- features include: hinged barrel/barrel shroud that allows access to an eight-shot disk; black plastic construction; "slide" mounted safety; single or double action; and open adjustable sights.
- also available with a frame-mounted laser aiming device.

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- CO2-powered air pistol.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the right side of the firearm.
- observed serial number consisted of number "04", a dash (-), "4C", a dash (-), six numbers, a dash (-) and "03".
- Spanish government instituted a new system for firearm's serial numbering in 1995. This system incorporated the gunmaker/manufactuer code, weapon code, serial number sequence, and year of manufacturer.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter (4C) are the code for an air pistol, the next six numbers are the serial number sequence, and the last two numbers (08) are the year of manufacture.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- marked on the left side of the firearm.
Shots	- rotary "disk" pellet magazine.

Notes

Make

- The company logo is marked on the receiver/frame.

Model

- Introduced in 2020.
- "ROADSTER G2" is marked on top of the receiver/frame of the firearm.
- May also be known as "Roadster 10X IGT GEN2".
- This model come equipped with a "Whisper Fusion" sound moderator.
- Features include: break action receiver/frame; "IGT" system (inert gas technology); horizontal top load magazine with load indicator; customized action trigger (CAT); shock wave absorber (SWA); recoil reducing rail (RRR); light weight polymer one-piece thumbhole stock.
- Overall length with a 508 mm (20 inches) barrel is 1309.9 mm (51.57 inches), average weight is 3.1 kg (6.83 lbs).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- Break open action. - Compressed gas piston. - Velocities have been reported as 280 (for 177 pellet) mps/918.6 fps and 1266 mps/385.9 fps. - Velocities have been reported as 208 (for 22 Pellet) mps/682.4 fps and 268.2 mps/880 fps. - Velocity is reported (for 177 Pellet) 150.9 mps or 495 fps.
Serial Number	- The serial number is marked on the left side of the receiver/frame. - The serial number rationalization is unknown. - Observed serial number sample consisted of the following format: two (2) numbers, followed by a dash, "-", followed by one (1) letter and one (1) number, followed by a dash, "-", finally followed by six (6) numbers, (example: 11-1A-123456).
Calibre	- "Cal. 5,5 (22)" is marked on the left side of the receiver/frame.
Shots	- Introduced in 2020 with a 10 shot detachable pellet magazine. - Detachable rotary disc magazine.
Canadian Law Comments	- At least two variants of this particular model exist: Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport. Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport. - This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

Firearm Reference Number (FRN): 131688
Make: Gamo
Model: Rocket

Summary

Make:	Gamo
Model:	Rocket
Manufacturer:	Industrias El Gamo
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
131688 - 1	177 PELLET	1	457	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GAMO" is usually marked on the receiver/frame just behind the breech.

Model

- introduced in 2010.
- "Rocket" may be marked on top of the receiver/frame.
- this is a single shot, break barrel cocking air rifle.
- features include: blued polymer jacketed, fluted rifled steel round barrel; no iron sights; front hinged tubular receiver/frame is grooved for scope mounts; automatic cocking safety system; two stage adjustable trigger; manual safety; one piece all-weather synthetic pistol grip stock with twin cheekpieces and ventilated rubber butt pad; non-slip material on all gripping parts.
- Gamo illuminated glass edged rifle scope may be included.
- overall length is 1092mm (43.0") and average weight is 2.8 kg (6.1 lbs).

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- break barrel cocking, spring piston.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the left side of the barrel.
- observed serial number consisted of number "04", a dash (-), "1C", a dash (-), six numbers, a dash (-), and "10".
- Spanish government instituted a new system for firearm's serial numbering in 1995. This system incorporated the gunmaker/manufactuer code, weapon code, serial number sequence, and year of manufacturer.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter (1C) are the code for an air carbine/rifle, the next six numbers are the serial number sequence, and the last two numbers (10) are the year of manufacture.

Calibre

- "Cal. 4.5 (.177)" is usually marked on the left side of the breech of the barrel.

FRT Report

Firearm Reference Number (FRN): 128314
Make: Gamo
Model: Shadow Express

Summary

Make:	Gamo
Model:	Shadow Express
Manufacturer:	Industrias El Gamo
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
128314 - 1	22 PELLET	1	457	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
128314 - 2	22 SHOT	1	457	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Gamo" is marked on the firearm.

Model

- "Shadow Express" is marked on the firearm.
- introduced in 2008.
- this firearm is sold as a air shotgun/air rifle combination which uses a chamber adapter to fire 22 calibre pellet or 22 calibre shot shell.
- the 22 calibre shot shell holds No. 9 lead shot.
- features include: blued smooth bore barrel with ventilated rib and bead front sight; two stage adjustable trigger; abidextrous Monte-Carlo style all weather synthetic pistol grip stock; grooved spring housing for the mounting of a scope and a manual safety inside the trigger guard, forward of the trigger.

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- break-barrel, spring-piston air gun.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the left side of the barrel.
- observed serial number consisted of number "04", a dash (-), "1C", a dash (-), six numbers, a dash (-), and "08".
- Spanish government instituted a new system for firearm's serial numbering in 1995. This system incorporated the gunmaker/manufacturer code, weapon code, serial number sequence, and year of manufacturer.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter (1C) are the code for an air carbine/rifle, the next six numbers are the serial number sequence, and the last two numbers (08) are the year of manufacture.

Notes

Make

- The company logo is marked on the firearm.
- "GAMO" is marked on the top of the receiver frame.
- "GAMO" is a trade name/trademark of "Industrias El Gamo".

Model

- "SHADOW WHISPER" is marked on the top of the receiver/frame.
- Features include: safety lever located within the trigger guard.

Manufacturer

- The company logo is marked on the firearm.
- "GAMO" is marked on the top of the receiver frame.
- "Industrias El Gamo" use the trade name/trademark "Gamo".
- "GAMO" trade name/trademark has been imported into the USA by "Gamo USA, Corp." of Ft. Lauderdale, Florida, and by "Stoeger Industries" of Wayne, NJ and by "Dynamite Nobel", "RWS Inc." of Closter, NJ and by "Daisy".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- Break open action. - Hinged barrel design. - Velocity is reported 381 mps or 1250 fps.
Serial Number	- The serial number is marked on the left side of the firearm.
Calibre	- The calibre designation is marked on the barrel.
Canadian Law Comments	- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed. - Discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Notes

Make

- "Gamo" is marked on the firearm.

Model

- "SILENT CAT" is marked on the firearm.
- introduced in 2009.
- this is a standard pattern, break-barrel, spring-piston air rifle.
- features include: fluted, polymer, bull barrel with a non-removable noise dampener (ND 52 system); fibre optic sights; two stage adjustable trigger; one piece synthetic thumb hole stock with Monte Carlo cheekpiece and ventilated black rubber buttpad; grooved spring housing for the mounting of a scope; manual safety inside the trigger guard, forward of the trigger.

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- break-barrel, spring-piston air rifle.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the left side of the barrel.
- observed serial number consisted of number "04", a dash (-), "1C", a dash (-), six numbers, a dash (-), and "09".
- Spanish government instituted a new system for firearm's serial numbering in 1995. This system incorporated the gunmaker/manufactuer code, weapon code, serial number sequence, and year of manufacturer.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter (1C) are the code for an air carbine/rifle, the next six numbers are the serial number sequence, and the last two numbers (09) are the year of manufacture.

Calibre

- calibre is marked on the side of the barrel.

Canadian Law Comments

- as it left the factory, this firearm is equipped with an integral sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada.
- when the sound suppressor/silencer (prohibited device) is removed from the firearm it would be correctly identified as a "Non Restricted Firearm".

136196 - 2	22 PELLET	1	457	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Gamo" is marked on the firearm.

Model

- introduced in 2011.
- "SILENT STALKER" is marked on the firearm.
- features include: round fluted polymer jacketed steel rifled barrel; receiver/frame is grooved for scope mounts; adjustable trigger; automatic safety; manual safety is located inside the trigger guard; ambidextrous black synthetic pistol grip stock with cheek piece and ventilated rubber recoil pad; black/blue finish.
- equipped with a 3-9X40 scope.
- overall length is 1092 mm (43.0"), and average weight of 3.24 kgs (7.15 lbs).
- "Silent Stalker" is also available in a version with a sound suppressor/silencer known as the Silent Stalker Whisper.

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- spring-piston powered, hinged barrel design.
- discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the receiver/frame.
- observed serial number consisted of number "04", a dash (-), "1C", a dash (-), six numbers, a dash (-), and "09".
- Spanish government instituted a new system for firearm's serial numbering in 1995. This system incorporated the gunmaker/manufactuer code, weapon code, serial number sequence, and year of manufacturer.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter (1C) are the code for an air carbine/rifle, the next six numbers are the serial number sequence, and the last two numbers (09) are the year of manufacture.

Notes

Make

- "Gamo" is marked on the firearm.

Model

- introduced in 2011.
- "SILENT STALKER WHISPER" is marked on the firearm.
- features include: round fluted polymer jacketed steel rifled barrel with ND52 sound suppressor/silencer, and fibre optic adjustable sights; receiver/frame is grooved for scope mounts; adjustable trigger; automatic safety; manual safety lever is located inside the trigger guard; ambidextrous black synthetic pistol grip stock with cheek piece and ventilated rubber recoil pad; black/blue finish.
- equipped with a 3-9X40 scope and mount.
- overall length is 1092 mm (43.0"), and average weight of 3.24 kgs (7.15 lbs).
- "Silent Stalker Whisper" is also available in a version without a sound suppressor/silencer known as the Silent Stalker.

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- spring-piston powered, hinged barrel design.
- discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the receiver/frame.
- observed serial number consisted of number "04", a dash (-), "1C", a dash (-), six numbers, a dash (-), and "09".
- Spanish government instituted a new system for firearm's serial numbering in 1995. This system incorporated the gunmaker/manufactuer code, weapon code, serial number sequence, and year of manufacturer.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter (1C) are the code for an air carbine/rifle, the next six numbers are the serial number sequence, and the last two numbers (09) are the year of manufacture.

Canadian Law Comments

- as it left the factory, this firearm is equipped with an integral sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada.
- when the sound suppressor/silencer (prohibited device) is removed from the firearm it would be correctly identified as a "Non Restricted Firearm".

- observed serial number consisted of number "04", a dash (-), "1C", a dash (-), six numbers, a dash (-), and "10".
- Spanish government instituted a new system for firearm's serial numbering in 1995. This system incorporated the gunmaker/manufactuer code, weapon code, serial number sequence, and year of manufacturer.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter (1C) are the code for an air carbine/rifle, the next six numbers are the serial number sequence, and the last two numbers (10) are the year of manufacture.

Canadian Law Comments

- as it left the factory, this firearm is equipped with an integral sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada.
- when the sound suppressor/silencer (prohibited device) is removed from the firearm it would be correctly identified as a "Non Restricted Firearm".

Notes

Make

- The company logo is marked on the receiver/frame.

Model

- "SPEEDSTER IGT 10X GEN2" is marked on the top of the receiver/frame.
- Features include: safety located within the trigger trigger guard ahead to the trigger; magazine storage located under the grip cap; may come equipped with a barrel shroud suppressor.
- Overall length with a 500 mm (19.7 inches) barrel is 1117 mm (44 inches) with the stock collapsed, average weight is 2.72 kg (6 lbs).

Manufacturer

- The company logo is marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- Hinged barrel design. - Compressed gas piston. - Velocity is reported 386 mps or 1266 fps. - Velocity is reported 268 mps or 879 fps. - Velocity is reported 150 mps or 495 fps.
Serial Number	- The serial number is marked on the left side of the firearm.
Calibre	- The calibre designation is marked on the barrel.
Shots	- Detachable rotary disc magazine.
Canadian Law Comments	- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed. - At least two variants of this particular model exist: Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport. Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

Firearm Reference Number (FRN): 199671
Make: Gamo
Model: Swarm Bone Collector

Summary

Make:	Gamo
Model:	Swarm Bone Collector
Manufacturer:	Industrias El Gamo
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
199671 - 1	22 PELLET	10	505	Prohibited CC 84(1) "prohibited device" para. (c)	Manufacturer Specifications and Commercial Customization	
199671 - 2	22 PELLET	10	505	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- The company logo is marked on the firearm.
- The company logo is comprised of a circle overlaid with the end of an arrow or sideways check mark pointing towards the front of the firearm depending on the side the logo is marked.
- "GAMO" is marked on the top of the receiver/frame.

Model

- Introduced in 2019.
- "SWARM BONE COLLECTOR" is marked on the top of the receiver/frame.
- "BONE COLLECTOR" refers to specialized image of an engraved, printed or branded on either the receiver/frame or stock, specifically: a set of bone antlers on the skull of a deer, whereby the antlers form a very loose outline/cradle for a human skull image complete with a hallow nose and eye sockets.
- Features include: safety located within the trigger guard.
- Different versions of this model exist with a minor changes to the profile and markings, which may include, but not be limited to any of the following configurations, all at the top of the barrel at the break barrel point:
- 1) "Swarm Bone Collector" or "Swarm Bone Collector G1" or Gen 1, with simple addition of an elevated magazine attachment whereby the magazine inserts vertically,
- 2) "Swarm Bone Collector" or "Swarm Bone Collector G2", G2i or Gen2 or GEN2i, plus a lowered profile design to the vertical magazine attachment, loads the magazine horizontally rather than vertically, is lighter, contains fibre optic sight options,
- 3) "Swarm Bone Collector" or "Swarm Bone Collector GEN3i", G3i or Gen3 or G3, plus a lowered profile design to the magazine attachment, is lighter, contains fibre optic sight options, uses exclusive "inertia" fed magazine which load horizontally rather than vertically.

Manufacturer

- The company logo is marked on the firearm.
- The company logo is comprised of a circle overlaid with the end of an arrow or sideways check mark pointing towards the front of the firearm depending on the side the logo is marked.
- "GAMO" is marked on the top of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- Compressed gas piston. - Hinged barrel design. - Velocity is reported 297.2 mps or 975 fps.
Serial Number	- The serial number is marked on the left side of the receiver/frame.
Calibre	- The calibre designation is marked on the barrel.
Shots	- Detachable rotary disc magazine.
Canadian Law Comments	- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed. - Discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

- Introduced in 2021.
- "SWARM BONE COLLECTOR GEN3i" is marked on the top of the receiver/frame.
- "BONE COLLECTOR" refers to specialized image of an engraved, printed or branded on either the receiver/frame or stock, specifically: a set of bone antlers on the skull of a deer, whereby the antlers form a very loose outline/cradle for a human skull image complete with a hallow nose and eye sockets.
- "i" refers to the inertia driven operation of the air rifle.
- Features include: safety located within the trigger guard.
- Different versions of this model exist with a minor changes to the profile and markings, which may include, but not be limited to any of the following configurations, all at the top of the barrel at the break barrel point:
- 1) "Swarm Bone Collector" or "Swarm Bone Collector G1" or Gen 1, with simple addition of an elevated magazine attachment whereby the magazine inserts vertically,
- 2) "Swarm Bone Collector" or "Swarm Bone Collector G2", G2i or Gen2 or GEN2i, plus a lowered profile design to the vertical magazine attachment, loads the magazine horizontally rather than vertically, is lighter, contains fibre optic sight options,
- 3) "Swarm Bone Collector" or "Swarm Bone Collector GEN3i", G3i or Gen3 or G3, plus a lowered profile design to the magazine attachment, is lighter, contains fibre optic sight options, uses exclusive "inertia" fed magazine which load horizontally rather than vertically.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- The company logo is marked on the firearm. - The company logo is comprised of a circle overlaid with the end of an arrow or sideways check mark pointing towards the front of the firearm depending on the side the logo is marked. - "GAMO" is marked on the top of the receiver/frame. - "GAMO" is marked on the left side of the receiver/frame.
Action	- Compressed gas piston. - Hinged barrel design. - Velocity is reported 335.3 mps or 1100 fps.
Serial Number	- The serial number is marked on the left side of the receiver/frame.
Calibre	- The calibre designation is marked on the barrel.
Shots	- Detachable rotary disc magazine.
Importer	- "GAMO USA" is marked on the left side of the receiver/frame.
Canadian Law Comments	- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed. - Discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Notes

Make

- "Gamo" and "Made in Spain" will be marked on the barrel and/or receiver/frame.

Model

- introduced in 2017.
- "Swarm Maxxim" is usually marked on the firearm.
- features include: muzzle break doubles as cocking handle and sound suppressor; checkered synthetic stock; rubber forearm grip; adjustable two stage trigger; receiver/frame is grooved for a scope mount; ventilated rubber butt plate with red line spacer; blued finish.
- overall length is 1152mm (45.3"), average weight is 3.01kg (5.64 lbs).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain. - Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy. - Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s. - Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s. - Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.
Action	- spring-piston powered. - in calibre 177 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
Serial Number	- serial number is marked on the left side of the barrel. - observed serial number consisted of number "04", a dash (-), "1C", a dash (-), six numbers, a dash (-), and "06". - Spanish government instituted a new system for firearm's serial numbering in 1995. This system incorporated the gunmaker/manufacturer code, weapon code, serial number sequence, and year of manufacturer. - serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter (1C) are the code for an air carbine/rifle, the next six numbers are the serial number sequence, and the last two numbers (06) are the year of manufacture.
Calibre	- the calibre designation is usually marked on the left side of the firearm.
Shots	- detachable rotary box magazine mounted on top of the receiver/frame
Canadian Law Comments	- as it left the factory, this firearm is equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada. - when the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". - note that removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer (prohibited device) including all internal parts, baffles, wipes, end caps, mounting hardware and the device body must be removed.

Model	- "URBAN .22" is marked on both sides of the receiver/frame. - Features include: adjustable cheek piece; textured pistol grip and fore-end; two-stage trigger; manual safety switch in the trigger guard in front of the trigger; right hand bolt handle; pressure meter on the front end of the air tank; barrel band.
Action	- Pre charged pneumatic.
Serial Number	- The serial number is usually marked on the right side of the receiver/frame.
Barrel	- The barrel length does not include any attached device such as flash-hider or muzzle brake.
Calibre	- The calibre designation is marked on the right side of the firearm. - "Cal .22" is marked on the right side of the receiver/frame.
Shots	- Detachable rotary disc magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada.

If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

Firearm Reference Number (FRN): 122611
Make: Gamo
Model: V3

Summary

Make:	Gamo
Model:	V3
Manufacturer:	Industrias El Gamo
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Air,Spring or Gas
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
122611 - 1	BB	15	108	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GAMO" is marked on the left side of the slide.

Model

- "V-3" is marked on the left side of the slide.
- features include: rifled steel barrel; slide cycles back and forth every time a BB is fired; receiver/frame mounted slide lock thumb safety; double action only trigger mechanism; skeletonized trigger; 15 BBs and the CO2 cylinder are housed in the detachable unit that fits in the grip; finger grooved combat style grips; three dot sight consisting of a fixed blade front sight and adjustable rear sight; receiver/frame has a rail for mounting a laser; all black or black and silver finish.

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- CO2 precharged cylinder.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the side of the slide.
- observed serial number consisted of number "04", a dash (-), "4C", a dash (-), six numbers, a dash (-) and "03".
- Spanish government instituted a new system for firearm's serial numbering in 1995. This system incorporated the gunmaker/manufactuer code, weapon code, serial number sequence, and year of manufacturer.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter (4C) are the code for an air pistol, the next six numbers are the serial number sequence, and the last two numbers (08) are the year of manufacture.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- "BB Cal 4.5MM 177" is usually marked on the left side of the slide.
Shots	- detachable box type magazine, that hold the BB's and CO2 cylinder.

- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- break-barrel, spring-piston air rifle.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the left side of the barrel.
- observed serial number consisted of number "04", a dash (-), "1C", a dash (-), six numbers, a dash (-), and "06".
- Spanish government instituted a new system for firearm's serial numbering in 1995. This system incorporated the gunmaker/manufactuer code, weapon code, serial number sequence, and year of manufacturer.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter (1C) are the code for an air carbine/rifle, the next six numbers are the serial number sequence, and the last two numbers (06) are the year of manufacture.

Calibre

- the calibre is marked on the firearm.

Firearm Reference Number (FRN): 182649
Make: Gamo
Model: Wasp Maxxim

Summary

Make:	Gamo
Model:	Wasp Maxxim
Manufacturer:	Industrias El Gamo
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
182649 - 1	177 PELLET	1	454	Prohibited CC 84(1) "prohibited device" para. (c)	Manufacturer Specifications and Commercial Customization	
182649 - 2	177 PELLET	1	454	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GAMO" is marked on the top of the receiver/frame, on the grip cap and the buttstock.

Model

- "WASP MAXXIM" is marked on the top of the receiver/frame.
- features include: vented muzzle break/air stripper; no iron sights; polymer jacketed, round fluted rifled barrel fitted with an intergrated silencer; front hinged cylindrical receiver/frame with a groove for a scope mount; two stage adjustable trigger mechanism; manual safety mounted inside the trigger guard; black synthetic one piece pistol grip stock with cheeckpiece and recoil pad; black finish.

Manufacturer

- "GAMO" is marked on the top of the receiver/frame, on the grip cap and the buttstock.
- "MADE IN SPAIN" is usually marked on the firearm.
- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- spring-piston powered, hinged barrel design.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the left side of the barrel block.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel	- barrel length does not include the muzzle break/air stripper.
Calibre	- calibre is marked on the left side of the barrel block.
Canadian Law Comments	- as it left the factory, this firearm is equipped with an integral sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada. - when the sound suppressor/silencer (prohibited device) is removed from the firearm it would be correctly identified as a "Non Restricted Firearm".
Other Markings	- "MADE IN SPAIN" is marked on the right side of the barrel block.

Notes

Make

- "Gamo" is marked on the firearm.

Model

- "WHISPER" is marked on the firearm.
- introduced in 2007.
- this is a standard pattern, break-barrel, spring-piston air rifle.
- features include: fluted, polymer, bull barrel with a non-removable noise dampener (ND 52 system); fibre optic sights; two stage adjustable trigger; one piece wood or synthetic pistol grip stock with Monte Carlo cheekpiece and ventilated black rubber buttpad; grooved spring housing for the mounting of a scope; manual safety inside the trigger guard, forward of the trigger.
- also available in a Deluxe and thumb hole stock version.

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- break-barrel, spring-piston air rifle.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the left side of the barrel.
- observed serial number consisted of number "04", a dash (-), "1C", a dash (-), six numbers, a dash (-), and "07".
- Spanish government instituted a new system for firearm's serial numbering in 1995. This system incorporated the gunmaker/manufactuer code, weapon code, serial number sequence, and year of manufacturer.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter (1C) are the code for an air carbine/rifle, the next six numbers are the serial number sequence, and the last two numbers (07) are the year of manufacture.

Calibre

- calibre designation is marked on the barrel.

Canadian Law Comments

- as it left the factory, this firearm is equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada.
- when the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm".
- note that removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer (prohibited device) including all internal parts, baffles, wipes, end caps, mounting hardware and the device body must be removed.

Notes

Make - "GAMO" is marked on both sides of the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- Introduced in 2013. - "WHISPER FUSION" may be marked on the firearm. - Variations of this model occur based on firearm configurations, which may seem to change the model name by tagging or adding features as per advertisements or packaging information. Model name variations indicate the type of configuration/technology contained within the firearm without appearing as part of the model name on the firearm. - "IGT Mach 1" refers to "Inert Gas Technology", specific to the gas piston used to replace the standard spring power. This feature significantly increases the velocity the firearm produces. - "CAT" refers to "Custom Action Trigger" technology, which permits the adjustment of trigger pull. - "RRR" refers to "Recoil Reducing Rail", technology which assists to absorb the recoil and reduce stress to the scope. - "WHISPER" refers to "Noise Reduction", definite and significant noise reduction based on size of pellet. - Overall length with a 520 mm (20.5 inches) barrel is 1067 mm (42 inches), average weight is 3.0 kg (6.61 lbs).
Manufacturer	- "GAMO" is marked on the firearm in various places. - The company logo is marked on the firearm.
Action	- Break open action.
Serial Number	- The serial number rationalization is unknown.
Canadian Law Comments	- Discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules. - This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

Notes

Make

- "FCA. DE. ARMAS GARANTIZADAS" over "1924 MODEL" or "1924 - EIBAR" is marked on the barrel.

Model

- "1924 MODEL" or "1924 - EIBAR" is marked on the barrel.
- this firearm is based on the Colt Police Positive model from circa 1924.
- this firearm features a unique cylinder release button mounted on the left side of the receiver/frame in front of the cylinder.
- features include: fixed sights; round tapered barrel; solid top receiver/frame with left side swing-out fluted cylinder and unshrouded ejector rod; exposed spurred hammer; single/double action trigger mechanism; checkered rubber or wood grip panels; blued finish.

