Notes

Make

- "Azul" is usually marked on the firearm.
- "Azul" is Spanish for "Blue".
- "Azul" is a trade name used by Eulogio Arostegui, of Eibar, Spain.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "MM 31" is marked on the left side of the receiver/frame.
- "MM 31" stands for "Modelo Militar 1931".
- "MM 31" was available in four distinct variants.
- "MM 31 Third Variant" is a Spanish copy of the Mauser 712 "Schnellfeuerpistole", a selective-fire version of the C96 Mauser that can be used with an accessory buttstock/holster.
- "MM 31 Third Variant" only accepts the Spanish developed detachable box magazine.
- "MM 31 Third Variant" was produced from 1931 to 1932.
- features include: tapered barrel with integral inverted "V" front sight; ladder type rear sight; two piece manufactured barrel and slide; receiver/frame magazine well in front of the trigger guard; flat sided receiver/frame with rounded bottom grip frame and wood grip panels that originate the "Broomhandle" name; stock attaching slot at the rear of the grip; lanyard ring at the bottom of the grip; rear, left side safety lever and firing selector lever; magazine release on the right side ahead of the trigger guard; external hammer; bolt gripping ears at the rear of the slide; blued finish.
- overall length with a 140mm (5.5") barrel is 290mm (11.5"), average weight is 1.4kg (3lbs).

Manufacturer

- "Beistegui Hermanos" may or may not be marked on the firearm.
- "Beistegui Hermanos" used an overlaid "BH" within a circle monogram.
- "BH" is usually marked on the grip frame, underneath the grip panels.

Action

- recoil-operated.

Serial Number

- serial number is located at the rear of the receiver/frame above the grip.
- serial number is repeated in full or partially on other components.

Calibre

- calibre identification is usually marked on the front grip strap under the grip plate.

Shots

- detachable box magazine.

Notes

Make

- "B&T" over "APC" over "SWISS MADE" was observed marked on the left side of the lower receiver/frame.
- "B&T" is the trademark logo of Brugger & Thomet.

Model

- "B&T" over "APC" over "SWISS MADE" was observed marked on the left side of the lower receiver/frame.
- "APC" is the abbreviation for "Advanced Police Carbine".
- "APC" uses a two piece receiver/frame.
- features include: round rifled barrel with barrel lugs; synthetic upper receiver/frame with flip up battle sights, four integral picatinny equipment rails and right side ejection; synthetic lower receiver/frame with forward mounted magazine well, and pistol grip; synthetic right side folding buttstock; ambidextrous bolt handle, bolt release, magazine release and selector lever; black, desert, or OD finish.
- "APC" may be equipped with a sound suppressor.
- overall length with a 175 mm barrel and the stock in the closed/folded position is 385 mm.
- overall length with a 175 mm barrel and the stock in the extended position is 600 mm, and average weight is 2.5 kgs.

Manufacturer

- "B&T" over "APC" over "SWISS MADE" was observed marked on the left side of the lower receiver/frame.

Action

- blowback operated.
- selective fire.

Serial Number

- serial number was observed marked on the right side of the upper receiver/frame, on the bolt visible through the ejection port, on the barrel, and on the bottom rear of the magazine well on the lower receiver/frame.
- serial number observed consisted of a two letter prefix, two numbers, a dash (-), and four numbers.

Calibre

- calibre is marked on the bolt and is visible through the ejection opening.

Shots

- detachable box magzine.

Canadian Law Comments

- the Brugger & Thomet's serial number is marked on the right side of bolt/breech block and NOT on the receiver/frame.
- the Brugger & Thomet Operator's Manual identifies the receiver/frame as the lower synthetic assembly which consists of the main body, front handle, pistol grip and associated components.

Notes

Make

- "B&T" over "APC-G" over "SWISS MADE" is marked on the left side of the lower magazine/trigger mechanism assembly.
- "B&T" is the trademark logo of Brugger & Thomet.
- "B&T USA" office is located in Tampa, Florida U.S.A.

Model

- "APC-G SA" is marked on the left side of the trigger/magazine well lower assembly on the Canadian version.
- "APC-G" is marked on the left side of the trigger/magazine well lower assembly on the other produced version.
- "APC-G" is also sold as a trigger/magazine well lower assembly only.
- "APC-G" lower assembly is also a option for the APC9 and the GHM9 Brugger & Thomet models.
- "APC" stands for "Advanced Practical Carbine".
- "G" stands for "Glock" meaning the use of Glock pistol magazine.
- "SA" stands for "Semi-Automatic".
- "APC" has a two piece assembly, upper receiver/frame and lower trigger housing.
- features include: round rifled barrel with forward, optional three lug barrel accessory attachment; alloy upper receiver/frame with flip up battle sights; four accessory rails; right side ejection; synthetic lower trigger housing assembly; with forward mounted magazine well, and pistol grip; synthetic, right side folding or collapsible buttstock; ambidextrous bolt handle, bolt release, magazine release and safety lever; black or colour finish.
- overall length with a 175 mm (6.875") barrel is 404mm (15.875) with the stock in the folded and is 582 mm (22.875") in the unfolded position, the average weight is 2.8 kg (6.17 lbs).

Manufacturer

- "B&T" over "APC-G" over "SWISS MADE" is marked on the left side of the lower magazine/trigger mechanism assembly.
- "B&T" is the trademark logo of Brugger & Thomet.
- "B&T USA" office is located in Tampa, Florida U.S.A.

Action

- closed bolt, blowback operated.

Serial Number

- serial number is marked on the right side of the receiver/frame under the ejection port.
- serial number is also marked on the bolt visible through the ejection port.
- serial number of a referenced example consisted of a two letter prefix , two numbers, a dash and four or five numbers.

Calibre

- calibre designation is marked on the bolt, visible through the ejection port.
- 9MM LUGER rifling characteristics: 1 turn in 254mm (10 inches), right hand twist.

Shots

- detachable box magazine.
- use Glock pistol magazine.

Notes

Make

- "B&T" over "APC" over "SWISS MADE" was observed marked on the left side of the lower receiver/frame
- "B&T" is the trademark logo of Brugger & Thomet.

Model

- "APC-R" is not marked on the firearm.
- "B&T" over "APC" over "SWISS MADE" was observed marked on the left side of the lower receiver/frame.
- "APC" is the abbreviation for "Advanced Police Carbine".
- this firearm design incorporates a two-piece receiver.
- features include: round rifled barrel with barrel lugs; upper receiver with flip up battle sights, four integral picatinny equipment rails and right side ejection; synthetic lower receiver/frame with forward mounted magazine well, and pistol grip; synthetic right side folding buttstock; ambidextrous bolt handle, bolt release, magazine release and selector lever; black, desert, or OD finish.
- the "B&T, APC family of firearms " may be equipped with a sound suppressor.
- overall length with a 175 mm barrel and the stock in the closed/folded position is 385 mm.
- overall length with a 175 mm barrel and the stock in the extended position is 600 mm, and average weight is 2.5 kgs.

Manufacturer

- "B&T" over "APC" over "SWISS MADE" was observed marked on the left side of the lower receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- blowback operated.
Serial Number	- serial number was observed marked on the right side of the upper receiver/frame, on the bolt visible through the ejection port, on the barrel, and on the bottom rear of the magazine well on the lower receiver/frame. - observed serial numbers consisted of a two letter prefix, two numbers, a dash (-), and four numbers.
Calibre	- calibre is marked on the bolt and is visible through the ejection opening.
Shots	- detachable box magazine.
Canadian Law Comments	- this firearm design incorporates a two-piece receiver, the upper receiver is the master component for the receiver/frame for all purposes of the Criminal Code and The Firearms Act. - the APC-R design incorporates the receiver/frame of a full automatic firearm; namely the Brugger & Thomet, Model APC. - as it left the factory, this firearm may be equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada.

Notes

Make

- "B&T" over "APC" over "SWISS MADE" is marked on the left side of the receiver/frame.
- "B&T" is the trademark logo of Brugger & Thomet.

Model

- "APC 300" or "APC 300-SA" may be marked on the left side of the upper receiver/frame.
- "B&T" over "APC" over "SWISS MADE" is marked on the left side of the lower assembly.
- "APC" is the abbreviation for "Advanced Police Carbine".
- the Wolverine Supplies logo may be marked on the right side of the upper receiver/frame to the right of the ejection port.
- features include: flip up sights; round rifled barrel with threaded muzzle for attachments; flash hider; upper receiver/frame with integrated accessory rail for mounting optics; right side ejection; accessory rails mounted on the underside and on either side of the forend; synthetic lower with forward mounted magazine well, and pistol grip; synthetic right side folding and collapsible buttstock; ambidextrous bolt handle, bolt release, magazine release and selector lever; black finish.
- overall length with a 265 mm (10.43") barrel is 564 mm (22.20") with the stock in the folded position and 737mm (29. 02") with the stock in the extended position, average weight is 3.42 kg (7.54 lbs).
- overall length with a 477 mm (18.78") barrel is 775mm (30.51") with the stock in the folded position and 988mm (38.90") with the stock in the extended position.

Manufacturer

- "B&T" over "APC" over "SWISS MADE" is marked on the left side of the receiver/frame.

Action

- gas operated.

Serial Number

- alpha/numeric serial number is marked on the right side of the upper receiver/frame, on the bolt carrier visible through the ejection port, on the bolt head, on the barrel and on the bottom of the lower assembly, between the trigger guard and the magazine well.

Calibre

- calibre designation is marked on the bolt carrier, visible through the ejection port.
- rifling characteristics: 1 turn in 8 inch.

Shots

- detachable box magazine.

Canadian Law Comments

- this firearm design incorporates a upper and lower assembly.
- the upper assembly is the master component or "receiver/frame" for all administrative purposes of The Firearms Act.

Other Markings

- the Swiss Cross symbol is marked on the side of the receiver/frame.

Notes

Make

- "B&T" over "APC" over "SWISS MADE" was observed marked on the left side of the lower magazine/trigger mechanism assembly.
- "B&T USA" office is located in Tampa, Florida U.S.A..

Model

- "APC 9" or "APC" may be marked on the left side of the lower assembly, or the right side of the receiver/frame.
- "B&T" over "APC" over "SWISS MADE" is marked on the left side of the lower assembly.
- "APC" stands for "Advanced Practical Carbine".
- "APC" uses a two piece receiver/frame.
- Features include: round rifled barrel with forward, optional three lug barrel accessory attachment; alloy upper receiver/frame with flip up battle sights, four accessory rails and right side ejection; synthetic lower receiver/trigger housing with forward mounted magazine well, and pistol grip; synthetic, right side folding or collapsible buttstock; ambidextrous bolt handle, bolt release, magazine release and safety lever; black or colour finish.
- Overall length with a 175 mm (6.875") barrel is 404mm (15.875) with the stock in the folded and is 582 mm (22.875") in the unfolded position, the average weight is 2.8 kg (6.17 lbs).
- This firearm is available in different magazine configurations. The lower assembly can be changed to use magazines designed for the B&T TP9 series, Glock series or Sig P320 series firearms.

Manufacturer

- "B&T" over "APC" over "SWISS MADE" was observed marked on the left side of the lower magazine/trigger mechanism assembly.
- "B&T" is the trademark logo of Brugger & Thomet.
- "B&T USA" office is located in Tampa, Florida U.S.A..

Action

- Closed bolt, blowback operated.

Serial Number

- The serial number is marked on the right side of the receiver/frame under the ejection port.
- The serial number is also marked on the bolt visible through the ejection port.
- The serial number is also marked on a metal insert located at the rear underside of the magazine housing
- The serial number of a referenced example consisted of a two letter prefix, two numbers representing the year of manufacture, a dash and five numbers.

Calibre

- The calibre designation is marked on the bolt, visible through the ejection port.
- 9MM LUGER rifling characteristics: 1 turn in 254mm (10 inches), right hand twist.

Shots

- Detachable box magazine.

Notes

Make

- The company logo is marked on the firearm.
- "B&T" is marked on the firearm in various places.
- Trade name used by B&T AG.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- Introduced in 2018. - Based on the "APC9" design. - The model designation is usually marked on the right side of the receiver/frame. - May also be known as "APC9 SD G". - May also be known as "APC9 SD Pro". - May also be known as "APC9 SD Pro G". - This is a features-driven firearm with multiple combinations of upper and lower receivers. - Features include: Two-piece, split-receiver design retained by front and rear push pins; extruded aluminum upper receiver with integrated accessory rail; modular handguard with accessory rail; ported barrel with integral suppressor; right side ejection; fixed, reciprocating charging handle; rotary safety located above the pistol grip; injection molded polymer lower receiver with integral pistol grip; ambidextrous bolt release button and magazine release; sling loops. - Features may include: Various suppressor lengths; telescopic and/or side-folding butt stocks. - "APC9 SD G" features: Shrouded magazine release; swept-back magazine well to accept Glock-style magazines. - "APC9 SD Pro" features: Folding, non-reciprocating charging handle; interchangeable pistol grip; extended bolt lock and release lever. - "APC9 SD Pro G" features: Shrouded magazine release; swept-back magazine well to accept Glock-style magazines; folding, non-reciprocating charging handle; interchangeable pistol grip; extended bolt lock and release lever.
Manufacturer	- The company logo is marked on the firearm. - "B&T" is marked on the firearm in various places. - Trade name used by B&T AG.
Action	- Blowback operated.
Serial Number	- The serial number is marked on the right side of the firearm. - Observed serial numbers consisted of a two (2) letter country prefix, a two (2) digit year code, followed by a dash and five (5) digits.
Barrel	- The barrel length does not include any attached device such as flash-hider or muzzle brake.
Calibre	- The calibre designation is marked on the right side of the firearm.
Shots	- Detachable box magazine. - This firearm features interchangeable lower receivers allowing for the use of both B&T and Glock pattern magazines.
Canadian Law Comments	- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm remains a "Prohibited Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), when removed will not change the "Prohibited Firearm" classification.
Other Markings	- Serial numbers may be marked on the suppressor.

Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
148222 - 1	338 LAPUA MAG	10	685	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "B&T" stands for "Brugger & Thomet".
- The company logo is marked on the firearm.
- "B&T AG Switzerland" is marked on the right side of the receiver/frame.

Model

- "APR338" is marked on the left side of the receiver/frame.
- "APR338" stands for "Advanced Precision Rifle" and "338" for it calibre, ".338 Lapua Magnum".
- Features include: fluted forged steel heavy contour barrel with muzzle brake; two piece receiver/frame, the upper receiver/frame consists of the locking ring; three lug bolt assembly and has an integral optical base; the lower receiver/frame consists of the ambidextrous manual safety, box magazine housing, adjustable trigger group, forend and bipod assembly; ergonomic and adjustable folding stock.

Manufacturer

- "B&T" stands for "Brugger & Thomet".
- The company logo is marked on the firearm.
- "B&T AG Switzerland" is marked on the right side of the receiver/frame.
- "B&T" is located in Thun, Switzerland.
- "B&T" specializes in the production of small arms, sound suppressors, weapon upgrades systems and accessories.
- "B&T" was founded in 1991.

Action

- Turn bolt operated.

Serial Number

- The serial number is marked on the right side of the receiver/frame.
- Serial number of referenced examples consisted of a two letter prefix, two numbers, a dash and four numbers.
- The two letter prefix identifies the country of importation, "CA" for Canada, "US" for the United States of America.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- The calibre designation is marked on the right side of the receiver/frame. - The calibre designation is marked on the barrel assembly.
Shots	- Detachable box magazine.
Canadian Law Comments	- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

Notes

Make

- The company logo is marked on the firearm.
- "B&T" is the trademark logo of Brügger & Thomet.
- "B&T USA" office is located in Tampa, Florida U.S.A.

Model

- "GHM9" is marked on the right side of the receiver/frame.
- "B&T" over "SWISS MADE" over "320" is marked on the left side of the trigger housing.
- The "320" trigger housing permit the use of SIG Sauer P320 pistol magazine.
- Features include: barrel with threaded muzzle or optional three lug barrel accessory attachment; alloy upper receiver/frame, two integral accessory rails located at the top and bottom and two removable accessory rails on the left and the right side of the receiver/frame, ambidextrous charging handle; synthetic lower trigger housing with forward mounted magazine well, and removable pistol grip; black synthetic, right side folding or collapsible buttstock; ambidextrous bolt release, magazine release and safety lever.
- Overall length with a 179mm (7.04") barrel is 435mm (17.12") with the stock in the folded position and is 629mm (24.76") in the open position.

Manufacturer

- The company logo is marked on the firearm.
- "B&T" is the trademark logo of Brügger & Thomet.
- "B&T USA" office is located in Tampa, Florida U.S.A.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- Blowback operated.
Serial Number	- The serial number is marked on the right side of the receiver/frame. - The serial number of referenced examples consisted of a two letter for the country of importation (CA, US), two numbers, for the year of manufacture, a dash and four or five numbers.
Calibre	- The calibre designation is marked on the right side of the receiver/frame.
Shots	- Designed to accept SIG P320 type magazines.
Canadian Law Comments	- In the case of this firearm, it has been determined that the component commonly referred to as the upper receiver assembly, into which the barrel is mounted and which contains the breech mechanism and upon which the manufacturer's identification, model identification, proof information, and the full serial number is marked, is the receiver/frame for the purposes stated within the Firearms Act and the Criminal Code of Canada.

FRT Report

Firearm Reference Number (FRN): 128083
Make: B&T
Model: GL06

Summary

Make:	B&T
Model:	GL06
Manufacturer:	Brugger & Thomet (B&T)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Grenade Launcher
Action:	Single-Shot
Country of Manufacturer:	SWITZERLAND
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
128083 - 2	40X46MM	1	200	Prohibited PFR, Part 1, para. 95(z.003)	Manufacturer Specifications and Commercial Customization	
128083 - 1	40X46MM	1	280	Prohibited PFR, Part 1, para. 95(z.003)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "B&T" is marked on both sides of the firearm.
- "B&T AG Switzerland" is marked on the right side of the firearm.
- The company logo is marked on the firearm.
- The logo consists of "B&T" written next to half a circle.

Model

- "GL-06" is marked on the left side of the firearm.
- Features include: barrel with integral, top accessory rail; front hinged receiver/frame with break open ambidextrous release lever located at the front of the trigger guard; with or without cross bolt safety; adjustable peep rear sight; accessory rail mounted on the bottom and sides of the forend; side folding or collapsible stock; double action only trigger mechanism.
- Overall length with a 280 mm (11 inches) barrel is 383 mm (15.1 inches) with the stock collapsed, average weight is 2.2 kg (4.9 lbs).

Manufacturer

- "B&T AG Switzerland" is marked on the right side of the firearm.
- The company logo is marked on the firearm.
- The logo consists of "B&T" written next to half a circle.

Action

- Hinged barrel design.

Serial Number

- serial number is located on the right side of the receiver/frame.
- observed specimen had a letter "C" prefix followed by six numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- The calibre designation is marked on the barrel assembly. - Rifling characteristics in calibre 40x46mm: 12 grooves, 1 turn in 47.2 inches, right hand twist.
Canadian Law Comments	- This model meets the definition of firearm in the Criminal Code of Canada S.2. This model may be regulated by other Federal Acts such as the Export and Import Permits Act (EIPA) and the Defence Production Act.

Notes

Make

- "B&T" logo beside the model designation "KH9" and the serial numbner was observed marked on the right side of the receiver/frame below the ejection port.
- swiss cross in a circle logo was observed on the right side of the receiver/frame behind the ejection port.
-"B&T" is the trademark logo of Brugger & Thomet.

Model

- blowback operated semi-automatic, striker fired, closed bolt design carbine.
- the B&T KH9 utilizes a distinctive double action/single action trigger design that incorporates an ambidextrous de-cocking lever that functions as a drop safety providing a heavy double action trigger pull for the first round as the only safety mechanism to prevent accidental discharges.
- features include: round rifled barrel; square alloy metal receiver/frame with flip up sights; forward mounted polymer magazine well with ambidextrous magazine release; right side ejection; integral accessory rails located along the top of the receiver/frame and four sides of the fore end; alloy metal trigger housing; polymer pistol grip; removable fore end hand stop; synthetic right side folding buttstock; charging handle and bolt stop button located on the top of the receiver/frame; black OD finish.
- a conversion kit is available to replace the polymer magazine housing with a magazine housing that accepts Suomi, Model M31/CH MP43/44 50 round four column "casket" style magazines.
- overall length with a 477 mm (18.8") barrel and the stock in the closed/folded position is 727 mm (28.6").

Manufacturer

- "B&T" logo beside the model designation "KH9" and serial numbner was observed marked on the right side of the receiver/frame below the ejection port.
- swiss cross in a circle logo was observed on the right side of the receiver/frame behind the ejection port.

Action

- blowback operated.

Serial Number

- observed serial number consisted of "CA" followed by a space, two numbers, a dash and then three numbers.

Shots

- detachable box magazine.
- a conversion kit is available to replace the polymer magazine housing with a magazine housing that accepts Suomi, Model M31/CH MP43/44 50 round four column "casket" style magazines.

Notes

Make

- "MfG Brugger & Thomet AG" and "BT-401000" was observed marked on the handguard assembly.
- "Brugger & Thomet", the "B&T" logo or a variation thereof may appear on the upper and/or lower receivers of this firearm.

Model

- "MP 5" was observed marked on the top of the receiver/frame.
- production ceased in 2006.
- this is a select fire submachine gun.
- this MP5 submachine gun was available in with a wide assortment of accessories/variations, however the model designation of MP5 is consistent regardless of the stock type or trigger mechanism differences, i.e. folding or telescoping stocks, three-round burst etc.
- features include: roller locking delayed blowback design; detachable box magazine.

Manufacturer

- "Brugger & Thomet AG" was founded in 1992 by Karl Brugger and Heinrich Thomet.
- "Brugger & Thomet AG" is located in Thun, Switzerland.
- "Brugger & Thomet AG" specializes in the field of weapons technology and defence related products.
- "B&T" or "B+T" are trademarks used by "Brugger & Thomet AG"
- Brugger & Thomet AG purchased MP5 receiver/frames in the white from Makina ve Kimya Endustrisi (MKE) of Turkey and finished and assembled the firearm with components from Germany and Switzerland.

Action

- roller-locked delayed blowback.

Serial Number

- observed serial number was marked on the top of the receiver/frame.
- observed serial number had six digits without a letter prefix or suffix, example "06-####".

Calibre

- "Cal. 9mm x 19" is marked on the left side of the magazine housing of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make	- "B&T" over "P26" over "SWISS MADE" was observed marked on the left side of the lower receiver/frame - "B&T" is the trademark logo of Brugger & Thomet.
Model	- "P26" was observed marked on the left side of the lower receiver/frame. - features include; hammer fired (not an advanced-primer ignition system); "forced air cooling system" (breech bolt pushes air across the barrel for cooling much like an air pump), this cooling system reduces the possibility of a "cook-off" due to rapid fire and high accumulated temperatures; common parts of the mechanism interchange with other Brugger & Thomet firearm models (such as the B&T, APC family of firearms models). - also marketed as a pistol.
Manufacturer	- "B&T" over "P26" over "SWISS MADE" was observed marked on the left side of the lower receiver/frame
Action	- blowback operated.
Serial Number	- serial number is marked on the lower assembly. - serial number rationalization: two letters (CA), a dash (-), "15", a dash (-) and four numbers.
Shots	- detachable box magazine.
Canadian Law Comments	- The "B&T Model P26" lower receiver is considered to be the receiver/frame for all purposes of the Criminal Code of Canada and the regulatory purposes of The Firearms Act.

Notes

Make

- The make is marked on the right side of the receiver/frame.
- "B&T" is the trademark logo of Brugger & Thomet.
- "Brugger & Thomet" is located in Thun, canton of Berne, Switzerland.

Model

- Introduced in 2020.
- "SPC" is marked on the sides of the receiver/frame.
- "SPC" stands for "Special Purpose Carbine".
- Magazine release located on the side of the firearm.
- Features include: may have a three lugs muzzle attachment point; handguard with integral top and bottom accessory rail with rail anchor points on both side; flat top receiver/frame assembly with integral accessory rail; front, left side, non-reciprocating and foldable bolt handle and rear AR-15 type cocking handle; ambidextrous safety lever; buttstock with internal hydraulic buffer; collapsible buttstock.
- Overall length with a 152 mm (6 inches) barrel is 450 mm (17.75 inches) with the stock collapsed.
- Overall length with a 152 mm (6 inches) barrel is 585 mm (23 inches) with the stock extended.

Manufacturer

- The company logo is marked on the receiver/frame.
- "B&T" is the trademark logo of Brugger & Thomet.

- "B&T" was founded in 1991 by Karl Brügger and Heinrich Thomet.
- "Brugger & Thomet" is located in Thun, canton of Berne, Switzerland.
- "B&T USA" office is located in Tampa, Florida U.S.A..

Action

- Close bolt, blowback action.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- The serial number is marked on the right side of the receiver/frame. - The serial number can be found on the receiver/frame and the lower receiver of the firearm.
Calibre	- The calibre designation is marked on the right side of the receiver/frame.
Shots	- Detachable box magazine. - Introduced in 2020 with a 10, 15, 20, 25 and 30 shot detachable cartridge magazine. - "Brügger & Thomet SPC9" is available with lower assembly using B&T, Glock or Sig P320 magazines.
Canadian Law Comments	- In the case of this firearm, it has been determined that the component commonly referred to as the upper receiver assembly, into which the barrel is mounted and which contains the breech mechanism and upon which the manufacturer's identification, model identification, proof information, and the full serial number is marked, is the receiver/frame for the purposes stated within the Firearms Act and the Criminal Code of Canada.

Notes

Make

- The company logo is marked on the receiver/frame.
- "B&T" is the trademark logo of Brugger & Thomet.

Model

- "SPC" is marked on both sides of the receiver/frame.
- "SPC9 SD" is an integrally suppressed version of the "SPC9".
- "SPC" stands for "Special Purpose Carbine".
- "SD" stands for "Suppressed".
- Features include: flat top receiver/frame assembly with integral accessory rail; front, left side, non-reciprocating and foldable bolt handle and rear AR-15 type cocking handle; ambidextrous safety lever; magazine release located on the right side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- The company logo is marked on the receiver/frame. - "B&T" is the trademark logo of Brugger & Thomet.
Action	- Close bolt, blowback action.
Serial Number	- The serial number is marked on the right side of the receiver/frame. - The serial number of referenced examples consisted of a two letter for the country of importation (CA, US), two numbers, for the year of manufacture, a dash and four or five numbers.
Calibre	- The calibre designation is marked on the right side of the receiver/frame. - The calibre designation is marked on the barrel, visible through the ejection port.
Shots	- Detachable box magazine. - "SPC9" use the proprietary B&T MP9/TP9 submachine gun magazine. - "SPC9" is available with different trigger housing that has magazine well for the use of B&T TP9, Glock or Sig 320 magazines.
Canadian Law Comments	- In the case of this firearm, it has been determined that the component commonly referred to as the upper receiver assembly, into which the barrel is mounted and which contains the breech mechanism and upon which the manufacturer's identification, model identification, proof information, and the full serial number is marked, is the receiver/frame for the purposes stated within the Firearms Act and the Criminal Code of Canada. - This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm remains a "Prohibited Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), when removed will not change the "Prohibited Firearm" classification.

