137541 - 2	30 CARBINE	5	457	Prohibited PFR, Part 1, para. 86(k)	Non-Commercial Customization	
137541 - 1	30 CARBINE	30	457	Prohibited PFR, Part 1, para. 86(k)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "COMMANDO MARK = " over "PAT. PEND." is marked on the left side of the aluminum housing/forestock.

Model

- " COMMANDO MARK = " is marked on the left side of the housing kit/stock; the two horizontal lines after the word "MARK" indicate the number "2".
- Commando Arms manufactured several converter kits for the 30 calibre, US Carbine model M1.
- Commando Arms kit gave the US Carbine model M1 receiver/frame and barrel the general/overall appearance of the Thompson 1928A1submachine gun.
- US Carbine model M1 original manufacturer's markings and serial number are still apparent on the top rear of the receiver/frame.
- Commando Arms MARK 1 kit consisted of an aluminum alloy holder for the receiver/frame (this holder had two pistol grip assemblies) and a fixed walnut butt stock.
- Commando Arms MARK 2 kit consisted of an aluminum alloy holder for the receiver/frame (this holder had two pistol grip assemblies).
- Commando Arms MARK 4 kit consisted of an aluminum alloy holder for the receiver/frame (this holder had two pistol grip assemblies) and a detachable walnut butt stock.
- features include: round barrel; gas operated, semi-automatic only, M1 Carbine receiver/frame utilizing a detachable box magazine; Mark 2 "converter kit" which features an aluminum forestock with two vertical pistol grips and a walnut buttstock; blued finish.

Manufacturer

- "COMMANDO MARK = " over "PAT. PEND." is marked on the left side of the aluminum housing/forestock.
- "SAGINAW SG" is marked on the top rear of the receiver/frame.
- Commando Arms Incorporated was located in Knoxville, Tennessee, U.S.A.
- Commando Arms was formerly known as Volunteer Enterprises; the name change to Commando Arms took place in 1978.

Action

- gas operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the original manufacturer's seven digit serial number is retained on the top rear of the receiver/frame.
Shots	- detachable box magazine.

Firearm Reference Number (FRN): 224
Make: Commission Carbine
Model: 1888 Carbine

Summary

Make:	Commission Carbine
Model:	1888 Carbine
Manufacturer:	Erfurt Arsenal
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
224 - 1	8MM MAUSER	5	435	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make designation does not appear on the firearm.
- Commission refers to the "Gewehr-Prufungs-Kommission", struck in November 1887 to address the redesign of German small arms in the face of France's introduction of small bore, smokeless powder cartridges and rifles, and their attendant superiority versus larger diameter, black powder cartridge using rifles.

Model

- the model designation is usually marked on the left side of the receiver/frame as "KAR. 88".
- manufactured 1889-1892.
- features include: split rear bridge on the receiver/frame whereby the bolt handle turns down ahead of the bridge; two locking lugs on the bolt head; full length oversize steel tube barrel shroud; full length one-piece wood stock; wing safety on the rear of the bolt acting directly upon the cocking piece; flip-up tangent rear sight and folding close range express style sight immediately forward of the receiver/frame mounted on the barrel shroud; scalloped and turned down bolt handle; winged steel forend cap.

Manufacturer

- the manufacturer's name is normally marked on the front ring of the receiver/frame.

Action

- turn-bolt design.

Serial Number

- the serial number is typically marked on the left side of the receiver/frame ring, may have a letter suffix.

Calibre

- the calibre designation was not part of the original marking on the firearm.
- calibre markings may be found on some examples sold as commercial sporters.
- additionally, some rifles were marked on the top surface of the front receiver/frame ring and on the stock with either a "Z" or an "S" indicating either deepened rifling grooves, or in the latter case, modification to an "S" 8MM MAUSER type ammunition chambering/bore diameter of .323" from .318" in the 1903-05 period.
- rifling characteristics: 4 grooves, 1 turn in 9 1/2 inches, right hand twist.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- "Mannlicher" style, enbloc clip loading mechanism.
Other Markings	- markings usually include the model designation on the left side of the receiver/frame, year of manufacture and manufacturer identifiers are usually found on the receiver/frame ring.

Notes

Make

- the make designation does not appear on the firearm.
- Commission refers to the "Gewehr-Prufungs-Kommission", struck in November 1887 to address the redesign of German small arms in the face of France's introduction of small bore, smokeless powder cartridges and rifles, and their attendant superiority versus larger diameter, black powder cartridge firing rifles.

Model

- the model designation is usually marked on the left side of the receiver/frame as "GEW. 88".
- manufactured 1889-1897.
- features include: split rear bridge on the receiver/frame whereby the bolt handle turns down ahead of the bridge; two locking lugs on the bolt head; full length oversize steel tube barrel shroud; full length one-piece wood stock; wing safety on the rear of the bolt acting directly upon the cocking piece; flip-up tangent rear sight mounted on the barrel shroud; straight bolt handle; steel barrel band mounted mid-barrel length; stock end-cap/barrel band with side bayonet mounting lug is mounted behind the front sight; cleaning rod is stored beneath the barrel; bolt release button is on the left-rear of the receiver/frame.
- the overall length for this rifle with a 740mm barrel is 1245mm (49"), average weight is 3.9kg (8.58 lbs).

Manufacturer

- German Imperial Crown over "AMBERG" over the year of manufacture are marked on the front ring of the receiver/frame.
- approximately 100,000 rifles of this model were produced by this manufacturer.

Action

- turn-bolt design.

Serial Number

- the serial number is typically marked on the left side of the receiver/frame ring, may have a letter suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- the calibre designation was not part of the original marking on the firearm.
- calibre markings may be found on some examples sold as commercial sporters.
- additionally, some rifles were marked on the top surface of the front receiver/frame ring and on the stock with either a "Z" or an "S" indicating either deepened rifling grooves, or in the latter case, modification to an "S" 8MM MAUSER type ammunition chambering/bore diameter of .323" from .318" in the 1903-05 period.
- rifling characteristics: 4 grooves, 1 turn in 9 1/2 inches, right hand twist.

Shots

- "Mannlicher" style, enbloc clip loading mechanism.

Other Markings

- markings usually include the model designation on the left side of the receiver/frame, year of manufacture and manufacturer identifiers are usually found on the receiver/frame ring.
- markings of "S", "Z", and/or crescent moon shapes may also be found on the receiver/frame and stock material indicating chambering or rifling changes, or Turkish contract sales.

Remarks

- the model 1888 used a Mannlicher design of enbloc clip loading where the empty clip was ejected through a hole in the floor-plate of the magazine housing.
- the model 1888/05 was a standard model 1888 modified by the addition of rectangular charger clip guides which were riveted/pinned to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets and the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.
- the model 1888/14 was a standard model 1888 modified by the addition of roughly welded charger clip guides to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.

FRT Report

Firearm Reference Number (FRN): 230
Make: Commission Rifle
Model: 1888

Summary

Make:	Commission Rifle
Model:	1888
Manufacturer:	Chinese State Arsenal, Hanyang
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	CHINA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
230 - 2	8MM MAUSER	5	705	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
230 - 1	8MM MAUSER	5	740	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make designation does not appear on the firearm.
- Commission refers to the "Gewehr-Prufungs-Kommission", struck in November 1887 to address the redesign of German small arms in the face of France's introduction of small bore, smokeless powder cartridges and rifles, and their attendant superiority versus larger diameter, black powder cartridge firing rifles.

Model

- the model designation is not marked on the receiver/frame.
- features include: split rear bridge on the receiver/frame whereby the bolt handle turns down ahead of the bridge; two locking lugs on the bolt head; full length one-piece wood stock; wing safety on the rear of the bolt acting directly upon the cocking piece; leaf-type tangent sight mounted directly on the barrel; straight bolt handle; steel barrel band mounted mid-barrel length; stock end-cap/barrel band with side bayonet mounting lug is mounted behind the front sight; cleaning rod is stored beneath the barrel; bolt release button is on the left-rear of the receiver/frame.
- this variant of the 1888 Commission Rifle differs from original German production in not having a full length barrel shroud and in having a wooden hand guard over the rear half of the barrel.
- the overall length for this rifle with a 740mm barrel is 1245mm (49"), average weight is 3.9kg (8.58 lbs).

Manufacturer

- the manufacturer's name appears on the receiver ring in Chinese characters, the two stylized characters on the left read "Hanyang", the characters on the right reads "Model" and the center figure of a "swastika" is the logo for the Hanyang Arsenal.

Action

- turn-bolt design.

Serial Number

- the serial number is typically marked on the left side of the receiver/frame ring and may have a letter suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel

- some variation in barrel lengths is possible.

Calibre

- the calibre designation was not part of the original marking on the firearm.
- calibre markings may be found on some examples sold as commercial sporters or arsenal reworks.
- these rifles are barreled with .318" bores and are not commonly found marked on the top surface of the front receiver/frame ring and on the stock with either a "Z" or an "S" indicating either deepened rifling grooves, or in the latter case, modification to an "S" 8MM MAUSER type ammunition chambering/bore diameter of .323" from .318", as is commonly the case with German produced models of this firearm.
- rifling characteristics: 4 grooves, 1 turn in 9 1/2 inches, right hand twist.

Shots

- "Mannlicher" style, enbloc clip loading mechanism.

Other Markings

- markings usually include the model designation on the left side of the receiver/frame, year of manufacture and manufacturer identifiers are usually found on the receiver/frame ring.
- markings of "S", "Z", and/or crescent moon shapes may also be found on the receiver/frame and stock material indicating chambering or rifling changes, or Turkish contract sales.

Remarks

- the model 1888 used a Mannlicher design of enbloc clip loading where the empty clip was ejected through a hole in the floor-plate of the magazine housing.
- the model 1888/05 was a standard model 1888 modified by the addition of rectangular charger clip guides which were riveted/pinned to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets and the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.
- the model 1888/14 was a standard model 1888 modified by the addition of roughly welded charger clip guides to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.

Notes

Make

- the make designation does not appear on the firearm.
- Commission refers to the "Gewehr-Prufungs-Kommission", struck in November 1887 to address the redesign of German small arms in the face of France's introduction of small bore, smokeless powder cartridges and rifles, and their attendant superiority versus larger diameter, black powder cartridge firing rifles.

Model

- the model designation is usually marked on the left side of the receiver/frame as "GEW. 88".
- manufactured 1889-1897.
- features include: split rear bridge on the receiver/frame whereby the bolt handle turns down ahead of the bridge; two locking lugs on the bolt head; full length oversize steel tube barrel shroud; full length one-piece wood stock; wing safety on the rear of the bolt acting directly upon the cocking piece; flip-up tangent rear sight mounted on the barrel shroud; straight bolt handle; steel barrel band mounted mid-barrel length; stock end-cap/barrel band with side bayonet mounting lug is mounted behind the front sight; cleaning rod is stored beneath the barrel; bolt release button is on the left-rear of the receiver/frame.
- the overall length for this rifle with a 740mm barrel is 1245mm (49"), average weight is 3.9kg (8.58 lbs).

Manufacturer

- the manufacturer's name is marked on the front ring of the receiver/frame as "ERFURT" below a German Imperial crown, with the date of manufacture stamped below the name.
- approximately 750,000 rifles of this model were produced by this manufacturer, along with Danzig and Spandau, as part of the Prussian Arsenal system.

Action

- turn-bolt design.

Serial Number

- the serial number is typically marked on the left side of the receiver/frame ring, may have a letter suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- the calibre designation was not part of the original marking on the firearm.
- calibre markings may be found on some examples sold as commercial sporters.
- additionally, some rifles were marked on the top surface of the front receiver/frame ring and on the stock with either a "Z" or an "S" indicating either deepened rifling grooves, or in the latter case, modification to an "S" 8MM MAUSER type ammunition chambering/bore diameter of .323" from .318" in the 1903-05 period.
- rifling characteristics: 4 grooves, 1 turn in 9 1/2 inches, right hand twist.

Shots

- "Mannlicher" style, enbloc clip loading mechanism.

Other Markings

- markings usually include the model designation on the left side of the receiver/frame, year of manufacture and manufacturer identifiers are usually found on the receiver/frame ring.
- markings of "S", "Z", and/or crescent moon shapes may also be found on the receiver/frame and stock material indicating chambering or rifling changes, or Turkish contract sales.

Remarks

- the model 1888 used a Mannlicher design of enbloc clip loading where the empty clip was ejected through a hole in the floor-plate of the magazine housing.
- the model 1888/05 was a standard model 1888 modified by the addition of rectangular charger clip guides which were riveted/pinned to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets and the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.
- the model 1888/14 was a standard model 1888 modified by the addition of roughly welded charger clip guides to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.

237 - 1	8MM MAUSER	5	740	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make designation does not appear on the firearm.
- Commission refers to the "Gewehr-Prufungs-Kommission", struck in November 1887 to address the redesign of German small arms in the face of France's introduction of small bore, smokeless powder cartridges and rifles, and their attendant superiority versus larger diameter, black powder cartridge firing rifles.

Model

- the model designation is usually marked on the left side of the receiver/frame as "GEW. 88".
- manufactured 1889-1897.
- features include: split rear bridge on the receiver/frame whereby the bolt handle turns down ahead of the bridge; two locking lugs on the bolt head; full length oversize steel tube barrel shroud; full length one-piece wood stock; wing safety on the rear of the bolt acting directly upon the cocking piece; flip-up tangent rear sight mounted on the barrel shroud; straight bolt handle; steel barrel band mounted mid-barrel length; stock end-cap/barrel band with side bayonet mounting lug is mounted behind the front sight; cleaning rod is stored beneath the barrel; bolt release button is on the left-rear of the receiver/frame.
- the overall length for this rifle with a 740mm barrel is 1245mm (49"), average weight is 3.9kg (8.58 lbs).

Manufacturer

- the manufacturer's name is marked on the front ring of the receiver/frame as "OEWG STEYR" below a German Imperial crown, with the date of manufacture stamped below the name.
- approximately 300,000 rifles of this model were produced by this manufacturer.

Action

- turn-bolt design.

Serial Number

- the serial number is typically marked on the left side of the receiver/frame ring, may have a letter suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- the calibre designation was not part of the original marking on the firearm.
- calibre markings may be found on some examples sold as commercial sporters.
- additionally, some rifles were marked on the top surface of the front receiver/frame ring and on the stock with either a "Z" or an "S" indicating either deepened rifling grooves, or in the latter case, modification to an "S" 8MM MAUSER type ammunition chambering/bore diameter of .323" from .318" in the 1903-05 period.
- rifling characteristics: 4 grooves, 1 turn in 9 1/2 inches, right hand twist.

Shots

- "Mannlicher" style, enbloc clip loading mechanism.

Other Markings

- markings usually include the model designation on the left side of the receiver/frame, year of manufacture and manufacturer identifiers are usually found on the receiver/frame ring.
- markings of "S", "Z", and/or crescent moon shapes may also be found on the receiver/frame and stock material indicating chambering or rifling changes, or Turkish contract sales.

Remarks

- the model 1888 used a Mannlicher design of enbloc clip loading where the empty clip was ejected through a hole in the floor-plate of the magazine housing.
- the model 1888/05 was a standard model 1888 modified by the addition of rectangular charger clip guides which were riveted/pinned to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets and the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.
- the model 1888/14 was a standard model 1888 modified by the addition of roughly welded charger clip guides to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.

Notes

Make

- The make is not marked on the receiver/frame.
- Commission refers to the "Gewehr-Prufungs-Kommission", struck in November 1887 to address the redesign of German small arms in the face of France's introduction of small bore, smokeless powder cartridges and rifles, and their attendant superiority versus larger diameter, black powder cartridge firing rifles.

Model

- GEW. 88 is marked on the left side of the receiver/frame.
- 1888 is a rifle converted to a handgun configuration.
- Features include: split rear bridge on the receiver/frame whereby the bolt handle turns down ahead of the bridge; two locking lugs on the bolt head; wing safety on the rear of the bolt acting directly upon the cocking piece; straight bolt handle; bolt release button is on the left-rear of the receiver/frame.

- Manufactured from 1889 to 1897.
- Overall length with a 470 mm (18.5 inches) barrel is 750 mm (29.5 inches).

Manufacturer

- The manufacturer's name is marked on the front ring of the receiver/frame as "DANZIG" below a German Imperial crown, with the date of manufacture stamped below the name.
- Approximately 750,000 rifles of this model were produced by this manufacturer, along with Spandau and Erfurt, as part of the Prussian Arsenal system.

Action

- Turn bolt operated.

Serial Number

- The serial number is marked on the left side of the receiver/frame.

Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
238 - 1	8MM MAUSER	5	740	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make designation does not appear on the firearm.
- Commission refers to the "Gewehr-Prufungs-Kommission", struck in November 1887 to address the redesign of German small arms in the face of France's introduction of small bore, smokeless powder cartridges and rifles, and their attendant superiority.

Model

- the model designation is usually marked on the left side of the receiver/frame as "GEW. 88".
- the "05" portion of the model designation is not marked on the firearm and indicates conversion to the Mauser stripper clip loading system from the original Mannlicher-style enbloc clip loading system.
- conversions of rifles from model 1888 to model 1888/05 configuration were undertaken in 1906-1907
- features include: split rear bridge on the receiver/frame whereby the bolt handle turns down ahead of the bridge; Mauser style clip loading guides and thumb cut-out on the left wall of the receiver/frame; two locking lugs on the bolt head; full length oversize steel tube barrel shroud; full length one-piece wood stock; wing safety on the rear of the bolt acting directly upon the cocking piece; flip-up tangent rear sight mounted on the barrel shroud; straight bolt handle; steel barrel band mounted mid-barrel length; stock end-cap/barrel band with side bayonet lug is mounted behind the front sight; cleaning rod is stored beneath the barrel; bolt release button is on the left-rear of the receiver/frame.
- the models 1888, 1888/05, and 1888/14 differ primarily in their magazine loading systems and how they were adapted to their respective configurations.
- the overall length for this rifle with a 740mm barrel is 1245mm (49"), average weight is 3.9kg (8.58 lbs).

Manufacturer

- German Imperial Crown over "AMBERG" over the year of manufacture are marked on the front ring of the receiver/frame.
- approximately 100,000 rifles of the Model 1888 were produced by this manufacturer and it is unknown as to how many of these were converted to the 1888/05 model configuration.

Action

- turn-bolt design.

Serial Number

- the serial number is typically marked on the left side of the receiver/frame ring, and may have a letter suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- the calibre designation was not part of the original marking on the firearm.
- calibre markings may be found on some examples sold as commercial sporters or arsenal reworks.
- additionally, some rifles were marked on the top surface of the front receiver/frame ring and on the stock with either a "Z" or an "S" indicating either deepened rifling grooves, or in the latter case, modification to an "S" 8MM MAUSER type ammunition chambering/bore diameter of .323" from .318" in the 1903-05 period.
- rifling characteristics: 4 grooves, 1 turn in 9 1/2 inches, right hand twist.

Shots

- stripper-clip loading.

Other Markings

- markings usually include the model designation on the left side of the receiver/frame, year of manufacture and manufacturer identifiers are usually found on the receiver/frame ring.
- markings of "S", "Z", and/or crescent moon shapes may also be found on the receiver/frame and stock material indicating chambering or rifling changes, or Turkish contract sales.

Remarks

- the model 1888 used a Mannlicher design of enbloc clip loading where the empty clip was ejected through a hole in the floor plate of the magazine housing.
- the model 1888/05 was a standard model 1888 modified by the addition of rectangular charger clip guides which were riveted/pinned to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets and the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.
- the model 1888/14 was a standard model 1888 modified by the addition of roughly welded charger clip guides to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.

