Model

- the "Buck Mark" line of rifles was introduced in 2001. This model has the same visual appearance of the Buck Mark pistol but for the integral shoulder stock and longer barrel. The Buck Mark line of rifles includes several variations built on the same basic platform. Model markings within Browning model lines usually remain constant, features identify individual variations.
- "Buck Mark" will usually be marked on the barrel assembly.
- features of the "Buck Mark Sporter" (introduced in 2001) include: blued or camouflage (introduced in 2004) finish; sporter weight tapered barrel with fibre optic sight system; aluminium receiver/frame with an integral rail scope mount; slide has a grooved recess and raised "ears" for easy manipulation; walnut forend, grip panels and buttstock.
- features of the "Buck Mark Target" (introduced in 2001) include: blued finish; heavy profile barrel (.900" diameter) with no open sights; aluminium receiver/frame with an integral rail scope mount; slide has a grooved recess and raised "ears" for easy manipulation; walnut forend, grip panels and buttstock.
- features of the "Buck Mark Classic Target" (introduced in 2002) include: blued finish; heavy profile barrel (.900" diameter)with no open sights; aluminium receiver/frame with an integral rail scope mount; slide has a grooved recess and raised "ears" for easy manipulation; gray laminate forend, grip panels and buttstock.
- features of the "Buck Mark Classic Carbon" (introduced in 2003) include: blued finish; heavy profile, lightweight carbon composite barrel (.900" diameter) with no open sights; aluminium receiver/frame with an integral rail scope mount; slide has a grooved recess and raised "ears" for easy manipulation; gray laminate forend, grip panels and buttstock.
- overall length with a 457mm barrel (18") is 854mm (33 5/8") and an average weight of 2.55kg (5.6lbs).
- rifling characteristics in caliber 22 LR: 1 turn in 16 inches.

Manufacturer

- the manufacturer's name is marked on the firearm.

Action

- blowback operated.

Serial Number

- the serial number is marked on the receiver/frame and consists of a three digit product code followed by a two letter year of manufacture code followed by a further five digits.

Calibre

- the calibre designation is marked on the barrel.

Shots

- detachable box magazine housed in the grip.

Remarks

- Browning catalogues have listed the same product code for both the "Buck Mark Sporter" and "Buck Mark Target" in different years.

- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the Browning Challenger III was introduced in 1982 and discontinued in 1990. Two versions were offered, the first, touted as a "target" version featured a heavy profile barrel with flat sides. In 1983 a "sporter" version was introduced with a slim, round, tapered barrel. - "CHALLENGER III" is normally marked on the right side of the barrel. - features include: blued aluminum receiver/frame, blued slide and barrel, flat sided bull barrel, internal hammer, serrations on the rear of the slide, fixed front sight with an adjustable rear sight, gold plated trigger, the safety is located on the left side of the receiver/frame, the magazine release is on the heel of the grip, and the grip panels may be made of wood.
Manufacturer	- normally marked on the left side of the barrel as, "BROWNING ARMS COMPANY / MORGAN, UTAH U.S.A. & / MONTREAL, P.Q. CANADA". The country may be marked on the right side of the barrel as, "MADE IN U.S.A.". - manufactured on contract by Arms Technology, Salt Lake City, Utah.
Action	- blowback operated.
Serial Number	- the serial number is marked on the grip strap of the receiver/frame. - the serial number incorporates the model code, "655", followed by two letter year code, and then five sequential numbers, eg. "655PX179##".
Calibre	- the calibre is normally marked on the right side of the barrel as, "22 LONG RIFLE".
Shots	- detachable box magazine.

Notes

Make

- "Browning" trade name is normally marked on the receiver/frame and/or the "Browning" deer head trade mark logo is marked on the side of the receiver/frame.
- "Browning Arms Company" is marked on the side of the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "Citori" (in script) is marked on the underside of the receiver/frame .
- model was introduced in 1973.
- the following calibres were introduced: 12 GA in 1973, 20 GA in 1974, 28 GA and 410 GA in 1978 and 16 GA in 1987.
- features include: over and under barrel configuration; boxlock; hinged receiver/frame with top break open lever; straight or pistol grip stock.
- the "Citori" shotgun is available in a variety of hunting, trap, skeet, and sporting clays models; with various barrel lengths and styles.
- also available in a wide variety of finishes, including custom engraving, precious metal inlay, etc.
- this is a generic model; other model "Citori" entries exist which might better describe the firearm.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- over & under barrel pattern.

Serial Number

- the serial number is marked on the upper tang of the receiver/frame.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacture followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, MV - 2005, MT - 2006, MR - 2007, MP - 2008, MN - 2009, ZM - 2010, ZZ - 2011, ZY - 2012, ZX - 2013, ZW - 2014, ZV - 2015, ZT - 2016, ZR - 2017, ZP - 2018, ZN - 2019, and YM - 2020.
- an observed example, with the serial number "03869PZ1C3" would indicate a Miroku manufactured in 1981.

Calibre

- calibre is marked on the upper barrel.

Other Markings

- marked on the right side of the barrel: "SPECIAL STEEL", "calibre" and "barrel length in inches", example: (SPECIAL STEEL 20GA - 2 3/4" - 28").
- marked on the underside of the barrel monobloc: proof and acceptance marks, repeat of serial number.

Notes

Make

- "Browning" trade name is marked on the receiver/frame and/or the "Browning" deer head trade mark logo is marked on the side of the receiver/frame.
- "Browning Arms Company" is marked on the side of the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- model may be marked on the receiver/frame in front of the trigger guard.
- model 325 Golden Clays was manufactured circa 1992 to 1994.
- features include: blued metal with the exception of engraved and gold inlayed receiver/frame portraying the transition of a game bird to a clay target; ported barrels; walnut pistol grip stock and forend; ventilated rib; top tang open lever and safety/selector; ejectors; gold finish single selective trigger and checkered grip and forend.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- over & under configuration.

Serial Number

- the serial number is usually marked on the upper tang of the receiver/frame.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacture followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, MV - 2005, MT - 2006, MR - 2007, MP - 2008, MN - 2009, ZM - 2010, ZZ - 2011, ZY - 2012, ZX - 2013, ZW - 2014, ZV - 2015, ZT - 2016, ZR - 2017, ZP - 2018, ZN - 2019, and YM - 2020.

Other Markings

- "Browning Arms, Morgan Utah and Montreal P. Q. Made in Japan" is marked on the firearm.

Notes

Make

- "Browning" trade name is marked on the receiver/frame and/or the "Browning" deer head trade mark logo is marked on the side of the receiver/frame.
- "Browning Arms Company" is marked on the side of the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- the Citori 525 Sporting is a new model for 2002.
- features include: box lock receiver/frame; silver nitride finish on the receiver/frame (with light engraving on both sides of the receiver/frame) and high polish blued barrels; ventilated top and middle ribs; checkered walnut pistol grip stock and fore end; adjustable comb; rubber butt pad; gold trigger; high visibility front sight; both barrels have slightly protruding removable choke tubes.
- left hand model with lightweight barrel contour and left hand palm swell introduced in 2004.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- over/under barrel configuration.

Serial Number

- the serial number is usually marked on the upper tang of the receiver/frame.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacture followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, MV - 2005, MT - 2006, MR - 2007, MP - 2008, MN - 2009, ZM - 2010, ZZ - 2011, ZY - 2012, ZX - 2013, ZW - 2014, ZV - 2015, ZT - 2016, ZR - 2017, ZP - 2018, ZN - 2019, and YM - 2020.

Notes

Make

- "Browning" trade name is marked on the receiver/frame and/or the "Browning" deer head trade mark logo is marked on the side of the receiver/frame.
- "Browning Arms Company" is marked on the side of the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "Citori" is marked on the firearm.
- Citori 625 Feather is a new model for 2008.
- Citori 625 Feather is a lightweight version of the Citori 625 model.
- features include: over and under barrels with ventilated top rib and ventilated middle rib on some variants, high visibility front sight and removable Invector or Invector Plus choke tubes; front hinged lightweight alloy receiver/frame with steel breech face and hinge pin, top tang mounted break open lever and barrel selector/safety; hammerless; boxlock; ejectors; gold plated single selective trigger; checkered walnut forearm with schnabel forend and pistol grip buttstock with rubber butt pad; silver nitride finish on the receiver/frame (including light scroll engraving on both sides of the receiver/frame) and high polish blue on the barrels.
- in 2010 offered with a three or four barrel set.
- overall length with a 660mm barrel (26") is 1092mm (43") and an average weight of 2.79kg (6.14lbs).

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- over and under barrel configuration.

Serial Number

- serial number is usually marked on the upper tang of the receiver/frame.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacture followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, MV - 2005, MT - 2006, MR - 2007, MP - 2008, MN - 2009, ZM - 2010, ZZ - 2011, ZY - 2012, ZX - 2013, ZW - 2014, ZV - 2015, ZT - 2016, ZR - 2017, ZP - 2018, ZN - 2019, and YM - 2020.

Calibre

- calibre designation is marked on the barrel assembly.

Make

- "BROWNING" is marked on the firearm; this trade name is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced in 2013.
- "BROWNING" over "725" over "FEATHER" may be marked on the underside of the receiver/frame.
- "725" was observed marked on the right side of the receiver/frame.
- "CITORI" may be marked on the right of the barrel.
- features observed: round, over and under barrels with ventilated top and side ribs, fibre optic front and ivory mid-bead sights, and interchangeable Invector choke tubes; front hinged, lightweight alloy receiver/frame with steel breech face and hinge pin, and top tang mounted break open lever and safety/selector; single selective trigger; ejectors; checkered walnut schnabel style forearm and pistol grip buttstock with recoil pad; gloss blue barrel and silver nitride finished receiver/frame with gold accented engraving.
- overall length is from 1111 mm (43 3/4") to 1162 mm (45 3/4"), and the average weight is from 3.03 kg (6.7 lbs) to 3.12 kgs (6.9 lbs).

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- over and under barrel configuration, hinged barrel design.

Serial Number

- serial number is usually marked on the upper tang of the receiver/frame.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacture followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, MV - 2005, MT - 2006, MR - 2007, MP - 2008, MN - 2009, ZM - 2010, ZZ - 2011, ZY - 2012, ZX - 2013, ZW - 2014, ZV - 2015, ZT - 2016, ZR - 2017, ZP - 2018, ZN - 2019, and YM - 2020.

- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "Citori 725" may be marked on the firearm, with "Pro" marked on the sides of the receiver.
- this is a version of the Citori 725 over/under box lock shotgun made specifically for sporting clays shooters, with an adjustable comb on the buttstock to allow a shooter to adjust the point of impact of the shot stream.
- features include: blued, ported barrels with ventilated top-rib and mid-rib; screw-in interchangeable Invector choke tubes; checkered walnut forearm and pistol-grip buttstock; matte silver nitride-finished receiver with specific engraving; single trigger adjustable for length of pull; adjustable comb on the butt; and a rounded rubber butt pad to allow a shooter to shoulder the shotgun quickly.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on the barrels.

Action

over/under configuration.

Serial Number

- numbered on the receiver/frame.

Notes

Make

- "BROWNING" is marked on the firearm; this trade name is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- introduced in 2015.
- "725 SPORTING G7" is marked on the underside of the receiver/frame.
- this firearm is part of the box lock action Citori 725 small gauge series, limited in production with individually hand-engraved receivers.
- features include: over and under blued, round partially divoted barrels with ventilated top rib and ventilated side rib, plus fixed fiber-optic front sight; front hinged blued and gold-accented finished, hand-engraved steel receiver/frame with top break open lever; top tang safety toggle; single brass trigger and blued trigger guard; checkered high-grade walnut schnabel style forearm and pistol grip buttstock with black recoil pad.
- overall firearm length with 762mm (30") barrel is 1219mm (48") and overall weight is 3.4 kg (7.5 lbs).

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- hinged barrel design, over and under barrel configuration.

Serial Number

- serial number is usually marked on the upper tang of the receiver/frame.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacture followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, MV - 2005, MT - 2006, MR - 2007, MP - 2008, MN - 2009, ZM - 2010, ZZ - 2011, ZY - 2012, ZX - 2013, ZW - 2014, ZV - 2015, ZT - 2016, ZR - 2017, ZP - 2018, ZN - 2019, and YM - 2020.

Calibre

- calibre may be marked on the firearm.

Other Markings

- "CITORI SPECIAL STEEL" may be marked on the barrel.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Serial Number

- the serial number is usually marked on the upper tang of the receiver/frame.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacture followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, MV - 2005, MT - 2006, MR - 2007, MP - 2008, MN - 2009, ZM - 2010, ZZ - 2011, ZY - 2012, ZX - 2013, ZW - 2014, ZV - 2015, ZT - 2016, ZR - 2017, ZP - 2018, ZN - 2019, and YM - 2020.

Remarks

- the Citori 802 is similar to other Citori models (box lock, auto ejectors, single selective trigger and ventilated rib barrels) but differ in the accessories. Long choke inserts for the barrels allow the lenght of the barrels (for better swing) to be lenghthened from the 28" basic to 30" or 32". Citori models are manufactured in Japan, have ventilated ribs, walnut stock and forearms. Most models have a pistolgrip butt stock.

Firearm Reference Number (FRN): 200252
Make: Browning
Model: Citori 825 Field

Summary

Make:	Browning
Model:	Citori 825 Field
Manufacturer:	Miroku Firearms Manufacturing
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Multi-Barrel
Country of Manufacturer:	JAPAN
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
200252 - 1	12 GA X 3"	2	660	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
200252 - 2	12 GA X 3"	2	711	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- The company logo is marked on the receiver/frame.
- The company logo consists of a stag head.
- "BROWNING ARMS COMPANY" is marked on the underside of the receiver/frame.

Model

- "CITORI" is marked on the right side of the barrel.
- "825 FIELD" is marked on the underside of the receiver/frame.
- Features include: action release lever located on the upper tang of the receiver/frame; safety with integral barrel selector located on the upper tang of receiver/frame.

Manufacturer

- "MIROKU" is marked on the left side of the barrel.

Action

- Break open action.
- Hinged barrel design.

Barrel

- The barrel length does not include any attached device such as flash-hider or muzzle brake.

Calibre

- The calibre designation is marked on the barrel.

Notes

Make

- "BROWNING" is marked on the firearm; this trade name is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "Citori Crossover Target" in script with gold inlay is marked on both sides of the receiver/frame. - features include: round, over and under barrels with ventilated top and side ribs and interchangeable choke tubes; front hinged steel receiver/frame with a top tang mounted break open action release lever and safety/selector; single selective trigger; ejectors; checkered walnut forearm and Monte Carlo pistol grip buttstock with recoil pad; gloss blued barrels and steel receiver/frame with gold engraving. - overall length with a 762 mm (30") barrel is 1219 mm (48"), and the average weight is 3.76 kgs (8.3 lbs). - also available with a laminated stock.
Manufacturer	- manufacturer's name is not usually marked on the firearm. - "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on the barrels.
Action	- over and under barrel configuration, hinged barrel design.
Serial Number	- serial number is usually marked on the upper tang of the receiver/frame. - Browning adopted a new serial number rationalization starting in 1975. - the serial number on Japanese manufactured firearms may consist of five numbers followed by a two letter code for the year of manufacture followed by a three character code for the model identifier.
Calibre	- calibre designation is marked on the barrel.

Notes

Make	- "Browning" trade name is marked on the receiver/frame and/or the "Browning" deer head trade mark logo is marked on the side of the receiver/frame. - "Browning Arms Company" is marked on the side of the barrel. - "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennesse, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- introduced in 1994.
Manufacturer	- manufacturer's name is not usually marked on the firearm. - "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.
Action	- commonly called over/under or O/U.
Serial Number	- the serial number is usually marked on the upper tang of the receiver/frame. - Browning adopted a new serial number rationalization starting in 1975. - the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacture followed by a three character code for the model identifier. - this two letter code for the year of manufacture started with the letters RV - 1975, and progress to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, MV - 2005, MT - 2006, MR - 2007, MP - 2008, MN - 2009, ZM - 2010, ZZ - 2011, ZY - 2012, ZX - 2013, ZW - 2014, ZV - 2015, ZT - 2016, ZR - 2017, ZP - 2018, ZN - 2019, and YM - 2020.
Barrel	- all barrels manufactured after 1988 have the Invector choke system and after 1995 The Invector Plus was standard.
Other Markings	- manufacturer name, address, calibre and patent dates. Browning Arms, Morgan Utah and Montreal P. Q. Made in Japan, marked on barrel.
Remarks	- the Citori Gran Lightning is similar to other Citori models (box lock, auto ejectors, single selective trigger and ventilated rib barrels) but differ in the quality of the wood used for the stock and forend. All Citori models are manufactured in Japan, have ventilated ribs, walnut stock and forearms. Most models have a pistolgrip butt stock.

Notes

Make

- "Browning" trade name is marked on the receiver/frame and/or the "Browning" deer head trade mark logo is marked on the side of the receiver/frame.
- "Browning Arms Company" is marked on the side of the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced in 1973
- features include: round over and under barrels with a ventilated rib; semi beaver tail forearm and semi pistol grip buttstock.
- Invector choke system became standard in 1988.
- Invector Plus choke system became standard in 1995.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- over & under barrel configuration.

Serial Number

- the serial number is usually marked on the upper tang of the receiver/frame.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacture followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, MV - 2005, MT - 2006, MR - 2007, MP - 2008, MN - 2009, ZM - 2010, ZZ - 2011, ZY - 2012, ZX - 2013, ZW - 2014, ZV - 2015, ZT - 2016, ZR - 2017, ZP - 2018, ZN - 2019, and YM - 2020.

Other Markings

- barrel will be marked with calibre designation and patent datesas well as "Browning Arms, Morgan Utah and Montreal P. Q." and "Made in Japan".

Make

- "Browning" trade name is marked on the receiver/frame and/or the "Browning" deer head trade mark logo is marked on the side of the receiver/frame.
- "Browning Arms Company" is marked on the side of the barrel.
- "BROWNING" trade name is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced in 1999.
- "Citori" is usually marked on the top barrel and may be marked on the receiver/frame.
- features include: blued over & under barrels with ventilated rib, bead front sight and Invector choke tubes; engraved front hinged lightweight alloy receiver/frame with top tang mounted break open lever and barrel selector/safety; box lock action; automatic ejectors; single selective trigger; walnut forearm and rounded pistol grip buttstock.
- this model is also sold as the Citori Lightning Feather Combo which is supplied with 20 gauge and 28 gauge barrel sets in a fitted luggage case.
- overall length with a 711mm barrel (27") is 1118mm (44") and an average weight of 2.86kg (6.3lbs).

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- over and under.

Serial Number

- the serial number is usually marked on the upper tang of the receiver/frame.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacture followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, MV - 2005, MT - 2006, MR - 2007, MP - 2008, MN - 2009, ZM - 2010, ZZ - 2011, ZY - 2012, ZX - 2013, ZW - 2014, ZV - 2015, ZT - 2016, ZR - 2017, ZP - 2018, ZN - 2019, and YM - 2020.

Make

- "Browning" trade name is marked on the receiver/frame and/or the "Browning" deer head trade mark logo is marked on the side of the receiver/frame.
- "Browning Arms Company" is marked on the side of the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced in 2011.
- "CITORI MICRO MIDAS" may be marked on the firearm.
- features include: round over and under barrels with a ventilated top rib, ivory bead front sight and Invector-Plus choke tubes; front hinged steel receiver/frame with top tang mounted break open lever and barrel selector/safety; gold plated single selective trigger; ejectors; satin finish walnut forearm and pistol grip buttstock with ventilated recoil pad; blue finished.
- overall length with a 660 mm barrel (26") is 1080 mm (42 1/2"), and the average weight is 3.25 kgs (7.14 lbs).

Action

- over and under barrel configuration, hinged barrel design.

Serial Number

- serial number is usually marked on the upper tang of the receiver/frame.
- Browning adopted a new serial number rationalization starting in 1975.
- Browning serial numbers on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacture followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, MV - 2005, MT - 2006, MR - 2007, MP - 2008, MN - 2009, ZM - 2010, ZZ - 2011, ZY - 2012, ZX - 2013, ZW - 2014, ZV - 2015, ZT - 2016, ZR - 2017, ZP - 2018, ZN - 2019, and YM - 2020.

Make

- "Browning" trade name is marked on the receiver/frame and/or the "Browning" deer head trade mark logo is marked on the side of the receiver/frame.
- "Browning Arms Company" is marked on the side of the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- model designation is marked on the barrel.
- introduced 2005.
- features include: over and under barrels with ventilated rib and Invector-Plus choke tubes; front hinged receiver/frame with top tang mounted break open lever and safety; box lock action; single selective trigger; blued receiver/frame with gold border; checkered Schnabel forearm and pistol grip stock; recoil pad on 12 GA only.
- overall length 1092mm (43") for 660mm and weight 6lbs 7oz.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- over & under configuration.

Serial Number

- the serial number is usually marked on the upper tang of the receiver/frame.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacture followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, MV - 2005, MT - 2006, MR - 2007, MP - 2008, MN - 2009, ZM - 2010, ZZ - 2011, ZY - 2012, ZX - 2013, ZW - 2014, ZV - 2015, ZT - 2016, ZR - 2017, ZP - 2018, ZN - 2019, and YM - 2020.

