Model	- this is a generic entry for those firearms that are not identifiable beyond being one of the several variations of the Colt produced "1911A1" pistol. Other entries exist that may better identify the firearm being examined. As this type of pistol is one of the most common platforms to use as a basis for a custom pistol or as a complete pistol via the use of surplus or aftermarket parts variations in finish and appearance will exist. - markings on the receiver/frame will bear the Colt name, markings on other parts will vary as slides, barrel's and other components are available from a large number of suppliers.
Action	- recoil operated.
Serial Number	- usually numbered on the right side of the receiver/frame.
Shots	- detachable box magazine housed in the grip.

Notes

Make

- "Colt Brevete" ("Colt Patent") is marked on top of the barrel; this is a licenced copy of a Colt revolver made for the European market.

Model

- "Colt Brevete" or "Colt Patent" is marked on top of the barrel; this is a licenced Belgian copy of the 1848 3rd Model Dragoon revolver, manufactured by Nicholas Gilon, of Liege, Belgium.
- features include: blued finish; bead front sight with hammer notch rear sight; round barrel transitioning to flat-sided, octagonal-topped barrel assembly; cross-wedge through the cylinder pin retained by a screw; spring-loaded under barrel loading rammer; cavalry scene on an unfluted cylinder; brass trigger guard and grip-frame; single-action trigger mechanism; walnut grips.

Manufacturer

- "NG" or "N GILON" is marked on the firearm.
- Nicholas Gilon was one of several Belgian manufacturers who were originally licenced to produce Colt revolvers for the European market after Colt's London Exhibition in 1851; by the end of the decade, both licenced and unlicenced manufacturers had made so many copies of Colt's revolvers that Colt realized the danger they posed to his US market, and he let these licencing agreements lapse, warning his customers against "inferior foreign copies" of his guns. Nicholas Gilon is widely regarded as one of the best, most faithful copies of the Colt revolver, and Gilon continued producing unlicenced copies of various Colt revolvers well after his licencing agreement with Colt ended.

Action

- single-action percussion revolver.

- "COLT SINGLE ACTION BUNTLINE SCOUT" is usually marked on the left side of the barrel.
- "Rampant Colt" horse logo is usually marked on the left side of the receiver/frame.

Model

- manufactured from 1957 to 1971.
- "COLT SINGLE ACTION BUNTLINE SCOUT" or "COLT SINGLE ACTION SCOUT BUNTLINE and ".22 CAL.", ".22 L.R.", or ".22 MAGNUM" is usually marked on the left side of the barrel.
- there are no "Patent Dates" marked on this revolver.
- total production is approximately 47,354 units.
- features include: fixed blade front sight and a groove and notch in the top strap of the receiver/frame for a rear sight; round barrel with a right side mounted ejector rod assembly; solid top receiver/frame with a removable fluted cylinder and right side mounted swing down loading gate; exposed spur hammer; single action trigger mechanism; grip panels may be made of wood, black plastic with a picture of the "Rampant Colt" horse logo or a white plastic stag like design; blued, nickel or a duo-tone finish.
- duo-tone finish included a natural metal finished receiver/frame, grip frame, triggerguard, loading gate, and the sides of the hammer. The top and the bottom of the hammer were blued. The barrel, ejector rod assembly, cylinder, and trigger were blued.
- "Buntline Scout" was available in a convertible version with two cylinders. One cylinder for the 22 LR cartridge, and a second cylinder for the 22 MAG cartridge.
- this revolver was also available with a 114, 120 or a 152mm barrel as the Colt "Frontier Scout". Colt also offered a similar model as the "Frontier Scout Buntline '62".

Manufacturer

- "COLT'S PT. F. A. MFG. CO. HARTFORD CT. U.S.A." is usually marked on the top of the barrel.

Action

- solid receiver/frame revolver with right side loading gate.

Serial Number

- serial number is marked on the underside of the receiver/frame in front of the trigger guard.

Notes

Make

- the make is normally marked on top of the barrel as:
"COLT'S PT.F.A.MFG. Co."
"HARTFORD CT.U.S.A.".
- the markings will read from the muzzle towards the breech.

Model

- manufactured from 1870 to 1890.
- "No1" is normally marked on top of the barrel.
- may also be known as "First Model Derringer".
- total production is approximately 6,500.
- the Derringer No 1 can be identified by the complete metal construction, there are no wooden grip panels, the spur trigger and the grip, which give the appearance of forming a "C" when looking at the derringer from the side.
- the "Derringer No 2" is easily distinguished from the Derringer No 1 as the No 2 has a bird's-head grip with wood grip panels.
- the derringer is loaded by rotating the barrel downward towards the left.
- features include: single action spur trigger mechanism, an iron, nickel plated, or silver plated receiver/frame, the oval barrel was blued, nickel plated or silver plated, the front sight is a fixed half moon blade with a notch on the hammer spur for a rear sight, a case hardened hammer and trigger and metal grip.
- an error was made on a few "Derringer No 1" in which the barrels were marked, "No 2". These derringers will have the "Derringer No 1" receiver/frame and matching serial numbers on both the barrel and the receiver/frame.

Manufacturer

- the manufacturer is normally marked on top of the barrel as:
"COLT'S PT.F.A.MFG. Co."
"HARTFORD CT.U.S.A.".
- the markings will read from the muzzle towards the breech.

Action

- rotating barrel, single shot firearm.
- derringer is loaded by rotating the barrel downward towards the left.

Notes

Make

- the make is normally marked on top of the barrel as, "COLT".
- on approximately the first 2,000 deringers the "COLT" will be marked without an angle. The "COLT" marking was then changed to include an angle towards to the right side.
- on some of the deringers sold through Colt's London Agency, the left side of the barrel may be marked:
"COLT'S FIRE ARMS CO."
"14 PALL MALL LONDON".
- the markings will read from the muzzle towards the breech.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured from 1875 to 1910 or 1912.
- model designation is not marked on the firearm.
- may also be known as "Third Model Derringer" or "Thuer Model".
- total production is approximately 49,000.
- the "Derringer No 3" can be identified from the Colt Derringer No 1 and No 2 by the way the No 3 is loaded. Instead of the oval barrel rotating downward towards the left side, the round barrel pivots horizontally towards the right side.
- features include: single action spur trigger mechanism, the brass receiver/frame with a bird's-head grip was normally nickel plated, or silver plated, the round barrel was blued, nickel plated or silver plated, the front sight is a fixed half moon blade with a notch on the hammer spur for a rear sight, a case hardened spur hammer and trigger, and walnut, ivory, pearl, rosewood, horn, or ebony grip panels.

- There are five variations of the "Derringer No 3":
- Variation 1: Brass frame, high hammer, larger barrel swivel bolster; short, curved grip. Less than 500 were manufactured.
- Variation 2: Bronze frame, high hammer, larger barrel swivel bolster; short, curved grip. Less than 2000 were manufactured.
- Variation 3: High hammer, no barrel swivel bolster; short, curved grip. Approximately 13,000 of these were manufactured.
- Variation 4: Sloping hammer, no barrel swivel bolster; short, curved grip.
- Variation 5: Sloping hammer, no barrel swivel bolster; long, curved grip.

