- the tooling for the US manufactured receiver/frame was then sold to Firearms Import/Export (FIE) of Miami, Florida who subsequently assembled about 20,000 pistols in 25 AUTO calibre under the name of the FIE model "THE BEST" between 1980 and 1985.
- as of 1999 the "ASTRA CUB" is manufactured in Spain under the ASTRA name only and is available only in 25 AUTO calibre. The 22 SHORT calibre having been discontinued in 1980.

Model

- these rifles were manufactured from 1878 to 1885, and most came with two sets of barrels; a smoothbore set in 20 gauge, and a rifled set in 45-70 GOVT, 45-85 EXPRESS, 45-90, or 45-100.
- the rifled barrel sets of these rifles were rifled with a left-hand twist in the left barrel, and a right-hand twist in the right barrel, to make it easier to regulate the barrels to the same point of impact.
- these rifles were top-lever opening, with double triggers, had open adjustable sights, and were normally fitted with walnut half-pistol-grip stocks and schnabel-tipped forearms.

Manufacturer

- "COLT'S PT. F.A.MFG.CO. HARTFORD CT.U.S.A." is marked on the barrel rib and "COLT'S PT. F.A.MFG.CO." is marked on the lockplates.

- "Frontier Scout '62" was also available in a "Buntline" version with a 241mm (9 ½") barrel.
- " '62 series " with a blued finish were also known as the model "P" to differentiate it from the previous "K" series revolvers that had a nickel finish.
- this model was also available as a "brace" of two consecutively numbered revolvers or with a "Frontier Scout Buntline '62" as a matched pair.
- a total of 23,826 "Frontier Scout '62's" were produced in calibre 22 LR, another 3,521 were produced in calibre 22 MAG and 32,996 were produced with dual cylinders.
- features include: blade front sight and a channel/notch in the top strap for a rear sight; round barrel; ejector rod and housing mounted on the right side of the barrel; solid top receiver/frame with a removable fluted cylinder and loading gate mounted on the right side; exposed spur hammer; single action trigger mechanism; plastic "Staglite" grip panels; blued finish.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the underside of the receiver/frame in front of the trigger guard.
- '62 series (Frontier Scout and Frontier Scout Buntline) serial numbers started with 999P and continued to 68088P. It is reported that a few serial numbers below 999P were completed.

Calibre

- the calibre designation is usually stamped on the barrel as ".22 L.R" or ".22 MAG". Examples that are marked ".22 CAL" were units that left the factory with dual cylinders in 22 LR and 22 MAG or late production single cylinder guns.
- beginning in 1964 cylinders were also stamped with the calibre designation.

Other Markings

- the bottom of the grip frame will have an engraved scroll pattern that was introduced in 1961. The front of the trigger guard will usually bear the "Verified Proof" mark (VP in a triangle), the rear of the trigger guard will usually bear a final inspection mark in the form of an alpha character or numeral (introduced in the late 1960's).

Remarks

- Colt used the letters "Q", "F", "K" and "P" when referring to the description of the receiver/frame and size of the frame.
- "Q" and "F" were used to denote a lightweight receiver/frame available in a duotone or a complete, blued finish.
- "K" was a heavier receiver/frame, available in a complete nickel finish.
- "P" was the same as the "K" but was available in a complete blued finish.

- manufactured from 1962 to 1971.
- "FRONTIER BUNTLINE SCOUT '62" or "FRONTIER SCOUT BUNTLINE '62" and ".22 CAL.", ".22 L.R.", or ".22 MAG." is usually marked on the left side of the barrel.
- "BUNTLINE" in the model designation denotes the use of a 241mm (9 ½") barrel. - "FRONTIER SCOUT '62" was equipped with a 121 mm (4 ¾") barrel.
- " '62 series " with a blued finish were also known as the model "P" to differentiate it from the previous "K" series revolvers that had a nickel finish.
- this model was also available as a "brace" of two consecutively numbered revolvers or with a "Frontier Scout '62" as a matched pair.
- a total of 3,219 "Frontier Scout Buntline '62's" were produced in calibre 22 LR, another 1,467 were produced in calibre 22 MAG and 254 were produced with dual cylinders.
- features include: blade front sight and a groove and notch in the top strap of the receiver/frame for a rear sight; round barrel with a right side mounted ejector rod and housing; solid top receiver/frame with removeable fluted cylinder and swing down loading gate is mounted on the right side; exposed spur hammer; single action trigger mechanism; plastic "Staglite" grip panels; blued finish.
- Colt offered some special order options such as different grips, engraving and finish so variations may be encountered.
- a similar model, known as the "Buntline Scout" was also offered by Colt.

