Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model designation appears on the barrel and/or the receiver/frame. - this model was introduced in 1998. - prior to 2000 the receiver/frame and barrel were separate components. In 2000, CVA changed the design to a one piece receiver/frame/barrel called the "Mono-Block". - in 2001 an improved ignition system using a 209 shot shell primer was introduced. - features include: in-line design; percussion ignition; black or camouflage printed synthetic stocks and a blued or nickel finished barrel.
Manufacturer	- "Made in Spain" may be marked on the firearm.
Action	- muzzle loading, percussion ignition, using a break-action design that allows the use of type 209 Shotgun primers.
Serial Number	- serial number is marked on the receiver/frame and/or the barrel. - serial number rationalization is unknown. - Spanish government instituted a new system for firearm serial numbering in 1995. - Spanish system incorporated the code number of the gunmaker/manufactuer, weapon code, serial number sequence, and year of manufacturer. - serial number break down, the first two numbers (61) are the code numbers for the manufacture, the next two numbers (13) are the code numbers for muzzle loader, the next numbers are the serial number sequence, and the last two numbers (97) are the year of manufacture.
Calibre	- the calibre designation is marked on the left side of the barrel as "45 CAL" or "50 CAL". - 54 PERCUSSION was produced in 1998 only, or on special request following that date.
Remarks	- this is a muzzle loading, in-line, bolt operated, percussion ignition sporting rifle. It is similar to the CVA Firebolt except that it has a traditional type stock made of black synthetic material and has a standard blade front and adjustable open rear sights.

- "CZ" trademark/logo ("CZ" with a "v" on top of the letter "C" in a circle) has been used by "LUVO Prague Limited (LUVO Arms)" since 2006.

Model

- model name does not appear on the firearm.
- adopted by the Czechoslovak military in 1924 as the model 24 (Vz 24). This pistol was an improvement on and the successor to the model 22 pistol (Vz 22).
- production 'in quantity' ceased in 1939 with the German occupation of Czechoslovakia, however, small quantities were apparently produced during this period as well; research sources also indicate that some pistols were produced as late as 1946.
- production of these pistols was carried out exclusively by Ceska Zbrojovka at the Strakonice factory.
- recoil operated, barrel has three locking lugs, magazine safety, wooden or hard rubber grips, has an external hammer which is almost entirely concealed by the rear of the slide, barrel protrudes noticeably from the front of the slide (approximately 6mm).
- some models may have the rear backstrap grooved for a shoulder stock attachment.
- five "slanted" grasping grooves at the rear of slide (vs. vertical grasping grooves as found on the model 27).
- pistols produced during the German occupation of WWII may be devoid of all markings except the company name on the top rib of the slide or feature four vertical slide serrations, brown plastic grips and an eagle over "WaA76" stamped on the barrel lug.
- Czechoslovak Military acceptance marks are usually stamped on the right rear of the receiver/frame above the grip plate; they may appear as a "J", followed by a stylized lion with a crown followed by a two digit number. This series of characters has offen been mistaken for the model number, eg., J26, J37; in fact, these characters represent Czechoslovakian Military acceptance marks with the J indicating the "office" of acceptance, and the numerals indicating the year of acceptance. The year of manufacture is usually marked on the left side of the slide below the cocking serrations, ie. "CZ26", "CZ27" and "CZ28" etc.
- Note: The stylized lion Acceptance Mark may also be found stamped on the firearm without accompanying characters.
- this pistol was designated P24(t) by the German occupying forces of WW II.

Manufacturer

- "CZ" logo is usually marked on the receiver/frame or slide or grip plates.
- "CESKA ZBROJOVKA A.S. v PRAZE" may be marked on the slide.

Action

- recoil operated.

Serial Number

- usually located on left rear on left rear of receiver, right front of receiver, top of slide.
- apparently some of the pistols produced during the German occupation were not serialized or were not serialized in the traditional manner.

Shots

- detachable box magazine.

Other Markings

- "CESKA ZBROJOVKA A.S. v PRAZE." marked on top of slide rib.
- the CZ logo or "c" and "z" seperated by a vertical arrow and a two number year of manufacture date are marked on the left side of the slide below the cocking serrations.