Manufacturer

- manufacturer is marked on top of the barrel.
- the manufacturer is normally marked on top of the barrel as, "COLT".
- on approximately the first 2,000 deringers the "COLT" will be marked without an angle. The "COLT" marking was then changed to include an angle towards to the right side.
- on some of the deringers sold through Colt's London Agency, the left side of the barrel may be marked: "COLT'S FIRE ARMS CO." over "14 PALL MALL LONDON".
- the markings will read from the muzzle towards the breech.
- the Colt rampant colt logo with the letter "C" may also be marked on the receiver/frame of some of the deringers sold through Colt's London Agency.

Action

- horizontal pivoting barrel, single shot firearm.
- derringer is loaded by pivoting the barrel horizontally towards the right.

Serial Number

- serialization started at 1 and continued unbroken to approximately 49,000.
- serial numbers are stamped on the left side of the grip strap, under the grip plate and may be repeated on the bottom of the barrel.
- note; research indicates that date of manufacture by serial number cannot be determined based on exisiting records.
- The serial number range is believed to have been started over three times.

Calibre

- "41 Cal." is stamped on the left side of the receiver/frame.

Canadian Law Comments

- NOTE: some firearms manufactured prior to 1898 are deemed to be "ANTIQUE" and as such are not subject to registration under Canadian law. For further clarification refer to the "Antique Firearms Regulations".

Other Markings

- Colt - London production usually marked as follows:
 "COLT" or "COLT'S FIREARMS CO 14 PALL MALL LONDON"
- those sold in England will usually be marked with British proofmarks on the bottom of the barrel in front of the receiver/frame.
- English retailers frequently marked their names on the firearms they sold. Encountered names include: Thuer; W. Watson & Son; Williams & Powell; Cogswell & Harrison Ltd;

- serial number is marked in the crane cut out area of the receiver/frame.
- for the First Issue, serialization was shared with the "Police Positive Special" Model. It started at 331000 and continued unbroken to approximately 501817, which marked the end of the Old series.
- serial number 510001 is considered the start of the New Series which ended at approximately 519410.
- the New Series was replaced with the New Start at 525001. At approximately 890800 the numbering skipped to D900101 and continued to D999999. Letter prefixes in the serial number began after 1966. Numbering then became:
A10000 to A59999
B01001 to B59999
C01001 to C60000
F01001 to F60000
H01001 to H60000
M01001 to M51999
01001M to 59999M
01001R to 59999R
S01001 to an unknown range.

Calibre

- the calibre designation is marked on the left side of the barrel.
- Colt advertising list a number of calibres as being available in this model firearm such as:
32 S&W LONG, 32 COLT NEW POLICE, 32 S&W SHORT or 32 S&W
or
38 SPL, 38 LONG COLT, 38 SHORT COLT or 38-44 S&W.
- In fact, Colt revolver cylinders had chambers which were cut for the longest of a variety of cartridge case lengths of the same approximate calibre cartridge. The shorter cartridges chamber and fire in the long chamber in much the same way the 38 SPL cartridges will chamber and fire in a revolver chambered for the 357 MAG cartridge.

Notes

Make

- "Colt" and the Colt "pony" logo are marked on the firearm.

Model

- "Detective Special" is marked on the barrel, with "bijan" in gold-filled script marked on the left sideplate.
- this is one of a limited number of Detective Special revolvers manufactured by Colt in 1993, to fill an order for custom revolvers by Bijan Pakzad, a Beverly Hills and New York fashion designer who was known for attaching his name to fragrances and clothing.
- although somewhere between 100 and 200 of these revolvers were ordered, only about 30 were ever delivered for sale through Bijan (at a cost of ~$10,000 each), and the remainder were sold by Colt through retail.
- features include: standard Detective Special layout and operation; high-polish blued finish with gold-plated cylinder, ejector-rod, and cylinder latch; gold-accented "bijan" signature and sight accents; and black suede or mother of pearl grips.

Manufacturer

- "Colt" and the Colt "pony" logo are marked on the firearm.

Notes

Make

- "COLT'S PT. F.A.MFG.CO. HARTFORD CT.U.S.A." is marked on the barrel rib and "COLT'S PT. F.A.MFG.CO." is marked on the lockplates.

Model

- the model designation is not marked on the firearm.
- this is a side by side, exposed-hammer double rifle, originally based on the 1878 shotgun; approximately 40 of these rifles were made, primarily for friends and associates of Caldwell Colt, Samuel Colt's "nephew"/son.
- these rifles were manufactured from 1878 to 1885, and most came with two sets of barrels; a smoothbore set in 20 gauge, and a rifled set in 45-70 GOVT, 45-85 EXPRESS, 45-90, or 45-100.
- the rifled barrel sets of these rifles were rifled with a left-hand twist in the left barrel, and a right-hand twist in the right barrel, to make it easier to regulate the barrels to the same point of impact.
- these rifles were top-lever opening, with double triggers, had open adjustable sights, and were normally fitted with walnut half-pistol-grip stocks and schnabel-tipped forearms.

Manufacturer

- "COLT'S PT. F.A.MFG.CO. HARTFORD CT.U.S.A." is marked on the barrel rib and "COLT'S PT. F.A.MFG.CO." is marked on the lockplates.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- side by side pattern.
Serial Number	- numbered on water table and barrel lug; the first two rifles were serial-numbered 293 and 307 (having been taken from the 1878 shotgun production line), and the remaining rifles numbered sequentially from 1 to ~40.

Notes

Make

- "COLT'S PT. F. A. MFG. CO. HARTFORD, CT. U.S.A." is usually marked on the top of the barrel.
- "Rampant Colt" horse logo is marked on the left side of the receiver/frame.

Model

- manufactured from 1962 to 1971.
- "FRONTIER SCOUT '62" and ".22 CAL.", ".22 L.R." or ".22 MAG." is usually marked on the left side of the barrel.
- "Frontier Scout '62" was also available in a "Buntline" version with a 241mm (9 ½") barrel.
- " '62 series " with a blued finish were also known as the model "P" to differentiate it from the previous "K" series revolvers that had a nickel finish.
- this model was also available as a "brace" of two consecutively numbered revolvers or with a "Frontier Scout Buntline '62" as a matched pair.
- a total of 23,826 "Frontier Scout '62's" were produced in calibre 22 LR, another 3,521 were produced in calibre 22 MAG and 32,996 were produced with dual cylinders.
- features include: blade front sight and a channel/notch in the top strap for a rear sight; round barrel; ejector rod and housing mounted on the right side of the barrel; solid top receiver/frame with a removable fluted cylinder and loading gate mounted on the right side; exposed spur hammer; single action trigger mechanism; plastic "Staglite" grip panels; blued finish.
- Colt offered some special order options such as different grips, engraving and finish so variations may be encountered.
- a similar version, known as the "Frontier Scout" was also available.

Manufacturer

- "COLT'S PT. F. A. MFG. CO. HARTFORD, CT. U.S.A." is usually marked on the top of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the underside of the receiver/frame in front of the trigger guard.
- '62 series (Frontier Scout and Frontier Scout Buntline) serial numbers started with 999P and continued to 68088P. It is reported that a few serial numbers below 999P were completed.

Calibre

- the calibre designation is usually stamped on the barrel as ".22 L.R" or ".22 MAG". Examples that are marked ".22 CAL" were units that left the factory with dual cylinders in 22 LR and 22 MAG or late production single cylinder guns.
- beginning in 1964 cylinders were also stamped with the calibre designation.

Other Markings

- the bottom of the grip frame will have an engraved scroll pattern that was introduced in 1961. The front of the trigger guard will usually bear the "Verified Proof" mark (VP in a triangle), the rear of the trigger guard will usually bear a final inspection mark in the form of an alpha character or numeral (introduced in the late 1960's).

