- "HANDCRAFTED IN FERLACH" is marked on the top of the receiver/frame.

Model

- introduced in 2017.
- "WORLD OF BIRDS" is marked on the bottom of the trigger guard.
- this model is part of the "Masterpiece" collection, offered by "Ludwig Borovnik".
- features include: three, special ordnance Bohler steel round, blued barrels with fixed front bead sight; bird theme fully engraved, sidelock receiver/frame; top tang break open lever; double lug underlock toggle; top tang mounted safety toggle; double triggers; engraved trigger guard; straight, smooth wood shoulder stock without pistol grip, plus matching smooth wooden forend.
- average weight is 3.3kg (7.3 lbs).

Manufacturer

- "Lud.BOROVNIK" is marked on the left side receiver/frame of the firearm.
- "LUDWIG BOROVNIK" may be marked between the top barrel rib followed by "GUNS & RIFLES".
- "HANDCRAFTED IN FERLACH" is marked on the top of the receiver/frame.
- "Ludwig Borovnik I" established his gunsmith business in 1848.
- "Ludwig Borovnik II" ran the small business until circa 1930.
- the manufacturing business was suspended between 1942 and 1945.
- "Ludwig Borovnik III" re-established the business in 1945.
- "Ludwig Borovnik IV" runs the business since 1984.
- "Borovnik, Ludwig" specializes in the manufacture mostly handcrafted custom drillings, over & under, side by side, combination and multi-barrel rifles and shotguns.

Action

- three barrel, multi-barrel shotgun with side by side top barrels and a single barrel centred below the top two.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the firearm, specifically on the rear trigger guard tang. - observed serial number consisted of two numbers followed by a period followed by four more numbers. - serial number rationalization is not known.
Calibre	- calibre may be marked on the firearm.

FRT Report

Firearm Reference Number (FRN): 172182
Make: Boss
Model: Tranter's Patent

Summary

Make:	Boss
Model:	Tranter's Patent
Manufacturer:	Tranter, William
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
172182 - 1	320	5	73	Antique AFR, Section 1, para. 7	Manufacturer Specifications and Commercial Customization	
172182 - 2	320	5	73	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Non-Commercial Customization	
172182 - 3	450 REV CF	6	114	Antique AFR, Section 1, para. 7	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "T. Boss & Co," over "St James St. London" is marked on the barrel.
- "Thomas Boss & Co" was a gun manufacturer and distributor.
- the company was located on St. Jame's Street, London circa 1837 to 1908.

Model

- model designation may be marked on the extractor rod lever assembly or marked "Tranter's Patent" within an oval on the side of the receiver/frame.
- features include: octagonal barrel; solid top engraved bronze receiver/frame with round, fixed, fluted or unfluted cylinder and right side loading gate; swing out ejector rod assembly located on the front of the receiver/frame, under the barrel; exposed spur hammer; single/double action trigger mechanism; saw handle type grip with wood or ivory grip pannels.

Manufacturer

- "Tranter's Patent" or "W. Tranter's Patent" is marked on the firearm.
- "TRANTER'S PATENT" or "W. TRANTER'S PATENT" is usually marked on the firearm.
- "TRANTER'S PATENT" or "W. TRANTER'S PATENT" can not be considered definitive proof that the firearm in question was actually built by William Tranter. On the other hand, Tranter himself built many firearms for retail sale through other distributors, and marked those firearms with "Tranter's Patent" or "W. Tranter's Patent" and with the name of the intended retailer who can easily be mistaken as the manufacturer.

Serial Number

- serial number is marked on the left side of the receiver/frame.
-

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments - some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "Chas. Boswell" and/or "Charles Boswell" may be marked on the top strap.

Model

- the model name is not marked on the firearm.
- the model designation is derived from the physical characteristics of this handgun which are very similar to the popular British style of revolver known as the Bull Dog.
- features include: single/double action trigger mechanism; exposed rebounding hammer; heavy profile ovate barrel; solid top receiver/frame with removeable fluted cylinder; loading gate located on the right side of the standing breech; retractable ejector rod housed within the cylinder axis pin which swings to the right to eject spent casings; half moon blade-type front sight with a rear sighting groove traversing the top of backstrap; nickel plated finish.
- British proof marks are apparent on the barrel and receiver/frame.

Manufacturer

- "Chas. Boswell" over "126 Strand" may be marked on the top strap.
- in 1869, "Charles Boswell" established a gunmakers business in London, England.
- the "Charles Boswell" firm had facilities at the following addresses: "126 The Strand", "15 Mill Street", and "Connaught Street".
- in 1963, the "Charles Boswell" business ceased operations.
- in 1988, the "Charles Boswell" trade name/trademark was purchased by Frank E. Malin & Cape Horn International (Cape Horn Outfitters) and reloacted to Charlotte, North Carolina, U.S.A.

Serial Number

- known example did not have a manufacturer's serial number marked on the receiver/frame.

Calibre

- ".455" may be marked on the left side of the receiver/frame.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
195386 - 1	38 S&W	6	67	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "JOSEPH BOURNE & SON" over "BIRMINGHAM" was observed on the top strap of the receiver/frame.

Model

- model designation is not marked on the firearm.
- features may include: blade front sight; octagonal barrel; solid top receiver/frame with a removable fluted cylinder; loading gate and swivel-type ejector rod is housed within the cylinder axis pin and attached to the right front side of the receiver/frame; exposed hammer; double/single action trigger mechanism; checkered wood grips.

Manufacturer

- "JOSEPH BOURNE & SON" over "BIRMINGHAM" was observed on the top strap of the receiver/frame.
- Joseph Bourne & Son was located in Birmingham, England.
- Joseph Bourne was succeeded by his grandsons William Bourne, H.J. Bourne and A.E. Bourne.
- Bourne remained in business until 1960.

Serial Number

- observed serial number was located under the grips and was likely added at a time after manufacture.

Other Markings

- Birmingham proof marks of a crown over "BP" and a crown over "IV" were observed on the receiver/frame as well as other components.

Firearm Reference Number (FRN): 158507
Make: Boutet, Nicolas Noel
Model: Flintlock Pistol

Summary

Make:	Boutet, Nicolas Noel
Model:	Flintlock Pistol
Manufacturer:	Boutet, Nicolas Noel
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	FRANCE
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
158507 - 2	60 FLINTLOCK	1	200	Antique AFR, Section 1, para. 1	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Boutet", "Boutet a Paris", or "Boutet a Versailles" is isually marked on the firearm.
- Nicolas Noel Boutet was a famous French gunsmith between 1761 and 1833, working both as a commissioned gunsmith for select customers and as the Director of the Versailles Armory.

Model

- The model is not marked on the firearm; this is a descriptor of the firearm type.
- This is one of a number of flintlock single-shot pistols in various configurations, manufactured by Nicolas Noel Boutet between 1761 and 1833.
- These pistols may be seen in various styles and sizes, ranging from compact "muff"-pistol sizes, up to full-size "duelling" pistol sizes.
- Features may include: blued or browned finish; screw-barrel or octagonal heavy barrel; checkered/carved walnut or ivory stock; fixed sights; frizzen and cock on a side-plate; and ball grip or carved grip-cap.

Manufacturer

- "Boutet", "Boutet a Paris", or "Boutet a Versailles" is isually marked on the firearm.
- Nicolas Noel Boutet was a famous French gunsmith between 1761 and 1833, working both as a commissioned gunsmith for select customers and as the Director of the Versailles Armory.

Action

- Muzzle-loaded flintlock single-shot.

Serial Number

- These pistols may bear numbers, but in at least some instances, they may only bear "set" numbers (ie. "1" and "2" of a cased pair).

Calibre

- Calibres may vary.

147061 - 1	45 FLINTLOCK	1	914	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the manufacturer is marked on the barrel as "James Bown & Son".

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is one of a large number and variety of muzzle-loaded single-shot rifles built for hunters from the mid-to-late 1800s, both in flintlock and percussion versions.
- features may include: blued octagonal barrel; open fixed or adjustable sights; half-length walnut or maple stock; German silver mountings; under-barrel ramrod; and percussion or flintlock ignition.
- these rifles may also be seen with "Enterprise Gun Works" markings (the trade-name used by Bown), or a variety of retailer markings.

Manufacturer

- the manufacturer is marked on the barrel as "James Bown & Son".
- James Bown & Son were a Pittsburgh, Pennsylvania-based gunmaker and distributor during the 1800s, that manufactured and retailed a large number of firearms, including those by other manufacturers. They were particularly known for their "Kentucky"-style flintlock and percussion rifles, which were widely sold throughout the west.

Action

- muzzle-loaded single-shot.

Barrel

- barrel lengths may vary widely.

Calibre

- calibres may vary.

Notes

Make

- "JAMES BOWN & SONS" is usually marked on the firearm.
- James Bown & Son were a Pittsburgh, Pennsylvania based gun maker and distributor during the 1800s that manufactured and retailed a large number of firearms, including those by other manufacturers. They were particularly known for their "Kentucky"-style flintlock and percussion rifles, which were widely sold throughout the west.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is an adaptation of the Remington "rolling block" action into a single-shot target rifle, operated with a curved lever on the right side of the receiver.
- features may include: blued finish; octagonal barrel; open adjustable or early tube-style optical sights; walnut forearm and straight-grip stock with crescent or schuetzen buttplate; a manually-cocked hammer; and a lever on the right side to rotate the front cam/breechblock.

Manufacturer

- "JAMES BOWN & SONS" is usually marked on the firearm.
- James Bown & Son were a Pittsburgh, Pennsylvania based gun maker and distributor during the 1800s that manufactured and retailed a large number of firearms, including those by other manufacturers. They were particularly known for their "Kentucky"-style flintlock and percussion rifles, which were widely sold throughout the west.

Action

- rolling block single-shot with the breechblock operated by way of a lever on the right side of the action.

Serial Number

- numbered on the receiver/frame.

Barrel

- barrel lengths may vary.

Calibre

- calibres may vary.

Notes

Make

- "F.E. BOYD & P.S. TYLER" was observed marked on the centre rib of the barrels

Model

- model name is not marked on the firearm.
- manufactured between 1870 and 1881.
- F.E. Boyd and P.S. Tyler improved on the design of a breech loading shotgun that was loaded and unloaded by rotating the barrels and forend 180 degrees to expose the chambers.
- features include: damascus side by side barrels with bead front sight; rotating action with release located on top tang of receiver/frame; back action side locks with exposed hammers; manual extractors; dual triggers; checkered wooden forearm and straight grip shoulder stock.

Manufacturer

- The Boyd Breachloading Arms Company was established during the 1870s to manufacture and sell shotguns designed by Francis E. Boyd and P. Shelton Tyler.
- Francis E. Boyd was a gunmaker located in Hide Park, Massachusetts between 1866 and 1873.
- The Boyd Breechloading Arms Company sales office was listed in Boston, Massachusetts at 81 Washington Street in 1870, and 205 Broadway Street during 1871 and 1872.
- The Boyd Breachloading Arms Company operated a factory in Hyde Park, Massachusetts during its period of operation from 1871 to 1881.

Action

- side by side, rotating action.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- serial number may be partially obscured by the left side hammer.
- serial number may consist of a series of three numbers without a letter prefix or suffix.

Other Markings

- may be marked with the patent markings "PAT JAN 21. 68." over "REISSUED DEC 29. 68." between the barrels at the chamber.

FRT Report

Firearm Reference Number (FRN): 143624
Make: Boyi
Model: M4 SD Airsoft

Summary

Make:	Boyi
Model:	M4 SD Airsoft
Manufacturer:	D-Boys
Level:	Manufacturer Specifications and Commercial Customization
Type:	Airsoft
Action:	Air,Spring or Gas
Country of Manufacturer:	CHINA
Serial Numbering:	See Note
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
143624 - 1	6MM AIRSOFT BB	300	300	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "BOYI" or "BI" may be marked on the firearm.
- "BOYI" is an alias for D-Boys of China.

Model

- "M4 SD AIRSOFT" is not marked on the firearm.
- this airsoft firearm resembles a full automatic "Colt model M4 Carbine" with an integral sound suppressor.
- features include: aluminum outer barrel/sleeve and smoothbore inner barrel; mock suppressor/silencer; aluminum receiver/frame; synthetic forearm assembly, pistol grip and a telescoping buttstock; black finish.
- M4 SD Airsoft has an overall length of 700 mm in the retracted position and 785 mm in the extended position.

Manufacturer

- D-Boys is located in China.

Type

- this is an airsoft rifle.

Action

- spring piston is powered by an electric motor, gear box and battery.
- selective fire.
- at least two variants of this particular model exist:

Variant #1) does not discharge a 0.20 gram 6MM AIRSOFT BB projectile at a muzzle velocity exceeding 238.7 mps (783 fps) and/or a muzzle energy exceeding 5.7 Joules, and
Variant #2) does not discharge a 0.20 gram 6MM AIRSOFT BB projectile at a muzzle velocity exceeding 111.6 mps (366 fps) and/or a muzzle energy exceeding 1.2 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number was observed marked on the left side of the magazine housing. - serial number of an observed example consisted of a three letter prefix (BYO) and nine numbers.
Calibre	- calibre is not usually marked on the firearm.
Shots	- detachable box magazine.
Canadian Law Comments	- this airsoft is available in two variants: Variant #1) CC 2 "firearm" / CC 84 (3) Exempted: muzzle velocity exceeds 111.6 mps (366 fps) and/or muzzle energy exceeds 1.2 Joules, when discharging a 0.2 gram 6MM AIRSOFT BB, and Variant #2) CC 84 (1) "replica firearm": muzzle velocity is less than 111.6 mps (366 fps) and/or muzzle energy is less than 1.2 Joules, when discharging a 0.2 gram 6MM AIRSOFT BB.

Notes

Make

- "Boys" is not marked on the firearm.

Model

- "R.B. MkI" ("an abbreviation of "Rifle, Boys, Mark I") is marked on the left side of the receiver.
- this is an example of the Boys Mark 1 anti-tank rifle manufactured by the John Inglis Company of Toronto, Ontario, Canada.
- the first Boys Anti Tank Rifle was delivered in February 1942.
- production ceased in August 1943.
- total production of all MARKS and variants was in excess of 50,000 examples.
- features include: blued finish; harmonica muzzle-brake; open sights offset to the left; tapered barrel; strut-style stock; adjustable bipod; top-mounted box magazine; separately-cocked striker via a ring at the rear of the bolt; forward-canted pistol-grip and off-hand grip at the butt; and a padded butt.

Manufacturer

- "INGLIS" and a date of manufacture is marked on the left side of the receiver.

Serial Number

- serial-numbered on the left side of the receiver/frame; known example serial-numbered with a "4T" prefix and four digits.

Calibre

- originally manufactured in Calibre 55 BOYS, a quantity were adapted, post-war, to 50 BMG.

Shots

- detachable top-mounted box magazine.

Notes

Make

- "J. Braddell & Son Belfast" is marked on the barrel.

Model

- no model name is marked on this firearm.
- features include: Martini-type downward tilting breech block, hinged at the rear and usually operated by an under lever; cocking indicator located on the right side of the receiver/frame; English style, walnut buttstock with checkering; walnut forend with checkering; blued finish.
- this type of rifle would have been manufactured circa early 1870's to the mid-late 1890's.

Manufacturer

- "J. Braddell & Son Belfast" is marked on the barrel.
- Joseph Braddell/Joseph Braddell & Son was established in Belfast, Ireland in 1811.
- Joseph Braddell & Son's trade mark symbol consisted of the hand of Ulster with a monogram of an interwoven "JB&S" in the palm.
- Joseph Braddell & Son was a sporting goods manufacturer and retailer.
- Joseph Braddell & Son manufactured firearms, golf clubs, fishing rods, etc.
- Joseph Braddell & Son ceased manufacturing firearms in 1915.

Action

- rear hinged, lever operated tipping block design.
- Martini action is locked in the firing position by the tip of the operating lever holding the breech block face up and in line with the chamber.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- known example had a five digit number without prefix or suffix marked on the underside of the receiver/frame in front of the trigger guard.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "J. BRADDELL & SON, BELFAST" is marked on the rear grip strap.
- Joseph Braddell/Joseph Braddell & Son was established in Belfast, Ireland in 1811.
- Joseph Braddell & Son's trade mark symbol consisted of the hand of Ulster with a monogram of an interwoven "JB&S" in the palm.
- Joseph Braddell & Son was a sporting goods manufacturer and retailer.
- Joseph Braddell & Son manufactured firearms, golf clubs, fishing rods, etc.
- Joseph Braddell & Son ceased manufacturing firearms in 1915.

Model

- produced circa 1870's to 1880's.
- "THE ULSTER" over "BULL DOG" is marked on the top strap of the receiver/frame.
- Webley No 2 The Ulster Bull Dog was produced by Webley and finished an retailed by the Irish firm of Joseph Braddell & Son of Belfast, Ireland.
- Webley No 2 The Ulster Bull Dog is virtually identical to the Webley No. 2 revolver with the exception of an extra long grip frame which was fitted and welded into place by Braddell. This afforded the user a firmer grip on the firearm.
- features include: blade front sight and a groove in the top strap for a rear sight; ovate barrel; solid top receiver/frame with a removable non fluted cylinder; ejector rod housed within the cylinder axis pin which swings to the right to align with the cylinder chambers; swing down loading gate is mounted on the right side of the standing breech; exposed spur hammer; double/single action trigger mechanism; extra long bird's head grip strap; checkered hardwood grips; blued or nickel plated finish.
- NOTE: extended grip strap weld can be observed by removing the grip plate.

Manufacturer

- Joseph Braddell & Son reworked this Webley No 2 revolver with an extended grip strap and assigned their own serial number to this firearm.

Serial Number

- serial number is marked on the grip strap of the receiver/frame.
- observed serial numbers consisted of four numbers without a letter prefix or suffix.

Notes

Make

- "Christopher C. Brand" is not marked on the firearm.
- Christopher C. Brand was located in Norwich, Connecticut, U.S.A. from 1855 to 1874.
- Christopher C. Brand designed and manufactured or had manufactured various carbines, rifles, pistols, and whaling guns.
- Christopher C. Brand founded the "Brand Arms Company".
- Brand Arms Company was in located in Norwich, Connecticut, U.S.A. from 1850 to 1875.

Model

- manufactured in the 1860s.
- model designation is not marked on the firearm.
- this pistol was manufactured using the September 23, 1862 patent for a toggle-action carbine that Christopher C. Brand used in his design for the Brand carbine.
- this is an unusual single-shot handgun.
- this pistol operates in the same manner as Brand's carbine, where a lever built into the backstrap or tang of the firearm is lifted, which pulls the standing breech rearwards away from the chamber, extracting a fired case and allowing a fresh cartridge to be loaded. The manually-cocked hammer is built into the standing breech, and a small checkered protrusion attached to the backstrap alows the lever to be lifted.
- this pistol was offered as a military pistol at the end of the US Civil War, but wasn't accepted due to the greater rate of fire of the Colt revolver.
- features include: blued, nickeled, or colour-case-hardened finishes; round barrel; fixed sights; octagonal breech section; single-action spur trigger on a rounded frame; very thin walnut grip panels on a wide-bodied action; and a checkered "prawl"-like protrustion on the back strap, which allows the action lever to be lifted away from the frame.

Manufacturer

- Christopher C. Brand was located in Norwich, Connecticut, U.S.A. from 1855 to 1874.
- Christopher C. Brand designed and manufactured or had manufactured various carbines, pistols, and whaling guns.
- Christopher C. Brand founded "Brand Arms Company".
- Brand Arms Company was in located in Norwich, Connecticut, U.S.A. from 1850 to 1875.
- Christopher C. Brand/Brand Arms Company was succeded by "Junius A. Brand".
- Junius A. Brand was located in Norwich, Connecticut, U.S.A. from 1876 to 1889.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- this is a toggle-action single-shot pistol, wherein the backstrap of the pistol lifts up to withdraw the standing breech and allow access to the chamber.
Serial Number	- serial number is marked on the receiver/frame.

Notes

Make - "R J BRAVERMAN CORP" and "MERIDITH N H" is marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model designation is not marked on the firearm. - this is an unusual "pen pistol" that is considered a normal handgun/Title 1 firearm in most jurisdictions in the United States. - resembles a large pen or tire pressure gauge, but it must be pulled and bent to a 30 degree angle to cock the pistol and drop a hidden trigger. - the barrel is unscrewed to load/unload the firearm, and it has a pen type pocket clip.
Manufacturer	- "MERIDITH N H" is marked on the firearm. - produced by Remcon North Corp. of Meredith, New Hampshire, U.S.A.
Serial Number	- the serial number is located on the receiver/frame near the muzzle. - observed serial number had a letter prefix and six numbers, eg. "B005520".
Calibre	- "22 LR" is marked on the barrel.

Notes

Make

- "W BRAZIER" is marked on the firearm.
- "LONDON" is also usually marked on the firearm.
- "W BRAZIER" stands for "William Brazier".

Model

- model designation is derived from the characteristics of the firearm.
- "LONDON" was marked on the barrel on one example.
- commonly known as a Queen Anne style pistol from circa 1725.
- features include: round, tapered barrel slightly flared at the muzzle; flintlock mechanism on the right side ; trigger and trigger guard; round, curved wood grip with an ornamental grip cap; light scroll engraving and finished "in the white".

Manufacturer

- "W BRAZIER" is marked on the firearm.
- "LONDON" is also usually marked on the firearm.
- "William Brazier" was apprentice to Edmund Weston in 1702.
- "W BRAZIER" was "Master" from 1730 to 1747.
- "W BRAZIER" had 28,844 guns proved at the London Proof House from 1721 to 1731.

Action

- muzzle loader.

Notes

Make

- "BRAZOS CUSTOM GUNWORKS" is marked on the bottom of the dust cover.
- "BRAZOS CUSTOM GUNWORKS" is located in Morgan, Texas U.S.A..
- "BRAZOS CUSTOM GUNWORKS" is a custom gun builder, parts distributor and manufacturer.
- "BRAZOS CUSTOM GUNWORKS" was established in 1992.

Model

- "MDS" is not marked on the firearm.
- "MDS" stands for "Modular Double Stack" for a Colt 1911/1911A1 type pistol.
- "MDS" main feature is the receiver/frame to be only the upper portion of a Colt 1911/1911A1 type pistol that the grip portion is independent of it and may be of polymer or steel.
- "MDS" is sold as a receiver/frame only.
- "MDS" receiver/frame work with the polymer STI grip and the Cheely steel grip.
- "MDS" features may vary widely when assembled as this model is frequently customized for competitive shooters.
- features include: steel receiver/frame with standard or long dustcover; receiver/frame may be pre-drilled for a side optic mount.

Manufacturer

- "BRAZOS CUSTOM GUNWORKS" is marked on the bottom of the dust cover.
- "BRAZOS CUSTOM GUNWORKS" is located in Morgan, Texas U.S.A..
- "BRAZOS CUSTOM GUNWORKS" is a custom gun builder, parts distributor and manufacturer.
- "BRAZOS CUSTOM GUNWORKS" was established in 1992.

Action

- recoil operated.

Serial Number

- serial number is marked on the right side of the receiver/frame.
- serial number of a referenced example consisted of a one letter (B) prefix and six numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre designation is usually marked on the barrel, visible through the ejection port.
Shots	- detachable box magazine.

148682 - 1	20X138B LONG SOLOTHURN	12	1300	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the manufacturer or logo thereof is marked on the firearm.

Model

- the model is marked on the firearm.
- this is a light 20mm cannon adopted by the Italian military in 1935, for use as an anti-tank and anti-aircraft weapon, in single and dual ground and naval mountings; the land mounts were customarily equipped with a folding trail and integral wheels, for easy transport behind a vehicle, and some examples of this cannon were mounted on trucks as mobile anti-aircraft batteries.
- features include: coned flash hider, parkerized/phosphated finish; open adjustable sights (though optical sights were available for long-range fire); an under-barrel gas piston; a feed-tray on the left side into which 12-round clips were placed by an assistant gunner (this cannon, like the Breda 37, was engineered so that fired cases were re-inserted into the feed clips before the entire clip was ejected out the right side); and a gunner's seat with wheels to operate the traversing gear, and dual spade grips.

Manufacturer

- the manufacturer or logo thereof is marked on the firearm.

Action

- gas operated.

Serial Number

- numbered on the receiver/frame.

Shots

- clip fed via 12-round clips that are placed in the feed-tray manually.

Notes

Make - "BREDA" is marked on the top of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "MTR. LEGG.MOD.30" is marked on the top of the receiver/frame. - this is a light machine gun designed by Breda in 1930, and adopted by the Italian military the same year; this is an unusual-appearing light machine gun designed to feed from a hinged box magazine that hinges forward to be loaded with stripper clips. In 1938, the Italians adopted the newer 7.35x52 Carcano cartridge, and a number of these machine guns were subsequently re-chambered and re-built for the newer cartridge as the "M1938" (not to be confused with the tank-mounted M38 machine gun with a drum magazine). - this machine gun has a cartridge oiler built into the top cover to aid in primary extraction. - features include: blued finish; a cone-shaped flash hider; open adjustable sights; a ribbed quick-change barrel; a right side mounted magazine that is hinged forward to allow loading from charging clips, a hinged top cover with oiler, bipod mounted on the barrel shroud, and a pistol grip.
Manufacturer	- "BREDA-ROMA-A.XI" is marked on the top of the receiver/frame.
Action	- recoil operated.
Serial Number	- serial number is marked on the top of the receiver/frame. - Observed sample contained "No" followed by two numbers. - The serial number rationalization is unknown.
Shots	- uses a right side mounted box magazine that hinges forward and is loaded from chargers.
Other Markings	- a crown over "RE" is marked on the firearm. - Observed sample contained "GOBIERNO DE COSTA RICA" over "MLTR. LEGG. CAL. 7M", followed by firearm serial number, over, "BREDA ROMA 1935 A.XIII". - Note: "GOBIERNO DE COSTA RICA" translates to "Government of Costa Rica".