Manufacturer

- "OV" may be marked on the firearm.
- "OV" is the abbreviation for "Ojanguren y Vidosa".

Serial Number

- serial number is marked on the bottom of the butt.
- observed serial number consisted of five numbers without a letter prefix or suffix.

Calibre

- calibre is marked on the barrel.

Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
109135 - 1	38 LONG COLT	6	127	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Ojanguren Y Marcaide" trademark logo and "FCA. DE. ARMAS GARANTIZADAS" is marked on the barrel.
- "Ojanguren Y Marcaide" logo consists of the the letters "O", and a "M" overlaping each other within a circle with "TRADE" marked above the circle and "MARK" marked below the circle.

Model

- this revolver was made in the 1920s.
- model designation is not marked on this model.
- this model looks similiar to the Colt Police Positive with the cylinder release button located behind the cylinder on the left side of the receiver/frame above the grip, and the cylinder release looks like a large round button..
- features include: fixed sights; round rifled barrel; unshrouded ejector rod may be supported or unsupported at the front; solid top receiver/frame with left side swing-out fluted cylinder; cylinder turns counter clockwise; cylinder release is located behind the cylinder on the left side of the receiver/frame; exposed spurred or bobbed hammer; double/single action trigger mechanism; checkered grip panels; blued finish.
- four proof marks may be marked on the left side of the receiver/frame and barrel in front of the cylinder. A "X" within a sheld and a crown on top of the sheild, a"PN", and two lions standing on their hind legs.

Manufacturer

- the manufacturer's trademark logo may be marked on the barrel or the receiver/frame as the letters "O", and a "M" overlaping each other within a circle with "TRADE" marked above the circle and "MARK" marked below the circle.
- the receiver/frame may be marked "MADE IN SPAIN".
- "Ojanguren Y Marcaide (OM)" was located on Eibar, Spain and manufactured firearms from the early 1890s until the 1930s.

Serial Number

- serial number is marked on the butt of the receiver/frame.
- observed serial number consisted of five numbers without a letter prefix or suffix.

Calibre

- the calibre designation is normally marked on the barrel.
- the markings on these firearms may vary.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- swing-out cylinder.
Other Markings	- the barrel or the receiver/frame may be marked "FCA. DE ARMES GARANTIZADAS". Garantizada is a trade name and not the manufacturer of the firearm.

Notes

Make

- "GARATE ANITUA & CIA - EIBAR (ESPANA)" was observed marked on the barrel.

Model

- model designation is not marked on the firearm.
- this is a double-action revolver that very closely resembles a Colt Police Positive, complete with a thumb-latch at the rear of the cylinder (unlike this company's "Cosmopolite Oscillatory", which also resembles a Colt Police Positive, but the cylinder of which is locked solely with the ejector-rod.)
- features include: fixed sights; blued finish; knurled ejector-rod finial and thumb-latch; a lanyard ring on the butt and checkered wooden grips.

Manufacturer

- "GARATE ANITUA & CIA - EIBAR (ESPANA)" was observed marked on the barrel.

Action

- double-action revolver.

Serial Number

- numbered on the butt, the serial number is also repeated on other components.
- examined example bore a five-digit serial number.

Notes

Make

- "GARATE ANITUA & Cia - EIBAR (ESPANA)" may be marked on the barrel.

Model

- manufactured for the French Army from 1915 to 1916.
- "EL LUNAR" is usually marked on the barrel.
- this is a double-action revolver based on the Colt Police Positive, but with a more vertical grip-frame, to more closely resemble the French Mle 1892 Lebel service revolver; these revolvers were manufactured during the middle of World War One to provide additional revolvers for the French military.
- features include: blued finish; round barrel; fixed open blade and groove sights; six-shot fluted cylinder; Colt-style cylinder latch on the left side of the frame; double-action trigger mechanism with spurred hammer; checkered walnut grips on a square-butt grip frame; and a lanyard ring at the butt.

Manufacturer

- "GARATE ANITUA & Cia - EIBAR (ESPANA)" may be marked on the barrel.

Action

- double-action revolver.

Notes

Make

- "Garate Anitua y Cia Eibar Espana" or a variation thereof is usually marked on the top of the barrel rib.
- "Garate Anitua y Cia's" logo of a "GAC" monogram, inside a "U" shaped snake, is marked on the right side of the receiver/frame.
- "Garate Anitua y Cia's" logo of the stylized letters "GAC" monogram is marked on both of the grip plates.

Model

- model designation is not marked on the firearm.
- introduced in 1915.
- similar to the S&W .44 Double Action Frontier.
- produced for the British Army during World War I with the official British designation of "Pistol OP No 1 MARK 1". References are conflicting as to the meaning of OP. It may be either Old Pattern or Ordnance Pattern.
- features include: fixed sights; round ribbed barrel; front hinged receiver/frame with fluted cylinder and no sideplate; exposed spur hammer; single/double action trigger mechanism; checkered bird's head grip panels; lanyard ring.
- the OP No1 MARK I model is similar in all features with the OP No2 MARK I with the exception of the shorter, horn or hard rubber, grip panels that are mounted approximately 1 cm above the bottom of the grip frame.

Manufacturer

- "Garate Anitua y Cia Eibar Espana" or a variation thereof is usually marked on the top of the barrel rib.
- "Garate Anitua y Cia's" logo of a "GAC" monogram, inside a "U" shaped snake, is marked on the right side of the receiver/frame.
- "Garate Anitua y Cia's" logo of the stylized letters "GAC" monogram is marked on both of the grip plates.

Action

- double action, top break.

Serial Number

- serial number is usually marked on the backstrap of the firearm.
- serial number on one example was marked on the right side of the receiver/frame under the grip panel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - early production may have no British military acceptance markings or be marked on the receiver/frame, cylinder and barrel with a crown over a "V" or "BV" and also may be marked with the broad arrow.

Notes

Make	- "GARATE ANITUA & CIA" is marked on the left side of the slide.
Model	- "PISTOLA AUTOMATICA" is marked on the left side of the slide. - model was manufactured circa 1915. - this is a typical Eibar pattern, blowback operated, semi automatic handgun with an external appearance similar to early 1900's FN-Browning models. - features include: hammerless design; vertical striations at the rear of the slide; slide lock lever on the left side of the receiver/frame forward of the grip panel; no grip safety; fixed front sight and notched rear sight; magazine release in the heel of the butt and a lanyard ring.
Manufacturer	- "GARATE ANITUA & CIA - EIBAR (ESPANA)" is marked on the left side of the slide. - "GA" in a circle may be marked on the receiver/frame, this is the identifier for "Garate Anitua".
Action	- blowback operated.
Serial Number	- serial number is marked on the left side of the receiver/frame and/or slide.
Calibre	- the calibre designation is marked on the left side of the slide.
Shots	- detachable box magazine housed in the grip.

Notes

Make

- "Garate Anitua y Cia Eibar Espana" or a variation thereof is usually marked on the top of the barrel rib.
- "Garate Anitua y Cia's" logo of a "GAC" monogram, inside a "U" shaped snake, is marked on the right side of the receiver/frame.
- "Garate Anitua y Cia's" logo of the stylized letters "GAC" monogram is marked on both of the grip plates.

Model

- model designation is not marked on this firearm.
- this handgun is bascially a copy of the Smith & Wesson, double action, top break, automatic ejecting revolver.
- features include: blade front sight and fixed rear sight; round barrel with a solid top rib; front hinged receiver/frame with a fluted cylinder; break open action release is mounted on the rear of the top strap; exposed spur hammer; double/single action trigger mechanism; lanyard ring; black plastic grip plates; blue or nickel plated finish.

Manufacturer

- "Garate Anitua y Cia Eibar Espana" or a variation thereof is usually marked on the top of the barrel rib.
- "Garate Anitua y Cia's" logo of a "GAC" monogram, inside a "U" shaped snake, is marked on the right side of the receiver/frame.
- "Garate Anitua y Cia's" logo of the stylized letters "GAC" monogram is marked on both of the grip plates.

Action

- double action, top break.

Serial Number

- serial number is usually marked on the bottom of the grip strap.
- serial number may consisted of one to six numbers without a letter prefix or suffix.

Calibre

- known example had the calibre designation marked on the left side of the receiver/frame above the trigger as, "38 CAL".

Notes

Make

- usually marked on the firearm.

Model

- model designation is not marked on the firearm.
- this is a generic entry for those William Garden side by side shotguns that are not identifiable as to model.
- features may include:
- external or internal hammers.
- double, or single trigger, with or without barrel selector.
- sidelock or box lock.
- top, side, or push button opening lever.
- finishes, and engraving may vary widely.
- hardwood stock, pistol grip, semi pistol grip, or straight English style.

Manufacturer

- William Garden's firm was established in Aberdeen, Scotland in 1867.
- William Garden was in business from 1867 to 1968.
- William Garden was located at 34 Summer Street from 1868 to 1869, 2 Belmont Street from 1869 ro 1872, 112 1/2 Union Street from 1872 to 1935, and 216 Union Street from 1937 to 1968.
- William Garden's business was acquired by John Dickson of Edinburgh, Scotland.

Action

- side by side barrel configuration.

Serial Number

- serialization unknown.
- will usually be marked on the water table of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- calibre may be stamped on the barrel flats.
- example:
- barrel flats may be stamped with 12 and/or 2 3/4" over 70; or 12 and/or 2 1/2 " over 64: chamber lengths in both metric and/or Imperial.

FRT Report

Firearm Reference Number (FRN): 118491
Make: Gardner
Model: Two Barrel Gardner Gun

Summary

Make:	Gardner
Model:	Two Barrel Gardner Gun
Manufacturer:	Pratt & Whitney
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
118491 - 1	45-70 GOVT	N/A	707	Prohibited CC 84(1) "prohibited firearm" para. (c)	Non-Commercial Customization	

Notes

Make

- may not be marked "Gardner".
- invented in 1874 by William Gardner of Toledo Ohio, U.S.A.

Model

- usually not marked with model designation.
- this firearm is characterized by two barrels mounted side by side, about 32 mm / one and one-quarter inches apart, a large rectangular receiver/frame with an activating hand-crank on the right side, cartridges fed from a paired de-mountable vertical feed guide on the top forward receiver/frame.
- the clock wise rotation of the hand-crank sequentially activates a pair of cams and levers, phased 180 degrees to each other, each set of cams and levers dedicated to one of the two barrels: on the initial half rotation of the hand-crank, the first set picks up a cartridge, feeds it to the chamber, locks, cocks and fires the cartridge; the other set unlocks, primary extracts, final extracts, ejects the spent cartridge case, and prepares to pick up a fresh cartridge. On the second half-rotation the first set unlocks, extracts, and ejects the spent cartridge casing; while the second set feeds, locks, cocks and fires a fresh cartridge.
- Do not confuse with the Single Barrel Gardner Gun with one set of cams and levers, which operates in a similar manner.

Manufacturer

- apart from the hand built original gun built in 1874, these firearms were manufactured by Pratt & Whitney.

Action

- manual hand-crank operation.

Serial Number

- serial numbering of these is not known: no number was found on the specimen examined.

Calibre

- the 1885 manual for this firearm names the cartridge as ".45 Government".

Shots

- the feeder-guides can be loaded with additional cartridges as the firearm is being fired.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks - activation of this firearm is entirely dependent on manual cranking of the handle: the rate of fire may be varied by the rate at which the handle is rotated.

Notes

Make

- "W GARDNER GENEVA" is usually marked on the firearm.
- William Gardner was a gunsmith active in Geneva, New York, during the mid-1800s, known for his percussion hunting guns.

Model

- the model is not marked on the firearm; this is a description of the firearm type.
- this is a percussion hunting rifle manufactured by William Gardner prior to 1882.
- these rifles may be seen in side-hammer or "mule-ear" ignition styles (some with pill-lock, rather than percussion-cap ignition).
- features may include: browned or blued finish; open fixed sights; octagonal barrel; under barrel ramrod thimbles; full- or half-length straight-grip walnut stock with brass or German silver finishings; external manually-cocked hammer on the lock plate; finial trigger-guard/grip strap; and a crescent butt.

Manufacturer

- "W GARDNER GENEVA" is usually marked on the firearm.
- William Gardner was a gunsmith active in Geneva, New York, during the mid-1800s, known for his percussion hunting guns.

Notes

Make

- the make is marked on the receiver/frame.

Model

- "M134G Minigun" may not be marked on the firearm.
- "M134G Minigun" is an electrically-powered, multi-barreled machine gun based on the "Gatling Gun" concept.
- "M134G Minigun" has a high rate of fire between 3000 and 4000 rounds per minute.
- "M134G Minigun" is employed in the land, air and sea environment as a fire support weapon.
- features include: rotating six barrel cluster group; six rotating gun bolts; gun housing; feeder/delinker; clutch assembly; gun control unit and spade grips; ac or dc electric motor, gear head and drive unit to rotate the barrel cluster; feed chute to contain and direct linked belt of ammunition.
- also built in a "hybrid" ("M134GH") version with titanium and stainless-steel components to reduce wear and weight.
- overall length of 749mm and average weight of 16 kgs.

Manufacturer

- the manufacturer is marked on the receiver/frame.

Action

- this is an electrically-powered, multi-barrelled machine gun of the "Gatling" or "Minigun" type.

Serial Number

- serial number is marked on the receiver/frame.

Shots

- belt-fed firearm.

Notes

Make

- "L. GASSER" over "WIEN" or "L. GASSER" over "PATENT" or "L. GASSER" over "PATENT" over "WIEN" is usually marked on the left side of the firearm.
- "Leopold Gasser" patent revolvers were manufactured by Leopold Gasser and numerous small Austrian and Belgian companies.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- 1870 model was manufactured from 1869 to approximately 1882.
- 1870 model was a center-fire revolver issued to the military service of the Austro-Hungarian Empire starting in 1870.
- 1870 model used the Lefaucheux double action trigger mechanism.
- features include: fixed sights; round barrel; barrel assembly and manual ejector rod is attached to the bottom of the receiver/frame by a screw; open top wrought iron receiver/frame with a right side loading gate and fixed non-fluted cylinder; exposed spur hammer; double/single action trigger mechanism; round trigger guard; round trigger guard; round "Broom-Handle" style grip strap with a lanyard ring loop; checkered wood grip plates.
- Gasser military models:
- 1869 model was used by the Serbian military from 1869 to 1919.
- 1869 model had an open top wrought iron receiver/frame with a non-fluted cylinder.
- 1870 model was used by the Montenegran military from 1870 to 1919.
- 1870 model had an open top wrought iron receiver/frame with a non-fluted cylinder.
- 1870/74 model had an open top steel (Gussstahl) receiver/frame with a fluted cylinder and a right side swing-out ejector rod assembly.
- 1873 model had a solid top receiver/frame with a fluted cylinder and a right side swing-out ejector rod assembly.
- 1874 model had an open top receiver/frame and the right side swing-out ejector rod assembly of the 1874 model.
- 1877 and 1879 models had a front hinged receiver/frame with a non-fluted cylinder, automatic extraction/ejection and a single break open action release lever.
- 1880 model had a front hinged receiver/frame with a non-fluted cylinder, automatic extraction/ejection and a Pryse type dual break open action release levers.

Manufacturer

- Leopold Gasser's business was located in Vienna (Wien), Austria between 1862 and 1898.
- Leopold Gasser originally manufactured copies of Adams cap lock revolvers.
- Leopold Gasser's patent revolvers were adopted by the Austo-Hungarian Army in circa 1869.
- Leopold Gasser's trademark logo consisted of the letters "L.G." over an apple pierced by an arrow over "SCHUTZ MARKE".
- Leopold Gasser was born in 1836 and died in 1871.
- Leopold Gasser's business was taken over by his brother Johann Gasser.
- Johann Gasser was born in 1847 and died in 1896.
- Leopold Gasser's business was then run by Michael Gasser.
- Leopold Gasser's business manufactured more than 100,000 revolvers for the Austo-Hungarian Army between 1870 and 1884.
- "Rast & Gasser" was founded by August Rast and Michael Gasser.
- "Rast & Gasser" was in business from 1898 to 1918.

Serial Number

- serial number was observed marked on the left side of the receiver/frame.
- serial number observed consisted of six numbers without a letter prefix or suffix.

Other Markings

- markings: may be "L. Gasser, Wien, Patent, Ottakring".

Notes

Make

- "L. GASSER" over "PATENT" is marked on the left side in front of the cylinder.
- "Leopold Gasser" patent revolvers were manufactured by Leopold Gasser and numerous small Austrian and Belgian companies.

Model

- the model designation is not marked on the firearm.
- this is a version of the Gasser M1870 revolver manufactured for the Austro-Hungarian Navy (at a time when the Austro-Hungarian empire had access to the sea via the Adriatic) between 1870 and ~1876; this revolver differs from the Army version of the 1870 Gasser in having a Colt blackpowder/"Walker"-style locking wedge securing the barrel to the cylinder pin, instead of the Army-version thumbscrew into the bottom of the cylinder pin.
- features include: blued finish; round barrel; open fixed sights; open top, two-piece receiver/frame; rod ejector; hinged loading gate on the right side; single action/double action trigger mechanism; two piece checkered wooden grips; lanyard ring at the rounded butt.

Manufacturer

- Leopold Gasser's business was located in Vienna (Wien), Austria between 1862 and 1898.
- Leopold Gasser originally manufactured copies of Adams cap lock revolvers.
- Lepold Gasser's patent revolvers were adopted by the Austo-Hungarian Army in circa 1869.
- Leopold Gasser's trademark logo consisted of the letters "L.G." over an apple pierced by an arrow over "SCHUTZ MARKE".
- Leopold Gasser was born in 1836 and died in 1871.
- Leopold Gasser's business was taken over by his brother Johann Gasser.
- Johann Gasser was born in 1847 and died in 1896.
- Leopold Gasser's business was then run by Michael Gasser.
- Leopold Gasser's business manufactured more than 100,000 revolvers for the Austo-Hungarian Army between 1870 and 1884.
- "Rast & Gasser" was founded by August Rast and Michael Gasser.
- "Rast & Gasser" was in business from 1898 to 1918.

Action

- double-action revolver.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the left side of the receiver/frame, and repeated on other parts.
- serial number observed with five numbers without letter prefix or suffix.

Other Markings

- observed markings on the cylinder: a crown above two numbers (year of manufacture), over "KM", and over the serial number.
- may have also be regimentally marked.

Notes

Make

- Leopold Gasser's business was located in Vienna (Wien), Austria between 1862 and 1898.
- Leopold Gasser originally manufactured copies of Adams cap lock revolvers.
- Lepold Gasser's patent revolvers were adopted by the Austo-Hungarian Army in circa 1869.
- Leopold Gasser's trademark logo consisted of the letters "L.G." over an apple pierced by an arrow over "SCHUTZ MARKE".
- Leopold Gasser was born in 1836 and died in 1871.
- Leopold Gasser's business was taken over by his brother Johann Gasser.
- Johann Gasser was born in 1847 and died in 1896.
- Leopold Gasser's business was then run by Michael Gasser.
- Leopold Gasser's business manufactured more than 100,000 revolvers for the Austo-Hungarian Army between 1870 and 1884.
- "Rast & Gasser" was founded by August Rast and Michael Gasser.
- "Rast & Gasser" was in business from 1898 to 1918.

Model

- model designation is not marked on the firearm.
- "PATENT RAST & GASSER WIEN" is marked on the left side in front of cylinder.
- 1870/74 model was manufactured from 1874 to approximately 1882.
- these pistols were assembled by Rast & Gasser from receiver/frame manufactured by Gasser.
- 1870/74 model was a center-fire revolver issued to the military of the Austro-Hungarian Empire.
- 1870/74 model used the Lefaucheux double action trigger mechanism.
- "GUSS STAHL" or "GUSS-STAHL" or "GUSSSTAHL" may be marked on the left side of the barrel assembly.
- "Guss Stahl/Guss-Stahl/Gussstahl" denotes "cast steel".
- features include: round barrel with fixed sights; barrel assembly and swing-out manual ejector rod is attached to the bottom of the receiver/frame by a screw; swing-out manual ejector is usually located beneath the barrel and swings-out to the right to eject the cartridges from the cylinder; open top steel receiver/frame with a right side loading gate and fixed unfluted cylinder; exposed spur hammer; double action trigger mechanism; round trigger guard; round "Broom-Handle" style grip strap with a lanyard ring loop; checkered wood grip plates.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "PATENT RAST & GASSER WIEN" is marked on the left side of the firearm.
- letters "L.G." over an apple pierced by an arrow over "SCHUTZ MARKE" is marked on the left side of the receiver/frame.
- these pistols were assembled by Rast & Gasser from receiver/frame manufactured by Gasser, these pistols bear markings from both companies.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- serial number of a referenced example six numbers without letter prefix or suffix.

Notes

Make

- "L. GASSER" over "WIEN" or "L. GASSER" over "PATENT SYSTEM" or "L. GASSER" over "PATENT" over "WIEN" is usually marked on the left side of the firearm.
- "GUSSSTAHL" may be marked on the left side of the barrel assembly.
- "Gussstahl" is German for Cast Steel.
- "Leopold Gasser" patent revolvers were manufactured by Leopold Gasser and numerous small Austrian and Belgian companies.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "GASSER" over "SYSTEM" over "PATENT" over "NEU MODEL" over "WEIN" over the Gasser trademark of an "arrow through a heart", over "SCHUTZ MARKE" was observed marked on the left side of the barrel lug.
- "Neu Model" appears to be an improved 1870/74 model that featured extensive engraving, nickel plating and a longer barrel.
- 1870/74 model was manufactured from 1874 to approximately 1882.
- 1870/74 model was a center-fire revolver issued to the military of the Austro-Hungarian Empire.
- 1870/74 model used the Lefaucheux double action trigger mechanism.
- "GUSS STAHL" or "GUSS-STAHL" or "GUSSSTAHL" is usually marked on the left side of the barrel or receiver/frame.
- "Guss Stahl/Guss-Stahl/Gussstahl" denotes "cast steel".
- features include: round barrel with fixed sights; barrel assembly and swing-out manual ejector rod is attached to the bottom of the receiver/frame by a screw; swing-out manual ejector is usually located beneath the barrel and swings-out to the right to eject the cartridges from the cylinder; open top steel receiver/frame with a right side loading gate and fixed fluted cylinder; exposed spur hammer; double action trigger mechanism; round trigger guard; round "Broom-Handle" style grip strap with a lanyard ring loop; checkered wood grip plates.
- Gasser military models:
- 1869 model was used by the Serbian military from 1869 to 1919.
- 1869 model had an open top wrought iron receiver/frame with a non-fluted cylinder.
- 1870 model was used by the Montenegran military from 1870 to 1919.
- 1870 model had an open top wrought iron receiver/frame with a non-fluted cylinder.
- 1870/74 model had an open top steel (Gussstahl) receiver/frame with a fluted cylinder and a right side swing-out ejector rod assembly.
- 1873 model had a solid top receiver/frame with a fluted cylinder and a right side swing-out ejector rod assembly.
- 1874 model had an open top receiver/frame and the right side swing-out ejector rod assembly of the 1874 model.
- 1877 and 1879 models had a front hinged receiver/frame with a non-fluted cylinder, automatic extraction/ejection and a single break open action release lever.
- 1880 model had a front hinged receiver/frame with a non-fluted cylinder, automatic extraction/ejection and a Pryse type dual break open action release levers.

Manufacturer

- Leopold Gasser's business was located in Vienna (Wien), Austria between 1862 and 1898.
- Leopold Gasser originally manufactured copies of Adams cap lock revolvers.
- Lepold Gasser's patent revolvers were adopted by the Austo-Hungarian Army in circa 1869.
- Leopold Gasser's trademark logo consisted of the letters "L.G." over an apple pierced by an arrow over "SCHUTZ MARKE".
- Leopold Gasser was born in 1836 and died in 1871.
- Leopold Gasser's business was taken over by his brother Johann Gasser.
- Johann Gasser was born in 1847 and died in 1896.
- Leopold Gasser's business was then run by Michael Gasser.
- Leopold Gasser's business manufactured more than 100,000 revolvers for the Austo-Hungarian Army between 1870 and 1884.
- "Rast & Gasser" was founded by August Rast and Michael Gasser.
- "Rast & Gasser" was in business from 1898 to 1918.

Serial Number

- serial number was observed marked on the left side of the receiver/frame.
- observed serial number consisted of five numbers without a letter prefix or suffix.

Calibre

- centrefire. - 11 x 35.8mm R or 11.2mm Montenegrin Revolver cartridge.