Notes

Make

- "B&T" was observed marked on the left side of the receiver/frame.
- "Brugger & Thomet" and "Switzerland" were observed marked on the right side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "SPR 300" is marked on the right side of the stock. - "SPR" stands for "Special Police Rifle". - "SPR 300" is a bolt-action rifle that comes from the factory with an integral suppressor. - "SPR 300" is a quick takedown rifle that strips into components fitting in a briefcase size bag. - features include: integrally-suppressed barrel; removable suppressor that is threading on the barrel at the chamber end; drilled and tapped receiver/frame for scope rail with right ejection port; bolt release lever on the rear, left side of the receiver/frame; barrel with barrel extension locking in the receiver/frame by the mean of two screws at the front, bottom of the receiver/frame; three lug bolt assembly locking into the barrel extension with cocking indicator; aluminum chassis housing the receiver/frame, a forward handguard mounted saddle with rails, bottom mounted rail or front attachment point for a bipod assembly; synthetic pistol grip; right side of the rear tang safety lever; adjustable, side folding stock with adjustable cheek rest; black or Coyote tan stock with black barreled action. - overall length with a 250mm (9.875") barrel with the collapsed stock is 972mm (38.25") and with the stock side folded is 761mm (30"), average weight is 3.95 kg (8.7lbs).
Manufacturer	- "B&T" was observed marked on the left side of the receiver/frame. - "Brugger & Thomet" and "Switzerland" were observed marked on the right side of the receiver/frame.
Action	- turn-bolt design.
Serial Number	- serial number is marked on the left side of the receiver/frame. - serial number of referenced examples consisted of two numbers, a dash and four numbers.
Calibre	- calibre identification is marked on the right side of the stock. - calibre identification is also usually marked on the barrel. - 300 WHISPER rifling characteristics: 1 turn in 8 inches, right hand twist.
Shots	- detachable box magazine. - uses SIG 550 - type magazines.
Canadian Law Comments	- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

Notes

Make

- "B&T Brugger + Thomet AG" is marked on the left side of the firearm.
- "SWISS MADE" is marked on the right side of the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "TP9" may be marked on the left side of the firearm and/or on the side of the bolt. - "TP9" is a semi-automatic only version of the Brugger & Thomet "MP9" submachine gun. - features include: synthetic receiver/frame with a fixed forward handgrip and side folding buttstock; double trigger safety; adjustable sight; picatinny rail on the top cover. - "TP9" may be equipped with a sound suppressor. - overall length with a 130 mm barrel is 523 mm with the stock extended or 303 mm with the stock closed. - overall weight without the magazine is 1.4 kgs.
Manufacturer	- "B&T Brugger + Thomet AG" is marked on the left side of the firearm. - "SWISS MADE" is marked on the right side of the firearm.
Action	- blowback operated.
Serial Number	- the sample examined had a serial number marked on the left side of the "U" shaped steel insert block at the forward end of the receiver/frame and is not visible without field stripping the firearm. The serial number is repeated on the bolt and is visible through the ejection opening. - observed sample had a letter prefix of "SA" followed by two numbers and a dash and followed by the sequential numbers, e.g.: "SA 04-###".
Calibre	- calibre designation is marked on the bolt and is visible through the ejection opening.
Shots	- detachable box magazine.
Canadian Law Comments	- the Brugger & Thomet's serial number is marked on the right side of bolt/breech block and NOT on the receiver/frame (2004/10/07). - the Brugger & Thomet Operator's Manual identifies the receiver/frame as the lower synthetic assembly which consists of the main body, front handle, pistol grip and associated components.

Notes

Make

- "B&T Brugger + Thomet AG" is marked on the left side of the firearm.
- "SWISS MADE" is marked on the right side of the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "TP9 CANADA" will be marked on the left side of the firearm and/or on the side of the bolt. - "TP9 CANADA" is a semi-automatic version of the TP9 model. - "TP9 CANADA" is modernized by the addition of a front receiver accessory rail, with the folding stock removed and all of the catches, springs and parts required to function a folding stock, removed. - "TP9" is a semi-automatic only version of the Brugger & Thomet "MP9" submachine gun. - features include: synthetic receiver/frame with a receiver accessory rail; double trigger safety; adjustable sight; picatinny rail on the top cover. - "TP9" may be equipped with a sound suppressor. - overall length with a 130 mm barrel is 303 mm, and average weight without a magazine is 1.4 kgs.
Manufacturer	- "B&T Brugger + Thomet AG" is marked on the left side of the firearm. - "SWISS MADE" is marked on the right side of the firearm.
Action	- blowback operated.
Serial Number	- the sample examined had a serial number marked on the left side of the "U" shaped steel insert block at the forward end of the receiver/frame and is not visible without field stripping the firearm. The serial number is repeated on the bolt and is visible through the ejection opening. NOTE: the serial number for record is located on the interior of the receiver/frame. - an observed sample had a letter prefix of "SA" followed by two numbers followed by a dash, followed by four digits, eg: "SA 07-XXXX.
Calibre	- marked on the barrel, visible through the ejection port.
Shots	- detachable box magzine.
Importer	- marked on the right side.
Other Markings	- the United States of America importer markings may be found moulded into the receiver/frame on the right rear. - markings to DS Arms Inc., Lake Barrington IL have been observed followed by the DSA logo.
Remarks	- the Brugger & Thomet Operator's Manual identifies the receiver/frame as the lower synthetic assembly which consists of the main body, front handle, pistol grip and associated components.

Notes

Make

- "B&T" and "SWISS MADE" is usually marked on the receiver/frame.
- "B&T" is the trademark logo of Brugger & Thomet.

Model

- "USW-A1" may be marked on the receiver/frame.
- "USW" stands for "Universal Service Weapon".
- "USW-A1" is produced with Sphinx 3000 pistol parts and is a Swiss-made version of the CZ-75 pistol.
- "USW-A1" features an integral folding stock, optical sight and accessory rail on the receiver/frame.
- features include: threaded barrel extending from the slide; flared, front serrated slide; right side external extractor and ejection; alloy receiver/frame with integral accessory rail; folding stock and optical sight mounted on a rear trunnion; ambidextrous magazine and slide release levers; double-action/single-action trigger mechanism; synthetic grip panels; black finish.
- overall length with a 106mm (4.175") barrel is 253mm (10") with the stock folded and 468mm (18.375") with the stock unfolded, average weight is 1.16 kg (2.55lbs) empty.

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the right side of the receiver/frame. - serial number is also usually marked on the slide and barrel.
Calibre	- calibre designation is marked on the barrel, visible through the ejection port.
Shots	- detachable box magazine.
Canadian Law Comments	- The "USW-A1" is a B&T version of the Sphinx pistols which have a separated lower grip frame. For all purposes of the Criminal Code and the Firearms Act the receiver/frame of this firearm is the "upper frame" or the main central component to which the slide and barrel, and this grip frame are attached.

Notes

Make

- "B&T" in logo form is usually marked on both side of the firearm.

- "B&T" stands for "Brugger & Thomet AG".
- "Swiss Made" is marked on the right side of the receiver/frame.

Model

- "USW-P" is marked on the right side of the receiver/frame.
- "USW-P" stands for "Universal Service Weapon - Pistol".
- Features include: unthreaded or threaded barrel; front and rear serrated slide; right side external extractor and ejection; two piece aluminum alloy and polymer receiver/frame with integral accessory rail; ambidextrous slide release levers; reversible magazine releases; trigger with integral mechanical safety lever.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "B&T" in logo form is usually marked on both side of the firearm. - "B&T" stands for "Brugger & Thomet AG". - "Brugger & Thomet AG" is located in Thun, Switzerland.
Action	- Recoil operated.
Serial Number	- The serial number is marked on the right side of the receiver/frame. - The serial number of a referenced example consisted of a two letter prefix, a space two numbers, a dash and four numbers.
Calibre	- The calibre designation is marked on the barrel, visible through the ejection port. - The calibre designation is marked on the right side of the receiver/frame.
Shots	- Detachable box magazine housed in the grip. - "USW-P" pistol uses the same magazines as its USW-A1 and USW-SF.
Canadian Law Comments	- The "USW-P" is a B&T version of the Sphinx pistols which have a separated lower grip frame. For all purposes of the Criminal Code and the Firearms Act the receiver/frame of this firearm is the "upper frame" or the main central component to which the slide and barrel, and this grip frame are attached.

- "B&T" and "VP9" over "SWISS MADE" was observed marked on the left side of the lower receiver/frame.

Action

- each round has to be chambered and cocked by turning a large round knob at the rear of the action.

Serial Number

- serial number observed was marked on the right side of the receiver/frame.
- serial number observed consisted of a two letter "CA" prefix, a space, two number (last two digit of the year of manufacture), a dash (-), and four numbers.

Shots

- detachable box magazine.

Canadian Law Comments

- as it left the factory, this firearm is equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada.

FRT Report

Firearm Reference Number (FRN): 120916
Make: B-West
Model: AK47S

Summary

Make:	B-West
Model:	AK47S
Manufacturer:	
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
120916 - 1	7.62X39 RUSSIAN	5	416	Prohibited PFR, Part 1, para. 64	Non-Commercial Customization	

Notes

Make	- "B-WEST TUCSON, AZ", "AK47S 7.62X39MM" and "MADE IN USA" are marked on the left side of the receiver/frame. - B-West Imports is currently located in Tucson, Arizona, USA.
Model	- "B-WEST TUCSON, AZ", "AK47S 7.62X39MM" and "MADE IN USA" are marked on the left side of the receiver/frame. - this model is an adaptation of the AKM. - features include: fixed wood stock, handguard and pistol grip; magazine release ahead of the trigger guard; sling swivels.
Action	- gas operated.
Serial Number	- serial number is marked on the right side of the receiver/frame.
Barrel	- barrel has attached flash hider / muzzle brake, which is not included in the measured barrel length.
Calibre	- calibre designation is marked on the left side of the receiver/frame.
Shots	- detachable box magazine.
Other Markings	- "MADE IN USA" is marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- a modernized version of the AK47, it entered production in 1959.
- it replaced the forged steel receiver/frame of the AK47 with a stamped and pressed steel receiver/frame employing simplified construction and material requirements.
- the AKM series of weapons have several visual distinguishing characteristics which set it apart from the standard AK47.
- the main differences are:
- small recess in each side of the receiver/frame is located centrally over the magazine to serve as a guide for magazine loading/unloading.
- the lower handguard may be grooved, or in the case of the Hungarian or Rumanian versions replaced by a metal cover and plastic handgrip, or fitted with a wooden forend/handgrip unit.
- the receiver cover has stamped, transverse (perpendicular to the bore) ribs.
- the four gas escape holes on each side of the gas cylinder are not present (however, AK47 gas-cylinder assemblies may be found mounted as these parts are generally interchangeable).
- the rear sight arrangement is graduated to 1000m instead of 800m, except in the case of certain Hungarian variants.
- a small compensator is fitted to the muzzle (this compensator is of an angled-cut configuration).
- the wide production, proliferation, and supply of this weapon to various groups and nations worldwide means that numerous variances in furniture, finish, markings, accessories, etc may be encountered.
- stock configurations may include folding buttstocks of skeleton style, mono-tube construction, underfolders, side folders, etc.
- grip profiles for forearm or pistol grips may also differ between national arsenals.

146466 - 1	52 PERCUSSION	1	686	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "M. BABCOCK" is marked on the hammer.

Model

- manufactured prior to 1874.
- model designation is not marked on the firearm.
- this is one of several styles of cane gun manufactured by Babcock, with a concealed trigger that drops when the flat hammer is cocked.
- features include: various lengths of barrel/shaft; an iron barrel which may be contained inside a wooden or cane shaft OR may simply be painted in a woodgrain finish; and a perpendicular wooden grip.

Manufacturer

- "M. BABCOCK" is marked on the hammer.
- Moses Babcock was located in Charlestown, Massachusetts, U.S.A. from 1849 to 1873.
- Moses Babcock specialized in producing underhammer pistols.

Action

- muzzle-loaded, percussion, single-shot.

Notes

Make

- "BACON MFG CO, NORWICH CONN." is marked on the barrel.

Model

- manufactured from the late 1850s to circa 1867.
- this is a single action percussion revolver with an open top receiver/frame and a traditional trigger guard.
- features include: fixed sights; round or octagonal barrel with rammer/loading lever; open top receiver/frame with a removable fluted or round cylinder; exposed spurred hammer; single action trigger mechanism; rounded trigger guard; flat bottom grip strap; wood grips; blued finish; plain or engraved barrel, cylinder and receiver/frame.
- Bacon Manufacturing Company model Pocket Percussion Revolver bears a strong resemblance to a "Manhattan" model Pocket Percussion Revolver.
- Bacon had worked for Manhattan before forming his own company.
- Bacon Manufacturing Company model Pocket Percussion Revolver was also sold under the names of Fitch & Waldo, B. J. Hart & Bro., Tomes Son & Melvain, Union Arms Company, and Western Arms Company.

Serial Number

- progressive numbers starting with number one.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- barrels marked "BACON MFG. CO. - NORWICH, CONN. DEPOT 297 BROADWAY, N.Y."
- retailer markings include; Fitch & Waldo, N.Y.; B.J.Hart & Bro. New York; Tomes Son & Melvain, N.Y.; Union Arms Co., N.Y.; Western Arms Co. New York; Western Arms Co. Chicago, Ill.

Remarks

- Total production of this model is approximately 3300 examples broken into production marked Bacon Mfg Co about 1400 specimens and production for other firms totalling approximately 1900 specimens.
- Bacon manufactured for several other firms as follows: - Fitch & Waldo (approx 100 examples), B J Hart & Bro, NY (approximately 600 examples), Tomes, Melvain & Co (approximately 100 examples) NY, and Western Arms Co (approximately 400 examples).
- Bacon was bought-out by Hopkins & Allen in 1867 with production of this revolver continuing under the Hopkins & Allen name for approximately 250 additional examples.

Notes

Make

- make usually marked on top of barrel as:
"BACON MFG. CO. NORWICH, CONN.".
- examples are occasionally seen that are completely unmarked.

Model

- model is not marked on the firearm.
- this is a small square butt derringer with a side pivoting barrel, built by the Bacon Arms Company during the early 1860s.
- most examples known have iron frames and barrels, but some have been seen with a brass frame and an iron barrel.
- octagonal barrel, spur trigger, walnut grip panels, and made in at least three distinct variations; a version with a "lip" off of the bottom of the barrel that extends into the standing breech, a "flush breech" version built on a slightly smaller frame, and a brass framed version with a dovetail off of the standing breech that fits into a mortise on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the Bacon Arms Company manufactured a number of metallic cartridge spur trigger handguns and a side hammer single shot shotgun.
Action	- single-shot pistol with side pivoting barrel.
Serial Number	- serial number is marked on the bottom of the barrel.
Other Markings	- barrel marked "BACON MFG. CO. NORWICH, CONN."

Notes

Make

- make is marked on the pepperbox.

Model

- estimated production of 200.
- produced prior to 1857.
- features include: no sights; ribbed or fluted barrel cluster; floral engraved receiver/frame; percussion ignition; single exposed trigger without trigger guard; single action trigger mechanism; walnut grips; blued finish.
- the underhammer has a forward-projecting trigger-like spur extension that is used to assist in the cocking of the hammer; this gives the pistol the appearance of having two triggers.

Manufacturer

- "BACON & CO" is usually marked on the pistol.

Action

- muzzle loading, percussion ignition.
- rotating barrel cluster.

Serial Number

- usually marked on the receiver/frame/barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - calibre designation is not marked on the firearm.

Other Markings - marked: "BACON & CO., NORWICH C-T" and possibly "CAST STEEL"

Notes

Make

- "Baikal" was a trade name used by a consortium of various Soviet Union (USSR) Arsenals for production of sporting firearms for the domestic and export markets.
- "Baikal" trade name/trademark is currently used by Izhevsky Mekhanichesky Zavod (Izhmech) for production of sporting firearms.

Model

- this is a single shot, top break, under lever shotgun similar to the IJ-18.
- model designation and country of manufacture (U.S.S.R.) appear on the receiver/frame.
- model designation may have Russian cyrillic characters that appear as a reversed "N" and 2 K's that are back-to-back preceeding the "-17"
- receiver/frame is usually found with engraved scenes on it, there are several variations in these scenes.

Manufacturer

- one of the symbols/identifier marks (an arrow in a shield) used by the arsenal at Izhevsk will usually be found on the receiver/frame.
- the receiver/frame or barrel assembly may also be marked "Made in USSR".

Serial Number

- samples have been noted with the serial number marked on the receiver/frame or on the break open lever.

Calibre

- gauge may be marked on the top of the barrel; example "12" in a circle.

Notes

Make

- "Baikal" was a trade name used by a consortium of various Soviet Union (USSR) Arsenals for production of sporting firearms for the domestic and export markets.
- "Baikal" trade name/trademark is currently used by Izhevsky Mekhanichesky Zavod (Izhmech) for production of sporting firearms.

Model

- this is a single shot top break under lever shotgun, trigger guard is the operating lever.
- model designation will usually be found on the side of the receiver/frame, depending on the intended market the model designation may be marked as "IJ-18" or have cyrilic characters that appear as an "N" that is reversed and two "K's" that are back to back and then "-18".

Manufacturer

- one of the symbols/identifier marks (an arrow in a shield) used by the arsenal at Izhevsk will usually be found on the receiver/frame and/or barrel.
- the receiver/frame or barrel assembly will usually be marked "Made in USSR".

Action

- hinged barrel design.

Serial Number

- alpha numeric serial number rationalization unknown, samples have been noted with the serial number marked on the opening lever or barrel hook.

Calibre

- a complete or partial calibre designation is usually marked on the barrel assembly.

Other Markings

- model designation and country of manufacture (.U.S.S.R.) appear on the receiver/frame.
- receiver is usually found with engraved scenes on it, there are several variations in these scenes.

Notes

Make

- "Baikal" may be molded into the butt plate.
- "Baikal" was a trade name used by a consortium of various Soviet Union (USSR) Arsenals for production of sporting firearms for the domestic and export markets.
- "Baikal" trade name/trademark is currently used by Izhevsky Mekhanichesky Zavod (Izhmech) for production of sporting firearms.

Model

- the model designation may appear in Russian cyrillic characters as an inversed N,and two K's back to back, preceeding the model number or as "IJ 18-E" on the underside or side of the receiver/frame.
- single shot, top break (part of the trigger guard serves as the opening lever).
- automatic ejectors which is the feature that differentiates it from the model IJ-18.

Manufacturer

- Izhevsk's logo of an arrow in a shield is molded into the butt plate and marked on the top of the barrel.
- "MADE IN USSR" is marked on the right side of the receiver/frame.

Action

- break open design.

Notes

Make

- "Baikal" was a trade name used by a consortium of various Soviet Union (USSR) Arsenals for production of sporting firearms for the domestic and export markets.
- "Baikal" trade name/trademark is currently used by Izhevsky Mekhanichesky Zavod (Izhmech) for production of sporting firearms.

Model

- "MODEL IJ-18EM" is usually marked on the left side of the receiver/frame.
- the alpha portion of the designation may appear as a reversed "N" and two letter "K's", back to back, one facing left and one right (this translates to "IJ").
- features include: blued barrel; front bead sight; chromed bore; cross bolt safety; ejectors; cocking indicator; blued finish; walnut stained hardwood stock and forearm.
- some variations may have an external hammer and no cocking indicator.
- the opening lever is located on the trigger guard.

Manufacturer

- a manufacturer's symbol may marked on the barrel flats.
- "MADE IN USSR" or "MADE IN RUSSIA" may be marked on the right side of the receiver/frame.

Action

- break open action.

Serial Number

- serial number is marked on the water table and may be repeated on the bottom of the barrel and may have a Cyrillic letter prefix.

Notes

Make

- "Baikal" may be marked on the butt plate.
- "Baikal" was a trade name used by a consortium of various Soviet Union (USSR) Arsenals for production of sporting firearms for the domestic and export markets.
- "Baikal" trade name/trademark is currently used by Izhevsky Mekhanichesky Zavod (Izhmech) for production of sporting firearms.

Model

- model designation is found on the circular resin medallions found on both sides of the stock above the wrist which bears the Izhevsk logo in the center, and marked: IJ22 MADE IN USSR
- features include: top break-open barrel for loading and cocking; spring detent barrel closure; rifled brass barrel insert; two millimeter recessed muzzle; one piece pistol-gripped schnabel-tipped beechwood stock with plastic butt plate and pistol grip cap; machined steel trigger; rear leaf sight and blade front sight.

Manufacturer

- marked with the logo of the Russian State Arsenal, Izhevsk, which is comprised of an upright elongated flat-topped shield with cutout corners, and a rounded bottom; containing an upright fletched arrow.

Action

- hinged barrel cocking, spring powered air rifle.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- marked on the left side of the barrel monoblock, example: C 4321

Calibre

- not marked with calibre designation.

FRT Report

Firearm Reference Number (FRN): 117340
Make: Baikal
Model: IJ-27M

Summary

Make:	Baikal
Model:	IJ-27M
Manufacturer:	Russian State Arsenals
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Multi-Barrel
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
117340 - 1	12 GA X 2 3/4"	2	725	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "BAIKAL" may be marked on the butt plate.
- "Baikal" was a trade name used by a consortium of various Soviet Union (USSR) Arsenals for production of sporting firearms for the domestic and export markets.
- "Baikal" trade name/trademark is currently used by Izhevsky Mekhanichesky Zavod (Izhmech) for production of sporting firearms.

Model

- "IJ-27 M" may be marked on the bottom of the receiver/frame.
- features include: over and under barrel configuration with ventilated rib; hinged receiver/frame with top tang mounted break open operating lever; boxlock; hammerless; double triggers; tang mounted automatic slide safety; extractors; pistol grip butt stock; sling swivels; engraved; blued finish.

Manufacturer

- "MADE IN USSR" or "MADE IN RUSSIA" may be marked on the firearm.

Action

- over and under barrel pattern.

Serial Number

- serial number is usually located on the top tang under the break open lever.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- marked on the receiver/frame and/or buttplate. - this "make" is a trade name used by Russian manufacturers in the Izhevsk area of Russia that produce sporting firearms for domestic use and foreign export sales.
Model	- hammerless, double-trigger, double barrel-side by side with or without engraving or sling swivels. - model designation is marked on the receiver/frame and/or barrels. - the alpha portion of the designation may appear "IJ" or as a reversed "N" and two letter "K's", back to back, one facing left and one right (this translates to "IJ").
Action	- side by side pattern.
Serial Number	- marked on the receiver/frame; all examples seen have an alpha letter preceding five digits.
Importer	- over the years there have been many importers of "Baikal" products. - Universal Firearms (Florida, USA). - Ruko of Canada.
Remarks	- this family of firearms is manufactured in several sub-models; these variations each are considered of enough significance to warrant being models themselves as the model numbers change on the firearm. IJ-58 M - extractors only, without automatic ejection; IJ-58 ME - extractors with automatic ejection; IJ-58 MA - extractors only with automatic safety (safety catch applied mechanically / automatically each time the action is opened); IJ-58 MAE - selective extractors with automatic ejection and with automatic safety (safety catch applied mechanically / automatically each time the action is opened);

Notes

Make

- as there are several variations in the way that these firearms are marked, the Baikal name may be found on the receiver/frame, barrel assembly, butt plate/recoil pad or any combination of locations.
- this "make" is a trade name used by Russian manufacturers in the Izhevsk area of Russia that produce sporting firearms for domestic use and foreign export sales.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- this model features extractors only with automatic safety (safety catch applied mechanically / automatically each time the action is opened); - the model designation appears on the receiver. - the alpha portion of the designation may appear as "IJ" or as a reversed "N" and two letter "K's", back to back, one facing left and one right (this translates to "IJ").
Manufacturer	- one of the symbols/identifier marks (an arrow in a shield) used by the arsenal at Izhevsk will usually be found on the receiver/frame. - the receiver/frame or barrel assembly will usually be marked "Made in USSR".
Action	- side by side barrel configuration.
Serial Number	- marked on the water table of the receiver/frame, may have a Cyrillic or alpha character prefix or suffix.
Calibre	- the receiver/frame or barrel assembly will usually be marked with the calibre designation.
Remarks	- This family of firearms is manufactured in several sub-models; these variations are considered of enough significance to warrant being distinct models themselves. IJ-58 M - extractors only (no automatic ejectors) IJ-58 ME - automatic ejectors IJ-58 MA - extractors only with automatic safety (safety catch applied mechanically / automatically each time the action is opened) IJ-58 MAE - selective, automatic ejectors and with automatic safety (safety catch applied mechanically / automatically each time the action is opened);

Notes

Make

- the make is not marked on the receiver/frame.
- this "make" is a trade name used by Russian manufacturers in the Izhevsk area that produce sporting firearms for domestic use and foreign export sales.

Model

- the model designation is marked on the receiver/frame.
- known example marked "IJ-58MAE" on underside of receiver/frame ahead of the trigger guard.
- the alpha portion of the designation may appear as a reversed "N" and two letter "K's", back to back, one facing left and one right (this translates to "IJ").
- model features include extractors with automatic ejection and with an automatic safety (safety catch applied mechanically / automatically each time the action is opened).

Manufacturer

- the manufacturer's symbol (an arrow within a shield) is usually marked on the receiver/frame or underside of the barrels.

Action

- hinged breech, side by side shotgun.

Serial Number

- marked on the receiver/frame, may have a Cyrillic letter prefix of suffix.

Calibre

- calibre designation usually marked on action or barrel flats.
- calibre markings will indicate nominal gauge with the chamber length in millimetres, eg., 12 over 70, 12.70, 12/70 which indicates 12 GA X 2-3/4".

Other Markings

- model designation and country of manufacture (U.S.S.R.) are marked on the receiver/frame.

Remarks

- this family of firearms is manufactured in several sub-models; these variations each are considered of enough significance to warrant being models themselves as the model numbers change on the firearm.

IJ-58 M - extractors only, without automatic ejection;
IJ-58 ME - extractors with automatic ejection;
IJ-58 MA - extractors only with automatic safety (safety catch applied mechanically / automatically each time the action is opened);
IJ-58 MAE - extractors with automatic ejection and with automatic safety (safety catch applied mechanically / automatically each time the action is opened);

48091 - 1	9MM MAKAROV	8	97	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	
48091 - 3	9MM MAKAROV	8	106	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	
48091 - 4	9MM MAKAROV	8	108	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "Baikal" may be moulded into the plastic grip plate or engraved on the side of the slide.

Model

- introduced in 1994.
- this firearm is a commercial version of the PM Makarov with an adjustable rear sight.
- the IJ-70 has been sold in the past as IZH-70, IJ-70 A and IJ-70 AH, IJ70 17A. These codes reflect various marketing strategies and the letter codes following the model designation identify the calibre of the hand gun and whether it has a "high capacity" magazine.
- the firearm identified here on FRT # 48091 is the commercial production Makarov pistol sold by the Baikal Marketing Agency and is not intended to be used for identification of any standard Russian Armed Forces issue side arm
- post 1991- sections of the Russian State Arsenal at Izhevsk were privatised. The IJ series of firearms is the product of what is known as Izhevsky Mekhanichesky Zavod (Izhmech) which means - Izhevsk Mechanical Factory).
- IJ70 17A, is a code that may be decyphered as follows: IJ = Izhevsk, 70 = basic Makarov design commercial pistol, 17 = 380 AUTO Calibre, A = Standard Capacity magazine (8 shots).
- features include: disassembly by lowering the trigger guard and lifting the slide and return spring off of the receiver/frame for disassembly; slide mounted safety catch which also releases the hammer when applied, lowering the hammer onto a hammer block; double/single action trigger mechanism; adjustable sights; magazine release catch located on the bottom of the hand grip/butt; the extractor functions as a loaded chamber indicator by standing proud of the slide when a cartridge is chambered; wrap-around grip plates; unlike the Walther PP or PPK pistol the Makarov pistol has a slide release lever on the left side.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- blow-back operated.