Notes

Make	- "BREDA" is marked on both sides of the receiver/frame and on the underside of the forearm.
Model	- introduced in 2005. - "Echo" is marked on the right side of the receiver/frame. - this model uses an inertia operating system that when fired, using the rearward recoil movement of all parts but for a free-floating bolt with a rotating bolt head which compresses an inertia spring. Once pressure levels have dropped to a safe level the inertia spring pushes the bolt rearward with enough energy to unlock the bolt head, eject the spent cartridge and re-cock the hammer. The recoil spring then pushes the bolt forward, feeding a new cartridge into the chamber and locking the bolt head. - features include: TruGlo front sight; ventilated rib; blued smooth or rifled slug barrel; fixed or interchangeable choke tubes; grey, nickel, black or bronze anti-reflective chromed receiver/frame; polymer trigger guard; gold trigger; checkered walnut pistol grip stock; removable sling swivels; wooden or rubber butt plate. - introduced in 2007: the "Echo grey BHC" (BHC stands for Breda Hard Coating) feature a grey finished receiver/frame providing a high resistance to corrosion. - average weight when chambered in 12GAX2 3/4" and a 610mm (24") barrel length is 2.850kg (6.28lbs). - special matt finish receiver/frame, engraved side strip is plated with four different quality of gold; pink, black, white and yellow for the Echo Iris series.
Manufacturer	- the manufacturer's name is marked on the firearm.
Action	- inertia operated.
Serial Number	- the serial number is marked on the right side of the receiver/frame. - the serial number consists of a "P" prefix followed by five numbers.
Calibre	- the calibre designation is usually marked on the barrel.
Shots	- tubular magazine is mounted under the barrel.

Notes

Make - the make is marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- model marked in script on the side of the lower receiver/frame as "Ermes Gold". - this is the highest grade of the Ermes recoil-operated shotgun available, differing only in cosmetics from other Ermes models. - features include: deluxe walnut pistol-grip stock and forearm; nickel-plated aluminum-alloy receiver/frame with gold-filled game-bird and scroll engraving; blued barrel; ventilated rib on barrel; magazine cut-off on right side of receiver/frame and a cross-bolt safety at the rear of the trigger-guard. - also available as the "Ermes Silver", without gold-filled engraving. - this model uses an inertia operating system that when fired, using the rearward recoil movement of all parts but for a free-floating bolt with a rotating bolt head which compresses an inertia spring. Once pressure levels have dropped to a safe level the inertia spring pushes the bolt rearward with enough energy to unlock the bolt head, eject the spent cartridge and re-cock the hammer. The recoil spring then pushes the bolt forward, feeding a new cartridge into the chamber and locking the bolt head.
Manufacturer	- the manufacturer is marked on the firearm.
Action	- recoil-operated. - inertia operated.
Serial Number	- numbered on right lower edge of receiver/frame; rationalization unknown.
Calibre	- available with either a "standard" chambered barrel in 12 GA X 2 3/4" or a "magnum" chambered barrel in 12 GA X 3".
Shots	- tubular magazine in forearm.
Importer	- the importer's name is marked on the firearm.

Notes

Make

- "BREDA" over "MECCANICA ROMANA" over "ITALIA" is marked on the left rear side of the receiver/frame.

Model

- Introduced in 1950.
- the model designation is not marked on the firearm.
- manufactured from 1950 to 1959.
- these firearms were made on contract for other nations.
- Danish property marking is "Crown FKF".
- features include: parkerized metal surfaces; walnut stock; post foresight with protective side wings and rear aperture sight adjustable for both windage and elevation; detachable trigger group; bayonet lug forged as part of the gas assembly.

Manufacturer

- these rifles were manufactured by Breda who were licenced to produce these firearms and sell them to third nation clients.
- in addition to those rifles produced solely for Italian use, export orders were produced for Denmark and Indonesia.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- gas operated.
Serial Number	- the serial number will be found on the top rear of the receiver/frame. - all Italian and foreign contract models manufactured by Breda will have serial numbers beginning with "BMR". - serial numbers observed included: "BMR 4483" and "BMR 4071".
Shots	- Introduced in 1950 with a 8 shot fix cartridge magazine. - this firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, 8 cartridge, enbloc clip. - once inserted into the firearm, this clip cannot be recharged.
Other Markings	- Danish rifles are marked with a crown over "FKF", while Indonesian rifles are marked with a half-bird / half-human figure.
Remarks	- this firearm was designed by John Garand, adopted by the U.S. Government in 1936, and saw service through WW II and Korea. - these Italian versions of the US Rifle M1 Garand were manufactured by Breda & Beretta who were licenced to produce these firearms and sell them to third nation clients. - in addition to those rifles produced solely for Italian use, export orders were produced for Denmark and Indonesia.

Notes

Model

- this is a recoil-operated semi-automatic shot gun with a steel or alloy receiver; walnut pistol grip stock and forearm, safety reversible for left-handed shooters, and barrels available with or without ventilated rib.
- also available in Skeet, Trap, and Field versions, as well as a Slug version with adjustable sights.
- choke tube extensions may be fitted to the barrel which may increase the appearence of barrel length considerably.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- Breda is a manufacturer located in the Brescia area of Italy that began manufacturing firearms for the Italian armed forces during the First World War; they were previously involved in manufacturing railway cars and engines. They are best known for a series of light machine guns they produced during World War Two.
Action	- recoil-operated.
Barrel	- all barrels also available with a screw-on choke attachment which increases the barrel length to 32"/812mm.
Calibre	- barrels interchangeable between chamber lengths.
Shots	- these firearms left the factory with a magazine plug to limit the 2 3/4" magazine capacity to three cartridges.

Notes

Make

- the logo "Breda" is marked on the receiver/frame.

Model

- introduced in 2005.
- this is a limited series Pegaso model manufactured by Breda to commemorate the 100th anniversary foundation (1905-2005) of the Oto Melara Company. "Oto Melara S.p.A" and "Breda Meccanica Bresciana" are part of the "Finmeccanica Company group".
- limited edition to one hundred specimens (fifty in 12GA and fifty in 20GA) numbered consecutively from 1/100 to 100/100. The numbering sequence is engraved on the trigger guard.
- "1905-2005" inlaid in gold inside a banner over "Anniversary" engraved on both sides of the receiver/frame.
- the Oto Melara logo (two arrows forming two interlacing circles with 1905-2005 within) is stamped on the underside of the receiver/frame.
- features include: standard pattern over & under shotgun; deep high polished blued barrels with ventilated rib and two side ribs; hand fitted barrels to action; detachable trigger group with adjustable single selective trigger; engraving pattern realized by "Bottega C. Giovanelli"; oil finished selected walnut stock with pistol grip and hand checkered; wood but plate; sling swivels and luxury ABS case.
- average weight for a 12GA X 3" and 711mm (28") barrel length is 3.1kg (6.9lbs).

Manufacturer

- the Breda logo is stamped on the bottom of the receiver/frame forward of the trigger assembly.

Action

- over/under pattern.

Serial Number

- numbered on the receiver/frame.
- do not confuse the serial number with the limited series (1 to 100) sequence engraved on the trigger guard.

Notes

Make

- marked on the top of the receiver: BREDA (in an oval)
- marked on the removeable sliding receiver cover: BREDA Mod. P.G.

Model

- model designation is marked on the removeable receiver cover: BREDA Mod. P.G.
- this is selective-fire rifle, capable of single round or four round burst-fire, the selector lever is behind the trigger.
- a compact but comparatively heavy rifle, with an unusual inclined bolt-lock mechanism within a rectangular receiver body, with the charging handle on the right side attached to the breech-block carrier; and an annular ring piston surrounding the forward portion of the barrel.

Manufacturer

- marked on the receiver: BREDA (in an oval)
- marked on the removeable receiver cover: BREDA Mod. P.G.

Action

- gas operation.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- marked on the top of the receiver body under the sliding receiver cover, example: N. 123 NOTE: the serial number on the receiver body is not neccessarily the same as the number on the sliding receiver cover.
Calibre	- caliber is not marked on the firearm.
Shots	- detachable box magazine.
Other Markings	- may be marked on top of the sliding receiver cover: GOBIERNO DE COSTA RICA (translates as: Government of Costa Rica) - may alsobe marked on top of the sliding cover: MOSCHETTO AUTOMATICO (translates as: Short Rifle Automatic) - sample examined was also marked with the date of manufacture: ROMA 1935.XIII (denotes the 13th year of the Italian Fascist Era)
Remarks	- this rifle developed by the technical head of Breda, Sestilio Fiorini during the early 1930s, known as the "PG Short Rifle" was adopted by Costa Rica in 7MM MAUSER; the rifle was originally offered for adoption to the Italian Army in 6.5 X 52 ITALIAN without success.

Notes

Make

- marked on the top of the receiver: BREDA (in an oval)
- marked on the removeable sliding receiver cover: BREDA Mod. P.G.

Model

- model designation is marked on the removeable receiver cover: BREDA Mod. P.G.
- this is selective-fire rifle, capable of single round or four round burst-fire, the selector lever is behind the trigger.
- a compact but comparatively heavy rifle, with an unusual inclined bolt-lock mechanism within a rectangular receiver body, with the charging handle on the right side attached to the breech-block carrier; and an annular ring piston surrounding the forward portion of the barrel.

Manufacturer

- marked on the receiver: BREDA (in an oval)
- marked on the removeable receiver cover: BREDA Mod. P.G.

Action

- no longer capable of full automatic fire.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- marked on the top of the receiver body under the sliding receiver cover, example: N. 123 - NOTE: the serial number on the receiver body is not neccessarily the same as the number on the sliding receiver cover.
Calibre	- caliber is not marked on the firearm.
Shots	- detachable box magazine.
Other Markings	- may be marked on top of the sliding receiver cover: GOBIERNO DE COSTA RICA (translates as: Government of Costa Rica) - may alsobe marked on top of the sliding cover: MOSCHETTO AUTOMATICO (translates as: Short Rifle Automatic) - sample examined was also marked with the date of manufacture: ROMA 1935.XIII (denotes the 13th year of the Italian Fascist Era)
Remarks	- this rifle developed by the technical head of Breda, Sestilio Fiorini during the early 1930s, known as the "PG Short Rifle" was adopted by Costa Rica in 7mm; the rifle was originally offered for adoption to the Italian Army in 6.5 X 52 Italian without success.

Notes

Make

- normally marked on the receiver/frame.

Model

- this is a generic model; other model entries exist which might better describe the firearm.
- model may not be marked on the firearm; some examples have been noted with the model being marked on the left side of the receiver/frame;
- the receiver/frame may be marked "Brescia," a word that is often mistaken as the model; Brescia is the name of the city in Italy where Breda manufactures shotguns;
- receivers/frames may be encountered made of forged steel or of alloy.
- features include: blued, silver finished, or mixed finish receiver/frames with varying degrees of engraving and ornamentation available;
- checkered walnut stock;
- vent rib or plain barrels which are interchangeable within model series;
- may be designed to function using the Browning Long Recoil operating system or a gas- operated system;
- receiver/frame is produced in two pieces;
- may have a magazine cut-off switch mounted on the right side of the recevier/ frame above the loading gate;
- the safety switch itself may be mounted as either a cross-bolt design in the front edge of the trigger guard or may be found mounted on the right side of the receiver/frame;
- available with removeable, adjustable chokes.

Manufacturer

- may be marked on the receiver/frame "BREDA, BRESCIA" and "MADE IN ITALY"
- full name of manufacturer is "Breda Meccanica Bresciana."
- also previously known as Ernesto Breda.

Action

- made in both long-recoil and gas-operated variants.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number
- stamped on the receiver/frame.
- observed samples have been located on rear-right of receiver/frame or on underside of receiver/frame.

38185 - 4	20 GA X 3"	3	723	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Model	- this is a lightweight version of the Mark II recoil operated semi automatic shot gun with an all steel receiver; walnut pistol grip stock and forearm, safety reversible for left handed shooters, and barrels available with or without ventilated rib.
Manufacturer	- Breda is a manufacturer located in the Brescia area of Italy that began manufacturing firearms for the Italian armed forces during the First World War; they were previously involved in manufacturing railway cars and engines. They are best known for a series of light machine guns they produced during World War Two.
Action	- recoil-operated.
Barrel	- all barrels also available with a screw-on choke attachment which increases the barrel length to 32"/812mm.
Calibre	- barrels interchangeable between chamber lengths.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - these firearms left the factory with a magazine plug to limit the 2 3/4" magazine capacity to three cartridges.

Notes

Make

- "BREN" is usually marked on the side of receiver/frame.
- "BREN" name is derived from the first two letters in "Brno" and "Enfield".
- "BREN GUN" contact between the British Government and Ceskoslovenska Zbrojovka of Brno was signed in 1935.
- "BREN GUN" was an improved CZ model ZB light machine gun.
- "BREN GUN" was initially manufactured in Britain at the Royal Small Arms Factory, Enfield
- "BREN GUN" model MARK 1 was manufactured by the Royal Small Arms Factory, Enfield starting in September of 1937.

Model

- "GUN MACHINE 7.62MM IA" and "IMG 15 GA" may be marked on the right side of the receiver/frame.
- light machine gun.
- selective fire.
- "1A IMG15GA" is the Indian Army conversion of the Bren Gun model MARK 3.
- this is similar to the British conversion of the Bren Gun to 7.62MM NATO. The British version was known as the Model "L4".

Manufacturer

- the Ashoka symbol and "S.A.F." may be marked on the right side of the receiver/frame.
- Small Arms Factory, Ishapore is a State Arsenal, re-named from ROYAL ORDNANCE FACTORY ISHAPORE, in post-Indian independence.

Type

- air-cooled, light machine gun.

Action

- no longer capable of full automatic fire.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- "7.62MM IA" may be marked on the right side of the receiver/frame.
Shots	- detachable box magazine.
Other Markings	- markings may be as follows: GUN MACHINE 7.62MM IA IMG 15 GA

Notes

Make

- "BREN" is usually marked on the side of receiver/frame.
- "BREN" name is derived from the first two letters in "Brno" and "Enfield".
- "BREN GUN" contact between the British Government and Ceskoslovenska Zbrojovka of Brno was signed in 1935.
- "BREN GUN" was an improved CZ model ZB light machine gun.
- "BREN GUN" was initially manufactured in Britain at the Royal Small Arms Factory, Enfield
- "BREN GUN" model MARK 1 was manufactured by the Royal Small Arms Factory, Enfield starting in September of 1937.

Model

- model designation should be marked on the left side of the receiver/frame.
- markings may read "GUN M/C 7.62MM L4A2".
- the L4A2 is reworked or refurbished from other existing models and may still have the original markings. Ex.: BREN MK3 and may have been cancelled out with two lines etched through the old model designation.
- light machine gun.
- selective fire: semi & automatic.
- has a flash suppressor versus a flash hider.
- L4 Bren series variants in 7.62MM NATO, are reworked/remanufactured Bren Light Machine Guns.
- L4A2: converted MARK 3, .303 British, Bren. Two steel barrels & a light bipod.

Type

- air cooled, light machine gun.

Action

- gas-operated, tilting-block locking system.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on top of the receiver/frame, behind the rear sight.
Barrel	- length of 537 mm is the barrel measurement without the flash-hider.
Calibre	- calibre designation located on receiver/frame & barrel.
Shots	- detachable box magazine. - the 30 round L4A1 type magazine was issued in the L4A2. - the 20 and 30 round FN-FAL magazine my also be encountered in the L4A2 as they are interchangable.
Remarks	- The 7.62 mm Nato, L4 Bren series variants are: - L4A1: converted MARK 3, .303 British, Bren. Two steel barrels & a MARK 1 bipod. - L4A2: converted MARK 3, .303 British, Bren. Two steel barrels & a light bipod. - L4A3: converted MARK 2, .303 British, Bren. One chromium-plated barrel & bipod. - L4A4: converted MARK 3, .303 British, Bren. One chromium-plated barrel & bipod. - L4A5: converted MARK 2, .303 British, Bren. Two steel barrels & a bipod. - L4A6: converted L4A1. One chromium-plated barrel & bipod. - L4A7: None were produced. Drawings were prepared for the Indian Army. This model would have consist of the conversion of a MARK 1, .303 British, Bren with one chromium-plated barrel & bipod. - L4A8: Non were produced. - L4A9: Modified L4A4 with bracket on left side of receiver for anti-aircraft or night sight.

Model	- model designation marked on the receiver. - light machine gun. - selective fire: semi & automatic. - has a flash suppressor versus a flash hider. - the L4 Bren series variants in 7.62MM NATO, are reworked/remanufactured Bren Light Machine Guns & consist of the following models: - L4A1: converted MARK 3, .303 British, Bren. Two steel barrels & a MARK 1 bipod. - L4A2: converted MARK 3, .303 British, Bren. Two steel barrels & a light bipod. - L4A3: converted MARK 2, .303 British, Bren. One chromium-plated barrel & bipod. - L4A4: converted MARK 3, .303 British, Bren. One chromium-plated barrel & bipod. - L4A5: converted MARK 2, .303 British, Bren. Two steel barrels & a bipod. - L4A6: converted L4A1. One chromium-plated barrel & bipod. - L4A7: None were produced. Drawings were prepared for the Indian Army. This model would consist of the conversion of a MARK 1, .303 British, Bren with one chromium-plated barrel & bipod. - L4A8: None were produced. - L4A9: Modified L4A4 with bracket on left side of receiver for anti-aircraft or night sights.
Manufacturer	- the original manufacturer's name will be found marked on the receiver/frame upper right side as INGLIS.
Type	- air cooled, light machine gun.
Action	- gas-operated, tilting-block locking system.
Serial Number	- located on top of receiver, behind rear sight. - the Inglis serial number rationalization was a number followed by the letter "T" followed by up to four numbers.
Barrel	- length of 537 mm is the barrel measurement without the flash-hider.
Calibre	- calibre designation located on receiver & barrel.
Shots	- detachable box magazine.
Remarks	- The 7.62 mm Nato, L4 Bren series variants are: - L4A1: converted MARK 3, .303 British, Bren. Two steel barrels & a MARK 1 bipod. - L4A2: converted MARK 3, .303 British, Bren. Two steel barrels & a light bipod. - L4A3: converted MARK 2, .303 British, Bren. One chromium-plated barrel & bipod. - L4A4: converted MARK 3, .303 British, Bren. One chromium-plated barrel & bipod. - L4A5: converted MARK 2, .303 British, Bren. Two steel barrels & a bipod. - L4A6: converted L4A1. One chromium-plated barrel & bipod. - L4A7: None were produced. Drawings were prepared for the Indian Army. This model would have consist of the conversion of a MARK 1, .303 British, Bren with one chromium-plated barrel & bipod. - L4A8: None were produced. - L4A9: Modified L4A4 with bracket on left side of receiver for anti-aircraft or night sights.

Notes

Make

- "BREN Mk III" which has been "lined-out" by the Arsenal is still present on the rear left side of the receiver/frame; this is due to the fact that the L4A4 configuration of the Nato Bren was a rework/modification from the original MARK III Bren in 303 British calibre to 7.62MM NATO calibre.
- above the "BREN Mk III" is marked, "GUN M/C 7.62MM L4A4".
- below the "BREN Mk III" is marked, MG 43 GA".
- "BREN" name is derived from the first two letters in "Brno" and "Enfield".
- "BREN GUN" contact between the British Government and Ceskoslovenska Zbrojovka of Brno was signed in 1935.
- "BREN GUN" was an improved CZ model ZB light machine gun.
- "BREN GUN" was initially manufactured in Britain at the Royal Small Arms Factory, Enfield
- "BREN GUN" model MARK 1 was manufactured by the Royal Small Arms Factory, Enfield starting in September of 1937.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- model designation is marked on the rear left side of the receiver/frame as, "GUN M/C 7.62MM L4A4".
- "BREN Mk III" which has been "lined-out" by the Arsenal is still present on the rear left side of the receiver/frame; this is due to the fact that the L4A4 configuration of the Nato Bren was a rework/modification from the original MARK III Bren in 303 BRITISH calibre to 7.62MM NATO calibre; "MG 43 GA" is also marked on the receiver/frame beneath the "BREN Mk III".
- the L4A4 Bren Gun is a light machine gun that was accepted into British military service in 1961.
- research indicates that 6,900 L4A2 Bren Guns were converted/modified to the L4A4 configuration and were so marked.
- 500 new L4A4 Bren Guns were manufactured in 1961.
- the L4A4 designation was caused by the adoption of a single chrome-lined barrel to replace the two standard issue barrels that were originally supplied with the MARK III and L4A2 Bren Guns.
- Note: originally selective fire, this firearm has been subsequently modified to semi-automatic only
- features: gas operated, converted for semi-automatic fire only, utilizing a top mounted detachable box magazine; quick change barrel design; front mounted, folding-type bipod; folding rear sight; has a slotted type hider; may have a black paint finish.
- this gun will also accept the 20 round magazine of the British, L1 series of Self-Loading Rifle (SLR) which is also in calibre 7.62MM NATO.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number is marked on the top rear of the receiver/frame.
- known example had a five digit number with a letter prefix.
- letter prefix "A" has been observed.

- "BREN GUN" was initially manufactured in Britain at the Royal Small Arms Factory, Enfield
- "BREN GUN" model MARK 1 was manufactured by the Royal Small Arms Factory, Enfield starting in September of 1937.

Model

- model designation should be marked on the left side of the receiver/frame.
- markings may read "GUN M/C 7.62MM L4A6".
- the L4A6 is reworked or refurbished from other existing models and may still have the original markings. Ex.: BREN MK3 and may have been cancelled out with two lines etched through the old model designation.
- light machine gun.
- selective fire: semi & automatic.
- has a flash suppressor versus a flash hider.
- L4 Bren series variants in 7.62MM NATO, are reworked/remanufactured Bren Light Machine Guns.

Manufacturer

- remanufactured or converted by many organizations, other than the original manufacturers.

Type

- air cooled, light machine gun.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- no longer capable of full automatic fire.
Serial Number	- serial number is marked on top of the receiver/frame, behind the rear sight.
Barrel	- length of 537 mm is the barrel measurement without the flash-hider.
Calibre	- calibre designation located on receiver/frame & barrel.
Shots	- detachable box magazine. - the 30 round L4A1 type magazine was issued in the L4A6. - the 20 and 30 round FN-FAL magazine my also be encountered in the L4A6 as they are interchangable.
Remarks	- The 7.62 mm Nato, L4 Bren series variants are: - L4A1: converted MARK 3, .303 British, Bren. Two steel barrels & a MARK 1 bipod. - L4A2: converted MARK 3, .303 British, Bren. Two steel barrels & a light bipod. - L4A3: converted MARK 2, .303 British, Bren. One chromium-plated barrel & bipod. - L4A4: converted MARK 3, .303 British, Bren. One chromium-plated barrel & bipod. - L4A5: converted MARK 2, .303 British, Bren. Two steel barrels & a bipod. - L4A6: converted L4A1. One chromium-plated barrel & bipod. - L4A7: None were produced. Drawings were prepared for the Indian Army. This model would have consist of the conversion of a MARK 1, .303 British, Bren with one chromium-plated barrel & bipod. - L4A8: None were produced. - L4A9: Modified L4A4 with bracket on left side of receiver for anti-aircraft or night sigh

Notes

Make

- "BREN" is usually marked on the side of receiver/frame.
- "BREN" name is derived from the first two letters in "Brno" and "Enfield".
- "BREN GUN" contact between the British Government and Ceskoslovenska Zbrojovka of Brno was signed in 1935.
- "BREN GUN" was an improved CZ model ZB light machine gun.
- "BREN GUN" was initially manufactured in Britain at the Royal Small Arms Factory, Enfield
- "BREN GUN" model MARK 1 was manufactured by the Royal Small Arms Factory, Enfield starting in September of 1937.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "Mk I" is marked on the side of the receiver/frame.
- this is a light air cooled machine gun.
- features include: quick change barrel with carrying handle; folding bipod; gas operated; detachable magazine; and selective fire change lever with safe, semi automatic & full automatic positions.

Various Bren Gun models:
- "MARK 1" (Mk I): introduced in 1937.
- features include: dial drum sight, dovetail slot on the left side of the receiver/frame for fixed line sight; dish-shaped gas deflector shield at front of body, Mk 1 gas piston and bolt assembly, folding cocking handle, buttstock fitted with butt handle underneath, and a folding strap at top of the cup shaped buttplate.
- MARK 1m (Mk 1m) Canadian & MARK 1* (Mk 1*) British: introduced in 1941.
- features include: folding cocking handle; dial drum rear sight, dovetail slot on the left side of the receiver/frame removed; usually fitted with Mk 2 butt slide, Mk 1* barrel assembly, flat gas deflector shield, no vertical reinforcing rib outside the magazine housing.
- MARK 2 (Mk II): introduced in 1942.
- features include: folding leaf backsight mounted on top of body, simplified bolt, fixed (non-folding) cocking handle.
- MARK 2/1 (Mk II/I or Mk 2/I): introduced in 1948.
- features include: folding cocking handle.
- MARK 3 (Mk III or Mk 3): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.
- MARK 4 (Mk IV or Mk 4): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.

Manufacturer

- manufacturer's code of "M67" or "D" is marked on the side of the receiver/frame.

Action

- gas operated.

Serial Number

- serial number is located on the top rear of the body of the receiver/frame
- Monotype serial numbered range from 1942 to 1954 with the following prefixes: R1 - R999, S1 - S9999, T1 - T9999, U1 - U999, V1 - V9999, W1 - W8320, RA1 - RA6695, RB1 - RB10000.

Barrel

- Bren Gun barrels in .303 British for models MARK 1, MARK 1*, MARK 1m, MARK 2, MARK 2/1, MARK 3 and MARK 4 are interchangeable.

Barrel Assemblies: Mk 1, Mk 1* and Mk 2 have a length of 578 mm (internal measurement) or 635 mm (external measurement including the flash hider); and
Barrel Assemblies: Mk 4 and Mk 5 have a length of 508 mm (internal measurement) or 565 mm (external measurement including the flash hider).

Shots

- detachable 30 round box or 100 round drum magazine.

Canadian Law Comments

- a cartridge magazine that "is of the "drum" type, is not a reproduction and was originally designed or manufactured for use in a firearm commonly known as (iii) the Bren Light machine-gun, or any variant or modified version of it, including the Mark1, Mark 2, Mark2/1, Mark3 and Mark 4 is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- the 100 round drum magazine is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".