Remarks

- The model 24 pistol was an evolution of the model 22. These pistols look very similar in appearance; in order to assist in the identification of these handguns the following outline will be of assistance;
- Model 22: - muzzle almost flush with front of slide.
  - ejection port has straight edge at rear of opening.
  - there is a noticeable open space between the trigger and the receiver
  - manufacturer's markings located on left side plate of receiver.
  - rear of receiver is square or flat in appearance.
- Model 24: - muzzle protrudes approximately 6mm from the front of slide.
  - ejection port is rounded at the rear of the opening.
  - left side plate of receiver is ridged.
  - no open space between trigger and receiver.
  - rear of receiver is rounded.
  - manufacturer's markings located on top rib of slide.

Model	- "52", the model designation denotes 1952, the year of adoption by the Czechoslovakian Military. - "52", "53" or "54", the year of manufacture and the crossed swords of the Czechoslovakian Military were marked on the right side of the receiver/frame just above the front of the trigger guard. These date markings have been mistaken for model numbers. - CZ model 52 or vz. 52 ("vzor 52" means "model of 1952") may be marked differently if they have been reconditioned or sold in North America. - CZ model 52 is identified by its generally clean, slim angular appearance. - features include: round barrel with recoil spring; angular slide with rear grip serrations and fixed sights; roller-locking system; exposed hammer; single action trigger mechanism; ribbed take-down buttons on either side of the forward portion of the trigger guard; heel mounted magazine release; receiver/frame mounted safety/de-cocker; dark plastic grip halves held to the receiver/frame by an external spring-clip; blued or parkerized finish. - in 1947, the Czechoslovakian Minister of Defense orders Ceska Zbrojovka (CZ) to produce three prototype pistols for evaluations. - in 1948, at the Swiss military trials in Myska, the CZ prototype pistol was designated the CZ 038. - in 1948, at the Czechoslovakian military trial, the CZ 038 was known as the "vz 482" design. During the testing, the pistol was also known as the "CZ 038/vz 482". After the testing, the vz 482 design was modified and became the vz 491 in 9mm Luger. - in early 1951, a small number of prototype vz 491 9mm pistols were made and tested. The pistols were found unsatisfactory and in late 1951 the design were again modified, changing the calibre to 7.62mm Tokarev and the designation to "vz 513". - in 1952 the vz 513 prototype was adopted by the Czechoslovakian Military and designated the vz 52. Productions of the vz 52 start in late 1952 and ended in 1954 with an estimated total production of 200,000 to 220,000 units. - in the late 1970's a refurbishing program was initiated by the Czechoslovakian Military and the letters "VOZ" denoting (military repair plant) and the last two digits of the year, i.e. 78 for 1978 were marked on the firearm. These markings have been mistaken for model numbers. - Century Arms and Century International imported a number of the model 52's into the U.S.A. and Canada. These pistols may be marked as per U.S.A. import regulations (CZ52 7.62 TOK Czech). - also available in 9MM LUGER calibre. - the CZ model 52 design was also manufactured in an automatic version in limited numbers. This automatic version was known as the model 55 or vz 55.
Manufacturer	- usually marked after the serial number on the forward right side of the frame as an "rid" code.
Action	- delayed blowback operation.
Serial Number	- serial number was observed marked on the left side of the receiver/frame and repeated on the top of the slide and on the barrel.
Calibre	- calibre may be marked on the receiver/frame and/or slide. - examples have been observed marked "9.MM". - examples have been observed marked "7.62 TOK".
Shots	- detachable box magazine in the grip.
Importer	- "C.A.I. ST. ALB. VT" was observed marked on the right side of the receiver/frame of two samples. - "C.A.I. GEORGE VT." was observed marked on the right side of the slide of one sample.
Other Markings	- units imported into the U.S.A. by Century Arms International are usually marked on the right side of receiver/frame above trigger as "CAI ST ALB VT" or "CAI GEORGIA VT". - marked on the right side of the frame above trigger: "Czechoslovak Military mark with two digit year mark, eg; X54". - marked when repaired, usually on the slide with the letters "VOZ" denoting Military Repair Plant and the last two digits denoting year of re-work: (eg; VOZ 78 re-worked in 1978).

- "CZ" trademark/logo ("CZ" with a "v" on top of the letter "C" in a circle) has been used by "LUVO Prague Limited (LUVO Arms)" since 2006.

Model

- the CZ23 and CZ25 were designed in the 1940s and went into production in 1948 as the M48A. The designation was changed in 1950 and production ceased in about 1954, when they were replaced by the CZ 24 and CZ26.
- the CZ23 with a fixed wooden stock and the CZ25 with a folding medal stock are in calibre 9MM LUGER, the CZ24 with a fixed wooden stock and the CZ26 with a folding medal stock are in 7.62x25MM TOKAREV.
- model designation is not marked on firearm; this is a typical Czech submachine gun with a tubular receiver/frame, but appearing similar to the UZI series; synthetic grips and forearm, fixed sights, and overhanging bolt to reduce overall length.

