Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- M1918:
- introduced in 1917, featured as follows:
- capable of selective fire; no bipod; walnut stock with a checkered fore-end which covered almost all the top of the barrel; simple flash hider and relatively light (16 pounds) compared to the subsequent variations.
- 1918A1:
- this variation was taken into service in June 1937, there was no new production of this model, they were all converted from existing model M1918s, total production not known, but not believed to have been very large. The variations from the original model are as follows:
- markings on top of receiver "M1918A1"; capable of selective fire; folding bipod attached to the gas cylinder tube; hinged butt plate to assist keeping the weapon on the shoulder when fired; these new additions increased the weight to about 18.5 pounds.
- 1918A2:
- this is the final mass produced variant of the "BAR" adopted in 1940, the differences from the previous variations are as follows:
- this version is capable of full-automatic firing only; folding bipod, adjustable for elevation was installed on a special flash hider; guide ribs were added to the front of the trigger guard to assist in inserting magazines; these additions raised the weight to almost 20 pounds, and later production were fitted with carrying handle, and black plastic stock.
- manufacturers of models M1918, M1918A1 and M1918A2, identified themselves by stamping their name or trade name on top of receiver.
- manufacturer's include:
- M1918, M1918A1; Winchester, Colt, Marlin-Rockwell.
- M1918A2; (World War II Mfg) International Business Machines (IBM), New England Small Arms.
- M1918A2; (Korean War Mfg) Royal McBee.
- the first production of the model M1918A2 BARs were BARs converted from existing M1918 and M1918A1 models.
- it has been reported that a total of 188,380 M1918 model BARs were converted to M1918A2 configuration in the early1940s.

Notes

Make

- "Browning Automatic Rifle" was commonly referred to as the "BAR".
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model is marked on the firearm. - this is a commercially-produced copy of the M1918A2 Browning Automatic Rifle manufactured by NuArmCo during the early 1980s. - NuArmCo produced receivers only, and these receivers may be seen assembled into a variety of configurations, but the most common would be the standard US military version, as replacement parts are available. - features include: standard BAR layout and function; blued finish; open adjustable sights; under-barrel gas piston; wooden forearm; characteristic BAR "humped" receiver; detachable box magazine; operating handle on the left side of the receiver; and wooden butt.
Manufacturer	- the manufacturer or logo thereof is marked on the firearm.
Action	- gas operated.
Serial Number	- numbered on the receiver/frame
Shots	- detachable box magazine.

Model

- this firearm was developed by John M Browning in 1917.
- this is the final mass produced variant of the "BAR" adopted in 1940.
- features include:
- this version is capable of full-automatic firing only.
- folding bipod, adjustable for elevation was installed on a special flash hider.
- early production were fitted with a butt rest monopod which was quickly dropped from use.
- guide ribs were added to the front of trigger guard to assist in inserting magazines.
- theses additions raised the weight to almost 20 pounds, and later production were fitted with carrying handle, and black plastic stock.
- the receiver is machined from a solid steel block.
- the operating handle and fire selector are located on the left side of the receiver.
- the magazine release button is located inside the trigger guard, and the gas cylinder tube is located on the underside of the barrel.
- there are three basic variations of this model; Model 1918, Model 1918A1 and Model 1918A2.

Manufacturer

- manufacturers who produced models of the Browning Automatic Rifle identified themselves by stamping their name or trademark on the top of the receiver.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number located on top of receiver, serialisation sequence unknown, but six numerical digits observed. Other combination may exist, especially with the conversion and/or rebuilted specimens on which over stamping of serial numbers and alpha numeric combinations are common.

Barrel

- Browning Automatic Rifle's with a factory barrel length of 457mm, are recognized to be the model 1922, they were manufactured in very limited numbers for the cavalry units of the 1920s.

Shots

- detachable box magazine.

Other Markings

- examples of markings on top of receiver:
- Model 1918:

"BROWNING MACHINE RIFLE"
" -US MODEL OF 1918-"
" - MAN'F'D. BY manufacturer name-"
" serial number "
" - PATENT APPLIED FOR-"

W = Winchester manufacture.
2-53= manufactured February 1953.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- M1918:
- introduced in 1917, featured as follows:
- capable of selective fire; no bipod; walnut stock with a checkered fore-end which covered almost all the top of the barrel; simple flash hider and relatively light (16 pounds) compared to the subsequent variations.
- 1918A1:
- this variation was taken into service in June 1937, there was no new production of this model, they were all converted from existing model M1918s, total production not known, but not believed to have been very large. The variations from the original model are as follows:
- markings on top of receiver "M1918A1"; capable of selective fire; folding bipod attached to the gas cylinder tube; hinged butt plate to assist keeping the weapon on the shoulder when fired; these new additions increased the weight to about 18.5 pounds.
- 1918A2:
- this is the final mass produced variant of the "BAR" adopted in 1940, the differences from the previous variations are as follows:
- this version is capable of full-automatic firing only; folding bipod, adjustable for elevation was installed on a special flash hider; guide ribs were added to the front of the trigger guard to assist in inserting magazines; these additions raised the weight to almost 20 pounds, and later production were fitted with carrying handle, and black plastic stock.
- manufacturers of models M1918, M1918A1 and M1918A2, identified themselves by stamping their name or trade name on top of receiver.
- manufacturer's include:
- M1918, M1918A1; Winchester, Colt, Marlin-Rockwell.
- M1918A2; (World War II Mfg) International Business Machines (IBM), New England Small Arms.
- M1918A2; (Korean War Mfg) Royal McBee.
- the first production of the model M1918A2 BARs were BARs converted from existing M1918 and M1918A1 models.
- it has been reported that a total of 188,380 M1918 model BARs were converted to M1918A2 configuration in the early1940s.

Notes

Make

- "Browning Automatic Rifle" was commonly referred to as the "BAR".
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this firearm was developed by John M Browning in 1917.
- this is the final mass produced variant of the "BAR" adopted in 1940.
- features include:
- this version is capable of full-automatic firing only.
- folding bipod, adjustable for elevation was installed on a special flash hider.
- early production were fitted with a butt rest monopod which was quickly dropped from use.
- guide ribs were added to the front of trigger guard to assist in inserting magazines.
- theses additions raised the weight to almost 20 pounds, and later production were fitted with carrying handle, and black plastic stock.
- the receiver is machined from a solid steel block.
- the operating handle and fire selector are located on the left side of the receiver.
- the magazine release button is located inside the trigger guard, and the gas cylinder tube is located on the underside of the barrel.
- there are three basic variations of this model; Model 1918, Model 1918A1 and Model 1918A2.

Manufacturer

- manufacturers who produced models of the Browning Automatic Rifle identified themselves by stamping their name or trademark on the top of the receiver.

Action

- gas operated.

Serial Number

- serial number located on top of receiver, serialisation sequence unknown, but six numerical digits observed. Other combination may exist, especially with the conversion and/or rebuilted specimens on which over stamping of serial numbers and alpha numeric combinations are common.

Barrel

- Browning Automatic Rifle's with a factory barrel length of 457mm, are recognized to be the model 1922, they were manufactured in very limited numbers for the cavalry units of the 1920s.

Shots

- detachable box magazine.

Other Markings

- examples of markings on top of receiver:
- Model 1918:

"BROWNING MACHINE RIFLE"
" -US MODEL OF 1918-"
" - MAN'F'D. BY manufacturer name-"
" serial number "
" - PATENT APPLIED FOR-"

- Model 1918A1:

"BROWNING MACHINE RIFLE"
"-US MODEL OF 1918 A1-"
" - MAN'F'D. BY manufacturer name-"
" serial number "
" - PATENT APPLIED FOR-"

or

" BROWNING AUTOMATIC RIFLE"
" U S CAL . .30 M 1918 A1"
" manufacturer name"
" serial number"
" -PATENT APPLIED FOR-"

- Model 1918A2:

" BROWNING AUTOMATIC RIFLE"
" U S CAL . .30 M 1918 A1"
" manufacturer name"
" serial number"
" -PATENT APPLIED FOR-"

- on top of barrel just at the back of the front sight, manufacturer abreviation, inspector mark, month, and year of manufacture may be found, example;
W = Winchester manufacture.
2-53= manufactured February 1953.

Make

- "Browning Automatic Rifle" was commonly referred to as the "BAR".
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model is marked on the firearm. - this is a commercially produced manually-operated copy of the M1918A2 Browning Automatic Rifle manufactured by Group Industries during the early 1980s. - Group Industries produced receivers only, and these receivers may be seen assembled into a variety of configurations, but the most common would be the standard US military version, as replacement parts are available. - features include: standard BAR layout with manual bolt operation; blued finish; open adjustable sights; under-barrel gas piston; wooden forearm; characteristic BAR "humped" receiver; detachable box magazine; operating handle on the left side of the receiver; and wooden butt.
Manufacturer	- the manufacturer or logo thereof is marked on the firearm.
Action	- this is a manually operated straight pull version of the M1918A2 BAR mechanism manufactured on a newly-built receiver into a repeating rifle, where the action must be operated by hand for each shot.
Serial Number	- numbered on the receiver/frame.
Shots	- detachable box magazine.

Make	- "Browning Automatic Rifle" was commonly referred to as the "BAR". - "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennesee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- "Colt Automatic Machine Rifle" / "Model 1919 - Cal. (calibre)" / "Browning Pat. Feb. 4, 1919" / "Colt's Pat. Fire Arms Mfg. Co." / "Hartford, Conn. U.S.A." / "No. (serial number) is marked on the top side of the receiver/frame. - the Models 1919, 1924 and 1925 were manufactured between 1919 and 1935. - after the First World War, Colt and FN were two manufacturers licenced by Browning to produce the Browning Automatic Rifle for commercial, foreign and domestic sales (each with their own allowed sales areas); while FN had the rights to sell this design in most of Europe and Australia, Colt was allowed similar rights in North & South America, Russia, and other parts of Europe. - Colt eventually produced a number of distinct variations of the "Colt Automatic Machine Rifle", including the Colt "Monitor", a shortened lightweight version of the CAMR made specifically for police and armed guard use. - the Model 1919 was the "basic military" version of the CAMR, that resembled a lightweight 1918 BAR without a flash hider; features included: walnut stock and forearm; open adjustable sights; folding integral bipod; pivoting ejection-port cover; and detachable box magazine. - the Model 1924 was an upgraded version of the Model 1919, with the addition of a BAR-D-style pistol-grip; a heavier forearm than on the Model 1919; and a "quick-change" bolt, which did not require the entire rifle to be stripped down for changing. - the Model 1925 was a further upgraded version of the Model 1924, with the BAR-D-style pistol-grip; a heavy ribbed barrel for heat dispersion during sustained fire; and some versions were manufactured with what was considered at the time to be a "quick-change" barrel.
Manufacturer	- the manufacturer's name is marked on the firearm.
Action	- gas-operated.
Serial Number	- the serial number is marked on the top side of the frame/receiver. - observed serial numbers had a letter "C" prefix followed by six sequential numbers, eg. "NO. C-100000".
Calibre	- variations of this firearm were manufactured in a number of calibres for foreign sales, including .30-06 Springfield, 8mm Mauser, 7x57 Mauser, 7.65 Argentine Mauser, 6.5x55 Swedish Mauser, and .303 British.
Shots	- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "Colt Automatic Machine Rifle" / "Model 1924" (calibre) / "Browning Pat. Feb. 4, 1919" / "Colt's Pat. Fire Arms Mfg. Co." / "Hartford, Conn. U.S.A." / "No. (serial number) is marked on the top side of the receiver/frame. - the Models 1919, 1924 and 1925 were manufactured between 1919 and 1935. - after the First World War, Colt and FN were the two manufacturers that were licenced by Browning to produce the Browning Automatic Rifle for commercial, foreign and domestic sales (each with their own allowed sales areas); while FN had the rights to sell this design in most of Europe and Australia, Colt was allowed similar rights in North & South America, Russia, and other parts of Europe. - Colt eventually produced a number of distinct variations of the "Colt Automatic Machine Rifle", including the Colt "Monitor", a shortened lightweight version of the CAMR made specifically for police and armed guard use. - the Model 1919 was the "basic military" version of the CAMR, that resembled a lightweight 1918 BAR without a flash hider; features included: walnut stock and forearm; open adjustable sights; folding integral bipod; pivoting ejection-port cover; and detachable box magazine. - the Model 1924 was an upgraded version of the Model 1919, with the addition of a BAR-D-style pistol-grip; a heavier forearm than on the Model 1919; some versions manufactured with covers for the ejection port and magazine well; and a "quick-change" bolt, which did not require the entire rifle to be stripped down for changing. - the Model 1925 was a further upgraded version of the Model 1924, with the BAR-D-style pistol-grip; covers for the ejection port and magazine well; a heavy ribbed barrel for heat dispersion during sustained fire; and some versions were manufactured with what was considered at the time to be a "quick-change" barrel.
Manufacturer	- the manufacturer's name and address are marked on the firearm.
Action	- gas-operated.
Serial Number	- the serial number is marked on the top side of the frame/receiver. - observed serial numbers had a letter "C" prefix followed by six sequential numbers, eg. "NO. C-100000".
Calibre	- variations of this firearm were manufactured in a number of calibres for foreign sales, including .30-06 Springfield, 8mm Mauser, 7x57 Mauser, 7.65 Argentine Mauser, 6.5x55 Swedish Mauser, and .303 British.
Shots	- detachable box magazine.

- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "Colt Automatic Machine Rifle" / "Model 1925 - Cal. 30" / "Browning Pat. Feb. 4, 1919" / "Colt's Pat. Fire Arms Mfg. Co." / "Hartford, Conn. U.S.A." / "No. (serial number) and "COLT MONITOR" are marked on the top of the receiver/frame.
- Models 1919, 1924 and 1925 were manufactured between 1919 and 1935.
- after the First World War, Colt and FN were the two manufacturers that were licenced by Browning to produce the Browning Automatic Rifle for commercial, foreign and domestic sales (each with their own allowed sales areas); while FN had the rights to sell this design in most of Europe and Australia, Colt was allowed similar rights in North & South America, Russia, and other parts of Europe.
- Colt eventually produced a number of distinct variations of the "Colt Automatic Machine Rifle", including the Colt "Monitor", a shortened lightweight version of the CAMR made specifically for police and armed guard use.
- Model 1919 was the "basic military" version of the CAMR, that resembled a lightweight 1918 BAR without a flash hider; features included: walnut stock and forearm; open adjustable sights; folding integral bipod; pivoting ejection-port cover; and detachable box magazine.
- Model 1924 was an upgraded version of the Model 1919, with the addition of a BAR-D-style pistol-grip; a heavier forearm than on the Model 1919; some versions manufactured with covers for the ejection port and magazine well; and a "quick-change" bolt, which did not require the entire rifle to be stripped down for changing.
- Model 1925 was a further upgraded version of the Model 1924, with the BAR-D-style pistol-grip; covers for the ejection port and magazine well; a heavy ribbed barrel for heat dispersion during sustained fire; and some versions were manufactured with what was considered at the time to be a "quick-change" barrel.
- this is a specific variation of the Browning Automatic Rifle / BAR built by Colt during the 1930s; after World War One, Colt was licenced to manufacture and sell this firearm by Browning. Most of Colt's Monitor production was eventually purchased by the Federal Bureau of Investigation, for use in fighting gangsters and bootleggers, but Colt also produced other versions of the BAR (the "Colt Automatic Machine Rifle") for sale in its licenced area (North & South America, and parts of Europe).
- features include: characteristic BAR profile, with a BAR-D-style pistol-grip; walnut furniture; open adjustable sights; short (457 mm) barrel with a distinctive Cutts compensator, and selector and cocking handle on the left side of the receiver/frame.

Manufacturer

- the manufacturer is marked on the firearm as "Colt".

Action

- gas operated.

Serial Number

- serial number is marked on the receiver/frame.

Shots

- detachable box magazine.

Notes

Make

- "Browning Automatic Rifle" is not marked on the firearm.
- "Browning Automatic Rifle" was commonly referred to as the "BAR".
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model designation may be marked on top of the receiver/frame as "WZ.28". - this is a licenced copy of the Browning Automatic Rifle, manufactured by FN for Poland, with the total contract run of 10,000 units having been delivered between November 1929 and February 1930. These rifles bear Polish national insignia (an eagle with outstretched wings) as well as markings indicating FN manufacture. - features include: BAR-D profile, with separate pistol-grip; pivoting covers for the ejection port and magazine well; blued finish; open adjustable sights; cone-shaped flash hider; skid-equipped bipod mounted on the gas regulator; heavy ribbed barrel for heat dispersion; and a knuckle on top of the barrel above the forearm to allow attachment of a ring-type anti-aircraft sight.
Manufacturer	- the manufacturer, logo, or insignia thereof is marked on the firearm. - typical markings appear in three lines on the top of the receiver/frame as, "FABRIQUE NATIONALE D'ARMES DE GUERRE / HERSTAL BELGIQUE / BROWNINGS PATENT DEPOSE". - a variant marking may be found wherein "FN" is marked on the top of the receiver/frame below the model designation of "WZ.28" and above the serial number. this firearm may also be marked with the Polish crest of an eagle on the top of the frame/receiver.
Action	- gas-operated.
Serial Number	- serial number is marked on the top of the receiver/frame beneath the manufacturer markings. - the serial number range is from 1 to 10,000. - serial numbers may be followed by an "Li" suffix, denoting Belgian manufacture in Liege.
Calibre	- the calibre designation may be marked on the top of the receiver/frame as part of the manufacturer's markings as, "Calibre 7.9".
Shots	- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "Wz37" is marked on the firearm. - "Wz37" is a Polish adaptation of the mechanism of the Polish Wz28 Browning Automatic Rifle into an observer's aircraft machine gun, adopted in 1937 on a number of Polish light bombers. This machine gun was produced from 1937 to 1939, and was used until the end of the 1940s. - this machine gun externally resembles a number of other observer's guns of the 1930s, especially the Vickers GO, but uses the internal toggle mechanism of the BAR. - to produce the high rates of fire that an aircraft machine gun requires, the designer, W. Lewandowski, developed a pan-magazine adaptor that allowed the use of 91-round top-mounted Lewis-style pan magazines, and moved the firing controls to a pistol-grip attachment at the rear of the gun. - features include: blued finish; cone-shaped flash hider; raised sights; under-barrel gas piston; pan magazine; thin rectangular receiver; pintle mount; and a vertical pistol grip at the rear of the gun with a trigger at the top of the grip.
Manufacturer	- the manufacturer or logo thereof is marked on the firearm.
Action	- gas operated.
Serial Number	- numbered on the receiver/frame.
Shots	- detachable pan magazine.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- "BROWNING PATENTS" is marked on the firearm.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "COLT AUTOMATIC GUN" over "BROWNING PATENTS" and "MANUFACTURED BY" over "COLT'S PAT FIRE ARMS MFG. CO." over "HARTFORD CONN." over "U.S.A." and "PATENTED IN THE UNITED STATES" over "JULY 30. AUG. 20. 1895", or
- "COLT AUTOMATIC GUN" over "BROWNING PATENTS." and "MANUFACTURED BY" over "COLT'S PT. F. A. MFG. CO." over "HARTFORD, CT. U.S.A." and "PATENTED IN THE UNITED STATES" over "JULY 30 AUGUST 20. 1895" is marked on the firearm.
- "M1895" was a joint development between Colt and John Browning.
- "M1895" is an air-cooled; gas operated machine gun.
- features include: fixed round heavy barrel; flat sided steel receiver/frame; gas operated with a swing lever, which cams the rear of the bolt into a locking recess in the receiver; fires from the closed bolt position; full automatic with a rate of fire of 400 - 450 rounds per minute; belt feed mechanism used a 250 round fabric belt; mounted on a gun carriage, tripod or fixed mount.
- used by the military in Canada, Russia, United States, Central and South American countries.
- in 1904, the "M1895" which was chambered in "30-40 KRAG" was rechambered for the "30-03 GOV'T". These weapon was then redesignated the "Model of 1902".
- in 1906, the "Model of 1902" was rechambered for the "30-06 SPRG" and redesignated the "Model of 1906", some new machine guns were produced using this pattern.
- in 1914, Colt modified the design of the "M1895" to incorporate a removeable finned barrel and redesignated it the "Model 1914".