Serial Number

- serial number rationalization unknown.
- all recent imports into the United States must be marked with the importer's name and address. These recent imports may also have been re-serial numbered, at the instruction of the US BATF, to avoid confusion caused by non-roman alphabet letters and non-Arabic numerals. In all cases the original serial number is still visible.

Shots

- detachable box magazine.

Remarks

- the production of Makarov pistols at Izhevsky Mekhanichesky Zavod (Izhmech) spans the time period from the early 1960's to date (2003). During this time period the Union of Soviet Socialist Republics (USSR) disintegrated and became the Confederation of Independent States (CIS) and subsequently reverted to Russia. During this time period the Arsenal at Izhevsk reverted from military production of Makarov pistols, to a mix of military production and foreign export sales.
- also during this time period the North American importers experienced a variety of changes in import regulations. This history of change has produced a myriad of differences in the "tradenames" used by export or import agencies. Business practice changes or translation practices have changed the name of the manufacturer several times, and importers have used imperfect translations to advertise their products.
- the United States Government has insisted upon re-serializing the Makarov family of firearms, commencing in the late 1980's / early 1990's, so as to reduce confusion arising from the use of Cyrillic letters in the serial numbers of firearms destined for import into the USA.
- Formerly the firm "RAZNOEXPORT" handled all production from the Russian Arsenal system destined for foreign sales or export. "Baikal" and "Vostok" were brand or trade names used by the "RAZNOEXPORT" firm. These brand names were used regardless of the origin/manufacturer of the firearms being sold.
- After the demise of the Soviet Union, "RAZNOEXPORT" was phased-out and a new export firm was founded to meet the needs of the Russian Department of Defence Industry, this firm was called "TEKHMASHEXPORT" which had in its structure another firm called Baikal International Trading.
- When the Izhevsk Mechanical Plant launched its own export sales branch it also took the "brand name" Baikal.
- Izhmech was permitted to retain the name "Baikal" and "TECHMASHEXPORT" had to dismantle Baikal International.

25923 - 2	9MM BROWNING SHORT	8	94	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Baikal" may be found moulded into the plastic grips or engraved on the pistol slide.

Model

- this firearm is a commercial version of the PM Makarov with an adjustable rear sight to make it eligible for importation into the United States.
- this firearm was manufactured at Izhevsk circa 1991-1995 during the period that the Russian Arms Industry was in the process of privatization. The variety of "Brand Names", (Baikal / IZHMECH / IZMASH / IMEZ) that appear on these firearms is a result of the uncertainty caused by the turmoil of privatization and imperfect translation of the manufacturer's name or designation by foreign importers.
- IJ70 17A, is a code that may be deciphered as follows: IJ = Izhevsk, 70 = Makarov Pistol, 17 = 380 AUTO Calibre, A = Standard Capacity magazine (8 shots).
- features include: disassembly by lowering the trigger guard and lifting the slide and return spring off of the receiver/frame for disassembly; slide mounted safety catch which also releases the hammer when applied, lowering the hammer onto a hammer block; double/single action trigger mechanism; adjustable sights; magazine release catch located on the bottom of the hand grip/butt; the extractor functions as a loaded chamber indicator by standing proud of the slide when a cartridge is chambered; wrap-around grip plates; unlike the Walther PP or PPK pistol the Makarov pistol has a slide release lever on the left side.

Action

- blowback operated.

Serial Number

- all recent imports into the United States must be marked with the importer's name and address. These recent imports may also be re-serial numbered at the instruction of the BATF to avoid confusion caused by non-roman alphabet letters and non-Arabic numerals.
- serial number may be located on the left side of the receiver/frame above the grip plate.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- "Cal.380-ACP" is marked on the right side of the slide.
Shots	- detachable box magazine.
Importer	- importers information is normally marked on the right side of the slide.
Other Markings	- when IMEZ is found marked on a Makarov pistol; IMEZ is an imperfect translation of Izhevsky Mekhanichesky Zavod - Izhmech (which means - Izhevsk Mechanical Factory). Makarov pistols, PSM pistols, air guns and various shotguns have been produced and identified by the IMEZ name.
Remarks	- the production of Makarov pistols at Izhevsky Mekhanichesky Zavod (Izhmech) spans the time period from the early 1960's to date (2003). During this time period the Union of Soviet Socialist Republics (USSR) disintegrated and became the Confederation of Independent States (CIS) and subsequently reverted to Russia. During this time period the Arsenal at Izhevsk reverted from military production of Makarov pistols, to a mix of military production and foreign export sales. - also during this time period the North American importers experienced a variety of changes in import regulations. 25924 - 2	380 AUTO	12	94	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the trade name "Baikal" may be found moulded into the plastic grips or engraved on the slide.
- this firearm design is also commonly called "Makarov".

Model

- "IJ-70-17AH" was observed marked on the left side of the slide.
- this firearm is a commercial version of the PMM Makarov with an adjustable rear sight to make it eligible for importation into the United States.
- available in nickel or blue finish.
- this firearm was manufactured at Izhevsk circa 1991 - 1995 during the period that the Russian Arms Industry was in the process of privatization. The variety of "Brand Names", (Baikal / IZHMECH / IZMASH / IMEZ) that appear on these firearms is a result of the uncertainty caused by the turmoil of privatization and imperfect translation of the manufacturer's name or designation by foreign importers.
- IJ70 17AH, is a code that may be deciphered as follows: IJ = Izhevsk, 70 = Makarov, 17 = 380 AUTO Calibre, AH = High Capacity magazine (10-12 shots).
- changes made in 1994-95 to U.S. import rules made new production magazines in excess of 10 shots capacity impossible to import for public consumption. K B I imported this model without magazines and had a 10 shot magazine manufactured for the firearm.
- features include: disassembly by lowering the trigger guard and lifting the slide and return spring off of the receiver/frame for disassembly; slide mounted safety catch which also releases the hammer when applied, lowering the hammer onto a hammer block; double/single action trigger mechanism; adjustable sights; magazine release catch located on the bottom of the hand grip/butt; widened grip to accept a thicker magazine; the extractor functions as a loaded chamber indicator by standing proud of the slide when a cartridge is chambered; wrap-around grip plates; unlike the Walther PP or PPK pistol the Makarov pistol has a slide release lever on the left side.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "IMEZ" was observed marked on the left side of the slide. - Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatisation of the Russian State Arsenal at Izhevsk (circa) 1994. - manufacturer identifier's on this model may include an "IMEZ" markings and/or the Russian State Arsenal code for Izhevsk, a vertical, stylized arrow in a circle.
Action	- blowback operated.
Serial Number	- usually located on left rear of receiver/frame. - all recent imports into the United States must be marked with the importer's name and address. These recent imports may also be re-serial numbered at the instruction of the BATF to avoid confusion caused by non-roman alphabet letters and non-Arabic numerals.
Calibre	- marked on the right side of the slide.
Shots	- detachable box magazine.
Importer	- marked on the right side of the slide.
Other Markings	- The firearm identified here on FRT # 25924 is the commercial production Makarov pistol sold by the Baikal Marketing Agency or by IZHMECH / IZMASH / IMEZ and is not intended to be used for identification of any standard Russian Armed Forces issue side arm. - Post 1991- sections of the Russian State Arsenal at Izhevsk have been privatized. - The IJ series of firearms are the product of what is known as IZHMECH. - Note that at various times in the past IZH has been translated by North American importers as IJ. - IMEZ stands for Izhevskii Mechanicheskii Zavod or Izhevsky Mekhanichesky Zavod (Izhmech) which translates to - Izhevsk Mechanical Factory. - Izhmech produces Makarov pistols, the PSM pistol, air guns and various shotguns.
Remarks	- Izhmech has its origins in 1942 when the manufacturing at the Russian State arsenal at Izhevsk was split into two entities; Izhmash & Izhmech. - immediate production in 1942, at Izhmech, consisted of Tokarev TT33 pistols, Model 1895 Nagant revolvers and PTRS Anti-Tank rifles. - after WWII Izhmech produced the PM Makarov pistol and the APS Stechkin pistol. - the present Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatisation of the Russian State Arsenal at Izhevsk (circa) 1994. - the product line of Izhevsky Mekhanichesky Zavod (Izhmech) consists of Baikal "Brand name" sporting firearms, Makarov and other pistols under the IZH model prefixes and parts for Kalashnikov type firearms. - note that at various times in the past IZH has been translated by North American importers as IJ. - formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold. - after the demise of the Soviet Union, RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading. - when the Izhevsk Mechanical Plant launched its own export sales branch it also took the "brand name" Baikal. - Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.

FRT Report

Firearm Reference Number (FRN): 25926
Make: Baikal
Model: IJ-70-18A

Summary

Make:	Baikal
Model:	IJ-70-18A
Manufacturer:	Izhevsky Mekhanichesky Zavod (Izhmech)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
25926 - 1	9MM MAKAROV	8	94	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Baikal" may be found moulded into the plastic grips or engraved on the slide.

Model

- this firearm is a commercial version of the PM Makarov with an adjustable rear sight to make it eligible for importation into the United States.
- this firearm was manufactured at Izhevsk circa 1991 - 1995 during the period that the Russian Arms Industry was in the process of privatization. The variety of "Brand Names", (Baikal / IZHMECH / IZMASH / IMEZ) that appear on these firearms is a result of the uncertainty caused by the turmoil of privatization and imperfect translation of the manufacturer's name or designation by foreign importers.
- IJ70 18A, is a code that may be decyphered as follows: IJ = Izhevsk, 70 = Makarov Pistol, 18 = 9MM MAKAROV Calibre, A = Standard Capacity magazine (8 shots).
- features include: disassembly by lowering the trigger guard and lifting the slide and return spring off of the receiver/frame for disassembly; slide mounted safety catch which also releases the hammer when applied, lowering the hammer onto a hammer block; double/single action trigger mechanism; adjustable sights; magazine release catch located on the bottom of the hand grip/butt; the extractor functions as a loaded chamber indicator by standing proud of the slide when a cartridge is chambered; wrap-around grip plates; unlike the Walther PP or PPK pistol the Makarov pistol has a slide release lever on the left side.

Manufacturer

- Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatisation of the Russian State Arsenal at Izhevsk (circa) 1994.
- manufacturer identifier's on this model may include an "IMEZ" markings and/or the Russian State Arsenal code for Izhevsk, a vertical, stylized arrow in a circle.

Action

- blowback operated.

Serial Number

- usually located on left rear of receiver/frame.
- all recent imports into the United States must be marked with the importer's name and address. These recent imports may also be re-serial numbered at the instruction of the BATF to avoid confusion caused by non-roman alphabet letters and non-Arabic numerals.

Calibre

- calibre designation is marked on the right side of the slide.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.

Importer

- marked on the right side of the slide.

Other Markings

- The firearm identified here on FRT # 25926 is the commercial production Makarov pistol sold by the Baikal Marketing Agency or by IZHMECH / IZMASH / IMEZ and is not intended to be used for identification of any standard Russian Armed Forces issue side arm.
- Post 1991- sections of the Russian State Arsenal at Izhevsk have been privatized. The IJ series of firearms are the product of what is known as IZHMECH.
- IMEZ stands for Izhevskii Mechanicheskii Zavod or Izhevsky Mekhanichesky Zavod (Izhmech) which translates to - Izhevsk Mechanical Factory.
- Izhmech produces Makarov pistols, the PSM pistol, air guns and various shotguns.

Remarks

- Izhmech has its origins in 1942 when the manufacturing at the Russian State arsenal at Izhevsk was split into two entities; Izhmash & Izhmech.
- immediate production in 1942, at Izhmech, consisted of Tokarev TT33 pistols, Model 1895 Nagant revolvers and PTRS Anti-Tank rifles.
- After WWII Izhmech produced the PM Makarov pistol and the APS Stechkin pistol.
- The present Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatisation of the Russian State Arsenal at Izhevsk (circa) 1994.
- the product line of Izhevsky Mekhanichesky Zavod (Izhmech) consists of Baikal "Brand name" sporting firearms, Makarov and other pistols under the IZH model prefixes and parts for Kalashnikov type firearms.
- Note that at various times in the past IZH has been translated by North American importers as IJ.
- The other arms factory at Izhevsk (Izhmash - Joint Stock Company) product line consists of Kalashnikov type rifles, carbines and shotguns (Saiga), Dragunov (SVD) type sporting rifles (TIGR).
- Formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold.
- After the demise of the Soviet Union, RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading.
- When the Izhevsk Mechanical Plant launched its own export sales branch it also took the "brand name" Baikal.
- Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.

Notes

Make

- the tradename "Baikal" may be found moulded into the plastic grips or engraved on the pistol slide.

Model

- this firearm is a high capacity variant of the standard Makarov PM pistol with an adjustable rear sight to make it eligible for importation into the United States.
- this firearm was manufactured at Izhevsk circa 1991 - 1995 during the period that the Russian Arms Industry was in the process of privatization. The variety of "Brand Names", (Baikal / IZHMECH / IZMASH / IMEZ) that appear on these firearms is a result of the uncertainty caused by the turmoil of privatization and imperfect translation of the manufacturer's name or designation by foreign importers.- model designation is marked on the left side of the slide as "IJ70-18AH".
- IJ70 18AH, is a code that may be decyphered as follows: IJ = Izhevsk, 70 = Makarov Pistol, 18 = 9MM MAKAROV Calibre, AH = Standard, high Capacity magazine (12 shots).
- features include: disassembly by lowering the trigger guard and lifting the slide and return spring off of the receiver/frame for disassembly; slide mounted safety catch which also releases the hammer when applied, lowering the hammer onto a hammer block; double/single action trigger mechanism; adjustable sights; magazine release catch located on the bottom of the hand grip/butt; widened grip to accept a thicker magazine; the extractor functions as a loaded chamber indicator by standing proud of the slide when a cartridge is chambered; wrap-around grip plates; unlike the Walther PP or PPK pistol the Makarov pistol has a slide release lever on the left side.

Manufacturer

- manufacturer's designation is marked on the firearm as "IMEZ".

Action

- blow back operation.

Serial Number

- numbered on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre is marked on the right side of the slide.
Shots	- detachable double stack box magazine.

123165 - 2	9MM BROWNING SHORT	8	91	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- as there are several variations in the way that these firearms are marked, the Baikal name may be found on the receiver/frame, slide, grip panels or any combination of locations.
- Baikal is a trade name used by Russian manufacturers in the Izhevsk area of Russia that produce sporting firearms for domestic use and foreign export sales.

Model

- this firearm is a commercial version of the PM Makarov.
- the model designation was marked on the left side of the slide on the sample examined. It would appear this model has been sold under a variety of "IJ-70" model designations by different North American importers.
- features on sample examined included: blued finish; black plastic grip panels; slide mounted safety/decocking lever; pivoting trigger guard that acts as a take-down lever; blade front sight with an adjustable rear sight; heel mounted magazine release; recoil spring surrounds the barrel; double/single action trigger mechanism; lanyard ring on the left side of the grip frame.

Manufacturer

- the manufacturer's marking, an arrow within a shield, will usually be marked on the receiver/frame.
- the firearm may also be marked "Made in Russia" and "Izhevsk".

Action

- blowback operated.

Serial Number

- the sample examined was numbered on the left side of the receiver/frame and slide.
- when the factory applied serial number included Cyrillic characters they were sometimes re-numbered to comply with import regulations of various countries.

Calibre

- marked on the right side of the slide.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine housed in the grip.
Importer	- the sample examined had the North American importers name marked on the right side of the slide.

Notes

Make

- may or may not be marked "BAIKAL".
- "Baikal" is a trade name of a consortium of various Soviet Arsenals producing sporting firearms for the domestic and export markets.

Model

- model designation may be marked "IZH-18 (or marking may appear in Cyrillic as a backward "N" and two "K"s back to back and "-18").
- this model has been imported since 1998.
- features include: blued, hammer forged steel barrel with fixed or screw in choke; hinged receiver/frame; trigger guard lever action release; cross bolt or trigger block safety; cocking lever with external cocking indicator; extractor or automatic ejector; hardwood pistol-grip buttstock and forearm; rubber recoil pad; engraved receiver/frame.
- also available in a "MAX" version with a walnut stock, nickel receiver/frame and a vented rib on barrel.

Manufacturer

- manufactured at Izhevsk Arsenal in Russia for domestic sales and for export, address: Izhevsky Mekhanichesky Zavod 8, Promyshlennaya Str., Izhevsk, 426063.

Action

- break-open tilting single barrel.

Serial Number

- serial number is located on the receiver/frame under the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

122176 - 2	12 GA X 3"	1	749	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
122176 - 1	20 GA X 3"	1	724	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- may not be marked with the make designation, "BAIKAL".
- "Baikal" is a trade name that has been used by a consortium of various Soviet Arsenals and is currently utilized by Izhevsky Mekhanichesky Zavod (Izhmech) for production of sporting firearms for the domestic and export markets.

Model

- the model designation may be marked "IZH-18" (or marking may appear in Cyrillic as a backward "N" and two "K"s back to back and "-18") or marked "Competition" in script on the right side of the receiver/frame.
- introduced in 2002.
- features include: blued, hammer forged and ported barrel with a top mounted ventilated rib; fixed or screw-in choke tubes; double sight beads; hinged receiver/frame; trigger guard lever action release; cross bolt or trigger block safety; selectable extractor or ejector; cocking lever with external cocking indicator; walnut, Monte Carlo type checkered butt stock and forearm; clay bird engraved, nickel finished, receiver/frame; rubber recoil pad.

Manufacturer

- the manufacturer's designation may be marked on the firearm.

Action

- break open action.

Serial Number

- the serial number is marked on the receiver/frame.
- the serial number rationalization is unknown.

Calibre

- the calibre designation is normally marked on the barrel assembly.

Notes

Make

- make is usually marked on the firearm.
- "BAIKAL" is a trade mark used on Russian firearms manufactured in Izhevsk and Tula.

Model

- model designation or a backward "N" and two "K"s back to back plus "-18EM-M" is marked on the firearm.
- importation of the "IZH-18" model line began in 1998.
- features include: single round hammer forged steel barrel with bead front sight; hinged receiver/frame with bottom mounted break-open lever; hammerless mechanism; cross bolt safety; cocking lever with external cocking indicator; automatic ejector; pistol grip butt stock; beavertail forearm; blued finish; sling swivels.
- "Sporting" version features include: walnut monte carlo stock with rubber recoil pad; nickel plated receiver/frame; ventilated ported barrel with screw-in chokes and fluorescent front sight. The "Junior" version feature a scaled down stock and lower average weight.

Manufacturer

- manufactured at the Izhevsky Mekhanichesky Zavod (Izhmech) on the site of the former Russian State Arsenal, Izhevsk in the Republic of Udmurtia.

Action

- hinged barrel design.

Serial Number

- serial number is located on the inside of the receiver/frame, under the barrel.

Model

- the model designation may not be marked on the firearm.
- this is the single-shot rifle version of the Baikal IZH-18/IZH-18M series of hammerless single-shot shotguns.
- features include: stained hardwood pistol-grip stock and forearm; blued finish; hammer-forged barrel; sling swivels; cross-bolt safety at rear of trigger; open fixed sights or optional scope rail; action opening-lever at the rear of the trigger-guard; vented rubber recoil pad.
- overall length for 600mm (23 5/8") barrel is 1015mm (40"), average weight is 3.2kg (7.1lbs).
- model name is usually marked on the left side of the receiver/frame over "Made in Russia".

Manufacturer

- the manufacturer (or logo thereof) is marked on the firearm.

Action

- "tip-down" single-shot.

Serial Number

- numbered on receiver/frame.

Notes

Make

- make is usually marked on the firearm.
- "BAIKAL" is a trade mark used on Russian firearms manufactured in Izhevsk and Tula.

Model

- model designation or a backward "N" and two "K"s back to back plus "-18MK-M" is marked on the firearm.
- importation of the "IZH-18" model line began in 1998.
- features include: single round hammer forged steel barrel with bead front sight; hinged receiver/frame with bottom mounted break open lever; exposed hammer; automatic ejector; pistol grip butt stock; beavertail forearm; blued finish; sling swivels.

Manufacturer

- manufactured at the Izhevsky Mekhanichesky Zavod (Izhmech) on the site of the former Russian State Arsenal, Izhevsk in the Republic of Udmurtia.

Serial Number

- serial number is located on the inside of the receiver/frame, under the barrel.

Notes

Make

- may be marked "BAIKAL" (RUSSIA) on the left side of the receiver/frame.
- Baikal is a trade name used by IZHMECH for export sales.

Model

- this record is a generic model to cover the Baikal Brand Name for the basic IZH-27 shot gun as imported into USA and Europe.
Model decode:
- IZH-27M is the model with double triggers and non-selective ejectors,
- IZH-27M-1C is the model with single trigger and non-selective ejectors,
- IZH-27EM is the model with double triggers and selective ejectors,
- IZH-27EM-1C is the model with single trigger and non-selective ejectors,
- with all of the above models when a "-M" is used as the final letter in the suffix of the model designation, this letter denotes a "magnum" or 3 inch chamber.
- IZH-27M-M is the IZH-27M with a magnum 3 inch chamber,
- IZH-27EM-M is the IZH-27EM with a magnum 3 inch chamber, and so on.
- this firearm is a conventional over / under boxlock shotgun; may or may not be marked "IZH-27EM" (or marking may appear in Cyrillic as "I3H-27EM")
- available in different grades of engraving and embellishment.
- features include; automatic tang safety; forearm and buttstock with pistol-grip of hardwood; extractors and ejectors; single or double triggers; bead front sight; ventilated-rib on top barrel; fixed chokes; blued metal finish.
- shotguns of this design (or other variants of similar design) are sold by other retailers as the IJ-27 or IJ-27EM .

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- manufactured at the Izhevsky Mekhanichesky Zavod (Izhmech) on the site of the former Russian State Arsenal, Izhevsk in the Republic of Udmurtia.
Action	- top lever, front hinged, tipping barrel, "break-open sub-action type". - over / under barrel configuration.
Serial Number	- marked on the receiver; usually located on the upper receiver tang (under opening lever), or on the water-table flats, and on bottom of the barrel mono-block.
Other Markings	- Formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold. - After the demise of the Soviet Union, RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading. - When the Izhevsk Mechanical Plant (Izhmech) launched its own export sales branch it also took the "brand name" Baikal. - Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.
Remarks	- Izhmech has its origins in 1942 when the manufacturing at the Russian State arsenal at Izhevsk was split into two entities; Izhmash & Izhmech. - immediate production in 1942, at Izhmech, consisted of Tokarev TT33 pistols, Model 1895 Nagant revolvers and PTRS Anti-Tank rifles. - After WWII Izhmech produced the PM Makarov pistol and the APS Stechkin pistol. - The present Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatization of the Russian State Arsenal at Izhevsk (circa) 1994. - The product line of Izhevsky Mekhanichesky Zavod (Izhmech) consists of Baikal "Brand name" sporting firearms, Makarov and other pistols under the IZH model prefixes and parts for Kalashnikov type firearms. - The other arms factory at Izhevsk (Izhmash - Joint Stock Company) product line consists of Kalashnikov type rifles, carbines and shotguns (Saiga), and Dragunov (SVD) type sporting rifles (TIGR).

122166 - 2	20 GA X 3"	2	749	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- may not be marked with the make designation, "BAIKAL".
- "Baikal" is a trade name that has been used by a consortium of various Soviet Arsenals and is currently utilized by Izhevsky Mekhanichesky Zavod (Izhmech) for production of sporting firearms for the domestic and export markets.

Model

- the model designation may be marked "IZH-27" (or marking may appear in Cyrillic as a backward "N" and two "K"s back to back and "-27") or marked "Competition" in script on the right side of the receiver/frame.
- features include: blued, ported barrels with top mounted ventilated rib; removable chokes; double sight beads; nickel finished receiver/frame with clay bird engraving; single, selective trigger; auto ejectors; top tang mounted safety and action release; checkered, walnut forend and pistol grip, "cast off", butt stock; rubber butt plate; screw in choke tubes.

Manufacturer

- the manufacturer's designation may be marked on the firearm.
- the present Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatization of the Russian State Arsenal at Izhevsk (circa) 1994.
- the product line of Izhevsky Mekhanichesky Zavod (Izhmech) consists of Baikal "Brand name" sporting firearms, Makarov and other pistols under the IZH model prefixes and parts for Kalashnikov type firearms.

Action

- over and under barrel configuration.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number is marked on the receiver/frame; usually located on the upper tang (under opening lever), or on the water-table flats and on the bottom of the barrel block. - the serial number rationalization is unknown.
Calibre	- the calibre designation is normally marked on the chamber area of the barrel assembly.

Notes

Make

- may be marked "BAIKAL" (RUSSIA) on the left-hand side of the receiver/frame.
- Baikal is a trade name used by IZHMECH for export to foreign countries.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this firearm is a model IZH-27 with non-selective ejectors.
- this firearm is a conventional over/under boxlock shotgun; may or may not be marked "IZH-27M" (or marking may appear in Cyrillic as "I3H-27M")
- available in different grades of engraving and embellishment.
- features include; automatic tang safety, forearm and buttstock with pistol-grip of hardwood, extractors or automatic ejectors, double triggers, single sight-bead ventilated-rib barrels with fixed choke tubes and blued metal finish.
- the "Junior" version features include: a scaled down walnut butt stock and forend; lightweight reveiver/frame; rubber butt plate and screw-in chokes.
- shotguns of this design (or other variants of similar design) are sold by other retailers as the IJ-27 or IJ-27M .
- in 2005 this model was offered with a removable oval spiral barrel unit.

Manufacturer

- manufactured at the Izhevsky Mekhanichesky Zavod (Izhmech) on the site of the former Russian State Arsenal, Izhevsk in the Republic of Udmurtia.

Action

- top lever, front hinged, tipping barrel, "break-open sub-action type".
- over / under barrel configuration.

Serial Number

- marked on the receiver; usually located on the upper receiver tang (under opening lever), or on the water-table flats, and on bottom of the barrel mono-block.

Other Markings

- Formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold.
- After the demise of the Soviet Union, RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading.
- When the Izhevsk Mechanical Plant (Izhmech) launched its own export sales branch it also took the "brand name" Baikal.
- Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.

Remarks

- Izhmech has its origins in 1942 when the manufacturing at the Russian State arsenal at Izhevsk was split into two entities; Izhmash & Izhmech.
- immediate production in 1942, at Izhmech, consisted of Tokarev TT33 pistols, Model 1895 Nagant revolvers and PTRS Anti-Tank rifles.
- After WWII Izhmech produced the PM Makarov pistol and the APS Stechkin pistol.
- The present Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatization of the Russian State Arsenal at Izhevsk (circa) 1994.
- The product line of Izhevsky Mekhanichesky Zavod (Izhmech) consists of Baikal "Brand name" sporting firearms, Makarov and other pistols under the IZH model prefixes and parts for Kalashnikov type firearms.
- The other arms factory at Izhevsk (Izhmash - Joint Stock Company) product line consists of Kalashnikov type rifles, carbines and shotguns (Saiga), and Dragunov (SVD) type sporting rifles (TIGR).