Notes

Make

- "BREN" is usually marked on the side of receiver/frame.
- "BREN" name is derived from the first two letters in "Brno" and "Enfield".
- "BREN GUN" contact between the British Government and Ceskoslovenska Zbrojovka of Brno was signed in 1935.
- "BREN GUN" was an improved CZ model ZB light machine gun.
- "BREN GUN" was initially manufactured in Britain at the Royal Small Arms Factory, Enfield
- "BREN GUN" model MARK 1 was manufactured by the Royal Small Arms Factory, Enfield starting in September of 1937.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "Mk I" is marked on the side of the receiver/frame.
- this is a light air cooled machine gun.
- features include: quick change barrel with carrying handle; folding bipod; gas operated; detachable magazine; and originally selective fire, but subsequently modified to semi automatic only.

Various Bren Gun models:
- "MARK 1" (Mk I): introduced in 1937.
- features include: dial drum sight, dovetail slot on the left side of the receiver/frame for fixed line sight; dish-shaped gas deflector shield at front of body, Mk 1 gas piston and bolt assembly, folding cocking handle, buttstock fitted with butt handle underneath, and a folding strap at top of the cup shaped buttplate.
- MARK 1m (Mk 1m) Canadian & MARK 1* (Mk 1*) British: introduced in 1941.
- features include: folding cocking handle; dial drum rear sight, dovetail slot on the left side of the receiver/frame removed; usually fitted with Mk 2 butt slide, Mk 1* barrel assembly, flat gas deflector shield, no vertical reinforcing rib outside the magazine housing.
- MARK 2 (Mk II): introduced in 1942.
- features include: folding leaf backsight mounted on top of body, simplified bolt, fixed (non-folding) cocking handle.
- MARK 2/1 (Mk II/I or Mk 2/I): introduced in 1948.
- features include: folding cocking handle.
- MARK 3 (Mk III or Mk 3): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.
- MARK 4 (Mk IV or Mk 4): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.

Manufacturer

- manufacturer's code of "M67" or "D" is marked on the side of the receiver/frame.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number is located on the top rear of the body of the receiver/frame
- Monotype serial numbered range from 1942 to 1954 with the following prefixes: R1 - R999, S1 - S9999, T1 - T9999, U1 - U999, V1 - V9999, W1 - W8320, RA1 - RA6695, RB1 - RB10000.

Barrel

- Bren Gun barrels in .303 British for models MARK 1, MARK 1*, MARK 1m, MARK 2, MARK 2/1, MARK 3 and MARK 4 are interchangeable.

Barrel Assemblies: Mk 1, Mk 1* and Mk 2 have a length of 578 mm (internal measurement) or 635 mm (external measurement including the flash hider); and
Barrel Assemblies: Mk 4 and Mk 5 have a length of 508 mm (internal measurement) or 565 mm (external measurement including the flash hider).

Shots

- detachable 30 round box or 100 round drum magazine.

Canadian Law Comments

- a cartridge magazine that "is of the "drum" type, is not a reproduction and was originally designed or manufactured for use in a firearm commonly known as (iii) the Bren Light machine-gun, or any variant or modified version of it, including the Mark1, Mark 2, Mark2/1, Mark3 and Mark 4 is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- the 100 round drum magazine is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".

Notes

Make

- "BREN" is usually marked on the side of receiver/frame.
- "BREN" name is derived from the first two letters in "Brno" and "Enfield".
- "BREN GUN" contact between the British Government and Ceskoslovenska Zbrojovka of Brno was signed in 1935.
- "BREN GUN" was an improved CZ model ZB light machine gun.
- "BREN GUN" was initially manufactured in Britain at the Royal Small Arms Factory, Enfield
- "BREN GUN" model MARK 1 was manufactured by the Royal Small Arms Factory, Enfield starting in September of 1937.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this is a light air cooled machine gun.
- features include: quick change barrel with carrying handle; folding bipod; gas operated; detachable magazine; and selective fire change lever with safe, semi automatic & full automatic positions.

Various Bren Gun models:
- "MARK 1" (Mk I): introduced in 1937.
- features include: dial drum sight, dovetail slot on the left side of the receiver/frame for fixed line sight; dish-shaped gas deflector shield at front of body, Mk 1 gas piston and bolt assembly, folding cocking handle, buttstock fitted with butt handle underneath, and a folding strap at top of the cup shaped buttplate.
- MARK 1m (Mk 1m) Canadian & MARK 1* (Mk 1*) British: introduced in 1941.
- features include: folding cocking handle; dial drum rear sight, dovetail slot on the left side of the receiver/frame removed; usually fitted with Mk 2 butt slide, Mk 1* barrel assembly, flat gas deflector shield, no vertical reinforcing rib outside the magazine housing.
- MARK 2 (Mk II): introduced in 1942.
- features include: folding leaf backsight mounted on top of body, simplified bolt, fixed (non-folding) cocking handle.
- MARK 2/1 (Mk II/I or Mk 2/I): introduced in 1948.
- features include: folding cocking handle.
- MARK 3 (Mk III or Mk 3): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.
- MARK 4 (Mk IV or Mk 4): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.

Type

- light, air cooled.

Action

- gas operated.

Serial Number

- Enfield's Bren Gun were serial numbered from 1937 to 1954 with the following prefixes: A1 - A999, B1 - B9999, C, D, E, F, G, H, K, L, P, U, V, W, X, Y, Z, AA, BA, BB, BC, BD, BE, BF, BG, BH, LB1 TO LB58823.

Barrel

- Bren Gun barrels in .303 British for models MARK 1, MARK 1* or MARK 1m, MARK 2, MARK 2/1, MARK 3 and MARK 4 are interchangeable.

Barrel Assemblies: Mk 1, Mk 1* and Mk 2 have a length of 578 mm (internal measurement) or 635 mm (including the flash hider); and
Barrel Assemblies: Mk 4 and Mk 5 have a length of 508 mm (internal measurement) or 565 mm (including the flash hider).

Shots

- detachable 30 round box or 100 round drum magazine.

Canadian Law Comments

- a cartridge magazine that "is of the "drum" type, is not a reproduction and was originally designed or manufactured for use in a firearm commonly known as (iii) the Bren Light machine-gun, or any variant or modified version of it, including the Mark1, Mark 2, Mark2/1, Mark3 and Mark 4 is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- the 100 round drum magazine is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".

Notes

Make

- "BREN" is usually marked on the side of receiver/frame.
- "BREN" name is derived from the first two letters in "Brno" and "Enfield".
- "BREN GUN" contact between the British Government and Ceskoslovenska Zbrojovka of Brno was signed in 1935.
- "BREN GUN" was an improved CZ model ZB light machine gun.
- "BREN GUN" was initially manufactured in Britain at the Royal Small Arms Factory, Enfield
- "BREN GUN" model MARK 1 was manufactured by the Royal Small Arms Factory, Enfield starting in September of 1937.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation is marked on the receiver as "7.92 BREN". This model may also be found with Chinese characters/ideograms under the "7.92 BREN" designation.
- manufactured between 1940 and 1945.
- this firearm is considered to be an air cooled, magazine fed, light machine gun.
- features include: quick change barrel; "MARK 1" receiver/frame/body group; "MARK 2" style folding leaf rear sight assembly; non-folding type cocking handle; bipod.
- originally capable of full automatic fire, subsequently modified to be capable of semi automatic fire only.
- Various models:
- MARK 1:
- introduced in 1937.
- features include: drum/dial rear sight; dish-shaped gas deflector shield at front of body; Mk 1 gas piston and bolt assembly; folding cocking handle; buttstock fitted with grip handle on the underside, and a folding strap at top of the cup shaped buttplate.
- MARK 1m (Cdn) & MARK 1*(British)
- introduced 1941.
- drum/dial rear sight, usually fitted with Mk 2 butt slide, Mk 1* barrel assembly, flat gas deflector shield, no vertical reinforcing rib outside the magazine housing.
- MARK 2:
- introduced in 1942.
- folding leaf backsight mounted on top of body, simplified bolt, fixed (non-folding) cocking handle.
- MARK 2/1:
- introduced in 1948.
- marked with a "/1" after the original "Mk II" or "Mk 2", folding cocking handle.
- MARK 3:
- introduced in 1944.
- folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.
- MARK 4:
- introduced in 1944.
- folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.

Manufacturer

- manufacturer is not marked on the firearm.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number is located on top rear of the receiver/frame.

Shots

- detachable box magazine.

Canadian Law Comments

- a cartridge magazine that "is of the "drum" type, is not a reproduction and was originally designed or manufactured for use in a firearm commonly known as (iii) the Bren Light machine-gun, or any variant or modified version of it, including the Mark1, Mark 2, Mark2/1, Mark3 and Mark 4 is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- the 100 round drum magazine is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".

Notes

Make

- "BREN" is usually marked on the side of receiver/frame.
- "BREN" name is derived from the first two letters in "Brno" and "Enfield".
- "BREN GUN" contact between the British Government and Ceskoslovenska Zbrojovka of Brno was signed in 1935.
- "BREN GUN" was an improved CZ model ZB light machine gun.
- "BREN GUN" was initially manufactured in Britain at the Royal Small Arms Factory, Enfield
- "BREN GUN" model MARK 1 was manufactured by the Royal Small Arms Factory, Enfield starting in September of 1937.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model designation is marked on the receiver as "7.92 BREN". This model may also be found with Chinese characters/ideograms under the "7.92 BREN" designation. - manufactured between 1940 and 1945. - this is a light air cooled machine gun. - features include: quick change barrel with carrying handle; folding bipod; gas operated; detachable magazine; and selective fire change lever with safe, semi automatic & full automatic positions. Various Bren Gun models: - "MARK 1" (Mk I): introduced in 1937. - features include: dial drum sight, dovetail slot on the left side of the receiver/frame for fixed line sight; dish-shaped gas deflector shield at front of body, Mk 1 gas piston and bolt assembly, folding cocking handle, buttstock fitted with butt handle underneath, and a folding strap at top of the cup shaped buttplate. - MARK 1m (Mk 1m) Canadian & MARK 1* (Mk 1*) British: introduced in 1941. - features include: folding cocking handle; dial drum rear sight, dovetail slot on the left side of the receiver/frame removed; usually fitted with Mk 2 butt slide, Mk 1* barrel assembly, flat gas deflector shield, no vertical reinforcing rib outside the magazine housing. - MARK 2 (Mk II): introduced in 1942. - features include: folding leaf backsight mounted on top of body, simplified bolt, fixed (non-folding) cocking handle. - MARK 2/1 (Mk II/I or Mk 2/I): introduced in 1948. - features include: folding cocking handle. - MARK 3 (Mk III or Mk 3): introduced in 1944. - features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel. - MARK 4 (Mk IV or Mk 4): introduced in 1944. - features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.
Manufacturer	- manufacturer is not marked on the firearm.
Action	- gas operated.
Serial Number	- serial number is located on top rear of the receiver/frame.
Shots	- detachable box magazine.
Canadian Law Comments	- a cartridge magazine that "is of the "drum" type, is not a reproduction and was originally designed or manufactured for use in a firearm commonly known as (iii) the Bren Light machine-gun, or any variant or modified version of it, including the Mark1, Mark 2, Mark2/1, Mark3 and Mark 4 is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted". - the 100 round drum magazine is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".

- "BREN GUN" was initially manufactured in Britain at the Royal Small Arms Factory, Enfield
- "BREN GUN" model MARK 1 was manufactured by the Royal Small Arms Factory, Enfield starting in September of 1937.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "Mk I m" is marked on the side of the receiver/frame.
- this is a light air cooled machine gun.
- features include: quick change barrel with carrying handle; folding bipod; gas operated; detachable magazine; and originally selective fire, but subsequently modified to semi-automatic only.

Various Bren Gun models:
- "MARK 1" (Mk I) was introduced in 1937.
- features include: dial drum sight, dovetail slot on the left side of the receiver/frame for fixed line sight; dish-shaped gas deflector shield at front of body, Mk 1 gas piston and bolt assembly, folding cocking handle, buttstock fitted with butt handle underneath, and a folding strap at top of the cup shaped buttplate.
- MARK 1m (Mk 1m) Canadian & MARK 1* (Mk 1*) British: introduced in 1941.
- features include: folding cocking handle; dial drum rear sight, dovetail slot on the left side of the receiver/frame removed; usually fitted with Mk 2 butt slide, Mk 1* barrel assembly, flat gas deflector shield, no vertical reinforcing rib outside the magazine housing.
- MARK 2 (Mk II): introduced in 1942.
- features include: folding leaf back sight mounted on top of body, simplified bolt, fixed (non-folding) cocking handle.
- MARK 2/1 (Mk II/I or Mk 2/I): introduced in 1948.
- features include: folding cocking handle.
- MARK 3 (Mk III or Mk 3): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.
- MARK 4 (Mk IV or Mk 4): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.

Manufacturer

- the manufacturer's name will be found marked on the receiver/frame upper right side as INGLIS.

Type

- air cooled, magazine-fed, light machine gun.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number is usually located on the top rear of the body.
- serial numbers for the Canadian Bren Guns manufactured between 1939 to 1945: M1 to M9999, N1 to N9999, P1 to P2, 0T1 to 15T7544 and 0CH1 to approximately 4CH3000.

Barrel

- the calibre 303 British Bren barrel is interchangeable on all MARKS.
- the internal barrel length of 578mm has an overall measurement including flash hider of 635mm.

Shots

- detachable 30 round box magazine; or
- detachable 100 round self-propelled drum magazine.

Canadian Law Comments

- a cartridge magazine that "is of the "drum" type, is not a reproduction and was originally designed or manufactured for use in a firearm commonly known as (iii) the Bren Light machine-gun, or any variant or modified version of it, including the Mark1, Mark 2, Mark2/1, Mark3 and Mark 4 is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- the 100 round drum magazine is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".

Remarks

- Bren Gun barrels, in calibre 303 British, for models MARK 1, MARK 1* or MARK 1m, MARK 2, MARK 2/1, MARK 3 and MARK 4 are interchangeable.
- barrel assemblies: Mk 1, Mk 1* and Mk 2 have a length of 578 mm (internal measurement) or 635 mm (including the flash hider); and barrel Assemblies: Mk 4 and Mk 5 have a length of 508 mm (internal measurement) or 565 mm (including the flash hider).

- MARK 2 (Mk II): introduced in 1942.
- features include: folding leaf back sight mounted on top of body, simplified bolt, fixed (non-folding) cocking handle.
- MARK 2/1 (Mk II/I or Mk 2/I): introduced in 1948.
- features include: folding cocking handle.
- MARK 3 (Mk III or Mk 3): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.
- MARK 4 (Mk IV or Mk 4): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.

Manufacturer

- the manufacturer's name will be found marked on the receiver/frame upper right side as INGLIS.

Type

- air cooled, magazine-fed, light machine gun.

Action

- gas-piston operated, tilting-block locking system.

Serial Number

- serial number is usually located on the top rear of the body.
- serial numbers for the Canadian Bren Guns manufactured between 1939 to 1945: M1 to M9999, N1 to N9999, P1 to P2, 0T1 to 15T7544 and 0CH1 to approximately 4CH3000.

Barrel

- the calibre 303 British Bren barrel is interchangeable on all MARKS.
- the internal barrel length of 578mm has an overall measurement including flash hider of 635mm.

Shots

- detachable 30 round box magazine; or
- detachable 100 round self-propelled drum magazine.

Canadian Law Comments

- a cartridge magazine that "is of the "drum" type, is not a reproduction and was originally designed or manufactured for use in a firearm commonly known as (iii) the Bren Light machine-gun, or any variant or modified version of it, including the Mark1, Mark 2, Mark2/1, Mark3 and Mark 4 is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- the 100 round drum magazine is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".

Remarks

- Bren Gun barrels, in calibre 303 British, for models MARK 1, MARK 1* or MARK 1m, MARK 2, MARK 2/1, MARK 3 and MARK 4 are interchangeable.
- barrel assemblies: Mk 1, Mk 1* and Mk 2 have a length of 578 mm (internal measurement) or 635 mm (including the flash hider); and barrel Assemblies: Mk 4 and Mk 5 have a length of 508 mm (internal measurement) or 565 mm (including the flash hider).

Notes

Make

- "BREN" is usually marked on the side of receiver/frame.
- "BREN" name is derived from the first two letters in "Brno" and "Enfield".
- "BREN GUN" contact between the British Government and Ceskoslovenska Zbrojovka of Brno was signed in 1935.
- "BREN GUN" was an improved CZ model ZB light machine gun.
- "BREN GUN" was initially manufactured in Britain at the Royal Small Arms Factory, Enfield
- "BREN GUN" model MARK 1 was manufactured by the Royal Small Arms Factory, Enfield starting in September of 1937.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "Mk II" is marked on the side of the receiver/frame.
- this is a light air cooled machine gun.
- features include: quick change barrel with carrying handle; folding bipod; gas operated; detachable magazine; and selective fire change lever with safe, semi automatic & full automatic positions.

Various Bren Gun models:
- "MARK 1" (Mk I): introduced in 1937.
- features include: dial drum sight, dovetail slot on the left side of the receiver/frame for fixed line sight; dish-shaped gas deflector shield at front of body, Mk 1 gas piston and bolt assembly, folding cocking handle, buttstock fitted with butt handle underneath, and a folding strap at top of the cup shaped buttplate.
- MARK 1m (Mk 1m) Canadian & MARK 1* (Mk 1*) British: introduced in 1941.
- features include: folding cocking handle; dial drum rear sight, dovetail slot on the left side of the receiver/frame removed; usually fitted with Mk 2 butt slide, Mk 1* barrel assembly, flat gas deflector shield, no vertical reinforcing rib outside the magazine housing.
- MARK 2 (Mk II): introduced in 1942.
- features include: folding leaf backsight mounted on top of body, simplified bolt, fixed (non-folding) cocking handle.
- MARK 2/1 (Mk II/I or Mk 2/I): introduced in 1948.
- features include: folding cocking handle.
- MARK 3 (Mk III or Mk 3): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.
- MARK 4 (Mk IV or Mk 4): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.

Manufacturer

- manufacturer's code of "M67" or "D" may be marked on the right side of the receiver/frame.

Type

- air cooled, magazine-fed, light machine gun.

Action

- gas operated, tilting-block locking system.

Serial Number

- usually located on the top rear of the body.
- range: R1 - R9999, S1 - S9999, T1 - T9999, U1 - U9999, V1 - V9999, W1 - W8320, RA1 - RA6695 and RB1 - RB10000.

Barrel

- the calibre 303 British Bren barrel is interchangeable on all MARKS.
- the internal barrel length of 578mm has an overall measurement including flash hider of 635mm.

Shots

- detachable 30 round box magazine; or
- detachable 100 round self-propelled drum magazine.

Canadian Law Comments

- a cartridge magazine that "is of the "drum" type, is not a reproduction and was originally designed or manufactured for use in a firearm commonly known as (iii) the Bren Light machine-gun, or any variant or modified version of it, including the Mark1, Mark 2, Mark2/1, Mark3 and Mark 4 is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- the 100 round drum magazine is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".

- MARK 1m (Mk 1m) Canadian & MARK 1* (Mk 1*) British: introduced in 1941.
- features include: folding cocking handle; dial drum rear sight, dovetail slot on the left side of the receiver/frame removed; usually fitted with Mk 2 butt slide, Mk 1* barrel assembly, flat gas deflector shield, no vertical reinforcing rib outside the magazine housing.
- MARK 2 (Mk II): introduced in 1942.
- features include: folding leaf back sight mounted on top of body, simplified bolt, fixed (non-folding) cocking handle.
- MARK 2/1 (Mk II/I or Mk 2/I): introduced in 1948.
- features include: folding cocking handle.
- MARK 3 (Mk III or Mk 3): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.
- MARK 4 (Mk IV or Mk 4): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.

Manufacturer

- the manufacturer's name will be found marked on the receiver/frame upper right side as INGLIS.

Type

- air cooled, magazine-fed, light machine gun.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number is usually located on the top rear of the body.

Barrel

- the calibre 303 British Bren barrel is interchangeable on all MARKS.
- the internal barrel length of 578mm has an overall measurement including flash hider of 635mm.
- Bren Gun barrels in .303 British for models MARK 1, MARK 1* or MARK 1m, MARK 2, MARK 2/1, MARK 3 and MARK 4 are interchangeable.
- barrel assemblies: Mk 1, Mk 1* and Mk 2 have a length of 578 mm (internal measurement) or 635 mm (including the flash hider); and
- barrel assemblies: Mk 4 and Mk 5 have a length of 508 mm (internal measurement) or 565 mm (including the flash hider).

Shots

- detachable 30 round box magazine; or
- detachable 100 round self-propelled drum magazine.

Canadian Law Comments

- a cartridge magazine that "is of the "drum" type, is not a reproduction and was originally designed or manufactured for use in a firearm commonly known as (iii) the Bren Light machine-gun, or any variant or modified version of it, including the Mark1, Mark 2, Mark2/1, Mark3 and Mark 4 is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- the 100 round drum magazine is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".

- "BREN GUN" was initially manufactured in Britain at the Royal Small Arms Factory, Enfield
- "BREN GUN" model MARK 1 was manufactured by the Royal Small Arms Factory, Enfield starting in September of 1937.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "Mk II" or Mk 2" is marked on the side of the receiver/frame.
- this is a light air cooled machine gun.
- features include: quick change barrel with carrying handle; folding bipod; gas operated; detachable magazine; and originally selective fire, but subsequently modified to semi automatic only.

Various Bren Gun models:
- "MARK 1" (Mk I): introduced in 1937.
- features include: dial drum sight, dovetail slot on the left side of the receiver/frame for fixed line sight; dish-shaped gas deflector shield at front of body, Mk 1 gas piston and bolt assembly, folding cocking handle, buttstock fitted with butt handle underneath, and a folding strap at top of the cup shaped buttplate.
- MARK 1m (Mk 1m) Canadian & MARK 1* (Mk 1*) British: introduced in 1941.
- features include: folding cocking handle; dial drum rear sight, dovetail slot on the left side of the receiver/frame removed; usually fitted with Mk 2 butt slide, Mk 1* barrel assembly, flat gas deflector shield, no vertical reinforcing rib outside the magazine housing.
- MARK 2 (Mk II): introduced in 1942.
- features include: folding leaf backsight mounted on top of body, simplified bolt, fixed (non-folding) cocking handle.
- MARK 2/1 (Mk II/I or Mk 2/I): introduced in 1948.
- features include: folding cocking handle.
- MARK 3 (Mk III or Mk 3): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.
- MARK 4 (Mk IV or Mk 4): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.

Manufacturer

- may be marked: "ENFIELD" or the Enfield logo.

Action

- no longer capable of full automatic fire.

Serial Number

- Enfield's Bren Gun were serial numbered from 1937 to 1954 with the following prefixes: A1 - A999, B1 - B9999, C, D, E, F, G, H, K, L, P, U, V, W, X, Y, Z, AA, BA, BB, BC, BD, BE, BF, BG, BH, LB1 TO LB58823.

Barrel

- Bren Gun barrels in .303 British for models MARK 1, MARK 1*, MARK 1m, MARK 2, MARK 2/1, MARK 3 and MARK 4 are interchangeable.

Barrel Assemblies: Mk 1, Mk 1* and Mk 2 have a length of 578 mm (internal measurement) or 635 mm (external measurement including the flash hider); and
Barrel Assemblies: Mk 4 and Mk 5 have a length of 508 mm (internal measurement) or 565 mm (external measurement including the flash hider).

Shots

- detachable 30 round box or 100 round drum magazine.

Canadian Law Comments

- a cartridge magazine that "is of the "drum" type, is not a reproduction and was originally designed or manufactured for use in a firearm commonly known as (iii) the Bren Light machine-gun, or any variant or modified version of it, including the Mark1, Mark 2, Mark2/1, Mark3 and Mark 4 is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- the 100 round drum magazine is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".

Notes

Make

- "BREN" is usually marked on the side of receiver/frame.
- "BREN" name is derived from the first two letters in "Brno" and "Enfield".
- "BREN GUN" contact between the British Government and Ceskoslovenska Zbrojovka of Brno was signed in 1935.
- "BREN GUN" was an improved CZ model ZB light machine gun.
- "BREN GUN" was initially manufactured in Britain at the Royal Small Arms Factory, Enfield
- "BREN GUN" model MARK 1 was manufactured by the Royal Small Arms Factory, Enfield starting in September of 1937.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- model designation does not appear on the firearm.
- may be marked "7.92 BREN".
- these firearms were built on Mark 2 receivers or on the Mark 2 Chinese Contract guns with out the CH serial number prefix. Some of these firearms may be prototypes of the Mark 2 Chinese Contract guns.
- features include: MARK 2 barrel, bipod, carrying handle, butt and butt slide; non-folding type cocking handle; folding leaf rear sight.

Bren Gun models:
- "MARK 1" (Mk I): introduced in 1937.
- features include: dial drum sight, dovetail slot on the left side of the receiver/frame for fixed line sight; dish-shaped gas deflector shield at front of body, Mk 1 gas piston and bolt assembly, folding cocking handle, buttstock fitted with butt handle underneath, and a folding strap at top of the cup shaped buttplate.
- MARK 1m (Mk 1m) Canadian & MARK 1* (Mk 1*) British: introduced in 1941.
- features include: folding cocking handle; dial drum rear sight, dovetail slot on the left side of the receiver/frame removed; usually fitted with Mk 2 butt slide, Mk 1* barrel assembly, flat gas deflector shield, no vertical reinforcing rib outside the magazine housing.
- MARK 2 (Mk II): introduced in 1942.
- features include: folding leaf backsight mounted on top of body, simplified bolt, fixed (non-folding) cocking handle.
- MARK 2/1 (Mk II/I): introduced in 1948.
- marked with a "/I" after the original "Mk II" or "Mk 2",
- features include: folding cocking handle.
- MARK 3 (Mk III or Mk 3): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.
- MARK 4 (Mk IV or Mk 4): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.

Manufacturer

- manufacturer and year of manufacturer are marked on the right side of the receiver/frame in two lines: eg. "INGLIS" and "1944".