Manufacturer

- "COLT AUTOMATIC GUN" over "BROWNING PATENTS" and "MANUFACTURED BY" over "COLT'S PAT FIRE ARMS MFG. CO." over "HARTFORD CONN." over "U.S.A." and "PATENTED IN THE UNITED STATES" over "JULY 30. AUG. 20. 1895", or
- "COLT AUTOMATIC GUN" over "BROWNING PATENTS." and "MANUFACTURED BY" over "COLT'S PT. F. A. MFG. CO." over "HARTFORD, CT. U.S.A." and "PATENTED IN THE UNITED STATES" over "JULY 30 AUGUST 20. 1895" is marked on the firearm.

Action

- gas operated.

Serial Number

- serial number is marked on top of the receiver/frame.

Calibre

- calibre is marked on the top of the receiver/frame.

Shots

- belt fed firearm.

FRT Report

Firearm Reference Number (FRN): 161567
Make: Browning Machine Gun
Model: M1905

Summary

Make:	Browning Machine Gun
Model:	M1905
Manufacturer:	Marlin Firearms
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
161567 - 1	30-06 SPRG	N/A	711	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is not marked on the firearm.
- this is an early gas-operated machine gun designed by John Browning and originally licenced to and built by Colt; when World War One began, and Colt could not meet the demand for these machine guns, Marlin was contracted to produce their own version, and later produced a heavily-modified aircraft version of this machine gun as the "M1917 Marlin Aircraft Machine Gun".

Model

- "U.S.A." over "INSPR.", initials, and a date, over "CAL. 30 MODEL 1905", over a serial number, is marked on the top of the receiver.
- "M1905" is an upgraded version of the Colt model M1895, machine gun, fitted with a detachable finned barrel.
- "M1905" is an air cooled, gas operated, belt fed machine gun.
- "M1905" was a full automatic machine gun with a cycle rate of 400 - 450 rounds per minute;
- features include: detachable heavy barrel with cooling fins; open adjustable sights; flat sided steel receiver/frame; a swinging under barrel gas-operated lever that cams the rear of the bolt into a locking recess in the receiver/frame; fired from a closed bolt position; a strut with a wooden pistol-grip extending from the back plate, a trigger mounted at the bottom rear of the receiver; and a belt fed mechanism that uses 250 round fabric belt.
- "M1905" was usually mounted on a tripod.

Manufacturer

- "MARLIN ARMS CORPORATION" is marked on top of the receiver.
- Marlin was contracted to manufacture these machine guns during World War One, as Colt, the patent holder, was unable to keep up with the demand.

Action

- gas operated.

Serial Number

- serial numbered on the receiver/frame.

Shots

- belt-fed firearm.

Notes

Make

- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "AUTOMATIC MACHINE GUN" or "AUTOMATIC MACHINE GUN MODEL 1914" is marked on the top of the receiver/frame. - Marlin Arms Corporation and Colt's Patent Firearms Company made an agreement authorizing Marlin to manufacture the M1914 Colt Automatic Gun for the Russian Goverment. - Colt granted full rights and authority for the Colt Automatic Gun to Marlin and also agreed to supply drawings, advice and assistance. - "M1914" is an upgraded version of the model M1895. - "M1914" is an air cooled, gas operated, belt fed machine gun. - "M1914" was a full automatic machine gun with a cycle rate of 400 - 450 rounds per minute; - features include: detachable heavy barrel with cooling fins; flat sided steel receiver/frame; swing lever cammed the rear of the bolt into a locking recess in the receiver/frame; fired from a closed bolt position; belt fed mechanism used 250 round fabric belt. - "M1914" was usually mounted on a tripod.
Manufacturer	- "MANUFACTURED BY THE MARLIN ARMS CORPORATIO NEW HAVEN, CONN. U.S.A. PATENTS PENDING." or " MANUFACTURED BY THE" over "MARLIN ARMS CORPORATION" over "BY CONSENT AND ADVICE OF" COLT'S PATENT FIRE ARMS MFG. CO." over "HARTFORD, CONN. U.S.A." is marked on the top of the receiver/frame. - Marlin was contract to produce the M1914 Automatic Gun for the Russian Government.
Action	- no longer capable of full automatic fire.
Shots	- belt fed.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	"BROWNING" or "BROWNING MACHINE GUN" may be marked on the top plate of the receiver/frame. - "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926). - John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A. - Jonathan Browning was born in Tennessee, U.S.A. in 1805. - Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879. - Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831. - Jonathan Browning had four sons: David, John M., Matthew S., and Wesley. - John Moses Browning was born January 23, 1855 in Ogden, Utah. - John Moses Browning assumed the management of Jonathan Browning's business in 1873. - John M. Browning married Rachel Teresa Child on April 10, 1879. - John M. Browning's father, Jonathan Browning passed away on June 21, 1879. - J. M. Browning & Bro./Browning Brothers is formed circa 1879. - Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning. - John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co." - Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization. - John Moses Browning passed away on November 26, 1926. - Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927. - Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004. - Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).
Model	- the model is not marked on the firearm; this is a model designation of "type", referring to the heavy tripod-mounted, rifle-calibre, water-cooled machine gun adopted by the US as the M1917. - this is a licenced copy of the M1917 produced by Armstrong and Whitworth between 1924 and 1928, when they had the manufacturing rights to the Browning machine gun in the United Kingdom; these machine guns were sold to a variety of countries, including Sweden, Holland, Romania, Finland, and Norway, in various calibres. - features include: standard Browning layout and operation; blued finish; large-diameter water jacket; open adjustable "ladder"-style sights; hinged top cover; left-hand feed; pistol-grip and trigger mounted on the back plate; and these machine guns were designed to be fired from a large tripod mount, often with a gunner's seat on the rear leg.
Manufacturer	- the manufacturer or logo thereof is marked on the firearm.
Action	- recoil operated.
Serial Number	- numbered on the receiver/frame.
Calibre	- other calibres available on order.
Shots	- belt-fed.

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "MODEL OF 1917" is marked on the right side plate of the receiver/frame. - manufactured from 1917 to 1919. - total production of 68,389 units. - 43,000 guns were shipped to Europe before the end of World War One in 1918. - manufactured by Westinghouse, Remington, and Colt. - this is a water-cooled, recoil-operated, left hand belt fed machine gun, which was normally mounted on a tripod. - in 1936, Rock Island Arsenal started a re-manufacturing program to improve the "M1917". This model was then re-designated the "M1917A1".
Manufacturer	- "MANFD BY N.E. WESTINGHOUSE CO." is marked on the right side plate of the receiver/frame.
Action	- recoil operated.
Serial Number	- serial number is located on the right side plate of the receiver/frame.
Calibre	- "U.S. CAL. 30" is marked on the right side plate.
Shots	- belt-fed mechanism.
Other Markings	- observed markings on the right side plate: NO.(serial number) U.S. INSP. (inspector's initials) BROWNING MACHINE GUN U.S. CAL. 30 MODEL OF 1917 MANFD. N.E. WESTINGHOUSE CO. PATENTS APPLIED FOR

145427 - 1	8MM MAUSER	N/A	610	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is not marked on the firearm; this is an unlicenced copy of the Browning 1919 machine gun, as originally manufactured by Colt.

Model

- the model is not marked on the firearm.
- this is an unlicensed copy of the Browning water-cooled machine gun, produced from a dealer's sample that was seized and measured by Chinese authorities after a sales representative of Colt was detained in China in 1920; the drawings from these measurements were finalized on the 10th day of the 10th month of the 10th year of the Chinese Republic, leading to this machine gun being known as the Triple Ten Type. These machine guns were manufactured at several Nationalist Chinese Arsenals during the Sino-Japanese War, World War Two, and the Communist Chinese Revolution.
- features include: standard Browning 1917-style layout and operation; large-diameter water jacket; open adjustable simplified sights; left-hand feed; hinged top cover; a swinging safety lever on the right rear side of the receiver; and a pistol-grip and trigger on the back plate.

Manufacturer

- the manufacturer is marked on the firearm with a logo consisting of two intersecting diamonds; this was the logo of the Chinese Nationalist Arsenal 11.

Action

- recoil operated.

Serial Number

- numbered on the receiver/frame.

Shots

- belt-fed.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- manufactured from 1916 to 1918. - "MARLIN AIRCRAFT MACHINE GUN" over "MODEL OF 1917" may be marked on the synchronization system. - the 1918 model has a larger gas piston and a smaller hole in the gas adjuster and three 1/16th inch holes milled in the gas adjuster barrel. A jam preventer consisting of a small steel stamping applied to the ratchet lever preventing double feeds. A hole was drilled through the right side of the lock container in which a key, known as the functioning cam, was inserted. Rotation of this key raised the trigger, thus enabling the gun to fire full automatic testing and firing without the synchronizing grear. - the Model of 1917 fires full-automatic only, the 1918 fires in both full-automatic and single shot. - the main features that identify the model 1917 from the model 1918 are, the 1917 has a smooth barrel and no grip, the 1918 has cooling ribs and a grip.
Manufacturer	- "MARLIN ROCKWELL CORP. NEW HAVEN CONN. USA" is marked on the top of the receiver/frame. - "Marlin Rockwell Corporation" of New Haven, Connecticut, U.S.A. was in business from 1915 to 1921.
Action	- gas operated.
Calibre	- the calibre designation is marked on the top of the receiver/frame as "CAL. 30"
Shots	- uses desintegrating metal link or fabric belts.
Other Markings	- the year of manufacture and the inspecting ordnance officer's initials are usually marked on the receiver/frame.
Remarks	- designed originally for aircraft use, it was also used mounted in tanks. - this was an improved version of the Colt M1895 and Colt 1914 machine guns. - the Marlin Model 1917 machine gun has a smooth barrel and no firing handle and is capable of full automatic fire only. - the Marlin Model 1918 machine gun has a ribbed barrel and has a firing handle and is capable of full automatic and semi automatic fire.

A jam preventer consisting of a small steel stamping applied to the ratchet lever preventing double feeds. A hole was drilled through the right side of the lock container in which a key, known as the functioning cam, was inserted. Rotation of this key raised the trigger, thus enabling the gun to fire full automatic testing and firing without the synchronizing grear. - the Model of 1917 fires full-automatic only, the 1918 fires in both full-automatic and single shot. - the main features that identify the model 1917 from the model 1918 are, the 1917 has a smooth barrel and no grip, the 1918 has cooling ribs and a grip.
Manufacturer	- "MARLIN ROCKWELL CORP. NEW HAVEN CONN. USA" is marked on the top of the receiver/frame. - "Marlin Rockwell Corporation" of New Haven, Connecticut, U.S.A. was in business from 1915 to 1921.
Action	- no longer capable of full automatic fire.
Calibre	- the calibre designation is marked on the top of the receiver/frame as "CAL. 30"
Shots	- uses disintegrating metal link or fabric belts.
Other Markings	- the year of manufacture and the inspecting ordnance officer's initials are usually marked on the receiver/frame.
Remarks	- designed originally for aircraft use, it was also used mounted in tanks. - this was an improved version of the Colt M1895 and Colt 1914 machine guns. - the Marlin Model 1917 machine gun has a smooth barrel and no firing handle and is capable of full automatic fire only. - the Marlin Model 1918 machine gun has a ribbed barrel and has a firing handle and is capable of full automatic and semi automatic fire.

Notes

Make

- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model designation may not be marked on the firearm; this is a version of the Browning water cooled heavy machine gun (in M1917/commercial Colt 1919 configuration) adopted by Sweden in 1929, as a replacement for their m/14 Schwarzlose heavy machine guns; this designation refers to the combination of the m/14 tripod mount, and the m/29 machine gun, as used in Swedish service. - features include: typical Browning M1917A1-style layout and operation; blued finish; complex muzzle booster/packing gland; large-diameter water jacket; open adjustable rifle-style sights; hinged top cover; operating handle on the right side of the receiver; and dual spade grips with a thumb trigger assembly surrounding the buffer tube.
Manufacturer	- the manufacturer or logo thereof is marked on the firearm.
Action	- recoil operated.
Serial Number	- numbered on the receiver/frame.
Shots	- belt-fed.

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- is a water-cooled machine gun, normally fired from a tripod.

Manufacturer

- "MANF'D. BY BUFFALO ARMS CORP." over "BUFFALO, NEW YORK, U.S.A." are usually marked on the right side plate of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- no longer capable of full automatic fire.
Shots	- is a belt fed firearm.
Remarks	- The M1917-A1 Machine Gun is a water-cooled firearm which may be found in flexible configuration for infantry use normally mounted on tripods, and a flexible configuration for mounting on an armoured fighting vehicle. - The M1917-A1 mechanism is designed to have a rate of fire of approximately 450 to 600 shots per minute.

- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- is a water-cooled machine gun, normally fired from a tripod.

Manufacturer

- "MANUFACTURED BY" over "FRIGIDAIRE DIV. GENERAL MOTORS CORP" over "DAYTON" and "OHIO" is usually marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- no longer capable of full automatic fire.
Shots	- is a belt fed firearm.
Remarks	- The M1917-A1 Machine Gun is a water-cooled firearm which may be found in flexible configuration for infantry use normally mounted on tripods, and a flexible configuration for mounting on an armoured fighting vehicle. - The M1917-A1 mechanism is designed to have a rate of fire of approximately 450 to 600 shots per minute.

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- is a water-cooled machine gun, normally fired from a tripod.
- The model designation is marked on the right side of the receiver.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- The manufacturer's name is marked on right side of receiver.
Action	- recoil operated.
Shots	- is a belt fed firearm.
Remarks	- The M1917-A1 Machine Gun is a water-cooled firearm which may be found in flexible configuration for infantry use normally mounted on tripods, and a flexible configuration for mounting on an armoured fighting vehicle. - The M1917-A1 mechanism is designed to have a rate of fire of approximately 450 to 600 shots per minute.

Make:	Browning Machine Gun
Model:	M1917A1
Manufacturer:	Rock Island Arsenal
Level:	Converted Automatics
Type:	Machine Gun
Action:	Converted Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
28549 - 1	30-06 SPRG	N/A	610	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- is a water-cooled machine gun, normally fired from a tripod.

Manufacturer

- The manufacturer's name is marked on right side of receiver.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- no longer capable of full automatic fire.
Shots	- is a belt fed firearm.
Remarks	- The M1917-A1 Machine Gun is a water-cooled firearm which may be found in flexible configuration for infantry use normally mounted on tripods, and a flexible configuration for mounting on an armoured fighting vehicle. - The M1917-A1 mechanism is designed to have a rate of fire of approximately 450 to 600 shots per minute.

- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- is a water-cooled machine gun, normally fired from a tripod.
- The model designation is marked on the right side of the receiver.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "MANUFACTURED BY" over "SAVAGE ARMS CORPORATION" over "UTICA, N.Y., U.S.A." is usually marked on the side of the receiver/frame.
Action	- recoil operated.
Shots	- is a belt fed firearm.
Remarks	- The M1917-A1 Machine Gun is a water-cooled firearm which may be found in flexible configuration for infantry use normally mounted on tripods, and a flexible configuration for mounting on an armoured fighting vehicle. - The M1917-A1 mechanism is designed to have a rate of fire of approximately 450 to 600 shots per minute.

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

FRT Report

Firearm Reference Number (FRN): 95316
Make: Browning Machine Gun
Model: M1918

Summary

Make:	Browning Machine Gun
Model:	M1918
Manufacturer:	Marlin Rockwell Corporation
Level:	Converted Automatics
Type:	Machine Gun
Action:	Converted Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
95316 - 1	30-06 SPRG	N/A	711	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- "BROWNING AIRCRAFT MACHINE GUN" over "U.S. CAL. .30 MODEL OF 1918" may be marked on the receiver/frame.

Model

- the model designation may not be marked on the firearm.
- produced in 1918.
- features include: "L" shaped cocking handle located on the right side of the receiver/frame, gas system is located under the barrel, capable of semi and full automatic fire, and ribs on the barrel.
- the main features that identify the model 1917 from the model 1918 are, the 1917 has a smooth barrel, no grip, and capable of full automatic fire only.
- the 1918 has cooling ribs on the barrel, a grip, and is capable of full automatic and semi automatic fire.

Manufacturer

- "M'F'D. BY MARLIN-ROCKWELL CORP." is marked on the receiver/frame.
- "Marlin Rockwell Corporation" of New Haven, Connecticut, U.S.A. was in business from 1915 to 1921.

Action

- no longer capable of full automatic fire.

Calibre

- the calibre designation is marked on the top of the receiver/frame as "CAL. 30"

Shots

- uses disintegrating metal link or fabric belts.

Other Markings

- the year of manufacture and the inspecting ordnance officer's initials are usually marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- designed originally for aircraft use, it was also used mounted in tanks.
- the model 1918 is an improved version of the Marlin model 1917 which was an improved Colt M1895 and Colt model 1914 machine gun.
- the Marlin Model 1917 machine gun has a smooth barrel and no firing handle.
- the Marlin Model 1918 machine gun has a ribbed barrel and has a firing handle.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "BROWNING AIRCRAFT MACHINE GUN" over "U.S. CAL. 30 MODEL OF 1918" was observed marked on the side plate. - manufactured circa 1918. - total production of approximately 5,000 units manufactured by New England Westinghouse and Marlin-Rockwell. - features include: light weight barrel; skeletonized perforated barrel jacket with muzzle booster; lightened aircraft bolt; no pistol grip; synchronizer/trigger motor located on the left side plate. - the M1918 Aircraft was upgraded to a M1918A1 configuration circa 1920/1921 by the Springfield Armory. - the M1918A1 configuration was re-designated the M1919 Aircraft when produced as a new weapon.
Manufacturer	- "MF'D BY MARLIN-ROCKWELL CORP." was observed marked on the side plate. - "Marlin Rockwell Corporation" of New Haven, Connecticut, U.S.A. was in business from 1915 to 1921.
Action	- recoil operated.
Serial Number	- serial number range falls between 59,701 and 1,000,000. - serial number is marked on the side plate. - serial numbers have been observed consisting of five or six numbers without a letter prefix or suffix.
Calibre	- "U.S. CAL. 30" is marked on the side plate.
Shots	- belt fed firearm.
Remarks	- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows: a) Browning Aircraft Machine Gun Model AN M2: - the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side. b) Browning Machine Gun M1919-A4: - the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute. - the M1919-A4 version feeds belts of ammunition from the left side. c) Browning Machine Gun M1919-A5: - the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute. - the M1919-A5 version feeds belts of ammunition from the left side. d) Browning Machine Gun M1919-A6: - the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute. - the M1919-A6 version feeds belts of ammunition from the left side.

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the top plate of the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model may or may not be marked on the firearm. - this is a version of the Browning machine gun manufactured in the UK by Vickers-Armstrong during the period from 1928 to 1932 (when they had the licencing rights to the Browning design in Europe) for domestic use and international sales, and produced in both fixed and flexible and aircraft and ground-mount versions. - features include: standard Browning layout; blued finish; a slot- or hole-ventilated barrel shroud; hinged top cover; left- or right-hand feed; and, depending on whether the specific gun in question was set up as a fixed or flexible version, can be seen with no sights, open adjustable "ladder"-style sights or aircraft sights; single- or dual spade grips, or solenoid/pneumatic firing controls.
Manufacturer	- the manufacturer or logo thereof is marked on the firearm; Armstrong & Whitworth held the manufacturing rights for Browning machine guns in the United Kingdom between 1924 and 1928.
Action	- recoil operated.
Serial Number	- numbered on the receiver/frame; numbered with an "MG" prefix.
Shots	- belt-fed.

- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "BROWNING AIRCRAFT MACHINE GUN" over "U.S. CAL. 30 MODEL OF 1919" was observed marked on the side plate.
- manufactured between 1923 and 1927.
- production of approximately 925 units.
- features include: heavy barrel profile, perforated barrel jacket.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "MANUFACTURED BY" over "COLT'S PFA MFG. CO. HARTFORD, CONN. U.S.A." was observed marked on the side plate.
Action	- recoil operated.
Serial Number	- serial number rationalization unknown. - serial number is marked on the side plate. - serial numbers have been observed consisting of an "A30" prefix followed by up to three numbers, eg: "A30-933".
Calibre	- "U.S. CAL. 30" is marked on the side plate.
Shots	- belt fed firearm.
Remarks	- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows: a) Browning Aircraft Machine Gun Model AN M2: - the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side. b) Browning Machine Gun M1919-A4: - the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute. - the M1919-A4 version feeds belts of ammunition from the left side. c) Browning Machine Gun M1919-A5: - the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute. - the M1919-A5 version feeds belts of ammunition from the left side. d) Browning Machine Gun M1919-A6: - the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute. - the M1919-A6 version feeds belts of ammunition from the left side.

Notes

Make

- "BROWNING MACHINE GUN" is not marked on the firearm.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "Wz.33" is marked on the firearm. - "Wz.33" is an improved version of the air-cooled Browning Machine Gun model M1919, manufactured by Poland for use in a number of its pre-World War Two aircraft. - this machine gun was designed primarily as a fixed forward-firing machine gun, in both synchronized and non-synchronized mounts. - features include: standard Browning layout; blued finish; cone-shaped flash hider; slot-ventilated barrel shroud; hinged top cover; and a tubular buffer on the back plate. - this machine gun was later replaced by the Wz36, another Browning design.
Manufacturer	- the manufacturer or logo thereof is marked on the firearm.
Action	- recoil operated.
Serial Number	- numbered on the receiver/frame.
Shots	- belt fed.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured in the 1930s and 1940s.
- "M1919A4" is marked on the right side of the receiver/frame.
- M1919A4 is an air-cooled, belt fed, general purpose machine gun.
- M1919A4 may be found in flexible configuration for infantry use and is normally fired from a bipod or tripod.
- M1919A4 may be found in a fixed configuration for mounting in an armoured fighting vehicle.
- M1919A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- M1919A4 feeds belts of ammunition from the left side.
- features include: heavy barrel profile; perforated barrel jacket; rectangular receiver/frame.
- overall length is 964 mm (38"), and average weight is 14 kgs (31 lbs).

Manufacturer

- "BORDER CITIES IND. LTD." is marked on right side of receiver/frame.
- Border Cities Industries Limited produced approximately 40,000 Browning Machine Guns during WW II.

Action

- recoil operated, gas assisted by means of a muzzle booster / barrel bearing.

Serial Number

- serial number rationalization unknown.
- serial number is marked on the right side of the receiver/frame.
- observed serial number consisted of a single number, the letter "W", and four numbers.

Calibre

- Browning Machine Gun M1919A4 was originally manufactured in calibre 30-06 SPRG.
- at times these guns have been converted by the country using them to calibres of their choice.
- some of these calibres include 8MM MAUSER, 7.62MM NATO and 6.5 X 55MM MAUSER.

Shots

- this is a belt-fed firearm.

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:

a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.

b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.

c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.

d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. These firearms were then redesignated "C-1 Machine Gun".

Model

- manufactured in the 1930s and 1940s.
- "M1919A4" is marked on the right side of the receiver/frame.
- M1919A4 is an air-cooled, belt fed, general purpose machine gun.
- M1919A4 may be found in flexible configuration for infantry use and is normally fired from a bipod or tripod.
- M1919A4 may be found in a fixed configuration for mounting in an armoured fighting vehicle.
- M1919A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- M1919A4 feeds belts of ammunition from the left side.
- features include: heavy barrel profile; perforated barrel jacket; rectangular receiver/frame.
- overall length is 964 mm (38"), and average weight is 14 kgs (31 lbs).

Manufacturer

- "MANF'D. BY BUFFALO ARMS CORP." over "BUFFALO, NEW YORK, U.S.A." are usually marked on the right side plate of the receiver/frame.

Action

- recoil operated, gas assisted by means of a muzzle booster / barrel bearing.

Serial Number

- serial number rationalization unknown.
- serial number is marked on right side of receiver/frame.
- observed serial number consisted of six numbers without a letter prefix or suffix.

Calibre

- Browning Machine Gun M1919A4 was originally manufactured in calibre 30-06 SPRG.
- at times these guns have been converted by the country using them to calibres of their choice.
- some of these calibres include 8MM MAUSER, 7.62MM NATO and 6.5 X 55MM MAUSER.

Shots

- is a belt fed firearm.

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:
a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.
b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.
c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.
d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the right side of the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "US. CAL .30" and "M1919A4" was observed marked on the right side plate of the receiver/frame. - M1919A4 is an air-cooled, belt fed, general purpose machine gun. - M1919A4 may be found in flexible configuration for infantry use and is normally fired from a bipod or tripod. - M1919A4 may be found in a fixed configuration for mounting in an armoured fighting vehicle. - M1919A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute. - M1919A4 feeds belts of ammunition from the left side. - features include: heavy barrel profile; perforated barrel jacket; rectangular receiver/frame. - overall length is 964 mm (38"), and average weight is 14 kgs (31 lbs).
Manufacturer	- "MFD INLAND" was observed marked on the right side plate of the receiver/frame. - "MFG INLAND" does not conform to markings used by "Inland Manufacturing Division of General Motors".
Action	- no longer capable of full automatic fire.
Serial Number	- serial number rationalization unknown. - serial number was observed marked on right side of receiver/frame.
Calibre	- Browning Machine Gun M1919A4 was originally manufactured in calibre 30-06 SPRG. - at times these guns have been converted by the country using them to calibres of their choice. - some of these calibres include 8MM MAUSER, 7.62MM NATO and 6.5 X 55MM SWEDISH MAUSER.
Shots	- is a belt fed firearm.
Canadian Law Comments	- Browning Machine Gun receiver/frame of a multi-plate design - the five sided box consisting of top and bottom plates, left and right side plates and the front trunnion block is the receiver/frame for all purposes of the Criminal Code, Section 2 definition of "firearm". - for the administrative purposes of The Firearms Act, when the five sided box receiver/frame is further disassembled, the receiver/frame component plate where the manufacturer information and serial number are found, is used to establish the description for the purpose of firearms registration. - the Criminal Code PART III, Section 84 para (c) definition - prohibited firearm means, "an automatic firearm, whether or not it has been altered to discharge only one projectile with one pressure of the trigger".
Remarks	- The Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows: a) Browning Aircraft Machine Gun Model AN M2: - The AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side. b) Browning Machine Gun M1919-A4: - The M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute. - The M1919-A4 version feeds belts of ammunition from the left side. c) Browning Machine Gun M1919-A5: - The M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute. - The M1919-A5 version feeds belts of ammunition from the left side. d) Browning Machine Gun M1919-A6: - The M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute. - The M1919-A6 version feeds belts of ammunition from the left side. - NOTE: this firearm may be found converted to 7.62MM NATO Calibre by various manufacturers and was also manufactured in 6.5X55MM SWEDISH MAUSER and 8MM MAUSER Calibre.

Notes

Make

- "BROWNING MACHINE GUN" was observed marked on the right side plate of the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured in the 1930s and 1940s.
- "M1919A4" is marked on the right side of the receiver/frame.
- M1919A4 is an air-cooled, belt fed, general purpose machine gun.
- M1919A4 may be found in flexible configuration for infantry use and is normally fired from a bipod or tripod.
- M1919A4 may be found in a fixed configuration for mounting in an armoured fighting vehicle.
- M1919A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- M1919A4 feeds belts of ammunition from the left side.
- features include: heavy barrel profile; perforated barrel jacket; rectangular receiver/frame.
- overall length is 964 mm (38"), and average weight is 14 kgs (31 lbs).

Manufacturer

- The manufacturer's name is marked on the right side of the receiver/frame.

Action

- recoil operated, gas assisted by means of a muzzle booster / barrel bearing.

Serial Number

- serial number rationalization unknown.
- specimen observed had a serial number of six digits with no prefix or suffix.

Calibre

- The Browning Machine Gun M1919A4 was originally manufactured in calibre 30-06 SPRG.
- At times these guns have been converted by the country using them to calibres of their choice.
- Some of these calibres include 8MM MAUSER, 7.62MM NATO and 6.5 X 55MM MAUSER.

Shots

- this is a belt-fed firearm.

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:

a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.

b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.

c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.

d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. These firearms were then redesignated "C-1 Machine Gun".

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured in the 1930s and 1940s.
- "M1919A4" is marked on the right side of the receiver/frame.
- M1919A4 is an air-cooled, belt fed, general purpose machine gun.
- M1919A4 may be found in flexible configuration for infantry use and is normally fired from a bipod or tripod.
- M1919A4 may be found in a fixed configuration for mounting in an armoured fighting vehicle.
- M1919A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- M1919A4 feeds belts of ammunition from the left side.
- features include: heavy barrel profile; perforated barrel jacket; rectangular receiver/frame.
- overall length is 964 mm (38"), and average weight is 14 kgs (31 lbs).

Manufacturer

- the manufacturer's name is marked on the right side of the receiver/frame.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number rationalization unknown.
- specimen observed had a serial number of six digits with no prefix or suffix.

Calibre

- The Browning Machine Gun M1919A4 was originally manufactured in calibre 30-06 SPRG.
- At times these guns have been converted by the country using them to calibres of their choice.
- Some of these calibres include 8MM MAUSER, 7.62MM NATO and 6.5 X 55MM MAUSER.

Shots

- this is a belt-fed firearm.

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:

a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.

b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.

c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.

d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. These firearms were then redesignated "C-1 Machine Gun".

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured in the 1930s and 1940s.
- "M1919A4" is marked on the right side of the receiver/frame.
- M1919A4 is an air-cooled, belt fed, general purpose machine gun.
- M1919A4 may be found in flexible configuration for infantry use and is normally fired from a bipod or tripod.
- M1919A4 may be found in a fixed configuration for mounting in an armoured fighting vehicle.
- M1919A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- M1919A4 feeds belts of ammunition from the left side.
- features include: heavy barrel profile; perforated barrel jacket; rectangular receiver/frame.
- overall length is 964 mm (38"), and average weight is 14 kgs (31 lbs).

Manufacturer

- manufactures name is marked on right side of receiver.

Action

- recoil operated, gas assisted by means of a muzzle booster / barrel bearing.

Serial Number

- serial number rationalization unknown.
- marked on right side.
- representative serial numbers have been observed consisting of six digits without suffix or prefix.

Calibre

- The Browning Machine Gun M1919A4 was originally manufactured in calibre 30-06 SPRG.
- At times these guns have been converted by the country using them to calibres of their choice.
- Some of these calibres include 8MM MAUSER, 7.62MM NATO and 6.5 X 55MM MAUSER.

Shots

- this is a belt-fed firearm.

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:

a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.

b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.

c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.

d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "MACHINE GUN 7.62MM C1" may be marked on the right side of the receiver/frame.
- the original model designation "M1919A4" may have been cancelled or ground-off the right side of the receiver/frame.
- adopted into Canadian miltary service as the "C1" machine gun.
- this machine gun was modified from "M1919A4" to "C1" by converting the calibre from 30-06 SPRG to 7.62MM NATO and by altering the feed mechanism and the barrel-muzzle bearing.

Manufacturer

- the model designation, manufacturer's name and the serial number are located on the right-hand receiver side plate.
- the manufacturer "Canadian Arsenals Limited" converted / modified the "M1919A4" to "C1"; the manufacturer's name may not be marked on the firearm.
- the original manufacturer's name may still be marked on the receiver/frame.

Action

- no longer capable of full automatic fire.

Serial Number

- the model designation, manufacturer's name and the serial number are located on the right-hand receiver side plate.

Calibre

- the calibre is marked on the right side of the receiver/frame.

Shots

- belt fed firearm.

Remarks

- This machinegun is a firearm that formerly was named BROWNING MACHINE GUN M1919A4, CALIBRE 30-06.
- In the early 1970's these machineguns were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre.
- This modification was not a success and they were all rebuilt to C-5 and later C-5A1 configuration. As time passed these unreliable machineguns were replaced in Canadian service by the C-6 Machinegun (FN MAG 58) in 1984-85.
- All BROWNING MACHINE GUN, M1919, CALIBRE 30-06, models in service with the Canadian Forces circa 1968 - 70 were converted by Canadian Arsenals to C-1 and later C-5 and C-5A1 configuration. These firearms were originally manufactured by many different contractors; however, as they were re-manufactured by Canadian Arsenals, Canadian Arsenals Limited (CAL) qualifies as the MANUFACTURER.
- Browning Machine Gun Models that were converted to C-1 configuration include:

a) Browning Machine Gun M1919-A4
b) Browning Machine Gun M1919-A5
c) Browning Machine Gun M1919-A6

NOTE:

1. All Canadian 7.62 MM, Browning C-1 Machine Gun Models in service with the Canadian Forces were subsequently modified to C-5 configuration and later C-5A1 configuration. A small quantity of these firearms will have survived in each of the three configurations in museums, displays and such places as the Enfield "Pattern Room".
2. These firearms were not all marked as to their configuration (C-1, C-5 or C-5A1). They may be marked Canadian Arsenals Limited (CAL) and the original manufacturer's name may not be cancelled.

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- is an air-cooled machine gun, normally fired from a tripod.
- this machinegun was taken into Canadian service as the Machinegun C-1 after conversion at Canadian Arsenals from 30-06 SPG to 7.62MM NATO Calibre and subsequently converted again to C-5 model configuration.
- the model name may have been cancelled or ground-off and the designation C-5 may have been added.
- susequently these firearms were modified once again to C-5A1 configuration and may or may not have been so-marked.

Manufacturer

- the model designation, manufacturer's name and the serial number are located on the right-hand receiver side plate.

Action

- no longer capable of full automatic fire.

Serial Number

- the model designation, manufacturer's name and the serial number are located on the right-hand receiver side plate.
- original manufacturer serial numbers remain unchanged.
- numerical up to 7 digits.

Shots

- is a belt fed firearm.

Remarks

- this machinegun is a firearm that formerly was named BROWNING MACHINE GUN M1919A4, CALIBRE 30-06.
- in the early 1970's these machineguns were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre.
- this modification was not a success and they were all rebuilt to C-5 and later C-5A1 configuration. As time passed these unreliable machineguns were replaced in Canadian service by the C-6 Machinegun (FN MAG 58) in 1984-85.
- all BROWNING MACHINE GUN, M1919, CALIBRE 30-06, models in service with the Canadian Forces circa 1968 - 70 were converted by Canadian Arsenals to C-1 and later C-5 and C-5A1 configuration. These firearms were originally manufactured by many different contractors; however, as they were re-manufactured by Canadian Arsenals, Canadian Arsenals Limited (CAL) qualifies as the MANUFACTURER.
- Browning Machine Gun Models that were converted to C-1 configuration include:

a) Browning Machine Gun M1919-A4
b) Browning Machine Gun M1919-A5
c) Browning Machine Gun M1919-A6

NOTE:

1. All Canadian 7.62 MM, Browning C-1 Machine Gun Models in service with the Canadian Forces were subsequently modified to C-5 configuration and later C-5A1 configuration. A small quantity of these firearms will have survived in each of the three configurations in museums, displays and such places as the Enfield "Pattern Room".
2. These firearms were not all marked as to their configuration (C-1, C-5 or C-5A1). They may be marked Canadian Arsenals Limited (CAL) and the original manufacturer's name may not be cancelled.

- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "US. CAL .30" and "M1919A4" and the original manufacturer's name may be marked on the right side plate of the receiver/frame. - M1919A4 model was supplied to the Israeli Government in large quantities prior to 1977. - M1919A4 model was converted in Israel to fire the 7.62MM NATO cartridge for used by the Israeli Defense Forces (IDF). - M1919A4 is an air-cooled, belt fed, general purpose machine gun. - M1919A4 may be found in flexible configuration for infantry use and is normally fired from a bipod or tripod. - M1919A4 may be found in a fixed configuration for mounting in an armoured fighting vehicle. - M1919A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute. - M1919A4 feeds belts of ammunition from the left side. - features include: heavy barrel profile; perforated barrel jacket; rectangular receiver/frame. - overall length is 964 mm (38"), and average weight is 14 kgs (31 lbs).
Manufacturer	- original manufacturer's marking may still be observed on the receiver/frame.
Action	- recoil operated, gas assisted by means of a muzzle booster / barrel bearing.
Serial Number	- serial number rationalization unknown. - serial number is usually marked on right side of receiver/frame.
Calibre	- "7.62" is usually marked on the left side plate. - Browning Machine Gun M1919A4 was originally manufactured in calibre 30-06 SPRG. - Browning Machine Gun M1919A4 have been converted by the country using them to calibres of their choice. - some of these calibres include 8MM MAUSER, 7.62MM NATO and 6.5 X 55MM SWEDISH MAUSER.
Shots	- is a belt fed firearm.
Canadian Law Comments	- Browning Machine Gun receiver/frame of a multi-plate design - the five sided box consisting of top and bottom plates, left and right side plates and the front trunnion block is the receiver/frame for all purposes of the Criminal Code, Section 2 definition of "firearm". - for the administrative purposes of The Firearms Act, when the five sided box receiver/frame is further disassembled, the receiver/frame component plate where the manufacturer information and serial number are found, is used to establish the description for the purpose of firearms registration. - the Criminal Code PART III, Section 84 para (c) definition - prohibited firearm means, "an automatic firearm, whether or not it has been altered to discharge only one projectile with one pressure of the trigger".
Remarks	- The Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows: a) Browning Aircraft Machine Gun Model AN M2: - The AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side. b) Browning Machine Gun M1919-A4: - The M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute. - The M1919-A4 version feeds belts of ammunition from the left side. c) Browning Machine Gun M1919-A5: - The M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute. - The M1919-A5 version feeds belts of ammunition from the left side. d) Browning Machine Gun M1919-A6: - The M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute. - The M1919-A6 version feeds belts of ammunition from the left side. - NOTE: this firearm may be found converted to 7.62MM NATO Calibre by various manufacturers and was also manufactured in 6.5X55MM SWEDISH MAUSER and 8MM MAUSER Calibre.

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model designation is marked on the right side of the receiver/frame. - this variant of the Browning Machine Gun is an air-cooled firearm which was designed for flexible configuration use. - this L3A2 Machine Gun is essentially the Browning Machine Gun M1919-A4 re-manufactured by the United Kingdom (UK) Royal Ordnance Factories for use within the British Armed Forces and redesignated Gun, Machine, .30 inch L3A2, Flexible: - the L3A2 is available in calibre 30-06 SPRG. - rate of fire 550 to 650 shots per minute. - the L3A2 Machine Gun feeds belts of ammunition from the left side. - "Gun M/G .30in. L3A2" is marked on the right rear side of the receiver/frame. - may also be marked with NATO stock number: 1005-99-964-5039.
Manufacturer	- "BORDER CITIES IND. LTD." may be marked on the right side of the receiver/frame. - Border Cities Industries was a Canadian manufacturer located in the Hamilton area that produced approximately 40,000 Browning Machine Guns during WW II.
Action	- recoil operated, gas assisted.
Serial Number	- serial number may be marked on the right side of the receiver/frame.
Shots	- this model is a belt fed firearm.
Other Markings	- "Gun M/G .30in. L3A2" is marked on the right rear side of the receiver/frame. - may also be marked with NATO stock number: 1005-99-964-5039.
Remarks	- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows: a) Browning Aircraft Machine Gun Model AN M2: - the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side. b) Browning Machine Gun M1919-A4: - the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute. - the M1919-A4 version feeds belts of ammunition from the left side. c) Browning Machine Gun M1919-A5: - the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute. - the M1919-A5 version feeds belts of ammunition from the left side. d) Browning Machine Gun M1919-A6: - the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute. - the M1919-A6 version feeds belts of ammunition from the left side. - circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. These firearms were then redesignated "C-1 Machine Gun".