- Izhmech now has the "rights" to the use of the name "Baikal".
- Izhmech is a privatized portion of the old Russian Arsenal at Izhevsk.
- importer's name will be found marked on all USA imports, the exclusive USA agent for the Baikal IZH-35M pistol is the EAA Corporation.(year 2000)

Model

- the model designation may be marked on the firearm and may contain Cyrillic characters.
- the Cyrillic representation of "IZH-35M" resembles a backwards "N" and two back-to-back "K"s, in front of "-35M".
- features include: matte blued or grey slide and receiver/frame; adjustable anatomical heel, palm, and thumb-rest grips; open sights; target trigger; detachable Weaver-style scope mount and extended cocking levers on bolt that lie along the forward edges of the receiver/frame and barrel.
- firearm also known by the catalog designation of "MP-35M".

Manufacturer

- manufacturer's designation may be marked on the firearm.

Action

- blowback operated.

Serial Number

- serial number rationalization unknown.

Calibre

- marked on the left side.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - "READ OWNER'S MANUAL BEFORE USE" is marked on the right side of the barrel/slide assembly.

Notes

Make

- "Baikal" is usually marked on the receiver/frame.
- Formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold.
- After the demise of the Soviet Union, RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading.
- When the Izhevsk Mechanical Plant (Izhmech) launched its own export sales branch it also took the "brand name" Baikal.
- Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.

Model

- "IZH-43" or Cyrillic "I3H-43" is usually marked on the receiver/frame.
- "BOUNTY HUNTER II" may be marked on the left barrel of some example.
- this is a conventional side by side box lock shotgun.
- features include: round side by side smoothbore barrels with screw-in choke tubes (full/modified/improved cylinder) and a bead front sight; front hinged receiver/frame with a top tang mounted break open lever and safety; box lock action; hammerless; single selective trigger or double triggers; automatic ejectors; checkered walnut forearm and semi-pistol grip buttstock; blued metal finish.

Action

- side by side barrel configuration, hinged barrel design.

Serial Number

- serial number is usually marked on the top tang of the receiver/frame, under the break open lever, and may be repeated on the underside of the barrel assembly.
- observed serial numbers consisted of seven numbers and a letter "B" suffix.

Calibre

- gauge and chamber length are marked on the barrel assembly.

Notes

Make

- "BAIKAL" is usually marked on the firearm.
- formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold.
- after the demise of the Soviet Union, RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading.
- when the Izhevsk Mechanical Plant (Izhmech) launched its own export sales branch it also took the "brand name" Baikal.
- Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.

Model

- may be marked "IZH-43-1C" (or marking may appear in Cyrillic as "I3H-43-1C")
- this is a conventional side by side boxlock shotgun.
- features include: single trigger; checkered pistol-grip buttstock and forearm of walnut; blued barrels and blued or nickel receiver/frame;
- shotguns of this design (or other variants of similar design) are sold by other retailers.

Action

- side by side barrel configuration.

Serial Number

- the serial number is marked on the receiver/frame; usually located on the upper receiver-tang (under opening lever), or on the water-table flats, and on bottom of the barrel mono-block.
- serial number of a referenced example consisted of seven numbers.

Calibre

- the calibre designation is usually marked on the barrel assembly.

Notes

Make	- "Baikal" is usually marked on the butt plate of the firearm.
Model	- model designation is marked on the firearm on the underside of the receiver/frame; the first three characters of the model name are Cyrillic and look like a backwards N followed by what would appear to be a back-to-back letter K; the translation for these characters is IZH; the model name with the first three characters translated is marked as, "IZH-43E-1C". - features include: box lock action; hammerless; side by side barrels; top lever opening; single trigger which will sequentially fire both barrels in any order; selective ejector and blued finish. - overall length for 725mm barrel is 1130mm (44.5"), average weight in 12GA X 3" is 3.18kg (7lbs).
Action	- side by side barrel configuration, hinged barrel design.
Serial Number	- serial number is marked on the top tang of the receiver/frame underneath the action opening lever. - known examples have had nine digit numbers without prefix or suffix.

Notes

Make

- "BAIKAL" is marked on the receiver/frame.
- formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold.
- after the demise of the Soviet Union, RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading.
- when the Izhevsk Mechanical Plant (Izhmech) launched its own export sales branch it also took the "brand name" Baikal.
- Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.

Model

- "IZH-43K" or Cyrillic "I3H-43K" is usually marked on the receiver/frame.
- "BOUNTY HUNTER II" may be marked on the left barrel of some example.
- this is a conventional side by side box lock shotgun with side plates and exposed oversize spur hammers.
- features include: round side by side smoothbore barrels with screw-in choke tubes (full/modified/improved cylinder) and a bead front sight; front hinged receiver/frame with a top tang mounted break open lever and safety; side plates with exposed hammers; single or double triggers; automatic ejectors; checkered walnut forearm and semi-pistol grip buttstock; blued metal finish.
- this shotgun type is popular with re-enactors and competitors involved in "Old West" style action shooting.

Action

- side by side barrel configuration, hinged barrel design.

Serial Number

- marked on the receiver/frame; usually located on the upper receiver/frame tang (under the opening lever), or on the water-table flats, and on the bottom of the barrel mono-block.

Notes

Make

- "BAIKAL" is marked on the receiver/frame and/or butt plate.
- "Baikal" is a trade name that has been used by a consortium of various Soviet Arsenals and is currently utilized by Izhevsky Mekhanichesky Zavod (Izhmech).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- introduced circa 2003.
- "IZH-43KH" is usually marked on the underside of the receiver/frame.
- "BOUNTY HUNTER II" may be marked on the left barrel of some examples.
- this is a conventional side by side box lock shotgun with side plates and exposed oversize spur hammers.
- features include: round side by side smoothbore barrels with screw-in choke tubes and a bead front sight; front hinged receiver/frame with a top tang mounted break open lever and safety; side plates and side mounted hammers; double triggers; automatic ejectors; checkered walnut forearm and semi-pistol grip buttstock; blued finish.
- average weight is 3.4kg (7.48 lbs)

Manufacturer

- the manufacturer's designation may be marked on the firearm.

Action

- side by side barrel configuration, hinged barrel design.

Serial Number

- marked on the receiver/frame; usually located on the upper receiver/frame tang, (under opening lever), or on the water-table flats.
- the serial number rationalization is not known.

Calibre

- the calibre designation is marked on the chamber flats of the barrel assembly.

Notes

Make

- make is not marked on the firearm.

Model

- the model is marked on the firearm, in Cyrillic; the Cyrillic representation of "IZH-54" resembles a backwards "N", followed by back-to-back "K"s, followed by "-54".
- this is a hammerless side by side boxlock shotgun, manufactured by Izhmech in various grades of engraving, fit and finish from 1954 to 1970, based on a modernized and upgraded IZH-49.
- features include: blued barrels, with blued, colour-case-hardened, or coin-finished receiver in various grades of finish and engraving; chromed bores; sling swivels; checkered walnut straight-, semi-pistol- or pistol-grip stock and forearm; receiver with various grades of engraving; cocking indicators on the top of the receiver; dual under-lug locking with a Greener cross-bolt; double triggers; and automatic tang safety and opening lever.

Manufacturer

- the manufacturer or logo thereof is marked on the firearm.

Action

- side by side barrel configuration, hinged barrel design.

Serial Number

- serial number is marked on the water table.
- serial number of a referenced example consisted of a cyrillic letter prefix and four numbers.

Notes

Make

- the tradename "Baikal" may be found moulded into the plastic grips or engraved on the pistol slide.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- this firearm is a commercial version of the PM Makarov with an adjustable rear sight. - the IZH-70 pistol is a product of the Izhevsky Mekhanichesky Zavod (Izhmech) and is featured in their 2003 catalog. - the IZH-70 has been sold in the past as IJ-70, IJ-70 A and IJ-70 AH, IJ70 17A. These codes represent the calibre of the hand gun and whether it is a "high capacity" firearm. - the firearm identified here is the commercial production Makarov pistol sold by the Baikal Marketing Agency or by IZHMECH / IZMASH / IMEZ and is not intended to be used for identification of any standard Russian Armed Forces issue side arm - features include: disassembly by lowering the trigger guard and lifting the slide and return spring off of the receiver/frame for disassembly; slide mounted safety catch which also releases the hammer when applied, lowering the hammer onto a hammer block; double/single action trigger mechanism; adjustable sights; magazine release catch located on the bottom of the hand grip/butt; (applicable only to high capacity pistols) widened grip to accept a thicker magazine; the extractor functions as a loaded chamber indicator by standing proud of the slide when a cartridge is chambered; wrap-around grip plates; unlike the Walther PP or PPK pistol the Makarov pistol has a slide release lever on the left side.
Manufacturer	- Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatization of the Russian State Arsenal at Izhevsk (circa) 1994. - the product line of Izhevsky Mekhanichesky Zavod (Izhmech) consists of Baikal "Brand name" sporting firearms, Makarov and other pistols under the IZH model prefixes and parts for Kalashnikov type firearms. - MANUFACTURER: The Russian Arsenal code for Izhevsky Mekhanichesky Zavod (Izhmech) is a vertical, stylized arrow in a shield preceded by the number five. - the tradename "Baikal" may be found moulded into the plastic grips or engraved on the pistol slide.
Action	- blowback operated in 9MM MAKAROV & 380 AUTO calibres and delayed blow-back in 9MM LUGER calibre. - delayed blowback accomplished by grooves cut into the chamber of the firearm.
Serial Number	- serial number rationalization unknown. - all recent imports into the United States must be marked with the importer's name and address. These recent imports may also be re-serial numbered at the instruction of the BATF to avoid confusion caused by non-roman alphabet letters and non-Arabic numerals. - observed sample serial number which appears to be of original factory origin consisted of four digits without prefix or suffix and is found on the left side of the receiver/frame and the left side of the slide.
Calibre	- marked on the right side of the slide.
Shots	- detachable box magazine.
Importer	- in the case of Big Bear Arms the importer inscription is found on the left forward portion of the slide. - in the case of B-West the importer inscription is found on the right side of the receiver/frame.
Other Markings	- IMEZ stands for Izhevskii Mechanicheskii Zavod (which is an imperfect translation of Izhevsky Mekhanichesky Zavod (Izhmech) which means - Izhevsk Mechanical Factory). IMEZ produces Makarov pistols, the PSM pistol, air guns and various shotguns.
Remarks	- the production of Makarov pistols at Izhevsky Mekhanichesky Zavod (Izhmech) spans the time period from the early 1960's to date (2003). During this time period the Union of Soviet Socialist Republics (USSR) disintegrated and became the Confederation of Independent States (CIS) and subsequently reverted to Russia. During this time period the Arsenal at Izhevsk reverted from military production of Makarov pistols, to a mix of military production and foreign export sales. - also during this time period the North American importers experienced a variety of changes in import regulations. This history of change has produced a myriad of differences in the "tradenames" used by export or import agencies. Business practice changes or translation practices have changed the name of the manufacturer several times, and importers have used imperfect translations to advertise their products. - the United States Government has insisted upon re-serializing the Makarov family of firearms, commencing in the late 1980's / early 1990's, so as to reduce confusion arising from the use of Cyrillic letters in the serial numbers of firearms destined for import into the USA. - Formerly the firm "RAZNOEXPORT" handled all production from the Russian Arsenal system destined for foreign sales or export. "Baikal" and "Vostok" were brand or trade names used by the "RAZNOEXPORT" firm. These brand names were used regardless of the origin/manufacturer of the firearms being sold. - After the demise of the Soviet Union, "RAZNOEXPORT" was phased-out and a new export firm was founded to meet the needs of the Russian Department of Defence Industry, this firm was called "TEKHMASHEXPORT" which had in its structure another firm called Baikal International Trading. - When the Izhevsk Mechanical Plant launched its own export sales branch it also took the "brand name" Baikal. - Izhmech was permitted to retain the name "Baikal" and "TECHMASHEXPORT" had to dismantle Baikal International.

Notes

Make

- Baikal: formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold.
- After the demise of the Union of Soviet Socialist Republics (USSR), RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Russian Confederation of Independent States (CIS), Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading.
- When the Izhevsk Mechanical Plant launched its own export sales branch it also took the "brand name" Baikal.
- Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.

Model

- this firearm is a variant of the IZH-27 shotgun design, with double non-selective triggers and selective ejectors.
- the IZH-94 is built in rifle over shotgun (the "Sever", or "North") and shotgun over rifle (the "Taiga", or "Forest") versions.
- also available in an over/under double rifle version (the "IZH-94 Express").
- this firearm is a conventional over/under box lock shotgun design and may or may not be marked "IZH-94" (or marking may appear in Cyrillic as "I3H-94")
- available in different grades of engraving and embellishment.
- features include: automatic tang safety; forearm and buttstock with pistol-grip of hardwood; extractors and non-selective ejectors; double non-selective triggers; rifle sights and blued metal finish.
- combination guns of this design (or other variants of similar design) may be sold by other retailers.
- this combination gun can be either a rifle barrel over a shotgun barrel ("Sever") or a shotgun barrel over a rifle barrel.
- overall length for 600mm barrel is 1029mm (40.5"), average weight is 3.63kg (8lbs).

Manufacturer

- manufactured at the Izhevsky Mekhanichesky Zavod (Izhmech) on the site of the former Russian State Arsenal, Izhevsk in the Republic of Udmurtia.

Type

- over/under design with the shotgun barrel over the rifle barrel.

Action

- over & under barrel configuration.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number
- serial number rationalization unknown.
- marked on the receiver/frame; usually located on the upper tang (under the opening lever), or on the water-table flats, and on bottom of the barrel mono-block.

Calibre
- the calibre designations are normally marked on the barrel assembly.

Notes

Make

- Baikal: formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold.
- After the demise of the Union of Soviet Socialist Republics (USSR), RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Russian Confederation of Independent States (CIS), Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading.
- When the Izhevsk Mechanical Plant launched its own export sales branch it also took the "brand name" Baikal.
- Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.

Model

- this firearm is a variant of the IZH-27 shotgun design, with double non-selective triggers and selective ejectors.
- the IZH-94 is built in rifle over shotgun (the "Sever", or "North") and shotgun over rifle (the "Taiga", or "Forest") versions.
- also available in an over/under double rifle version (the "IZH-94 Express").
- this firearm is a conventional over/under box lock shotgun design and may or may not be marked "IZH-94" (or marking may appear in Cyrillic as "I3H-94")
- available in different grades of engraving and embellishment.
- features include: automatic tang safety; forearm and buttstock with pistol-grip of hardwood; extractors and non-selective ejectors; double non-selective triggers; rifle sights and blued metal finish.
- combination guns of this design (or other variants of similar design) may be sold by other retailers.
- this combination gun can be either a rifle barrel over a shotgun barrel ("Sever") or a shotgun barrel over a rifle barrel.
- overall length for 600mm barrel is 1029mm (40.5"), average weight is 3.63kg (8lbs).

Action

- shotgun over-barrel and rifle under-barrel configuration.

Serial Number

- marked on the receiver; usually located on the upper receiver tang (under opening lever), or on the water-table flats, and on bottom of the barrel mono-block.

Calibre

- shotgun barrel chambered for three inch length cartridges, will handle 2 3/4" and shorter ammunition of the specific gauge as marked on the barrel.

Notes

Make

- maker's name may be marked on the receiver/frame, barrels and/or butt plate.
- "Baikal" is a trade name that has been used by a consortium of various Soviet Arsenals and is currently utilized by Izhevsky Mekhanichesky Zavod (Izhmech) for production of sporting firearms for the domestic and export markets.

Model

- "Izubr" (or its Cyrillic equivalent, which resembles "(backwards)N3iobp" may be marked on the firearm; "Izubr" is the Russian name for the elk (Cervus Canadensis).
- this is a gas-operated semi-automatic hunting rifle designed by Gennady Nikonov, the designer of the Nikonov AN-94 rifle; this rifle somewhat resembles the Medved 4 rifle, but operates via a tilting bolt, rather than a rotating bolt.
- features include: blued barrel with blued or engraved receiver/frame; round barrel (may include ventilated rib on some versions); open adjustable sights; sling swivels; right side operating handle on a tilting bolt; right side ejection port; detachable box magazine; cross-bolt safety; and a pistol-grip buttstock with Monte Carlo comb and ventilated rubber buttpad.

Manufacturer

- the Russian Arsenal code for Izhevsky Mekhanichesky Zavod (Izhmech) is a vertical, stylized arrow in a shield preceded by the number five.
- the tradename "Baikal" may be found stamped or engraved on the receiver/frame and also marked on the butt plate.

Action

- gas-operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the receiver/frame.
Shots	- detachable box magazine.

FRT Report

Firearm Reference Number (FRN): 117536
Make: Baikal
Model: MC-106

Summary

Make:	Baikal
Model:	MC-106
Manufacturer:	Russian State Arsenals
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Multi-Barrel
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
117536 - 1	12 GA X 2 3/4"	2	750	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make may or may not be marked on the firearm.

Model

- "MU-106" is marked on the firearm.
- the Russian cyrillic character "U" with a tail, has no direct English translation but is pronounced as "ts" as in "cats".
- Russian manufacturers have substituted this letter with a "C" in their advertisements.
- "MU-106" has been amended to the model designation of "MC-106".
- this is a standard pattern over & under boxlock shotgun with a high degree of hand finishing and embellishment.
- walnut pistol grip stock and three piece forearm (with silver and mother of pearl inlay), blued barrels with ventilated rib, coin finished receiver with deep relief engraving, single trigger and a quick detachable low power scope.

Manufacturer

- the specific arsenal of manufacture is not marked on the firearm.

Action

- over & under barrel configuration.

Serial Number

- serial number is marked on the upper and lower tang and barrel monoblock.

FRT Report

Firearm Reference Number (FRN): 125757
Make: Baikal
Model: MC-108

Summary

Make:	Baikal
Model:	MC-108
Manufacturer:	Russian State Arsenals
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Multi-Barrel
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
125757 - 1	12 GA X 2 3/4"	2	686	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- make may not be marked on the firearm.
- Baikal, formerly known as the firm RAZNOEXPORT, handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold.
- After the demise of the Union of Soviet Socialist Republics (USSR), RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Russian Confederation of Independent States (CIS), Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading.
- When the Izhevsk Mechanical Plant launched its own export sales branch it also took the "brand name" Baikal.
- Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.

Model

- "MU-108" is marked on the firearm.
- the Russian Cyrillic character "U" with a tail, has no direct English translation but is pronounced as "ts" as in "cats".
- Russian manufactures have substituted this letter with a "C" in their advertisements.
- "MU-108" has been amended to the model designation of "MC-108".
- this is a standard pattern over & under boxlock shotgun.
- features include: walnut pistol grip stock and forearm; blued boxlock action; blued barrels with ventilated rib; single trigger; selector safety; and light engraving on the receiver/frame.

Manufacturer

- the specific arsenal of manufacture is not marked on the firearm.

Action

- over & under barrel configuration.

Serial Number

- serial number may be marked on the upper and lower tang and barrel monoblock.

Notes

Make

- the make designation appears on the receiver/frame.

Model

- "MU-7" may appears on the receiver/frame.
- the Russian cyrillic character "U" with a tail, has no direct English translation but is pronounced as "ts" as in "cats".
- Russian manufactures have substituted this letter with a "C" in their advertisements.
- "MU-7" has been amended to the model designation of "MC-7".
- features include: stained wood semi-pistol grip butt stock and slim, removeable forend; blued steel barrels with ventilated top rib; double or single triggers; engraved receiver/frame, trigger guard and tang; fitted recoil pad; top tang mounted opening lever and safety switch.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the manufacturer's symbol appears on the receiver/frame.
Action	- over & under barrel configuration.
Serial Number	- appears on the receiver/frame and may have a Cyrillic letter prefix of suffix.
Calibre	- the calibre designation is marked on the barrel assembly.
Other Markings	- country of manufacture (U.S.S.R.) appear on the receiver/frame.
Remarks	- this is an over and under, top lever, top break, hammerless shotgun featuring fancy grain, hand checkered walnut stock, hand engraved receiver/frame, selective ejectors, single selective trigger and solid raised barrel rib.

FRT Report

Firearm Reference Number (FRN): 27131
Make: Baikal
Model: MC-8

Summary

Make:	Baikal
Model:	MC-8
Manufacturer:	Russian State Arsenal, Izhevsk
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Multi-Barrel
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
27131 - 1	12 GA X 2 3/4"	2	660	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
27131 - 2	12 GA X 2 3/4"	2	711	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- This "make" was a combination of Universal Firearms (Florida, USA), and Baikal (trade name of the various Soviet Arsenals that produced sporting firearms for domestic use and foreign export); they were imported into the U.S through Universal, and into Canada through Ruko.

Model

- this is an over/under boxlock shotgun made specifically for skeet shooters.
- checkered walnut pistol-grip stock with three-piece forearm, single or double triggers, extractors or ejectors, ventilated rib, and an engraved receiver.
- also available with multiple barrel sets.

Action

- over & under barrel configuration, hinged barrel design.
- this firearm was also sold with sets of 2 different barrel lengths, 660 and 711mm, so the owner could switch back and forth at will.

Serial Number

- on receiver; all examples seen have a letter preceeding five digits.

Firearm Reference Number (FRN): 96375
Make: Baikal
Model: Medved

Summary

Make:	Baikal
Model:	Medved
Manufacturer:	Izhevsky Mashinostroitely Zavod (Izhmash)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
96375 - 1	9X53R	3	551	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Baikal" may or may not be marked on the firearm; "Baikal" is a trade-name belonging to Izhmech (the "Izhevsk Mechanical Factory"), but it may be seen applied to the products of other manufacturers, because the Soviet exporting concern, "Razoexport" wished to capitalize on the name.

Model

- the model may or may not be marked on the right side of the firearm in Cyrillic characters resembling "MEABEAb" ("Medved"/"Bear"); early examples of this firearm were marked merely "COK-9x53" ("SOK-9x53", standing for "Samozaryadny Okhotnichy Karabina - 9x53", or "Selfloading Hunting Carbine - 9x53"), on the right side of the receiver/frame rail, above the trigger-guard. The "Medved" and "Medved 2" were manufactured from ca. 1963 until 1975, both in 9x53R, with the difference between the two being that the "Medved 2" had a detachable box magazine, while the "Medved" had a front-hinged attached magazine, similar to the SKS, but with an internal 3-round single-column magazine body in the curved cover.
- features include: blued finish; open adjustable sights, with provision for a detachable scope on a side-rail; above-barrel gas-port and piston; underbarrel cleaning rod; checkered three-piece walnut handguards and pistol-grip buttstock; a hinged single-column magazine; stamped metal top-cover that slides onto milled grooves in the receiver/frame; a right-side operating handle and ejection-port; a single-action trigger mechanism; a rotating safety lever at the right rear of the receiver/frame; and these firearms were available with several grades of engraving and metal inlay, from "plain" to "presentation grade"

Manufacturer

- "Made in USSR" may be marked on the right side of the receiver/frame.
- the manufacturer or logo thereof may or may not be marked on the firearm; may only be marked "Made in Russia".

Action

- gas operated.

Serial Number

- serial-numbered on the receiver/frame and on major parts, with a Cyrillic letter prefix.

Shots

- integral or detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make

- maker's name may be marked on the receiver/frame, barrels and/or butt plate.
- "Baikal" is a trade name that has been used by a consortium of various Soviet arsenals and is currently utilized by Izhevsky Mekhanichesky Zavod (Izhmech) for production of sporting firearms for the domestic and export markets.

Model

- model designation may not be marked on the firearm.
- this model is copy of the model 1891/30.
- features observed: tapered blued barrel; octogonal receiver/frame; hooded front and adjustable rear sights; left side mounted scope bracket; turned down bolt handle; full wood stock.

Manufacturer

- the Russian Arsenal code for Izhevsky Mekhanichesky Zavod (Izhmech) is a vertical, stylized arrow within a shield.
- the tradename "Baikal" may be found stamped or engraved on the receiver/frame and also marked on the butt plate.
- the present Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatization of the Russian State Arsenal at Izhevsk (circa) 1994.
- the product line of Izhevsky Mekhanichesky Zavod (Izhmech) consists of Baikal "Brand name" sporting firearms, Makarov and other pistols under the IZH model prefixes and parts for Kalashnikov type firearms.

Action

- turn-bolt design.

Serial Number

- serial number may be marked on the receiver/frame.

Shots

- permanently fixed box magazine that is loaded from a stripper clip.

Notes

Make

- the "BAIKAL" logo is marked on the right side of the receiver/frame and may be repeated on the butt plate.
- Baikal is a trade name used by Izhevsky Mekhanichesky Zavod (Izhmech).

Model

- introduced in 2000.
- model designation may be marked in Cyrillic letters on the firearm.
- features include: hardwood, walnut or polymer stock and forearm with longitudinal grooves and checkered pistol grip; blued barrel and receiver/frame; tubular magazine mounted under the barrel; external chokes; dual extractors and action bars; trigger block safety; ventilated rib; sling swivels; ventilated recoil pad.
- the bolt locks open after the last round is ejected.
- available in a pistol grip version known as the Jaguar with a rifle sight, also available in black polymer with a folding stock.

Serial Number

- serial number rationalization is unknown.

Barrel

- shorter barrels are available for this model upon request.

Calibre

- the shotgun in 3 1/2" chambering will also feed, chamber and fire 12 Gauge cartridges of 2 3/4" and 3" lengths.

Shots

- tubular magazine located under the barrel.

Remarks

- Formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold.
- After the demise of the Soviet Union, RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading.
- When the Izhevsk Mechanical Plant launched its own export sales branch it also took the "brand name" Baikal.
- Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.

120018 - 4	22 MAG	10	500	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make marked on the firearm as "Baikal".

Model

- this is an unusual straight-pull, bolt-action, repeating rifle that very closely resembles the semi-automatic MP-161K.
- features include: hardwood thumbhole stock with upper handguard; blued finish; open adjustable sights; detachable box magazine; cross-bolt safety at the rear of the trigger guard and a top cover with a rail for mounting a telescopic or red dot sight.
- overall length is 1,000 mm (39 3/8"), average weight is 2.6 Kg (5.72 lbs).

Manufacturer

- the manufacturer's name, or logo thereof, is marked on the firearm.

Action

- straight-pull bolt-action; this firearm can easily be mistaken for a semi-automatic firearm, but it is intended to function as a manually operated repeater.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- numbered on the receiver/frame; this firearm may have a serial number that incorporates Russian alphabetic characters that can easily be confused for Western alphabetic characters.
Shots	- detachable box magazine.