FRT Report

Firearm Reference Number (FRN): 240
Make: Commission Rifle
Model: 1888/05

Summary

Make:	Commission Rifle
Model:	1888/05
Manufacturer:	Erfurt Arsenal
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
240 - 1	8MM MAUSER	5	740	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make designation does not appear on the firearm.
- Commission refers to the "Gewehr-Prufungs-Kommission", struck in November 1887 to address the redesign of German small arms in the face of France's introduction of small bore, smokeless powder cartridges and rifles.

Model

- the model designation is usually marked on the left side of the receiver/frame as "GEW. 88".
- the "05" portion of the model designation indicates conversion to Mauser-stripper clip loading from the original Mannlicher-style enbloc clip loading system and is not marked on the firearm.
- conversions of rifles from model 1888 to model 1888/05 configuration were undertaken in 1906-1907
- features include: split rear bridge on the receiver/frame whereby the bolt handle turns down ahead of the bridge; Mauser style clip loading guides and thumb cut-out on the left wall of the receiver/frame; two locking lugs on the bolt head; full length oversize steel tube barrel shroud; full length one-piece wood stock; wing safety on the rear of the bolt acting directly upon the cocking piece; flip-up tangent rear sight mounted on the barrel shroud; straight bolt handle; steel barrel band mounted mid-barrel length; stock end-cap/barrel band with side bayonet mounting lug is mounted behind the front sight; cleaning rod is stored beneath the barrel; bolt release button is on the left-rear of the receiver/frame.
- the models 1888, 1888/05, and 1888/14 differ primarily in their magazine loading systems and how they were adapted to their respective configurations.
- the overall length for this rifle with a 740mm barrel is 1245mm (49"), average weight is 3.9kg (8.58 lbs).

Manufacturer

- the manufacturer's name is marked on the front ring of the receiver/frame as "ERFURT" below a German Imperial crown, with the date of manufacture stamped below the name.
- approximately 750,000 rifles of this model were produced by this manufacturer, along with Spandau and Erfurt, as part of the Prussian Arsenal system; it is unknown as to how many of these were converted to 1888/05 model configuration of the total 370,000 units which were so converted.

Action

- turn-bolt design.

Serial Number

- the serial number is typically marked on the left side of the receiver/frame ring, and may have a letter suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- the calibre designation was not part of the original marking on the firearm.
- calibre markings may be found on some examples sold as commercial sporters.
- additionally, some rifles were marked on the top surface of the front receiver/frame ring and on the stock with either a "Z" or an "S" indicating either deepened rifling grooves, or in the latter case, modification to an "S" 8MM MAUSER type ammunition chambering/bore diameter of .323" from .318" in the 1903-05 period.
- rifling characteristics: 4 grooves, 1 turn in 9 1/2 inches, right hand twist.

Shots

- stripper-clip loading.

Other Markings

- markings usually include the model designation on the left side of the receiver/frame, year of manufacture and manufacturer identifiers are usually found on the receiver/frame ring.
- markings of "S", "Z", and/or crescent moon shapes may also be found on the receiver/frame and stock material indicating chambering or rifling changes, or Turkish contract sales.

Remarks

- the model 1888 used a Mannlicher design of enbloc clip loading where the empty clip was ejected through a hole in the floor plate of the magazine housing.
- the model 1888/05 was a standard model 1888 modified by the addition of rectangular charger clip guides which were riveted/pinned to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets and the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.
- the model 1888/14 was a standard model 1888 modified by the addition of roughly welded charger clip guides to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.

Notes

Make

- the make designation does not appear on the firearm.
- Commission refers to the "Gewehr-Prufungs-Kommission", struck in November 1887 to address the redesign of German small arms in the face of France's introduction of small bore, smokeless powder cartridges and rifles.

Model

- the model designation is usually marked on the left side of the receiver/frame as "GEW. 88".
- the "05" portion of the model designation indicates conversion to Mauser-stripper clip loading from the original Mannlicher-style enbloc clip loading system and is not marked on the firearm.
- conversions of rifles from model 1888 to model 1888/05 configuration were undertaken in 1906-1907
- features include: split rear bridge on the receiver/frame whereby the bolt handle turns down ahead of the bridge; Mauser style clip loading guides and thumb cut-out on the left wall of the receiver/frame; two locking lugs on the bolt head; full length oversize steel tube barrel shroud; full length one-piece wood stock; wing safety on the rear of the bolt acting directly upon the cocking piece; flip-up tangent rear sight mounted on the barrel shroud; straight bolt handle; steel barrel band mounted mid-barrel length; stock end-cap/barrel band with side bayonet mounting lug is mounted behind the front sight; cleaning rod is stored beneath the barrel; bolt release button is on the left-rear of the receiver/frame.
- the models 1888, 1888/05, and 1888/14 differ primarily in their magazine loading systems and how they were adapted to their respective configurations.
- the overall length for this rifle with a 740mm barrel is 1245mm (49"), average weight is 3.9kg (8.58 lbs).

Manufacturer

- the manufacturer's name is marked on the front ring of the receiver/frame as "DANZIG" below a German Imperial crown, with the date of manufacture stamped below the name.
- approximately 750,000 rifles of this model were produced by this manufacturer, along with Spandau and Erfurt, as part of the Prussian Arsenal system.

Action

- turn-bolt design.

Serial Number

- the serial number is typically marked on the left side of the receiver/frame ring, and may have a letter suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- the calibre designation was not part of the original marking on the firearm.
- calibre markings may be found on some examples sold as commercial sporters.
- additionally, some rifles were marked on the top surface of the front receiver/frame ring and on the stock with either a "Z" or an "S" indicating either deepened rifling grooves, or in the latter case, modification to an "S" 8MM MAUSER type ammunition chambering/bore diameter of .323" from .318" in the 1903-05 period.
- rifling characteristics: 4 grooves, 1 turn in 9 1/2 inches, right hand twist.

Shots

- stripper-clip loading.

Other Markings

- markings usually include the model designation on the left side of the receiver/frame, year of manufacture and manufacturer identifiers are usually found on the receiver/frame ring.
- markings of "S", "Z", and/or crescent moon shapes may also be found on the receiver/frame and stock material indicating chambering or rifling changes, or Turkish contract sales.

Remarks

- the model 1888 used a Mannlicher design of enbloc clip loading where the empty clip was ejected through a hole in the floor plate of the magazine housing.
- the model 1888/05 was a standard model 1888 modified by the addition of rectangular charger clip guides which were riveted/pinned to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets and the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.
- the model 1888/14 was a standard model 1888 modified by the addition of roughly welded charger clip guides to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.

Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
243 - 1	8MM MAUSER	5	740	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make designation does not appear on the firearm.
- Commission refers to the "Gewehr-Prufungs-Kommission", struck in November 1887 to address the redesign of German small arms in the face of France's introduction of small bore, smokeless powder cartridges and rifles.

Model

- the model designation is usually marked on the left side of the receiver/frame as "GEW. 88".
- the "05" portion of the model designation indicates conversion to Mauser stripper clip loading from the original Mannlicher-style enbloc clip loading system; it is not marked on the firearm.
- conversions of rifles from model 1888 to model 1888/05 configuration were undertaken in 1906-1907
- features include: split rear bridge on the receiver/frame whereby the bolt handle turns down ahead of the bridge; Mauser style clip loading guides and thumb cut-out on the left wall of the receiver/frame; two locking lugs on the bolt head; full length oversize steel tube barrel shroud; full length one-piece wood stock; wing safety on the rear of the bolt acting directly upon the cocking piece; flip-up tangent rear sight mounted on the barrel shroud; straight bolt handle; steel barrel band mounted mid-barrel length; stock end-cap/barrel band with side bayonet mounting lug is mounted behind the front sight; cleaning rod is stored beneath the barrel; bolt release button is on the left-rear of the receiver/frame.
- the models 1888, 1888/05, and 1888/14 differ primarily in their magazine loading systems and how they were adapted to their respective configurations.
- the overall length for this rifle with a 740mm barrel is 1245mm (49"), average weight is 3.9kg (8.58 lbs).

Manufacturer

- the manufacturer's name is marked on the front ring of the receiver/frame as "SPANDAU" below a German Imperial crown, with the date of manufacture stamped below the name.
- approximately 750,000 rifles of this model were produced by this manufacturer, along with Spandau and Erfurt, as part of the Prussian Arsenal system; it is unknown as to how many of these were converted to the 1888/05 model configuration.

Action

- turn-bolt design.

Serial Number

- the serial number is typically marked on the left side of the receiver/frame ring, and may have a letter suffix.

- the model 1888 used a Mannlicher design of enbloc clip loading where the empty clip was ejected through a hole in the floor-plate of the magazine housing.
- the model 1888/05 was a standard model 1888 modified by the addition of rectangular charger clip guides which were riveted/pinned to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets and the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.
- the model 1888/14 was a standard model 1888 modified by the addition of roughly welded charger clip guides to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.

FRT Report

Firearm Reference Number (FRN): 250
Make: Commission Rifle
Model: 1888/14

Summary

Make:	Commission Rifle
Model:	1888/14
Manufacturer:	Loewe & Company
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
250 - 1	8MM MAUSER	5	740	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make designation does not appear on the firearm.
- Commission refers to the "Gewehr-Prufungs-Kommission", struck in November 1887 to address the redesign of German small arms in the face of France's introduction of small bore, smokeless powder cartridges and rifles.

Model

- the model designation is usually marked on the left side of the receiver/frame as "GEW. 88".
- the "14" portion of the model designation indicates conversion to Mauser-stripper clip loading from the original Mannlicher-style enbloc clip loading system and is not marked on the firearm.
- conversions of rifles from model 1888 to model 1888/14 configuration were undertaken in 1914-1915.
- features include: split rear bridge on the receiver/frame whereby the bolt handle turns down ahead of the bridge; Mauser style clip loading guides and thumb cut-out on the left wall of the receiver/frame; two locking lugs on the bolt head; full length oversize steel tube barrel shroud; full length one-piece wood stock; wing safety on the rear of the bolt acting directly upon the cocking piece; flip-up tangent rear sight mounted on the barrel shroud; straight bolt handle; steel barrel band mounted mid-barrel length; stock end-cap/barrel band with side bayonet mounting lug is mounted behind the front sight; cleaning rod is stored beneath the barrel; bolt release button is on the left-rear of the receiver/frame.
- the models 1888, 1888/05, and 1888/14 differ primarily in their magazine loading systems and how they were adapted to their respective configurations.
- the overall length for this rifle with a 740mm barrel is 1245mm (49"), average weight is 3.9kg (8.58 lbs).

Manufacturer

- the manufacturer's name is marked on the front ring of the receiver/frame as "LOEWE BERLIN" below a German Imperial crown, with the date of manufacture stamped below the name.
- approximately 425,000 rifles of this model were produced by this manufacturer; it is unknown as to how many of these were converted to the 1888/14 model configuration.

Action

- turn-bolt design.

Serial Number

- the serial number is typically marked on the left side of the receiver/frame ring, and may have a letter suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- the calibre designation was not part of the original marking on the firearm.
- calibre markings may be found on some examples sold as commercial sporters.
- additionally, some rifles were marked on the top surface of the front receiver/frame ring and on the stock with either a "Z" or an "S" indicating either deepened rifling grooves, or in the latter case, modification to an "S" 8MM MAUSER type ammunition chambering/bore diameter of .323" from .318" in the 1903-05 period.
- rifling characteristics: 4 grooves, 1 turn in 9 1/2 inches, right hand twist.

Shots

- stripper-clip loading.

Other Markings

- markings usually include the model designation on the left side of the receiver/frame, year of manufacture and manufacturer identifiers are usually found on the receiver/frame ring.
- markings of "S", "Z", and/or crescent moon shapes may also be found on the receiver/frame and stock material indicating chambering or rifling changes, or Turkish contract sales.

Remarks

- the model 1888 used a Mannlicher design of enbloc clip loading where the empty clip was ejected through a hole in the floor-plate of the magazine housing.
- the model 1888/05 was a standard model 1888 modified by the addition of rectangular charger clip guides which were riveted/pinned to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets and the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.
- the model 1888/14 was a standard model 1888 modified by the addition of roughly welded charger clip guides to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
245 - 1	8MM MAUSER	5	740	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make designation does not appear on the firearm.
- Commission refers to the "Gewehr-Prufungs-Kommission", struck in November 1887 to address the redesign of German small arms in the face of France's introduction of small bore, smokeless powder cartridges and rifles.

Model

- the model designation is usually marked on the left side of the receiver/frame as "GEW. 88" as applied on manufacture, or if new Turkish production, may not be marked on the firearm at all.
- the "35" portion of the model designation indicates conversion to Mauser-stripper clip loading from the original Mannlicher-style enbloc clip loading system by the Turks and it is not marked on the firearm.
- conversions of rifles from model 1888 to model 1888/35 configuration were undertaken in the 1920's and 1930's.
- features include: split rear bridge on the receiver/frame whereby the bolt handle turns down ahead of the bridge; Mauser style clip loading guides and thumb cut-out on the left wall of the receiver/frame; two locking lugs on the bolt head; full length one-piece wood stock; wing safety on the rear of the bolt acting directly upon the cocking piece; flip-up tangent rear sight mounted on the barrel shroud; straight bolt handle; steel barrel band mounted mid-barrel length; stock end-cap/barrel band with side bayonet mounting lug is mounted behind the front sight; cleaning rod is stored beneath the barrel; bolt release button is on the left-rear of the receiver/frame.
- the original Commission Rifle models 1888, 1888/05, and 1888/14 differ primarily in their magazine loading systems and how they were adapted to their respective configurations, and, as the model 1888/35 was adapted from these models, each rifle may exhibit slight variations in markings and configuration; i.e. no barrel shroud, a pistol grip stock, and tangent rear sight of a Mauser pattern.
- the overall length for this rifle with a 740mm barrel is 1245mm (49"), average weight is 3.9kg (8.58 lbs).

Manufacturer

- the manufacturer's name appears on the receiver ring as a "TC" monogram, indicating "Turkiye Cumhuriyeti" meaing "Republic of Turkey", or as "AS.FA" indicating the military factory at Ankara (Askeri Fabrika).
- crescent moon markings may also be present as may be original German manufacturer's marks.

Action

- turn-bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number is typically marked on the left side of the receiver/frame ring, and may have a letter suffix.

Calibre

- the calibre designation was not part of the original marking on the firearm.
- calibre markings may be found on some examples sold as commercial sporters and arsenal reworks.
- additionally, some rifles were marked on the top surface of the front receiver/frame ring and on the stock with either a "Z" or an "S" indicating either deepened rifling grooves, or in the latter case, modification to an "S" 8MM MAUSER type ammunition chambering/bore diameter of .323" from .318" in the 1903-05 period.
- rifling characteristics: 4 grooves, 1 turn in 9 1/2 inches, right hand twist.

Shots

- stripper-clip loading.

Other Markings

- markings usually include the model designation on the left side of the receiver/frame, year of manufacture and manufacturer identifiers are usually found on the receiver/frame ring.
- markings of "S", "Z", and/or crescent moon shapes may also be found on the receiver/frame and stock material indicating chambering or rifling changes, or Turkish contract sales and conversions.

Remarks

- the model 1888 used a Mannlicher design of enbloc clip loading where the empty clip was ejected through a hole in the floor plate of the magazine housing.
- the model 1888/05 was a standard model 1888 modified by the addition of rectangular charger clip guides which were riveted/pinned to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets and the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.
- the model 1888/14 was a standard model 1888 modified by the addition of roughly welded charger clip guides to either side of the split bridge portion of the receiver/frame to accept clip loading with Mauser designed stripper clips; the front ring of the receiver/frame was grooved to allow for the loading of pointed bullets; the left side of the receiver/frame had a semi-circular thumb groove cut to ease clip loading; the magazine housing was fitted with a spring steel cover to enclose the clip ejection port used under the previous Mannlicher clip system, and was also fitted with a cartridge retention system to keep cartridges in the magazine prior to chambering.

Firearm Reference Number (FRN): 260
Make: Commission Rifle
Model: 1891

Summary

Make:	Commission Rifle
Model:	1891
Manufacturer:	Erfurt Arsenal
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
260 - 1	8MM MAUSER	5	435	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make designation does not appear on the firearm.
- Commission refers to the "Gewehr-Prufungs-Kommission", struck in November 1887 to address the redesign of German small arms in the face of France's introduction of small bore, smokeless powder cartridges and rifles.

Model

- the model designation is usually marked on the left side of the receiver/frame as "GEW. 91".
- manufactured 1891-1896.
- features include: split rear bridge on the receiver/frame whereby the bolt handle turns down ahead of the bridge; two locking lugs on the bolt head; full length oversize steel tube barrel shroud; full length one-piece wood stock; wing safety on the rear of the bolt acting directly upon the cocking piece; flip-up tangent rear sight and folding close range express style sight immediately forward of the receiver/frame mounted on the barrel shroud; scalloped and turned down bolt handle; winged steel forend cap with extended bottom on which a stacking hook is mounted.
- the overall length for this rifle with a 435mm barrel is 995mm (39 1/8"), average weight is 3.1kg (6.82 lbs).

Manufacturer

- the manufacturer's name is normally marked on the front ring of the receiver/frame.

Action

- turn-bolt design.

Serial Number

- the serial number is typically marked on the left side of the receiver/frame ring, may have a letter suffix.

Calibre

- the calibre designation was not part of the original marking on the firearm.
- calibre markings may be found on some examples sold as commercial sporters.
- additionally, some rifles were marked on the top surface of the front receiver/frame ring and on the stock with either a "Z" or an "S" indicating either deepened rifling grooves, or in the latter case, modification to an "S" 8MM MAUSER type ammunition chambering/bore diameter of .323" from .318" in the 1903-05 period.
- rifling characteristics: 4 grooves, 1 turn in 9 1/2 inches, right hand twist.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- Mannlicher style, enbloc clip loading mechanism.
Other Markings	- markings usually include the model designation on the left side of the receiver/frame, year of manufacture and manufacturer identifiers are usually found on the receiver/frame ring.
Remarks	- this rifle is nearly identical to the Commission Carbine, Model 1888 Carbine, except for the addition of a stacking hook at the muzzle; in German terminology this firearm, despite its carbine configuration, is designated and marked as a rifle (Gew.) rather than as a Carbine (Kar.).

Notes

Make

- known example stamped "COMPEER GUN" on the left side of the receiver/frame over the word 'INDIANAPOLIS".
- COMPEER is a trade name used by H&D Folsom Arms Company, circa 1893 to 1926, on firearms made for the Van Camp Hardware and Iron Company of Indianapolis, Indiana.

Model

- model designation is not marked on the firearm.
- this is a generic entry designed to encompass all side by side shotguns marked COMPEER that have no model name marked on them.
- features may include;
- double triggers,
- box lock or side lock action,
- action release lever located on the top tang,
- damascus or fluid steel barrels,
- double exposed hammers or hammerless,
- full pistol grip stock,
- hardwood stock and forend.

Manufacturer

- manufacturer's name may not be marked on the firearm.

Action

- side by side.

Serial Number

- known example had a six digit number without prefix or suffix marked on the action flats.

Notes

Make

- "Component Metal Products, Inc." is marked on top of the tubular receiver/frame.
- Component Metal Products, Inc. was a manufacturer based in Atlanta, Georgia, during the 1990's.

Model

- "CM-55" is marked on top of the receiver/frame.
- this is an unusual single-shot shotgun manufactured with a "twist to open" breech and a simple "open bolt" style of hammer.
- these shotguns are extremely simple, with a hinge on the left side of the receiver/frame and barrel, that allows the barrel to be rotated over to the left for loading and unloading.
- features include: blued finish; no sights; simple tubular construction; may include an AR-style synthetic forward pistol-grip; an underbarrel barrel latch that keeps the barrel aligned with the receiver/hammer assembly during firing; a right-side cocking handle for the hammer/striker, that can also be pushed through the hammer to lock the bolt in a forward or rear position, acting as a safety; and an AR-style synthetic rear pistol-grip.
- a "deluxe" long-barreled version with wooden forearm and thumbhole stock was also produced as the "New Frontiersman".