Action

- no longer capable of full automatic fire.

Serial Number

- serial number is located on the top rear of the receiver/frame.

Shots

- detachable box magazine.

Canadian Law Comments

- a cartridge magazine that "is of the "drum" type, is not a reproduction and was originally designed or manufactured for use in a firearm commonly known as (iii) the Bren Light machine-gun, or any variant or modified version of it, including the Mark1, Mark 2, Mark2/1, Mark3 and Mark 4 is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- the 100 round drum magazine is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".

Notes

Make

- "BREN" is usually marked on the side of receiver/frame.
- "BREN" name is derived from the first two letters in "Brno" and "Enfield".
- "BREN GUN" contact between the British Government and Ceskoslovenska Zbrojovka of Brno was signed in 1935.
- "BREN GUN" was an improved CZ model ZB light machine gun.
- "BREN GUN" was initially manufactured in Britain at the Royal Small Arms Factory, Enfield
- "BREN GUN" model MARK 1 was manufactured by the Royal Small Arms Factory, Enfield starting in September of 1937.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "Mk II/I" or "Mk 2/I" is marked on the side of the receiver/frame.
- this is a light air cooled machine gun.
- features include: quick change barrel with carrying handle; folding bipod; gas operated; detachable magazine; and originally selective fire, but subsequently modified to semi automatic only.

Various Bren Gun models:
- "MARK 1" (Mk I): introduced in 1937.
- features include: dial drum sight, dovetail slot on the left side of the receiver/frame for fixed line sight; dish-shaped gas deflector shield at front of body, Mk 1 gas piston and bolt assembly, folding cocking handle, buttstock fitted with butt handle underneath, and a folding strap at top of the cup shaped buttplate.
- MARK 1m (Mk 1m) Canadian & MARK 1* (Mk 1*) British: introduced in 1941.
- features include: folding cocking handle; dial drum rear sight, dovetail slot on the left side of the receiver/frame removed; usually fitted with Mk 2 butt slide, Mk 1* barrel assembly, flat gas deflector shield, no vertical reinforcing rib outside the magazine housing.
- MARK 2 (Mk II): introduced in 1942.
- features include: folding leaf backsight mounted on top of body, simplified bolt, fixed (non-folding) cocking handle.
- MARK 2/1 (Mk II/I or Mk 2/I): introduced in 1948.
- features include: folding cocking handle.
- MARK 3 (Mk III or Mk 3): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.
- MARK 4 (Mk IV or Mk 4): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.

Manufacturer

- "INGLIS" and year of manufacture are marked on the side of the receiver/frame.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number is located on the top rear of the receiver/frame.
- Inglis Bren Gun serial number range from 1939 to 1945 was M1 - M9999, N1 - N9999, P1 - P2, 0T1 - 15T7544 and for the 8MM MAUSER Chinese contract from 1943 to 1945 was 0CH1 - 4CH3000.

Barrel

- Bren Gun barrels in .303 British for models MARK 1, MARK 1*, MARK 1m, MARK 2, MARK 2/1, MARK 3 and MARK 4 are interchangeable.

Barrel Assemblies: Mk 1, Mk 1* and Mk 2 have a length of 578 mm (internal measurement) or 635 mm (external measurement including the flash hider); and
Barrel Assemblies: Mk 4 and Mk 5 have a length of 508 mm (internal measurement) or 565 mm (external measurement including the flash hider).

Shots

- detachable 30 round box or 100 round drum magazine.

Canadian Law Comments

- a cartridge magazine that "is of the "drum" type, is not a reproduction and was originally designed or manufactured for use in a firearm commonly known as (iii) the Bren Light machine-gun, or any variant or modified version of it, including the Mark1, Mark 2, Mark2/1, Mark3 and Mark 4 is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- the 100 round drum magazine is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".

Notes

Make

- "BREN" is usually marked on the side of receiver/frame.
- "BREN" name is derived from the first two letters in "Brno" and "Enfield".
- "BREN GUN" contact between the British Government and Ceskoslovenska Zbrojovka of Brno was signed in 1935.
- "BREN GUN" was an improved CZ model ZB light machine gun.
- "BREN GUN" was initially manufactured in Britain at the Royal Small Arms Factory, Enfield
- "BREN GUN" model MARK 1 was manufactured by the Royal Small Arms Factory, Enfield starting in September of 1937.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "Mk III" or "Mk 3" is marked on the side of the receiver/frame.
- this is a light air cooled machine gun.
- features include: quick change barrel with carrying handle; folding bipod; gas operated; detachable magazine; and originally selective fire, but subsequently modified to semi-automatic only.

Various Bren Gun models:
- "MARK 1" (Mk I): introduced in 1937.
- features include: dial drum sight, dovetail slot on the left side of the receiver/frame for fixed line sight; dish-shaped gas deflector shield at front of body, Mk 1 gas piston and bolt assembly, folding cocking handle, buttstock fitted with butt handle underneath, and a folding strap at top of the cup shaped buttplate.
- MARK 1m (Mk 1m) Canadian & MARK 1* (Mk 1*) British: introduced in 1941.
- features include: folding cocking handle; dial drum rear sight, dovetail slot on the left side of the receiver/frame removed; usually fitted with Mk 2 butt slide, Mk 1* barrel assembly, flat gas deflector shield, no vertical reinforcing rib outside the magazine housing.
- MARK 2 (Mk II): introduced in 1942.
- features include: folding leaf backsight mounted on top of body, simplified bolt, fixed (non-folding) cocking handle.
- MARK 2/1 (Mk II/I or Mk 2/I): introduced in 1948.
- features include: folding cocking handle.
- MARK 3 (Mk III or Mk 3): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.
- MARK 4 (Mk IV or Mk 4): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.

Manufacturer

- "INGLIS" and year of manufacture are marked on the side of the receiver/frame.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number is located on the top rear of the receiver/frame.
- Inglis Bren Gun serial number range from 1939 to 1945 was M1 - M9999, N1 - N9999, P1 - P2, 0T1 - 15T7544 and for the 8MM MAUSER Chinese contract from 1943 to 1945 was 0CH1 - 4CH3000.

Barrel

- Bren Gun barrels in .303 British for models MARK 1, MARK 1*, MARK 1m, MARK 2, MARK 2/1, MARK 3 and MARK 4 are interchangeable.

Barrel Assemblies: Mk 1, Mk 1* and Mk 2 have a length of 578 mm (internal measurement) or 635 mm (external measurement including the flash hider); and
Barrel Assemblies: Mk 4 and Mk 5 have a length of 508 mm (internal measurement) or 565 mm (external measurement including the flash hider).

Shots

- detachable 30 round box or 100 round drum magazine.

Canadian Law Comments

- a cartridge magazine that "is of the "drum" type, is not a reproduction and was originally designed or manufactured for use in a firearm commonly known as (iii) the Bren Light machine-gun, or any variant or modified version of it, including the Mark1, Mark 2, Mark2/1, Mark3 and Mark 4 is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- the 100 round drum magazine is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".

Notes

Make

- "BREN" is usually marked on the side of receiver/frame.
- "BREN" name is derived from the first two letters in "Brno" and "Enfield".
- "BREN GUN" contact between the British Government and Ceskoslovenska Zbrojovka of Brno was signed in 1935.
- "BREN GUN" was an improved CZ model ZB light machine gun.
- "BREN GUN" was initially manufactured in Britain at the Royal Small Arms Factory, Enfield
- "BREN GUN" model MARK 1 was manufactured by the Royal Small Arms Factory, Enfield starting in September of 1937.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "Mk IV" or "Mk 4" is marked on the side of the receiver/frame.
- this is a light air cooled machine gun.
- features include: quick change barrel with carrying handle; folding bipod; gas operated; detachable magazine; and selective fire change lever with safe, semi-automatic & full automatic positions.

Various Bren Gun models:
- "MARK 1" (Mk I): introduced in 1937.
- features include: dial drum sight, dovetail slot on the left side of the receiver/frame for fixed line sight; dish-shaped gas deflector shield at front of body, Mk 1 gas piston and bolt assembly, folding cocking handle, buttstock fitted with butt handle underneath, and a folding strap at top of the cup shaped buttplate.
- MARK 1m (Mk 1m) Canadian & MARK 1* (Mk 1*) British: introduced in 1941.
- features include: folding cocking handle; dial drum rear sight, dovetail slot on the left side of the receiver/frame removed; usually fitted with Mk 2 butt slide, Mk 1* barrel assembly, flat gas deflector shield, no vertical reinforcing rib outside the magazine housing.
- MARK 2 (Mk II): introduced in 1942.
- features include: folding leaf back sight mounted on top of body, simplified bolt, fixed (non-folding) cocking handle.
- MARK 2/1 (Mk II/I or Mk 2/I): introduced in 1948.
- features include: folding cocking handle.
- MARK 3 (Mk III or Mk 3): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.
- MARK 4 (Mk IV or Mk 4): introduced in 1944.
- features include: folding leaf rear sight, lightened & modified Mk 1 body fitted with a shorter barrel.

Manufacturer

- "ENFIELD" or the Enfield logo may be marked on the firearm.

Action

- gas operated.

Serial Number

- serial number is located on the top rear of the receiver/frame.
- Enfield's Bren Gun were serial numbered from 1937 to 1954 with the following prefixes: A1 - A999, B1 - B9999, C, D, E, F, G, H, K, L, P, U, V, W, X, Y, Z, AA, BA, BB, BC, BD, BE, BF, BG, BH, LB1 TO LB58823.

Barrel

- Bren Gun barrels in .303 British for models MARK 1, MARK 1*, MARK 1m, MARK 2, MARK 2/1, MARK 3 and MARK 4 are interchangeable.

Barrel Assemblies: Mk 1, Mk 1* and Mk 2 have a length of 578 mm (internal measurement) or 635 mm (external measurement including the flash hider); and
Barrel Assemblies: Mk 4 and Mk 5 have a length of 508 mm (internal measurement) or 565 mm (external measurement including the flash hider).

Shots

- detachable 30 round box or 100 round drum magazine.

Canadian Law Comments

- a cartridge magazine that "is of the "drum" type, is not a reproduction and was originally designed or manufactured for use in a firearm commonly known as (iii) the Bren Light machine-gun, or any variant or modified version of it, including the Mark1, Mark 2, Mark2/1, Mark3 and Mark 4 is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- the 100 round drum magazine is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".

Notes

Make

- the make designation is marked on the left side of the receiver/frame.

Model

- the model designation may not be marked on the firearm.
- features include: blued round barrel with integral sound suppressor; supplied with a four power telescopic scope; one-piece, checkered, black synthetic or wooden Monte Carlo stock with a straight or schnabel forend and pistol grip; black, flattened bolt knob.

Manufacturer

- the manufacturer's designation is marked on the firearm.
- "Bretton" and "Gaucher Armes", both located in Saint Etienne France, amalgamated in 2000 to form "Bretton & Gaucher".

Action

- turn-bolt operated.

Serial Number

- the serial number is marked on the receiver/frame
- the serial number rationalization is unknown.

Canadian Law Comments

- this firearm left the factory equipped with an integral sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada.
- if the prohibited device (sound suppressor/silencer) were to be removed from the firearm, the firearm is correctly identified as a "Non Restricted Firearm".

Notes

Make

- "BRG - Savunma ve Havacilik" is marked on the right side of the receiver/frame.
- "BRG" is marked on the firearm in various places.
- Trade name used by "Burgu Metal".
- The logo may be marked on the left or right side of the pistol grip; logo may be comprised of a large letter "B" in a circle or hexagon shape with a series of three or more crescent shapes with three cut lines leading to the upper back end of the letter "B" over a similar series of lines leading to the lower back end of the letter "B" without obscuring the main component of the logo, which is the oversized letter "B". The "B" may look like a stylized number 3, but is not a number.

Model

- Introduced in 2022.
- "BRG9 ELITE GEN2" is marked on the left side of the firearm.
- "BRG" is marked on the firearm in various places.
- Trade name used by "Burgu Metal".
- Slide stop lever located on the side of the firearm.
- Takedown catch/lever located on the side of the firearm.
- Features include: under barrel accessory rail, pistol grip receiver/frame with integral square serrated front, trigger guard; metal slide with 'chevron' or 'V' shaped serrations at the front and rear of the slide; adjustable backstraps for grip fit; ambidextrous slide catch; firing pin lock; rear grip and trigger safety toggles; chamber and striker status indicators; ambidextrous magazine release button; finish options, black.
- Overall length with a 102 mm (4 inches) barrel is 190 mm (7.48 inches), average weight is 860(g) kg (30.33(oz) lbs).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "BRG" is marked on the firearm in various places. - "BRG - Savunma ve Havacilik" is marked on the right side of the receiver/frame. - The logo may be marked on the left or right side of the pistol grip; logo may be comprised of a large letter "B" in a circle or hexagon shape with a series of three or more crescent shapes with three cut lines leading to the upper back end of the letter "B" over a similar series of lines leading to the lower back end of the letter "B" without obscuring the main component of the logo, which is the oversized letter "B". The "B" may look like a stylized number 3, but is not a number.
Action	- Recoil operated.
Serial Number	- The serial number rationalization is unknown. - The serial number may be marked on a metal insert/strip/plate attached to the underside of the receiver frame in front of the trigger guard. - The serial number may be repeated on other firearm components, (example: the bolt assembly as viewed through the ejection port, the barrel, the left or right side of a firearm slide, etc...), but cannot be used for the purposes of registration in Canada, unless also found on the receiver/frame of the firearm.
Barrel	- The barrel length does not include any attached device such as flash-hider or muzzle brake.
Calibre	- "9x19" is marked on the right side of the barrel. - The calibre designation is marked on the barrel, visible through the ejection port.
Shots	- Introduced in 2022 with a 16 and 18 shot detachable cartridge magazine. - Detachable box magazine.
Other Markings	- Importer regulations is based on individual country requirements, therefore the following may be marked on the firearm: "Buffalo Cartridge Co. Findlay, OH". - "CAUTION WILL FIRE" over "WITHOUT MAGAZINE" may be marked on the left side of the receiver/frame. - "WARNING: READ" over "SAFETY MANUAL" may be marked on the left side of the receiver/frame.

Summary

Make:	Brichet
Model:	Pin-Fire Revolver
Manufacturer:	Lefaucheux
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	FRANCE
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
199130 - 1	8MM PIN-FIRE	6	83	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Brichet a nantes" is marked on top of the barrel.
- "Brichet" is listed as Arquebusier of Liege, Belgium circa 1840 to 1875.
- "Brichet" is listed as an armourer in Chateau-Gontier, Mayenne in the Loire region of France circa 1854.
- Alphonse-Pierre-Jacques Brichet was an armourer located at 21 Rue de La Fosse, Nantes in the Loir region of France circa 1855.
- Alphonse-Pierre-Jaques Brichet was succeeded by a relative at 21 Rue de la Fosse circa 1931 to 1985.

Model

- The model designation is not marked on the firearm.
- Features include: un-fluted cylinder; loading gate and ejector rod located on the right side of the receiver/frame.

Manufacturer

- "L.F." or "LF" within a circle, shield or under a broken pistol, "Lefaucheux", "E. Lefaucheux", "E. Lefaucheux Bte a Paris", "E. Lefaucheux Inv Brevete", "Inv. Lefaucheux Brvt S.G.D.G. Paris", "IVon E. Lefaucheux Bvte S.D.G.D. a Paris" or a variation thereof will be marked on barrel and/or receiver/frame.

- "Casimir Lefaucheux" was a French gunmaker who was the inventor of pin-fire ammunition in 1835, and built some of the first firearms to use pin-fire ammunition.

- "Lefaucheux" is also associated with Eugene Gabriel Lefaucheux, the son of Casimir Lefaucheux.

- Eugene Gabriel Lefaucheux was the inventor and manufacturer of an open top frame, double action revolver which used Casimir Lefaucheux's pin-fire metallic cartridge.

Serial Number

- The serial number is usually marked on the right side of the firearm.

Calibre

- The calibre designation is not marked on the firearm.

Canadian Law Comments

- Some examples of this model, when manufactured prior to 1898 may be considered Antique in Canada.

Notes

Make

- "BRIGG" is marked on the barrel/receiver/frame and may be repeated on the locking ring.

Model

- model designation is not marked on the firearm.
- this is one of several styles of cane gun manufactured circa 1880.
- features include: various lengths of barrel/shaft with an iron, fluted, four barrel assembly that is manually rotated on a central axis that extends to become a spike dagger; silver mounted, round or perpendicular, horn or wooden grip.

Manufacturer

- "BRIGG" is marked on the barrel/receiver/frame and may be repeated on the locking ring.
- Thomas Brigg & Sons were cane and umbrella manufacturers/distributors based in London, England, beginning in 1836; up until 1943, they had a branch office in Paris, France. In 1943, they became partners with Swaine Adeney (manufacturers and distributors of leather goods, such as whips, attache cases, etc) to become "Swaine Adeney Brigg", which is today known as "Swaine Adeney".
- Brigg retailed a number of unusual cane- and stick-related items, such as flasks, pencils, and guns, all contained in canes, umbrellas, or walking sticks.

Action

- muzzle-loaded, percussion ignition.

Notes

Make

- "BRILEY" and "Pistol Division" are marked on the right side of the slide.
- Briley is a manufacturer/customizer located in Houston, Texas, since 1976.
- Briley specializes in manufacturing interchangeable choke-tubes for world-class skeet, trap, and sporting-clays shotguns.
- Briley started manufacturing and/or customizing rifles and pistols in the 1990s.

Model

- "EL PRESIDENTE" is marked on the right side of the slide.
- "2011" may be marked on the right side of the receiver/frame.
- introduced in 1998.
- this semi-automatic pistol is built by Briley on a STI International model 2011 modular receiver/frame, specifically for competitive shooting.
- the custom work done on this pistol includes an extended-tang grip safety, loop-style hammer, spherical bushing, frame-mounted optical sight mounting rail, the top portion of the slide has been cut-away to lighten the pistol, enlarged and fluted ejection port, enlarged and beveled magazine well, multi-port compensator, and various other custom modifications.
- this pistol is available in blued or hard-chromed versions.

Manufacturer

- this pistol is built on a STI International model 23011 modular receiver/frame, that has been extensively customized by Briley manufacturing.

Action

- recoil operated.

Serial Number

- marked on the right side of the receiver/frame, above the trigger-guard.

Notes

Make

- "BRITISH" over "BULL DOG" was observed marked on the top strap.
- "Made in Belgium" and/or Belgian proofmarks will usually appear on the firearm, usually on the receiver/frame and/or rear of cylinder.
- no markings that indicate the actual manufacturer appear on the firearm. This type of firearm was built by several firms that remain unidentified.

Model

- "BRITISH" over "BULL DOG" or "BRITISH" over "BULL-DOG" is marked on the top strap.
- in general terms this type of Belgian handgun was a copy of the Webley No.2 "British Bulldog". It is typified as a short barreled, solid receiver/frame handgun with a loading gate, it usually has an empty case ejecting rod with the rod sheathed within the cylinder axis pin; this rod is pivot mounted on the right side of the receiver/frame and is capable of swinging to the right. A bird's head grip is typical.
- barrel may be ovate, round or multi-sided, trigger may be fixed (with a trigger guard), folding or hidden (folds flush with the receiver/frame when not in use).
- barrel and receiver/frame are usually forged integrally as one piece. It may or may not have a noticeable "hump" on the grip backstrap behind the hammer.
- typically there are no manufacturer's marks of any kind on this genre of handgun, however, Belgian proofmarks will be apparent.
- dates of manufacture for this type of handgun are approximately circa 1880's or earlier to circa 1914.

Manufacturer

- "Made in Belgium" and/or Belgian proofmarks will usually appear on the firearm, usually on the receiver/frame and/or rear of cylinder.
- no markings that indicate the actual manufacturer appear on the firearm. This type of firearm was built by several firms that remain unidentified.

Serial Number

- serial number is usually marked on the receiver/frame, under the grips.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Other Markings

A Belgian proofmark of "ELG*" within an oval is a good indication that a firearm was made prior to July, 1893. In July of 1893 a crown was added to the top of the oval which encircles "ELG*".

Notes

Make

- "BRITISH" and "CONSTABULARY" were observed marked on the top-strap.
- "Constabulary" was marked on numerous revolvers manufactured in Belgium, France, and Spain between 1875 and 1950.
- "Constabulary" type revolvers were manufactured and/or sold by the following:
L. Ancion-Marx,
Francisco Arizmendi,
Automoto (ATM),
Marius Berger,
Forges & Acieries de la Marine,
Francois Dumoulin & Company,
J. Gaucher,
William Grah,
Jannsen Fils & Company,
Lepage,
Liege United Arms Company,
F. Lovinfosse-Hardy & Fils,
Manufacture d'Armes de St. Etienne,
Antoine Masereel,
Ch. Masquelier,
Neumann Freres,
Jules Pire & Company,
Raick Freres,
Theate Freres,
Trio Hammerless Fire Arms Company,
Verney-Carron, and
F. Voytier.
- Belgian proofs may appear on the cylinder.

Model

- "BRITISH" and "CONSTABULARY" were observed marked on the top-strap.
- manufactured prior to 1917.
- features include: blade front sight and groove in the top strap for a rear sight; octagonal or round barrel; solid top receiver/frame with removable fluted cylinder and right side fold down loading gate; ejector rod assembly may be mounted on the barrel or on the front of the receiver/frame; exposed spur hammer; double/single action trigger mechanism; saw handle square grip frame with metal end cap and lanyard ring; checkered wood grip plates; blued or nickel plated finish.
- may also have safety catch to block cylinder mounted on the left side of the receiver/frame.

Serial Number

- may or may not be serialized.

Notes

Make

- Mortar is a short barreled, smooth bore or rifled, muzzle or breech loading, low velocity, short range, high angle of fire weapon.
- Mortars are classified as artillery although usually employed by infantry troops.

Model

- manufacture commenced in 1938.
- ML-2 Inch Mortar was still in service in 1975.
- "M.L.2 - IN. MORTAR" over "1943" was observed marked on the barrel.
- ML-2 Inch Mortar is a light weight, high angle of fire, infantry model.
- features included: round smooth bore barrel, three different barrel lengths exist; this mortar is found with various different base plates or spades and sights depending on the model variation and the intended use; the firing mechanism is actuated by a firing lever and lanyard.
- numerous modifications were made to this equipment after its introduction into "service" in 1938.
- the various different Marks of this equipment are as follows: used with Universal Carrier, MK 2, MK 2*, MK 2**, MK 2***, MK 7, MK 7 **; used by Airborne Troops Mk 7* & Mk 8.

Manufacturer

- "M.M.Co." was observed marked on the tube.

Serial Number

- serial number rationalization unknown.
- serial number was observed marked on the tube.
- observed serial number markings consisted of "REG No L/" and six numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- this model of mortar meets the definition of "firearm" in the Criminal Code of Canada S. 2, however is an exempt firearm under CC S. 84 (3) (d) due to the velocity of the mortar bomb which does not exceed 152.4 mps.
- there are Federal Acts other than the Criminal Code which apply to these items such as the provisions of the Controlled Goods Act and the Defence Production Act.
- Natural Resources Canada has a vested interest in the natures of ammunition employed by these mortars, which fall under the ambit of the Explosives Act.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
139020 - 1	3" MORTAR	1	1151	Prohibited PFR, Part 1, para. 95(z.001)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is not marked on this firearm; the Make is derived from the characteristics of the firearm.
- a Mortar is a short barreled, smooth bore or rifled, muzzle or breech loading, low velocity, short range, high angle of fire weapon.
- Mortars are classified as artillery although usually employed by infantry troops.

Model

- known example had no marking on the tube.
- the Muzzle Loading 3 Inch Mortar Mk 2 was introduced into British Service in 1936. This mortar is a direct descendant of the original British Stokes 3 Inch Mortar Mk 1 as issued in 1917. With subsequent modifications and upgrades, the new standard issue mortar became the ML 3 Inch Mk 2 as adopted in 1936.
- this mortar remained in service until the mid-late 1960's.
- the actual bore diameter of the early barrels for this mortar was 3.189"/81mm diameter, later Mark 4 and 5 versions had a bore diameter of 3.208"/81.48mm.
- features; muzzle loading, smooth bore tube, drop fired ignition; various "Marks" of sights and base plates were utilized.
- barrel weights; 44 lb/20 kg to 49 lb/22.2 kg.
- weight of mounting including cradle; 45 lb/ 20.5 kg.
- base plate weights; 34 lb/15.54 kg to 43 lb/19.5 kg.

Manufacturer

- known example had no manufacturer's name marked on the tube.

Action

- muzzle loading, drop fired.

Notes

Make

- the make is not marked on this firearm; this make is derived from the characteristics of the firearm.
- a mortar is a short barreled, smooth bore or rifled, muzzle or breech loading, low velocity, short range, high angle of fire weapon.
- mortars are classified as artillery although usually employed by infantry troops.

Model

- the model may or may not be marked on the firearm.
- this is a heavy mortar adopted and used by UK and Commonwealth forces from the middle of the Second World War through Korea, designed as light towed artillery, but which could also be seen on a baseplate in an emplaced firing position.
- on the towed two-wheeled trailer, the mortar could be dropped into position, and the mounting legs extended into position, so the mortar could be fired from a baseplate socket in the middle of the trailer; for emplaced use, a heavy square baseplate could instead be used.
- features usually include: smoothbore barrel with a length of approximately 1524m/60" (not including the breech piece); three extendable bracing legs with a moving cradle to allow elevation and traverse; a lensatic sight with range scales to allow for aiming once the mortar is laid into firing position; and either a baseplate or a socketed two-wheeled carriage.

Manufacturer

- the manufacturer or code/logo thereof may or may not be marked on the tube, baseplate, or breechpiece.

Action

- muzzle loaded, drop fired single-shot.

Serial Number

- serial numbered on the barrel or breech.

Canadian Law Comments

- This model meets the definition of firearm in the Criminal Code of Canada S.2. This model may be regulated by other Federal Acts such as the Export and Import Permits Act (EIPA) and the Defence Production Act.

Notes

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.
- "TOWER" is marked on the lock plate.