Remarks

- Colt used the letters "Q", "F", "K" and "P" when referring to the description of the receiver/frame and size of the frame.
- "Q" and "F" were used to denote a lightweight receiver/frame available in a duotone or a complete, blued finish.
- "K" was a heavier receiver/frame, available in a complete nickel finish.
- "P" was the same as the "K" but was available in a complete blued finish.

Notes

Make

- "COLT'S PT. F. A. MFG. CO. HARTFORD CT. U.S.A." is usually marked on the top of the barrel.
- "Rampant Colt" horse logo is marked on the left side of the receiver/frame.

Model

- manufactured from 1962 to 1971.
- "FRONTIER BUNTLINE SCOUT '62" or "FRONTIER SCOUT BUNTLINE '62" and ".22 CAL.", ".22 L.R.", or ".22 MAG." is usually marked on the left side of the barrel.
- "BUNTLINE" in the model designation denotes the use of a 241mm (9 ½") barrel. - "FRONTIER SCOUT '62" was equipped with a 121 mm (4 ¾") barrel.
- " '62 series " with a blued finish were also known as the model "P" to differentiate it from the previous "K" series revolvers that had a nickel finish.
- this model was also available as a "brace" of two consecutively numbered revolvers or with a "Frontier Scout '62" as a matched pair.
- a total of 3,219 "Frontier Scout Buntline '62's" were produced in calibre 22 LR, another 1,467 were produced in calibre 22 MAG and 254 were produced with dual cylinders.
- features include: blade front sight and a groove and notch in the top strap of the receiver/frame for a rear sight; round barrel with a right side mounted ejector rod and housing; solid top receiver/frame with removeable fluted cylinder and swing down loading gate is mounted on the right side; exposed spur hammer; single action trigger mechanism; plastic "Staglite" grip panels; blued finish.
- Colt offered some special order options such as different grips, engraving and finish so variations may be encountered.
- a similar model, known as the "Buntline Scout" was also offered by Colt.

Manufacturer

- "COLT'S PT. F. A. MFG. CO. HARTFORD CT. U.S.A." is usually marked on the top of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the underside of the receiver/frame in front of the trigger guard. - '62 series (Frontier Scout and Frontier Scout Buntline) serial numbers started with 999P and continued to 68088P. It is reported that a few serial numbers below 999P were completed.
Calibre	- the calibre designation is usually stamped on the barrel as ".22 L.R" or ".22 MAG". Examples that are marked ".22 CAL" were units that left the factory with dual cylinders in 22 LR and 22 MAG or late production single cylinder guns. - beginning in 1964 cylinders were also stamped with the calibre designation.
Other Markings	- the bottom of the grip frame will have an engraved scroll pattern that was introduced in 1961. The front of the trigger guard will usually bear the "Verified Proof" mark (VP in a triangle), the rear of the trigger guard will usually bear a final inspection mark in the form of an alpha character or numeral (introduced in the late 1960's).
Remarks	- Colt used the letters "Q", "F", "K" and "P" when referring to the description of the receiver/frame and size of the frame. - "Q" and "F" were used to denote a lightweight receiver/frame available in a duotone or a complete, blued finish. - "K" was a heavier receiver/frame, available in a complete nickel finish. - "P" was the same as the "K" but was available in a complete blued finish.

Notes

Make - the make is marked on the left side of the slide as, "COLT".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- manufactured from 1983 to 1998. - Markings: on left side of slide "COLT MK IV - SERIES 80"; on right side of slide "GOVERNMENT MODEL" and on right side of receiver/frame "COLT'S PT.F.A. MFG. CO. HARTFORD, CONN, U.S.A. - manufactured in carbon steel and stainless steel. - features include: single action trigger mechanism; blued, nickel or stainless steel finished receiver/frame and slide; grip safety; may have an ambidextrous slide safety; a fixed ramp front sight with a fixed notch or adjustable rear sight; a serrated combat hammer; and the grip panels may be checkered walnut or black rubber. - the Government Model O Series XSE features: cocking serrations on the forward and rearward sides of the slide, skeletonized hammer and trigger, beavertail grip safety, flat mainspring housing, and an ambidextrous safety.
Manufacturer	- the manufacturer is marked on the right side of receiver/frame as: "COLT'S PT.F.A. MFG. CO. HARTFORD, CONN, U.S.A.
Action	- recoil operated.
Serial Number	- serial number is marked on the right side of the receiver/frame above the trigger. - first variation : seven (7) characters: prefixed with two (2) alphabetic letters and then five (5) Arabic numbers (eg. FG01000). - second variation: eight (8) characters: prefixed by two (2) alphabetic letters, five (5) Arabic numbers and suffixed with the letter "E" (eg. SG01000E).
Calibre	- the calibre designation may be marked on the top of the barrel, visible through the ejection port.
Shots	- detachable box magazine, magazine capacity increased to eight in 1992.
Remarks	- in 2001 an XSE Series was introduced. - accessories have been manufactured which convert a 1911-A1 receiver/frame from a semi-automatic, repeating firearm to a single shot handgun. Two examples are the Pachmayr Dominator and the Springfield Armory 1911-A2 S.A.S.S. By removing the existing slide and barrel on a 1911-A1 receiver/frame, and installing either the Pachmayr Dominator or the Springfield Armory conversion units a handgun can be converted from a semi-automatic firearm to a single shot firearm. - the Pachmayr Dominator was manufactured from 1988 to 1994. The right side of the unit was marked "DOMINATOR". This unit was bolt operated and available in calibres 22 HORNET, 223 REM, 7MM-08 REM, 308 WIN, 35 REM, and 44 MAG. The barrel length was 356mm, except for the 44 MAG. The 44 MAG had a barrel length of 267mm. The barrel is drilled and tapped for a scope mount. The unit may have a serial number. This serial number should not be mistaken for the serial number on the receiver/frame. - the Springfield Armory 1911-A2 S.A.S.S. was manufactured from 1989 to 1992. The right side of the unit was marked "SPRINGFIELD ARMORY". The left side of the unit was marked "1911-A2 SASS". This unit is broken open to expose the chamber, and was available in calibre 22 LR, 223 REM, 7MM-08 REM, 7MM BR REM, 308 WIN, 357 MAG, 358 WIN, and 44 MAG. Two-barrel lengths were available, 273mm and 379mm. The barrels were interchangeable. The unit may have a serial number. - the "rampant colt" trademark is stamped to the right of the patent information on the left side of the slide.

Remarks

- this firearm started life as the "ASTRA" model "2000" made in Spain in calibre 22 SHORT.
- it then became the "ASTRA" model "CUB" for North American export/consumption in 1954.
- in 1956 with a 102MM barrel length it became the "CAMPER". The "CAMPER" and "CUB" are identical except for a drift-adjustable rear sight on the "CAMPER" and the longer barrel on the "CAMPER".
- in 1956 the "CUB" was introduced in a new calibre, 25 AUTO or 6.35MM.
- in 1958 "ASTRA" started manufacturing the "CUB" as the "COLT" model "JUNIOR COLT" in both 22 SHORT & 25 AUTO. The USA Gun Control Act of 1968 put an end to the importation of the "COLT" model "JUNIOR COLT".
- post 1968, "Firearms International" had receiver/frames manufactured for them in the USA and imported parts from "ASTRA", assembling pistols which were sold as the "US MADE" "COLT AUTO" calibre 25 AUTO between 1970 and 1973 when Colt discontinued the model.
- the tooling for the US manufactured receiver/frame was then sold to "Firearms Import/Export (FIE)" of Miami, Florida who subsequently assembled about 20,000 pistols in 25 AUTO calibre under the name of the "FIE" model "THE BEST" between 1980 and 1985.
- as of 1999 the "ASTRA CUB" is manufactured in Spain under the "ASTRA" trade name only and is currently available only in 25 AUTO calibre. The 22 SHORT calibre having been discontinued in 1980.