Manufacturer

- "Component Metal Products, Inc." is marked on top of the tubular receiver/frame.
- Component Metal Products, Inc. was a manufacturer based in Atlanta, Georgia, during the 1990's.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action - single-shot shotgun with a "twist to open" breech.

Serial Number - serial-numbered on the receiver/frame.

Notes

Make

- the make or logo thereof is marked on the firearm.

Model

- the model may or may not be marked on the firearm.
- this is an unusual style of single-shot hunting rifle, using a rotary "cannon-breech" breech block that is twisted (via a bolt handle in the conventional location) to load or unload the rifle.
- features include: round, rifled barrel; open adjustable sights (drilled and tapped for scope mounts); checkered two-piece walnut forearm and pistol-grip stock; right-side bolt handle that operates the rotary breech mechanism; right side safety lever; double set triggers; sling swivels; blued finish.

Manufacturer

- the manufacturer or logo thereof is marked on the firearm.

Action

- rotary/"cannon-breech" single-shot.

Serial Number

- serial number is marked on the receiver/frame.

Notes

Make

- "CONDOR" was observed marked on the receiver/frame/compression chamber.
- "Condor" is a trade name under which some Diana air rifles are sold in the British Commonwealth; this arose out of a sequence of events after World War II. Prior to World War II, German made Diana air rifles (as made by Mayer & Grammelspacher) were sold throughout Europe. After World War II, with the division of Germany and the requirement for war reparations, the Diana factory was moved to Lanarkshire, Scotland, where it was run by Millard Brothers ("Milbros"), who manufactured airguns as "Milbro Dianas". After 1950, the original Diana/Mayer & Grammelspacher factory in (then) West Germany recommenced production, and again began selling airguns throughout Europe. However, to distinguish the Scottish made "Dianas" from the German made "Dianas", the German Diana was required to sell their products in Britain as "Original Dianas". Rather than mark guns destined for the British market as "Original Dianas", Mayer & Grammelspacher chose to launch several new brand names, and still sells air rifles under those names, both in Britain and elsewhere. These include "Condor", "Geco", and "Gecado". Mayer & Grammelspacher has itself since been bought, and is now a subsidiary of RWS, so Diana made air rifles may also be seen marked "RWS".

Model

- "MOD. 34" was observed marked in on the receiver/frame/compression chamber.
- this is an adult class break-barrel spring-piston air rifle
- features include: round rifled barrel with adjustable sights; tubular receiver/frame compression chamber with push-in automatic safety and grooved for scope mounts; one piece wood pistol grip stock with buttpad; blued finish.
- overall length of 1146 mm (45 1/8").

Manufacturer

- manufacturer's name was not observed marked on the firearm.
- "Made in West Germany" was observed marked on the left side of the receiver/frame/compression chamber.

Action

- spring-piston air rifle.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number was observed marked on the left side of the barrel, forward of the barrel block/hinge point.
- observed serial number consisted of six numbers without a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - "CAL. 4.5/.177" was observed marked on the left side of the barrel.

Notes

Make

- "CONDOR" and "MOD. 35" was observed marked on the receiver/frame/compression chamber.
- "Condor" is a trade name under which some Diana air rifles were sold in the British Commonwealth; this arose out of a sequence of events after World War II. Prior to World War II, German made Diana air rifles (as made by Mayer & Grammelspacher) were sold throughout Europe. After World War II, with the division of Germany and the requirement for war reparations, the Diana factory was moved to Lanarkshire, Scotland, where it was run by Millard Brothers ("Milbros"), who manufactured airguns as "Milbro Dianas". After 1950, the original Diana/Mayer & Grammelspacher factory in (then) West Germany recommenced production, and again began selling airguns throughout Europe. However, to distinguish the Scottish made "Dianas" from the German made "Dianas", the German Diana was required to sell their products in Britain as "Original Dianas". Rather than mark guns destined for the British market as "Original Dianas", Mayer & Grammelspacher chose to launch several new brand names, and still sells air rifles under those names, both in Britain and elsewhere. These include "Condor", "Geco", and "Gecado". Mayer & Grammelspacher has itself since been bought, and is now a subsidiary of RWS, so Diana made air rifles may also be seen marked "RWS".

Model

- "CONDOR" and "MOD. 35" are marked on the top of the receiver/frame.
- model 35 was also sold as the "Diana 35", "Gecado 35", "Peerless 35" and "Peerless 35B ".
- this is a break open, barrel cocking action type air rifle.
- features include: hooded front sight and adjustable rear sight; round rifled steel barrel; receiver/frame is grroved for a scope mounts; checkered wooden pistol grip buttstock with cheekpiece.

Manufacturer

- manufacturer's name was not observed marked on the firearm.
- "Made in West Germany" was observed marked on the left side of the receiver/frame/compression chamber.

Action

- hinged barrel design, barrel cocking action.
- discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the left side of the barrel.
- observed serial number consisted of six numbers without a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - calibre is marked on the left side of the receiver/frame at the hinged.

- "Condor" is a trade name under which some Diana air rifles are sold in the British Commonwealth; this arose out of a sequence of events after World War II. Prior to World War II, German made Diana air rifles (as made by Mayer & Grammelspacher) were sold throughout Europe. After World War II, with the division of Germany and the requirement for war reparations, the Diana factory was moved to Lanarkshire, Scotland, where it was run by Millard Brothers ("Milbros"), who manufactured airguns as "Milbro Dianas". After 1950, the original Diana/Mayer & Grammelspacher factory in (then) West Germany recommenced production, and again began selling airguns throughout Europe. However, to distinguish the Scottish made "Dianas" from the German made "Dianas", the German Diana was required to sell their products in Britain as "Original Dianas". Rather than mark guns destined for the British market as "Original Dianas", Mayer & Grammelspacher chose to launch several new brand names, and still sells air rifles under those names, both in Britain and elsewhere. These include "Condor", "Geco", and "Gecado". Mayer & Grammelspacher has itself since been bought, and is now a subsidiary of RWS, so Diana made air rifles may also be seen marked "RWS".

Model

- "CONDOR" and "MODEL 75" are marked on the top of the receiver/frame.
- this is a fixed barrel; side lever cocking recoilless single shot spring air rifle;
- this model uses the Giss Contra Piston system and is one of the most powerfull rifles of the Diana line.
- this target air rifle has a variable aperature front sight and an adjustable target rear sight, adjustable match trigger, barrel weights and an adjustable walnut stock.
- differs from other Diana models in stock design, muzzle velocity of the projectile and target options.

Manufacturer

- manufacturer's name is not usually marked on the firearm.
- "Made in Germany" or "Made in West Germany" may be marked on the firearm.

Action

- spring-piston powered.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial numbered on the barrel, forward of the barrel block/hinge point.
- example observed with four numbers without a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - calibre is marked on the firearm.

17757 - 1	28 FRONT-LOADING CUP PRIMER	6	76	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "CONN. ARMS CO., NORFOLK, CONN." is marked on the barrel, with one or more patent dates.
- "Connecticut Arms Company" revolvers were manufactured by Connecticut Arms Company of Norfolk, Connecticut, U.S.A.
- "Connecticut Arms Company" was a trade name/trademark manufactured by Crescent Fire Arms Company.

Model

- manufactured from 1864 to 1866.
- this is an unusual metallic-cartridge firing single action revolver manufactured in the 1860's to circumvent the Rollin White "bored-through cylinder" patent held by Smith & Wesson; to this end, the cylinder has a solid breech end, with slots into the chambers between the bolt stops on the outside of the cylinder. During firing, the hammer nose enters the chamber through these slots, crushing the portion of the cup-fire case that contains the priming compound.
- these cartridges were both loaded and ejected from the front of the cylinder, and have a hook-shaped ejector pivoting on the right side of thereceiver/frame, below the cylinder; this ejector enters the chambers through the firing-pin slots in the cylinder, pushing expended cases forward out of the chamber enough to be grasped with the fingers and discarded.
- features include: square butt, brass receiver/frame (most often silver-plated), walnut grips, spur trigger, octagonal barrel, and blued cylinder and barrel.
- it is believed that at least 2700 of these revolvers were manufactured.
- the barrel is marked "Conn. Arms Co. Norfolk, Conn" and may show "1864" (for Standard variant) or "1864" and "1866" (for Late variant).

Manufacturer

- Connecticut Arms Company was located in Norfolk, Connecticut, U.S.A. from 1864 to 1866.
- Connecticut Arms Company manufactured several variations Stephen Wood's patent front loading cup primed metallic cartridge firing revolver.

Calibre

- this is an unusual cartridge that resembles a straight-walled rimfire without a rim, and with a depression in the center of the base; the priming compound is deposited around the edge of the base depression.

Notes

Make

- "CONTINENTAL" is marked on top of the barrel.
- Trade name used by Hood Firearms Company.
- The Continental Arms Company was located in Norwich, Connecticut. They started manufacturing pepperboxes, single shot handguns, and revolvers in 1866. It is believed that shortly thereafter in 1870, Hood Firearms Company purchased Continental Arms and continued production of their revolvers under the same brand name, however, this is unproven.

Model

- "CONTINENTAL 20" is marked on top of the barrel.
- Features may include: fake rifling marks on barrel muzzle; spring loaded button style cylinder axis pin release located ahead of the cylinder, on the right side of the receiver/frame; smooth or fluted cylinder; rear sight trough on top of receiver/frame; blued spur trigger and hammer; right side of the receiver/frame is scalloped for loading and unloading;

Serial Number

-The serial number may be marked on the butt of the grip.
- The serial number of a known example consisted of three digits.

FRT Report

Firearm Reference Number (FRN): 134477
Make: Continental
Model: Continental 33

Summary

Make:	Continental
Model:	Continental 33
Manufacturer:	Continental Arms Company
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
134477 - 1	38 RF	5	72	Antique AFR, Section 1, para. 6	Non-Commercial Customization	

Notes

Make

- "CONTINENTAL 33" is marked on the top of the barrel.

Model

- "CONTINENTAL 33" is marked on the top of the barrel.
- this firearm would have been produced from 1866 to early 1870's.
- firearm is attributed to the Continental Firearms Company due to the absence of any F.W. Hood patent dates marked on it. This affiliation is based on the very close resemblance of this handgun to that of the "Continental 26" which is marked with the Hood patent date of April 6, 1875.
- features include: solid top receiver/frame; single action only spur trigger; blade front sight and groove in the top strap for a rear sight; octagonal barrel; removable fluted cylinder with rectangular slotted locking notches at the rear; loading notch on the right side of the receiver/frame; button-type cylinder release pin located on the left side of the receiver/frame in front of the cylinder; exposed spur hammer; bird head grip frame; checkered black rubber grips; nickel plated finish.

Manufacturer

- Continental Arms Company was located in Norwich, Connecticut, USA; research indicates that it existed circa 1866 to 1870 when it is thought to have been purchased by the Hood Fire Arms Company of Norwich, CT.

Serial Number

- known example had a four digit number without prefix or suffix marked on the bottom of the grip frame.

FRT Report

Firearm Reference Number (FRN): 24045
Make: Continental Arms Company
Model: Pepperbox

Summary

Make:	Continental Arms Company
Model:	Pepperbox
Manufacturer:	Bacon Manufacturing Company
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
24045 - 1	22 SHORT	5	64	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "CONTINENTAL ARMS CO. NORWICH, CT." and "PATENTED AUG. 28, 1866" are marked on the barrel unit.
- these pistols were built by the Bacon Arms Company, but used "CONTINENTAL ARMS CO." as a trade name to avoid confusion with another of Bacon's pepperbox revolvers.

Model

- the model designation does not appear on the firearm.
- this is a somewhat unusual five-shot "pepperbox" type revolver made in the late 1860's
- features include: square butt, blued iron receiver/frame, rosewood grips, spur trigger, loading groove on right side of receiver/frame, fluted barrels with round cylinder portion, and a circular shield/retainer that circles the barrel unit just forward of the cylinder; the barrel unit on this pepperbox must be removed to eject empty cases.
- a very limited number of these pistols were built with brass receiver/frames, rather than iron receiver/frames.
- marked "CONTINENTAL ARMS CO. NORWICH, CT. PATENTED AUG. 28, 1866" on the barrel unit.

Manufacturer

- the manufacturers name does not appear on the firearm.

Action

- "pepperbox" type revolver, with automatically indexing chambers/barrels.

Serial Number

- sample examined had a three digit serial number located under the left grip.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make

- "COOEY" is marked on the firearm.
- "COOEY" trade name/trademark was used by "H.W. Cooey Machine & Arms Co Ltd." and "Winchester".
- "COOEY" was sold to the Olin Corporation (owner of Winchester-Western) in 1961.
- "COOEY" tradename/trademark and products were manufactured by Winchester.

Model

- "Model 64" is marked on the top of the barrel.

Manufacturer

- "Winchester" or "Winchester Western" is marked on the top of the barrel.

Action

- blowback operated.

Serial Number

- may or may not be numbered.
- Export production for US market was serial numbered only after the "Gun Control Act of 1968" took effect in the USA.
- Canadian domestic firearms were not serial numbered until 1969 or 1970.
- Canadian model 64's have a "CA" prefix or suffix.
- The serial number is located on the side of the receiver/frame.
- The serial number usually has a letter prefix.
- it is possible to confuse the word AUTO on the top of the barrel with the numbers A010. This is not to be considered the serial number.

Calibre

- the calibre designation is marked on the top of the barrel.

Shots

- detachable box magazine.
- The Cooey Model 64, in all variants, was produced from 1961 to 1970 with an 8 shot plastic magazine. This magazine produced feed problems due to the soft material of the plastic "wearing-out quickly".
- This weakness was corrected by the factory, in 1970, by modifying the firearm to take a 10 shot, detachable, steel, box magazine which was in use with another Winchester product.
- This retro-fit modification kit was made available to Winchester authorized service agents and was incorporated into all new production Model 64 Rifles effective November 1970.

Remarks

- this firearm is a semi automatic sporting rifle, with a detachable magazine.
- this firearm is designated Cooey Model 64, (when produced by / at the former H.W. Cooey Machine & Arms Company).
- Cooey was purchased by Winchester-Western, and introduced into the Canadian market in 1961 by the Olin Corporation (owner of Winchester-Western).

Notes

Make

- "COOEY" is marked on the firearm.
- "COOEY" trade name/trademark was used by "H.W. Cooey Machine & Arms Co Ltd." and "Winchester".
- "COOEY" was sold to the Olin Corporation (owner of Winchester-Western) in 1961.
- "COOEY" tradename/trademark and products were manufactured by Winchester.

Model

- "MODEL 71" is marked on the barrel.
- introduced in 1966, discontinued in 1972.
- this is a center fire bolt-action rifle built under the "Cooey" trade name by Winchester; essentially, this rifle is a Winchester Model 70, with Cooey-specific markings and a sliding receiver/frame mounted safety.
- features include: smooth hardwood pistol-grip stock; blued finish; open adjustable folding (rear) sights; receiver/frame is drilled and tapped for scope mounts; tang-mounted sliding safety; and an internal box magazine.

Manufacturer

- "Made in Cobourg Ont. by" and "Winchester-Western (Canada) Limited" may be marked on the barrel of the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- turn bolt operated.
Serial Number	- the serial number is marked on the right front side of the receiver/frame.
Calibre	- the calibre designation is marked on the barrel.
Shots	- internal box magazine.

Notes

Make

- "COOEY" is marked on the firearm.
- "COOEY" trade name/trademark was used by "H.W. Cooey Machine & Arms Co Ltd." and "Winchester".
- "COOEY" was sold to the Olin Corporation (owner of Winchester-Western) in 1961.
- "COOEY" tradename/trademark and products were manufactured by Winchester.

Model

- "Model 840" may be marked on the left side of the receiver/frame or the barrel.
- in 1961, the Cooey company was sold to the Olin Corporation (owner of Winchester Western) who changed the model designation from "84" to "840" and continued production under the manufacturing name "Winchester".

Manufacturer

- "Winchester" or "Winchester Western" is marked on the right side of the receiver/frame or on the barrel.

Action

- single-shot, top break action.

Serial Number

- serial number is located on the right side of the receiver/frame.
- serial number rationalization is unknown.
- observed serial number consisted five numbers without a letter prefix or suffix.
- observed serial number consisted of six numbers without a letter prefix or suffix.

Calibre

- the gauge and chamber length are marked on the barrel.

Remarks

- single barrel top break shotgun with automatic ejector identical to the H.W. Cooey Machine & Arms Company produced Model 84 shotgun, (with the addition of pressed checkering).

122240 - 1	45 PERCUSSION	1	89	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "Cook" was observed marked on the right side of the receiver/frame.

Model

- Screw Barrel Pistols were popular in the period 1850 to 1870 and were commonly manufactured in Belgium and England.
- model designation is not marked on the firearm.
- model designation is derived from the method by which this pistol is loaded; loading was accomplished by unscrewing the barrel.
- this is a single shot pistol with a removable barrel and an exposed hammer centrally located on the receiver/frame behind the chamber.
- this handgun is intended to be loaded from the breech end of the barrel and as such was originally suppied with a wrench to unscrew the barrel from the receiver/frame in order that a lead ball and loose powder could be inserted into the chamber end of the barrel and then the barrel screwed back onto the receiver/frame.
- this is a single shot box-lock action pistol with a removable barrel and an exposed hammer centrally located on the receiver/frame behind the chamber.
- this handgun is intended to be loaded from the breech end of the barrel and as such was originally suppied with a wrench to unscrew the barrel from the receiver/frame in order that a lead ball and loose powder could be inserted into the chamber end of the barrel and then the barrel screwed back onto the receiver/frame.
- features include: round, removable barrel; box lock action with a centrally located cock with flintlock ignition; top mounted sliding safety; folding trigger; wooden grip.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- COOK name has been associated with numerous gun makers/gun smiths.
- BATH, ENGLAND:
- Alfred Cook was in business from circa 1874 to circa 1886.
- John Cook was in business from circa 1791 to circa 1793.
- John Cook was in business from circa 1825 to circa 1870.
- William Cook was in business from circa 1815 to circa 1822.
- William Cook was in business from circa 1846 to circa 1849.
- BIRMINGHAM, ENGLAND:
- H. Cook was in business circa 1860.
- James Cook was in business from circa 1817 to circa 1831.
- John Thomas Cook & Son/Sons was in business from circa 1855 to circa 1878.
- DORSET, ENGLAND"
- James Cook was in business circa 1854.
- LINCOLN, ENGLAND:
- John Cook was in business from circa 1821 to circa 1841.
- LIVERPOOL, ENGLAND:
- William Cook was in business from circa 1909 to circa 1917.
- LONDON, ENGLAND:
- James Cook in business circa 1841.
- John Cook was in business from circa 1814 to circa 1820.
- John Thomas Cook was in business from circa 1839 to 1850.
- John Thomas Cook & Sons (JT Cook & Sons) was in business from circa 1850 to circa 1855.
- Richard Cook was in business circa 1841.
- SALOP, SHOPSHIRE, ENGLAND:
- John Cook was in business from circa 1847 to circa 1854.
- SHEPTON MALLET, SOMERSET, ENGLAD:
- John Cook was in business from circa 1797 to 1839.
- Thomas Cook was in business from circa 1841 to circa 1844.
- Thomas Cook Junior were in business from circa 1850 to circa 1883.
- WARMINSTER, WILTS, ENGLAND:
- Thomas Cook was in business from circa 1821 to circa 1830.
- CUPAR, SCOTLAND:
- David Cook was in business from circa 1799 to circa 1811.

Action

- the barrel unscrews in front of the chamber, so it can be loaded with a ball that fits the barrel more tightly than is possible with a muzzle loader.
- the turnoff barrel may be rifled.

Serial Number

- known example did not have a serial number.

Notes

Make

- "COOK & BROTHER", "COOK & BROTHER NO 1862" or "COOK & BROTHER ATHENS GA" over "GA" may be marked on the barrel or the lockplate ahead of the hammer.