Model

- model designation is not marked on the firearm.
- this is a generic entry for those Tower marked firearms that are not identifiable as a distinct model. Other entries exist that may accurately identify the model that is being observed.
- the "Brown Bess" descriptor has been applied to firearms that were made from circa 1700 to 1820.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "TOWER" is marked on the lock plate.
- British Royal Board of Ordnance established a system circa 1714 to control manufacturing specifications of firearms for the Army (Land Service) and Navy (Sea Service), this system was known as the Pattern.
- British Royal Board of Ordnance had two main assembly/inspection armory sites: DUBLIN CASTLE in Ireland and TOWER in London, England.
- "TOWER" was marked on firearms assembled/inspected at the Tower of London armory from parts supplied by various contracts.
- "TOWER" was also marked on firearms inspected at the Tower of London armory and manufactured by other contracted gunmakers.
- "TOWER" was used by the Tower of London armory as an inspection marked, until the early 1900s.
- "TOWER" marked firearms were proofed in either Birmingham or London.

Notes

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.
- "TOWER" is marked on the lock plate.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is one of a limited number of breech-loaded flintlock rifles designed by Major Patrick Ferguson of the British Army, circa 1776; these rifles were issued to a body of sharpshooters commanded by Major Ferguson during the American Revolution, and were produced in both "officers" (69 calibre) and "enlisted" (65 calibre) versions.
- these rifles are notable for their breech-loading mechanism, which involves a vertical threaded breech-plug running up through the breech of the barrel which can be lowered by rotating the combined gripstrap/trigger-guard, exposing the chamber and allowing the ball and powder to be loaded. This both increased the rate of fire and the accuracy of the rifle, but military commanders of the day did not appreciate the advantages of the design, and shelved it.
- features include: blued/browned finish; brass fittings; underbarrel ramrod on thimbles; round barrel; fixed open sights; cock and frizzen on a right-side lockplate; a brass trigger-guard with a handle at the rear of the tang; and the top of the breech-plug is vissible in a threaded hole just forward of the top tang.

Manufacturer

- "TOWER" is marked on the lock plate.
- British Royal Board of Ordnance established a system circa 1714 to control manufacturing specifications of firearms for the Army (Land Service) and Navy (Sea Service), this system was known as the Pattern.
- British Royal Board of Ordnance had two main assembly/inspection armory sites: DUBLIN CASTLE in Ireland and TOWER in London, England.

Notes

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.

Model

- referred to as William IV cavalry pistol because it was adopted by the British for horsed military units during the reign of King William IV (1830 - 1837).
- lockplate marked with "crown" and "W R" (William Rex).
- sidehammer, flintlock pistol with brass triggerguard, buttcap and nosecap.
- stock ends approximately 320mm from muzzle in order to accomodate a swivel ram rod which is permanently attached to the underside of the barrel.
- specimens still in the British service in the 1840's were officially converted to percussion.

Action

- muzzleloading.

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.

Model

- no model name is marked on this firearm; the model designation is derived from the characteristics of the firearm.
- year of proofing may be marked on the lock plate; British proofmarks are usually apparent on the top rear of the barrel.
- introduced circa 1770's and produced into the early 1800's.
- these pistols were made by various British makers.
- originally a flintlock pistol, it may have been converted to percussion ignition.
- features include: muzzle loading, originally flintlock ignition; steel barrel; full walnut stock with brass mounts comprising butt cap with lanyard ring, trigger guard and forend cap with captive swivel-type ram rod; early versions of this model had a rounded brass butt which was soon followed by a flat butt with heavy brass cap and a lanyard ring.

Action

- muzzle loader.

Serial Number

- such arms are often marked on the right side of the buttstock or the upper tang of the butt plate with a number that usually represents the rack position, or Company, Unit, or Regiment number and is not the serial number.

FRT Report

Firearm Reference Number (FRN): 36452
Make: British Service
Model: Pattern 1730 Long Land Musket

Summary

Make:	British Service
Model:	Pattern 1730 Long Land Musket
Manufacturer:	Tower
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
36452 - 1	75 FLINTLOCK	1	1168	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.
- "TOWER" is marked on the lock plate.

Model

- model designation is not marked on the firearm.
- produced circa 1727 to 1743.
- typical features include: polished "in the white", blackened or browned, smooth bore barrel; full length, one piece walnut stock with nose cap; long lock with a drooping tail; one screw showing behind the cock; thin brass wrist plate; three pronged feather-spring finial; tapered steel or capped wood ram rod retained by four pipes; brass furniture; sling swivels are attached to the trigger guard bow and screwed through the stock between the first and second pipes; stepped, long tang butt plate.
- overall length is 1578mm (62 1/8"), average weight is 4.28kg (9.4 lbs).

Manufacturer

- "TOWER" is marked on the lock plate.
- British Royal Board of Ordnance established a system circa 1714 to control manufacturing specifications of firearms for the Army (Land Service) and Navy (Sea Service), this system was known as the Pattern.
- British Royal Board of Ordnance had two main assembly/inspection armory sites: DUBLIN CASTLE in Ireland and TOWER in London, England.
- "TOWER" was marked on firearms assembled/inspected at the Tower of London armory from parts supplied by various contracts.
- "TOWER" was also marked on firearms inspected at the Tower of London armory and manufactured by other contracted gunmakers.
- "TOWER" was used by the Tower of London armory as an inspection marked, until the early 1900s.
- "TOWER" marked firearms were proofed in either Birmingham or London.

Action

- muzzle loader.

Serial Number

- such arms are often marked on the right side of the buttstock or the upper tang of the butt plate with a number that usually represents the rack position, or Company, Unit, or Regiment number and is not the serial number.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel	- the barrel length is subject to a nominal variance.
Calibre	- the bore diameter is subject to a nominal variance.

Notes

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.
- "TOWER" is marked on the lock plate.

Model

- model designation is not marked on the firearm.
- produced from 1778 to 1782.
- "Wallpiece" is a generic term used for firearms that were designed to be mounted on a parapet, rampart, wall or ships rail. They are typically much larger than the standard shoulder held firearm and feature a forend mounted bracket assembly that resembles an oar lock.
- this is a Pattern 1738 Wallpiece Musket that has been fitted with a Pattern 1777 lock.
- typical features include: polished "in the white", blackened or browned barrel; full length, one piece walnut stock with no nosecap; tapered steel ram rod with button head; brass furniture.
- overall length is 1809.75 mm (71.25").

Manufacturer

- "TOWER" is marked on the lock plate.
- British Royal Board of Ordnance established a system circa 1714 to control manufacturing specifications of firearms for the Army (Land Service) and Navy (Sea Service), this system was known as the Pattern.
- British Royal Board of Ordnance had two main assembly/inspection armory sites: DUBLIN CASTLE in Ireland and TOWER in London, England.

Notes

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.

Model

- the model designation is not marked on the firearm.
- the year of manufacture is marked on the lock plate.
- made circa 1742 to 1750.
- this is an improved Pattern 1730 Long Land Pattern Musket with the same 1168mm (46") barrel length but with later lock dates.
- typical features include: polished "in the white", blackened or browned, smooth bore barrel; full length, one piece walnut stock with nosecap; long lock with a drooping tail; one screw showing behind the cock; three pronged feather-spring finial; tapered steel or capped wood ram rod retained by four pipes; brass furniture; sling swivels are attached to the trigger guard bow and screwed through the stock between the first and second pipes; stepped, long tang butt plate.
- overall length is 1578mm (62 1/8"), average weight is 4.28kg (9.4 lbs).

Manufacturer

- "FARMER" is marked on the tail of the lock plate over a date, ie. 1748.
- James Farmer was located in Birmingham, England from 1737 to 1773.
- typically marked with a crowned "G.R." ahead of the cock and
with a small crowned broad arrow marked beneath the pan on the lock plate.

Action

- muzzle loader.

Serial Number

- such arms are often marked on the right side of the buttstock or the upper tang of the butt plate with a number that usually represents the rack position, or Company, Unit, or Regiment number and is not the serial number.

- "TOWER" was used by the Tower of London armory as an inspection marked, until the early 1900s.
- "TOWER" marked firearms were proofed in either Birmingham or London.

Action

- muzzle loader.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel	- the barrel length is subject to a nominal variance.
Calibre	- the bore diameter is subject to a nominal variance.
Remarks	- the Short Land Muskets were referenced as early as 1730 and featured the 1067mm (42") barrel. A Dragoon version, made without a forend cap, and featured a wood ram rod was introduced in 1744. A steel ram rod version was introduced in 1749. The Dragoon version was improved 1n 1757 with a new straight line lockplate, a stronger stock and a return to the wood ramrod. A Marine and Militia version was produced concurrently and featured a shorter buttplate tang that was held with a screw, a steel ramrod and the absence of a wrist escutcheon.

FRT Report

Firearm Reference Number (FRN): 138598
Make: British Service
Model: Pattern 1770 Carbine

Summary

Make:	British Service
Model:	Pattern 1770 Carbine
Manufacturer:	Willets, Benjamin
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
138598 - 1	68 FLINTLOCK	1	991	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.

Model

- the model designation is not marked on the firearm.
- the year of manufacture is marked on the lock plate.
- made circa 1770 to circa 1790.
- this is a scaled down Pattern 1756 Long Land Pattern Musket with a 991mm (39") barrel designed for sergeants of grenadiers.
- typical features include: polished "in the white", blackened or browned, smooth bore barrel held by pins through the stock; full length, one piece walnut stock with cast nose cap; tapered steel ram rod retained by four pipes; shorter lock with a straight tail; flat or rounder side plate; one screw showing behind the cock; three pronged feather-spring finial; oval wrist escutcheon (vs the usual shield); brass furniture; sling swivels are attached to the trigger guard bow and screwed through the stock between the first and second pipes; stepped, long tang butt plate.
- average overall length is 1381mm (54 3/8").

Manufacturer

- "WILLETS" is marked on the tail of the lock plate.
- typically marked with a crowned "G.R." ahead of the cock and
with a small crowned broad arrow marked beneath the pan on the lock plate.

Action

- muzzle loader.

Barrel

- the barrel length is subject to a nominal variance.

Calibre

- the bore diameter is subject to a nominal variance.

Notes

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.
- "TOWER" is marked on the lock plate.

Model

- the model designation is not marked on the firearm.
- the year of manufacture is marked on the lock plate.
- made circa 1778 to 1790.
- this is an improved Pattern 1756 Long Land Pattern Musket but with a 1092mm (42") barrel.
- typical features include: polished "in the white", blackened or browned, smooth bore barrel held by pins through the stock; full length, one piece walnut stock with cast nose cap; tapered steel ram rod retained by four pipes; shorter lock with a straight tail; flat or rounder side plate; one screw showing behind the cock; three pronged feather-spring finial; wrist escutcheon; brass furniture; sling swivels are attached to the trigger guard bow and screwed through the stock between the first and second pipes; stepped, long tang butt plate.
- average overall length is 1473 mm (58").

Manufacturer

- "TOWER" is marked on the lock plate.
- British Royal Board of Ordnance established a system circa 1714 to control manufacturing specifications of firearms for the Army (Land Service) and Navy (Sea Service), this system was known as the Pattern.
- British Royal Board of Ordnance had two main assembly/inspection armory sites: DUBLIN CASTLE in Ireland and TOWER in London, England.
- "TOWER" was marked on firearms assembled/inspected at the Tower of London armory from parts supplied by various contracts.
- "TOWER" was also marked on firearms inspected at the Tower of London armory and manufactured by other contracted gunmakers.
- "TOWER" was used by the Tower of London armory as an inspection marked, until the early 1900s.
- "TOWER" marked firearms were proofed in either Birmingham or London.

Action

- muzzle loader.

Notes

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.
- "TOWER" is marked on the lock plate.

Model

- the model designation is not marked on the firearm.
- after 1764, the contractor's name and the date that the lock was made were no longer applied to the lock plate; only the word "TOWER" would appear.
- produced circa 1793 to circa 1815.
- this is an improved Pattern 1779 Short Land Pattern Musket but with a 991mm / 39" barrel.
- typical features include: sidelock action with exposed hammer, muzzle loading, flintlock ignition; polished "in the white", blackened or browned, smooth bore barrel; full length, one piece walnut stock with nosecap; two screws showing behind the hammer; lobed feather-spring finial; tapered steel ram rod retained by three pipes; brass furniture; sling swivels are attached to the trigger guard bow and screwed through the stock between the first and second pipes; stepped, long tang butt plate.
- this Pattern of musket encompassed two variations; the Pattern 1793 Musket, India Pattern Type 1 and the Pattern 1809 Musket, India Pattern Type 2.
- average overall length is 1391mm (54 3/4"), average weight is 4.18kg (9.2lbs).

Manufacturer

- "TOWER" is marked on the lock plate.
- British Royal Board of Ordnance established a system circa 1714 to control manufacturing specifications of firearms for the Army (Land Service) and Navy (Sea Service), this system was known as the Pattern.
- British Royal Board of Ordnance had two main assembly/inspection armory sites: DUBLIN CASTLE in Ireland and TOWER in London, England.

- "TOWER" was also marked on firearms inspected at the Tower of London armory and manufactured by other contracted gunmakers.
- "TOWER" was used by the Tower of London armory as an inspection marked, until the early 1900s.
- "TOWER" marked firearms were proofed in either Birmingham or London.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- muzzle loading.
Serial Number	- such arms are often marked on the right side of the buttstock or the upper tang of the butt plate with a number that usually represents the rack position, or Company, Unit, or Regiment number and is not the serial number.
Other Markings	- an observed example featured the East India Company logo, consisting of four letters ("V"over "E", "I" and "C") within an "X" inside a heart marked on the barrel.

Notes

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.
- "TOWER" is marked on the lock plate.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- no model name is marked on this rifle; the model is derived from the official British military designation.
- the "Baker Rifle" was a flintlock rifle adopted by the British Military in 1800 for use by the Rifle regiments of the British Army. It was the first standard issue, British made rifle accepted by the British armed forces.
- the Baker Rifle was produced from 1800 to 1837; total number made is estimated at 22,000.
- features; muzzle loading, exposed right side mounted hammer, flintlock ignition; variations in the lockplate design and hammer configuration will be encountered; brass patchbox on the right side of the buttstock; brass buttplate; the brass trigger guard was distinctively shaped like an elongated "S" which enabled a firmer grip on the rifle; walnut stocked to the muzzle; the buttstock has a raised cheek piece on the left side; barrel is held in the stock by three flat captive wedges; the forend cap and ramrod pipes are brass; has an underbarrel 30"/762mm steel ramrod with a rounded tip; has a distinctive "sword bayonet" lug attachment on the right side of the barrel at the muzzle end; may have a flip-up type rear sight and solid front sight; browned barrel.
- Baker rifling consisted of 7 rectangular grooves making a quarter turn in the length of the barrel.
- it was also produced in a Calvary Carbine version which was shorter and weighed less than the standard rifle; it had a safety catch on the lock, a swivel-mounted ramrod and the sword bayonet lug was omitted.
- the 1800/15 version was the standard rifle modified to accommodate the use a socket bayonet.

Manufacturer

- "TOWER" is marked on the lock plate.
- British Royal Board of Ordnance established a system circa 1714 to control manufacturing specifications of firearms for the Army (Land Service) and Navy (Sea Service), this system was known as the Pattern.
- British Royal Board of Ordnance had two main assembly/inspection armory sites: DUBLIN CASTLE in Ireland and TOWER in London, England.
- "TOWER" was marked on firearms assembled/inspected at the Tower of London armory from parts supplied by various contracts.
- "TOWER" was also marked on firearms inspected at the Tower of London armory and manufactured by other contracted gunmakers.
- "TOWER" was used by the Tower of London armory as an inspection marked, until the early 1900s.
- "TOWER" marked firearms were proofed in either Birmingham or London.
- most early production Baker's were manufactured under the Tower of London system which utilized the services of many sub-contractor gunsmiths, barrel makers, etc.
- the government arsenal at Enfield also made the Baker rifle after 1815 and the lockplate would be so marked.
- additional manufacturing of the Baker rifle was undertaken by the following London gunsmiths; Ezekiel Baker, Thomas Barnett, Martin Brander, Durs Egg, Harrison and Thompson, Henry Nock, Samuel Pritchett, James Wilkes, Robert Wright, Thomas Reynolds, Samuel Galton, Joseph Grice, Henry & John Whately.

Action

- muzzle loading, flintlock ignition.

Notes

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.
- "TOWER" is marked on the lock plate.

Model

- no model name is marked on this rifle; the model is derived from the official British military designation.
- the "Baker Rifle" was a flintlock rifle adopted by the British Military in 1800 for use by the Rifle regiments of the British Army. It was the first standard issue, British made rifle accepted by the British armed forces.
- the Baker Rifle was produced from 1800 to 1837; total number made is estimated at 22,000.
- production of the Pattern 1803 Cavalry Carbine began in 1803.
- this model was also known as the Pattern 1803 Cavalry Rifle due to the fact that it was indeed a "carbine" but it had a "rifled" barrel. It is characterized by its shorter barrel and lighter weight than that of the standard Baker Infantry Rifle.
- features include: muzzle loading, exposed right side mounted hammer, flintlock ignition; variations in the lockplate design and hammer configuration will be encountered; brass patchbox on the right side of the buttstock; brass buttplate; the brass trigger guard was distinctively shaped like an elongated "S" which enabled a firmer grip on the rifle; walnut stocked to the muzzle; the buttstock has a raised cheek piece on the left side; the forend cap and ramrod pipes are brass; has an under-barrel captive swivel-type steel ramrod with a rounded tip; the carbine version of the Baker does not have the distinctive "sword bayonet" lug attachment on the right side of the barrel at the muzzle end; a sling bar with lanyard ring is mounted on the rear left side of the forestock; plain block rear sight and solid front sight; browned barrel.
- Baker rifling consisted of 7 rectangular grooves making a quarter turn in the length of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "TOWER" is marked on the rear of the lockplate behind the hammer.
-- "TOWER" is marked on the lock plate.
- British Royal Board of Ordnance established a system circa 1714 to control manufacturing specifications of firearms for the Army (Land Service) and Navy (Sea Service), this system was known as the Pattern.
- British Royal Board of Ordnance had two main assembly/inspection armory sites: DUBLIN CASTLE in Ireland and TOWER in London, England.

Notes

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.
- "TOWER" is marked on the lock plate.

Model

- the model designation does not appear on the firearm.
- smooth bore, side hammer, percussion musket adopted by the British government circa 1839.
- manufacturer made use of many obsolescent flintlock parts but required a new made percussion hammer and nipple.
- full stocked with barrel retaining pins (inlieu of barrel bands).
- brass triggerguard, buttplate, nose cap and three ram rod pipes.
- the 1839 Musket is easily confused with the 1842 Musket, the most obvious difference being that the 1839 has an undated, converted flintlock lock plate while the 1842 has a lockplate originally manufactured as percussion and usually has a manufacture date (1843 for example).

Manufacturer

- "TOWER" is marked on the lock plate.
- British Royal Board of Ordnance established a system circa 1714 to control manufacturing specifications of firearms for the Army (Land Service) and Navy (Sea Service), this system was known as the Pattern.
- British Royal Board of Ordnance had two main assembly/inspection armory sites: DUBLIN CASTLE in Ireland and TOWER in London, England.
- "TOWER" was marked on firearms assembled/inspected at the Tower of London armory from parts supplied by various contracts.
- "TOWER" was also marked on firearms inspected at the Tower of London armory and manufactured by other contracted gunmakers.
- "TOWER" was used by the Tower of London armory as an inspection marked, until the early 1900s.
- "TOWER" marked firearms were proofed in either Birmingham or London.

Notes

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.
- "BECKWITH" is marked on the lock plate.

Model

- the model is not marked on the firearm; this is a version of the Pattern 1842 Musket adopted by the Royal Irish Constabulary, for use as a police service firearm.
- normally marked "BECKWITH" on the lock-plate, and "BECKWITH LONDON" on the barrel.
- these carbines may be seen with rack or issue numbers on the butt or buttplate, indicating to who they were originally issued.
- features usually include: blued or browned finish; round barrel; open fixed sights; under barrel ramrod; sling swivels; right side lockplate and hammer; brass trigger guard, nose cap, and ramrod thimbles; straight grip walnut stock.

Manufacturer

- the Beckwiths were a gunmaking family based in London, England, between 1801 and 1861; William A. Beckwith was succeeded by Henry Beckwith, who was succeeded by Elizabeth Beckwith.

Action

- muzzle-loaded percussion ignition.

117055 - 1	75 PERCUSSION	1	991	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.
- "TOWER" is marked on the lock plate.

Model

- the model designation does not appear on the firearm.
- smooth bore, side hammer, percussion musket adopted by the British government circa 1842.
- the 1842 Musket is easily confused with the 1839 Musket, the obvious difference being that the 1839 has an undated, converted flintlock lockplate and a back-action lock while the 1842 has a side-action lock originally manufactured as percussion and usually is marked with the date of manufacture (ie. 1843).

Manufacturer

- "TOWER" is marked on the lock plate.
- British Royal Board of Ordnance established a system circa 1714 to control manufacturing specifications of firearms for the Army (Land Service) and Navy (Sea Service), this system was known as the Pattern.
- British Royal Board of Ordnance had two main assembly/inspection armory sites: DUBLIN CASTLE in Ireland and TOWER in London, England.
- "TOWER" was marked on firearms assembled/inspected at the Tower of London armory from parts supplied by various contracts.
- "TOWER" was also marked on firearms inspected at the Tower of London armory and manufactured by other contracted gunmakers.
- "TOWER" was used by the Tower of London armory as an inspection marked, until the early 1900s.
- "TOWER" marked firearms were proofed in either Birmingham or London.

Notes

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.
- "TOWER" is marked on the lock plate.

Model

- "BARNETT" and the year of manufacture may be marked on the lock plate.
- manufactured circa 1842 to 1855.
- full model designation is not marked on the firearm.
- features include: round, smoothbore barrel, no sights; swivel ramrod; bevelled and stepped lock plate with ordnance marks and a "VR" crown; brass capped forend, and butt-cap; brass trigger guard; one piece walnut stock; belt hook mounted on the left side; lanyard ring.
- may be encountered with various proof marks on the barrel and a numbered rack or storage plaque tacked on the side or back of the stock.
- some later versions may be encountered with a rifled bore and half moon front sight.

Manufacturer

- "BARNETT" over "LONDON" is usually marked on the lockplate.
- Barnett of London, England.
- Thomas Barnett was located at 134 Minories from 1796 to 1810.
- Thomas Barnett became Thomas Barnett & Sons in 1811.
- Thomas Barnett & Sons was located at 134 Minories from 1811 to 1832.
- Thomas Barnett & Sons business was succeeded by John Edward Barnett in 1833.
- John Edward Barnett/JE Barnett was located at 37 Camomile Street from 1816 to 1818, Prescott Street from 1819 to 1823, and 134 Minories from 1833 to 1842.
- John Edward Barnett/JE Barnett became JE Barnett & Sons in 1842.
- JE Barnett & Sons was located at 134 Minories from 1842 to 1859, Brewhouse Lane, Wapping from 1860 to 1874, 134 Minories and Duncan Street, Leman Street in 1875, and Duncan Street from 1876 to 1901.
- JE Barnett & Sons became JE Barnett & Sons Limited in 1902.
- JE Barnett & Sons Ltd was located at Duncan Street from 1902 to 1908.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action - muzzle-loaded percussion single-shot.

Summary

Make:	British Service
Model:	Pattern 1844 Yeomanry Carbine
Manufacturer:	Tower
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
110456 - 1	65 PERCUSSION	1	508	Antique CC 84(1) "antique firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.
- "TOWER" is marked on the lock plate.

Model

- not marked with anything to designate the model as "Yeomanry Carbine", intended for use by the Yeoman (Cavalry) and Colonial Mounted Troops.
- features determine the model.
- a short (nominally 508 mm./20 inch long) barrel with fixed notch rear-sight, black powder, muzzle-loading, side hammered, smooth-bore percussion carbine, with sling-bar and ring on the left side.
- full-length walnut stock with a brass butt-plate, trigger-guard with a grip-tang extension, a ram-rod pipe, and nose-cap; swivel ram-rod of steel (508 mm./20 inches long) with large flat tip,.
- produced circa 1843 to about 1848: some reported to have been converted from existing muskets to meet the demand.

DO NOT CONFUSE with the almost identical "Victoria Carbine" which has a nominal barrel length of 559 mm./26 inches.

Manufacturer

- "TOWER" is marked on the lock plate.
- British Royal Board of Ordnance established a system circa 1714 to control manufacturing specifications of firearms for the Army (Land Service) and Navy (Sea Service), this system was known as the Pattern.
- British Royal Board of Ordnance had two main assembly/inspection armory sites: DUBLIN CASTLE in Ireland and TOWER in London, England.
- "TOWER" was marked on firearms assembled/inspected at the Tower of London armory from parts supplied by various contracts.
- "TOWER" was also marked on firearms inspected at the Tower of London armory and manufactured by other contracted gunmakers.
- "TOWER" was used by the Tower of London armory as an inspection marked, until the early 1900s.
- "TOWER" marked firearms were proofed in either Birmingham or London.

Action

- black powder, muzzle-loading, side hammer, smooth-bore percussion carbine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the convention of the period did not require a serial number on these arms.
- such arms are often marked on the right side of the buttstock (or elsewhere) with number, representing the Rack position, or Company, Unit, or Regiment number: such a number is usually not the serial number.

Notes

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.

Model

- no model name is marked on this firearm; model designation is derived from the British Government sealed pattern designation.
- "V", a crown, and "R" is marked on the left side of the barrel under the nipple.
- a "BO" (for "Board of Ordnance") under a broad arrow may be stamped on the grip.
- "Pattern 1848 Police Pistol" was approved for British Service in 1848 with 500 made for the Irish Constabulary for plain clothes officers on special duty.
- features include: no sights; muzzle loading, round barrel; swivel type ram rod attached to the under barrel rib; percussion ignition, exposed hammer mounted on the central, left side of the pistol; one piece hardwood stock with a bag grip; steel trigger guard; finished "in the white".