Other Markings

- markings: may be "L. Gasser, Wien, Patent, Ottakring".

Type:	Handgun
Action:	Revolver
Country of Manufacturer:	AUSTRIA
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
16331 - 1	8MM GASSER	8	116	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "L. GASSER" over "PATENT" over "WIEN" is marked on the left side of the receiver/frame.

Model

- "L. GASSER" over "PATENT" over "WIEN" is marked on the left side of the receiver/frame.
- introduced in 1898.
- features include: blade front sight and a notch in the top strap for a rear sight; round barrel with manually operated ejector rod; solid top receiver/frame with a removable non-fluted cylinder and right side mounted swing down loading gate; firing pin is mounted in the receiver/ frame; left side plate of the receiver/frame swings out and to the rear to expose the lock works; exposed spur hammer; double/single action trigger mechanism; trigger guard is hinged at the front; checkered wood grip plates; metal butt cap with lanyard ring; blued finish.
- 1898 model has a grip safety.
- 1898 model has an Abadie-type loading gate which prevents movement of the hammer by disconnecting the trigger when the loading gate is open.

Manufacturer

- "Rast & Gasser" was founded by August Rast and Michael Gasser.
- "Rast & Gasser" was in business from 1898 to 1918.
- Leopold Gasser's business was located in Vienna (Wien), Austria between 1862 and 1898.
- Leopold Gasser originally manufactured copies of Adams cap lock revolvers.
- Lepold Gasser's patent revolvers were adopted by the Austo-Hungarian Army in circa 1869.
- Leopold Gasser's trademark logo consisted of the letters "L.G." over an apple pierced by an arrow over "SCHUTZ MARKE".
- Leopold Gasser was born in 1836 and died in 1871.
- Leopold Gasser's business was taken over by his brother Johann Gasser.
- Johann Gasser was born in 1847 and died in 1896.
- Leopold Gasser's business was then run by Michael Gasser.
- Leopold Gasser's business manufactured more than 100,000 revolvers for the Austo-Hungarian Army between 1870 and 1884.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the left side of the receiver/frame and may be repeated on the barrel, and cylinder.
- serial numbers observed consisted of two numbers without a letter prefix or suffix.
- serial numbers observed consisted of three numbers without a letter prefix or suffix.
- serial numbers observed consisted of four numbers without a letter prefix or suffix.
- serial numbers observed consisted of five numbers without a letter prefix or suffix.

Firearm Reference Number (FRN): 141048
Make: Gates, Frederick
Model: Webley No 2 The British Bull Dog

Summary

Make:	Gates, Frederick
Model:	Webley No 2 The British Bull Dog
Manufacturer:	Webley
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
141048 - 1	442 REV CF	5	60	Antique AFR, Section 1, para. 7	Manufacturer Specifications and Commercial Customization	

Notes

Make

- FREDK GATES" over "SAN FRANCISCO" was observed marked on the barrel.

- Frederick Gates was located at 14 London Street, Derby, England in 1863, 4 Market Head, Derby, England in 1869, Rotten Row circa 1870, and Market Place circa 1874.
- Frederick Gates emigrated to the United States of America circa 1875.
- Frederick Gates was located in San Francisco, California from 1876 to 1878, and Salinas, California from 1878 to 1898.

Model

- manufactured prior to 1879.
- "THE BRITISH" over "BULL DOG" was observed marked on the top strap of the receiver/frame.
- "WEBLEY'S" over "No 2" was observed marked on the left side of the receiver/frame.
- features include: fixed front sight and a groove in the top strap for a rear sight; ovate barrel; solid top receiver/frame with non-fluted cylinder; hinged loading gate on the right side of the receiver/frame; swing-out case ejector rod stored within the cylinder axis rod; exposed spur hammer; double/single action trigger mechanism; bird's head grip strap; checkered wood grip plates.
- NOTE: barrel is ovate and may have an unusual taper with the diameter at the muzzle end being greater in diameter than where the barrel meets the receiver/frame.

Manufacturer

- "WEBLEY'S" was observed marked on the front left side of the receiver/frame.
- "P. Webley & Son / Webley & Scott" trademark logo of a "Winged Bullet" over "W&S" is usually marked on the left side of the receiver/frame.

Serial Number

- serial number is marked on the left front side of the receiver/frame.

Notes

Make

- "GATLING BATTERY GUN" is marked on the identification plate, on top of the receiver/frame.
- "Gatling Gun" designation is derived for the name of the designer of the Revolving Battery Gun, "Richard Jordan Gatling".
- "Richard Jordan Gatling" was assigned patent number 36,836 on November 4, 1862 for a Revolving Battery Gun.
- "Richard Jordan Gatling" was born in 1818 and died in 1903.

Model

- "GATLING BATTERY GUN" over "PAT. NOVEMBER 4, 1862" is marked on a bronze plate attached to the top rear of the breech housing of the receiver/frame.
- "1862 Reproduction" is a reproduction of the "Revolving Battery Gun" of the 1862 patent of Richard Jordan Gatling.
- Features include: six powder coated finish barrel in a circular cluster; bronze, half circular front mount with a front sight; brass cylindrical main body and hopper feed mounted in a rectangular cradle; right side crank handle; aiming elevation was controlled by a rear mounted jack-screw; lateral adjustment was attained by moving the complete yoke assembly.

Manufacturer

- "The Battery Gun Company" is marked on the identification plate, on top of the receiver/frame.
- "The Battery Gun Company" produced Civil War re-enactment products and black powder guns since 1979.
- "The Battery Gun Company" is located in Metamora, Michigan U.S.A..
- "The Battery Gun Company" headquarters is located in Roseville, Michigan U.S.A..

Action

- Manually rotated barrel assembly.

Serial Number

- The serial number is marked on the top of the receiver/frame.
- Serial number of referenced examples consisted of four numbers.

Make

- Gatling Gun designation is derived for the name of the designer of this Revolving Battery Gun, Richard Jordan Gatling.
- Richard Jordan Gatling was born in 1818 and died in 1903.
- Richard Jordan Gatling was assigned patent number 36,836 on November 4, 1862 for a Revolving Battery Gun.
- Richard Jordan Gatling's first Revolving Battery Guns were built in 1862 at the Miles Greenwood Foundry & Machine Works of Cincinnati, Ohio, U.S.A..
- Richard Jordan Gatling's first six Revolving Battery Guns were destroyed by fire before they were delivered.
- Richard Jordan Gatling resumed production of the Revolving Battery Gun at the Cincinnati Type Foundry in 1863.
- Cincinnati Type Foundry manufactured thirteen Gatling Revolving Battery Guns from 1863 to 1865.
- Richard Jordan Gatling's Revolving Battery Gun production was moved to the Cooper Firearms Manufacturing Company in Philadelphia, Pennsylvania, U.S.A. in 1865.
- Cooper Firearms Manufacturing Company manufactured eight Revolving Battery Guns from 1865 to 1866.
- Richard Jordan Gatling's Revolving Battery Gun production was transferred to Colt's Patent Fire Arms Manufacturing Company, of Hartford, Connecticut, U.S.A. in late 1866.

- Gatling Gun Company was established at 24 ½ East Washington Street, Indianapolis, Indiana, U.S.A. in 1866.
- Gatling Gun Company was a sales arm of Colt's Patent Fire Arms Manufacturing Company.
- Gatling Gun Company was relocated to Hartford, Connecticut, U.S.A. in 1874.
- Gatling Gun Company's president was Richard Jordan Gatling until 1897.
- Gatling Gun Company ceased operations in 1909.
- Gatling Gun Limited/Gatling Arms & Ammunition Company Limited was located in Birmingham, England from 1888 to 1890.

- "GATLING BATTERY GUN" over "PAT. MAY 3, 1865" over "MANUFACTURED BY" over "COLT'S PT. FIRE ARMS MFG. CO." over "HARTFORD, CONN. U.S.A." was observed marked on a bronze plate attached to the top rear of the breech housing of the receiver/frame of a model 1866.
- "GATLING'S" over "BATTERY" over "GUN" over "PAT. NOV 4.1862" over "MAY 9.1865" over "FEB 28.1871" over "APR 9.1872" over "MADE BY COLTS'S PT. FIRE ARMS MFG CO HARTFORD, CONN U.S.A." was observed marked on an oval bronze plate attached to the top rear of the breech housing of the receiver/frame of a model 1874, 1875, and 1876.
- "GATLING GUN" over "PATENTED" on a round plate over "MODEL 1883" over "CAL. 45" and "MANUFD BY" over "Colts Pat. F.A. Mfg. Co." over "HARTFORD CONN." was observed marked on the receiver/frame of a model 1883.
- "GATLING GUN PATENTED" over "Manufactured by" over "Colt's Pt. F.A. Mfg. Co." over "HARTFORD, CONN. U.S.A." over "Model of 1903" over "Cal. .30" was observed marked on the receiver/frame of a model 1903.

Model

- "MODEL 1874" may be marked on the gun.
- "1874" model is a multi-barreled, trunnion mounted, rapid fire firearm.
- "1874" model has an exposed barrel cluster.
- "1874" model had a two-plane traverse mechanism allowing for both lateral and horizontal movement during discharge, a top-centre mounted forty round detachable steel magazine, continued use of the "Broadwell drum" and the sights were moved to the right side of the gun.
- "1874" model was chambered in calibre 45-70 GOVT.
- "1874" Army and Navy models had 813 mm (32") barrels.
- "1874" model was also introduced with 457 mm (18") barrels, which permitted various mounting possibilities.
- "1874" model with shorter barrels became known as the "camel gun", from advertising literature shown with the gun mounted atop a camel.
- features include: hand cranked, rotating, ten barrel cluster utilizing a top-centre mounted gravity feed straight, detachable box magazine or Broadwell drum; mounted on a yoke, and attached to any artillery type carriage, cavalry cart, tripod, or camel saddle; blued barrels; bronze cylindrical breech and main body with bolt access port; right side crank handle which passed through the gun body to engage a dual action cam on the left side for traversing capability; crank lock (safety); right side mounted adjustable rear sight, fixed front sight; some camel guns had a folding front sight; sighting elevation was controlled by a rear-mounted jack-screw; lateral adjustment was attained by moving the yoke assembly.
- Gatling guns were model designated by year, therefore if the year date was encountered, one would know the model.
- year of manufacture may be located on the breech of the firearm.
- overall weight of the 1874 model with 813 mm (32") barrels was approximately 93 kgs (205 lbs).
- overall weight of the 1874 camel gun version with 457 mm (18") barrels was approximately 61.2 kgs (135 lbs).

Manufacturer

- "MADE BY COLTS'S PT. FIRE ARMS MFG CO HARTFORD, CONN U.S.A." is usually marked on a cast oval bronze plate attached to the top rear of the breech housing of the receiver/frame.

Action

- hand crank operated, repeating action.

Serial Number

- serial number is marked on the right hand side of the receiver/frame, other parts may also marked with assembly numbers.
- each year started at # 1 and progressed sequentially.

Other Markings

- normally found with a plate with the Colt address and Gatling patent markings.

- Gatling Gun Limited/Gatling Arms & Ammunition Company Limited was located in Birmingham, England from 1888 to 1890.

- "GATLING BATTERY GUN" over "PAT. MAY 3, 1865" over "MANUFACTURED BY" over "COLT'S PT. FIRE ARMS MFG. CO." over "HARTFORD, CONN. U.S.A." was observed marked on a bronze plate attached to the top rear of the breech housing of the receiver/frame of a model 1866.
- "GATLING'S" over "BATTERY" over "GUN" over "PAT. NOV 4.1862" over "MAY 9.1865" over "FEB 28.1871" over "APR 9.1872" over "MADE BY COLTS'S PT. FIRE ARMS MFG CO HARTFORD, CONN U.S.A." was observed marked on an oval bronze plate attached to the top rear of the breech housing of the receiver/frame of a model 1874, 1875, and 1876.
- "GATLING GUN" over "PATENTED" on a round plate over "MODEL 1883" over "CAL. 45" and "MANUFD BY" over "Colts Pat. F.A. Mfg. Co." over "HARTFORD CONN." was observed marked on the receiver/frame of a model 1883.
- "GATLING GUN PATENTED" over "Manufactured by" over "Colt's Pt. F.A. Mfg. Co." over "HARTFORD, CONN. U.S.A." over "Model of 1903" over "Cal. .30" was observed marked on the receiver/frame of a model 1903.

Model

- "MODEL 1877" Bulldog was the first to have a standard production, full barrel enclosure. (the Navy had full barrel enclosure previous to this to retard salt water corrosion) This model also moved the hand crank to the rear of the firearm, directly mounted on the main shaft. This increased the rate of fire to 1000 rounds per minute. Standard configuration with eighteen inch barrels, this was a much smaller firearm and was typically mounted on a tripod. The gun had a two-plane traverse mechanism allowing for both lateral and horizontal movement during discharge, a top-centre mounted forty round detachable steel magazine.
- this model has an enclosed barrel cluster.
- features include: hand cranked, rotating, five or ten barrel cluster utilizing a top-centre mounted gravity feed straight, forty round detachable box magazine; mounted on a yoke, and typically a tripod, it also could be attached to any artillery type carriage, cavalry cart, or camel saddle; blued barrels now enclosed in a full bronze barrel enclosure, bronze cylindrical breech and main body with bolt access port; rear mounted crank handle ; adjustable spring tension mounts left and right provided traversing capability; crank lock (safety); jack screw for elevation adjustment; and fully adjustable right side mounted rear and front sights.
- Gatling guns were model designated by year, therefore if the year date was encountered, one would know the model.
- year of manufacture may be located on the breech of the firearm.
- overall weight of the .45-70 Gov't calibre gun with five, eighteen inch barrels was approximately 90lbs.

Manufacturer

- "MADE BY COLTS'S PT. FIRE ARMS MFG CO HARTFORD, CONN U.S.A." is usually marked on a cast oval bronze plate attached to the top rear of the breech housing of the receiver/frame.

Action

- hand crank operated, repeating action.

Serial Number

- serial number is marked on the receiver/frame casing near the right side trunnion.
- each year started at # 1 and progressed sequentially.

Calibre

- other calibres were available upon request.

Shots

- gravity feed detachable box-type magazine; other types of feed devices were also used.

Make

- Gatling Gun designation is derived for the name of the designer of this Revolving Battery Gun, Richard Jordan Gatling.
- Richard Jordan Gatling was born in 1818 and died in 1903.
- Richard Jordan Gatling was assigned patent number 36,836 on November 4, 1862 for a Revolving Battery Gun.
- Richard Jordan Gatling's first Revolving Battery Guns were built in 1862 at the Miles Greenwood Foundry & Machine Works of Cincinnati, Ohio, U.S.A..
- Richard Jordan Gatling's first six Revolving Battery Guns were destroyed by fire before they were delivered.
- Richard Jordan Gatling resumed production of the Revolving Battery Gun at the Cincinnati Type Foundry in 1863.
- Cincinnati Type Foundry manufactured thirteen Gatling Revolving Battery Guns from 1863 to 1865.
- Richard Jordan Gatling's Revolving Battery Gun production was moved to the Cooper Firearms Manufacturing Company in Philadelphia, Pennsylvania, U.S.A. in 1865.
- Cooper Firearms Manufacturing Company manufactured eight Revolving Battery Guns from 1865 to 1866.
- Richard Jordan Gatling's Revolving Battery Gun production was transferred to Colt's Patent Fire Arms Manufacturing Company, of Hartford, Connecticut, U.S.A. in late 1866.

- Gatling Gun Company was established at 24 ½ East Washington Street, Indianapolis, Indiana, U.S.A. in 1866.
- Gatling Gun Company was a sales arm of Colt's Patent Fire Arms Manufacturing Company.
- Gatling Gun Company was relocated to Hartford, Connecticut, U.S.A. in 1874.
- Gatling Gun Company's president was Richard Jordan Gatling until 1897.
- Gatling Gun Company ceased operations in 1909.
- Gatling Gun Limited/Gatling Arms & Ammunition Company Limited was located in Birmingham, England from 1888 to 1890.

- "GATLING BATTERY GUN" over "PAT. MAY 3, 1865" over "MANUFACTURED BY" over "COLT'S PT. FIRE ARMS MFG. CO." over "HARTFORD, CONN. U.S.A." was observed marked on a bronze plate attached to the top rear of the breech housing of the receiver/frame of a model 1866.
- "GATLING'S" over "BATTERY" over "GUN" over "PAT. NOV 4.1862" over "MAY 9.1865" over "FEB 28.1871" over "APR 9.1872" over "MADE BY COLTS'S PT. FIRE ARMS MFG CO HARTFORD, CONN U.S.A." was observed marked on an oval bronze plate attached to the top rear of the breech housing of the receiver/frame of a model 1874, 1875, and 1876.
- "GATLING GUN" over "PATENTED" on a round plate over "MODEL 1883" over "CAL. 45" and "MANUFD BY" over "Colts Pat. F.A. Mfg. Co." over "HARTFORD CONN." was observed marked on the receiver/frame of a model 1883.
- "GATLING GUN PATENTED" over "Manufactured by" over "Colt's Pt. F.A. Mfg. Co." over "HARTFORD, CONN. U.S.A." over "Model of 1903" over "Cal. .30" was observed marked on the receiver/frame of a model 1903.

Model

- "MODEL 1883" over "CAL. 45" was observed marked on top of the bronze breech housing.
- this is a multi-barreled, trunnion mounted, rapid fire firearm.
- this model has a barrels cluster enclosed in a tubular bronze barrel jacket to give an overall "cannon like" appearance.
- cartridges are fed from a top mounted Accles Drum; earlier models were fed by hopper, stick/strip, box magazine, or Broadwell drum.
- this model is often found mounted on a two wheeled field carriage (land service), or on a pedestal mount (sea service, or static defense).
- this is a hand crank operated firearm with a set of ten barrels revolving about a central axis, which successively loads each barrel with a cartridge from the top mounted "Accles Positive Feed Drum" (a flat sided doughnut shaped cartridge magazine), fires each barrel, extracts and ejects the spent cartridge casing; the firearm fires each of the ten barrels in succession with each complete rotation of the set of barrels.
- the mechanism of the Model 1883 was more robust than previous models, it had longer breech bolts to permit use of the Accles feed mechanism, rebounding firing pins and stronger wider extractors.
- the normal reduced ratio side crank could be detached and the crank fitted to the direct drive end shaft protruding from the rear of the firearm, which permitted the increase of the maximum cyclic rate of fire from approximately 800 RPM, to up to 1500 RPM.

Manufacturer

- "MADE BY COLTS'S PT. FIRE ARMS MFG CO HARTFORD, CONN U.S.A." may be marked on a cast oval bronze plate attached to the top rear of the breech housing of the receiver/frame.

Action

- hand crank operation.

Serial Number

- serial number was observed marked on the end of the right trunnion.
- observed serial number consisted of three numbers without a letter prefix or suffix.

Calibre

- "CAL. 45" is marked on top of the bronze breech housing.

Remarks

- the activation of this firearm is entirely dependent on manual cranking of the crank handle and requires neither energy from the recoil, nor energy from tapping gas pressure from the barrel: the rate of fire is adjusted by varying the speed of cranking of the handle.

FRT Report

Firearm Reference Number (FRN): 58559
Make: Gaulois
Model: Palm Pistol

Summary

Make:	Gaulois
Model:	Palm Pistol
Manufacturer:	Manufacture Francaise d'Armes & Cycles de St-Etienne (MF)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Other
Country of Manufacturer:	FRANCE
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
58559 - 2	8MM GAULOIS	5	51	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	
58559 - 1	8MM GAULOIS	5	63	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GAULOIS" is usually marked on the top of the barrel.
- also marked with the company logo comprising: a central two-ring bullseye, over two crossed cannons, vertically bisected by a arrow, and the letter "M" within the angle between the cannons to the left, and the letter "F" between the angle to the right.

Model

- manufactured from 1904 to 1913; named "Palm Pistol" for the mode of deployment.
- the pistol is "palmed" with the barrel facing forward, and squeezed against the telescoping palm-pad assembly: this causes the mechanism to pick up the top cartridge from the magazine, chamber and fire it; releasing the pressure results in the palm-pad to return back, extract and eject the spent casing, and lift the next cartridge into position for chambering.
- usually marked with the model number on the top receiver/frame, located just behind the top-ribbed barrel, ahead of the sliding ejection-port cover.
- models No. 1 through No. 6 differ in appointment detail and embellishment. Features include:
  model No. 1: blued polished metal, with checkered black ebonite grip-pad.
  model No. 2: lightly patterned, bright nickel plated, with checkered black ebonite grip-pad.
  model No. 3: lightly engraved, blued or nickel plated, with checkered "figured orange/brown wood" grip-pad (pre 1905), or "marbled Ebonite" (since 1905).
  model No. 4: "modele deluxe" artisticly chisel-engraved or damascened, with checkered "ivory" grip-pad (pre-1905); and "mother-of -pearl" (from 1905).
  model No. 4: "modele Extra" (1905 and 1906); gold in-laid inscriptions, artisticly chisel-engraved on both sides of the frame, and the visible portion of the squeeze handle;,in "foliage and gargoyle style"; with checkered "ivory" grip-pad (pre-1905); and "mother-of -pearl" (from 1905).
  model No. 5: "model de luxe", similar to model 4, except engraved in a floral style and gold inlaid; on both sides, top and bottom of the frame, barrel, ejection port cover, and the visible portion of the squeeze handle; with checkered "ivory" grip-pad.
  model No. 6: "model de grand luxe"; similar to model 5, except "each of the pieces are magnificently decorated by chisel

Manufacturer

- marked with a logo, either on the lower on the right side, or on the top of the receiver/frame within a circle "MANUFACTURE FRANCAISE D'ARMES ET CYCLES SAINT-ETIENNE".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- a repeating mechanical operation cartridge-magazine handgun, this is not an automatic fire machine gun.
Serial Number	- usually marked under the barrel, inside on the receiver/frame on the right, and on the inside of the right receiver/frame cover.
Calibre	- marked on top of the receiver/frame, between the barrel and the ejection port.
Shots	- internal Mauser-type magazine, loaded by removing the right frame cover-plate, which also exposes the mechanism.

FRT Report

Firearm Reference Number (FRN): 141133
Make: Gay, F
Model: Cane Gun

Summary

Make:	Gay, F
Model:	Cane Gun
Manufacturer:	Gay, F
Level:	Manufacturer Specifications and Commercial Customization
Type:	Other
Action:	Single-Shot
Country of Manufacturer:	FRANCE
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
141133 - 1	10MM	1	702	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "GAY" in an oval was observed on the breach.

Model

- model designation is not marked on the firearm.
- this is a single shot, single action, breech loading firearm made to resemble a cane or walking stick.
- Cane Guns are usually loaded either by pulling back on the handle, twisting and pulling the shaft of the cane or some variation thereof thus exposing the breech area and usually cocking the piece at the same time.
- features may include: round rifled or smooth bore barrel; trigger may be of the folding or button type; many variations of grip design may be encountered.

Manufacturer

- F. Gay was a can gun manufacturer located in Vincennes (Val de Marne), France circa 1926.

FRT Report

Firearm Reference Number (FRN): 143121
Make: Gazela
Model: Gazela 58

Summary

Make:	Gazela
Model:	Gazela 58
Manufacturer:	Kolarms
Level:	Converted Automatics
Type:	Rifle
Action:	Converted Automatic
Country of Manufacturer:	SLOVAKIA (SLOVAK REPUBLIC)
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
143121 - 1	7.62X39 RUSSIAN	5	390	Prohibited PFR, Part 1, para. 90(q)	Converted Automatics	
143121 - 2	7.62X39 RUSSIAN	30	390	Prohibited PFR, Part 1, para. 90(q)	Converted Automatics	

Notes

Make

- "GAZELA 58" was observed marked on the left side of the receiver/frame.

Model

- "GAZELA 58" is marked on the left side of the receiver/frame.
- "Gazela 58" is derived from a full automatic firearm, which has been altered to discharge one projectile with one pressure of the trigger, and has had the original markings altered or obliterated and has been remarked as a "Gazela 58".
- "Gazela 58" externally resemble the Kalashnikov model AK47 assault rifle; however, this firearm is not a member of the Kalashnikov family of firearms nor a Kalashnikov variant.
- "Gazela 58" is a variant or modified version of the CZ58 or "Puska VZ 58" (Rifle Model 1958) developed in Czechoslovakia for use by the Czech army.
- features include: hooded front sight and tangent rear sight; round, rifled barrel; short stroke gas piston is mounted above the barrel; flat sided machine steel receiver/frame with a sheet metal dust cover; tilting block locking system; striker fired; cocking handle is mounted on the right side of the breech block; detachable box magazine release lever is mounted behind the magazine well; safety/selector lever is mounted on the right side of the receiver/frame; composition wood or synthetic forearm, hand guard, pistol grip, and fixed buttstock; blued metal finish.
- overall length with a 390 mm barrel and a fixed buttstock is 845 mm, and the average weight is 2.91 kgs.