Make

- "Browning" trade name is marked on the receiver/frame and/or the "Browning" deer head trade mark logo is marked on the side of the receiver/frame.
- "Browning Arms Company" is marked on the side of the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- features include: high polish blue finish on receiver/frame; ventilated top and middle ribs; top tang safety; gold plated single trigger; ejectors; ported and blued barrels and checkered walnut pistol grip butt stock and forearm.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- over/under barrel configuration.

Serial Number

- the serial number is usually marked on the upper tang of the receiver/frame.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacture followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, MV - 2005, MT - 2006, MR - 2007, MP - 2008, MN - 2009, ZM - 2010, ZZ - 2011, ZY - 2012, ZX - 2013, ZW - 2014, ZV - 2015, ZT - 2016, ZR - 2017, ZP - 2018, ZN - 2019, and YM - 2020.

Barrel

- barrels manufactured after 1988 have the Invector choke system, after 1995 Invector Plus was standard.

Make

- "Browning" trade name is marked on the receiver/frame and/or the "Browning" deer head trade mark logo is marked on the side of the receiver/frame.
- "Browning Arms Company" is marked on the side of the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced in 2002.
- "CITORI" is marked on the right side of the barrel.
- "XS" is marked on side of the receiver/frame.
- "Skeet" is not marked on the firearm, features distinguish this variation.
- features include: engraved receiver/frame with gold coloured inlay; ventilated top and middle ribs; top tang mounted safety; gold plated, single trigger; ejectors; blued finish on barrels; checkered walnut pistol grip buttstock and forearm.
- this model may be equipped with an adjustable comb type buttstock.
- additional features; box lock action, over/under barrels, top lever opening; steel receiver/frame with silver nitride finish and gold accented, high relief engraving; lightweight profile, ported barrels; tapered, floating high-post top rib; single selective trigger; top tang mounted barrel selector/safety; hammer ejectors; Tripple Trigger System; HiViz Pro-Comp fiber-optic sight; Invector-Plus choke tubes; satin finish Grade III/IV walnut stock with right hand palm swell and checkering; semi-beavertail forearm with finger grooves and checkering.
- overall length with a 711mm barrel (28") is 1156mm (45 1/2") and an average weight of 3.24kg (7.13lbs).

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- over/under barrel configuration.

Serial Number

- the serial number is usually marked on the upper tang of the receiver/frame.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacture followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, MV - 2005, MT - 2006, MR - 2007, MP - 2008, MN - 2009, ZM - 2010, ZZ - 2011, ZY - 2012, ZX - 2013, ZW - 2014, ZV - 2015, ZT - 2016, ZR - 2017, ZP - 2018, ZN - 2019, and YM - 2020.

Make

- "Browning" trade name is marked on the receiver/frame and/or the "Browning" deer head trade mark logo is marked on the side of the receiver/frame.
- "Browning Arms Company" is marked on the side of the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced in 2002.
- "CITORI" is marked on the right side of the barrel.
- "XT" is marked on the side of the receiver/frame.
- features include: engraved receiver/frame with gold colored inlay; ventilated top and middle ribs; top tang safety; gold plated single trigger; ejectors; blued finish on barrels; checkered walnut pistol grip buttstock and forearm.
- this model may be equipped with an adjustable comb type butt stock.
- additional features; box lock action, over/under barrels, top lever opening; steel receiver/frame with silver nitride finish and gold accented, high-relief engraving; tapered, floating high-post top rib; blued barrels are ported with ventilated top and middle ribs; gold plated single selective trigger; hammer ejectors; top tang mounted barrel selector/safety; Vector Pro lengthened forcing cones; three Invector-Plus choke tubes; Tripple Trigger System; HiViz Pro-Comp sight; adjustable straight comb; adjustable GraCoil recoil reduction system; gloss finish Grade III/IV or Grade V/VI walnut pistol grip stock with right hand palm swell and checkering; semi-beavertail forearm with finger grooves and checkering.
- overall length with a 762mm barrel (30") is 1194mm (47") and an average weight of 3.90kg (8.6lbs).

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- over/under design.

Serial Number

- the serial number is usually marked on the upper tang of the receiver/frame.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacture followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, MV - 2005, MT - 2006, MR - 2007, MP - 2008, MN - 2009, ZM - 2010, ZZ - 2011, ZY - 2012, ZX - 2013, ZW - 2014, ZV - 2015, ZT - 2016, ZR - 2017, ZP - 2018, ZN - 2019, and YM - 2020.

Notes

Make

- "Browning" trade name is marked on the receiver/frame and/or the "Browning" deer head trade mark logo is marked on the side of the receiver/frame.
- "Browning Arms Company" is marked on the side of the barrel.
- "BROWNING" trade name is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced in 2003.
- features include: round over and under barrels with a ventilated top and middle rib, white bead front sight and mid bead sight, and interchangeable choke tubes; low profile front hinged receiver/frame with top tang mounted break open lever; top tang mounted slide safety; gold plated trigger; ejectors; blued and silver nitride finish with stylistic engraving.
- available with walnut stock and forearm or weather-resistant lightweight composite stock and forearm and adjustable comb and recoil pad.
- in 2006 the Cynergy was available in 12 GA X 3 1/2" chambering and with a "Camo" finish that also featured a composite forearm and buttstock.
- overall length with a 660mm barrel (26") is 1092mm (43") and an average weight of 3.59kg (7.9lbs).

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- over/under configuration.

Serial Number

- the serial number is usually marked on the upper tang of the receiver/frame.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial number on Japanese manufactured firearms may consist of five numbers followed by a two letter code for the year of manufacture followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, MV - 2005, MT - 2006, MR - 2007, MP - 2008, MN - 2009, ZM - 2010, ZZ - 2011, ZY - 2012, ZX - 2013, ZW - 2014, ZV - 2015, ZT - 2016, ZR - 2017, ZP - 2018, ZN - 2019, and YM - 2020.

Make

- "Browning" trade name is marked on the receiver/frame and/or the "Browning" deer head trade mark logo is marked on the side of the receiver/frame.
- "Browning Arms Company" is marked on the side of the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced in 2007.
- features include: over and under ported barrels with a ventilated top and middle rib and fibre optic sight; Invector-Plus Midas Grade choke tubes; low profile front hinged receiver/frame with top tang mounted break open lever and barrel selector/safety; gold plated single trigger; ejectors; oil finish walnut stock with recoil pad and with or without adjustable comb; blued barrels; silver nitride receiver/frame with engraving.
- Cynergy Classic Trap Unsingle Combo with adjustable comb was introduced in 2008.
- overall length with a 762mm barrel (30") is 1276mm (50 1/4") and an average weight of 3.70kg (8.15lbs).

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- over & under configuration.

Serial Number

- the serial number is usually marked on the upper tang of the receiver/frame.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacture followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, MV - 2005, MT - 2006, MR - 2007, MP - 2008, MN - 2009, ZM - 2010, ZZ - 2011, ZY - 2012, ZX - 2013, ZW - 2014, ZV - 2015, ZT - 2016, ZR - 2017, ZP - 2018, ZN - 2019, and YM - 2020.

Notes

Make

- "BROWNING" is marked on the firearm; this trade name is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "CYNERGY" is marked on the receiver, and this particular version is manufactured with synthetic furniture and an overall "mossy oak" camouflage pattern. - features include: overall camouflage finish; screw-in interchangeable choke tubes; bead sight; short rail over the chamber for mounting an optical sight; ventilated top- and mid-rib; synthetic checkered forearm and pistol-grip buttstock with over-moulded gripping areas and cheekpiece; single trigger; top-lever; and tang safety/selector.
Manufacturer	- manufacturer's name is not usually marked on the firearm. - "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" may be marked on the barrels.
Action	- over/under configuration.
Serial Number	- serial-numbered on the receiver/frame.

Notes

Make

- "Browning" trade name is marked on the receiver/frame and/or the "Browning" deer head trade mark logo is marked on the side of the receiver/frame.
- "Browning Arms Company" is marked on the side of the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced in 2007.
- "Sporting" in script may be marked on the underside of the receiver/frame.
- features include: over and under ported barrels with a ventilated top and middle rib and fibre optic or white bead front sight and mid bead; Invector-Plus Midas Grade choke tubes; low profile front hinged receiver/frame with top tang mounted break open lever and barrel selector/safety; gold plated single trigger; ejectors; black composite or oil finish walnut stock with recoil pad and with or without adjustable comb; blued barrels; silver nitride receiver/frame with gold enhanced engraving.
- overall length with a 711mm barrel (28") is 1168mm (46") and an average weight of 3.24kg (7.13lbs).

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- over & under configuration.

Serial Number

- the serial number is usually marked on the upper tang of the receiver/frame.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacture followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, MV - 2005, MT - 2006, MR - 2007, MP - 2008, MN - 2009, ZM - 2010, ZZ - 2011, ZY - 2012, ZX - 2013, ZW - 2014, ZV - 2015, ZT - 2016, ZR - 2017, ZP - 2018, ZN - 2019, and YM - 2020.

Make

- "Browning" trade name is marked on the receiver/frame and/or the "Browning" deer head trade mark logo is marked on the side of the receiver/frame.
- "Browning Arms Company" is marked on the side of the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced in 2007.
- features include: round over and under barrels with a ventilated top and middle rib and ivory front and middle bead sights, and interchangeable Invector-Plus choke tubes; low profile front hinged light weight alloy receiver/frame with top tang mounted break open lever and barrel selector/safety; gold plated single trigger; ejectors; black composite or satin finish walnut stock with recoil pad; blued barrels; blued and grayed finish.
- available with a three barrel combination set in 2008.
- overall length is from 1092mm (43") to 1143 (45") and average weight is from 2.25kg (4.14lbs) to 3.14kg (6.10lbs).

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- over & under configuration.

Serial Number

- the serial number is usually marked on the upper tang of the receiver/frame.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacture followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, MV - 2005, MT - 2006, MR - 2007, MP - 2008, MN - 2009, ZM - 2010, ZZ - 2011, ZY - 2012, ZX - 2013, ZW - 2014, ZV - 2015, ZT - 2016, ZR - 2017, ZP - 2018, ZN - 2019, and YM - 2020.

- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced in 2003
- features include: over and under barrels with a ventilated top and middle ribs and Hi-Viz Pro-Comp front sight and white mid bead; low profile front hinged receiver/frame with top tang mounted break open lever; top tang mounted slide safety; gold plated single trigger; ejectors; blued barrels and silver nitride receiver/frame with stylistic engraving.
- available with walnut stock and forearm or weather-resistant lightweight composite stock and forearm and adjustable comb and recoil pad.
- in 2006 the Cynergy Sporting model was available in the "TopCote" finish which is a dipped finish that resembles wood and also in a carbon fibre dipped finish.
- 2010 Cdn catalog information indicates that the "Cynergy Euro Sporting" model is now referred to as the "Cynergy Sporting" model with the same code numbers.
- overall length with a 711mm barrel (28") is 1168mm (46) and an average weight of 3.24kg (7.13lbs).
- available in 2015 with an adjustable comb.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- over/under configuration.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number is usually marked on the upper tang of the receiver/frame.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial number on Japanese manufactured firearms may consist of five numbers followed by a two letter code for the year of manufacture followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, MV - 2005, MT - 2006, MR - 2007, MP - 2008, MN - 2009, ZM - 2010, ZZ - 2011, ZY - 2012, ZX - 2013, ZW - 2014, ZV - 2015, ZT - 2016, ZR - 2017, ZP - 2018, ZN - 2019, and YM - 2020.

Make

- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- this model was manufactured from 1952 (although not commonly available in North America until 1954) to 1971.
- the "Double Automatic" name may be marked on the buttplate
- the name "Double Automatic" is derived from the fact that this firearm is designed to be loaded with one round in the chamber and one round in the "magazine" thereby giving it the capability of firing only two shots in succession.
- the Double Automatic line of shotguns was offered in three variations, the "Standard" Double Automatic used a steel receiver/frame (incorporates a "C" in the serial number), the Double Automatic Twelvette used a "hiduminium" aluminum alloy receiver/frame (available in different colours) and was advertised as a "12 Gauge that weighed less than a 16 gauge" and the Double Automatic Twentyweight which also used the hiduminium receiver/frame (black finish with gold filled engraving) but was even lighter. Shotguns produced with the hiduminium receiver/frame had an "A" in the serial number. All versions were only offered in 12 Gauge.
- this model does not have a conventional magazine tube, the cartridge is loaded through a port in the left side of the receiver/frame and is held on a lifter by spring tension. After the first shot is fired and the bolt has reached its maximum rearward position the next cartridge is lifted into place and chambered by the forward movement of the bolt.
- available in Trap or Skeet configuration.
- features include: blued finish; plain or ventilated rib barrel; ambidextrous sliding type safety located at the rear of the trigger guard; "speed loading" port located on the left side of the receiver/frame; right side ejection.

Manufacturer

- the manufacturer's name is not usually marked on the firearm, the barrel is usually marked "Made in Belgium".

Action

- recoil operated.

Serial Number

- found on the receiver/frame, incorporates a "C" in the serial number.
- total manufactured 67,000 in all variations.

Calibre

- marked on the left side.

Shots

- factory literature lists capacity as two shots: one in the "magazine", plus one in the chamber.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- this model was manufactured from 1952 to 1971. - the "Double Automatic" had a production run of 67,000 units in all variations. - the name "Twentyweight" may be engraved on the left side of the receiver/frame- note: on early production guns the receiver/frame was unmarked. - this is a 12 gauge shotgun designed to be lighter than most 20 gauge shotguns, hence the name, "Twentyweight". - the name "Double Automatic" is derived from the fact that this firearm is designed to be loaded with one round in the chamber and one round in the magazine thereby giving it the capability of firing only two shots in succession. - short recoil operated, semi-automatic shotgun utilizing a single-shot under-barrel tubular magazine. - features include: lightweight, hiduminium receiver/frame; ambidextrous sliding-type safety located at the rear of the trigger guard; "speed loading" port located on the left side of the receiver/frame; right side ejection.
Manufacturer	- "BROWNING ARMS COMPANY St. LOUIS, MO", "BROWNING ARMS COMPANY MORGAN UTAH & MONTREAL, P.Q. MADE IN BELGIUM", or a variation thereof is usually marked on the rear left side of the barrel.
Action	- short recoil operated.
Serial Number	- the serial number is found on the receiver/frame. - serial numbers are usually four or five digits, they are usually preceded by one of the following prefixes: A, 1A, 2A, 3A, 4A, 5A, 6A, 7A, 8A, 69A, 70A, 71A.
Shots	- factory literature lists capacity as two shots: one in the magazine, plus one in the chamber.
Other Markings	- rear of the barrel may also be marked with any of the following; - "Browning Patents" over "Made In Belgium", - "Special Steel - 12 GA Shells - 2 3/4" " over "Browning Patents", - "Special Steel - 12 GA Shells - 2 3/4" " over "Brownings Patent".

Notes

Make

- "BROWNING" is marked on the firearm; this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "Gold" in script is marked on the right side of the receiver/frame.
- "MOD. GOLD" may be marked on the right side of barrel.
- Gold model was available in two series, the Gold and the Gold Classic.
- "Gold" series was introduced circa 1994.
- "Gold Classic" was introduced circa 1998.
- "Gold Classic" is not marked on the firearm.
- "GOLD CLASSIC" are distinguished from others in the "Gold" series by the semi-humpback (scalloped top-rear surface) receiver/frame, reminiscent of the B-80.
- features include: coin finish with engraving and gold inlay (Classic High Grade) or blue receiver/frame (Classic Hunter, Classic Deer Hunter, Classic Stalker); blued barrel with interchangeable choke system; bolt release button located on bottom front of right side of receiver/frame; magazine cut-off located on bottom front of left side of receiver/frame; ventilated rib barrel; gold trigger; safety located on rear of trigger guard; offered with either a checkered walnut stock and forearm (Hunter) or a black synthetic forearm and buttstock (Stalker).

Manufacturer

- parts are manufactured in Belgium and assembled in Portugal.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- gas operated.
Serial Number	- serial number is found on the action. - serial number rationalization unknown.
Shots	- the tubular magazine is located under the barrel. - Browning factory literature indicates total capacity for: - 2 3/4" shells as five (5) shots, this includes four (4) cartridges in the magazine, and one (1) cartridge in the chamber; - 3" shells as four (4) shots, this includes three (3) cartridges in the magazine and, one (1) cartridge in the chamber; and - 3 1/2" shells as four (4) shots, this includes three (3) cartridges in the magazine and, one (1) cartridge in the chamber. - NOTE: the firearm may come from the factory with a removeable plug in the magazine tube, which will only allow the magazine to hold two (2) cartridges.
Other Markings	- manufacturer's name, address, calibre designation and patent dates are marked on the barrel. - the model designation "GOLD" is marked in script on the right rear of the receiver/frame. - "BROWNING" appears on the left front of the receiver/frame. - "Special Steel 12GA." and "Patents Pending" is found on the right side of the barrel.

Notes

Make

- "BROWNING" is marked on the barrel and stock.

Model

- introduced in 2011.
- "GOLD" is marked on the left side of the barrel at the breech.
- features include: round rifled barrel with a fiber optic ramp front sight and an adjustable rear sight, front hinged receiver/frame/compression tube is grooved for scope mounts; ambidextrous safety mounted on the rear of the receiver/frame; adjustable trigger; ambixetrous wood or black synthetic Monte Carlo pistol grip stock with two cheekpieces and adjustable rubber butt pad; blued finish.
- overall length is 1229 mm (48.4"), and average weight is 3.8 kgs (8.4 lbs).

Manufacturer

- manufacturer's name is not marked on the firearm.

Action

- at least two variants of this particular model exist:
Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4 mps (500 fps) and a muzzle energy exceeding 5.7 Joules.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps (500 fps) and/or a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the left side of the barrel at the breech. - observed serial number consisted of eight numbers without a letter prefix or suffix.
Calibre	- calibre is marked on the left side of the barrel.
Canadian Law Comments	- at least two variants of this particular model exist: Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4 mps (500 fps) and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorization to Transport. Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps (500 fps) and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorization to Transport.

Make

- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- in 1993 Browning announced the introduction of the "BSA 10" (Browning Semi Automatic 10) in two versions. The standard "BSA 10" was going to be offered with a walnut buttstock and forend while the "BSA 10 Stalker" would be equipped with synthetic furniture. Before production began the model designation was changed to "Gold 10". The Gold 10 was offered with a steel receiver/frame from 1994 to 2001 when the Gold 10 was redesigned to use a lightweight aluminium receiver/frame. This newest variation is now referred to as the "Gold Light 10".
- the model designation is usually marked on the barrel as "GOLD 10". The standard model is also known as the "Gold 10 Hunter".
- features include: checkered walnut stock and forend; polished, blued finish: ventilated barrel rib with a bead front sight; cross-bolt safety located on the front of the trigger guard; bolt release button mounted on the right side of the receiver/frame; self-cleaning gas system.
- also offered with a matte blued finish with a synthetic buttstock and forend as the "Gold 10 Stalker". In 1999 Browning introduced a "Combo" package that included an extra 610mm (24") turkey hunting barrel for increased versatility.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- gas operated.

Serial Number

- marked on the receiver/frame.

Calibre

- calibre designation is marked on the barrel.

Shots

- tubular magazine mounted under the barrel.

Notes

Make

- "BROWNING ARMS COMPANY" is marked on the side of the barrel.

Model

- model name does not appear on this firearm.
- "U" with a one or two digit suffix following the serial number is an indicator that the pistol is a Challenger model.
- model designation is derived from the unique characteristics that make this a specific model in Browning terminology.
- introduced in 1962 and discontinued in 1972.
- research indicates that only 293 units were produced.
- this is a blow back operated, semi-automatic pistol utilizing a detachable box magazine.
- this is a high grade variant of the Challenger model series.
- features include: high lustre blue finish with hand inlaid gold line engraving on the receiver/frame and the barrel; gold plated trigger; French walnut carved and checkered grips with a high gloss finish.

Manufacturer

- "Made in Belgium" and/or "Made in Belgium by Fabrique Nationale Herstal" is marked on the side of the barrel.

Action

- blowback operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the front of the grip strap.
- "U" with a one or two digit suffix following the serial number is an indicator that the pistol is a Challenger model manufactured by FN.
- NOTE: the letter
- "I" in the serial number indicates a Medalist II model.
- "P" in the serial number indicates a Nomad model.
- "T" in the serial number indicates a Medalist model.
- "U" in the serial number indicates a Challenger model.

Calibre

- calibre designation is marked on the side of the barrel.

Shots

- detachable box magazine.