Notes

Make

- the "BAIKAL" logo is marked on the right side of the receiver/frame and may be repeated on the butt plate.
- "Baikal" is a trade name used by Izhevsky Mekhanichesky Zavod (Izhmech).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- introduced in 2000. - model designation may be marked in Cyrillic letters on the firearm. - features include: walnut oil-finished stock with checkered pistol grip, beavertail forearm, blued barrel and receiver/frame; tubular magazine mounted under the barrel; trigger block safety; ventilated rib; screw-in chokes; bead front sight; ventilated recoil pad. - also available with a black synthetic stock. - the "Practical Shooting" version features include: milled slot in the receiver/frame to accommodate Weaver type pincatinny rail; extended tube magazine; enlarged safety and interceptor buttons; redesigned carrier. - overall length for 750mm (29 1/2") barrel is 1280mm (50 3/8"), average weight with wood stock is 3.45kg (7.6lbs).
Manufacturer	- manufactured at the Izhevsky Mekhanichesky Zavod (Izhmech) on the site of the former Russian State Arsenal, Izhevsk. - The present Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatization of the Russian State Arsenal at Izhevsk (circa) 1994. - The product line of Izhevsky Mekhanichesky Zavod (Izhmech) consists of Baikal "Brand name" sporting firearms, Makarov and other pistols under the IZH model prefixes and parts for Kalashnikov type firearms.
Action	- gas operated.
Serial Number	- serial number rationalization is unknown.
Calibre	- the shotgun in 3 1/2" chambering will also feed, chamber and fire 12 Gauge cartridges of 2 3/4" and 3" lengths.
Shots	- tubular magazine located under the barrel.
Canadian Law Comments	- when fitted with the full length magazine tube or with a magazine extension the magazine capacity of this firearm exceeds five cartridges. As such the magazine is subject to Part 4, Prohibited Devices, paragraph 3.(1) (a) (ii) of the "Regulations Prescribing Certain Firearms and Other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".

Notes

Make

- the "BAIKAL" logo is marked on the right side of the receiver/frame and may be repeated on the butt plate.
- "Baikal" is a trade name used by Izhevsky Mekhanichesky Zavod (Izhmech).

Model

- introduced in 2005.
- model designation may be marked in Cyrillic letters on the firearm.
- features include: blued barrel and aluminum alloy receiver/frame; bead front sight; screw-in chokes; tubular magazine mounted under the barrel; trigger block safety; gold trigger; black synthetic stock with checkered pistol grip, beavertail forearm.
- Note: can be operate as a semi-automatic or pump action, selector located on the front underside of the firearm
- overall length for 710mm barrel is 1,240mm (48 7/8"), average weight is 3.7 Kg (8.14 lbs).

Action

- this firearm is considered "Other" for an action-type because it can operate as a semi-automatic (gas operated) or a pump action.
- designed to function primarily as a semi-automatic firearm, with the pump-action mode used to reliably fire low-pressure ammunition such as tear gas rounds or less-lethal rounds.

Serial Number

- the serial number is marked on the receiver/frame.
- the serial number rationalization is unknown.

Calibre

- the calibre designation is marked on the barrel.

Shots

- tubular magazine located under the barrel.
- this tubular magazine is available with a two shot extender.

Canadian Law Comments

- because this firearm is capable of semiautomatic fire, the magazine capacity of this firearm is subject to Part 4, Prohibited Devices, paragraph 3.(1) (a) (ii) of the "Regulations Prescribing Certain Firearms and Other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".

Notes

Make

- "BAIKAL" may be marked on the firearm receiver/frame or butt plate.
- Baikal is a trade name of Izhevsky Mekhanichesky Zavod (Izhmech).

Model

- this is a conventional side by side boxlock shotgun; may or may not be marked "MP-213" (or may be marked in Cyrillic as "MTT-213")
- features removeable interchangeable trigger assembly (supplied with either a single selective or double triggers), automatic ejectors, screw-in choke tubes (full/modified/improved cylinder), checkered pistol-grip buttstock and forearm of walnut, and blued barrels and receiver.
- other options: engraving, the other trigger assembly.
- NOTE: - Model delineation: MP-213 has twin independant triggers, MP-213A has single selective trigger, MP-213B has twin universal triggers and MP-213C comes with two sets of triggers, one single selective and the other is a twin trigger.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- manufactured at the Izhevsky Mekhanichesky Zavod (Izhmech) on the site of the former Russian State Arsenal, Izhevsk.
- The present Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatization of the Russian State Arsenal at Izhevsk (circa) 1994.
- The product line of Izhevsky Mekhanichesky Zavod (Izhmech) consists of Baikal "Brand name" sporting firearms, Makarov and other pistols under the IZH model prefixes and parts for Kalashnikov type firearms.

Action

- side by side barrel configuration.

Serial Number

- serial number rationalization unknown.
- the serial number is usually found marked on the receiver; usually located on the upper receiver tang (under opening lever), or on the water-table flats, and on bottom of the barrel mono-block.

Calibre

- chambered for three inch length cartridges, will handle 2 3/4" and shorter ammunition of the specific gauge as marked on the barrel.

Remarks

- Formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold.
- After the demise of the Soviet Union, RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading.
- When the Izhevsk Mechanical Plant launched its own export sales branch it also took the "brand name" Baikal.
- Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.

Notes

Make

- may or may not be marked "BAIKAL".
- "Baikal" is a trade name of a consortium of various Soviet Arsenals producing sporting firearms for the domestic and export markets.

Model

- this is a conventional over/under boxlock shotgun; may or may not be marked "MP-233" (or may be marked in Cyrillic as "MTT-233")
- features include: removable interchangeable trigger assembly (supplied with either a single selective or double triggers); automatic ejectors; screw-in choke tubes (full/modified/improved cylinder); walnut, checkered pistol-grip buttstock and forearm; blued, plain or ported barrels with a top mounted ventilated rib; blued or brushed nickel receiver/frame.

Manufacturer

- the present Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatization of the Russian State Arsenal at Izhevsk (circa) 1994.
- the product line of Izhevsky Mekhanichesky Zavod (Izhmech) consists of Baikal "Brand name" sporting firearms, Makarov and other pistols under the IZH model prefixes and parts for Kalashnikov type firearms.

Action

- over and under barrel configuration.

Serial Number

- marked on the receiver/frame; usually located on the upper tang (under opening lever), or on the water-table flats and on the bottom of the barrel mono-block.

Calibre

- chambered for three inch length cartridges, will handle 2 3/4" and shorter ammunition of the specific gauge as marked on the barrel.
- both barrels chambered for the same cartridge.

Remarks

- Formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold.
- After the demise of the Soviet Union, RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading.
- When the Izhevsk Mechanical Plant launched its own export sales branch it also took the "brand name" Baikal.
- Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.

Notes

Make

- maker's name may be marked on the receiver/frame, barrels and/or butt plate.
- "Baikal" is a trade name that has been used by a consortium of various Soviet Arsenals and is currently utilized by Izhevsky Mekhanichesky Zavod (Izhmech) for production of sporting firearms for the domestic and export markets.

Model

- model name may be marked on the firearm.
- this shotgun is also available with an oval-spiral rifled barrel unit for the firing of shotgun slugs; this unit has sights that are adjustable for windage and elevation.
- features include: box lock action; over/under barrel configuration; top lever opening; automatic tang safety; chrome plated bores and chambers; forearm and buttstock with pistol-grip of hardwood; selective ejectors or extractors as selectable by the operator; gold plated single or double triggers; fixed or interchangeable chokes; single sight-bead; ventilated rib on top barrel; blued metal finish.

Manufacturer

- the Russian Arsenal code for Izhevsky Mekhanichesky Zavod (Izhmech) is a vertical, stylized arrow in a shield preceded by the number five.
- the tradename "Baikal" may be found stamped or engraved on the receiver/frame and also marked on the butt plate.

Action

- over/under barrel configuration.

Serial Number

- serial number is marked on the receiver/frame; it maybe located on the upper receiver tang underneath the action opening lever or on the action flats.

- this firearm is a commercial version of the PSM (IZH-75) pistol with an adjustable rear sight.
- at present (1999) the Baikal MP-441 pistol is a product of the Izhevsky Mekhanichesky Zavod (Izhmech) and is featured in their 1999 catalog.

Manufacturer

- MANUFACTURER: The Russian Arsenal code for Izhevsky Mekhanichesky Zavod (Izhmech) is a vertical, stylized arrow in a shield preceded by the number five.
- the tradename "Baikal" may be found moulded into the plastic grips or engraved on the pistol slide.

Action

- blow-back operated.

Serial Number

- serial number rationalization unknown.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- Formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold.
- After the demise of the Soviet Union, RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading.
- When the Izhevsk Mechanical Plant launched its own export sales branch it also took the "brand name" Baikal.
- Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make

- "BAIKAL" is marked on the firearm.
- this firearm is commonly called the "Makarov" - although it goes by other designations for commercial sales or export markets.
- this firearm is designated the model Baikal MP-442 when manufactured by IZHMECH for commercial sales and export.

Model

- "442" or "MP-442" is marked on the left side of the slide.
- "MP" in the model designation is for Makarov Pistol.
- MP-442 is a commercial version of the Makarov model PM with an adjustable rear sight.
- MP-442 pistol is a product of the Izhevsky Mekhanichesky Zavod (Izhmech) and was featured in their 1999 catalog.
- MP-422 is a blow back operated, semi-automatic pistol utilizing a detachable box magazine.
- features include: round barrel; flat sided slide with right side ejection, rear grip serrations, thumb actuated safety/decocker on the rear left side, and fixed or adjustable sights; exposed hammer; single/double action trigger mechanism; magazine release located on the left side of the receiver/frame; checkered synthetic grips; blued, bright nickel-plate or brushed nickel finish.

Manufacturer

- the Russian Arsenal code for Izhevsky Mekhanichesky Zavod (Izhmech) is a vertical, stylized arrow in a shield surrounded by a circle and may be found on the left rear of both the slide and the receiver.
- the tradename "Baikal" may be found moulded into the plastic grips or engraved on the pistol slide.

Action

- blowback operated in 9MM MAKAROV & 380 AUTO calibres and delayed blow-back in 9MM LUGER calibre.

Serial Number

- serial number rationalization: found marked above the serial number on the left rear of the receiver/frame above the grip panels. The serial numbers observed in the prime reference book consisted of a three letter prefix followed by four digits.
- a recent imports into the United States must be marked with the importer's name and address. These recent imports may also be re-serial numbered to avoid confusion caused by non-roman alphabet letters and non-Arabic numerals.

Shots

- detachable box magazine.

Other Markings

- formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold.
- after the demise of the Soviet Union, RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading.
- when the Izhevsk Mechanical Plant launched its own export sales branch it also took the "brand name" Baikal.
- Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.

Remarks

- Izhmech has its origins in 1942 when the manufacturing at the Russian State arsenal at Izhevsk was split into two entities; Izhmash & Izhmech.
- immediate production in 1942, at Izhmech, consisted of Tokarev TT33 pistols, Model 1895 Nagant revolvers and PTRS Anti-Tank rifles.
- after WWII Izhmech produced the PM Makarov pistol and the APS Stechkin pistol.
- the present Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatisation of the Russian State Arsenal at Izhevsk (circa) 1994.
- the product line of Izhevsky Mekhanichesky Zavod (Izhmech) consists of Baikal "Brand name" sporting firearms, Makarov and other pistols under the IZH model prefixes and parts for Kalashnikov type firearms.
- the other arms factory at Izhevsk (Izhmash - Joint Stock Company) product line consists of Kalashnikov type rifles, carbines and shotguns (Saiga), Dragunov (SVD) type sporting rifles (TIGR).

Make

- "BAIKAL" or the Baikal logo is usually marked on the firearm.
- "Baikal" is a trade name that has been used by a consortium of various Soviet arsenals and is currently utilized by Izhevsky Mekhanichesky Zavod (Izhmech) for production of sporting firearms for the domestic and export markets.

Model

- "MP-449" is usually marked on the firearm.
- this is a compact version of the Margolin target pistol, chambered for 25 AUTO/6.35mm, and made for sport shooting or plinking.
- features include: blued/black finish; black synthetic grips; open fixed sights; detachable box magazine; and combination slide-stop/safety.

Manufacturer

- the Russian Arsenal code for Izhevsky Mekhanichesky Zavod (Izhmech) is a vertical, stylized arrow within a shield.
- the tradename "Baikal" may be found stamped or engraved on the receiver/frame and also marked on the grips.
- the present Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatization of the Russian State Arsenal at Izhevsk (circa) 1994.

Action

- blowback.

Serial Number

- serial-numbered on the receiver/frame.

Shots

- detachable box magazine.

116255 - 3	177 PELLET	1	450	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "BAIKAL" may be marked on the air rifle and is a trademark used by Izhmech.

Model

- "MP512" is marked on air rifle.
- this is a standard-pattern break-barrel spring-piston air rifle.
- features include: synthetic or wood pistol-grip stock; blued barrel and receiver/frame; scope mount rail; hooded front sight; adjustable rear sight and automatic safety.

Manufacturer

- these airguns are manufactured at Izhevsk Arsenal in Russia for domestic sales and for export.

Action

- break action, spring piston air rifle.
- at least two variants of this particular model exist:

Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- numbered on compression chamber and/or barrel block; may contain Cyrillic characters.

Calibre

- marked on the left side of the receiver/frame.

119539 - 2	BB	400	190	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is marked on the left side of the receiver/frame in script as "Baikal".

Model

- introduced in 2006/2007.
- "MP-661K" and "DROZD" are marked on the right side of the receiver/frame.
- this is a CO2 powered "air gun" with a user-selectable burst feature.
- features include: synthetic black or yellow furniture and detachable shoulder-stock; battery-powered firing mechanism selectable for semi-automatic, three-shot bursts, or six-shot bursts; and adjustable open sights.
- a variant version of this firearm was introduced circa 2009 which featured the following; a hopper loading system with increased shot capacity, this hopper was attached underneath the forearm and can hold three 12g CO2 cylinders or one 88g cylinder; a completely redesigned skeleton stock; Picatinny rails on top of the receiver/frame and on the front underside of the forearm; a rate-of-fire adjuster allowing 300, 450 or 600 shots per minute; weight is 2,6 kg.

Manufacturer

- factory identifier may or may not be marked on the firearm.

Type

- this resembles a large automatic pistol or submachine gun.

Action

- CO2 powered.
- selective fire (Semi-Automatic or Full Automatic).
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- numbered at the left rear side of the receiver/frame.
Canadian Law Comments	- references indicate a muzzle velocity of 164.9 mps (541 fps) and a muzzle energy of 4.49 Joules with a 5.1 grain BB. - because this firearm does not discharge a projectile at a muzzle energy exceeding 5.7 Joules, this is a CC2 "firearm"/CC 84(3) Exempted.

Notes

Make

- "BAIKAL" was observed marked on the right side of the receiver/frame.
- "Baikal" is a trade name that has been used by a consortium of various Soviet arsenals and is currently utilized by Izhevsky Mekhanichesky Zavod (Izhmech) for production of sporting firearms for the domestic and export markets.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "MP-71" was observed marked on the left of the slide. - features observed: round rifled barrel; flat sided slide with rear grip serrations, left side mounted decocking/safety lever, fixed front sight and adjustable rear sight; rounded combat style hammer; single/double action trigger mechanism; action release is located on the left side of the receiver/frame; magazine release is located on the bottom of the rear grip strap and a lanyard loop may be located on the left side of the rear grip strap of the receiver/frame; black checkered grip plates; blued finish.
Manufacturer	- the Russian Arsenal code for Izhevsky Mekhanichesky Zavod (Izhmech) is a vertical, stylized arrow within a shield. - the tradename "Baikal" may be found stamped or engraved on the receiver/frame. - the present Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatization of the Russian State Arsenal at Izhevsk (circa) 1994. - the product line of Izhevsky Mekhanichesky Zavod (Izhmech) consists of Baikal "Brand name" sporting firearms, Makarov and other pistols under the IZH model prefixes and parts for Kalashnikov type firearms.
Action	- blowback operated.
Serial Number	- the serial number is marked on the receiver/frame and may be repeated on the slide. - observed serial number consisted of nine numbers.

Notes

Make

- "BAIKAL" was observed marked on the right side of the receiver/frame.
- "Baikal" is a trade name that has been used by a consortium of various Soviet arsenals and is currently utilized by Izhevsky Mekhanichesky Zavod (Izhmech) for production of sporting firearms for the domestic and export markets.

Model

- "IZH-71H" was observed marked on the left side of the slide.
- this is the variant of the model IZH-71 differing only by a higher magazine capacity.
- features observed: double action trigger mechanism; blued receiver/frame and slide; fixed front sight with an adjustable rear sight; serration's on the slide with a decocking lever located at the rear of the slide; rounded combat style hammer; black checkered grips and may have a lanyard loop located on the left side of the receiver/frame; trigger activated laser pointer available on special order.
- overall length with a 94mm (3 3/4") barrel is 165mm (6 1/2"), average weight is 0.78kg (1.72lb)

Manufacturer

- the Russian Arsenal code for Izhevsky Mekhanichesky Zavod (Izhmech) is a vertical, stylized arrow within a shield.
- the tradename "Baikal" may be found stamped or engraved on the receiver/frame.
- the present Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatization of the Russian State Arsenal at Izhevsk (circa) 1994.
- the product line of Izhevsky Mekhanichesky Zavod (Izhmech) consists of Baikal "Brand name" sporting firearms, Makarov and other pistols under the IZH model prefixes and parts for Kalashnikov type firearms.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- blowback operated.
Serial Number	- the serial number is marked on the receiver/frame and may be repeated on the slide.
Shots	- detachable box magazine.

Notes

Make

- may be marked "BAIKAL" (RUSSIA) on the left-hand side of the receiver/frame.
- Baikal is a trade name used by IZHMECH for export to foreign countries.

Model

- the model designation may be marked on the firearm and contain Cyrillic characters.
- this is a standard-pattern over/under boxlock double rifle, based on the IZH-27 over/under shotgun.
- features include: checkered hardwood pistol-grip stock and forearm; blued barrels and receiver/frame; fixed open sights; integral adjustment mechanism under forearm to regulate the rifle for different bullet weights/velocities; double triggers; tang safety; and a barrel band at the muzzle.

Manufacturer

- manufactured at the Izhevsky Mekhanichesky Zavod (Izhmech) on the site of the former Russian State Arsenal, Izhevsk in the Republic of Udmurtia.

Type

- over/under design with the rifle barrel over the shotgun barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- top lever, front hinged, tipping barrel, "break-open sub-action type". - over / under barrel configuration.
Serial Number	- serial number rationalization not known. - marked on the receiver; usually located on the upper receiver tang (under opening lever), or on the water-table flats, and on bottom of the barrel mono-block.
Remarks	- formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold. - after the demise of the Soviet Union, RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading. - when the Izhevsk Mechanical Plant (Izhmech) launched its own export sales branch it also took the "brand name" Baikal. - Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.

Notes

Make

- maker's name may be marked on the receiver/frame, barrels and/or butt plate.
- "Baikal" is a trade name that has been used by a consortium of various Soviet arsenals and is currently utilized by Izhevsky Mekhanichesky Zavod (Izhmech) for production of sporting firearms for the domestic and export markets.

Model

- model name may be marked on the firearm.
- firearm is available in either centre fire rifle cartridge which is also called the "MP94 Centerfire" or in rimfire cartridge which is called the "MP-94 Rimfire".
- this combination gun features a shotgun barrel over the rifle barrel or two rifle barrels.
- features; over/under box lock action, top lever opening; steel receiver/frame available in blued finish or nickel coloured finish; double triggers; automatic top tang safety; polymer buttstock and forend; also available with hardwood semi-pistol grip buttstock with checkering and hardwood forend with checkering; extractors; supplied with four screw-in chokes for the shotgun barrel; iron rifle sights and scope rail; also available with a Picatinny Rail; ventilated rubber butt pad or plastic butt plate on the rimfire versions; blued finish on the barrels.
- overall length is 1050mm (41 3/8"), average weight is 3.8 Kg (8.38 lbs).

Manufacturer

- the Russian Arsenal code for Izhevsky Mekhanichesky Zavod (Izhmech) is a vertical, stylized arrow within a shield.
- the tradename "Baikal" may be found stamped or engraved on the receiver/frame and also marked on the butt plate.
- the present Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatization of the Russian State Arsenal at Izhevsk (circa) 1994.
- the product line of Izhevsky Mekhanichesky Zavod (Izhmech) consists of Baikal "Brand name" sporting firearms, Makarov and other pistols under the IZH model prefixes and parts for Kalashnikov type firearms.

Action

- over and under configuration, hinged barrel design.

Serial Number

- serial number is marked on the receiver/frame.
- observed serial number consisted of nine numbers and a letter "B" suffix.

57218 - 1	22 LR	1	640	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Baikal" is usually marked on the butt plate.
- "TO3" or "TOZ" and/or the "T" logo is marked on the firearm.
- "3" in "TO3" is a Russian Cyrillic character for the English letter "Z".
- "T" logo/symbol consists of the capital letter "T" within a circle, both of which are subsequently enclosed within a triangle.
- "TOZ" or "TO3" or the "T" logo was used on firearms manufactured by the Russian State Arsenal, Tula" or "Tulsky Oruzheiny Zavod (TOZ)".
- "TOZ" firearms were sold in North America under the brand names of "Baikal" and "Vostok".
- "Made in Russia" or "Made in USSR" may be marked on the firearm.

Model

- marked on the receiver ring.
- note that the Russina abbreviation "TOZ" appears as "TO3"
- half-stock with a straight comb, an unusually long elongated fore-end.
- micro-adjustable rear sight and hooded front sight.
- manufactured from approximately 1960 to 1988.

Manufacturer

- "TOZ" or "TO3" or the "T" logo was used on firearms manufactured by the "Russian State Arsenal, Tula" and "Tulsky Oruzheiny Zavod".
- "T" logo/symbol consists of the capital letter "T" within a circle, both of which are subsequently enclosed within a triangle.

Action

- bolt assisted.

Notes

Make

- "Baikal" is usually marked on the buttplate.
- "TO3" or "TOZ" and/or the "T" logo is marked on the firearm.
- "3" in "TO3" is a Russian Cyrillic character for the English letter "Z".
- "T" logo/symbol consists of the capital letter "T" within a circle, both of which are subsequently enclosed within a triangle.
- "TOZ" or "TO3" or the "T" logo was used on firearms manufactured by the Russian State Arsenal, Tula" or "Tulsky Oruzheiny Zavod (TOZ)".
- "TOZ" firearms were sold in North America under the brand names of "Baikal" and "Vostok".
- "Made in Russia" or "Made in USSR" may be marked on the firearm.

Model

- sample firearm noted with the model designation marked on the bottom of the trigger guard as, "TO3-34 E" with "TO3-34 EP" marked on the left side of the barrel lump; note: in the prefix TO3, the last letter is the Cyrillic character for the English letter "Z"; the model name then becomes, "TOZ-34 EP".
- this is a deluxe grade shotgun with engraved receiver/frame and stock.
- box lock, hammerless, over/under barrel configuration, top lever opening.
- features may include; selective automatic ejectors; silver plated double triggers; ventilated rib on the top barrel; top tang mounted sliding-type safety; blued engraved receiver/frame and trigger guard with partial engraving on the rear of the top barrel; full pistol grip walnut stock with hand checkering and engraved game scenes; one inch sling swivels.

Manufacturer

- "TOZ" or "TO3" or the "T" logo was used on firearms manufactured by the "Russian State Arsenal, Tula" and "Tulsky Oruzheiny Zavod".
- "T" logo/symbol consists of the capital letter "T" within a circle, both of which are subsequently enclosed within a triangle.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- over & under pattern.
Serial Number	- known example had the serial number marked on the left side of the receiver/frame on the watertable.
Calibre	- calibre designation is usually proofmarked on the left side of the barrel flat as, "12x70", which indicates a chambering of 12 GA X 2-3/4".
Canadian Law Comments	- note: Cyrillic characters may prefix the numbers; these characters are not recognized as part of the serial number for registration purposes.
Other Markings	- known example marked "Made in Russia" on the front underside of the receiver/frame.

146744 - 2	69 PERCUSSION	1	1111	Antique CC 84(1) "antique firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the manufacturer is marked on the lockplate as "M. BAKER".

Model

- the model is not marked on the firearm
- this is an example of the 1797 Pennsylvania Contract Flintlock Musket (a copy of the French Charleville 1763 Flintlock Musket), adopted by the State of Pennsylvania in 1797 and supplied by Melchoir Baker, of Fayette County, Pennsylvania,, under a contract issued by the state government to arm the state militia.
- known Baker 1797 muskets are marked "M. BAKER" on the lockplate, along with a Pennsylvania property mark of "CP" (Commonwealth of Pennsylvania).
- features include: browned finish; fixed open sights; iron mountings and three barrel bands; an underbarrel ram-rod; flintlock mechanism with cock and frizzen on the right-side lockplate; sling swivels at second barrel band and front of trigger-guard; and straight-grip stock with an iron buttplate.
- these firearms may also be seen converted to percussion ignition.

Manufacturer

- the manufacturer is marked on the lockplate as "M. BAKER".
- Melchoir Baker was a gunsmith based in Fayette County, Pennsylvania from the mid-1700s to early 1800s, who produced 1798-pattern muskets under contract to the State of Pennsylvania.

Action

- muzzle-loaded flintlock single-shot.

Notes

Make

- "W.H. BAKER & CO." is normally marked on the firearm.
- William H. Baker was a prolific designer, gunsmith, and industrialist during the mid-to-late 1800s, who began as a small-town gunsmith in Greene, New York, and went on to set up gunmaking businesses in Marathon and Lisle, New York.
- In 1877, he moved to Syracuse, New York, and founded the "W.H. Baker & Co." gunmaking company, in concert with his brother (Ellis L. Baker), and Lyman C. (L.C.) and Leroy H. Smith.
- In 1883, he was also a founding partner of the Ithaca Gun Company.
- In 1886, after a falling-out with the other partners of Ithaca, Baker returned to Syracuse, New York, in order to found the Syracuse Forging Company, which was moved to Batavia, New York in 1889, after a fire destroyed the Syracuse location. - In 1890, after W.H. Baker's death, the new company was renamed as the "Baker Gun & Forging Company".

Model

- manufactured from 1877 to 1888.
- model designation is not marked on the firearm.
- differs from the second type by having a separate opening lever in front of the trigger guard (verses the inside trigger guard lever of the second type).
- features include: triple barrels; double external hammers; top break, double trigger; box lock, external lever at front of trigger guard which opens the action; two piece shotgun stock, with an folding elevating rear sight mounted on the upper tang.
- available graded from one to five, with five being the most elaborate.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make

- "W.H. BAKER & CO." is normally marked on the firearm.
- William H. Baker was a prolific designer, gunsmith, and industrialist during the mid-to-late 1800s, who began as a small-town gunsmith in Greene, New York, and went on to set up gunmaking businesses in Marathon and Lisle, New York.
- In 1877, he moved to Syracuse, New York, and founded the "W.H. Baker & Co." gunmaking company, in concert with his brother (Ellis L. Baker), and Lyman C. (L.C.) and Leroy H. Smith.
- In 1883, he was also a founding partner of the Ithaca Gun Company.
- In 1886, after a falling-out with the other partners of Ithaca, Baker returned to Syracuse, New York, in order to found the Syracuse Forging Company, which was moved to Batavia, New York in 1889, after a fire destroyed the Syracuse location. - In 1890, after W.H. Baker's death, the new company was renamed as the "Baker Gun & Forging Company".