Model

- manufactured between 1860 and 1866.
- this model is based on the Enfield Pattern 1853 muzzle loading percussion rifle. - this model was manufactured for the Confederate States of America.
- features include: blade front sight and a fixed V-notch rear sight; round barrel with two barrel bands; ramrod is mounted under the barrel; right side lock plate with an exposed percussion hammer; full length wood stock with brass furniture; sling swivels are attached to the front barrel band and the buttstock.
- early production featured a steel ramrod with large flat brass tip.
- Cook & Brother made three different versions of the percussion carbine/rifle:
- artillery carbine/musketoon with a 610 mm (24") barrel,
- cavalry carbine with a 533 mm (21) barrel and a saddle ring, and an
- infantry rifle with a 838 mm (33") barrel and with or without a lug for a bayonet.

Manufacturer

- "COOK & BROTHER", "COOK & BROTHER NO 1862" or "COOK & BROTHER ATHENS GA" over "GA" may be marked on the barrel or the lockplate ahead of the hammer.

Action

- muzzle loader.

Serial Number

- serial number is usually marked on the lockplate right after the manufacturer information, and may be found on the barrel.

149013 - 1	36 PERCUSSION	4	711	Antique CC 84(1) "antique firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "EW COOK" is usually marked on the firearm.
- Elliot Wilkinson Cook was a Lockport, New York-based gunsmith during the mid-to-late-1800s, known primarily for his percussion hunting and target rifles.

Model

- the model is not marked on the firearm; this is a description of the firearm type.
- this is an unusual style of four barrelled "swivel rifle" (a rifle with multiple barrels, chambers and individual nipples that are rotated by hand around a central axis pin) manufactured by Elliott Cook prior to 1861.
- features include: browned or blued finish; open fixed or adjustable sights; ramrod thimbles may be seen on the side of the barrels; straight-grip maple or walnut stock (no forearm); external manually-cocked hammers on back-action locks; double triggers; finial trigger-guard/grip strap; and a shotgun butt.
- this firearm was designed to fire two shots, then the shooter would re-cock the hammers, rotate the barrels through 180 degrees to bring the lower barrels into firing position, and then the next two shots could be fired.

Manufacturer

- "EW COOK" is usually marked on the firearm.
- Elliot Wilkinson Cook was a Lockport, New York-based gunsmith during the mid-to-late-1800s, known primarily for his percussion hunting and target rifles.

Action

- muzzle loaded percussion multi-barrel.

Notes

Make

- "EW COOK" is usually marked on the firearm.
- Elliot Wilkinson Cook was a Lockport, New York-based gunsmith during the mid-to-late-1800s, known primarily for his percussion hunting and target rifles.

Model

- manufactured prior to 1861.
- model designation is not marked on the firearm.
- this is a side hammer percussion target pistol, often made in a "buggy rifle" configuration with a detachable shoulder-stock. These pistols characteristically have a very large-heavy-diameter octagonal barrel and finely-shaped orthopaedic pistol-grips.
- features include: blued or browned finish; heavy octagonal barrel; open screw-adjustable or "tube" sights; side hammer percussion lock; varying styles of triggers; and a pistol-grip, usually with a detachable solid or frame shoulder-stock.

Manufacturer

- "EW COOK" is usually marked on the firearm.
- Elliot Wilkinson Cook was a Lockport, New York-based gunsmith during the mid-to-late-1800s, known primarily for his percussion hunting and target rifles.

Action

- muzzle-loaded percussion single-shot.

Notes

Make

- "COOK" was marked on an observed specimen on the left side of the receiver/frame.
-"BATH" was marked on an observed specimen on the right side of the receiver/frame.

Model

- manufactured circa 1800.
- model designation is not marked on the firearm.
- model designation is derived from the method by which this pistol is loaded; loading was accomplished by unscrewing the barrel.
- this is a single shot pistol with a removable barrel and an exposed hammer centrally located on the receiver/frame behind the chamber.
- this handgun is intended to be loaded from the breech end of the barrel and as such was originally suppied with a wrench to unscrew the barrel from the receiver/frame in order that a lead ball and loose powder could be inserted into the chamber end of the barrel and then the barrel screwed back onto the receiver/frame.
- features include: round, removable barrel with lug; box lock action with a centrally located cock with flintlock ignition; top mounted sliding safety; folding trigger; wooden grip.

Manufacturer

- "COOK" was marked on an observed specimen on the left side of the receiver/frame.
-"BATH" was marked on an observed specimen on the right side of the receiver/frame.
- John Cook was a gunmaker located in Bath, Somerset, England.
- John Cook was in business from circa 1791 to circa 1793.
- John Cook was in business from circa 1825 to circa 1870.

Action

- the barrel unscrews in front of the chamber, so it can be loaded with a ball that fits the barrel more tightly than is possible with a muzzle loader.
- the turnoff barrel may be rifled.

Notes

Make

- "THOMAS COOK" is marked on both sides of the receiver/frame.
- Thomas Cook father was John Cook.
- John Cook was located at High Street, Shepton Mallet, Southhampton from 1797 to 1839.
- Thomas Cook was located at High Street, Shepton Mallet, Somerset, England from 1841 to 1844.
- Thomas Cook junior was located at High Street, Shepton Mallet, Somerset, England from 1850 to 1883.
- "THOMAS COOK" trade name was also used by Arthur James Chamberlain.

Model

- model designation is not marked on the firearm.
- this is a custom side by side shotgun made circa 1885.
- features include: round smoothbore Damascus steel barrels with a bead front sight; front hinged receiver/frame with break open lever mounted on the underside in front of the trigger guard; break open lever locks into the trigger guard; engraved side lock action with a dog and bird scene; engraved trigger guard, under lever, and external hammers; extractors; double triggers; checkered wood forearm held with a barrel esutcheon and straight grip butt stock with a skeleton buttplate.

Manufacturer

- "A.CHAMBERLAIN (LATE COOK) HIGH ST SHEPTON MALLET" is marked on the top of the barrel rib.
- Arthur James Chamberlain succeeded to the business of John and Thomas Cook.
- Arthur James Chamberlain was located at 48 High Street, Shepton Mallet, Somerset, England circa 1883 and 19 High Street until circa 1890.
- Arthur James Chamberlain died in 1891.
- Arthur James Chamberlain business was run by Mrs. Annie Chamberlain from 1891 to 1897 at 18 Queen Street, Market Place, Salisbury, England.
- Arthur James Chamberlain business was succeeded by Arthur Chamberlain circa 1901 to 1917 and later his wife circa 1920 to 1922.
- Chamberlain business was continued by A. Chamberlain to circa 1939 at 21a Milford St. and finally succeeded to S.R.Jeffery & Son after 1951.

Action

- side by side barrel configuration, hinged barrel design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number was observed marked on the rear of the trigger guard.
- observed serial number consisted of four numbers without a letter prefix or suffix.

Notes

Make - firearm will be marked, "J.R. Cooper Co.", "J.R. Cooper's Patent", "J.R. Cooper Patentee", "Cooper's Patent", "J.R. Cooper Maker", or a variation thereof.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- no model name appears on this firearm. - this is a generic entry designed to encompass the varied designs of pepperbox handguns produced by J.R.Cooper & Co. - produced circa 1838 to 1866. - markings on this firearm may be found on either side plate, top strap or top of the barrels. - double action. - percussion cap and disc primer versions were produced. - may be under-hammer or top-hammer, folding trigger, or ring-type trigger. - rotating barrel clusters may vary in shots from four to six.
Manufacturer	- Joseph Rock Cooper (J.R. Cooper) was an British gunmaker circa 1838-1862 who along with Joseph Bentley of Birmingham and Liverpool were known as the principle designer's and manufacturer's of pepper-box revolvers. Various British patents were issued to Cooper that included improvements to percussion revolver and various breech loading rifle and shotgun designs. - in 1862, the J.R.Cooper patents and manufacturing facility were taken over by "Cooper & Goodman" operating until 1890.
Action	- rotating barrel cluster.
Serial Number	- known example had no serial number.
Barrel	- barrel length on this type of firearm is an exterior measurement from muzzle end of barrel to chamber end where the percussion nipples screw in to the rear of the barrels.
Calibre	- known example did not have a calibre designation marked on it.

Notes

Make	- Copperhead is an inexpensive line of air guns manufactured by Crosman. This line is designed for the entry level market. - the logo for this line of air guns is a "snake head" in a diamond outline.
Model	- introduced in 1996. - is a single-stroke pneumatic air rifle styled after the Remington 1187 series of shotguns - features include: magnetic bolt-head that retains BBs from an internal magazine when the rifle is cocked; black plastic stock and forearm with smooth-bore steel barrel; bead sight, look-alike "shotgun shell" in the buttstock that is actually a container for additional BBs, and cross-bolt safety.
Action	- single-stroke pneumatic air rifle. - does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.
Serial Number	- serial numbered on left side of receiver/frame, with a prefix code that indicates date of manufacture.
Barrel	- this air rifle is styled after the Remington "1187" shotgun. To accomodate this design there is a barrel cover that makes the barrel appear longer (around 420mm). The actual barrel length is 356mm.
Shots	- BBs are fed from a reservoir inside the air-rifle, and are picked up one at a time by a magnetic bolt-head.

- Copperhead is an inexpensive line of air guns manufactured by Crosman. This line is designed for the entry level market.
- the logo for this line of air guns is a "snake head" in a diamond outline.

Model

- introduced in 1996.
- model may be marked on right side of receiver/frame.
- is a single-stroke pneumatic air rifle that can fire BBs or pellets
- features include: a magnetic bolt-head that retains BBs from an internal magazine; a manually-advanced "clip" that can be loaded with pellets; a black plastic stock and forearm with smooth-bore steel barrel; adjustable rear sight; fixed front sight; and cross-bolt safety.

Action

- single-stroke pneumatic air rifle.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Calibre

- will shoot pellets or BBs.

Shots

- the BBs are fed from a reservoir inside the air-rifle
- the pellets are loaded into a 5-shot "clip" that must be manually advanced across the front of the "bolt" for each shot.

FRT Report

Firearm Reference Number (FRN): 172843
Make: Corbet, R
Model: Scottish Highlander Regimental Flintlock Pistol

Summary

Make:	Corbet, R
Model:	Scottish Highlander Regimental Flintlock Pistol
Manufacturer:	Corbet, R
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
172843 - 1	52 FLINTLOCK	1	200	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "R CORBET" is marked on the lockplate.
- "R CORBET" was located in London, United Kingdom.
- "R CORBET" operated business from 1782 to 1790.
- "R CORBET" was located in New-York, New-York U.S.A. circa 1798.

Model

- model designation is derived from the characteristics of the firearm.
- this is an all steel construction, including the stock, flintlock Pistol.
- features include: round barrel slightly flared at the muzzle; flat sided metal stock with curved grip; under the barrel ram rod; button shaped triggers without trigger guard; ram's horn butt with a threaded, centre knob for the touch hole pick; belt hook attachment on the left side; unfinished metal surface with engraving and/or Regimental numbers.
- a very similar pistol, the "Black Watch Pistol" is known under several similar names, and must not be confused with the "Murdoch" pistol; where the "Murdoch" pistol has a "ram's-head" butt, with curlicue extensions that help to protect a ball-headed vent-pick threaded into the butt, the "Black Watch Pistol" is made with an all-brass butt and stock, with a double-lobed "kidney-shaped" butt that allows the pistol to be used as a club after the shot is fired.

Manufacturer

- "R CORBET" is marked on the lockplate.
- "R CORBET" was located in London, United Kingdom.
- "R CORBET" operated business from 1782 to 1790.
- "R CORBET" was located in New-York, New-York U.S.A. circa 1798.

Action

- muzzle loader.

Shots

- muzzle loader.

Notes

Make	- "COSMI" is marked on the receiver/frame.
Model	- model not marked on firearm. - this is the "Lightweight" version of the Cosmi semi-automatic shotgun, manufactured with an aluminium-alloy receiver, rather than the steel receiver of the "Standard" model, or the titanium receiver of the "Titanium" model. - This is a custom-order semi-auto shotgun with several unique features and options available; these shotguns are hand-built, with a break-open receiver/frame to allow the shooter to reload the tubular magazine located in the fore-end. - features include: blued steel barrel; bead sight; may include screw-in interchangeable choke tubes; deluxe walnut straight or pistol-grip stock and forearm; blued or nickeled receiver/frame with various grades of engraving; optional interchangeable screw-in choke tubes, a top-lever to open the action; an action-release button on the left side of the receiver/frame; and a tang safety.
Manufacturer	- "COSMI - BREV." and "ANCONA - ITALY" may be marked on the side of the receiver/frame. - "FUCILE COSMI" followed "BREVETTATO - TORRETTE DI ANCONA ITALIA" may be marked on the side of the receiver/frame.
Action	- recoil-operated.
Serial Number	- serial number is marked on the frame/receiver. - observed serial number consisted of four numbers.
Barrel	- barrel length to customer's specifications.
Shots	- tubular in-fore-end magazine, available in 3- or 8-round capacities, but normally blocked to 2 rounds when hunting.

Notes

Make

- "Cosmi" is marked on the barrel.

Model

- model not marked on firearm.
- approximately 7000 produced.
- this is the "standard" version of the Cosmi semi-automatic shotgun, manufactured with a steel receiver, rather than the aluminium-alloy receiver of the "Lightweight" model, or the titanium receiver of the "Titanium" model.
- This is a custom-order semi-auto shotgun with several unique features and options available; these shotguns are hand-built, with a break-open receiver/frame to allow the shooter to reload the tubular magazine located in the fore-end.
- features include: blued steel barrel; bead sight; may include screw-in interchangeable choke tubes; deluxe walnut straight or pistol-grip stock and forearm; blued or nickeled receiver/frame with various grades of engraving; optional interchangeable screw-in choke tubes, a top-lever to open the action; an action-release button on the left side of the receiver/frame; and a tang safety.

Manufacturer

- "COSMI - BREV." and "ANCONA - ITALY" are marked on the side of the receiver/frame.
- Americo & Figlio Cosmi are based in Torrete, Italy, and have been manufacturing a semi-automatic shotgun of their own design since 1930.

Action

- recoil operated.

Serial Number

- serial number is marked on the receiver/frame.

Barrel

- barrel length to customer's specifications.

Shots

- tubular in-fore-end magazine, available in 3- or 8-round capacities, but normally blocked to 2 rounds when hunting.

Notes

Make

- "COSMOPOLITAN ARMS CO.", "HAMILTON O. US.", "GROSS' PATENT" and "1859" or "COSMOPOLITAN ARMS CO.", "HAMILTON O. US.", "UNION" and "RIFLE" may be marked on the lock plate.
- "UNION" and "RIFLE" may be marked on the right side of the receiver/frame.

Model

- "GROSS' PATENT" and "1859" or "UNION" and "RIFLE" may be marked on the lock plate.
- "UNION" and "RIFLE" may be marked on the right side of the receiver/frame.
- manufactured prior to June 1862.
- Henry Gross Junior of Tiffan, Ohio was granted patent number 25,259 on August 30, 1859 for a breechloading firearm.
- this is a side hammer, breech loading, under lever operated falling block action carbine.
- this carbine requires a separate percussion cap.
- features include: part round to part octagon barrel; right side lock plate with an extremely long nosed hammer; walnut straight grip buttstock with no forearm; sling ring on the left side of the receiver/frame.
- this carbine was issued to the 5th and 6th Illinois cavalry in 1862.

Manufacturer

- Cosmopolitan Arms Company was located in Hamilton, Ohio, U.S.A. from 1860 to 1865.
- Cosmopolitan Arms Co. produced Gross patent carbines and rifles.
- Cosmopolitan Arms Co. was owned by Edward Gwynn and Abner C. Campbell.
- E. Gwynn and A.C. Campbell (Gwynn & Campbell) produced a Gross' patent style carbine under patent number 30,709 granted on October 21, 1862.
- Gwyn & Campbell was located in Hamilton, Ohio, U.S.A. from 1861 to 1866.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number started with the number 1 and continued upwards.
- total quantity of about 1140 units produced so it is believed that the serial number range coincides with total produced.
- an assembly number may also be marked on the firearm.

Firearm Reference Number (FRN): 198020
Make: Costantino, Antonio
Model: Lorenzoni Type

Summary

Make:	Costantino, Antonio
Model:	Lorenzoni Type
Manufacturer:	Costantino, Antonio
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Lever Action
Country of Manufacturer:	ITALY
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
198020 - 1	50 FLINTLOCK	7	310	Antique CC 84(1) "antique firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "COSTANTINO" is marked on the right side of the rotating breech cylinder.
Model	- The model designation is not marked on the firearm. - This flintlock handgun uses the "Lorenzoni System". Two magazine compartments in the butt hold powder and ball projectiles, another compartment located below the flash pan holds priming powder. To load, the firearm is tilted down and the lever turned clockwise, then returned to its starting position; this rotates the breechblock and gravity loads powder, ball, and priming powder each in distinct recesses, the hammer is cocked and the firearm is ready to fire. - Features include: flared muzzle; unloading port under the receiver; brass rotating breech; right side hammer; priming magazine below flash pan; right hinged loading cover in butt.
Manufacturer	- "COSTANTINO" is marked on the right side of the rotating breech cylinder. - Antonio Constantine was in operation in Ferrara, Italy circa 1790-1807, known to make repeating flintlocks using the Lorenzoni/Cookson system.
Action	- Rotating Breechblock by use of a Lever, Flintlock Ignition
Serial Number	- The serial number is not marked on the firearm.
Calibre	- The calibre designation is not marked on the firearm.
Shots	- Internal magazine compartment in the butt/pistol grip.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments - Some examples of this model, when manufactured prior to 1898 may be considered Antique in Canada.

Notes

Make

- "PH COUNET" is normally marked on barrel just in front of the cylinder.

Model

- model designation is not marked on firearm.
- do not confuse the three digit number that appears below the maker's name with a model designation.
- manufactured from 1865 to 1890.
- features include: fixed sights; octagonal or round barrel with raised rib; plain or fluted cylinder; top break front hinged receiver/frame; barrel release lever is located on left side or on both sides of the frame/receiver; automatic extractor; spur hammer; trigger guard or folding double action trigger mechanism; round or square pistol grip butt; may have lanyard ring.
- Belgian proofmarks are apparent on the barrel, cylinder and/or receiver/frame.

Manufacturer

- "PH. COUNET" is normally marked on the rear of the barrel in front of the cylinder; it may also be marked on the side of the grip frame underneath the grip plates.
- Phillipe Counet was a Belgian firearms manufacturer located in Liege, circa 1865 to 1890.

Serial Number

- known examples had four digit serial numbers without prefix or suffix marked on the left side of the receiver/frame.

FRT Report

Firearm Reference Number (FRN): 23703
Make: Coventry Ordnance Works (COW)
Model: Cow Gun

Summary

Make:	Coventry Ordnance Works (COW)
Model:	Cow Gun
Manufacturer:	Coventry Ordnance Works (COW)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Cannon
Action:	Full Automatic
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
23703 - 1	37X190	5	1520	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "Coventry Ordnance Works" or the abbreviation "C.O.W." is marked on the cannon.
Model	- the model is not marked on the cannon; these light cannon were named "Cow Guns" because of the manufacturer's initials, "Coventry Ordnance Works". These light cannon were produced in both Mark 3 and Mark 4 versions, and saw service from 1918 through the Second World War. - this is a light cannon originally designed for use as airborne anti-aircraft cannon, but which also saw limited use as anti-submarine armament on flying boats; these cannon never proved to be very successful or effective (with less than 100 being built), but were kept in use through World War Two out of necessity and the lack of anything better. - features include: a very "bare" tubular appearance, with a barrel wrapped with a clockwise recoil spring and having a guide piston mounted on the underside of the gun; blued finish; a clip guide for 5-round clips mounted on top of the cannon, with a rudimentary pistol-grip opposite the clip guide; and arranged for a pintle mounting. - these cannon were originally intended to be mounted in aircraft, for anti-aircraft use, but the difficulties of aiming and the heavy recoil made them as dangerous to the host plane as they were to targets, so they were then tried as anti-submarine cannon on seaplanes. During World War Two, numbers of these cannon were again employed as mobile anti-aircraft guns, mounted in the backs of flat-bed armoured trucks.
Manufacturer	- "Coventry Ordnance Works" or the abbreviation "C.O.W." is marked on the cannon.
Action	- long recoil operated.
Serial Number	- serial numbered on the receiver/frame.
Shots	- five-round clip-fed.