Manufacturer

- "she" is marked on the left side of the receiver/frame.
- year of manufacture preceeded by a prefix, is marked on the left side of the receiver/frame.
- "she" is a post-World War II, factory code used by Ceskoslovenska Zbrojovka, Povaski Strjirny (Povaska Bystrica), Czechoslovakia.

Notes

Make

- "CZ" is the acronym for Ceska Zbrojovka.
- "CZ" firearms have been made in Czechoslovakia, the Czech Republic, Turkey, and the United States of America.
- "CZ" trademark/logo ("CZ" with a "v" on top of the letter "C" in a circle) was originally used by Ceska Zbrojovka of Strakonice, Czechoslovakia.
- Czechoslovakia was dissolved into the Czech Republic and Slovakia in January of 1993.
- "CZ" trademark/logo ("CZ" with a "v" on top of the letter "C" in a circle) was used by Ceska Zbrojovka Strojirna (CZ Strojirna Limited) of the Czech Republic until 2006.
- Ceska Zbrojovka Strojirna (CZ Strojirna Limited) was purchased by "LUVO Prague Limited (LUVO Arms)" of the Czech Republic in 2006.
- "CZ" trademark/logo ("CZ" with a "v" on top of the letter "C" in a circle) has been used by "LUVO Prague Limited (LUVO Arms)" since 2006.

Model

- the CZ23 and CZ25 were designed in the 1940s and went into production in 1948 as the M48A. The designation was changed in 1950 and production ceased in about 1954, when they were replaced by the CZ 24 and CZ26.
- the CZ23 with a fixed wooden stock and the CZ25 with a folding medal stock are in calibre 9MM LUGER, the CZ24 with a fixed wooden stock and the CZ26 with a folding medal stock are in calibre 7.62x25MM TOKAREV.
- model not marked on firearm; this is a typical Czech submachinegun with a tubular receiver/frame, but appearing similar to the UZI series; synthetic grips and forearm, fixed sights, and overhanging bolt to reduce overall length.

Manufacturer

- "she" is marked on the left side of the receiver/frame.
- year of manufacture preceeded by a prefix, is marked on the left side of the receiver/frame.
- "she" is a post-World War II, factory code used by Ceskoslovenska Zbrojovka, Povaski Strjirny(Povaska Bystrica), Czechoslovakia.

Notes

Make

- "CZ" is marked on the firearm.
- "CZ" is the acronym for Ceska Zbrojovka.
- "CZ" firearms have been made in Czechoslovakia, the Czech Republic, Turkey, and the United States of America.
- "CZ" trademark/logo ("CZ" with a "v" on top of the letter "C" in a circle) was originally used by Ceska Zbrojovka of Strakonice, Czechoslovakia.
- Czechoslovakia was dissolved into the Czech Republic and Slovakia in January of 1993.
- "CZ" trademark/logo ("CZ" with a "v" on top of the letter "C" in a circle) was used by Ceska Zbrojovka Strojirna (CZ Strojirna Limited) of the Czech Republic until 2006.
- Ceska Zbrojovka Strojirna (CZ Strojirna Limited) was purchased by "LUVO Prague Limited (LUVO Arms)" of the Czech Republic in 2006.
- "CZ" trademark/logo ("CZ" with a "v" on top of the letter "C" in a circle) has been used by "LUVO Prague Limited (LUVO Arms)" since 2006.

Model

- the "Junior" is a model with shorter stock and barrel built for shooters of a smaller physique than an adult.
- this model is a derivation of the CZ452-2E ZKM.
- take note that the marking practices for this rifle and this series of firearms has changed over the last few years as the factory changed names and management.
- the evolution of Czechoslovakia into the Czech Republic and the Slovakian Republic has invalidated copyright and trademark protection to the point where it is difficult to trace the history and development of model names and manufacturer's names.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- these rifles are manufactured at the arms factory at Uhersky Brod in the country formerly known as Czechoslovakia, now known as the Czechoslovakian Republic.