Manufacturer

- "TOWER" is marked on the lock plate.
- British Royal Board of Ordnance established a system circa 1714 to control manufacturing specifications of firearms for the Army (Land Service) and Navy (Sea Service), this system was known as the Pattern.
- British Royal Board of Ordnance had two main assembly/inspection armory sites: DUBLIN CASTLE in Ireland and TOWER in London, England.

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.
- "TOWER" is marked on the lock plate.

Model

- model is not marked on the firearm.
- designed in 1851 with production between 1853 and 1855.
- this is based on the Pattern 1842 Musket with the exception of an improved ladder-type rear sight graduated from 200 to 1,000 yards and a smaller calibre ("minie") and saw limited production as it was replaced by the Pattern 1853 Rifle.
- features include: blade front sight; ramrod; pinned (no barrel bands); spring catch bayonet mount; trigger guard mounted and stock mounted sling loops; brass furniture and three ram rod pipes; full length walnut stock.

Manufacturer

- "TOWER" is marked on the lock plate.
- British Royal Board of Ordnance established a system circa 1714 to control manufacturing specifications of firearms for the Army (Land Service) and Navy (Sea Service), this system was known as the Pattern.

Notes

Make

- make may not be marked on the firearm
- the basic firearm originated at the Royal Small Arms Factory, Enfield.

Model

- not marked as to the model or pattern.
- this pattern was adopted in 1856 by the British Military Ordnance Board as the "1856 Pattern Cavalry Carbine".
- various dates commencing with 1856 and up to the mid to late 1860's will be marked on right lock plate with a Victorian crown.
- more than 16,000 produced.
- features include: wooden full stock; two barrel bands; sling swivels attached to the first barrel band and to the butt stock; blade front sight; multiple leaf rear sight; sling bar attached to the left side of the stock, brass nose cap, butt plate and trigger guard, attached swivel ramrod.
- average weight with a 533mm (21") barrel is 1.136kgs (2.51lbs)

Manufacturer

- "TOWER" is marked on the lock plate.
- British Royal Board of Ordnance established a system circa 1714 to control manufacturing specifications of firearms for the Army (Land Service) and Navy (Sea Service), this system was known as the Pattern.
- British Royal Board of Ordnance had two main assembly/inspection armory sites: DUBLIN CASTLE in Ireland and TOWER in London, England.

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.
- "TOWER" is marked on the lock plate.

Model

- made circa 1858.
- smoothbore short barrel rifle issued to Native mounted police regiments.
- this was a conversion of original Pattern 1853 Musket, the original caliber was in .577 PERCUSSION, but the overbore ensured that the firearm could not be used against the British with their own ammunition.
- full stocked with two barrel bands, and swivel rammer.
- brass nose cap, trigger guard, and butt plate.
- side hammer, percussion ignition.

Manufacturer

- "TOWER" is marked on the lock plate.
- British Royal Board of Ordnance established a system circa 1714 to control manufacturing specifications of firearms for the Army (Land Service) and Navy (Sea Service), this system was known as the Pattern.

Notes

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.

Model

- no model name is marked on this firearm; model designation is derived from the British Government sealed pattern designation.
- this pistol was approved for British Service on 17 December 1858, under order " 77/22/74, the Pistol, 8 in., Rifled, for Cavalry Service India, Pattern No.1 ".
- features include: muzzle loading, percussion ignition; side action lock plate and exposed hammer mounted on right side of the pistol; one piece hardwood stock which had a brass plate butt cap with lanyard ring; ramrod mounted underneath the barrel, the ramrod was of the captive, swivel-type retained in position by the brass nose cap; brass trigger guard.
- this pistol was originally manufactured with a device called a "tige", which is a post or wedge located in the chamber - the tige was designed to expand the ball into the rifling upon loading; the use of the tige design was abolished by Government order issued on 02 November 1860.

Manufacturer

- known example was marked "BIRMINGHAM" on the lockplate with the Royal Crown cypher behind the hammer.
- research indicates that the Birmingham marking on this lockplate indicates that this particular example was made for the British Government by one or more of the various gunmakers within the "Birmingham Trade" firearms industry.

Action

- muzzle loading, percussion ignition.

Serial Number

- not numbered.

FRT Report

Firearm Reference Number (FRN): 158107
Make: British Service
Model: Pattern 1858 Pistol

Summary

Make:	British Service
Model:	Pattern 1858 Pistol
Manufacturer:	Tower
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
158107 - 1	577 PERCUSSION	1	203	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.

Model

- no model name is marked on this firearm; model designation is derived from the British Government sealed pattern designation.
- "Pattern 1858 pistol" was approved for British Service in 1861.
- "Pattern 1858 pistol" is a modified "Pattern 1856 pistol" with a 203mm (8") rifled barrel.
- "Pattern 1858 pistol" lock plate is marked with the "Victorian Crown" over "VR".
- features include: blade front sight and raised notch rear sight; muzzle loading, rifled barrel; swivel type ram rod attached to the barrel retained by a brass nose cap; percussion ignition, side action lock plate and exposed hammer mounted on right side of the pistol; one piece hardwood stock with a brass grip cap and lanyard ring; brass trigger guard; finished "in the white".

Manufacturer

- "TOWER" is marked on the lock plate.
- British Royal Board of Ordnance established a system circa 1714 to control manufacturing specifications of firearms for the Army (Land Service) and Navy (Sea Service), this system was known as the Pattern.
- British Royal Board of Ordnance had two main assembly/inspection armory sites: DUBLIN CASTLE in Ireland and TOWER in London, England.
- "TOWER" was marked on firearms assembled/inspected at the Tower of London armory from parts supplied by various contracts.
- "TOWER" was also marked on firearms inspected at the Tower of London armory and manufactured by other contracted gunmakers.
- "TOWER" was used by the Tower of London armory as an inspection marked, until the early 1900s.
- "TOWER" marked firearms were proofed in either Birmingham or London.

Action

- muzzle loading, percussion ignition.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- not numbered.
- may have a rack location number.
- may also have letters of the military unit i.e.: "VPEI60" (that stands for "Volunteer Cavalry of Prince Edward Island, 60th pistol").

Notes

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.

Model

- model not marked on firearm.
- this is a generic entry for British Service FlintLock Pistols whose model designation is unknown.
- lockplate marked with a "crown" and initials.
- features include: browned or blued finish; round barrel; underbarrel ramrod; full-length walnut stock with brass fittings; sidehammer; flintlock ignition; brass trigger guard, buttcap and nosecap.
- specimens still in the British service in the 1840's were officially converted to percussion.
- British Service flintlock pistols were in production from the late 1600's to the early 1800's.

Manufacturer

- "Gill" is usually engraved on the lockplate.
- Thomas Gill was a large gunsmith with operations in both London & Birmingham, from the mid-1700s until the early 1800s; he manufactured guns for both military and commercial sales.

Action

- muzzle-loading.

16954 - 1	70 FLINTLOCK	1	996	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- "British Service" is a term used for firearms commissioned and approved by the Board of Ordnance for military use from circa 1714 to the mid 1800's.

Model

- the model is not marked on the firearm; this is the colloquial description of a type of flintlock musket produced on order for the British government, made for issue to domestic and overseas militia organizations.
- features include: blued or browned finish; round barrel; blade front sight; brass or iron furniture; full-length straight-grip stock; underbarrel ramrod; right-side cock, frizzen, pan, and lockplate;

Manufacturer

- Thomas Henry Potts was an English gun making firm located in London, England from 1821 to 1851.
- Thomas Henry Potts entered into a partnership with Thomas Hunt to form the company of "Potts & Hunt" in 1853.
- "Potts & Hunt" was dissolved in 1874.

Action

- muzzle-loaded flintlock single-shot.

Notes

Make

- "THE BRITISH SPORTING ARMS Co. TORONTO" may be marked on the hard rib.

Model

- "THE CLIMAX GUN" may be marked inside a banner on both sides of the receiver/frame.
- features include: side by side barrels with raised hard rib and bead front sight; front hinged receiver/frame with top tang mounted break open lever and sliding safety; box lock; hammerless; double triggers; splinter forearm and semi pistol grip butt stock, engraved.
- British proof marks may be apparent on the barrel assembly and the receiver/frame.

Manufacturer

- the manufacturer's name is not marked on the firearm.
- the manufacturer's logo of three stacked rifles may be marked on the underside of the barrels.
- "ENGLISH MADE" may be marked on the action flats of the receiver/frame.

Action

- side by side barrel configuration; break open action.

Serial Number

- the serial number may be marked on the watertable and may be repeated on the underside of the barrels and on the metal mechanism of the forearm.
- known example had a six digit number without prefix or suffix.

Firearm Reference Number (FRN): 118032
Make: British Submachine Gun
Model: MCEM 2

Summary

Make:	British Submachine Gun
Model:	MCEM 2
Manufacturer:	Royal Small Arms Factory, Enfield (RSAF(E))
Level:	Converted Automatics
Type:	Submachine Gun
Action:	Converted Automatic
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
118032 - 1	9MM LUGER	5	220	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
118032 - 2	9MM LUGER	18	220	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- make is not marked on the firearm.

Model

- model designation "MCEM 2" ("Military Carbine Experimental Model 2") is not marked on the firearm.
- this is a prototype/experimental submachinegun designed by a Lt. Podsenkowski, at the Royal Small Arms Factory ,Enfield Arsenal during World War Two; a number of Polish arms designers had escaped to England after the war had started, and they worked on several firearms designs during the war.
- this is a highly compact submachine gun that was designed for airborne troops, and had several innovative design features that were later used by other small arms designers.
- can be fired with a stock as a submachinegun, or without the shoulder stock/carrying case as a large machine pistol.
- features include: double stack magazine inserted through the pistol-grip, synthetic grip panels, a canvas-covered hollow buttstock that can serve as a holster when dismounted, an over-hanging bolt to keep length to a minimum, peep sights, an integral compensator, and a matte-black one-piece receiver/frame knurled at the forward end for a gripping surface.
- because of its extremely high rate of fire (1000 rpm), low magazine capacity (18 rounds), and slightly longer production time, the MCEM 2 was passed over in favour of the STEN series of submachine guns.

Manufacturer

- manufacturer is not marked on the firearm.

Action

- no longer capable of full automatic fire.

Serial Number

- numbered on the right side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Notes

Make

- make is not marked on the firearm.

Model

- this is an unusual experimental/prototype submachine gun designed by a Mr. Norman of Birmingham Small Arms during the latter part of World War Two; because of its compact size, this submachine gun was being considered for adoption by airborne troops and clandestine forces.
- features include: folding "T" stock, wooden pistol grip and horizontal forearm, an open sided receiver/frame with grasping grooves on the bolt and a recoil spring within a ventilated shroud surrounding the barrel.
- this firearm has an unusual fire selector; pulling the trigger alone will produce semi automatic fire, but pulling the trigger and depressing a thumb lever on the left side of the pistol grip will produce automatic fire.
- this firearm was never officially adopted due to the adoption of the competing Mark 5 Sten gun.

Manufacturer

- manufacturer's designation is not marked on the firearm.

Action

- no longer capable of full automatic fire.

Serial Number

- numbered on the receiver/frame.

Shots

- detachable box magazine; this firearm uses Sten magazines.

Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
118130 - 1	9MM LUGER	5	199	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	
118130 - 2	9MM LUGER	32	199	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is not marked on the firearm.

Model

- this is an unusual experimental/prototype submachine gun designed by a Mr. Norman of Birmingham Small Arms during the latter part of World War Two; because of its compact size, this submachine gun was being considered for adoption by airborne troops and clandestine forces.
- features include: folding "T" stock, wooden pistol grip and horizontal forearm, an open sided receiver/frame with grasping grooves on the bolt and a recoil spring within a ventilated shroud surrounding the barrel.
- this firearm has an unusual fire selector; pulling the trigger alone will produce semi automatic fire, but pulling the trigger and depressing a thumb lever on the left side of the pistol grip will produce automatic fire.
- this firearm was never officially adopted due to the adoption of the competing Mark 5 Sten gun.

Manufacturer

- manufacturer not marked on firearm.

Action

- selective fire.

Serial Number

- numbered on the receiver/frame.

Shots

- detachable box magazine; this firearm uses Sten magazines.

FRT Report

Firearm Reference Number (FRN): 25266
Make: Brixia
Model: 1912

Summary

Make:	Brixia
Model:	1912
Manufacturer:	Metallurgica Bresciana Gia Tempini (MBT)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	ITALY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
25266 - 1	9MM GLISENTI	7	95	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	
25266 - 2	9MM GLISENTI	7	130	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- the make is normally not marked on the firearm.
- Brixia is Latin for Brescia.

Model

- the model designation does not normally appear on the firearm.
- this model was a further development of the Glisenti model 1910 used by the Italian military.
- features include; lack of grip safety, and strengthening the receiver/frame which resulted in a flat side rather than a stepped side as in the Glisenti.
- although tested, this model was not adopted by the Italian authorities.

Manufacturer

- "MBT" will normally be molded into the plastic grip panels.
- Metallurgica Bresciana Gia Tempimi (MBT) was established in 1884.
- Metallurgica Bresciana Gia Tempimi (MBT) was located in Brescia, Italy.
- Metallurgica Bresciana Gia Tempimi (MBT) was a large arms and metallurgy factory with over 1,100 employees in 1923.

Action

- recoil operated.

Serial Number

- sample examined used an alpha prefix followed by sequential numbers marked on the front of the receiver/frame.
- serial number may also be marked on other componants.

Calibre

- the 9X19 Glisenti cartridge is dimensionally identical to the 9MM LUGER cartridge but loaded to a lower pressure and velocity level.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.

Remarks

- Fabbrica d'Armi Glisenti, Brescia developed this firearm. In 1907 Glisenti sold the rights for this firearm to Metallurgica Brescia gia Tempini (MBT). The further development of the firearm took two more years at which time it was submitted as model 1909 to the Italian Armed Forces for evaluation with the purpose of replacing Italian Service revolvers as the military standard. This firearm design was successful and replaced the previous Italian Service series of revolvers as the Italian Service pistol M1910 Glisenti.
- MBT later emitted a model known as the M1912 BRIXIA without grip safety and with a slight strengthening of the frame which resulted in a flat side rather than a stepped side as in the Glisenti. The differences between the two pistols are small and there is little advantage of one over the other. The Italian authorities declined to replace the Glisenti Model 1910 with the Brixia Model 1912.
- the difference between the M1910 Glisenti and the M1912 Brixia.
- If the firearm has a grip safety and the magazine release is on the bottom left side at the rear of the grip - it is an M1910 Glisenti (FAB 1909 or FAB 1910).
- if the firearm has no grip safety, the magazine release is in the centre bottom rear of the grip (as per the Walther P-38) and the capitol letters MBT are moulded into the grips - it is an M1912 Brixia Pistol.

Notes

Make

- "BRIXIA" is marked on the side of the receiver/frame.
- the logo of a stylized "X" over a circle may be marked on the firearm.
- "MADE IN ITALY" is marked on the underside of the receiver/frame near the trigger guard and may be marked on the side of the barrel.
- Brixia Shotguns is a manufacturer located in Gardone, Val Trompia, Brescia, Italy.

Model

- model is not marked on the firearm.
- this is a standard-pattern over/under boxlock shotgun made by Brixia Shotguns with a minimum of decoration; this shotgun can be distinguished from other Brixia over/unders by the plain, polished receiver/frame marked only "BRIXIA" on the sides, and the Brixia logo of a stylized "X" in a circle on the botton of the receiver/frame..
- features include: blued barrels; fixed or interchangeable screw-in chokes; bead sight; ventilated top-rib; sling swivels; checkered walnut schnabel forearm and pistol-grip stock; mirror-polished box lockreceiver/frame; top-lever opening; tang safety/selector; single trigger; rubber buttpad.
- average weight is 3.2 kg (7.0 lbs).

Manufacturer

- "BRIXIA" is marked on the side of the receiver/frame.
- the logo of a stylized "X" over a circle may be marked on the firearm.
- "MADE IN ITALY" is marked on the underside of the receiver/frame near the trigger guard and may be marked on the side of the barrel.
- Brixia Shotguns is a manufacturer located in Gardone Val Trompia, Brescia Italy.

Action

- over/under configuration.

Serial Number

- serial number may be marked under the break open lever or on the underside of the receiver/frame.
- serial number rationalization is not known.

Calibre

- calibre is marked on the barrel.

Notes

Make

- "BRIXIA" is marked on both sides of the receiver/frame and on the barrels.

Model

- the model is not marked on the firearm.
- Brixia Shotguns makes numerous box lock over/under shotguns, and care must be taken to identify them accurately:
- the "Leonessa" has a gold-highlighted double-tailed lion in a crest on the side of the receiver/frame;
- the "Master" series has "Master" written in longhand above an arc on the receiver/frame;
- the "Ethos" has a woodcock on the receiver floor and a gold-highlighted settling duck on the receiver/frame;
- the "Praeda" has a woodcock on the receiver floor and a gold-highlighted bounding hare on the receiver/frame;
- the "Lilium" has a gold-highlighted mallard and red streaks on the receiver/frame;
- the "Raven" has a silhouette of a raven, and the word "RAVEN" on the receiver/frame; and
- the "Exsimius" has clay pigeons with whorls on the sides of the receiver/frame, with a hawk, a clay pigeon, and "Exsimius" on the receiver floor.
- features include: round over and under barrels with fixed bead front sight and ventilated top rib; fixed or screw-in interchangeable chokes; matte nickel hinged boxlock receiver/frame; top tang mounted break open lever; top tang mounted safety toggle; checked wood pistol buttstock and checked matching wood forend; sling stud and sling swivels.
- average weight is 3.2 kg (7.05 lbs).

Manufacturer

- "BRIXIA" is marked on both sides of the receiver/frame and on the barrels.
- "BRIXIA SHOTGUNS - Made in Italy" may be marked on the barrels.
- "MADE IN ITALY" may be marked on the underside of the receiver/frame.
- Brixia Shotguns is a manufacturer located in Gardone, Val Trompia, Brescia, Italy.

Action

- over/under configuration.

Serial Number

- serial-numbered on the receiver/frame.

Notes

Make

- "BRIXIA SHOTGUNS" is marked on both sides of the receiver/frame and on the barrels.
- "BRIXIA ARMI" is marked on the receiver/frame under the lion crest.
- "BRIXIA SHOTGUNS - Made in Italy" may be marked on the barrels.

Model

- model is not marked on the firearm.
- the "Leonessa" model was specifically made in dedication to the city of Brescia and has a stylized shield crest with downward point, a gold-highlighted "rampant two-tailed lion" inside, engraved on both sides of the receiver/frame with a banner on the bottom of the crest with "BRIXIA ARMI" inside.
- features include: round, over and under barrels with fixed bead front sight and ventilated top rib; fixed or screw-in interchangeable chokes; hinged box lock receiver/frame; top tang mounted break open lever; top tang mounted safety toggle; checked wood pistol buttstock with black recoil pad and wood checked matching wood forend; sling stud and sling swivels.
- average weight is 3.2 kg (7.05 lbs).

Manufacturer

- "BRIXIA SHOTGUNS" is marked on both sides of the receiver/frame and on the barrels.
- "BRIXIA ARMI" is marked on the receiver/frame under the lion crest.
- "BRIXIA SHOTGUNS - Made in Italy" may be marked on the barrels.
- Brixia Shotguns is a manufacturer located in Gardone Val Trompia, Brescia Italy.

Action

- over and under configuration, hinged barrel design.

Serial Number

- serial number is marked on the underside of the receiver/frame.
- serial number may be marked inside a circle and double V logo.
- observed serial number consisted six numbers without letter prefix or suffix.
- serial number rationalization is not known.

Calibre

- caliber may be marked on the firearm and/or barrels.

Notes

Make

- "BRIXIA SHOTGUNS" is marked on both sides of the receiver/frame and on the barrels.
- "BRIXIA SHOTGUNS - Made in Italy" may be marked on the barrels.

Model

- the model is not marked on the firearm.
- Brixia Shotguns makes numerous boxlock over/under shotguns, and care must be taken to identify them accurately:
- the "Leonessa" has a gold-highlighted double-tailed lion in a crest on the side of the receiver/frame;
- the "Master" series has "Master" written in longhand above an arc on the receiver/frame;
- the "Ethos" has a woodcock on the receiver floor and a gold-highlighted settling duck on the receiver/frame;
- the "Praeda" has a woodcock on the receiver floor and a gold-highlighted bounding hare on the receiver/frame;
- the "Lilium" has a gold-highlighted mallard and red streaks on the receiver/frame;
- the "Raven" has a silhouette of a raven, and the word "RAVEN" on the receiver/frame; and
- the "Exsimius" has clay pigeons with whorls on the sides of the receiver, with a hawk, a clay pigeon, and "Exsimius" on the receiver floor.
- features include: round over and under barrels with fixed bead front sight and ventilated top rib; fixed or screw-in interchangeable chokes; matte nickel hinged boxlock receiver/frame; top tang mounted break open lever; top tang mounted safety toggle; checked wood pistol buttstock and checked matching wood forend; sling stud and sling swivels.
- average weight is 3.2 kg (7.05 lbs).

Manufacturer

- "BRIXIA SHOTGUNS" is marked on both sides of the receiver/frame and on the barrels.
- "BRIXIA SHOTGUNS - Made in Italy" may be marked on the barrels.
- "MADE IN ITALY" may be marked on the underside of the receiver/frame.
- Brixia Shotguns is a manufacturer located in Gardone Val Trompia, Brescia Italy.

Action

- over/under configuration.

Serial Number

- serial-numbered on the receiver/frame.

Notes

Make

- "BRIXIA SHOTGUNS" and/or the logo of a styalized "X" over a circle may be marked on the firearm.

Model

- "PM5" is a pump action shotgun with a detachable box magazine mounted to the underside of the receiver/frame.
- features include: raised blade front sight and an adjustable rear sight; round barrel with an extended choke tube; solid top receiver/frame with a Picatinny type rail and right side ejection; cross bolt safety is located on the rear of the trigger guard; action release is mounted on the left side of the receiver/frame; detachable box magazine release lever is mounted on the rear of the magazine well; checkered black forearm and a fixed one piece buttstock with a vertical pistol grip or a pistol grip with a side folding wire skeleton stock; blued metal finish.
- overall length with a 260 mm (10 1/4") barrel and with a folding buttstock in the folded position is 520 mm (20 1/2").
- overall length with a 260 mm (10 1/4") barrel and a fixed buttstock is 804 mm (31 5/8").
- overall length with a 360 mm (14 1/8") barrel and with a folding buttstock in the folded position is 620 mm (24 3/8").
- overall length with a 360 mm (14 1/8") barrel and a fixed buttstock is 904 mm (35 5/8").
- overall length with a 510 mm (20 1/8") barrel and with a folding buttstock in the folded position is 770 mm (24 2/8").
- overall length with a 510 mm (20 1/8") barrel and a fixed buttstock is 1054 mm (41 1/2").
- average weight is 3 kgs.

Manufacturer

- "BRIXIA SHOTGUNS" and/or the logo of a styalized "X" over a circle may be marked on the firearm.
- Brixia Shotguns is a manufacturer located in Gardone, Val Trompia, Italy.

Serial Number

- serial number is usually marked on the receiver/frame.

Shots

- detachable box magazine.

Canadian Law Comments

- this firearm is normally Non-Restricted unless affected by the following conditions:

1) by combining a barrel from a licensed firearms manufacture that is less than 406mm (16.0") in length and a receiver/frame fitted with a pistol grip only, this firearm may be deemed a "handgun" and therefore "RESTRICTED" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (a) of the Criminal Code of Canada.
- "handgun" means a firearm that is designed, altered or intended to be aimed and fired by the action of one hand, whether or not it has been redesigned or subsequently altered to be aimed and fired by the action of both hands.

2) "a firearm that is designed or adapted to be fired when reduced to a length of less than 660 mm by folding, telescoping or otherwise" and therefore "Restricted" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (c) of the Criminal Code of Canada.

3) by combining a barrel that has been altered to less than 457mm (18.0") in length by a non-licensed firearms manufacturer (cottage industry, individual or gunsmith) regardless of whether the shotgun has a pistol grip or conventional stock, this firearm is "PROHIBITED" and subject to the definition of a "prohibited firearm" in Part III/Firearms and Other Weapons of Section 84 of the Criminal Code of Canada.
- "prohibited firearm" means a firearm that is adapted from a rifle or shotgun, whether by sawing, cutting or any other alteration, and that, as so adapted,
(i) is less than 660 mm in length, or
(ii) is 660mm or greater in length and has a barrel less than 457 mm in length.

Notes

Make

- The company logo is marked on the receiver/frame.
- Make is marked on the underside of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- This firearm is manufactured by the "new" Zbrojovak Brno Arms Division. Not to be confused with the old Brno 500 series which is similar except for the markings. The new series can be identified by the country of origin as being the CZECH REPUBLIC. - The 500 is the basic gun of a series. - The parent version of the 500 series is also sold as a shotgun (Model 501.2). - Features include: European walnut stock with checkered forend and semi-pistol grip, Monte Carlo stock, double triggers, blued barrel and receiver/frame with acid etched engraving, boxlock action, tang safety, sling swivels, and bead front sight. - The company logo is marked on the receiver/frame.
Action	- Over/under configuration.
Serial Number	- serial number usually marked on the receiver/frame.
Barrel	- Optional barrels were available at time of order as original equipment.
Remarks	- Matt vent rib. - The system permits the interchange of barrel sets. - Developed in part for the North American market to use popular rimless rifle cartridges. - Also found in rimmed European calibres. - Available in rifle calibers over 12 GA only. - All shotgun barrels chambered 70MM (2 3/4"). - European hardwood stock, with cheek piece, single trigger, light engraving on the side plates.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
29804 - 1	22 LR	5	530	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make	- made both in Czechoslovakia and the Czech Republic
Model	- Derivation of the Brno ZKM 452-2 which in itself was an improvement of the Brno Model 5. The Model 513 is an economy grade version.
Manufacturer	- These rifles were manufactured at the arms factory at Ceskoslovenska Zbrojovka Uhersky Brod Plant. Firearms manufactured after 1993 were made at Ceska Zbrojovka, Uhersky Brod in the Czech Republic.
Action	- modified Miniature Mauser type action. - safety locks the bolt.
Serial Number	- number located on right side of receiver.
Barrel	- optional threaded muzzle to accommodate a sound suppressor.
Shots	- this rifle uses a 5 or 10 shot detachable box magazine. - single shot platform available.
Other Markings	- Manufacturer's Cartouche and Model Name on left side of receiver, year of manufacture is indicated by last two digits which appear with the proof marks ('95 indicates 1995).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- This is a box magazine fed bolt action sporting rifle. It features an uncheckered beech stock, sling swivels, open rear and hooded front sight. This rifle is a direct descendant of the Brno rifles ZKM series. Simplified trigger mechanism.