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
25587 - 1	38 SPL	6	130	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "COWBOY" and "RANGER" is marked on the top strap of the firearm.
- the "Fabriques d'Armes Unies de Liege" logo of a running deer may be moulded into the grip plates.
- "Baby", "Bull Dog", "Centaure", "Clement Fulgor", "Constabulary", "Cowboy Ranger", "Dictator", "Extracteur", "F.A.U.L.", "Le Centaure", "Liege United Arms", "Milady", "Nagant" and "Texas Ranger" were some brand/trade names and models manufactured and sold by Fabriques d'Armes Unies de Liege (F.A.U.L.).

Model

- "COWBOY" and "RANGER" is marked on the top strap of the firearm.
- "Cowboy Ranger" was a trade/model name used by "Fabrique d'Armes Unies de Liege".
- this model was introduced in the early 1920's along with the "Texas Ranger".
- this model resembles a Colt Single Action Army revolver, but in double action.

Manufacturer

- "Fab D'Armes Unies Liege Belgium" may be marked on the barrel.
- "Fabriques d'Armes Unies de Liege" logo of an running deer or elk inside an oval is moulded into the grip plates.
- "Fabriques d'Armes Unies de Liege" was founded in 1919.
- "Fabriques d'Armes Unies de Liege S.A." was formed from the amalgamation of "Fabriques d'Armes Reunies", "Fabriques d'Armes de Liege" and "Ferdinand Hanquet".
- "Fabriques d'Armes Reunies" was formed from the partnership of "Albert Simonis", "Antoine Bertrand & Fils" and "Pirlot & Fresart".
- "Fabriques d'Armes de Liege" was formed from the partnership of "J. Ancion & Fils", "Joseph Tolet & Cie" and "Societe Anonyme Fabrication des Armes a Feu".
- "Fabriques d'Armes Unies de Liege" ceased operations in 1959.

Serial Number

- the serial number may be marked under the grip plate.

Calibre

- the calibre designation may be marked on the side of the barrel.

Notes

Make

- "CRAIG LTD" is marked on the right side of the slide.
- Craig Limited was owned by Fred Craig.
- Fred Craig designed the Fantom F-Series and Vortak pistols.

Model

- "FANTOM" and "F" is marked on the right side of the slide.
- introduced in 1997.
- this is a generic screen for the Fantom F-series.
- Fantom F-series was available in the following models: F-10, F-11, F-11LS, F-13, F-15, F-17, F-17C, F-19, F-19L, and F-19R.
- Fantom F-Series used Caspian Arms slides and 1911-A1 Hi Capacity aluminum alloy or steel receivers/frames and the final product was assembled and completed by Craig Limited.
- features include: match stainless steel barrel; low mounted front and rear sights; skeleton hammer; aluminum trigger; ambidextrous safety; extended beavertail grip safety; checkered back strap; bevelled magazine well; blued slide and armor coated receiver/frame or hard chrome finish.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "CASPIAN" is marked on the left side of the slide.
- Caspian Arms logo of a "C" inside a wreath is marked on both sides of the slide behind the grip serrations.
- "CASPIAN ARMS LTD. HARDWICK, VT U.S.A." is marked on the right side of the receiver/frame.
- Caspian Arms Limited has been in business since 1983.
- Caspian Arms Limited moved to Wolcott, Virginia circa 2004.
- Caspian Arms Limited is a manufacturer of carbon steel, stainless steel, titanium or aluminum alloy 1911-A1 receivers.
- Caspian Arms Limited is a manufacturer of carbon steel, stainless steel or titanium slides for 1911-A1 receivers.
- Caspian Arms Limited sells just slides, or just receivers, or a combination, as requested by the customer. In many cases, the customer may choose to complete the receiver with components from other industry manufacturers.

Action

- recoil operated.

Serial Number

- serial number should be located on the underside of the receiver/frame in front of the trigger guard.
- serial number range started at "FANTOM 001" for steel receiver/frames.
- serial number range started a "FANTOM 001A" for alloy receiver/frames.

Calibre

- calibre is marked on the chamber.

Shots

- detachable box magazine.

- "CRAIG LTD" is marked on the right side of the slide.
- Craig Limited was owned by Fred Craig.
- Fred Craig designed the Fantom F-Series and Vortak pistols.

Model

- "FANTOM" and "F-15" is marked on the right side of the slide.
- introduced in 1997.
- Fantom F-series was available in the following models: F-10, F-11, F-11LS, F-13, F-15, F-17, F-17C, F-19, F-19L, and F-19R.
- Fantom F-Series used Caspian Arms slides and 1911-A1 Hi Capacity aluminum receivers/frames and the final product was assembled and completed by Craig Limited.
- features include: match stainless steel barrel; low mounted front and rear sights; skeleton hammer; aluminum trigger; ambidextrous safety; extended beavertail grip safety; checkered back strap; bevelled magazine well; blued slide and armor coated receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "CASPIAN" is marked on the left side of the slide.
- Caspian Arms logo of a "C" inside a wreath is marked on both sides of the slide behind the grip serrations.
- "CASPIAN ARMS LTD. HARDWICK, VT U.S.A." is marked on the right side of the receiver/frame.
- Caspian Arms Limited has been in business since 1983.
- Caspian Arms Limited moved to Wolcott, Virginia circa 2004.
- Caspian Arms Limited is a manufacturer of carbon steel, stainless steel, titanium or aluminum alloy 1911-A1 receivers.
- Caspian Arms Limited is a manufacturer of carbon steel, stainless steel or titanium slides for 1911-A1 receivers.
- Caspian Arms Limited sells just slides, or just receivers, or a combination, as requested by the customer. In many cases, the customer may choose to complete the receiver with components from other industry manufacturers.

Action

- recoil operated.

Serial Number

- serial number should be located on the underside of the receiver/frame in front of the trigger guard.
- serial number range started at "FANTOM 001" for steel receiver/frames.
- serial number range started a "FANTOM 001A" for alloy receiver/frames.

Shots

- detachable box magazine.

Notes

Make

- "CRESCENT" is marked on the top of the barrel; "PAT'D APR. 23 1878" is marked on the left side of the barrel.
- "PAT'D APR. 23 1878" represents the date that patent number 202,627 was assigned to William H. Bliss of Norwich, Connecticut.
- "CRESCENT" was a brand/trade name used by the Norwich Pistol Company/Norwich Falls Pistol Company of Norwich, Connecticut.

Model

- "CRESCENT" is marked on the top of the barrel; "PAT'D APR. 23 1878" is marked on the left side of the barrel.
- "PAT'D APR. 23 1878" represents the date that patent number 202,627 was assigned to William H. Bliss of Norwich, Connecticut.
- this firearm would have been manufactured circa 1873 to 1887.
- this type of handgun is commonly referred to as a "Suicide Special".
- features include: solid receiver/frame; may have the W.H. Bliss patented removable circular side plate with a slot on the left side of the receiver/frame; single action spur trigger; fluted or plain cylinder with locking notches at the rear; cylinder pin release is a blade-type either push-in or pull-out, located at the front of the receiver/frame; round or octagonal barrel; brass half-disc blade front sight; bird-head grip frame; case hardened or blued trigger and hammer; nickel plated finish; grips may be walnut or checkered black hard rubber; may have light engraving on the barrel and/or receiver/frame.

Manufacturer

- manufacturer's name is not marked on the firearm; firearm was produced by the Norwich Pistol Company/Norwich Falls Pistol Company of Norwich, Connecticut.
- "PAT'D APR. 23 1878" is marked on the left side of the barrel.
- "PAT'D APR. 23 1878" represents the date that patent number 202,627 was assigned to William H. Bliss of Norwich, Connecticut.
- W.H. Bliss was the plant superintendent of the Norwich Pistol Co. (circa 1873 to 1881) and its successor the Norwich Falls Pistol Co.(circa 1882 to 1887). He was not affiliated in any way with the company of Bliss & Goodyear of New Haven, Connecticut.

Serial Number

- serial number is usually located on the left side of the grip frame.
- serial numbers are numeric only without prefix or suffix.

- "CRICKETT" or "DAVEY CRICKETT" may be marked on the firearm.
- "Crickett" is a registered trade mark of Keystone Sporting Arms, Inc.

Model

- "MODEL 230" may be marked on the firearm.
- features include: blued tapered barrel with fixed ramp front sight, elevation and windage adjustable rear peep sight; blued receiver/frame which is drilled and tapped for optical sight; manually cocked single shot bolt operated action; polished trigger with steel trigger guard; internal safety lock; one piece pistol grip black synthetic stock with a hard rubber buttplate.
- this style of rifle is marketed as a youth rifle and is commonly distinguished by a shorter barrel and stock.
- overall length with a 410mm barrel is 762mm (30"), average weight is 1.36kg (2.5lbs).
- similar to the model 240 which is available without an internal safety lock and the model 245 which comes with a stainless steel barrel.

Manufacturer

- "KEYSTONE SPORTING ARMS, INC. MILTON, PA, USA" may be marked on the firearm.

Action

- turn bolt operated.

Calibre

- may be marked on the firearm.

146630 - 1	31 CRISPIN RF	6	127	Antique AFR, Section 1, para. 6	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "CRISPIN'S PAT. OCT. 3, 1865" is marked on the firearm.
- Silas Crispin was an inventor and gunsmith based in New York City, New York, U.S.A. during the 1860s
- Silas Crispin patented a number of ideas relating to firearms and ammunition.
- Silas Crispin most successful invention was a conversion of the Civil War Smith breech-loading carbine (which originally used a separately-primed combustible cartridge) to a copper-cased rimfire cartridge with the priming compound contained in belt around the waist of the case.

Model

- manufactured in the 1860s.
- "CRISPIN'S PAT. OCT. 3, 1865" is marked on the firearm.
- this is an unusual hinged frame revolver designed by Silas Crispin and manufactured by the Smith Arms Company (who had also performed conversions of the Smith Carbine to the Crispin cartridge).
- this revolver was designed to circumvent the Rollin White patent on bored-through revolver cylinders, by using a two-piece cylinder that splits in half (with one portion remaining on the standing breech, and the other tipping down with the barrel.
- the unique Crispin cartridges used in this design have a "belt" at the waist that is actually where the priming compound is located; the cartridge is fired when the hammer crushes a portion of that belt against the forward part of the cylinder.
- features include: iron construction; fixed open sights; octagonal barrel transitioning to a flat-sided frame; front hinged receiver/frame with a two=piece cylinder; firearmt breaks mid-way down the cylinder; exposed spur hammer; sheathed trigger; single action trigger mechanism; square bottom grip strap with wood grip panels; blued finish.

Manufacturer

- "SMITH ARMS CO., NEW YORK CITY" is marked on the firearm.
- "Smith Arms Company" was located in New York City, New York. U.S.A.
- "Smith Arms Company" was founded by Gilbert Smith in the 1860s to produce firearms based on Silas Crispin's patents for firearms and ammunition, particularly the Crispin revolver.

Notes

Make

- these firearms are commonly referred to as "Cristobal" light rifle in reference to the manufacturer.

Model

- "C.30 C.A." and the serial number may be marked on the receiver/frame, behind the rear sight.
- this model resembles a Beretta submachine gun but is in fact a light rifle.
- features include: three quarter length wood stock with upper handguard, hooded blade front sight with notch rear sight, two triggers (the front trigger allows single shots while depressing the rear trigger allows automatic fire), two piece bolt and a tubular receiver/frame.

Manufacturer

- "ARMERIA E.N." over "SAN CRISTOBAL R.D." may be marked on the receiver/frame in front of the rear sight.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number is marked on the right side of the receiver/frame.
- serial number rationalization unknown.

Shots

- detachable box magazine.

Notes

Make	- the make is not marked on the firearm; this make is applied to domestic Croatian firearms adopted by the Croatian military.
Model	- the model may or may not be marked on the firearm; where present, it may only be marked in the Croatian alphabet, which is a mixture of Greek, Latin, and Cyrillic characters. - this is a domestically-produced version of the Israeli Galil or South African R4 rifle, manufactured for use by the Croatian armed forces during the 1990s. Unlike the Galil and R4, this rifle uses a stamped AKM-style receiver/frame, and has numerous other changes desired by the Croats. - features include: blued or parkerized/phosphated finish; bird-cage 22mm flash suppressor adapted for launching rifle grenades; a gas cut-off in the front sight base (for launching grenades); open adjustable back-up sights, with a primary optical 1.5X power telescopic sight built into a carry handle; synthetic furniture, with ventilated handguard; right-side operating handle; Galil-style "paddle" magazine release; Galil-style ambidextrous safety/selector; and a frame tubular buttstock that folds to the right for transport.
Manufacturer	- the manufacturer may or may not be marked on the firearm.
Action	- gas-operated.
Serial Number	- serial-numbered on the receiver/frame.
Shots	- detachable box magazine.

143816 - 1	20X110 HISPANO-SUIZA	1	920	Prohibited PFR, Part 1, para. 95(z.017)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is not marked on the firearm.

Model

- the model may not be marked on the firearm.
- this is an unusual-appearing bolt-action single-shot rifle mounted on a "bullpup"-style synthetic shoulder-stock, where the action and bolt handle sits above the firer's shoulder in firing position, and that has a rearward-venting "venturi tube" system to reduce recoil.
- these rifles first appeared in the Yugoslavian Civil War, and were widely used by two-person crews against armoured vehicles and light vehicles, especially against the sighting equipment on heavy tanks.
- features include: blued finish; three-chambered "fish-gill"-style muzzle brake; heavy-profile barrel; one-piece synthetic shoulder-stock/grip frame with a ventilated butt section; folding bipod; optical sight offset to the left (this rifle can only be used by someone firing it from the right shoulder); a venturi tube with a cone-shaped vent above the bolt handle; rubber butt pad; and manually-operated bolt with three locking lugs.
- when fired, a portion of the propellant gasses are directed into the venturi tube and rearwards, over the firer's shoulder, to help reduce the recoil of the 20mm cartridge; although effective, this can also be very dangerous to the loader (usually behind the gunner), and the blast of firing discloses the firer's position.

Manufacturer

- the manufacturer or logo thereof may not be marked on the firearm; Croatia is known to have produced "sterile" firearms for export.

Action

- bolt operated single shot.

Serial Number

- numbered on the receiver/frame.

Canadian Law Comments

- This model meets the definition of firearm in the Criminal Code of Canada S.2. This model may be regulated by other Federal Acts such as the Export and Import Permits Act (EIPA) and the Defence Production Act.

Notes

Make

- "CROSMAN ARMS CO." or "CROSMAN ARMS COMPANY" and "ROCHESTER N.Y." is usually marked on the right side of the receiver/frame.

Model

- manufactured from 1925 to 1950.
- "101" is not marked on the firearm.
- model designation is based on calibre, action (pneumatic pump or CO2), and function (single shot or repeater).
- features include: blade front sight and adjustable rear aperture/peep sight; brass, bronze or steel barrel is mounted on the top of the compression chamber giving this rifle the appearance of an "over & under" firearm; white metal cast receiver/frame, sliding turn bolt action; walnut forearm and semi-pistol grip buttstock.
- Model 100 was a .177 calibre, pneumatic pump, single shot rifle.
- Model 100 CG was a .177 calibre, CO2, single shot rifle.
- Model 101 was a .22 calibre, pneumatic pump, single shot rifle.
- Model 101 CG was a .22 calibre, CO2, single shot rifle.
- Model 102 was a .22 calibre, pneumatic pump, magazine fed, repeater rifle.
- Model 102 CG was a .22 calibre, CO2, magazine fed, repeater rifle.
- Model 104 was a .177 calibre, pneumatic pump, magazine fed, repeater rifle.

Manufacturer

- "CROSMAN ARMS CO." or "CROSMAN ARMS COMPANY" and "ROCHESTER N.Y." is usually marked on the right side of the receiver/frame.

Action

- pneumatic, up to 12 pumps.
- bolt operated with manual cocking.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number of an observed example was marked on the top of the receiver/frame near the chamber and consisted of a letter prefix (P) and four numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - "PAT.OCT.28 1924" over "CROSMAN ARMS CO." over "ROCHESTER N.Y." is marked on the side of the receiver/frame of an observed example.

Notes

Make	- "CROSMAN" is marked on the receiver/frame and/or barrel.
Model	- Introduced in 1994. - The Crosman 1077 is a semi-automatic, magazine fed, CO2 powered air rifle. It is available in three stock configurations: checkered molded grey polymer; smooth polished wood; and a tactical molded polymer stock with pistol grip. - In 2004, an 88 gram pre-filled CO2 "Airsource" system that replaces the standard CO2 cylinder system became available.
Manufacturer	- "CROSMAN" is marked on the receiver/frame and/or barrel.
Action	- CO2 powered. - Velocities have been reported as 238 mps/780 fps and 151 mps/495 fps.
Serial Number	- The serial number is marked on the trigger guard. - The serial number of a referenced example consisted of nine digits.
Calibre	- the calibre designation is marked on the left side of the firearm.
Shots	- Rotary clip contained within a detachable holder that resembles a box-type magazine.

Canadian Law Comments

- At least two variants of this particular model exist:
Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

42198 - 1	38 SHOT	1	711	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "CROSMAN ARMS CO., INC." is molded into the left side of the receiver/frame.
Model	- "TRAPMASTER 1100" is molded into the left side of the receiver/frame. - this is a CO2-powered air SHOTGUN; - made to resemble a Remington 1100 semi-auto shotgun; walnut pistol grip stock and forearm, and bead sight. - because of their relative scarcity today, these air guns are highly collectible. - uses two CO2 cartridges in the forearm to propel a .38-calibre plastic shot cup. - barrel moves rearward after loading, lever on right goes forward to cock and button on bottom releases the barrel.
Manufacturer	- "CROSMAN ARMS CO., INC. FAIRPORT, NEW YORK, U.S.A PAT. PEND." is molded into the left side of the receiver/frame.
Action	- does not discharge a projectile at a muzzle velocity exceeding 152.4 mps and/or a muzzle energy exceeding 5.7 Joules.
Calibre	- fires .38-calibre plastic shot cups using Co2 pressure.
Canadian Law Comments	- does not discharge a projectile at a muzzle velocity exceeding 152.4 mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorization To Transport.

Firearm Reference Number (FRN): 159486
Make: Crosman
Model: 1322

Summary

Make:	Crosman
Model:	1322
Manufacturer:	Crosman Air Guns
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Air,Spring or Gas
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
159486 - 1	22 PELLET	1	260	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
159486 - 2	22 PELLET	1	260	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Crosman" or "Crosman Arms" is marked on the air gun.

Model

- "1322" is marked on the right side of the air gun.
- this is a multi-pump, pneumatic air pistol with a turn-bolt loading system.
- can be fitted with a detachable shoulder stock.
- features include: a black receiver/frame with brown or black plastic forearm and grip panels (interchangeable with stock), cross-bolt safety and adjustable sights.
- the latest versions of this pistol are bolt operated single-shots, but earlier versions were made with a loading gate on the top of the barrel that had to be twisted to the left and pulled rearward to expose the chamber for loading.
- overall length is 346mm and weight is .91kg.

Manufacturer

- "Crosman" or "Crosman Arms" is marked on the air gun.