Manufacturer

- Kolarms s.r.o. is located in Kolarovo, Slovakia.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number is marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- "7.62x39" is marked on the right side of the receiver/frame.
Shots	- detachable box magazine.
Canadian Law Comments	- Gazela 58, firearm is derived from a full automatic firearm, the CZ VZ58, which has been altered to discharge one projectile with one pressure of the trigger and has had the original markings altered or obliterated and has been remarked as a Gazela 58.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
76891 - 1	12 GA X 2 3/4"	2	762	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "GECADO" is stamped inside a square ended diamond on the firearm.
- the "GeCaDo" trade name is derived from the first two letters in each of the founders name "Georg Carl Dornheim".
- "Gecado" was a trade name used by "G.C. Dornheim AG" of Suhl, Germany in the late 1930s.
- "Gecado" is a trade name used by "Dynamite Nobel" since 1959.
- "Gecado" is a trade name used by "Albrecht Kind" since 1960.
- "Gecado" is a trade name under which some Mayer & Grammelspacher air rifles are sold.

Model

- this is a generic entry for G.C. Dornheim side by side shotguns, with no model markings.
- hammer, or hammerless with a combination of single or double triggers.
- top, side, or push button opening lever.
- damascus, or steel barrels.
- boxlock, or sidelock configuration.
- "SPECIAL GEWEHR LAUF STAHL S.61 " and "GERMANY" may be stamped on top of barrel.

Action

- side by side configuration.

Serial Number

- it is unknown if all firearms in this model were serialised, if any, location of serial number usually found on water table, and/or underneath the barrels at the chamber area
- specimen observed with serial number located on water table, six numerical digits observed, but other combinations may exist.

Notes

Make

- known example had the name "Geco" within an elongated oval marked on the right side of the receiver ring.
- the "GECO" logo may also be a large "G" with "eco" sitting on the cross bar of the "G".
- "GECO" is a acronym, brandname, and trademark used by the "Gustav Genschow & Company, AG" of Germany prior to 1959.
- "GeCo" is derived from the first two letters in "Genschow" and "Company".
- "Geco" is a trade name used by "Dynamite Nobel" since 1959.

Model

- model designation is not marked on this firearm.
- this is a turn bolt operated, Mauser 98-type action, sporting rifle utilizing an internal box magazine.
- features may include: hardwood Monte Carlo style stock, full pistol grip with white line spacing on grip cap and forend and checkering; blued finish.

Manufacturer

- known example had the name "Geco" within an elongated oval marked on the right side of the receiver ring.
- "Gustav Genschow & Company AG" was a manufacturer and distributor of ammunition and firearms from the 1920s to 1959.
- the manufacturer had facilities in Alsadt, Berlin, Durlach, Hachenburg, Hamburg, Hamm, Koln, Koningsberg, Suhl, Wien, and Wolfartsweier.
- "Dynamite Noble" purchased the company in 1959.

Action

- turn bolt operated.

Serial Number

- known example had a four digit number without prefix or suffix marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - internal box magazine.

161531 - 1	44 PERCUSSION	1	953	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "JP GEMMER" is usually marked on the barrel.
- John Phlip Gemmer was a St. Louis, Missouri, gunsmith who bought Sam Hawken's gunshop in 1860, and continued the business until 1915.
- Gemmer both manufactured his own firearms and retailed the products of other gunmakers.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is a "Hawken"-styled percussion rifle made prior to 1898 by John P. Gemmer, of St. Louis, Missouri.
- features include: browned or blued finish; open fixed or adjustable sights; octagonal or half-round/half-octagonal barrel; under barrel ramrod thimbles; half-length straight-grip maple or walnut stock (some with brass or German silver finishings); external manually-cocked hammer on the lock plate; finial trigger-guard/grip strap; double-set triggers; and a crescent butt.

Manufacturer

- "JP GEMMER" is usually marked on the barrel.
- John Phlip Gemmer was a St. Louis, Missouri, gunsmith who bought Sam Hawken's gunshop in 1860, and continued the business until 1915.
- Gemmer both manufactured his own firearms and retailed the products of other gunmakers.

Action

- muzzle loaded percussion single-shot.

Notes

Make

- the make may not be marked on the firearm.

Model

- the model designation may not be marked on the firearm.
- this is one of a series of second-generation submachine guns designed after the Second World War by Toni & Zorzoli Giandoso, the brothers who designed the TZ-45 submachine gun; the Genar series of SMGs were made in a variety of different patterns, and were distinguished from one another by their overall lengths (the PM 410 is 410mm in overall length, the PM 440 is 440mm in overall length, etc.)
- features include: tubular pattern with a wooden half-shoulder stock; safety/selector switch on the bottom of the stock, behind the magazine well; a two-port muzzle brake; a peculiar barrel shroud consisting of a heavy coil spring wound around the barrel (also seen on the PM 440, PM 720, and PM 470); and fixed open sights.
- a similar submachine gun (only with an under-folding stock) was also built as the "PM 470".

Action

- blowback operated.

Shots

- detachable box magazine.
- this firearm uses the same magazines as the Beretta Model 12 submachine gun.

FRT Report

Firearm Reference Number (FRN): 148854
Make: General Dynamics
Model: M168

Summary

Make:	General Dynamics
Model:	M168
Manufacturer:	General Dynamics
Level:	Manufacturer Specifications and Commercial Customization
Type:	Cannon
Action:	Full Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
148854 - 1	20X102	N/A	1524	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- the make or logo thereof is marked on the cannon.
Model	- the model may or may not be marked on the cannon; "M168" was the model number assigned by the US military on the adoption of this particular cannon. - this is a version of the M61A1 aircraft cannon (seen mounted on many US fighter planes) produced as a ground-mount anti-aircraft weapon, with a lower rate of fire than the M61A1 (where the M61A1 fires at a rate of 6000 rpm, to increase hit probability, the M168 has a selectable rate of fire of either 1000 rpm or 3000 rpm.) - features include: parkerized finish; six-barrel rotating barrel cluster; an electrically-powered feed and firing system; and these cannon are normally seen on a wheeled mount with electro-optical sights and electrically-powered traverse and elevation controls to allow tracking an airborne target.
Manufacturer	- the manufacturer or logo thereof is marked on the cannon.
Action	- electrically powered with a rotating barrel cluster.
Serial Number	- numbered on the receiver/frame.
Shots	- belt fed.

128730 - 1	40X53MM	32	415	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GENERAL DYNAMICS" is usually marked on the receiver/frame.

Model

- introduced in 1981.
- the barrel is available with a variety of muzzle attachments and can be removed and replaced without any requirements for head space or timing adjustments.
- equipped with machine gun type flip up iron sights and is available with a variety of other optic sights.
- the Mk 19 is fitted with dual spade grips and cocking handle on the left and right side much like the 50 M2 Browning machine gun and is available with a variety of other fire-control systems such as an electric trigger pack for remote controlled firing,
- the standard mount is the M3 tripod (using the Mark 64 cradle/adapter for infantry use and is available with a variety of other mounts.
- fitted with a left side mounted ammunition box.

Manufacturer

- "GENERAL DYNAMICS" is usually marked on the receiver/frame.
- General Dynamics was established on April 24th 1952.
- General Dynamics was originally know as the Electric Boat Company.
- Electric Boat Company was established in 1899.
- Electric Boat Company was originally known as Holland Torpedo Boat Company.
- General Dynamics headquarters was located in Falls Church, Virginia, U.S.A. in 2011.
- General Dynamics was organized into four business groups in 2011:
- Aerospace,
- Combat Systems,
- Information Systems and Technologies, and
- Marine Systems.
- General Dynamics had numerous manufacturing facilities in Asia, Australia, Canada, Europe, Middle East, South America, and the United States of America in 2011.

Action

- blowback operated, belt fed automatic.
- fires from open bolt and uses advanced primer ignition.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- first developed around the 40X53mm M384 grenade, today the primary ammunition type is the 40X53mm M430 High Explosive,dual purpose (HEDP) round. - rifling characteristics: 24 grooves with 1 turn in 1.22m, right hand twist.
Shots	- 32 or 48 belted rounds in a detachable box.

Notes

Make

- GENERAL DYNAMICS is marked on the left side of the receiver/frame.
- "GENERAL DYNAMICS" located in Saco, Maine U.S.A..

Model

- RM277 is marked on the left side of the receiver/frame.
- "RM277" features a bull-pup design with full length, top accessory rails.
- "277" stands for the ammunition size, in Imperial measurement of the "6.8MM" calibre.

- Features include: forend with anchor points for accessory rails; cocking handle below the top optic rail; ambidextrous controls; ejection can switch from one side to the other.

Action

- Gas operated.
- Capable of full automatic fire.

Serial Number

- The serial number is marked on the left side of the receiver/frame.
- Serial number of a referenced example consisted of the number 277 followed by seven numbers.

Calibre

- 6.8MM is marked on the left side of the receiver/frame.
- The calibre designation is usually marked on the barrel assembly.
- "6.8MM" is the equivalent of ".277" in Imperial measurement.

Shots

- Detachable box magazine.

Firearm Reference Number (FRN): 91655
Make: General Electric
Model: GAU-2B/A

Summary

Make:	General Electric
Model:	GAU-2B/A
Manufacturer:	General Electric
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
91655 - 1	7.62MM NATO	N/A	559	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Model

- introduced in 1962.
- GAU-2A/B Minigun evolved from the 20mm Vulcan machine gun also developed and manufactured by General Electric for the US Military.
- GAU-2A/B model was the first of several Minigun models that fulfilled the US Military's requirement for an aircraft mounted machine gun with a high rate of fire in a rifle calibre.
- GAU-2A/B is a scaled down version of Richard J. Gatling's "Gatling Gun" originally introduced in 1862.
- GAU-2A/B is modified to operated with an external electric motor driving the full automatic action.
- features include:
- six barrels fixed around a central pivot that rotates counter clockwise when viewed from the breech end.
- each barrel has a bolt assembly and accomplishes through one rotation around the central pivot the internal functions required to achieve a cycle of operation.
- only one barrel fires at a time.
- although the firearm is powered by an external electric motor it does not have electrical ignition, rather ignition is achieved by mechanical firing pins.
- GAU-2A/B is capable of discharging 6,000 rounds per minute.

Manufacturer

- General Electric developed and manufactured Gatlings, Vulcans and Miniguns for the US Military. These models were used in various helicopters, aircraft and naval vessels.

Action

- six barreled, full automatic machine gun, driven by an external electric motor.

Serial Number

- serial number on observed sample consisted on four digits.

Shots

- several external magazine feed systems were developed utilizing linked or non-linked ammunition.
- observed sample featured an external magazine with a capacity of 2000 rounds.

Notes

Make

- General Electric developed and manufactured Gatlings, Vulcans and Miniguns for the US Military. These models were used in various helicopters, aircraft and naval vessels.
- "G.E. CO." is usually marked on the identification plate on the housing assembly.

Model

- the model is marked on the identification plaque.
- this is a lighter-weight, three-barrelled version of the six-barrelled M61A1 "Vulcan" 20x102mm aircraft cannon, manufactured to allow a wider range of mounting options, including detachable aircraft gun pods, and pintle, vehicle, or anti-aircraft mounts.
- this cannon operates through the use of an electric motor which spins the barrel cluster and drives the feed mechanism.
- features include: parkerized/phosphated finish; rotating three-barrel cluster; cylindrical receiver housing with various feed options usually including a flexible chute; and remote firing/operating controls with remote sights.

Manufacturer

- General Electric developed and manufactured Gatlings, Vulcans and Miniguns for the US Military. These models were used in various helicopters, aircraft and naval vessels.
- "G.E. CO." is usually marked on the identification plate on the housing assembly.

Action

- electrically powered multi-barrel "Gatling"-style.

Serial Number

- serial numbered on an identification plaque.

Shots

- belt fed firearm.

Notes

Make

- "GENERAL FIRE ARMS MANUFACTORY" was observed marked on the top of the barrel.
- "General Fire Arms Manufactory" was a trademark used by J.B. Ronge of Liege, Belgium.

Model

- "AUTOMATIC EXTRACTOR REVOLVER PATENT 86" was observed marked on the top of the barrel.
- this firearm resembles a Smith & Wesson model "Top Break 32 No 1 1/2 Double Action" revolver.
- features include: fixed sights; round barrel with rib; front hinged receiver/frame with fluted cylinder, automatic ejection and top strap mounted break open release; exposed spurred hammer; single/double action trigger mechanism; flat bottom grip strap with lanyard loop; checkered black hard rubber grip plates; nickel plated finish.

Manufacturer

- the outline of a "crown" over the letters "JB" over the letter "R" was observed marked on the left side of the receiver/frame.
- "JBR" is the initials of Jean Baptise Ronge.

Action

- front hinged receiver/frame, break open action.

Serial Number

- serial number was observed marked on the right side of the receiver/frame.
- observed serial number consisted of four numbers without a letter prefix or suffix.

Other Markings

- observed example has numerous Belgian type proof marks.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "GENESIS ARMS LLC" is marked on the left side of the receiver/frame. - "GENESIS ARMS LLC" is located in Coeur D'Alene, Idaho U.S.A.. - "GENESIS ARMS LLC" was established in 2014.
Model	- Introduced in 2019. - "GEN-12" is marked on the left side of the receiver/frame. - "GEN-12" is a magazine feed, semi-automatic pistol shotgun using the AR-10 platform receiver/frame. - "GEN-12" is available as a rifle variant. - The "GEN-12" is also available from the manufacturer with a threaded & removeable "HUX VENTUM 12K" suppressor. - Features include: reciprocating barrel; top accessory rail, free floating handguard; handguard with accessory rail anchor point; accessory rail flat top upper assembly; may have attached adjustable rear sight, folding sights or optical sight; reciprocating, right side cocking handle; pistol brace attachment/buttstock; synthetic pistol grip; matte black or colour finish.
Manufacturer	- "GENESIS ARMS LLC" is marked on the left side of the receiver/frame. - "GENESIS ARMS LLC" is located in Coeur D'Alene, Idaho U.S.A.. - "GENESIS ARMS LLC" was established in 2014.
Action	- Short-recoil operated.
Serial Number	- The serial number is marked on the left side of the receiver/frame. - The serial number of a referenced example consisted of one letter, followed by five digits.
Calibre	- "CAL MULTI" is marked on the left side of the receiver/frame. - The calibre designation is marked on the barrel assembly.
Shots	- Detachable box magazine.
Importer	- As of February 6th, 2024, Gravel Agency is the only factory authorized Law Enforcement distributor for "Genesis Firearms" in Canada.
Canadian Law Comments	- Prohibited by PFR, Part 1, para. 87. 87. The firearms of the designs commonly known as the M16, AR-10 and AR-15 rifles and the M4 carbine, and any variants or modified versions of them - other than one referred to in item 47, 49 or 50 of this Part. - This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm remains a "Prohibited Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), when removed will not change the "Prohibited Firearm" classification.

Notes

Make

- "GENEZ", "A. GENEZ", or "AG GENEZ" is usually marked on the firearm.
- August G. Genez was a gunsmith based in New York, New York, known for his percussion target and hunting guns during the mid-to-late 1800s.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is a percussion muzzle-loaded "schuetzen"-style target rifle.
- features include: a wide range of possible finishes and engraving styles, but usually blued with hexagonal barrel; a one-piece walnut butt (with varying degrees of carving, checkering, and inlay); micrometer adjustable peep sights (but may also be seen with adjustable open backup sights); single or double set triggers; an ornate filigree frame grip; and a butt with a cheek rest and hooked butt plate.
- may also be seen with an offhand palm rest.

Manufacturer

- "GENEZ", "A. GENEZ", or "AG GENEZ" is usually marked on the firearm.
- August G. Genez was a gunsmith based in New York, New York, known for his percussion target and hunting guns during the mid-to-late 1800s.

Action

- muzzle loaded percussion single-shot.

Barrel

- barrel lengths may vary.

Calibre

- calibres may vary.

Notes

Make

- "GENEZ", A. GENEZ", or "AG GENEZ" is usually marked on the firearm.
- August G. Genez was a gunsmith based in New York, New York, known for his percussion target and hunting guns during the mid-to-late 1800s.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is a side by side, side lock exposed-hammer pin-fire shotgun with an under-lever opening mechanism
- these shotguns normally had Damascus barrels, straight, English-style walnut stocks and forearms, with double triggers, and minimally-engraved side plates and receivers.

Manufacturer

- "GENEZ", A. GENEZ", or "AG GENEZ" is usually marked on the firearm.
- August G. Genez was a gunsmith based in New York, New York, known for his percussion target and hunting guns during the mid-to-late 1800s.

Action

- hinged breech side by side.

Barrel

- barrel lengths may vary.

Calibre

- gauges may vary.

129804 - 1	7.92X94 PANZERBUCHSE	1	613	Prohibited PFR, Part 1, para. 95(z.052)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is not marked on the firearm but is derived from the function of the firearm.

Model

- model designation is marked on the front top of the receiver/frame as "Gr B 39"; the letters stand for "Granatbuchse 39".
- this firearm is a World War II modification/conversion of the German Pz.B.39 anit-tank rifle into a Grenade-Launching rifle utilizing special 7.92/13MM Tankgewehr Blank cartridges.
- the conversion consisted of; shortening the original barrel and threading it to accept a cup-type grenade launcher base; removal of the original sights and replacing them with a special sighting system with preset graduations for range; bipod with extendable legs; wooden forearm of the PzB39 was removed; the butt was laterally offset to accommodate the new sighting system and strengthened by the insertion of a welded cross-member, this alteration prevented the butt from being folded.
- features include: single shot, dropping block design whereby the trigger housing and pistol grip assembly are swung down to expose the breech; carrying handle at the rear of the barrel; cup-type grenade launcher attached to the end of the barrel; blued finish.
- overall length is approximately 48"/ 1219 mm.
- weight is 23.15 lbs. / 10.5 kilos.

Manufacturer

- manufacturer's code letters "bnz" are marked on the front top of the receiver/frame.

Action

- dropping block type.

Serial Number

- observed examples have had a four or five digit number without prefix or suffix marked on the front top of the receiver/frame.

Calibre

- takes a special 7.92MM Blank cartridge to propel three different types of grenade.
- the standard weight grenade was propelled by a steel case 7.92MM Panzerbuchse blank cartridge closed at the mouth by crimping.
- the heavier grenade used a steel case 7.92MM Panzerbuchse wooden bulleted blank cartridge.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - observed examples have had the date of manufacture marked on the top front of the receiver/frame; two observed examples were dated 1941.

Notes

Make

- should be marked on the left side of the receiver, markings should read "Pz.B.38" PzB stands for Panzerabwehrbuchsen which means Antitank Rifle in German and it is also part of the model designation.

Model

- Introduced in 1938.
- should be marked on the left side of the receiver, markings should read "Pz.B.38" PzB stands for Panzerabwehrbuchsen which means Antitank Rifle in German and it is also part of the designation used in the make.

Manufacturer

- the manufacturer's code appears on the firearm as "936".
- German military practice during World War II was to mark the manufacturers name as an alpha or numeric code to conceal the actual name and location of the manufacturer.

Serial Number

- should be marked on the left side of the receiver/frame.
- serial number should not be confuised with the manufacturer code.
- EXAMPLE:
- Pz.B.38 is the model.
- 989 is the serial number.
- 936 is the manufacturer.
- 1940 is the date of manufacturer.

Calibre

- The calibre was introduced in 1938.

Notes

Make

- make is not marked on the firearm but is derived from the function of the firearm.

Model

- "Pz.B.39" is marked on the top of the receiver/frame; "Pz.B." is an abbreviation of "Panzerbuchse" or "tank rifle".
- this is a single-shot anti-tank rifle fielded by the German armed forces just prior to World War Two, and based on the earlier Pz.B. 38, which made more use of stamped and folded assemblies. These rifles were used operationally up until 1941, but, with the invasion of Russia, it was realized that they were largely obsolete and unable to penetrate the thicker armour of later-war tanks. As a result, most Pz.B.39s were collected and converted to Gr.B.39s, which used a blank cartridge to launch a shaped-charge grenade with sufficient penetration to knock out most Allied tanks of the time. The conversion of Pz.B.s to Gr.B.s involved shortening the barrel, adding a muzzle cup to accept a grenade, and adding a ranging sight calibrated to account for the looped trajectory of the lower-velocity grenade.
- features include: blued finish; muzzle brake with two side-slots; open sights with shielded front and rear sight with ranging cross-wires; wooden or stamped-metal forearm; a single-shot falling-block mechanism operated via the hinged pistol-grip (swinging the grip forward drops the breech-block); a rotating safety at the rear of the receiver/frame; and a side-folding buttstock having a thick folding butt pad.

Manufacturer

- manufacturer's code letters "bnz" are marked on the front top of the receiver/frame.

Action

- falling-block, single-shot.

Serial Number

- serial-numbered on the top and side of the receiver/frame.

121721 - 2	20X138B LONG SOLOTHURN	10	1306	Prohibited PFR, Part 1, para. 95(z.056)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is not marked on the firearm.

Model

- the model designation is marked on the firearm.
- "PzB 41" is an acronym for "Panzerbusche 1941", or "Anti-Tank Rifle, Model of 1941".
- the PzB 41 was developed from a Solothurn design in the late 1930s/early 1940s just as the then-issue PzB 39 was entering service, and it occurred to the German ordnance department that rifle-calibre anti-tank rifles were on the verge of obsolescence; as the various shaped-charge anti-tank weapons (Bazooka/Panzerfaust/etc.) were not yet on the drawing-board, they approved the PzB 41 for production.
- features include: detachable box magazine mounted horizontally on the left side of the receiver (as with the FG42); rear monopod and front bipod supports; open adjustable sights; recoil operation; cocking via a chain attached to a crank on the right side of the receiver; and a flat "harmonica"-style muzzle brake.

Manufacturer

- the manufacturer is marked on the firearm, with one of eight WW2 German manufacturers' codes: bmv, cpo, cpp, cpq, hhg, myx, nhr, or nyv. Rheinmetall-Borsig used all of these codes at various times during the Second World War.

Action

- recoil-operated.

Serial Number

- numbered on the receiver/frame.

Shots

- detachable box magazine.

Notes

Make

- the make is not marked on the firearm; this rifle was originally designed for the Czechoslovakian armed forces, but was adopted by Germany after the invasion of Czechoslovakia during World War Two.

Model

- the model may or may not be marked on the firearm.
- this is a single-shot anti-tank rifle designed to be a more effective version of the 7.92mm M41 anti-tank rifle, by adapting the design to a heavier 15mm cartridge (also used in the ZB60 heavy machine gun and the later BESA).
- this rifle uses an odd form of layout with the pistol-grip being used as the bolt-handle on a moving barrel; to open the breech, the pistol grip is rotated up towards the right and pushed forward, then a single cartridge is manually loaded, and the pistol-grip is pulled rearward and rotated down again to lock the breech in preparation for firing.
- features include: blued finish; M41-style layout; three-chambered muzzle brake; open adjustable sights; folding bipod; folding carry handle; wooden pistol-grip; and a wooden butt which resembles that on the FG42 rifle.

Manufacturer

- the manufacturer or logo thereof is marked on the firearm.

Action

- bolt-operated single-shot, with the pistol-grip acting as the bolt handle.

Serial Number

- numbered on the receiver/frame.

Notes

Make

- the make is not marked on the firearm; this is a descriptor of the type of firearm.

Model

- "2cm Flak 30" is marked on the receiver/frame.
- this is a single-barrel anti-aircraft gun developed by Rheinmetall (through their Solothurn subsidiary in neutral Switzerland) during the 1930s, and manufactured by Rheinmetall (later Rheinmetall-Borsig) and Mauser through the Second World War.
- this cannon could be seen in towed, wheeled, stationary, vehicle, and naval mountings, for low-flying aircraft and anti-armour use, but it had a relatively low rate of fire (~280 rpm), leading to the development of the later 2cm Flak 38, with a rate of fire of ~450 rpm, to try to deal with fast-moving strafing aircraft. Because the faster-firing Flak 38 couldn't be manufactured in sufficient quantities to meet demand, the Flak 30 remained in production throughout World War Two.
- this cannon would normally be crewed by a crew of 5 soldiers (1 gunner and 4 loaders/rangefinders/support personnel), as the box magazine only held 20 rounds, and couldn't be changed from the gunner's seat.
- the standard anti-aircraft version of this cannon was fitted with a 1300mm barrel, but an 1100mm-barrelled version was also produced for truck and halftrack mounts, for use as mobile anti-aircraft and anti-armour use.
- features include: blued and painted finish; cone-shaped flash-hider/muzzle brake; tapered barrel; a triangular mount (based on either "mushroom cap" legs, wheels, or a vehicle or naval mount; a gunner's seat in-line with the cannon that swivels in a 360-degree arc; a reflector gunsight; pedal triggers; and hand wheels for traverse and elevation control.