Notes

Make

- marked on the top of the barrel.

Model

- this firearm is a pump-action rifle made by Colt between 1884 and 1904, in various grades of finish, engraving, etc.
- these rifles could be ordered with a wide variety of factory options (engraving, half-round barrels, tang sights, crescent butt-plates, straight or pistol-grip walnut stocks, etc.)
- available in three frame sizes and sold in rifle or carbine formats.

Manufacturer

- manufacturer's designation is marked on the top of the barrel as:
"COLT'S PT.F.A. MFG, CO. HARTFORD CT. U.S.A."

Action

- commonly refered to as the Colt Slide Action.

Serial Number

- marked on the receiver/frame and on major sub-assemblies; additionally, each of the three frame types were serial-numbered within their own ranges. Thus, small-frame Lightnings were numbered from 1 to 89777, medium-frame Lightnings were numbered from 1 to 89912, and large-frame Lightnings were numbered from 1 to 6496.

Calibre

- a variety of calibres were available in the large frame version.
- medium-frame Lightnings may be marked "32 CLMR" (32-20 WIN), "38 CLMR" (38-40 WIN), or "44 CLMR" (44-40 WIN). "CLMR" is an abbreviation of "Colt Lightning Magazine Rifle".
- some of the 44-40 WIN-chambered Lightnings were smoothbores, for exhibition serial shooting.
- marked on the top of the barrel.
- the calibre designation "45-85-285" as marked on those rifles so chambered is completely interchangeable with the 45-90 WIN (so listed) chambering.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- has a full length tube magazine and a right side feed port; additionally, half- or three-quarter-length magazines could be ordered.
-the small-frame (22 calibre) Lightnings have a pivoting brass feed-block, that has to be turned out of the receiver to load the rifle.

Notes

Make

- the make is not marked on the firearm.

Model

- "M16A1" was observed on the left side of the receiver/frame magazine housing.
- identical specifications and in operation to the model M16A1 manufactured by Colt.
- features include: round barrel with bayonet lug and prong or "birdcage" flash hider; two-piece receiver/frame with carrying handle and forward bolt assist closing mechanism on the top unit; three position selector lever with "SAFE", "SEMI" and "AUTO" marked on the left side of the lower receiver/frame; post front sight and rear adjustable peep sight; grey/black anodized or parkerized metal surfaces; black plastic buttstock and two-piece triangular forend.

Manufacturer

- "HYDRA-MATIC DIV." over "G.M. CORP." over "U.S.A." was observed on the left side of the receiver/frame.
- due to the demand for rifles, which outstripped Colt's production ability, the decision to award "second source" contracts for M16A1 rifles was made. On April 19, 1968 Harrington & Richardson of Worcester, Massachusetts and Hydra-Matic, a division of GMC based in Ypsilanti, Michigan were awarded contracts that called for initial deliveries in February of 1969. The contracts called for each firm to supply 240,000 rifles with production reaching a maximum output of 25,000 rifles per month by November of 1969.

Action

- gas operated.

Serial Number

- the serial number is marked on the left side of the magazine housing.
- the serial number range on the Hydra-Matic produced M16A1 rifle began at 3,000,000.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- "CAL.5.56MM" was observed on the left side of the receiver/frame magazine housing.
Shots	- detachable box magazine.
Other Markings	- "PROPERTY" over "OF U.S. GOVT." was observed below the company logo.

Notes

Make
- the Make will be found marked on the left-hand side of the receiver/frame, both in writing and by registered trademark.

Model
- this firearm is a "special order" model.
- it was specifically ordered as an M16A2 in military configuration and modified at the factory to be capable of semi-automatic fire only.

Manufacturer
- the manufacturer's name will be found marked on the left-hand side of the receiver/frame, both in writing and by registered trademark.

Action
- gas operated.

Serial Number
- serial number rationalization for this limited production model is as follows: the letter A followed by seven numbers.

Remarks
- these firearms were ordered from Colt by the RCMP.
- the customer specified that the firearm be modified to fire semi-automatic only.
- the Colt Factory converted them from FA to SA, therefor the ACTION is Commercial Version (CV).
- apart from the conversion these firearms are indistinguishable from the FA version of the M16A2.

Model

- Ithaca, Singer Manufacturing Co., Union Switch & Signal and Remington Rand all produced M1911A1 US Army models during World War II under Colt license.
- the 1911A1's modifications of the 1911 include the recessing of the receiver/frame behind the trigger, the angle of the back strap and size of the grip safety.
- the M1911A1 US Army was manufactured from 1925 to 1945.
- reintroduced in 2001, new production of this model is limited to approximately 4000 units.
- markings on the reintroduced pistol are consistent with the earlier production series.

Action

- recoil operated.

Serial Number

- serial number is located on the right side of the receiver/frame.
- serial number is prefixed by "No" and is the abbreviation for "number".
- approximate range: 700001 to 800000, 1096405 to 1208673, 1609529 to 1743846 and 2134404 to 2380013.
- serial number rationalization for pistols manufactured in 2001 differs from that of the original production run.
- newly manufactured pistols bear a serial number consisting of a "WMK" prefix followed by four numbers ranging from 0001 to approximately 4000.

Calibre

- Colt manufactured a conversion unit that converted Government and National Match Models from calibre 45 AUTO to calibre 22 LR.

Shots

- detachable box magazine.
- aftermarket magazines are available that increase the shot capacity.

- Matthew S. Browning passed away in 1923, and his son Marriner Browning joins the organization.
- John Moses Browning passed away on November 26, 1926.
- Browning Brothers Co. was renamed "The Browning Arms Company" circa 1927.
- Browning Arms Company's (BAC) headquarters was located in Morgan, Utah, U.S.A. in 2004.
- Browning firearms have been manufactured by many companies including Fabrique Nationale Herstal (FN) of Belgium, Beretta of Italy, Miroku Firearms Manufacturing Company of Japan, Sig-Sauer of Germany, Remington, and the Browning Group (A.T.I. in Salt Lake City, Utah, and FNMI in Columbia, South Carolina U.S.A.).