Model	- this model is a derivation of the Brno ZKM 452-2 which in itself was an improvement of the Brno Model 5. - take note that the marking practices for this series of firearms has changed over the years as the factory changed names and management. - the evolution of Czechoslovakia into the Czech Republic and the Slovakian Republic has invalidated copyright and trademark protection to the point where it is difficult to trace the history and development of model names and manufacturer's names. - the model designation is usually marked on the firearm. - features include: no iron sights, grooved receiver/frame, safety lever mounted at the rear of the bolt, blued finish and Turkish walnut stock.
Manufacturer	- these rifles are manufactured at the arms factory at Uhersky Brod in the country formerly known as Czechoslovakia, now known as the Czech Republic. - during the period 1988 to 1993 firearms manufactured at this factory were identified with the "BRNO" trade mark, as the Uhersky Brod Plant was part of Agrozet Brno.
Action	- turn-bolt design.
Serial Number	- the serial number is located on the right side of the receiver/frame, rationalization unknown.
Barrel	- barrel is a heavier contour (thicker) than the other 452-2E ZKM models.
Shots	- this rifle uses a detachable box magazine, a single shot magazine adapter is also available.
Importer	- CZ-USA literature refers to the 452-2E ZKM line of firearms simply as CZ452.
Other Markings	- year of manufacture is usually indicated by its last two digits which appear with the proof marks ('98 indicates 1998).
Remarks	- this rifle is a direct descendant of the Brno ZKM series of rifles. - the 452-2E series is available in various different configurations, as follows: - 452-2E ZKM Standard: calibre 22 MAG or 22 LR, no checkering and standard grade beechwood stock. - 452-2E ZKM Lux: calibre 22 MAG or 22 LR, checkered, standard grade walnut stock. - 452-2E ZKM Special: calibre 22 MAG or 22 LR, checkered, standard grade beechwood stock. - 452-2E ZKM Varmint: calibre 22 MAG, 22 LR or 17 HMR, heavier than normal barrel, classic American style stock with a checkered wrist. - 452-2E ZKM Classic: calibre 22 MAG or 22 LR, classic American style stock with a checkered wrist and forend. - 452-2E ZKM Silhouette: calibre 22 LR, blued finish and synthetic stock with a schnable forend. - 452-2E ZKM Style: calibre 22 MAG or 22 LR, , nickel finish and synthetic stock. - 452-2E ZKM Scout: calibre 22 LR, compact size for young shooters. - 452-2E ZKM FS: calibre 22 MAG and 22 LR, full length "Mannlicher" style stock. - 452-2E ZKM American: calibre 17 HMR, 22 MAG and 22 LR, Turkish or American walnut stock, no iron sights.

Notes

Make

- "CZ" is marked on the firearm.
- "CZ" is the acronym for Ceska Zbrojovka.
- "CZ" firearms have been made in Czechoslovakia, the Czech Republic, Turkey, and the United States of America.
- "CZ" trademark/logo ("CZ" with a "v" on top of the letter "C" in a circle) was originally used by Ceska Zbrojovka of Strakonice, Czechoslovakia.
- Czechoslovakia was dissolved into the Czech Republic and Slovakia in January of 1993.
- "CZ" trademark/logo ("CZ" with a "v" on top of the letter "C" in a circle) was used by Ceska Zbrojovka Strojirna (CZ Strojirna Limited) of the Czech Republic until 2006.
- Ceska Zbrojovka Strojirna (CZ Strojirna Limited) was purchased by "LUVO Prague Limited (LUVO Arms)" of the Czech Republic in 2006.
- "CZ" trademark/logo ("CZ" with a "v" on top of the letter "C" in a circle) has been used by "LUVO Prague Limited (LUVO Arms)" since 2006.

Model

- model marked on left side of receiver/frame as "CZ 47".
- this is a standard pattern open bolt submachine gun with several unusual features, designed by Frantisek Myska and built by CZ during the post WW2 period; a slightly later version of this submachine gun (the CZ247) is identical except that it has a bayonet lug mounted on the barrel.
- this submachine gun is selective fire, with the length of pull of the trigger determining the mode of fire.
- features include: wooden pistol grip stock, tubular receiver/frame with octagonal barrel nut, skeletonized magazine housing that can be rotated from vertical to horizontal (this submachine gun can be fired in either position) and a magazine loading accessory inlet into the right side of the buttstock; to use this loader, you place a stripper clip of 8 rounds in the track, then push the magazine along the track.

Manufacturer

- manufacturer's designation is not marked on the firearm.

Action

- no longer capable of full automatic fire.