Manufacturer

- the manufacturer or code thereof is marked on the firearm.

Action

- recoil operated.

Notes

Make

- the make is not marked on the firearm; this is a descriptor of the type of firearm.

Model

- "2cm Flak 38" is marked on the receiver/frame.
- this is a single-barrel anti-aircraft gun developed by Mauser, based on the Rheinmetall Flak 30, during the early 1940s, and manufactured through the Second World War; where the Flak 30 had a rate of fire of around ~280 rpm, the Flak 38 roughly doubled that, to ~450-480 rpm, to better deal with with fast-moving and low-flying aircraft. To increase hit probabilty even more, the Flak 38 was commonly seen in multiple (dual and quadruple) mounts called "Zwilling" (from the German "zwei"/"two") and "Vierling" (from the German "vier"/"four"). A quad-mount of Flak 38s on a Panzer IV tank chassis was also produced as a mobile anti-aircraft battery called the "Wirbelwind"/"Whirlwind".
- this cannon could be seen in towed, wheeled, stationary, vehicle, and naval mountings, for low-flying aircraft and anti-armour use.
- this cannon would normally be crewed by a crew of 5 soldiers (1 gunner and 4 loaders/rangefinders/support personnel), as the box magazine only held 20 rounds, and couldn't be changed from the gunner's seat.
- the standard anti-aircraft version of this cannon was fitted with a 1300mm barrel, but an 1100mm-barrelled version was also produced for truck and halftrack mounts, for use as mobile anti-aircraft and anti-armour use.
- features include: blued and painted finish; cone-shaped flash-hider/muzzle brake; tapered barrel; a triangular mount (based on either "mushroom cap" legs, wheels, or a vehicle or naval mount; a gunner's seat in-line with the cannon that swivels in a 360-degree arc; a reflector gunsight; pedal triggers; and hand wheels for traverse and elevation control.

Manufacturer

- the manufacturer or code thereof is marked on the firearm.

Action

- recoil operated.

Notes

Make

- the make is not marked on the firearm; this is a descriptor of the type of firearm.

Model

- "3.7cm Flak 18" is marked on the receiver/frame.
- this is a single-barrel medium anti-aircraft gun developed by Rheinmetall (through their Solothurn subsidiary in neutral Switzerland) during the 1930s, and manufactured by Rheinmetall (later Rheinmetall-Borsig) through the Second World War.
- this cannon could be seen in towed, wheeled, stationary, vehicle, and naval mountings, for use against aircraft and anti-armour at ranges up to 4 km, but it had a relatively low rate of fire (theoretical - ~250 rpm, practical - ~150 rpm), leading to the development of the later 3.7cm Flak 36 and Flak 43, with either multiple mounts or a faster rate of fire, to try to deal with fast-moving strafing aircraft.
- this cannon would normally be crewed by a crew of at least 6 soldiers (2 gunners and 4 loaders/rangefinders/support personnel), as the cannon was fed by loaders dropping clips of 6 rounds into the feed tray, and couldn't be fed from the gunners' seats.
- these cannon were produced in single, dual (side by side and over/under), and quadruple mounts.
- features include: blued and painted finish; cone-shaped flash-hider/muzzle brake; tapered barrel; a cross-shaped mount (based on either "mushroom cap" legs, wheels, or a vehicle or naval mount; two gunner's seat at the front of the mount, on each side of the barrel, that swivels in a 360-degree arc; a reflector gunsight; pedal triggers; and hand wheels for traverse and elevation control.
- these cannon were replaced by the 3.7cm Flak 36 before World War Two, which were themselves largely replaced by the faster-firing Flak 43 later in the war.

Manufacturer

- the manufacturer or code thereof is marked on the firearm.

Action

- recoil operated.

Serial Number

- serial numbered on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - stripper-clip fed.

Notes

Make

- the make is not marked on the firearm.

Model

- the model is marked on the firearm.
- this is a recoil-operated heavy machine gun/light cannon adopted by the German air force in the early 1940's as a replacement for the 15mm MG151, and which saw use in many of the German fighters and bombers of the Second World War; this machine gun/cannon was designed at Mauser and put into production at several other World War Two German and occupied territory factories. This firearm was designed primarily as fixed armament in fighter and bomber installations, and many of them were converted to infantry/anti-aircraft ground mountings as the war closed.
- features include: thin barrel without a barrel shroud; hinged top cover on a tubular receiver; and either a solenoid or pistol-grip firing control; these machine guns used both electrically- and percussion primed ammunition, and the electrically-ignited ammunition required an electrical power source to operate; blued finish.

Manufacturer

- the manufacturer or code thereof is marked on the firearm.

Action

- recoil-operated.

Serial Number

- numbered on the receiver/frame.

Shots

- belt-fed.

159426 - 1	30X90 RB	N/A	584	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is not marked on the firearm; this is a descriptor of the type of firearm.

Model

- "MK-108" is usually marked on the cannon.
- this is a large-calibre aircraft cannon developed by Rheinmetall-Borsig beginning in 1941, and which was mounted in Me-109 fighters and Me-110 night-fighters/fighter-bombers; this cannon was known for its ability to destroy an Allied bomber with only three or four hits on the airframe, using explosive shells.
- this cannon has a peculiar appearance due to its short barrel and stamped, folded, and welded construction, with an overall length of only 1143mm/45".
- features include: parkerized/phosphated finish; stubby, stepped 584mm/23" barrel; stamped, folded, and welded top and bottom receiver halves, with eyes for mounting to the host aircraft (most mountings of this cannon were in centre-line "through the proeller hub" mounts); a stamped and folded top-cover to allow loading a belt of ammunition; pneumatic hose attachments to allow the gunner or pilot to re-cock the cannon in the case of a failure-to-fire; and an electrical solenoid trigger.

Manufacturer

- the manufacturer or code thereof is marked on the cannon.

Action

- blowback.

Serial Number

- serial numbered on the receiver/frame or top-cover.

Shots

- belt fed firearm.

159827 - 1	8MM MAUSER	N/A	705	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

Model

- "LMG 14" is the German Military model designation.
- the German Government did not use the commercial designation "S.M. Gew. Mod. Parabellum 1913" as applied by Deutsche Waffen und Munitionsfabrik (DWM).
- "S.M. Gew. Mod. Parabellum 1913" and "Berlin" are marked on the left side of the receiver/frame.
- "S.M.GEW" means Schulter Maschinengewhr or "shoulder machinegun".
- this Machine Gun may also be known as "MG-13" a DWM designation entirely different from the MG-13 model adopted by the German during WW II.
- this particular vewrsion of the Parabellum machine gun is a late-war adaptation of the MG14 parabellum into a lighter-weight aircraft observer's gun, with a reduced-diameter barrel shroud to prevent the gun from being blown off-target by the aircraft's slip-stream.
- this is a World War One medium machinegun used primarily as an aircraft machinegun by the German military; as such, versions saw use mounted as observer's guns in two-seater aircraft, as defensive armament on Zeppelin airships/bombers, and even as a fixed, synchronized forward-firing single gun on early fighter planes (though most WW1 German fighters used synchronized MG08's, commonly called "Spandau"s).
- features include: wooden butt and pistol-grip; ventilated barrel shroud (some versions of the Parabellum intended for ground use had a solid water-jacket); open adjustable sights; and a "dual trigger" safety arrangement, whereby a lower trigger (outside the trigger guard) must be pulled in order for the primary trigger to be pulled.

Manufacturer

- "DWM" the abbreviation for "Deutsche Waffen und Munitionsfabriken" may be marked on the left side of the receiver/frame and on the top cover.

Action

- recoil operated.

Serial Number

- the serial number may be marked on the bottom of the receiver/frame.

Shots

- this is a belt-fed firearm.

120536 - 1	8MM MAUSER	N/A	726	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- the model designation may not be marked on the firearm.
- this is a World War One light machine gun based on the earlier MG10 and MG15 (not to be confused with the World War Two "MG15" manufactured by either Krieghoff or Rheinische Metallwaren und Maschinenfabrik); this machinegun was adopted as an improved "lightweight" version of the MG15.
- in 1914, with the outbreak of World War One, the German military was desperate to obtain as many practical machineguns as was possible; although the bulk of this demand was filled by the Maxim MG08 (and later, the MG08/15), they also purchased a number of commercial designs that were made available to them. Theodore Bergmann (of Bergmann pistol fame) had produced a number of medium machineguns as early as 1905, and variations of these machineguns were taken into German service as the MG10 and the MG15; the MG15nA ("neuer Art", or "New Model") was a lightened and re-designed version of the MG 15, intended for use as both an aircraft machinegun and as a true man-portable "light machinegun".
- features include: compact design, with a buttpad placed at the rear of the receiver/frame and a pistol-grip for the firer's hand placed under the belt feed-way; cocking handle at right rear of the receiver/frame; open adjustable high-mount sights; finned barrel within a longitudinally-ventilated barrel shroud; and most versions of this machinegun were designed to be fired from a centrally-mounted bipod, tripod, or pintle mount.

Manufacturer

- the manufacturer is marked on the firearm.

Action

- recoil-operated.

Serial Number

- numbered on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- belt-fed firearm.
Remarks	- do not confuse with the World War Two "MG15" manufactured by either Krieghoff or Rheinische Metallwaren und Maschinenfabrik.

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

Model

- the model is marked on the firearm.
- this is an early belt-fed, recoil-operated machine gun was adopted by Germany shortly prior to World War One; although the bulk of Germany's machine guns at this time was composed of the Maxim-based MG08, the demand for machine guns was great enough that the Bergmann was kept in production until sufficient quantities of the MG08 could be obtained. At the same time, the Bergmann MG10 (and its successor, the MG15) was light enough, and easily convertible to air-cooling, that a lightweight MG15nA version was adopted, for infantry and aircraft use.
- features include: blued finish; large water jacket; open adjustable "ladder"-style sights; hinged top cover; a "hump" on the bottom of the receiver into which the locking bolt drops during operation; and dual spade grips with a thumb trigger.

Manufacturer

- the manufacturer or logo thereof is marked on the firearm.

Action

- recoil-operated.

Serial Number

- numbered on the receiver/frame.

Shots

- belt-fed.

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation may not be found marked on the firearm.
- essentially this machine gun is a much modified Dreyse Model 1918 machine gun. The firm that developed the MG13 from the Dreyse M1918 was Simson & Company, Suhl, Thuringia, Germany.
- the MG13K was a short barrel ("K=kurz" or short) MG13 which was designed and intended for use as an armoured fighting vehicle machine gun.
- folding metal stock with two piece padded butt were standard, however wooden stocks may be encountered.
- box magazine or drum is fed into the left side of the receiver/frame.
- air cooled barrel within a barrel jacket which is perforated/ventilated, fitted with a shoulder stock, pistol grip, sling and a bipod.
- a belt fed water cooled version was also developed from the MG13 and was designated "MG14"

Manufacturer

- "BSW" is marked on the right side of the receiver"frame.
- "BSW" is the trademark of Berlin-Suhler-Waffen.
- "BSW" is not to be confused with an other manufacturer "Maschinenfabrik Ardeltwerke" with the same letter code "bsw" marked in small letters.

Type

- air-cooled machine gun.

Action

- recoil operated.

Serial Number

- located on left side of receiver/frame.
- sequentially numbered.
- serial number may be duplicated on other parts of the firearm: top cover.

Shots

- originally introduced with a 25 round box magazine.
- a 75 round saddle drum magazine is available for this firearm (which is a true magazine).

Canadian Law Comments

- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model designation may not be found marked on the firearm. - essentially this machine gun is a much modified Dreyse Model 1918 machine gun. The firm that developed the MG13 from the Dreyse M1918 was Simson & Company, Suhl, Thuringia, Germany. - the MG13K was a short barrel ("K=kurz" or short) MG13 which was designed and intended for use as an armoured fighting vehicle machine gun. - folding metal stock with two piece padded butt were standard, however wooden stocks may be encountered. - box magazine or drum is fed into the left side of the receiver/frame. - air cooled barrel within a barrel jacket which is perforated/ventilated, fitted with a shoulder stock, pistol grip, sling and a bipod. - a belt fed water cooled version was also developed from the MG13 and was designated "MG14"
Manufacturer	- "BSW" is marked on the right side of the receiver"frame. - "BSW" is the trademark of Berlin-Suhler-Waffen. - "BSW" is not to be confused with an other manufacturer "Maschinenfabrik Ardeltwerke" with the same letter code "bsw" marked in small letters.
Type	- air-cooled machine gun.
Action	- no longer capable of full automatic fire.
Serial Number	- located on left side of receiver/frame. - sequentially numbered. - serial number may be duplicated on other parts of the firearm.
Shots	- originally introduced with a 25 round box magazine. - a 75 round saddle drum magazine is available for this firearm (which is a true magazine).
Canadian Law Comments	- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted". - For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

Model

- the model is marked on the firearm.
- this is a recoil-operated heavy machine gun adopted by the German air force in 1938, and which saw use in many of the German fighters and bombers of the Second World War; this machine gun was designed at Rheinmetall and put into production at several other World War Two German and occupied territory factories. This machine gun was produced in both fixed and flexible versions, and many of these machine guns were converted to infantry ground mountings as the war closed.
- features include: blued finish; cone flash hider with internal recoil booster; hole-ventilated barrel shroud; hinged top cover on a tubular receiver; and either a solenoid or pistol-grip firing control; these machine guns used electrically-primed ammunition, and required an electrical power source to operate. These machine guns have such heavy recoil springs that they require a gear (operated via a crank handle) to cock them.
- this machine gun was also copied by the Japanese, as the Type 2.

Manufacturer

- the manufacturer or logo thereof is marked on the firearm.

Action

- recoil operated.

Serial Number

- numbered on the receiver/frame.

Shots

- belt-fed.

64628 - 1	8MM MAUSER	N/A	705	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- "MG 14" is the German Military model designation.
- the German Government did not use the commercial designation "S.M. Gew. Mod. Parabellum 1913" as applied by Deutsche Waffen und Munitionsfabrik (DWM).
- "S.M. Gew. Mod. Parabellum 1913" and "Berlin" are marked on the left side of the receiver/frame.
- "S.M.GEW" means Schulter Maschinengewhr or "shoulder machinegun".
- this Machine Gun may also be known as "MG-13" a DWM designation entirely different from the MG-13 model adopted by the German during WW II.
- available as a water or air cooled machine gun.
- this is a World War One medium machinegun used primarily as an aircraft machinegun by the German military; as such, versions saw use mounted as observer's guns in two-seater aircraft, as defensive armament on Zeppelin airships/bombers, and even as a fixed, synchronized forward-firing single gun on early fighter planes (though most WW1 German fighters used synchronized MG08's, commonly called "Spandau"s).
- features include: wooden butt and pistol-grip; ventilated barrel shroud (some versions of the Parabellum intended for ground use had a solid water-jacket); open adjustable sights; and a "dual trigger" safety arrangement, whereby a lower trigger (outside the trigger guard) must be pulled in order for the primary trigger to be pulled.

Manufacturer

- "DWM" the manufacturer's abbreviation may be marked on the left side of the receiver/frame and on the top cover.

Action

- no longer capable of full automatic fire.

Serial Number

- the serial number may be marked on the bottom of the receiver/frame.

FRT Report

Firearm Reference Number (FRN): 64625
Make: German Machine Gun
Model: MG14

Summary

Make:	German Machine Gun
Model:	MG14
Manufacturer:	Deutsche Waffen und Munitionsfabriken (DWM)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
64625 - 1	8MM MAUSER	N/A	705	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- "MG 14" is the German Military model designation.
- the German Government did not use the commercial designation "S.M. Gew. Mod. Parabellum 1913" as applied by Deutsche Waffen und Munitionsfabrik (DWM).
- "S.M. Gew. Mod. Parabellum 1913" and "Berlin" are marked on the left side of the receiver/frame.
- "S.M.GEW" means Schulter Maschinengewhr or "shoulder machinegun".
- this Machine Gun may also be known as "MG-13" a DWM designation entirely different from the MG-13 model adopted by the German during WW II.
- available as a water or air cooled machine gun.
- this is a World War One medium machinegun used primarily as an aircraft machinegun by the German military; as such, versions saw use mounted as observer's guns in two-seater aircraft, as defensive armament on Zeppelin airships/bombers, and even as a fixed, synchronized forward-firing single gun on early fighter planes (though most WW1 German fighters used synchronized MG08's, commonly called "Spandau"s).
- features include: wooden butt and pistol-grip; ventilated barrel shroud (some versions of the Parabellum intended for ground use had a solid water-jacket); open adjustable sights; and a "dual trigger" safety arrangement, whereby a lower trigger (outside the trigger guard) must be pulled in order for the primary trigger to be pulled.

Manufacturer

- "DWM" the abbreviation for "Deutsche Waffen und Munitionsfabriken" may be marked on the left side of the receiver/frame and on the top cover.

Action

- recoil-operated.

Serial Number

- the serial number may be marked on the bottom of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - this is a belt-fed firearm.

FRT Report

Firearm Reference Number (FRN): 145431
Make: German Machine Gun
Model: MG15

Summary

Make:	German Machine Gun
Model:	MG15
Manufacturer:	Bergmann
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
145431 - 1	8MM MAUSER	N/A	726	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

Model

- the model is marked on the firearm.
- this is an early belt-fed, recoil-operated machine gun designed by Louis Schmeisser, but manufactured by Theodor Bergmann, and adopted by Germany shortly prior to World War One; although the bulk of Germany's machine guns at this time was composed of the Maxim-based MG08, the demand for machine guns was great enough that the Bergmann was kept in production until sufficient quantities of the MG08 could be obtained. At the same time, the Bergmann MG10 (and its successor, the MG15) was light enough, and easily convertible to air-cooling, that a lightweight MG15nA version was adopted, for infantry and aircraft use.
- features include: blued finish; large water jacket; open adjustable "ladder"-style sights; hinged top cover; a "hump" on the bottom of the receiver into which the locking bolt drops during operation; and dual spade grips with a thumb trigger.

Manufacturer

- the manufacturer or logo thereof is marked on the firearm.

Action

- recoil-operated.

Serial Number

- numbered on the receiver/frame.

Shots

- belt-fed.

FRT Report

Firearm Reference Number (FRN): 55638
Make: German Machine Gun
Model: MG15

Summary

Make:	German Machine Gun
Model:	MG15
Manufacturer:	Krieghoff (fzs)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
55638 - 2	8MM MAUSER	75	597	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.
- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- usually marked with model on the top of the receiver housing, behind the rear sight as "M.G.15".
- developed from Solothurn prototypes designed by Louis Stange.
- initially manufactured by Rheinmetal-Borsig as a flexible-mount air-cooled machinegun for Luftwaffe bomber aircraft.
- entered German service circa 1932.
- rebuilt later in the war, circa 1943 to 1945, by the Kreighoff firm as a light machinegun for ground use, principally by the Volksturm branch of the Wehrmacht.
- rework consisted of the addition of a butt stock and bi-pod.
- features include: full automatic fire only; recoil operated with gas assist by means of a recoil booster; cylindrical sheet metal receiver-housing with lock-mechanism housing and pistol-grip underside; ventilated cylindrical sheet metal barrel shroud; utilizes a special detachable, dual saddle-drum type magazine containing 75 cartridges; large cylindrical reciprocating charging handle on the right side of receiver; part-rotational indexed ring-safety (safe or fire only) just ahead of the cylindrical rear-receiver extension.

Manufacturer

- the trademark symbol of Heinrich Kreighoff is usually marked on the top of the receiver/frame; this symbol consists of the letters "HK" within a stylized anchor and may also have the following marked underneath the symbol, "Kreighoff" over "Suhl".

Action

- recoil operated with gas assist by means of a recoil booster.

Serial Number

- serial numbered on the top rear of the receiver/frame housing.
- serial numbering usually follows the WW II German Luftwaffe system marked as follows, "Nr xxxx-xx".
- the last two numbers of the serial number represent the year of manufacture.
- the letters "Nr" are not considered as part of the serial number.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- dual saddle-drum type of magazine containing 75 cartridges.

Canadian Law Comments

- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol. 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.
- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- usually marked with model on the top of the receiver/frame housing, behind the rear sight: M.G.15
- developed from Solothurn prototypes designed by Louis Stange.
- initially manufactured by Rheinmetal-Borsig as a flexible-mount air-cooled machinegun for Luftwaffe bomber aircraft. (entered service approx. 1932)
- rebuilt later in the war (late 1943 through 1945) by Kreighoff as a light machinegun for ground troops (principally the Volksturm Wehrmacht) by addition of a butt-stock and bi-pod.
- cylindrical sheet metal receiver-housing with lock-mechanism housing and pistol-grip underside, ventilated cylindrical sheet metal barrel shroud, takes dual saddle-drum magazine, large cylindrical reciprocating charging handle on the right side of receiver, part-rotational indexed ring-safety (safe or fire only) just ahead of the cylindrical rear-receiver extension of wood or plastic composite, tubular stock with hinge-open recoil pads, bi-pod.

Manufacturer

- rebuilt by Heinrich Krieghoff, Suhl Germany, in late in WW II as a light ground-service machinegun.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number is marked on the top rear of the receiver/frame housing; usually follows German WW II Luftwaffe system, example: Nr. 8724 - 40

Calibre

- designed to use German Military ammunition, 7.92 X 57JS (Gewehr Patrone 98)

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- dual saddle-drum magazine: contains 75 cartridges in non-disintegrating link-belt form.

Canadian Law Comments

- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol. 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

Model

- usually marked "MG15" on the top of the receiver housing, behind the rear sight.
- developed from Solothurn prototypes designed by Louis Stange.
- initially manufactured by Rheinmetal-Borsig as a fixed or flexible-mount air-cooled machinegun for Luftwaffe use in bomber aircraft.
- entered German service circa 1932.
- an undetermined number were rebuilt between 1943 and 1945, by the Kreighoff firm as a light machinegun for ground use, principally by the Volksturm branch of the Wehrmacht.
- rework usually consisted of the addition of: butt stock; bi-pod; adjustable rear sight; folding front sight; carrying handle; and sling swivels. Some conversions also include the replacement of the air cooled barrel and jacket with a 762MM (30 Inch) water cooled barrel and jacket.
- features include: full automatic fire only; recoil operated with gas assist by means of a recoil booster; cylindrical sheet metal receiver-housing with lock-mechanism housing and pistol-grip underside; ventilated cylindrical sheet metal barrel shroud; utilizes a special detachable, dual saddle-drum type magazine containing 75 cartridges; large cylindrical reciprocating charging handle on the right side of the receiver/frame; part-rotational indexed ring-safety (safe or fire only) just ahead of the cylindrical rear-receiver extension.

Manufacturer

- "RHEINMETALL BORSIG" is marked on the firearm, in the form of the Rheinmetall-Borsig logo ("RHEIN" over "METALL" in a diamond within a circle, slightly overlapping a three-ringed circle containing "BORSIG" to the right).

Action

- recoil operated with gas assist by means of a recoil booster.
- rate of fire between 750-1000 rounds per minute.

Serial Number

- serial-numbered on top of the rece3iver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - dual saddle-drum type of magazine containing 75 cartridges.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- recoil operated with gas assist by means of a recoil booster. - rate of fire between 750-1000 rounds per minute.
Serial Number	- serial numbered on the top rear of the receiver/frame housing. - serial numbering usually follows the WW II German Luftwaffe system marked as follows, "Nr xxxx-xx". - the last two numbers of the serial number represent the year of manufacture. - the letters "Nr" are not considered as part of the serial number.
Shots	- dual saddle-drum type of magazine containing 75 cartridges.
Canadian Law Comments	- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted". - for further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol. 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".
Other Markings	- the code "FL45701" is the German air force stock number for the MG15 machine gun, and is not to be used as the serial number.
Remarks	- the MG15 was also licence built in Japan as the "Type 98" for the Japanese army, (FRT# 55759) and as the "Type 1" for the Japanese navy.