Make	- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennesee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- "Gold Classic" is not marked on the firearm. - "GOLD CLASSIC" are distinguished from others in the "Gold" series by the semi-humpback (scalloped top-rear surface) receiver/frame, reminiscent of the B-80. - "Gold" in script is marked on the right side of the receiver/frame. - "MOD. GOLD" may be marked on the right side of barrel. - Gold model was available in two series, the Gold and the Gold Classic. - "Gold" series was introduced circa 1994. - "Gold Classic" was introduced circa 1998. - features include: blued finish; interchangeable choke system; bolt release button located on bottom front of right side of receiver/frame; gold trigger; safety located on rear of trigger guard; checkered walnut stock and forearm; blued finish.
Manufacturer	- the manufacturer's name is not usually marked on the firearm. - "Made in Belgium - Assembled in Portugal" may be marked on the side of the barrel.
Action	- gas operated.
Serial Number	- the serial number is marked on the receiver/frame. - observed serial numbers have consisted of a three character (number/letter combination) product code, followed by a two letter year-of-production designator, followed by five numbers.
Calibre	- the gauge and chamber length are marked on the barrel, eg. 12 GA - 3".
Shots	- a tubular magazine is mounted below the barrel. - Browning factory literature indicates total capacity for: - 2 3/4" shells as five (5) shots, this includes four (4) cartridges in the magazine, and one (1) cartridge in the chamber; and - 3" shells as four (4) shots, this includes three (3) cartridges in the magazine and, one (1) cartridge in the chamber. - NOTE: the firearm may come from the factory with a removable plug in the magazine tube, which will only allow the magazine to hold two (2) cartridges.
Remarks	- Browning has used the "Gold" designation on more than one of their semi-automatic shotgun designs. The "Gold" designation has been used to describe upgraded existing models as well as at least two distinct designs. The markings found on the side of the receiver/frame are not always indicative of each specific variation, markings are usually associated to the base model from which each variant was derived. Sub-variants are usually identifiable by specific features on a given Browning model (example: the Browning "Stalker" designation is usually applied to a model when fitted with a black synthetic stock. These models bear no "Stalker" markings). Further, a given Browning model may sometimes be marketed differently in North America and Europe. Model designations, markings and different variations of the same basic gun will be found in Browning product literature. - the standard North American "Gold" line features a receiver/frame profile with a continually curving top edge while the "Gold Classic" (referred to in Browning's European product literature simply as "Gold") receiver/frame features a scalloped, angular cut at the top rear. As both variants are offered in similar configurations they may bear the same markings on the side of the receiver/frame regardless of design.

Notes

Make

- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "Gold Classic High Grade" is not marked on the firearm.
- "GOLD CLASSIC" are distinguished from others in the "Gold" series by the semi-humpback (scalloped top-rear surface) receiver/frame, reminiscent of the B-80.
- "Gold" in script is marked on the right side of the receiver/frame.
- "MOD. GOLD" may be marked on the right side of barrel.
- Gold model was available in two series, the Gold and the Gold Classic.
- "Gold" series was introduced circa 1994.
- "Gold Classic" was introduced circa 1998.
- this is an upgraded version of the "Gold Classic". This version is offered in Europe as the "Gold Luxe" (the "Classic" line is referenced in European catalogues simply as "Gold").
- "Gold Classic High Grade" was introduced in 1999.
- features include: nickel plated semi-humpback receiver/frame and blued barrel; engraving patterns on the receiver/frame include three golden ducks landing on a marsh or doves on one side of the receiver/frame and quail on the other side; raised, ventilated barrel rib with a bead front sight; bolt release button located on bottom front of right side of receiver/frame; gold trigger; safety located on rear of trigger guard; high grade walnut buttstock and forend.

Manufacturer

- the manufacturer's name is not usually marked on the firearm.
- "Made in Belgium - Assembled in Portugal" may be marked on the side of the barrel.

Action

- gas operated.

Serial Number

- the serial number is marked on the receiver/frame.
- observed serial numbers within the "Gold Classic" line have consisted of a three character (number/letter combination) product code, followed by a two letter year-of-production designator, followed by five numbers.

Shots

- tubular magazine mounted below the barrel.
- Browning factory literature indicates total capacity for:
- 2 3/4" shells as five (5) shots, this includes four (4) cartridges in the magazine, and one (1) cartridge in the chamber; and
- 3" shells as four (4) shots, this includes three (3) cartridges in the magazine and, one (1) cartridge in the chamber.
- NOTE: the firearm may come from the factory with a removable plug in the magazine tube, which will only allow the magazine to hold two (2) cartridges.

Remarks

- Browning has used the "Gold" designation on more than one of their semi-automatic shotgun designs. The "Gold" designation has been used to describe upgraded existing models as well as at least two distinct designs. The markings found on the side of the receiver/frame are not always indicative of each specific variation, markings are usually associated to the base model from which each variant was derived. Sub-variants are usually identifiable by specific features on a given Browning model (example: the Browning "Stalker" designation is usually applied to a model when fitted with a black synthetic stock. These models bear no "Stalker" markings). Further, a given Browning model may sometimes be marketed differently in North America and Europe. Model designations, markings and different variations of the same basic gun will be found in Browning product literature.
- the standard North American "Gold" line features a receiver/frame profile with a continually curving top edge while the "Gold Classic" (referred to in Browning's European product literature simply as "Gold") receiver/frame features a scalloped, angular cut at the top rear. As both variants are offered in similar configurations they may bear the same markings on the side of the receiver/frame regardless of design.

- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "Gold Classic Stalker" is not marked on the firearm.
- "GOLD CLASSIC" are distinguished from others in the "Gold" series by the semi-humpback (scalloped top-rear surface) receiver/frame, reminiscent of the B-80.
- "Gold" and "Stalker" in script are marked on the right side of the receiver/frame.
- "MOD. GOLD" may be marked on the right side of barrel.
- Gold model was available in two series, the Gold and the Gold Classic.
- "Gold" series was introduced circa 1994.
- "Gold Classic" was introduced circa 1998.
- features include: blued finish; raised, ventilated barrel rib with a bead front sight; bolt release button located on bottom front of right side of receiver/frame; gold trigger; safety located on rear of trigger guard; black synthetic buttstock and forend.

Manufacturer

- the manufacturer's name is not usually marked on the firearm.
- "Made in Belgium - Assembled in Portugal" may be marked on the side of the barrel.

Action

- gas operated.

Serial Number

- the serial number is marked on the receiver/frame.
- observed serial numbers have consisted of a three character (number/letter combination) product code, followed by a two letter year-of-production designator, followed by five numbers.

Shots

- a tubular magazine is mounted below the barrel.
- Browning factory literature indicates total capacity for:
- 2 3/4" shells as five (5) shots, this includes four (4) cartridges in the magazine, and one (1) cartridge in the chamber; and
- 3" shells as four (4) shots, this includes three (3) cartridges in the magazine and, one (1) cartridge in the chamber.
- NOTE: the firearm may come from the factory with a removable plug in the magazine tube, which will only allow the magazine to hold two (2) cartridges.

Remarks

- Browning has used the "Gold" designation on more than one of their semi-automatic shotgun designs. The "Gold" designation has been used to describe upgraded existing models as well as at least two distinct designs. The markings found on the side of the receiver/frame are not always indicative of each specific variation, markings are usually associated to the base model from which each variant was derived. Sub-variants are usually identifiable by specific features on a given Browning model (example: the Browning "Stalker" designation is usually applied to a model when fitted with a black synthetic stock. These models bear no "Stalker" markings). Further, a given Browning model may sometimes be marketed differently in North America and Europe. Model designations, markings and different variations of the same basic gun will be found in Browning product literature.
- the standard North American "Gold" line features a receiver/frame profile with a continually curving top edge while the "Gold Classic" (referred to in Browning's European product literature simply as "Gold") receiver/frame features a scalloped, angular cut at the top rear. As both variants are offered in similar configurations they may bear the same markings on the side of the receiver/frame regardless of design.

Notes

Make

- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the "Gold" line was introduced into North America in 1994. In 1998, Browning introduced the similarly named "Gold Classic" line into North America.
- this model variation may be distinguished from the "Gold Classic" by the absence of the scalloped upper rear surface of the receiver/frame (reminiscent of the earlier Browning model B-80).
- "Gold" and "Deer Hunter" are marked on the right side of the receiver/frame.
- this variation was introduced in 1997.
- features include: blued receiver/frame and barrel; barrel features a cantilever scope mount; bolt release button located on bottom front of the right side of the receiver/frame; plain, round barrel profile; gold trigger; triangular cross-bolt safety located on rear of trigger guard; offered with a checkered walnut forend and buttstock which may be camouflaged in a variety of patterns.
- introduced in 1999 with a black synthetic buttstock and forend as the "Gold Deer Stalker".
- the receiver/frame and barrel may also be camouflaged in a variety of patterns.

Manufacturer

- may be marked on the firearm only as "Made in Belgium / Assembled in Portugal".

Action

- gas operated.

Serial Number

- the serial number is marked on the receiver/frame.

Shots

- tubular magazine mounted under the barrel.
- Browning factory literature indicates total capacity for:
- 2 3/4" shells as five (5) shots, this includes four (4) cartridges in the magazine, and one (1) cartridge in the chamber;
- 3" shells as four (4) shots, this includes three (3) cartridges in the magazine and, one (1) cartridge in the chamber; and
- NOTE: the firearm may come from the factory with a removable plug in the magazine tube, which will only allow the magazine to hold two (2) cartridges.

Remarks

- Browning has used the "Gold" designation on more than one of their semi-automatic shotgun designs. The "Gold" designation has been used to describe upgraded existing models as well as at least two distinct designs. The markings found on the side of the receiver/frame are not always indicative of each specific variation, markings are usually associated to the base model from which each variant was derived. Sub-variants are usually identifiable by specific features on a given Browning model (example: the Browning "Stalker" designation is usually applied to a model when fitted with a synthetic stock. These models bear no "Stalker" markings). Further, a given Browning model may sometimes be marketed differently in North America and Europe. Model designations, markings and different variations of the same basic gun will be found in Browning product literature.
- the standard North American "Gold" line features a receiver/frame profile with a continually curving top edge while the "Gold Classic" (referred to in Browning's European product literature simply as "Gold") receiver/frame features a scalloped, angular cut at the top rear. As both variants are offered in similar configurations they may bear the same markings on the side of the receiver/frame regardless of design.
- this model is made in Belgium and assembled in Portugal and has an alloy receiver/frame. The Gold Deer Hunter variant offers a choice of a fixed choke, fully rifled barrel with rifle sights (but without a ventilated rib) or with the multi-choke option.

Notes

Make

- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "Gold" and "EVOLVE" are marked on the right side of the receiver/frame.
- introduced in 2004.
- features include: blued ventilated rib barrel with bead front sight; solid top receiver/frame with right side ejection port and bottom loading port; gold-plated trigger; oversized cross bolt safety; shim adjustable comb system; "Hi-Viz" Tri-Comp sight system; checkered forend and pistol grip with ventilated recoil pad.

Manufacturer

- "Made in Belgium by Fabrique National" is marked on the barrel.

Action

- gas operated.

Serial Number

- the serial number is marked on the left side of the receiver/frame.
- serial number consists of alpha and numeric characters.

Shots

- tubular magazine located under the barrel.
- Browning factory literature indicates total capacity for:
- 2 3/4" shells as five (5) shots, this includes four (4) cartridges in the magazine, and one (1) cartridge in the chamber; and
- 3" shells as four (4) shots, this includes three (3) cartridges in the magazine and, one (1) cartridge in the chamber.
- NOTE: the firearm may come from the factory with a removable plug in the magazine tube, which will only allow the magazine to hold two (2) cartridges.

Remarks

- Browning has used the "Gold" designation on more than one of their semi-automatic shotgun designs. The "Gold" designation has been used to describe upgraded existing models as well as at least two distinct designs. The markings found on the side of the receiver/frame are not always indicative of each specific variation, markings are usually associated to the base model from which each variant was derived. Sub-variants are usually identifiable by specific features on a given Browning model (example: the Browning "Stalker" designation is usually applied to a model when fitted with a synthetic stock. These models bear no "Stalker" markings). Further, a given Browning model may sometimes be marketed differently in North America and Europe. Model designations, markings and different variations of the same basic gun will be found in Browning product literature.
- the standard North American "Gold" line features a receiver/frame profile with a continually curving top edge while the "Gold Classic" (referred to in Browning's European product literature simply as "Gold") receiver/frame features a scalloped, angular cut at the top rear. As both variants are offered in similar configurations they may bear the same markings on the side of the receiver/frame regardless of design.

Notes

Make

- "BROWNING" is marked on the firearm; this trade name is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "GOLD EVOLVE SPORTING" is marked on the right side of the receiver/frame. - introduced in 2006. - features include: blued ventilated rib barrel with bead front sight; solid top aluminum alloy receiver/frame with right side ejection port and bottom loading port; gold-plated trigger; oversized cross bolt safety; shim adjustable comb system; "Hi-Viz" Tri-Comp sight system and mid-bead; satin finish Walnut checkered forend and pistol grip stock; ventilated recoil pad.
Manufacturer	- "Made in Belgium by Fabrique National" is marked on the barrel.
Action	- gas operated.
Serial Number	- the serial number is marked on the left side of the receiver/frame. - serial number consists of alpha and numeric characters.

- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- the "Gold" line was introduced into North America in 1994. In 1998, Browning introduced the similarly named "Gold Classic" line into North America. This particular "Gold Fusion" variant was introduced in 2001.
- this model variation may be distinguished from the "Gold Classic" by the absence of the scalloped upper rear surface of the receiver/frame (reminiscent of the earlier Browning model B-80).
- this model is marketed in North America as the "Gold Fusion", in Browning's European catalogues the same model has, since 2002, been referred to simply as "Fusion" (although the barrel retains the "Gold" marking; early examples were marked "Gold Fusion").
- "Fusion" or "Gold" in script over "Fusion" in block letters is marked on the side of the receiver/frame, "Gold" is marked on the barrel.
- features include: ventilated rib barrel; blued receiver/frame and barrel; bolt release button located on the bottom front of the right side of the receiver/frame; gold trigger; cross-bolt safety located on the rear of the trigger guard; checkered, adjustable, Turkish walnut buttstock and forend; self-regulating gas system.
- the "Gold Fusion" is available in an upgraded version as the "Gold Fusion Ultimate", with a rifled barrel equipped with rifle type sights as the "Gold Fusion Slug" , as a combination package that includes a smoothbore barrel and a rifled barrel for shooting slugs, and in a "High Grade" variant featuring a high grade turkish walnut stock set and a silver-nitride finished receiver with gold engraving/inlays.

Manufacturer

- "Made in Belgium by Fabrique National" is marked on the barrel.

Action

- gas operated.

Serial Number

- alpha-numeric; marked on the left side of the receiver/frame.

Shots

- the tubular magazine is located under the barrel.
- Browning factory literature indicates total capacity for:
- 2 3/4" shells as five (5) shots, this includes four (4) cartridges in the magazine, and one (1) cartridge in the chamber; and
- 3" shells as four (4) shots, this includes three (3) cartridges in the magazine and, one (1) cartridge in the chamber.
- NOTE: the firearm may come from the factory with a removable plug in the magazine tube, which will only allow the magazine to hold two (2) cartridges.

Remarks

- Browning has used the "Gold" designation on more than one of their semi-automatic shotgun designs. The "Gold" designation has been used to describe upgraded existing models as well as at least two distinct designs. The markings found on the side of the receiver/frame are not always indicative of each specific variation, markings are usually associated to the base model from which each variant was derived. Sub-variants are usually identifiable by specific features on a given Browning model (example: the Browning "Stalker" designation is usually applied to a model when fitted with a synthetic stock. These models bear no "Stalker" markings). Further, a given Browning model may sometimes be marketed differently in North America and Europe. Model designations, markings and different variations of the same basic gun will be found in Browning product literature.
- the standard North American "Gold" line features a receiver/frame profile with a continually curving top edge while the "Gold Classic" (referred to in Browning's European product literature simply as "Gold") receiver/frame features a scalloped, angular cut at the top rear. As both variants are offered in similar configurations they may bear the same markings on the side of the receiver/frame regardless of design.

Make	- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennesee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Company was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- the "Gold" line was introduced into North America in 1994. In 1998, Browning introduced the similarly named "Gold Classic" line into North America. - this model variation may be distinguished from the "Gold Classic" by the absence of the semi-humpback receiver/frame (reminiscent of the earlier Browning model B-80). - "GOLD Hunter" in block letters or "GOLD" over "HUNTER" in script is marked on the side of the receiver/frame. - do not confuse this model with the "Gold Classic Hunter" which shares similar features but is based upon a different receiver/frame design. - "GOLD" and/or "MOD. GOLD" may also be marked on the right side of the barrel. - features include: ventilated rib barrel; blued receiver/frame and barrel; bolt release button located on the bottom front of the right side of the receiver/frame; gold trigger; cross-bolt safety located on the rear of the trigger guard; checkered walnut pistol grip buttstock and forend; self-regulating gas system. - the same basic gun is available as the "Gold Hunter Upland Special" with a straight grip buttstock, "Gold Hunter Micro" with a shorter length buttstock and lighter overall weight, "Gold Deer Hunter" with a rifled barrel with rifle type sights, "Gold Stalker" with a synthetic buttstock and forend, "Gold Hunter 3 ½" which is chambered for 3 ½" shells (examples chambered for 12 GA X 3 ½" shells feature a magazine cut-off (marked M.C.) located on the bottom front of the left side of the receiver/frame); and a "Gold Hunter National Wild Turkey Federation" endorsed by the National Wild Turkey Federation.
Manufacturer	- the manufacturer's name is not marked on the firearm. - "MADE IN BELGIUM - ASSEMBLED IN PORTUGAL" may be marked on the left side of the barrel.
Action	- gas operated.
Serial Number	- the serial number is marked on the left side of the receiver/frame and is normally repeated on the underside of the barrel. - observed serial numbers have consisted of a three character (number/letter combination) product code, followed by a two letter year-of-production designator, followed by five numbers, eg. F51NT05422. - serial number prefix's include: "F51" and "F61".
Barrel	- the barrel length is marked on the right side of the barrel, eg. 28". - the barrel uses the Browning "Invector" or "Invector Plus" interchangeable choke tubes.
Calibre	- the calibre designation is marked on the right side of the barrel.
Shots	- the tubular magazine is located under the barrel. - Browning factory literature indicates total capacity for: - 2 3/4" shells as five (5) shots, this includes four (4) cartridges in the magazine, and one (1) cartridge in the chamber; - 3" shells as four (4) shots, this includes three (3) cartridges in the magazine and, one (1) cartridge in the chamber; and - 3 1/2" shells as four (4) shots, this includes three (3) cartridges in the magazine and, one (1) cartridge in the chamber. - NOTE: the firearm may come from the factory with a removable plug in the magazine tube, which will only allow the magazine to hold two (2) cartridges.
Other Markings	- barrel is marked "Made in Belgium" and "Assembled in Portugal".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- Browning has used the "Gold" designation on more than one of their semi-automatic shotgun designs. The "Gold" designation has been used to describe upgraded existing models as well as at least two distinct designs. The markings found on the side of the receiver/frame are not always indicative of each specific variation, markings are usually associated to the base model from which each variant was derived. Sub-variants are usually identifiable by specific features on a given Browning model (example: the Browning "Stalker" designation is usually applied to a model when fitted with a synthetic stock. These models bear no "Stalker" markings). Further, a given Browning model may sometimes be marketed differently in North America and Europe. Model designations, markings and different variations of the same basic gun will be found in Browning product literature.
- the standard North American "Gold" line features a receiver/frame profile with a continually curving top edge while the "Gold Classic" (referred to in Browning's European product literature simply as "Gold") receiver/frame features a scalloped, angular cut at the top rear. As both variants are offered in similar configurations they may bear the same markings on the side of the receiver/frame regardless of design.
- this model is made in Belgium and assembled in Portugal and has an alloy receiver/frame. The Gold Deer Hunter variant offers a choice of a fixed choke, fully rifled barrel with rifle sights (but without a ventilated rib) or with the multi-choke option.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the "Gold" line was introduced into North America in 1994. In 1998, Browning introduced the similarly named "Gold Classic" line into North America. 1998 was also the year that two variants with a 3 1/2" chambers were introduced. The "Gold Hunter 3 1/2"" is equipped with walnut furniture and the "Gold Stalker 3 1/2"" has black synthetic furniture.
- this model variation may be distinguished from the "Gold Classic" by the absence of the scalloped upper rear surface of the receiver/frame (reminiscent of the earlier Browning model B-80).
- "GOLD" over "HUNTER 3 1/2"" in script is marked on the side of the receiver/frame. The National Wild Turkey Federation logo is applied to the buttstock.
- "GOLD" is also marked on the right side of the barrel.
- features include: Mossy Oak "New Break-Up" pattern camouflage finish; ventilated rib barrel with a HiViz® TriViz® sight system; bolt release button located on the bottom front of the right side of the receiver/frame; gold trigger; cross-bolt safety located on the rear of the trigger guard; self-regulating gas system.
- the same basic gun is available with a 3" chamber as the "Gold Hunter Upland Special" with a straight grip buttstock, "Gold Hunter Micro" with a shorter length buttstock and lighter overall weight, "Gold Deer Hunter" with a rifled barrel with rifle type sights, "Gold Hunter Stalker" with a synthetic buttstock and forend, "Gold Stalker 3 ½" which is chambered for 3 ½" shells (examples chambered for 12 GA X 3 ½" shells feature a magazine cut-off (marked M.C.) located on the bottom front of the left side of the receiver/frame); and a "Gold Hunter National Wild Turkey Federation" endorsed by the National Wild Turkey Federation.

Manufacturer

- the manufacturer's name is not marked on the firearm.
- "MADE IN BELGIUM - ASSEMBLED IN PORTUGAL" may be marked on the left side of the barrel.

Action

- gas operated.

Serial Number

- the serial number is marked on the left side of the receiver/frame and is normally repeated on the underside of the barrel.
- observed serial numbers have consisted of a three character (number/letter combination) product code, followed by a two letter year-of-production designator, followed by five numbers.

Calibre

- the calibre designation is marked on the right side of the barrel.