Model

- the model is not marked on the firearm.
- manufactured for a short time in 1880; thereafter, this design was built by the LC Smith Gun Company.
- this is the second of two types of "drilling"-style combination gun designed by W. H. Baker
- differs from the first type by having a cocking lever for the rifle barrel hammer inside the trigger guard (verses the lengthened, in FRONT of the trigger guard lever of the first type); both of these combination guns are opened by pushing forward on the front trigger, and either trigger will fire the rifle barrel once the rifle hammer is cocked.
- features include: triple barrels; double external hammers; internal third hammer cocked by pushing forward on a lever at the front of the trigger-guard; top break, double trigger; box lock; two piece shotgun stock, with an folding elevating rear sight mounted on the upper tang.
- available graded from one to five, with five being the most elaborate.

Notes

Make

- "BAKER" or "W.H. BAKER" is normally marked on the firearm.
- William H. Baker was a prolific designer, gunsmith, and industrialist during the mid-to-late 1800s, who began as a small-town gunsmith in Greene, New York, and went on to set up gunmaking businesses in Marathon and Lisle, New York.
- In 1877, he moved to Syracuse, New York, and founded the "W.H. Baker & Co." gunmaking company, in concert with his brother (Ellis L. Baker), and Lyman C. (L.C.) and Leroy H. Smith.
- In 1883, he was also a founding partner of the Ithaca Gun Company.
- In 1886, after a falling-out with the other partners of Ithaca, Baker returned to Syracuse, New York, in order to found the Syracuse Forging Company, which was moved to Batavia, New York in 1889, after a fire destroyed the Syracuse location. - In 1890, after W.H. Baker's death, the new company was renamed as the "Baker Gun & Forging Company".

Model

- the model is not marked on the firearm; this is a description of the firearm type.
- this is a heavy octagonal-barrel percussion target rifle manufactured by William Henry Baker prior to 1877, while Baker was still living and working in Greene, Marathon, or Lisle, New York
- features include: browned or blued finish; open fine-screw-adjustable sights (some examples may have screw-adjustable optical sights of a type patented by Baker on Dec. 8, 1863); octagonal barrel; underbarrel ramrod thimbles; no forearm; straight-grip walnut stock with German silver finishings and patchbox; external manually-cocked hammer on a short frame; single trigger; finial trigger-guard/grip; and a crescent butt.

Manufacturer

- "BAKER" or "W.H. BAKER" is normally marked on the firearm.
- William H. Baker was a prolific designer, gunsmith, and industrialist during the mid-to-late 1800s, who began as a small-town gunsmith in Greene, New York, and went on to set up gunmaking businesses in Marathon and Lisle, New York.
- In 1877, he moved to Syracuse, New York, and founded the "W.H. Baker & Co." gunmaking company, in concert with his brother (Ellis L. Baker), and Lyman C. (L.C.) and Leroy H. Smith.
- In 1883, he was also a founding partner of the Ithaca Gun Company.
- In 1886, after a falling-out with the other partners of Ithaca, Baker returned to Syracuse, New York, in order to found the Syracuse Forging Company, which was moved to Batavia, New York in 1889, after a fire destroyed the Syracuse location. - In 1890, after W.H. Baker's death, the new company was renamed as the "Baker Gun & Forging Company".

Notes

Make

- "BALIKLI SILA SANAYI" ("Balikli Weapons Factory") and/or the Balikli logo of "BS" ("Balikli Silah") inside a shield may or may not be marked on the firearm.
- Balikli Silah Sanayi was founded in Konya, Turkey, in 2004, as a manufacturer of shotguns, shotgun parts and accessories.

Model

- Introduced in 2014.
- "CATUS" is marked on the receiver/frame.
- this is a box magazine-fed, gas-operated semi-automatic manufactured in 410 and 28 gauges, and somewhat resembling a Browning Automatic Rifle.
- features include: blued or nickeled finish; screw-in interchangeable muzzle brakes/flash hiders and choke tubes; fluorescent rifle-style sights with rear sight on an accessory rail; checkered walnut or synthetic pistol-grip stock and forearm; right-side operating handle, ejection port, and magazine release; detachable box magazine; cross-bolt safety at the rear of the trigger guard; sling swivels.

Manufacturer

- "BALIKLI SILA SANAYI" ("Balikli Weapons Factory") and/or the Balikli logo of "BS" ("Balikli Silah") inside a shield may or may not be marked on the firearm.
- Balikli Silah Sanayi was founded in Konya, Turkey, in 2004, as a manufacturer of shotguns, shotgun parts and accessories.

Action

- gas-operated.

Serial Number

- serial-numbered on the receiver/frame.

Shots

- Introduced in 2017 with 2, 5, and 7 shot capacity, magazines.
- Detachable box magazine.

- serial-numbered on the receiver/frame.

Barrel

- not including the muzzle attachment - flash hider

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- underbarrel tubular magazine.

Canadian Law Comments

this firearm is normally Non-Restricted unless affected by the following conditions:

1) by combining a barrel from a licensed firearms manufacture that is less than 406mm (16.0") in length and a receiver/frame fitted with a pistol grip only, this firearm may be deemed a "handgun" and therefore "RESTRICTED" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (a) of the Criminal Code of Canada.
- "handgun" means a firearm that is designed, altered or intended to be aimed and fired by the action of one hand, whether or not it has been redesigned or subsequently altered to be aimed and fired by the action of both hands.

2) "a firearm that is designed or adapted to be fired when reduced to a length of less than 660 mm by folding, telescoping or otherwise" and therefore "Restricted" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (c) of the Criminal Code of Canada.

3) by combining a barrel that has been altered to less than 457mm (18.0") in length by a non-licensed firearms manufacturer (cottage industry, individual or gunsmith) regardless of whether the shotgun has a pistol grip or conventional stock, this firearm is "PROHIBITED" and subject to the definition of a "prohibited firearm" in Part III/Firearms and Other Weapons of Section 84 of the Criminal Code of Canada.
- "prohibited firearm" means a firearm that is adapted from a rifle or shotgun, whether by sawing, cutting or any other alteration, and that, as so adapted,
(i) is less than 660 mm in length, or
(ii) is 660mm or greater in length and has a barrel less than 457 mm in length.

30769 - 3	44 RF	1	612	Antique AFR, Section 1, para. 2	Manufacturer Specifications and Commercial Customization	

Notes

Make

- The Ballard rifle was invented and patented by a C.H. Ballard in 1861, and was subsequently manufactured by 6 different companies until approximately 1890.
- these rifles all share the same basic design, and will often have the patent date (Nov. 5, 1861) displayed somewhere on the firearm.
- The most prolific manufacturer of this design was J.M. Marlin, who produced Ballards from 1873 until 1890, when they discontinued the design in favour of their lever-action repeater.

Model

- This military carbine was manufactured for the Union forces during the U.S. Civil War.
- these rifles are falling-block single-shots with an externally-operated extractor, located at the bottom of the fore-end in front of the chamber.
- To operate, the lever/trigger-guard is swung down and forwards, which exposes the chamber and places the hammer at half-cock. The extractor knob can then be pulled to extract a fired case in the chamber, allowing a new round to be chambered. After closing the lever again, the firer can then pull the hammer to full-cock, and is then ready to aim and fire.
- approximately 3300 of these carbines were delivered to various state and federal agencies between January and September 1864.

Manufacturer

- Ball and Williams manufactured Ballards from 1861 through 1864, after which this company was re-organized as R. Ball & Company.

Action

- lever-operated falling-block.

Serial Number

- Ball and Williams produced this carbine in two distinct serial-no. blocks; from 1500 through 7500, and from 8500 through 10500.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- "Ball & Williams" located on receiver or barrel.

Remarks

- This military carbine was manufactured for the Union forces during the U.S. Civil War; these rifles are falling-block single-shots with an externally-operated extractor, located at the bottom of the forend in front of the chamber.
- To operate, the lever/trigger-guard is swung down and forwards, which exposes the chamber and places the hammer at half-cock. The extractor knob can then be pulled to extract a fired case in the chamber, allowing a new round to be chambered. After closing the lever again, the firer can then pull the hammer to full-cock, and is then ready to aim and fire.

Notes

Make

- The Ballard rifle was invented and patented by a C.H. Ballard in 1861, and was subsequently manufactured by six different companies until approximately 1890; these rifles all share the same basic design, and will often have the patent date (Nov. 5, 1861) displayed somewhere on the firearm.
- This design has a comparatively weak breech, and is not suitable for modern high-power cartridges.
- The most prolific manufacturer of this design was J.M. Marlin, who produced Ballards from 1873 until 1890, when they discontinued the design in favour of their lever-action repeater.

Model

- These carbines were manufactured with the Merwin & Bray dual-purpose breech-block, and were taken from the same serial-number range as R. Ball's Sporting rifles; only approximately 1000 of these carbines were built, but they all have a caliber marking ("No. 44") on the receiver near the breech.

Manufacturer

- R. Ball & Co. was the company that succeeded Ball & Williams after the "Williams" of the latter left the company in 1865; this company made Ballard rifles and carbines from 1865 through 1866.

Action

- lever-operated falling-block.

Serial Number

- approx. 16400 through 17700.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- This military carbine was manufactured for the Union forces during the U.S. Civil War; these rifles are falling-block single-shots with an externally-operated extractor, located at the bottom of the forend in front of the chamber.
- To operate, the lever/trigger-guard is swung down and forwards, which exposes the chamber and places the hammer at half-cock. The extractor knob can then be pulled to extract a fired case in the chamber, allowing a new round to be chambered. After closing the lever again, the firer can then pull the hammer to full-cock, and is then ready to aim and fire.

Notes

Make	- The Ballard rifle was invented and patented by a C.H. Ballard in 1861, and was subsequently manufactured by six different companies until approximately 1890; these rifles all share the same basic design, and will often have the patent date (Nov. 5, 1861) displayed somewhere on the firearm. This design has a comparatively weak breech, and is not suitable for modern high-power cartridges. The most prolific manufacturer of this design was J.M. Marlin, who produced Ballards from 1873 until 1890, when they discontinued the design in favour of their lever-action repeater.
Model	- This was a military carbine produced for a U.S. Army contract awarded to Merwin & Bray of Worcester, Mass; these had externally-operated extractors, two-piece breech-blocks, and carbine-length barrels and stocks; many of these will be found with "Merwin & Bray" marked on the frame, though Merwin & Bray actually had the firearms produced by either Dwight, Chapin, and Co., or by Ball & Williams after Dwight et al. went bankrupt.
Manufacturer	- a sub-contractor for the firm of Merwin & Bray, of Worcester, Mass., from 1862 to 1864, that began producing parts and whole guns to satisfy a government contract; this firm went bankrupt after many of their firearms didn't pass acceptance tests, so Merwin & Bray had the remainder of their stock assembled by Ball & Williams.
Action	- lever-operated falling-block.
Serial Number	- these rifles serial-numbered 1 through approximately 1000; located on right side of receiver.
Other Markings	- "Merwin & Bray/Agt's N.Y." located on right side of receiver.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make

- "BALLARD'S PATENT" over "NOV. 5, 1861" is usually marked on the left side of the receiver/frame.
- Ballard rifle was invented and patented by a C.H. Ballard in 1861, and was subsequently manufactured by 6 different companies until approximately 1890; these rifles all share the same basic design, and will often have the patent date (Nov. 5, 1861) displayed somewhere on the firearm. This design has a comparatively weak breech, and is not suitable for modern high-power cartridges. The most prolific manufacturer of this design was J.M. Marlin, who produced Ballards from 1873 until 1890, when they discontinued the design in favour of their lever-action repeater.

Model

- these "carbine" versions of Merrimack's Ballard rifle were manufactured specifically for guards at two of New York's prisons, many of them will have state property marks, besides being marked as being made by "Merrimack Arms & Mfg. Co".

Manufacturer

- "MERRIMACK ARMS & MFG. CO." over "NEWBURYPORT, MASS." over "BALLARD'S PATENT" over "NOV. 5, 1861" is usually marked on the left side of the receiver/frame.

Action

- lever-operated falling-block.

Serial Number

- references indicate that these rifles were produced in two distinct serial number blocks, from 18500 through 18600, and from 19400 through 19500.
- samples have been reported outside these number blocks.

Calibre

- the calibre may be marked on the firearm as "No 44".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- "Merrimack Arms & Mfg Co / Newburyport Mass" marked on the left-hand side of the receiver/frame.

Remarks

- this carbine was manufactured between 1867 and 1869.
- these firearms are falling-block single-shots with an externally-operated extractor, located at the bottom of the forend in front of the chamber.
- to operate, the lever / trigger-guard is swung down and forwards, which exposes the chamber and places the hammer at half-cock. The extractor knob can then be pulled to extract a fired case in the chamber, allowing a new round to be chambered. After closing the lever again, the firer can then pull the hammer to full-cock, the firearm is then ready to fire.

17328 - 1	41 SHORT RF	1	72	Antique AFR, Section 1, para. 6	Manufacturer Specifications and Commercial Customization	

Notes

Make

- all known examples marked "BALLARD'S" (sometimes with additional markings) on the top of the barrel.

Model

- this is a single-shot tipping barrel derringer built by C.H. Ballard & Co. circa 1870.
- brass or iron bird's-head receiver/frame with walnut grips, spur trigger, half-round/half-octagonal barrel, barrel latch on the right side, most examples were originally silver-plated.
- while brass receiver/framed examples are normally marked "BALLARD'S" on top of the barrel and "C.H. BALLARD & CO / WORCESTER MASS / PAT'D JUNE 22, 1869" on the left side of the barrel, iron-framed examples normally bear only the "BALLARD'S" marking on top of the barrel.

Manufacturer

- C. H. Ballard & Company was a manufacturer based in Worcester, Massachusetts, during the 1860's and 70's; the company was founded by Charles H. Ballard (firearms designer and patentee of note, responsible for the Marlin-manufactured series of Ballard rifles), and built only one of Ballard's designs.

Action

- tipping-barrel single-shot.

Serial Number

- marked on the receiver/frame under the right grip panel.
- sample imaged has three digits without prefix or suffix.

The most prolific manufacturer of this design was J.M. Marlin, who produced Ballards from 1875 until 1891, when they discontinued the design in favour of their lever-action repeater.

Model

- up to 500 manufactured from 1875 to 1876.
- assembled by J.M. Marlin from many of the parts he had purchased when the Brown Manufacturing Co. went bankrupt; these rifles are marked "J.M. Marlin", but still have an externally-operated extractor utilizing a knob on the underside of the forend near the receiver/frame. They also have John Marlin's patented reversible firing pin, which allows a user to fire both rim-fire and center-fire cartridges in the same firearm, merely by flipping the firing pin over. This improvement was patented Feb. 9, 1875, and this patent date will also be present on the left side of the receiver/frame.

Manufacturer

- "Marlin" is usually marked on the firearm.
- in 1875, John Marlin began manufacturing the Ballard rifle for exclusive sale by Schoverling & Daly, of New York.

Action

- lever operated dropping block design.

Serial Number

- range: 1 - 500.

Notes

Make	- The Ballard rifle was invented and patented by a C.H. Ballard in 1861, and was subsequently manufactured by 6 different companies until approximately 1890; these rifles all share the same basic design, and will often have the patent date (Nov. 5, 1861) displayed somewhere on the firearm. This design has a comparatively weak breech, and is not suitable for modern high-power cartridges. The most prolific manufacturer of this design was J.M. Marlin, who produced Ballards from 1873 until 1890, when they discontinued the design in favour of their lever-action repeater.
Model	- These Ballard rifles were apparently produced in anticipation of a European contract for firearms, but the contract never came through and the rifles were subsequently sold on the commercial market; many of these were subsequently "sporterized", or shortened and lightened, and may have a wide variety of barrel lengths.
Manufacturer	- After the bankruptcy of the Merrimack Arms & manufacturing Co. in 1869, John H. Brown purchased the company and re-instituted it as the "Brown Manufacturing Company", which then resumed manufacture of Ballard rifles until 1873. In 1873, the Brown Manufacturing Company also went bankrupt, and was purchased by John Marlin.
Action	- lever-operated falling-block.
Serial Number	- these rifles were serial-numbered between 20500 and 21600, mixed with Sporting Rifles.
Barrel	- likely subsequently shortened by re-sellers, but factory original is 762 mm (30").
Calibre	- calibre may be marked on the barrel as "No.46".
Other Markings	- "No.46" marked on receiver near chamber (a caliber designation).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make

- the Ballard rifle was invented and patented by a C.H. Ballard in 1861, and was subsequently manufactured by 6 different companies until approximately 1890; these rifles all share the same basic design, and will often have the patent date (Nov. 5, 1861) displayed somewhere on the firearm. This design has a comparatively weak breech, and is not suitable for modern high-power cartridges. The most prolific manufacturer of this design was J.M. Marlin, who produced Ballards from 1873 until 1890, when they discontinued the design in favour of their lever-action repeater.

Model

- manufactured from 1879-1883.
- features may include: round barrel with front sight; rear barleycorn sight; wood forearm; external spur hammer; folding adjustable rear sight; open or ringed lever; straight wood stock with crescent steel buttplate.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- beginning in 1875, John Marlin began manufacturing the Ballard rifle for exclusive sale by Schoverling & Daly, of New York; these guns were slightly re-designed in that they now had internal extractors (operated by the same lever used to open and close the breech). These firearms can be found marked either "J.M. Marlin" or "Marlin Firearms Co.", depending on the exact date of manufacture.
Action	- lever operated falling block.
Serial Number	- serial number may be under the forearm on the underside of the barrel.
Remarks	- this rifle is similar to the No. 1 Hunter's Rifle, except that it is chambered in center-fire cartridges ONLY, and does not have a reversible firing pin; they are found with both "J.M. Marlin" and "Marlin Firearms Co." markings.

Notes

Make

- The Ballard rifle was invented and patented by a C.H. Ballard in 1861, and was subsequently manufactured by six different companies until approximately 1890; these rifles all share the same basic design, and will often have the patent date (Nov. 5, 1861) displayed somewhere on the firearm. This design has a comparatively weak breech, and is not suitable for modern high-power cartridges. The most prolific manufacturer of this design was J.M. Marlin, who produced Ballards from 1873 until 1890, when they discontinued the design in favour of their lever-action repeater.

Manufacturer

- The Ballard Rifle & Cartridge Company of Cody, Wyoming, has been manufacturing Ballard rifle reproductions since 1996.

Action

- lever-operated falling-block.

Serial Number

- located bottom front of receiver.

Remarks

- Centre fire, double set triggers, octagonal top frame, ring on the opening lever, case hardened, lever operated, drop block action. This rifle is identical to the No. 1 1/2 Hunter's Rifle, except that the action lever has an integral ring cast into the end of it and the rifle has double-set triggers.

The most prolific manufacturer of this design was J.M. Marlin, who produced Ballards from 1873 until 1890, when they discontinued the design in favour of their lever-action repeater.

Model

- manufactured circa 1879 to 1882.
- features include: double set triggers; wood ramrod, and two thimbles under barrel; octagonal top receiver/frame; ring on the opening lever; colour case-hardened;
- identical to the No. 1 1/2 Hunter's Rifle, except that the action lever has an integral ring cast into the end of it and has double set triggers.

Manufacturer

- beginning in 1875, John Marlin began manufacturing the Ballard rifle for exclusive sale by Schoverling & Daly, of New York; these guns were slightly re-designed in that they now had internal extractors (operated by the same lever used to open and close the breech. These firearms can be found marked either "J.M. Marlin" or "Marlin Firearms Co.", depending on the exact date of manufacture.

Action

- lever operated dropping block design.

Marlin, who produced Ballards from 1873 until 1890, when they discontinued the design in favour of their lever-action repeater.

Model

- the model designation is not marked on the firearm.
- manufactured from 1876 to 1888.
- this was a version of the Ballard rifle specifically intended for "gallery", or indoor target shooting.
- features include: colour-case-hardened receiver/frame with a long grip-tang; walnut straight grip stock and forearm; octagonal barrel; open sights (though tang sights were available as a factory option); these rifles are seen with both flat-topped octagonal and "scooped-top" octagonal receiver/frames.
- a similar rifle, the No. 3F Gallery rifle ("No 3 Fine Gallery"), is identical except for a "Schuetzen"-type hooked butt-plate and a "loop"-style action lever.

Manufacturer

- Beginning in 1875, John Marlin began manufacturing the Ballard rifle for exclusive sale by Schoverling & Daly, of New York; these guns were slightly re-designed in that they now had internal extractors (operated by the same lever used to open and close the breech). These firearms can be found marked either "J.M. Marlin" or "Marlin Firearms Co.", depending on the exact date of manufacture.

Action

- lever operated falling block.

Serial Number

- located on the bottom of the receiver/frame.

Calibre

- calibre may be marked on the barrel.

Other Markings

- "J.M Marlin. New Haven Conn,U.S A. Ballard Patent Nov 5 1861. ---" or "-- Marlin Firearms Co New Haven Ct. U.S.A. /Patent Feb 9 1875Ballard Patent Nov 5 1861" will be marked on the barrel.

Notes

Make

- "BALLARD'S" is marked on the left side of the receiver/frame.
- The "Ballard" rifle was invented and patented by a "C.H. Ballard" in 1861, and was subsequently manufactured by 6 different companies until approximately 1890; these rifles all share the same basic design, and will often have the patent date (Nov. 5, 1861) displayed somewhere on the firearm. This design has a comparatively weak breech, and is not suitable for modern high-power cartridges. The most prolific manufacturer of this design was "J.M. Marlin", who produced "Ballards" from 1873 until 1890, when they discontinued the design in favour of their lever-action repeater.

Model

- Manufactured from 1880-1882.

- The model designation is not marked on the firearm.
- Features may include: wood forearm; external spur hammer; open or ringed lever; crescent steel buttplate.

Manufacturer

- "MARLIN FIREARMS CO" is marked on the left side of the receiver/frame.
- Beginning in 1875, John Marlin began manufacturing the "Ballard" rifle for exclusive sale by "Schoverling & Daly", of New York; these guns were slightly re-designed in that they now had internal extractors, operated by the same lever used to open and close the breech.

Action

- lever operated falling block.

Serial Number

- The serial number is marked on the underside of the receiver/frame.

- manufactured from 1882 to 1887.
- the model designation is not marked on the firearm.
- this was a version of the Ballard rifle specifically intended for "gallery", or indoor target shooting.
- features include: colour-case-hardened receiver/frame with a long grip-tang; walnut straight-grip stock and forearm; octagonal barrel; and open sights (though tang sights were available as a factory option); and a nickel-plated "schuetzen"-type hooked butt plate; these rifles are seen with both flat-topped octagonal and "scooped-top" octagonal receiver/frames.
- a similar rifle, the No. 3 Gallery rifle, is identical except for a plain rifle-type crescent butt-plate and a "rat-tail"-style action lever.

Manufacturer

- Beginning in 1875, John Marlin began manufacturing the Ballard rifle for exclusive sale by Schoverling & Daly, of New York; these guns were slightly re-designed in that they now had internal extractors (operated by the same lever used to open and close the breech.

Action

- lever-operated falling-block.

Other Markings

- "J.M Marlin. New Haven Conn,U.S A. Ballard Patent Nov 5 1861" or "Marlin Firearms Co New Haven Ct. U.S.A. /Patent Feb 9 1875Ballard Patent Nov 5 1861".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks - This is a "deluxe" version of the No. 3 gallery rifle, that comes with a nickel-plated "Schuetzen"-style butt-plate, a pistol-grip stock, and a closed-ring operating lever.

Notes

Make

- The Ballard rifle was invented and patented by a C.H. Ballard in 1861, and was subsequently manufactured by six different companies until approximately 1890. These rifles all share the same basic design, and will often have the patent date (Nov. 5, 1861) displayed somewhere on the firearm. The most prolific manufacturer of this design was J.M. Marlin, who produced Ballards from 1873 until 1890, when they discontinued the design in favour of their lever-action repeater.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- manufactured from 1876 to 1880. - may also be known as the "Perfection" rifle. - features include: straight-grip stock; walnut stock and forearm; heavy-framed steel receiver; "buckhorn"-type open sights and medium-heavy blued octagon barrel.
Manufacturer	- Beginning in 1875, John Marlin began manufacturing the Ballard rifle for exclusive sale by Schoverling & Daly, of New York. These guns were slightly re-designed in that they now had internal extractors (operated by the same lever used to open and close the breech. These firearms can be found marked either "J.M. Marlin" or "Marlin Firearms Co.", depending on the exact date of manufacture.
Action	- lever-operated falling-block.
Serial Number	- located at bottom of receiver, near front.

Notes

Make

- The Ballard rifle was invented and patented by a C.H. Ballard in 1861, and was subsequently manufactured by six different companies until approximately 1890; these rifles all share the same basic design, and will often have the patent date (Nov. 5, 1861) displayed somewhere on the firearm. This design has a comparatively weak breech, and is not suitable for modern high-power cartridges. The most prolific manufacturer of this design was J.M. Marlin, who produced Ballards from 1873 until 1890, when they discontinued the design in favour of their lever-action repeater.

Manufacturer

- The Ballard Rifle & Cartridge Company of Cody, Wyoming, has been manufacturing Ballard rifle reproductions since 1996.

Action

- lever-operated falling-block.

Serial Number

- located bottom front of receiver.

Remarks

- Centre fire, double set triggers, octagonal top frame, ring on the opening lever, case hardened, lever operated, drop block action. This rifle is identical to the No. 1 1/2 Hunter's Rifle, except that the action lever has an integral ring cast into the end of it and the rifle has double-set triggers. Ramrod with two thimbles set on underside of barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- manufactured circa 1876 to 1891. - features include: a ring on the action lever; octagonal barrel; double-set triggers; cleaning rod; blade front and buck horn-type rear sights.
Manufacturer	- beginning in 1875, John Marlin began manufacturing the Ballard rifle for exclusive sale by Schoverling & Daly, of New York; these guns were slightly re-designed in that they now had internal extractors (operated by the same lever used to open and close the breech). These firearms can be found marked either "J.M. Marlin" or "Marlin Firearms Co.", depending on the exact date of manufacture.
Action	- lever operated dropping block design.
Serial Number	- serial number is marked at the bottom front of the receiver/frame.
Barrel	- other barrel lengths possible, but not specified in references.
Other Markings	- J.M Marlin. New Haven Conn,U.S A. Ballard Patent Nov 5 1861. --- Or-- Marlin Firearms Co New Haven Ct. U.S.A. /Patent Feb 9 1875Ballard Patent Nov 5 1861

Notes

Make

- The Ballard rifle was invented and patented by a C.H. Ballard in 1861, and was subsequently manufactured by 6 different companies until approximately 1890; these rifles all share the same basic design, and will often have the patent date (Nov. 5, 1861) displayed somewhere on the firearm. This design has a comparatively weak breech, and is not suitable for modern high-power cartridges. The most prolific manufacturer of this design was J.M. Marlin, who produced Ballards from 1873 until 1890, when they discontinued the design in favour of their lever-action repeater.

Model

- manufactured from 1877 to 1887.

Manufacturer

- Beginning in 1875, John Marlin began manufacturing the Ballard rifle for exclusive sale by Schoverling & Daly, of New York; these guns were slightly re-designed in that they now had internal extractors (operated by the same lever used to open and close the breech.

Action

- lever-operated falling-block.

Serial Number

- The serial number is marked at the bottom front of the receiver/frame.