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- this variant of the Browning Machine Gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. - this L3A3 Machine Gun is essentially the Browning Machine Gun M1919-A5 re-manufactured by the United Kingdom (UK) Royal Ordnance Factories for use within the British Armed Forces and redesignated "Gun, Machine, .30 inch L3A3, Fixed": - the L3A3 is available in calibre 30-06 SPRG. - rate of fire 550 to 650 shots per minute. - the L3A3 Machine Gun feeds belts of ammunition from the left side. - "Gun M/G .30in. L3A3" is marked on the right rear side of the receiver/frame. - may also be marked with NATO stock number: 1005-99-960-5555.
Manufacturer	- marked on the right rear side of the receiver/frame: "F.T.R." is the abbreviation for Factory Thorough Repair". "E71" = "E" is the abbreviation for Royal Small Arms Factory. Enfield (RSAF(E)) and "71" is for the year, 1971.
Action	- no longer capable of full automatic fire.
Serial Number	- serial number is located on the right rear side of the receiver/frame.
Calibre	- calibre is marked on the right rear side of the receiver/frame: eg. ".30in."
Shots	- belt fed mechanism.
Other Markings	- markings on the right rear side of the receiver/frame in three lines: "GUN. M/G .30IN. L3A3." "F.T.R. E71. (Serial Number)." "1005-99-960-5555."

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- model designation is marked on the right side of the receiver.
- this machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- features include a heavy barrel profile and a ventilated barrel jacket.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- The manufacturer's name is marked on right side of receiver.
- Border Cities Industries was a Canadian manufacturer located in the Hamilton area that produced approximately 40,000 Browning Machine Guns during WW II.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number rationalization unknown.

Shots

- belt-fed firearm.

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:
a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.
b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.
c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.
d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. These firearms were then redesignated "C-1 Machine Gun".

Model

- model designation is marked on the right side of the receiver.
- two types of this model were issued, a fixed version that was normally fired from a tripod, and a flexible gun that was mounted on a vehicle.
- features include a heavy barrel profile and a perforated barrel jacket.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- recoil operated.

Serial Number

- serial number rationalization unknown.
- marked on right side.
- representative serial numbers have been observed consisting of six digits without suffix or prefix.

Calibre

- The Browning Machine Gun M1919A4 was originally manufactured in calibre 30-06 SPRG.
- At times these guns have been converted by the country using them to calibres of their choice.
- Some of these calibres include 8MM MAUSER, 7.62MM NATO and 6.5 X 55MM MAUSER.

Shots

- this machine gun is a belt fed firearm.

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:

a) Browning Aircraft Machine Gun Model AN M2:

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- model designation is marked on the right side of the receiver.
- this machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- features include a heavy barrel profile and a perforated barrel jacket.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer - The manufacturer's name is marked on right side of receiver.

Action - recoil operated, gas assisted by means of a muzzle booster / barrel bearing.

Serial Number - serial number rationalization unknown.

Shots - belt-fed firearm.

Remarks - the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:
a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.
b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.
c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.
d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. These firearms were then redesignated "C-1 Machine Gun".

Notes

Make

- "BROWNING MACHINE GUN" is marked on right side of receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- the M1919-A6 is available in calibre 30-06 SPRG calibre.
- this machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock.
- rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "MFD. BY ROCK ISLAND ARSENAL" is marked on right side of receiver/frame.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number rationalization unknown.
- serial number is marked on the right side of the firearm.
- representative serial numbers have been observed consisting of six digits without suffix or prefix.

Calibre

- "U.S.CAL,.30" is marked on the right side of the receiver/frame.
- the Browning Machine Gun M1919A6 was originally manufactured in calibre 30-06 SPRG.
- at times these guns have been converted by the country using them to calibres of their choice.
- some of these calibres include 8MM MAUSER, 7.62MM NATO and 6.5 X 55MM MAUSER.

Shots

- this machine gun is a belt fed firearm.

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:
a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.
b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.
c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.
d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.

The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.
c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.
d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. These firearms were then redesignated "C-1 Machine Gun".

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the top plate of the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model may or may not be marked on the firearm. - these firearms were made to order in a variety of configurations, including fixed or flexible aircraft mountings, infantry ground mounts, and vehicle mountings, and in air- and water-cooled versions, all based on the Browning M1921 50 BMG machine gun; may be seen with a variety of markings, depending on the end customer. - features include: standard Browning layout and operation; blued finish; left-hand feed; and may be seen in fixed or flexible mounts, for ground or air use, with appropriate solenoid or spade grip and thumb trigger firing controls.
Manufacturer	- the manufacturer or logo thereof is marked on the firearm.
Action	- recoil operated.
Serial Number	- numbered on the receiver/frame.
Shots	- belt fed.

Model

- this is an air cooled, "heavy" machine gun. It is cooled during the sustained fire role by air circulation only.

Action

- "short" recoil operated, air cooled.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.

Shots

- this is a belt fed firearm.

Remarks

- developed by John M. Browning towards the end of World War I.
- The Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.
- During World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations.
- The Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999.
- In Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- this is a water cooled, "heavy" machine gun. It is cooled during the sustained fire role by a heavy water jacket filled with water and has a condenser to convert steam back into water.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- "short" recoil operated, water cooled.
Serial Number	- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.
Shots	- this is a belt fed firearm.
Remarks	- developed by John M. Browning towards the end of World War I. - The Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod. - During World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations. - The Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999. - In Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model designation may not be marked on the firearm; this is a version of the Browning air-cooled aircraft machine gun (in M1919 configuration) adopted by Sweden in 1922 for use in their aircraft, primarily as fixed armament; limited numbers of these guns were converted to flexible configuration at the beginning of World War Two. - features include: typical Browning M1919-style layout and operation; blued finish; ventilated barrel shroud; hinged top cover; operating handle on the right side of the receiver; and solenoid or pneumatic firing controls. - the versions of these machine guns converted to flexible observer's guns were usually fitted with ring-type aircraft sights; an under-receiver pistol-grip and trigger, and a tubular strut buttstock.
Manufacturer	- the manufacturer or logo thereof is marked on the firearm.
Action	- recoil operated.
Serial Number	- numbered on the receiver/frame.
Shots	- belt fed.

- "M1924" is a water cooled, "heavy" machine gun.
- "M1924" is cooled during the sustained fire role by a heavy water jacket filled with water and has a condenser to convert steam back into water.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "COLT'S P.T. F.A. MFG. CO." over "HARTFORD, CONN., U.S.A." over "NO." and the "serial number" is marked on the receiver/frame.
Action	- "short" recoil operated.
Serial Number	- "COLT AIRCRAFT MACHINE GUN" over "MODEL 1924" and "CAL. 50" over "BROWNING PATENT FEB. 4, 1919" over "COLT'S P.T. F.A. MFG. CO." over "HARTFORD, CONN., U.S.A." over "NO." and the "serial number" is marked on the receiver/frame.
Calibre	- "CAL. 50" is marked on the receiver/frame.
Shots	- belt fed.
Remarks	- developed by John M. Browning towards the end of World War I. - The Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod. - During World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations. - The Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999. - In Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

Notes

Make

- "BROWNING PATENT FEB. 4, 1919" is marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- "COLT AUTOMATIC MACHINE GUN" over "MODEL 1924" and "CAL. 50" over "BROWNING PATENT FEB. 4, 1919" over "COLT'S P.T. F.A. MFG. CO." over "HARTFORD, CONN., U.S.A." over "NO." and the "serial number" is marked on the receiver/frame.
- "M1924" is a water cooled, "heavy" machine gun.
- "M1924" is cooled during the sustained fire role by a heavy water jacket filled with water and has a condenser to convert steam back into water.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model may or may not be marked on the firearm. - this is a domestically-produced copy of the Colt-manufactured Model 37 (the Colt commercial designation for the water-cooled M1917) machine gun, manufactured by Argentina after World War Two; Argentina had previously (from 1929-33) purchased these machine guns directly from Colt, and adopted them as the "M1928", and decided to manufacture replacements for these machine guns themselves, rather than continue to purchase them from foreign sources. - features include: standard Browning M1917 layout and operation; blued or parkerized finish; heavy water jacket; open "ladder"-type adjustable sights; hinged top-cover; pistol-grip and trigger on the back-plate. - these machine guns were usually mounted on a folding tripod.
Manufacturer	- the manufacturer or logo thereof is marked on the firearm.
Action	- recoil-operated.
Serial Number	- numbered on the receiver/frame.
Shots	- belt-fed.

- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model is not marked on the firearm, however the year of manufacture is. - this is a version of the Browning machine gun manufactured in Belgium by FN for domestic use and international sales, and produced in both fixed and flexible versions. - features include: standard Browning layout; blued finish; a slot-ventilated barrel shroud; hinged top cover; left- or right-hand feed; and, depending on whether the specific gun in question was set up as a fixed or flexible version, can be seen with no sights or aircraft sights; single- or dual spade grips, or solenoid/pneumatic firing controls. - these machine guns were quickly supplanted by the M1932 FN, with a lightened bolt and a faster rate of fire.
Manufacturer	- the manufacturer is marked on the firearm.
Action	- recoil operated.
Serial Number	- numbered on the receiver/frame.
Shots	- belt fed.

Notes

Make

- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- the model designation may not be marked on the firearm; this is a version of the Browning air-cooled machine gun (in M1919 configuration) adopted by Sweden in 1939, for use in armoured vehicles.
- features include: typical Browning M1919 layout and operation; blued finish; ventilated barrel shroud; open adjustable rifle-style sights; a curved feed chute to allow belt-feed in the cramped quarters of armoured vehicle mountings; hinged top cover; operating handle on the right side of the receiver; and a single spade/vertical pistol-grip control on the back plate.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the manufacturer or logo thereof is marked on the firearm.
Action	- recoil operated.
Serial Number	- numbered on the receiver/frame.
Shots	- belt fed.

Model

- the model designation is marked on the right side of the receiver/frame as "M2".
- adopted into U.S. service in the late 1920's as the final development of the M1917 design. It remained the standard aircraft machine gun until its replacement by the 50 BMG calibre series of Browning Machine Guns.
- this machine gun is an air-cooled firearm normally mounted on aircraft fixed or flexible mountings.
- features include: the ability to be assembled to feed belts of ammunition from either left or right sides, where all other Browning Machine Gun models are fed from the left side only; lightened interior parts and variations in the mechanism give this model the capability of a higher cyclic rate of fire (1000-1350 rounds per minute) than other models of the Browning Machine Gun; grey phosphate metal finish; ventilated barrel jacket, external extended cocking mechanism; solenoid or spade grip firing mechanism and ventilated barrel jacket.

Manufacturer

- "MANUFACTURED BY" over "A C SPARK PLUG DIVISION-GENERAL MOTORS" over "FLINT, MICHIGAN - U.S.A." is usually marked on the receiver/frame.

Action

- recoil operated, gas assisted by means of a muzzle booster / barrel bearing.

Serial Number

- unknown serial number rationalization, however observed serial numbers have consisted of numerals without prefix or suffix.
- the serial number is marked on the right side of the receiver/frame as "U.S. NO. (serial number)".

Calibre

- the calibre designation is marked on the right side of the receiver/frame as "CAL. .30"

Shots

- this is a belt fed firearm.

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:
a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.
b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.
c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.
d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. These firearms were then redesignated "C-1 Machine Gun".

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation is marked on the right side of the receiver/frame as "M2".
- adopted into U.S. service in the late 1920's as the final development of the M1917 design. It remained the standard aircraft machine gun until its replacement by the 50 BMG calibre series of Browning Machine Guns.
- this machine gun is an air-cooled firearm normally mounted on aircraft fixed or flexible mountings.
- features include: the ability to be assembled to feed belts of ammunition from either left or right sides, where all other Browning Machine Gun models are fed from the left side only; lightened interior parts and variations in the mechanism give this model the capability of a higher cyclic rate of fire (1000-1350 rounds per minute) than other models of the Browning Machine Gun; grey phosphate metal finish; ventilated barrel jacket, external extended cocking mechanism; solenoid or spade grip firing mechanism and ventilated barrel jacket.

Manufacturer

- "MANUFACTURED BY" over "A C SPARK PLUG DIVISION-GENERAL MOTORS" over "FLINT, MICHIGAN - U.S.A." is usually marked on the receiver/frame.

Action

- no longer capable of full automatic fire.

Serial Number

- unknown serial number rationalization, however observed serial numbers have consisted of six numerals without prefix or suffix.
- the serial number is marked on the right side of the receiver/frame as "U.S. NO. (serial number)".

Calibre

- the calibre designation is marked on the right side of the receiver/frame as "CAL. .30"

Shots

- this is a belt fed firearm.

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:
a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.
b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.
c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.
d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. Model

- the model designation is marked on the right side of the receiver/frame as "M2".
- adopted into U.S. service in the late 1920's as the final development of the M1917 design. It remained the standard aircraft machine gun until its replacement by the 50 BMG calibre series of Browning Machine Guns.
- this machine gun is an air-cooled firearm normally mounted on aircraft fixed or flexible mountings.
- features include: the ability to be assembled to feed belts of ammunition from either left or right sides, where all other Browning Machine Gun models are fed from the left side only; lightened interior parts and variations in the mechanism give this model the capability of a higher cyclic rate of fire (1000-1350 rounds per minute) than other models of the Browning Machine Gun; grey phosphate metal finish; ventilated barrel jacket, external extended cocking mechanism; solenoid or spade grip firing mechanism and ventilated barrel jacket.

Manufacturer

- the manufacturer's name is marked on the right front of the receiver/frame directly under the belt feedway.
- Border Cities Industries was a Canadian manufacturer located in the Windsor, Ontario area that produced approximately 40,000 Browning Machine Guns during WW II.

Action

- no longer capable of full automatic fire.

Serial Number

- unknown serial number rationalization, however observed serial numbers have consisted of numerals without prefix or suffix.
- the serial number is marked on the right side of the receiver/frame.

Calibre

- the calibre designation is marked on the right side of the receiver/frame as "CAL. .30"

Shots

- this is a belt fed firearm.

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:

- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation is marked on the right side of the receiver/frame as "M2".
- adopted into U.S. service in the late 1920's as the final development of the M1917 design. It remained the standard aircraft machine gun until its replacement by the 50 BMG calibre series of Browning Machine Guns.
- this machine gun is an air-cooled firearm normally mounted on aircraft fixed or flexible mountings.
- features include: the ability to be assembled to feed belts of ammunition from either left or right sides, where all other Browning Machine Gun models are fed from the left side only; lightened interior parts and variations in the mechanism give this model the capability of a higher cyclic rate of fire (1000-1350 rounds per minute) than other models of the Browning Machine Gun; grey phosphate metal finish; ventilated barrel jacket, external extended cocking mechanism; solenoid or spade grip firing mechanism and ventilated barrel jacket.

Manufacturer

- the manufacturer's name is marked on the right front of the receiver/frame directly under the belt feedway.
- Border Cities Industries was a Canadian manufacturer located in the Windsor, Ontario area that produced approximately 40,000 Browning Machine Guns during WW II.

Action

- recoil operated, gas assisted by means of a muzzle booster/barrel bearing.

Serial Number

- unknown serial number rationalization, however observed serial numbers have consisted of six numerals without prefix or suffix.
- the serial number is marked on the right side of the receiver/frame.

Calibre

- the calibre designation is marked on the right side of the receiver/frame as "CAL. .30"

Shots

- this is a belt fed firearm.

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:

a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.

b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.

c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.

d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. These firearms were then redesignated "C-1 Machine Gun".

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation is marked on the right side of the receiver/frame as "M2".
- adopted into U.S. service in the late 1920's as the final development of the M1917 design. It remained the standard aircraft machine gun until its replacement by the 50 BMG calibre series of Browning Machine Guns.
- this machine gun is an air-cooled firearm normally mounted on aircraft fixed or flexible mountings.
- features include: the ability to be assembled to feed belts of ammunition from either left or right sides, where all other Browning Machine Gun models are fed from the left side only; lightened interior parts and variations in the mechanism give this model the capability of a higher cyclic rate of fire (1000-1350 rounds per minute) than other models of the Browning Machine Gun; grey phosphate metal finish; ventilated barrel jacket, external extended cocking mechanism; solenoid or spade grip firing mechanism and ventilated barrel jacket.

Manufacturer

- "MANUFACTURED BY" over "BROWN - LIPE - CHAPIN DIV. GENERAL MOTORS" over "SYRACUSE, NEW YORK U.S.A." is marked on the receiver/frame.

Action

- recoil operated, gas assisted by means of a muzzle booster/barrel bearing.

Serial Number

- unknown serial number rationalization, however observed serial numbers have consisted of five numerals without prefix or suffix.
- the serial number is marked on the right side of the receiver/frame as "U.S. NO. (serial number)".

Calibre

- "CAL. .30" is marked on the right side of the receiver/frame.

Shots

- this is a belt fed firearm.

Other Markings

- as manufactured by Brown-Lipe-Chapin, complete typical markings on the right side of the receiver/frame are as follows: "U.S. NO. (Serial Number) G'V'T. INSP'T. / BROWNING MACHINE GUN / CAL. .30 M2 / MANUFACTURED BY / BROWN-LIPE-CHAPIN DIV GENERAL MOTORS. / SYRACUSE, NEW YORK, U.S.A."

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:
a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.
b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.
c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.
d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. These firearms were then redesignated "C-1 Machine Gun".

FRT Report

Firearm Reference Number (FRN): 28515
Make: Browning Machine Gun
Model: M2 Aircraft

Summary

Make:	Browning Machine Gun
Model:	M2 Aircraft
Manufacturer:	Buffalo Arms
Level:	Converted Automatics
Type:	Machine Gun
Action:	Converted Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
28515 - 1	30-06 SPRG	N/A	608	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- "BROWNING MACHINE GUN" is marked on the right side of the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation is marked on the right side of the receiver/frame as "M2".
- adopted into U.S. service in the late 1920's as the final development of the M1917 design. It remained the standard aircraft machine gun until its replacement by the 50 BMG calibre series of Browning Machine Guns.
- this machine gun is an air-cooled firearm normally mounted on aircraft fixed or flexible mountings.
- features include: the ability to be assembled to feed belts of ammunition from either left or right sides, where all other Browning Machine Gun models are fed from the left side only; lightened interior parts and variations in the mechanism give this model the capability of a higher cyclic rate of fire (1000-1350 rounds per minute) than other models of the Browning Machine Gun; grey phosphate metal finish; ventilated barrel jacket, external extended cocking mechanism; solenoid or spade grip firing mechanism and ventilated barrel jacket.

Manufacturer

- "MANUFACTURED BY" over "BUFFALO ARMS CORP." over "BUFFALO, NEW YORK, U.S.A." are usually marked on the receiver/frame.

Action

- no longer capable of full automatic fire.

Serial Number

- unknown serial number rationalization, however observed serial numbers have consisted of six numerals without prefix or suffix.
- the serial number is marked on the right side of the receiver/frame as "U.S. NO. (serial number)".