Shots

- tubular magazine mounted under the barrel.
- Browning factory literature indicates total capacity for:
- 2 3/4" shells as five (5) shots, this includes four (4) cartridges in the magazine, and one (1) cartridge in the chamber;
- 3" shells as four (4) shots, this includes three (3) cartridges in the magazine and, one (1) cartridge in the chamber; and
- 3 1/2" shells as four (4) shots, this includes three (3) cartridges in the magazine and, one (1) cartridge in the chamber.
- NOTE: the firearm may come from the factory with a removable plug in the magazine tube, which will only allow the magazine to hold two (2) cartridges.

Remarks

- Browning has used the "Gold" designation on more than one of their semi-automatic shotgun designs. The "Gold" designation has been used to describe upgraded existing models as well as at least two distinct designs. The markings found on the side of the receiver/frame are not always indicative of each specific variation, markings are usually associated to the base model from which each variant was derived. Sub-variants are usually identifiable by specific features on a given Browning model (example: the Browning "Stalker" designation is usually applied to a model when fitted with a synthetic stock. These models bear no "Stalker" markings). Further, a given Browning model may sometimes be marketed differently in North America and Europe. Model designations, markings and different variations of the same basic gun will be found in Browning product literature.
- the standard North American "Gold" line features a receiver/frame profile with a continually curving top edge while the "Gold Classic" (referred to in Browning's European product literature simply as "Gold") receiver/frame features a scalloped, angular cut at the top rear. As both variants are offered in similar configurations they may bear the same markings on the side of the receiver/frame regardless of design.

Make

- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- the "Gold" line was introduced into North America in 1994. In 1998, Browning introduced the similarly named "Gold Classic" line into North America. 1998 was also the year that two variants with a 3 1/2" chambers were introduced. The "Gold Hunter 3 1/2"" is equipped with walnut furniture and the "Gold Hunter 3 1/2" Stalker" has black synthetic furniture.
- this model variation may be distinguished from the "Gold Classic" by the absence of the semi-humpback (scalloped upper rear surface) receiver/frame (reminiscent of the earlier Browning model B-80).
- "GOLD" over "HUNTER 3 1/2"" in script is marked on the side of the receiver/frame, the "Stalker" denotes the black synthetic buttstock and forend. No "Stalker" markings are found on the firearm.
- "GOLD" and/or "MOD. GOLD" may also be marked on the right side of the barrel.
- features include: ventilated rib barrel; blued receiver/frame and barrel; bolt release button located on the bottom front of the right side of the receiver/frame; gold trigger; cross-bolt safety located on the rear of the trigger guard; self-regulating gas system.
- the same basic gun is available with a 3" chamber as the "Gold Hunter Upland Special" with a straight grip buttstock, "Gold Hunter Micro" with a shorter length buttstock and lighter overall weight, "Gold Deer Hunter" with a rifled barrel with rifle type sights, "Gold Hunter Stalker" with a synthetic buttstock and forend, "Gold Hunter 3 ½" which is chambered for 3 ½" shells (examples chambered for 12 GA X 3 ½" shells feature a magazine cut-off (marked M.C.) located on the bottom front of the left side of the receiver/frame); and a "Gold Hunter National Wild Turkey Federation" endorsed by the National Wild Turkey Federation.

Manufacturer

- the manufacturer's name is not marked on the firearm.
- "MADE IN BELGIUM - ASSEMBLED IN PORTUGAL" may be marked on the left side of the barrel.

Serial Number

- the serial number is marked on the left side of the receiver/frame and is normally repeated on the underside of the barrel.
- observed serial numbers have consisted of a three character (number/letter combination) product code, followed by a two letter year-of-production designator, followed by five numbers.

Shots

- the tubular magazine is located under the barrel.
- Browning factory literature indicates total capacity for:
- 2 3/4" shells as five (5) shots, this includes four (4) cartridges in the magazine, and one (1) cartridge in the chamber;
- 3" shells as four (4) shots, this includes three (3) cartridges in the magazine and, one (1) cartridge in the chamber; and
- 3 1/2" shells as four (4) shots, this includes three (3) cartridges in the magazine and, one (1) cartridge in the chamber.
- NOTE: the firearm may come from the factory with a removable plug in the magazine tube, which will only allow the magazine to hold two (2) cartridges.

Canadian Law Comments

- Browning has used the "Gold" designation on more than one of their semi-automatic shotgun designs. The "Gold" designation has been used to describe upgraded existing models as well as at least two distinct designs. The markings found on the side of the receiver/frame are not always indicative of each specific variation, markings are usually associated to the base model from which each variant was derived. Sub-variants are usually identifiable by specific features on a given Browning model (example: the Browning "Stalker" designation is usually applied to a model when fitted with a synthetic stock. These models bear no "Stalker" markings). Further, a given Browning model may sometimes be marketed differently in North America and Europe. Model designations, markings and different variations of the same basic gun will be found in Browning product literature.
- the standard North American "Gold" line features a receiver/frame profile with a continually curving top edge while the "Gold Classic" (referred to in Browning's European product literature simply as "Gold") receiver/frame features a scalloped, angular cut at the top rear. As both variants are offered in similar configurations they may bear the same markings on the side of the receiver/frame regardless of design.
- this model is made in Belgium and assembled in Portugal and has an alloy receiver/frame. The Gold Deer Hunter variant offers a choice of a fixed choke, fully rifled barrel with rifle sights (but without a ventilated rib) or with the multi-choke option.

- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the "Gold" line was introduced into North America in 1994. In 1998, Browning introduced the similarly named "Gold Classic" line into North America. This particular "Micro" variant (shorter buttstock, 660mm (26") or 610mm (24") barrel and lighter overall weight) was introduced in 2001.
- this model variation may be distinguished from the "Gold Classic" by the absence of the semi-humpback (scalloped upper rear surface) receiver/frame (reminiscent of the earlier Browning model B-80).
- "GOLD" over "HUNTER" in script is marked on the side of the receiver/frame.
- "GOLD" or "MOD. GOLD" may also be marked on the right side of the barrel.
- features include: ventilated rib barrel; blued receiver/frame and barrel; bolt release button located on the bottom front of the right side of the receiver/frame; gold trigger; cross-bolt safety located on the rear of the trigger guard; checkered walnut pistol grip buttstock and forend; self-regulating gas system.
- the same basic gun is available as the "Gold Hunter Upland Special" with a straight grip buttstock, "Gold Hunter" with a longer buttstock, "Gold Deer Hunter" with a rifled barrel with rifle type sights, "Gold Stalker" with a synthetic buttstock and forend, "Gold Hunter 3 ½" which is chambered for 3 ½" shells (examples chambered for 12 GA X 3 ½" shells feature a magazine cut-off (marked M.C.) located on the bottom front of the left side of the receiver/frame); and a "Gold Hunter National Wild Turkey Federation" endorsed by the National Wild Turkey Federation.

Manufacturer

- "Made in Belgium by Fabrique Nationale" is marked on the barrel.

Action

- gas operated.

Serial Number

- alpha numeric; marked on the left side of the receiver/frame.

Shots

- tubular magazine mounted under the barrel.
- Browning factory literature indicates total capacity for:
- 2 3/4" shells as five (5) shots, this includes four (4) cartridges in the magazine, and one (1) cartridge in the chamber;
- 3" shells as four (4) shots, this includes three (3) cartridges in the magazine and, one (1) cartridge in the chamber; and
- 3 1/2" shells as four (4) shots, this includes three (3) cartridges in the magazine and, one (1) cartridge in the chamber.
- NOTE: the firearm may come from the factory with a removable plug in the magazine tube, which will only allow the magazine to hold two (2) cartridges.

Remarks

- Browning has used the "Gold" designation on more than one of their semi-automatic shotgun designs. The "Gold" designation has been used to describe upgraded existing models as well as at least two distinct designs. The markings found on the side of the receiver/frame are not always indicative of each specific variation, markings are usually associated to the base model from which each variant was derived. Sub-variants are usually identifiable by specific features on a given Browning model (example: the Browning "Stalker" designation is usually applied to a model when fitted with a synthetic stock. These models bear no "Stalker" markings). Further, a given Browning model may sometimes be marketed differently in North America and Europe. Model designations, markings and different variations of the same basic gun will be found in Browning product literature.
- the standard North American "Gold" line features a receiver/frame profile with a continually curving top edge while the "Gold Classic" (referred to in Browning's European product literature simply as "Gold") receiver/frame features a scalloped, angular cut at the top rear. As both variants are offered in similar configurations they may bear the same markings on the side of the receiver/frame regardless of design.

- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the "Gold" line was introduced into North America in 1994. In 1998, Browning introduced the similarly named "Gold Classic" line into North America. This particular "Upland Special" variant (straight grip buttstock) was introduced in 2001.
- this model variation may be distinguished from the "Gold Classic" by the absence of the semi-humpback (scalloped upper rear surface) receiver/frame (reminiscent of the earlier Browning model B-80).
- "GOLD" over "HUNTER" in script is marked on the side of the receiver/frame.
- "GOLD" or "MOD. GOLD" may also be marked on the right side of the barrel.
- features include: ventilated rib barrel; blued receiver/frame and barrel; bolt release button located on the bottom front of the right side of the receiver/frame; gold trigger; cross-bolt safety located on the rear of the trigger guard; checkered walnut straight grip buttstock and forend; self-regulating gas system.
- the same basic gun is available as the "Gold Hunter Micro" with a shorter buttstock, "Gold Hunter" with a pistol grip buttstock, "Gold Deer Hunter" with a rifled barrel with rifle type sights, "Gold Stalker" with a synthetic buttstock and forend, "Gold Hunter 3 ½" which is chambered for 3 ½" shells (examples chambered for 12 GA X 3 ½" shells feature a magazine cut-off (marked M.C.) located on the bottom front of the left side of the receiver/frame); and a "Gold Hunter National Wild Turkey Federation" endorsed by the National Wild Turkey Federation.

Manufacturer

- "Made in Belgium by Fabrique Nationale" is marked on the barrel.

Action

- gas operated.

Serial Number

- alpha-numeric; marked on the left side of the receiver/frame.

Shots

- tubular magazine mounted under the barrel.

Remarks

- Browning has used the "Gold" designation on more than one of their semi-automatic shotgun designs. The "Gold" designation has been used to describe upgraded existing models as well as at least two distinct designs. The markings found on the side of the receiver/frame are not always indicative of each specific variation, markings are usually associated to the base model from which each variant was derived. Sub-variants are usually identifiable by specific features on a given Browning model (example: the Browning "Stalker" designation is usually applied to a model when fitted with a synthetic stock. These models bear no "Stalker" markings). Further, a given Browning model may sometimes be marketed differently in North America and Europe. Model designations, markings and different variations of the same basic gun will be found in Browning product literature.
- the standard North American "Gold" line features a receiver/frame profile with a continually curving top edge while the "Gold Classic" (referred to in Browning's European product literature simply as "Gold") receiver/frame features a scalloped, angular cut at the top rear. As both variants are offered in similar configurations they may bear the same markings on the side of the receiver/frame regardless of design.

Model	- in 1993 Browning announced the introduction of the "BSA 10" (Browning Semi Automatic 10) in two versions. The standard "BSA 10" was going to be offered with a walnut buttstock and forend while the "BSA 10 Stalker" would be equipped with synthetic furniture. Before production began the model designation was changed to "Gold 10". The Gold 10 was offered with a steel receiver/frame from 1994 to 2001 when the Gold 10 was redesigned to use a lightweight aluminium receiver/frame. This newest variation is now referred to as the "Gold Light 10". - the model designation is usually marked on the barrel as "GOLD 10". - features include: ventilated barrel rib with a bead front sight; cross-bolt safety located on the front of the trigger guard; bolt release button mounted on the right side of the receiver/frame; self-cleaning gas system; Mossy Oak "Break-Up" or "Shadow Grass" camouflage finish as the "Gold Light 10". - also available with a black synthetic buttstock and forend as the Gold Light 10 Stalker". - overall length is from 1168mm (46") to 1270mm (50") and average weight from 4.26kg (9.4lbs) to 4.13kg (9.10lbs).
Manufacturer	- manufacturer's name is not usually marked on the firearm. - "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.
Action	- gas operated.
Serial Number	- alpha-numeric; marked on the left side of the receiver/frame.
Shots	- tubular magazine mounted under the barrel.

Make	- "Browning" trade name is marked on the receiver/frame and/or the "Browning" deer head trade mark logo is marked on the side of the receiver/frame. - "Browning Arms Company" is marked on the side of the barrel. - "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennessee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- "Gold" and "SL" in script are mark on the right side of the receiver/frame. - "MOD. GOLD" may be marked on the right side of barrel. - Gold model was available in two series, the Gold and the Gold Classic. - "Gold" series was introduced circa 1994. - "Gold Classic" was introduced circa 1998. - "Gold Classic" is not marked on the firearm. - "GOLD CLASSIC" are distinguished from others in the "Gold" series by the semi-humpback (scalloped top-rear surface) receiver/frame, reminiscent of the B-80. - "Gold SL" and "Gold Classic SL" were introduced in 2006. - features include: round barrel with ventilated rib, bead front sight and Invector-Plus choke tube; solid top aluminum alloy receiver/frame with right side ejection; bolt release button located on the bottom front of the right side of the receiver/frame; cross-bolt safety located on the rear of the trigger guard; checkered wood forearm and pistol grip butt stock with gloss or satin finish and recoil pad; blue finish barrel and receiver/frame. - in 2008 a series of firearms was marketed with Delta Waterfowl logo on the right side of the receiver/frame.
Manufacturer	- the manufacturer's name is not marked on the firearm. - "MADE IN BELGIUM - ASSEMBLED IN PORTUGAL" may be marked on the left side of the barrel.
Action	- gas operated.
Serial Number	- the serial number is marked on the left side of the receiver/frame and is normally repeated on the underside of the barrel.
Calibre	- the calibre designation is marked on the barrel assembly.
Shots	- tubular magazine located under the barrel.

Notes

Make

- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the "Gold" line was introduced into North America in 1994. In 1998, Browning introduced the similarly named "Gold Classic" line into North America. This particular "Sporting Clays" variant was introduced in 1996. In 1999 an upgraded version featuring a silver nitride receiver/frame with gold filled engraving was introduced as the "Gold Sporting Clays Golden Clays".
- this model variation may be distinguished from the "Gold Classic" by the absence of the scalloped upper rear surface of the receiver/frame (reminiscent of the earlier Browning model B-80).
- "Gold" over "Sporting Clays" is marked on the side of the receiver/frame, "Gold" is marked on the barrel.
- features include: ventilated rib barrel; blued receiver/frame and a blued, ported barrel; bolt release button located on the bottom front of the right side of the receiver/frame; gold trigger; cross-bolt safety located on the rear of the trigger guard; checkered walnut buttstock and forend; self-regulating gas system.
- the same basic design is available as the "Gold Ladies/Youth Sporting Clays" with a shorter buttstock.
- other variations of this design are; "Gold Hunter" with an non-ported barrel, "Gold Deer Hunter" with a rifled barrel with rifle type sights, "Gold Stalker" with a synthetic buttstock and forend, "Gold Hunter 3 ½" which is chambered for 3 ½" shells (examples chambered for 12 GA X 3 ½" shells feature a magazine cut-off (marked M.C.) located on the bottom front of the left side of the receiver/frame); and a "Gold Hunter National Wild Turkey Federation" endorsed by the National Wild Turkey Federation.

Manufacturer

- may be marked on the firearm only as "Made in Belgium / Assembled in Portugal".

Action

- gas operated.

Serial Number

- the serial number is found on the receiver/frame.
- observed serial numbers have consisted of a three character (number/letter combination) product code, followed by a two letter year-of-production designator, followed by five numbers.

Shots

- the tubular magazine is located under the barrel.
- Browning factory literature indicates total capacity for:
- 2 3/4" shells as five (5) shots, this includes four (4) cartridges in the magazine, and one (1) cartridge in the chamber.
- NOTE: the firearm may come from the factory with a removeable plug in the magazine tube, which will only allow the magazine to hold two (2) cartridges.

Remarks

- Browning has used the "Gold" designation on more than one of their semi-automatic shotgun designs. The "Gold" designation has been used to describe upgraded existing models as well as at least two distinct designs. The markings found on the side of the receiver/frame are not always indicative of each specific variation, markings are usually associated to the base model from which each variant was derived. Sub-variants are usually identifiable by specific features on a given Browning model (example: the Browning "Stalker" designation is usually applied to a model when fitted with a synthetic stock. These models bear no "Stalker" markings). Further, a given Browning model may sometimes be marketed differently in North America and Europe. Model designations, markings and different variations of the same basic gun will be found in Browning product literature.
- the standard North American "Gold" line features a receiver/frame profile with a continually curving top edge while the "Gold Classic" (referred to in Browning's European product literature simply as "Gold") receiver/frame features a scalloped, angular cut at the top rear. As both variants are offered in similar configurations they may bear the same markings on the side of the receiver/frame regardless of design.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "BROWNING" is marked on the firearm, this trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennesee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Company was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- "Gold Stalker" is not marked on the firearm, this model is based on the Browning model "Gold Hunter". Samples examined retained the "Gold Hunter" markings on the right side of the receiver/frame. "Stalker" denotes a matte finish and the use of a synthetic buttstock and forend. - introduced in 1998, a similar model, available with a 3 1/2" chamber is available as the "Gold Stalker 3 1/2"". - this model may be distinguished from "Gold Classic" by the absence of the scalloped top-rear surface of the receiver/frame (reminiscent of the B-80). - features include: blued receiver/frame and barrel; bolt release button located on bottom front of right side of receiver/frame; magazine cut-off located on bottom front of left side of receiver/frame; gold trigger; safety located on rear of trigger guard; black composite stock and forearm.
Manufacturer	- may be marked on the firearm only as "Made in Belgium / Assembled in Portugal".
Action	- gas operated.
Serial Number	- marked on the left side of the receiver/frame. - observed serial numbers have consisted of a three character (number/letter combination) product code, followed by a two letter year-of-production designator, followed by five numbers.
Shots	- the tubular magazine is located under the barrel. - Browning factory literature indicates total capacity for: - 2 3/4" shells as five (5) shots, this includes four (4) cartridges in the magazine, and one (1) cartridge in the chamber; - 3" shells as four (4) shots, this includes three (3) cartridges in the magazine and, one (1) cartridge in the chamber; and - 3 1/2" shells as four (4) shots, this includes three (3) cartridges in the magazine and, one (1) cartridge in the chamber. - NOTE: the firearm may come from the factory with a removable plug in the magazine tube, which will only allow the magazine to hold two (2) cartridges.
Other Markings	- left side of receiver/frame marked: Gold
Remarks	- Browning has used the "Gold" designation on more than one of their semi-automatic shotgun designs. The "Gold" designation has been used to describe upgraded existing models as well as at least two distinct designs. The markings found on the side of the receiver/frame are not always indicative of each specific variation, markings are usually associated to the base model from which each variant was derived. Sub-variants are usually identifiable by specific features on a given Browning model (example: the Browning "Stalker" designation is usually applied to a model when fitted with a synthetic stock. These models bear no "Stalker" markings). Further, a given Browning model may sometimes be marketed differently in North America and Europe. Model designations, markings and different variations of the same basic gun will be found in Browning product literature. - the standard North American "Gold" line features a receiver/frame profile with a continually curving top edge while the "Gold Classic" (referred to in Browning's European product literature simply as "Gold") receiver/frame features a scalloped, angular cut at the top rear. As both variants are offered in similar configurations they may bear the same markings on the side of the receiver/frame regardless of design. - this model is made in Belgium and assembled in Portugal and has an alloy receiver/frame. The Gold Deer Hunter variant offers a choice of a fixed choke, fully rifled barrel with rifle sights (but without a ventilated rib) or with the multi-choke option.

- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- the model designation may not be marked on the firearm.
- this is a boxlock over/under shotgun built for Browning by Miroku of Japan; this shotgun is intended as an "all-purpose" field and competition shotgun.
- "GTS" stands for "Game Target Shooting", and the receiver/frame will have different grades of engraving depicting both game birds and clay targets.
- features include: gold-plated single adjustable trigger; tang safety/selector; checkered walnut pistol-grip stock with schnabel-tipped forearm; ventilated-rib; and grayed receiver/frame with engraved scenes of a duck taking off over water and turning into a clay pigeon.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- over/under configuration.

Serial Number

- the serial number is usually marked on the upper tang of the receiver/frame.
- Browning adopted a new serial number rationalization starting in 1975.
- the serial number on Japanese manufactured firearms may consist of five sequential numbers followed by a two letter code for the year of manufacture followed by a three character code for the model identifier.
- this two letter code for the year of manufacture started with the letters RV - 1975, and progress to RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NT - 1996, NR - 1997, NP - 1998, NN - 1999, MM - 2000, MZ - 2001, MY - 2002, MX - 2003, MW - 2004, MV - 2005, MT - 2006, MR - 2007, MP - 2008, MN - 2009, ZM - 2010, ZZ - 2011, ZY - 2012, ZX - 2013, ZW - 2014, ZV - 2015, ZT - 2016, ZR - 2017, ZP - 2018, ZN - 2019, and YM - 2020.

Notes

Make

- "BROWNING ARMS COMPANY" is marked on the left side of the slide.

