Make	- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame. - "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennesee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel. - manufactured from 1985 to 1993. - "A-Bolt" series was replaced by the "A-Bolt 2" series in 1994. - serial number on the "A-Bolt" models will have one of the following letter year codes: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993.
Manufacturer	- manufacturer's name is not usually marked on the firearm. - "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" may be marked on the barrel.
Action	- turn-bolt design.
Serial Number	- the serial number is marked on the right rear side of the receiver/frame. - the serial number consists of five numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier. - the Patent number "4723369" may be marked on the right side of the barrel. - Browning adopted a new serial number rationalization starting in 1975. - the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers. - the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier. - this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984. - the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion". - the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".
Calibre	- the calibre designation is marked on the right side of the barrel.
Shots	- hidden detachable box magazine. - the box magazine is removable when the front hinged floorplate is opened.
Other Markings	- markings may include: Browning, St Louis MO. and Montreal P.Q. Made in Japan Patent, Model and Calibre.
Remarks	- the A-Bolt was available (1985-1993) in long and short action models to accommodate non-magnum and magnum ammunition, and has now been superseded by the A-Bolt II (1994 to date). This rifle may be found plain or with different amounts of engraving, gold inlays, quality of wood, steel or stainless construction and with a graphite fiberglass stock option. The A-Bolt has a thumb safety on top of the pistol grip at the end of the tang and may be found with or without open sights.

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "A-Bolt 2" is not marked on the firearm.
- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "A-Bolt 2" is available in long and short action models to accommodate non-magnun and magnum ammunition.
- "A-Bolt 2" rifle may be found plain or with different amounts of engraving, gold inlays, quality of wood, steel or stainless construction and with a graphite fiberglass stock option.
- "A-Bolt 2" has a thumb safety on top of the pistol grip at the end of the tang and may be found with or without open sights.
- "A-Bolt 2" rifle may have a ballistic optimizing shooting system called a BOSS as an option, which adds approximately 50mm to the overall length of the barrel.
- "A-Bolt 2 Digital Green" was introduced in 2009 in both a short and long action and features a digital pattern synthetic stock.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on the barrel.

Action

- turn bolt operated.

Serial Number

- the serial number is marked on the right rear side of the receiver/frame.
- the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier.
- the Patent number "4723369" may be marked on the right side of the barrel.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion".
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".

Barrel

- this model is also available with the optional Boss system.
- an overall measurement of barrel length including the BOSS attachment would show a length 50mm longer than the actual barrel length.

Calibre

- the calibre designation is marked on the right side of the barrel.

Shots

- hidden detachable box magazine.
- the box magazine is removable when the front hinged floorplate is opened.

Canadian Law Comments

- this model is also available with the optional Boss system. An overall measurement of barrel including the BOSS attachment would show a length 50mm longer than the actual barrel length. The length of the barrel for the purpose of registration does not include the BOSS unit.

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A-Bolt 2 Carbon Stainless Stalker" is not marked on the firearm.
- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "A-Bolt 2 Carbon Fiber Stainless Stalker" was manufactured from 2000 to 2001.
- features include: no sights, hinged floor plate with detachable magazine, carbon fiber wrapped stainless steel barrel and a black graphite fiberglass stock.
- available with a left- or right-hand action.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on the barrel.

Action

- turn bolt design.

Serial Number

- the serial number is marked on the right rear side of the receiver/frame.
- the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier.
- the Patent number "4723369" may be marked on the right side of the barrel.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion".
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".

Calibre

- the calibre designation is marked on the right side of the barrel.

Shots

- hidden detachable box magazine.
- the box magazine is removeable when the front hinged floorplate is opened.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks - the Christensen Arms supplied barrel consists of a stainless steel inner liner surounded by continuous weave of carbon fibers.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A-Bolt 2 Composite Stalker" is not marked on the firearm.
- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "A-Bolt 2 Composite Stalker" was introduced in 1994.
- features include: black graphite fiberglass stock; matte blue metal finish; top tang thumb safety; detachable box magazine and is not fitted with iron sights, instead the receiver/frame is drilled and tapped for scope mounting.
- this model is available with a long, short or super short action length dependant upon the calibre for which the rifle is chambered at the time of manufacture.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on the barrel.

Action

- manual turn bolt mechanism.

Serial Number

- the serial number is marked on the right rear side of the receiver/frame.
- the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier.
- the Patent number "4723369" may be marked on the right side of the barrel.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion".
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".

Barrel

- this model also is available with the optional Boss system.

Calibre

- the calibre designation is marked on the right side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots
- hidden detachable box magazine.
- the box magazine is removeable when the front hinged floorplate is opened.

Other Markings
- marked "Browning, St Louis MO. and Montreal P.Q." and " Made in Japan" along with patent, model and calibre information.

Remarks
- the A-Bolt II Composite Stalker is similar to the pre-1994 model except for an upgraded bolt which is hexagonal, instead of tubular. As pre-1994 manufactured barrels were used on the new Model II the barrel lettering will not necessarily reflect the Series II design.

- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A-Bolt 2 Composite Stalker Boss" is not marked on the firearm.
- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "A-Bolt 2 Composite Stalker" was introduced in 1994.
- features include: black graphite fiberglass stock; matte blue finish and BOSS system; and top tang safety.
- BOSS denotes "Ballistic Optimizing Shooting System" and is designed to be adjusted to suit individual ammunition choice for increased accuracy.
- overall length is from 1080mm (42 1/2") to 1181mm (46 1/2") and average weight is from 2.99kg (6.6lbs) to 3.31kg (7.3lbs).

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on the barrel.

Action

- manual turn bolt mechanism.

Serial Number

- the serial number is marked on the right rear side of the receiver/frame.
- the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier.
- the Patent number "4723369" may be marked on the right side of the barrel.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion".
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".

Barrel

- factory advertised barrel lengths of 559mm or 584mm or 610mm or 660mm includes the length of the BOSS.
- an overall measurement of barrel length including the BOSS attachment would show a length 50mm longer than the proper barrel length.

Calibre

- the calibre designation is marked on the right side of the barrel.
- rifling characteristics in calibre 7MM WSM and 7mm REM MAG: 1 turn in 9 1/2 inches.
- rifling characteristics in calibre 270 WSM, 300 WSM, 325 WSM, 25-06 REM, 270 WIN, 30-06 SPRG, 300 WIN MAG and 338 WIN MAG: 1 turn in 10 inches.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- hidden detachable box magazine. - the box magazine is removable when the front hinged floorplate is opened.
Canadian Law Comments	- an overall measurement of barrel length including the BOSS attachment would show lengths of 559mm or 660mm. The length of the barrels for the purposes of registration does not include BOSS units.
Other Markings	- barrel markings read "Browning, St Louis MO. and Montreal P.Q.", "Made in Japan", followed by patent, model and calibre information.
Remarks	- the A-Bolt II Composite Stalker Boss is similar to the pre-1994 model except for an upgraded bolt which is hexagonal instead of tubular. As pre-1994 manufactured barrels were used on the new Model II the barrel lettering will not necessarily reflect the Series II design.

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A-Bolt 2 Custom Trophy" is not marked on the firearm.
- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "A-Bolt 2 Custom Trophy" was manufactured from 1998 to 2000.
- features include: octagon barrel with a gold highlight band at the muzzle; turn bolt action; detachable box magazine; tang mounted safety; adjustable trigger; gold highlight on the receiver/frame; checkered select American walnut Monte Carlo pistol grip stock.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on the barrel.

Action

- turn bolt operated.

Serial Number

- the serial number is marked on the right rear side of the receiver/frame.
- the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier.
- the Patent number "4723369" may be marked on the right side of the barrel.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion".
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A-Bolt 2 Eclipse Hunter Boss" is not marked on the firearm.
- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "A-Bolt 2 Eclipse Hunter with BOSS" was introduced in 1996.
- features include: round tapered barrel with BOSS; turn bolt action; top tang mounted safety; internal box magazine; laminated Monte Carlo style thumbhole stock with recoil pad and sling swivel studs; no open sights; receiver/frame is drilled and tapped for scope mounts; blued finish.
- "BOSS" stands for Ballistic Optimizing Shooting System and is a muzzle attachment approximately 50mm long.
- overall length is from 1086mm (42 3/4") to 1188mm (46 3/4") and average weight is from 3.54kg (7.8lbs) to 3.23kg (7.12lbs).

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on the barrel.

Action

- turn bolt operated.

Serial Number

- observed serial number had a "351" product code.
- the serial number is marked on the right rear side of the receiver/frame.
- the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier.
- the Patent number "4723369" may be marked on the right side of the barrel.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc.

Barrel

- factory advertised barrel lengths of 559mm or 584mm or 610mm or 660mm includes the length of the BOSS.
- an overall measurement of barrel length including the BOSS attachment would show a length 50mm longer than the proper barrel length.

Calibre

- the calibre designation is marked on the right side of the barrel.
- rifling characteristics in calibre 270 WIN and 30-06 SPRG : 1 turn in 10 inches.
- rifling characteristics in calibre 7MM REM MAG : 1 turn in 9 1/2 inches.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- hidden detachable box magazine.
- the box magazine is removable when the front hinged floorplate is opened.

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A-Bolt 2 Eclipse M-1000" is not marked on the firearm.
- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "A-Bolt 2 Eclipse M-1000" series was introduced in 2004.
- features include: heavy bull/target barrel; turn bolt action; top tang mounted safety; internal box magazine; laminated Monte Carlo style thumbhole stock with recoil pad and sling swivel studs; no open sights; receiver/frame is drilled and tapped for scope mounts; blued or stainless steel finish.
- overall length with a 660mm barrel (26") is 1162mm (45 3/4") and an average weight of 4.15kg (9.14lbs).

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on the barrel.

Action

- turn bolt operated.

Serial Number

- the serial number is marked on the right rear side of the receiver/frame.
- the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier.
- the Patent number "4723369" may be marked on the right side of the barrel.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion".
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".

Calibre

- the calibre designation is marked on the right side of the barrel.
- rifling characteristics in calibre 20-250 REM: 1 turn in 14 inches.
- rifling characteristics in calibre 308 WIN: 1 turn in 12 inches.
- rifling characteristics in calibre 270 WSM and 300 WSM: 1 turn in 10 inches.
- rifling characteristics in calibre 7MM WSM: 1 turn in 9 1/2 inches.

- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A-Bolt 2 Eclipse M-1000 Boss" is not marked on the firearm.
- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "A-Bolt 2 Eclipse M-1000 with BOSS" was introduced in 2006.
- features include: heavy bull/target barrel with BOSS; turn bolt action; top tang mounted safety; internal box magazine; laminated Monte Carlo style thumbhole stock with recoil pad and sling swivel studs; no open sights; receiver/frame is drilled and tapped for scope mounts; blued or stainless steel finish.
- "BOSS" stands for Ballistic Optimizing Shooting System and is a muzzle attachment approximately 50mm long.
- in 2006 the "A-Bolt II Eclipse M-1000 Boss" was also available in the calibres 22-250 REM, 270 WSM, 300 WIN MAG, 300 WSM and 7mm WSM.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on the barrel.

Action

- turn bolt operated.

Serial Number

- the serial number is marked on the right rear side of the receiver/frame.
- the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier.
- the Patent number "4723369" may be marked on the right side of the barrel.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion".
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".

Barrel

- factory advertised barrel lengths of 559mm or 584mm or 610mm or 660mm includes the length of the BOSS.
- an overall measurement of barrel length including the BOSS attachment would show a length 50mm longer than the proper barrel length.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- the calibre designation is marked on the right side of the barrel. - rifling characteristics in calibre 7MM WSM: 1 turn in 9 1/2 inches. - rifling characteristics in calibre 270 WSM, 300 WSM and 300 WIN MAG: 1 turn in 10 inches. - rifling characteristics in calibre 308 WIN: 1 turn in 12 inches. - rifling characteristics in calibre 22-250 REM: 1 turn in 14 inches.
Shots	- hidden detachable box magazine. - the box magazine is removeable when the front hinged floorplate is opened.
Canadian Law Comments	- an overall measurement of barrel length including the BOSS attachment would show a length of 660mm. The length of the barrel for the purpose of registration does not include BOSS units in the barrel length measurement.
Other Markings	- "Browning, St Louis MO. and Montreal P.Q.", "Made in Japan" and patent, model and calibre information will also be marked on the firearm.
Remarks	- the A-Bolt II Eclipse M-1000 has an upgraded bolt which is hexagonal, or six sided, instead of tubular. As pre-1994 manufactured barrels were used on the new Model II the barrel lettering will not always identify the new designation.

- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A-Bolt 2 Eclipse Varmint Boss" is not marked on the firearm.
- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "A-Bolt 2 Eclipse Varmint with BOSS" was manufactured from 1996 to 1999.
- features include: heavy bull/target barrel with BOSS; turn bolt action; top tang mounted safety; internal box magazine; laminated Monte Carlo style thumbhole stock with recoil pad and sling swivel studs; no iron sights; receiver/frame is drilled and tapped for scope mounts; blued finish.
- "BOSS" stands for Ballistic Optimizing Shooting System and is a muzzle attachment approximately 50mm long.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on the barrel.

Action

- turn bolt operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- observed serial number had a "351" suffix. - the serial number is marked on the right rear side of the receiver/frame. - the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier. - the Patent number "4723369" may be marked on the right side of the barrel. - Browning adopted a new serial number rationalization starting in 1975. - the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers. - the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier. - this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984. - the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion". - the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stal
Barrel	- factory advertised barrel lengths of 559mm or 584mm or 610mm or 660mm includes the length of the BOSS. - an overall measurement of barrel length including the BOSS attachment would show a length 50mm longer than the proper barrel length.
Calibre	- the calibre designation is marked on the right side of the barrel.
Shots	- hidden detachable box magazine. - the box magazine is removeable when the front hinged floorplate is opened.
Canadian Law Comments	- an over-all measurement of barrel lengths including the BOSS attachment are given in the manufacturer's catalogs as 24" / 610mm and 26" / 660mm. For the purpose of firearms registration in Canada the length of the BOSS (approximately 51mm) must be deducted from the over-all length of the barrel to find the correct length.
Other Markings	- Browning, St Louis MO. and Montreal P.Q. Made in Japan Patent, Model and Calibre.
Remarks	- the A-Bolt II Eclipse Varmint Boss has an upgraded bolt which is hexagonal, or six sided, instead of tubular. As pre-1994 manufactured barrels were used on the new Model II the barrel lettering will not always include the new 'Model II' designation.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A-Bolt 2 Euro-Bolt" is not marked on the firearm.
- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "A-Bolt 2 Euro-Bolt" was manufactured from 1994 to 1996.
- "A-Bolt 2 Euro-Bolt" is similar to the pre-1994 model except for an upgraded bolt which is hexagonal, or six sided, instead of tubular.
- "A-Bolt 2 Euro-Bolt" was available with Boss unit as an option.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on the barrel.

Serial Number

- the serial number is marked on the right rear side of the receiver/frame.
- the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier.
- the Patent number "4723369" may be marked on the right side of the barrel.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion".
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel	- this model is also available with the optional Boss system. - the Boss unit adds approximately 50mm to the overall length of the firearm. - the Boss is not included in the barrel length as required for the purposes of registration.
Calibre	- the calibre designation is marked on the right side of the barrel.
Shots	- hidden detachable box magazine. - the box magazine is removeable when the front hinged floorplate is opened.
Other Markings	- Browning, St Louis MO. and Montreal P.Q. Made in Japan Patent, Model and Calibre.

- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A-Bolt 2 Gold Medallion" is not marked on the firearm.
- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "A-Bolt 2 Gold Medallion" was manufactured from 1994 to 1998.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on the barrel.

Serial Number

- the serial number is marked on the right rear side of the receiver/frame.
- the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier.
- the Patent number "4723369" may be marked on the right side of the barrel.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion".
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".

Barrel

- this model also is available with the optional Boss system.
- the barrel lengths for those with Boss will be listed under the A-Bolt II Gold Medallion Boss FRT entry.

Calibre

- the calibre designation is marked on the right side of the barrel.

Shots

- hidden detachable box magazine.
- the box magazine is removeable when the front hinged floorplate is opened.

Other Markings

- Browning, St Louis MO. and Montreal P.Q. Made in Japan Patent, Model and Calibre.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- the A-Bolt II Gold Medallion is similar to the pre-1994 model except for an upgraded bolt which is hexagonal, or six sided, instead of tubular. As pre-1994 manufactured barrels were used on the new Series II the barrel lettering may not reflect it as a Series II.

(Calibre) ONLY" is marked on the right side of the barrel. - "A-Bolt 2" series was introduced in 1994. - "A-Bolt 2" replaced the A-Bolt. - "A-Bolt" was manufactured from 1985 to 1993. - "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system. - "A-Bolt 2 Gold Medallion with BOSS" was manufactured from 1994 to 1997.
Manufacturer	- the manufacturer's name may not appear on the firearm. - "MADE IN JAPAN / MIROKU" may be marked on the left side of the barrel.
Serial Number	- the serial number is marked on the right rear side of the receiver/frame. - the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier. - the Patent number "4723369" may be marked on the right side of the barrel. - Browning adopted a new serial number rationalization starting in 1975. - the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers. - the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier. - this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984. - the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion". - the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".
Barrel	- factory advertised barrel lengths of 559mm or 584mm or 610mm or 660mm includes the length of the BOSS. - an overall measurement of barrel length including the BOSS attachment would show a length 50mm longer than the proper barrel length.
Calibre	- the calibre designation is marked on the right side of the barrel.
Shots	- hidden detachable box magazine. - the box magazine is removeable when the front hinged floorplate is opened.
Canadian Law Comments	- an overall measurement of barrel length including the BOSS attachment would show a length 50mm longer than the proper barrel length. The length of the barrel for the purpose of registration does not include the BOSS unit in the barrel length measurement.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - Browning, St Louis MO. and Montreal P.Q. Made in Japan Patent, Model and Calibre.

Remarks - the A-Bolt II Gold Medallion is similar to the pre-1994 model except for an upgraded bolt which is hexagonal, or six sided, instead of tubular. As pre-1994 manufactured barrels were used on the new Series II the barrel lettering may not reflect it as a Series II.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A-Bolt 2 Hunter" is not marked on the firearm.
- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
-"A-Bolt 2 Hunter" has been manufactured in three action lengths: Long, Short, and Super Short (introduced in 2003).
- "A-Bolt 2 Hunter" was introduced in 1999.
- features include: left or right hand bolt action; top tang thumb safety; detachable box magazine; no iron sights; receiver/frame is drilled and tapped for scope mounting; checkered walnut or composite stock with recoil pad and sling swivel studs.
- overall length is from 1048mm (41 1/4") to 1086mm (42 3/4") and average weight is from 2.90kg (6.4lbs) to 3.13kg (6.9lbs).

Manufacturer

- the manufacturer's name may not appear on the firearm.
- "MADE IN JAPAN / MIROKU" may be marked on the left side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- turn bolt operated.
Serial Number	- observed serial number had a product/model code of "717". - the serial number is marked on the right rear side of the receiver/frame. - the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier. - the Patent number "4723369" may be marked on the right side of the barrel. - Browning adopted a new serial number rationalization starting in 1975. - the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers. - the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier. - this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984. - the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion". - the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".
Barrel	- this model is not fitted with a BOSS unit.
Calibre	- the calibre designation is marked on the right side of the barrel. - rifling characteristics in calibre 7MM WSM: 1 turn in 9 1/2 inches. - rifling characteristics in calibre 270 WSM, 300 WSM and 325 WSM: 1 turn in 10 inches. - rifling characteristics in calibre 223 REM: 1 turn in 12 inches.
Shots	- hidden detachable box magazine. - the box magazine is removeable when the front hinged floorplate is opened.
Remarks	- the A-Bolt II Hunter (Long, Short, or Super Short Action) is similar to the pre-1994 model except for an upgraded bolt which is hexagonal, or six sided, instead of tubular. - as pre-1994 manufactured barrels (old stock) were used-up on new production A-Bolt II Hunter Models, the barrel marking designation may reflect old production model designations and not the new Series II designation.

- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A-Bolt 2 Hunter Boss" is not marked on the firearm.
- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "A-Bolt 2 Hunter with BOSS" was manufactured from 1994 to 1999.
- features include: matte blue finish; top tang thumb safety and pistol grip stock and Boss. Boss stands for "Ballistic Optimizing Shooting System" and is a muzzle attachment approximately 50mm long.

Manufacturer

- the manufacturer's name may not appear on the firearm.
- "MADE IN JAPAN / MIROKU" may be marked on the left side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number is marked on the right rear side of the receiver/frame. - the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier. - the Patent number "4723369" may be marked on the right side of the barrel. - Browning adopted a new serial number rationalization starting in 1975. - the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers. - the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier. - this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984. - the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion". - the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".
Barrel	- factory advertised barrel lengths of 559mm or 584mm or 610mm or 660mm includes the length of the BOSS. - an overall measurement of barrel length including the BOSS attachment would show a length 50mm longer than the proper barrel length.
Calibre	- the calibre designation is marked on the right side of the barrel.
Shots	- hidden detachable box magazine. - the box magazine is removable when the front hinged floorplate is opened.
Canadian Law Comments	- an overall measurement of barrel including the BOSS attachment would show a length 50mm longer than the actual barrel length. The length of the barrel for the purpose of registration does not include the BOSS.
Other Markings	- Browning, St Louis MO. and Montreal P.Q. Made in Japan Patent, Model and Calibre.
Remarks	- the A-Bolt II Hunter Boss (Long or Short Action) is similar to the pre-1994 model except for an upgraded bolt which is hexagonal, or six sided, instead of tubular. As pre-1994 manufactured barrels were used on the new Model II the barrel lettering may not reflect the Series II designation.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured in 2007 and 2008.
- model designation is not marked on the firearm.
- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "Rocky Mountain Elk Foundation" logo is inset with a medallion into the pistol grip cap of the stock.
- "RMEF" in the model designation denotes "Rocky Mountain Elk Foundation".
- features include: blued steel receiver/frame and barrel; inlaid gold markings and engravings on the receiver/frame and barrel; gloss finished select walnut stock with rosewood forend cap and pistol grip cap with white spacers; continental style cheek piece; top tang mounted safety; gold trigger; receiver/frame drilled and tapped for scope mounting.

Manufacturer

- the manufacturer's name may not appear on the firearm.
- "MADE IN JAPAN / MIROKU" may be marked on the left side of the barrel.

Action

- turn-bolt design.

Serial Number

- the serial number is marked on the right rear side of the receiver/frame.
- the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier.
- the Patent number "4723369" may be marked on the right side of the barrel.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion".
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".

Calibre

- the calibre designation is marked on the side of the barrel.

Shots

- hidden detachable box magazine.
- the box magazine is removeable when the front hinged floorplate is opened.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A-Bolt 2 Medallion" is not marked on the firearm.
- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "MEDALLION" is usually marked on the receiver/frame.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "A-Bolt 2 Medallion" was introduced in 1994.
- features include: blued finish; pistol grip; fore-end cap; synthetic floor plate and available in a left hand version.
- "A-Bolt 2 Medallion" is the same as the pre-1994 model except for an upgraded bolt which is hexagonal instead of tubular.
- overall length with a 559 mm barrel (22") is 1048 mm (41 1/4"), and the average weight is 2.90 kgs (6.4 lbs).
- rifling characteristics in calibre 223 REM: 1 turn in 12 inches.

Manufacturer

- the manufacturer's name may not appear on the firearm.
- "MADE IN JAPAN / MIROKU" may be marked on the left side of the barrel.

Action

- turn bolt operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number is marked on the right rear side of the receiver/frame.
- the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier.
- the Patent number "4723369" may be marked on the right side of the barrel.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion".
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt 2 Composite Stalker".

Barrel

- this model is not fitted with a BOSS unit.

Calibre

- the calibre designation is marked on the right side of the barrel.

Shots

- hidden detachable box magazine.
- the box magazine is removeable when the front hinged floorplate is opened.

Other Markings

- barrel markings will usually consist of "Browning, St Louis MO. and Montreal P.Q.", "Made in Japan", patent numbers, model designation and calibre designation.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." may be marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A-Bolt 2 Medallion A-Bolt 25th Anniversary Commemorative" is not marked on the firearm.
- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "25th" over "Anniversary" in a banner over "A-Bolt" was observed marked on the floor plate.
- "A-Bolt 2 Medallion A-Bolt 25th Anniversary Commemorative" was introduced in 2010.
- this model commemorates twenty five years of the model A-Bolt.
- features include: free floating matte high gloss blued finish tapered octogon barrel; engraved receiver/frame; turn bolt action with 60 degree bolt lift; detachable box magazine; adjustable trigger; top tang safety and bolt unlock button; checkered gloss finish stock with sling swivel studs and recoil pad; no iron sights; receiver/frame is drilled and taped for scope mounts.
- average weight is 3.13kg (6.9lbs).

Manufacturer

- manufacturer's name may not be marked on the firearm.
- "MADE IN JAPAN" may be marked on the firearm.

Action

- turn-bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number - serial number may be marked on the right rear side of the receiver/frame.

Shots - detachable box magazine.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A-Bolt 2 Medallion Boss" is not marked on the firearm.
- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "MEDALLION" is usually marked on the side of the receiver/frame.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "A-Bolt 2 Medallion with Boss" was introduced in 1994.
- features include blued finish, pistol grip, fore-end cap, synthetic floor plate and BOSS system; available in a left-handed configuration
- BOSS stands for Ballistic Optimizing Shooting System and is a muzzle attachment approximately 50mm long.
- available in left or right hand action.
- overall length is from 1080 mm (42 1/2") to 1181 mm (46 1/2"), and average weight is from 3.13 kgs (6.9 lbs) to 3.2 kgs (7.1 lbs).

Manufacturer

- the manufacturer's name may not appear on the firearm.
- "MADE IN JAPAN / MIROKU" may be marked on the left side of the barrel.

Action

- manual turn bolt mechanism.

Serial Number

- the serial number is marked on the right rear side of the receiver/frame.
- the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier.
- the Patent number "4723369" may be marked on the right side of the barrel.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion".
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".

Barrel

- factory advertised barrel lengths of 559mm or 584mm or 610mm or 660mm includes the length of the BOSS.
- an overall measurement of barrel length including the BOSS attachment would show a length 50mm longer than the proper barrel length.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- the calibre designation is marked on the right side of the barrel. - rifling characteristics in calibre 7MM WSM and 7MM REM MAG: 1 turn in 9 1/2 inches. - rifling characteristics in calibre 270 WSM, 270 WIN, 300 WSM 325 WSM, 30-06 SPRG, 300 WIN MAG and 338 WIN MAG: 1 turn in 10 inches. - rifling characteristics in calibre 375 H&H MAG: 1 turn in 12 inches.
Shots	- hidden detachable box magazine. - the box magazine is removable when the front hinged floorplate is opened.
Canadian Law Comments	- factory advertised barrel length of 559MM or 660MM includes the length of the BOSS. An overall measurement of barrel length including the BOSS attachment would show a length 50mm longer than the proper barrel length. The length of the barrel for the purpose of registration does not include the BOSS unit in the barrel length measurement.
Other Markings	- Browning, St Louis MO. and Montreal P.Q. Made in Japan Patent, Model and Calibre.
Remarks	- the A-Bolt II Medallion Boss is the same as the pre-1994 model except for an upgraded bolt which is hexagonal, or six sided, instead of tubular. As pre-1994 manufactured barrels were used on the new Model II the barrel lettering may not reflect this change.

- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion".
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".

Calibre

- the calibre designation is marked on the right side of the barrel.
- rifling characteristics in calibre 7MM-08 REM and 7MM WSM: 1 turn in 9 1/2 inches.
- rifling characteristics in calibre 243 WIN, 270 WSM, 300 WSM, 325 WSM: 1 turn in 10 inches.
- rifling characteristics in calibre 308 WIN: 1 turn in 12 inches.
- rifling characteristics in calibre 22-250 REM: 1 turn in 14 inches.
- rifling characteristics in caliber 22 HORNET: 1 turn in 16 inches.

Shots

- hidden detachable box magazine.
- the box magazine is removeable when the front hinged floorplate is opened.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame. - "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennesee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- "A-Bolt 2 Micro Medallion" is not marked on the firearm. - "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel. - "A-Bolt 2" series was introduced in 1994. - "A-Bolt 2" replaced the A-Bolt. - "A-Bolt" was manufactured from 1985 to 1993. - "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system. - "A-Bolt 2 Micro Medallion" was manufactured from 1994 to 1998. - "A-Bolt 2 Micro Medallion" is a smaller version of the A-Bolt 2 Medallion with all dimensions being reduced including the barrel length.
Manufacturer	- the manufacturer's name may not appear on the firearm. - "MADE IN JAPAN / MIROKU" may be marked on the left side of the barrel.
Action	- turn-bolt design.
Serial Number	- the serial number is marked on the right rear side of the receiver/frame. - the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier. - the Patent number "4723369" may be marked on the right side of the barrel. - Browning adopted a new serial number rationalization starting in 1975. - the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers. - the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier. - this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984. - the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion". - the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".
Calibre	- the calibre designation is marked on the right side of the barrel.
Shots	- hidden detachable box magazine. - the box magazine is removeable when the front hinged floorplate is opened.
Other Markings	- Browning, St Louis MO. and Montreal P.Q. Made in Japan Patent, Model and Calibre.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- the A-Bolt II Micro Medallion is the same as the pre-1994 model except for an upgraded bolt which is hexagonal, or six sided, instead of tubular. This model is chambered in short action calibres only and has a shorter barrel and smaller overall dimensions. As some pre-1994 manufactured barrels were used on the new Model II guns, the barrel lettering may not reflect the model change.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A-Bolt 2 Octagon" is not marked on the firearm.
- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "A-Bolt 2 Octagon" was introduced in 2007.
- features include: high polish blued octagon barrel; turn bolt action with 60 degree bolt lift; detachable box magazine; top tang mounted safety; grade II or III walnut pistol grip stock with sling swivel studs and recoil pad; rosewood fore-end and pistol grip cap; no iron sights; receiver/frame is drilled and taped for scope mounts.