Manufacturer

- "COLT'S PT. F. A. MFG. CO. HARTFORD CT. U.S.A." is usually marked on the top of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the underside of the receiver/frame in front of the trigger guard. - '62 series (Frontier Scout and Frontier Scout Buntline) serial numbers started with 999P and continued to 68088P. It is reported that a few serial numbers below 999P were completed.
Calibre	- the calibre designation is usually stamped on the barrel as ".22 L.R" or ".22 MAG". Examples that are marked ".22 CAL" were units that left the factory with dual cylinders in 22 LR and 22 MAG or late production single cylinder guns. - beginning in 1964 cylinders were also stamped with the calibre designation.
Other Markings	- the bottom of the grip frame will have an engraved scroll pattern that was introduced in 1961. The front of the trigger guard will usually bear the "Verified Proof" mark (VP in a triangle), the rear of the trigger guard will usually bear a final inspection mark in the form of an alpha character or numeral (introduced in the late 1960's).
Remarks	- Colt used the letters "Q", "F", "K" and "P" when referring to the description of the receiver/frame and size of the frame. - "Q" and "F" were used to denote a lightweight receiver/frame available in a duotone or a complete, blued finish. - "K" was a heavier receiver/frame, available in a complete nickel finish. - "P" was the same as the "K" but was available in a complete blued finish.

- this firearm started life as the "ASTRA" model "2000" made in Spain in calibre 22 SHORT.
- it then became the "ASTRA" model "CUB" for North American export/consumption in 1954.
- in 1956 with a 102MM barrel length it became the "CAMPER". The "CAMPER" and "CUB" are identical except for a drift-adjustable rear sight on the "CAMPER" and the longer barrel on the "CAMPER".
- in 1956 the "CUB" was introduced in a new calibre, 25 AUTO or 6.35MM.
- in 1958 "ASTRA" started manufacturing the "CUB" as the "COLT" model "JUNIOR COLT" in both 22 SHORT & 25 AUTO. The USA Gun Control Act of 1968 put an end to the importation of the "COLT" model "JUNIOR COLT".
- post 1968, "Firearms International" had receiver/frames manufactured for them in the USA and imported parts from "ASTRA", assembling pistols which were sold as the "US MADE" "COLT AUTO" calibre 25 AUTO between 1970 and 1973 when Colt discontinued the model.
- the tooling for the US manufactured receiver/frame was then sold to "Firearms Import/Export (FIE)" of Miami, Florida who subsequently assembled about 20,000 pistols in 25 AUTO calibre under the name of the "FIE" model "THE BEST" between 1980 and 1985.
- as of 1999 the "ASTRA CUB" is manufactured in Spain under the "ASTRA" trade name only and is currently available only in 25 AUTO calibre. The 22 SHORT calibre having been discontinued in 1980.

- these firearms may or may not be original Springfield Armory manufactured Colt pistols.
- it is certain that the US Government Arsenal building National Match Pistols would not restrict themselves to original Springfield Armory pistols.

Notes

Make

- make is marked on the top of the barrel.

Model

- introduced in 1907 and discontinued in 1943.
- model designation is marked on the left or right side of the barrel as:
"POLICE POSITIVE" in two lines, one large "P" is shared by both words.
- manufactured from 1907 to 1939 on the Colt small frame and from 1927 to 1943 on the Colt's Police Positive 38 large frame.
- features include: double action trigger mechanism, blued or nickel finished receiver/frame and barrel, fluted cylinder; enshrouded ejector rod; fixed half moon front sight with fixed channel top strap rear sight and grip panels may be made of rubber or wood with "COLT" marked on them.
- special order gold and silver plated finishes were available in various combinations. Grip panels were also available in pearl or ivory.

Manufacturer

- manufacturer's designation is marked on top of the barrel as:
- from 1907 to 1926:
"COLT'S PT.F.A.MFG. CO. HARTFORD, CT.U.S.A."
"PAT'D AUG. 5, 1884 JUNE 5, 1900 JULY 4, 1905"
- from 1926 to 1943:
"COLT'S PT. F.A. MFG. CO. HARTFORD, CT. U.S.A."
"PAT'D AUG. 5, 1884 JULY 4, 1905. OCT. 5, 1926"
- the 'rampant colt' logo is marked on the left side of the receiver/frame above the grip.
- from 1907 to 1909 the 'rampant colt' logo was within a circle marking of:
"COLT"S NEW POLICE".