Model	- "Colt Automatic Machine Rifle" / "Model 1925 - Cal. (calibre) / "Browning Pat. Feb. 4, 1919" / "Colt's Pat. Fire Arms Mfg. Co." / "Hartford, Conn. U.S.A." / "No. (serial number) is marked on the top side of the receiver/frame. - the Models 1919, 1924 and 1925 were manufactured between 1919 and 1935. - after the First World War, Colt and FN were the two manufacturers that were licenced by Browning to produce the Browning Automatic Rifle for commercial, foreign and domestic sales (each with their own allowed sales areas); while FN had the rights to sell this design in most of Europe and Australia, Colt was allowed similar rights in North & South America, Russia, and other parts of Europe. - Colt eventually produced a number of distinct variations of the "Colt Automatic Machine Rifle", including the Colt "Monitor", a shortened lightweight version of the CAMR made specifically for police and armed guard use. - the Model 1919 was the "basic military" version of the CAMR, that resembled a lightweight 1918 BAR without a flash hider; features included: walnut stock and forearm; open adjustable sights; folding integral bipod; pivoting ejection-port cover; and detachable box magazine. - the Model 1924 was an upgraded version of the Model 1919, with the addition of a BAR-D-style pistol-grip; a heavier forearm than on the Model 1919; some versions manufactured with covers for the ejection port and magazine well; and a "quick-change" bolt, which did not require the entire rifle to be stripped down for changing. - the Model 1925 was a further upgraded version of the Model 1924, with the BAR-D-style pistol-grip; covers for the ejection port and magazine well; a heavy ribbed barrel for heat dispersion during sustained fire; and some versions were manufactured with what was considered at the time to be a "quick-change" barrel.
Manufacturer	- the manufacturer's name and address are marked on the firearm.
Action	- gas-operated.
Serial Number	- the serial number is marked on the top side of the frame/receiver. - observed serial numbers had a letter "C" prefix followed by six sequential numbers, eg. "NO. C-100000".
Calibre	- variations of this firearm were manufactured in a number of calibres for foreign sales, including .30-06 Springfield, 8mm Mauser, 7x57 Mauser, 7.65 Argentine Mauser, 6.5x55 Swedish Mauser, and .303 British.
Shots	- detachable box magazine.

Notes

Model

- approx. 15,500 were manufactured from 1955 to 1965.

Manufacturer

- Springfield Armory manufactured approximately 15,000 National Match M1911A1 Pistols between 1955 and 1965.
- these firearms may or may not be original Springfield Armory manufactured Colt pistols.
- it is certain that the US Government Arsenal building National Match Pistols would not restrict themselves to original Springfield Armory pistols.

Serial Number

- the serial numbers may be consistent with any of the Colt Military Contractor's serial number rationalizations.
- do not confuse this firearm with anything manufactured by the "New" Springfield Armoury Inc".

Other Markings

- the Springfield Armory acceptance stamp (SA) will be found on the right side of the frame or receiver and the National Match stamp (NM) appears on the right side of the trigger guard at the top. These marks identify all Springfield Armory, National Match Pistols manufactured between 1955 and 1965.
- original National Match Pistols are extremely rare. They were sold only by the US Government Directorate of Civilian Marksmanship (DCM).
- if the SA and NM stampings do not appear on the firearm - it is not correctly identified to this screen.

Remarks

- Springfield Armory "manufactured" approximately 15,000 National Match M1911A1 Pistols between 1955 and 1965, this was accomplished by taking existing pistols and re-manufacturing them to meet National Match standards.
- these firearms may or may not be original Springfield Armory manufactured Colt pistols.
- it is certain that the US Government Arsenal building National Match Pistols would not restrict themselves to original Springfield Armory pistols.
- the Springfield Armory acceptance stamp (SA) will be found on the right side of the frame or receiver and the National Match stamp (NM) appears on the right side of the trigger guard at the top. Notes

Make

- the make is normally marked on top of the barrel as:
"COLT'S PT. F.A. MFG. CO."
"HARTFORD, CT. U.S.A."
- on revolvers which were sold through Colt's London address, a third line may also be marked as:
"DEPOT 14, PALL MALL LONDON" .

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured from 1880 through c.1886.
- total production estimated at 4,000.
- starting at approximately serial number 22,000, the model designation was etched or stamped on left side of barrel as; "COLT 32", "NEW HOUSE 32", "NEW HOUSE 38", "COLT HOUSE 38", "COLT NEW 38", "NEW HOUSE 41", "COLT HOUSE 41", and "COLT NEW 41".
- the most distinctive details identifying this model compared to the other New Line Colts are the square profile of the butt, 57mm(2 1/4") barrel length with no ejector rod, and the thin loading gate.
- spur trigger, outside hammer.
- nickel plated, or blued with case hardened frame were standard, some specimens were plated in silver, and/or a combination of silver and gold, engraved specimens are extremely rare.
- the cylinder has long flutes with the cylinder stop notches located on the back of the cylinder.
- the left side of the receiver/frame has a distinct round circle with a screw in the middle. The screw is inserted from the right side of the revolver.
- checkered hard rubber grips with "COLT" in an oval on the top.
- some specimens may be stamped with British proofmarks, since a high proportion of these firearms were shipped to England, these stampings are located in the cylinder flutes, and on underside of the barrel.
- a patent date may be marked on the underside of the barrel as, "PAT. SEPT. 15, 1874.".
- limited run of about 25 were fitted with 254mm (10") barrel length, nickel-plated finish, and the butt adapted for a shoulder stock (skeleton type) attachment.

Manufacturer

- the manufacturer is normally marked on top of the barrel as:
"COLT'S PT. F.A. MFG. CO."
"HARTFORD, CT. U.S.A."
- on revolvers which were sold through Colt's London address, a third line may also be marked as:
"DEPOT 14, PALL MALL LONDON" .

Action

- single action.

Serial Number

- the "New House" revolver shared in the same serial number series as the "New Line" and "New Police" model revolvers.
- production started in 1880 at serial number 10,300 and continued through serial number 25700.
- production ceased in 1886.
- total production of the "New House" model revolver is approximately 4000 examples.

Calibre

- caliber marking sometimes found on the left flat of the frame below the cylinder, and sometimes accompanied with letter "C", which stands for centerfire.
- the firearm calibres are etched or roll-stamped on the left side of the barrel as follows: - NEW HOUSE 32 or COLT 32, NEW HOUSE 38 or COLT NEW 38 or COLT HOUSE 38 , NEW HOUSE 41 or COLT NEW 41 or COLT HOUSE 41.
- Colt firearms of the 1875 - 1900 time period, chambered for the cartridge known as 38 LONG COLT, will also chamber and fire the cartridge known as 38 SHORT COLT, in the same manner as 38 SPL may be fired in firearms chambered for the 357 MAGNUM cartridge.
- those Colt firearms of the 1875 - 1900 time period, chambered for the cartridge known as 41 LONG COLT, will also chamber and fire the cartridge known as 41 SHORT COLT.
- those Colt firearms of the 1875 - 1900 time period, chambered for the cartridge known as 32 LONG COLT, will also chamber and fire the cartridge known as 32 SHORT COLT.

Other Markings

- on top of the barrel; "COLT'S PT. F.A. MFG. CO."
"HARTFORD, CT. U.S.A."
or
- specimens with the "London barrel address" ; "COLT'S PT. F.A. MFG. CO"
"HARTFORD CT. U.S.A."
"DEPOT 14, PALL MALL LONDON"
- sometimes marked on the underside of the barrel; "PAT. SEPT. 15, 1874."

Notes

Make

- the make is normally marked on top of the barrel as:
"COLT'S PT. F.A. MFG. CO."
"HARTFORD, CT. U.S.A."
- on revolvers which were sold through Colt's London address, a third line may also be marked as:
"DEPOT 14, PALL MALL LONDON" .