Manufacturer

- the manufacturer's name may not appear on the firearm.
- "MADE IN JAPAN / MIROKU" may be marked on the left side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- turn-bolt design.
Serial Number	- the serial number is usually marked on the right rear side of the receiver/frame. - the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier. - the Patent number "4723369" may be marked on the right side of the barrel. - Browning adopted a new serial number rationalization starting in 1975. - the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers. - the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier. - this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984. - the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion". - the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".
Calibre	- the calibre designation is marked on the right side of the barrel. - rifling characteristics: 1 turn in 10 inches.
Shots	- hidden detachable box magazine. - the box magazine is removeable when the front hinged floorplate is opened.

- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- manufactured from 1995 to 1998. - reintroduced in 2011. - "A - BOLT SHOTGUN" is usually marked on the barrel. - "A-Bolt 2 Shotgun Stalker" is available with standard barrel with an interchangeable choke tube system, or a fully rifled barrel. - features include: no sights or fiber-optic front sight and an adjustable rear sight; round barrel; steel receiver/frame with a top tang mounted safety; receiver/frame is drilled an tapped for scope mounts; one piece checkered synthetic semi-pistol grip stock with recoil pad and sling swivel studs; matte blue metal finish.
Manufacturer	- manufacturer's name is not usually marked on the firearm. - "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.
Type	- resembles a traditional rifle with a rifled bore but is chambered in a shotgun calibre.
Action	- turn-bolt design.
Serial Number	- serial number is marked on the rear right side of the receiver/frame. - serial number observed consisted of five numbers, a two letter "NT" year code, and a "L52" product code.
Barrel	- the type of barrel determine the length. - rifled barrel; 559mm - standard invector; 584mm
Shots	- detachable box magazine is mounted on a front hinged floor plate.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A-Bolt 2 Stainless" is not marked on the firearm.
- "A BOLT" and/or "STAINLESS STEEL PAT. 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "A-Bolt 2 Stainless Camo" was introduced in 2006.
- features include: no iron sights; round, tapered stainless steel barrel with a rifled bore; stainless steel receiver/frame is drilled and tapped for scope mounts; safety lever mounted on upper rear tang; single action trigger mechanism; one piece, camouflage synthetic, pistol grip stock.
- available in a super short, short or long action to permit the use of various calibres.
- overall length with a 559 mm (22") barrel is 1038 mm (40 7/8"), and average weight is 2.84 kgs (6 lbs 4oz).
- "A-Bolt 2 Stainless" is similar to the "A-Bolt 2 Stainless Stalker" model which features a black synthetic stock.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "MADE IN JAPAN" is usually marked on the left side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- turn-bolt design.
Serial Number	- serial number is marked on the right rear side of the receiver/frame. - serial number consists of five numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier. - "PAT 4723369" may be marked on the right side of the barrel. - "4723369" is not a serial number, this is a Patent Number. - Browning adopted a new serial number rationalization starting in 1975. - serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers. - serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier. - this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984. - the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion". - the A- Bolt 2 series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".
Calibre	- calibre designation is usually marked on the right side of the barrel.
Shots	- front hinged floorplate with a detachable box magazine.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A-Bolt 2 Stainless Stalker" is not marked on the firearm.
- "A BOLT" and/or "STAINLESS STEEL PAT. 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "A-Bolt 2 Stainless Stalker" was introduced in 1994.
- features include: no iron sights; round, tapered stainless steel barrel with a rifled bore; stainless steel receiver/frame is drilled and tapped for scope mounts; safety lever mounted on upper rear tang; single action trigger mechanism; one piece, black synthetic, pistol grip stock; sling swivel studs; matte metal finish.
- available in a super short, short or long action to permit the use of various calibres.
- available in left and right hand action.
- overall length with a 559 mm barrel (22") is 1080 mm (42 1/2"), and the average weight is 2.78 kgs (6.11 lbs).
- rifling characteristics in caliber 270 WIN: 1 turn in 10 inches.

Manufacturer

- the manufacturer's name may not appear on the firearm.
- "MADE IN JAPAN / MIROKU" may be marked on the left side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- turn-bolt design.
Serial Number	- serial number is marked on the right rear side of the receiver/frame. - serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier. - "PAT. 4723369" may be marked on the right side of the barrel. - "4723369" is not a serial number, this is a Patent Number. - Browning adopted a new serial number rationalization starting in 1975. - the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers. - the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier. - this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984. - the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion". - the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".
Barrel	- this model also is available with the optional Boss system.
Calibre	- the calibre designation is marked on the right side of the barrel.
Shots	- hidden detachable box magazine. - the box magazine is removeable when the front hinged floorplate is opened.
Other Markings	- Browning, St Louis MO. and Montreal P.Q. Made in Japan Patent, Model and Calibre.
Remarks	- the A-Bolt II Stainless Stalker is similar to the pre-1994 model except for an upgraded bolt which is hexagonal, or six sided, instead of tubular. As pre-1994 manufactured barrels were used on the new Model II the barrel lettering may not reflect this change.

- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "A-Bolt 2 Stainless Stalker with Boss" was introduced in 1994.
- features include: composite stock; stainless steel action and barrel with BOSS; BOSS stands for Ballistic Optimizing Shooting System and is a muzzle attachment approximately 50mm long.
- available in left or right hand action.
- overall length with a 559 mm barrel (22") is 1080 mm (42 1/2"), and the average weight is 2.78 kgs (6.11 lbs).
- rifling characteristics in caliber 270 WIN: 1 turn in 10 inches.

Manufacturer

- the manufacturer's name may not appear on the firearm.
- "MADE IN JAPAN / MIROKU" may be marked on the left side of the barrel.

Action

- turn-bolt design.

Serial Number

- the serial number is marked on the right rear side of the receiver/frame.
- the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier.
- the Patent number "4723369" may be marked on the right side of the barrel.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion".
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".

Barrel

- factory advertised barrel lengths of 559mm or 584mm or 610mm or 660mm includes the length of the BOSS.
- an overall measurement of barrel length including the BOSS attachment would show a length 50mm longer than the proper barrel length.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- the calibre designation is marked on the right side of the barrel.
Shots	- hidden detachable box magazine. - the box magazine is removable when the front hinged floorplate is opened.
Canadian Law Comments	- factory barrel length of 559mm or 660mm includes the length of the BOSS. An overall measurement of barrel length including the BOSS attachment would show a length 50mm longer than the proper barrel length. The length of the barrel for the purpose of registration does not include the BOSS unit in the barrel length measurement.
Other Markings	- Browning, St Louis MO. and Montreal P.Q. Made in Japan Patent, Model and Calibre.
Remarks	- the A-Bolt II Stainless Stalker Boss is similar to the pre-1994 model except for an upgraded bolt which is hexagonal, or six sided, instead of tubular. As pre-1994 manufactured barrels were used on the new Model II the barrel lettering may not reflect this change.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "A-Bolt 2 Stainless Varmint Laminated" is not marked on the firearm.
- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "A-Bolt 2 Stainless Varmint Laminated" was introduced as a "Shot Show Special" in 2004.
- features include: round medium stainless varmint barrel; turn bolt action; detachable box magazine; top tang mounted safety; grey laminated pistol grip stock with sling swivel studs and recoil pad; receiver/frame is drilled and taped for scope mounts.

Manufacturer

- the manufacturer's name may not appear on the firearm.
- "MADE IN JAPAN / MIROKU" may be marked on the left side of the barrel.

Action

- turn bolt operated.

Serial Number

- the serial number is marked on the right rear side of the receiver/frame.
- the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier.
- the Patent number "4723369" may be marked on the right side of the barrel.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion".
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".

Model

- "A-Bolt 2 Varmint" is not marked on the firearm.
- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "A-Bolt 2 Varmint" was introduced in 2007.
- features include: free floating round medium varmint weight barrel; turn bolt action with 60 degree bolt lift; detachable box magazine; top tang mounted safety; composite pistol grip stock with sling swivel studs and recoil pad; no iron sights; receiver/frame is drilled and taped for scope mounts; matte blue finish.

Manufacturer

- the manufacturer's name may not appear on the firearm.
- "MADE IN JAPAN / MIROKU" may be marked on the left side of the barrel.

Action

- turn-bolt design.

Serial Number

- the serial number is usually marked on the right rear side of the receiver/frame.
- the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier.
- the Patent number "4723369" may be marked on the right side of the barrel.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion".
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".

Calibre

- the calibre designation is marked on the right side of the barrel.

Shots

- hidden detachable box magazine.
- the box magazine is removable when the front hinged floorplate is opened.

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A-Bolt 2 Varmint Boss" is not marked on the firearm.
- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "A-Bolt 2 Varmint with BOSS" was manufactured from 1994 to 2000.
- features include: standard A-Bolt II action with heavy barrel eqipped with a BOSS unit, laminated stock with beavertail forend and traditional pistol grip, and tang mounted safety.

Manufacturer

- the manufacturer's name may not appear on the firearm.
- "MADE IN JAPAN / MIROKU" may be marked on the left side of the barrel.

Action

- turn-bolt design.

Serial Number

- the serial number is marked on the right rear side of the receiver/frame.
- the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier.
- the Patent number "4723369" may be marked on the right side of the barrel.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion".
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".

Barrel

- the factory barrel length of 559mm or 584mm or 610mm or 660mm includes the length of the BOSS.
- an overall measurement of the barrel length including the BOSS attachment would show a length 50mm longer than the proper barrel length.

Calibre

- the calibre designation is marked on the right side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- hidden detachable box magazine. - the box magazine is removeable when the front hinged floorplate is opened.
Canadian Law Comments	- factory barrel length of 559mm or 660mm includes the length of the BOSS. An overall measurement of barrel length including the BOSS attachment would show a length 50mm longer than the proper barrel length. The length of the barrel for the purpose of registration does not include the BOSS unit in the barrel length measurement.
Remarks	- if the sample being inspected has a factory stock of the thumbhole type this would be an A-Bolt II Eclipse Varnint or A-Bolt II Eclipse Varmint BOSS.

- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A-Bolt 2 Varmint Stalker" is not marked on the firearm.
- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "A-Bolt 2 Varmint Stalker" was introduced in 2002.
- features include: round medium heavy varmint barrel; turn bolt action; detachable box magazine; top tang mounted safety; black synthetic pistol grip stock with sling swivel studs and recoil pad; no sights; receiver/frame is drilled and taped for scope mounts.

Manufacturer

- the manufacturer's name may not appear on the firearm.
- "MADE IN JAPAN / MIROKU" may be marked on the left side of the barrel.

Action

- turn-bolt design.

Serial Number

- the serial number is marked on the right rear side of the receiver/frame.
- the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier.
- the Patent number "4723369" may be marked on the right side of the barrel.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion".
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".

Calibre

- the calibre designation is marked on the right side of the barrel.

Shots

- hidden detachable box magazine.
- the box magazine is removeable when the front hinged floorplate is opened.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured from 2003 to 2008.
- model designation is not marked on the firearm.
- "A BOLT" and/or "PAT. 4723369 A-BOLT CAL. (Calibre) ONLY" may be marked on the right side of the barrel.
- "Rocky Mountain Elk Foundation" logo is inset with a medallion into the pistol grip cap of the stock.
- "A-Bolt II" series was introduced in 1994.
- "RMEF" in the model designation denotes "Rocky Mountain Elk Foundation".
- features include: stainless steel receiver/frame and barrel; inlaid gold markings and engravings on the receiver/frame and barrel; gloss finished select walnut stock with rosewood forend cap and pistol grip cap with white spacers; continental style cheekpeice; top tang mounted safety; gold trigger; receiver/frame drilled and tapped for scope mounting.

Manufacturer

- the manufacturer's name may not appear on the firearm.
- "MADE IN JAPAN / MIROKU" may be marked on the left side of the barrel.

Action

- manual turn bolt mechanism.

Serial Number

- the serial number is marked on the right rear side of the receiver/frame.
- the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier.
- the Patent number "4723369" may be marked on the right side of the barrel.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion".
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".

Calibre

- the calibre designation is marked on the right side of the barrel.

Shots

- hidden detachable box magazine.
- the box magazine is removeable when the front hinged floorplate is opened.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "A-Bolt 2 White Gold RMEF" is not marked on the firearm.
- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "A-Bolt 2" series was introduced in 1994.
- "A-Bolt 2" replaced the A-Bolt.
- "A-Bolt" was manufactured from 1985 to 1993.
- "A-Bolt 2" has a new anti-bind bolt with a non-rotating bolt sleeve and an improved trigger system.
- "Rocky Mountain Elk Foundation" logo is inset with a medallion into the pistol grip cap of the stock.
- "A-Bolt 2 White Gold RMEF" edition was introduced in 2007.
- "RMEF" in the model designation denotes "Rocky Mountain Elk Foundation".
- features include: stainless steel receiver/frame and barrel; inlaid gold markings and engravings on the receiver/frame and barrel; gloss finished select walnut stock with rosewood forend cap and pistol grip cap with white spacers; continental style cheek piece; top tang mounted safety; gold trigger; receiver/frame drilled and tapped for scope mounting.

Manufacturer

- the manufacturer's name may not appear on the firearm.
- "MADE IN JAPAN / MIROKU" may be marked on the left side of the barrel.

Action

- manual turn bolt mechanism.

Serial Number

- the serial number is marked on the right rear side of the receiver/frame.
- the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier.
- the Patent number "4723369" may be marked on the right side of the barrel.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion".
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".

Calibre

- the calibre designation is marked on the side of the barrel.

Shots

- hidden detachable box magazine.
- the box magazine is removable when the front hinged floorplate is opened.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- model designation is not marked on the firearm.
- "A-BOLT" is marked on the barrel.
- "A-Bolt 3" series was introduced in 2013.
- "A-Bolt 3" is a new bolt design of the A-Bolt.
- "A-Bolt 3" has a top tang safety with locking trigger and features a bolt "unlock" button similar to the X-Bolt series.
- "A-Bolt 3" has a three level trigger system.
- "A-Bolt 3" is available in long and short action models to accommodate non-magnun and magnum ammunition.
- features include: no iron sights; round free floating barrel with target crown; triangular shaped steel receiver/frame is drilled and tapped for scope mounts; top tang mounted safety; bolt release button is mounted on the rear right side of the receiver/frame; detachable box magazine release is mounted on the front of the magazine well; checkered walnut semi-pistol grip stock with right-hand palm swell; sling swivel studs; matte blued finish.
- overall length is from 1086 mm (49 3/4") to 1188 mm (46 3/4") and the average weight is fron 2.78 kg (6.13 lbs) to 3.31 kg (7.3 lbs).

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on the barrel.

Action

- turn bolt design.

Serial Number

- the serial number is marked on the right rear side of the receiver/frame.
- the serial number may consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three number code for the model identifier.
- The serial number observed consisted of five numbers, two letter "ZX" year code, and a three letter "SAR" product code.

Shots

- detachable box magazine.

- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model designation is not marked on the firearm. - "A BOLT" is marked on the right side of the barrel. - "GOLD MEDALLIOM" is marked on the left side of the receiver/frame. - manufactured from 1988 to 1993. - the serial number on the A-Bolt Gold Medallion Rimfire model will have one of the following letter year codes: PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, or NX - 1993.
Manufacturer	- the manufacturer's name is not marked on the firearm. - "MADE IN JAPAN" is marked on the left side of the barrel.
Action	- turn bolt operated.
Serial Number	- the serial number is marked on the right rear side of the receiver/frame. - the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier. - the Patent number "4723369" may be marked on the right side of the barrel. - Browning adopted a new serial number rationalization starting in 1975. - the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers. - the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier. - this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984. - the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion". - the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".
Calibre	- the calibre designation is marked on the right side of the barrel.
Shots	- detachable box magazine.
Other Markings	- Browning, St Louis MO. and Montreal P.Q. Made in Japan Caliber .22 Long Rifle Browning Patent (these words stated on barrel)
Remarks	- Slim rifle though it retains adult proportions. The Gold Medallion model has better grade wood with rosewood grip cap, tip and fine checkering. Moderate engraving, gold filled and high gloss finish on the stock.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- manufactured from 1985 to 1993.
- the "A-Bolt Hunter" model was replaced by the "A-Bolt II Hunter" model in 1994.
- the serial number on the A-Bolt Hunter model will have one of the following two letter year codes: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, or NX - 1993.

Manufacturer

- the manufacturer's name is not marked on the firearm.
- "MADE IN JAPAN" is marked on the left side of the barrel.

Serial Number

- the serial number is marked on the right rear side of the receiver/frame.
- the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier.
- the Patent number "4723369" may be marked on the right side of the barrel.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion".
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- the calibre designation is marked on the right side of the barrel.
Shots	- hidden detachable box magazine. - the box magazine is removeable when the front hinged floorplate is opened.
Other Markings	- Browning, St Louis MO. and Montreal P.Q., Made in Japan, Patent, Model and Calibre marked on barrel.
Remarks	- the A-Bolt Hunter (Long or Short Action) is a bolt action rifle offered with checkered walnut stock and three barrel lengths.

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- "MEDALLION" is marked on the left side of the receiver/frame.
- manufactured from 1988 to 1993.
- the "A-Bolt Micro Medallion" model was replaced by the "A-Bolt II Micro Medallion" model in 1994.
- the serial number on the A-Bolt Micro Medallion model will have one of the following two letter year codes: PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, or NX - 1993.

Manufacturer

- the manufacturer's name is not marked on the firearm.
- "MADE IN JAPAN" is marked on the left side of the barrel.

Action

- turn bolt action.

Serial Number

- the serial number is marked on the right rear side of the receiver/frame.
- the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier.
- the Patent number "4723369" may be marked on the right side of the barrel.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion".
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".

Calibre

- the calibre designation is marked on the right side of the barrel.

Shots

- hidden detachable box magazine.
- the box magazine is removeable when the front hinged floorplate is opened.

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A BOLT" and/or "PAT 4723369 A-BOLT CAL. (Calibre) ONLY" is marked on the right side of the barrel.
- manufactured from 1987 to 1993.
- the "A-Bolt Stainless Stalker" model was replaced by the "A-Bolt II Stainless Stalker" model in 1994.
- the Stainless Stalker has a black graphite composite stock and stainless steel barrel and action.
- the serial number on the A-Bolt Stainless Stalker model will have one of the following two letter year codes: PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, or NX - 1993.

Manufacturer

- the manufacturer's name is not marked on the firearm.
- "MADE IN JAPAN" is marked on the left side of the barrel.

Action

- turn bolt action.

Serial Number

- the serial number is marked on the right rear side of the receiver/frame.
- the serial number consists of five sequential numbers, followed by a two letter code for the year of manufacturer, and followed by a three character code for the model identifier.
- the Patent number "4723369" may be marked on the right side of the barrel.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial numbers on Belgium manufactured firearms may consist of a three character code for the model identifier followed by a two letter code for the year of manufacture followed by five sequential numbers.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacturer followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress on to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, and PW - 1984.
- the A- Bolt series' code for the year of manufacture consist of two letters, examples of code: PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, and an example of a serial number "12314PR217" for an "A-Bolt Medallion".
- the A- Bolt II series' code for the year of manufacture consist of two letters, examples of the code: NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, etc., and an example of a serial number "29305NR8C7" for an "A-Bolt II Composite Stalker".

Calibre

- the calibre designation is marked on the right side of the barrel.

Shots

- hidden detachable box magazine.
- the box magazine is removeable when the front hinged floorplate is opened.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- "BROWNING" is usually marked on the left side of the receiver/frame.
- "Browning's" Buck Mark deer head trade mark logo is usually marked on the trigger guard.
- "BROWNING ARMS COMPANY MORGAN, UTAH" over "Assembled in Portugal by Browning Viana" is usually marked on the left side of the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "A5" is usually marked on the right side of the receiver/frame and barrel.
- features include: round barrel with ventilated top rib, fiber optic front sight or brass bead front sight and ivory mid-bead sight, and interchangeable Invector choke tube; solid top aluminum alloy receiver/frame with right side ejection, bottom loading and humpback; gold plated trigger; cross bolt safety; checkered black or camouflage synthetic or walnut forearm and semi-pistol grip buttstock with an Inflex II technology recoil pad; kinematic drive system; blued or camouflage finish
- overall length with a 660 mm (26.0") barrel is from 1210 mm (47 5/8") to 1311 mm (51 5/8") and the average weight is from 3.11 kg (7.3 lbs) to 3.49 kgs (7.7 lbs).
- available with a 3 1/2" chamber, a bird scene engraved receiver/frame, and a Grade III Walnut gloss finish stock in 2013.
- available with an engraved and nickel plated receiver/frame showing ducks in flight in 2013.

Manufacturer

- "Designed at FN Herstal Belgium" is usually marked on the right of the barrel.

Action

- short recoil operated.
- kinematic drive system.

Serial Number

- serial number is usually marked on the right side of the receiver/frame.
- serial number observed consisted of a three number "116" product code, two letter year code and five numbers.

Shots

- tubular magazine is mounted under the barrel inside the forearm.
- mag capacity 3 shots (3 1/2" shells) & 4 shots (2 3/4" & 3" shells)

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- this is an electrically cocked spring powered air rifle, powered by a rechargeable Ni-Cad battery.
- features include: stained beech stock with black rubber butt-pad; black plastic forearm lower; hooded front sight and adjustable rear sight; receiver/frame grooved for scope mounts; cold hammered fixed barrel with single pellet loading shutter; power switch and status light located on the bottom of the pistol grip.
- overall length with a 470mm (18.5") barrel is 1155mm (45.5").

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- Rutten Airguns is a manufacturer based in Herstal, Belgium, that specializes in producing spring-powered airguns.
Action	- electrically cocked spring piston air rifle. - discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.
Calibre	- 10 groove barrel with a right hand twist.
Shots	- fixed barrel single pellet loading shuttle.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- "BROWNING" is marked on the firearm.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- model designation was not marked on Auto-5s manufactured before 1969.
- "BROWNING AUTO-5" was marked on the barrel from 1969 to 1976.
- manufactured between 1903 and 1940 by FN.
- manufactured between 1940 and 1952 by Remington.
- manufactured between 1946 and 1976 by FN.
- manufactured between 1976 and 1999 by Miroku.
- features include: round tapered take-down barrel; various fixed and removeable chokes; plain barrel, ventilated rib or raised matted rib; metal bead front sight, also available with centre bead; solid top receiver/frame with right side ejection port and bottom loading port; action release button located on the right side of the receiver/frame; safety located in front of the trigger guard (pre 1951) or cross bolt safety on the rear of the trigger guard (1951-1976); with or without magazine cut-off lever; magazine cut-off lever is located on the left side of the receiver/frame; blued barrel and receiver/frame; plain or engraved receiver/frame; engraving was not available until circa 1910; checkered or smooth forearm and straight or pistol grip stock; available with sling loops.
- the Auto-5 came in various grades from Grade I to Grade IV. The guns differ only in engraving and wood quality from Standard model Auto-5's.
- the Browning Automatic (Auto-5) shotgun was offered in four variations circa 1903/1905, No. 0 Messenger Gun, No.1 Regular Gun, No. 2 Trap Gun, and the Two Shot Gun. For further info see: Other Notes / Remarks.

Manufacturer

- the manufacturer's name is usually not marked on Auto-5 shotguns manufactured between 1927 and 1975.
- "Made in Belgium" is usually marked on the barrel.
- "Fabrique Nationale d'Armes de Guerre Herstal Belgique" or "Fabrique Nationale sa d'Armes de Guerre Herstal Belgique" over "Browning's Patent Depose" was marked on the receiver/frame between 1903 and 1926.

Action

- recoil operated.

Serial Number

- serial number is marked on the side or underside of the receiver/frame.
- 1) serial number rationalization for Belgium (FN) manufactured Auto-5s is as follows:
- a) Auto-5s in 12 GA manufactured from 1903 to 1957, serial number from 1 to 463,700.
- b) Auto-5s in 16 GA manufactured from 1903 to 1947, serial number from 1 to 130,616, and from 1947 to 1953, serial number range from X1 to X99,999.
- c) Standard Twelve manufactured from 1947 to 1956, s/n range from H1 to H100,000, and from 1956 to 1958, s/n range from M1 to M99,999.
- d) Light Twelve manufactured from 1953 to 1956, s/n range from L1 to L99,877, and from 1956 to 1958, s/n range from G1 to G99,663.
- e) Standard Sixteen manufactured from 1953 to 1957/58, s/n range from R1 to R99,999, and T1 to T10,900.
- f) Sweet Sixteen manufactured from 1953 to 1957/58, s/n range from S1 to S99,908, and A1 to A10,900.
- g) Auto-5s manufactured from 1958 to 1976, the serial number consisted of a year code consisting of a single or double number and a letter code followed by a five digit number. Letter code: M = Standard Twelve, G = Light Twelve, V = Magnum Twelve, R = Standard Sixteen, S = Sweet Sixteen, Z = Light Twenty; and X = Magnum Twenty. Examples: 8M = 1958 / Standard Twelve, 69M = 1969 / Standard Twelve, and "0M89115" = 1960 / Standard Twelve.
- 2) serial number rationalization for Remington manufactured Auto-5s is as follows: s/n range for 12 GA (B5,000 to G43,129), s/n range for 16 GA (A5,000 to A19,450), and s/n range for 20 GA (C5,000 to C16,152).
- 3) serial number rationalization for Miroku manufactured Auto-5s is as follows: serial number consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a 2 letter code for the year and a three character code (usually three digits) which is the product code, eg. 00348NN161 = Auto-5 Magnum Twelve manufactured in 1999.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- calibre designation is marked on the barrel.
- the Auto-5 was introduced in:
- 12 GA X 2 3/4" circa 1903.
- 12 GA X 3" circa 1958.
- 16 GA circa 1908/1909.
- 20 GA X 2 3/4" circa 1958.
- 20 GA x 3" circa 1967.
- Note: 16 GA was first offered in 2 9/16" length and later in 2 3/4".

Shots

- tubular magazine mounted under the barrel.
- Auto-5 shotguns manufactured by Fabrique Nationale Herstal (FN) of Belgium were available in a variety of shot capacities.
- Auto-5 (Two Shot) variant holds a total of two (2) cartridges: one (1) cartridge in the chamber and one (1) cartridge in the tubular magazine, manufactured between 1903 and 1913.
- Auto-5 (Three Shot) variant holds a total of three (3) cartridges: one (1) cartridge in the chamber and two (2) cartridges in the tubular magazine, manufactured between 1932 and 1940.
- Auto-5 (Five Shot) variant holds a total of five (5) cartridges: one (1) cartridge in the chamber and four (4) cartridges in the tubular magazine, manufactured from between 1903 and 1976.
- NOTE: may be factory plugged to two (2) round magazine capacity in accordance with hunting regulations.

Other Markings

- Belgian proof markings will be found on the barrel, receiver/frame and the breech mechanism on this and all other Belgian manufactured Brownings.
- barrel markings:
- circa 1903, first 10, 000 shotguns: "Browning Automatic Arms Co." over "Ogden, Utah U.S.A." and "Made in Belgium Browning Patent".
- after the first 10,000 shotguns: "Browning Bros. Ogden, Utah U.S.A." and "Made in Belgium" over "Browning Patent".
- 1927 to 1950: "Browning Arms Company" over "Ogden, Utah U.S.A." and "Made in Belgium".
- 1951 to 1958: "Browning Arms Company St. Louis, Mo" and "Made in Belgium".
- 1959 to 1968: "Browning Arms Company" over "St Louis Mo & Montreal P.Q." and "Made in Belgium".
- 1969 to 1975 "Browning Arms Company" over "St Louis Mo & Montreal P.Q." and "Browning Auto-5" over "Browning Patent".
- receiver/frame markings:
- circa 1903 to 1926" "Fabrique Nationale d'Armes" over "de Guerre Herstal Belgique" over "Browning's Patent Depose" or "Fabrique Nationale sa d'Armes" over "de Guerre Herstal Belgique" over "Browning's Patent Depose".
- circa 1927: "Brownings Arms Company St Louis Mo" over "Browning" over "Trade", (bust of John Moses Browning in a circle), and "Mark".