Calibre

- the calibre designation is marked on the right side of the receiver/frame as "CAL. .30"

Shots

- this is a belt fed firearm.

Other Markings

- as manufactured by Buffalo Arms, complete typical markings on the right side of the receiver/frame are as follows: "U.S. NO. (Serial Number) GVT. INSPT. / BROWNING MACHINE GUN / CAL. .30 M2 / MANUFACTURED BY / BUFFALO ARMS CORP. / BUFFALO, NEW YORK, U.S.A."

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:
a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.
b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.
c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.
d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. These firearms were then redesignated "C-1 Machine Gun".

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation is marked on the right side of the receiver/frame as "M2".
- adopted into U.S. service in the late 1920's as the final development of the M1917 design. It remained the standard aircraft machine gun until its replacement by the 50 BMG calibre series of Browning Machine Guns.
- this machine gun is an air-cooled firearm normally mounted on aircraft fixed or flexible mountings.
- features include: the ability to be assembled to feed belts of ammunition from either left or right sides, where all other Browning Machine Gun models are fed from the left side only; lightened interior parts and variations in the mechanism give this model the capability of a higher cyclic rate of fire (1000-1350 rounds per minute) than other models of the Browning Machine Gun; grey phosphate metal finish; ventilated barrel jacket, external extended cocking mechanism; solenoid or spade grip firing mechanism and ventilated barrel jacket.

Manufacturer

- "MANUFACTURED BY" over "FRIGIDAIRE DIV. GENERAL MOTORS CORP" over "DAYTON" and "OHIO" is usually marked on the receiver/frame.

Action

- no longer capable of full automatic fire.

Serial Number

- unknown serial number rationalization, however observed serial numbers have consisted of numerals without prefix or suffix.
- the serial number is marked on the right side of the receiver/frame as "U.S. NO. (serial number)".

Calibre

- the calibre designation is marked on the right side of the receiver/frame as "CAL. .30"

Shots

- this is a belt fed firearm.

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:
a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.
b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.
c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.
d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. These firearms were then redesignated "C-1 Machine Gun".

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation is marked on the right side of the receiver/frame as "M2".
- adopted into U.S. service in the late 1920's as the final development of the M1917 design. It remained the standard aircraft machine gun until its replacement by the 50 BMG calibre series of Browning Machine Guns.
- this machine gun is an air-cooled firearm normally mounted on aircraft fixed or flexible mountings.
- features include: the ability to be assembled to feed belts of ammunition from either left or right sides, where all other Browning Machine Gun models are fed from the left side only; lightened interior parts and variations in the mechanism give this model the capability of a higher cyclic rate of fire (1000-1350 rounds per minute) than other models of the Browning Machine Gun; grey phosphate metal finish; ventilated barrel jacket, external extended cocking mechanism; solenoid or spade grip firing mechanism and ventilated barrel jacket.

Manufacturer

- "MANUFACTURED BY" over "THE HIGH STANDARD MFG. CO." over "NEW HAVEN, CONN. U.S.A." is usually marked on the right side of the receiver/frame.

Action

- recoil operated, gas assisted by means of a muzzle booster/barrel bearing.

Serial Number

- unknown serial number rationalization, however observed serial numbers have consisted of seven numerals without prefix or suffix.
- the serial number is marked on the right side of the receiver/frame as "U.S. NO. (serial number)".

Calibre

- the calibre designation is marked on the right side of the receiver/frame as "CAL. .30"

Shots

- this is a belt fed firearm.

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:
a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.
b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.
c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.
d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. These firearms were then redesignated "C-1 Machine Gun".

c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.
d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. These firearms were then redesignated "C-1 Machine Gun".

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation is marked on the right side of the receiver/frame as "M2".
- adopted into U.S. service in the late 1920's as the final development of the M1917 design. It remained the standard aircraft machine gun until its replacement by the 50 BMG calibre series of Browning Machine Guns.
- this machine gun is an air-cooled firearm normally mounted on aircraft fixed or flexible mountings.
- features include: the ability to be assembled to feed belts of ammunition from either left or right sides, where all other Browning Machine Gun models are fed from the left side only; lightened interior parts and variations in the mechanism give this model the capability of a higher cyclic rate of fire (1000-1350 rounds per minute) than other models of the Browning Machine Gun; grey phosphate metal finish; ventilated barrel jacket, external extended cocking mechanism; solenoid or spade grip firing mechanism and ventilated barrel jacket.

Manufacturer

- the manufacturer's name is marked on the right side of the receiver/frame directly under the belt feedway

Action

- no longer capable of full automatic fire.

Serial Number

- unknown serial number rationalization, however observed serial numbers have consisted of numerals without prefix or suffix.
- the serial number is marked on the right side of the receiver/frame as "U.S. NO. (serial number)".

Calibre

- the calibre designation is marked on the right side of the receiver/frame as "CAL. .30"

Shots

- this is a belt fed firearm.

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:
a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.
b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.
c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.
d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. These firearms were then redesignated "C-1 Machine Gun".

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:
a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.
b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.
c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.
d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. These firearms were then redesignated "C-1 Machine Gun".

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation is marked on the right side of the receiver/frame as "M2".
- adopted into U.S. service in the late 1920's as the final development of the M1917 design. It remained the standard aircraft machine gun until its replacement by the 50 BMG calibre series of Browning Machine Guns.
- this machine gun is an air-cooled firearm normally mounted on aircraft fixed or flexible mountings.
- features include: the ability to be assembled to feed belts of ammunition from either left or right sides, where all other Browning Machine Gun models are fed from the left side only; lightened interior parts and variations in the mechanism give this model the capability of a higher cyclic rate of fire (1000-1350 rounds per minute) than other models of the Browning Machine Gun; grey phosphate metal finish; ventilated barrel jacket, external extended cocking mechanism; solenoid or spade grip firing mechanism and ventilated barrel jacket.

Manufacturer

- the manufacturer's name is marked on the right front of the receiver/frame directly under the belt feedway.

Action

- no longer capable of full automatic fire.

Serial Number

- unknown serial number rationalization, however observed serial numbers have consisted of numerals without prefix or suffix.
- the serial number is marked on the right side of the receiver/frame as "U.S. NO. (serial number)".

Calibre

- the calibre designation is marked on the right side of the receiver/frame as "CAL. .30"

Shots

- this is a belt fed firearm.

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:
a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.
b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.
c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.
d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. These firearms were then redesignated "C-1 Machine Gun".

Manufacturer

- the manufacturer's name is marked on the right front of the receiver/frame directly under the belt feedway.

Action

- recoil operated, gas assisted by means of a muzzle booster/barrel bearing.

Serial Number

- unknown serial number rationalization, however observed serial numbers have consisted of numerals without prefix or suffix.
- the serial number is marked on the right side of the receiver/frame as "U.S. NO. (serial number)".

Calibre

- the calibre designation is marked on the right side of the receiver/frame as "CAL. .30"

Shots

- this is a belt fed firearm.

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:
a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.
b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.
c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.
d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. These firearms were then redesignated "C-1 Machine Gun".

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation is marked on the right side of the receiver/frame as "M2".
- adopted into U.S. service in the late 1920's as the final development of the M1917 design. It remained the standard aircraft machine gun until its replacement by the 50 BMG calibre series of Browning Machine Guns.
- this machine gun is an air-cooled firearm normally mounted on aircraft fixed or flexible mountings.
- features include: the ability to be assembled to feed belts of ammunition from either left or right sides, where all other Browning Machine Gun models are fed from the left side only; lightened interior parts and variations in the mechanism give this model the capability of a higher cyclic rate of fire (1000-1350 rounds per minute) than other models of the Browning Machine Gun; grey phosphate metal finish; ventilated barrel jacket, external extended cocking mechanism; solenoid or spade grip firing mechanism and ventilated barrel jacket.

Manufacturer

- the manufacturer's name is marked on the right front of the receiver/frame directly under the belt feedway.

Action

- no longer capable of full automatic fire.

Serial Number

- unknown serial number rationalization, however observed serial numbers have consisted of numerals without prefix or suffix.
- the serial number is marked on the right side of the receiver/frame as "U.S. NO. (serial number)".

Calibre

- the calibre designation is marked on the right side of the receiver/frame as "CAL. .30"

Shots

- this is a belt fed firearm.

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:
a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.
b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.
c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.
d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. Model

- the model designation is marked on the right side of the receiver/frame as "M2".
- adopted into U.S. service in the late 1920's as the final development of the M1917 design. It remained the standard aircraft machine gun until its replacement by the 50 BMG calibre series of Browning Machine Guns.
- this machine gun is an air-cooled firearm normally mounted on aircraft fixed or flexible mountings.
- features include: the ability to be assembled to feed belts of ammunition from either left or right sides, where all other Browning Machine Gun models are fed from the left side only; lightened interior parts and variations in the mechanism give this model the capability of a higher cyclic rate of fire (1000-1350 rounds per minute) than other models of the Browning Machine Gun; grey phosphate metal finish; ventilated barrel jacket, external extended cocking mechanism; solenoid or spade grip firing mechanism and ventilated barrel jacket.

Manufacturer

- "MANUFACTURED BY" over "SAVAGE ARMS CORPORATION" over "UTICA, N.Y., U.S.A." is usually marked on the side of the receiver/frame.

Action

- no longer capable of full automatic fire.

Serial Number

- unknown serial number rationalization, however observed serial numbers have consisted of numerals without prefix or suffix.
- the serial number is marked on the right side of the receiver/frame as "U.S. NO. (serial number)".

Calibre

- the calibre designation is marked on the right side of the receiver/frame as "CAL. .30"

Shots

- this is a belt fed firearm.

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:

a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.

b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.

c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.

d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. These firearms were then redesignated "C-1 Machine Gun".

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation is marked on the right side of the receiver/frame as "M2".
- adopted into U.S. service in the late 1920's as the final development of the M1917 design. It remained the standard aircraft machine gun until its replacement by the 50 BMG calibre series of Browning Machine Guns.
- this machine gun is an air-cooled firearm normally mounted on aircraft fixed or flexible mountings.
- features include: the ability to be assembled to feed belts of ammunition from either left or right sides, where all other Browning Machine Gun models are fed from the left side only; lightened interior parts and variations in the mechanism give this model the capability of a higher cyclic rate of fire (1000-1350 rounds per minute) than other models of the Browning Machine Gun; grey phosphate metal finish; ventilated barrel jacket, external extended cocking mechanism; solenoid or spade grip firing mechanism and ventilated barrel jacket.

Manufacturer

- "MANUFACTURED BY" over "SAVAGE ARMS CORPORATION" over "UTICA, N.Y., U.S.A." is usually marked on the side of the receiver/frame.

Action

- recoil operated, gas assisted by means of a muzzle booster/barrel bearing.

Serial Number

- unknown serial number rationalization, however observed serial numbers have consisted of numerals without prefix or suffix.
- the serial number is marked on the right side of the receiver/frame as "U.S. NO. (serial number)".

Calibre

- the calibre designation is marked on the right side of the receiver/frame as "CAL. .30"

Shots

- this is a belt fed firearm.

Remarks

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this is an air-cooled aircraft machine gun.
- may also be known as "AN-M2".
- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.
- This "Heavy Machinegun" may be configured as a "Fixed" gun for aircraft use with an electric charger and a firing solonoid or a "Flexible" gun with a spade hand grip and manual charger for use in a manned "gun station" on an aircraft.

Manufacturer

- "MANUFACTURED BY" over "A C SPARK PLUG DIVISION-GENERAL MOTORS" over "FLINT, MICHIGAN - U.S.A." is usually marked on the receiver/frame.

Action

- "short" recoil operated.

Shots

- this is a belt fed firearm.

Remarks

- developed by John M. Browning towards the end of World War I.
- The Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.
- During World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations.
- The Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999.
- In Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this is an air-cooled aircraft machine gun.
- may also be known as "AN-M2".
- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.
- this "Heavy Machinegun" may be configured as a "Fixed" gun for aircraft use with an electric charger and a firing solonoid or a "Flexible" gun with a spade hand grip and manual charger for use in a manned "gun station" on an aircraft.

Manufacturer

- "MANUFACTURED BY" over "BROWN - LIPE - CHAPIN DIV. GENERAL MOTORS" over "SYRACUSE, NEW YORK U.S.A." is marked on the receiver/frame.

Action

- "short" recoil operated.

Shots

- this is a belt fed firearm.

Remarks

- developed by John M. Browning towards the end of World War I.
- the Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.
- during World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations.
- the Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999.
- in Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

Model: M2 Aircraft Basic

Summary

Make:	Browning Machine Gun
Model:	M2 Aircraft Basic
Manufacturer:	Canadian Arsenals Limited (CAL)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	CANADA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
50654 - 1	50 BMG	N/A	914	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this is an air-cooled aircraft machine gun.
- may also be known as "AN-M2".
- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.
- this "Heavy Machinegun" may be configured as a "Fixed" gun for aircraft use with an electric charger and a firing solonoid or a "Flexible" gun with a spade hand grip and manual charger for use in a manned "gun station" on an aircraft.

Action

- "short" recoil operated.

Serial Number

- the serial number rationalization from observed specimens appears to be: - one digit followed by one alphabet letter followed by four digits.

Shots

- this is a belt fed firearm.

Remarks

- developed by John M. Browning towards the end of World War I.
- The Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.
- During World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations.
- the Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999.
- in Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this is an air-cooled aircraft machine gun.
- may also be known as "AN-M2".
- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.
- this "Heavy Machinegun" may be configured as a "Fixed" gun for aircraft use with an electric charger and a firing solonoid or a "Flexible" gun with a spade hand grip and manual charger for use in a manned "gun station" on an aircraft.

Manufacturer

- "MANUFACTURED BY" over "FRIGIDAIRE DIV. GENERAL MOTORS CORP" over "DAYTON" and "OHIO" is usually marked on the receiver/frame.

Action

- no longer capable of full automatic fire.

Shots

- this is a belt fed firearm.

Remarks

- developed by John M. Browning towards the end of World War I.
- The Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.
- During World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations.
- The Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999.
- In Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

Shots

- this is a belt fed firearm.

Remarks

- developed by John M. Browning towards the end of World War I.
- The Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.
- During World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations.
- The Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999.
- In Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- this is an air-cooled aircraft machine gun. - may also be known as "AN-M2". - the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way. - this "Heavy Machinegun" may be configured as a "Fixed" gun for aircraft use with an electric charger and a firing solonoid or a "Flexible" gun with a spade hand grip and manual charger for use in a manned "gun station" on an aircraft.
Manufacturer	- "MANUFACTURED BY" over "KELSEY HAYES WHEEL CO." over PLYMOUTH MICHIGAN" or "MANUFACTURED BY" over "KELSEY-HAYES WHEEL" over "DIV. OF GENERAL MOTORS" is usually marked on the right side of the receiver/frame.
Action	- no longer capable of full automatic fire.
Serial Number	- unknown serial number rationalization.
Shots	- this is a belt fed firearm.
Remarks	- developed by John M. Browning towards the end of World War I. - The Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod. - During World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations. - The Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. - Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- this is an air-cooled aircraft machine gun. - may also be known as "AN-M2". - the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way. - this "Heavy Machinegun" may be configured as a "Fixed" gun for aircraft use with an electric charger and a firing solonoid or a "Flexible" gun with a spade hand grip and manual charger for use in a manned "gun station" on an aircraft.
Manufacturer	- marked on right side of receiver.
Action	- "short" recoil operated.
Serial Number	- marked on right side of receiver.
Shots	- this is a belt fed firearm.
Remarks	- developed by John M. Browning towards the end of World War I. - the Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod. - during World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations. - the Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999. - in Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- this is an air-cooled aircraft machine gun. - may also be known as "AN-M2". - the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way. - this "Heavy Machinegun" may be configured as a "Fixed" gun for aircraft use with an electric charger and a firing solonoid or a "Flexible" gun with a spade hand grip and manual charger for use in a manned "gun station" on an aircraft.
Manufacturer	- "MANUFACTURED BY" over "SAVAGE ARMS CORPORATION" over "UTICA, N.Y., U.S.A." is usually marked on the side of the receiver/frame.
Action	- "short" recoil operated.
Serial Number	- marked on right side of receiver.
Shots	- this is a belt fed firearm.
Remarks	- developed by John M. Browning towards the end of World War I. - the Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod. - during World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations. - the Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999. - in Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way. - this "Heavy Machinegun" may be configured as a "Fixed" gun for armoured fighting vehicle use with a manual charger and an electric firing solenoid, a "Fixed Turret Type" gun with a manual charger and an electric firing solenoid or a "Flexible" gun with a spade hand grip having the capability for both semi-automatic and full-automatic fire. - the "Flexible" gun is used interchangeably for "Ground Mount" use as an infantry weapon or vehicle anti-aircraft use. - these machineguns may be found mounted in pairs or in quadruple mounts for dedicated anti-aircraft use.
Manufacturer	- Airtronic (Airtronic Services, Incorporated / Airtronic USA, Incorporated) is located in Elk Grove Village, Illinois, U.S.A. - Airtronic is an engineering design and manufacturing company. - Airtronic was founded in 1990 and incorporated in 1993.
Action	- recoil operated.
Serial Number	- numbered on the receiver/frame.
Shots	- belt fed firearm.

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.
- this "Heavy Machinegun" may be configured as a "Fixed" gun for armoured fighting vehicle use with a manual charger and an electric firing solonoid, a "Fixed Turret Type" gun with a manual charger and an electric firing solonoid or a "Flexible" gun with a spade hand grip having the capability for both semi-automatic and full-automatic fire.
- the "Flexible" gun is used interchangeably for "Ground Mount" use as an infantry weapon or vehicle anti-aircraft use.
- these machineguns may be found mounted in pairs or in quadruple mounts for dedicated anti-aircraft use.

Manufacturer

- "MANUFACTURED BY" over "BROWN - LIPE - CHAPIN DIV. GENERAL MOTORS" over "SYRACUSE, NEW YORK U.S.A." is marked on the receiver/frame.

Action

- no longer capable of full automatic fire.

Shots

- belt fed.

Remarks

- developed by John M. Browning towards the end of World War I.
- the Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.
- during World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations.
- the Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999.
- in Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

Notes

Make

- "BROWNING MACHINE GUN CAL 50 M2" is marked on the right side plate.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.
- this "Heavy Machinegun" may be configured as a "Fixed" gun for armoured fighting vehicle use with a manual charger and an electric firing solonoid, a "Fixed Turret Type" gun with a manual charger and an electric firing solonoid or a "Flexible" gun with a spade hand grip having the capability for both semi-automatic and full-automatic fire.
- the "Flexible" gun is used interchangeably for "Ground Mount" use as an infantry weapon or vehicle anti-aircraft use.
- these machineguns may be found mounted in pairs or in quadruple mounts for dedicated anti-aircraft use.

Manufacturer

- "MANUFACTURED BY" over "BUFFALO ARMS CORP." over "BUFFALO, NEW YORK, U.S.A." are usually marked on the receiver/frame.

Action

- no longer capable of full automatic fire.

Shots

- belt fed.

Remarks

- developed by John M. Browning towards the end of World War I.
- the Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.
- during World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations.
- the Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999.
- in Canada, this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

Notes

Make

- "BROWNING MACHINE GUN CAL 50 M2" is marked on the right side plate.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.
- this "Heavy Machinegun" may be configured as a "Fixed" gun for armoured fighting vehicle use with a manual charger and an electric firing solonoid, a "Fixed Turret Type" gun with a manual charger and an electric firing solonoid or a "Flexible" gun with a spade hand grip having the capability for both semi-automatic and full-automatic fire.
- the "Flexible" gun is used interchangeably for "Ground Mount" use as an infantry weapon or vehicle anti-aircraft use.
- these machineguns may be found mounted in pairs or in quadruple mounts for dedicated anti-aircraft use.