Action

- pneumatic design.
- at least two variants of this particular model exist:

Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the left side of the compression chamber.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- calibre is marked on the right side of the air gun.

Canadian Law Comments

- at least two variants of this particular model exist:
Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

Notes

Make

- "Crosman", "Crosman Airguns" or "Crosman Arms" may be marked on the right side of the receiver/frame.

Model

- "Medalist" and "Model 1322" are marked on the right side of the receiver/frame.
- manufactured from 1977 to 1996.
- this is a pneumatic air pistol, with a cocking knob at the rear of the receiver/frame and a movable shutter at the top of the receiver that is twisted to the left and pulled back to expose the chamber for loading.
- black receiver/frame with brown plastic forearm and grip panels (interchangeable with stock), cross bolt safety and adjustable sights.
- the new version of this pistol is the model 1322C, a bolt operated single shot.

Manufacturer

- "Crosman", "Crosman Airguns" or "Crosman Arms" may be marked on the right side of the receiver/frame.

Type

- this is a handgun that can be fitted with a detachable shoulder stock.

Action

- single pump pneumatic air pistol.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number
- samples have been noted with and without a serial number.
- when numbered the serial number is usually marked on the left side of the receiver/frame.

Calibre
- calibre designation is marked on the right side of the receiver/frame.

Notes

Make

- "CROSMAN" is marked on the left side of the receiver/frame.
- "CROSMAN ARMS CO. INC." over "FAIRPORT, N.Y. U.S.A." is marked on the rear right side of the reciever/frame.

Model

- model name is marked on the rear left side of the receiver/frame as, "CROSMAN "157" " over " ".177 CAL" PELLGUN ".
- this is a single shot CO2 powered air pistol utilizing a 12.5 gm CO2 Powerlet cylinder located within an under-barrel tube; the cylinder is loaded from the front of the tube.
- this model has adjustable power levels; the amount of gas released which affects the velocity of the pellet can be controlled by turning the cocking knob full right for maximum power and turning to the left to lessen the amount of gas released thereby lowering the velocity.
- features; loaded by turning up the breech cover and drawing to the rear, inserting a pellet and then closing the breech cover; cocking is accomplished by pulling back on the projecting cocking knob; cocking knob is of the rebounding type; action is self-cocking but chamber must be manually loaded for each shot; rifled barrel; ramp front sight; adjustable rear sight; cross-bolt safety; black plastic grips; blued finish.
- two variations of this pistol were made; the first variant manufactured from 1954 to1956 had a two piece barrel and breech assembly; the second variant made from 1956 to 1966 had a one piece breech/barrel.
- overall length; 254 mm.
- following "versions" of this pistol were also produced; Sk (Shooting Kit), Sears/Ted Williams, Mexican and Canadian.

Manufacturer

- "CROSMAN" is marked on the left side of the receiver/frame.
- "CROSMAN ARMS CO. INC." over "FAIRPORT, N.Y. U.S.A." is marked on the rear right side of the reciever/frame.

Action

- CO2 powered.
- at least two variants of this particular model exist;
- Variant 1; discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
- Variant 2; does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- observed example had a six digit number without prefix or suffix marked on the top of the sliding breech cover.

Canadian Law Comments

- at least two variants of this particular model exist:
Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

Notes

Make

- "Crosman 2100 Classic" is marked or moulded on the right side of the receiver/frame.

Model

- "Crosman 2100 Classic" is marked or moulded on the right side of the receiver/frame.
- this is a multi-pump pneumatic air rifle, with a cocking handle on the right side of the receiver/frame; available in several variations, including walnut or wood-grained black or brown plastic stock, with or without silver or gold accents and with or without white line spacers at the pistol-grip and butt-plate.
- also known as "2100 Silver Series Classic" with a black stock and forearm.

Action

- multi-pump pneumatic.
- at least two variants of this particular model exist:

Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number - serial number is marked on the right side of the receiver/frame.

Canadian Law Comments - at least two variants of this particular model exist:
Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

118223 - 4	BB	17	529	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is marked on the right hand side of the receiver/frame.

Model

- this is a multi-pump pneumatic air rifle of the 2100 Classic series, it differs only by the black wood grained stock with gold accents and white line spacers at the pistol grip and the butt-plate.
- the receiver/frame may be marked "2100 Classic".
- cocking handle on the right side of the receiver/frame
- rear sight adjustable for elevation, fixed front sight.
- comes standard with a 4 x 20 power scope.

Action

- multi-pump pneumatic.
- at least two variants of this particular model exist:

Variant #1: in calibre 177 PELLET and BB, discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
Variant #2: in calibre 177 PELLET and BB, does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- at least two variants of this particular model exist:
Variant #1: in calibre 177 PELLET and BB, discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport.
Variant #2: in calibre 177 PELLET and BB, does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

46767 - 4	22 PELLET	1	610	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "Crosman" will be marked on the barrel and/or receiver/frame.

Model

- model designation is marked on the right side of the receiver/frame.
- single shot air pistol, CO2-powered, bolt-operated, with black receiver/frame, black plastic forearm and grip panels, cross-bolt safety, and adjustable sights.
- available in 2004 with an 88 gram pre-filled CO2 "Airsource" system that replaces the standard CO2 cylinder system and is also equipped with a scope.
- this model is available with more than one variation of removeable butt-stock which when installed on the firearm does not change the legal classification of the firearm.
- a "Canadian version" of this firearm is available for sale in Canada with a muzzle velocity reduced below 152.4 mps and yielding less than 5.7 J of energy.

Action

- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.
- also available in a "Canadian Version" which discharges a projectile at a muzzle velocity less than 152.4 mps and a muzzle energy under 5.7 Joules.

Serial Number

- serial number is usually marked on the tube of this firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- marked on the right side of the receiver/frame.
Canadian Law Comments	- the Crosman Model 2250B firearm exists in several variations; those of which are "RESTRICTED Firearms" in Canada, have a velocity greater than 152.4 mps and and energy greater than 5.7 j. The model 2250B in this velocity and energy yield is a "Restricted" firearm whether or not the easily removed butt-stock has been mounted to the firearm. - the second case is the model aimed at the Canadian market, having a velocity less than 152.4 mps and yielding energy less than 5.7 j, this variation will be a "Deemed Non-Firearm", whether or not the easily removed butt-stock has been mounted to the firearm.

42068 - 1	177 PELLET	1	552	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make	- marked on the right side of the barrel.
Model	- this is a CO2-powered single-shot air rifle with hardwood high-comb stock; made to resemble a "biathlon" or competition-style firearm. These rifles are pressurized with CO2 by unscrewing a cap below the barrel at the front of the forearm, dropping a CO2 cartridge into the rifle, then screwing the cap back on to puncture the cartridge. Also manufactured in a 262 "Youth" version with a smaller-scaled stock for younger/smaller shooters.
Action	- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.
Calibre	- the calibre designation is marked on the right side of the barrel.

Model:	622 Pell-Clip
Manufacturer:	Crosman Air Guns
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
42184 - 1	22 PELLET	6	584	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Model

- this is a Co2-powered pump-action air rifle.
- manufactured from 1971 to 1978.
- features include: walnut pistol-grip stock and forearm (CO2 cartridges loaded into a port in the front of the forearm); open adjustable sights and receiver grooved for mounting a scope.

Action

- CO2-powered semi-automatic air rifle.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Shots

- Pellets are loaded into a rotary disk contained in a box, that box then locks into a slot on the right side of the receiver.

Notes

Make

- "CROSMAN CORP." is usually marked on the receiver/frame.

Model

- "66" and "POWERMASTER" are stamped or molded into the right side of the receiver/frame.
- introduced in 1983.
- this is a multi-pump pneumatic air rifle, with a cocking handle on the right side of the receiver/frame.
- available in several variations, including wood-grained black or brown plastic; camouflaged plastic with or without silver or gold accents or silver plating and with white line spacers at the pistol-grip and butt plate.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- manufacturer is marked on the receiver/frame.
Action	- multi-pump pneumatic. - at least two variants of this particular model exist: Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.
Serial Number	- stamped or molded into the right side of the receiver/frame.
Calibre	- the calibre designation is stamped or molded into the right side of the receiver/frame.
Shots	- the 177 PELLET must be single-loaded, but BBs will feed from an internal reservoir and are picked up by a magnetic bolt head. - originally offered as a single shot in 177 PELLET calibre but available in 2004 with a "Firepow'r" kit that includes four 5-shot pellet clips.
Canadian Law Comments	- at least two variants of this particular model exist: Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport. Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

Notes

Make

- "CROSMAN AIR GUNS" is marked on the left side of the receiver/frame.

Model

- "GOLD MEDALIST" and "MODEL 66-AB" are marked on the left side of the receiver/frame.
- "GOLD MEDALIST" and "66 POWERMASTER" are marked on the right side of the receiver/frame.
- features include: brown plastic stock furniture; alloy receiver/frame painted matte black; blued steel barrel with adjustable rear leaf sight and fixed front post sight; cross bolt safety in the front bow of the trigger guard; right side mounted cocking/loading handle; cocking mechanism incorporated into the forend assembly.
- in this model, a "velocity regulator" prevents damage from over-pumping the mechanism by bleeding off excess air.

Manufacturer

- "CROSMAN AIR GUNS" and "A COLEMAN COMPANY / FAIRPORT, N.Y. U.S.A." are marked on the left side of the receiver/frame.

Action

- multi-pump pneumatic.
- does not discharge a projectile at a velocity exceeding 152.4mps and /or a muzzle energy exceeding 5.7 Joules.

Serial Number

- the serial number is marked on the right side of the receiver/frame.
- observed serial number series have consisted of a single letter prefix followed by eight numbers.

Calibre

- ".177 CALIBER PELLET BB REPEATER" is marked on the right side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- an internal magazine for BB's is part of the receiver/frame design and has a capacity of 18, with a further storage area for up to 200 additional BB's in a separate compartment (not associated with the loading mechanism) of the receiver/frame being part of the design.
- pellets may only be loaded singly.

Canadian Law Comments

- does not discharge a projectile at a velocity exceeding 152.4mps and /or a muzzle energy exceeding 5.7 Joules.

Notes

Make	- moulded onto the left side of the receiver/frame: Crosman
Model	- "Powermaster 760" or "PowerMaster 760" is marked on the firearm. - this is a multi-pump pneumatic air rifle first produced by Crosman in 1966, that has been produced in at least 12 different variations; this has been Crosman's most popular model since its introduction, and millions of these rifles have been produced. - all of these variations are known and marked as either 760 Powermasters or Powermaster 760s, but all share the same basic design; however, do not confuse these rifles with the 760 Pumpmaster series, a very similar appearing air rifle. - depending on the exact version, these rifles can be seen with "lift and pull"-style bolts or straight-pull bolts, and with either plastic/ABS or wooden stocks and forearms. - variants of this rifle have been made in both plastic- and metal-receiver versions, and in several different colour schemes, including 20th and 25th anniversary commemoratives. - this air rifle functions as a single-shot pellet rifle, or as a 18 shot BB repeater fed from an integral magazine, which can be refilled from the internal 180/200 BB capacity reservoir. - this rifle is a multi-pump pneumatic air rifle, with the pump-handle located below the barrel forming the forearm; the straight-pull pellet loading and cocking/arming handle is located on the right side of the receiver; and a pivoting tear-drop-shaped cover for the BB reservoir (approximately) on the left side of the receiver/frame.
Manufacturer	- moulded onto the left side of the receiver/frame: Crosman
Action	- multi-pump pneumatic air rifle. - at least two variants of this particular model exist: Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules. Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4 mps and/or a muzzle energy exceeding 5.7 Joules.
Serial Number	- may or may not be serial numbered, depending on country sold in and date of manufacture.
Calibre	- moulded onto the left side of the plastic receiver/frame: .177 CALIBER PELLET / BB REPEATER
Shots	- 177 PELLET = single manual load. - BB = 180 shot gravity-fed reservoir magazine with a 18 shot visual magazine.
Canadian Law Comments	- at least two variants of this particular model exist: Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport. Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

Notes

Make

- "Crosman" is moulded on the left side of the receiver/frame.

Model

- introduced in 1966 with a die-cast metal receiver/frame and wood buttstock and forend. It was not marked "Pumpmaster".
- offered in 1984 with a moulded plastic receiver/frame, marked on the right side "760 PUMPMASTER".
- this is a multi-pump pneumatic air rifle, with a cocking handle on the right side of the receiver/frame; available in several variations, including wood-grained black, brown or pink plastic stock, with or without silver or gold accents and with white line spacers at the pistol-grip and butt-plate.
- also known as "760 Silver Series Pumpmaster".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "Crosman" is moulded on the left side of the receiver/frame.
Action	- at least two variants of this particular model exist: Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.
Serial Number	- serial number is marked on the right side of the receiver/frame (early models may not be marked with a serial number).
Calibre	- moulded onto the right side of the receiver/frame: .177 CALIBER PELLET / BB REPEATER
Shots	- originally offered as a single shot in 177 PELLET calibre but available in 2004 with a "Firepow'r" kit that includes four 5-shot pellet clips.
Canadian Law Comments	- at least two variants of this particular model exist: Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport. Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

Notes

Make

- make is marked on the firearm.
- observed sample marked on the left side of the barrel:
"CROSMAN ARMS (CANADA) LTD. / DUNNVILLE, ONTARIO"

Model

- this is an adult scaled CO2 powered lever action repeating air rifle, built by Crosman from 1965 to 1970.
- features include:
- black painted metal finish, walnut pistol grip buttstock and forearm, open adjustable sights with optional factory scope and mount, in-line tubular tray magazine on the left side of the receiver/frame and dual power settings, so the user can choose between "high" power and "medium" power.
- this rifle resembles a cross between a Marlin 336 and a Savage 99, with a curved lever.

Action

- CO2 powered lever action repeater.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Shots

- internal tubular tray magazine.

42066 - 2	BB	21	495	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- make is marked on the left side of the receiver/frame.
Model	- manufactured from 1985 to 1990. - model designation is marked on the right side of the receiver/frame as "A*I*R* 17" and on the left side of the receiver as "Model 17" - this is a single-stroke pneumatic air rifle that can fire BBs or pellets; a magnetic bolt-head retains BBs from an internal magazine, while a manually-advanced "clip" can be loaded with pellets; this air rifle is styled after an AR-15/M-16-style firearm, with a black plastic pistol-grip stock and forearm, "carrying handle", raised front sight, detachable "magazine" for carrying extra pellets or BBs, smooth-bore steel barrel, adjustable sights, cross-bolt safety, and a 21-shot magazine for BBs.
Manufacturer	- manufacturer's designation is marked on the left side of the receiver/frame.
Action	- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.
Serial Number	- these rifles have serial numbers hot-impressed into the right side of the plastic "magazine well" bolted to the receiver; the first two digits indicate the year of manufacture. - marked on the right side of the receiver/frame
Calibre	- capable of firing pellets or BBs. - marked on the right side of the receiver/frame

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - BBs are fed from a reservoir inside the air-rifle, while pellets are loaded into a 4-shot "clip" that must be manually advanced across the front of the "bolt" for each shot.

197608 - 2	177 PELLET	1	381	Prohibited CC 84(1) "prohibited device" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Crosman" is marked on the left side of the receiver/frame.
- The company logo is marked on the firearm.

Model

- "BLAZE XT" is marked on the left side of the receiver/frame.
- "Model: CBVT7NP1-SX" is marked on the left side of the receiver/frame.
- "NP" stands for "Nitro Piston".
- "NITRO PISTON" may be marked on the side of the receiver/frame.
- Features include: break barrel receiver/frame; one-piece thumbhole synthetic stock with raised cheekpiece and angled forend; mounted scope option.
- Overall length with a 381 mm (15 inches) barrel is 1105 mm (43.5 inches), average weight is 3.4 kg (7.5 lbs).

Manufacturer

- "Crosman" is marked on the left side of the receiver/frame.
- The company logo is marked on the firearm.

Action

- Compressed air piston.
- Velocity is reported 366 mps or 1200 fps.
- Energy is reported at 24.4 J (joules) or 18 FPE (foot/lbs of energy).

Serial Number

- The serial number is marked on the left side of the receiver/frame.
- The serial number rationalization is unknown.
- Observed serial number sample consisted of the following configuration: three (3) numbers, followed by one (1) letter finally followed by five (5) numbers, (example: 123A12345).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- The calibre designation is marked on the barrel.

Canadian Law Comments

- Discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.
- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada.

If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

129116 - 1	BB	18	133	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Crosman" is marked on the receiver/frame.

Model

- introduced in 2008.
- C31 marked on the right side of the firearm.
- this is a CO2 powered semi-automatic pistol.
- features include: rifled metal barrel; accessory rail molded in front of the trigger guard; fibre-optic sights; grips slide back for easy replacement of CO2 powerlets; removable magazine with release button located on the grip.
- overall length with a 133mm (5.25") barrel is 216mm (8.5"), average weight is 0.68kgs (1.5lbs).

Manufacturer

- "Crosman" is marked on the receiver/frame.

Action

- CO2 gas "powerlet" operated.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is usually marked on the right side of the receiver/frame.

Calibre

- marked on the right side of the firearm.

Shots

- detachable box magazine located in the grip.

Notes

Make

- "Crosman" is marked on the side of the receiver/frame.

Model

- "FIRE" is marked on the left side of the receiver/frame.
- "NP" stands for "nitro piston".
- features include: round rifled steel barrel; receiver/frame is grooved for scope mounts; two stage adjustable trigger; ambidextrous safety located inside the trigger guard; ambidextrous synthetic pistol grip stock with rubber butt plate; black finish.
- overall length is 1117 mm (44"), and average weight is 2.7 kgs (6 lbs).

- There are two version of this rifle. One with velocities reported as 304 mps/1000 fps and another with velocities reported as 150 mps/495 fps.

Action

- gas piston powered, hinged barrel design.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.
- Velocities have been reported as 304 mps/1000 fps and 150 mps/495 fps.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the right side of the barrel block.

Canadian Law Comments

- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada.
- If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.
- At least two variants of this particular model exist:

Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

42171 - 1	BB	N/A	403	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Crosman Arms Co., Inc." may be marked on the barrel.

Model

- "M-1 CARBINE" and "B-B AIR RIFLE" may be marked on the barrel.
- manufactured between 1966 and 1978.
- this is a push barrel cocking, spring-powered air rifle.
- patterned after the U.S. M1 Carbine.
- features include: smooth-bore barrel; internal gravity fed magazine for 22 BBs and detachable "magazine" made to store extra BBs; hardwood or plastic stock.
- cocks with operating rod handle.

Manufacturer

- "Crosman Arms Co., Inc." and "Fairport, N.Y., U.S.A." may be marked on the barrel.

Action

- spring-powered air rifle.
- does not discharge a projectile at a muzzle velocity exceeding 152.4 mps and/or muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number was marked on the top of the receiver/frame, behind the rear sight on the earlier production, examples: "0064##" and "4760151##".
- serial number markings were dropped towards the end of production.