Remarks

- the Browning Automatic (Auto-5) shotgun was offered in four variations circa 1903/1905, No. 0 Messenger Gun, No.1 Regular Gun, No. 2 Trap Gun, and the Two Shot Gun:
- No. 0, Messenger Gun (Riot Gun): 12 Gauge, 508mm (20") cylinder-bore take-down barrel; matted receiver/frame; smooth forearm and straight grip stock; five shot capacity.
- No. 1, Regular Gun: 12 Gauge, 711mm (28") take-down barrel with full, modified or cylinder chokes; matted receiver/frame; smooth forearm and straight grip stock with rubber butt pad; five shot capacity.
- No. 2, Trap Gun: 12 Gauge, 711mm (28") take-down barrel; matted receiver/frame; checkered forearm and straight grip stock with rubber butt pad; five shot capacity.
- Two Shot Gun: 12 Gauge, 711mm (28") take-down barrel with full, modified or cylinder chokes; matted receiver/frame; checkered or smooth forearm and straight grip stock with rubber butt pad; two shot capacity. This is the Auto-5 with a reduced magazine capacity.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennesee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Company was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- this is a generic entry. - other entries exist which may better describe the firearm in question. - Miroku manufacture commenced circa 1975. - the gauge or calibre is marked on the left mid-receiver in script: for example -"Light Twelve". - magazine cutoff lever on forward left side receiver.
Manufacturer	- manufacturer's name is not usually marked on the firearm. - "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.
Action	- recoil operated.
Serial Number	- serial number is usually marked on the underside of the receiver/frame. - Miroku of Japan (Auto-5 production from 1976 to 1998) serial number rationalization is as follows: - serial number usually consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a two (2) letter code for the year and a three character code (usually three digits) which is the product code. - example No 1): - 00348NN161 = Browning Auto-5, Magnum 20 model, in 20 GA X 3", produced in 1999 in Japan by Miroku Firearms Manufacturing. - example No 2): - 01765NP151 = Browning Auto-5, Magnum 12 model in 12 GA X 3", produced in 1998 in Japan by Miroku Firearms Manufacturing. - when the serial number rationalization of the firearm being examined is different from that described above, this would indicate that the firearm may have been manufactured in Europe by Fabrique Nationale, Herstal (FN) between 1904 and 1975.
Shots	- tubular magazine mounted under the barrel. - Auto-5 holds a total of five (5) cartridges: one (1) cartridge in the chamber and four (4) cartridges in the tubular magazine. - NOTE: may be factory plugged to two (2) round magazine capacity in accordance with hunting regulations.
Other Markings	- marked on barrel "MADE IN JAPAN". - cameo of J. M. Browning on the mid-left side of the receiver, below the name BROWNING.
Remarks	- the model Auto-5 came in four different grades. - the grades differ in the amount of engraving and quality of wood furniture: Grade I having a simple scroll engraving, and higher grades having increasingly elaborate engraving. - the barrels usually have a ventilated rib.

Notes

Make

- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- model designation is not marked on the firearm.
- manufactered by Remington between 1940 and 1952, before Fabrique Nationale, Herstal (FN) started their post-war production.
- about 90,000 of this model were manufactured by Remington.
- this Auto-5 is a modified Remington Model 11, which was, essentially, the Browning Model Auto-5 without the "magazine cut-off device".

Action

- recoil operated.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- approximately 90,000 manufactured between 1940 and 1952.
- serial number range and rationalization are as follows:
- B5,000 to B43,129 / prefix letter "B" indicates 12 GA X 2 3/4".
- A5,000 to A19,450 / prefix "A" or "X" indicates 16 GA X 2 3/4".
- C5,000 to C16,152 / prefix "C" indicates 20 GA X 2 3/4".

Calibre

- NOTE: These firearms pre-date the introduction of Calibre 20 GA X 3" ammunition. There was no production of 20 GA X 3" in this particular model of Browning Auto-5.

Shots

- tubular magazine mounted under the barrel.
- Auto-5 holds a total of five (5) cartridges: one (1) cartridge in the chamber and four (4) cartridges in the tubular magazine.
- NOTE: may be factory plugged to two (2) round magazine capacity in accordance with hunting regulations.

Remarks

- the Browning Auto-5 is a John M. Browning design.
- this firearm design has also been manufactured by FN Herstal under the FN brand name for distribution in Europe, Asia and South America and the Browning brand name for sale and distribution in North America.
- in 1975 manufacture by FN in Belgium ceased and manufacture by Miroku Firearms Manufacture in Japan commenced. The Miroku production is primarily for the North American market under the Browning brand name.

Serial Number

- serial number is marked on the side or underside of the receiver/frame.
- 1) serial number rationalization for Belgium (FN) manufactured Auto-5s is as follows:
- a) Auto-5s in 12 GA manufactured from 1903 to 1957, serial number from 1 to 463,700.
- b) Auto-5s in 16 GA manufactured from 1903 to 1947, serial number from 1 to 130,616, and from 1947 to 1953, serial number range from X1 to X99,999.
- c) Standard Twelve manufactured from 1947 to 1956, s/n range from H1 to H100,000, and from 1956 to 1958, s/n range from M1 to M99,999.
- d) Light Twelve manufactured from 1953 to 1956, s/n range from L1 to L99,877, and from 1956 to 1958, s/n range from G1 to G99,663.
- e) Standard Sixteen manufactured from 1953 to 1957/58, s/n range from R1 to R99,999, and T1 to T10,900.
- f) Sweet Sixteen manufactured from 1953 to 1957/58, s/n range from S1 to S99,908, and A1 to A10,900.
- g) Auto-5s manufactured from 1958 to 1976, the serial number consisted of a year code consisting of a single or double number and a letter code followed by a five digit number. Letter code: M = Standard Twelve, G = Light Twelve, V = Magnum Twelve, R = Standard Sixteen, S = Sweet Sixteen, Z = Light Twenty; and X = Magnum Twenty. Examples: 8M = 1958 / Standard Twelve, 69M = 1969 / Standard Twelve, and "0M89115" = 1960 / Standard Twelve.
- 2) serial number rationalization for Remington manufactured Auto-5s is as follows: s/n range for 12 GA (B5,000 to G43,129), s/n range for 16 GA (A5,000 to A19,450), and s/n range for 20 GA (C5,000 to C16,152).
- 3) serial number rationalization for Miroku manufactured Auto-5s is as follows: serial number consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a 2 letter code for the year and a three character code (usually three digits) which is the product code, eg. 00348NN161 = Auto-5 Magnum Twelve manufactured in 1999.

Calibre

- calibre designation is marked on the barrel.
- the Auto-5 was introduced in:
- 12 GA X 2 3/4" circa 1903.
- 12 GA X 3" circa 1958.
- 16 GA circa 1908/1909.
- 20 GA X 2 3/4" circa 1958.
- 20 GA x 3" circa 1967.
- Note: 16 GA was first offered in 2 9/16" length and later in 2 3/4".

Shots

- tubular magazine mounted under the barrel.
- Auto-5 shotguns manufactured by Fabrique Nationale Herstal (FN) of Belgium were available in a variety of shot capacities.
- Auto-5 (Two Shot) variant holds a total of two (2) cartridges: one (1) cartridge in the chamber and one (1) cartridge in the tubular magazine, manufactured between 1903 and 1913.
- Auto-5 (Three Shot) variant holds a total of three (3) cartridges: one (1) cartridge in the chamber and two (2) cartridges in the tubular magazine, manufactured between 1932 and 1940.
- Auto-5 (Five Shot) variant holds a total of five (5) cartridges: one (1) cartridge in the chamber and four (4) cartridges in the tubular magazine, manufactured between 1903 and 1976.

Other Markings

- Manufacturer name, address, calibre and patent dates.

Remarks

- the Auto-5 BCA Commemorative is similar to the Standard model.

Notes

Make

- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "BROWNING" and "CLASSIC" are engraved on the side of the receiver/frame.
- introduced in 1984.
- total production of 1500 units.
- the "Auto-5 Classic" and "Auto-5 Gold Classic" were high grade guns differing only in engraving and wood quality from the more standard model Auto-5's.
- the "Classic" and "Gold Classic" both have a flat gray or nickel finish with engraved scenes.
- the "Classic" has an engraved bust of John M. Browning and a hunting, wildlife scene on the receiver/frame.

Action

- recoil operated.

Serial Number

- serial number is marked on the side or underside of the receiver/frame.
- 1) serial number rationalization for Belgium (FN) manufactured Auto-5s is as follows:
- a) Auto-5s in 12 GA manufactured from 1903 to 1957, serial number from 1 to 463,700.
- b) Auto-5s in 16 GA manufactured from 1903 to 1947, serial number from 1 to 130,616, and from 1947 to 1953, serial number range from X1 to X99,999.
- c) Standard Twelve manufactured from 1947 to 1956, s/n range from H1 to H100,000, and from 1956 to 1958, s/n range from M1 to M99,999.
- d) Light Twelve manufactured from 1953 to 1956, s/n range from L1 to L99,877, and from 1956 to 1958, s/n range from G1 to G99,663.
- e) Standard Sixteen manufactured from 1953 to 1957/58, s/n range from R1 to R99,999, and T1 to T10,900.
- f) Sweet Sixteen manufactured from 1953 to 1957/58, s/n range from S1 to S99,908, and A1 to A10,900.
- g) Auto-5s manufactured from 1958 to 1976, the serial number consisted of a year code consisting of a single or double number and a letter code followed by a five digit number. Letter code: M = Standard Twelve, G = Light Twelve, V = Magnum Twelve, R = Standard Sixteen, S = Sweet Sixteen, Z = Light Twenty; and X = Magnum Twenty. Examples: 8M = 1958 / Standard Twelve, 69M = 1969 / Standard Twelve, and "0M89115" = 1960 / Standard Twelve.
- 2) serial number rationalization for Remington manufactured Auto-5s is as follows: s/n range for 12 GA (B5,000 to G43,129), s/n range for 16 GA (A5,000 to A19,450), and s/n range for 20 GA (C5,000 to C16,152).
- 3) serial number rationalization for Miroku manufactured Auto-5s is as follows: serial number consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a 2 letter code for the year and a three character code (usually three digits) which is the product code, eg. 00348NN161 = Auto-5 Magnum Twelve manufactured in 1999.

Shots

- tubular magazine mounted under the barrel.

- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "Ducks Unlimited Canada" and "1991" are inscribed on the left and right hand sides of the receiver/frame;
- features include: round tapered take-down barrel; ventilated rib; metal bead front sight, solid top receiver/frame with right side ejection port and bottom loading port; action release button is located on the right side of the receiver/frame; cross bolt safety is located on the rear of the trigger guard; magazine cut-off lever is located on the left side of the receiver/frame.
- Ducks Unlimited Commemorative Model has a blued barrel and heavily engraved pewter/silver colored receiver/frame.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- recoil operated.

Serial Number

- observed serial number consists of two numbers (year), "DUCAN" and three numbers, eg. "99DUCAN999".
- serial number is usually marked on the underside of the receiver/frame.
- Miroku of Japan (Auto-5 production from 1976 to 1998) serial number rationalization is as follows:
- serial number usually consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a two (2) letter code for the year and a three character code (usually three digits) which is the product code.
- example No 1): - 00348NN161 = Browning Auto-5, Magnum 20 model, in 20 GA X 3", produced in 1999 in Japan by Miroku Firearms Manufacturing.
- example No 2): - 01765NP151 = Browning Auto-5, Magnum 12 model in 12 GA X 3", produced in 1998 in Japan by Miroku Firearms Manufacturing.
- when the serial number rationalization of the firearm being examined is different from that described above, this would indicate that the firearm may have been manufactured in Europe by Fabrique Nationale, Herstal (FN) between 1904 and 1975.

Shots

- tubular magazine mounted under the barrel.

Make

- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "Light Twelve" may be marked on the left side of the receiver/frame and "Lightweight" may be marked on the barrel.
- total production of all configurations of Browning Auto-5s manufactured by FN between 1902 and 1976 was over 2,750,000.
- features include: interchangeable plain or ventilated rib barrel; recoil operated; solid receiver/frame; bottom loaded; side ejection; double extractors; gold plated trigger; cross bolt safety; checkered walnut forend and half pistol grip buttstock; engraved, blued finish.

Manufacturer

- "Made in Belgium" is marked on the firearm.

Action

- recoil operated.

Serial Number

- serial number is marked on the side or underside of the receiver/frame.
- 1) serial number rationalization for Belgium (FN) manufactured Auto-5s is as follows:
- a) Auto-5s in 12 GA manufactured from 1903 to 1957, serial number from 1 to 463,700.
- b) Auto-5s in 16 GA manufactured from 1903 to 1947, serial number from 1 to 130,616, and from 1947 to 1953, serial number range from X1 to X99,999.
- c) Standard Twelve manufactured from 1947 to 1956, s/n range from H1 to H100,000, and from 1956 to 1958, s/n range from M1 to M99,999.
- d) Light Twelve manufactured from 1953 to 1956, s/n range from L1 to L99,877, and from 1956 to 1958, s/n range from G1 to G99,663.
- e) Standard Sixteen manufactured from 1953 to 1957/58, s/n range from R1 to R99,999, and T1 to T10,900.
- f) Sweet Sixteen manufactured from 1953 to 1957/58, s/n range from S1 to S99,908, and A1 to A10,900.
- g) Auto-5s manufactured from 1958 to 1976, the serial number consisted of a year code consisting of a single or double number and a letter code followed by a five digit number. Letter code: M = Standard Twelve, G = Light Twelve, V = Magnum Twelve, R = Standard Sixteen, S = Sweet Sixteen, Z = Light Twenty; and X = Magnum Twenty. Examples: 8M = 1958 / Standard Twelve, 69M = 1969 / Standard Twelve, and "0M89115" = 1960 / Standard Twelve.
- 2) serial number rationalization for Remington manufactured Auto-5s is as follows: s/n range for 12 GA (B5,000 to G43,129), s/n range for 16 GA (A5,000 to A19,450), and s/n range for 20 GA (C5,000 to C16,152).
- 3) serial number rationalization for Miroku manufactured Auto-5s is as follows: serial number consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a 2 letter code for the year and a three character code (usually three digits) which is the product code, eg. 00348NN161 = Auto-5 Magnum Twelve manufactured in 1999.

Calibre

- calibre designation is marked on the barrel.
- the Auto-5 was introduced in:
- 12 GA X 2 3/4" circa 1903.
- 12 GA X 3" circa 1958.
- 16 GA circa 1908/1909.
- 20 GA X 2 3/4" circa 1958.
- 20 GA x 3" circa 1967.
- Note: 16 GA was first offered in 2 9/16" length and later in 2 3/4".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- tubular magazine mounted under the barrel.
- Auto-5 shotguns manufactured by Fabrique Nationale Herstal (FN) of Belgium were available in a variety of shot capacities.
- Auto-5 (Two Shot) variant holds a total of two (2) cartridges: one (1) cartridge in the chamber and one (1) cartridge in the tubular magazine, manufactured between 1903 and 1913.
- Auto-5 (Three Shot) variant holds a total of three (3) cartridges: one (1) cartridge in the chamber and two (2) cartridges in the tubular magazine, manufactured between 1932 and 1940.
- Auto-5 (Five Shot) variant holds a total of five (5) cartridges: one (1) cartridge in the chamber and four (4) cartridges in the tubular magazine, manufactured between 1903 and 1976.

Importer

- marked on the left side of the barrel.
- from 1952 to 1958: St. Louis, Missouri
- from 1959 to 1968: St. Louis, Missouri and Montreal P.Q.
- from 1969 to 1975: Morgan, Utah and Montreal P.Q.

Remarks

- The model Auto-5 Light Twleve was offered in various levels of embelishment from Grade 1 to Grade 4. The guns differ only in engraving and wood quality from Standard model Auto-5's and are so marked. Some guns were purchased with a solid rib or ventilated rib option in place of plain barrel.

Make

- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced in 1976.
- marked on the left side of the receiver/frame in script: "Light Twelve".
- there is a magazine cutoff lever on the forward left side of the receiver/frame.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- recoil operated.

Serial Number

- serial number is usually marked on the underside of the receiver/frame.
- Miroku of Japan (Auto-5 production from 1976 to 1998) serial number rationalization is as follows:
- serial number usually consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a two (2) letter code for the year and a three character code (usually three digits) which is the product code.
- example No 1): - 00348NN161 = Browning Auto-5, Magnum 20 model, in 20 GA X 3", produced in 1999 in Japan by Miroku Firearms Manufacturing.
- example No 2): - 01765NP151 = Browning Auto-5, Magnum 12 model in 12 GA X 3", produced in 1998 in Japan by Miroku Firearms Manufacturing.
- when the serial number rationalization of the firearm being examined is different from that described above, this would indicate that the firearm may have been manufactured in Europe by Fabrique Nationale, Herstal (FN) between 1904 and 1975.

Shots

- tubular magazine mounted under the barrel.

Other Markings

- marked on barrel, right side, below address, MADE IN JAPAN; also below model: * SPECIAL STEEL 12 GA. SHELLS - 2 3/4" - (barrel length), and below that: BROWNING PATENTS
- may have a line drawn cameo of J. M. Browning on the mid-left side of the receiver, below the name BROWNING.

Remarks

- the model Auto-5 Light Twelve came in Grades 1 to 4. The grades differ in the amount of engraving and quality of wood furniture: Grade I having a simple scroll engraving, and higher grades having increasingly elaborate engraving. The barrels may have either a solid or ventilated rib.

Model

- manufactured from 1958 to 1976.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the side or underside of the receiver/frame.
- 1) serial number rationalization for Belgium (FN) manufactured Auto-5s is as follows:
- a) Auto-5s in 12 GA manufactured from 1903 to 1957, serial number from 1 to 463,700.
- b) Auto-5s in 16 GA manufactured from 1903 to 1947, serial number from 1 to 130,616, and from 1947 to 1953, serial number range from X1 to X99,999.
- c) Standard Twelve manufactured from 1947 to 1956, s/n range from H1 to H100,000, and from 1956 to 1958, s/n range from M1 to M99,999.
- d) Light Twelve manufactured from 1953 to 1956, s/n range from L1 to L99,877, and from 1956 to 1958, s/n range from G1 to G99,663.
- e) Standard Sixteen manufactured from 1953 to 1957/58, s/n range from R1 to R99,999, and T1 to T10,900.
- f) Sweet Sixteen manufactured from 1953 to 1957/58, s/n range from S1 to S99,908, and A1 to A10,900.
- g) Auto-5s manufactured from 1958 to 1976, the serial number consisted of a year code consisting of a single or double number and a letter code followed by a five digit number. Letter code: M = Standard Twelve, G = Light Twelve, V = Magnum Twelve, R = Standard Sixteen, S = Sweet Sixteen, Z = Light Twenty; and X = Magnum Twenty. Examples: 8M = 1958 / Standard Twelve, 69M = 1969 / Standard Twelve, and "0M89115" = 1960 / Standard Twelve.
- 2) serial number rationalization for Remington manufactured Auto-5s is as follows: s/n range for 12 GA (B5,000 to G43,129), s/n range for 16 GA (A5,000 to A19,450), and s/n range for 20 GA (C5,000 to C16,152).
- 3) serial number rationalization for Miroku manufactured Auto-5s is as follows: serial number consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a 2 letter code for the year and a three character code (usually three digits) which is the product code, eg. 00348NN161 = Auto-5 Magnum Twelve manufactured in 1999.

Calibre

- calibre designation is marked on the barrel.
- the Auto-5 was introduced in:
- 12 GA X 2 3/4" circa 1903.
- 12 GA X 3" circa 1958.
- 16 GA circa 1908/1909.
- 20 GA X 2 3/4" circa 1958.
- 20 GA x 3" circa 1967.
- Note: 16 GA was first offered in 2 9/16" length and later in 2 3/4".

Shots

- tubular magazine mounted under the barrel.
- Auto-5 shotguns manufactured by Fabrique Nationale Herstal (FN) of Belgium were available in a variety of shot capacities.
- Auto-5 (Two Shot) variant holds a total of two (2) cartridges: one (1) cartridge in the chamber and one (1) cartridge in the tubular magazine, manufactured between 1903 and 1913.
- Auto-5 (Three Shot) variant holds a total of three (3) cartridges: one (1) cartridge in the chamber and two (2) cartridges in the tubular magazine, manufactured between 1932 and 1940.
- Auto-5 (Five Shot) variant holds a total of five (5) cartridges: one (1) cartridge in the chamber and four (4) cartridges in the tubular magazine, manufactured between 1903 and 1976.

Other Markings

- Manufacturer name, adress, calibre and patent dates. May have as address: St. Louis, Missouri 1952-1958 St. Louis, Missouri and Montreal P.Q. 1959-1968 Morgan, Utah and Montreal P.Q. 1969-1975

Remarks

- the Light 12 Buck Special has cylinder bore and rifle sights. A change in the pistolgrip from round to flat is a tipoff to year of manufacture pre- or post 1967.

- "DUCKS UNLIMITED" in a banner is marked on the left side of the receiver/frame.
- "FIFTIETH YEAR" in a banner is marked on the right side of the receiver/frame.
- "Auto-5 Light Twelve Ducks Unlimited 50th Anniversary Edition" is a high grade guns differ only in engraving and wood quality from the more standard model Auto-5's.
- "Auto-5 Light Twelve Ducks Unlimited 50th Anniversary Edition" models have special engraving.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- recoil operated.

Serial Number

- serial number is usually marked on the underside of the receiver/frame.
- Miroku of Japan (Auto-5 production from 1976 to 1998) serial number rationalization is as follows:
- serial number usually consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a two (2) letter code for the year and a three character code (usually three digits) which is the product code.
- example No 1): - 00348NN161 = Browning Auto-5, Magnum 20 model, in 20 GA X 3", produced in 1999 in Japan by Miroku Firearms Manufacturing.
- example No 2): - 01765NP151 = Browning Auto-5, Magnum 12 model in 12 GA X 3", produced in 1998 in Japan by Miroku Firearms Manufacturing.
- when the serial number rationalization of the firearm being examined is different from that described above, this would indicate that the firearm may have been manufactured in Europe by Fabrique Nationale, Herstal (FN) between 1904 and 1975.

Shots

- tubular magazine mounted under the barrel.

Notes

Make

- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- model manufactured from 1958 to 1971.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the side or underside of the receiver/frame.
- 1) serial number rationalization for Belgium (FN) manufactured Auto-5s is as follows:
- a) Auto-5s in 12 GA manufactured from 1903 to 1957, serial number from 1 to 463,700.
- b) Auto-5s in 16 GA manufactured from 1903 to 1947, serial number from 1 to 130,616, and from 1947 to 1953, serial number range from X1 to X99,999.
- c) Standard Twelve manufactured from 1947 to 1956, s/n range from H1 to H100,000, and from 1956 to 1958, s/n range from M1 to M99,999.
- d) Light Twelve manufactured from 1953 to 1956, s/n range from L1 to L99,877, and from 1956 to 1958, s/n range from G1 to G99,663.
- e) Standard Sixteen manufactured from 1953 to 1957/58, s/n range from R1 to R99,999, and T1 to T10,900.
- f) Sweet Sixteen manufactured from 1953 to 1957/58, s/n range from S1 to S99,908, and A1 to A10,900.
- g) Auto-5s manufactured from 1958 to 1976, the serial number consisted of a year code consisting of a single or double number and a letter code followed by a five digit number. Letter code: M = Standard Twelve, G = Light Twelve, V = Magnum Twelve, R = Standard Sixteen, S = Sweet Sixteen, Z = Light Twenty; and X = Magnum Twenty. Examples: 8M = 1958 / Standard Twelve, 69M = 1969 / Standard Twelve, and "0M89115" = 1960 / Standard Twelve.
- 2) serial number rationalization for Remington manufactured Auto-5s is as follows: s/n range for 12 GA (B5,000 to G43,129), s/n range for 16 GA (A5,000 to A19,450), and s/n range for 20 GA (C5,000 to C16,152).
- 3) serial number rationalization for Miroku manufactured Auto-5s is as follows: serial number consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a 2 letter code for the year and a three character code (usually three digits) which is the product code, eg. 00348NN161 = Auto-5 Magnum Twelve manufactured in 1999.

Barrel

- The most common barrel length was 26".

Calibre

- calibre designation is marked on the barrel.
- the Auto-5 was introduced in:
- 12 GA X 2 3/4" circa 1903.
- 12 GA X 3" circa 1958.
- 16 GA circa 1908/1909.
- 20 GA X 2 3/4" circa 1958.
- 20 GA x 3" circa 1967.
- Note: 16 GA was first offered in 2 9/16" length and later in 2 3/4".

Shots

- tubular magazine mounted under the barrel.
- Auto-5 shotguns manufactured by Fabrique Nationale Herstal (FN) of Belgium were available in a variety of shot capacities.
- Auto-5 (Two Shot) variant holds a total of two (2) cartridges: one (1) cartridge in the chamber and one (1) cartridge in the tubular magazine, manufactured between 1903 and 1913.
- Auto-5 (Three Shot) variant holds a total of three (3) cartridges: one (1) cartridge in the chamber and two (2) cartridges in the tubular magazine, manufactured between 1932 and 1940.
- Auto-5 (Five Shot) variant holds a total of five (5) cartridges: one (1) cartridge in the chamber and four (4) cartridges in the tubular magazine, manufactured between 1903 and 1976.

Other Markings

- Manufacturer name, adress, calibre and patent dates. May have as address: St. Louis, Missouri 1952-1958 St. Louis, Missouri and Montreal P.Q. 1959-1968 Morgan, Utah and Montreal P.Q. 1969-1975

Remarks

- The Auto-5 Skeet has a skeet choke and ventilated rib. A change in the pistol grip from round to flat is a tipoff to year of manufacture pre- or post 1967.

Model

- "Auto-5 Light Weight" is not marked on the receiver/frame.
- "Light Twenty" or Twenty" over "Browning" may be marked on the receiver/frame.
- "Auto-5" and/or "Lightweight" may be marked on the barrel.
- total production of all configurations of Browning Auto-5's manufactured by FN between 1902 and 1976 was over 2,750,000.
- before 1975 production was in Herstal, Belgium and after 1975 at Miroku, Japan.
- features include: interchangeable plain or ventilated rib barrel; recoil operated; solid receiver/frame; bottom loaded; side ejection; double extractors; gold plated trigger; cross bolt safety; checkered walnut forend and half pistol grip buttstock; engraved, blued finish.

Manufacturer

- "Made in Belgium" is marked on the firearm.

Action

- recoil operated.

Serial Number

- serial number is marked on the side or underside of the receiver/frame.
- 1) serial number rationalization for Belgium (FN) manufactured Auto-5s is as follows:
- a) Auto-5s in 12 GA manufactured from 1903 to 1957, serial number from 1 to 463,700.
- b) Auto-5s in 16 GA manufactured from 1903 to 1947, serial number from 1 to 130,616, and from 1947 to 1953, serial number range from X1 to X99,999.
- c) Standard Twelve manufactured from 1947 to 1956, s/n range from H1 to H100,000, and from 1956 to 1958, s/n range from M1 to M99,999.
- d) Light Twelve manufactured from 1953 to 1956, s/n range from L1 to L99,877, and from 1956 to 1958, s/n range from G1 to G99,663.
- e) Standard Sixteen manufactured from 1953 to 1957/58, s/n range from R1 to R99,999, and T1 to T10,900.
- f) Sweet Sixteen manufactured from 1953 to 1957/58, s/n range from S1 to S99,908, and A1 to A10,900.
- g) Auto-5s manufactured from 1958 to 1976, the serial number consisted of a year code consisting of a single or double number and a letter code followed by a five digit number. Letter code: M = Standard Twelve, G = Light Twelve, V = Magnum Twelve, R = Standard Sixteen, S = Sweet Sixteen, Z = Light Twenty; and X = Magnum Twenty. Examples: 8M = 1958 / Standard Twelve, 69M = 1969 / Standard Twelve, and "0M89115" = 1960 / Standard Twelve.
- 2) serial number rationalization for Remington manufactured Auto-5s is as follows: s/n range for 12 GA (B5,000 to G43,129), s/n range for 16 GA (A5,000 to A19,450), and s/n range for 20 GA (C5,000 to C16,152).
- 3) serial number rationalization for Miroku manufactured Auto-5s is as follows: serial number consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a 2 letter code for the year and a three character code (usually three digits) which is the product code, eg. 00348NN161 = Auto-5 Magnum Twelve manufactured in 1999.

Calibre

- calibre designation is marked on the barrel.
- the Auto-5 was introduced in:
- 12 GA X 2 3/4" circa 1903.
- 12 GA X 3" circa 1958.
- 16 GA circa 1908/1909.
- 20 GA X 2 3/4" circa 1958.
- 20 GA x 3" circa 1967.
- Note: 16 GA was first offered in 2 9/16" length and later in 2 3/4".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- tubular magazine mounted under the barrel.
- Auto-5 shotguns manufactured by Fabrique Nationale Herstal (FN) of Belgium were available in a variety of shot capacities.
- Auto-5 (Two Shot) variant holds a total of two (2) cartridges: one (1) cartridge in the chamber and one (1) cartridge in the tubular magazine, manufactured between 1903 and 1913.
- Auto-5 (Three Shot) variant holds a total of three (3) cartridges: one (1) cartridge in the chamber and two (2) cartridges in the tubular magazine, manufactured between 1932 and 1940.
- Auto-5 (Five Shot) variant holds a total of five (5) cartridges: one (1) cartridge in the chamber and four (4) cartridges in the tubular magazine, manufactured between 1903 and 1976.

Other Markings

- manufacturer name, address, calibre and patent dates.
- may have as address: St. Louis, Missouri, from 1952 to 1958, St. Louis, Missouri and Montreal P.Q., from 1959 to 1968, and Morgan, Utah and Montreal P.Q., from 1969 to 1975.