Model

- "New Police" and calibre or "Colt New" and calibre is normally marked on the barrel.
- manufactured between 1882 and 1886
- total production estimated at 4,000.
- distinguishing features: single-action mechanism; spur trigger without a trigger guard; ejector rod similar to the Model 1877 Double Action "Lightning" revolver.
- this firearm is the largest of Colt's "New Line" series of single action, spur trigger, pocket revolvers.
- this revolver became known as the "Cop & Thug" model because it was intended to be marketed to police forces and has a low relief scene on the grips of a police officer arresting a criminal.
- from the cylinder forward, most examples of this revolver strongly resemble a scaled down Single Action Army, except that the cylinder stops are on the rear of the cylinder instead of the radius.
- features include: nickel or blue finish with an ejector rod and housing present on all barrel lengths (except the 57mm barrel examples), right side loading gate, spur trigger and square butt with hard rubber grips.
- the cylinder has long flutes with the cylinder stop notches located on the back of the cylinder.
- the left side of the receiver/frame has a distinct round circle with a screw in the middle. The screw is inserted from the right side of the revolver.
- a patent date may be marked on the underside of the barrel as, "PAT. SEPT. 15, 1874.".

Manufacturer

- the manufacturer is normally marked on top of the barrel as:
"COLT'S PT. F.A. MFG. CO."
"HARTFORD, CT. U.S.A."
- on revolvers which were sold through Colt's London address, a third line may also be marked as:
"DEPOT 14, PALL MALL LONDON" .

Action

- single action revolver.

Serial Number

- production started in 1882 at serial number 14450 and continued through serial number 25700.
- production ceased in 1886.
- total production of the "New Police" model revolver is approximately 4000 examples.
- Note: the "New Police" revolver shared the same serial number series as the "New Line" and "New House" model revolvers.

Calibre

- the firearm calibres are etched or roll-stamped on the left side of the barrel as follows: - NEW POLICE 32 or COLT NEW 32, NEW POLICE 38 or COLT NEW 38, NEW POLICE 41 or COLT NEW 41.
- Colt firearms of the 1875 to 1900 time period, chambered for the cartridge known as 38 LONG COLT, will also chamber and fire the cartridge known as 38 SHORT COLT, in the same manner as 38 SPL may be fired in firearms chambered for the 357 MAGNUM cartridge.
- those Colt firearms of the 1875 to 1900 time period, chambered for the cartridge known as 41 LONG COLT, will also chamber and fire the cartridge known as 41 SHORT COLT.
- those Colt firearms of the 1875 to 1900 time period, chambered for the cartridge known as 32 LONG COLT, will also chamber and fire the cartridge known as 32 SHORT COLT.

Make	- "COLT. D.A. 32" or "COLT NEW POLICE .32" is make on the left side of the barrel. - "COLT'S PT. F.A. MFG. CO.", "HARTFORD. CT. U.S.A.", and "PAT. AUG. 5.84.NOV. 6.1888" are marked on the top side of barrels that are 102mm or less in length, or - "COLT'S PT. F.A. MFG. CO. HARTFORD. CT. U.S.A." and "PAT. AUG. 5.84.NOV. 6.1888" are marked on the top side of the barrel. - "COLT'S" and "NEW POLICE" are marked on the left side of the receiver/frame.
Model	- "COLT'S" and "NEW POLICE" encircles the 'rampant colt' logo are mared on the left side of the receiver/frame. - manufactured from 1896 to 1907. - total estimated production of 49,500 revolvers. - this Colt Double Action New Police model should not be confused with Colt's Single Action "New Police" model. The most significant difference is the presence of a trigger guard on the Colt Double Action New Police model. - features include: double action trigger mechanism; blued or nickel plated receiver/frame and round barrel; fluted cylinder; rectangular shaped cylinder release lever located on the left side of the receiver/frame; unshrouded ejector rod; fixed blade front sight and the rear sight is a notch in the topstrap; hand grip panels may be checkered rubber with "COLT" marked on them, mother-of-pearl or ivory hand grip panels. - finish may also be silver or gold plated or a combination of finishes. - approximately 5,000 revolvers were manufactured as a target version with adjustable sights and a 152mm barrel. This version was known as the New Police Target model. - the sights on the Colt New Police Target model may be one of the following: fixed blade front sight and the rear sight a fixed notch in the topstrap or a movable bead front sight set on a iron base with a windage adjustable rear sight pinned to the topstrap.
Manufacturer	- "COLT. D.A. 32" or "COLT NEW POLICE .32" is make on the left side of the barrel. - "COLT'S PT. F.A. MFG. CO.", "HARTFORD. CT. U.S.A.", and "PAT. AUG. 5.84.NOV. 6.1888" are marked on the top side of barrels that are 102mm or less in length, or - "COLT'S PT. F.A. MFG. CO. HARTFORD. CT. U.S.A." and "PAT. AUG. 5.84.NOV. 6.1888" are marked on the top side of the barrel. - "COLT'S" and "NEW POLICE" are marked on the left side of the receiver/frame.
Serial Number	- serialization started at 1 and continued unbroken to approximately 49,500. - early pistols may be numbered on the butt. Later examples will be numbered inside the crane and on the frame facing the crane. - apparent anomalies in serial numbers can occur due to parts which interchange between models and the fact that some model designations appear on the barrel only. - serial number range from 49,500 to 253,351 was asigned to the Police Positive 32 and Police Positive Target.
Calibre	- "COLT. D.A. 32" or "COLT NEW POLICE .32" is make on the left side of the barrel. NOTE 1: firearms chambered for the cartridge known as 32 S&W LONG will chamber and fire cartridges known as 32 COLT NEW POLICE, 32 S&W (32 S&W SHORT). NOTE 2: firearms chambered for the cartridge known as 32 LONG COLT will chamber and fire cartridges known as 32 SHORT COLT.
Shots	- swing-out cylinder.
Other Markings	- there may be various other markings on the revolver. - these markings are usually on the backstrap or the butt: - "AGUSTA POLICE". - "BALTIMORE CITY POLICE". - "C.P.D.", Cincinnati, Ohio. - "K.P.D.". - "LACKA CO. JAIL". - "METROPOLITIAN POLICE DEPT D.C.". - "NEW ORLEANS POLICE". - "NEW YORK POLICE". - "OTTAWA POLICE". - "P.P.D.", Providence, Rhode Island. - "RICHMOND POLICE DEPT.". - revolvers may be marked with various other police departments.

- Colt's rampant colt logo was marked on the left side of the receiver/frame from 1903 to 1943.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "COLT'S NEW POLICE" encircling the 'rampant colt' logo was marked on the left side of the receiver/frame from 1907 to 1909.
- "COLT" and "POLICE POSITIVE" in two lines, with one large "P" shared by both words or "POLICE POSITIVE" in two lines, with one large "P" shared by both words or "POLICE POSITIVE" in a single line is marked on the left side of the barrel.
- manufactured from 1905 to 1943.
- this is a generic entry for Colt Police Positive models. Other screens exist that may more accurately identify the firearm.
- features include: double action trigger mechanism; blued or nickled finish receiver/frame and barrel; fluted cylinder; unshrouded ejector rod; fixed half moon or blade front sight with a fixed channel along the top strap or adjustable rear sight and the grip panels may be made of rubber or wood with "COLT" marked on them.

Manufacturer

- "COLT'S PT. FA. MFG. CO." is marked on the top of the barrel
- "COLT'S NEW POLICE" encircling Colt's rampant colt logo was marked on the left side of the receiver/frame from 1905 to 1909.

Notes

Make

- make is marked on the top of the barrel.

Model

- introduced in 1907 and discontinued in 1943.
- model designation is marked on the left or right side of the barrel as:
"POLICE POSITIVE" in two lines, one large "P" is shared by both words.
- manufactured from 1907 to 1939 on the Colt small frame and from 1927 to 1943 on the Colt's Police Positive 38 large frame.
- features include: double action trigger mechanism, blued or nickel finished receiver/frame and barrel, fluted cylinder; enshrouded ejector rod; fixed half moon front sight with fixed channel top strap rear sight and grip panels may be made of rubber or wood with "COLT" marked on them.
- special order gold and silver plated finishes were available in various combinations. Grip panels were also available in pearl or ivory.