Manufacturer

- "MANUFACTURED BY" over "BUFFALO ARMS CORP." over "BUFFALO, NEW YORK, U.S.A." are usually marked on the receiver/frame.

Action

- "short" recoil operated.

Shots

- belt fed.

Remarks

- developed by John M. Browning towards the end of World War I.
- the Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.
- during World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations.
- the Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999.
- in Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.
- This "Heavy Machinegun" may be configured as a "Fixed" gun for armoured fighting vehicle use with a manual charger and an electric firing solonoid, a "Fixed Turret Type" gun with a manual charger and an electric firing solonoid or a "Flexible" gun with a spade hand grip having the capability for both semi-automatic and full-automatic fire.
- The "Flexible" gun is used interchangeably for "Ground Mount" use as an infantry weapon or vehicle anti-aircraft use.
- These machineguns may be found mounted in pairs or in quadruple mounts for dedicated anti-aircraft use.

Manufacturer

- found marked on the right-hand side-plate.

Action

- recoil operated.

Shots

- belt fed firearm.

Remarks

- developed by John M. Browning towards the end of World War I.
- The Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.
- During World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations.
- The Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999.
- In Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

Model

- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.
- this "Heavy Machinegun" may be configured as a "Fixed" gun for armoured fighting vehicle use with a manual charger and an electric firing solonoid, a "Fixed Turret Type" gun with a manual charger and an electric firing solonoid or a "Flexible" gun with a spade hand grip having the capability for both semi-automatic and full-automatic fire.
- the "Flexible" gun is used interchangeably for "Ground Mount" use as an infantry weapon or vehicle anti-aircraft use.
- these machineguns may be found mounted in pairs or in quadruple mounts for dedicated anti-aircraft use.

Action

- "short" recoil operated.

Shots

- belt fed.

Remarks

- developed by John M. Browning towards the end of World War I.
- the Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.
- during World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations.
- the Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999.
- in Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.
- this "Heavy Machinegun" may be configured as a "Fixed" gun for armoured fighting vehicle use with a manual charger and an electric firing solonoid, a "Fixed Turret Type" gun with a manual charger and an electric firing solonoid or a "Flexible" gun with a spade hand grip having the capability for both semi-automatic and full-automatic fire.
- the "Flexible" gun is used interchangeably for "Ground Mount" use as an infantry weapon or vehicle anti-aircraft use.
- these machineguns may be found mounted in pairs or in quadruple mounts for dedicated anti-aircraft use.

Manufacturer

- "MANUFACTURED BY" over "FRIGIDAIRE DIV. GENERAL MOTORS CORP" over "DAYTON" and "OHIO" is usually marked on the receiver/frame.

Action

- "short" recoil operated.

Serial Number

- observed serial number consisted of 6 digits without suffix or prefix, hand stamped as follows:
US NO 176876

Shots

- belt fed.

Remarks

- developed by John M. Browning towards the end of World War I.
- the Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.

Model

- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.
- this "Heavy Machinegun" may be configured as a "Fixed" gun for armoured fighting vehicle use with a manual charger and an electric firing solonoid, a "Fixed Turret Type" gun with a manual charger and an electric firing solonoid or a "Flexible" gun with a spade hand grip having the capability for both semi-automatic and full-automatic fire.
- the "Flexible" gun is used interchangeably for "Ground Mount" use as an infantry weapon or vehicle anti-aircraft use.
- these machineguns may be found mounted in pairs or in quadruple mounts for dedicated anti-aircraft use.

Manufacturer

- "MANUFACTURED BY" over "THE HIGH STANDARD MFG. CO." over "NEW HAVEN, CONN. U.S.A." is usually marked on the right side of the receiver/frame.

Action

- no longer capable of full automatic fire.

Serial Number

- the two serial numbers reported consisted of seven digits without suffix or prefix.

Shots

- this is a belt fed firearm.

Remarks

- developed by John M. Browning towards the end of World War I.
- the Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.
- during World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations.
- the Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999.
- in Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.
- this "Heavy Machinegun" may be configured as a "Fixed" gun for armoured fighting vehicle use with a manual charger and an electric firing solonoid, a "Fixed Turret Type" gun with a manual charger and an electric firing solonoid or a "Flexible" gun with a spade hand grip having the capability for both semi-automatic and full-automatic fire.
- the "Flexible" gun is used interchangeably for "Ground Mount" use as an infantry weapon or vehicle anti-aircraft use.
- these machineguns may be found mounted in pairs or in quadruple mounts for dedicated anti-aircraft use.

Manufacturer

- "MANUFACTURED BY" over "THE HIGH STANDARD MFG. CO." over "NEW HAVEN, CONN. U.S.A." is usually marked on the right side of the receiver/frame.

Action

- "short" recoil operated.

Serial Number

- the two serial numbers reported consisted of seven digits without suffix or prefix.

Shots

- this is a belt fed firearm.

Remarks

- developed by John M. Browning towards the end of World War I.
- the Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.
- during World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations.
- the Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999.
- in Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

Notes

Make

- "BROWNING MACHINE GUN" is marked on the right side of the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.
- this "Heavy Machinegun" may be configured as a "Fixed" gun for armoured fighting vehicle use with a manual charger and an electric firing solonoid, a "Fixed Turret Type" gun with a manual charger and an electric firing solonoid or a "Flexible" gun with a spade hand grip having the capability for both semi-automatic and full-automatic fire.
- the "Flexible" gun is used interchangeably for "Ground Mount" use as an infantry weapon or vehicle anti-aircraft use.
- these machineguns may be found mounted in pairs or in quadruple mounts for dedicated anti-aircraft use.
- "M2" is marked on the right side of the receiver/frame.

Manufacturer

- "MANUFACTURED BY" over "KELSEY HAYES WHEEL CO." over PLYMOUTH MICHIGAN" or "MANUFACTURED BY" over "KELSEY-HAYES WHEEL" over "DIV. OF GENERAL MOTORS" is usually marked on the right side of the receiver/frame.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number is marked on the right side of the receiver/frame.

Calibre

- "U.S. CAL.50" is marked on the right side of the receiver/frame.

Shots

- belt fed.

Other Markings

- "U.S. PAT.PEND. 1942" is marked on the right side of the receiver/frame.

Remarks

- developed by John M. Browning towards the end of World War I.
- the Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.
- during World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations.
- the Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999.
- in Canada, this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- this is a British-built copy of the Browning M2 Heavy Barrel heavy machine gun, manufactured for the United Kingdom's armed forces.
- features include: phosphated/parkerized finish; spade grips; open adjustable sights; short ventilated barrel shroud; this machinegun may be seen on a variety of mounts, including vehicle, tripod, or anti-aircraft mountings.
- also available with a quick change barrel as the model M2 Heavy Barrel QCB.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "MANUFACTURED BY" over "MANROY ENGINEERING LTD" over "ENGLAND" is marked on the firearm.
Action	- recoil operated.
Serial Number	- numbered on the receiver/frame.
Shots	- belt-fed firearm.
Remarks	- this design was developed by John M. Browning towards the end of World War I. - The Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel (with or without the Quick Change Barrel (QCB) feature), which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod. - During World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations. - The Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least two European manufacturers. Manufacture continues as of 1999. - In Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2 Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2 Heavy Barrel markings may have replaced the original markings.

Notes

Make

- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way. - this "Heavy Machinegun" may be configured as a "Fixed" gun for armoured fighting vehicle use with a manual charger and an electric firing solenoid, a "Fixed Turret Type" gun with a manual charger and an electric firing solenoid or a "Flexible" gun with a spade hand grip having the capability for both semi-automatic and full-automatic fire. - the "Flexible" gun is used interchangeably for "Ground Mount" use as an infantry weapon or vehicle anti-aircraft use. - these machineguns may be found mounted in pairs or in quadruple mounts for dedicated anti-aircraft use.
Manufacturer	- the manufacturer or logo thereof is marked on the firearm.
Action	- recoil operated.
Serial Number	- numbered on the receiver/frame.
Shots	- belt fed.

- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.
- This "Heavy Machinegun" may be configured as a "Fixed" gun for armoured fighting vehicle use with a manual charger and an electric firing solonoid, a "Fixed Turret Type" gun with a manual charger and an electric firing solonoid or a "Flexible" gun with a spade hand grip having the capability for both semi-automatic and full-automatic fire.
- The "Flexible" gun is used interchangeably for "Ground Mount" use as an infantry weapon or vehicle anti-aircraft use.
- These machineguns may be found mounted in pairs or in quadruple mounts for dedicated anti-aircraft use.

Manufacturer

- the manufacturer's name or registered trade-mark is usually found marked on the right-hand side-plate.

Action

- "short" recoil operated.

Serial Number

- the serial number is usually in numeric form without suffix or prefix and is usually found along with the manufacturer's name or registered trade-mark on the right-hand side-plate.

Shots

- belt fed

Remarks

- developed by John M. Browning towards the end of World War I.
- The Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.
- During World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations.
- The Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999.
- In Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

Remarks

- developed by John M. Browning towards the end of World War I.
- the Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.
- during World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations.
- the Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999.
- in Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.
- this "Heavy Machinegun" may be configured as a "Fixed" gun for armoured fighting vehicle use with a manual charger and an electric firing solonoid, a "Fixed Turret Type" gun with a manual charger and an electric firing solonoid or a "Flexible" gun with a spade hand grip having the capability for both semi-automatic and full-automatic fire.
- the "Flexible" gun is used interchangeably for "Ground Mount" use as an infantry weapon or vehicle anti-aircraft use.
- these machineguns may be found mounted in pairs or in quadruple mounts for dedicated anti-aircraft use.

Action

- "short" recoil operated.

Shots

- belt fed.

Remarks

- developed by John M. Browning towards the end of World War I.
- the Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.
- during World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations.

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.
- this "Heavy Machinegun" may be configured as a "Fixed" gun for armoured fighting vehicle use with a manual charger and an electric firing solonoid, a "Fixed Turret Type" gun with a manual charger and an electric firing solonoid or a "Flexible" gun with a spade hand grip having the capability for both semi-automatic and full-automatic fire.
- the "Flexible" gun is used interchangeably for "Ground Mount" use as an infantry weapon or vehicle anti-aircraft use.
- these machineguns may be found mounted in pairs or in quadruple mounts for dedicated anti-aircraft use.

Manufacturer

- "MANUFACTURED BY" over "SAVAGE ARMS CORPORATION" over "UTICA, N.Y., U.S.A." is usually marked on the side of the receiver/frame.

Action

- "short" recoil operated.

Shots

- this is a belt fed firearm.

Remarks

- developed by John M. Browning towards the end of World War I.
- the Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.
- during World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations.
- the Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999.
- in Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

Notes

Make

- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- model placed on the market approximately 1985.
- model designation is marked on receiver/frame.
- QCB is the "Quick Change Barrel" arrangement invented by FN. The purpose of which is to eliminate the safety hazard and instructional time required to teach users how to "headspace & time" the Browning 50 Cal Machinegun.

Manufacturer

- "FN HERSTAL" is marked on the right side of the receiver/frame.

Action

- "short" recoil operated.

Calibre

- calibre is marked on the side of the receiver/frame.

Shots

- belt fed.

Remarks

- developed by John M. Browning towards the end of World War I.
- The Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.
- During World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations.
- The Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999.
- In Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.
- the concept of a QCB or Quick Change Barrel, Browning HMG is founded on a desire to decrease the training time required to teach users to "headspace & time" the machine gun each time barrels are changed which is a training intensive function with severe consequences when not done correctly. Unfortunately the HMG must be adjusted at a factory or "depot" level maintenance facility to achieve the "Quick Change Barrel" interchangeability and the "quick change barrel" feature lasts only until the two or three barrels that are supplied with the machine gun are "shot-out". When all the barrels are "shot-out" the gun becomes completely useless as it must be returned to the factory or "depot" level repair facility to have more so-called "quick change barrels" installed.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- model placed on the market in approximately 1985.
- model designation, manufacturer, serial number markings are located on the receiver/frame.
- this is a British-built copy of the Browning M2 Heavy Barrel QCB heavy machine gun, manufactured for the United Kingdom's armed forces.
- features include: phosphated/parkerized finish; spade grips; open adjustable sights; short ventilated barrel shroud; this machinegun may be seen on a variety of mounts, including vehicle, tripod, or anti-aircraft mountings.
- "QCB" is the "Quick Change Barrel" arrangement invented by FN. The purpose of which is to eliminate the safety hazard and instructional time required to teach users how to "headspace & time" the Browning .50 Calibre machine gun.

Manufacturer

- "MANUFACTURED BY" over "MANROY ENGINEERING LTD" over "ENGLAND" is marked on the firearm.

Action

- "short" recoil operated.

Shots

- this is a belt fed firearm.

Remarks

- this design was developed by John M. Browning towards the end of World War I.
- The Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel (with or without the Quick Change Barrel (QCB) feature), which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.
- During World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations.
- The Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least two European manufacturers. Manufacture continues as of 1999.
- In Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2 Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2 Heavy Barrel markings may have replaced the original markings.

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- model designation, manufacturer's name and serial number are marked on the receiver/frame; US Ordnance calls their version of the M2 HB QCB the "M2A2". - this is a version of the Browning M2 Heavy Barrel QCB heavy machine gun, manufactured for the United States armed forces. - features include: phosphated/parkerized finish; heavy tapered barrel; carry handle mounted on the barrel to allow for changing a hot barrel; spade grips; open adjustable sights; short ventilated barrel shroud; and a rectangular receiver; this machinegun may be seen on a variety of mounts, including vehicle, tripod, or anti-aircraft mountings. - "QCB" is the "Quick Change Barrel" arrangement invented by FN. The purpose of which is to eliminate the safety hazard and instructional time required to teach users how to "headspace & time" the Browning .50 Calibre machine gun. - overall length is 1651mm (65"), average weight is 38.2 kg (84 lbs).
Manufacturer	- "OHIO ORDNANCE WORKS INC." is marked on the firearm.
Action	- recoil-operated.
Serial Number	- serial-numbered on the right-side sideplate.
Shots	- belt-fed firearm.

Model

- model placed on the market in approximately 1985.
- model designation, manufacturer's name and serial number are marked on the receiver/frame.
- this is a British-built copy of the Browning M2 Heavy Barrel QCB heavy machine gun, manufactured for the United Kingdom's armed forces.
- features include: phosphated/parkerized finish; spade grips; open adjustable sights; short ventilated barrel shroud; this machinegun may be seen on a variety of mounts, including vehicle, tripod, or anti-aircraft mountings.
- "QCB" is the "Quick Change Barrel" arrangement invented by FN. The purpose of which is to eliminate the safety hazard and instructional time required to teach users how to "headspace & time" the Browning .50 Calibre machine gun.
- overall length is 1651mm (65"), average weight is 38.2 kg (84 lbs).

Manufacturer

- "S.D.I. Ltd." may be marked on the side of the receiver/frame.
- "S.D.I. Ltd." is the abbreviation for "Sabre Defence Industries Limited".
- "Sabre Defence Industries Ltd." is located in Northolt, Middlesex, United Kingdom.
- "Sabre Defence Industries LLC" is located in Nashville, Tennessee, U.S.A.

Action

- recoil operated.

Serial Number

- the serial number is marked on the firearm.
- the serial number rationalization is unknown.

Shots

- this is a belt fed firearm.

Remarks

- this Browning Heavy Machine Gun was developed by John M. Browning towards the end of the First World War.
- The Browning 50 Calibre Heavy Machine Gun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel (with or without the Quick Change Barrel (QCB) feature), which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.
- During World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations.
- The Browning 50 Calibre, Heavy Machine Gun has been produced by twelve different manufacturers in North America and at least two European manufacturers. Manufacture continues as of 1999.
- In Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2 Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2 Heavy Barrel markings may have replaced the original markings.
- the concept of a QCB or Quick Change Barrel, Browning HMG is founded on a desire to decrease the training time required to teach users to "headspace & time" the machine gun each time barrels are changed which is a training intensive function with severe consequences when not done correctly. Unfortunately the HMG must be adjusted at a factory or "depot" level maintenance facility to achieve the "Quick Change Barrel" interchangeability and the "quick change barrel" feature lasts only until the two or three barrels that are supplied with the machine gun are "shot-out". When all the barrels are "shot-out" the gun becomes completely useless as it must be returned to the factory or "depot" level repair facility to have more so-called "quick change barrels" installed.

Model	- model designation, manufacturer's name and serial number are marked on the receiver/frame; US Ordnance calls their version of the M2 HB QCB the "M2A2". - this is a version of the Browning M2 Heavy Barrel QCB heavy machine gun, manufactured for the United States armed forces. - features include: phosphated/parkerized finish; heavy tapered barrel; carry handle mounted on the barrel to allow for changing a hot barrel; spade grips; open adjustable sights; short ventilated barrel shroud; and a rectangular receiver; this machinegun may be seen on a variety of mounts, including vehicle, tripod, or anti-aircraft mountings. - "QCB" is the "Quick Change Barrel" arrangement invented by FN. The purpose of which is to eliminate the safety hazard and instructional time required to teach users how to "headspace & time" the Browning .50 Calibre machine gun. - overall length is 1651mm (65"), average weight is 38.2 kg (84 lbs).
Manufacturer	"US ORDNANCE" is marked on the firearm. - US Ordnance Incorporated is a manufacturer based in McCarran, Nevada (a suburb of Reno/Sparks) that produces semi-automatic recreations of medium machine-guns, as well as machineguns for military and domestic purchasers.
Action	- recoil operated.
Serial Number	- serial-numbered on the receiver/frame.
Shots	- belt fed firearm.

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the side plate of the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- this is a water-cooled, "heavy" machine gun. It is cooled during the sustained fire role by a heavy water jacket filled with water and has a condenser to convert steam back into water.
- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.
- these machineguns may be found mounted in pairs or in quadruple mounts for dedicated anti-aircraft use.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.
Action	- "short" recoil operated.
Serial Number	- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way. - sequentially numbered up to seven digits.
Shots	- belt fed firearm.
Remarks	- developed by John M. Browning towards the end of World War I. - The Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod. - During World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations. - The Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999. - In Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

Remarks	- developed by John M. Browning towards the end of World War I. - the Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod. - during World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations. - the Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999. - in Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model

- this is a water-cooled, "heavy" machine gun. It is cooled during the sustained fire role by a heavy water jacket filled with water and has a condenser to convert steam back into water.
- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver/frame side plate, under the feed-way.
- these machineguns may be found mounted in pairs or in quadruple mounts for dedicated anti-aircraft use.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "MANUFACTURED BY" over "SAVAGE ARMS CORPORATION" over "UTICA, N.Y., U.S.A." is usually marked on the side of the receiver/frame.
Action	- no longer capable of full automatic fire.
Serial Number	- sequentially numbered up to seven digits. - the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver/frame side plate, under the feed-way.
Shots	- belt fed firearm.
Remarks	- developed by John M. Browning towards the end of World War I. - the Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod. - during World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations. - the Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999. - in Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- This firearm is a Norwegian manufactured version of the Browning Aircraft Machine Gun - Model AN M2:
- The Norwegian manufactured firearm is known as the Model 29.
- These machine guns normally have identification markings on the left side of the receiver: - markings may read "Mitr. M / 29".
- This machine gun is air-cooled, normally mounted on an aircraft or fixed mountings.
- features include a heavy barrel profile and a perforated barrel jacket.
- This machine gun may be assembled to feed belts of ammunition from either side.
- Due to the lightening of all interior parts and variations in the mechanism, this Model is capable of a higher cyclic rate of fire than other models of the BROWNING Machine Gun (rate of fire: 1000-1200 rounds per minute).

Action

- no longer capable of full automatic fire.

Serial Number

- should be marked on the left side of the receiver just above the date of manufacturer and below the model.
- may or may not have a letter prefix.