Remarks

- The Auto-5 Light 20 has a selection of chokes and a ventilated rib. A change in the pistol grip from round to flat is a tipoff to year of manufacture pre- or post 1967. May be found with engraving and better wood from Grade I up to Grade IV.

- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- Miroku manufacture: 1987 to 1997. - marked on right side barrel near breechend: "BROWNING AUTO-5"; marked on the left mid-receiver in script: "Light Twenty". - magazine cutoff lever on left side receiver, forward.
Manufacturer	- manufacturer's name is not usually marked on the firearm. - "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.
Action	- recoil operated.
Serial Number	- serial number is usually marked on the underside of the receiver/frame. - Miroku of Japan (Auto-5 production from 1976 to 1998) serial number rationalization is as follows: - serial number usually consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a two (2) letter code for the year and a three character code (usually three digits) which is the product code. - example No 1): - 00348NN161 = Browning Auto-5, Magnum 20 model, in 20 GA X 3", produced in 1999 in Japan by Miroku Firearms Manufacturing. - example No 2): - 01765NP151 = Browning Auto-5, Magnum 12 model in 12 GA X 3", produced in 1998 in Japan by Miroku Firearms Manufacturing. - when the serial number rationalization of the firearm being examined is different from that described above, this would indicate that the firearm may have been manufactured in Europe by Fabrique Nationale, Herstal (FN) between 1904 and 1975.
Barrel	- available barrel lengths: 660mm (26"), and 711mm (28").
Shots	- tubular magazine mounted under the barrel.
Other Markings	- marked on barrel, right, below model: the calibre markings with barrel length, and below that: BROWNING PATENTS - may have a line drawn cameo of J. M. Browning on the mid-left side of the receiver, below the name BROWNING.
Remarks	- The Auto-5 Light Twenty came in Grades from 1 to 4. The grades differ in the amount of engraving and quality of the wood furniture: Grade I having a simple scroll engraved receiver, and higher grades having increasingly elaborate engraving. The barrels may have either a solid rib or ventilated rib.

Notes

Make

- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- Made 1987 to 1992.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the side or underside of the receiver/frame.
- 1) serial number rationalization for Belgium (FN) manufactured Auto-5s is as follows:
- a) Auto-5s in 12 GA manufactured from 1903 to 1957, serial number from 1 to 463,700.
- b) Auto-5s in 16 GA manufactured from 1903 to 1947, serial number from 1 to 130,616, and from 1947 to 1953, serial number range from X1 to X99,999.
- c) Standard Twelve manufactured from 1947 to 1956, s/n range from H1 to H100,000, and from 1956 to 1958, s/n range from M1 to M99,999.
- d) Light Twelve manufactured from 1953 to 1956, s/n range from L1 to L99,877, and from 1956 to 1958, s/n range from G1 to G99,663.
- e) Standard Sixteen manufactured from 1953 to 1957/58, s/n range from R1 to R99,999, and T1 to T10,900.
- f) Sweet Sixteen manufactured from 1953 to 1957/58, s/n range from S1 to S99,908, and A1 to A10,900.
- g) Auto-5s manufactured from 1958 to 1976, the serial number consisted of a year code consisting of a single or double number and a letter code followed by a five digit number. Letter code: M = Standard Twelve, G = Light Twelve, V = Magnum Twelve, R = Standard Sixteen, S = Sweet Sixteen, Z = Light Twenty; and X = Magnum Twenty. Examples: 8M = 1958 / Standard Twelve, 69M = 1969 / Standard Twelve, and "0M89115" = 1960 / Standard Twelve.
- 2) serial number rationalization for Remington manufactured Auto-5s is as follows: s/n range for 12 GA (B5,000 to G43,129), s/n range for 16 GA (A5,000 to A19,450), and s/n range for 20 GA (C5,000 to C16,152).
- 3) serial number rationalization for Miroku manufactured Auto-5s is as follows: serial number consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a 2 letter code for the year and a three character code (usually three digits) which is the product code, eg. 00348NN161 = Auto-5 Magnum Twelve manufactured in 1999.

Calibre

- calibre designation is marked on the barrel.
- the Auto-5 was introduced in:
- 12 GA X 2 3/4" circa 1903.
- 12 GA X 3" circa 1958.
- 16 GA circa 1908/1909.
- 20 GA X 2 3/4" circa 1958.
- 20 GA x 3" circa 1967.
- Note: 16 GA was first offered in 2 9/16" length and later in 2 3/4".

Shots

- tubular magazine mounted under the barrel.
- Auto-5 shotguns manufactured by Fabrique Nationale Herstal (FN) of Belgium were available in a variety of shot capacities.
- Auto-5 (Two Shot) variant holds a total of two (2) cartridges: one (1) cartridge in the chamber and one (1) cartridge in the tubular magazine, manufactured between 1903 and 1913.
- Auto-5 (Three Shot) variant holds a total of three (3) cartridges: one (1) cartridge in the chamber and two (2) cartridges in the tubular magazine, manufactured between 1932 and 1940.
- Auto-5 (Five Shot) variant holds a total of five (5) cartridges: one (1) cartridge in the chamber and four (4) cartridges in the tubular magazine, manufactured between 1903 and 1976.

Other Markings

- Manufacturer name, adress, calibre and patent dates. May have as address: St. Louis, Missouri 1952-1958 St. Louis, Missouri and Montreal P.Q. 1959-1968 Morgan, Utah and Montreal P.Q. 1969-1975

Remarks

- the Light 20 Buck Special has cylinder bore and rifle sights. A change in the pistol grip from round to flat is a tipoff to year of manufacture pre- or post 1967.

Notes

Make

- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured in 1990.
- 4,500 were produced.
- "LIGHT TWENTY" in a banner is marked on the left side of the receiver/frame.
- "DUCKS UNLIMITED" in a banner is marked on the right side of the receiver/frame.
- "Auto-5 Light Twenty Ducks Unlimited" is a high grade guns differ only in engraving and wood quality from the more standard model Auto-5's.
- "Auto-5 Light Twenty Ducks Unlimited" models have special engraving.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- recoil operated.

Serial Number

- observed serial number consisted of two numbers "90", followed by two letters "DU", followed by five numbers.
- serial number is usually marked on the underside of the receiver/frame.
- Miroku of Japan (Auto-5 production from 1976 to 1998) serial number rationalization is as follows:
- serial number usually consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a two (2) letter code for the year and a three character code (usually three digits) which is the product code.
- example No 1): - 00348NN161 = Browning Auto-5, Magnum 20 model, in 20 GA X 3", produced in 1999 in Japan by Miroku Firearms Manufacturing.
- example No 2): - 01765NP151 = Browning Auto-5, Magnum 12 model in 12 GA X 3", produced in 1998 in Japan by Miroku Firearms Manufacturing.
- when the serial number rationalization of the firearm being examined is different from that described above, this would indicate that the firearm may have been manufactured in Europe by Fabrique Nationale, Herstal (FN) between 1904 and 1975.

Shots

- tubular magazine is mounted under the barrel.

- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- made 1963 to 1983.
- in 1975, production moved to Japan from Belgium.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- manufacturer's name is not usually marked on the firearm. - "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.
Action	- recoil operated.
Serial Number	- serial number is usually marked on the underside of the receiver/frame. - Miroku of Japan (Auto-5 production from 1976 to 1998) serial number rationalization is as follows: - serial number usually consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a two (2) letter code for the year and a three character code (usually three digits) which is the product code. - example No 1): - 00348NN161 = Browning Auto-5, Magnum 20 model, in 20 GA X 3", produced in 1999 in Japan by Miroku Firearms Manufacturing. - example No 2): - 01765NP151 = Browning Auto-5, Magnum 12 model in 12 GA X 3", produced in 1998 in Japan by Miroku Firearms Manufacturing. - when the serial number rationalization of the firearm being examined is different from that described above, this would indicate that the firearm may have been manufactured in Europe by Fabrique Nationale, Herstal (FN) between 1904 and 1975.
Shots	- tubular magazine mounted under the barrel.
Remarks	- The Auto-5 Light 20 Skeet has a skeet choke and ventilated rib. A change in the pistol grip from round to flat is a tipoff to year of manufacture pre- or post 1967. May be found with engraving and better wood as the Grade I up to Grade IV.

Notes

Make

- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- model designation markings are dependant on when a particular example was produced. Variations include, no "Auto-5" markings but marked "Magnum" on the receiver/frame; "Auto-5" marked on the barrel near the chamber and "Magnum" on the receiver/frame.
- the shotgun is entirely blued or blued with a satin silver receiver/frame, plain or with slight engraving.
- the barrel may be plain, with rifle sights or ventilated rib.
- the stock and forearm are walnut with or without checkering depending on when the firearm was produced.

Manufacturer

- manufacturer may only be denoted by "Made in Belgium" marked on the barrel.
- manufactured by Fabrique Nationale Herstal (FN) from 1958 to 1975/6 when rising costs led to production of this and several other models being moved to Miroku Firearms Manufacturing of Japan.

Action

- recoil operated.

Serial Number

- serial number is marked on the side or underside of the receiver/frame.
- 1) serial number rationalization for Belgium (FN) manufactured Auto-5s is as follows:
- a) Auto-5s in 12 GA manufactured from 1903 to 1957, serial number from 1 to 463,700.
- b) Auto-5s in 16 GA manufactured from 1903 to 1947, serial number from 1 to 130,616, and from 1947 to 1953, serial number range from X1 to X99,999.
- c) Standard Twelve manufactured from 1947 to 1956, s/n range from H1 to H100,000, and from 1956 to 1958, s/n range from M1 to M99,999.
- d) Light Twelve manufactured from 1953 to 1956, s/n range from L1 to L99,877, and from 1956 to 1958, s/n range from G1 to G99,663.
- e) Standard Sixteen manufactured from 1953 to 1957/58, s/n range from R1 to R99,999, and T1 to T10,900.
- f) Sweet Sixteen manufactured from 1953 to 1957/58, s/n range from S1 to S99,908, and A1 to A10,900.
- g) Auto-5s manufactured from 1958 to 1976, the serial number consisted of a year code consisting of a single or double number and a letter code followed by a five digit number. Letter code: M = Standard Twelve, G = Light Twelve, V = Magnum Twelve, R = Standard Sixteen, S = Sweet Sixteen, Z = Light Twenty; and X = Magnum Twenty. Examples: 8M = 1958 / Standard Twelve, 69M = 1969 / Standard Twelve, and "0M89115" = 1960 / Standard Twelve.
- 2) serial number rationalization for Remington manufactured Auto-5s is as follows: s/n range for 12 GA (B5,000 to G43,129), s/n range for 16 GA (A5,000 to A19,450), and s/n range for 20 GA (C5,000 to C16,152).
- 3) serial number rationalization for Miroku manufactured Auto-5s is as follows: serial number consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a 2 letter code for the year and a three character code (usually three digits) which is the product code, eg. 00348NN161 = Auto-5 Magnum Twelve manufactured in 1999.

Calibre

- calibre designation is marked on the barrel.
- the Auto-5 was introduced in:
- 12 GA X 2 3/4" circa 1903.
- 12 GA X 3" circa 1958.
- 16 GA circa 1908/1909.
- 20 GA X 2 3/4" circa 1958.
- 20 GA x 3" circa 1967.
- Note: 16 GA was first offered in 2 9/16" length and later in 2 3/4".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- tubular magazine mounted under the barrel.
- Auto-5 shotguns manufactured by Fabrique Nationale Herstal (FN) of Belgium were available in a variety of shot capacities.
- Auto-5 (Two Shot) variant holds a total of two (2) cartridges: one (1) cartridge in the chamber and one (1) cartridge in the tubular magazine, manufactured between 1903 and 1913.
- Auto-5 (Three Shot) variant holds a total of three (3) cartridges: one (1) cartridge in the chamber and two (2) cartridges in the tubular magazine, manufactured between 1932 and 1940.
- Auto-5 (Five Shot) variant holds a total of five (5) cartridges: one (1) cartridge in the chamber and four (4) cartridges in the tubular magazine, manufactured between 1903 and 1976.

- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- Made 1958 to present. In 1975 production moved to Japan from Belgium. 'MAGNUM' is engraved on the top centre of the left side of the receiver.

Serial Number

- serial number is marked on the side or underside of the receiver/frame.
- 1) serial number rationalization for Belgium (FN) manufactured Auto-5s is as follows:
- a) Auto-5s in 12 GA manufactured from 1903 to 1957, serial number from 1 to 463,700.
- b) Auto-5s in 16 GA manufactured from 1903 to 1947, serial number from 1 to 130,616, and from 1947 to 1953, serial number range from X1 to X99,999.
- c) Standard Twelve manufactured from 1947 to 1956, s/n range from H1 to H100,000, and from 1956 to 1958, s/n range from M1 to M99,999.
- d) Light Twelve manufactured from 1953 to 1956, s/n range from L1 to L99,877, and from 1956 to 1958, s/n range from G1 to G99,663.
- e) Standard Sixteen manufactured from 1953 to 1957/58, s/n range from R1 to R99,999, and T1 to T10,900.
- f) Sweet Sixteen manufactured from 1953 to 1957/58, s/n range from S1 to S99,908, and A1 to A10,900.
- g) Auto-5s manufactured from 1958 to 1976, the serial number consisted of a year code consisting of a single or double number and a letter code followed by a five digit number. Letter code: M = Standard Twelve, G = Light Twelve, V = Magnum Twelve, R = Standard Sixteen, S = Sweet Sixteen, Z = Light Twenty; and X = Magnum Twenty. Examples: 8M = 1958 / Standard Twelve, 69M = 1969 / Standard Twelve, and "0M89115" = 1960 / Standard Twelve.
- 2) serial number rationalization for Remington manufactured Auto-5s is as follows: s/n range for 12 GA (B5,000 to G43,129), s/n range for 16 GA (A5,000 to A19,450), and s/n range for 20 GA (C5,000 to C16,152).
- 3) serial number rationalization for Miroku manufactured Auto-5s is as follows: serial number consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a 2 letter code for the year and a three character code (usually three digits) which is the product code, eg. 00348NN161 = Auto-5 Magnum Twelve manufactured in 1999.

Barrel

- The most common barrel length was 28" but were available in 26", 30" and 32".

Calibre

- calibre designation is marked on the barrel.
- the Auto-5 was introduced in:
- 12 GA X 2 3/4" circa 1903.
- 12 GA X 3" circa 1958.
- 16 GA circa 1908/1909.
- 20 GA X 2 3/4" circa 1958.
- 20 GA x 3" circa 1967.
- Note: 16 GA was first offered in 2 9/16" length and later in 2 3/4".

Shots

- tubular magazine mounted under the barrel.
- Auto-5 shotguns manufactured by Fabrique Nationale Herstal (FN) of Belgium were available in a variety of shot capacities.
- Auto-5 (Two Shot) variant holds a total of two (2) cartridges: one (1) cartridge in the chamber and one (1) cartridge in the tubular magazine, manufactured between 1903 and 1913.
- Auto-5 (Three Shot) variant holds a total of three (3) cartridges: one (1) cartridge in the chamber and two (2) cartridges in the tubular magazine, manufactured between 1932 and 1940.
- Auto-5 (Five Shot) variant holds a total of five (5) cartridges: one (1) cartridge in the chamber and four (4) cartridges in the tubular magazine, manufactured between 1903 and 1976.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - Manufacturer name, adress, calibre and patent dates. May have as address: St. Louis, Missouri 1952-1958 St. Louis, Missouri and Montreal P.Q. 1959-1968 Morgan, Utah and Montreal P.Q. 1969-1975

Remarks - The Auto-5 Magnum is offered in various levels of embelishment from Grade I to Grade IV. The guns differ only in engraving and wood quality from Standard model Auto-5 magnum and are so marked. Some guns were purchased with a solid rib or ventilated rib option in place of plain barrel.

Make	- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennesee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Company was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- manufactured from 1958 to present. In 1975, production moved to Japan from Belgium. "Magnum" is engraved on the top centre of the left side of the receiver.
Manufacturer	- manufacturer's name is not usually marked on the firearm. - "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.
Action	- recoil operated.
Serial Number	- serial number is usually marked on the underside of the receiver/frame. - Miroku of Japan (Auto-5 production from 1976 to 1998) serial number rationalization is as follows: - serial number usually consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a two (2) letter code for the year and a three character code (usually three digits) which is the product code. - example No 1): - 00348NN161 = Browning Auto-5, Magnum 20 model, in 20 GA X 3", produced in 1999 in Japan by Miroku Firearms Manufacturing. - example No 2): - 01765NP151 = Browning Auto-5, Magnum 12 model in 12 GA X 3", produced in 1998 in Japan by Miroku Firearms Manufacturing. - when the serial number rationalization of the firearm being examined is different from that described above, this would indicate that the firearm may have been manufactured in Europe by Fabrique Nationale, Herstal (FN) between 1904 and 1975.
Barrel	- the most common barrel length was 28" but were available in 26", 30" and 32".
Shots	- tubular magazine mounted under the barrel.
Other Markings	- manufacturer name, adress, calibre and patent dates. May have as address: St. Louis, Missouri 1952-1958 St. Louis, Missouri and Montreal P.Q. 1959-1968 Morgan, Utah and Montreal P.Q. 1969-1975
Remarks	- the Auto-5 Magnum is offered in various levels of embellishment from Grade I to Grade IV. - the guns differ only in engraving and wood quality from Standard Model Auto-5 magnum and are so marked. - some guns were purchased with a solid rib or ventilated rib option in place of plain barrel.

Notes

Make

- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- The word ' Magnum' is engraved on left side of receiver.

Action

- Recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the side or underside of the receiver/frame.
- 1) serial number rationalization for Belgium (FN) manufactured Auto-5s is as follows:
- a) Auto-5s in 12 GA manufactured from 1903 to 1957, serial number from 1 to 463,700.
- b) Auto-5s in 16 GA manufactured from 1903 to 1947, serial number from 1 to 130,616, and from 1947 to 1953, serial number range from X1 to X99,999.
- c) Standard Twelve manufactured from 1947 to 1956, s/n range from H1 to H100,000, and from 1956 to 1958, s/n range from M1 to M99,999.
- d) Light Twelve manufactured from 1953 to 1956, s/n range from L1 to L99,877, and from 1956 to 1958, s/n range from G1 to G99,663.
- e) Standard Sixteen manufactured from 1953 to 1957/58, s/n range from R1 to R99,999, and T1 to T10,900.
- f) Sweet Sixteen manufactured from 1953 to 1957/58, s/n range from S1 to S99,908, and A1 to A10,900.
- g) Auto-5s manufactured from 1958 to 1976, the serial number consisted of a year code consisting of a single or double number and a letter code followed by a five digit number. Letter code: M = Standard Twelve, G = Light Twelve, V = Magnum Twelve, R = Standard Sixteen, S = Sweet Sixteen, Z = Light Twenty; and X = Magnum Twenty. Examples: 8M = 1958 / Standard Twelve, 69M = 1969 / Standard Twelve, and "0M89115" = 1960 / Standard Twelve.
- 2) serial number rationalization for Remington manufactured Auto-5s is as follows: s/n range for 12 GA (B5,000 to G43,129), s/n range for 16 GA (A5,000 to A19,450), and s/n range for 20 GA (C5,000 to C16,152).
- 3) serial number rationalization for Miroku manufactured Auto-5s is as follows: serial number consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a 2 letter code for the year and a three character code (usually three digits) which is the product code, eg. 00348NN161 = Auto-5 Magnum Twelve manufactured in 1999.

Calibre

- calibre designation is marked on the barrel.
- the Auto-5 was introduced in:
- 12 GA X 2 3/4" circa 1903.
- 12 GA X 3" circa 1958.
- 16 GA circa 1908/1909.
- 20 GA X 2 3/4" circa 1958.
- 20 GA x 3" circa 1967.
- Note: 16 GA was first offered in 2 9/16" length and later in 2 3/4".

Shots

- tubular magazine mounted under the barrel.
- Auto-5 shotguns manufactured by Fabrique Nationale Herstal (FN) of Belgium were available in a variety of shot capacities.
- Auto-5 (Two Shot) variant holds a total of two (2) cartridges: one (1) cartridge in the chamber and one (1) cartridge in the tubular magazine, manufactured between 1903 and 1913.
- Auto-5 (Three Shot) variant holds a total of three (3) cartridges: one (1) cartridge in the chamber and two (2) cartridges in the tubular magazine, manufactured between 1932 and 1940.
- Auto-5 (Five Shot) variant holds a total of five (5) cartridges: one (1) cartridge in the chamber and four (4) cartridges in the tubular magazine, manufactured between 1903 and 1976.

Other Markings

- Manufacturer name, adress, calibre and patent dates. May have as address: St. Louis, Missouri 1952-1958 St. Louis, Missouri and Montreal P.Q. 1959-1968 Morgan, Utah and Montreal P.Q. 1969-1975

Remarks

- The Auto-5 Magnum Buck Special came with cylinder choke and rifle sights. Various levels of embellishment from Grade I to Grade IV were offered with those guns differing only in engraving and wood quality from regular model Auto-5's.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "Magnum Twenty" in script is engraved on the left side of the receiver/frame.

Serial Number

- serial number is marked on the side or underside of the receiver/frame.
- 1) serial number rationalization for Belgium (FN) manufactured Auto-5s is as follows:
- a) Auto-5s in 12 GA manufactured from 1903 to 1957, serial number from 1 to 463,700.
- b) Auto-5s in 16 GA manufactured from 1903 to 1947, serial number from 1 to 130,616, and from 1947 to 1953, serial number range from X1 to X99,999.
- c) Standard Twelve manufactured from 1947 to 1956, s/n range from H1 to H100,000, and from 1956 to 1958, s/n range from M1 to M99,999.
- d) Light Twelve manufactured from 1953 to 1956, s/n range from L1 to L99,877, and from 1956 to 1958, s/n range from G1 to G99,663.
- e) Standard Sixteen manufactured from 1953 to 1957/58, s/n range from R1 to R99,999, and T1 to T10,900.
- f) Sweet Sixteen manufactured from 1953 to 1957/58, s/n range from S1 to S99,908, and A1 to A10,900.
- g) Auto-5s manufactured from 1958 to 1976, the serial number consisted of a year code consisting of a single or double number and a letter code followed by a five digit number. Letter code: M = Standard Twelve, G = Light Twelve, V = Magnum Twelve, R = Standard Sixteen, S = Sweet Sixteen, Z = Light Twenty; and X = Magnum Twenty. Examples: 8M = 1958 / Standard Twelve, 69M = 1969 / Standard Twelve, and "0M89115" = 1960 / Standard Twelve.
- 2) serial number rationalization for Remington manufactured Auto-5s is as follows: s/n range for 12 GA (B5,000 to G43,129), s/n range for 16 GA (A5,000 to A19,450), and s/n range for 20 GA (C5,000 to C16,152).
- 3) serial number rationalization for Miroku manufactured Auto-5s is as follows: serial number consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a 2 letter code for the year and a three character code (usually three digits) which is the product code, eg. 00348NN161 = Auto-5 Magnum Twelve manufactured in 1999.

Calibre

- calibre designation is marked on the barrel.
- the Auto-5 was introduced in:
- 12 GA X 2 3/4" circa 1903.
- 12 GA X 3" circa 1958.
- 16 GA circa 1908/1909.
- 20 GA X 2 3/4" circa 1958.
- 20 GA x 3" circa 1967.
- Note: 16 GA was first offered in 2 9/16" length and later in 2 3/4".

Shots

- tubular magazine mounted under the barrel.
- Auto-5 shotguns manufactured by Fabrique Nationale Herstal (FN) of Belgium were available in a variety of shot capacities.
- Auto-5 (Two Shot) variant holds a total of two (2) cartridges: one (1) cartridge in the chamber and one (1) cartridge in the tubular magazine, manufactured between 1903 and 1913.
- Auto-5 (Three Shot) variant holds a total of three (3) cartridges: one (1) cartridge in the chamber and two (2) cartridges in the tubular magazine, manufactured between 1932 and 1940.
- Auto-5 (Five Shot) variant holds a total of five (5) cartridges: one (1) cartridge in the chamber and four (4) cartridges in the tubular magazine, manufactured between 1903 and 1976.

Remarks

- The Auto-5 Magnum 20 may be found in plain (or Grade 1) or up to Grade 4 differing in the amounts of engraving and beauty of the wood chosen. A change in the pistol grip from round to flat is a tipoff to manufacture post 1967.

Notes

Make

- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- manufactured from 1976 to present. - "MAGNUM" is engraved on the top centre of the left side of the receiver/frame.
Manufacturer	- manufacturer's name is not usually marked on the firearm. - "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.
Action	- recoil operated.
Serial Number	- serial number is usually marked on the underside of the receiver/frame. - Miroku of Japan (Auto-5 production from 1976 to 1998) serial number rationalization is as follows: - serial number usually consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a two (2) letter code for the year and a three character code (usually three digits) which is the product code. - example No 1): - 00348NN161 = Browning Auto-5, Magnum 20 model, in 20 GA X 3", produced in 1999 in Japan by Miroku Firearms Manufacturing. - example No 2): - 01765NP151 = Browning Auto-5, Magnum 12 model in 12 GA X 3", produced in 1998 in Japan by Miroku Firearms Manufacturing. - when the serial number rationalization of the firearm being examined is different from that described above, this would indicate that the firearm may have been manufactured in Europe by Fabrique Nationale, Herstal (FN) between 1904 and 1975.
Barrel	- the most common barrel length was 28" but were available in 26", 30" and 32".
Shots	- tubular magazine mounted under the barrel.
Other Markings	- manufacturer's name, address, calibre and patent dates.
Remarks	- the Auto-5 Magnum 20 may be found in plain (or Grade 1) or up to Grade 4 differing in the amounts of engraving and beauty of the wood chosen. A change in the pistol grip from round to flat is a tipoff to manufacture post 1967.

Model

- "MAGNUM" is engraved on left side of the receiver/frame.
- offered with cylinder choke and rifle sights and various levels of embellishment from Grade 1 to Grade 4.

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the side or underside of the receiver/frame.
- 1) serial number rationalization for Belgium (FN) manufactured Auto-5s is as follows:
- a) Auto-5s in 12 GA manufactured from 1903 to 1957, serial number from 1 to 463,700.
- b) Auto-5s in 16 GA manufactured from 1903 to 1947, serial number from 1 to 130,616, and from 1947 to 1953, serial number range from X1 to X99,999.
- c) Standard Twelve manufactured from 1947 to 1956, s/n range from H1 to H100,000, and from 1956 to 1958, s/n range from M1 to M99,999.
- d) Light Twelve manufactured from 1953 to 1956, s/n range from L1 to L99,877, and from 1956 to 1958, s/n range from G1 to G99,663.
- e) Standard Sixteen manufactured from 1953 to 1957/58, s/n range from R1 to R99,999, and T1 to T10,900.
- f) Sweet Sixteen manufactured from 1953 to 1957/58, s/n range from S1 to S99,908, and A1 to A10,900.
- g) Auto-5s manufactured from 1958 to 1976, the serial number consisted of a year code consisting of a single or double number and a letter code followed by a five digit number. Letter code: M = Standard Twelve, G = Light Twelve, V = Magnum Twelve, R = Standard Sixteen, S = Sweet Sixteen, Z = Light Twenty; and X = Magnum Twenty. Examples: 8M = 1958 / Standard Twelve, 69M = 1969 / Standard Twelve, and "0M89115" = 1960 / Standard Twelve.
- 2) serial number rationalization for Remington manufactured Auto-5s is as follows: s/n range for 12 GA (B5,000 to G43,129), s/n range for 16 GA (A5,000 to A19,450), and s/n range for 20 GA (C5,000 to C16,152).
- 3) serial number rationalization for Miroku manufactured Auto-5s is as follows: serial number consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a 2 letter code for the year and a three character code (usually three digits) which is the product code, eg. 00348NN161 = Auto-5 Magnum Twelve manufactured in 1999.

Calibre

- calibre designation is marked on the barrel.
- the Auto-5 was introduced in:
- 12 GA X 2 3/4" circa 1903.
- 12 GA X 3" circa 1958.
- 16 GA circa 1908/1909.
- 20 GA X 2 3/4" circa 1958.
- 20 GA x 3" circa 1967.
- note: 16 GA was first offered in 2 9/16" length and later in 2 3/4".

Shots

- tubular magazine mounted under the barrel.
- Auto-5 shotguns manufactured by Fabrique Nationale Herstal (FN) of Belgium were available in a variety of shot capacities.
- Auto-5 (Two Shot) variant holds a total of two (2) cartridges: one (1) cartridge in the chamber and one (1) cartridge in the tubular magazine, manufactured between 1903 and 1913.
- Auto-5 (Three Shot) variant holds a total of three (3) cartridges: one (1) cartridge in the chamber and two (2) cartridges in the tubular magazine, manufactured between 1932 and 1940.
- Auto-5 (Five Shot) variant holds a total of five (5) cartridges: one (1) cartridge in the chamber and four (4) cartridges in the tubular magazine, manufactured between 1903 and 1976.

Notes

Make

- "BROWNING" is marked on the receiver/frame, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).