68108 - 4	303 BRITISH	2	559	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "MADE IN CZECHOSLOVAKIA" was observed marked on the right barrel.
- "BRNO / ZBROJOVKA BRNO" logo of a "Z" inside a rifled bore, inside a circle was observed marked on the water table.

Model

- model designation is not marked on the firearm.
- this is a generic entry for those BRNO Side By Side shotguns that are not marked with a model designation.
- features include: round side by side barrels with a concave barrel rib and bead front sight; front hinged receiver/frame with a top tang mounted break open lever and safety; side locks; extractors or ejectors; single or double triggers; checkered walnut forearm and pistol grip buttstock with a cheek pad; blued and light engraved.

Action

- side by side barrel configuration, hinged barrel design.

Serial Number

- serial number is marked on the water table of the receiver/frame, barrel flats and forearm metal.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- calibre may be stamped on the barrel flats.
- example:
- barrel flats may be stamped with 12 and 2 3/4" over 70; the chamber lengths in both metric and Imperial.

Other Markings

- markings on the barrels, top at breech: ' SPECIAL POLDI ELEKTRO' and ' MADE IN CZECHOSLOVAKIA'

Notes

Make	- the logo appears on the left side of the receiver/frame above the manufacturer's name.
Model	- this is a single shot tip down receiver/frame that can be fitted with either a rifle or a shotgun barrel, at the owner's discretion. - features include walnut pistol grip stock and forearm, angular cheekpiece, blued receiver/frame and barrel and sling swivels. - switching or removing these barrels is a matter of removing the forearm, pressing the tang opening lever to one side, then rotating the barrel down and out of the receiver/frame;
Manufacturer	- usually marked on the left side of the receiver/frame, under the company logo.
Action	- tilting barrel single shot.
Serial Number	- usually marked on the receiver/frame.
Other Markings	- on the left hand side of the receiver/frame: BRNO logo (Z into rifled bore in a circle) ZBROJOVKA BRNO MADE IN CZECH REPUBLIC

Notes

Make

- barrel and/or receiver/frame may be marked "BRNO" and "MADE IN CZECHOSLOVAKIA".

Model

- model name may appear on the left side of the receiver ring as "ZG 47", and also on the rear of the barrel followed by the calibre designation.
- introduced in 1947, production ceased circa mid-to-late 1960's.
- year of manufacture is indicated by last two digits which appear with the proof marks ('56 indicates 1956).
- this is a "German" style bolt action sporting rifle designed primarily for the European market.
- features include: Mauser 98 type action; checkered walnut stock with cheek piece; sling swivels; double set triggers; multi leaf folding rear sight and a "butter knife" bolt handle.

Manufacturer

- manufacturer's name " ZBROJOVKA BRNO NARODNI PODIK" on left side of the receiver/frame rail.

Action

- turn-bolt design.

Serial Number

- known example had a five digit number without prefix or suffix marked on the top of the receiver ring.
- research literature indicates the serial number range as 0 to 20,000.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - internal box magazine with hinged floor plate.

Notes

Make

- "BRNO" is marked on the barrel.

Model

- "ZH" followed by three numbers (which identify the barrels' calibre combination) is marked on the barrel.
- originally designed by Mr. Holek circa 1958 to accept a variety of barrel types on the same receiver/frame including rifle, shotgun, or combination thereof.
- this is a generic model and other entries exist which may better describe the firearm.
- typical features include: ribbed barrel; extractors; sling swivels on bottom barrel and buttstock; optional engraving; single or double triggers.

Manufacturer

- the company logo is marked on the barrel, opening lever and underside of receiver/frame.

Action

- over & under barrel pattern.

Serial Number

- located on the bottom front of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make

- BRNO is marked on the barrel.

Model

- the model designation will be marked on left side of the upper barrel. The "ZH" series of firearms was designed to have one receiver/frame with interchangeable over/under shotgun barrels, double rifle barrels or a combination of one shotgun barrel with one rifle barrel. The next three numbers refer to the barrel configuration on the firearm.
- standard features include: blued boxlock receiver/frame; double triggers; break action lever is mounted on a sliding action locking block; automatic safety mounted in the trigger guard; walnut, pistol grip buttstock with a cheekpiece and walnut forend.
- a feature of the double trigger system on this model is that the front trigger will discharge the upper barrel only. The rear trigger will discharge both barrels in sequence, the lower barrel first followed by the upper barrel.

Manufacturer

- "BRNO" and "MADE IN CZECHOSLOVAKIA" are marked on the upper barrel.
- the "Zbrojovka Brno" logo is marked on the firearm.

Type

- this model is equipped with a rifled barrel over a smooth bore barrel.

Action

- over and under barrel configuration.

Serial Number

- serial number is marked on the underside of the receiver/frame.
- serial number may also be repeated on the barrel assembly.

Calibre

- the calibre and gauge information is usually marked on the left side of the upper barrel.

Remarks

- the ZH series includes:
- ZH301 is an over/under shotgun with 700mm barrels. Both barrels chambered for 12 GA X 2 3/4".
- ZH302 is an over/under shotgun with 660mm barrels. Both barrels chambered for 12 GA X 2 3/4".
- ZH303 is an over/under shotgun with 762mm barrels. Both barrels chambered for 12 GA X 2 3/4".
- ZH304 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 7X57R MAUSER and the lower barrel chambered for 12 GA X 2 3/4".
- ZH305 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 5.6X52R and the lower barrel chambered for 12 GA X 2 3/4".
- ZH306 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 5.6X50 MAG and the lower barrel chambered for 12 GA X 2 3/4".
- ZH307 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 22 HORNET and the lower barrel chambered for 12 GA X 2 3/4".
- ZH308 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 7X65R BRENNEKE and the lower barrel chambered for 12 GA X 2 3/4".
- ZH309 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 8X57 JRS and the lower barrel chambered for 12 GA X 2 3/4".
- ZH321 is an over/under shotgun with 680mm barrels. Both barrels chambered for 16 GA X 2 3/4".
- ZH324 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 7X57R MAUSER and the lower barrel chambered for 16 GA X 2 3/4".
- ZH328 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 7X65R BRENNEKE and the lower barrel chambered for 16 GA X 2 3/4".
- ZH344 is an over/under double rifle with 600mm barrels. Both barrels chambered for 7X57R MAUSER.
- ZH348 is an over/under double rifle with 600mm barrels. Both barrels chambered for 7X65R BRENNEKE.
- ZH349 is an over/under double rifle with 600mm barrels. Both barrels chambered for 8X57 JRS.

Notes

Make

- "BRNO" may be marked on the barrel assembly.

Model

- "MODEL ZH302" is marked on the side of the upper barrel.
- the model ZH302 is designed for skeet shooting.
- features include: blued tapered round barrel with a ventilated top rib and open side ribs; muzzle porting; smooth bore; fixed chokes; bead front sight; engraved front hinged box lock receiver/frame; hammerless; break opening lever located on the upper rear tang; a safety is located on the front of the trigger guard; double trigger mechanism of which the rear trigger can be used as a single trigger mechanism which will allow the lower barrel to be discharged first followed by the upper barrel, the front trigger will only discharge the upper barrel; checkered forearm and semi-pistol grip buttstock with or without cheekpiece.
- overall length for a 660mm (26") barrel is 1090mm (43"), average weight is 3.3kg (7lbs 4oz).
- interchangeable barrels are available which may consist of rifle or rifle and shotgun.

Manufacturer

- "ZBROJOVKA BRNO" may be marked on the firearm.

Action

- over and under configuration.

Serial Number

- serial number of an observed example was marked on the underside of the receiver/frame and may be repeated on the barrel assembly.
- serial number of an observed example consisted of six numbers.

Barrel

- barrel lengths may vary.
- optional barrels were available at time of order as original equipment.

Calibre

- calibre is marked on the side of the upper barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- the ZH series include:
- ZH301 is an over/under shotgun with 700mm barrels. Both barrels chambered for 12 GA X 2 3/4".
- ZH302 is an over/under shotgun with 660mm barrels. Both barrels chambered for 12 GA X 2 3/4".
- ZH303 is an over/under shotgun with 762mm barrels. Both barrels chambered for 12 GA X 2 3/4".
- ZH304 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 7X57R MAUSER and the lower barrel chambered for 12 GA X 2 3/4".
- ZH305 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 5.6X52R and the lower barrel chambered for 12 GA X 2 3/4".
- ZH306 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 5.6X50 MAG and the lower barrel chambered for 12 GA X 2 3/4".
- ZH307 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 22 HORNET and the lower barrel chambered for 12 GA X 2 3/4".
- ZH308 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 7X65R BRENNEKE and the lower barrel chambered for 12 GA X 2 3/4".
- ZH309 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 8X57 JRS and the lower barrel chambered for 12 GA X 2 3/4".
- ZH321 is an over/under shotgun with 680mm barrels. Both barrels chambered for 16 GA X 2 3/4".
- ZH324 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 7X57R MAUSER and the lower barrel chambered for 16 GA X 2 3/4".
- ZH328 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 7X65R BRENNEKE and the lower barrel chambered for 16 GA X 2 3/4".
- ZH344 is an over/under double rifle with 600mm barrels. Both barrels chambered for 7X57R MAUSER.
- ZH348 is an over/under double rifle with 600mm barrels. Both barrels chambered for 7X65R BRENNEKE.
- ZH349 is an over/under double rifle with 600mm barrels. Both barrels chambered for 8X57 JRS.

Notes

Make

- the make is marked on the firearm.

Model

- introduced in 1972.
- the model designation may be marked on left side of the upper barrel. The "ZH" series of firearms was designed to have one receiver/frame with interchangeable over/under shotgun barrels, double rifle barrels or a combination of one shotgun barrel with one rifle barrel. The next three numbers refer to the barrel configuration on the firearm.
- standard features include: blued boxlock receiver/frame; double triggers; top tang safety and break action lever; and a pistol grip stock and forend with checkering and buttstock may have a cheek piece.
- the receiver/frame may also have a plain silver finish, a combination of black and silver and/or engraving.
- a feature of the double trigger system on this model is that the front trigger will discharge the upper barrel only. The rear trigger will discharge both barrels in sequence, the lower barrel first followed by the upper barrel.

Manufacturer

- "ZBROJOVKA BRNO" is marked on the left side of the barrel.

Action

- over and under configuration.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number is marked on the receiver/frame.

Barrel

- barrel lengths may vary.
- optional barrels were available at time of order as original equipment.

Calibre

- the calibre and gauge information may be marked on the barrel.

Remarks

- the ZH series included:
- ZH301 is an over/under shotgun with 700mm barrels. Both barrels chambered for 12 GA X 2 3/4".
- ZH302 is an over/under shotgun with 660mm barrels. Both barrels chambered for 12 GA X 2 3/4".
- ZH303 is an over/under shotgun with 762mm barrels. Both barrels chambered for 12 GA X 2 3/4".
- ZH304 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 7X57R MAUSER and the lower barrel chambered for 12 GA X 2 3/4".
- ZH305 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 5.6X52R and the lower barrel chambered for 12 GA X 2 3/4".
- ZH306 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 5.6X50 MAG and the lower barrel chambered for 12 GA X 2 3/4".
- ZH307 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 22 HORNET and the lower barrel chambered for 12 GA X 2 3/4".
- ZH308 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 7X65R BRENNEKE and the lower barrel chambered for 12 GA X 2 3/4".
- ZH309 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 8X57 JRS and the lower barrel chambered for 12 GA X 2 3/4".
- ZH321 is an over/under shotgun with 680mm barrels. Both barrels chambered for 16 GA X 2 3/4".
- ZH324 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 7X57R MAUSER and the lower barrel chambered for 16 GA X 2 3/4".
- ZH328 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 7X65R BRENNEKE and the lower barrel chambered for 16 GA X 2 3/4".
- ZH344 is an over/under double rifle with 600mm barrels. Both barrels chambered for 7X57R MAUSER.
- ZH348 is an over/under double rifle with 600mm barrels. Both barrels chambered for 7X65R BRENNEKE.
- ZH349 is an over/under double rifle with 600mm barrels. Both barrels chambered for 8X57 JRS.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
29420 - 1	5.6X50 MAG/12 GA X 2 3/4"	2	600	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "BRNO" may be marked on the barrel assembly.

Model

- "MODEL ZH306" is marked on the side of the upper barrel.
- features include: blued tapered round barrel with a solid top rib and solid side ribs; rifled bore upper barrel and smooth bore lower barrel with fixed choke; fixed front sight and adjustable rear sight; engraved front hinged box lock receiver/frame; hammerless; break opening lever located on the upper rear tang; a safety is located on the front of the trigger guard; double trigger mechanism of which the rear trigger can be used as a single trigger mechanism which will allow the lower barrel to be discharged first followed by the upper barrel, the front trigger will only discharge the upper barrel; checkered forearm and semi-pistol grip buttstock with or without cheekpiece; sling swivels.
- overall length for a 600mm (23.5") barrel is 1030mm (40.5"), average weight is 3.45kg (7lbs 9oz).
- interchangeable barrels are available which may consist of rifle and rifle or rifle and shotgun.

Manufacturer

- "ZBROJOVKA BRNO" may be marked on the firearm.

Action

- over and under configuration.

Barrel

- barrel lengths may vary.
- optional barrels were available at time of order as original equipment.

Calibre

- calibre is marked on the side of the upper barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- the ZH 300 series include:
- ZH301 is an over/under shotgun with 700mm barrels. Both barrels chambered for 12 GA X 2 3/4".
- ZH302 is an over/under shotgun with 660mm barrels. Both barrels chambered for 12 GA X 2 3/4".
- ZH303 is an over/under shotgun with 762mm barrels. Both barrels chambered for 12 GA X 2 3/4".
- ZH304 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 7X57R MAUSER and the lower barrel chambered for 12 GA X 2 3/4".
- ZH305 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 5.6X52R and the lower barrel chambered for 12 GA X 2 3/4".
- ZH306 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 5.6X50 MAG and the lower barrel chambered for 12 GA X 2 3/4".
- ZH307 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 22 HORNET and the lower barrel chambered for 12 GA X 2 3/4".
- ZH308 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 7X65R BRENNEKE and the lower barrel chambered for 12 GA X 2 3/4".
- ZH309 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 8X57 JRS and the lower barrel chambered for 12 GA X 2 3/4".
- ZH321 is an over/under shotgun with 680mm barrels. Both barrels chambered for 16 GA X 2 3/4".
- ZH324 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 7X57R MAUSER and the lower barrel chambered for 16 GA X 2 3/4".
- ZH328 is an over/under combination gun with 600mm barrels. The upper barrel chambered for 7X65R BRENNEKE and the lower barrel chambered for 16 GA X 2 3/4".
- ZH344 is an over/under double rifle with 600mm barrels. Both barrels chambered for 7X57R MAUSER.
- ZH348 is an over/under double rifle with 600mm barrels. Both barrels chambered for 7X65R BRENNEKE.
- ZH349 is an over/under double rifle with 600mm barrels. Both barrels chambered for 8X57 JRS.

FRT Report

Firearm Reference Number (FRN): 36087
Make: Brno
Model: ZH344

Summary

Make:	Brno
Model:	ZH344
Manufacturer:	Zbrojovka Brno
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Multi-Barrel
Country of Manufacturer:	CZECH REPUBLIC
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
36087 - 1	7X57R MAUSER	2	600	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "ZBROJOVKA BRNO" may be marked on the firearm.
- The company logo is marked on the firearm.

Model

- "MODEL ZH 344" may be marked on the firearm.
- This particular model is sold with 14 sets in various calibers and combinations. These are individually available with other firearms in the ZH-300 series. Models listed include, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 321, 324, 344, 348, 349.

Manufacturer

- "ZBROJOVKA BRNO" may be marked on the firearm.
- Created out of the old Ceska Zbrojovka Brno .
- The company logo is marked on the firearm.

Action

- Over and under configuration.

Barrel

- Barrel lengths may vary. This firearm has been in production for sometime and by several corporations. May be found with barrels from older production.

Calibre

- The calibre designation is marked on the barrel.

Remarks

- These firearms are identical in recognition features to those produced by the former Brno. Unique in that, the series permits the interchange of 14 barrel sets. Walnut wood with diamond checkering. Unusual looking weapon. Mono- block barrels. Top Kersten sliding cross bolt and under bolt lock up. Double triggers, front trigger fires upper barrel only. Rear trigger fires lower then upper. Matt rib.

Notes

Make

- marked "Zbrojovka Brno" on the left side of the receiver/frame.

Model

- this is a break open single-shot boxlock hunting rifle.
- features include: blued finish; round barrel; walnut "hog's-back" pistol-grip stock and schnabel forearm; tang lever and safety slide; quarter-rib; open adjustable sights; sling swivels.
- do not confuse these rifles with the "ZBK" series of single-shot rifles by the same manufacturer; where the ZK 99 has a flat sided receiver/frame and a quarter-rib, the ZBK series have rounded receiver/frame tops and no rib on the barrel (very reminiscent of an H&R Topper).

Manufacturer

- BRNO is a manufacturer located in the Czech Republic since 1936; in addition to hunting, sporting, and target firearms, they have also made firearms on order for the Czech military.

Action

- hinged barrel design.

Serial Number

- numbered on the receiver/frame.

119688 - 3	22 BAC	6	191	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make not marked on air pistol.

Model

- the model designation is not marked on the firearm.
- this firearm is a modern reproduction of a 1873 Single Action Army, available in a number of finishes.
- features include: colour-case-hardened or nickeled receiver/frame; nickeled or blued barrel and cylinder and walnut, faux ivory or faux pearl grips.
- this air pistol is built on frames supplied by Uberti.

Manufacturer

- model is not marked with the names of the original manufacturer or the firm Brocock.
- this firearm is completely devoid of country of manufacture markings, manufacturer's name (s) or trade marks / proof marks.

Action

- Brocock pre-charged air-cartridge system.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- numbered on the bottom of the receiver/frame forward of the trigger guard.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- the 22 PELLET is fired from the .38 Brocock Air Cartridge. - the Brocock firm has an innovative "cartridge" which may be charged with compressed air. A pellet is inserted into the front portion of the cartridge and the assembly is loaded as if it were a conventional cartridge into the chamber. When the firing pin strikes the rear of the cartridge, air pressure is released, propelling the lead waisted pellet out of the cartridge and accelerating it through the barrel.
Canadian Law Comments	- this firearm is deemed to be a restricted firearm as it employs the receiver/frame of a "Restricted Firearm" as its essential component (an Uberti reproduction of the Colt 1873 SAA).

119689 - 4	22 PELLET	6	114	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make not marked on air pistol.

Model

- the model designation is not marked on the firearm.
- this firearm is intended to be a reproduction of a Colt 1877 Double Action "Thunderer" revolver, produced in single-action only and available in a number of finishes.
- features include: colour-case-hardened or nickeled receiver/frame; nickeled or blued barrel and cylinder and walnut grips on a "bird's-head" grip frame.
- this air pistol is built on frames supplied by Uberti.

Manufacturer

- model is not marked with the names of the original manufacturer or the firm Brocock.
- this firearm is completely devoid of country of manufacture markings, manufacturer's name (s) or trade marks / proof marks.

Action

- Brocock pre-charged air-cartridge system.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- numbered on the bottom of the receiver/frame forward of the trigger-guard.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- the 22 PELLET is fired from the .38 Brocock Air Cartridge. - the Brocock firm has an innovative "cartridge" which may be charged with compressed air. A pellet is inserted into the front portion of the cartridge and the assembly is loaded as if it were a conventional cartridge into the chamber. When the firing pin strikes the rear of the cartridge, air pressure is released, propelling the lead waisted pellet out of the cartridge and accelerating it through the barrel.
Canadian Law Comments	- this firearm is deemed to be a restricted firearm as it employs the receiver/frame of a "Restricted Firearm" as its essential component (an Uberti reproduction of the Colt 1873 SAA, with a "bird's-head" grip frame).

Firearm Reference Number (FRN): 110195
Make: Brocock
Model: Orion 6

Summary

Make:	Brocock
Model:	Orion 6
Manufacturer:	Brocock/Weihrauch
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Air,Spring or Gas
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
110195 - 1	177 PELLET	6	152	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
110195 - 2	22 BAC	6	152	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is usually marked on the left side of the receiver/frame as " BROCOCK LIMITED ENGLAND " England is marked on a second line with the Brocock logo in the centre of the three words.

Model

- model designation does not appear on the firearm.
- the "Orion 6" is a double action revolver with a swing out cylinder.
- blue or chrome plated finish.

Manufacturer

- usually marked on the right side of the receiver/frame just below the serial number. Markings may read " HwM " and "Made in Germany" below "HwM". May also be marked "hWm" inside a circle.

Action

- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Calibre

- calibre is usually marked on the left side of the barrel, eg. " Cal.177in/4.5MM ".
- this firearm uses a Brocock Air Cartridge known as the BAC .38/.177or BAC .38/.22.
- this is a self contained cartridge which has similar dimensions to a 38 SPL cartridge. A pellet is loaded in the front of the cartridge body and a pellet cap is placed over the pellet which in turn is screwed to the cartridge body. Then the cartridge is placed into the BACS hand charger which in turn compresses air into the cartridge at pressures of up to 2500psi.

Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
119927 - 1	22 BAC	5	450	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is marked on the firearm.

Model

- model may or may not be marked on air rifle.
- this is an air rifle that uses the pre-charged Brocock Air Cartridge System.
- features include: blued barrel with the end of the muzzle threaded for a moderator/silencer; turn bolt action; detachable box magazine; groove for telescopie mounting; two stage trigger; safety catch in front of the trigger; plain or Monte Carlo beech or walnut pistol-grip stock.
- this rifle is also available in a single-shot design, known as the "Safari".

Manufacturer

- manufacturer marked on firearm.
- Brocock is a manufacturer based in Birmingham that specializes in producing air pistols and air rifles that use a peculiar form of "pre-charged air cartridge" of their own design.
- Brocock often convert other manufacturers' firearms to use these cartridges.

Action

- pre-charged pneumatic Brockock Air Cartridge.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps. and a muzzle energy exceeding 5.7 Joules.

Serial Number

- numbered on the receiver/frame.

Calibre

- the 22 PELLET is fired from the .38 Brocock Air Cartridge.
- the Brocock firm has an innovative "cartridge" which may be charged with compressed air. A pellet is inserted into the front portion of the cartridge and the assembly is loaded as if it were a conventional cartridge into the chamber. When the firing pin strikes the rear of the cartridge, air pressure is released, propelling the lead waisted pellet out of the cartridge and accelerating it through the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Notes

Make

- make not marked on air pistol.

Model

- the model designation is not marked on the firearm.
- this firearm is a reproduction of a Remington New Model Army revolver.
- features include: brass receiver/frame; blued octagonal barrel and cylinder; walnut grips and colour case hardened rammer and hammer.
- this air pistol is built on frames supplied by Pietta.

Manufacturer

- this firearm model is not marked with the names of the original manufacturer or the firm Brocock.
- this firearm is completely devoid of country of manufacture markings, manufacturer's name (s) or trade marks / proof marks.

Action

- Brocock pre-charged air-cartridge system.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- numbered on the bottom of the receiver/frame forward of the trigger guard.

Calibre

- the 22 PELLET is fired from the .38 Brocock Air Cartridge.
- the Brocock firm has an innovative "cartridge" which may be charged with compressed air. A pellet is inserted into the front portion of the cartridge and the assembly is loaded as if it were a conventional cartridge into the chamber. When the firing pin strikes the rear of the cartridge, air pressure is released, propelling the lead waisted pellet out of the cartridge and accelerating it through the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments - this firearm is deemed to be a restricted firearm as it employs the receiver/frame of a "Restricted Firearm" as its essential component (a Pietta reproduction of the Remington 1858 Army).

146746 - 2	69 PERCUSSION	1	1111	Antique CC 84(1) "antique firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is marked on the firearm, but in a location that is invisible unless the lockplate is taken off the musket; the inside of the lockplate is marked "PETER BRANG" (note mispelling)..

Model

- the model is not marked on the firearm
- this is an example of the 1797 Pennsylvania Contract Flintlock Musket (a copy of the French Charleville 1763 Flintlock Musket), adopted by the State of Pennsylvania in 1797 and supplied by Peter Brong of Lancaster, Pennsylvania,, under a contract issued by the state government to arm the state militia.
- known Brong 1797 muskets are marked simply "CP" (Commonwealth of Pennsylvania) on the outside of lockplate, and "PETER BRANG" (note mispelling) on the INSIDE of the lockplate.
- features include: browned finish; fixed open sights; iron mountings and three barrel bands; an underbarrel ram-rod; flintlock mechanism with cock and frizzen on the right-side lockplate; sling swivels at second barrel band and front of trigger-guard; and straight-grip stock with an iron buttplate.
- these firearms may also be seen converted to percussion ignition.

Manufacturer

- the manufacturer is marked on the firearm, but in a location that is invisible unless the lockplate is taken off the musket; the inside of the lockplate is marked "PETER BRANG" (note mispelling)..
- Peter Brong (sometimes mispelled "Brang") was a Lancaster, Pennsylvania gunsmith who produced 1798-pattern flintlock muskets for the State of Pennsylvania and the US government (marked "US").

Action

- muzzle-loaded flintlock single-shot.

Barrel

- barrel lengths may vary slightly.

74170 - 3	32 RF	6	76	Antique AFR, Section 1, para. 6	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "B. A. Co. PATENT APRIL 14TH 1863" is usually marked on the barrel.
- "B.A. Co." is the abbreviation for "Brooklyn Arms Company".