Manufacturer

- manufacturer's designation is marked on top of the barrel as:
- from 1907 to 1926:
"COLT'S PT.F.A.MFG. CO. HARTFORD, CT.U.S.A."
"PAT'D AUG. 5, 1884 JUNE 5, 1900 JULY 4, 1905"
- from 1926 to 1943:
"COLT'S PT. F.A. MFG. CO. HARTFORD, CT. U.S.A."
"PAT'D AUG. 5, 1884 JULY 4, 1905. OCT. 5, 1926"
- the 'rampant colt' logo is marked on the left side of the receiver/frame above the grip.
- from 1907 to 1909 the 'rampant colt' logo was within a circle marking of:
"COLT"S NEW POLICE".

Serial Number

- serial number is marked on the crane and on the receiver/frame facing the crane.
- serial number range is a continuation of the New Police Model. Numbering started at approximately 49500 and continued to 239000. The serial range was shared with the Police Positive Target until approximately 200000 at which time the range was dedicated to the "Police Positive 32".
- Colt also produced a 32 calibre model in this series based on the 38 calibre receiver/frame; it was introduced in 1927 and was serial numbered from 300000 on up.
- apparent anomalies in serial numbers can occur due to parts which interchange between models and the fact that some model designations appear on the barrel only.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- calibre designation is marked on the left side of the barrel.
- the 32 calibre was available with smooth bored barrel.
- Colt advertising lists a number of calibres as being available in this model firearm such as:
- 32 S&W LONG, 32 COLT NEW POLICE, 32 S&W SHORT or 32 S&W.
- 32 LONG COLT and 32 SHORT.
- in fact Colt revolver cylinders had chambers which were cut for the longest of a variety of cartridge case lengths of the same approximate calibre cartridge. The shorter cartridges chamber and fire in the long chamber in much the same way that 38 SPL cartridges will chamber and fire in a revolver chambered for the 357 MAG cartridge.

Other Markings

- there may be various other markings on the Colt "Police Positive 32" applied by several law enforcement and private agencies. These markings are normally on the backstrap or the butt.

Notes

Make

- make is marked on the top of the barrel.

Model

- introduced in 1908.
- model designation is marked on the left side of the barrel as "POLICE POSITIVE" in two lines, one large "P" is shared by both words, followed by the calibre. From 1949 on, the model designation was marked on the left side of the barrel in one line as "POLICE POSITIVE SPECIAL".
- modifications were made to this model over the years of its production. For this reason, references are made to First Issue, Second Issue, etc.
- features include: double action trigger mechanism; blued or nickled finish receiver/frame and barrel; fluted cylinder; unshrouded ejector rod; fixed half moon front sight with a fixed channel along the top strap and the grip panels may be made of rubber or wood with "COLT" marked on them.
- special order gold and silver plated finishes were available in various combinations.
- grip panels were also available in pearl or ivory.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- manufacturer's designation is marked on the top of the barrel as:
- from 1908 to 1926:
"COLT'S PT. F.A. MFG.CO. HARTFORD, CT. U.S.A."
"PAT'D AUG. 5, 1884 JUNE 5, 1900, JULY 4, 1905"
- from 1926 to 1949:
"COLT'S PT. F.A. MFG. CO. HARTFORD, CT. U.S.A."
"PAT'D AUG. 5, 1884, JULY 4, 1905, OCT. 5, 1926".
- or on the right side of the barrel as:
- from 1949 to 1955:
"COLTS MFG. CO. HARTFORD, CONN. U.S.A."
- from 1955 on:
"COLTS PT.F.A. MFG. CO. HARTFORD, CONN. U.S.A."
- the 'rampant colt' logo is marked on the left side of the receiver/frame above the grip.

Serial Number

- serial numbering began at 1 and continued unbroken to approximately 325000 at which point, in 1926, the Detective Special model was included in this numbering series. Numbering continued to approximately 501817, which marked the end of the "old series".
- in 1948, a new series started at 510001 and ended at approximately 519410.
- another new series was started at 525001. This ran through to 1966 where it reached approximately 890800. Numbers between 890800 and 900101 have been observed. At this time a new series was introduced starting at D900101, with the "D" prefix remaining consistent. This series continued to D999999.
- numbering then became:
A10000 to A59999
B01001 to B59999
C01001 to C60000
F01001 to F60000
H01001 to H60000
M01001 to M51999
01001M to 59999M
01001R to 59999R
S01001 to an unknown range.

Calibre

- calibre designation is marked on the barrel.
- Colt advertising list a number of calibres as being available in this model firearm such as:
- 32 S&W LONG, 32 COLT NEW POLICE, 32 S&W SHORT or 32 S&W.
- 38 SPL, 38 LONG COLT, 38 SHORT COLT or 38-44 S&W.
- in fact Colt revolver cylinders had chambers which were cut for the longest of a variety of cartridge case lengths of the same approximate calibre cartridge. The shorter cartridges chamber and fire in the long chamber in much the same way that 38 SPL cartridges will chamber and fire in a revolver chambered for the 357 MAG cartridge.

Shots

- swing-out cylinder.

Other Markings

- there may be various other markings on the Colt "Police Positive Special" applied by several law enforcement and private agencies. These markings are normally on the backstrap or the butt.

Notes

Make

- the make designation does not appear on the firearm.
- Commission refers to the "Gewehr-Prufungs-Kommission", struck in November 1887 to address the redesign of German small arms in the face of France's introduction of small bore, smokeless powder cartridges and rifles, and their attendant superiority versus larger diameter, black powder cartridge firing rifles.

Model

- the model designation is not marked on the receiver/frame.
- features include: split rear bridge on the receiver/frame whereby the bolt handle turns down ahead of the bridge; two locking lugs on the bolt head; full length one-piece wood stock; wing safety on the rear of the bolt acting directly upon the cocking piece; leaf-type tangent sight mounted directly on the barrel; straight bolt handle; steel barrel band mounted mid-barrel length; stock end-cap/barrel band with side bayonet mounting lug is mounted behind the front sight; cleaning rod is stored beneath the barrel; bolt release button is on the left-rear of the receiver/frame.
- this variant of the 1888 Commission Rifle differs from original German production in not having a full length barrel shroud and in having a wooden hand guard over the rear half of the barrel.
- the overall length for this rifle with a 740mm barrel is 1245mm (49"), average weight is 3.9kg (8.58 lbs).

Manufacturer

- the manufacturer's name appears on the receiver ring in Chinese characters, the two stylized characters on the left read "Hanyang", the characters on the right reads "Model" and the center figure of a "swastika" is the logo for the Hanyang Arsenal.

Action

- turn-bolt design.

Serial Number

- the serial number is typically marked on the left side of the receiver/frame ring and may have a letter suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel

- some variation in barrel lengths is possible.

Calibre

- the calibre designation was not part of the original marking on the firearm.
- calibre markings may be found on some examples sold as commercial sporters or arsenal reworks.
- these rifles are barreled with .318" bores and are not commonly found marked on the top surface of the front receiver/frame ring and on the stock with either a "Z" or an "S" indicating either deepened rifling grooves, or in the latter case, modification to an "S" 8MM MAUSER type ammunition chambering/bore diameter of .323" from .318", as is commonly the case with German produced models of this firearm.
- rifling characteristics: 4 grooves, 1 turn in 9 1/2 inches, right hand twist.