Model

- manufactured from 1903 until 1969.
- model designation was not marked on the firearm prior to 1958 when a model code was introduced.
- after 1958 "Auto-5 Standard Twelve" can be distinguished by a one or two-digit year of manufacture as well as the letter "M" denoting "Standard Twelve" in the serial number.
- features include: round tapered take-down barrel; various fixed and removable chokes; plain barrel, ventilated rib or raised matted rib; metal bead front sight, also available with centre bead; solid top receiver/frame with right side ejection port and bottom loading port; action release button located on the right side of the receiver/frame; safety located in front of the trigger guard (pre 1951) or cross bolt safety on the rear of the trigger guard (1951-1976); with or without magazine cut-off lever; magazine cut-off lever is located on the left side of the receiver/frame; blued barrel and receiver/frame; plain or engraved receiver/frame; engraving was not available until circa 1910; checkered or smooth forearm and straight or pistol grip stock; available with sling loops.
- the Auto-5 came in various grades from Grade I to Grade IV. The guns differ only in engraving and wood quality.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "Fabrique Nationale d'Armes de Guerre Herstal Belgique" or "Fabrique Nationale sa d'Armes de Guerre Herstal Belgique" over "Browning's Patent Depose" was marked on the receiver/frame between 1903 and 1926.
- the manufacturer's name is usually not marked on Auto-5 shotguns manufactured between 1927 and 1975.
- "Made in Belgium" is usually marked on the barrel.

Action

- recoil operated.

Serial Number

- serial number is marked on the side or underside of the receiver/frame.
- serial number rationalization in 1903 began at 1 and went to 463700.
- serial number rationalization from 1954 to 1956 letter prefix "H" followed by five digits.
- serial number rationalization from 1957 to 1958 letter prefix "M" followed by five digits
- serial number rationalization from 1958 included year of manufature followed by "M" and then five digits: 8M=1958, 9M=1959, 0M=1970, 1M=1971, 2M=1972, 3M=1973, 4M=1974, 5M=1975, 6M=1976, 7M=1977, 68M=1968, 69M=1969.

Calibre

- calibre designation is marked on the barrel.
- the Auto-5 was introduced in:
- 12 GA X 2 3/4" circa 1903.
- 12 GA X 3" circa 1958.
- 16 GA circa 1908/1909.
- 20 GA X 2 3/4" circa 1958.
- 20 GA x 3" circa 1967.
- Note: 16 GA was first offered in 2 9/16" length and later in 2 3/4".

Shots

- tubular magazine mounted under the barrel.
- Auto-5 shotguns manufactured by Fabrique Nationale Herstal (FN) of Belgium were available in a variety of shot capacities.
- Auto-5 (Two Shot) variant holds a total of two (2) cartridges: one (1) cartridge in the chamber and one (1) cartridge in the tubular magazine, manufactured between 1903 and 1913.
- Auto-5 (Three Shot) variant holds a total of three (3) cartridges: one (1) cartridge in the chamber and two (2) cartridges in the tubular magazine, manufactured between 1932 and 1940.
- Auto-5 (Five Shot) variant holds a total of five (5) cartridges: one (1) cartridge in the chamber and four (4) cartridges in the tubular magazine, manufactured between 1903 and 1976.

Remarks

- The model Auto-5 Standard 12 is blued with light engraving but may be found with various levels of embelishment from Grade 1 to Grade 4. These grades differ only in engraving and wood quality from Standard model Auto-5's. Some guns were purchased with a solid rib, rifle sights or ventilated rib option in place of plain barrels.

- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- manufactured from 1936 to 1975.
- similar to the Standard Model. A change in the pistol grip from round to flat is a tipoff to year of manufacture pre or post 1967.

Action

- long recoil operated.

Serial Number

- serial number is marked on the side or underside of the receiver/frame.
- 1) serial number rationalization for Belgium (FN) manufactured Auto-5s is as follows:
- a) Auto-5s in 12 GA manufactured from 1903 to 1957, serial number from 1 to 463,700.
- b) Auto-5s in 16 GA manufactured from 1903 to 1947, serial number from 1 to 130,616, and from 1947 to 1953, serial number range from X1 to X99,999.
- c) Standard Twelve manufactured from 1947 to 1956, s/n range from H1 to H100,000, and from 1956 to 1958, s/n range from M1 to M99,999.
- d) Light Twelve manufactured from 1953 to 1956, s/n range from L1 to L99,877, and from 1956 to 1958, s/n range from G1 to G99,663.
- e) Standard Sixteen manufactured from 1953 to 1957/58, s/n range from R1 to R99,999, and T1 to T10,900.
- f) Sweet Sixteen manufactured from 1953 to 1957/58, s/n range from S1 to S99,908, and A1 to A10,900.
- g) Auto-5s manufactured from 1958 to 1976, the serial number consisted of a year code consisting of a single or double number and a letter code followed by a five digit number. Letter code: M = Standard Twelve, G = Light Twelve, V = Magnum Twelve, R = Standard Sixteen, S = Sweet Sixteen, Z = Light Twenty; and X = Magnum Twenty. Examples: 8M = 1958 / Standard Twelve, 69M = 1969 / Standard Twelve, and "0M89115" = 1960 / Standard Twelve.
- 2) serial number rationalization for Remington manufactured Auto-5s is as follows: s/n range for 12 GA (B5,000 to G43,129), s/n range for 16 GA (A5,000 to A19,450), and s/n range for 20 GA (C5,000 to C16,152).
- 3) serial number rationalization for Miroku manufactured Auto-5s is as follows: serial number consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a 2 letter code for the year and a three character code (usually three digits) which is the product code, eg. 00348NN161 = Auto-5 Magnum Twelve manufactured in 1999.

Calibre

- calibre designation is marked on the barrel.
- the Auto-5 was introduced in:
- 12 GA X 2 3/4" circa 1903.
- 12 GA X 3" circa 1958.
- 16 GA circa 1908/1909.
- 20 GA X 2 3/4" circa 1958.
- 20 GA x 3" circa 1967.
- Note: 16 GA was first offered in 2 9/16" length and later in 2 3/4".

Shots

- tubular magazine mounted under the barrel.
- Auto-5 shotguns manufactured by Fabrique Nationale Herstal (FN) of Belgium were available in a variety of shot capacities.
- Auto-5 (Two Shot) variant holds a total of two (2) cartridges: one (1) cartridge in the chamber and one (1) cartridge in the tubular magazine, manufactured between 1903 and 1913.
- Auto-5 (Three Shot) variant holds a total of three (3) cartridges: one (1) cartridge in the chamber and two (2) cartridges in the tubular magazine, manufactured between 1932 and 1940.
- Auto-5 (Five Shot) variant holds a total of five (5) cartridges: one (1) cartridge in the chamber and four (4) cartridges in the tubular magazine, manufactured between 1903 and 1976.

Notes

Make

- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- manufactured from 1987 to 1992.
Manufacturer	- manufacturer's name is not usually marked on the firearm. - "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.
Action	- recoil operated.
Serial Number	- serial number is usually marked on the underside of the receiver/frame. - Miroku of Japan (Auto-5 production from 1976 to 1998) serial number rationalization is as follows: - serial number usually consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a two (2) letter code for the year and a three character code (usually three digits) which is the product code. - example No 1): - 00348NN161 = Browning Auto-5, Magnum 20 model, in 20 GA X 3", produced in 1999 in Japan by Miroku Firearms Manufacturing. - example No 2): - 01765NP151 = Browning Auto-5, Magnum 12 model in 12 GA X 3", produced in 1998 in Japan by Miroku Firearms Manufacturing. - when the serial number rationalization of the firearm being examined is different from that described above, this would indicate that the firearm may have been manufactured in Europe by Fabrique Nationale, Herstal (FN) between 1904 and 1975.
Barrel	- The most common barrel length was 28" but were available in 22", 26"and 30".
Shots	- tubular magazine mounted under the barrel.
Remarks	- the Auto-5 Sweet 16 is built on the Standard Light action and is available with a 26, 28", 30" and 30" barrels.

- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured in 1988/89.
- 4,500 were produced.
- "SWEET SIXTEEN" in a banner is marked on the left side of the receiver/frame.
- "DUCKS UNLIMITED" in a banner is marked on the right side of the receiver/frame.
- "Auto-5 Light Twenty Ducks Unlimited" is a high grade guns differ only in engraving and wood quality from the more standard model Auto-5's.
- "Auto-5 Light Twenty Ducks Unlimited" models have special engraving.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- recoil operated.

Serial Number

- serial number incorporates the letters "DU".
- serial number is usually marked on the underside of the receiver/frame.
- Miroku of Japan (Auto-5 production from 1976 to 1998) serial number rationalization is as follows:
- serial number usually consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a two (2) letter code for the year and a three character code (usually three digits) which is the product code.
- example No 1): - 00348NN161 = Browning Auto-5, Magnum 20 model, in 20 GA X 3", produced in 1999 in Japan by Miroku Firearms Manufacturing.
- example No 2): - 01765NP151 = Browning Auto-5, Magnum 12 model in 12 GA X 3", produced in 1998 in Japan by Miroku Firearms Manufacturing.
- when the serial number rationalization of the firearm being examined is different from that described above, this would indicate that the firearm may have been manufactured in Europe by Fabrique Nationale, Herstal (FN) between 1904 and 1975.

Shots

- tubular magazine mounted under the barrel.

Other Markings

- Manufacturer name, address, calibre and patent dates. Made in Japan.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- model designation was not marked on Auto-5's manufactured before 1969.
- "BROWNING AUTO-5" was marked on the barrel from 1969 to 1976.
- manufactured between 1903 and 1940 by FN.
- manufactured between 1940 and 1952 by Remington.
- manufactured between 1946 and 1976 by FN.
- manufactured between 1976 and 1999 by Miroku.
- features include: round tapered take-down barrel; various fixed and removable chokes; plain barrel, ventilated rib or raised matted rib; metal bead front sight, also available with centre bead; solid top receiver/frame with right side ejection port and bottom loading port; action release button located on the right side of the receiver/frame; safety located in front of the trigger guard (pre-1951) or cross bolt safety on the rear of the trigger guard (1951-1976); with or without magazine cut-off lever; magazine cut-off lever is located on the left side of the receiver/frame; blued barrel and receiver/frame; plain or engraved receiver/frame; engraving was not available until circa 1910; checkered or smooth forearm and straight or pistol grip stock; available with sling loops.
- the Auto-5 came in various grades from Grade I to Grade IV. The guns differ only in engraving and wood quality from Standard model Auto-5's.
- the Browning Automatic (Auto-5) shotgun was offered in four variations circa 1903/1905, No. 0 Messenger Gun, No.1 Regular Gun, No. 2 Trap Gun, and the Two Shot Gun.

Action

- recoil operated.

Serial Number

- serial number is marked on the side or underside of the receiver/frame.
- 1) serial number rationalization for Belgium (FN) manufactured Auto-5s is as follows:
- a) Auto-5s in 12 GA manufactured from 1903 to 1957, serial number from 1 to 463,700.
- b) Auto-5s in 16 GA manufactured from 1903 to 1947, serial number from 1 to 130,616, and from 1947 to 1953, serial number range from X1 to X99,999.
- c) Standard Twelve manufactured from 1947 to 1956, s/n range from H1 to H100,000, and from 1956 to 1958, s/n range from M1 to M99,999.
- d) Light Twelve manufactured from 1953 to 1956, s/n range from L1 to L99,877, and from 1956 to 1958, s/n range from G1 to G99,663.
- e) Standard Sixteen manufactured from 1953 to 1957/58, s/n range from R1 to R99,999, and T1 to T10,900.
- f) Sweet Sixteen manufactured from 1953 to 1957/58, s/n range from S1 to S99,908, and A1 to A10,900.
- g) Auto-5s manufactured from 1958 to 1976, the serial number consisted of a year code consisting of a single or double number and a letter code followed by a five digit number. Letter code: M = Standard Twelve, G = Light Twelve, V = Magnum Twelve, R = Standard Sixteen, S = Sweet Sixteen, Z = Light Twenty; and X = Magnum Twenty. Examples: 8M = 1958 / Standard Twelve, 69M = 1969 / Standard Twelve, and "0M89115" = 1960 / Standard Twelve.
- 2) serial number rationalization for Remington manufactured Auto-5s is as follows: s/n range for 12 GA (B5,000 to G43,129), s/n range for 16 GA (A5,000 to A19,450), and s/n range for 20 GA (C5,000 to C16,152).
- 3) serial number rationalization for Miroku manufactured Auto-5s is as follows: serial number consists of ten characters; the first five are the numeric portion of the serial number which starts at 00001 each year and rises with production to 99999, the next five characters consist of a 2 letter code for the year and a three character code (usually three digits) which is the product code, eg. 00348NN161 = Auto-5 Magnum Twelve manufactured in 1999.

Calibre

- calibre designation is marked on the barrel.
- the Auto-5 was introduced in:
- 12 GA X 2 3/4" circa 1903.
- 12 GA X 3" circa 1958.
- 16 GA circa 1908/1909.
- 20 GA X 2 3/4" circa 1958.
- 20 GA x 3" circa 1967.
- note: 16 GA was first offered in 2 9/16" length and later in 2 3/4".

Shots

- tubular magazine mounted under the barrel.
- Auto-5 shotguns manufactured by Fabrique Nationale Herstal (FN) of Belgium were available in a variety of shot capacities.
- Auto-5 (Two Shot) variant holds a total of two (2) cartridges: one (1) cartridge in the chamber and one (1) cartridge in the tubular magazine, manufactured between 1903 and 1913.
- Auto-5 (Three Shot) variant holds a total of three (3) cartridges: one (1) cartridge in the chamber and two (2) cartridges in the tubular magazine, manufactured between 1932 and 1940.
- Auto-5 (Five Shot) variant holds a total of five (5) cartridges: one (1) cartridge in the chamber and four (4) cartridges in the tubular magazine, manufactured between 1903 and 1976.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- Belgian proof marks will be may be marked on the barrel, receiver/frame and the breech mechanism on this and all other Belgian manufactured Brownings.
- barrel markings may include:
- circa 1903, first 10, 000 shotguns: "Browning Automatic Arms Co." over "Ogden, Utah U.S.A." and "Made in Belgium Browning Patent".
- after the first 10,000 shotguns: "Browning Bros. Ogden, Utah U.S.A." and "Made in Belgium" over "Browning Patent".
- 1927 to 1950: "Browning Arms Company" over "Ogden, Utah U.S.A." and "Made in Belgium".
- 1951 to 1958: "Browning Arms Company St. Louis, Mo" and "Made in Belgium".
- 1959 to 1968: "Browning Arms Company" over "St Louis Mo & Montreal P.Q." and "Made in Belgium".
- 1969 to 1975 "Browning Arms Company" over "St Louis Mo & Montreal P.Q." and "Browning Auto-5" over "Browning Patent".
- receiver/frame markings:
- circa 1903 to 1926" "Fabrique Nationale d'Armes" over "de Guerre Herstal Belgique" over "Browning's Patent Depose" or "Fabrique Nationale sa d'Armes" over "de Guerre Herstal Belgique" over "Browning's Patent Depose".
- circa 1927: "Brownings Arms Company St Louis Mo" over "Browning" over "Trade", (bust of John Moses Browning in a circle), and "Mark".

Remarks

- the Browning Automatic (Auto-5) shotgun was offered in four variations circa 1903/1905, No. 0 Messenger Gun, No.1 Regular Gun, No. 2 Trap Gun, and the Two Shot Gun:
- No. 0, Messenger Gun (Riot Gun): 12 Gauge, 508mm (20") cylinder-bore take-down barrel; matted receiver/frame; smooth forearm and straight grip stock; five shot capacity.
- No. 1, Regular Gun: 12 Gauge, 711mm (28") take-down barrel with full, modified or cylinder chokes; matted receiver/frame; smooth forearm and straight grip stock with rubber butt pad; five shot capacity.
- No. 2, Trap Gun: 12 Gauge, 711mm (28") take-down barrel; matted receiver/frame; checkered forearm and straight grip stock with rubber butt pad; five shot capacity.
- Two Shot Gun: 12 Gauge, 711mm (28") take-down barrel with full, modified or cylinder chokes; matted receiver/frame; checkered or smooth forearm and straight grip stock with rubber butt pad; two shot capacity. This is the Auto-5 with a reduced magazine capacity.

Notes

Make

- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this model was to commemorate the 2,000,000th Auto-5 produced in Belgium.
- introduced in 1970.
- features include: round tapered barrel with modified choke, ventilated rib, metal bead front sight and ivory centre bead; solid top receiver/frame with right side ejection port and bottom loading port; action release button located on the right side of the receiver/frame, cross bolt safety located on the rear of the trigger guard; magazine cut off lever located on the left side of the receiver/frame; polished blue barrel and receiver/frame; engraved and gold inlaid receiver/frame; checkered high grade walnut forearm and pistol grip stock.

Manufacturer

- the manufacturer's name and address may be marked on the barrel.

Action

- recoil operated.

Serial Number

- serial number is marked on the receiver/frame.
- serial numbers range is from 2,000,000 - 0001 to 2,000,000 - 2,750.
- duplicate serial number will have the letter "X" added.
- total production of 2,503 to 2,504 firearms were manufactured.

Calibre

- calibre designation is marked on the barrel.
- the Auto-5 was introduced in:
- 12 GA X 2 3/4" circa 1903.
- 12 GA X 3" circa 1958.
- 16 GA circa 1908/1909.
- 20 GA X 2 3/4" circa 1958.
- 20 GA x 3" circa 1967.
- Note: 16 GA was first offered in 2 9/16" length and later in 2 3/4".

Shots

- tubular magazine mounted under the barrel.
- Auto-5 shotguns manufactured by Fabrique Nationale Herstal (FN) of Belgium were available in a variety of shot capacities.
- Auto-5 (Two Shot) variant holds a total of two (2) cartridges: one (1) cartridge in the chamber and one (1) cartridge in the tubular magazine, manufactured between 1903 and 1913.
- Auto-5 (Three Shot) variant holds a total of three (3) cartridges: one (1) cartridge in the chamber and two (2) cartridges in the tubular magazine, manufactured between 1932 and 1940.
- Auto-5 (Five Shot) variant holds a total of five (5) cartridges: one (1) cartridge in the chamber and four (4) cartridges in the tubular magazine, manufactured between 1903 and 1976.

Notes

Make

- "BROWNING ARMS COMPANY MORGAN, UTAH & MONTREAL P.Q." over "MADE IN JAPAN" is marked on the left side of the barrel..
- "BROWNING-92" is marked on the right side of the barrel.
- Browning's deer head logo is marked on the loop lever.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the Browning model B-92 was originally introduced in calibre 44 MAG 1978 as a limited edition "Centennial" model to commemorate 100 years of John M. Browning's design genius. The John Browning design that became the Winchester model 1892 was one of the most popular rifles ever produced with over 1,000,000 manufactured between 1892 and 1941. The Browning offering was only produced until 1985. After 1979 Browning offered the standard rifle simply as the B-92 in calibre 44 MAG and 357 MAG. - the model designation was marked on the sample examined as "Browning-92". - features include: blued finish on metalwork (the Centennial edition features an engraved receiver/frame); walnut buttstock and forend with a high gloss finish; barrel mounted blade front sight and open rear sight.
Manufacturer	- manufacturer's name is not usually marked on the firearm. - "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.
Serial Number	- the serial number is marked on the right side of the receiver/frame. - complete serial number rationalization is unknown. - the serial number incorporates a five digit number, a two letter year code and the model code of "167", eg. 06216PY167. - Browning products produced in Japan usually have the year and model codes at the end of the serial number, Belgian and american production usually have these codes at the beginning.
Calibre	- the calibre is marked on the barrel.
Shots	- full length tubular magazine mounted under the barrel.
Importer	- marked on the left side of the barrel.

Model

- "B125" is normally marked on either the sides of the receiver/frame or on the barrel assembly.
- "B" in the model designation denotes "Browning".
- features include: custom fitted buttstock and forend of oiled walnut with checkered grip panels; custom dimension chokes or interchangeable choke tubes; box lock mechanism; top tang mounted opening lever; top tang mounted sliding safety and barrel selector; gold plated single trigger or optional double triggers; fitted recoil pad or checkered butt plate; non-detachable three piece forend wood; matted ventilated top barrel rib with front and mid beads; optional inlaid stock escutcheon; blued steel barrels; automatic ejectors.
- this model was produced with three optional grades of finish on the receiver/frame with varying levels of embellishment and an optional coin finish.

Manufacturer

- the manufacturer's designation is normally marked on the top barrel.

Action

- over and under barrel configuration.

Serial Number

- the serial number is marked on the top of the receiver/frame under the top tang mounted opening lever.
- observed serial number series have consisted of a three number model production code, followed by a two letter year of production code, followed by five numbers.

Calibre

- the calibre designation is normally marked on the upper barrel of the barrel assembly so as to be visible when the firearm is assembled.

Remarks

- the B125 is available only through the Browning custom shop and may be ordered in one of four lettered grades. "Grade A" being a blued receiver/frame with minor embellishments, "Grade B" to "Grade D" having a silvered receiver/frame with progressively more elaborate engraving and embellishment.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "BROWNING" is usually marked on the receiver/frame and on the barrel. - "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennesee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- "B125" is normally marked on either the sides of the receiver/frame or on the barrel assembly. - "B" in the model designation denotes "Browning". - features include: custom fitted butt stock and forend of oiled walnut with checkered grip panels; custom dimension chokes or interchangeable choke tubes; box lock mechanism; top tang mounted opening lever; top tang mounted sliding safety and barrel selector; gold plated single trigger or optional double triggers; fitted recoil pad or checkered butt plate; non-detachable three piece forend wood; matted ventilated top barrel rib with front and mid beads; inlaid stock escutcheon; blued steel barrels; automatic ejectors. - this model was produced with three optional grades of finish on the receiver/frame with varying levels of embellishment and an optional coin finish.
Manufacturer	- the firearm will be marked "Made in Belgium" on the top barrel.
Action	- over and under barrel configuration.
Serial Number	- the serial number is marked on the top of the receiver/frame under the top tang mounted opening lever. - observed serial number series have consisted of a three number model production code, followed by a two letter year of production code, followed by five numbers.
Barrel	- barrels are manufactured with fixed or Invector chokes. The length may also be noted from 660mm to 810mm. Back boring and rib heights are optional.
Calibre	- the calibre designation is normally marked on the upper barrel of the barrel assembly so as to be visible when the firearm is assembled.
Other Markings	- manufacturer name, address, calibre and patent dates. Browning S.A. Herstal Made in Belgium. Trap F1 is boldly impressed on right side of gun.
Remarks	- The Model B125 Special Game was assembled only in the Browning S.A. custom shop with parts from out sourcing. The Browning B125 Special Game Model is similar to other O/U models (box lock, auto ejectors, single selective trigger). All Browning Over and Under models have ventilated ribs and walnut forearms with semi-pistolgrip or straight grip butt stocks.

Notes

Make

- "BROWNING" is usually marked on the receiver/frame and on the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "Browning 2000" is marked on the bottom left side of the receiver/frame.
- manufactured circa 1973 to 1983.
- model is marked on the bottom left of the receiver/frame.
- this is a generic entry for the model B2000, other entries exist which may better describe the firearm.
- features include: checkered walnut with pistol grip; rectangular receiver/frame; cocking handle on the right side of the receiver/frame behind the ejection port and the loading gate is on the left side of the receiver/frame.

Manufacturer

- made in Belgium. Assembled in Portugal.

Action

- gas operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number is found on the underside of the receiver/frame.
- total manufactured 115,000 including all variations.
- the letter denotes the gauge (C is 12 GA, D is 20 GA, E is 28 GA and G is 410 GA) and the numbers reversed indicate the year of manufacture. Therefore "C57" is a 12 GA made in 1975.

Calibre

- calibre is marked on the barrel.

Remarks

- The walnut wood stock is checkered with pistol grip and the receiver/frame is rectangular. The cocking handle is on the right side of the receiver/frame behind the ejection port and the loading gate is on the left side of the receiver/frame.

- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "MOD B.25" is marked on the right side of the top barrel.
- this is a generic entry, other model "B25" entries exist which may better describe the firearm.
- features include: single trigger mechanism; top tang safety/barrel selector; top opening lever; boxlock action with or without false sideplates; straight or pistol grip buttstocks and two piece forend; blued barrels and a variety of receiver/frame finishes and degrees of embellishment.
- this model was produced with three optional grades of finish on the receiver/frame with varying levels of embellishment and an optional coin finish.

Manufacturer

- the manufacturer's designation may be marked either on the barrel assembly or on the receiver/frame.
- markings may appear as the "FN" logo, "MADE IN BELGIUM", or "FABRIQUE NATIONALE HERSTAL BELGIQUE".

Action

- over and under barrel configuration.

Serial Number

- the serial number is marked on the top of the receiver/frame under the top tang mounted opening lever.
- observed serial number series have consisted of a three number model production code, followed by a two letter year of production code, followed by five numbers.

Calibre

- the calibre designation is marked on the barrel assembly.

Remarks

- All Model B25 are manufactured and assembled in Belgium. Most have ventilated ribs and walnut forearms with semi-pistolgrip or straight grip butt stocks. The B25 Model is similar to other Superposed models (box lock, auto ejectors, single selective trigger and ventilated rib) but has the distinction of being manufactured totally in Belgium at FN.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- the "Browning" trade name and/or the "Browning" deer head trade mark logo is marked on the side of the receiver/frame.
- "Browning Arms Company" may be marked on the side of the top barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- the model designation is marked on the barrel assembly and on the underside of the receiver/frame.
- features include: blued steel receiver/frame with gold inlaid engraving; checkered walnut pistol-grip stock and schnabel tipped forearm; blued barrels; top tang mounted opening lever; tang mounted safety/selector; single trigger; interchangeable choke tubes.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- over and under barrel configuration.

Serial Number

- the serial number is engraved on the top tang of the receiver/frame under the top opening lever.
- observed serial number sequences have consisted of five digits followed by a two letter year of production code followed by a three character product code.

Barrel

- barrel length is marked on the chamber area of the barrel assembly in inches.

Calibre

- the calibre designation is usually marked on the right side of the upper barrel.

- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- B425 is the European designation for Japanese made Citori. Models offered include: Hunter, Hunting, Sporter, Sporting, Skeet, Trap or Waterfowl.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- over and under barrel configuration.

Serial Number

- the serial number is engraved on the top tang of the receiver/frame under the top opening lever.
- observed serial number sequences have consisted of five digits followed by a two letter year of production code followed by a three character product code.

Barrel

- Hunter and Sporter: designates Invector Choke tubes. Hunting and Sporting: designates Fixed Chokes.

Calibre

- the calibre designation is usually marked on the right side of the upper barrel of the barrel assembly.

Other Markings

- Browning Arms, Morgan Uath and Montreal P. Q. Made in Japan. BROWNING SA- engraved on right side of barrels . Buck Head - on trigger guard

Remarks

- SEE ALSO:
Browning Citori.
REFERENCE:
Blue Book of Gun Values, S.P. Fjestad, Eighteenth Edition, Blue Book Publications Ink., pg 274. Standard Catalog of Firearms, 7th Edition, Krause Publications, Ned Schwing, pg. 179. Browning Europe - Catalogue 1989, 1995, 1996 and a visit by this Pri
REMARKS:
The B425 Sporter Model is very similar to the Citori and differs only in chambering, barrel length and chokes.

- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "BROWNING-78 SPORTER" may be marked on the right side of the barrel.
- features observed: free floating round heavy barrel; falling block action; adjustable ejector; American walnut stock with cheekpiece, checkered pistol grip and schnabel tip forearm; blued finish with no engraving; no sights; drilled and tapped for scope mounts and sling swivels.
- average weight is 3.90kg (8.6lbs).

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- lever operated dropping block design.

Serial Number

- the serial number is marked on the receiver/frame.

Make

- "BROWNING" is marked on the left side of the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "BROWNING" and "B-80" are marked on the left side of the receiver/frame.
- manufactured from 1981 to 1988.
- components manufactured by Beretta and the firearm was assembled and finished by Fabrique National Herstal (FN) plant in Portugal.
- this is a Beretta A303 marketed by FN under the Browning name.
- features include: interchangeable round barrel with ventilated rib barrel, matted sighting surface, bead front sight and with or without "Invector" choke tube system; semi-hump back steel or alloy receiver/frame with right side ejection and bottom loading; gold plated trigger; cross-bolt safety at front of trigger guard; checkered wood forearm and pistol grip buttstock with butt pad; blued or black anodized finish.

Manufacturer

- "Browning Arms Company" over "Morgan, Utah & Montreal P.Q." over "Made in Portugal by F.N. Herstal" or a variation thereof is usually marked on the barrel.
- "PATENT PB ITALY - 3420140" is usually marked on the barrel; the initials PB stand for Pietro Beretta.
- both firms contributed to the manufacture of this particular model.

Action

- gas operated.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- observed serial number consisted of a three numbers product code, two letters year code and five numbers, eg. "411PZ06509".

Calibre

- gauge and chamber length are marked on the barrel.
- has the versatility to change from 2 3/4" to 3" shotshells just by changing the barrel as the receiver/frame is the same length.