Other Markings

- "J.M Marlin. New Haven Conn,U.S A. Ballard Patent Nov 5 1861" ou "Marlin Firearms Co New Haven Ct. U.S.A. /Patent Feb 9 1875Ballard Patent Nov 5 1861".

Remarks

- Grooved receiver sides, centre fire, vernier peep sight wind gauge, inletted plate mount near butt plate, for back position sight location. Loop and spur lever, single trigger, spirit level front sight, steel shotgun butt plate. This is a rifle made specifically for long-range target shooting, with half-octagonal barrel, vernier peep sights that can be moved from the tang to the stock comb, windage-adjustable front sight, and pistol-grip checkered stock. These rifles were used for shooting at up to 1300 yards, and the sights were movable to the stock so shooters could lay on their backs and still sight their rifles

Marlin, who produced Ballards from 1873 until 1890, when they discontinued the design in favour of their lever-action repeater.

Model

- manufactured from 1876 to 1878.

Manufacturer

- Beginning in 1875, John Marlin began manufacturing the Ballard rifle for exclusive sale by Schoverling & Daly, of New York; these guns were slightly re-designed in that they now had internal extractors (operated by the same lever used to open and close the breech.

Action

- lever-operated falling-block.

Serial Number

- example seen has a 4-digit serial number, located at bottom front of receiver.

Other Markings

- "J.M Marlin. New Haven Conn,U.S A. Ballard Patent Nov 5 1861" or "Marlin Firearms Co New Haven Ct. U.S.A. /Patent Feb 9 1875Ballard Patent Nov 5 1861".

Remarks

- Grooved receiver sides, centre fire, vernier peep sight wind gauge, inletted plate mount near butt plate, for back position sight location. Loop and spur lever, single trigger, half-octagonal barrel, spirit level front sight, steel shotgun butt plate. This is a version of the No. 7 Creedmore Long Range Rifle with even better quality wood and engraving.

Notes

Make

- the Ballard rifle was invented and patented by a C.H. Ballard in 1861, and was subsequently manufactured by 6 different companies until approximately 1890; these rifles all share the same basic design, and will often have the patent date (Nov. 5, 1861) displayed somewhere on the firearm. This design has a comparatively weak breech, and is not suitable for modern high-power cartridges. The most prolific manufacturer of this design was J.M. Marlin, who produced Ballards from 1873 until 1890, when they discontinued the design in favour of their lever-action repeater.

Model

- this was a military rifle produced for a U.S. Army contract awarded to Merwin & Bray of Worcester, Mass; these had externally-operated extractors, two-piece breech-blocks, and full-length barrels and stocks; many of these will be found with "Merwin & Bray" marked on the frame, though Merwin & Bray actually had the firearms produced by either Dwight, Chapin, and Co., or by Ball & Williams after Dwight et al. went bankrupt.

Manufacturer

- this was a sub-contractor for the firm of Merwin & Bray, of Worcester, Mass., from 1862 to 1864, that began producing parts and whole guns to satisfy a government contract; this firm went bankrupt after many of their firearms didn't pass acceptance tests, so Merwin & Bray had the remainder of their stock assembled by Ball & Williams.

Action

- lever-operated falling-block.

Other Markings

- "Merwin & Bray" located on right side.

Notes

Make

- "BALLARD'S PATENT" over "NOV. 5, 1861" is usually marked on the left side of the receiver/frame.
- Ballard rifle was invented and patented by a C.H. Ballard in 1861, and was subsequently manufactured by 6 different companies until approximately 1890; these rifles all share the same basic design, and will often have the patent date (Nov. 5, 1861) displayed somewhere on the firearm. This design has a comparatively weak breech, and is not suitable for modern high-power cartridges. The most prolific manufacturer of this design was J.M. Marlin, who produced Ballards from 1873 until 1890, when they discontinued the design in favour of their lever-action repeater.

Model

- marked "Merrimack Arms & Mfg. Co." on the left side of the receiver/frame, and are of the same design as Ballard rifles and carbines. Merrimack Arms went into bankruptcy after only two years, and it's likely that very few of these were made; those seen have externally-operated extractors and a sighting groove milled into the top of the receiver/frame.

Manufacturer

- "MERRIMACK ARMS & MFG. CO." over "NEWBURYPORT, MASS." over "BALLARD'S PATENT" over "NOV. 5, 1861" is usually marked on the left side of the receiver/frame.

Action

- lever-operated falling-block.

Serial Number

- located on top of barrel or receiver/frame.

Barrel

- barrel length not specified in reference.

Notes

Make

- The Ballard rifle was invented and patented by a C.H. Ballard in 1861, and was subsequently manufactured by 6 different companies until approximately 1890; these rifles all share the same basic design, and will often have the patent date (Nov. 5, 1861) displayed somewhere on the firearm.

Model

- This firearm was made after the Civil War, when there was a glut of cheap firearms on the market; it follows the standard Ballard pattern, with an externally-operated extractor, and all of them will be marked "Ball & Williams" on the left side of the receiver.
- This is a commercial version of the Ballard design, one that again used the Merwin & Bray "dual-purpose" breechblock that allowed the user to fire either metallic-cased rimfire cartridges or use loose powder, bullets, and percussion caps.

Manufacturer

- Ball & Williams produced approximately 5000 of this model circa 1862-1865.

Action

- lever-operated falling-block.

Serial Number

- these rifles were serial numbered and continued in the sequence after the Merrimack Arms Ballard serial numbers from approx. 20,300 to 22,000.

Remarks

- To operate, the lever / trigger-guard is swung down and forwards, which exposes the chamber and places the hammer at half-cock. The extractor knob can then be pulled to extract a fired case in the chamber, allowing a new round to be chambered. After closing the lever again, the firer can then pull the hammer to full-cock, and is then ready to aim and fire.
- This design has a comparatively weak breech, and is not suitable for modern high-power cartridges.
- The most prolific manufacturer of this design was J.M. Marlin, who produced Ballards from 1873 until 1890, when they discontinued the design in favour of their lever-action repeater.

Notes

Make

- The Ballard rifle was invented and patented by a C.H. Ballard in 1861, and was subsequently manufactured by 6 different companies until approximately 1890; these rifles all share the same basic design, and will often have the patent date (Nov. 5, 1861) displayed somewhere on the firearm.

Model

- This is a commercial version of the Ballard design, one that again used the Merwin & Bray "dual-purpose" breechblock that allowed the user to fire either metallic-cased rimfire cartridges or use loose powder, bullets, and percussion caps.
- The hammers of these rifles may be marked with the patent date of Jan. 5, 1864, while the receivers may be marked "R. Ball & Co."

Action

- lever-operated falling-block.

Serial Number

- these rifles were serial numbered from approx. 16,000 through 18,000.

Remarks

- To operate, the lever / trigger-guard is swung down and forwards, which exposes the chamber and places the hammer at half-cock. The extractor knob can then be pulled to extract a fired case in the chamber, allowing a new round to be chambered. After closing the lever again, the firer can then pull the hammer to full-cock, and is then ready to aim and fire.
- This design has a comparatively weak breech, and is not suitable for modern high-power cartridges.
- The most prolific manufacturer of this design was J.M. Marlin, who produced Ballards from 1873 until 1890, when they discontinued the design in favour of their lever-action repeater.

Notes

Make

- The Ballard rifle was invented and patented by a C.H. Ballard in 1861, and was subsequently manufactured by 6 different companies until approximately 1890; these rifles all share the same basic design, and will often have the patent date (Nov. 5, 1861) displayed somewhere on the firearm.

Model

- This firearm was made after the Civil War, when there was a glut of cheap firearms on the market; it follows the standard Ballard pattern, with an externally-operated extractor, and all of them will be marked "Brown Mfg. Co." on the left side of the receiver. The Brown Manufacturing Company only made approx. 2000 Ballard rifles.
- This is a commercial version of the Ballard design, one that again used the Merwin & Bray "dual-purpose" breechblock that allowed the user to fire either metallic-cased rimfire cartridges or use loose powder, bullets, and percussion caps.

Action

- lever-operated falling-block.

Serial Number

- these rifles were serial numbered and continued in the sequence after the Merrimack Arms Ballard serial numbers from approx. 20,300 to 22,000.

Remarks

- To operate, the lever / trigger-guard is swung down and forwards, which exposes the chamber and places the hammer at half-cock. The extractor knob can then be pulled to extract a fired case in the chamber, allowing a new round to be chambered. After closing the lever again, the firer can then pull the hammer to full-cock, and is then ready to aim and fire.
- This design has a comparatively weak breech, and is not suitable for modern high-power cartridges.
- The most prolific manufacturer of this design was J.M. Marlin, who produced Ballards from 1873 until 1890, when they discontinued the design in favour of their lever-action repeater.

Notes

Make

- "BALLARD'S PATENT" over "NOV. 5, 1861" is usually marked on the left side of the receiver/frame.
- Ballard rifle was invented and patented by a C.H. Ballard in 1861, and was subsequently manufactured by 6 different companies until approximately 1890; these rifles all share the same basic design, and will often have the patent date (Nov. 5, 1861) displayed somewhere on the firearm.

Model

- this firearm was a rifle made after the Civil War, when there was a glut of cheap firearms on the market; this rifle (and a similar carbine) were only made for 2 years before Merrimack Arms went bankrupt. These will be marked "Merrimack Arms & Mfg. Co." of the left side of the receiver, and some of them were fitted with the Merwin & Bray dual-purpose breech block to allow the use of either metallic rimfire cartridges or loose ball, powder and percussion caps; also made in 20 gauge.

Manufacturer

- "MERRIMACK ARMS & MFG. CO." over "NEWBURYPORT, MASS." over "BALLARD'S PATENT" over "NOV. 5, 1861" is usually marked on the left side of the receiver/frame.

Action

- lever-operated falling-block.

Serial Number

- these rifles were serial numbered and continued in the sequence from approximately 18,000 to 20,300.

Other Markings

- usually stamped on the left-hand side of the receiver/frame in four lines;
"MERRIMACK ARMS & MFG.CO"
"NEWBURYPORT,MASS"
"BALLARD'S PATENT"
"NOV 5, 1861"

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- this was a rifle made after the Civil War, when there was a glut of cheap firearms on the market; this rifle (and a similar carbine) were only made for two years befor Merrimack Arms went bankrupt. These will be marked "Merrimack Arms & Mfg. Co." of the left side of the receiver, and some of them were fitted with the Merwin & Bray dual-purpose breechblock to allow the use of either metallic rimfire cartridges or loose ball, powder and percussion caps.
- to operate, the lever / trigger-guard is swung down and forwards, which exposes the chamber and places the hammer at half-cock. The extractor knob can then be pulled to extract a fired case in the chamber, allowing a new round to be chambered. After closing the lever again, the firer can then pull the hammer to full-cock, and is then ready to aim and fire.
- this design has a comparatively weak breech, and is not suitable for modern high-power cartridges.
- the most prolific manufacturer of this design was J.M. Marlin, who produced Ballards from 1873 until 1890, when they discontinued the design in favour of their lever-action repeater.

Notes

Make

- "Ballard Rifle & Cartridge LLC Cody Wyoming" or a variation thereof will be marked on the barrel and/or receiver/frame.

Model

- model designation is not marked on the firearm.
- this firearm is an exact copy of the original Winchester Model 1885 rifle to the extent that the parts are interchangeable between the original and the reproduction rifles.
- introduced circa 2000.
- falling block action, under lever operated.
- features can vary widely on this firearm but may include; case hardened receiver/frame; round or octagonal barrel; single trigger or double set triggers and American walnut stock.

Manufacturer

- "Ballard Rifle & Cartridge LLC Cody Wyoming" or a variation thereof will be marked on the barrel and/or receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is usually marked on the front underside of the receiver/frame. - known examples had 3 digit serial numbers with a letter prefix. - letter prefix "W" has been observed.
Barrel	- available in the following barrel lengths: 660 mm (26"), 762 mm (30"), 813 mm (32"), plus custom orders.
Calibre	- available in calibres from 17 HMR to 50-90 SHARPS STRAIGHT.

46869 - 3	12 GA X 2 3/4"	2	760	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Model

- produced circa 1900-1904 with some stock still being sold as late as January 1909.
- this firearm was produced in various grades as determined by its level of engraving and the method of its barrel production.
- this entry encompasses all Baltimore Arms model grades.
- features include: boxlock action, side by side barrels, double triggers, top lever-opening.

Manufacturer

- may be marked on action sideplates.
- this firm evolved from the FOX GUN COMPANY.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- receiver/frame and or barrels may be engraved.
- may have Damascus barrels or fluid steel barrels.
- standard choke was "FULL," others were available on request.
- Available in a number of grades:
  - "A"- twist steel barrels,
  - "B"- Three-Blade Damascus barrels,
  - "C"- twist or fluid steel barrels,
  - "D"- highest grade of production materials and engraving,
  - "TRAP"- photo's of this variant evidence a high level of engraving and finish with special stock selection and checkering.
  - "FIELD"- this grade is also mentioned in some sources.
- "A" grade is the least adorned model.
- this firearm was unique for its era in that it used the barrel rounded-undersides to cock the action during closing of the breech.
- some sources claim manufacture of this shotgun in two styles of barrel locking mechanism.
- the patent date "FEB. 13, 1900," may be present on the watertable.
- "BALTIMORE ARMS CO." may be marked on the sideplates of the action.

Notes

Make

- "BAM", super-imposed on a multi-ringed circle may be marked on the top of the receiver/frame/air chamber.
- "BAM" is the acronym for "Best Airgun Manufacturer" in China.
- "BAM" trademark/trade name is manufactured by JiangSu XinSu Machinery Manufacturing Company Limited located in WuXi, JiangSu Province, China.
- "BAM" products are imported and distributed Xisico.
- Xisico USA, Incorporated was established in Houston, Texas, USA circa 1992.

Model

- "S2" may be marked on the firearm.
- features include: blued finish, round steel barrel; fixed blade type front sight; adjustable rear sight; one piece wooden or synthetic pistol grip stock.

Manufacturer

- manufacturer's name may not be marked on the firearm.
- "BAM" and "Made in China" are usually marked on the firearm.
- JiangSu XinSu Machinery Manufacturing Company Limited located in WuXi, JiangSu Province, China.
- JiangSu XinSu Machinery Manufacturing began manufacturing military rifles and handguns in 1965 and airguns for the civilian market in 1980.

Action

- hinged barrel design.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is usually marked on the left side of the barrel assembly at the chamber.
- observed example consisted of seven numbers.

Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	CHINA
Serial Numbering:	See Note
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
123191 - 1	177 PELLET	1	370	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "BAM", super-imposed on a multi-ringed circle may be marked on the top of the receiver/frame/air chamber.
- "BAM" is the acronym for "Best Airgun Manufacturer" in China.
- "BAM" trademark/trade name is manufactured by JiangSu XinSu Machinery Manufacturing Company Limited located in WuXi, JiangSu Province, China.
- "BAM" products are imported and distributed Xisico.
- Xisico USA, Incorporated was established in Houston, Texas, USA circa 1992.

Model

- "XS-B15" is usually marked on the receiver/frame of the firearm or on the barrel.
- features include: spring piston, break barrel; adjustable rear sight with hooded front; grooved receiver/frame for scope mount; pistol-grip stock.
- overall length is 930mm (36.6"), average weight is 2.3kg (5 lbs).
- this is the youth version of the "XS-B12" or "BAM12".

Manufacturer

- manufacturer's name may not be marked on the firearm.
- "BAM" and "Made in China" are usually marked on the firearm.
- JiangSu XinSu Machinery Manufacturing Company Limited located in WuXi, JiangSu Province, China.
- JiangSu XinSu Machinery Manufacturing began manufacturing military rifles and handguns in 1965 and airguns for the civilian market in 1980.

Action

- does not discharges a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- the serial number is usually located on the receiver/frame of the firearm.
- a serial number rationalization for these firearms is unknown at this time.

Calibre

- the calibre designation is usually marked on the receiver/frame or the barrel.

123194 - 4	22 PELLET	1	450	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "BAM", super-imposed on a multi-ringed circle may be marked on the top of the receiver/frame/air chamber.
- "BAM" is the acronym for "Best Airgun Manufacturer" in China.
- "BAM" trademark/trade name is manufactured by JiangSu XinSu Machinery Manufacturing Company Limited located in WuXi, JiangSu Province, China.
- "BAM" products are imported and distributed Xisico.
- Xisico USA, Incorporated was established in Houston, Texas, USA circa 1992.

Model

- "XS-B3-1" or "B3-1" is usually marked on the receiver/frame of the firearm or on the barrel.
- similar in appearance to an AK 47.
- features include: spring piston, side lever; manual safety; frame for scope mounts; adjustable rear sight with hooded front sight; pistol-grip with folding stock.
- overall length with a 451 mm barrel and the stock extended is 900mm (35.4").
- overall length with a 451 mm barrel and the stock folded is 633mm (25").
- average weight is 3.25kg (7 lbs).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- manufacturer's name may not be marked on the firearm.
- "BAM" and "Made in China" are usually marked on the firearm.
- JiangSu XinSu Machinery Manufacturing Company Limited located in WuXi, JiangSu Province, China.
- JiangSu XinSu Machinery Manufacturing began manufacturing military rifles and handguns in 1965 and airguns for the civilian market in 1980.

Action

- in calibre 177 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
- in calibre 22 PELLET: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- the serial number is usually located on the receiver/frame of the firearm.
- a serial number rationalization for these firearms is unknown at this time.

Calibre

- the calibre designation is usually marked on the receiver/frame or the barrel.

123189 - 2	22 PELLET	1	470	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "BAM", super-imposed on a multi-ringed circle may be marked on the top of the receiver/frame/air chamber.
- "BAM" is the acronym for "Best Airgun Manufacturer" in China.
- "BAM" trademark/trade name is manufactured by JiangSu XinSu Machinery Manufacturing Company Limited located in WuXi, JiangSu Province, China.
- "BAM" products are imported and distributed Xisico.
- Xisico USA, Incorporated was established in Houston, Texas, USA circa 1992.

Model

- the model designation "XS-B51" is marked on the left side of the receiver/frame of the firearm.
- introduced in 2003.
- features include: blued barrel; receiver/frame grooved for scope mounting; manual safety; pistol-grip Chinese beech or walnut stock with roll-over cheek piece and thumb hole; rubber butt pad.
- a sound suppressor is available for both .177 and .22 calibres.
- overall length is 1050mm (41.34"), average weight is 3.65kg (8 lbs).
- the plain stock version of this rifle (without thumb hold) is available and known as the "B50" or "BAM50".

Manufacturer

- manufacturer's name may not be marked on the firearm.
- "BAM" and "Made in China" are usually marked on the firearm.
- JiangSu XinSu Machinery Manufacturing Company Limited located in WuXi, JiangSu Province, China.
- JiangSu XinSu Machinery Manufacturing began manufacturing military rifles and handguns in 1965 and airguns for the civilian market in 1980.

Action

- pre-charged pneumatic airgun design.
- in calibre 177 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
- in calibre 22 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number may be marked on the receiver/frame. - serial number rationalization is unknown.
Calibre	- the calibre designation may be marked on the left side of the firearm, example "CAL. 4.5/.177".
Canadian Law Comments	- discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to Firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorization to Transport. - the sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada.

123354 - 2	22 PELLET	1	380	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "BAM", super-imposed on a multi-ringed circle may be marked on the top of the receiver/frame/air chamber.
- "BAM" is the acronym for "Best Airgun Manufacturer" in China.
- "BAM" trademark/trade name is manufactured by JiangSu XinSu Machinery Manufacturing Company Limited located in WuXi, JiangSu Province, China.
- "BAM" products are imported and distributed Xisico.
- Xisico USA, Incorporated was established in Houston, Texas, USA circa 1992.

Model

- "XS-B7" is usually marked on the receiver/frame of the firearm or on the barrel.
- resembles an AK47. This rifle has the same action as the model "XS-B3-1" except instead of having a folding stock, it has a sporter wooden stock and the sights are different.
- features include: spring piston, side lever; manual safety; frame for scope mounts; wooden stock.

Manufacturer

- manufacturer's name may not be marked on the firearm.
- "BAM" and "Made in China" are usually marked on the firearm.
- JiangSu XinSu Machinery Manufacturing Company Limited located in WuXi, JiangSu Province, China.
- JiangSu XinSu Machinery Manufacturing began manufacturing military rifles and handguns in 1965 and airguns for the civilian market in 1980.

Action

- in calibre 177 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
- in calibre 22 PELLET: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- the serial number is usually located on the receiver/frame of the firearm.
- a serial number rationalization for these firearms is unknown at this time.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - the calibre designation is usually marked on the receiver/frame or the barrel.

117734 - 2	4MM FLOBERT LONG RF	1	605	Antique AFR, Section 1, para. 2	Manufacturer Specifications and Commercial Customization	
117734 - 1	4MM FLOBERT SHORT RF	1	605	Antique AFR, Section 1, para. 2	Manufacturer Specifications and Commercial Customization	

Notes

Make

- stamped on top of the barrel.

Model

- model designation not marked on the firearm.
- this is a parlor or gallery rifle used for general indoor target shooting that was very popular in the end of the 19th century era.
- features include;
- double set triggers.
- brass trigger guard and crescent style buttplate.
- walnut stock.
- external hammer mounted on a lockplate located on the right-hand side of the firearm.
- an unique feature of this rifle is that the projectile and percussion cap is loaded through a milled port in the underside of the barrel about 200mm or less back from the muzzle, and is then discharged by a long firing piston, spring driven by the hammer at the breech end.

Manufacturer

- manufacturer name and address stamped on top of the barrel.
- Jacob C.Bandle, Cincinati, Ohio established in 1865 at 260 main Street until around 1888.

Serial Number

- specimen observed with a single numerical digit located on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - when tested and chronographed the 4MM RF LONG cartridge consistently produced velocities in the range of 300 f/p/s.

Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
129599 - 1	12 GA X 2 5/8"	5	660	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "F. BANNERMAN MANUFACTURER NEW YORK U.S.A." over "MODEL 1900" was observed marked on the left side of the receiver/frame.

Model

- "MODEL 1900" was observed marked on left side of the receiver/frame.
- manufactured from 1900 to 1902.
- this was a very unusual-appearing pump-action shotgun designed by Christopher Spencer, the designer of the Spencer rifle
- Spencer Arms shotguns were produced in various grades of finish, engraving, wood quality, etc., but all were made with Damascus or laminated barrels
- these shotguns have an extractor mounted on the action bar, what appear to be two triggers within the trigger-guard (the front "trigger" is actually an action-release), and a breech-block that also performs as a shell-lifter, to transfer shells from the magazine tube up to the chamber for firing.
- as the action is worked, the breech-block/shell-lifter pivots up and down through the receiver.
- Spencer Arms shotguns were made in three models, the 1884, the 1886, and the 1887, with only minor differences separating the three; some of the 1887 shotguns were produced in take-down variations
- Spencer Arms ceased production and Francis Bannerman & Sons of New York City began manufacturing this same basic design in four distinct models; the 1890, the 1894, the 1896, and the 1900.
- Bannerman's shotguns are usually marked on the left side of the receiver/frame with "F. BANNERMAN MANUFACTURER NEW YORK U.S.A." over "MODEL 1894 or 1896 or 1900" and "SPENCER RPT SHOT GUN PAT. APL. 1882." is marked on the barrel.

Manufacturer

- "F. BANNERMAN MANUFACTURER NEW YORK U.S.A." was observed marked on the left side of the receiver/frame.
- Bannerman was in business from 1851 to 1918.
- Bannerman was located in Brooklyn & New York City, New York, U.S.A.

Serial Number

- serial number may be marked on the lower tang just behind the trigger guard.
- serial number range from 18000 to 21000.
- observed serial number consisted of five numbers without a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- tubular magazine mounted under the barrel.
Other Markings	- "SPENCER RPT SHOT GUN PAT. APL. 1882." was observed be marked on the barrel.

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
149476 - 1	9.4MM DUTCH REV	6	113	Antique AFR, Section 1, para. 7	Manufacturer Specifications and Commercial Customization	
149476 - 2	9.4MM DUTCH REV	6	113	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the manufacturer is marked on the right front side of the frame, forward of the cylinder, with "JFJ BAR DELFT" in an oval.

Model

- the model designation does not appear on the firearm.
NOTE: the year of issue of the firearm is usually located on the left side of the receiver/frame, just in front of and above the trigger.
- the firearm was designed in 1891 and was known as the M91 in police and military service.
- Victor Collette sold copies of the M91 revolver beginning in 1896, after it was officially adopted by the Netherlands for issue in the Dutch East Indies.
- features and caliber determine this model.
- features include: octagonal barrel; solid five screw receiver/frame with under barrel spring loaded extractor rod; double action with rebounding hammer; hinged loading gate on right side of receiver/frame; two piece checkered wooden grips with metal butt cap and lanyard ring; beaded blade front sight and notch in the top strap for the rear sight.
- there are four distinct variations of the M91 Dutch East Indies revolver:
1) the original contract of 3754 revolvers, manufactured from 1894-5 by either WDW (using J.F.J. Bar-supplied parts) or JFJ Bar. Bar had originally agreed to supply complete revolvers, but as time progressed, Bar fell further behind schedule, and more and more of the contract had to be completed by WDW. These revolvers were serial numbered from 1 through 3754, and will bear Dutch inspector's/acceptance marks (usually consisting of a crowned "B" on all major parts). They will also usually (not always) bear issue dates on the left forward side of the frame (1895), along with unit issue marks on the left side of the frame above the grip;
2) the second contract of 2200 revolvers, manufactured entirely by L. Wittich, for a contract issued in 1909; these revolvers continued the serial number range from the first series, from 3755 through 5954, and will also bear Dutch inspection/acceptance marks;
3) in 1920, a third contract for M91 revolvers was issued, this time to Vickers-Armstrong of England, for 5830 revolvers for issue to the Dutch East Indies Police. These revolvers turned out to be of substandard quality, and had to be sent to Fabrique National of Belgium, to be completely reworked. These revolvers had serial numbers ranging between 1 and 9000 in several blocks, but all bear English proof marks; and
4) private copies of the M91 revolver were also made by Bar, Beaumont, and Munts in Holland, and by Nagant, and Ancion Marx in Belgium; for private sale to Dutch officers and for civilians heading to the Dutch East Indies.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the manufacturer is marked on the right front side of the frame, forward of the cylinder, with "JFJ BAR DELFT" in an oval. - JFJ Bar was in business from 1883 to 1908 in Delft, Netherlands.
Action	- double-action revolver.
Serial Number	- serial number is marked on the receive/frame and on major component parts, internally and externally.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "BARNETT LONDON" is marked in front of the hammer on the lockplate.

Model

- muzzleloading, side hammer, smooth bore firearm.
- the model designation does not appear on the firearm however firearms manufactured for the North American trade incorporate the features:
- stocked to the muzzle without a metal nosecap.
- exposed iron ramrod retaining pipes.
- flat iron buttplate.
- oversize iron triggerguard.
- bead front sight.
- brass "serpent" side plate on left side of the stock opposite lockplate.
- some specimens have the date of manufacture on the lockplate (1884 for example).
- any barrel length under 990mm is possible as it was common procedure for the owner of the firearm to cut the barrel back to accommodate owner's purpose or to eliminate a damaged muzzle.
- it is not uncommon to encounter these firearms with varying degrees of decoration using brass tacks driven into the stock.
- some specimens having a brass medallion, resembling the head of an Indian wearing a feathered head dress, located on the wrist of the buttstock are commonly referred to as "Chief's Guns".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Firearm Reference Number (FRN): 129688
Make: Barnett, J H
Model: Target Rifle

Summary

Make:	Barnett, J H
Model:	Target Rifle
Manufacturer:	Barnett, J H
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
129688 - 1	22 LR	1	762	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "J.H. Barnett, Son & Co Ltd" was observed marked on the top of the barrel.