Model	- the model "513" is a simplified version of the CZ 452. The 513 has been offered as the "513 Hunter", "513 Farmer" and "513 Basic" which are the same rifle with minor variations. - take note that the marking practices for this rifle and this series of firearms has changed over the last few years as the factory changed names and management. - the evolution of Czechoslavakia into the Czech Republic and the Slovakian Republic has invalidated copyright and trademark protection to the point where it is difficult to trace the history and development of model names and manufacturer's names. - built on a modified miniature Mauser type action. - safety locks the bolt. - optional threaded muzzle to accommodate a sound suppressor. - overall length with a 530mm (20.9") barrel is 990mm (39"), average weight is 2.60kg (5.73lbs).
Manufacturer	- these rifles are manufactured at the arms factory at Uhersky Brod in the country formerly known as Czechoslovakia, now known as the Czech Republic. - during the period 1988 to 1993 firearms manufactured at this factory were identified with the "BRNO" trade mark, as the Uhersky Brod Plant was part of Agrozet Brno.
Action	- turn-bolt design.
Serial Number	- the serial number is located on the right side of the receiver/frame, rationalization unknown.
Shots	- this rifle uses a five or ten shot detachable box magazine. - a single shot magazine adapter is available.
Other Markings	- year of manufacture is usually indicated by the last two digits which appear with the proof marks ('95 indicates 1995).
Remarks	- this firearm is a magazine fed, bolt action sporting rifle with an adjustable trigger. It features a lacquered beechwood stock, sling swivel studs, tangent rear and hooded front sight and an optional threaded muzzle to accomodate muzzle attachments (silencer etc.). - this rifle is a direct descendant of the Brno ZKM series of rifles.

Model

- "CZ858 Tactical-2" is a generic model. Other model entries exist which may better describe the firearm.
- "CZ858 Tactical-2" externally resembles the Kalashnikov model AK47 assault rifle, but is not a member of the Kalashnikov family of firearms.
- "CZ858 Tactical-2" with a proof date of 2005 or 2006 is a semi-automatic version of the "VZ58".
- "CZ858 Tactical-2" semi-automatic version has the following characteristics:
1) a narrow, machined window on the left side of the sight block with a modern CZ proof mark and a proof date of 2005 or 2006 (see image # 3), or
2) original CZ factory marks ("she") on the left side of the sight block along with a modern CZ proof mark and a proof date of 2005 or 2006 (see image # 7).
- NOTE: Any "CZ858 Tactical-2" firearm with a large machined window on the left side of the sight block and a proof date of 2007 or later is derived from the full automatic CZ VZ58 firearm which has been altered to discharge one projectile with one pressure of the trigger. The original markings have been altered or obliterated and the firearm has been remarked.
- "VZ58" was also known as the "Puska VZ 58" (Rifle Model 1958) and was developed in Czechoslovakia for use by the army.
- "CZ858 TACTICAL- 2 P" or "CZ858 TACTICAL- 2 V" may be marked on the left side of the receiver/frame.
- "P" denotes a factory installed fixed buttstock.
- "V" denotes a factory installed folding buttstock.
- features include: hooded front sight and tangent rear sight; round, rifled barrel; short stroke gas piston is mounted above the barrel; flat sided machine steel receiver/frame with a sheet metal dust cover; tilting block locking system; striker fired; cocking handle is mounted on the right side of the breech block; detachable box magazine release lever is mounted behind the magazine well; safety/selector lever is mounted on the right side of the receiver/frame; composite wood or synthetic forearm, hand guard, and pistol grip; composition wood or synthetic fixed buttstock or metal side folding buttstock; sling swivels; blued metal finish.
- available in two versions: a solid non-folding buttstock, and a folding buttstock.
- overall length with a 483mm barrel and the folding stock (folded) is 720mm.
- overall length with a 483mm barrel and the fixed stock is 930mm.