Shots

- tubular magazine mounted under the barrel.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "BROWNING" over "BAR" is marked on the side of the receiver/frame.
- "BAR" is marked on the side of the barrel.
- "BAR" is the abbreviation for Browning Automatic Rifle.
- manufactured from 1967 to 1992, was replaced by the "BAR Mark II" in 1993.
- codes for the BAR finishes are: Grade I = 137; Grade II = 237, Grade III = 337; Grade IV = 437; and Grade V = 537.
- BAR (Browning Automatic Rifle) was manufactured in blued steel and checkered walnut stocks. The Grade II, Grade III, Grade IV and Grade V have various hand engraved or etched scenes on a satin metal finish and upgraded wood. The higher the grade the more elaborate the engraving and wood quality. The older firearms made and assembled in Belgium (1974 manufacture and later were marked 'Made in Belgium Assembled in Portugal') had hand cut engraving which later became roll engraving or etching.

Manufacturer

- manufacturer's name may be marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- gas operated.

Serial Number

- early production versions of this firearm were serial numbered on the right side of the receiver/frame, just forward of the ejection port.
- on later production, the serial number is marked on the left side of the receiver/frame, above the trigger.
- serial number on production firearms from 1967 to 1977, used the following method: each year was started by 0001 and attached to a year code as listed below, eg. 0001M7:

1967 ....M7 1968 ....M8 1969 ....M69
1970 ....M70 1971 ....M71 1972 ....M72
1973 ....M73 1974 ....M74 1975 ....M75
1976 ....M76 1977 ....M77

- beginning around 1976, serial number may consist of up to eleven characters, up to seven (7) digits, 2 alpha characters and three digits, eg. 123456PM137 or 123456PM437.

Barrel

- barrel lengths are 508mm (20") in Lightweight, 559mm (22") in Standard and 610mm (24") in Magnum.

Calibre

- calibre is marked on the barrel.
- markings may be:

one line:
"BAR CALIBER (cal) ONLY BROWNING PATENTS"
two lines:
"CALIBER (cal) ONLY" "PATENT PENDING", or
"CALIBER (cal) ONLY" "BROWNING PATENTS", or
"BAR CALIBER (cal) ONLY" "BROWNING PATENTS"

Shots

- detachable box magazine.

Other Markings

- barrel markings:
- two lines:

"BROWNING ARMS COMPANY" "MADE IN BELGUIM", or

- three lines:

"BROWNING ARMS COMPANY" "MORGAN, UTAH & MONTREAL P.Q." "MADE IN BELGIUM", or

- four lines:

"BROWNING ARMS COMPANY" "MORGAN UTAH & MONTREAL P.Q." "MADE IN BELGIUM" " ASSEMBLED IN PORTUGAL" or

- five lines:

"BROWNING ARMS COMPANY" "MORGAN, UTAH & MONTREAL P.Q." "MADE IN BELGIUM BY FABRIQUE NATIONALE" " HERSTAL ASSEMBLED IN PORTUGAL", or
"BROWNING ARMS COMPANY" "MORGAN, UTAH & MONTREAL P.Q." "MADE IN BELGIUM BY FABRIQUE NATIONALE HERSTAL" "ASSEMBLED IN PORTUGAL"

Notes

Make	- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame. - "BROWNING" trade name is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennessee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- introduced in 2004. - "Long Trac" is marked on the right side of the barrel. - "BAR Long Trac" model shares the technical features of the BAR MARK 2 receiver/frame design with some styling features of other variants. - features include: no sights or hooded gold bead front sight and an adjustable rear sight; round cold hammer forged barrel with or without fluting; solid top alloy receiver/frame is drilled and tapped for scope mounts; bolt release lever is mounted on the side of the receiver/frame; crossbolt safety is mounted on the rear of the trigger guard; gold plated trigger; detachable box magazine release is mounted on the rear of the magazine well; checkered synthetic or walnut forearm and a semi-pistol grip buttstock with a removable and an adjustable length of pull recoil pad; sling swivel studs; matte black/blue and satin nickel or camouflage finish. - this firearm comes with varying levels and quality of finish, engraving and stock configurations. - this firearm is visually distinctive from the rest of the BAR and BAR MARK 2 series of models in that the forend and buttstock lines are more angular than standard BAR stocks, with the rear of the forend extending back to a point below the bolt handle rather than ending at the junction of the barrel assembly and the receiver/frame. - in comparison to other BAR series models, the exterior contour of the receiver/frame, trigger guard and ejection port are also more angular in design. - in 2006, the BAR Long Trac was introduced in a left hand configuration and also available with a camouflage finish. - overall length with a 559 mm barrel (22") is 1167 mm (42") and the average weight is 2.80 kg (6.15 lbs). - rifling characteristics in caliber 270 WIN: 1 turn in 10 inches.
Manufacturer	- the manufacturer's designation is marked on the barrel.
Action	- gas operated.
Serial Number	- serial number is marked on the side of the receiver/frame. - serial number series will consist of numbers followed by a two letter year of manufacture code followed by a three letter or letter/number product code, eg. "311MV290##".
Calibre	- the calibre designation is marked on the barrel.
Shots	- detachable box magazine.

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced in 2006.
- "LONG TRAC" was observed marked on the right side of the barrel.
- this model shares the technical features of the BAR MARK II receiver/frame design with some styling differences from other variants.
- features include: cold hammer forged blued barrel; no sights; alloy receiver/frame; crossbolt safety; removable box magazine; bolt release mechanism latch mounted on the right side of the receiver/frame; drilled and tapped receiver/frame for scope mounting; composite semi-pistol grip butt stock and forend with extended gripping panels.
- this firearm is visually distinctive from the rest of the BAR and BAR MARK II series of models in that the forend and butt stock lines are more angular than standard BAR stocks, with the rear of the forend extending back to a point below the bolt handle rather than ending at the junction of the barrel assembly and the receiver/frame.
- in comparison to other BAR series models, the exterior contour of the receiver/frame, trigger guard and ejection port are also more angular in design.
- overall length with a 559mm (22") barrel is 1067mm (42"), average weight is 3.1kg (6.9lbs).
- overall length with a 610mm (24") barrel is 1118mm (44"), average weight is 3.4kg (7.5lbs).
- similar to the Browning model BAR Long Trac which features a walnut buttstock and forearm.

Manufacturer

- the manufacturer's designation is usually marked on the barrel.

Action

- gas operated.

Calibre

- calibre designation was observed marked on the right side of the barrel assembly.

Shots

- detachable box magazine mounted on a hinged floorplate.

- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- the model designation is not marked on the firearm.
- "BAR" is marked on the left side of the receiver/frame and on the right side of the barrel.
- "BAR" stands for Browning Automatic Rifle.
- "Magnum" in the model designation is for the magnum calibres.

Manufacturer

- "MADE IN BELGIUM" and/or "MADE IN BELGIUM BY FABRIQUE NATIONALE HERSTAL" and/or "MADE IN BELGIUM BY FABRIQUE NATIONALE HERSTAL ASSEMBLED PORTUGAL" is marked on the side of the barrel.

Action

- gas operated.

Serial Number

- the serial number is usually located on the left side of the receiver/frame.
- on production from 1967 to 1975, the following method was used: each year was started by 0001 and attached to a year code as listed below

1967 ....M7 1968 ....M8 1969 ....M69
1970 ....M70 1971 ....M71 1972 ....M72
1973 ....M73 1974 ....M74 1975 ....M75
1976 ....M76 1977 ....M77

- on production after 1976, the serial number incorporates the Browning three number product code for this model, followed by two letters for the year code, and followed by five sequential numbers, eg. "137PX04348".

Shots

- detachable box magazine mounted on the floorplate.

Remarks

- The BAR Magnum (Browning Automatic Rifle) was manufactured in blued steel with checkered walnut stocks. The Grade II, Grade III, Grade IV and Grade V versions have various hand engraved or etched scenes on a satin metal finish and upgraded wood. The higher the grade the more elaborate the engraving and wood quality. The older guns made and assembled in Belgium (1974 manufacture and before, after which they were marked 'Made in Belgium Assembled in Portugal') had hand cut engraving which later became roll engraving or etching.

He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- Introduced in 1993. - "BAR MARK 2" is not marked on the firearm. - "BAR" is marked on the barrel. - BAR MARK 2 series of rifles was introduced in 1993. - BAR MARK 2 differ from the original BAR series of rifles in that: 1) the magazines are not interchangeable; 2) the use of a detachable trigger mechanism; 3) enlarged trigger guard; 4) improved gas system; and 5) a new bolt-hold open system located on the right side of the receiver/frame, the bolt release lever is a defining physical characteristic between the original BAR and the BAR MARK II series. - features include: round hammer forged barrel; flat sided steel receiver/frame with right side ejection and bottom loading; magazine release is located behind the magazine well; cross bolt safety located on the rear of the trigger guard; with or without iron sights; receiver/frame is drilled and tapped for scope mounts; gold plated trigger; checkered walnut forearm and pistol grip buttstock with recoil pad and sling swivel studs; blued barrel; blued or satin silver plated and engraved finished receiver/frame.
Manufacturer	- "Made in Belgium by Fabrique Nationale" may be marked on the left side of the barrel.
Action	- gas operated.
Serial Number	- serial number is marked on the side of the receiver/frame. - observed serial number consisted of three numbers, two letters and five numbers, eg. "311MN0#0#0".
Barrel	- factory catalog listed barrel lengths include the length of the BOSS unit. - an overall measurement of barrel length including the BOSS attachment would show a length 50mm longer than the proper barrel length. - the barrel lengths attributed to this record reflect the barrel length as measured without the BOSS unit.
Calibre	- calibre designation is marked on the side of the barrel.
Shots	- Introduced in 1993 with 3 and 4 shot capacity, magazines. - Browning: Introduced in 2002 a 2 shot capacity, magazine. - Internal magazine with a hinged floor plate. - Detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- The BAR MARK II series consists of a number of different models including the following:
- BAR MARK II Safari: introduced 1993; built using a forged steel receiver/frame and stocked with wood buttstock and forend; open sights standard.
- BAR MARK II Safari BOSS: introduced 1994; built using a forged steel receiver/frame and stocked with wood buttstock and forend; drilled and tapped for scope mounting without open sights.
- BAR MARK II Lightweight: introduced 1997; built using a lightweight aluminum alloy receiver/frame and stocked with wood buttstock and forend; open sights standard.
- BAR MARK II Lightweight BOSS: manufactured in 1999 and 2000; as above, except fitted with a BOSS (Ballistic Optimizing Shooting System) muzzle attachment. Overall length compared to Non-BOSS models remain the same.
- BAR MARK II Lightweight Stalker: introduced 2001; built using a lightweight aluminum alloy receiver/frame and stocked with a synthetic buttstock and forend; open sights standard.
- The overall length of BOSS and non-BOSS equipped rifles of this series are identical. Barrels fitted to BOSS equipped rifles are two inches shorter than non-BOSS equipped models.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the BAR MARK 2 Lightweight was introduced in 1997.
- features include a lightweight aluminum alloy receiver/frame and a wood buttstock and forend; open sights standard.
- BAR MARK 2 series of rifles was introduced in 1993.
- BAR MARK 2 differ from the original BAR series of rifles in that:
1) the magazines are not interchangeable;
2) the use of a detachable trigger mechanism;
3) enlarged trigger guard;
4) improved gas system; and
5) a new bolt-hold open system located on the right side of the receiver/frame, the bolt release lever is a defining physical characteristic between the original BAR and the BAR MARK II series.
- The BAR MARK II series consists of a number of different models including the following:
- BAR MARK II Safari: introduced 1993; built using a forged steel receiver/frame and stocked with wood buttstock and forend; open sights standard.
- BAR MARK II Safari BOSS: introduced 1994; built using a forged steel receiver/frame and stocked with wood buttstock and forend; drilled and tapped for scope mounting without open sights.
- BAR MARK II Lightweight BOSS: manufactured in 1999 and 2000; as above, except fitted with a BOSS (Ballistic Optimizing Shooting System) muzzle attachment. Overall length compared to Non-BOSS models remain the same.
- BAR MARK II Lightweight Stalker: introduced 2001; built using a lightweight aluminum alloy receiver/frame and stocked with a synthetic buttstock and forend; open sights standard.
- BAR MARK II Lightweight Stalker Boss: introduced 2001; built using a lightweight aluminum alloy receiver/frame and stocked with a synthetic buttstock and forend; open sights standard; fitted with a BOSS (Ballistic Optimizing Shooting System) muzzle attachment. Overall length compared to Non-BOSS models remain the same.
- The overall length of BOSS and non-BOSS equipped rifles of this series are identical. Barrels fitted to BOSS equipped rifles are two inches shorter than non-BOSS equipped models.
- average weight is 3.18kg (7lbs).

Manufacturer

- the manufacturers name does not usually appear on the firearm, the barrel will usually be marked "Made in Belgium".

Action

- gas operated.

Serial Number

- the serial number is marked on the receiver/frame and consists of a three digit or digit/letter combination product code followed by a two letter year of production code followed by five digits.

Calibre

- calibre designation is marked on the right side of the barrel.

Shots

- hinged floorplate with detachable box magazine.

Remarks

- variants of this model developed for sale in Europe include the BAR Evolve, Light battue and Light Posta.
- these variants are distinguishable from North America destined products in having fibre optic foresights and raised rear sight ramp or Battue quick alignment sight mounts but are otherwise identical in technical respects to the BAR MARK II series of rifles.

- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this model was introduced in 2001.
- the model designation is not marked on the firearm.
- features include: a lightweight aluminum alloy receiver/frame; a synthetic butt stock and forend; fitted with open sights as standard.
- BAR MARK 2 series of rifles was introduced in 1993.
- BAR MARK 2 differ from the original BAR series of rifles in that:

1) the magazines are not interchangeable;
2) the use of a detachable trigger mechanism;
3) enlarged trigger guard;
4) improved gas system; and
5) a new bolt-hold open system located on the right side of the receiver/frame, the bolt release lever is a defining physical characteristic between the original BAR and the BAR MARK II series.

- The BAR MARK II series consists of a number of different models including the following:
- BAR MARK II Safari: introduced 1993; built using a forged steel receiver/frame and stocked with wood butt stock and forend; open sights standard.
- BAR MARK II Safari BOSS: introduced 1994; built using a forged steel receiver/frame and stocked with wood butt stock and forend; drilled and tapped for scope mounting without open sights.
- BAR MARK II Lightweight: introduced 1997; built using a lightweight aluminum alloy receiver/frame and stocked with wood butt stock and forend; open sights standard.
- BAR MARK II Lightweight BOSS: manufactured in 1999 and 2000; as above, except fitted with a BOSS (Ballistic Optimizing Shooting System) muzzle attachment. Overall length compared to Non-BOSS models remain the same.
- BAR MARK II Lightweight Stalker BOSS: introduced 2001; built using a lightweight aluminum alloy receiver/frame and stocked with a synthetic butt stock and forend; open sights standard.
- the overall length of BOSS and non-BOSS equipped rifles of this series are identical. Barrels fitted to BOSS equipped rifles are two inches shorter than non-BOSS equipped models.
- in 2009 the Lightweight Stalker featured a fluted barrel and a carbine version.
- overall length with a 508mm barrel (20") is 1041mm (41") and an average weight of 2.79kg (6.14lbs).
- rifling characteristics in caliber 243 WIN: 1 turn in 10 inches.

Manufacturer

- "Made in Belgium by Fabrique Nationale" is marked on the barrel.

Action

- gas operated.

Serial Number

- serial number is marked on the receiver/frame.
- serial number consists of a three digit or digit/letter combination product code followed by a two letter year of production code followed by five digits.

Barrel

- barrel lengths of 510mm in this model were manufactured for sale on the European market by Browning International S.A.

Calibre

- the calibre designation is marked on the right side of the barrel.

Shots

- detachable box magazine mounted on the floorplate.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- this model was introduced in 2001.
- the model designation is not marked on the firearm.
- features include: a lightweight aluminum alloy receiver/frame; a synthetic buttstock and forend; may be fitted with open sights; fitted with a BOSS (Ballistic Optimizing Shooting System) muzzle attachment. Overall length compared to Non-BOSS models remain the same.
- BAR MARK 2 series of rifles was introduced in 1993.
- BAR MARK 2 differ from the original BAR series of rifles in that:

1) the magazines are not interchangeable;
2) the use of a detachable trigger mechanism;
3) enlarged trigger guard;
4) improved gas system; and
5) a new bolt-hold open system located on the right side of the receiver/frame, the bolt release lever is a defining physical characteristic between the original BAR and the BAR MARK II series.

- The BAR MARK II series consists of a number of different models including the following:
- BAR MARK II Safari: introduced 1993; built using a forged steel receiver/frame and stocked with wood buttstock and forend; open sights standard.
- BAR MARK II Safari BOSS: introduced 1994; built using a forged steel receiver/frame and stocked with wood buttstock and forend; drilled and tapped for scope mounting without open sights.
- BAR MARK II Lightweight: introduced 1997; built using a lightweight aluminum alloy receiver/frame and stocked with wood buttstock and forend; open sights standard.
- BAR MARK II Lightweight BOSS: manufactured in 1999 and 2000; as above, except fitted with a BOSS (Ballistic Optimizing Shooting System) muzzle attachment. Overall length compared to Non-BOSS models remain the same.
- BAR MARK II Lightweight Stalker: introduced 2001; built using a lightweight aluminum alloy receiver/frame and stocked with a synthetic buttstock and forend; open sights standard.
- The overall length of BOSS and non-BOSS equipped rifles of this series are identical. Barrels fitted to BOSS equipped rifles are two inches shorter than non-BOSS equipped models.

Manufacturer

- "Made in Belgium by Fabrique Nationale" is marked on the left side of the barrel.

Action

- gas operated.

Serial Number

- the serial number is marked on the receiver/frame and consists of a three digit or digit/letter combination product code followed by a two letter year of production code followed by five digits.

Barrel

- factory catalog listed barrel lengths include the length of the BOSS unit.
- an overall measurement of barrel length including the BOSS attachment would show a length 50mm longer than the proper barrel length.
- the barrel lengths attributed to this record reflect the barrel length as measured without the BOSS unit.

Calibre

- the calibre designation is marked on the right side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine mounted on a hinged floorplate.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "BROWNING" and "BAR II" are marked on the side of the receiver/frame.
- BAR MARK 2 Safari was introduced in 1993.
- features include a forged steel receiver/frame; wood butt stock and forend; open sights are standard.
- BAR MARK 2 series of rifles was introduced in 1993.
- BAR MARK 2 differ from the original BAR series of rifles in that:
1) the magazines are not interchangeable;
2) the use of a detachable trigger mechanism;
3) enlarged trigger guard;
4) improved gas system; and
5) a new bolt-hold open system located on the right side of the receiver/frame, the bolt release lever is a defining physical characteristic between the original BAR and the BAR MARK II series.
- the overall length of BOSS and non-BOSS equipped rifles of this series are identical. Barrels fitted to BOSS equipped rifles are two inches shorter than non-BOSS equipped models.
- the BAR MARK II Safari starting in 2004 was available with a richly blue finish; one piece ordnance steel receiver/frame features scroll engraving; select Grade II wood stock and forearm.
- overall length with a 559mm barrel (22") is 1092mm (43") and an average weight of 2.55kg (7.8lbs).
- rifling characteristics in caliber 243 WIN: 1 turn in 10 inches.

Manufacturer

- "Made in Belgium by Fabrique Nationale" is marked on the left side of the barrel.

Action

- gas operated.

Serial Number

- the serial number is marked on the receiver/frame and consists of a three digit or digit/letter combination product code followed by a two letter year of production code followed by five digits, eg. "207NT1###8".

Calibre

- the calibre designation is marked on the right side of the barrel.

Shots

- detachable box magazine mounted on a hinged floorplate.

Other Markings

- barrel marked "Browning Arms Company Morgan Utah & Montreal P.Q." followed by patent information, model designation and calibre.
- receiver/frame roll engraved on both sides encircling the word "SAFARI".
- the older guns made and assembled in Belgium (prior to 1974, after which they were marked "Made in Belgium Assembled in Portugal") had hand cut engraving which later became roll engraving or etching.

Remarks

- firearms in the BAR MARK II series were offered in blued steel with checkered walnut stocks. The Grade II, Grade III, Grade IV and Grade V have various hand engraved or etched scenes on a satin metal finish and upgraded wood. The higher the grade the more elaborate the engraving and wood quality.
- the BAR MARK II series consists of a number of different models including the following:
- BAR MARK II Safari BOSS: introduced 1994; built using a forged steel receiver/frame and stocked with wood buttstock and forend; drilled and tapped for scope mounting without open sights.
- BAR MARK II Lightweight: introduced 1997; built using a lightweight aluminum alloy receiver/frame and stocked with wood buttstock and forend; open sights standard.
- BAR MARK II Lightweight BOSS: manufactured in 1999 and 2000; as above, except fitted with a BOSS (Ballistic Optimizing Shooting System) muzzle attachment. Overall length compared to Non-BOSS models remain the same.
- BAR MARK II Lightweight Stalker: introduced 2001; built using a lightweight aluminum alloy receiver/frame and stocked with a synthetic buttstock and forend; open sights standard.
- BAR MARK II Lightweight Stalker Boss: introduced 2001; built using a lightweight aluminum alloy receiver/frame and stocked with a synthetic buttstock and forend; open sights standard; fitted with a BOSS (Ballistic Optimizing Shooting System) muzzle attachment. Overall length compared to Non-BOSS models remain the same.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- introduced 1994.
- the model is not marked in full on the firearm.
- features include: forged steel receiver/frame; wood butt stock and forend; drilled and tapped for scope mounting without open sights and fitted with a BOSS.
- BAR MARK 2 series of rifles was introduced in 1993.
- BAR MARK 2 differ from the original BAR series of rifles in that:
1) the magazines are not interchangeable;
2) the use of a detachable trigger mechanism;
3) enlarged trigger guard;
4) improved gas system; and
5) a new bolt-hold open system located on the right side of the receiver/frame, the bolt release lever is a defining physical characteristic between the original BAR and the BAR MARK II series.
- the BAR MARK II series consists of a number of different models including the following:
- BAR MARK II Safari: introduced 1993; built using a forged steel receiver/frame and stocked with wood butt stock and forend; open sights standard.
- BAR MARK II Lightweight: introduced 1997; built using a lightweight aluminum alloy receiver/frame and stocked with wood butt stock and forend; open sights standard.
- BAR MARK II Lightweight BOSS: manufactured in 1999 and 2000; as above, except fitted with a BOSS (Ballistic Optimizing Shooting System) muzzle attachment. Overall length compared to Non-BOSS models remain the same.
- BAR MARK II Lightweight Stalker: introduced 2001; built using a lightweight aluminum alloy receiver/frame and stocked with a synthetic butt stock and forend; open sights standard.
- BAR MARK II Lightweight Stalker Boss: introduced 2001; built using a lightweight aluminum alloy receiver/frame and stocked with a synthetic butt stock and forend; open sights standard; fitted with a BOSS (Ballistic Optimizing Shooting System) muzzle attachment. Overall length compared to Non-BOSS models remain the same.
- the overall length of BOSS and non-BOSS equipped rifles of this series are identical. Barrels fitted to BOSS equipped rifles are two inches shorter than non-BOSS.
- overall length with a 559mm barrel (22") is 1092mm (43") and an average weight of 3.45kg (7.6lbs).
- rifling characteristics in caliber 270 WIN: 1 turn in 10 inches.

Manufacturer

- the manufacturers name may not appear on the firearm, the barrel will usually be marked "Made in Belgium".

Action

- gas operated.

Serial Number

- the serial number is marked on the receiver/frame and consists of a three number or number/letter combination product code followed by a two letter year of production code followed by five numbers.

Barrel

- factory catalog listed barrel lengths include the length of the BOSS unit.
- an overall measurement of barrel length including the BOSS attachment would show a length 50mm longer than the proper barrel length.
- the barrel lengths attributed to this record reflect the barrel length as measured without the BOSS unit.

Calibre

- calibre designation is marked on the right side of the barrel.

Shots

- detachable box magazine mounted on a hinged floorplate.

Other Markings

- Browning Arms Company Morgan Utah & Montreal P.Q. Patent, Model designation and Caliber .308 WIN ONLY (308 as an example only). Roll pressed engraving both sides of the action encircling the word 'SAFARI'.

Remarks

- the BAR MARK II (Browning Automatic Rifle) manufactured in blued steel and checkered walnut stocks. The Grade II, Grade III, Grade IV and Grade V have various hand engraved or etched scenes on a satin metal finish and upgraded wood. The higher the grade the more elaborate the engraving and wood quality. The older guns made and assembled in Belgium (1974 manufacture and before after which they were marked 'Made in Belgium Assembled in Portugal') had hand cut engraving which later became roll engraving or etching.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." may be marked on the barrel and/or the receiver/frame.
- "BROWNING" trade name is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- model designation may not be marked on the firearm.
- features include: alloy receiver/frame with matte black finish; blued barrel with or without fluting; click adjustable rear sight; fiber optic front sight; checkered Bavarian pistol grip butt stock; round or tulip forend; crossbolt safety; removable box magazine; bolt release mechanism latch mounted on the right side of the receiver/frame; drilled and tapped receiver/frame for scope mounting.
- this firearm comes with varying levels and quality of finish, engraving and stock configurations.
- this firearm is visually distinctive from the rest of the BAR MARK 2 series of models in that the forend and butt stock lines are more angular than standard BAR stocks, with the rear of the forend extending back to a point below the bolt handle rather than ending at the junction of the barrel assembly and the receiver/frame.
- average weight is 3.18kg (7lbs).

Manufacturer

- manufacturer's name may not be marked on the firearm.

Action

- gas operated.

Serial Number

- serial number may be marked on the right rear side of the receiver/frame.

Notes

Make	- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame. - "BROWNING" trade name is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennessee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- introduced in 2003. - "Short Trac" is marked on the right side of the barrel. - "BAR Short Trac" model shares the technical features of the BAR MARK II receiver/frame design with some styling differences from other variants. - features include: no sights; round cold hammer forged barrel; solid top alloy receiver/frame is drilled and tapped for scope mounts; bolt release lever is mounted on the side of the receiver/frame; crossbolt safety is mounted on the rear of the trigger guard; gold plated trigger; detachable box magazine release is mounted on the rear of the magazine well; checkered synthetic or walnut forearm and a semi-pistol grip buttstock with a removable and an adjustable length of pull recoil pad; sling swivel studs; matte black/blue and satin nickel or camouflage finish. - this firearm comes with varying levels and quality of finish, engraving and stock configurations. - this firearm is visually distinctive from the rest of the BAR and BAR MARK II series of models in that the forend and butt stock lines are more angular than standard BAR stocks, with the rear of the forend extending back to a point below the bolt handle rather than ending at the junction of the barrel assembly and the receiver/frame. - in comparison to other BAR series models the exterior contour of the receiver/frame, trigger guard and ejection port are also more angular in design. - in 2006 the BAR Short Trac was introduced in a left handed configuration and is also available in a camouflage finish. - overall length with a 559 mm barrel (22") is 1054 mm (41 1/2") and the average weight is 2.77 kg (6.10 lbs). - rifling characteristics in caliber 243 WIN: 1 turn in 10 inches.
Manufacturer	- the manufacturer's designation is marked on the barrel.
Action	- gas operated.
Serial Number	- serial number is marked on the receiver/frame. - serial number series will consist of numbers followed by a two letter year of manufacture code followed by a three letter or letter/number product code. - manufacture code is usually "311".
Calibre	- the calibre designation is marked on the barrel.
Shots	- detachable box magazine. - magazine capacities for the European market are listed as two shots in WSM calibres.

Model

- introduced in 2006.
- "SHORT TRAC" was observed marked on the right side of the barrel.
- "BAR Short Trac" model shares the technical features of the BAR MARK II receiver/frame design with some styling differences from other variants.
- features include: no sights; round cold hammer forged barrel; solid top alloy receiver/frame is drilled and tapped for scope mounts; bolt release lever is mounted on the side of the receiver/frame; crossbolt safety is mounted on the rear of the trigger guard; gold plated trigger; detachable box magazine release is mounted on the rear of the magazine well; checkered synthetic forearm and a semi-pistol grip buttstock with a removable and an adjustable length of pull recoil pad; sling swivel studs; matte black/blue finish.
- this firearm is visually distinctive from the rest of the BAR and BAR MARK II series of models in that the forend and butt stock lines are more angular than standard BAR stocks, with the rear of the forend extending back to a point below the bolt handle rather than ending at the junction of the barrel assembly and the receiver/frame.
- in comparison to other BAR series models the exterior contour of the receiver/frame, trigger guard and ejection port are also more angular in design.
- overall length with a 559mm (22") barrel is 1054mm (41.5"), average weight is 3.02kg (6.65lbs).
- overall length with a 584mm (23") barrel is 1080mm (42.5"), average weight is 3.3kg (7.25lbs).
- similar to the Browning model BAR Short Trac which features a walnut buttstock and forearm.

Manufacturer

- the manufacturer's designation is usually marked on the barrel.

Action

- gas operated.

Calibre

- calibre designation was observed marked on the right side of the barrel assembly.

Shots

- detachable box magazine mounted on a hinged floorplate.

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- manufactured by FN Belgium from 1967 to present.
- the letters BAR stand for Browning Automatic Rifle.

Manufacturer

- "MADE IN BELGIUM" or "MADE IN BELGIUM ASSEMBLED IN PORTUGAL" may be marked on the left side of the barrel.

Serial Number

- the serial number is marked on the receiver/frame as a digit, two alpha and eight numeric on production after 1976.