Model

- "HI POWER MARK III" is marked on the right side of the slide.
- "HI POWER MARK III" resembles the Browning High Power pistol.
- "HI POWER MARK III" was introduced in 2012.
- features include: fixed sights; smoothbore barrel; non-working slide with rear grip serrations; left side non-working slide release lever; left side magazine release; ambidextrous safety catch lever; external hammer; single and double action trigger mechanism; semi-automatic firing action; molded plastic construction; black finish.
- overall length with a 121mm (4.75") barrel is 205mm (8.1"), average weight is 0.33kg (0.73lbs).

Manufacturer

- manufacturer is not marked on the firearm.
- "MADE IN TAIWAN" is marked on the right side of the slide.

Action

- CO2 powered.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the right side of the receiver/frame.
- serial number of a referenced example consisted of two numbers, a letter (A) and five numbers.

Calibre

- calibre identification is marked on the right side of the slide.
- calibre identification is also marked on the detachable magazine.
- calibre is 4.5mm (.177") diameter BB.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame. - "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennessee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- retailed as the "High Power Rifle" by Browning, it was manufactured between 1959 and 1975. (grades: Grade I (Standard), Safari, Medallion, and Olympian) - rifles built on the Short SAKO action (L461 Vixen) were only used for the 222 REM, and 222 REM MAG cartridges. - rifles built on the Medium SAKO action (L579 Forester), or the FN Mauser 98 action were used for medium length cartridges (2.875" overall length) such as 243 WIN and 308 WIN. - rifles built for longer standard-length cartridges such as the 30-06 SPRG and 270 WIN, also known as the Short Magnum length for the 300 WIN MAG and 7MM REM MAG, used the FN Mauser 98 action. - rifles built for the Long Magnum length cartridges such as 300 H&H MAG, and 375 H&H MAG, only used the modified FN Mauser 98 action. - this rifle features an integral box magazine (with hinged floorplate), sliding safety (right of the rear receiver tang), checkered walnut Monte Carlo stock with black plastic or ventilated rubber recoil pad (marked "Browning"), high polish blued metal, available with or without open sights. - the Safari, Medallion, and Olympian grades of this firearm represent progressively greater degrees embellishment; of engraving, inlay, and finish on the receiver, floorplate, and barrel; and of walnut furniture selection of figuring, quality of checkering, finish, and polish.
Manufacturer	- all Browning High Power Rifles were built (finished, stocked, and proofed) at Fabrique Nationale (Herstal) in Belgium, regardless of origin of the receiver and markings on the barrel; whether it is marked "Made in Finland" (SAKO: L461/L579), or marked "Made in Belgium" (Fabrique Nationale: 98 Mauser).
Action	- manually operated, bolt-action repeating rifle.
Serial Number	- serial number is marked on the receiver/frame. - serial number rationalization: commencing in 1959 with a single letter "L", with the first rifle being serial number L1 and continuing to letter "L" plus five digits; thence 2L plus five digits to 9L plus five digits. In 1969 the system changed to five digits followed by the letter "L" and the last two digits of the year. EXAMPLE - 55555L69 This firearm model ceased production in 1975. - from 1959 to 1968: marked on the right side of the barrel. - from 1969 to 1975: usually marked on the left side receiver bridge, or rarely on the right side of the receiver ring.
Calibre	- usually marked on the right side of the barrel below the rear sight. - the 222 REM, 243 WIN and the 22-250 REM may be found with in heavy barrel or lightweight versions, the 308 WIN in lightweight only.
Shots	- integral box magazine (with hinged floorplate).
Other Markings	- marked with Belgian Proof House (Liege) marks, on the receiver, bolt, and barrel.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "Browning Arms Company" is marked on the side of the slide. - "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennesee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- this is a generic model used to describe commercial production pistols introduced in 1954 and other screens exist which may more accurately identify the pistol being examined. - may also be known as "Standard". - starting in 1966, the pistol was redesigned to make it less expensive to manufacture. The changes introduced were: a two piece barrel, an exterior mounted extractor, and a spur hammer. - these changes occurred at approximately the same time (1966) as the serial number rationalization changed to incorporate the letter "T" as the serial number prefix. - features may include: blue or nickeled finish; round or spur hammer; wood or plastic or rubber grip panels; fixed or adjustable sights. - overall length with a 117mm (4 5/8") barrel is 197mm (7 3/4"), average weight is 909g (32oz) in 9MM LUGER and 994g (35oz) in 40 S&W.
Manufacturer	- manufacturer is marked on the slide.
Action	- recoil operated.
Serial Number	- prior to 1964, the serial number did not have a letter prefix. - 1964 to 1969, the serial number had a letter "T" prefix followed by six numbers, eg. "T136569". - 1969 to 1976, the serial number had a two number year code followed by the product code of "C" followed by numbers, eg. "70C001". - 1977 to 2004, the serial number has a three number product code of "215" or "245" followed by a two letter year code followed by five numbers, eg. "245PZ87344". - the serial numbers may be located on the right side of the receiver/frame and repeated on the slide and barrel or on the front grip strap.
Calibre	- calibre is usually marked on the barrel.
Shots	- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- The BROWNING "High Power" pistol has been used by the military forces of the following countries, some of which have marked their BROWNING pistols with unique identifying markings:
Austria
Belgium
Cambodia
Canada (CH or T serial numbers)
China (CH serial numbers or Chinese Republic property ideogram)
Columbia
Denmark
El Salvador
Estonia (letters K.L. for Police and/or E V for Republic of Estonia Property Mark)
Lithuania (Lithuanian crest - Towers of Vilnius)
The Lithuanian and Estonian contract pistols had their own serial number series, starting at 1 and continuing to approximately 10000 - the barrel serial number is on the opposite side of the barrel to the ejection opening and is visible only when the pistol is disassembled.
French Indo China
Greece
Netherlands (various royal crowns and the letter "W" or "J")
Some of the Netherlands BROWNING High Power pistols were re-serialized by the Dutch Government upon rebuild.
Indonesia
Lebanon
Paraguay
Peru (Peruvian crest)
Portugal
Syria
United Kingdom (Great Britain) ("T" and standard commercial serial numbers)
Venezuala
West Germany
Yugoslavia

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- retailed as the "High Power Rifle" by Browning, it was manufactured between 1959 and 1975. (grades: Grade I (Standard), Safari, Medallion, and Olympian)
- rifles built on the Short SAKO action (L461 Vixen) were only used for the 222 REM, and 222 REM MAG cartridges.
- rifles built on the Medium SAKO action (L579 Forester), or the FN Mauser 98 action were used for medium length cartridges (2.875" overall length) such as 243 WIN and 308 WIN.
- rifles built for longer standard-length cartridges such as the 30-06 SPRG and 270 WIN, also known as the Short Magnum length for the 300 WIN MAG and 7MM REM MAG, used the FN Mauser 98 action.
- rifles built for the Long Magnum length cartridges such as 300 H&H MAG, and 375 H&H MAG, only used the modified FN Mauser 98 action.
- this rifle features an integral box magazine (with hinged floorplate), sliding safety (right of the rear receiver tang), checkered walnut Monte Carlo stock with black plastic or ventilated rubber recoil pad (marked "Browning"), high polish blued metal, available with or without open sights.
- the Safari, Medallion, and Olympian grades of this firearm represent progressively greater degrees embellishment; of engraving, inlay, and finish on the receiver, floorplate, and barrel; and of walnut furniture selection of figuring, quality of checkering, finish, and polish.

Manufacturer

- all Browning High Power Rifles were built (finished, stocked, and proofed) at Fabrique Nationale (Herstal) in Belgium, regardless of origin of the receiver and markings on the barrel; whether it is marked "Made in Finland" (SAKO: L461/L579), or marked "Made in Belgium" (Fabrique Nationale: 98 Mauser).

Action

- turn bolt operated.

Serial Number

- from 1959 to 1968: marked on the right side of the barrel.
- from 1969 to 1975: usually marked on the left side receiver bridge, or rarely on the right side of the receiver ring.

Calibre

- the 222 REM, 243 WIN and the 22-250 REM may be found with in Heavy Barrel or Lightweight versions, the 308 WIN in Lightweight only.
- usually marked on the right side of the barrel below the rear sight.

Shots

- integral box magazine (with hinged floorplate).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - marked with Belgian Proof House (Liege) marks, on the receiver, bolt, and barrel.

Action

- recoil operated.

Other Markings

- The BROWNING "High Power" pistol has been used by the military forces of the following countries, some of which have marked their BROWNING pistols with unique identifying markings:

Austria
Belgium
Cambodia
Canada (CH or T serial numbers)
China (CH serial numbers or Chinese Republic property ideogram)
Columbia
Denmark
El Salvador
Estonia (letters K.L. for Police and/or E V for Republic of Estonia Property Mark)
Lithuania (Lithuanian crest - Towers of Vilnius)
The Lithuanian and Estonian contract pistols had their own serial number series, starting at 1 and continuing to approximately 10000 - the barrel serial number is on the opposite side of the barrel to the ejection opening and is visible only when the pistol is disassembled.
French Indo China
Greece
Netherlands (various royal crowns and the letter "W" or "J")
Some of the Netherlands BROWNING High Power pistols were re-serialized by the Dutch Government upon rebuild.
Indonesia
Lebanon
Paraguay
Peru (Peruvian crest)
Portugal
Syria
United Kingdom (Great Britain) ("T" and standard commercial serial numbers)
Venezuala
West Germany
Yugoslavia

Notes

Make

- "FABRIQUE NATIONALE HERSTAL BELGIQUE" over "PISTOL AUTOMATIC . 9mm L9A1 BROWNING'S PATENT DEPOSE" over "FN" and year of manufacturer or "FABRIQUE NATIONALE HERSTAL BELGIQUE" over "PISTOL SELF-LOADING BROWNING'S PATENT DEPOSE 9mm L9A1" over "FN" and year of manufacturer may be marked on the left side of the slide.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "PISTOL AUTOMATIC . 9mm L9A1 BROWNING'S PATENT DEPOSE" or "PISTOL SELF-LOADING BROWNING'S PATENT DEPOSE 9MM L9A1" over "FN" and year of manufacturer may be marked on the left side of the slide. - this firearm is a commercial model Browning High Power Pistol, purchased by the Australian and the British Service circa 1963 and later. - this pistol will be found with a lanyard ring and a profusion of other markings.
Manufacturer	- "FABRIQUE NATIONALE HERSTAL BELGIQUE" over "BROWNING'S PATENT DEPOSE" over "FN" and year of manufacturer may be marked on the left side of the slide.
Action	- recoil operated.
Serial Number	- this contract was specified to have a special serial number range by the UK Ministry of Defence (MoD). - the serial number rationalization is not known. - sample serial numbers have been observed having a two letter prefix followed by two digits, followed by a letter, followed by five digits. - it is suspected that the two digits following the two letter prefix could be the year of production. - the year of production may be found marked on the firearm slide. - the thirteen digit number number (1005-13-010-0475) found on the slide and receiver/frame of this firearm is the NATO stock/part number of the firearm.
Calibre	- calibre is usually marked on the right side of the barrel.
Shots	- double column, detachable box magazine.
Other Markings	- The BROWNING "High Power" pistol has been used by the military forces of the following countries, some of which have marked their BROWNING pistols with unique identifying markings: Austria Belgium Cambodia Canada (CH or T serial numbers) China (CH serial numbers or Chinese Republic property ideogram) Columbia Denmark El Salvador Estonia (letters K.L. for Police and/or E V for Republic of Estonia Property Mark) Lithuania (Lithuanian crest - Towers of Vilnius) The Lithuanian and Estonian contract pistols had their own serial number series, starting at 1 and continuing to approximately 10000 - the barrel serial number is on the opposite side of the barrel to the ejection opening and is visible only when the pistol is disassembled. French Indo-China Greece Netherlands (various royal crowns and the letter "W" or "J") Some of the Netherlands BROWNING High Power pistols were re-serialized by the Dutch Government upon rebuild. Indonesia Lebanon Paraguay Peru (Peruvian crest) Portugal Syria United Kingdom (Great Britain) ("T" and standard commercial serial numbers) Venezuala West Germany Yugoslavia
Remarks	- The Model of the Browning High Power Pistol designated L9A1 is in use in the United Kingdom Armed Forces, the Australian Armed Forces and the Armed Forces of Nepal.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- introduced in 1947 and discontinued in 1950. - approximately 30 units produced. - the model designation is normally not marked on this firearm. - Canadian Arsenals Limited was contracted to provide an experimental lightweight Browning High Power. New receiver/frames were made and existing slides and barrels were installed for test purposes. The receiver/frames were made from various aluminum alloys. The first sample was made from steel. The slides were normally reduced in weight by cutting channels along each side of the slide, in the middle and at the rear of the slide. - features include: single action trigger mechanism, black receiver/frame, blued slide with serrations at the rear and weight reducing channels cut along both sides of the slide, a fixed or adjustable rear sight with a fixed front sight, and may have checkered grip panels.
Manufacturer	- the manufacturer is not marked on the receiver/frame.
Action	- recoil operated.
Serial Number	- the receiver/frame may be marked with a serial number for identification during the experiments. This one or two digit number is located on the butt of the receiver/frame, behind the magazine well. - a serial number is usually marked on the barrel and on the right side of the slide. This number may be the original number from the original firearm, or a number which was applied by Canadian Arsenals Limited. The numbers applied by Canadian Arsenal Limited were marked in the following format , "XP-76-7".
Calibre	- the calibre designation is normally marked on the left side of the slide as, "9mm".
Shots	- detachable box magazine.
Other Markings	- these firearms may have numbers marked on the slides and/or grip panels, Examples, "L1", "L2", "S1". These numbers were marked on the firearms for firearm recognition during the experiments.

- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced in 1990/1.
- model designation may not be marked on the firearm
- features include: an ambidextrous safety catch; Pachmayr wrap-around rubber grips; firing pin block and high visibility, high profile sights.
- the principal difference between this and other "High Power" Models is that this features the mixture of a blued slide and a chromed receiver/frame with a matte finish.
- overall length with a 118mm (4 5/8") barrel is 197mm (7 3/4"), average weight is 1022g (36oz) in 9MM LUGER and 1107g (39oz) in 40 S&W.

Action

- recoil operated.

Serial Number

- serial number may include a three digit and two alpha character product code.
- usually marked on the side of the receiver/frame (although other "High Power" variations have been noted with serial numbers in a variety of locations) and will usually be repeated on the slide and barrel.

Calibre

- calibre designation is marked on the barrel, visible through the ejection port.

Shots

- detachable box magazine.

Importer

- marked on the left side of the slide as "Browning Arms Company Morgan. Utah & Montreal P.Q.".

Other Markings

- samples examined were marked "MADE IN BELGIUM" over "ASSEMBLED IN PORTUGAL".

Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- was introduced in 1973. - may also be known as "Vigilante". - this Model was produced for military and police consumption with a lanyard ring and for civilian consumption without a lanyard ring. - features may include: an ambidextrous safety catch, improved hand grip plates with thumb rest, and high visibility, high profile sights.
Action	- recoil operated.
Shots	- detachable box magazine.
Canadian Law Comments	- Handguns chambered for the cartridge 7.65MM LUGER, also known as 30 LUGER and 7.65MM PARABELLUM, are deemed exempt from CC 84(1) "prohibited firearm" para. (a)(ii), which states: "prohibited firearm" means (a) a handgun that (ii) is designed or adapted to discharge a 25 or 32 calibre cartridge,

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- The BROWNING "High Power" pistol has been used by the military forces of the following countries, some of which have marked their BROWNING pistols with unique identifying markings:

Austria
Belgium
Cambodia
Canada (CH or T serial numbers)
China (CH serial numbers or Chinese Republic property ideogram)
Columbia
Denmark
El Salvador
Estonia (letters K.L. for Police and/or E V for Republic of Estonia Property Mark)
Lithuania (Lithuanian crest - Towers of Vilnius)
The Lithuanian and Estonian contract pistols had their own serial number series, starting at 1 and continuing to approximately 10000 - the barrel serial number is on the opposite side of the barrel to the ejection opening and is visible only when the pistol is disassembled.
French Indo China
Greece
Netherlands (various royal crowns and the letter "W" or "J")
Some of the Netherlands BROWNING High Power pistols were re-serialized by the Dutch Government upon rebuild.
Indonesia
Lebanon
Paraguay
Peru (Peruvian crest)
Portugal
Syria
United Kingdom (Great Britain) ("T" and standard commercial serial numbers)
Venezuala
West Germany
Yugoslavia

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- "BROWNING ARMS CO. MORGAN, UTAH & MONTREAL, P.Q. MADE IN U.S.A." is marked on the barrel.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "Johnathan Browning Mountain Rifle" is marked on the barrel.
- this is a plain version of the Jonathan Browning Mountain Rifle Centennial Commemorative.
- this is a replica of a circa 1850 American muzzle loading, percussion side hammer sporting rifle
- features include: octagonal barrel with fixed blade front sight and adjustable rear sight, ramrod mounted under the barrel, plain lockplate with percussion hammer, single set trigger, half length walnut stock.
- overall length is 1194 mm (47").

Manufacturer

- "BROWNING ARMS CO. MORGAN, UTAH & MONTREAL, P.Q. MADE IN U.S.A." is marked on the barrel.
- Browning subcontracted the manufacture of parts to several firms, and then subcontracted the final assembly of the firearm.

Action

- muzzle loading.

Serial Number

- serial number is marked on the right side of the barrel.
- observed serial number consisted of a three number "957" product code, two letter "PY" year code, and five numbers.
- observed serial number consisted of a three number "957" product code, two letter "PZ" year code, and five numbers.

Notes

Make

- Browning's deer head logo is marked on the receiver/frame and on the stock.

Model

- introduced in 2011.
- "LEVERAGE" is marked on the receiver/frame.
- features include: round fixed rifled barrel with fiber optic fixed front sight and a fiber optic adjustable rear sight; cocking lever is mounted under the barrel; tubular receiver/frame with a Picatinny scope rail; ambidextrous safety; adjustable trigger; wood Monte Carlo pistol grip stock with a ventilated rubber recoil pad; blued finish.
- overall length is 1138 mm (44.8"), and average weight is 3.9 kgs (8.6 lbs).

Manufacturer

- manufacturer's name is not marked on the firearm.

Action

- spring-piston powered, hinged barrel design.
- at least two variants of this particular model exist:

Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4 mps (500 fps) and a muzzle energy exceeding 5.7 Joules.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps (500 fps) and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- observed serial number consisted of eight numbers without a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- at least two variants of this particular model exist:

Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4 mps (500 fps) and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorization to Transport.

Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps (500 fps) and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorization to Transport.

Notes

Make

- the make may be marked on the firearm.

Model

- "M4" is usually marked on the identification plaque.
- this is a recoil-operated 37mm cannon designed by John M. Browning in the 1920s, and which was essentially an enlarged Browning M2 machine gun mechanism, adapted to feed the 37mm x 145R cartridge. This cannon was used on both the Bell P-39 Airacobra and P-64 Kingcobra, as well as on motor torpedo boats.
- early installations of this cannon in aircraft were fitted with a 15 round magazine, while later installations were fitted with a 30 round magazine, that wrapped around the cannon in the shape of an aircraft cowling; in aircraft, this cannon was usually installed to fire through the centre of the propeller shaft.
- features include: parkerized/phosphated finish; long recoil operation; underbarrel hydraulic buffer mechanism; square profile receiver/frame constructed of plates rivetted together, with a square feed-housing located on top of the receiver/frame; ambidextrous feed/ejection; and solenoid (aircraft) or manual (flexible) trigger mechanism.

Manufacturer

- the manufacturer is marked on the firearm.

Action

- recoil-operated.

Serial Number

- serial number is marked on the receiver/frame.

Shots

- endless-loop magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make	- "Browning" and the Browning logo are marked on the firearm.
Model	- "Maral" is marked on the firearm ("Maral" is the common name for a sub-species of the European red deer). - this is a straight-pull rifle made primarily for the European market, for hunting big game; this rifle has a spring-loaded action, allowing the bolt handle to be pulled to the rear and released, and the bolt will strip another cartridge out of the magazine as it runs forward into battery. - features include: round, tapered, optionally fluted, rifled barrel; open adjustable or battue ramp open sights; two-piece walnut forearm and pistol-grip buttstock (some versions with additional wood inlays on the receiver sides); detachable box magazine; straight-pull action with spring-loaded return; ball knob bolt handle; tang mounted cocker/decocker/safety; "hog's-back" comb; rubber recoil pad; blued/anodized finish.
Manufacturer	- "Browning" and the Browning logo are marked on the firearm.
Action	- straight-pull bolt action.
Serial Number	- serial number is marked on the receiver/frame.
Shots	- detachable box magazine.
Canadian Law Comments	- Browning Maral rifle magazines are "compatible with the BAR rifle", depending on calibre. - Because semi-automatics are limited to a five (5) shot magazine capacity in accordance with the CC PART III, S. 84, Regulations PART 4 Para 3. (1) (a) (ii) "The Former Cartridge Magazine Control Regulations", this limits the magazine capacity to five (5) shots, despite the model Maral being designed as a bolt action.

Notes

Make

- "BROWNING" and/or the Browning stag's head logo is marked on the firearm.

Model

- "MARAL" is marked on the right side of the barrel; "Maral" is the common name for the Caspian red deer, a species of big game animal hunted in Eastern Europe.
- this is a new (2015) design of straight-pull bolt-action rifle intended for hunters who want the ability for fast follow-up shots but who are prevented from using semi-automatic rifles.
- features include: blued finish; fluted barrel; fluorescent-dot open sights on a battue-style rib; drilled and tapped for scope mounts; checkered walnut schnabel forearm and pistol-grip stock with rubber recoil pad; detachable walnut or engraved side plates; a tang safety/cocking mechanism that must be pushed forward to initially cock the rifle and take it off safe; a detachable box magazine; and a cross-bolt safety at the rear of the trigger-guard.