Mitr. M / 29
- Example:of serial #------ F.184
1935

Shots

- this is a belt-fed firearm.

Other Markings

- markings may be found on the left side of the receiver.
- sample markings as follows:

Mitr. M / 29
F.184
1935

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:
a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.
b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.
c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.
d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. These firearms were then redesignated "C-1 Machine Gun".

- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model is marked on the firearm as "M/29". - this is a licenced copy of the Browning machine gun adopted by Norway in 1929 in air-cooled (fixed and flexible) and water-cooled versions, chambered for the 8mm Mauser cartridge. Initial orders of this machine gun were supplied by Vickers-Armstrong of the UK, but in 1933, the Norwegian Kongsberg Arsenal began manufacturing these machine guns domestically. - features include: standard Browning layout and operation; blued finish; ventilated barrel shroud (air-cooled) or large-diameter water jacket (water cooled), either no sights (fixed aircraft versions) or open adjustable ladder (water-cooled) or ring sights (flexible aircraft or anti-aircraft); hinged top cover; and remote controls or single or dual spade or pistol-grip firing controls, with appropriate triggers.
Manufacturer	- the manufacturer or logo thereof is marked on the firearm.
Action	- recoil operated.
Serial Number	- numbered on the receiver/frame.
Shots	- belt fed.

Notes

Make

- The make is not marked on the firearm.

Model

- "M2HB" is marked on the right side of the receiver/frame.
- "M2HB" stands for "M2 Heavy Barrel".
- Features include: air cooled heavy barrel; dual spade handle grips; butterfly trigger; bolt release located at the rear of the receiver/frame below the trigger; charging handle located on the right side of the receiver/frame; flip up loading port lid; safety is a flip down toggle switch located at the rear of the firearm on the left side of the trigger.

Manufacturer

- "SPRINGFIELD ARMORY" is marked on the right side of the receiver/frame.

Action

- Recoil operated.

Serial Number

- The serial number is marked on the right side of the receiver/frame.
- The serial number is repeated on other parts and components.
- The serial number of referenced example consists of six digits.

Barrel

- The barrel length does not include any attached device such as flash-hider or muzzle brake.

Calibre

- The calibre designation is marked on the right side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- Belt fed firearm. - Disintegrating link.
Other Markings	- Multiple patent numbers are marked on the right side of the receiver frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this is an air-cooled aircraft machine gun.
- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.
- this "Heavy Machinegun" may be configured as a "Fixed" gun for aircraft use with an electric charger and a firing solonoid or a "Flexible" gun with a spade hand grip and manual charger for use in a manned "gun station" on an aircraft.
- The Browning Machine Gun, Caliber 50, M3, Aircraft, Basic, is designed to have a rate of fire of between 1,150 - 1,250 shots per minute.

Manufacturer

- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.

Action

- recoil operated.

Serial Number

- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.

Shots

- this is a belt fed firearm.

Remarks

- Developed by John M. Browning towards the end of World War I. The Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod. During World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations. The Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999.
In Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" is not marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- Model designation appears on the firearm as GUN 50 CALIBER M3-AC-BASIC.
- may also be known as "AN-M3".
- This firearm is an air-cooled, aircraft machine gun.
- the model designation, manufacturer's name and the serial number are located on the right-hand receiver side plate, under the feed-way.
- This "Heavy Machinegun" may be configured as a "Fixed" gun for aircraft use with an electric charger and a firing solonoid or a "Flexible" gun with a spade hand grip and manual charger for use in a manned "gun station" on an aircraft.
- The Browning Machine Gun, Caliber 50, M3, Aircraft, Basic, is designed to have a rate of fire of between 1,150 - 1,250 shots per minute.

Manufacturer

- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.

Action

- no longer capable of full automatic fire.

Serial Number

- the model designation, manufacturer's name and the serial number are located on the right-hand receiver side plate, under the feed-way.
- the serial number rationalization from observed specimens appears to be: - one digit followed by one alphabet letter followed by four digits.

Calibre

- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.

Shots

- this is a belt fed firearm.

Remarks

- developed by John M. Browning towards the end of World War I.
- The Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.
- During World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations.
- The Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999.

FRT Report

Firearm Reference Number (FRN): 50405
Make: Browning Machine Gun
Model: M3 Aircraft Basic

Summary

Make:	Browning Machine Gun
Model:	M3 Aircraft Basic
Manufacturer:	Canadian Arsenals Limited (CAL)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	CANADA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
50405 - 1	50 BMG	N/A	914	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	
50405 - 2	50 BMG	N/A	1143	Prohibited CC 84(1) "prohibited firearm" para. (c)	Non-Commercial Customization	

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" is not marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- model designation appears on the firearm as GUN 50 CALIBER M3-AC-BASIC.
- may also be known as "AN-M3".
- this firearm is an air-cooled, aircraft machine gun.
- the model designation, manufacturer's name and the serial number are located on the right-hand receiver side plate, under the feed-way.
- this "Heavy Machinegun" may be configured as a "Fixed" gun for aircraft use with an electric charger and a firing solonoid or a "Flexible" gun with a spade hand grip and manual charger for use in a manned "gun station" on an aircraft.
- the Browning Machine Gun, Caliber 50, M3, Aircraft, Basic, is designed to have a rate of fire of between 1,150 - 1,250 shots per minute.

Manufacturer

- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.

Action

- recoil operated, air-cooled.

Serial Number

- the model designation, manufacturer's name and the serial number are located on the right-hand receiver side plate, under the feed-way.
- the serial number rationalization from observed specimens appears to be: - one digit followed by one alphabet letter followed by four digits.

Calibre

- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.

Shots

- this is a belt fed firearm.

Remarks

- developed by John M. Browning towards the end of World War I.
- The Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod.
- During World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations.
- the Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999.
- In Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3-AC-BASIC) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this is an air-cooled aircraft machine gun.
- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.
- this "Heavy Machinegun" may be configured as a "Fixed" gun for aircraft use with an electric charger and a firing solonoid or a "Flexible" gun with a spade hand grip and manual charger for use in a manned "gun station" on an aircraft.
- The Browning Machine Gun, Caliber 50, M3, Aircraft, Basic, is designed to have a rate of fire of between 1,150 - 1,250 shots per minute.

Manufacturer

- "MANUFACTURED BY" over "FRIGIDAIRE DIV. GENERAL MOTORS CORP" over "DAYTON" and "OHIO" is usually marked on the receiver/frame.

Action

- no longer capable of full automatic fire.

Serial Number

- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.

Shots

- this is a belt fed firearm.

Remarks

- Developed by John M. Browning towards the end of World War I. The Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod. During World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations. The Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999.
In Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "M3 Aircraft Basic" is an air-cooled aircraft machine gun.
- "U.S. NO." and the "serial number" over "MACHINE GUN CAL. 50 - M3 - A.C. - BASIC" over "MANUFACTURED BY" over "SPRINGFIELD ARMORY" over "SPRINGFIELD MASS." over "PATENT NOS. RE19159 1803349" over "1803352 1919242 1936254 2110165" are usually marked on the side plate of the receiver/frame.
- "Machine Gun Cal. 50 M3" may be configured as a "Fixed" gun for aircraft use with an electric charger and a firing solonoid or a "Flexible" gun with a spade hand grip and manual charger for use in a manned "gun station" on an aircraft.
- "Browning Machine Gun model M3 Aircraft Basic" is designed to have a rate of fire of between 1,150 - 1,250 shots per minute.

Manufacturer

- "MANUFACTURED BY" over "SPRINGFIELD ARMORY" over "SPRINGFIELD MASS." is usually marked on the side plate of the receiver/frame.

Action

- no longer capable of full automatic fire.

Serial Number

- the model designation, manufacturer's name and the serial number are located on the right or left-hand receiver side plate, under the feed-way.

Shots

- this is a belt fed firearm.

Remarks

- Developed by John M. Browning towards the end of World War I. The Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod. During World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations. The Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999.
In Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

FRT Report

Firearm Reference Number (FRN): 153027
Make: Browning Machine Gun
Model: M3M

Summary

Make:	Browning Machine Gun
Model:	M3M
Manufacturer:	Fabrique Nationale Herstal (FN)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	BELGIUM
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
153027 - 1	50 BMG	N/A	914	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- the make and/or the FN crest is marked on the firearm.
Model	- model designation may or may not be marked on the firearm; in US service, this machine gun is known as the "GAU-21". - this is a lightened aircraft version of the Browning M2 heavy machine gun, adopted for firing from a pintle from a helicopter door or tail position, and normally fitted with spade grips and a metallic feed chute. - features include: standard BHMG layout and operation, with lightened internal parts to increase the rate of fire to 950-1100 rpm; parkerized/phosphated finish; a slot-ventilated muzzle brake to allow use with night-vision equipment; a hole-ventilated barrel shroud; and usually mounted on a swing-out pivoting pintle mount to allow a gunner a greater axis of fire.
Manufacturer	- the manufacturer and/or the FN crest is marked on the firearm.
Action	- recoil operated.
Serial Number	- serial numbered on the right sideplate.
Shots	- belt fed firearm.

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the top plate of the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this firearm is a British service small arm, named in accordance with UK marking, naming and model series practices.
- "BROWNING MK. II" or "MK. II" is marked on the top of the receiver/frame.
- this machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. It may be assembled to feed belts of ammunition from either side - where all other BROWNING Machine Gun Models are fed from the left side only.
- due to the lightening of all interior parts and variations in the mechanism, this Model is capable of a higher cyclic rate of fire than other models of the BROWNING Machine Gun (rate of fire: 1000-1200 rounds per minute).

Manufacturer

- the manufacturer's name is marked on the top of the receiver as follows: B.S.A. 1938

Action

- recoil operated, gas assisted by means of a muzzle booster / barrel bearing.

Serial Number

- unknown serial number rationalization.
- from an observed specimen the serial numbering practice appears on the firearm as follows: - B period, followed by two digits, period followed by three digits.

Shots

- this is a belt fed firearm.

Other Markings

- The date of manufacture is marked prominently on the top of the receiver. As the serial numbers did not repeat on an annual basis it is deemed that the year of manufacture is not required as a component of the model designation.

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:

a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.

b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.

c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.

d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. These firearms were then redesignated "C-1 Machine Gun".

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this firearm is a British service small arm, named in accordance with UK marking, naming and model series practices.
- "BROWNING MK. II*" or "MK. II*" is marked on the top of the receiver/frame.
- this machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. It may be assembled to feed belts of ammunition from either side - where all other BROWNING Machine Gun Models are fed from the left side only.
- due to the lightening of all interior parts and variations in the mechanism, this Model is capable of a higher cyclic rate of fire than other models of the BROWNING Machine Gun (rate of fire: 1000-1200 rounds per minute).

Manufacturer

- the manufacturer's name is marked on the top of the receiver as follows: - "B"
- "B" is a British Mfr code for B.S.A. Shirley Works.

Action

- no longer capable of full automatic fire.

Serial Number

- unknown serial number rationalization.
- from an observed specimen the serial numbering practice appears on the firearm as follows: - B period, followed by two digits, period followed by three digits.

Shots

- this is a belt fed firearm.

Other Markings

- The serial number is marked prominently on the top of the receiver.

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:
a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.
b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.
c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.
d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. These firearms were then redesignated "C-1 Machine Gun".

- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this firearm is a British service small arm, named in accordance with UK marking, naming and model series practices.
- "BROWNING - MK. II*" is marked on the top of the receiver/frame of the firearm.
- this machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. It may be assembled to feed belts of ammunition from either side - where all other BROWNING Machine Gun Models are fed from the left side only.
- due to the lightening of all interior parts and variations in the mechanism, this Model is capable of a higher cyclic rate of fire than other models of the BROWNING Machine Gun (rate of fire: 1000-1200 rounds per minute).
- more than 30,000 examples of this machine gun model were delivered before production ceased in 1943.

Manufacturer

- the manufacturer's name is marked on the top of the receiver as follows: -
INGLIS
1942

Action

- no longer capable of full automatic fire.

Serial Number

- unknown serial number rationalization.
- from observed specimens the serial numbering practice appears remarkably similar to the John Inglis manufactured, Browning High Power Pistol serial numbering rationalization: - a digit followed by the letter "T" followed by four digits.

Shots

- this is a belt fed firearm.

Other Markings

- The date of manufacture is marked prominently on the top of the receiver/frame. As the serial numbers did not repeat on an annual basis it is deemed that the year of manufacture is not required as a component of the model designation.
- Canadian proof & inspection markings and the date of proof appear on the receiver/frame. Observed samples show crossed flags with the initials DCP (Dominion of Canada Proof) on the left, right and middle of the crossed flags, inspector #24 and the last two digits of the year "42" (1942).

Remarks

- the Browning Machine Gun design was easily configured for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows:
a) Browning Aircraft Machine Gun Model AN M2:
- the AN M2 machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. The AN M2 may also be found in a flexible version with a spade grip. The AN M2 has a reversible belt holding and belt feed mechanism so that the gun may feed belts of ammunition from either side.
b) Browning Machine Gun M1919-A4:
- the M1919-A4 Machine Gun is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. The M1919-A4 mechanism is designed to have a rate of fire of approximately 550 to 650 shots per minute.
- the M1919-A4 version feeds belts of ammunition from the left side.
c) Browning Machine Gun M1919-A5:
- the M1919-A5 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which was designed for fixed configuration use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- the M1919-A5 version feeds belts of ammunition from the left side.
d) Browning Machine Gun M1919-A6:
- the M1919-A6 is available in calibre 30-06 SPRG. This machine gun is an air-cooled firearm which may be configured for infantry use with a carrying handle, bi-pod and shoulder stock. Rate of fire 550 to 650 shots per minute.
- the M1919-A6 version feeds belts of ammunition from the left side.
- circa 1968 - 1970 all of these machineguns in service with the Canadian Forces were all returned to ARSENALS DIVISION OF CANADIAN ARSENALS LTD where they were modified to accept the M20 machinegun metallic, disintegrating link and converted to 7.62MM NATO calibre. These firearms were then redesignated "C-1 Machine Gun".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this firearm is a British service small arm, named in accordance with UK marking, naming and model series practices.
- "BROWNING - MK. II*" is marked on the top of the receiver/frame of the firearm.
- this machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. It may be assembled to feed belts of ammunition from either side - where all other BROWNING Machine Gun Models are fed from the left side only.
- due to the lightening of all interior parts and variations in the mechanism, this Model is capable of a higher cyclic rate of fire than other models of the BROWNING Machine Gun (rate of fire: 1000-1200 rounds per minute).
- more than 30,000 examples of this machine gun model were delivered before production ceased in 1943.

Manufacturer

- the manufacturer's name is marked on the top of the receiver as follows: -
INGLIS
1942

Action

- recoil operated, gas assisted by means of a muzzle booster / barrel bearing.

Serial Number

- unknown serial number rationalization.
- from observed specimens the serial numbering practice appears remarkably similar to the John Inglis manufactured, Browning High Power Pistol serial numbering rationalization: - a digit followed by the letter "T" followed by four digits.

Shots

- this is a belt fed firearm.

Other Markings

- The date of manufacture is marked prominently on the top of the receiver/frame. As the serial numbers did not repeat on an annual basis it is deemed that the year of manufacture is not required as a component of the model designation.

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the top plate of the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- this firearm is a British service small arm, named in accordance with UK marking, naming and model series practices. - "BROWNING - MK. II*" or "MK. II*" is marked on the top of the receiver/frame. - this machine gun is an air-cooled firearm normally mounted on aircraft fixed mountings. It may be assembled to feed belts of ammunition from either side - where all other BROWNING Machine Gun Models are fed from the left side only. - due to the lightening of all interior parts and variations in the mechanism, this Model is capable of a higher cyclic rate of fire than other models of the BROWNING Machine Gun (rate of fire: 1000-1200 rounds per minute).
Manufacturer	- the manufacturer is marked on the firearm as "V.A." or "V.A.C.".
Action	- recoil operated.
Serial Number	- unknown serial number rationalization. - from an observed specimen the serial numbering practice appears on the firearm as follows: - V period, followed by digits.
Shots	- belt fed.

Notes

Make

- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model is marked on the firearm. - this is a commercial sales version of the M1917A1 water-cooled machine gun (known to Colt at this time as the "MG38") produced for sales from the early 1930s up to the entry of the US into World War Two. - these machine guns were produced in a variety of chamberings, for sales in South America, the Pacific, and American overseas allies. - features include: typical Browning M1917A1 layout and operation, large-diameter water jacket; open adjustable "ladder" sights; hinged top cover; and buyer's choice of single pistol grip with back plate trigger or dual spade grips with thumb trigger.
Manufacturer	- the manufacturer or logo thereof is marked on the firearm.
Action	- recoil operated.
Serial Number	- numbered on the receiver/frame, with a "C" prefix.
Shots	- belt fed.

Notes

Make

- "BROWNING PATENT" is marked on the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennessee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennessee from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- manufactured prior to 1939. - "COLT AIRCRAFT MACHINE GUN" over "MODEL MG 52 - 2 CAL. 50" over "BROWNING PATENT" over "COLT'S P.T. F.A. MFG. CO." over "HARTFORD, CONN., U.S.A." over "NO." and the "serial number" is marked on the receiver/frame. - "MG52-2" is a water cooled, "heavy" machine gun. - "MG52-2" was manufactured to be fed from either the left or right side of the receiver/frame by repositioning several components. - "MG52-2" is cooled during the sustained fire role by a heavy water jacket filled with water and has a condenser to convert steam back into water.
Manufacturer	- "COLT'S P.T. F.A. MFG. CO." over "HARTFORD, CONN., U.S.A." over "NO." and the "serial number" is marked on the receiver/frame.
Action	- "short" recoil operated.
Serial Number	- "NO." and the "serial number" is marked on the receiver/frame.
Calibre	- "CAL. 50" is marked on the receiver/frame.
Shots	- belt fed.
Remarks	- developed by John M. Browning towards the end of World War I. - The Browning 50 Calibre Heavy Machinegun is available in seven different configurations; the most commonly encountered are: - the aircraft mounted machinegun (AN-M2 & AN-M3), a water-cooled version (M1921& M2-Water Cooled) and the M2-Heavy Barrel, which is the vehicle mounted anti-aircraft model and a ground mounted infantry model utilizing a tripod. - During World War II, approximately two million Browning 50 Calibre, Heavy Machineguns were produced in various different configurations. - The Browning 50 Calibre, Heavy Machinegun has been produced by twelve different manufacturers in North America and at least one European manufacturer. Manufacture continues as of 1999. - In Canada this firearm was produced by Canadian Arsenals as an aircraft model (M3 Aircraft-Basic) in the early 1950's for the Canadian version of the "Sabre" jet fighter. Years later when the Sabre was retired these machineguns were rebuilt and recycled into other aircraft, eventually being rebuilt to M2-Heavy Barrel models for use by the Canadian Armed Forces as Turret-Type or Flexible models. The original markings may or may not have been cancelled and M2-Heavy Barrel markings may have replaced the original markings.