On production from 1967 to 1976 the following method was used: each year was started by 0001 and attached to a year code as listed below
1967 ....M7 1968 ....M8 1969 ....M69
1970 ....M70 1971 ....M71 1972 ....M72
1973 ....M73 1974 ....M74 1975 ....M75
1976 ....M76

Calibre

- caliber designation is marked on the right side of the barrel.

Shots

- detachable box magazine under a hinged cover plate.

Other Markings

- the barrel will usually be marked with "Browning Arms Company Morgan Utah & Montreal P.Q.", Patent numbers, model designation and calibre designation.

Remarks

- The BAR (Browning Automatic Rifle) is manufactured with blued steel and checkered walnut stocks. The Grade II, Grade III, Grade IV and Grade V have various hand engraved or etched scenes on a satin metal finish and upgraded wood. The higher the grade the more elaborate the engraving and wood quality. The older guns were made and assembled in Belgium (1974 manufacture and before, after which they were marked 'Made in Belgium Assembled in Portugal') had hand cut engraving which later became roll engraving or etching.

- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "B.B.R." is marked on the right side of the barrel. - manufactured from 1978 to 1984. - short action manufactured in 1983 and 1984 only. - Limited edition was available with engraving in 7MM REM MAG.
Manufacturer	- manufacturer's name is not usually marked on the firearm. - "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.
Action	- turn bolt action.
Serial Number	- the serial number is normally marked on the right side of the receiver/frame. - the serial number incorporates five numbers, followed by two letters for the year code, and followed by the Browning three number product code for this model, eg. "01203PY117".
Calibre	- calibre designation is marked on the right side of the barrel.
Shots	- hidden detachable box magazine. - the box magazine is removeable when the front hinged floorplate is opened.
Other Markings	- left side of barrel is marked "Browning Arms Company, Morgan, Utah & Montreal P.Q. Made in Japan" on the right side "BBR CALIBER (Calibre) ONLY".
Remarks	- The BBR issue has a three stock types Standard, Lightning and Short Lightning. American walnut finished in high gloss. The Standard stock has a pistol grip with Monte Carlo style comb and flat forearm with rosewood grip cap and black plastic butt plate marked "Browning", the magnum stock has a black rubber recoil pad also marked "Browning" with a white spacer. The lightning stock configuration has a pistol grip with Monte Carlo comb, cheek piece round forearm and rosewood forearm cap. Detachable magazine and the floor plate is hinged for removal of the magazine. Inside the forearm is an aluminum insert to prevent warping. Trigger is adjustable, and blued except in 1977/8 and the 1983 Limited Edition.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- "Browning Arms Co." over "Morgan Utah & Montreal P.Q." marked on the left side of the firearm slide.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- model was introduced in 1977 and discontinued in 1978 except for the BDA-45 which was discontinued in 1980.
- production only by "SIG-Sauer".
- available in blued and nickeled finishes.
- the product code used in the serial number rationalization for the BDA in 9MM LUGER (SIG-Sauer P-220) is: "345".
- the product code used in the serial number rationalization for the BDA in 38 Super (SIG-Sauer P-220) is: "375".
- the product code used in the serial number rationalization for the BDA in 45 AUTO (SIG-Sauer P-220) is: "395".
- with this firearm the product code is the first three numbers of the serial number.

Manufacturer

- the firm SIG-Sauer manufactured these firearms models for FN, who in turn distribute them in North America under the Browning name.

Type

- double action, recoil operated, magazine fed, semi-automatic pistol.

Serial Number

- the serial number is marked on the front of the grip strap.
- the serial number consist of the first three numbers are the product code, the next two letters are the year code and followed by four or five sequential numbers, eg."345RR1387".
- the product code used in the serial number rationalization for the BDA in 9MM LUGER (SIG-Sauer P-220) is: "345".
- the product code used in the serial number rationalization for the BDA in 38 Super (SIG-Sauer P-220) is: "375".
- the product code used in the serial number rationalization for the BDA in 45 AUTO (SIG-Sauer P-220) is: "395".

Calibre

- calibre is usually marked on the barrel.

Shots

- detachable box magazine.

Remarks

- Browning and FN have named several models of hand guns the BDA.

Notes

Make

- "BROWNING ARMS COMPANY" is marked on the left side of the slide.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- manufactured from 1991 to 1997. - "BDM" is marked on the right side of the slide. - "BDM" stands for "Browning Double Mode (or Dual Mode)", "Double Action" or "Double Action Only" trigger mechanism selected by a slide mounted selector. - features include: three dot sight system with a fixed front sight and a windage adjustable rear sight; round barrel; flat sided slide with right side ejection, left side mounted trigger mode selector and rear grasping serrations; external hammer; selectable double/single action or double action only trigger mechanism; ambidextrous safety/decocker levers; action release and magazine release are mounted on the left side of the receiver/frame; squared front trigger guard; molded, checkered grip panels; matte blue or matte blue and silver chrome or silver chrome finish.
Manufacturer	- "MADE IN U.S.A." is marked on the right side of the slide. - "BDM" was designed and produced in the USA by FNMI, a US subsidiary of the Belgian company FN Herstal.
Action	- recoil operated.
Serial Number	- serial number is marked on right side of the receiver/frame forward of trigger guard. - serial number rationalization: the first three numbers "945" are a product code that specifically identify this firearm "MODEL", the next two letters "NW" are a year code for "1994", and the last five numbers "02750" are the number produced, eg. "945NW02750".
Calibre	- calibre is usually marked on the right side of the slide and barrel.
Shots	- detachable box magazine.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- model designation may or may not be marked on the firearm. - introduced in 2004. - this firearm has an inlaid piece of wood from the American Forest Alamo tree with laser engraved scene. - features include: octagonal barrel; silver nitride receiver/frame; gold enhanced engraving; tip-up barrel mounted rear sight and post front sight mounted on the barrel assembly; side ejection; short-throw lever with integrally mounted trigger; grooved for scope mounting.
Manufacturer	- manufacturer's name is not usually marked on the firearm. - "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.
Serial Number	- the serial number is marked on the underside of the receiver/frame. - "PATENT NO. 3377731" may be marked on the right side of the barrel, "3377731" is not a serial number.
Shots	- tubular magazine located under the barrel.

- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- BLR Belgian manufacture commenced at FN in 1970 and ceased in 1973/1974.
- BLR production moved to Miroku in Japan in 1974.
- BLR means Browning Lever action Rifle
- features include: fixed ramp front sight, adjustable rear sight, the top of the receiver/frame is drilled and tapped for scope mounting, side ejection, external hammer, gold plated trigger, detachable box magazine, blued finish, checkered walnut pistol grip buttstock and forearm.
- the mechanism is a manually operated lever action in which the trigger is mounted on the platform which moves with the lever as the mechanism is operated. As the lever mechanism is manipulated a gear drives the bolt forward or rearward by means of matching pinion gear teeth machined into the underside of the bolt. The bolt locking function is accomplished by a rotating bolt head with seven locking lugs, the bolt has a recessed bolt face to completely enclose the base of a rimless cartridge. The bolt has an inertia firing pin safety feature built into the design so that the firing pin is shorter than the housing in which it travels. This design feature effectively reduces the possibility of the firearm accidentally discharging a cartridge when the firearm is dropped onto a lowered hammer or when the lowered hammer is struck by any foreign object, as discharge requires a strong blow from a fully cocked hammer to overcome the "inertia firing pin feature"..

Manufacturer

- "Browning Arms Company, and Made in Belgium" may be found marked on the left side of the barrel.

Action

- manually operated lever action firearm.

Serial Number

- production code for this model was the letter "K" until 1976, eg. "00000K71".
- serial number rationalization was as follows:
- K70 was produced in 1970.
- K71 was produced in 1971.
- K72 was produced in 1972, and so on.

Shots

- detachable box magazine.

Other Markings

- Browning, St Louis MO. and Montreal P.Q. Made in Belgium Patent, Model, calibre.

Notes

Make	- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame. - "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennesee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- Japanese manufacture commenced at the Miroku plant in 1974, all production of the Browning, BLR Rifle subsequent to 1974 has been in Japan, by Miroku. - features include: fixed ramp front sight, adjustable rear sight, the top of the receiver/frame is drilled and tapped for scope mounting, side ejection, external hammer, gold plated trigger, detachable box magazine, blued finish, hand checkered walnut pistol grip buttstock and forearm. - the mechanism is a manually operated lever action in which the trigger is mounted on the platform which moves with the lever as the mechanism is operated. As the lever mechanism is manipulated a gear drives the bolt forward or rearward by means of matching pinion gear teeth machined into the underside of the bolt. The bolt locking function is accomplished by a rotating bolt head with seven locking lugs, the bolt has a recessed bolt face to completely enclose the base of a rimless cartridge. The bolt has an inertia firing pin safety feature built into the design so that the firing pin is shorter than the housing in which it travels. This design feature effectively reduces the possibility of the firearm accidentally discharging a cartridge when the firearm is dropped onto a lowered hammer or when the lowered hammer is struck by any foreign object, as discharge requires a strong blow from a fully cocked hammer to overcome the "inertia firing pin feature".
Manufacturer	- the manufacturer's name is not usually marked on the firearm. - "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" may be found marked on the barrel.
Action	- manually operated lever action firearm.
Serial Number	- the serial number will be found marked on the underside of the receiver/frame between the magazine well and the trigger guard. - Japanese/Miroku production serial number rationalization is as follows: starting in 1975 the serial number assigned to any particular Model BLR Rifle comes first, followed by a two letter year date code, followed by the product code for the inividual model of firearm. NOTE: the entire sequence of numbers and letters is the serial number. - starting in 1976 the product code for the BLR became 127 for the "short action" and 327 for the "long action" version. - example - 15748RT127 = Model BLR, short action, manufactured in 1976.
Shots	- detachable box magazine.
Other Markings	- Browning, St Louis MO. and Montreal P.Q. Made in Japan Patent, Model, calibre.

3782 - 1	308 WIN	4	508	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured circa 1966, for a short time and only by (TRW) - Thompson-Ramo-Wooldridge of Cleveland Ohio.
- BLR means Browning Lever action Rifle
- TRW and Browning had contractual problems which were never resolved and only a very small quantity of these firearms were manufactured, believed to be approximately 250 examples of which 50 to 70 ended up in the hands of the general public, the remainder were destroyed.
- features include: fixed ramp front sight, adjustable rear sight, side ejection, external hammer, detachable box magazine, blued finish, checkered walnut pistol grip buttstock and forearm.
- the mechanism is a manually operated lever action in which the trigger is mounted on the platform which moves with the lever as the mechanism is operated. As the lever mechanism is manipulated a gear drives the bolt forward or rearward by means of matching pinion gear teeth machined into the underside of the bolt. The bolt locking function is accomplished by a rotating bolt head with seven locking lugs, the bolt has a recessed bolt face to completely enclose the base of a rimless cartridge. The bolt has an inertia firing pin safety feature built into the design so that the firing pin is shorter than the housing in which it travels. This design feature effectively reduces the possibility of the firearm accidentally discharging a cartridge when the firearm is dropped onto a lowered hammer or when the lowered hammer is struck by any foreign object, as discharge requires a strong blow from a fully cocked hammer to overcome the "inertia firing pin feature".

Action

- manually operated lever action firearm.

Serial Number

- up to 250 manufactured.
- the serial number will be found only on the barrel.
- serial number rationalization information has been reported to be as follows: 6K01001 to 6K0XXXX.

Shots

- detachable box magazine.

Canadian Law Comments

- the manufacturer of this firearm did not mark the serial number on the receiver/frame.

- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "MODEL 81 BLR" is usually marked on the right side of the barrel.
- manufactured from 1981 to 1995.
- Japanese manufacture commenced at the Miroku plant in 1974, all production of the Browning, BLR Rifle subsequent to 1974 has been in Japan, by Miroku.
- features include: fixed ramp front sight, adjustable rear sight, the top of the receiver/frame is drilled and tapped for scope mounting, side ejection, external hammer, gold plated trigger, detachable box magazine, blued finish, hand checkered walnut pistol grip buttstock and forearm.
- the mechanism is a manually operated lever action in which the trigger is mounted on the platform which moves with the lever as the mechanism is operated. As the lever mechanism is manipulated a gear drives the bolt forward or rearward by means of matching pinion gear teeth machined into the underside of the bolt. The bolt locking function is accomplished by a rotating bolt head with seven locking lugs, the bolt has a recessed bolt face to completely enclose the base of a rimless cartridge. The bolt has an inertia firing pin safety feature built into the design so that the firing pin is shorter than the housing in which it travels. This design feature effectively reduces the possibility of the firearm accidentally discharging a cartridge when the firearm is dropped onto a lowered hammer or when the lowered hammer is struck by any foreign object, as discharge requires a strong blow from a fully cocked hammer to overcome the "inertia firing pin feature".

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" may be marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- manually operated lever action firearm.
Serial Number	- the serial number is marked on the right side of the receiver/frame. - the serial number incorporates five numbers, followed by two letters for the year code, and followed by the Browning three number product code for this model, eg. "12469PX227". - NOTE: do not confuse the "Patent No. 3377731" which is marked on the barrel for the serial number.
Calibre	- the calibre is marked on the right side of the barrel.
Shots	- detachable box magazine.

- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "BLR LT WT 81" is marked on the barrel.
- introduced in 2003.
- features include: fixed ramp front sight; adjustable rear sight; machined aluminum alloy receiver/frame is drilled and tapped for scope mounting; side ejection, external hammer, gold plated trigger, detachable box magazine, blued finish, hand checkered walnut straight grip buttstock and forearm.
- the mechanism is a manually operated lever action in which the trigger is mounted on the platform which moves with the lever as the mechanism is operated. As the lever mechanism is manipulated a gear drives the bolt forward or rearward by means of matching pinion gear teeth machined into the underside of the bolt. The bolt locking function is accomplished by a rotating bolt head with seven locking lugs, the bolt has a recessed bolt face to completely enclose the base of a rimless cartridge. The bolt has an inertia firing pin safety feature built into the design so that the firing pin is shorter than the housing in which it travels. This design feature effectively reduces the possibility of the firearm accidentally discharging a cartridge when the firearm is dropped onto a lowered hammer or when the lowered hammer is struck by any foreign object, as discharge requires a strong blow from a fully cocked hammer to overcome the "inertia firing pin feature".
- similar to the model BLR and features a curved lever, a semi-pistol grip buttstock and schnabel style forearm without barrel band.
- overall length is from 1016mm (40") to 1143mm (45") and average weight is from 3.08kg (6.8lbs) to 3.23kg (7.12lbs).

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- manually operated lever action.

Serial Number

- serial number is marked on the right side of the receiver/frame.
- serial number consists of five numbers, two alpha characters (year code) and three numbers (product code).

Calibre

- the calibre designation is marked on the right side of the barrel.
- rifling characteristics in calibre 7MM-08 REM and 7MM WSM: 1 turn in 9 1/2 inches.
- rifling characteristics in calibre 243 WIN, 270 WSM, 300 WSM, 325 WSM, 270 WIN, 30-06 SPRG and 300 WIN MAG: 1 turn in 10 inches.
- rifling characteristics in calibre 223 REM, 308 WIN and 358 WIN: 1 turn in 12 inches.
- rifling characteristics in calibre 22-250 REM: 1 turn in 14 inches.
- rifling characteristics in calibre 450 MARLIN: 1 turn in 20 inches.

Shots

- detachable box magazine.

Notes

Make

- "Browning Arms of Canada" is inscribed in gold on the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- model designation is not marked on the firearm. - "BLR LT WT 81" is usually marked on the barrel. - 100 made in 2008 to commemorate the 50th anniversary of Browning Arms of Canada, established in 1958. - features may include: takedown; octagonal barrel with fibre optic front sight, adjustable rear sight; solid top receiver/frame with rotating bolt, right side ejection, drilled and tapped for scope mount; external spurred hammer; detachable box magazine; checkered, grey laminate forearm and straight grip buttstock with a rubber butt pad. - the mechanism is a manually operated lever action in which the trigger is mounted on the platform which moves with the lever as the mechanism is operated. As the lever mechanism is manipulated a gear drives the bolt forward or rearward by means of matching pinion gear teeth machined into the underside of the bolt. The bolt locking function is accomplished by a rotating bolt head with seven locking lugs, the bolt has a recessed bolt face to completely enclose the base of a rimless cartridge. The bolt has an inertia firing pin safety feature built into the design so that the firing pin is shorter than the housing in which it travels. This design feature effectively reduces the possibility of the firearm accidentally discharging a cartridge when the firearm is dropped onto a lowered hammer or when the lowered hammer is struck by any foreign object, as discharge requires a strong blow from a fully cocked hammer to overcome the "inertia firing pin feature".
Manufacturer	- manufacturer's name is not usually marked on the firearm.
Serial Number	- serial number is marked on the right side of the receiver/frame. - serial number may consist of five numbers followed by two letters (MP) followed by three numbers.
Shots	- detachable box magazine.

- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "BLR LT WT 81" may be marked on the barrel.
- "BLR 81 Lightweight Stainless" was introduced at the SHOT Show in 2008.
- features include: takedown; tapered round matte grey stainless steel barrel with fibre optic front sight, and adjustable rear sight; drilled and tapped for Scout scope mount; solid top matte grey aluminum receiver/frame with rotating bolt, and right side ejection; external spurred hammer; checkered, grey laminate forearm and straight- or pistol-grip buttstock with a rubber butt pad.
- the mechanism is a manually operated lever action in which the trigger is mounted on the platform which moves with the lever as the mechanism is operated. As the lever mechanism is manipulated a gear drives the bolt forward or rearward by means of matching pinion gear teeth machined into the underside of the bolt. The bolt locking function is accomplished by a rotating bolt head with seven locking lugs, the bolt has a recessed bolt face to completely enclose the base of a rimless cartridge. The bolt has an inertia firing pin safety feature built into the design so that the firing pin is shorter than the housing in which it travels. This design feature effectively reduces the possibility of the firearm accidentally discharging a cartridge when the firearm is dropped onto a lowered hammer or when the lowered hammer is struck by any foreign object, as discharge requires a strong blow from a fully cocked hammer to overcome the "inertia firing pin feature".
- overall length is from 1016mm (40") to 1143mm (45") and average weight is from 3.08kg (6.8lbs) to 3.38kg (7.12lbs).

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- manually operated lever action.

Make

- "Browning Arms of Canada" is inscribed in gold on the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- model designation is not marked on the firearm.
- introduced in 2009.
- "BLR LT WT 81" is usually marked on the barrel.
- "WHITE GOLD MEDALLION" is usually marked on the left side of the receiver/frame.
- features include: stainless steel barrel with fibre optic front sight and adjustable rear sight; nickel finished and engraved solid top aluminum alloy receiver/frame with rotating bolt, right side ejection, and drilled and tapped for scope mount; external spurred hammer; detachable box magazine; checkered walnut forearm with rosewood tipped forend and pistol grip buttstock with pistol grip cap, silver spacer and rubber butt pad; sling swivels.
- the mechanism is a manually operated lever action in which the trigger is mounted on the platform which moves with the lever as the mechanism is operated. As the lever mechanism is manipulated a gear drives the bolt forward or rearward by means of matching pinion gear teeth machined into the underside of the bolt. The bolt locking function is accomplished by a rotating bolt head with seven locking lugs, the bolt has a recessed bolt face to completely enclose the base of a rimless cartridge. The bolt has an inertia firing pin safety feature built into the design so that the firing pin is shorter than the housing in which it travels. This design feature effectively reduces the possibility of the firearm accidentally discharging a cartridge when the firearm is dropped onto a lowered hammer or when the lowered hammer is struck by any foreign object, as discharge requires a strong blow from a fully cocked hammer to overcome the "inertia firing pin feature".

Manufacturer

- manufacturer's name is not usually marked on the firearm.

Serial Number

- serial number is marked on the right side of the receiver/frame.
- observed serial number consisted of five numbers, two letters "MN" year code and three numbers "341" product code.

Calibre

- the calibre is usually marked on the barrel.

Shots

- detachable box magazine.

Notes

Make	- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame. - "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennesee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- production started in late 1995 and was introduced in the 1996 catalogue. - the model designation is marked on the right side of the barrel as "LIGHTNING BLR". - features include: fixed ramped front sight, adjustable rear sight, the top of the machined aluminum alloy receiver/frame is drilled and tapped for scope mounting, side ejection, external folding hammer, gold plated trigger, detachable box magazine, curved lever, blued finish, checkered walnut pistol grip buttstock and forearm. - available in short or long actions to accommodate different calibres. - similar to the Browning model "BLR 81", it uses a pinion gear to offer a smooth action. The trigger travels with the lever to avoid pinching the finger. - the "BLR Lightning" also features a breech block with a rotary bolt head with multiple locking lugs.
Manufacturer	- manufacturer's name is not usually marked on the firearm. - "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.
Serial Number	- the serial number is marked on the right side of the receiver/frame and consists of five numerical digits followed by two alpha characters followed by three numerical digits.
Calibre	- the calibre designation is marked on the right side of the barrel.
Shots	- detachable box magazine.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade name is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced in 2005.
- model designation "BLR LT WT" may be marked on the firearm.
- features include: tapered round barrel; fixed ramp front sight and adjustable rear sight; rifled bore; drilled and tapped, bottom fed, side eject, alloy, receiver/frame; exposed hammer; gold coloured single trigger; magazine release located in front of the curved lever; blued finish; checkered, schnabel style, forearm and semi-pistol grip buttstock.
- available in a short or long action to accommodate different calibres.
- similar to the model BLR 81 Lightweight which features a straight lever, a straight buttstock and a square tip forearm with one barrel band.
- the mechanism is a manually operated lever action in which the trigger is mounted on the platform which moves with the lever as the mechanism is operated. As the lever mechanism is manipulated a gear drives the bolt forward or rearward by means of matching pinion gear teeth machined into the underside of the bolt. The bolt locking function is accomplished by a rotating bolt head with seven locking lugs, the bolt has a recessed bolt face to completely enclose the base of a rimless cartridge. The bolt has an inertia firing pin safety feature built into the design so that the firing pin is shorter than the housing in which it travels. This design feature effectively reduces the possibility of the firearm accidentally discharging a cartridge when the firearm is dropped onto a lowered hammer or when the lowered hammer is struck by any foreign object, as discharge requires a strong blow from a fully cocked hammer to overcome the "inertia firing pin feature".
- overall length is from 1016mm (40") to 1143mm (45") and average weight is from 3.08kg (6.8lbs) to 3.38kg (7.12lbs).

Manufacturer

- "MADE IN JAPAN" may be marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number was observed marked on the right side of the receiver/frame and consisted of five numbers, followed by two letters, followed by three numbers.
Calibre	- calibre designation was observed marked on the right side of the barrel assembly.
Shots	- detachable box magazine.

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced in 2006.
- "BLR LT WT" may be marked on the firearm.
- features include: stainless steel round tapered rifled barrel with fixed ramp front sight and adjustable rear sight; solid top aluminium receiver/frame drilled and tapped for scope mounts with right side ejection and bottom fed; exposed hammer; single action trigger mechanism; magazine release located in front of the curved lever; grey laminated, schnabel style, forearm and semi-pistol grip buttstock; satin nickel finished receiver/frame finish; matte stainless steel barrel.
- available in a short or long action to accommodate different calibres.
- overall length with a 508mm (20") barrel is 1016mm (40"), average weight is 2.95kg (6.5lbs).
- overall length with a 559mm (22") barrel is 1067mm (42"), average weight is 3.07kg (6.75lbs).
- similar to the model BLR 81 Lightweight which features a blued finish, a straight lever, a straight buttstock and a square tip forearm with one barrel band.
- the mechanism is a manually operated lever action in which the trigger is mounted on the platform which moves with the lever as the mechanism is operated. As the lever mechanism is manipulated a gear drives the bolt forward or rearward by means of matching pinion gear teeth machined into the underside of the bolt. The bolt locking function is accomplished by a rotating bolt head with seven locking lugs, the bolt has a recessed bolt face to completely enclose the base of a rimless cartridge. The bolt has an inertia firing pin safety feature built into the design so that the firing pin is shorter than the housing in which it travels. This design feature effectively reduces the possibility of the firearm accidentally discharging a cartridge when the firearm is dropped onto a lowered hammer or when the lowered hammer is struck by any foreign object, as discharge requires a strong blow from a fully cocked hammer to overcome the "inertia firing pin feature".

Manufacturer

- "MADE IN JAPAN" may be marked on the firearm.

Serial Number

- serial number was observed marked on the right side of the receiver/frame and consisted of five numbers, followed by two letters, followed by three numbers.

Notes

Make

- "BROWNING ARMS COMPANY MORGAN, UTAH & MONTREAL PQ." is usually marked on the left side of the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced in 1977.
- "BPS" is marked on the barrel.
- "BPS" denotes "Browning Pump Shotgun".
- features include: round, rifled or smoothbore barrel with or without a ventilated rib and fibre optic, metal bead or rifle type sights; solid top forged steel receiver/frame with a top tang mounted safety and bottom loading and ejection; dual steel action bars; action release lever is located on the rear left side of the trigger guard; gold plated trigger; synthetic or wood forearm and semi-pistol grip buttstock with a recoil pad; matte black, blued, camouflage or stainless finish; receiver/frame may be plain or engraved with a scene of mallards and pheasants.
- overall length with a 660 mm barrel (26") is 1219 mm (48") and the average weight is 4.90 kg (10.8 lbs).
- "BPS" was available with Invector and Invector Plus choke system in 1994.
- Invector Plus choke system became standard in 1995.
- "BPS" was introduced in a camouflage finish in 2006.
- "BPS" was offered in a "Grade III" version that featured a nickel finished receiver/frame and an oil finished, select walnut stock in 2008.
- "BPS" was available with stainless steel matte finish barrel HiViz Tactical fiber-optic front sight and satin nickel finish receiver/frame.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Serial Number

- serial number is marked on the receiver/frame.
- serial numbers observed consisted of five numbers, two letter yea code, and a three number product code.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - calibre designation is marked on the barrel.

Shots - tubular magazine is mounted under the barrel.

Remarks

- the BPS (Browning Pump Shotgun) series consists of a number of models.
- Browning has traditionally defined their models based on a combination of purpose, grade of appearance, and accoutrements.
- within the BPS series, model designations are not usually marked on the receiver/frame (some exceptions exist, examples include the BPS Waterfowl and BPS Pigeon Grade); rather they are roll-stamped on the right side of the barrel following the calibre designation.
- barrels of the same gauge are interchangeable between receiver/frames within the BPS series, (so care must be taken when determining which model is under examination.)
- within the BPS series, the "Hunter" designation means that wood furniture and a blued finish on metal surfaces are standard features; furthermore, "Hunter" designated shotguns are marked (as model) "Field" on their barrels.
- other variants which are marked (as model) "Field" include those BPS shotguns camouflaged in a Mossy Oak pattern.
- "Stalker" models are, in essence, "Field" models that have been fitted with plain matte black synthetic stocks and a matte black metal finish.
- the BPS "Game Gun" line may include variants whose barrel markings consist of "Deer Special" or "Turkey Special," and which may have round rather than ribbed barrels, fitted with rifle style sights. Furthermore, "Game Gun" variants may have wood or synthetic stocks, with the latter possibly camouflaged.
- other models may be marked as "Micro", "Trap" or "Buck Special", or may be defined by their style of stock, grade of finish, calibre, or barrel length.

Notes

Make

- "BROWNING" is usually marked on the receiver/frame and/or barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- model designation is not marked on the firearm. - the 50th Anniversary logo is marked on the side of the receiver/frame and a gold filled inscription is marked on the barrel. - 100 made in 2008 to commemorate the 50th anniversary of Browning Arms of Canada, established in 1958. - "BPS" represents Browning Pump Shotgun. - features include: blue finish with ventilated rib on barrel; select walnut forearm and buttstock.
Manufacturer	- manufacturer's name is not usually marked on the firearm.
Shots	- tubular magazine mounted under the barrel.

Make

- "BROWNING ARMS COMPANY MORGAN, UTAH & MONTREAL PQ." is usually marked on the left side of the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "BPS" and "Buck Special Model" are marked on the barrel.
- introduced in 1977 and discontinued in 1984.
- reintroduced in 1988 and discontinued in 1998.
- features include: round barrel with a ramp front sight and an adjustable rear sight; solid top, flat sided steel receiver/frame with a top tang mounted safety and bottom loading and ejection; dual steel action bars; action release lever is located on the rear left side of the trigger guard; checkered wood forearm and semi-pistol grip buttstock with a recoil pad; blued metal finish.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Serial Number

- serial number is marked on the receiver/frame.
- sequential numbers followed by two alpha characters followed by sequential numbers. Two alpha characters are the year code and the last series of numbers are the model code.

Calibre

- calibre is marked on the barrel.

Shots

- tubular magazine is mounted under the barrel.
- originally produced as a five shot, changed to three shot in 1985.