Notes

Make - "Crosman" logo and "Crosman Corp." are usually marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- introduced in 2011. - "M417" or "M4-177" may be marked on the side of the firearm. - "M4 Pneumatic Air Rifle" uses a multi-pump charging system. - "M4 Pneumatic Air Rifle" is similar in external appearance to a Colt model M4 Carbine. - "M4 Pneumatic Air Rifle" is not a variant of an AR15/M16. - "M4 Pneumatic Air Rifle" is a multi-pump, pneumatic air rifle housed inside a synthetic housing (clamp shell), which resembles a Colt model M4 Carbine. - features include: removable adjustable post front sight and removable adjustable dual aperture rear sight or removable carrying handle with an adjustable aperture rear sight; round, steel barrel with a birdcage type muzzle attachment; integral Picatinny type rails on the barrel for the front sight and on the underside for other attachments; integral Picatinny type rail on the underside of the swing down synthetic forearm; one piece synthetic receiver/frame with an integral Picatinny type rail, pistol grip and an internal BB reservoir; bolt cocking handle and slot for the 177 PELLET clip magazine are located on the right side of the receiver/frame; BB storage tube and BB retainer button are located on the left side of the receiver/frame; storage box release is mounted on the front of the storage box; storage box resembles a detachable box magazine; crossbolt safety is mounted in front of the trigger; plastic trigger; synthetic forearm acts as a front hinged, swing down pump grip; removable and adjustable/telescoping buttstock; sling loops; black or tan finish. - overall length with the stock in the collapsed position is 775 mm (30.5") and in the extended position is 857 mm (33.75"). - average weight is 1.7 kgs (3.75 lbs).
Action	- multi-pump pneumatic powered. - at least two variants of this particular model exist: Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.
Calibre	- calibre is marked on the left side of the firearm.
Shots	- detachable pellet clip magazine. - eighteen (18) round BB magazine is located on the left side of the receiver/frame. - five (5) round pellet plastic clip magazine is mounted on the right side of the receiver/frame and has to be manually indexed. - three hundred and fifty (350) round BB reservoir's loading port is located under a loading lever cover on the left side of the firearm. - reservoir loading cover resemble the safety/selector lever found on an AR type rifle.
Also Known As/Product Code	M4 Pneumatic
Canadian Law Comments	- at least two variants of this particular model exist: Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport. Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
196674 - 1	177 PELLET	12	464	Prohibited CC 84(1) "prohibited device" para. (c)	Manufacturer Specifications and Commercial Customization	
196674 - 2	22 PELLET	10	464	Prohibited CC 84(1) "prohibited device" para. (c)	Manufacturer Specifications and Commercial Customization	
196674 - 3	22 PELLET	10	464	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- The make is marked on the right side of the receiver/frame.

Model

- "Mag-Fire Ultra" is marked on the right side of the receiver/frame.
- "MODEL: CMU7SXS" is marked on the left side of the barrel block for the .177 PELLET variant.
- "MODEL: CMU2SXS" is marked on the left side of the barrel block for the .22 PELLET variant.
- "Mag-Fire Ultra" is a hinged barrel, nitrogen piston driven rifle.
- Features include: steel barrel inside a contoured synthetic shroud; shroud feature flute and a larger diameter toward the muzzle; action tube with rail for scope mounting; trapezoid shaped trigger guard; safety located inside the trigger guard; synthetic stock with light colour gripping inserts on the forend and semi-pistol grip area.
- Overall length with a 464 mm (18.24 inches) barrel is 1194 mm (47 inches), average weight is 4.44 kg (9.8 lbs).

Action

- Hinged barrel design.

Serial Number

- Serial number is marked on the left side of the barrel block.

Calibre

- The calibre designation is marked on the barrel assembly.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- Detachable rotary disc magazine.
Canadian Law Comments	- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

Notes

Make

- "Crosman" is marked on the right side of the firearm.
- Crosman's warning is marked on the left side of the firearm.

Model

- "MTR77NP" was introduced in 2013.
- "MTR77NP" is marked on the right side of the firearm.
- "NP" stands for "nitro piston".
- "MTR77NP" is similar in external appearance to a AR-15/M16 design.
- "MTR77NP" is not a variant of an AR-15/M16.
- "MTR77NP" is a hinged barrel, nitro piston air rifle housed inside a synthetic housing (clamp shell), which resembles a AR-15/M16 rifle.
- features include: threaded muzzle for fake flash hider; round, rifled steel, break open type barrel that is loaded ounce open from a opening on the top of the handguard; adjustable post front sight that may be removable and attached to a Picatinny rail front sight bracket; Picatinny rail flat top upper assembly; removable carry handle with rear sight or optical sight; adjustable two stage trigger; synthetic; false, removable magazine use as a storage box.
- overall length with a 381 mm (15") barrel is 1016 mm (40"), and the average weight is 2.77 kgs (6.1 lbs).

Manufacturer

- "Crosman" is marked on the right side of the firearm.
- Crosman's warning is marked on the left side of the firearm.

Action

- nitrogen-piston (NP) powered, hinged barrel design.
- nitrogen gas acts like a coil spring.
- at least two variants of this particular model exist:

Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number may be located on the underside of the barrel near the front sight or on the left side of the breech.
- serial number observed consisted of three numbers, a letter (X), and five numbers.

Canadian Law Comments

- at least two variants of this particular model exist:
Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

Notes

Make

- make is marked on the right side of the receiver/frame.
- the Crosman warning is marked on the left side of the air chamber.
- "MADE IN CHINA" is marked on the spring tube.

Model

- "PHANTOM" is usually marked on the side of the firearm.
- "PHANTOM" is a line or series of rifle.
- "PHANTOM" as specific model designation marked on the left side of the barrel at the chamber end.
- "PHANTOM" is a Crosman "Quest" series design with the addition of a synthetic stock.
- "PHANTOM" is available with a 4 X 32 scope as the "PHANTOM X".
- "PHANTOM" line was introduced in 2006.
- features include: blued round rifled steel barrel with fibre optic front sight and adjustable rear sight with windage and elevation; two stage adjustable trigger; one piece synthetic stock; grooved for scope mount.
- overall length is approximately 1130mm (44.5").

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- spring-piston powered, hinged barrel design.
- at least two variants of this particular model exist:
Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is located on the underside of the barrel near the front sight or on the left side of the breech.
- observed serial number consisted of three numbers, a letter "X", and five numbers.

Calibre

- calibre designation is usually marked on the left side of the barrel at the chamber end.

Canadian Law Comments

- at least two variants of this particular model exist:
Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

Notes

Make

- "BENJAMIN" is marked on the right side above the trigger.
- Benjamin Air Rifle Company purchased Sheridan Products Incorporated in 1977.
- Benjamin and Sheridan models were first marketed as Benjamin Sheridan in 1991.
- Benjamin Sheridan Corporation was purchased by Crosman Air Guns in 1992.
- Crosman continued production of both of the original Benjamin and Sheridan product lines under the Benjamin Sheridan trade name from 1992 to 1998.
- Crosman began to sell their .177 and .22 PELLET air guns under the Benjamin trade name and .20 PELLET air guns under the Sheridan name circa 1998.

Model

- introduce in 2015.
- model may be marked on the right side of the receiver/frame.
- "Airbow" function is by pre-charged pneumatic (PCP) of compressed air or high pressure nitrogen.
- features include: no open sights; Picatinny rail on top of the firearm and below the muzzle; spigot barrel with external partial shroud; 206 bar (3000 psi) pre-charged pneumatic cylinder is mounted below the barrel with quick connect air-port and built in air pressure gauge on the end; safety lever inside the trigger guard; top lever bolt reversible for left hand shooters; black or realtree camouflage finish; sling swivel mounts.
- referenced velocity is 450 fps.
- overall length is 851 mm (33.5"), and average weight is 3.18 kg (7.0 lbs).

Action

- pre-charged pneumatic (PCP).
- use compressed air or high pressure nitrogen.
- top, charging lever design.
- discharges a projectile at a muzzle velocity less than 152.4 mps but with a muzzle energy exceeding 5.7 Joules.

Calibre

- fires an aluminium-tubed arrow from a spigot type barrel; the arrow can be fitted with target or broad-head points.

Shots

- spigot type arrow launcher.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- this firearm shares a common receiver/frame with the Benjamin, Bulldog 357.
- the shell of the firearm is a "bullpup stock" and therefore is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada.
- should the prohibited device (bullpup stock) be removed from the firearm, this firearm will require an inspection to accurately determine its legal class in accordance with the Criminal Code of Canada, "Part III/Firearms and Other Weapons", Section 84.

Notes

Make

- make is marked on the receiver/frame and barrel assembly of the firearm as:
"CROSMAN".

Model

- model designation is marked on the barrel assembly and receiver/frame as:
"RM 622".
- features include: hardwood, thumbhole Monte-Carlo style stock; break open cocking and loading design; hooded foresight; aperture rear sight and blued metal surfaces. Stock grip areas are stippled.

Manufacturer

- manufacturer's designation is not marked on the firearm. The firearm is marked "Manufactured for Crosman USA."
- Mendoza SA of Mexico City, Mexico manufactures this rifle for Crosman.
- "MENDOZA" name was first used on products offered by Rafael Mendoza in 1911.
- "MENDOZA" has produced machine guns, artillery cannons, hand grenades, rifles and a number of signaling devices and sporting goods.

Action

- break-open cocking and loading mechanism.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the receiver/frame and barrel assembly and consists of a "C" prefix followed by six digits.

Barrel

- barrel length does not include an attached muzzle brake.

Calibre

- calibre designation is marked on the barrel assembly.

Notes

Make

- "Crosman" is marked on the airgun.

Model

- manufactured in 2002 and 2003.
- this is a spring-powered air rifle that closely resembles the Daisy "Red Ryder" series of lever-action BB rifles.
- features include: smooth bore steel barrel; etched metal receiver/frame; internal BB reservoir; fixed blade front sight and adjustable rear sights; ambidextrous slide type manual safety; loop cocking; checkered hardwood forearm and straight grip Monte Carlo buttstock; black metal finish.

Manufacturer

- manufacturer's designation is not marked on the firearm. The firearm is marked "Manufactured for Crosman USA."
- Mendoza SA of Mexico City, Mexico manufactures this rifle for Crosman.
- "MENDOZA" name was first used on products offered by Rafael Mendoza in 1911.
- "MENDOZA" has produced machine guns, artillery cannons, hand grenades, rifles and a number of signaling devices and sporting goods.

Action

- spring-powered BB gun.
- does not discharge a projectile at a muzzle velocity exceeding 152.4 mps and/or a muzzle energy exceeding 5.7 Joules.

Shots

- internal BB reservoir holds 65 BBs.

Notes

Make

- "Crosman" with logo is marked on the left side of the receiver/frame.

Model

- Discontinued in 2020.
- "Crosman" and "SHOCKWAVE" are marked on the left side of the receiver/frame.

- "NP" stand for "Nitrogen Piston", the power source of the rifle.
- "Nitro Piston" is marked on the left side of the barrel at the breech.
"SHOCKWAVE NP" was replaced in 2021 with the "Shockwave NP QuietFire" having a integral sound suppressor/silencer.
- Features include: fixed, ramped fiber optic front; tubular receiver/frame grooved for scope mount; manual safety lever located in the trigger guard.
- Overall length with a 381 mm (15 inches) barrel is 1105 mm (43.5 inches), average weight is 2.72 kg (6 lbs).

Manufacturer

- "Crosman" with logo is marked on the left side of the receiver/frame.

Action

- hinged barrel design.
- nitrogen/spring-piston powered.
- nitrogen acts like a mechanical spring.
- discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the right side of the barrel block.
Calibre	- calibre identification is marked on the right side of the barrel block.
Canadian Law Comments	- At least two variants of this particular model exist: Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport. Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

Notes

Make

- "CROSMAN" is marked on the left side of the receiver/frame.
- "CROSMAN" logo, a letter "C" within a circle and crosshair is usually marked on the right side of the receiver/frame.

Model

- Introduced in 2021.
- "Crosman" and "SHOCKWAVE" are marked on the right side of the receiver/frame.
- "NP" stand for "Nitrogen Piston", the power source of the rifle.
- "Nitro Piston" is marked on the left side of the barrel at the breech.
- "M-CS7SXS" model is marked on the right side of the barrel block.
- "M-CS7SXS" is the Canadian version of the "Shockwave NP QuietFire" without the sound suppressor/silencer.
- Features include: rifled barrel with a synthetic over molding that incorporate a larger diameter tapering onto the barrel block; tubular receiver/frame is grooved for scope mounts; manual safety lever located in the trigger guard; one piece synthetic semi-pistol grip stock with raised cheek piece.

Action

- Compressed gas piston.
- Hinged barrel design.

Serial Number

- Serial number is marked on the right side of the barrel block.

Calibre

- Calibre identification is marked on the right side of the barrel block.

Canadian Law Comments

- Discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

196986 - 2	22 PELLET	1	381	Prohibited CC 84(1) "prohibited device" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Crosman" is marked on the right side of the receiver/frame.
- "CROSMAN" logo, a letter "C" within a circle and crosshair is usually marked on the right side of the receiver/frame.

Model

- Introduced in 2021.
- "Crosman" and "SHOCKWAVE" are marked on the right side of the receiver/frame.
- "NP" stand for "Nitrogen Piston", the power source of the rifle.
- "Nitro Piston" is marked on the left side of the barrel at the breech.
- "Quietfire" stands for the built in sound suppressor/silencer.
- "Quietfire" is not marked on the firearm but designated by the model numbers.
- Features include: rifled barrel with a synthetic over molding that incorporate the sound suppressor/silencer of a larger diameter tapering onto the barrel block; tubular receiver/frame is grooved for scope mounts; manual safety lever located in the trigger guard; one piece synthetic semi-pistol grip stock with raised cheek piece.

Action

- Compressed gas piston.
- Hinged barrel design.

Serial Number

- Serial number is marked on the right side of the barrel block.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- Discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.
- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada.

If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

Notes

Make

- "CROSMAN" and the Crosman "bullseye" logo are marked on the air pistol.

Model

- "SNR.357" is marked on both sides of the barrel.
- "SNR" means "Short Nose Revolver".
- this is a CO2-powered air pistol that fires BBs from holders resembling cartridges, using CO2 gas from a 12 gram cylinder contained in the grip.
- although appearing to fire conventional cartridges, the actual cartridges merely hold the BB's or pellets.
- features include: fixed ramped and blade front sight and adjustable target rear sight; round sided smoothbore barrel; solid top metal receiver/frame with left side swing-out fluted cylinder; cylinder release/safety is located on the left side of the receiver/frame; exposed hammer; double/single action trigger mechanism; plastic grips with finger grooves; black finish.
- overall length 206mm (8.12"), weight 870.9g (1.92lbs).

Action

- CO2-powered revolver.
- does not discharge a projectile at a muzzle velocity exceeding 152.4pms and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is usually on the receiver/frame.

Notes

Make

- "CAUTION READ INSTRUCTION MANUAL", "FREE FROM CROSMAN AIRGUNS", "E. BLOOMFIELD, NY, USA 14448" was observed marked on the right side of the receiver/frame.

Model

- "SILHOUETTE SPORT PISTOL", "MODEL SSP-250" and "0.177 CAL (4.5MM) PELLET" was observed marked on the right side of the receiver/frame.
- manufactured from 1989 to 1995.
- this is a CO2-powered air-pistol built on the same receiver/frame as the 1322/1377 series of pneumatic air pistols.
- features include: interchangeable round rifled steel barrel; hooded fixed blade front sight and fully adjustable rear sight; cross-bolt safety; two stage trigger; checkered grip plates; black finish.

Manufacturer

- "CAUTION READ INSTRUCTION MANUAL", "FREE FROM CROSMAN AIRGUNS", "E. BLOOMFIELD, NY, USA 14448" was observed marked on the right side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- CO2 powered air rifle. - at least two variants of this particular model exist: Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.
Serial Number	- serial number was observed marked on the right side of the barrel. - observed serial number consisted of nine numbers without a letter prefix or suffix.
Calibre	- "0.177 CAL (4.5MM) PELLET" was observed marked on the right side of the receiver/frame. - interchangeable barrels also available in .20 and .22 PELLET.
Canadian Law Comments	- at least two variants of this particular model exist: Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport. Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

177983 - 4	22 PELLET	1	394	Prohibited CC 84(1) "prohibited device" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "CROSMAN SUMMIT" is marked on the side of the receiver/frame.

Model

- introduced in 2017.
- "SUMMIT" is marked on the left side of the receiver/frame.
- "MODEL CSRN292" or "MODEL CSRN217" is marked on the side of the barrel block.
- "NP2" stands for "nitro piston" second generation.
- features include: fiber optic front sight and adjustable rear sight; round rifled steel barrel with muzzle break; receiver/frame is grooved for scope mounts; two stage adjustable trigger; ambidextrous safety located inside the trigger guard; ambidextrous synthetic pistol grip stock with rubber butt plate; black finish; sling swivels.
- overall length is 1130 mm (44.5"), and average weight is 3.18 kgs (7 lbs).

Action

- nitrogen-piston (NP) powered, hinged barrel design.
- nitrogen gas acts like a coil spring.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the side of the barrel at the breech.
Canadian Law Comments	- this firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. - if the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.
Remarks	- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Notes

Make

- Crosman is marked on the right side of the receiver/frame.
- Crosman's warning is marked on the left side of the air chamber.

Model

- introduced in 2013.
- "TR77 NPS" is marked on the right of the firearm.
- "TR77 NPS" is a hinged barrel, air rifle powered by "Nitro Piston" technology with a synthetic stock.
- the "S" in "NPS" indicates that the barrel is shorter than the one featured on the Crosman model TR77.
- features include: fluted round, rifled steel barrel with a muzzle break; front hinged tubular receiver/frame is grooved for scope mounts; two stage adjustable trigger; automatic safety; one piece all-weather tactical synthetic pistol grip stock with an adjustable cheekpiece; black finish.
- overall length is 1016 mm (40"), and the average weight is 2.49 kgs (5.5 lbs).
- available with CenterPoint optics 4 X 32 scope and mount.

Manufacturer

- Crosman is marked on the right side of the receiver/frame.
- Crosman's warning is marked on the left side of the air chamber.

Action

- piston powered, hinged barrel design.
- at least two variants of this particular model exist:

Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number may be located on the underside of the barrel near the front sight or on the left side of the breech.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- at least two variants of this particular model exist:
Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

Notes

Make

- "Crosman Corp. East Bloomfield. NY 14443" is marked on the left side of the firearm.
- the Crosman logo of a "C" forming the inner ring of a bullseye is moulded into the grips.

Model

- introduced in 2014.
- "WILDCAT" is marked on the right side of the firearm.
- this is a CO2 powered semi-automatic pistol.
- features include: fixed blade front and rear notch sights; round metal smoothbore barrel; synthetic receiver/frame with integral accessory rail in front of the trigger guard; manual safety located on the right side of the receiver frame; magazine release button located on the grip; grips slide back for easy replacement of CO2 cartridge; matte black and pink finish.
- average weight is 0.91kg (2.0 lbs).

Manufacturer

- "Crosman Corp. East Bloomfield. NY 14443" is marked on the left side of the firearm.
- the Crosman logo of a "C" forming the inner ring of a bullseye is moulded into the grips.

Action

- CO2 (Carbon Dioxide) powered.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the right side of the receiver/frame under the grip.
- observed serial number consisted of three number followed by a letter and five numbers.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments - does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Notes

Make

- "CROSS MACHINE TOOL" is marked on the left side of the receiver/frame.
- "CROSS MACHINE TOOL" uses the acronym "CMT Tac".
- "CROSS MACHINE TOOL" was founded in 1993.
- "CROSS MACHINE TOOL" is located in Lexington, Tennessee U.S.A.

Model

- "UHP15H" is marked on the left side of the receiver/frame.
- "H" stands for "Hexagon" in reference to the machined pattern on the magazine well.
- "UHP15H" variants are based on the Colt AR-15/M16 design.
- "UHP15H" is sold as a receiver/frame.
- features include: threaded muzzle for flash hider/muzzle brake; standard, heavy profile or grooved, M4 carbine contoured barrel; AR15/M16 standard, low profile, accessory rail or folding front sight bracket/gas block; accessory railed, free floating or synthetic handguard; fixed carrying handle or accessory rail flat top upper assembly; may have adjustable sights, folding sights or optical sight; oversize integral trigger guard; collapsible, standard or custom rifle buttstock; synthetic pistol grip; matte black and/or coloured finish.

Manufacturer

- "CROSS MACHINE TOOL" is marked on the left side of the receiver/frame.
- "CROSS MACHINE TOOL" use the acronym "CMT Tac".
- "CROSS MACHINE TOOL" was founded in 1993.
- "CROSS MACHINE TOOL" is located in Lexington, Tennessee U.S.A.