Serial Number

- serial number is marked on the crane and on the receiver/frame facing the crane.
- serial number range is a continuation of the New Police Model. Numbering started at approximately 49500 and continued to 239000. The serial range was shared with the Police Positive Target until approximately 200000 at which time the range was dedicated to the "Police Positive 32".
- Colt also produced a 32 calibre model in this series based on the 38 calibre receiver/frame; it was introduced in 1927 and was serial numbered from 300000 on up.
- apparent anomalies in serial numbers can occur due to parts which interchange between models and the fact that some model designations appear on the barrel only.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- calibre designation is marked on the left side of the barrel.
- the 32 calibre was available with smooth bored barrel.
- Colt advertising lists a number of calibres as being available in this model firearm such as:
- 32 S&W LONG, 32 COLT NEW POLICE, 32 S&W SHORT or 32 S&W.
- 32 LONG COLT and 32 SHORT.
- in fact Colt revolver cylinders had chambers which were cut for the longest of a variety of cartridge case lengths of the same approximate calibre cartridge. The shorter cartridges chamber and fire in the long chamber in much the same way that 38 SPL cartridges will chamber and fire in a revolver chambered for the 357 MAG cartridge.

Other Markings

- there may be various other markings on the Colt "Police Positive 32" applied by several law enforcement and private agencies. These markings are normally on the backstrap or the butt.

Notes

Make

- make is marked on the top of the barrel.

Model

- introduced in 1908.
- model designation is marked on the left side of the barrel as "POLICE POSITIVE" in two lines, one large "P" is shared by both words, followed by the calibre. From 1949 on, the model designation was marked on the left side of the barrel in one line as "POLICE POSITIVE SPECIAL".
- modifications were made to this model over the years of its production. For this reason, references are made to First Issue, Second Issue, etc.
- features include: double action trigger mechanism; blued or nickled finish receiver/frame and barrel; fluted cylinder; unshrouded ejector rod; fixed half moon front sight with a fixed channel along the top strap and the grip panels may be made of rubber or wood with "COLT" marked on them.

- grip panels were also available in pearl or ivory.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- manufacturer's designation is marked on the top of the barrel as:
- from 1908 to 1926:
"COLT'S PT. F.A. MFG.CO. HARTFORD, CT. U.S.A."
"PAT'D AUG. 5, 1884 JUNE 5, 1900, JULY 4, 1905"
- from 1926 to 1949:
"COLT'S PT. F.A. MFG. CO. HARTFORD, CT. U.S.A."
"PAT'D AUG. 5, 1884, JULY 4, 1905, OCT. 5, 1926".
- or on the right side of the barrel as:
- from 1949 to 1955:
"COLTS MFG. CO. HARTFORD, CONN. U.S.A."
- from 1955 on:
"COLTS PT.F.A. MFG. CO. HARTFORD, CONN. U.S.A."
- the 'rampant colt' logo is marked on the left side of the receiver/frame above the grip.

Serial Number

- serial numbering began at 1 and continued unbroken to approximately 325000 at which point, in 1926, the Detective Special model was included in this numbering series. Numbering continued to approximately 501817, which marked the end of the "old series".
- in 1948, a new series started at 510001 and ended at approximately 519410.
- another new series was started at 525001. This ran through to 1966 where it reached approximately 890800. Numbers between 890800 and 900101 have been observed. At this time a new series was introduced starting at D900101, with the "D" prefix remaining consistent. This series continued to D999999.
- numbering then became:
A10000 to A59999
B01001 to B59999
C01001 to C60000
F01001 to F60000
H01001 to H60000
M01001 to M51999

- 38 SPL, 38 LONG COLT, 38 SHORT COLT or 38-44 S&W.
- in fact Colt revolver cylinders had chambers which were cut for the longest of a variety of cartridge case lengths of the same approximate calibre cartridge. The shorter cartridges chamber and fire in the long chamber in much the same way that 38 SPL cartridges will chamber and fire in a revolver chambered for the 357 MAG cartridge.

Shots

- swing-out cylinder.

Other Markings

- there may be various other markings on the Colt "Police Positive Special" applied by several law enforcement and private agencies. These markings are normally on the backstrap or the butt.