FRT Report

Firearm Reference Number (FRN): 120537
Make: German Machine Gun
Model: MG15 Dreyse

Summary

Make:	German Machine Gun
Model:	MG15 Dreyse
Manufacturer:	Rheinische Metallwaaren & Maschinenfabrik
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
120537 - 1	8MM MAUSER	N/A	705	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- the model designation may not be marked on the firearm.
- in 1914, with the outbreak of World War One, the German military was desperate to obtain as many practical machineguns as was possible; although the bulk of this demand was filled by the Maxim MG08 (and later, the MG08/15), they also purchased a number of commercial designs that were made available to them. The Dreyse Rheinische Metallwaren und Maschinenfabrik submitted a number of Browning 1917-style water-cooled medium machineguns, including two types that were adopted as the MG10 and the MG15; the only differences between these machineguns were the mountings they employed. The MG10 was mounted on a conventional tripod (for use in a sustained-fire role), while the MG15 was mounted on a MG08/15-style bipod, for use as a "light" machinegun.
- features include: blued finish; large-diameter water-jacket; cone-shaped flash-hider; dual spade grips with thumb trigger; and a three-jawed feed-block to withdraw cartridges from the feed belt before chambering (this feed block was one of the primary reasons the Dreyse was known for reliability, as it controlled the round at all times).

Manufacturer

- the manufacturer is marked on the firearm.

Action

- recoil-operated.

Serial Number

- numbered on the receiver/frame.

Shots

- belt-fed firearm.

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- "MG 17" is marked on top of the receiver/frame.
- designed and intended for use by the German air forces as a fixed aircraft machine gun and subsequently converted to other uses.
- features include: remote firing controls; barrel jacket; combination recoil booster and flash hider; belt or drum feed; may be equiped with a stock and pistol grip.

Manufacturer

- the Rheinmetall trademark/logo which is represented by a stylized 4-sided diamond within a circle may be found located on the left side of the receiver/frame in the same location as the proof marks and the date of manufacture.

Action

- recoil operated.

Serial Number

- marked on top of the receiver/frame.
- serial number rationalization unknown.
- specimen serial number observed consisted of the abbreviation for number "Nr" followed by seven digits without prefix or suffix.

Shots

- fed by a metallic link belt or a spring driven drum magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- the 50 shot magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

Other Markings

- the Rheinmetall trademark/logo which is represented by a stylized 4-sided diamond within a circle may be found located on the left side of the receiver/frame in the same location as the proof marks and the date of manufacture.

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- "GAST - GEWEHR" is marked on the left side of the receiver/frame.
- the model designation is not marked on the firearm.
- the "Gast" machine gun was based on patents granted in January 1916 and February 1917 to Carl Gast, an engineer with Vorwerk & Company in Barmen-Eberfield.
- Gast machine guns were developed and tested in 1917.
- approximately 3000 machine gun were ordered in the fall of 1917.
- over 1500 units were reported destroyed in 1919 by the Allied Control Commission.
- this is a highly unusual recoil-operated, double-barreled, dual-drum-fed machinegun adopted by the German armed forces during the closing days of World War One. Due to this machinegun's extremely high rate of fire (up to 1,800 rounds per minute), it was believed to be ideal for use as an aircraft machinegun, and most of those that saw actual service were used as observer's guns.
- features include: a wide, rectangular receiver/frame with a ventilated wooden buttstock; cocking handle on the right side of the receiver/frame; dual drum magazines mounted on the sides of the receiver (ejection was through the bottom of the receiver/frame); open adjustable sights (some versions were fitted with optical crosshair sights); a wooden pistol-grip below the receiver/frame; a "dual trigger" safety arrangement, whereby a lower trigger (outside the trigger guard) must be pulled in order for the primary trigger to be pulled; and dual barrels with ventilated barrel shrouds.
- this machinegun operated in such a way that the recoil impulse of one barrel drove the feeding and firing cycle of it's twin, and vice-versa; in this way, the Gast machinegun achieved rates of fire that weren't equalled until the adoption of modern "Gatling"-style or "Minigun" types.

Manufacturer

- "VORWERK & CO" over "BARMEN" is marked on the left side of the receiver/frame.

Action

- recoil-operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- numbered on top of the receiver/frame.
Shots	- dual drum-fed; each drum holds 192 rounds.

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- rear left side of the receiver/frame is usually marked with the serial number, date of manufacture and the Rheinmetall trademark which is represented by a stylized 4-sided diamond within a circle.
- this firearm is the post WW II version of the original MG 42 designed and produced specifically for the 7.62MM Nato cartridge.
- new production by Rheinmetall started circa 1957; prior to this date, Rheinmetall also undertook the conversion of original MG 42's from 8MM Mauser to 7.62MM Nato.
- this is a fully automatic, air-cooled, belt fed medium or general purpose machine gun utilizing a short recoil type of action which is gas-assisted by means of a recoil booster located within the flash hider; the bolt is of the roller locking type.
- features include;
- full automatic fire only, cyclic rate at 1100 rds/min.
- barrel is chrome plated.
- metal stamping type of construction,
- bolt weight - 550 g
- quick-change barrel system,
- easily removable bi-pod.

Manufacturer

- the Rheinmetall trademark which is represented by a stylized 4-sided diamond within a circle is usually located on the left rear side of the receiver/frame.

Type

- air-cooled medium machine gun.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- short recoil operated, with a gas assist by means of a muzzle booster.
Serial Number	- serial number usually located on the rear left side of the receiver/frame.
Barrel	- barrel length without the barrel extension is 531 mm. - barrel length with the barrel extension is 565 mm.
Calibre	- calibre designation is marked on the rear left side of the receiver/frame as: 7.62.
Shots	- belt feed only.
Canadian Law Comments	- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted". - For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".
Remarks	- in Yugoslavian service, manufactured at ZASTAVA, the MG42 was named "SARAC" or "M53". - the Italians manufactured this machine gun model (calibre 7.62 x 51 mm NATO) under the designation "MG42/59". - in 1957, the West Germans Government recommenced manufacture of this firearm in various calibres as the "MG1", "MG1A1", and later, the "MG3" & MG3e.

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- rear left side of the receiver/frame is usually marked with the serial number, date of manufacture and the Rheinmetall trademark which is represented by a stylized 4-sided diamond within a circle.
- this firearm is the post WW II version of the original MG 42 designed and produced specifically for the 7.62MM Nato cartridge.
- this firearm accepts both the US M-13 disintegrating link and the German DM1 disintegrating link belts.
- new production of the MG1 and MG3 family of machine guns, by Rheinmetall, started circa 1957; prior to this date, Rheinmetall also undertook the conversion of original MG 42's from 8MM Mauser to 7.62MM Nato.
- this is a fully automatic, air-cooled, belt fed medium or general purpose machine gun utilizing a short recoil type of action which is gas-assisted by means of a recoil booster located within the flash hider; the bolt is of the roller locking type.
- features include;
- full automatic fire only, cyclic rate at 900 rds/min.
- barrel is chrome plated.
- metal stamping type of construction,
- bolt weight - 950 g
- quick-change barrel system,
- easily removable bi-pod.
- NOTE: this firearm will accept differing masses of bolt and different buffers from other models of the MG1. When the 550 g bolt is installed this machine gun will fire at a cyclic rate of 1000 to 1100 shots per minute.

Manufacturer

- the Rheinmetall trademark which is represented by a stylized 4-sided diamond within a circle is usually located on the left rear side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number usually located on the rear left side of the receiver/frame.
Barrel	- barrel length without the barrel extension is 531 mm. - barrel length with the barrel extension is 565 mm.
Calibre	- calibre designation is marked on the rear left side of the receiver/frame as: 7.62.
Shots	- this firearm accepts both the US M-13 disintegrating link and the German DM1 disintegrating link belts. - belt fed machinegun, will not accept the 50 cartridge belt carrier or the 75 round saddle magazine without extensive modification.
Canadian Law Comments	- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted". - For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".
Remarks	- in Yugoslavian service, manufactured at ZASTAVA, the MG42 was named "SARAC" or "M53". - the Italians manufactured this machine gun model (calibre 7.62 x 51 mm NATO) under the designation "MG42/59". - in 1957, the West Germans Government recommenced manufacture of this firearm in various calibres as the "MG1", "MG1A1", and later, the "MG3" & MG3e.

FRT Report

Firearm Reference Number (FRN): 119071
Make: German Machine Gun
Model: MG1A2

Summary

Make:	German Machine Gun
Model:	MG1A2
Manufacturer:	Rheinmetall
Level:	Converted Automatics
Type:	Machine Gun
Action:	Converted Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
119071 - 1	7.62MM NATO	N/A	531	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- rear left side of the receiver/frame is usually marked with the serial number, date of manufacture and the Rheinmetall trademark which is represented by a stylized 4-sided diamond within a circle.
- this firearm is the post WW II version of the original MG 42 designed and produced specifically for the 7.62MM Nato cartridge.
- this firearm accepts both the US M-13 disintegrating link and the German DM1 disintegrating link belts.
- new production of the MG1 and MG3 family of machine guns, by Rheinmetall, started circa 1957; prior to this date, Rheinmetall also undertook the conversion of original MG 42's from 8MM Mauser to 7.62MM Nato.
- this is a fully automatic, air-cooled, belt fed medium or general purpose machine gun utilizing a short recoil type of action which is gas-assisted by means of a recoil booster located within the flash hider; the bolt is of the roller locking type.
- features include;
- full automatic fire only, cyclic rate at 900 rds/min.
- barrel is chrome plated.
- metal stamping type of construction,
- bolt weight - 950 g
- quick-change barrel system,
- easily removable bi-pod.
- NOTE: this firearm will accept differing masses of bolt and different buffers from other models of the MG1. When the 550 g bolt is installed this machine gun will fire at a cyclic rate of 1000 to 1100 shots per minute.

Manufacturer

- the Rheinmetall trademark which is represented by a stylized 4-sided diamond within a circle is usually located on the left rear side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Type	- air-cooled medium machine gun.
Action	- no longer capable of full automatic fire.
Serial Number	- serial number usually located on the rear left side of the receiver/frame.
Barrel	- barrel length without the barrel extension is 531 mm. - barrel length with the barrel extension is 565 mm.
Calibre	- calibre designation is marked on the rear left side of the receiver/frame as: 7.62.
Shots	- this firearm accepts both the US M-13 disintegrating link and the German DM1 disintegrating link belts. - belt fed machinegun, will not accept the 50 cartridge belt carrier or the 75 round saddle magazine without extensive modification.
Canadian Law Comments	- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted". - For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".
Remarks	- in Yugoslavian service, manufactured at ZASTAVA, the MG42 was named "SARAC" or "M53". - the Italians manufactured this machine gun model (calibre 7.62 x 51 mm NATO) under the designation "MG42/59". - in 1957, the West Germans Government recommenced manufacture of this firearm in various calibres as the "MG1", "MG1A1", and later, the "MG3" & MG3e.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
119104 - 1	7.62MM NATO	N/A	533	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	
119104 - 2	7.62MM NATO	75	533	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- MG2 is the official German Government designation for a World War II surplus, 8MM Mauser calibre MG42 which has been factory remanufactured/converted to fire 7.62MM NATO calibre ammunition.
- the model and other identification information is located on the left rear of the receiver/frame, markings include: "MG42", serial number and factory identifier.
- originally manufactured from 1942 to 1945.
- this firearm is a full-automatic (or converted to semi-automatic fire subsequent to manufacture), air-cooled, belt fed medium or general purpose machine gun utilizing a short recoil type of action which is gas-assisted by means of a recoil booster located within the flash hider; the bolt is of the roller locking type.
- features include;
- full-automatic fire only,
- metal stamping type of construction,
- variable cylic rate of fire through the use of bolts of differing masses and different buffers; a lightweight bolt of 550 g at 1100 rds/min, and a heavier bolt of 950 g at 900 rds/min,
- quick-change barrel system,
- easily removeable bi-pod.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- manufactured from 1942 to 1945 by cottage industry on a piece-work basis and assembled at the "manufacturer's" factories.
- commonly identified by manufacturer's code.
- code is usually found with a two or four digit date. (eg: cra/42 and bnz 1944).
- manufacturers of this Model have been be referred to by a variety of codes, such as
  . Grossfuss, Dobeln - 'bpr';
  . Gustloff-Werke, Suhl - 'dfb';
  . Maget, Berlin - 'cra'. This factory was controlled by Rheinmetall);
  . Mauser-Werke A.G., Berlin - 'ar'; and
  . Steyr-Daimler-Puch A.G., Steyr, Austria - 'bnz'.
- NOTE: it is not completely clear to what extent Rheinmetall was involved in the manufacture of the MG42.

Codes for Rheinmetall - Borsig: Apolda (cpn), Berlin (aqx, cpo, hhg), Breslau (cpp), Dusseldorf (bwo), Sommerda (bmv, myx, nhr, rhs), and Unterluss (nyx).

Type

- air-cooled medium machine gun.

Action

- short recoil operated, with a gas assist by means of a muzzle booster.

Serial Number

- located on left side of receiver/frame.
- German serial numbering practices are as follows: serial number ranges from 1 to 9999, after the first ten thousand items, a suffix was added as follows: - 1a to 9999a, then 1b to 9999b and so on. It is possible in any year that more than 270, 000 examples were manufactured by any single manufacturer to have a double letter suffix, such as 1aa to 9999aa and so on.

Shots

- belt fed machine gun.
- ammunition is packaged in 50 round non-disintegrating belts.
- belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum.
- a 75 round saddle drum magazine is available for this firearm (which is a true magazine).
- NOTE: all feed attachments for the MG34 family of machine guns may be utilized with the MG42 family of machine guns.

Canadian Law Comments

- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

119103 - 2	7.62MM NATO	75	533	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- MG2 is the official German Government designation for a World War II surplus, 8MM Mauser calibre MG42 which has been factory remanufactured/converted to fire 7.62MM NATO calibre ammunition.
- the model and other identification information is located on the left rear of the receiver/frame, markings include: "MG42", serial number and factory identifier.
- originally manufactured from 1942 to 1945.
- this firearm is a full-automatic (or converted to semi-automatic fire subsequent to manufacture), air-cooled, belt fed medium or general purpose machine gun utilizing a short recoil type of action which is gas-assisted by means of a recoil booster located within the flash hider; the bolt is of the roller locking type.
- features include;
- metal stamping type of construction,
- variable cylic rate of fire through the use of bolts of differing masses and different buffers; a lightweight bolt of 550 g at 1100 rds/min, and a heavier bolt of 950 g at 900 rds/min,
- quick-change barrel system,
- easily removeable bi-pod.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- manufactured from 1942 to 1945 by cottage industry on a piece-work basis and assembled at the "manufacturer's" factories.
- commonly identified by manufacturer's code.
- code is usually found with a two or four digit date. (eg: cra/42 and bnz 1944).
- manufacturers of this Model have been be referred to by a variety of codes, such as
  . Grossfuss, Dobeln - 'bpr';
  . Gustloff-Werke, Suhl - 'dfb';
  . Maget, Berlin - 'cra'. This factory was controlled by Rheinmetall);
  . Mauser-Werke A.G., Berlin - 'ar'; and
  . Steyr-Daimler-Puch A.G., Steyr, Austria - 'bnz'.
- NOTE: it is not completely clear to what extent Rheinmetall was involved in the manufacture of the MG42.

Codes for Rheinmetall - Borsig: Apolda (cpn), Berlin (aqx, cpo, hhg), Breslau (cpp), Dusseldorf (bwo), Sommerda (bmv, myx, nhr, rhs), and Unterluss (nyx).

Type

- air-cooled medium machine gun.

Action

- no longer capable of full automatic fire.

Serial Number

- located on left side of receiver/frame.
- German serial numbering practices are as follows: serial number ranges from 1 to 9999, after the first ten thousand items, a suffix was added as follows: - 1a to 9999a, then 1b to 9999b and so on. It is possible in any year that more than 270, 000 examples were manufactured by any single manufacturer to have a double letter suffix, such as 1aa to 9999aa and so on.

Shots

- belt fed machine gun.
- ammunition is packaged in 50 round non-disintegrating belts.
- belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum.
- a 75 round saddle drum magazine is available for this firearm (which is a true magazine).
- NOTE: all feed attachments for the MG34 family of machine guns may be utilized with the MG42 family of machine guns.

Canadian Law Comments

- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

Manufacturer

- manufactured from 1942 to 1945 by cottage industry on a piece-work basis and assembled at the "manufacturer's" factories.
- commonly identified by manufacturer's code.
- code is usually found with a two or four digit date. (eg: cra/42 and bnz 1944).
- manufacturers of this Model have been be referred to by a variety of codes, such as
  . Grossfuss, Dobeln - 'bpr';
  . Gustloff-Werke, Suhl - 'dfb';
  . Maget, Berlin - 'cra'. This factory was controlled by Rheinmetall);
  . Mauser-Werke A.G., Berlin - 'ar'; and
  . Steyr-Daimler-Puch A.G., Steyr, Austria - 'bnz'.
- NOTE: it is not completely clear to what extent Rheinmetall was involved in the manufacture of the MG42.

Codes for Rheinmetall - Borsig: Apolda (cpn), Berlin (aqx, cpo, hhg), Breslau (cpp), Dusseldorf (bwo), Sommerda (bmv, myx, nhr, rhs), and Unterluss (nyx).

Type

- air-cooled medium machine gun.

Action

- short recoil operated, with a gas assist by means of a muzzle booster.

Serial Number

- located on left side of receiver/frame.
- German serial numbering practices are as follows: serial number ranges from 1 to 9999, after the first ten thousand items, a suffix was added as follows: - 1a to 9999a, then 1b to 9999b and so on. It is possible in any year that more than 270, 000 examples were manufactured by any single manufacturer to have a double letter suffix, such as 1aa to 9999aa and so on.

Shots

- belt fed machine gun.
- ammunition is packaged in 50 round non-disintegrating belts.
- belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum.
- a 75 round saddle drum magazine is available for this firearm (which is a true magazine).
- NOTE: all feed attachments for the MG34 family of machine guns may be utilized with the MG42 family of machine guns.

Canadian Law Comments

- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

FRT Report

Firearm Reference Number (FRN): 119106
Make: German Machine Gun
Model: MG2

Summary

Make:	German Machine Gun
Model:	MG2
Manufacturer:	Mauser (ar)
Level:	Converted Automatics
Type:	Machine Gun
Action:	Converted Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
119106 - 1	7.62MM NATO	N/A	533	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
119106 - 2	7.62MM NATO	75	533	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- MG2 is the official German Government designation for a World War II surplus, 8MM Mauser calibre MG42 which has been factory remanufactured/converted to fire 7.62MM NATO calibre ammunition.
- the model and other identification information is located on the left rear of the receiver/frame, markings include: "MG42", serial number and factory identifier.
- originally manufactured from 1942 to 1945.
- this firearm is a full-automatic (or converted to semi-automatic fire subsequent to manufacture), air-cooled, belt fed medium or general purpose machine gun utilizing a short recoil type of action which is gas-assisted by means of a recoil booster located within the flash hider; the bolt is of the roller locking type.
- features include;
- metal stamping type of construction,
- variable cylic rate of fire through the use of bolts of differing masses and different buffers; a lightweight bolt of 550 g at 1100 rds/min, and a heavier bolt of 950 g at 900 rds/min,
- quick-change barrel system,
- easily removeable bi-pod.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- manufactured from 1942 to 1945 by cottage industry on a piece-work basis and assembled at the "manufacturer's" factories.
- commonly identified by manufacturer's code.
- code is usually found with a two or four digit date. (eg: cra/42 and bnz 1944).
- manufacturers of this Model have been be referred to by a variety of codes, such as
  . Grossfuss, Dobeln - 'bpr';
  . Gustloff-Werke, Suhl - 'dfb';
  . Maget, Berlin - 'cra'. This factory was controlled by Rheinmetall);
  . Mauser-Werke A.G., Berlin - 'ar'; and
  . Steyr-Daimler-Puch A.G., Steyr, Austria - 'bnz'.
- NOTE: it is not completely clear to what extent Rheinmetall was involved in the manufacture of the MG42.

Codes for Rheinmetall - Borsig: Apolda (cpn), Berlin (aqx, cpo, hhg), Breslau (cpp), Dusseldorf (bwo), Sommerda (bmv, myx, nhr, rhs), and Unterluss (nyx).

Type

- air-cooled medium machine gun.

Action

- no longer capable of full automatic fire.

Serial Number

- located on left side of receiver.
- German serial numbering practices are as follows: serial number ranges from 1 to 9999, after the first ten thousand items, a suffix was added as follows: - 1a to 9999a, then 1b to 9999b and so on. It is possible in any year that more than 270, 000 examples were manufactured by any single manufacturer to have a double letter suffix, such as 1aa to 9999aa and so on.

Shots

- belt fed machine gun.
- ammunition is packaged in 50 round non-disintegrating belts.
- belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum.
- a 75 round saddle drum magazine is available for this firearm (which is a true magazine).
- NOTE: all feed attachments for the MG34 family of machine guns may be utilized with the MG42 family of machine guns.

Canadian Law Comments

FRT Report

Firearm Reference Number (FRN): 119075
Make: German Machine Gun
Model: MG3

Summary

Make:	German Machine Gun
Model:	MG3
Manufacturer:	Rheinmetall
Level:	Converted Automatics
Type:	Machine Gun
Action:	Converted Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
119075 - 1	7.62MM NATO	N/A	531	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- essentially this firearm is a product-improved MG1A3. The main differences being an improved belt holding and belt feed mechanism although there are small non-visible differences in manufacture and components.
- rear left side of the receiver/frame is usually marked with the model, serial number, date of manufacture and the Rheinmetall trademark which is represented by a stylized 4-sided diamond within a circle.
- this firearm accepts both the US M-13 disintegrating link and the German DM1 & DM-6 disintegrating link belts.
- this firearm is a fully automatic, air-cooled, belt fed medium or general purpose machine gun utilizing a short recoil type of action which is gas-assisted by means of a recoil booster located within the flash hider; the bolt is of the roller locking type.
- features include;
- full automatic fire only.
- barrel is chrome plated.
- metal stamping type of construction,
- quick-change barrel system,
- easily removable bi-pod.
- NOTE: this firearm will accept 2 different masses of bolt and different buffers from other models of the MG1. When the 550 g bolt is installed this machine gun will fire at a cyclic rate of 1000 to 1100 shots per minute. When the 950 g bolt is installed this machine gun will fire at a cyclic rate of 900 shots per minute.

Manufacturer

- the Rheinmetall trademark which is represented by a stylized 4-sided diamond within a circle is usually located on the left rear side of the receiver/frame.

Type

- air-cooled medium machine gun.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- no longer capable of full automatic fire.
Serial Number	- serial number usually located on the rear left side of the receiver/frame.
Barrel	- barrel length without the barrel extension is 531 mm. - barrel length with the barrel extension is 565 mm.
Calibre	- calibre designation is marked on the rear left side of the receiver/frame as: 7.62.
Shots	- this firearm accepts the US M-13 disintegrating link and the German DM1 & DM-6 disintegrating link belts. - belt fed machinegun. - also accepts a 100 cartridge, belt carrier type drum magazine.
Canadian Law Comments	- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted". - For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".
Remarks	- in Yugoslavian service, manufactured at ZASTAVA, the MG42 was named "SARAC" or "M53". - the Italians manufactured this machine gun model (calibre 7.62 x 51 mm NATO) under the designation "MG42/59". - in 1957, the West Germans Government recommenced manufacture of this firearm in various calibres as the "MG1", "MG1A1", and later, the "MG3" & MG3e.

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.
- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- MG34 is not marked on the firearm.
- manufacturer's code, year of manufacturer and Waffenamt inspection code are marked on the firearm.
- MG34 was manufactured in Germany from 1934 to 1945.
- MG34 official German designation was "Maschinengewehr 1934".
- MG34 common designation is "German MG 34 Light Machine Gun".
- MG34 is a recoil operated with gas assist, selective fire, light machine gun utilizing non-disintegrating link belts of 50 round capacity that can be linked together; equipped with a bipod but can also be mounted on a tripod as a heavy machine gun configuration; blued or phosphate-type finish.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "bpr" the manufacturer's code is marked on the firearm.
- German military practice during World War II was to mark the manufacturers name as an alpha or numeric code to conceal the actual name and location of the manufacturer.
- manufacturer's code is usually found with a two or four digit date. Eg: dot/42, bnz, 1944.
- manufacturers of this Model have been be referred to by a variety of codes such as:
  . Alkett, (became Maget 1942/43), Berlin: cra
  . Gustloff-Werke, Suhl: dfb
  . Maget (formally ALKETT 1942/43), Berlin: cra
  . Mauser-Werke, Berlin: ar
  . Steyr-Daimler-Puch A.G., Steyr, Austria: bnz
  . Waffenwerke Brunn A.G., Brunn: dot
- NOTE: it is not clear to what extent the MG34 was produced by Rheinmetall - Borsig: Apolda (cpn), Berlin (aqx, cpo, hhg), Breslau (cpp), Dusseldorf (bwo), Sommerda (bmv, myx, nhr, rhs), and Unterluss (nyx).