Action

- gas operated.

Serial Number

- serial number is marked on the right side of the receiver/frame.
- serial number of referenced examples consisted of a one letter (H) prefix and five numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- "MULTICAL" is marked on the right side of the receiver/frame. - calibre identification is usually marked on the barrel.
Shots	- detachable box magazine. - uses all magazines available for AR15/M16 type rifles.

42668 - 1	223 REM	5	457	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Crossfire LLC" over "LaGrange GA USA" may be marked on right side of receiver/frame.
- Crossfire line was introduced in 1997 by Hesco, Incorporated.
- Crossfire was available in two configurations:
1) over & under, selective fire, repeating, pump action shotgun and semi-automatic rifle, and
2) over & under, selective fire, repeating, pump action shotgun and pump-action rifle.

Model

- manufactured from 1998 to 2001.
- Crossfire is an over & under, selective fire, repeating, shotgun/rifle.
- Crossfire is an unusual firearm that combines a pump-action shotgun and pump-action rifle (each with its own barrel) in a single receiver/frame.
- the single selector allows this over/under firearm to be used as either a rifle or shotgun at the user's discretion.
- features include: over & under barrels; single receiver/frame with integral scope rail; dual action bars; single trigger; ambidextrous selector and crossbolt safety; rifle-type sights; synthetic forearm, pistol grip and stock.
- Crossfire is available with either a black oxide (MK-1) or camouflaged finish (MK-1C).

Type

- Crossfire combines a pump-action shotgun and a pump-action rifle in an over & under configuration using a single receiver/frame.

Action

- Crossfire combines a pump-action shotgun and a pump-action rifle in an over & under configuration using a single receiver/frame.

Barrel

- Crossfire combines two separate barrels (and barrel lengths) in one receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- the rifle portion of this firearm will accept standard AR-15/M16 box magazines, which are commonly available in 20- and 30-round capacities.
- this firearm leaves the factory with a 5-round magazine.
- the removeable shotgun magazine is located in the buttstock.

Notes

Make

- "Crossfire LLC" over "LaGrange GA USA" may be marked on right side of receiver/frame.
- Crossfire line was introduced in 1997 by Hesco, Incorporated.
- Crossfire was available in two configurations:
1) over & under, selective fire, repeating, pump action shotgun and semi-automatic rifle, and
2) over & under, selective fire, repeating, pump action shotgun and pump-action rifle.

Model

- "MK 1" may be marked on the right front side of receiver/frame.
- this is a highly unusual firearm that combines a semi-automatic rifle with a pump-action shotgun (each with its own barrel), into an over/under firearm that can be used as a rifle or shotgun at the owner's discretion.
- introduced in 1997.
- single trigger with ambidextrous fire control lever, oversize crossbolt safety.
- synthetic stock and forend, luminous rifle-type sights (fitted with an integral scope rail).
- black oxidized finish on all metal parts; also available as the MK 1C version with a camouflaged finish.

Action

- this is an over/under combination gun with a single receiver/frame and a pump-action shotgun on top and a semi-automatic rifle on the bottom.

Serial Number

- serial number is marked on right front side of the receiver/frame.

Barrel

- Crossfire combines two separate barrels (and barrel lengths) in one receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- known example had calibre designation marked on each barrel.
Shots	- the rifle portion of this firearm will accept standard AR-15/M16 magazines, which are commonly available in 20 and 30 round capacities. Leaves the factory with a 5-round magazine.

Firearm Reference Number (FRN): 26610
Make: Crown
Model: Crown

Summary

Make:	Crown
Model:	Crown
Manufacturer:	Hopkins & Allen
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
26610 - 3	32 RF	5	68	Antique AFR, Section 1, para. 6	Manufacturer Specifications and Commercial Customization	

Notes

Make

- located on receiver/frame above cylinder, marked as "CROWN".

Model

- this is a Hopkins & Allen Ranger No. 2 produced before 1898.
- features include: blade front sight, groove rear sight, push-in type blade cyinder-release located on the left side, knurled cylinder pin, safety notches for the hammer are cut into the rear of the cylinder, octagonal barrel, exposed hammer, single action trigger mechanism, spur trigger, nickel plated with black plastic grips.

Manufacturer

- manufacture's name does not appear on the firearm.
- Before 1898, Hopkins & Allen firearms may or may not be marked with their name. They often only had a trade name, model name or patent dates as the only markings.
- "PAT. MCH 28.71 MAY 27.79" are marked on the top strap of the receiver/frame and are dates used by the Hopkins & Allen Company. These dates often appear on their firearms even if the firearms themselves do not bear the feature covered by the patents.
- the features of the push-in type blade cyinder release located on the left side, which is believed to be an exclusive feature of Hopkins & Allen, and the safety notches for the hammer, cut into the rear of the cylinder, along with the patent dates marked on the top strap are the clues used to indicate the correct manufacturer.

Serial Number

- serial number may be located on the side of the grip frame, under the left grip panel.

Other Markings

- "PAT. MCH 28.71 MAY 27.79" are marked on the topstrap of the receiver/frame.

Notes

Make

- "Crusader" is marked on the firearm in various places.

Model

- Introduced in 2021.
- The model designation is marked on the right side of the receiver/frame.
- This is a specifically designed "blowback" model.
- This firearm is a modular design similar in style to the (make) Armalite (model) AR-180B.
- Extended ambidextrous thumb safety located on the receiver/frame.
- Slide lever located on the side of the firearm.
- Takedown catch/lever located on the side of the firearm.
- Features include: 6061Aluminum lower receiver/frame with integral magazine housing; customisable monolithic aluminum upper assembly with integral upper and lower accessory rails; adjustable cocking handle for right handed or left handed operator.

Manufacturer

- The manufacturer is marked on the left side of the receiver/frame.

Action

- Blowback operated.

Serial Number

- The serial number rationalization is unknown.

Notes

Make

- The company logo is marked on the receiver/frame.
- The company logo consists of a "sword" over a "shield".
- "CRUSADER ARMS" is marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- Introduced in 2024. - "CRYPTO" is marked on the right side of the receiver/frame. - The Crusader Arms Crypto uses an AR-style upper and lower receiver arrangement, but uses two locating pins in the front of the lower receiver/frame, which slot into the upper receiver, instead of a front hinge pin. - This firearm is available for sale as a receiver/frame only. - Features include: full length, top mounted accessory rail; top mounted charging handle; action release located on the left side of the receiver/frame; safety located on the left side of the receiver/frame; magazine release located on the right side of the receiver/frame.
Manufacturer	- "MFG. BY SPECTRE LTD." is marked on the left side of the receiver/frame.
Action	- Gas operated.
Serial Number	- The serial number is marked on the left side of the receiver/frame.
Calibre	- The calibre designation is marked on the barrel.
Shots	- Introduced in 2024 with a 5 shot detachable cartridge magazine. - Detachable box magazine. - Uses a proprietary cartridge magazine.
Canadian Law Comments	- This firearm design incorporates a split receiver/frame: the lower receiver is the master component considered to be the receiver/frame for all purposes of the Criminal Code and the Firearms Act.

Notes

Make

- "CRUSADER ARMS" is marked on the left side of the receiver/frame.
- The company logo is marked on the firearm.
- "Crusader Arms" logo is a stylized shield with a "C" and an "A" intersected down the centre by a broad sword.
- "Crusader Arms" name written on the left side, has the "D" replaced with the stylized shield with a broad sword intersecting the centre.

Model

- Introduced in 2022.
- "TEMPLAR" is marked on the right side of the lower receiver/frame.
- Based on the "AR-180B" design.
- Features include: aluminum receiver/frame; right side magazine release; ambidextrous selector/safety switch; bolt release on the left side.
- There is a features driven version of this model known as the "Gen 2". The features that define the "Gen 2" are: pencil profile barrel; reduced profile handguard; three piston/spring bolt carrier group; large paddle shaped bolt catch/release; bent charging handle and; lightning cuts to reduce weight.

Manufacturer

- "MFG. BY SPECTRE LTD." is marked on the left side of the receiver/frame.

Action

- Gas operated.

Serial Number

- The serial number is marked on the left side of the receiver/frame.
- Serial number of a referenced example consisted of a two-letter prefix followed by two digits, three letters and three more digits.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel	- The barrel length does not include any attached device such as flash-hider or muzzle brake.
Calibre	- The calibre is marked on the bolt, visible through the ejection port.
Shots	- Detachable box magazine. - Designed to accept "AR15" type magazines.
Canadian Law Comments	- This firearm design incorporates a split receiver/frame: the lower receiver is the master component considered to be the receiver/frame for all purposes of the Criminal Code and the Firearms Act.

Notes

Make

- "Cruso" was a trade name used by Hibbard, Spencer, Bartlett & Company (H.S.B. & CO) of Chicago, Illinois on firearms made by Crescent Arms. "Cruso" was also used by other makers as a brand name.
- the "Cruso" trademark logo was the profile of a strutting rooster with the word "CRUSO" inscribed on the side of the rooster (the "C" in "CRUSO" may appear to be part of the rooster's wing). Because the letter "C" is not as defined as the other letters, it may appear to be the word "RUSO".
- "H.S.B. & CO" and "CHICAGO" are also marked on the left side of the receiver/frame.
- "Hibbard, Spencer, Bartlett & Company" was a hardware and sporting goods dealer located in Chicago, Illinois, U.S.A. from 1883 to 1929.
- "Hibbard, Spencer, Bartlett & Company" was formally known as "Hibbard & Spencer Company" from 1880 to 1883.
- "Hibbard & Spencer Company" of Chicago, Illinois, U.S.A. was the successor to "W.E. Spencer & Company".
- "Hibbard , Spencer, Bartlett and Company" used the following trade and model names/trademarks on shotguns: Bartlett Field, Blackfield, Chicago, Chicago Arms Company, Cruso, Cumberland Arms Company, Gold Hibbard, Greenfield, Hudson, Liege Gun Company, Newport, Pittsfield, Premier, Rev-O-Noc, Ruso (inside the outline of a chicken), Spencer Gun Company, H.S & Co., H.S.B. & Co., Hibbard, Hip Spe Bar, H.J. Sterling, Victor Special, and Whippet.
- "William E. Spencer & Company" was in business from 1874 to 1880.

Model

- this is a generic entry for those "Cruso" side by side shotguns that are not identifiable as to model.
- features may vary widely.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- manufacturer may not be marked on the firearm.
Action	- side by side configuration.
Serial Number	- sample examined was numbered on the water table.

Notes

Make

- "C.S.A." was observed marked on the barrel.
- "C.S." was observed marked on the right side of the receiver/frame.
- "ER" mirrored (RE) was observed marked on the left side of the trigger guard/ grip strap assembly.

Model

- "Colt 1851 Navy Type" is not marked on the firearm.
- this firearm resembles a Colt model 1851 Navy black powder percussion revolver.
- "PATENT N. and four numbers" and "ENGAGED 16 MAY 1843" was observed marked on the cylinder.
- features include: brass front sight and a notch in the hammer nose for a rear sight; blued octagonal barrel with hinged style loading lever/rammer assembly; brass receiver/frame with blued non-fluted cylinder roll-engraved with a naval battle scene; exposed spurred hammer; single action trigger mechanism; brass oval trigger guard/grip strap and back strap; one piece smooth wood grip; color case hardened rammer assembly and hammer.

Serial Number

- serial number rationalization unknown.
- serial number was observed marked on the underside of the receiver/frame ahead of the trigger guard and repeated on the trigger guard/grip strap, bottom of the buttstrap and on the cylinder.
- observed serial number consisted of four numbers without a letter prefix or suffix.

Calibre

- "36 CAL" was observed marked on the left side of the trigger guard/grip strap.

FRT Report

Firearm Reference Number (FRN): 118973
Make: Cummins
Model: B3-1

Summary

Make:	Cummins
Model:	B3-1
Manufacturer:	Shanghai Air Gun (SAG)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	CHINA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
118973 - 1	177 PELLET	1	450	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- marked on top of the receiver ring: CUMMINS INDUSTRIAL TOOLS

Model

- model designation is not marked on the air rifle, features determine the model.
- fixed barrel with under-barrel cocking lever, stamped metal trigger and trigger guard, hooded post front sight, windage and elevation adjustable rear sight mounted on the receiver/frame by dovetail grooves, plain pistol-gripped hardwood stock with raised cheekpad, black rubber buttpad.
- drawing the cocking lever down and rearwards against spring tension draws the pneumatic piston rearward, until it is caught, exposes the rear of the bore to chamber the pellet, and arms the mechanism.
- returning the lever to the clamped under-barrel position returns the breech-block to battery position in readiness for discharge.

Manufacturer

- "Shanghai Airgun Factory" is not marked on the firearm.
- "Shanghai China" in script under a line of Chinese ideographs or "Made in Shanghai, China" is marked on the receiver/frame.
- Shanghai Air Gun (SAG) is a manufacturer based in Shanghai, China.
- Shanghai Air Gun was established in 1957.
- Shanghai Air Gun produces air rifles and air pistols under several different names such as SAG, Industry Brand and Tech Force.
- Shanghai Air Gun primary importers into North America are Air Gun Inc. of Houston, TX and Compasseco, Inc. of Bardstown, KY.

Action

- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- sample examined did not have a serial number, sources indicate that current production may be serialized.

Calibre

- not marked with calibre designation.

FRT Report

Firearm Reference Number (FRN): 172943
Make: Currie, Gilbert & Co
Model: Scottish Highlander Regimental Flintlock Pistol

Summary

Make:	Currie, Gilbert & Co
Model:	Scottish Highlander Regimental Flintlock Pistol
Manufacturer:	
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
172943 - 1	52 FLINTLOCK	1	197	Antique CC 84(1) "antique firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Currie" and "London" in script is marked on the right side of the pistol.
- "Currie" operated business from 1828 to 1875.

Model

- model designation is derived from the characteristics of the firearm.
- this is an all steel construction, including the stock, flintlock pistol.
- features include: round, stepped barrel slightly flared at the muzzle that may also be octagon; flat sided metal stock with curved grip; under the barrel ram rod; button-shaped triggers without trigger guard; ram's horn butt with a threaded, centre knob for the touch hole pick; belt hook attachment on the left side; unfinished metal surface with engraving.
- a very similar pistol, the "Black Watch Pistol" is known under several similar names, and must not be confused with the "Murdoch" pistol; where the "Murdoch" pistol has a "ram's-head" butt, with curlicue extensions that help to protect a ball-headed vent-pick threaded into the butt, the "Black Watch Pistol" is made with an all-brass butt and stock, with a double-lobed "kidney-shaped" butt that allows the pistol to be used as a club after the shot is fired.

Action

- muzzle loading.

Firearm Reference Number (FRN): 161566
Make: Curry, Charles
Model: Percussion Rifle

Summary

Make:	Curry, Charles
Model:	Percussion Rifle
Manufacturer:	Slotter & Company
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
161566 - 1	47 PERCUSSION	1	807	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "C. CURRY", "CHARLES CURRY", "CHAS. CURRY" or "CHs CURRY" is usually marked on the firearm.
- Charles Curry was a San Francisco-based gunsmith and retailer during the 1850s and 1860s.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is a "hawken"-styled hunting rifle manufactured for Charles Curry by Slotter & Co. prior to 1863.
- features include: browned or blued finish; open fixed or adjustable sights; octagonal or half-round/half-octagonal barrel; under-barrel ramrod thimbles; half-length straight-grip maple or walnut stock (some with brass or German silver finishings); external, manually cocked, hammer on the lockplate; finial trigger guard/grip strap; double-set triggers; crescent butt.

Manufacturer

- "SLOTTER & Co. PHILa" is usually marked on the firearm.
- Slotter & Company was located in Philadelphia, Pennsylvania, U.S.A. from 1860 to 1870.
- Slotter & Company was founded by Charles and Henry Schlotterbeck.
- Slotter & Company originally manufactured copies of Henry Deringer's pistol.
- Henry Deringer filed a a law suit against Slotter & Company for infringement of trade name circa 1863.
- Slotter & Company took into their partnership, a John Deringer to be able to legally use the Deringer name circa 1863.

Action

- muzzle-loaded, percussion, single-shot.

Serial Number

- serial-numbered on the barrel.

- "Connecticut Valley Arms (CVA)" firearms were manufactured in Spain by Mendi and Santa Barbara.
- "Connecticut Valley Arms (CVA)" firearms were manufactured in Italy by Armi San Marco and Pietta.

Model

- this is a modern version of the traditional percussion rifle, uses a two way ignition system that allows the use of #11 or musket caps.
- features include: Tuff-Lite synthetic semi-pistol grip stock in black or Hardwoods, matte finish, drilled and tapped for scope mounting, designed to handle Pyrodex pellets, fiber optic sights, single trigger, and a ram rod mounted below the barrel.

Manufacturer

- "Made in Spain" may be marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- muzzle loading, percussion ignition system.

Serial Number

- serial number is marked on the receiver/frame/barrel.
- serial number rationalization is unknown.
- Spanish government instituted a new system for firearm serial numbering in 1995.
- Spanish system incorporated the code number of the gunmaker/manufactuer, weapon code, serial number sequence, and year of manufacturer.
- serial number break down, the first two numbers (61) are the code numbers for the manufacture, the next two numbers (13) are the code numbers for muzzle loader, the next numbers are the serial number sequence, and the last two numbers (97) are the year of manufacture.

Notes

Make

- "CVA" and/or "Connecticut Valley Arms" and/or "Connecticut Valley Arms, Inc." and/or "BPI-Connecticut Valley Arms" is marked on the firearm.
- "CVA" is the abbreviation for "Connecticut Valley Arms".
- "Connecticut Valley Arms (CVA)" was founded in 1971.
- "Connecticut Valley Arms (CVA)" has been a manufacturer, importer, and distributor.
- "Connecticut Valley Arms Company" was located in Higganum, Connecticut, U.S.A. in 1972.
- "Connecticut Valley Arms, Incorporated" was located in Haddam, Connecticut, U.S.A. in 1975.
- "Connecticut Valley Arms, Incorporated" was located in Norcross, George, U.S.A. until 2010.
- "Connecticut Valley Arms, Incorporated" moved to Duluth, Georgia, U.S.A. in 2010.
- "Connecticut Valley Arms, Incorporated" was purchased by "Blackpowder Products, Incorporated (BPI)" in May of 1999.
- "BP Firearms LLC" of Norcross, Georgia and "CVA/Connecticut Valley Arms" of Duluth, Georgia are Divisions of "BPI Outdoors".
- "Connecticut Valley Arms (CVA)" firearms were manufactured in Spain by Jukar (pre-1980) or Dikar (post-1980).
- "Connecticut Valley Arms (CVA)" firearms were manufactured in Spain by Mendi and Santa Barbara.
- "Connecticut Valley Arms (CVA)" firearms were manufactured in Italy by Armi San Marco and Pietta.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- appears on barrel and or the receiver.
- this model was introduced in 1997.
- this is a muzzle loading, in-line, bolt operated, sporting rifle.
- it features stock in either traditional or thumbhole configuration made of either walnut or synthetic material with black or camouflage finish.
- barrel is either matte blued, stainless steel or grey teflon finish.
- fiber optic sight system.
- trigger block safety system.
- available in a left handed version.
- in 2001 an improved ignition system using a 209 shot shell primer was introduced.

Manufacturer

- "Made in Spain" may be marked on the firearm.

Serial Number

- serial number appears on the receiver and or the barrel.
- serial number rationalization is unknown.
- Spanish government instituted a new system for firearm serial numbering in 1995.
- Spanish system incorporated the code number of the gunmaker/manufactuer, weapon code, serial number sequence, and year of manufacturer.
- serial number break down, the first two numbers (61) are the code numbers for the manufacture, the next two numbers (13) are the code numbers for muzzle loader, the next numbers are the serial number sequence, and the last two numbers (97) are the year of manufacture.