Model

- no model name is marked on this firearm.
- this is a high quality, benchrest-type, single shot target rifle.
- features; bolt action, underlever operated; set trigger that must be set while the bolt is open; fully adjustable sights; heavy barrel; one piece hardwood stock with full pistol grip; this firearm utilizes a unique feed system in that it has the appearance of having a detachable box magazine housing in front of the trigger guard, however, it is in fact a detachable spring-loaded cartridge platform similar in appearance to a cartridge magazine with the exception that it is designed for a single round of ammunition; blued finish.
- British proofmarks are apparent of the barrel and receiver/frame of this firearm.

Manufacturer

- "J.H. Barnett, Son & Co Ltd" was observed marked on the top of the barrel.
- J.H. Barnett, Son & Company Limited was located at 60 Longmore Street, Birmingham, England from 1947 to 1948.

Action

- bolt action, under lever operated.

Serial Number

- observed example had a two digit serial number without prefix or suffix marked on the rear left side of the barrel.

Calibre

- ".22 LR" was observed, on a physical example, marked on the right side of the barrel.

Remarks

- research indicates that this rifle was made for the British Small Bore National Rifle Association in England.

200611 - 3	25 PELLET	9	559	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	
200611 - 4	25 PELLET	9	559	Prohibited CC 84(1) "prohibited device" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "BARRA" is marked on the left side of the receiver/frame.
Model	- "1100z Gen.2" is marked on the left side of the receiver/frame. - Features include: removeable air stripper (sound suppressing part); side cocking lever located on the right side of the receiver/frame; manual safety located on the trigger guard; adjustable cheek piece; may include black or camo stock finish.
Action	- Pre charged pneumatic.
Serial Number	- The serial number is marked on the left side of the receiver/frame. - The serial number of a referenced example consisted of twelve digits.
Barrel	- The barrel length does not include any attached device such as flash-hider or muzzle brake.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- The calibre designation is marked on the left side of the receiver/frame.
Shots	- Detachable rotary disc magazine.
Canadian Law Comments	- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

FRT Report

Firearm Reference Number (FRN): 172703
Make: Barratt, William Butler
Model: Tranter's Patent

Summary

Make:	Barratt, William Butler
Model:	Tranter's Patent
Manufacturer:	Tranter, William
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
172703 - 1	320 REV RF	5	76	Antique AFR, Section 1, para. 7	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "W. Barratt & Son" over "BURTON ON TRENT" is marked on the top of the barrel.
- William Butler Barratt was located at 48 High Street, Burton-on-Trent, Staffordshire, England from 1849 to 1870.
- William Butler Barratt was joined by his son and the company name was listed as "William Butler Barratt & Son" from 1857 to 1870.

Model

- model designation may be marked on the extractor rod lever assembly or marked "Tranter's Patent" within an oval on the side of the receiver/frame.
- features include: octagonal barrel; solid top engraved bronze receiver/frame with round, fixed, fluted or unfluted cylinder and right side loading gate; swing out ejector rod assembly located on the front of the receiver/frame, under the barrel; exposed spur hammer; single/double action trigger mechanism; saw handle type grip with wood or ivory grip panels.

Manufacturer

- "Tranter's Patent" or "W. Tranter's Patent" is marked on the firearm.
- "TRANTER'S PATENT" or "W. TRANTER'S PATENT" is usually marked on the firearm.
- "TRANTER'S PATENT" or "W. TRANTER'S PATENT" can not be considered definitive proof that the firearm in question was actually built by William Tranter. On the other hand, Tranter himself built many firearms for retail sale through other distributors, and marked those firearms with "Tranter's Patent" or "W. Tranter's Patent" and with the name of the intended retailer who can easily be mistaken as the manufacturer.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- serial number observed with five numbers without a letter prefix or suffix.

Calibre

- calibre is marked on the barrel.

Notes

Make

- "BARRETT MANUFCTURING INC." is marked on the left side of the magazine well housing of the receiver/frame.

Model

- "82A1" model was introduced in 1986.
- "MOD: 82A1" is usually marked on the left side of the magazine well housing of the receiver/frame.
- "CQ" in the model designation denotes "Close Quarter".
- "82A1CQ" is a shorter and lighter version of the Model 82A1.
- "82A1CQ" is designated by the U.S. Army as the model M107CQ.
- "82A1CQ" model has a two piece receiver/frame.
- features include: fold down iron sights; round, fluted barrel with a threaded muzzle for a muzzle brake or sound suppressor/silencer; tubular upper receiver with a ventilated forend, carrying handle, full length Picatinny type rail, and right side ejection; receiver/frame has a ventilated forend with a detachable bipod, integral magazine well housing, synthetic vertical pistol grip, and a detachable butt plate with grip; magazine release is mounted on the rear of the magazine well; safety lever/selector is mounted on the left side of the receiver/frame, above the pistol grip; matte finish.
- overall length is 1250 mm and the average weight is 11.1 kg.

Manufacturer

- Barrett Firearms Manufacturing was established by Ronnie Barrett in 1982.
- Barrett Firearms Manufacturing is located in Murfreesboro, Tennessee, U.S.A.

Action

- recoil operated.

Serial Number

- serial number is marked on the left side of the magazine well housing of the receiver/frame.

Calibre

- "CAL. .50" is marked on the left side of the magazine well housing of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Canadian Law Comments
- this firearm as it left the factory is equipped with sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada.
- when the sound suppressor/silencer (prohibited device) is removed from the barrel the firearm is correctly identified as a "Prohibited Firearm".

Notes

Make

- "BARRETT MANUFCTURING INC." may be marked on the left side of the magazine well housing of the receiver/frame.

Model

- introduced in 2002.
- "82A1M" is a modernized and upgraded model 82A1.
- "82A1M" was adopted by the U.S. Army model as the model M107.
- "82A1M" is designed to be used with a 69 percent recoil reducing muzzle brake.
- "82A1M" unique feature from its predecessor is a lighter weight due to the use of titanium in some of the components and a one piece, lightweight aluminum upper assembly with an integral full length Picatinny rail.
- "82A1M" model has a two piece receiver/frame.
- features include: round heavy, fluted, chrome lined barrel with a threaded muzzle for a muzzle brake or sound suppressor silencer; integrated front folding sight in the Picatinny rail with rear folding sight on a welded bracket; straight line design barrel and buttstock assembly; made of two main assemblies, upper and lower receiver that in a frontal view forms an octagon shape; series of elongated cooling holes around the circumference of the firearm forward body; the upper receiver assembly houses the barrel assembly; thermal cheek guard; steel receiver/frame major components consist of: the butt plate assembly, trigger housing and magazine well; the receiver/frame houses the bolt assembly, recoil buffer/spring and trigger mechanism; the bolt is of three lug, triangular design; detachable bipod; AR15/M16 type pistol grip; modular hand grip mounted on a Picatinny rail at the rear of the receiver/frame; brown sand colour finish.
- overall length with a 737 mm (29") barrel is 1448 mm (57") and the average weight is 14 kg (30.9 lbs).

Manufacturer

- Barrett Firearms Manufacturing was established by Ronnie Barrett in 1982.
- Barrett Firearms Manufacturing is located in Murfreesboro, Tennessee, U.S.A.

Action

- short recoil operated.

Serial Number

- serial number is marked on the left side of the magazine well housing of the receiver/frame.
- serial number rationalization is unknown.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- calibre is marked on the left side of the magazine well housing of the receiver/frame.
- calibre is also marked on the barrel.
- 50 BMG rifling characteristics: 1 turn in 15 inches, right hand twist.

Shots

- detachable box magazine.

Notes

Make

- "BARRETT MANUFCTURING INC." may be marked on the magazine housing.

Model

- introduced in 2011.
- "M107A1" is marked on the left side of the receiver/frame.
- "M107A1" is a modernized and upgraded model M107.
- "M107" is the U.S. Army model designation for the military model 82A1 that the U.S. Marine Corp (USMC) as designated the M82A3.
- "M107A1" is designed to be used with a suppressor.
-"M107A1" unique feature from its predecessor is a lighter weight due to the use of titanium in some of the components and a one piece, lightweight aluminum upper assembly with integral, 609.6mm (24") long and 27 MOA tapered Picatinny rail.
- features include: threaded muzzle for a four port muzzle brake that accepts a quick-attach suppressor; heavy, fluted, chrome lined barrel; integrated front folding sight in the Picatinny rail with rear folding sight on a welded bracket; straight line design barrel and buttstock assembly; made of two main assemblies, upper and lower receiver that in a frontal view forms an octagon shape; series of elongated cooling holes around the circumference of the firearm forward body; the upper receiver assembly houses the barrel assembly; thermal cheek guard; steel receiver/frame major components consist of: the buttplate assembly, trigger housing and magazine well; the receiver/frame houses the bolt assembly, recoil buffer/spring and trigger mechanism; the bolt is of three lug, triangular design; detachable bipod; AR15/M16 type pistol grip; modular hand grip mounted on a Picatinny rail at the rear of the receiver/frame; brown sand colour finish.
- overall length with a 737mm (29") barrel is 1448mm (57") and overall weight is 14kg (30.9lbs).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- Barrett Firearms Manufacturing was established by Ronnie Barrett in 1982. - Barrett Firearms Manufacturing is located in Murfreesboro, Tennessee, U.S.A.
Action	- short recoil operated.
Serial Number	- serial number is marked on the left side of the magazine housing. - serial number rationalization is unknown.
Calibre	- calibre identification is marked on the left side of the receiver/frame. - calibre identification is also marked on the barrel. - 50 BMG rifling characteristics: 1 turn in 15 inches, right hand twist.
Shots	- detachable box magazine.

Firearm Reference Number (FRN): 118651
Make: Barretta
Model: Over & Under

Summary

Make:	Barretta
Model:	Over & Under
Manufacturer:	
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Multi-Barrel
Country of Manufacturer:	ITALY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
118651 - 1	12 GA X 3"	2	711	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- known examples have been marked "Barretta" on the rear left side of the top barrel.

Model

- no model name is marked on this firearm.
- this is a generic entry for over/under shotguns marked with the Barretta name that have no model designation marked on them.
- features include: box lock break action, top lever opening, over/under barrel configuration, ventilated rib on top barrel, single trigger, satin-finish silver-coloured receiver/frame with engraving, hardwood buttstock with full pistol grip and ventilated rubber recoil pad.
- Italian proof marks are apparent on the barrel and/or receiver/frame of this firearm.

Action

- over/under barrel configuration.

Serial Number

- known examples have had five digit numbers without prefix or suffix marked on the top tang underneath the action release lever and/or the front underside of the receiver/frame in front of the trigger guard.
- known example has been observed with the number "542762" marked on a black disc located on the left side of the receiver/frame; the significance of this number is unknown, however, it should not be mistaken as a serial number.

Calibre

- known examples had the calibre designation marked on the rear left side of the top barrel, e.g., "12 GA, 3.00 MAG."

Other Markings

- known examples were marked "Made In Italy" on the rear of the top barrel.

Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
148888 - 1	36 PERCUSSION	2	864	Antique CC 84(1) "antique firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is usually marked on the firearm (lockplate or barrel) as "J. Bartlett & Bro.", "J. Bartlett & Brs.", or "J&R Bartlett".
- Joseph & Robert Bartlett were Binghamton, New York-based gunsmiths during the mid-1800s, known primarily for their percussion hunting rifles.

Model

- the model is not marked on the firearm; this is a description of the firearm type.
- this is a heavy octagonal-barrel side by side percussion hunting rifle manufactured by the Bartlett brothers prior to 1897.
- features include: browned or blued finish; open fixed or adjustable sights (usually, one set of sights per barrel); octagonal barrels; underbarrel ramrod thimbles; half-length straight-grip maple or walnut stock with brass or German silver finishings and patchbox; external manually-cocked hammers (some examples on a back-action lockplate); double triggers; finial trigger-guard/grip; and a crescent butt.

Manufacturer

- the manufacturer is usually marked on the firearm (lockplate or barrel) as "J. Bartlett & Bro.", "J. Bartlett & Brs.", or "J&R Bartlett".
- Joseph & Robert Bartlett were Binghamton, New York-based gunsmiths during the mid-1800s, known primarily for their percussion hunting rifles.

Action

- muzzle loading, side by side barrel configuration, percussion ignition.

Barrel

- barrel lengths may vary.

Calibre

- calibres may vary.

Notes

Make

- "H. BARTLETT" is marked on the firearm.

Model

- manufactured during the 1830s.
- model designation is not marked on the firearm.
- this is a standard-pattern underhammer percussion "saw-handle"-style pistol, made using Ruggles' 1826/28 patent for an underhammer lock.
- features include: blued/browned finish; part-round/part-octagon barrel; fixed open sights; underhammer percussion lock; varying styles of triggers; and a "saw-handle"-profile of the grip, generally coming down to a rounded point at the butt. These pistols almost universally have a brass or German silver strap running around the grip of the pistol, and may be stamped or engraved with a variety of leaves, vines, stars, and so on.

Manufacturer

- "H. BARTLETT" is marked on the firearm.
- Henry Bartlett was located in New Hartford, Connecticut, U.S.A. during the 1830s.

Action

- muzzle-loading.

166203 - 2	11MM SPANISH ORDNANCE REV	6	170	Antique AFR, Section 1, para. 7	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make may or may not be marked on the firearm.

Model

- "BADET - PRIVILEGIADO" is usually marked on the firearm.
- this is an unusual-appearing single-action revolver manufactured by Trifon Bascaran during the 1880s and 1890s for use by Spanish military officers, who were expected to purchase their own side arms.
- features include: blued or nickeled finish; fixed open sights; round barrel; a grooved solid underlug resembling the forearm of a rifle; oval-fluted cylinder; a tip-down latch on the right side of the receiver/frame that allows the cylinder and barrel to slide forward on the cylinder pin for extraction/reloading; a single-action trigger mechanism with exposed manually-cocked hammer; wooden grips; and a lanyard loop at the butt.

Manufacturer

- the manufacturer may or may not be marked on the firearm.

Action

- single- or double-action revolver.

Serial Number

- serial-numbered on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make	- "BASQUE" is marked on the left side of the slide and may be repeated on the grip plates. - "Basque" was a trade name used by "Echave y Arizmendi".
Model	- "BASQUE" is normally marked on the left side of the slide and on both grip plates. - this is the Echasa model sold under a different name. - the "ECHASA" was introduced in the early 1950s. - this is similar to the Walther PP pistol, with many interior, and exterior changes, the most significant difference is in the method of dismantling, instead of pivoting the trigger guard like in the Walther, a sliding catch at the rear of the receiver/frame allows the slide to be removed. - severals variants were made and were sold under different "catalog" or "product numbers" but these differences were matters of finish and calibre. - a consistent identification key for these catalog numbers remain in the first two digits which was always referring to the caliber; ex; Basque 221 & 224 = 22 LR calibre Basque 761 & 764 = 7.65MM calibre Basque 901 & 904 = 9MM BROWNING SHORT calibre.
Manufacturer	- Echave Arizmendi y Cia's logo is normally marked on the left side of the slide and/or grip plates.
Action	- blowback operated.
Serial Number	- the serial number is located on the left side of the receiver/frame just above and forward of the trigger.
Calibre	- the calibre designation is marked on the left side of the slide.
Shots	- detachable box magazine.
Remarks	- a rationalization of some of the product codes is reproduced here; Basque 221; 22 LR calibre with Blued Finish, Black Plastic Grips. Basque 224; 22 LR calibre with Chrome Finish, Pearl Grips. Basque 761; 7.65 calibre with Blued Finish, Black Plastic Grips. Basque 764; 7.65 calibre with Chrome Finish, Pearl grips. Basque 901; 9MM BROWNING SHORT calibre, Blued Finish, Black Plastic Grips. Basque 904; 9MM BROWNING SHORT calibre, Chrome Finish, Pearl Grips.

FRT Report

Firearm Reference Number (FRN): 136037
Make: Bates & Dittus
Model: UBL-37

Summary

Make:	Bates & Dittus
Model:	UBL-37
Manufacturer:	Bates & Dittus (B&D)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Grenade Launcher
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
136037 - 2	37MM RIMMED	1	229	Prohibited PFR, Part 1, para. 95(v)	Manufacturer Specifications and Commercial Customization	
136037 - 1	37MM RIMMED	1	356	Prohibited PFR, Part 1, para. 95(v)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "BATES & DITTUS LLC." is marked on the left side of the receiver/frame.
- "BATES & DITTUS LLC." uses stylized "B&D" letters as a logo, marked on the right side of the receiver/frame.

Model

- "UBL-37" is marked on the left side of the receiver/frame.
- "UBL-37" variations are based on the Colt M203 under barrel mounted, forward sliding barrel grenade launcher.
- "UBL-37" stands for "Under Barrel Launcher - 37MM"
- introduced in 2011.
- features include: round barrel with six integrally machined ribs for a handgrip; full length 387mm (15.25") upper Picatinny rail; 76mm (3") long Picatinny rail under the barrel for accessory attachment; barrel unlocking lever located on the left side on top of the barrel handgrip; sliding safety selector on the right side of the receiver/frame over the trigger; one piece angular trigger guard.
- may also be available as a standalone launcher with a solid, folding or collapsible stock with adjustable, folding or optical sight; matte black or applied coloured finish.

Manufacturer

- "BATES & DITTUS LLC." is marked on the left side of the receiver/frame.
- "BATES & DITTUS LLC." uses stylized "B&D" letters as a logo, marked on the right side of the receiver/frame.
- was founded in 2009.
- first located in New Milford, Connecticut U.S.A. and now is located in Bantam, Connecticut U.S.A..

Action

- forward sliding barrel.

Serial Number

- serial number is marked on the receiver/frame.
- do not confuse "06776" or "06750" marked ZIP/postal code on the receiver/frame for the serial number.

148890 - 1	38 PERCUSSION	1	768	Antique CC 84(1) "antique firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is usually marked on the firearm as "C. BATES".
- Corydon (sometimes misspelled as "Cordon") Bates was an Ellington, New York-based gunsmith during the mid-to-late 1800s, known primarily for his percussion target rifles.

Model

- the model is not marked on the firearm; this is a description of the firearm type.
- this is a heavy octagonal-barrel percussion target rifle manufactured by Corydon Bates during the 1860s and 1870s.
- features include: browned or blued finish; open fine-screw-adjustable heart-shaped peep sights on the tang; octagonal barrel; underbarrel ramrod thimbles; half-length straight-grip walnut stock with German silver or brass finishings and patchbox; external manually-cocked hammer (some versions seen with a "mule ear"-style lock) on a sidelock; single trigger; finial trigger-guard/grip; and a crescent butt.

Manufacturer

- the manufacturer is usually marked on the firearm as "C. BATES".
- Corydon (sometimes misspelled as "Cordon") Bates was an Ellington, New York-based gunsmith during the mid-to-late 1800s, known primarily for his percussion target rifles.

Action

- muzzle-loaded percussion single-shot.

Barrel

- barrel length may vary.

Calibre

- calibre may vary.

Notes

Make

- "Bay State", and "Worcester Mass. U.S.A." are usually marked on the left side of the receiver/frame.
- "Bay State" was a trade name used by Bay State Arms Company, Hopkins & Allen Arms Company, J. Stevens Arms Company, and Harrington & Richardson Arms Company.

Model

- no model designation is marked on the firearm.
- features include: round tapered barrel; front hinged receiver/frame with top tang mounted break open lever; exposed hammer centrally located behind breech; case hardened receiver/frame, blued barrel.

Manufacturer

- manufacturer may not be marked on the firearm.
- "MADE IS U.S.A." may be marked on the top of the barrel.

Action

- break open action.

Serial Number

- serial number is marked on the lower tang of the receiver/frame, behind the trigger guard and may be repeated on the barrel flats.
- observed serial number consisted of six numbers without a letter prefix or suffix.
- observed serial number consisted of a letter "A" letter prefix and six numbers.

Calibre

- calibre designation may be marked on the barrel.

Other Markings

- the following "Harrington & Richardson" patent dates may be marked on the side of the receiver/frame: "Feb 20 & 27 1900" and/or "Feb 20 & 27 1900" and "May 14, 1901".

Notes

Make

- Bayard's trademark logo (a mounted knight) and "BAYARD" are usually marked on the firearm.
- "BAYARD" was a trade name used by Henri Pieper from 1892 to 1898, Etablissments Pieper (EP) from 1898 to 1905,and Anciens Etablissments Pieper (AEP) from 1905 to 1957.

Model

- model designation is not marked on the firearm.
- the most identifiable features for this model are:
- round ribbed barrel with a fixed blade partridge style front sight.
- there are no finger tabs on the sides of the magazine.
- magazine housing has smooth walls and is cut straight at the bottom of the magazine well, there are no cuts in the magazine housing which would allow the 1910 type magazine with the finger tabs to fit.
- the magazine is ahead of the trigger, much like the C96 Mauser and the magazine release is found inside the trigger guard.
- the backstrap may be slotted for a shoulder stock.

Manufacturer

- "ANCIENS ETABLISSEMENTS PIEPER", "HERSTAL- LIEGE" and "BERGMANN'S PATENT" may be marked on the left side of the slide.

Action

- recoil operated.

Notes

Make

- Bayard's trademark logo (a mounted knight) and "BAYARD" are usually marked on the receiver/frame.
- "BAYARD" was a trade name used by Henri Pieper from 1892 to 1898, Etablissments Pieper (EP) from 1898 to 1905,and Anciens Etablissments Pieper (AEP) from 1905 to 1957.

Model

- marked "M. 19 10/21" on the left side of the slide.
- wooden or synthetic grips with an integral lanyard ring at the bottom of the receiver/frame, manual safety to the left of the hammer, magazine release in the front of the trigger guard, fixed sights, and a detachable six round or ten round magazine in a well to the front of the trigger guard.

Manufacturer

- pistols manufactured by Pieper will be marked "ANCIENS ETABLISSEMENTS PIEPER. / HERSTAL-LIEGE. / BERGMANN'S PATENT." on the left side of the slide, above "M. 19 10/21".
- this firearm was also manufactured by HAERENS TOJHUS (Army Manufacturing Arsenal), and some examples may be found marked with HAERENS RUSTKAMMER (Army Storage Arsenal).

Action

- recoil operated.

Serial Number

- marked on the bottom of the receiver/frame in front of the magazine housing.
- sample examined used sequential numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.

Remarks

- this is a recoil operated semi automatic pistol designed by Theodor Bergmann in 1903, using his idea of a vertically moving locking piece to keep the breech closed until chamber pressures dropped to a safe level. The pistol was adopted by the Spanish Army in 1905, but Bergmann's manufacturing facility (Schilling, in Suhl, Germany) was bought by a competitor, and Bergmann was forced to sell the design to Piper, of Liege, Belgium, to meet the terms of the Spanish contract. Pieper made several changes to the design, and sold the resulting pistol to both military and commercial customers as the "Model 1908". In 1910, the Danish Army officially adopted the design as the "M.1910", and these pistols were manufactured in Belgium for the Danes until the factory was overrun in 1914, during the First World War. In 1921, the Danes were again desperate for military handguns, and decided to produce a modified version of the M.1910 in Denmark. These pistols are marked with the name of the Danish arsenal that they were produced at (either "HAERENS RUSTKAMMER" or "HAERENS TOJHUS"), but original Belgian-made M.1910s were also re-worked to the 1921 specifications.

Notes

Make

- Bayard's trademark logo (a mounted knight) and "BAYARD" are usually marked on the top of the barrel/receiver/frame.
- "BAYARD" was a trade name used by Henri Pieper from 1892 to 1898, Etablissments Pieper (EP) from 1898 to 1905, and Anciens Etablissments Pieper (AEP) from 1905 to 1957.

Model

- model designation is not marked on the firearm.
- "MODELO 1912" is marked on the firearm.
- "Half Automatic" describes functioning of the action, the firearm is loaded manually yet ejects the empty case automatically after firing, the bolt remains locked to the rear following the extraction process leaving the chamber exposed for loading the next cartridge.
- this model was offered in two variations, the No.1 was the standard rifle with a 485mm barrel and checkering on the wrist only, the No. 2 was the "deluxe" version which featured a 600mm barrel and checkering on the wrist and forend.
- manually operated, single shot rifle, with a one piece wooden stock, drift adjustable sights, and manually cocked striker.
- features may also include a takedown bolt on the underside of the stock which allows the rifle to be disassembled for storage, transport, packing, etc., post front and notch rear sight mounted on the barrel, sling swivels mounted on the toe of the butt and on either the underside of the barrel or the tip of the forend, a stamped metal trigger guard and a cylindrical receiver/frame with the bolt release lever and safety lever on the left of the receiver/frame.
- overall length with a 485 mm barrel is 980 mm, and the average weight is 1.6 kg.
- overall length with a 600 mm barrel is 1010 mm, and the average weight is 1.8 kg.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "ANCIENS ETABLISSMENTS PIEPER HERSTAL - BELGIUM BREVETE S.G.D.G. PATENTED JAN 12 1909 MODELE DEPOSE" may be marked on the top of the barrel, in front of the rear sight.
Action	- blowback operated. - the firearm is loaded manually yet ejects the empty case automatically after firing, the bolt remains locked to the rear following the extraction process leaving the chamber exposed for loading the next cartridge.
Serial Number	- serial number is usually marked on the underside of the receiver/frame, under the stock.
Calibre	- "FL .22 .C" or "FL .22 .L" is marked on the barrel.

Notes

Make

- the trademark of a mounted knight over the word "BAYARD" is usually marked on the barrel and/or the receiver/frame.
- "Bayard" was a trade name used by the firearms manufacturer Anciens Etablissements Pieper of Belgium.

Model

- no model designation is not marked on this firearm.
- the model designation of Half Automatic describes the functioning of the action.
- bolt operated to load a single cartridge, manually cocked striker, extraction is by blowback operation with the bolt locked in the rearward position, hence the name Half Automatic.
- features include: cocking lever located on the front left side of the action; swivel-type safety lever located at left rear of receiver/frame; takedown bolt on the underside of the stock; post front sight and leaf rear sight; stamped metal trigger guard; a screwdriver-type tool is located in the butt grip which is used to remove empty casings from the chamber in the event of a failed extraction, this tool is also used to extract a live cartridge from chamber if the piece has to be unloaded; blued finish.

Manufacturer

- known example marked, "Anciens Etablissements Pieper. Herstal - Belgium" on the top of the barrel.

Action

- blow back operated for extraction only.

Serial Number

- known example had a five digit number without prefix or suffix marked on the lower right side of the receiver/frame and may be obscured by the forestock.

Calibre

- known example proof marked, "FL 22.C" on the rear left side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - known example had following marking on the top of the barrel, " Anciens Etablissements Pieper. Herstal - Belgium Brevete S.G.D.G. Patented Jan 12 1909 Modele Depose ".