Type

- crew served, belt fed, air cooled, light machine gun.

Action

- short recoil operated, with a gas assist by means of a muzzle booster.

Serial Number

- serial number is usually marked on the rear of the receiver/frame and repeated on the component parts.
- German serial numbering practices are as follows: serial number ranges from 1 to 9999, after the first ten thousand items, a suffix was added as follows: - 1a to 9999a, then 1b to 9999b and so on. It is possible in any year that more than 270, 000 examples were manufactured by any single manufacturer to have a double letter suffix, such as 1aa to 9999aa and so on.

Shots

- belt fed machine gun.
- ammunition is packaged in 50 round non-disintegrating belts.
- belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum.
- a 75 round saddle drum magazine is available for this firearm (which is a true magazine).

Canadian Law Comments

- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

Type	- crew served, belt fed, air cooled, light machine gun.
Action	- no longer capable of full automatic fire.
Serial Number	- serial number is usually marked on the rear of the receiver/frame and repeated on the component parts. - German serial numbering practices are as follows: serial number ranges from 1 to 9999, after the first ten thousand items, a suffix was added as follows: - 1a to 9999a, then 1b to 9999b and so on. It is possible in any year that more than 270, 000 examples were manufactured by any single manufacturer to have a double letter suffix, such as 1aa to 9999aa and so on.
Shots	- belt fed machine gun. - ammunition is packaged in 50 round non-disintegrating belts. - belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum. - a 75 round saddle drum magazine is available for this firearm (which is a true magazine).
Canadian Law Comments	- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted". - For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- MG34 is not marked on the firearm.
- manufacturer's code, year of manufacturer and Waffenamt inspection code are marked on the firearm.
- MG34 was manufactured in Germany from 1934 to 1945.
- MG34 official German designation was "Maschinengewehr 1934".
- MG34 common designation is "German MG 34 Light Machine Gun".
- MG34 is a recoil operated with gas assist, selective fire, light machine gun utilizing non-disintegrating link belts of 50 round capacity that can be linked together; equipped with a bipod but can also be mounted on a tripod as a heavy machine gun configuration; blued or phosphate-type finish.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "dfb" the manufacturer's code is marked on the firearm.
- German military practice during World War II was to mark the manufacturers name as an alpha or numeric code to conceal the actual name and location of the manufacturer.
- manufacturer's code is usually found with a two or four digit date. Eg: dot/42, bnz, 1944.
- manufacturers of this Model have been be referred to by a variety of codes such as:
  . Gustloff-Werke, Suhl: dfb
  . Maget, Berlin: cra
  . Mauser-Werke, Berlin: ar
  . Steyr-Daimler-Puch A.G., Steyr, Austria: bnz
  . Waffenwerke Brunn A.G., Brunn: dot
- NOTE: it is not clear to what extent the MG34 was produced by Rheinmetall - Borsig: Apolda (cpn), Berlin (aqx, cpo, hhg), Breslau (cpp), Dusseldorf (bwo), Sommerda (bmv, myx, nhr, rhs), and Unterluss (nyx).

Type

- crew served, belt fed, air cooled, light machine gun.

Action

- short recoil operated, with a gas assist by means of a muzzle booster.

Serial Number

- serial number is usually marked on the rear of the receiver/frame and repeated on the component parts.
- German serial numbering practices are as follows: serial number ranges from 1 to 9999, after the first ten thousand items, a suffix was added as follows: - 1a to 9999a, then 1b to 9999b and so on. It is possible in any year that more than 270, 000 examples were manufactured by any single manufacturer to have a double letter suffix, such as 1aa to 9999aa and so on.

Shots

- belt fed machine gun.
- ammunition is packaged in 50 round non-disintegrating belts.
- belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum.
- a 75 round saddle drum magazine is available for this firearm (which is a true magazine).

Canadian Law Comments

- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

Other Markings

- may be marked on the top rear receiver: "MG34" and serial number.

  . Steyr-Daimler-Puch A.G., Steyr, Austria: bnz
  . Waffenwerke Brunn A.G., Brunn: dot
- it is not clear to what extent the MG34 was produced by Rheinmetall - Borsig: Apolda (cpn), Berlin (aqx, cpo, hhg), Breslau (cpp), Dusseldorf (bwo), Sommerda (bmv, myx, nhr, rhs), and Unterluss (nyx).

Type

- crew served, belt fed, air cooled, light machine gun.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number is usually marked on the rear of the receiver/frame and repeated on the component parts.
- German serial numbering practices are as follows: serial number ranges from 1 to 9999, after the first ten thousand items, a suffix was added as follows: - 1a to 9999a, then 1b to 9999b and so on. It is possible in any year that more than 270, 000 examples were manufactured by any single manufacturer to have a double letter suffix, such as 1aa to 9999aa and so on.

Shots

- belt fed machine gun.
- ammunition is packaged in 50 round non-disintegrating belts.
- belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum.
- a 75 round saddle drum magazine is available for this firearm (which is a true magazine).

Canadian Law Comments

- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- MG34 is not marked on the firearm.
- manufacturer's code, year of manufacturer and Waffenamt inspection code are marked on the firearm.
- MG34 was manufactured in Germany from 1934 to 1945.
- MG34 official German designation was "Maschinengewehr 1934".
- MG34 common designation is "German MG 34 Light Machine Gun".
- MG34 is a recoil operated with gas assist, selective fire, light machine gun utilizing non-disintegrating link belts of 50 round capacity that can be linked together; equipped with a bipod but can also be mounted on a tripod as a heavy machine gun configuration; blued or phosphate-type finish.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "ar" the manufacturer's code is marked on the firearm.
- German military practice during World War II was to mark the manufacturers name as an alpha or numeric code to conceal the actual name and location of the manufacturer.
- manufacturer's code is usually found with a two or four digit date. Eg: dot/42, bnz, 1944.
- manufacturers of this Model have been be referred to by a variety of codes such as:
  . Alkett, (became Maget 1942/43), Berlin: cra
  . Gustloff-Werke, Suhl: dfb
  . Maget (formally ALKETT 1942/43), Berlin: cra
  . Mauser-Werke, Berlin: ar
  . Steyr-Daimler-Puch A.G., Steyr, Austria: bnz
  . Waffenwerke Brunn A.G., Brunn: dot
- NOTE: it is not clear to what extent the MG34 was produced by Rheinmetall - Borsig: Apolda (cpn), Berlin (aqx, cpo, hhg), Breslau (cpp), Dusseldorf (bwo), Sommerda (bmv, myx, nhr, rhs), and Unterluss (nyx).

Type

- crew served, belt fed, air cooled, light machine gun.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number is usually marked on the rear of the receiver/frame and repeated on the component parts.
- German serial numbering practices are as follows: serial number ranges from 1 to 9999, after the first ten thousand items, a suffix was added as follows: - 1a to 9999a, then 1b to 9999b and so on. It is possible in any year that more than 270, 000 examples were manufactured by any single manufacturer to have a double letter suffix, such as 1aa to 9999aa and so on.

  . Gustloff-Werke, Suhl: dfb
  . Maget, Berlin: cra
  . Mauser-Werke, Berlin: ar
  . Steyr-Daimler-Puch A.G., Steyr, Austria: bnz
  . Waffenwerke Brunn A.G., Brunn: dot
- NOTE: it is not clear to what extent the MG34 was produced by Rheinmetall - Borsig: Apolda (cpn), Berlin (aqx, cpo, hhg), Breslau (cpp), Dusseldorf (bwo), Sommerda (bmv, myx, nhr, rhs), and Unterluss (nyx).

Type

- crew served, belt fed, air cooled, light machine gun.

Action

- short recoil operated, with a gas assist by means of a muzzle booster.

Serial Number

- serial number is usually marked on the rear of the receiver/frame and repeated on the component parts.
- German serial numbering practices are as follows: serial number ranges from 1 to 9999, after the first ten thousand items, a suffix was added as follows: - 1a to 9999a, then 1b to 9999b and so on. It is possible in any year that more than 270, 000 examples were manufactured by any single manufacturer to have a double letter suffix, such as 1aa to 9999aa and so on.

Shots

- belt fed machine gun.
- ammunition is packaged in 50 round non-disintegrating belts.
- belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum.
- a 75 round saddle drum magazine is available for this firearm (which is a true magazine).

Canadian Law Comments

- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.
- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- MG34 is not marked on the firearm.
- manufacturer's code, year of manufacturer and Waffenamt inspection code are marked on the firearm.
- MG34 was manufactured in Germany from 1934 to 1945.
- MG34 official German designation was "Maschinengewehr 1934".
- MG34 common designation is "German MG 34 Light Machine Gun".
- MG34 is a recoil operated with gas assist, selective fire, light machine gun utilizing non-disintegrating link belts of 50 round capacity that can be linked together; equipped with a bipod but can also be mounted on a tripod as a heavy machine gun configuration; blued or phosphate-type finish.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "dot" the manufacturer's code is marked on the firearm.
- German military practice during World War II was to mark the manufacturers name as an alpha or numeric code to conceal the actual name and location of the manufacturer.
- manufacturer's code is usually found with a two or four digit date. Eg: dot/42, bnz, 1944.
- manufacturers of this Model have been be referred to by a variety of codes such as:
  . Gustloff-Werke, Suhl: dfb
  . Maget, Berlin: cra
  . Mauser-Werke, Berlin: ar
  . Steyr-Daimler-Puch A.G., Steyr, Austria: bnz
  . Waffenwerke Brunn A.G., Brunn: dot
- NOTE: it is not clear to what extent the MG34 was produced by Rheinmetall - Borsig: Apolda (cpn), Berlin (aqx, cpo, hhg), Breslau (cpp), Dusseldorf (bwo), Sommerda (bmv, myx, nhr, rhs), and Unterluss (nyx).

Type

- crew served, belt fed, air cooled, light machine gun.

Action

- short recoil operated, with a gas assist by means of a muzzle booster.

Serial Number

- serial number is usually marked on the rear of the receiver/frame and repeated on the component parts.
- German serial numbering practices are as follows: serial number ranges from 1 to 9999, after the first ten thousand items, a suffix was added as follows: - 1a to 9999a, then 1b to 9999b and so on. It is possible in any year that more than 270, 000 examples were manufactured by any single manufacturer to have a double letter suffix, such as 1aa to 9999aa and so on.

Shots

- belt fed machine gun.
- ammunition is packaged in 50 round non-disintegrating belts.
- belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum.
- a 75 round saddle drum magazine is available for this firearm (which is a true magazine).

Canadian Law Comments

- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

Other Markings

- may be marked on the top rear receiver: "MG34" and serial number.

Remarks

- NOTE: this Czechoslovakian manufacturer, only made the MG34 from 1941 to 1944, according to the reference book "Czech Firearms and Ammunition".
- it is generally believed that the Czechoslovakian arms industry resumed manufacture of German WWII pattern small arms in the early post WWII period. Most of this post WWII production is marked with manufacture dates up to and including 1945.

132296 - 2	8MM MAUSER	75	500	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

Model

- "MG34/41" is marked on the receiver/frame and/or barrel jacket extension.
- year of manufacture is marked on the receiver/frame and/or barrel extension.
- MG34 machine gun was manufactured from 1934 to 1945.
- MG34/41 is a modified version of the MG34 with a shorter barrel, full automatic fire only, a trigger group of simpler construction, a larger buffer and larger diameter muzzle on the barrels.
- overall length is 1120mm (44 1/8") and average weight is 11.25 kg (25 lbs).

Manufacturer

- "cra" the manufacturer's code is usually marked on the top of the receiver/frame.
- manufacturer's code is usually found with a two or four digit date. Eg: dot/42, bnz, 1944.
- manufacturers of this Model have been be referred to by a variety of codes such as:
  - . Maget, Berlin: cra
  - . Gustloff-Werke, Suhl: dfb
  - . Mauser-Werke, Berlin: ar
  - . Steyr-Daimler-Puch A.G., Steyr, Austria: bnz
  - . Waffenwerke Brunn A.G., Brunn: dot
- it is not clear to what extent the MG34 was produced by Rheinmetall - Borsig: Apolda (cpn), Berlin (aqx, cpo, hhg), Breslau (cpp), Dusseldorf (bwo), Sommerda (bmv, myx, nhr, rhs), and Unterluss (nyx).

Type

- crew served, belt fed, air cooled, light machine gun.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- short recoil operated, with a gas assist by means of a muzzle booster.
Serial Number	- serial number is marked on the receiver/frame and barrel jacket extension. - German serial number practices are as follows: serial number ranges from 1 to 999, after the first ten thousand item, a suffix was added as follows: - 1a to 999a then 1b to 9999b and so on.
Shots	- belt fed machine gun. - ammunition is packaged in 50 round non-disintegrating belts. - belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum. - a 75 round saddle drum magazine is available for this firearm (which is a true magazine).
Canadian Law Comments	- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted". - For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

82392 - 1	7.62MM NATO	N/A	540	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- rear left side of the receiver/frame is usually marked with; "MG 3e", the serial number, date of manufacture and the Rheinmetall trademark which is represented by a stylized 4-sided diamond within a circle.
- this firearm is the post WW II version of the original MG 42 designed, produced specifically for the 7.62MM Nato cartridge and then further modified to lighten the firearm as much as possible.
- this is a fully automatic, (subsequently converted to fire semi-automatic only) air-cooled, belt fed medium or general purpose machine gun utilizing a short recoil type of action which is gas-assisted by means of a recoil booster located within the flash hider; the bolt is of the roller locking type.
- features include;
- subsequent to manufacture, converted to semi-automatic fire only.
- metal stamping type of construction,
- variable cylic rate of fire for anti-aircraft use or for anti-personnel use through the changing of various differing masses of bolt and buffer mechanisms.
- quick-change barrel system,
- easily removeable bi-pod.

Manufacturer

- the trademark for Rheinische Metallwaren Fabrik, Rheinmetal, Sommerda, Germany is marked on the left side of the receiver/frame.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number plus the month and year of manufacture are marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- "7.62" is marked on the top of the barrel.
Shots	- belt fed machine gun. - the MG3 family of machine guns may be configured for either the US M13 disintegrating link ammunition belts (250 round belts) or the German DM6 disintegrating link ammunition belts or the DM1 non-disintegrating link ammunition belts (50 round belts). - belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum.

154569 - 3	5.56MM NATO	N/A	480	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

Model

- "MG4" may or may not be marked on the firearm.
- this is a newly-designed light machine gun designed by Heckler & Koch as its own version of the Belgian Minim/M249/C9 light machine gun.. The MG4 uses a gas-operated mechanism with a rotating bolt cammed by the bolt carrier, unlike the roller-locked bolt of the machine guns it was designed to replace.
- this machine gun is the small-calibre (5.56mm NATO) counterpart to the 7.62mm NATO MG5.
- features include: quick-change barrel with black oxide finish in several barrel lengths; bird-cage flash suppressor; open adjustable sights with Picatinny rail for mounting a variety of optical and night sights; folding bipod on the under-barrel gas tube; receiver and furniture finished in black colour scheme; and this machine gun may be seen in a variety of roles and configurations, including LMG, bipod or tripod mount, or vehicle mount with spade grips.

Manufacturer

- "Heckler & Koch", "HK" or the "HK" logo is marked on the firearm.

Action

- gas-operated.

Serial Number

- serial-numbered on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - belt-fed firearm.

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- the model and other identification information is located on the left rear of the receiver/frame, markings include: "MG42", serial number and factory identifier.
- originally manufactured from 1942 to 1945.
- this firearm is a full-automatic (or converted to semi-automatic fire subsequent to manufacture), air-cooled, belt fed medium or general purpose machine gun utilizing a short recoil type of action which is gas-assisted by means of a recoil booster located within the flash hider; the bolt is of the roller locking type.
- features include;
- full-automatic fire only,
- metal stamping type of construction,
- variable cylic rate of fire through the use of bolts of differing masses and different buffers; a lightweight bolt of 550 g at 1100 rds/min, and a heavier bolt of 950 g at 900 rds/min,
- quick-change barrel system,
- easily removeable bi-pod.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- manufactured from 1942 to 1945 by cottage industry on a piece-work basis and assembled at the "manufacturer's" factories.
- commonly identified by manufacturer's code.
- code is usually found with a two or four digit date. (eg: cra/42 and bnz 1944).
- manufacturers of this Model have been be referred to by a variety of codes, such as
  . Grossfuss, Dobeln - 'bpr';
  . Gustloff-Werke, Suhl - 'dfb';
  . Maget, Berlin - 'cra' (MAGET - Maschinenbau und Geratebau GmbH. This factory was controlled by Rheinmetall);
  . Mauser-Werke A.G., Berlin - 'ar'; and
  . Steyr-Daimler-Puch A.G., Steyr, Austria - 'bnz'.
- NOTE: it is not completely clear to what extent Rheinmetall was involved in the manufacture of the MG42.

Codes for Rheinmetall - Borsig: Apolda (cpn), Berlin (aqx, cpo, hhg), Breslau (cpp), Dusseldorf (bwo), Sommerda (bmv, myx, nhr, rhs), and Unterluss (nyx).

Type

- air-cooled medium machine gun.

Action

- short recoil operated, with a gas assist by means of a muzzle booster.

Serial Number

- located on left side of receiver/frame.
- German serial numbering practices are as follows: serial number ranges from 1 to 9999, after the first ten thousand items, a suffix was added as follows: - 1a to 9999a, then 1b to 9999b and so on. It is possible in any year that more than 270, 000 examples were manufactured by any single manufacturer to have a double letter suffix, such as 1aa to 9999aa and so on.

Shots

- belt fed machine gun.
- ammunition is packaged in 50 round non-disintegrating belts.
- belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum.
- a 75 round saddle drum magazine is available for this firearm (which is a true magazine).
- NOTE: all feed attachments for the MG34 family of machine guns may be utilized with the MG42 family of machine guns.

Canadian Law Comments

- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

Other Markings

- Located on the left side of the receiver: "MG42", serial number and factory identifier.

Remarks

- in Yugoslavian service, manufactured at ZASTAVA, the MG42 was named "SARAC" or "M53".
- the Italians manufactured this machine gun model (calibre 7.62 x 51 mm NATO) under the designation "MG42/59".
- in 1957, the West Germans Government recommenced manufacture of this firearm in various calibres as the "MG1", "MG1A1", and later, the "MG3" & MG3e.

- "GERMAN MACHINE GUN" is not marked on the firearm.
- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- the model and other identification information is located on the left rear of the receiver/frame, markings include: "MG42", serial number and factory identifier.
- originally manufactured from 1942 to 1945.
- this firearm is a full-automatic (or converted to semi-automatic fire subsequent to manufacture), air-cooled, belt fed medium or general purpose machine gun utilizing a short recoil type of action which is gas-assisted by means of a recoil booster located within the flash hider; the bolt is of the roller locking type.
- features include;
- full-automatic fire only,
- metal stamping type of construction,
- variable cylic rate of fire through the use of bolts of differing masses and different buffers; a lightweight bolt of 550 g at 1100 rds/min, and a heavier bolt of 950 g at 900 rds/min,
- quick-change barrel system,
- easily removeable bi-pod.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- manufactured from 1942 to 1945 by cottage industry on a piece-work basis and assembled at the "manufacturer's" factories.
- commonly identified by manufacturer's code.
- code is usually found with a two or four digit date. (eg: cra/42 and bnz 1944).
- manufacturers of this Model have been be referred to by a variety of codes, such as
  . Grossfuss, Dobeln - 'bpr';
  . Gustloff-Werke, Suhl - 'dfb';
  . Maget, Berlin - 'cra' (MAGET - Maschinenbau und Geratebau GmbH. This factory was controlled by Rheinmetall);
  . Mauser-Werke A.G., Berlin - 'ar'; and
  . Steyr-Daimler-Puch A.G., Steyr, Austria - 'bnz'.
- NOTE: it is not completely clear to what extent Rheinmetall was involved in the manufacture of the MG42.

Codes for Rheinmetall - Borsig: Apolda (cpn), Berlin (aqx, cpo, hhg), Breslau (cpp), Dusseldorf (bwo), Sommerda (bmv, myx, nhr, rhs), and Unterluss (nyx).

Type

- air-cooled medium machine gun.

Action

- short recoil operated, with a gas assist by means of a muzzle booster.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- German serial numbering practices are as follows: serial number ranges from 1 to 9999, after the first ten thousand items, a suffix was added as follows: - 1a to 9999a, then 1b to 9999b and so on. It is possible in any year that more than 270, 000 examples were manufactured by any single manufacturer to have a double letter suffix, such as 1aa to 9999aa and so on.

Shots

- belt fed machine gun.
- ammunition is packaged in 50 round non-disintegrating belts.
- belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum.
- a 75 round saddle drum magazine is available for this firearm (which is a true magazine).
- NOTE: all feed attachments for the MG34 family of machine guns may be utilized with the MG42 family of machine guns.

Canadian Law Comments

- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

Other Markings

- located on the left side of the receiver: "MG42", serial number and factory identification code.

Remarks

- in Yugoslavian service, manufactured at ZASTAVA, the MG42 was named "SARAC" or "M53".
- the Italians manufactured this machine gun model (calibre 7.62 x 51 mm NATO) under the designation "MG42/59".
- in 1957, the West German Government recommenced manufacture of this firearm in various calibres as the "MG1", "MG1A1", and later, the "MG3" & MG3e.

FRT Report

Firearm Reference Number (FRN): 35612
Make: German Machine Gun
Model: MG42

Summary

Make:	German Machine Gun
Model:	MG42
Manufacturer:	Gustloff-Werke (dfb)
Level:	Converted Automatics
Type:	Machine Gun
Action:	Converted Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
35612 - 1	8MM MAUSER	N/A	533	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
35612 - 2	8MM MAUSER	75	533	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- the model and other identification information is located on the left rear of the receiver/frame, markings include: "MG42", serial number and factory identifier.
- originally manufactured from 1942 to 1945.
- this firearm is a full-automatic (or converted to semi-automatic fire subsequent to manufacture), air-cooled, belt fed medium or general purpose machine gun utilizing a short recoil type of action which is gas-assisted by means of a recoil booster located within the flash hider; the bolt is of the roller locking type.
- features include;
- full-automatic fire only,
- metal stamping type of construction,
- variable cylic rate of fire through the use of bolts of differing masses and different buffers; a lightweight bolt of 550 g at 1100 rds/min, and a heavier bolt of 950 g at 900 rds/min,
- quick-change barrel system,
- easily removeable bi-pod.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- manufactured from 1942 to 1945 by cottage industry on a piece-work basis and assembled at the "manufacturer's" factories.
- commonly identified by manufacturer's code.
- code is usually found with a two or four digit date. (eg: cra/42 and bnz 1944).
- manufacturers of this Model have been be referred to by a variety of codes, such as
  . Grossfuss, Dobeln - 'bpr';
  . Gustloff-Werke, Suhl - 'dfb';
  . Maget, Berlin - 'cra' (MAGET - Maschinenbau und Geratebau GmbH. This factory was controlled by Rheinmetall);
  . Mauser-Werke A.G., Berlin - 'ar'; and
  . Steyr-Daimler-Puch A.G., Steyr, Austria - 'bnz'.
- NOTE: it is not completely clear to what extent Rheinmetall was involved in the manufacture of the MG42.

Codes for Rheinmetall - Borsig: Apolda (cpn), Berlin (aqx, cpo, hhg), Breslau (cpp), Dusseldorf (bwo), Sommerda (bmv, myx, nhr, rhs), and Unterluss (nyx).

Type

- air-cooled medium machine gun.

Action

- no longer capable of full automatic fire.

Serial Number

- located on left side of receiver.
- German serial numbering practices are as follows: serial number ranges from 1 to 9999, after the first ten thousand items, a suffix was added as follows: - 1a to 9999a, then 1b to 9999b and so on. It is possible in any year that more than 270, 000 examples were manufactured by any single manufacturer to have a double letter suffix, such as 1aa to 9999aa and so on.

Shots

- belt fed machine gun.
- ammunition is packaged in 50 round non-disintegrating belts.
- belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum.
- a 75 round saddle drum magazine is available for this firearm (which is a true magazine).
- NOTE: all feed attachments for the MG34 family of machine guns may be utilized with the MG42 family of machine guns.

Canadian Law Comments

- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

Other Markings

- located on the left side of the receiver: "MG42", serial number and factory identification code.

Remarks

- in Yugoslavian service, manufactured at ZASTAVA, the MG42 was named "SARAC" or "M53".
- the Italians manufactured this machine gun model (calibre 7.62 x 51 mm NATO) under the designation "MG42/59".
- in 1957, the West Germans Government recommenced manufacture of this firearm in various calibres as the "MG1", "MG1A1", and later, the "MG3" & MG3e.