Model

- VZ58 was introduced into military service in 1958.
- VZ58 is also known as the "Samopal vzor 58" or "SA Vz.58".
- VZ58 externally resembles a Kalishnikov model AK47 assault rifle, but is not a member of the Kalishnikov family of firearms.
- VZ58 early versions used wood stocks but most samples will be found with wood fibre filled plastic furniture.
- features include: round barrel with a threaded muzzle, hooded front sight and tangent leaf V-notch rear sight; gas operating system is mounted above the barrel; flat sided machined steel receiver/frame; tilting block locking system; selector/safety is mounted on the right side of the receiver/frame; wood filled plastic covered metal heat shield and forearm; wood filled plastic vertical pistol grip; wood filled fixed buttstock with metal butt plate or a right side folding metal buttstock; sling swivels.
- overall length with a 400 mm (15 3/4") barrel and a fixed buttstock is 838 mm (33").
- overall length with a 400 mm (15 3/4") barrel and the metal buttstock folded is 635 mm (25") and with the buttstock extended is 838 mm (33").
- average weight is 2.91 kgs (6.42 lbs).
- VZ58 was available in three standard versions:
- VZ58P has a solid non folding buttstock,
- VZ58V has a right side folding buttstock,
- VZ58Pi is the VZ58P with the addition of a dovetail bracket on the left side for mounting a night sight. The VZ58Pi will normally also have a flash hider and bi-pod.
- accessories available include, sling, bayonet, flash hider, bi-pod and a blank firing attachment.
- VZ58 breech mechanism and locking mechanism are vastly different to the AK-47 in that locking is accomplished by a falling breech block somewhat similar to the breech locking system employed by the Walther P-38 and Beretta 92 pistol. The breech lock is pivoted downwards into dual locking recesses in the side of the receiver/frame to accomplish the locking cycle rather than a bolt which rotates into a locking recess in the receiver/frame employed by the AK family of firearms. Unlocking the breech mechanism is accomplished by the breech block carrier, when struck by the gas piston, the rearward movement of the breech block carrier cams the front of the locking block upwards, disengaging it from the locking recesses.
- VZ58 does not employ a hammer, it has a striker to give firing pin impulse.
- VZ58 gas mechanism is a "short stroke" system independent of the breech block carrier.

Manufacturer

- the code "she" may be the only manufacturers mark on the firearm.

Action

- no longer capable of full automatic fire.

Serial Number

- an observed sample serial number consisted of a single Roman alphabet letter followed by five Arabic numerals.

Calibre

- calibre may not be marked on the firearm.

Shots

- detachable box magazine.

Remarks

- this firearm has only a similar appearance to the AK-47 family of firearms.
- the only commonality between the Kalashnikov AK-47 family of firearms and the Vz58 is the calibre of the cartridge the rifle is chambered to utilize and a common magazine.
- the breech mechanism and locking mechanism of the Vz58 is vastly different from the AK-47 in that locking is accomplished by a pivoting/falling breech block somewhat similar to the breech locking system employed by the Walther P-38 and Beretta 92 pistol. The breech lock of the Vz58 is pivoted downwards into dual locking recesses in the side of the receiver/frame to accomplish the locking cycle rather than a bolt which rotates into a locking recess in the receiver/frame employed by the AK family of firearms. Unlocking the breech mechanism is accomplished by the breech block carrier, which when struck by the gas piston, moves rearward, this rearward movement of the breech block carrier cams the front of the locking block upwards, disengaging it from the locking recesses.
- the Vz58 does not employ a hammer, it has a striker to give firing pin impulse.
- the gas mechanism of the Vz58 is a "short stroke" system independent of the breech carrier.
- the VZ58 is available in three standard versions, the VZ58P, which has a solid non folding buttstock, the VZ58V, which uses a folding buttstock and the VZ58Pi, which is the VZ58P with the addition of a dovetail bracket on the left side for mounting a night sight. The VZ58Pi will normally also have a flash hider and bi-pod.