Manufacturer

- "FN HERSTAL" is marked on the left side of the receiver.

Action

- straight pull bolt-action.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial numbered on the receiver/frame.
Shots	- detachable box magazine.

Model

- Introduced in 2009.
- MAXUS is marked on the right side of the receiver/frame.
- "MAXUS" may be marked on the underside of the forend.
- Features include: magazine tube cut off toggle located on the left side of the receiver/frame; action release button is located on the right side of the receiver/frame; cross-bolt safety located on the rear of the trigger guard; can come in a variety of camo and none camo finishes for the receiver/frame, stock and forend.
- In 2021, the Maxus received a model upgrade and became commonly known and advertised as the Maxus II or Maxus 2.
- Defining features of the upgraded model may include: newly designed screw-on magazine cap; oversized action release; oversized bolt handle; ramped trigger guard; shim adjustable stock for cast, drop and length of pull; cheek pad; textured overmolding on the stock and forend.
- Overall length with a 762 mm (30 inches) barrel is 1302 mm (51.25 inches), average weight is 3.18 kg (7 lbs).
- Overall length with a 711 mm (28 inches) barrel is 1250 mm (49.25 inches), average weight is 2.72 kg (6 lbs).

Manufacturer

- the manufacturer's name is not marked on the firearm.
- "MADE IN BELGIUM - ASSEMBLED IN PORTUGAL" may be marked on the left side of the barrel.
- Browning Viana is marked on the left side of the firearm.
- Browning Viana was established in 1973 and is currently located in Neiva Portugal.
- "Designed at Browning Belgium" may be marked on the right side on the barrel.
- "Designed at FN HERSTAL" may be marked on the right side of the barrel.

Action

- gas operated.

Serial Number

- The serial number may be marked on either the left or right side of the receiver/frame.
-The serial number may also be marked on the underside of the barrel.
- Observed serial numbers consisted of a three number "115" product code, a two letter year code, and five numbers.
- Observed serial numbers for the Maxus II consisted of four letters, five numbers, a two letter year code and a three number "115" product code.

Calibre

- The calibre designation is marked on the barrel.

Shots

- the tubular magazine is located under the barrel.
- Browning factory literature indicates total capacity for:
- 2 3/4" shells as five (5) shots, this includes four (4) cartridges in the magazine, and one (1) cartridge in the chamber;
- 3" shells as four (4) shots, this includes three (3) cartridges in the magazine and, one (1) cartridge in the chamber; and
- 3 1/2" shells as four (4) shots, this includes three (3) cartridges in the magazine and, one (1) cartridge in the chamber.
- NOTE: the firearm may come from the factory with a removable plug in the magazine tube, which will only allow the magazine to hold two (2) cartridges.

Make

- The company logo is marked on the firearm.
- BROWNING is marked on the left side of the receiver/frame.
- BROWNING ARMS COMPANY MORGAN UTAH is marked on the left side of the firearm.
- "BROWNING" is marked on the firearm; this trade name is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Company was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- Introduced in 2010.
- MAXUS is marked on the right side of the receiver/frame.
- Features include: magazine cut off lever located on the left side of the receiver/frame; action release button located of the right side of the receiver/frame; cross-bolt safety located on the rear of the trigger guard; gold plated trigger; may come equipped with a satin nickel finish receiver/frame with engraving or a black finished receiver/frame.
- In 2021, the Maxus received a model upgrade and became commonly known and advertised as the Maxus II or Maxus 2.
- Defining features of the upgraded model may include: newly designed screw-on magazine cap; oversized action release; oversized bolt handle; ramped trigger guard; shim adjustable stock for cast, drop and length of pull; cheek pad; textured overmolding on the stock and forend.
- Overall length with a 762 mm (30 inches) barrel is 1302 mm (51.25 inches), average weight is 3.18 kg (7 lbs).

Manufacturer

- "Made in Portugal by Browning Viana" is marked on the left side of the barrel.
- "Designed at Browning Belgium" may be marked on the right side of the barrel.
- "Designed at FN HERSTAL" may be marked on the right side of the barrel.

Action

- gas operated.

Serial Number

- The serial number may be marked on either the left or right side of the receiver/frame.
- The serial number may also be marked on the underside of the barrel.
- Observed serial numbers consisted of a three number "115" product code, a two letter year code, and five numbers.
- Observed serial numbers for the Maxus II consisted of four letters, five numbers, a two letter year code and a three number "115" product code.

Calibre

- The calibre designation is marked on the barrel.

Shots

- bottom loading, under barrel tubular magazine.

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- Introduced in 2012.
- Discontinued in 2016.
- MAXUS is marked on the right side of the receiver/frame.
- Features observed: high gloss blued barrel; satin nickel finished receiver/frame featuring laser engraving of game birds; action release button located on the right side of the receiver/frame; magazine cut-off located on the left side of the receiver/frame; cross-bolt safety located on the rear of the trigger guard; shim adjustable buttstock.
- Overall length with a 762 mm (30 inches) barrel is 1295 mm (51 inches), average weight is 3.18 kg (7 lbs).

Manufacturer

- Assembled in Portugal by Browning Viana is marked on the left side of the barrel.
- Designed at FN HERSTAL Belgium is marked on the ride side of the barrel.

Action

- gas operated.

Serial Number

- serial number is located on the left side of the receiver/frame.
- observed serial number sequences have consisted of three numbers, two letters and five numbers.

Calibre

- The calibre designation is marked on the barrel.

Shots

- Browning factory literature indicates total capacity for:
- 2 3/4" shells as five (5) shots, this includes four (4) cartridges in the magazine, and one (1) cartridge in the chamber;
- 3" shells as four (4) shots, this includes three (3) cartridges in the magazine and, one (1) cartridge in the chamber.

- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- manufactured from 1962 to 1975.
- "MEDALIST" does not appear on the firearm.
- "T" in the serial number indicates a Medalist model.
- a deluxe target pistol with wrap around thumb-rest grips in checkered walnut, either for left or right handed form, and a matching underbarrel forend of plain walnut.
- medium heavy barrel with a matte finished ventilated rib, micrometer adjustable rear target sight, and slide hold open latch.
- optional features: cased model, consisted of a black case with red cloth interior.

Manufacturer

- Fabrique Nationale (FN) was founded in 1889 to manufacture arms under licence from Mauser for the Belgian army. In the late 1890's John Browning became associated with FN, who manufactured many of his designs. Fabrique Nationale manufactured firearms under the FN banner as well as the Browning banner.

Action

- blowback operation.

Serial Number

- serial number is marked on the front of the grip strap.
- "T" with a one or two digit suffix following the serial number is an indicator that the pistol is a Medalist model manufactured by FN.
- NOTE: the letter
- "I" in the serial number indicates a Medalist II model.
- "P" in the serial number indicates a Nomad model.
- "T" in the serial number indicates a Medalist model.
- "U" in the serial number indicates a Challenger model.
- one observed sample with the number sequence consisting of five numbers followed by the letter "U", followed by a number "3" and followed by a letter "S".

Calibre

- marked on the right side "22 LONG RIFLE", "Made in belgium 22 LR" or "22 L.R. BROWNING PATENTS".

Shots

- detachable box magazine.

Other Markings

- underside of barrel may be marked "Browning's Patent", and may also have Belgian proof marks.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- introduced in 1969, taken off the list by Browning in 1974. - model name not marked on the firearm. - "T" in the serial number indicates a Medalist model. - distinctive feature of the First Variation (over the Second) is the lack of the adjustable checkered walnut grips with the Palm Rest: this variant has a dull matte finish, interchangeable front sight and click-adjustable (for windage and elevation) rear sight; rounded medium heavy barrel with ventilated rib.
Manufacturer	- marked on the right side "MADE IN BELGIUM".
Action	- blowback operation.
Serial Number	- serial number is marked on the front of the grip strap. - "T" with a one or two digit suffix following the serial number is an indicator that the pistol is a Medalist model manufactured by FN. - NOTE: the letter - "I" in the serial number indicates a Medalist II model. - "P" in the serial number indicates a Nomad model. - "T" in the serial number indicates a Medalist model. - "U" in the serial number indicates a Challenger model.
Barrel	- the only length of barrel made was 151mm: this was a requirement at that time to qualify for both N.R.A. and International Shooting Union regulations
Calibre	- marked on the right side "22 LONG RIFLE".
Shots	- detachable box magazine.

Notes

Make

- "BROWNING ARMS COMPANY MORGAN, UTAH & MONTREAL P.Q." or "BROWNING ARMS COMPANY" is marked on the firearm.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- only sold in North America in 1980, (approximately 200 units), still produced for sales in other countries. - model name not marked on the firearm. - distinctive feature of the Second Variation (over the First) is the adjustable checkered walnut grips with the Palm Rest: this variant has a dull matte finish, interchangeable front sight and click-adjustable (for windage and elevation) rear sight; medium heavy barrel with plain rib. - the 152mm long medium heavy barrel is under-grooved to permit attachment of a weight that can be moved forward or rearward to adjust for balance.
Manufacturer	- marked on the left side "MADE IN BELGIUM BY FABRIQUE NATIONALE HERSTAL". - some units were made in France, and are marked "MADE IN FRANCE BY FABRIQUE NATIONALE HERSTAL".
Action	- blowback operation.
Serial Number	- the "Medalist International II" incorporates an "I" in the serial number, and later the model code "665" - a number of these units were made in France, and incorporate a "P" in the serial number. - serial number found on the forward left side of the receiver/frame above the trigger-guard, and repeated immediately above it on the left side of the barrel, observed serial number format example: 81630 I75. - NOTE: the letter - "I" in the serial number indicates a Medalist II model. - "P" in the serial number indicates a Nomad model. - "T" in the serial number indicates a Medalist model. - "U" in the serial number indicates a Challenger model.
Barrel	- the only length of barrel made was 151mm: this was a requirement at that time to qualify for both N.R.A. and International Shooting Union regulations
Calibre	- marked on the right side "22 LONG RIFLE".
Shots	- detachable box magazine.

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- can be found in both small or large ring Mauser actions.

Serial Number

- from 1959 until mid 1962 all serial numbers were numeric only, but beginning in mid 1962 and continuing until 1975, the last year of production, the year of manufacture was included as part of the serial number.
- for Medallion models built on the Mauser type, Fabrique Nationale produced receiver/frame, the rationalization used is as follows:
- 1962; "2X" prefix followed by a one to five digit number;
- 1963; "3X" prefix followed by sequential numbers, the rationalization of using the last digit of the year of manufacture ahead of the alpha character continued until 1969 at which time the "X" became the first character followed by a "9" or "69".
- beginning in 1962, Medallion models built on the Sako L461 receiver/frame, the letter "A" was used in the prefix preceded by the last digit of the year of manufacture. This continued until 1969 when it was s changed to "Y" followed by the last two digits of the year of manufacture.
- the same rationalization was used on Medallion models built on the Sako L579 receiver/frame except that "A" was used as the prefix until 1969 when it was changed to a "Z" suffix.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "BROWNING ARMS COMPANY" is marked on the left side of the firearm. - "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennesee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- manufactured from 1962 to 1974. - "NOMAD" does not appear on the firearm. - "P" in the serial number indicates a Nomad model. - black anodized or blued steel frame, black plastic grips, rear sights adjustable for windage and elevation, no slide hold-open latch.
Manufacturer	- Fabrique Nationale (FN) was founded in 1889 to manufacture arms under license from Mauser for the Belgian army. In the late 1890's John Browning became associated with FN, who manufactured many of his designs. Fabrique Nationale manufactured firearms under the FN banner as well as the Browning banner.
Action	- blowback operation.
Serial Number	- serial number is marked on the front of the grip strap. - "P" with a one or two digit suffix following the serial number is an indicator that the pistol is a Nomad model manufactured by FN. - NOTE: the letter - "I" in the serial number indicates a Medalist II model. - "P" in the serial number indicates a Nomad model. - "T" in the serial number indicates a Medalist model. - "U" in the serial number indicates a Challenger model.
Calibre	- marked on the right side "22 LONG RIFLE".
Shots	- detachable box magazine.
Other Markings	- Belgian proof marks will normally be found on the firearm.

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- can be found in both small or large ring Mauser actions.

Serial Number

- from 1959 to mid 1962 all serial numbers were numeric only, but beginning in mid 1962 and continuing until 1975, the last year of production, the year of manufacture was included as part of the serial number.
- on Olympian models built on the Mauser type, Fabrique Nationale receiver/frame the rationalization used is as follows:
- 1962; "2P" prefix followed by a one to five digit number;
- 1963; "3P" prefix followed by sequential numbers, the rationalization of using the last digit of the year of manufacture ahead of the alpha character continued until 1969 when the "P" appeared as a suffix followed by "9" or "69".
- from 1970 to 1975 the "P" suffix continued to be used followed by the last two year digits of the date of manufacture.
- beginning in 1962, Olympian models built on the Sako L461 receiver/frame the letter "B" was used in the prefix preceded by the last digit of the year of manufacture. This continued until 1969 when it was changed to a "Y" suffix followed by the last two digits of the date of manufacture.
- the same rationalization was used on Olympian models built on the Sako L579 receiver/frames except that a "B" was used as the prefix until 1969 when it was changed to a "Z" suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- this design was introduced in 2004 as a joint development effort between Fabrique Nationale Herstal (FN) and Browning, and resulted in the release of the model Pro-9. - the Pro-40 was first catalogued in 2005. - the model designation is marked on the right side of the slide. - features include: black polymer receiver/frame with an interchangeable backstrap, an integral rail that accepts a variety of accessories such as laser sight systems or lights and a steel "mechanical cradle" insert that mates to a stainless steel or Tenifer coated slide; trigger mechanism allows for a double action first shot followed by subsequent single action shots; firing pin safety and receiver/frame mounted safety catch; fixed, dovetailed sights. - overall length with a 102mm (4") barrel is 184mm (7.25"), average weight is 937g (33oz).
Manufacturer	- "MADE IN U.S.A." is marked on the slide.
Action	- recoil operated.
Serial Number	- numbered on the receiver/frame, rationalization unknown.
Calibre	- the calibre designation is marked on the top of the chamber area and is visible through the ejection port of the slide assembly when the action is closed.
Shots	- detachable box magazine housed in the grip.

- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced in 2004 as a joint development effort between Fabrique Nationale Herstal (FN) and Browning.
- the model designation is marked on the right side of the slide.
- features include: black polymer receiver/frame with an interchangeable backstrap; an integral rail that accepts a variety of accessories such as laser sight systems or lights; steel "mechanical cradle" insert that mates to a stainless steel or Tenifer coated slide; trigger mechanism allows for a double action first shot followed by subsequent single action shots; firing pin safety and receiver/frame mounted safety catch; fixed, dovetailed sights.
- overall length with a 102mm (4") barrel is 184mm (7.25"), average weight is 852g (30oz).

Manufacturer

- "BROWNING" and "MADE IN U.S.A." is marked on the slide.

Action

- recoil operated.

Serial Number

- serial number is marked on the receiver/frame, rationalization unknown.

Calibre

- "9MM" was observed marked on the top of the chamber.

Shots

- detachable box magazine housed in the grip.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- specifically designed for trap shooting. This model is named for its unique system that eliminates most of the felt recoil when a shell is fired. The forend is used to set the barrel back in the receiver, the bolt is opened and a shell inserted, when the trigger is pulled the bolt and barrel assembly move forward as a unit to counteract the force of recoil. - fully adjustable high ventilated rib. - walnut stock, adjustable recoil pad and length of pull. - also known as the Recoilless Micro, this is a variation of this model with slightly smaller dimensions.
Manufacturer	- manufacturer's name is not usually marked on the firearm. - "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.
Serial Number	- located on right side.

Notes

Make

- "BROWNING ARMS COMPANY" is marked on the side of the firearm.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- manufactured from 1970 to 1975. - "RENAISSANCE" or "MEDALIST" does not appear on the firearm. - "T" in the serial number indicates a Medalist model. - this is a a deluxe Medalist target pistol with wrap-around thumb-rest grips in checkered walnut, either for left or right-handed form, and a matching underbarrel forend of walnut. - embellished with engraving (scroll and leaves), covering 95% of the firearm. - nickle or chrome plated, with a gold plated trigger. - vented medium heavy barrel with a matte-finished ventilated rib, micrometer adjustable rear target sight, and slide hold-open latch.
Manufacturer	- "Made in Belgium" is marked on the side of the firearm.
Action	- blowback operation.
Serial Number	- serial number is marked on the front of the grip strap. - "T" with a one or two digit suffix following the serial number is an indicator that the pistol is a Medalist model manufactured by FN. - NOTE: the letter - "I" in the serial number indicates a Medalist II model. - "P" in the serial number indicates a Nomad model. - "T" in the serial number indicates a Medalist model. - "U" in the serial number indicates a Challenger model.
Shots	- detachable box magazine.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame. - "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennesee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- several noteable features set the "Safari" apart from the "High Power" rifle. - the "Safari" uses a Mauser "98" type action that has been upgraded to allow for a better adjustable trigger, a more user-friendly bolt handle and safety for telescopic sights, a drilled and tapped receiver/frame and a hinged floorplate. - features include: a better than standard quality walnut stock that will be found with or without a grip cap or forend tip; highly polished and blued barrel and receiver/frame; anodized trigger guard and floorplate that featured gold filled engraving and scroll work (two patterns were available, one was used on the short and medium length actions and the otherv on the long action); a black plastic butt plate marked with the "Browning" name was standard but a ventilated recoil pad could be special ordered.
Manufacturer	- the manufacturers name does not appear on the firearm. - the right side of the barrel will be marked "Made in Belgium" beneath the calibre designation. - the "Safari" rifle was also produced on a SAKO built receiver/frame, these will be marked "Made in Finland".
Serial Number	- the serial number will normally appear on the receiver/frame, some early production were known to have been marked on the barrel only. At various times during production Browning would use a "Safari" receiver/frame to make an "Olympian" model so the serial number rationalization that appears on a given firearm may not coincide with accepted serial number ranges or marking practices. - from 1959 until mid 1962 all serial numbers were numeric only on Safari models built on the Fabrique Nationale produced Mauser type receiver/frame. - beginning in mid 1962 and continuing until 1975, the last year of production, the year of manufacture was included as part of the serial number. - the rationalization used on the FN produced, long length receiver/frame is as follows (short length receiver/frames may have used a different alpha character): - 1962; "2L" prefix followed by a one to five digit number; - 1963; "3L" prefix followed by sequential numbers, the rationalization of using the last digit of the year of manufacture ahead of the alpha character continued until 1969 when the "L" appeared as the suffix followed by either "9" or "69". - from 1970 to 1975 the "L" suffix continued to be used followed by the last two year digits of the date of manufacture. - on Safari models built on the Sako L461 receiver/frame the letter "Y" was used in the prefix preceded by the last digit of the year of manufacture. From 1969 to 1975 the "Y" appeared as the suffix followed by the last two digits of the year of manufacture. - on Safari models built on the Sako L579 receiver/frame the same rationalization was used except the letter "Z" was used.
Calibre	- the calibre designation normally appears on the right side of the barrel.
Other Markings	- the firearms will also be marked with Belgian proofs, some components will also bear inspectors markings.
Remarks	- as these rifles could be special ordered variations in features anf finish may be encountered.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- several noteable features set the "Safari" apart from the "High Power" rifle.
- the "Safari" uses a Mauser "98" type action that has been upgraded to allow for a better adjustable trigger, a more user-friendly bolt handle and safety for telescopic sights, a drilled and tapped receiver/frame and a hinged floorplate.
- features include: a better than standard quality walnut stock that will be found with or without a grip cap or forend tip, highly polished and blued barrel and receiver/frame, anodized trigger guard and floorplate that featured gold filled engraving and scroll work (two patterns were available, one was used on the short and medium length actions and the otherv on the long action), a black plastic butt plate marked with the "Browning" name was standard but a ventilated recoil pad could be special ordered.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- the manufacturers name does not appear on the firearm.
- the right side of the barrel will be marked "Made in Finland" beneath the calibre designation.
- the "Safari" rifle was also produced on a Fabrique Nationale Herstal (FN) built receiver/frame, these will be marked "Made in Belgium".

Serial Number

- the serial number will normally appear on the receiver/frame, some early production were known to have been marked on the barrel only. At various times during production Browning would use a "Safari" receiver/frame to make an "Olympian" model so the serial number rationalization that appears on a given firearm may not coincide with accepted serial number ranges or marking practices.
- from 1959 until mid 1962 all serial numbers were numeric only on Safari models built on the Fabrique Nationale produced Mauser type receiver/frame.
- beginning in mid 1962 and continuing until 1975, the last year of production, the year of manufacture was included as part of the serial number.
- the rationalization used on the FN produced, long length receiver/frame is as follows (short length receiver/frames may have used a different alpha character):
- 1962; "2L" prefix followed by a one to five digit number;
- 1963; "3L" prefix followed by sequential numbers, the rationalization of using the last digit of the year of manufacture ahead of the alpha character continued until 1969 when the "L" appeared as the suffix followed by either "9" or "69".
- from 1970 to 1975 the "L" suffix continued to be used followed by the last two year digits of the date of manufacture.
- on Safari models built on the Sako L461 receiver/frame the letter "Y" was used in the prefix preceded by the last digit of the year of manufacture. From 1969 to 1975 the "Y" appeared as the suffix followed by the last two digits of the year of manufacture.
- on Safari models built on the Sako L579 receiver/frame the same rationalization was used except the letter "Z" was used.