Remarks

- the BPS (Browning Pump Shotgun) series consists of a number of models.
- Browning has traditionally defined their models based on a combination of purpose, grade of appearance, and accoutrements.
- within the BPS series, model designations are not usually marked on the receiver/frame (some exceptions exist, examples include the BPS Waterfowl and BPS Pigeon Grade); rather they are roll-stamped on the right side of the barrel following the calibre designation.
- barrels of the same gauge are interchangeable between receiver/frames within the BPS series, (so care must be taken when determining which model is under examination.)
- within the BPS series, the "Hunter" designation means that wood furniture and a blued finish on metal surfaces are standard features; furthermore, "Hunter" designated shotguns are marked (as model) "Field" on their barrels.
- other variants which are marked (as model) "Field" include those BPS shotguns camouflaged in a Mossy Oak pattern.
- "Stalker" models are, in essence, "Field" models that have been fitted with plain matte black synthetic stocks and a matte black metal finish.
- the BPS "Game Gun" line may include variants whose barrel markings consist of "Deer Special" or "Turkey Special," and which may have round rather than ribbed barrels, fitted with rifle style sights. Furthermore, "Game Gun" variants may have wood or synthetic stocks, with the latter possibly camouflaged.
- other models may be marked as "Micro", "Trap" or "Buck Special", or may be defined by their style of stock, grade of finish, calibre, or barrel length.

Make	- "BROWNING ARMS COMPANY MORGAN, UTAH & MONTREAL PQ." is marked on the left side of the barrel. - "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennessee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- this is one variation that Browning offers in its "Game Gun" line. Browning also offers a "BPS Turkey Special". - "BPS" and "Deer Special" are marked on the barrel. - features include: checkered, select walnut stock with grooved forend and pistol grip buttstock; interchangeable choke system; gold plated trigger; round barrel fitted with either rifle sights or a cantilever mount for optical sights; bottom loading and ejecting; tang mounted safety; fitted recoil pad; blued receiver/frame and barrel; sling swivel attachment points on magazine cap and buttstock. - available in blued or camouflage finishes.
Manufacturer	- manufacturer's name is not usually marked on the firearm. - "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.
Action	- manually operated, under-barrel mounted pump action.
Serial Number	- serial number is marked on the receiver/frame. - observed serial numbers have consisted of five numbers, followed by a two letter year-of-production designator, followed by a three character (number/letter combination) product code.
Calibre	- calibre designation is marked on the right side of the barrel.
Shots	- tubular magazine mounted below the barrel.
Remarks	- the BPS (Browning Pump Shotgun) series consists of a number of models. - Browning has traditionally defined their models based on a combination of purpose, grade of appearance, and accoutrements. - within the BPS series, model designations are not usually marked on the receiver/frame (some exceptions exist, examples include the BPS Waterfowl and BPS Pigeon Grade); rather they are roll-stamped on the right side of the barrel following the calibre designation. - barrels of the same gauge are interchangeable between receiver/frames within the BPS series, (so care must be taken when determining which model is under examination.) - within the BPS series, the "Hunter" designation means that wood furniture and a blued finish on metal surfaces are standard features; furthermore, "Hunter" designated shotguns are marked (as model) "Field" on their barrels. - other variants which are marked (as model) "Field" include those BPS shotguns camouflaged in a Mossy Oak pattern. - "Stalker" models are, in essence, "Field" models that have been fitted with plain matte black synthetic stocks and a matte black metal finish. - the BPS "Game Gun" line may include variants whose barrel markings consist of "Deer Special" or "Turkey Special," and which may have round rather than ribbed barrels, fitted with rifle style sights. Furthermore, "Game Gun" variants may have wood or synthetic stocks, with the latter possibly camouflaged. - other models may be marked as "Micro", "Trap" or "Buck Special", or may be defined by their style of stock, grade of finish, calibre, or barrel length.

- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "BPS" is marked on the firearm.
- "BPS" denotes Browning Pump Shotgun.
- this model was contracted from Browning by "Ducks Unlimited" and has the letters "DU" incorporated into the serial number.
- the "BPS" series was introduced in 1977.
- features include: barrel with or without ventillated rib; double slide bars; bottom loaded and ejection; top tang mounted slide safety; matte black or polished blued finish; synthetic or wood stock.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Serial Number

- serial number is marked on the receiver/frame.
- serial number will have the letters "DU" in the sequence.
- serial number may consist of a two letter "DU" prefix and five numbers.
- serial number may consist of two numbers (year), two letters "DU", three letters "CAN", and three numbers.
- serial number may consist of four numbers, two letters "DU", and four numbers.
- serial number may consist of five numbers, two letters "DU", and three numbers.

Calibre

- calibre is marked on the barrel.

Shots

- tubular magazine located under the barrel.

Remarks

- the BPS (Browning Pump Shotgun) series consists of a number of models.
- Browning has traditionally defined their models based on a combination of purpose, grade of appearance, and accoutrements.
- within the BPS series, model designations are not usually marked on the receiver/frame (some exceptions exist, examples include the BPS Waterfowl and BPS Pigeon Grade); rather they are roll-stamped on the right side of the barrel following the calibre designation.
- barrels of the same gauge are interchangeable between receiver/frames within the BPS series, (so care must be taken when determining which model is under examination.)
- within the BPS series, the "Hunter" designation means that wood furniture and a blued finish on metal surfaces are standard features; furthermore, "Hunter" designated shotguns are marked (as model) "Field" on their barrels.
- other variants which are marked (as model) "Field" include those BPS shotguns camouflaged in a Mossy Oak pattern.
- "Stalker" models are, in essence, "Field" models that have been fitted with plain matte black synthetic stocks and a matte black metal finish.
- the BPS "Game Gun" line may include variants whose barrel markings consist of "Deer Special" or "Turkey Special," and which may have round rather than ribbed barrels, fitted with rifle style sights. Furthermore, "Game Gun" variants may have wood or synthetic stocks, with the latter possibly camouflaged.
- other models may be marked as "Micro", "Trap" or "Buck Special", or may be defined by their style of stock, grade of finish, calibre, or barrel length.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- "BROWNING ARMS COMPANY MORGAN, UTAH & MONTREAL PQ." is marked on the left side of the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced 1977.
- "BPS" and "Field Model" may be marked on the barrel.
- BPS was available with Invector and Invector Plus choke system in 1994.
- Invector Plus choke system became standard in 1995.
- features include: pump-action bottom eject shotgun; ventilated rib; checkered walnut pistol grip stock and forearm; metal is blued; BPS Cantilevered Game has a plain (no ventilated rib) barrel, fully rifled without removable chokes and a fixed scope mount curving over the top of the receiver/frame.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Serial Number

- marked on the receiver/frame.
- observed example had five numbers, followed by a two letter year-of-production designator, followed by a three character (number/letter combination) product code.

Calibre

- marked on barrel.

Shots

- originally produced as a five shot.
- capacity was changed to three shots in 1985.

Remarks

- the BPS (Browning Pump Shotgun) series consists of a number of models.
- Browning has traditionally defined their models based on a combination of purpose, grade of appearance, and accoutrements.
- within the BPS series, model designations are not usually marked on the receiver/frame (some exceptions exist, examples include the BPS Waterfowl and BPS Pigeon Grade); rather they are roll-stamped on the right side of the barrel following the calibre designation.
- barrels of the same gauge are interchangeable between receiver/frames within the BPS series, (so care must be taken when determining which model is under examination.)
- within the BPS series, the "Hunter" designation means that wood furniture and a blued finish on metal surfaces are standard features; furthermore, "Hunter" designated shotguns are marked (as model) "Field" on their barrels.
- other variants which are marked (as model) "Field" include those BPS shotguns camouflaged in a Mossy Oak pattern.
- "Stalker" models are, in essence, "Field" models that have been fitted with plain matte black synthetic stocks and a matte black metal finish.
- the BPS "Game Gun" line may include variants whose barrel markings consist of "Deer Special" or "Turkey Special," and which may have round rather than ribbed barrels, fitted with rifle style sights. Furthermore, "Game Gun" variants may have wood or synthetic stocks, with the latter possibly camouflaged.
- other models may be marked as "Micro", "Trap" or "Buck Special", or may be defined by their style of stock, grade of finish, calibre, or barrel length.

Model

- introduced 1986.
- "BPS" and "FIELD MODEL" are usually marked on the barrel.
- "BPS Micro" was available with the Invector and the Invector Plus choke system in 1994.
- Invector Plus choke system became standard in 1995.
- features include: round, smoothbore barrel with a ventilated top rib, bead front sight, and interchangeable choke tube; solid top, flat sided steel receiver/frame with a top tang mounted safety, bottom loading and ejection; dual action bars; checkered walnut forearm and semi-pistol grip buttstock; blued metal finish.
- overall length with a 660 mm barrel (26") is 1061 mm (41 3/4"), and the average weight is 2.80 kgs (6.14 lbs).

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Serial Number

- serial number is marked on the receiver/frame.
- serial number observed consisted of five numbers, two letter year code, and a three number product code.

Calibre

- gauge and chamber length are marked on the barrel.

Shots

- tubular magazine is mounted under the barrel.

Remarks

- the BPS (Browning Pump Shotgun) series consists of a number of models.
- Browning has traditionally defined their models based on a combination of purpose, grade of appearance, and accoutrements.
- within the BPS series, model designations are not usually marked on the receiver/frame (some exceptions exist, examples include the BPS Waterfowl and BPS Pigeon Grade); rather they are roll-stamped on the right side of the barrel following the calibre designation.
- barrels of the same gauge are interchangeable between receiver/frames within the BPS series, (so care must be taken when determining which model is under examination.)
- within the BPS series, the "Hunter" designation means that wood furniture and a blued finish on metal surfaces are standard features; furthermore, "Hunter" designated shotguns are marked (as model) "Field" on their barrels.
- other variants which are marked (as model) "Field" include those BPS shotguns camouflaged in a Mossy Oak pattern.
- "Stalker" models are, in essence, "Field" models that have been fitted with plain matte black synthetic stocks and a matte black metal finish.
- the BPS "Game Gun" line may include variants whose barrel markings consist of "Deer Special" or "Turkey Special," and which may have round rather than ribbed barrels, fitted with rifle style sights. Furthermore, "Game Gun" variants may have wood or synthetic stocks, with the latter possibly camouflaged.
- other models may be marked as "Micro", "Trap" or "Buck Special", or may be defined by their style of stock, grade of finish, calibre, or barrel length.

Notes

Make

- "BROWNING ARMS COMPANY MORGAN, UTAH & MONTREAL PQ." is usually marked on the left side of the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- model designation may not be marked on the firearm.
- features include: round rifled barrel with a cantilever scope mount; solid top, flat sided steel receiver/frame with a top tang mounted safety and bottom loading and ejection; dual steel action bars; checkered walnut forearm and semi-pistol grip buttstock with a ventilated recoil pad and sling swivel studs; matte blued finish.
- overall length with a 508 mm barrel (20") is 997 mm (39 1/4") and the average weight is 2.79 kg (6.15 lbs).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- manufacturer's name is not usually marked on the firearm. - "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.
Serial Number	- serial number is marked on the side of the receiver/frame. - serial number consists of five numbers, two letter year code, and three number product code.
Shots	- tubular magazine mounted below the barrel.

- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced in 2001.
- "BPS" and "FIELD MODEL" may be marked on the barrel.
- "NATIONAL WILD TURKEY FEDERATION" name and logo are marked on the buttstock.
- features include: round smoothbore barrel with a ventilated top rib, "Hi Viz" interchangeable fibre optic sights, and interchangeable Invector-Plus choke tube; solid top forged steel receiver/frame with a top tang mounted safety and bottom loading and ejecton; receiver/frame is drilled and tapped for scope mounts; dual steel action bars; synthetic forearm and semi-pistol grip buttstock with a rubber recoil pad; "Mossy Oak Break-Up" camouflage finish.
- overall length with a 610 mm barrel (24") is 1168 mm (46") and the average weight is 4.68 kg (10.3 lbs).

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Serial Number

- serial number is marked on the right side of the receiver/frame.
- serial number observed consisted of five numbers, a two letter year code and a three number product code.

Calibre

- 20GA X 3" chambering with 559mm barrel, 3 shots capacity inroduced in 2003.

Shots

- tubular magazine mounted under the barrel.

Remarks

- this is a BPS specifically designed for turkey hunting.
- the BPS (Browning Pump Shotgun) series consists of a number of models.
- Browning has traditionally defined their models based on a combination of purpose, grade of appearance, and accoutrements.
- within the BPS series, model designations are not usually marked on the receiver/frame (some exceptions exist, examples include the BPS Waterfowl and BPS Pigeon Grade); rather they are roll-stamped on the right side of the barrel following the calibre designation.
- barrels of the same gauge are interchangeable between receiver/frames within the BPS series, (so care must be taken when determining which model is under examination.)
- within the BPS series, the "Hunter" designation means that wood furniture and a blued finish on metal surfaces are standard features; furthermore, "Hunter" designated shotguns are marked (as model) "Field" on their barrels.
- other variants which are marked (as model) "Field" include those BPS shotguns camouflaged in a Mossy Oak pattern.
- "Stalker" models are, in essence, "Field" models that have been fitted with plain matte black synthetic stocks and a matte black metal finish.
- the BPS "Game Gun" line may include variants whose barrel markings consist of "Deer Special" or "Turkey Special," and which may have round rather than ribbed barrels, fitted with rifle style sights. Furthermore, "Game Gun" variants may have wood or synthetic stocks, with the latter possibly camouflaged.
- other models may be marked as "Micro", "Trap" or "Buck Special", or may be defined by their style of stock, grade of finish, calibre, or barrel length.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "BPS" is marked on the barrel.
- introduced in 1987.
- features include: matte finish; black synthetic stock and forearm; bottom ejection; removable choke tubes; top tang safety and vent rib barrel.
- additional features; Back-Bored Technology in 12 gauge models; dual steel action bars; camouflage finish available.
- overall length with a 660mm barrel (26") is 1219mm (48") and an average weight of 4.90kg (10.8lbs).

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Serial Number

- the serial number is marked on the receiver/frame.
- observed serial numbers have consisted of five numbers, followed by a two letter year-of-production designator, followed by a two or three character (number/letter combination) product code.

Calibre

- calibre is marked on the barrel.

Shots

- tubular magazine mounted below barrel.

Remarks

- the BPS (Browning Pump Shotgun) series consists of a number of models.
- Browning has traditionally defined their models based on a combination of purpose, grade of appearance, and accoutrements.
- within the BPS series, model designations are not usually marked on the receiver/frame (some exceptions exist, examples include the BPS Waterfowl and BPS Pigeon Grade); rather they are roll-stamped on the right side of the barrel following the calibre designation.
- barrels of the same gauge are interchangeable between receiver/frames within the BPS series, (so care must be taken when determining which model is under examination.)
- within the BPS series, the "Hunter" designation means that wood furniture and a blued finish on metal surfaces are standard features; furthermore, "Hunter" designated shotguns are marked (as model) "Field" on their barrels.
- other variants which are marked (as model) "Field" include those BPS shotguns camouflaged in a Mossy Oak pattern.
- "Stalker" models are, in essence, "Field" models that have been fitted with plain matte black synthetic stocks and a matte black metal finish.
- the BPS "Game Gun" line may include variants whose barrel markings consist of "Deer Special" or "Turkey Special," and which may have round rather than ribbed barrels, fitted with rifle style sights. Furthermore, "Game Gun" variants may have wood or synthetic stocks, with the latter possibly camouflaged.
- other models may be marked as "Micro", "Trap" or "Buck Special", or may be defined by their style of stock, grade of finish, calibre, or barrel length.

Notes

Make

- "BROWNING ARMS COMPANY" is marked on the left side of the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- similar to BPS Field.
- manufactured from 1977 to 1984 and reintroduced in 2007.
- features include: ivory center and front beads on a floating rib; trap contoured ventilated recoil pad; high gloss finish; bottom loading and bottom eject.
- model designation is found on right side of barrel.
- overall length with a 711mm barrel (28") is 1226mm (48 1/4") and an average weight of 3.68kg (8.1lbs).

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Serial Number

- sequential numbers, followed by two alpha characters, followed by sequential numbers.
- the two alpha characters are the year code and the last series of numbers are the model code.

Calibre

- produced only in 2 3/4" chambering.

Remarks

- the BPS (Browning Pump Shotgun) series consists of a number of models.
- Browning has traditionally defined their models based on a combination of purpose, grade of appearance, and accoutrements.
- within the BPS series, model designations are not usually marked on the receiver/frame (some exceptions exist, examples include the BPS Waterfowl and BPS Pigeon Grade); rather they are roll-stamped on the right side of the barrel following the calibre designation.
- barrels of the same gauge are interchangeable between receiver/frames within the BPS series, (so care must be taken when determining which model is under examination.)
- within the BPS series, the "Hunter" designation means that wood furniture and a blued finish on metal surfaces are standard features; furthermore, "Hunter" designated shotguns are marked (as model) "Field" on their barrels.
- other variants which are marked (as model) "Field" include those BPS shotguns camouflaged in a Mossy Oak pattern.
- "Stalker" models are, in essence, "Field" models that have been fitted with plain matte black synthetic stocks and a matte black metal finish.
- the BPS "Game Gun" line may include variants whose barrel markings consist of "Deer Special" or "Turkey Special," and which may have round rather than ribbed barrels, fitted with rifle style sights. Furthermore, "Game Gun" variants may have wood or synthetic stocks, with the latter possibly camouflaged.
- other models may be marked as "Micro", "Trap" or "Buck Special", or may be defined by their style of stock, grade of finish, calibre, or barrel length.

Notes

Make

- "BROWNING" is marked in gold on the right side of the receiver/frame.
- "BROWNING" trade name is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.

Model

- the model designation may be marked on the barrel as "BPS" and "Turkey/Burglar".
- features observed: tapered plain round barrel with tactical fibre optic front sight; forged and machine steel receiver/frame; double action bars and bottom ejection; top tang mounted safety; Invector choke system with an extra full choke tube; rifle-style stock dimensions with a non-glare, satin, walnut forearm and butt stock; sling swivels; rubber recoil pad.
- overall length with a 559mm barrel (22") is 1080mm (42 3/4") and an average weight of 3.18kg (7lbs) for 20GA and 3.22kg (7.10lbs for 12GA..

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Serial Number

- serial number is usually marked on the upper tang of the receiver/frame.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacture followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, MV - 2005, MT - 2006, MR - 2007, MP - 2008, MN - 2009, ZM - 2010, ZZ - 2011, ZY - 2012, ZX - 2013, ZW - 2014, ZV - 2015, ZT - 2016, ZR - 2017, ZP - 2018, ZN - 2019, and YM - 2020.

- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced in 1985.
- "BPS" and "FIELD MODEL" are marked on the barrel.
- "Upland Special" is not marked on the firearm.
- "Upland Special" denotes the straight grip buttstock.
- "BPS" models were available with Invector and Invector Plus choke system in 1994.
- Invector Plus choke system became standard in 1995.
- features include: round smoothbore barrel with a ventilated top rib, bead front sight and Invector or an Invector-Plus choke tube; solid top steel receiver/frame with a top tang mounted safety and bottom loading and ejection; dual action bars; checkered walnut forearm and straight grip buttstock with a recoil pad; blued metal finish.
- overall length with a 660 mm barrel (26") is 1181 mm (46 1/2") and the average weight is 2.78 kg (6.13 lbs).

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Serial Number

- serial number is marked on the receiver/frame.
- serial number observed consisted of five numbers, two letter year code, and three number product code.

Calibre

- calibre designation is marked on the barrel.

Shots

- tubular magazine mounted under barrel.

Remarks

- the BPS (Browning Pump Shotgun) series consists of a number of models.
- Browning has traditionally defined their models based on a combination of purpose, grade of appearance, and accoutrements.
- within the BPS series, model designations are not usually marked on the receiver/frame (some exceptions exist, examples include the BPS Waterfowl and BPS Pigeon Grade); rather they are roll-stamped on the right side of the barrel following the calibre designation.
- barrels of the same gauge are interchangeable between receiver/frames within the BPS series, (so care must be taken when determining which model is under examination.)
- within the BPS series, the "Hunter" designation means that wood furniture and a blued finish on metal surfaces are standard features; furthermore, "Hunter" designated shotguns are marked (as model) "Field" on their barrels.
- other variants which are marked (as model) "Field" include those BPS shotguns camouflaged in a Mossy Oak pattern.
- "Stalker" models are, in essence, "Field" models that have been fitted with plain matte black synthetic stocks and a matte black metal finish.
- the BPS "Game Gun" line may include variants whose barrel markings consist of "Deer Special" or "Turkey Special," and which may have round rather than ribbed barrels, fitted with rifle style sights. Furthermore, "Game Gun" variants may have wood or synthetic stocks, with the latter possibly camouflaged.
- other models may be marked as "Micro", "Trap" or "Buck Special", or may be defined by their style of stock, grade of finish, calibre, or barrel length.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- "BROWNING" is marked in gold on the right side of the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- the model designation is marked as, "BPS" and "Waterfowl" in gold script on the right side of the receiver/frame.
- introduced in 1993.
- features include: matte black finish on all metal surfaces with gold detailing; ventilated rib on barrel; double action bars and bottom ejection; top tang mounted safety; Invector removable choke system; checkered walnut forearm and butt stock; gold trimmed receiver/frame; rubber recoil pad.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Serial Number

- the serial number is marked on the right side of the receiver/frame.
- serial numbers consist of five numbers, followed by a two letter year-of-production designator, followed by a three character (number/letter combination) product code.

Calibre

- the calibre designation is marked on the barrel.

Shots

- tubular magazine mounted below the barrel.

Remarks

- the BPS (Browning Pump Shotgun) series consists of a number of models.
- Browning has traditionally defined their models based on a combination of purpose, grade of appearance, and accoutrements.
- within the BPS series, model designations are not usually marked on the receiver/frame (some exceptions exist, examples include the BPS Waterfowl and BPS Pigeon Grade); rather they are roll-stamped on the right side of the barrel following the calibre designation.
- barrels of the same gauge are interchangeable between receiver/frames within the BPS series, (so care must be taken when determining which model is under examination.)
- within the BPS series, the "Hunter" designation means that wood furniture and a blued finish on metal surfaces are standard features; furthermore, "Hunter" designated shotguns are marked (as model) "Field" on their barrels.
- other variants which are marked (as model) "Field" include those BPS shotguns camouflaged in a Mossy Oak pattern.
- "Stalker" models are, in essence, "Field" models that have been fitted with plain matte black synthetic stocks and a matte black metal finish.
- the BPS "Game Gun" line may include variants whose barrel markings consist of "Deer Special" or "Turkey Special," and which may have round rather than ribbed barrels, fitted with rifle style sights. Furthermore, "Game Gun" variants may have wood or synthetic stocks, with the latter possibly camouflaged.
- other models may be marked as "Micro", "Trap" or "Buck Special", or may be defined by their style of stock, grade of finish, calibre, or barrel length.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- "Browning Arms Company" is marked on the left side of the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced in 1985.
- "Buck Mark" is marked on the right side of the firearm.
- this is a generic model and other entries exist which may better describe the firearm.
- generally a change in finish, barrel length, or features, and sometimes calibre drives the designation to another model.
- features include: slabside matte blued barrel; adjustable sights; steel (until 1991) or alloy matte blue finished receiver/frame.

Manufacturer

- "Browning Arms Company" is marked on the left side of the barrel.
- "Made in U.S.A." is marked on the right side of the firearm.
- manufactured on contract by Arms Technology (A.T.I.) of Salt Lake City, Utah.

Action

- blowback operated.

Serial Number

- serial number is marked on the front grip strap.
- serial number consists of three numbers "655" or "515" for the model/product code followed by two letters for the year code, followed by five numbers.

Calibre

- the calibre is marked on the right side of the barrel

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the "Buck Mark" line of rifles was introduced in 2001. This model has the same visual appearance of the Buck Mark pistol but for the integral shoulder stock and longer barrel. The Buck Mark line of rifles includes several variations built on the same basic platform. Model markings within Browning model lines usually remain constant, features identify individual variations. - "Buck Mark" will usually be marked on the barrel assembly. - features of the "Buck Mark Sporter" (introduced in 2001) include: blued or camouflage (introduced in 2004) finish; sporter weight tapered barrel with fibre optic sight system; aluminium receiver/frame with an integral rail scope mount; slide has a grooved recess and raised "ears" for easy manipulation; walnut forend, grip panels and buttstock. - features of the "Buck Mark Target" (introduced in 2001) include: blued finish; heavy profile barrel (.900" diameter) with no open sights; aluminium receiver/frame with an integral rail scope mount; slide has a grooved recess and raised "ears" for easy manipulation; walnut forend, grip panels and buttstock. - features of the "Buck Mark Classic Target" (introduced in 2002) include: blued finish; heavy profile barrel (.900" diameter)with no open sights; aluminium receiver/frame with an integral rail scope mount; slide has a grooved recess and raised "ears" for easy manipulation; gray laminate forend, grip panels and buttstock. - features of the "Buck Mark Classic Carbon" (introduced in 2003) include: blued finish; heavy profile, lightweight carbon composite barrel (.900" diameter) with no open sights; aluminium receiver/frame with an integral rail scope mount; slide has a grooved recess and raised "ears" for easy manipulation; gray laminate forend, grip panels and buttstock.
Manufacturer	- the manufacturer's name is marked on the firearm.
Action	- blowback operated.
Serial Number	- the serial number is marked on the receiver/frame and consists of a three digit product code followed by a two letter year of manufacture code followed by a further five digits.
Calibre	- the calibre designation is marked on the barrel.
Shots	- detachable box magazine housed in the grip.
Remarks	- Browning catalogues have listed the same product code for both the "Buck Mark Sporter" and "Buck Mark Target" in different years.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the "Buck Mark" line of rifles was introduced in 2001. This model has the same visual appearance of the Buck Mark pistol but for the integral shoulder stock and longer barrel. The Buck Mark line of rifles includes several variations built on the same basic platform. Model markings within Browning model lines usually remain constant and features identify individual variations.
- "Buck Mark" will usually be marked on the barrel assembly.
- features of the "Buck Mark Sporter" (introduced in 2001) include: blued or camouflage (introduced in 2004) finish; sporter weight tapered barrel with fibre optic sight system; aluminum receiver/frame with an integral rail scope mount; slide has a grooved recess and raised "ears" for easy manipulation; walnut forend, grip panels and buttstock.
- features of the "Buck Mark Target" (introduced in 2001) include: blued finish; heavy profile barrel (.900" diameter) with no open sights; aluminum receiver/frame with an integral rail scope mount; slide has a grooved recess and raised "ears" for easy manipulation; walnut forend, grip panels and buttstock.
- features of the "Buck Mark Classic Target" (introduced in 2002) include: blued finish; heavy profile barrel (.900" diameter) with no open sights; aluminum receiver/frame with an integral rail scope mount; slide has a grooved recess and raised "ears" for easy manipulation; grey laminate forend, grip panels and buttstock.
- features of the "Buck Mark Classic Carbon" (introduced in 2003) include: blued finish; heavy profile, lightweight carbon composite barrel (.900" diameter) with no open sights; aluminum receiver/frame with an integral rail scope mount; slide has a grooved recess and raised "ears" for easy manipulation; grey laminate forend, grip panels and buttstock.
- the "Buck Mark Target Lite" was introduced in 2006.
- overall length with a 457mm barrel (18") is 854mm (33 5/8") and an average weight of 2.64kg (5.8lbs).
- rifling characteristics in caliber 22 LR: 1 turn in 16 inches.

Manufacturer

- the manufacturer's name is marked on the firearm.

Action

- blowback operated.

Serial Number

- the serial number is marked on the receiver/frame and consists of a three number product code followed by a two letter year of manufacture code and followed by five numbers.

Calibre

- the calibre designation is marked on the barrel.

Shots

- detachable box magazine housed in the grip.

Remarks

- Browning catalogues have listed the same product code for both the "Buck Mark Sporter" and "Buck Mark Target" in different years.

Notes

Make

- "Browning Arms Company" is marked on the left side of the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- model designation may be marked on the right side of the barrel assembly.
- this is a more compact version of the "Buck Mark Challenge".
- features include; gold plated trigger; wood grip panels on a smaller profile grip than standard Buck mark models; blued receiver/frame and barrel assembly; windage and elevation adjustable rear sight; fixed blade foresight; barrel profile is reminiscent of older "Challenger" models and is designed to reduce weight.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "Browning Arms Company" is marked on the left side of the barrel. - "Made in U.S.A." is marked on the right side of the firearm. - manufactured on contract by Arms Technology (A.T.I.) of Salt Lake City, Utah.
Action	- blowback operated.
Serial Number	- marked on the left side of the receiver/frame.
Calibre	- marked on the right side of the barrel assembly.
Shots	- single column, detachable box magazine.

Notes

Make

- "Browning Arms Company" is usually marked on the left side of the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "BUCK MARK" was observed marked on the right side of the barrel assembly.
- introduced in 2006 in limited production.
- features include: flat sided stainless steel barrel with damascus finish; fixed front and adjustable rear fibre optic sights; serrated stainless steel slide; hammerless; magazine release located behind the trigger; slide release lever and safety lever located on the left side of the receiver/frame above the grip; laminated rosewood UDX grip panels with finger grooves.
- overall length with a 140mm (5.5") barrel is 241mm (9.5"), average weight is 0.97kg (2lbs 2oz).
- similar to the model "Buck Mark Plus Stainless UDX" which features a stainless steel slide and barrel.

Manufacturer

- "BROWNING ARMS COMPANY" may be marked on the firearm.
- "MADE IN U.S.A." was observed marked on the right side of the barrel assembly.
- manufactured on contract by Arms Technology (A.T.I.) of Salt Lake City, Utah.

Action

- blowback operated.

Serial Number

- the serial number is marked on the front grip strap.
- the serial number consists of three numbers for the model/product code followed by two letters for the year code, followed by five numbers.

Shots

- detachable box magazine.