Notes

Make

- "CZ" is the acronym for Ceska Zbrojovka.
- "CZ" firearms have been made in Czechoslovakia, the Czech Republic, Turkey, and the United States of America.
- "CZ" trademark/logo ("CZ" with a "v" on top of the letter "C" in a circle) was originally used by Ceska Zbrojovka of Strakonice, Czechoslovakia.
- Czechoslovakia was dissolved into the Czech Republic and Slovakia in January of 1993.
- "CZ" trademark/logo ("CZ" with a "v" on top of the letter "C" in a circle) was used by Ceska Zbrojovka Strojirna (CZ Strojirna Limited) of the Czech Republic until 2006.
- Ceska Zbrojovka Strojirna (CZ Strojirna Limited) was purchased by "LUVO Prague Limited (LUVO Arms)" of the Czech Republic in 2006.
- "CZ" trademark/logo ("CZ" with a "v" on top of the letter "C" in a circle) has been used by "LUVO Prague Limited (LUVO Arms)" since 2006.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- VZ58 was introduced into military service in 1958.
- VZ58 is also known as the "Samopal vzor 58" or "SA Vz.58".
- VZ58 externally resembles a Kalashnikov model AK47 assault rifle, but is not a member of the Kalashnikov family of firearms.
- VZ58 early versions used wood stocks but most samples will be found with wood fibre filled plastic furniture.
- features include: round barrel with a threaded muzzle, hooded front sight and tangent leaf V-notch rear sight; gas operating system is mounted above the barrel; flat sided machined steel receiver/frame; tilting block locking system; selector/safety is mounted on the right side of the receiver/frame; wood filled plastic covered metal heat shield and forearm; wood filled plastic vertical pistol grip; wood filled fixed buttstock with metal butt plate or a right side folding metal buttstock; sling swivels.
- overall length with a 400 mm (15 3/4") barrel and a fixed buttstock is 838 mm (33").
- overall length with a 400 mm (15 3/4") barrel and the metal buttstock folded is 635 mm (25") and with the buttstock extended is 838 mm (33").
- average weight is 2.91 kgs (6.42 lbs).
- VZ58 was available in three standard versions:
- VZ58P has a solid non folding buttstock,
- VZ58V has a right side folding buttstock,
- VZ58Pi is the VZ58P with the addition of a dovetail bracket on the left side for mounting a night sight. The VZ58Pi will normally also have a flash hider and bi-pod.
- accessories available include, sling, bayonet, flash hider, bi-pod and a blank firing attachment.
- VZ58 breech mechanism and locking mechanism are vastly different to the AK-47 in that locking is accomplished by a falling breech block somewhat similar to the breech locking system employed by the Walther P-38 and Beretta 92 pistol. The breech lock is pivoted downwards into dual locking recesses in the side of the receiver/frame to accomplish the locking cycle rather than a bolt which rotates into a locking recess in the receiver/frame employed by the AK family of firearms. Unlocking the breech mechanism is accomplished by the breech block carrier, when struck by the gas piston, the rearward movement of the breech block carrier cams the front of the locking block upwards, disengaging it from the locking recesses.
- VZ58 does not employ a hammer, it has a striker to give firing pin impulse.
- VZ58 gas mechanism is a "short stroke" system independent of the breech block carrier.

Manufacturer

- the code "she" may be the only manufacturers mark on the firearm.

Action

- gas operated.
- selective fire.

Serial Number

- serial number observed consisted of a letter prefix and five numerals.

Shots

- detachable box magazine.

Remarks

- this firearm has only a similar appearance to the AK-47 family of firearms.
- the only commonality between the Kalashnikov AK-47 family of firearms and the Vz58 is the calibre of the cartridge the rifle is chambered to utilize and a common magazine.
- the breech mechanism and locking mechanism of the Vz58 is vastly different from the AK-47 in that locking is accomplished by a pivoting/falling breech block somewhat similar to the breech locking system employed by the Walther P-38 and Beretta 92 pistol. The breech lock of the Vz58 is pivoted downwards into dual locking recesses in the side of the receiver/frame to accomplish the locking cycle rather than a bolt which rotates into a locking recess in the receiver/frame employed by the AK family of firearms. Unlocking the breech mechanism is accomplished by the breech block carrier, which when struck by the gas piston, moves rearward, this rearward movement of the breech block carrier cams the front of the locking block upwards, disengaging it from the locking recesses.
- the Vz58 does not employ a hammer, it has a striker to give firing pin impulse.
- the gas mechanism of the Vz58 is a "short stroke" system independent of the breech carrier.

Notes

Make

- the make or logo thereof is marked on the firearm.

Model

- the model is marked on the firearm.
- this is a heavy machine gun developed by CZ in the late 1930s, and which was sold to various foreign buyers (including Greece, Iran, Yugoslavia, and, notably, the UK, who further developed this design as the Besa Mk. I), but which didn't enter full production in time for the Czech armed forces to adopt it prior to World War Two.
- this machine gun is essentially a greatly-enlarged version of the VZ26 (which would become the BREN), and functions in the same manner, with a tipping bolt locked and unlocked by a cam on a gas-operated piston, and fired by an integral hammer on the piston during the closing stroke.
- features include: cone-shaped flash hider; quick-change barrel; ventilated shroud extending off of the receiver; hinged top cover; folding open ladder sights; and dual horizontal spade grips; blued finish.
- this machine gun was produced in tripod, towed/wheeled, and vehicle-mounted configurations.
- captured versions were used by the German forces during WW2 as anti-aircraft machineguns ("Flakmaschinengewehr"/"FlaMG").