Calibre

- the calibre designation normally appears on the right side of the barrel.

Other Markings

- the firearms will also be marked with Belgian proofs, some components will also bear inspectors markings.

Remarks

- as these rifles could be special ordered variations in features anf finish may be encountered.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame. - "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennesee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- manufactured from 1914. - "Semi-Automatic 22" is not marked on the firearm. - this model was refered to as the "Browning .22 Automatic Rifle" by the company, during that era (also marketed as the "Browning .22 Semi-Automatic Rifle"). - the Model B, as originally designated was intended for North American distribution and identified by the loading port on the right side of the buttstock: this has become the common variant and no longer designated as such. It is slim rifle equipped with open sights and a simple take-down feature. - depending on the time of manufacture and grade, the receiver top of the firearm may, or may not be dovetail grooved for scope mounts. - the quantity and quality of engraving and enbellishment (such as gold inlays) determine grade, beginning at Grade I, and increasing through to Grade III. - not to be confused with the same rifle manufactured by Remington as the "Model 24", or the identical rifle manufactured by "MIROKU" for Browning since 1976. - the Model "A" was an early production rifle intended only for European distribution and unlikely to be encountered in North America; are loaded through the top of the wrist just ahead of the comb of the buttstock, and have a small cartridge capacity of eight to ten long rifle or fourteen shorts. - the model "F" was a very rare non-takedown variant of this rifle.
Manufacturer	- "FABRIQUE NATIONAL D'ARMES DE GUERRE HERSTAL - BELGIQUE", "FABRIQUE NATIONAL D'ARMES DE GUERRE BELGIUM" and/or "MADE IN BELGIUM" may be marked on the barrel.
Action	- blowback operated.
Serial Number	- serial number is marked on the receiver/frame or on the underside of the barrel near the forend. - serial number may have a letter "A" or "T" prefix. - serial number may have a prefix of "1E", "3E", "4E", etc up to "73E". - serial number may have a prefix of "1T", "2T", "3T", etc up to "73T". - serial number may have a suffix of "T37". - Note: inconsistancies have been reported on serial number letters. - the letter "A" in the serial number was orginally used to identify units manufactured in calibre 22 SHORT. - the letter "E" in the serial number was used to identify units manufactured in calibre 22 SHORT, starting in 1961. - the letter "T" in the serial number was used to identify units manufactured in calibre 22 LR. - the letter "T" with a number in front of it was introduced in 1961.
Calibre	- manufactured in either 22 LR or 22 SHORT.
Shots	- fixed tubular magazine located in the buttstock. - the magazine is normally loaded through a port in the right side of buttstock, or in early production units through the top of the buttstock wrist.
Other Markings	- variously marked, depending upon time of manufacture; but commonly as: FABRIQUE NATIONALE D"ARMES DE GUERRE HERSTAL BELGIUM, and/or BROWNING ARMS COMPANY, ST LOUIS MO. & MONTREAL P.Q., or: BROWNING ARMS COMPANY MORGAN UTAH & MONTREAL P.Q.

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- this model was originally produced in Belgium by Fabrique Nationale, Herstal between 1914 and 1976.
- in 1976 production was contracted to Miroku of Japan.
- a slim rifle with a simple take-down feature that allows the rifle to be separated into two sections.
- loaded through the right side of the buttstock into a tubular magazine, accessed through the butt plate;
- equipped with open sights (may have a dovetail grooved receiver/frame to accept scope mount).
- satin grey receiver/frame and a stainless steel barrel.
- available in 2007 in the Grade I version featuring a blued barrel and receiver/frame and a Grade VI version that includes a round or octagonal barrel, engraved, blued or stainless receiver/frame, gold inlays and a traditional walnut or grey laminated stock.
- overall length with a 492mm barrel (19 3/8") is 940mm (37") and average weight of 2.4kg (5.3lbs).

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Browning Arms Company, Morgan Utah & Montreal P.Q." and "Made in Japan" or "Made in Japan" and "Miroku" have been reported marked on barrels.

Action

- blowback operated.

Serial Number

- the serial number is marked on the receiver/frame.
- the serial number consists of five numbers followed by two letters followed by three numbers.
- "PATENT NO. 3377731" may be marked on the right side of the barrel, "3377731" is not a serial number.

Calibre

- the calibre designation is marked on the barrel.
- rifling characteristics: 1 turn in 16 inches.

Shots

- fixed tubular magazine located in the buttstock.
- the tubular magazine is loaded through a port in the right side of buttstock.

Notes

Make

- "BROWNING" is usually marked on the top barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- in production since 1930.
- this is a generic entry, other entries exist that might better identify the sample being examined.
- features include: single selective or nonselective trigger, or double triggers, various levels or grades of engraving and embellishments.

Manufacturer

- marked on the left side.

Action

- over & under barrel configuration, hinged barrel design.

Serial Number

- the serial number is marked under the barrel release catch on the top of the receiver/frame tang, repeated on the barrel assembly.
- one sample observed consisted of a letter followed by two numbers then three letters and then four numbers, eg: L13PPDxxxx.

Calibre

- marked on the right side of the barrel.

Other Markings

- "PATENTS No. 2,203,378 - 2,233,861" may be marked on the right side of the barrel.

Remarks

- the Superposed is easily distinguished from the Citori by the sliding forend.
- the Superposed forend slides forward to release the barrels for disassembly, the Citori rotates in an arc for disassembly.

- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- the Superposed Continental Shotgun (CCS25 and CCS225 in Europe) was made and assembled at the FN Custom shop 1981 to 1988.
- all shotgun barrels have ventilated ribs, (the rifle barrels have sights) and walnut forearms with straight or semi-pistol grip butt stocks. The two barrel sets come in a fitted case.

Manufacturer

- will normally be marked "Made in Belgium".

Action

- over/under configuration.

Serial Number

- found on the receiver/frame.

Notes

Make

- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- the Superposed Lightning (B25 in Europe) was manufactured by FN in Herstal Belgium.
- they all have ventilated ribs and walnut forearms with semi-pistol grip or straight grip butt stocks.
- the Lightning weighs a little less (6 ounces) than the Standard and may be named in script under the action in front of trigger guard.
- this model may come as a 12 and 20 gauge set, a 20, 28 and 410 set on the 20 gauge frame, a four barrel set in 12, 20, 28 and 410 or as a 12 gauge with a set of calibre reducing tubes (Browning Supertubes) fitted to a 12 gauge set of barrels (mostly on Skeet models).
- the trap versions were the Lightning Trap and the Broadway Trap. The latter has a very wide ventilated rib which can't be confused with any other model.
- the Superposed was first patented in 1926 and manufactured from 1931 to 1973.
- as a semi-custom shotgun many options were available thus making many guns individual.
- the Superposed has remained mechanically the same but options and engraving motifs made up the many models names available.

Action

- over/under.

Serial Number

- found on the receiver.

Barrel

- all barrels manufactured with fixed chokes and ventilated ribs. On the double rifle option the barrels were rifled, without rib but with rifle sights installed.

Other Markings

- Made in Belgium.

- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- T-Bolt rifle was originally produced between 1965 and 1974 with a total production just under 67,000 units. While actual production ceased in 1974 Browning assembled approximately 3,100 more rifles between 1978 and 1981 using leftover parts from 1973/4 production. Those rifles produced after 1974 are identifiable by the product code incorporated in the serial number.
- Browning T-Bolt was available in three configurations:
- T-1 features include: round tapered 559mm barrel with blade front sight; straight-pull bolt using a cross-bolt locking system; receiver/frame was dovetailed to allow mounting the rear receiver sight or scope mount; safety lever mounted on the side of the receiver/frame; blue finish; plain (no checkering) one-piece oil finished walnut stock .
- T-2 features include round tapered 610mm barrel with blade front sight; straight-pull bolt using a cross-bolt locking system; receiver/frame was dovetailed to allow mounting the rear receiver sight or scope mount; safety lever mounted on the side of the receiver/frame; blue finish; checkered one-piece lacquer finished walnut stock .
- T-1 and T-2 versions were available in right or left hand configuration.
- T-3 features include: free floating round tapered 559mm barrel; straight-pull bolt using a cross-bolt locking system; receiver/frame is drilled and tapped for scope mounts; top tang safety; gold coloured trigger; no iron sights; blue finish; checkered one-piece satin finished walnut pistol grip stock with sling swivel studs.

Manufacturer

- manufacturer's name is not marked on the firearm.

Action

- straight-pull bolt design.

Serial Number

- when the T-Bolt was first introduced the serial number was marked on the underside of the barrel ahead of the forend tip. In 1968 the placement was moved to the side of the receiver/frame to comply with United States federal legislation introduced in the same year.
- the serial number on units produced between 1965 and 1974 incorporated an "X" to designate the model followed by the year of manufacture. Production in each year started with the number 0001.
- units produced after 1974 from leftover parts were numbered in one of three ways; a: 216PM (replaces the "X" model code) b: X37 or X47 (denotes parts made in 1973 or 1974 used to assemble guns after 1974) c: X without a year code.
- codes for year of manufacture are as follows;
- 1965; X5
- 1966; X6
- 1967; X7
- 1968; X8
- 1969; X69 or X9
- 1970; X70
- 1971; X71
- 1972; X72
- 1973; X73 or X37
- 1974; X74 or X47

Calibre

- the calibre designation is marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.
- each model T-Bolt was supplied with an adapter to convert the rifle to "single-shot" configuration. This adapter was a two-piece unit; one part was inserted into the top of the receiver/frame to act as a loading ramp while a second part was inserted into the magazine opening enclose it.

- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced in 2006.
- this is the re-introduction of the original model T-Bolt rifle that was manufactured from 1965 to 1974 and later 1978 to 1981.
- model designation may be marked on the firearm.
- features include: no iron sights; round tapered or heavy target barrel; straight pull bolt action; receiver/frame is drilled and tapped for scope mounts; safety lever located on the upper rear tang; gold coloured trigger; one piece, checkered, walnut or synthetic, semi-pistol grip stock with or without Monte Carlo comb; sling swivel studs; blued finish.
- detachable "Double Helix" rotary (front view resembles a figure eight) box magazine.
- overall length with a 413 mm (16.25") barrel is 883 mm (34.75").
- overall length with a 559mm (22") barrel is 1019mm (40 1/8").
- average weight is 2.2 kg (4lbs 14oz).
- introduced in 2008 with a grey laminate stock and a black composite stock with a spare magazine carrier in the buttstock. Both with installed sling swivels.
- a left hand version was introduced in 2008.
- barrel threaded for a suppressor was introduced in 2015.

Manufacturer

- "MADE IN JAPAN" may be marked on the firearm.

Action

- straight-pull bolt design.

Serial Number

- serial numbers observed have consisted of five numbers, two letters and three numbers.

Calibre

- "22 LR" was observed marked on the right side of the barrel.
- rifling characteristics in 22LR: 1 turn in 406 (16").

Shots

- detachable, rotary (double helix) box magazine.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade name is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- model designation may not be marked on the firearm.
- "X-BOLT" may be marked on the firearm.
- features include: matte blue barrel and receiver/frame; turn-bolt action with 60 degree bolt lift; detachable rotary magazine; gold plated, adjustable, trigger; top tang safety and bolt unlock button; composite/synthetic stock with sling swivel studs and recoil pad; no iron sights; receiver/frame is drilled and taped for scope mounts.
- also available in various camouflage finishes.

Manufacturer

- "MADE IN JAPAN" and "MIROKU" may be marked on the side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- turn-bolt design.
Serial Number	- serial number is marked on the side of the receiver/frame. - serial number observed consisteds of five numbers, two letter "ZW" year code, and a three number "354" product code.
Calibre	- calibre designation is marked on the barrel.
Shots	- detachable rotary magazine.

- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "X-BOLT" is marked on the firearm.
- "X-Bolt Composite Stalker" was introduced in 2008.
- features include: matte blue barrel and receiver/frame; turn bolt action with 60 degree bolt lift; detachable rotary magazine; gold plated adjustable Feather trigger; top tang safety and bolt unlock button; composite/synthetic stock with sling swivel studs and recoil pad; no iron sights; receiver/frame is drilled and taped for scope mounts.
- available in super short, short or long action.
- available with a bull barrel in 2009.
- overall length is from 1048mm (41 1/4") to 1188mm (46 3/4") and average weight is from 2.86kg (6.3lbs) to 3.18kg (6.13lbs).

Manufacturer

- "MADE IN JAPAN" and "MIROKU" are marked on the side of the barrel.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the side of the receiver/frame.
- observed serial number consisted of five numbers followed by two letters (MR) and three numbers.

Calibre

- calibre is marked on the barrel.
- rifling characteristics in calibre 7MM-08 REM, 7MM WSM and 7MM REM MAG: 1 turn in 9 1/2 inches.
- rifling characteristics in calibre 243 WIN, 270 WSM, 300 WSM, 325 WSM, 25-06 REM, 270 WIN, 280 REM, 30-06 SPRG, 300 WIN MAG and 338 WIN MAG: 1 turn in 10 inches.
- rifling characteristics in calibre 223 REM and 308 WIN: 1 turn in 12 inches.
- rifling characteristics in calibre 22-250 REM: 1 turn in 14 inches.

Shots

- detachable rotary box magazine.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- introduced in 2014. - "X-BOLT" is marked on the firearm. - "Eclipse" main characteristics is the laminated gray Monte Carlo stock with thumbhole grip. - "X-Bolt Eclipse Hunter" is available with a short action or a long action - features include: no iron sights; round sporter barrel with a target crown; steel receiver/frame has a top tang mounted safety; receiver/frame is drilled and tapped for scope mounts; turn bolt action with 60 degree bolt lift; bolt unlock button is mounted on the top of the bolt handle; detachable rotary magazine release is mounted in front of the magazine; gold plated adjustable trigger; one piece checkered gray laminated thumbhole grip stock with a recoil pad, and sling swivel studs; matte blue finish. - overall length with a 559 mm (22") barrel is 1070 mm (42 1/8"), and the average weight is 2.74 kg (6 lbs 7 oz).
Manufacturer	- "MADE IN JAPAN" and "MIROKU" are marked on the side of the barrel.
Action	- turn-bolt design.
Serial Number	- serial number is marked on the right rear side of the receiver/frame. - serial number observed consisted of five numbers, a two letter year code, and a three number product code.
Calibre	- calibre is marked on the barrel.
Shots	- detachable rotary magazine.

- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "X-BOLT" may be marked on the right side of the barrel.
- this is a version of the X-Bolt rifle fitted with a camouflage synthetic pistol-grip stock, and designed for long-range hunting
- features include: steel barrel and receiver/frame with matte tan cerakote finish; threaded muzzle with multi-directional muzzle brake; straight fluted barrel; turn bolt action with 60 degree bolt lift; detachable rotary magazine; adjustable trigger; top tang safety; bolt unlock button at the top of the bolt handle; dappled tan camouflage synthetic pistol-grip stock with sling swivel studs and recoil pad; no iron sights; receiver/frame is drilled and tapped for scope mounts.
- In 2021, a new version of the X-Bolt Hell's Canyon Long Range rifle was introduced called the X-Bolt Hell's Canyon Max Long Range. The Max comes equipped with a composite max stock featuring an adjustable comb and spacers to adjust its length of pull.

Manufacturer

- "MADE IN JAPAN" and "MIROKU" are marked on the left side of the barrel.

Action

- turn-bolt design.

Serial Number

- serial-numbered on the right rear of the receiver/frame.

Shots

- detachable rotary magazine.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade name is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- introduced in 2008.
- "X-BOLT" is marked on the firearm.
- "X-Bolt Hunter" is available in a short or long action.
- "X-Bolt Hunter" is available in a left or right hand version.
- features include: low luster blued barrel and receiver/frame; turn bolt action with 60 degree bolt lift; detachable rotary magazine; gold plated adjustable Feather trigger; top tang safety and bolt unlock button; satin finish walnut stock with sling swivel studs and recoil pad; no iron sights; receiver/frame is drilled and taped for scope mounts.
- overall length is from 1048mm (41 1/4") to 1188mm (46 3/4") and average weight is from of 2.99kg (6.6lbs) to 3.18kg (7lbs).
- "High Grade Hunter" version with octagonal barrel, engraved receiver sides, and polished walnut stock with stippled checkering available beginning 2015.

Manufacturer

- "MADE IN JAPAN" and "MIROKU" are marked on the side of the barrel.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the side of the receiver/frame.
- observed serial number consisted of five numbers followed by two letters (MR) and three numbers.

Calibre

- calibre is marked on the barrel.
- rifling characteristics in calibre 7MM-08 REM, 7MM WSM and 7MM REM MAG: 1 turn in 9 1/2 inches.
- rifling characteristics in calibre 243 WIN, 270 WSM, 300 WSM, 325 WSM, 25-06 REM, 270 WIN, 280 REM, 30-06 SPRG, 300 WIN MAG and 338 WIN MAG: 1 turn in 10 inches.
- rifling characteristics in calibre 223 REM and 308 WIN: 1 turn in 12 inches.
- rifling characteristics in calibre 22-250 REM: 1 turn in 14 inches.

Shots

- detachable box magazine.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade name is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- model designation may not be marked on the firearm.
- "X-BOLT" is marked on the barrel.
- "Predator Hunter" is defined by the calibre and the complete camouflage finish of the stock and barrelled action.
- features include; steel, heavy sporter, free-floating barrel with target crown; no iron sights; receiver/frame is drilled and tapped for scope mounts; 60 degree bolt lift; adjustable trigger; top tang safety and bolt unlocking button; glass bedded receiver/frame; composite pistol grip stock; sling swivel studs and recoil pad.
- overall length for a 610mm (24") barrel is 1099mm (43.25"), average weight is 2.86kg (6.3lbs).

Manufacturer

- "MADE IN JAPAN" and "MIROKU" may be marked on the side of the barrel.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the rear right side of the receiver/frame.

Calibre

- calibre designation is marked on the barrel.
- 22-250 REM rifling characteristics: 1 turn in 9 inches, right hand twist.
- 223 REM rifling characteristics: 1 turn in 8 inches, right hand twist.
- 204 RUGER rifling characteristics: 1 turn in 12 inches, right hand twist.

Shots

- detachable, rotary magazine.

Notes

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade name is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "X-BOLT" is marked on the firearm. - "X-Bolt Stainless Stalker" was introduced in 2008. - features include: matte finish stainless steel barrel and receiver/frame; turn bolt action with 60 degree bolt lift; detachable rotary magazine; adjustable Feather trigger; top tang safety and bolt unlock button; composite/synthetic stock with sling swivel studs and recoil pad; no iron sights or open sights; receiver/frame is drilled and taped for scope mounts. - available with a carbon fiber stock in 2010. - overall length with a 559mm barrel (22") is1188mm (41 3/4") and an average weight of 2.95kg (6.5lbs). - available with a fluted barrel in 2015.
Manufacturer	- "MADE IN JAPAN" and "MIROKU" are marked on the side of the barrel.
Action	- turn-bolt design.
Serial Number	- serial number is marked on the right rear side of the receiver/frame. - observed serial number consisted of five numbers, a two letter year code, and a three number "354" product code.
Barrel	- rifling characteristics in caliber 243 WIN: 1 turn in 10 inches.
Calibre	- calibre is marked on the barrel.
Shots	- detachable rotary box magazine.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- "BROWNING" and/or "BROWNING PATENTS" and/or "BROWNING ARMS COMPANY" and/or "BROWNING S.A." is marked on the barrel and/or the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "X-BOLT" is marked on the firearm.
- "X-Bolt Varmint Stalker" was introduced in 2009.
- features include: matte blue barrel and receiver/frame; glass bedded; turn bolt action with 60 degree bolt lift; detachable rotary magazine; gold plated, adjustable trigger; top tang safety and bolt unlock button; composite/synthetic, textured gripping surface stock; palm swell; sling swivel studs and inflex technology recoil pad; no iron sights; receiver/frame is drilled and taped for scope mounts.
- overall length is from 1111mm (43 3/4") to 1149 (45 1/4") and average weight is from 3.24kg (7.15lbs) to 3.72kg (8.2lbs).
- also available in camouflage finishes.

Manufacturer

- "MADE IN JAPAN" and "MIROKU" are marked on the side of the barrel.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the side of the receiver/frame.

Calibre

- the calibre is marked on the right side of the barrel.
- rifling characteristics in calibre 243 WIN: 1 turn in 10 inches.
- rifling characteristics in calibre 223 REM and 308 WIN: 1 turn in 12 inches.
- rifling characteristics in calibre 22-250 REM: 1 turn in 14 inches.

Shots

- detachable rotary magazine.

Notes

Make

- "Browning Automatic Rifle" was commonly referred to as the "BAR".
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- may also be known as "FN Model 1950", "FM D", "FN FMD", or "Fusil Mitrailleuse D".
- is an evolutionary improvement of the U.S. B A R Model 1918A2. These improvements included a quick-change barrel and the ability to change breech mechanism parts without completely stripping the gun.
- in calibre 7.62 it is known as "FN TYPE DA1".
- the only information to be found on these machine guns is the manufacturer's name and the property stamping of the country which utilized any of these particular firearms. The Model identification does not appear on the machine gun.