FRT Report

Firearm Reference Number (FRN): 145441
Make: Browning Machine Gun
Model: Mitr. 7.7 No. 3

Summary

Make:	Browning Machine Gun
Model:	Mitr. 7.7 No. 3
Manufacturer:	Fabrique Nationale Herstal (FN)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	BELGIUM
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
145441 - 1	303 BRITISH	N/A	608	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "BROWNING" or "BROWNING MACHINE GUN" may be marked on the top plate of the receiver/frame.
- "BROWNING" trade named is derived from the last name of the American inventor John Moses Browning (1855 - 1926).
- John Moses Browning was the son of Jonathan Browning of Ogden, Utah, U.S.A.
- Jonathan Browning was born in Tennesee, U.S.A. in 1805.
- Jonathan Browning was located in Sumner County, Tennesse from 1826 to 1834, Adams County, Illinois from 1834 to 1842, Nauvoo, Illinois from 1842 to 1846, Kanesville, Iowa from 1846 to 1852, and Ogden, Utah from 1852 to 1879.
- Jonathan Browning made muzzle loading and repeating percussion rifles. He designed and manufactured a harmonic type repeating rifle in 1831.
- Jonathan Browning had four sons: David, John M., Matthew S., and Wesley.
- John Moses Browning was born January 23, 1855 in Ogden, Utah.
- John Moses Browning assumed the management of Jonathan Browning's business in 1873.
- John M. Browning married Rachel Teresa Child on April 10, 1879.
- John M. Browning's father, Jonathan Browning passed away on June 21, 1879.
- J. M. Browning & Bro./Browning Brothers is formed circa 1879.
- Browning Brothers Company produce a single shot rifle based on Patent Number 220,271 granted on October 7, 1879 to John M. Browning.
- John M. Browning and his brother Matthew S. Browning conduct business under the name "J. M. & M. S. Browning, Co."
- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model is marked on the firearm, standing for "Mitrailleur 7.7 No. 3", meaning "7.7mm Machine Gun Number 3". - this is a version of the Browning aircraft machine gun adopted by the Dutch in 1935, for use by their home and colonial forces; this machine gun was designated as the "No.3" to distinguish it from the "No. 1" (a version of the Lewis machine gun) and the "No. 2" (a version of the Vickers/Maxim machine gun). - later versions of these machine guns (also produced by Fabrique National of Belgium) were also adopted in 7.9x57R Dutch; these machine guns were based on FN's 1932 aircraft model. - features include: standard Browning layout and operation; blued finish; fixed or flexible mount; either no sights (fixed guns) or open sights (flexible guns); slot-ventilated barrel shroud; hinged top cover; left-hand feed; either a below-receiver pistol-grip and trigger, or solenoid firing controls; and the flexible versions of these guns were fitted with an oddly-shaped combination short buttstock/off-hand grip that can be braced against the shoulder or swung with the non-firing hand.
Manufacturer	- the manufacturer or logo thereof is marked on the firearm.
Action	- recoil operated.
Serial Number	- numbered on the receiver/frame.
Shots	- belt fed.

Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Other
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
15477 - 1	50 PERCUSSION	5	800	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "J.M. BROWNING" is usually marked on the barrel.
- Jonathan M. Browning was the father of John Moses Browning, the noted American small arms designer; Jonathan Browning began as a gunsmith in Nauvoo, Illinois, prior to moving to Ogden, Utah.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is an unusual form of early repeating percussion rifle having a block with multiple chambers that slides through the receiver/frame from side to side in the manner of a harmonica being played.
- features include: browned finish; octagonal barrel; fixed open sights; rectangular chamber block; manually-cocked side-hammer on a back-action lock; and a curved-grip walnut stock with crescent butt plate.

Manufacturer

- "J.M. BROWNING" is usually marked on the barrel.
- Jonathan M. Browning was the father of John Moses Browning, the noted American small arms designer; Jonathan Browning began as a gunsmith in Nauvoo, Illinois, prior to moving to Ogden, Utah, during the westward migration of the Mormon sect.

Action

- this is an unusual repeating rifle with a block through the receiver horizontally that has multiple chambers and is manually lined up and fired for each shot.

Notes

Make

- The make is marked on the left side of the receiver/frame.

Model

- M.G. 42 is marked on the left side of the receiver/frame.
- SEMIAUTO is marked on the left side of the receiver/frame.
- This semi-automatic firearm is a reproduction of the MG42 German machine gun.
- Built using a newly manufactured full-length steel receiver/frame and a number of original MG 42 parts.
- Fires from the closed bolt position and will not accept the original MG-42 machine gun bolt, mainspring, cocking handle, dust cover or trigger housing.
- Other features include: folding front sight; folding anti-aircraft rear sight; right side barrel release latch; top-mounted feed cover latch.

Manufacturer

- BRP CLNTN-MD is marked on the left side of the receiver/frame.

Action

- short recoil operated, with a gas assist by means of a muzzle booster.
- manufactured in semi automatic configuration.

Serial Number

- The serial number is marked on the left side of the receiver/frame.

Calibre

- The calibre designation is marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- belt fed Commercial Version.
- ammunition is packaged in 50 round non-disintegrating belts.
- belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum.
- a 75 round saddle drum magazine is available for this firearm (which is a true magazine).
- NOTE: all feed attachments for the MG34 family of machine guns may be utilized with the MG42 family of machine guns.

Canadian Law Comments

- The rectangular sheet metal pressing/fabrication, from butt socket to the muzzle booster is the receiver/frame for all purposes of the Criminal Code, Section 2 definition of "firearm".

Remarks

- this firearm is a recreation of the German Service Machine Gun, Model MG 42, air cooled, machine-gun in semi-automatic fire configuration.
- the receiver/frame has been designed and manufactured to prevent the use of full-auto parts.
- the manufacturer used surplus parts to complete the firearms.

Make

- "BRUCE & DAVIS" was observed marked between the barrels on the rib.
- "Bruce & Davis" was located in Webster, Massachusetts, U.S.A. in the 1840s and 1850s.
- "Bruce & Davis" were agents/distributors for Allen pistols.

Model

- manufactured circa 1850s.
- possibly manufactured by Allen & Thurber or Allen & Wheelock.
- model designation is not marked on the firearm.
- this firearm is a double-barrel black powder percussion pistol with a single trigger mechanism that fires one barrel at a time.
- features include: fixed sights; round, side by side steel barrels; ramrod is mounted under the barrels; exposed double percussion hammers; single trigger; rounded trigger guard; "bag" shaped grip strap with wood grips.

Action

- muzzle loader, percussion ignition, side by side barrel configuration.

Serial Number

- serial number was observed marked on the left grip strap of the receiver/frame, under the grip plate.

Barrel

- available in barrel lengths from 76 mm (3") to 152 mm (6").

Notes

Make

- "WM BRYCE & CO." is marked on the barrel.
- "William Bryce & Company" was located in New York City, New York, U.S.A. from 1842 to 1886.
- "William Bryce & Company" was a wholesale hardware dealer and sales agent for the C. Sharps & Company pocket percussion revolver.

Model

- manufactured circa 1857/1858.
- approximately 2,000 units were manufactured.
- this is a small-caliber percussion revolver with a tip-up barrel.
- strongly resembles some of the early Smith & Wesson "tip-up" revolvers.
- features include: fixed sights; tip-up octagonal barrel with top rib; solid top receiver/frame with round non-fluted cylinder; exposed spurred hammer; sheathed spur trigger; single action trigger mechanism; flat bottom grip strap; walnut grip panels; blued finish.
- this firearm was also sold under the markings of "C. SHARPS & CO.".

Manufacturer

- "C. SHARPS & CO., PHILA. PA." is not marked on the barrel.

Serial Number

- serial numbered from "1" up.

Firearm Reference Number (FRN): 162466
Make: BS Ordnance
Model: Sten MARK 3

Summary

Make:	BS Ordnance
Model:	Sten MARK 3
Manufacturer:	BS Ordnance
Level:	Non-Commercial Customization
Type:	Commercial Version
Action:	Semi-Automatic
Country of Manufacturer:	CANADA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
162466 - 1	9MM LUGER	5	202	Prohibited PFR, Part 1, para. 177(a)	Non-Commercial Customization	
162466 - 2	9MM LUGER	32	202	Prohibited PFR, Part 1, para. 177(a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "BS ORDNANCE" is marked on the bottom of the magazine housing.

Model

-"STEN MKIII" is marked above "CANADA 44/14", above "9MM" on the top surface of the magazine housing.
- Sten MARK 3 submachine gun design is distinguished by its all-metal welded construction and by a short barrel that could not be readily replaced.
- the BS Ordnance, Sten MKIII, CANADA 44/14 closely resembles a Sten MARK 3 submachine gun and is capable of accepting only the non-full automatic parts from an original full-automatic Sten gun.
- features include: ten groove right hand twist barrel, newly manufactured magazine housing assembly welded to tube assembly; newly manufactured tube assembly with reduced inside diameter and sear cut-out width; refurbished original Sten Mark 2 trigger group components; crossbolt safety; newly manufactured breech block/bolt assembly with striker mechanism; two guide rods and springs replace the usual single Sten return spring; refurbished removable butt assembly; fixed sights; blued finish.
- overall length is 745 mm (29.3").

Manufacturer

- "BS ORDNANCE" is marked on the bottom of the magazine housing.

Action

- blowback operated, striker fired.

Serial Number

- an observed example had the two letters "BS", followed by 6 numbers, followed by a dash and a single number.

Calibre

- "9MM" is marked on the top of the magazine housing.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine.
Canadian Law Comments	- The tube in which the breech bolt reciprocates and the magazine housing constitute the receiver/frame for all purposes of the Criminal Code, Section 2 definition of "firearm". - For regulatory purposes, when the two component receiver/frame is further disassembled, the receiver/frame component known as the magazine housing where the manufacturer information and serial number are found, is used to establish the description for the purpose of firearms registration.

Notes

Make

- "B.S.A." and "Made in England" are usually marked on the left side of the receiver/frame.
- the "BSA" logo of three stacked rifles is usually marked on the right side of the receiver/frame.
- "BSA" is the acronym for "Birmingham Small Arms".
- "BSA" is a trademark used by Birmingham Small Arms & Metals Company Limited (BSA&MCo.), Birmingham Small Arms Guns Ltd (BSA Ltd.) and Birmingham Small Arms Company Limited.

Model

- model designation may not be marked on the firearm.
- up to 15 made in 1949.
- designed to compete with the EM-2 rifle for use by the British army.
- features include: squared receiver/frame with an integral optical sight; trigger mechanism incorporated a rate of fire reducer; pistol grip half stock; flash hider doubles as a grenade launcher; rubber recoil pad.
- overall length: 1067mm (42").
- tested at Enfield in 1950 and found to be relatively inaccurate and unreliable.

Manufacturer

- "The Birmingham Small Arms Co Ltd" and "Birmingham, England" may be marked on the right side of the receiver/frame.

Action

- gas operated.
- selective fire.

Shots

- detachable box magazine.

- this is a medium sized break barrel spring piston air rifle, made between 1947 and 1957, chiefly for use as a "boy's gun".
- features include: one piece walnut pistol grip stock, blued metal finish, fixed or elevation adjustable rear sight and bead front.
- these rifles are seen in both rifled and smooth-bore versions.
- also available in a slightly smaller version as the "Cadet".

Manufacturer

- BSA is a manufacturer that has been producing airguns and firearms since 1861 in Birmingham, England.
- they are particularly known for their match grade small bore rifles and air rifles.

Action

- spring piston air.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- numbered on the side of the trigger block, with an alpha prefix consisting of "M", "C", "Y", "CA", or "CC".

FRT Report

Firearm Reference Number (FRN): 3437
Make: BSA
Model: Centurion

Summary

Make:	BSA
Model:	Centurion
Manufacturer:	Birmingham Small Arms (BSA)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
3437 - 1	22 LR	1	737	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make	- usually marked on the side of the receiver/frame: BSA (with "three stacked rifle" logo)
Model	- introduced in 1915 and discontinued in 1932. - model designation not normally found on these rifles. - similar to the No. 15 target rifle (except featuring a "Centurion" barrel, warranted capable of 1.5" group at 100 yards by BSA). - uncheckered half stock beavertail forearm and uncheckered pistol grip buttstock with cheek piece, target front and adjustable aperture rear sights.
Manufacturer	- usually marked on the top of the barrel, near breech end, and/or the side of receiver (company name with logo).
Action	- rear hinged, lever operated tipping block design. - Martini action is locked in the firing position by the tip of the operating lever holding the breech block face up and in line with the chamber.
Serial Number	- usually numbered, front underside of the receiver.
Other Markings	- Company name and logo (3 stacked rifles) on side of receiver.

Notes

Make

- Usually marked on the top of the barrel and/or the receiver/frame.
- the BSA "three-stacked rifle" logo is also usually present.

Model

- model designation may be marked on the top of the barrel.
- 2667 made from 1955 to 1961.
- based on the model "Supersport" series action, but modified for match competition.
- features include:
- heavy profile target style barrel;
- target style stock with wide forend, contoured pistol grip, and raised cheekpiece;
- detachable box magazine may be replaced with a spring-retained magazine well filler block that permits single loading;
- dual claw extractors;
- side-mounted rear aperture competition sights;
- aperture foresight assembly;
- accessory/handstop rail may be mounted on underside of forend.

Manufacturer

- usually marked on the top of the barrel and/or the receiver/frame.

Action

- turn bolt operated.

Serial Number

- serial numbers for this model usually incorporate a "V" prefix.
- observed serial numbers have consisted of the prefix followed by three or four digits.

Calibre

- may be marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine may be replaced with a spring-retained magazine well filler block that permits single loading; this does not constitute the "ACTION" as "SINGLE SHOT."

Notes

Make

- Birmingham Small Arms (BSA) trademark logo of "three stacked rifles" and the letters "B.S.A." are usually marked on the barrel.
- "BSA" was a trademark used by The Birmingham Small Arms Company Limited and BSA Guns Limited of Birmingham, England.

Model

- model designation is not marked on the firearm.
- manufactured from 1974 to 1986.
- standard or heavy barrel.
- one-piece forged bolt and a shrouded bolt face.
- adjustable rear sights and hooded front sight or no sights.
- adjustable single trigger or double set triggers.
- blued or matte finish.
- walnut stock with high-gloss or oil finish.

Serial Number

- serial number is marked on the front of the receiver/frame.
- serial number identifiers (the first two or three letters/numbers of the serial number) for the model "CF2" include;
- "11R" for calibre 243 WIN
- "12R" for calibre 7MM REM MAG
- "14R" for calibre 300 WIN MAG
- "15R" for caliobre 22-250 REM
- "16R" for calibre 7X64 BRENNEKE
- "17R" for calibre 6.5X55 SWEDISH MAUSER
- "18R" for calibre 223 REM
- "2R" for calibre 222 REM
- "3R" for calibre 308 WIN
- "5R" for calibre 7MM MAUSER
- "8R" for calibre 270 WBY MAG

Calibre

- calibre is marked on the left side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- internal box magazine. - magazine floorplate is released by a catch on the front upper face of the trigger guard.
Remarks	- A replacement for the BSA Monarch Deluxe bolt action sporting rifle. It features "roll over" Monte Carlo stock with skip line checkering on pistol grip and forearm, adjustable trigger, hooded ramp front and open rear sights on "Sporting" models and no iron sights on "Varmint" models.

Notes

Make

- the "BSA" name and/or logo is marked on the firearm.

Model

- introduced in 2007 and reintroduced in 2012.
- model may be marked on the barrel and/or receiver/frame.
- features include: black synthetic stock with textured grip panels; single-stage trigger; high visibility fibre-optic ramped blade front-sight and windage/elevation adjustable open rear-sight; the top of the receiver/frame is grooved for mounting a telescopic sight; automatic and manual safety.
- overall length with a 445 mm (17.5") barrel is 1080 mm (42.5"), and the average weight is 2.7 kg (5.9 lbs)

Manufacturer

- Birmingham Small Arms (BSA) is a manufacturer that has been producing airguns and firearms since 1861 in Birmingham, England.
- they are particularly known for their match-grade small-bore rifles and air rifles.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- spring-piston powered.
- hinged barrel design.
- at least two variants of this particular model exist:

Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Calibre

- the calibre designation is usually marked on side of the barrel.

Canadian Law Comments

- at least two variants of this particular model exist:

Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

Notes

Make

- "BSA" is marked on top of the firearm.
- BSA logo, triple rifle teepee within an oval over the letter "BSA", may be found on the top of the firearm.

Model

- "BSA COMET EVO" is marked on top of the firearm.
- features include: fixed fiber optic front sight and an adjustable fiber optic rear sight; round, rifled barrel; front hinged tubular receiver/frame grooved for scope mounts; manual safety lever in front of the trigger; two stage adjustable trigger; one piece, checkered synthetic ambidextrous semi-pistol grip stock with a raised cheek piece, and ventilated rubber butt pad.
- NOTE: this air rifle may have left the factory with a screw on silencer or with a cosmetic barrel shroud containing no baffles or silencing components.
- overall length with a 368 mm (14.5") barrel is 980 mm (38"), and the average weight is 3.2 kgs (7 lbs).

Manufacturer

- "BSA" is marked on top of the firearm.
- BSA logo, triple rifle teepee within an oval over the letter "BSA", may be found on the top of the firearm.
- Birmingham Small Arms (BSA) is a manufacturer that has been producing airguns and firearms since 1861 in Birmingham, England.
- they are particularly known for their match-grade small-bore rifles and air rifles.

Action

- spring-piston powered, hinged barrel design.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the receiver/frame.
- serial number rationalization is not known.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.
- as it left the factory, this firearm is equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada.
- when the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm".
- note that removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer (prohibited device) including all internal parts, baffles, wipes, end caps, mounting hardware and the device body must be removed.

Notes

Make

- Birmingham Small Arms trademark logos of "three stacked rifles" and/or "B.S.A." are usually marked on the barrel, receiver/frame and buttplate.
- "MADE IN ENGLAND" may be marked on the receiver/frame.
- "Made by" over "The Birmingham Small Arms Co LTD" over "England" was observed marked on the top of the barrel.
- "BSA" was a trademark used by The Birmingham Small Arms Company Limited and BSA Guns Limited of Birmingham, England.

Model

- introduced between 1949 and 1953.
- model designation is not usually marked on the firearm.
- "D Sporter" model is a reworked Enfield Pattern 1914 or US Rifle 1917 Enfield Pattern military rifles.
- Birmingham Small Arms (BSA) modified both military service rifles to a sporting configuration.
- "D Sporter" modification involved: shortening the barrel, grinding off the rear sight base and protecting ears, replacing the military stock with a new checkered walnut sporting stock with cheek piece, rubber pistol grip cap, buttplate, white spacers and sling swivels, reshaping the bolt handle, drilling and tapping the receiver/frame for scope mounts, fitting sporting type ramp front sight and open type rear sight.
- "D Sporter" was also available with an aperature rear sight.
- "D Sporter" model metal work was polished and reblued.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "Made by" over "The Birmingham Small Arms Co LTD" over "England" was observed marked on the top of the barrel.
Action	- turn-bolt design.
Serial Number	- serial number was observed marked at the front right side of the receiver/frame ring. - serial number consists of a one or two letter prefix and four to five numbers. - serial number range was from 1004 to 18440. - letter prefix referring to the calibre. - H for 30-06 SPRG, HA for 270 WIN, and M for 303 BRITISH.
Calibre	- calibre was observed marked on the left side of the barrel's chamber area.
Shots	- internal box magazine.
Other Markings	- company logo (3 stacked rifles) on top of receiver.

Notes

Make

- the "BSA" name and/or logo are normally marked on the firearm.

Model

- this is a pre-charged pneumatic air rifle that resembles an ordinary spring-piston air rifle; in this design, what would be the compression chamber of a spring-piston rifle is used as the reservoir for a pre-compressed charge of air (usually filled from a SCUBA bottle).
- features include: stained beech pistol grip stock with Monte Carlo cheekpiece; blued metal work; free-floating barrel; adjustable match trigger, and scope mounting rail on the top of the air reservoir.
- made in both rifle and carbine versions, and available with an optional suppressor/silencer.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- Birmingham Small Arms (BSA) is a manufacturer that has been producing airguns and firearms since 1861 in Birmingham, England.
Action	- pre-charged pneumatic air rifle. - in calibre 177 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules. - in calibre 22 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules. - in calibre 25 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.
Serial Number	- numbered on the receiver/frame, serial number rationalization unknown.