Manufacturer

- the manufacturer or logo thereof is marked on the firearm.

Action

- gas-operated.

Serial Number

- numbered on the receiver/frame.

- Ceska Zbrojovka Strojirna (CZ Strojirna Limited) was purchased by "LUVO Prague Limited (LUVO Arms)" of the Czech Republic in 2006.
- "CZ" trademark/logo ("CZ" with a "v" on top of the letter "C" in a circle) has been used by "LUVO Prague Limited (LUVO Arms)" since 2006.

Model

- the model designation may not be marked on the firearm.
- this is an unusual "power driven" machine gun designed by CZ in the late 1930's specifically for use as an aircraft machine gun; unlike most other full automatic firearms, this design uses an external power source (planned to be an aircraft engine in this particular instance) to cycle the firearm and advance a linked non-disintegrating belt of ammunition through the firearm. Another peculiar aspect of this particular machine gun is that the belt remains attached to the cartridge rim at all times during passage through the machine gun and the barrel reciprocates longitudinally back and forth onto the linked cartridges as they are fired.
- features include: large sprocket on left or right side (depending on mounting position) to deliver mechanical power to the machine gun; slot-ventilated barrel shroud; remote firing apparatus and no sights (as this machine gun was designed to be aimed by the pilot via a remote gunsight).

Manufacturer

- the manufacturer may not be marked on the firearm.

Action

- mechanically operated with an external power source.

Shots

- belt fed firearm.

Model

- "SA vz.58" over "CANADIAN SPORTER" over "CAL. 7.62x39" was observed marked on the upper left side of the receiver/frame, rear sight housing.
- the "SA VZ58 CANADIAN SPORTER 7.62" has a resemblance to the Kalishnikov model AK47 assault rifle but is not a member of the Kalishnikov family of firearms.
- the "SA VZ58 CANADIAN SPORTER 7.62" is a factory original, semi-automatic version of the "vz 58" family of firearms.
- features include: hooded front sight and tangent rear sight; round rifled barrel with bayonet mounting point is under the front sight bracket; this firearm is gas operated with the gas tube mounted above the barrel; flat sided machined steel receiver/frame; tilting breech block locking system; safety lever mounted on the right side of the receiver/frame; magazine release located behind the magazine well; black synthetic polymer forearm with upper hand guard and pistol grip (SA Vz58 FAB Ltd Defense Line furniture), skeleton folding buttstock; sling swivels; blue/black finish on metal components.
- overall length with a 300mm barrel and the stock in the folded position is 547mm and with the stock in the extended position is 705mm.
- "SA VZ58 CANADIAN SPORTER 7.62" is designed to use commonly available Vz58 accessories and will accommodate a vast array of aftermarket parts and components which may vary from the standard features as described in the above note.
- "SA vz.58" over "CANADIAN SPORTER" over "CAL. 7.62x39" was observed marked on the upper left side of the receiver/frame, rear sight housing.
- "SA VZ58 CANADIAN SPORTER 7.62" has a resemblance to the Kalashnikov model AK47 assault rifle but is not a member of the Kalashnikov family of firearms.

Calibre

- "CAL. 7.62x39" was observed marked on the upper left side of the receiver/frame rear sight housing of an example.

Shots

- detachable box magazine.
- is designed to use the Vz58 detachable magazine and will accommodate a vast array of aftermarket magazines.

Remarks

- the SA VZ 58 CANADIAN SPORTER 7.62 firearm has a breech mechanism and a breech locking system that is vastly different from the Kalashnikov family of firearms in that locking is accomplished by a falling breech block somewhat similar to the breech locking system employed by the Walther P-38 and Beretta 92 pistol. The breech lock is pivoted downwards into dual locking recesses in the side of the receiver/frame to accomplish the locking cycle rather than a bolt which rotates into a locking recess in the receiver/frame employed by the Kalashnikov family of firearms. Unlocking the breech mechanism is accomplished by the breech block carrier, when struck by the gas piston, the rearward movement of the breech block carrier cams the front of the locking block upwards, disengaging it from the locking recesses.
- the SA VZ 58 CANADIAN SPORTER 7.62 firearm does not employ a hammer, it has a striker to give firing pin impulse.
- the SA VZ 58 CANADIAN SPORTER 7.62 firearm's gas mechanism is a "short stroke" system independent of the breech block carrier.