Serial Number

- unknown serial number rationalization.
- it is possible these firearms were serial numbered in a serial number rationalization of the customers choice.

Remarks

- may also be known as "FN Model 1950", "FM D", "FN FMD", or "Fusil Mitrailleuse D".
- this machinegun is an evolutionary improvement of the U.S. B A R Model 1918A2. These improvements included a quick-change barrel and the ability to change breech mechanism parts without completely stripping the gun.
- In calibre 7.62 NATO it is known as "FN TYPE DA1".
- The only information to be found on these machine guns is the manufacturer's name and the property stamping of the country which utilized any of these particular firearms.
- the Model identification does not appear on the machine gun.

- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- may also be known as "FN Model 1950", "FMDA1", "FN FMDA1", or "Fusil Mitrailleuse D". - is an evolutionary improvement of the U.S. B A R Model 1918A2. These improvements included a quick-change barrel and the ability to change breech mechanism parts without completely stripping the gun. - In calibres .30-06, 7.92, 7mm and 7.65 it is known as "FN TYPE D". - The only information to be found on these machine guns is the manufacturer's name and the property stamping of the country which utilized any of these particular firearms. The Model identification may not appear on the machine gun.
Manufacturer	- marked on the laft side of the receiver/frame.
Action	- no longer capable of full automatic fire.
Shots	- detachable box magazine.

Notes

Make

- "BROWNING MACHINE RIFLE" is marked on the top of the receiver/frame.
- "Browning Automatic Rifle" was commonly referred to as the "BAR".
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "U. S. MODEL OF 1918" is marked on the top of the receiver/frame.
- this firearm was developed by John M Browning in 1917, to meet the USA requirement for an automatic rifle for service in World War 1.
- features include:
- capable of selective fire.
- no bipod.
- walnut stock with a checkered fore-end which covered almost all the top of the barrel.
- simple flash hider.
- relatively light (16 pounds) compared to subsequent variations.
- the receiver is machined from a solid steel block.
- the operating handle and fire selector are located on the left side of the receiver.
- the magazine release button is located inside the trigger guard and the gas cylinder tube is located on the underside of the barrel.
- there are three basic variations of this model; Model 1918, Model 1918A1 and Model 1918A2.

Manufacturer

- "MANFD. BY COLT'S P. F. A. M. CO." is marked on the top of the receiver/frame.
- manufacturers appointed to produce models M1918, M1918A2, clearly identified themselves by their own stamping on top of receiver/frame.

Action

- gas operated.

Serial Number

- the serial number is marked on the top of the receiver/frame.
- the serialization sequence is unknown, but six numerical digits have been observed.
- other combinations may exist, especially with the conversion and/or rebuilt specimens on which over stamping of serial numbers and alpha numeric combinations is common.

Barrel

- Browning Automatic Rifle's with a factory barrel length of 457mm, are recognized to be the model 1922, they were manufactured in very limited numbers for the cavalry units of the 1920s.

Shots

- detachable box magazine.

Other Markings

- examples of markings on top of receiver:
- Model 1918:

"BROWNING MACHINE RIFLE"
" -US MODEL OF 1918-"
" - MAN'F'D. BY manufacturer name-"
" serial number "
" - PATENT APPLIED FOR-"

- Model 1918A1:

"BROWNING MACHINE RIFLE"
"-US MODEL OF 1918 A1-"
" - MAN'F'D. BY manufacturer name-"
" serial number "
" - PATENT APPLIED FOR-"

or

" BROWNING AUTOMATIC RIFLE"
" U S CAL . .30 M 1918 A1"
" manufacturer name"
" serial number"
" -PATENT APPLIED FOR-"

- Model 1918A2:

" BROWNING AUTOMATIC RIFLE"
" U S CAL . .30 M 1918 A1"
" manufacturer name"
" serial number"
" -PATENT APPLIED FOR-"

- on top of barrel just at the back of the front sight, manufacturer abreviation, inspector mark, month, and year of manufacture may be found, example;
W = Winchester manufacture.
2-53= manufactured February 1953.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- M1918:
- introduced in 1917, featured as follows:
- capable of selective fire; no bipod; walnut stock with a checkered fore-end which covered almost all the top of the barrel; simple flash hider and relatively light (16 pounds) compared to the subsequent variations.
- 1918A1:
- this variation was taken into service in June 1937, there was no new production of this model, they were all converted from existing model M1918s, total production not known, but not believed to have been very large. The variations from the original model are as follows:
- markings on top of receiver "M1918A1"; capable of selective fire; folding bipod attached to the gas cylinder tube; hinged butt plate to assist keeping the weapon on the shoulder when fired; these new additions increased the weight to about 18.5 pounds.
- 1918A2:
- this is the final mass produced variant of the "BAR" adopted in 1940, the differences from the previous variations are as follows:
- this version is capable of full-automatic firing only; folding bipod, adjustable for elevation was installed on a special flash hider; guide ribs were added to the front of the trigger guard to assist in inserting magazines; these additions raised the weight to almost 20 pounds, and later production were fitted with carrying handle, and black plastic stock.
- manufacturers of models M1918, M1918A1 and M1918A2, identified themselves by stamping their name or trade name on top of receiver.
- manufacturer's include:
- M1918, M1918A1; Winchester, Colt, Marlin-Rockwell.
- M1918A2; (World War II Mfg) International Business Machines (IBM), New England Small Arms.
- M1918A2; (Korean War Mfg) Royal McBee.
- the first production of the model M1918A2 BARs were BARs converted from existing M1918 and M1918A1 models.
- it has been reported that a total of 188,380 M1918 model BARs were converted to M1918A2 configuration in the early1940s.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "BROWNING MACHINE RIFLE" is marked on the top of the receiver/frame. - "Browning Automatic Rifle" was commonly referred to as the "BAR". - "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennesee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- "U. S. MODEL OF 1918" is marked on the top of the receiver/frame. - this firearm was developed by John M Browning in 1917, to meet the USA requirement for an automatic rifle for service in World War 1. - features include: - capable of selective fire. - no bipod. - walnut stock with a checkered fore-end which covered almost all the top of the barrel. - simple flash hider. - relatively light (16 pounds) compared to subsequent variations. - the receiver is machined from a solid steel block. - the operating handle and fire selector are located on the left side of the receiver. - the magazine release button is located inside the trigger guard and the gas cylinder tube is located on the underside of the barrel. - there are three basic variations of this model; Model 1918, Model 1918A1 and Model 1918A2.
Manufacturer	- "MANFD. BY MARLIN ROCKWELL" is marked on the top of the receiver/frame. - manufacturers appointed to produce models M1918, M1918A2, clearly identified themselves by their own stamping on the top of the receiver/frame. - "Marlin Rockwell Corporation" of New Haven, Connecticut, U.S.A. was in business from 1915 to 1921.
Action	- no longer capable of full automatic fire.
Serial Number	- the serial number is marked on the top of the receiver/frame. - the serialization sequence is unknown, but six numerical digits have been observed. - other combinations may exist, especially with the conversion and/or rebuilt specimens on which over stamping of serial numbers and alpha numeric combinations is common.
Barrel	- Browning Automatic Rifle's with a factory barrel length of 457mm, are recognized to be the model 1922, they were manufactured in very limited numbers for the cavalry units of the 1920s.
Shots	- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- examples of markings on top of receiver:
- Model 1918:
"BROWNING MACHINE RIFLE"
" -US MODEL OF 1918-"
" -MAN'F'D. BY manufacturer name-"
"serial number"
"-PATENT APPLIED FOR-"
- Model 1918A1:
"BROWNING MACHINE RIFLE"
"-US MODEL OF 1918 A1-"
"-MAN'F'D. BY manufacturer name-"
"serial number"
"-PATENT APPLIED FOR-"
or
"BROWNING AUTOMATIC RIFLE"
"U S CAL . .30 M 1918 A1"
"manufacturer name"
"serial number"
" -PATENT APPLIED FOR-"
- Model 1918A2:
"BROWNING AUTOMATIC RIFLE"
"U S CAL . .30 M 1918 A1"
"manufacturer name"
"serial number"
"-PATENT APPLIED FOR-"
- on top of barrel just at the back of the front sight, manufacturer abreviation, inspector mark, month, and year of manufacture may be found, example;
W = Winchester manufacture.
2-53= manufactured February 1953.

Remarks

- M1918:
- introduced in 1917, featured as follows:
- capable of selective fire; no bipod; walnut stock with a checkered fore-end which covered almost all the top of the barrel; simple flash hider and relatively light (16 pounds) compared to the subsequent variations.
- 1918A1:
- this variation was taken into service in June 1937, there was no new production of this model, they were all converted from existing model M1918s, total production not known, but not believed to have been very large. The variations from the original model are as follows:
- markings on top of receiver "M1918A1"; capable of selective fire; folding bipod attached to the gas cylinder tube; hinged butt plate to assist keeping the weapon on the shoulder when fired; these new additions increased the weight to about 18.5 pounds.
- 1918A2:
- this is the final mass produced variant of the "BAR" adopted in 1940, the differences from the previous variations are as follows:
- this version is capable of full-automatic firing only; folding bipod, adjustable for elevation was installed on a special flash hider; guide ribs were added to the front of the trigger guard to assist in inserting magazines; these additions raised the weight to almost 20 pounds, and later production were fitted with carrying handle, and black plastic stock.
- manufacturers of models M1918, M1918A1 and M1918A2, identified themselves by stamping their name or trade name on top of receiver.
- manufacturer's include:
- M1918, M1918A1; Winchester, Colt, Marlin-Rockwell.
- M1918A2; (World War II Mfg) International Business Machines (IBM), New England Small Arms.
- M1918A2; (Korean War Mfg) Royal McBee.
- the first production of the model M1918A2 BARs were BARs converted from existing M1918 and M1918A1 models.
- it has been reported that a total of 188,380 M1918 model BARs were converted to M1918A2 configuration in the early1940s.

Notes

Make

- "Browning Automatic Rifle" was commonly referred to as the "BAR".
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this firearm was developed by John M Browning in 1917.
- this variation was taken into service in June 1937, there was no new production of this model, they were all converted from existing model M1918s, total production not known, but not believed to have been very large.
- markings on top of receiver "M1918A1".
- features of this firearm:
- capable of selective fire.
- folding bipod attached to the gas cylinder tube.
- hinged butt plate to assist keeping the weapon on the shoulder when fired.
- these new additions increased the weight to about 18.5 pounds
- the receiver is machined from a solid steel block.
- the operating handle and fire selector are located on the left side of the receiver.
- the magazine release button is located inside the trigger guard, and the gas cylinder tube is located on the underside of the barrel.
- there are three basic variations of this model; Model 1918, Model 1918A1 and Model 1918A2.

Manufacturer

- manufacturers who produced models of the Browning Automatic Rifle identified themselves by stamping their name or trademark on the top of the receiver.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number located on top of receiver/frame, serialization sequence unknown, but six numerical digits observed. Other combinations may exist, especially with the conversion and/or rebuilt specimens on which over stamping of serial numbers and alpha numeric combinations is common.

Barrel

- Browning Automatic Rifle's with a factory barrel length of 457mm, are recognized to be the model 1922, they were manufactured in very limited numbers for the cavalry units of the 1920s.

Shots

- detachable box magazine.

Other Markings

- examples of markings on top of receiver:
- Model 1918:

"BROWNING MACHINE RIFLE"
" -US MODEL OF 1918-"
" - MAN'F'D. BY manufacturer name-"
" serial number "
" - PATENT APPLIED FOR-"

- Model 1918A1:

"BROWNING MACHINE RIFLE"
"-US MODEL OF 1918 A1-"
" - MAN'F'D. BY manufacturer name-"
" serial number "
" - PATENT APPLIED FOR-"

or

" BROWNING AUTOMATIC RIFLE"
" U S CAL . .30 M 1918 A1"
" manufacturer name"
" serial number"
" -PATENT APPLIED FOR-"

- Model 1918A2:

" BROWNING AUTOMATIC RIFLE"
" U S CAL . .30 M 1918 A1"
" manufacturer name"
" serial number"
" -PATENT APPLIED FOR-"

- on top of barrel just at the back of the front sight, manufacturer abreviation, inspector mark, month, and year of manufacture may be found, example;
W = Winchester manufacture.
2-53= manufactured February 1953.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- M1918:
- introduced in 1917, featured as follows:
- capable of selective fire; no bipod; walnut stock with a checkered fore-end which covered almost all the top of the barrel; simple flash hider and relatively light (16 pounds) compared to the subsequent variations.
- 1918A1:
- this variation was taken into service in June 1937, there was no new production of this model, they were all converted from existing model M1918s, total production not known, but not believed to have been very large. The variations from the original model are as follows:
- markings on top of receiver "M1918A1"; capable of selective fire; folding bipod attached to the gas cylinder tube; hinged butt plate to assist keeping the weapon on the shoulder when fired; these new additions increased the weight to about 18.5 pounds.
- 1918A2:
- this is the final mass produced variant of the "BAR" adopted in 1940, the differences from the previous variations are as follows:
- this version is capable of full-automatic firing only; folding bipod, adjustable for elevation was installed on a special flash hider; guide ribs were added to the front of the trigger guard to assist in inserting magazines; these additions raised the weight to almost 20 pounds, and later production were fitted with carrying handle, and black plastic stock.
- manufacturers of models M1918, M1918A1 and M1918A2, identified themselves by stamping their name or trade name on top of receiver.
- manufacturer's include:
- M1918, M1918A1; Winchester, Colt, Marlin-Rockwell.
- M1918A2; (World War II Mfg) International Business Machines (IBM), New England Small Arms.
- M1918A2; (Korean War Mfg) Royal McBee.
- the first production of the model M1918A2 BARs were BARs converted from existing M1918 and M1918A1 models.
- it has been reported that a total of 188,380 M1918 model BARs were converted to M1918A2 configuration in the early1940s.

Notes

Make

- "Browning Automatic Rifle" was commonly referred to as the "BAR".
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Notes

Make

- "Browning Automatic Rifle" was commonly referred to as the "BAR".
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this firearm was developed by John M Browning in 1917.
- this variation was taken into service in June 1937, there was no new production of this model, they were all converted from existing model M1918s, total production not known, but not believed to have been very large.
- markings on top of receiver "M1918A1".
- features of this firearm:
- capable of selective fire.
- folding bipod attached to the gas cylinder tube.
- hinged butt plate to assist keeping the weapon on the shoulder when fired.
- these new additions increased the weight to about 18.5 pounds
- the receiver is machined from a solid steel block.
- the operating handle and fire selector are located on the left side of the receiver.
- the magazine release button is located inside the trigger guard, and the gas cylinder tube is located on the underside of the barrel.
- there are three basic variations of this model; Model 1918, Model 1918A1 and Model 1918A2.

Manufacturer

- manufacturers who produced models of the Browning Automatic Rifle identified themselves by stamping their name or trademark on the top of the receiver.
- "Marlin Rockwell Corporation" of New Haven, Connecticut, U.S.A. was in business from 1915 to 1921.

Action

- gas operated.

Serial Number

- serial number located on top of receiver/frame, serialization sequence unknown, but six numerical digits observed. Other combinations may exist, especially with the conversion and/or rebuilt specimens on which over stamping of serial numbers and alpha numeric combinations is common.

Barrel

- Browning Automatic Rifle's with a factory barrel length of 457mm, are recognized to be the model 1922, they were manufactured in very limited numbers for the cavalry units of the 1920s.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- M1918:
- introduced in 1917, featured as follows:
- capable of selective fire; no bipod; walnut stock with a checkered fore-end which covered almost all the top of the barrel; simple flash hider and relatively light (16 pounds) compared to the subsequent variations.
- 1918A1:
- this variation was taken into service in June 1937, there was no new production of this model, they were all converted from existing model M1918s, total production not known, but not believed to have been very large. The variations from the original model are as follows:
- markings on top of receiver "M1918A1"; capable of selective fire; folding bipod attached to the gas cylinder tube; hinged butt plate to assist keeping the weapon on the shoulder when fired; these new additions increased the weight to about 18.5 pounds.
- 1918A2:
- this is the final mass produced variant of the "BAR" adopted in 1940, the differences from the previous variations are as follows:
- this version is capable of full-automatic firing only; folding bipod, adjustable for elevation was installed on a special flash hider; guide ribs were added to the front of the trigger guard to assist in inserting magazines; these additions raised the weight to almost 20 pounds, and later production were fitted with carrying handle, and black plastic stock.
- manufacturers of models M1918, M1918A1 and M1918A2, identified themselves by stamping their name or trade name on top of receiver.
- manufacturer's include:
- M1918, M1918A1; Winchester, Colt, Marlin-Rockwell.
- M1918A2; (World War II Mfg) International Business Machines (IBM), New England Small Arms.
- M1918A2; (Korean War Mfg) Royal McBee.
- the first production of the model M1918A2 BARs were BARs converted from existing M1918 and M1918A1 models.
- it has been reported that a total of 188,380 M1918 model BARs were converted to M1918A2 configuration in the early1940s.

Notes

Make

- "Browning Automatic Rifle" was commonly referred to as the "BAR".
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this firearm was developed by John M Browning in 1917.
- this variation was taken into service in June 1937, there was no new production of this model, they were all converted from existing model M1918s, total production not known, but not believed to have been very large.
- markings on top of receiver "M1918A1".
- features of this firearm:
- capable of selective fire.
- folding bipod attached to the gas cylinder tube.
- hinged butt plate to assist keeping the weapon on the shoulder when fired.
- these new additions increased the weight to about 18.5 pounds
- the receiver is machined from a solid steel block.
- the operating handle and fire selector are located on the left side of the receiver.
- the magazine release button is located inside the trigger guard, and the gas cylinder tube is located on the underside of the barrel.
- there are three basic variations of this model; Model 1918, Model 1918A1 and Model 1918A2.

Manufacturer

- manufacturers who produced models of the Browning Automatic Rifle identified themselves by stamping their name or trademark on the top of the receiver.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number located on top of receiver/frame, serialization sequence unknown, but six numerical digits observed. Other combinations may exist, especially with the conversion and/or rebuilt specimens on which over stamping of serial numbers and alpha numeric combinations is common.

Barrel

- Browning Automatic Rifle's with a factory barrel length of 457mm, are recognized to be the model 1922, they were manufactured in very limited numbers for the cavalry units of the 1920s.

Shots

- detachable box magazine.

Other Markings

- examples of markings on top of receiver:
- Model 1918:

- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this firearm was developed by John M Browning in 1917.
- this is the final mass produced variant of the "BAR" adopted in 1940.
- features include:
- this version is capable of full-automatic firing only.
- folding bipod, adjustable for elevation was installed on a special flash hider.
- early production were fitted with a butt rest monopod which was quickly dropped from use.
- guide ribs were added to the front of trigger guard to assist in inserting magazines.
- theses additions raised the weight to almost 20 pounds, and later production were fitted with carrying handle, and black plastic stock.
- the receiver is machined from a solid steel block.
- the operating handle and fire selector are located on the left side of the receiver.
- the magazine release button is located inside the trigger guard, and the gas cylinder tube is located on the underside of the barrel.
- there are three basic variations of this model; Model 1918, Model 1918A1 and Model 1918A2.

Manufacturer

- manufacturers who produced models of the Browning Automatic Rifle identified themselves by stamping their name or trademark on the top of the receiver.

Action

- gas operated.

Serial Number

- serial number located on top of receiver, serialisation sequence unknown, but six numerical digits observed. Other combination may exist, especially with the conversion and/or rebuilted specimens on which over stamping of serial numbers and alpha numeric combinations are common.

Barrel

- Browning Automatic Rifle's with a factory barrel length of 457mm, are recognized to be the model 1922, they were manufactured in very limited numbers for the cavalry units of the 1920s.

Shots

- detachable box magazine.

Other Markings

- examples of markings on top of receiver:
- Model 1918:

"BROWNING MACHINE RIFLE"
" -US MODEL OF 1918-"
" - MAN'F'D. BY manufacturer name-"
" serial number "
" - PATENT APPLIED FOR-"

- Model 1918A1:

Notes

Make

- "Browning Automatic Rifle" was commonly referred to as the "BAR".
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- this firearm was developed by John M Browning in 1917.
- this is the final mass produced variant of the "BAR" adopted in 1940.
- features include:
- this version is capable of full-automatic firing only.
- folding bipod, adjustable for elevation was installed on a special flash hider.
- early production were fitted with a butt rest monopod which was quickly dropped from use.
- guide ribs were added to the front of trigger guard to assist in inserting magazines.
- theses additions raised the weight to almost 20 pounds, and later production were fitted with carrying handle, and black plastic stock.
- the receiver is machined from a solid steel block.
- the operating handle and fire selector are located on the left side of the receiver.
- the magazine release button is located inside the trigger guard, and the gas cylinder tube is located on the underside of the barrel.
- there are three basic variations of this model; Model 1918, Model 1918A1 and Model 1918A2.

Manufacturer

- manufacturers who produced models of the Browning Automatic Rifle identified themselves by stamping their name or trademark on the top of the receiver.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number located on top of receiver, serialisation sequence unknown, but six numerical digits observed. Other combination may exist, especially with the conversion and/or rebuilted specimens on which over stamping of serial numbers and alpha numeric combinations are common.

Barrel

- Browning Automatic Rifle's with a factory barrel length of 457mm, are recognized to be the model 1922, they were manufactured in very limited numbers for the cavalry units of the 1920s.

Shots

- detachable box magazine.