Shots

- "Mannlicher" style, enbloc clip loading mechanism.

Other Markings

- markings usually include the model designation on the left side of the receiver/frame, year of manufacture and manufacturer identifiers are usually found on the receiver/frame ring.
- markings of "S", "Z", and/or crescent moon shapes may also be found on the receiver/frame and stock material indicating chambering or rifling changes, or Turkish contract sales.

Remarks

- the model 1888 used a Mannlicher design of enbloc clip loading where the empty clip was ejected through a hole in the floor-plate of the magazine housing.
- the model 1888/05 was a standard model 1888 modified by the addition of rectangular charger clip guides which were riveted/pinned to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets and the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.
- the model 1888/14 was a standard model 1888 modified by the addition of roughly welded charger clip guides to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.

Notes

Make

- the make designation does not appear on the firearm.
- Commission refers to the "Gewehr-Prufungs-Kommission", struck in November 1887 to address the redesign of German small arms in the face of France's introduction of small bore, smokeless powder cartridges and rifles, and their attendant superiority versus larger diameter, black powder cartridge firing rifles.

Model

- the model designation is usually marked on the left side of the receiver/frame as "GEW. 88".
- manufactured 1889-1897.
- features include: split rear bridge on the receiver/frame whereby the bolt handle turns down ahead of the bridge; two locking lugs on the bolt head; full length oversize steel tube barrel shroud; full length one-piece wood stock; wing safety on the rear of the bolt acting directly upon the cocking piece; flip-up tangent rear sight mounted on the barrel shroud; straight bolt handle; steel barrel band mounted mid-barrel length; stock end-cap/barrel band with side bayonet mounting lug is mounted behind the front sight; cleaning rod is stored beneath the barrel; bolt release button is on the left-rear of the receiver/frame.
- the overall length for this rifle with a 740mm barrel is 1245mm (49"), average weight is 3.9kg (8.58 lbs).

Manufacturer

- the manufacturer's name is marked on the front ring of the receiver/frame as "ERFURT" below a German Imperial crown, with the date of manufacture stamped below the name.
- approximately 750,000 rifles of this model were produced by this manufacturer, along with Danzig and Spandau, as part of the Prussian Arsenal system.

Action

- turn-bolt design.

Serial Number

- the serial number is typically marked on the left side of the receiver/frame ring, may have a letter suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- the calibre designation was not part of the original marking on the firearm.
- calibre markings may be found on some examples sold as commercial sporters.
- additionally, some rifles were marked on the top surface of the front receiver/frame ring and on the stock with either a "Z" or an "S" indicating either deepened rifling grooves, or in the latter case, modification to an "S" 8MM MAUSER type ammunition chambering/bore diameter of .323" from .318" in the 1903-05 period.
- rifling characteristics: 4 grooves, 1 turn in 9 1/2 inches, right hand twist.

Shots

- "Mannlicher" style, enbloc clip loading mechanism.

Other Markings

- markings usually include the model designation on the left side of the receiver/frame, year of manufacture and manufacturer identifiers are usually found on the receiver/frame ring.
- markings of "S", "Z", and/or crescent moon shapes may also be found on the receiver/frame and stock material indicating chambering or rifling changes, or Turkish contract sales.

Notes

Make

- The make is not marked on the receiver/frame.
- Commission refers to the "Gewehr-Prufungs-Kommission", struck in November 1887 to address the redesign of German small arms in the face of France's introduction of small bore, smokeless powder cartridges and rifles, and their attendant superiority versus larger diameter, black powder cartridge firing rifles.

Model

- GEW. 88 is marked on the left side of the receiver/frame.
- 1888 is a rifle converted to a handgun configuration.
- Features include: split rear bridge on the receiver/frame whereby the bolt handle turns down ahead of the bridge; two locking lugs on the bolt head; wing safety on the rear of the bolt acting directly upon the cocking piece; straight bolt handle; bolt release button is on the left-rear of the receiver/frame.

- Manufactured from 1889 to 1897.
- Overall length with a 470 mm (18.5 inches) barrel is 750 mm (29.5 inches).

Manufacturer

- The manufacturer's name is marked on the front ring of the receiver/frame as "DANZIG" below a German Imperial crown, with the date of manufacture stamped below the name.
- Approximately 750,000 rifles of this model were produced by this manufacturer, along with Spandau and Erfurt, as part of the Prussian Arsenal system.

Action

- Turn bolt operated.

Serial Number

- The serial number is marked on the left side of the receiver/frame.

Make

- the make designation does not appear on the firearm.
- Commission refers to the "Gewehr-Prufungs-Kommission", struck in November 1887 to address the redesign of German small arms in the face of France's introduction of small bore, smokeless powder cartridges and rifles, and their attendant superiority versus larger diameter, black powder cartridge firing rifles.

Model

- the model designation is usually marked on the left side of the receiver/frame as "GEW. 88".
- manufactured 1889-1897.
- features include: split rear bridge on the receiver/frame whereby the bolt handle turns down ahead of the bridge; two locking lugs on the bolt head; full length oversize steel tube barrel shroud; full length one-piece wood stock; wing safety on the rear of the bolt acting directly upon the cocking piece; flip-up tangent rear sight mounted on the barrel shroud; straight bolt handle; steel barrel band mounted mid-barrel length; stock end-cap/barrel band with side bayonet mounting lug is mounted behind the front sight; cleaning rod is stored beneath the barrel; bolt release button is on the left-rear of the receiver/frame.
- the overall length for this rifle with a 740mm barrel is 1245mm (49"), average weight is 3.9kg (8.58 lbs).

Manufacturer

- the manufacturer's name is marked on the front ring of the receiver/frame as "DANZIG" below a German Imperial crown, with the date of manufacture stamped below the name.
- approximately 750,000 rifles of this model were produced by this manufacturer, along with Spandau and Erfurt, as part of the Prussian Arsenal system.

Action

- turn-bolt design.

Serial Number

- the serial number is typically marked on the left side of the receiver/frame ring, may have a letter suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- the calibre designation was not part of the original marking on the firearm.
- calibre markings may be found on some examples sold as commercial sporters.
- additionally, some rifles were marked on the top surface of the front receiver/frame ring and on the stock with either a "Z" or an "S" indicating either deepened rifling grooves, or in the latter case, modification to an "S" 8MM MAUSER type ammunition chambering/bore diameter of .323" from .318" in the 1903-05 period.
- rifling characteristics: 4 grooves, 1 turn in 9 1/2 inches, right hand twist.

Shots

- "Mannlicher" style, enbloc clip loading mechanism.

Other Markings

- markings usually include the model designation on the left side of the receiver/frame, year of manufacture and manufacturer identifiers are usually found on the receiver/frame ring.
- markings of "S", "Z", and/or crescent moon shapes may also be found on the receiver/frame and stock material indicating chambering or rifling changes, or Turkish contract sales.

Remarks

- the model 1888 used a Mannlicher design of enbloc clip loading where the empty clip was ejected through a hole in the floor-plate of the magazine housing.
- the model 1888/05 was a standard model 1888 modified by the addition of rectangular charger clip guides which were riveted/pinned to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets and the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.
- the model 1888/14 was a standard model 1888 modified by the addition of roughly welded charger clip guides to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.