Model

- manufactured in 1863 and 1864.
- "PATENT APRIL 14TH 1863" may be marked on the barrel.
- this is a small Rimfire revolver built on a patent belonging to Frank P. Slocum. The patent was granted for a loading system developed to avoid infringing on the "bored through cylinder" patent that was held by Smith & Wesson (purchased from Rollin White circa 1855).
- at least three variants known, the first, a 32 RF five shot variant that featured a spur trigger, brass frame and a rounded bag shaped grip used a unique design that featured individual chambers that held sliding tubes in the cylinder. The chambers slide forward for loading and ejecting. The second was a six shot 32 RF variant that used a standard unfluted cylinder, brass frame, spur trigger and flat butt that flared at the rear. The third variant was a 22 RF, seven shot, that used a smaller frame and shared the features of the second variation.
- sometimes referred to as the model "1863" or "Slocum 1863" because of the patent markings.

Manufacturer

- "B. A. Co. PATENT APRIL 14TH 1863" may be marked on the barrel.
- Brooklyn Arms Company was located in Brooklyn, New York, U.S.A. from 1863 to 1867.

Serial Number

- serial number was observed on the receiver/frame under the barrel.
- observed serial number consisted of four digits with no letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - known markings on barrel include " B. A. CO. Patented April 14, 1863"

Notes

Model

- the model 702 in "Light Tactical" and "Ozark" configuration are based on the short action length receiver/frame, the "Tactical" and "Savanna" versions are based on the long action receiver/frame.
- the "Light Tactical" model uses a light weight floorplate and trigger guard and is equipped with a shorter barrel.
- equipped with a McMillan or H-S Precision fiberglass varmint/competition stock that uses an aluminum bedding block. Options include; Jewell trigger, scope and mounts of the customers choice, stainless steel barrel and a different barrel profile if preferred.
- all model 702 variants share these features: precision machined cylindrical receiver/frame, hand fitted bolts with welded handle, heavy duty recoil lug, three position safety lever, adjustable trigger, countersunk barrel crown, sling swivels mounted on stock and a one inch recoil pad.
- the 702 model is also available as a single shot in "Varmint" configuration.

Manufacturer

- Ed Brown Products manufactures their own rifle and handgun line as well as aftermarket parts for customizing other manufacturers firearms.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- turn-bolt operated.
Serial Number	- marked on the receiver/frame.
Barrel	- as these rifles are produced on a custom basis other barrel lengths may be specified.
Calibre	- as these rifles are produced on a custom basis other calibres may be specified.
Shots	- internal magazine, hinged floor plate.

Notes

Make

- "Ed Brown Custom Perry MO" is usually marked on the left side of the receiver/frame.

Model

- introduced circa 2002.
- the model designation is not marked on the firearm.
- this model was designed to suit the 270 and 280 calibres.
- features include: blued barrel; right hand only; McMillan fiberglass stock (sporter with cheek piece); Pachmayr Decel recoil pad; steel trigger guard; scope mounts.
- all model 702 variants share these features: precision machined cylindrical receiver/frame; hand fitted bolts with welded handle; heavy duty recoil lug; three position safety lever; adjustable trigger; countersunk barrel crown; sling swivels mounted on stock.
- average weight is from 3.07 kg (6.75 lbs) to 3.41 kg (7.5 lbs).
- the 702 action is also available in a single shot configuration.

Manufacturer

- Ed Brown Products manufactures their own rifle and handgun line as well as aftermarket parts for customizing other manufacturers' firearms.

Action

- turn-bolt design.

Serial Number

- the serial number is marked on the receiver/frame.
- the serial number rationalization is unknown.

Calibre

- the calibre designation is marked on the barrel.

Shots

- internal magazine with hinged floor plate.

Notes

Make

- marked on the left side of the receiver/frame.

Model

- introduced in 2006.
- model is not marked on the firearm.
- the model 704 is a blend of a "push feed" type of action and the conventional "controlled feed" action of the Winchester 70/Mauser 98 type but is fitted with an integral bolt face mounted extractor in lieu of the external long claw type extractor.
- features include: CNC precision machined round receiver/frame; spiral flutes on bolt; adjustable iron sights; swivel barrel band; heavy duty recoil lug; serrated three position safety; Shilen barrel; checkered fiberglass McMillan stock sporter style with Monte Carlo style with cheek piece and Pachmayr Decelarator recoil pad.
- average weight for 458 LOTT calibre is 4.5kg (10lbs).

Manufacturer

- Ed Brown Products manufactures their own rifle and handgun line as well as aftermarket parts for customizing other manufacturers firearms.

Action

- turn-bolt design.

Serial Number

- marked on the left side of the receiver/frame.

Barrel

- muzzle break standard in ultra magnum calibre.

Calibre

- marked on the barrel.

Shots

- internal magazine, hinged floor plate.

Notes

Make

- "Ed Brown Products" is marked on the right side of the receiver/frame.

Model

- model designation is not marked on the firearm.
- the "FX" series is marketed by Ed Brown as a customizable series of 1911's that feature "special effects" packages with custom textures, finishes and slide cuts.
- features may include: fixed fiber optic or night sights; stainless steel, ported slide with front and rear grip serrations; skeletonized hammer; under barrel accessory rail; beavertail grip safety; stainless steel receiver frame; extended thumb safety; skeletonized trigger; texturized front and back strap; texturized synthetic or wood grip panels; blue or stainless steel finish.
- the standard "FX1" is sold by Ed Brown with the "FX snakeskin" front strap texture, "FX1 American Flag" serrations where a patch of stars appears below the slide serrations to give the appearance of the American flag, and "FX1" angled slide cuts. Multiple custom options are available so this firearm will not always have standard FX1 designs and features.
- overall length with 108 mm (4.25") barrel is 197 mm (7.75") and average weight is 1.13 kg (2.5 lbs).

Manufacturer

-"Ed Brown Products" over "Perry, MO USA." is marked on the right side of the receiver/frame.
- Ed Brown is a gunsmith/manufacturer based in Perry, Missouri, who specializes in producing custom "1911" style handguns.

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number was marked on the right side of the receiver/frame. - observed serial number consisted of five digits.
Calibre	- calibre designation is not marked on the firearm.
Shots	- detachable box magazine.

Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
146621 - 1	22 RF	1	559	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the manufacturer may or may not be marked on the firearm.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type (being a handgun with a detachable shoulder-stock to allow easier transport or carriage in a case).
- this is a single-shot 22 RF handgun constructed as a "pocket" or "buggy" rifle, with a detachable shoulder stock, but with a longer-than-normal barrel, reflecting the fact that these firearms were designed to be used with the shoulder-stock attached.
- these firearms were designed using Brown's patent of March 4, 1862, where an underlever that forms the trigger-guard is dropped and rotated forward to slide the barrel and breech forward away from the standing breech, to allow the firearm to be loaded/unloaded.
- features include: round blued barrel with flat-sided breech section that matches the frame; a nickeled brass frame; open adjustable peep sights; a ring-handled under-lever that forms the trigger-guard; walnut grip panels on a square butt grip frame; and a filigree shoulder-stock that is held in place on the grip frame via a threaded nut into the backstrap.

Manufacturer

- the manufacturer may or may not be marked on the firearm.
- William H. Brown was a Worcerster, Massachusetts-based inventor and gunsmith during the 1860s, who was granted a patent for a design for a breech-loading firearm that uses a sliding breech and barrel mounted in a frame, operated via an under-lever.

Action

- sliding-breech single-shot.

Barrel

- barrel lengths may vary.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- The Browning Model 12 is a reproduction, with improvements, of the Winchester Model 12.
- manufactured from 1991 to 1992.
- Production:
- 8000 of the 20 GA, Grade I models (product code 832),
- 4000 of the 20 GA, Grade V models (product code 932),
- 7000 of the 28 GA, Grade I models (product code 872),
- 5000 of the 28 GA, Grade V models (product code 972) were manufactured.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q. Made in Japan" may be marked on the barrel.

Action

- manually operated, pump-action repeating shotgun.

Serial Number

- the last five characters of the serial number consist of two letters which are a code for the date of manufacture and three digits which are the product code.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "FABRIQUE NATIONALE D'ARMES DE GUERRE" over "HERSTAL BELGIQUE" over "BROWNING'S PATENT DEPOSE" are marked on the left side of the slide. - 1935 High Power pistols produced by Fabrique Nationale Herstal (FN) and intended for the North American market were distributed by the Browning Arms Company. - "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennesee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- model designation is not marked on the firearm. - this model is a generic model used to describe military contract pistols between 1935 and 1966, other screens exist which may more accurately identify a pistol being examined. - early post-war models may not have a magazine safety.
Manufacturer	- "FABRIQUE NATIONALE D'ARMES DE GUERRE" over "HERSTAL BELGIQUE" over "BROWNING'S PATENT DEPOSE" are marked on the left side of the slide.
Action	- recoil operated, locked breech, self-loading pistol.
Serial Number	- various client nations specified a serial number rationalization unique to that country's model designation. - the complete serial number is usually found in three places on the firearm: - on the receiver under the ejection opening. - on the slide under the ejection opening. - on the barrel visible in the ejection port. - most national contracts (pre World War II), were numeric with no letter prefix or suffix. - firearms manufactured circa 1960 have the letter "T" as the serial number prefix. - most serial numbers are located on the receiver on the right side underneath the ejection opening; some later serial numbers are located on the front grip strap. - known serial number prefixes: - Canada (CH or T serial numbers) - United Kingdom ("T" and standard commercial serial numbers) - China (CH serial numbers or Chinese Republic property ideogram) - the Lithuanian and Estonian contract pistols had their own serial number series, starting at 1 and continuing to approximately 10000 - the barrel serial number is on the opposite side of the barrel to the ejection opening and is visible only when the pistol is disassembled.
Calibre	- calibre is usually marked on the barrel.
Shots	- double column, detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- The BROWNING "High Power" pistol has been used by the military forces of the following countries, some of which have marked their BROWNING pistols with unique identifying markings:
  Austria
  Belgium
  Cambodia
  Canada (CH or T serial numbers)
  China (CH serial numbers or Chinese Republic property ideogram)
  Columbia
  Denmark
  El Salvador
  Estonia (letters K.L. for Police and/or E V for Republic of Estonia Property Mark)
  Lithuania (Lithuanian crest - Towers of Vilnius)
  The Lithuanian and Estonian contract pistols had their own serial number series, starting at 1 and continuing to approximately 10000 - the barrel serial number is on the opposite side of the barrel to the ejection opening and is visible only when the pistol is disassembled.
  French Indo-China
  Greece

Remarks

- this firearm model is generic to pre World War II and Post World War II military contract production models manufactured between 1935 and 1966, other screens exist which may more accurately identify a pistol being examined.
- the Browning, Model 1935 High Power Pistol was not sold commercially before 1954.
- pistols of this model in civilian hands are the result of "battlefield pick-up" or capture pistols taken from soldiers.

Notes

Make

- "BROWNING - F.N." is marked on the left side of the slide.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- six large Chinese characters and/ or "Mk I*" and six large Chinese characters may be marked on the left side of the slide.
- the serial number is marked on the right side of the receiver/frame without a number prefix and the letters "CH".
- this model may also be known as "Chinese Hi Power", "Chinese No 1 Mark I", or "Chinese No 1 Mark I*".
- manufactured between 1944 and 1945.
- features include: a stock slot cut into the rear of the grip to accept a removable butt-stock and adjustable rear sight.
- the pistol was originally manufactured with a tangent adjustable rear sight (calibrated from 50-500 meters).

Manufacturer

- "INGLIS CANADA" is marked on the left side of the slide.

Action

- recoil operated.

Serial Number

- the serial number is marked on the right side of the receiver/frame and is usually repeated on the right side of the slide and barrel.
- the serial number range began at "CH" followed by one digit (CH#) and progressed to "5CH" followed by four digits (5CH####).

Calibre

- "9MM H.P." is marked on the left side of the slide.

Shots

- detachable box magazine.

Remarks

- The BROWNING "High Power" pistol has been used by the military forces of the following countries, some of which have marked their BROWNING pistols with unique identifying markings:

Austria
Belgium
Cambodia
Canada (CH or T serial numbers)
China (CH serial numbers or Chinese Republic property ideogram)
Columbia
Denmark
El Salvador
Estonia (letters K.L. for Police and/or E V for Republic of Estonia Property Mark)
Lithuania (Lithuanian crest - Towers of Vilnius)

The Lithuanian and Estonian contract pistols had their own serial number series, starting at 1 and continuing to approximately 10000 - the barrel serial number is on the opposite side of the barrel to the ejection opening and is visible only when the pistol is disassembled.

French Indo China
Greece
Netherlands (various royal crowns and the letter "W" or "J")

Some of the Netherlands BROWNING High Power pistols were re-serialized by the Dutch Government upon rebuild.

Indonesia
Lebanon
Paraguay
Peru (Peruvian crest)
Portugal
Syria
United Kingdom (Great Britain) ("T" and standard commercial serial numbers)
Venezuala
West Germany
Yugoslavia

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "1935 High Power No 2 MARK 1" is not marked on the firearm.
- manufactured between 1944 and 1945.
- features include: a fixed rear sight and does not normally have a slot cut into the rear of the grip.
- the serial number rationalization for the "Pistol, Browning, F.N., 9mm., H.P., No 2, Mk 1" by Inglis started at 0T1 and progressed to 0T9999.
- when a design change was incorporated, the model designation was ammended to "Pistol, Browning, F.N., 9mm., H.P., No. 2, Mk. I*".

Manufacturer

- "INGLIS CANADA" is marked on the left side of the slide.

Action

- recoil operated.

Serial Number

- the serial number is marked on the right side of the receiver/frame and is usually repeated on the right side of the slide and barrel.
- these pistols have the letter "T" incorporated into the serial number.
- the serial number rationalization for the "Pistol, Browning, F.N. 9mm., No. 2, Mk. I" by Inglis started at 0T1 and progressed to 0T9999.

Shots

- detachable box magazine.

Remarks

- the BROWNING "High Power" pistol has been used by the military forces of the following countries, some of which have marked their BROWNING pistols with unique identifying markings:

Austria
Belgium
Cambodia
Canada (CH or T serial numbers)
China (CH serial numbers or Chinese Republic property ideogram)
Columbia
Denmark
El Salvador
Estonia (letters K.L. for Police and/or E V for Republic of Estonia Property Mark)
Lithuania (Lithuanian crest - Towers of Vilnius)
The Lithuanian and Estonian contract pistols had their own serial number series, starting at 1 and continuing to approximately 10000 - the barrel serial number is on the opposite side of the barrel to the ejection opening and is visible only when the pistol is disassembled.
French Indo China
Greece
Netherlands (various royal crowns and the letter "W" or "J")
Some of the Netherlands BROWNING High Power pistols were re-serialized by the Dutch Government upon rebuild.
Indonesia
Lebanon
Paraguay
Peru (Peruvian crest)
Portugal
Syria
United Kingdom (Great Britain) ("T" and standard commercial serial numbers)
Venezuala
West Germany
Yugoslavia

Notes

Make

- "BROWNING - F.N." is marked on the left side of the slide.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "MK.I*" is usually marked on the left side of the slide. The "No 2" designation denotes design changes over the original "No 1 MARK I" pistol (product improved versions of the No 1 MARK I pistol are designated No 1 MARK I* and are also marked "No I*"). The No 1 pistol uses an adjustable tangent rear sight while the No 2 pistol uses a fixed rear sight.
- the 1935 High Power No 2 MARK 1* designation denotes that this model has been manufactured with product improvements. Changes in design to the original model No 2 MARK I pistol include an improved ejector and ejector location, improvements to the extractor, re-shaped magazine well and better overall fit and finish.
- manufactured between 1944 and 1945.
- these pistols have a "T" incorporated into the serial number.
- features include: fixed rear sight with a blade front sight; single action trigger mechanism; slide release and safety catch mounted on the left side of the receiver/frame; magazine disconnect; does not normally have a slot cut into the rear of the grip strap for a shoulder stock.
- a small number of presentation versions of this model were made that featured a gold wash finish with the recipients initials marked on a disc on the grips or a hard chrome finish. Both of these versions featured an "EX" prefix in the serial number.

Manufacturer

- "INGLIS, CANADA" is marked on the left side of the slide.

Action

- recoil operated.

Serial Number

- the serial number is marked on the right side of the receiver/frame and is usually repeated on the right side of the slide and barrel.
- the letter "T" is incorporated into the serial number and denotes a contract for the United Kingdom Government. The Canadian Government's military requirements were also filled from this UK Contract.
- the serial number rationalization for the "Pistol, Browning, F.N., 9mm., H.P., No 2 Mk 1*" manufactured by Inglis started at 0T1 and progressed to 9T9999, although there are some post war anomalies in the 12T range.
- presentation versions have a two letter prefix (EX) and two numbers with one observed example with the "EX" prefix, two numbers and a two letter suffix (DP).

Calibre

- "9MM H.P." is marked on the left side of the slide.

Shots

- detachable box magazine.

Remarks

- the BROWNING "High Power" pistol has been used by the military forces of the following countries, some of which have marked their BROWNING pistols with unique identifying markings:

Austria
Belgium
Cambodia
Canada (CH or T serial numbers)
China (CH serial numbers or Chinese Republic property ideogram)
Columbia
Denmark
El Salvador
Estonia (letters K.L. for Police and/or E V for Republic of Estonia Property Mark)

Notes

Make	- Browning is used as a make for pistols that were marketed under the Browning name in North America and the FN name throughout the rest of the world. - These pistols were all manufactured by Fabrique Nationale, Herstal Belgium and are so marked. Pistols destined for the North American market were marked Browning Arms Company, St Louis Missouri & Morgan Utah and Montreal P.Q. - All of the firearms produced at FN and intended for the North American market were distributed by the Browning Arms Company (formed in early 1950's) and are so marked. - "BROWNING ARMS COMPANY MORGAN UTAH & MONTREAL P.Q. MADE IN BELGIUM", "BROWNING ARMS COMPANY ST LOUIS MO MADE IN BELGIUM" or "BROWNING ARMS COMPANY MADE IN BELGIUM" is marked on the left side of the slide. - FN-Browning is used as a make for pistols that were marketed throughout the world. In 1954 the Browning Arms Company was created to sell FN manufactured pistol to the North American Market.
Model	- "1955" is not marked on the firearm. - "1955" is modernized version of the FN-Browning "1910" pistol. - "1955" was the Belgium manufactured "1910" pistol type for export to the U.S.A. under the Browning banner. - "1955" was manufactured from 1954 to 1968. - "1955" had a "Renaissance" model that was covered with at least 95% engraving and were nickel plated or chromed finish with gold plated trigger. - features include: fixed blade front and notch rear sights; external extractor; receiver/frame mounted safety on the left side behind the grip; striker fired; single action; grip safety; heel type magazine release; black plastic grips with "BROWNING" in a oval molded in, on top of the grips; blued finish. - overall length with an 89mm (3.5") barrel is 152mm (6"), average weight is 0.57kgs (20 oz).
Manufacturer	- Fabrique Nationale (FN) was founded in 1889 to manufacture arms under licence from Mauser for the Belgian army. In the late 1890's John Browning became associated with FN, who manufactured many of his designs. Fabrique Nationale manufactured firearms under the FN banner as well as the Browning banner. - All the FN-Browning and Browning Arms Company pistols of the 1910 and 1922 pattern were manufactured by Fabrique National. - "MADE IN BELGIUM" is marked on the slide. - Fabrique Nationale (FN) was founded in 1889 to manufacture arms under license from Mauser for the Belgian army. In the late 1890's John Browning became associated with FN, who manufactured many of his designs. Fabrique Nationale manufactured firearms under the FN banner as well as the Browning banner.
Action	- blow back operated.
Serial Number	- serial number is marked on the right side of the receiver/frame. - serial number range is from 0 to 619475 up to 1968 at which time production under the "Browning" name for the U.S.A. export market stopped.
Calibre	- calibre designation is marked on the barrel, visible through the ejection port. - "CAL 9m/mOO" calibre marking stands for 9MM BROWNING SHORT, .380 AUTO or ACP.
Shots	- detachable box magazine.

Notes

Make

- Browning is used as a make for pistols that were marketed under the Browning name in North America and the FN name throughout the rest of the world.
- these pistols were all manufactured by Fabrique Nationale, Herstal Belgium and are so marked. Pistols destined for the North American market were marked Browning Arms Company, St Louis Missouri & Morgan Utah and Montreal P.Q.
- all of the firearms produced at FN and intended for the North American market were distributed by the Browning Arms Company (formed in early 1950's) and are so marked.
- the make is normally marked on the left side of the slide as, "BROWNING ARMS COMPANY MORGAN UTAH & MONTREAL P.Q.". or "BROWNING ARMS COMPANY".

Model

- this is the model 1955 with a few changes so that it could be marketed in the U.S.A. after the implementation of the Gun Control Act of 1968.
- this model has adjustable sights, grip safety, a longer barrel, blue finish and in it's original configuration came with thumb rest grips.
- a factory engraved variant known as the 1971 Renaissance was also available.
- manufactured from 1971 to 1975.
- left side of slide will be marked "BROWNING ARMS COMPANY MORGAN UTAH & MONTREAL P.Q. MADE IN BELGIUM" or "BROWNING ARMS COMPANY MADE IN BELGIUM".

Manufacturer

- the manufacturer is not marked on this model, but the country of manufacturer is marked as, "MADE IN BELGIUM".

Serial Number

- serial numbers started at number 0001 each year.
- serial number is prefixed with year of manufacture and and model designation, in this case the letter "N".
- serial numbers for the five year production span are as follows, 71N-----, 72N-----, 73N-----,74N-----, 75N-----

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- the caliber designation is normally marked on the barrel, visible through the ejection port as, "CAL 380".
Shots	- detachable box magazine.

Notes

Make

- Browning is used as a make for pistols that were marketed under the Browning name in North America and the FN name throughout the rest of the world.
- these pistols were all manufactured by Fabrique Nationale, Herstal Belgium and are so marked. Pistols destined for the North American market were marked Browning Arms Company, St Louis Missouri & Morgan Utah and Montreal P.Q.
- all of the firearms produced at FN and intended for the North American market were distributed by the Browning Arms Company (formed in early 1950's) and are so marked.

Model

- the model designation is not marked on the firearm.
- introduced in 1954.
- this model is the FN-Browning model "Baby" marketed in North America under the Browning Arms name. The "Standard 25" will usually bear "Browning Arms Company" markings on the slide, those examples sold under the FN-Browning name will usually feature "FN" markings.
- because of similarities, this model is often confused with the FN-Browning "1906" model or "Baby" model. The Baby is a smaller and lighter version of the model 1906 pistol. The receiver/frame is lengthened and is flush with the slide at the front giving the Baby a square look to it. The Baby also has no grip safety or slide lock lever.

Manufacturer

- the manufacturer's name will not usually be marked on the firearm. The slide is usually marked "MADE IN BELGIUM".
- Fabrique Nationale (FN) was founded in 1889 to manufacture arms under licence from Mauser for the Belgian army. In the late 1890's John Browning became associated with FN, who manufactured many of his designs. Fabrique Nationale manufactured Browning designed firearms under the FN banner as well as the Browning banner.

Action

- blowback operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is usually marked on the left side of the receiver/frame and may also be marked on the bottom of the barrel. - serial numbers range from 130,000 to approximately 527,000. - serial number does not include the letter "S", that stands for the "Safe" position of the safety lever.
Calibre	- calibre designation may be marked on the right side of the barrel, visible through the ejection port.
Shots	- detachable box magazine.

Notes

Make

- Browning is used as a make for pistols that were marketed under the Browning name in North America and the FN name throughout the rest of the world.
- These pistols were all manufactured by Fabrique Nationale, Herstal Belgium and are so marked. Pistols destined for the North American market were marked Browning Arms Company, St Louis Missouri & Morgan Utah and Montreal P.Q.
- All of the firearms produced at FN and intended for the North American market were distributed by the Browning Arms Company (formed in early 1950's) and are so marked.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- a very small quantity of the "Standard" pistols were manufactured in 32 AUTO calibre / or were Standard 380 pistols with a second barrel in 32 AUTO calibre. - for an unspecified time during the 1950s and 1960's Browning advertised and referred to their pistols which were not engraved, as the "Standard 380 Caliber Browning Automatic Pistol", the "Standard 25 Caliber Browning Automatic Pistol" and the "Standard 9MM Caliber Browning Automatic Pistol". - the "Standard 380 Caliber Browning Automatic Pistol" model name appears to have been interchangeable with / or replaced by the "Model 1955". - It would also appear that the "Model 1955" was introduced in 1954 and was discontinued in North America in 1968 after the Gun Control Act of 1968 was implemented in the USA.
Manufacturer	- Fabrique Nationale (FN) was founded in 1889 to manufacture arms under licence from Mauser for the Belgian army. In the late 1890's John Browning became associated with FN, who manufactured many of his designs. Fabrique Nationale manufactured firearms under the FN banner as well as the Browning banner.
Action	- blowback operated.
Serial Number	- early examples have the letter "T" as the serial number prefix. - later examples normally have a three digit number followed by 2-3 letters and then more digits. - later serial numbers are located on the front grip strap.
Shots	- detachable box magazine.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame. - "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennesee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- manufactured from 1986 to 1987 by Miroku, Japan. - the model designation is marked on the right side of the barrel as "BROWNING MODEL 71" - do not confuse with the original model of Winchester manufacture. - features of this model include an exposed hammer, loading gate on the right side of the receiver/frame, half-length under barrel mounted tubular magazine, barrel mounted rear sight, hooded foresight, walnut forend and buttstock either plain or checkered with a satin or gloss finish, varying degrees of embellishment on the receiver/frame with receiver/frames either being plain and blued, or satin finished engraved game scenes and gold inlays.
Manufacturer	- manufacturer's name is not usually marked on the firearm. - "Browning Arms Company, Morgan Utah & Montreal P.Q. Made in Japan" may be marked on the barrel.
Serial Number	- the serial number is marked on the receiver/frame.
Calibre	- the calibre designation is marked on the right side of the barrel as "348 WIN."
Shots	- under-barrel mounted tubular magazine.
Remarks	- the firearm is a direct copy of the Winchester Model 71. Introduced for the nostalgia market and about 4000 were made.