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- the model and other identification information is located on the left rear of the receiver/frame, markings include: "MG42", serial number and factory identifier.
- originally manufactured from 1942 to 1945.
- this firearm is a full-automatic (or converted to semi-automatic fire subsequent to manufacture), air-cooled, belt fed medium or general purpose machine gun utilizing a short recoil type of action which is gas-assisted by means of a recoil booster located within the flash hider; the bolt is of the roller locking type.
- features include;
- full-automatic fire only,
- metal stamping type of construction,
- variable cylic rate of fire through the use of bolts of differing masses and different buffers; a lightweight bolt of 550 g at 1100 rds/min, and a heavier bolt of 950 g at 900 rds/min,
- quick-change barrel system,
- easily removable bi-pod.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- manufactured from 1942 to 1945 by cottage industry on a piece-work basis and assembled at the "manufacturer's" factories.
- commonly identified by manufacturer's code.
- code is usually found with a two or four digit date. (eg: cra/42 and bnz 1944).
- manufacturers of this Model have been be referred to by a variety of codes, such as
  . Grossfuss, Dobeln - 'bpr';
  . Gustloff-Werke, Suhl - 'dfb';
  . Maget, Berlin - 'cra' (MAGET - Maschinenbau und Geratebau GmbH)
  . Mauser-Werke A.G., Berlin - 'ar'; and
  . Steyr-Daimler-Puch A.G., Steyr, Austria - 'bnz'.
- NOTE: it is not completely clear to what extent Rheinmetall was involved in the manufacture of the MG42.

Codes for Rheinmetall - Borsig: Apolda (cpn), Berlin (aqx, cpo, hhg), Breslau (cpp), Dusseldorf (bwo), Sommerda (bmv, myx, nhr, rhs), and Unterluss (nyx).

Type

- air-cooled medium machine gun.

Action

- short recoil operated, with a gas assist by means of a muzzle booster.

Serial Number

- located on the left side of the receiver/frame.
- German serial numbering practices are as follows: serial number ranges from 1 to 9999, after the first ten thousand items, a suffix was added as follows: - 1a to 9999a, then 1b to 9999b and so on. It is possible in any year that more than 270, 000 examples were manufactured by any single manufacturer to have a double letter suffix, such as 1aa to 9999aa and so on.

Shots

- belt fed machine gun.
- ammunition is packaged in 50 round non-disintegrating belts.
- belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum.
- a 75 round saddle drum magazine is available for this firearm (which is a true magazine).
- NOTE: all feed attachments for the MG34 family of machine guns may be utilized with the MG42 family of machine guns.

Canadian Law Comments

- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

Remarks

- in Yugoslavian service, manufactured at ZASTAVA, the MG42 was named "SARAC" or "M53".
- the Italians manufactured this machine gun model (calibre 7.62 x 51 mm NATO) under the designation "MG42/59".
- in 1957, the West Germans Government recommenced manufacture of this firearm in various calibres as the "MG1", "MG1A1", and later, the "MG3" & MG3e.

124959 - 1	8MM MAUSER	N/A	533	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.
- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- "MG 42" is marked on the left rear of the receiver/frame.
- manufactured in 1945.
- this firearm is a full-automatic, air-cooled, belt fed medium or general purpose machine gun utilizing a short recoil type of action which is gas-assisted by means of a recoil booster located within the flash hider; the bolt is of the roller locking type.
- features include: full-automatic fire only; metal stamping type of construction; variable cyclic rate of fire through the use of bolts of differing masses and different buffers; quick-change barrel system; easily removable bi-pod.
- a lightweight bolt of 550 g provides a cyclic rate of 1100 rds/min, and a heavier bolt of 950 g produces 900 rds/min.

Manufacturer

- the manufacturer is identified by a three letter code of "swd", which is marked on the left side of the receiver/frame.
- the "swd" manufacturer's code was assigned in the spring of 1945 to "Maget".
- "MG42s" were manufactured from 1942 to 1945 by cottage industry on a piece-work basis and assembled at the main "manufacturer's" factories.
- manufacturers of the "MG42" have been be referred to by a variety of codes:
Grossfuss, Dobeln - 'bpr';
Gustloff-Werke, Suhl - 'dfb';
Maget, Berlin - 'cra' or 'swd' (MAGET - Maschinenbau und Geratebau GmbH)
Mauser-Werke A.G., Berlin - 'ar'; and
Steyr-Daimler-Puch A.G., Steyr, Austria - 'bnz'.
- NOTE: it is not completely clear to what extent Rheinmetall was involved in the manufacture of the MG42. Manufacturer codes for Rheinmetall - Borsig: Apolda (cpn), Berlin (aqx, cpo, hhg), Breslau (cpp), Dusseldorf (bwo), Sommerda (bmv, myx, nhr, rhs), and Unterluss (nyx).

Type

- air-cooled medium machine gun.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- short recoil operated, with a gas assist by means of a muzzle booster.
Serial Number	- serial number is located on the left side of the receiver/frame. - German serial numbering practices are as follows: serial number ranges from 1 to 9999, after the first ten thousand items, a suffix was added as follows: - 1a to 9999a, then 1b to 9999b and so on. It is possible in any year that more than 270, 000 examples were manufactured by any single manufacturer to have a double letter suffix, such as 1aa to 9999aa and so on.
Shots	- belt fed machine gun. - ammunition is packaged in 50 round non-disintegrating belts. - belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum. - a 75 round saddle drum magazine is available for this firearm (which is a true magazine). - NOTE: all feed attachments for the MG34 family of machine guns may be utilized with the MG42 family of machine guns.
Canadian Law Comments	- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted". - for further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".
Other Markings	- date of manufacture is marked on the left side of the receiver frame as a two letter code. - Maget (swd) used the date code "NC" for the year 1945. - Maget (cra) also used the date code "NC" for the year 1944.

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- the model and other identification information is located on the left rear of the receiver/frame, markings include: "MG42", serial number and factory identifier.
- originally manufactured from 1942 to 1945.
- this firearm is a full-automatic (or converted to semi-automatic fire subsequent to manufacture), air-cooled, belt fed medium or general purpose machine gun utilizing a short recoil type of action which is gas-assisted by means of a recoil booster located within the flash hider; the bolt is of the roller locking type.
- features include;
- full-automatic fire only,
- metal stamping type of construction,
- variable cylic rate of fire through the use of bolts of differing masses and different buffers; a lightweight bolt of 550 g at 1100 rds/min, and a heavier bolt of 950 g at 900 rds/min,
- quick-change barrel system,
- easily removeable bi-pod.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- manufactured from 1942 to 1945 by cottage industry on a piece-work basis and assembled at the "manufacturer's" factories.
- commonly identified by manufacturer's code.
- code is usually found with a two or four digit date. (eg: cra/42 and bnz 1944).
- manufacturers of this Model have been be referred to by a variety of codes, such as
  . Grossfuss, Dobeln - 'bpr';
  . Gustloff-Werke, Suhl - 'dfb';
  . Maget, Berlin - 'cra' (MAGET - Maschinenbau und Geratebau GmbH (1942 - 43) was originally ALKETT - Altmarkisces Kettenwerke GmbH, Berlin. This factory was controlled by Rheinmetall);
  . Mauser-Werke A.G., Berlin - 'ar'; and
  . Steyr-Daimler-Puch A.G., Steyr, Austria - 'bnz'.
- NOTE: it is not completely clear to what extent Rheinmetall was involved in the manufacture of the MG42.

Codes for Rheinmetall - Borsig: Apolda (cpn), Berlin (aqx, cpo, hhg), Breslau (cpp), Dusseldorf (bwo), Sommerda (bmv, myx, nhr, rhs), and Unterluss (nyx).

Type

- air-cooled medium machine gun.

Action

- no longer capable of full automatic fire.

Serial Number

- located on the left side of the receiver.
- German serial numbering practices are as follows: serial number ranges from 1 to 9999, after the first ten thousand items, a suffix was added as follows: 1a to 9999a, then 1b to 9999b and so on.
- it is possible in any year that more than 270, 000 examples were manufactured by any single manufacturer to have a double letter suffix, such as 1aa to 9999aa and so on.

Shots

- belt fed machine gun.
- ammunition is packaged in 50 round non-disintegrating belts.
- belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum.
- a 75 round saddle drum magazine is available for this firearm (which is a true magazine).
- NOTE: all feed attachments for the MG34 family of machine guns may be utilized with the MG42 family of machine guns.

Canadian Law Comments

- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

Other Markings

- located on the left side of the receiver: "MG42", serial number and factory identifier.

Remarks

- in Yugoslavian service, manufactured at ZASTAVA, the MG42 was named "SARAC" or "M53".
- the Italians manufactured this machine gun model (calibre 7.62 x 51 mm NATO) under the designation "MG42/59".
- in 1957, the West Germans Government recommenced manufacture of this firearm in various calibres as the "MG1", "MG1A1", and later, the "MG3" & MG3e.

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- NOTE: this firearm is clearly marked MG 42.
- rear left side of the receiver/frame is usually marked with; "MG 42", the serial number, date of manufacture and the Rheinmetall trademark which is represented by a stylized 4-sided diamond within a circle.
- this firearm is the post WW II version of the original MG 42 designed and produced specifically for the 7.62MM Nato cartridge.
- new production by Rheinmetall started circa 1957; prior to this date, Rheinmetall also undertook the conversion of original MG 42's from 8MM Mauser to 7.62MM Nato.
- while this machine gun is not correctly AKA (also-known-as) MG42/59, all MG42s in calibre 7.62MM NATO have come to be known as an MG42/59.
- this is a fully automatic, air-cooled, belt fed medium or general purpose machine gun utilizing a short recoil type of action which is gas-assisted by means of a recoil booster located within the flash hider; the bolt is of the roller locking type.
- features include;
- full automatic fire only, cyclic rate at 1100 rds/min.
- barrel is not chrome plated.
- metal stamping type of construction,
- bolt weight - 550 g
- quick-change barrel system,
- easily removeable bi-pod.

Manufacturer

- the Rheinmetall trademark which is represented by a stylized 4-sided diamond within a circle is usually located on the left rear side of the receiver/frame.

Type

- air-cooled medium machine gun.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- short recoil operated, with a gas assist by means of a muzzle booster. - no longer capable of full-automatic fire.
Serial Number	- serial number usually located on the rear left side of the receiver/frame.
Barrel	- barrel length without the barrel extension is 531 mm. - barrel length with the barrel extension is 565 mm.
Calibre	- calibre designation is marked on the rear left side of the receiver/frame as: 7.62.
Shots	- belt feed only.
Canadian Law Comments	- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted". - For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".
Remarks	- in Yugoslavian service, manufactured at ZASTAVA, the MG42 was named "SARAC" or "M53". - the Italians manufactured this machine gun model (calibre 7.62 x 51 mm NATO) under the designation "MG42/59". - in 1957, the West Germans Government recommenced manufacture of this firearm in various calibres as the "MG1", "MG1A1", and later, the "MG3" & MG3e.

Model

- NOTE: this firearm is clearly marked MG 42.
- rear left side of the receiver/frame is usually marked with; "MG 42", the serial number, date of manufacture and the Rheinmetall trademark which is represented by a stylized 4-sided diamond within a circle.
- this firearm is the post WW II version of the original MG 42 designed and produced specifically for the 7.62MM Nato cartridge.
- new production by Rheinmetall started circa 1957; prior to this date, Rheinmetall also undertook the conversion of original MG 42's from 8MM Mauser to 7.62MM Nato.
- while this machine gun is not correctly AKA (also-known-as) MG42/59, all MG42s in calibre 7.62MM NATO have come to be known as an MG42/59.
- this is a fully automatic, air-cooled, belt fed medium or general purpose machine gun utilizing a short recoil type of action which is gas-assisted by means of a recoil booster located within the flash hider; the bolt is of the roller locking type.
- features include;
- full automatic fire only, cyclic rate at 1100 rds/min.
- barrel is not chrome plated.
- metal stamping type of construction,
- bolt weight - 550 g
- quick-change barrel system,
- easily removeable bi-pod.

Manufacturer

- the Rheinmetall trademark which is represented by a stylized 4-sided diamond within a circle is usually located on the left rear side of the receiver/frame.

Action

- no longer capable of full automatic fire.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number usually located on the rear left side of the receiver/frame.
Barrel	- barrel length without the barrel extension is 531 mm. - barrel length with the barrel extension is 565 mm.
Calibre	- calibre designation is marked on the rear left side of the receiver/frame as: 7.62.
Shots	- belt feed only.
Canadian Law Comments	- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted". - For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".
Remarks	- in Yugoslavian service, manufactured at ZASTAVA, the MG42 was named "SARAC" or "M53". - the Italians manufactured this machine gun model (calibre 7.62 x 51 mm NATO) under the designation "MG42/59". - in 1957, the West Germans Government recommenced manufacture of this firearm in various calibres as the "MG1", "MG1A1", and later, the "MG3" & MG3e.

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- the model and other identification information is located on the left rear of the receiver/frame, markings include: "MG42", serial number and factory identifier.
- originally manufactured from 1942 to 1945.
- this firearm is a full-automatic (or converted to semi-automatic fire subsequent to manufacture), air-cooled, belt fed medium or general purpose machine gun utilizing a short recoil type of action which is gas-assisted by means of a recoil booster located within the flash hider; the bolt is of the roller locking type.
- features include;
- full-automatic fire only,
- metal stamping type of construction,
- variable cylic rate of fire through the use of bolts of differing masses and different buffers; a lightweight bolt of 550 g at 1100 rds/min, and a heavier bolt of 950 g at 900 rds/min,
- quick-change barrel system,
- easily removable bi-pod.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- manufactured from 1942 to 1945 by cottage industry on a piece-work basis and assembled at the "manufacturer's" factories.
- commonly identified by manufacturer's code.
- code is usually found with a two or four digit date. (eg: cra/42 and bnz 1944).
- manufacturers of this Model have been be referred to by a variety of codes, such as
  . Grossfuss, Dobeln - 'bpr';
  . Gustloff-Werke, Suhl - 'dfb';
  . Maget, Berlin - 'cra'. This factory was controlled by Rheinmetall);
  . Mauser-Werke A.G., Berlin - 'ar'; and
  . Steyr-Daimler-Puch A.G., Steyr, Austria - 'bnz'.
- NOTE: it is not completely clear to what extent Rheinmetall was involved in the manufacture of the MG42.

Codes for Rheinmetall - Borsig: Apolda (cpn), Berlin (aqx, cpo, hhg), Breslau (cpp), Dusseldorf (bwo), Sommerda (bmv, myx, nhr, rhs), and Unterluss (nyx).

Type

- air-cooled medium machine gun.

Action

- no longer capable of full automatic fire.

Serial Number

- located on left side of receiver.
- German serial numbering practices are as follows: serial number ranges from 1 to 9999, after the first ten thousand items, a suffix was added as follows: - 1a to 9999a, then 1b to 9999b and so on. It is possible in any year that more than 270, 000 examples were manufactured by any single manufacturer to have a double letter suffix, such as 1aa to 9999aa and so on.

Shots

- belt fed machine gun.
- ammunition is packaged in 50 round non-disintegrating belts.
- belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum.
- a 75 round saddle drum magazine is available for this firearm (which is a true magazine).
- NOTE: all feed attachments for the MG34 family of machine guns may be utilized with the MG42 family of machine guns.

Canadian Law Comments

- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

Remarks

- in Yugoslavian service, manufactured at ZASTAVA, the MG42 was named "SARAC" or "M53".
- the Italians manufactured this machine gun model (calibre 7.62 x 51 mm NATO) under the designation "MG42/59".
- in 1957, the West Germans Government recommenced manufacture of this firearm in various calibres as the "MG1", "MG1A1", and later, the "MG3" & MG3e.

Manufacturer

- manufactured from 1942 to 1945 by cottage industry on a piece-work basis and assembled at the "manufacturer's" factories.
- commonly identified by manufacturer's code.
- code is usually found with a two or four digit date. (eg: cra/42 and bnz 1944).
- manufacturers of this Model have been be referred to by a variety of codes, such as
  . Grossfuss, Dobeln - 'bpr';
  . Gustloff-Werke, Suhl - 'dfb';
  . Maget, Berlin - 'cra' (MAGET - Maschinenbau und Geratebau GmbH. This factory was controlled by Rheinmetall);
  . Mauser-Werke A.G., Berlin - 'ar'; and
  . Steyr-Daimler-Puch A.G., Steyr, Austria - 'bnz'.
- NOTE: it is not completely clear to what extent Rheinmetall was involved in the manufacture of the MG42.

Codes for Rheinmetall - Borsig: Apolda (cpn), Berlin (aqx, cpo, hhg), Breslau (cpp), Dusseldorf (bwo), Sommerda (bmv, myx, nhr, rhs), and Unterluss (nyx).

Type

- air-cooled medium machine gun.

Action

- short recoil operated, with a gas assist by means of a muzzle booster.

Serial Number

- located on the left side of the receiver/frame.
- German serial numbering practices are as follows: serial number ranges from 1 to 9999, after the first ten thousand items, a suffix was added as follows: - 1a to 9999a, then 1b to 9999b and so on. It is possible in any year that more than 270, 000 examples were manufactured by any single manufacturer to have a double letter suffix, such as 1aa to 9999aa and so on.

Shots

- belt fed machine gun.
- ammunition is packaged in 50 round non-disintegrating link belts.
- belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum.
- a 75 round saddle drum magazine is available for this firearm (which is a true magazine).
- NOTE: all feed attachments for the MG34 family of machine guns may be utilized with the MG42 family of machine guns.

Canadian Law Comments

- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

Other Markings

- located on the left side of the receiver: "MG42", serial number and factory identifier.

Remarks

- in Yugoslavian service, manufactured at ZASTAVA, the MG42 was named "SARAC" or "M53".
- the Italians manufactured this machine gun model (calibre 7.62 x 51 mm NATO) under the designation "MG42/59".
- in 1957, the West Germans Government recommenced manufacture of this firearm in various calibres as the "MG1", "MG1A1", and later, the "MG3" & MG3e.

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.
- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- located on the left side of the receiver "MG42", serial number and factory identifier.
- originally manufactured from 1942 to 1945.
- characteristics: automatic fire.
- this machine gun was used by many nations post World War II and went into production once again about 1950-1955.
- in Yugoslavian service, manufactured at ZASTAVA, it was named "SARAC" or "M53".
- the Italians manufactured the Model (calibre 7.62 x 51 mm NATO) under the designation "MG42/59".
- in 1957, the West Germans recommenced manufacture of this firearm in various calibres as the "MG1", "MG1A1", and later, the "MG3".
- manufacture of the "MG42" by other model names and in other calibres continues to this date.

Type

- air-cooled medium machine gun.

Action

- short recoil operated, with a gas assist by means of a muzzle booster.

Serial Number

- located on left side of receiver/frame.
- German serial numbering practices are as follows: serial number ranges from 1 to 9999, after the first ten thousand items, a suffix was added as follows: - 1a to 9999a, then 1b to 9999b and so on. It is possible in any year that more than 270, 000 examples were manufactured by any single manufacturer to have a double letter suffix, such as 1aa to 9999aa and so on.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- belt fed machine gun.
- ammunition is packaged in 50 round non-disintegrating belts.
- belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum.
- a 75 round saddle drum magazine is available for this firearm (which is a true magazine).
- NOTE: all feed attachments for the MG34 family of machine guns may be utilized with the MG42 family of machine guns.

Other Markings

- Located on the left side of the receiver: "MG42", serial number and factory identifier.
- manufactured from 1942 to 1945 by cottage industry on a piece-work basis and assembled at the "manufacturer's" factories.
- manufacturer is commonly identified by manufacturer's code.
- code is usually found with a two or four digit date. (eg: cra/42 and bnz 1944).
- manufacturers of this Model have been be referred to by a variety of codes, such as
  . Grossfuss, Dobeln - 'bpr';
  . Gustloff-Werke, Suhl - 'dfb';
  . Maget, Berlin - 'cra' (MAGET - Maschinenbau und Geratebau GmbH (1942 - 43) was originally ALKETT - Altmarkisces Kettenwerke GmbH, Berlin. This factory was controlled by Rheinmetall);
  . Mauser-Werke A.G., Berlin - 'ar'; and
  . Steyr-Daimler-Puch A.G., Steyr, Austria - 'bnz'.
- NOTE: it is not completely clear to what extent Rheinmetall was involved in the manufacture of the MG42.

Codes for Rheinmetall - Borsig: Apolda (cpn), Berlin (aqx, cpo, hhg), Breslau (cpp), Dusseldorf (bwo), Sommerda (bmv, myx, nhr, rhs), and Unterluss (nyx).

FRT Report

Firearm Reference Number (FRN): 119008
Make: German Machine Gun
Model: MG42/59

Summary

Make:	German Machine Gun
Model:	MG42/59
Manufacturer:	Maget (cra)
Level:	Converted Automatics
Type:	Machine Gun
Action:	Converted Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
119008 - 1	7.62MM NATO	N/A	531	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
119008 - 3	7.62MM NATO	75	531	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

- "LMG08/15", "MG08", "MG08/15", and "MG08/18" machine guns produced by German manufacturers for the German military during World War One are listed under "Maxim Machine Gun".

Model

- rear left side of the receiver/frame is usually marked with; "MG 42", the serial number, date of manufacture and the .
- this firearm is the World War II version of the original MG 42 remanufactured or modified by an unknown manufacturer specifically for the 7.62MM Nato cartridge.
- this is a fully automatic (converted to semi-automatic fire subsequent to manufacture by Maget [cra]), air-cooled, belt fed medium or general purpose machine gun utilizing a short recoil type of action which is gas-assisted by means of a recoil booster located within the flash hider; the bolt is of the roller locking type.
- features include;
- full automatic fire only,
- metal stamping type of construction,
- variable cylic rate of fire through the use of bolts of differing masses and different buffers; a lightweight bolt of 550 g at 1100 rds/min, and a heavier bolt of 950 g at 900 rds/min,
- quick-change barrel system,
- easily removable bi-pod.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- originally manufactured from 1942 to 1945 by cottage industry on a piece-work basis and assembled at the "manufacturer's" factories.
- at some time subsequent to World War II this machine gun was remanufactured and changed to 7.62MM NATO calibre.
- commonly identified by manufacturer's code.
- code is usually found with a two or four digit date. (eg: cra/42 and bnz 1944).
- manufacturers of this Model have been be referred to by a variety of codes, such as
  . Grossfuss, Dobeln - 'bpr';
  . Gustloff-Werke, Suhl - 'dfb';
  . Maget, Berlin - 'cra' (MAGET - Maschinenbau und Geratebau GmbH)
  . Mauser-Werke A.G., Berlin - 'ar'; and
  . Steyr-Daimler-Puch A.G., Steyr, Austria - 'bnz'.
- NOTE: it is not completely clear to what extent Rheinmetall was involved in the manufacture of the MG42.

Codes for Rheinmetall - Borsig: Apolda (cpn), Berlin (aqx, cpo, hhg), Breslau (cpp), Dusseldorf (bwo), Sommerda (bmv, myx, nhr, rhs), and Unterluss (nyx).

Type

- this firearm is the WW II version of the original MG 42 remanufactured or modified by an unknown manufacturer specifically for the 7.62MM Nato cartridge

Action

- no longer capable of full automatic fire.

Serial Number

- serial number usually located on the rear left side of the receiver/frame.

Barrel

- barrel length without the barrel extension is 531 mm.
- barrel length with the barrel extension is 565 mm.

Calibre

- calibre designation is marked on the rear left side of the receiver/frame as: 7.62.

Shots

- belt fed machine gun.
- ammunition is packaged in 50 round non-disintegrating belts.
- belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum.
- a 75 round saddle drum magazine is available for this firearm (which is a true magazine).
- NOTE: all feed attachments for the MG34 family of machine guns may be utilized with the MG42 family of machine guns.

Canadian Law Comments

- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

154568 - 3	7.62MM NATO	N/A	663	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GERMAN MACHINE GUN" is not marked on the firearm.

Model

- "MG5" may or may not be marked on the firearm.
- this is a newly-designed general-purpose machine gun designed by Heckler & Koch in 2006 to replace the MG3 family, which was based on the WW2-era MG42. When adopted into German service, the HK121 is known as the "MG5". The MG5 uses a gas-operated mechanism with a rotating bolt cammed by the bolt carrier, unlike the roller-locked bolt of the machine guns it was designed to replace.
- this machine gun is the large-calibre (7.62mm NATO) counterpart to the 5.56mm NATO MG4.
- features include: quick-change barrel with black oxide finish in several barrel lengths; bird-cage flash suppressor; open adjustable sights with Picatinny rail for mounting a variety of optical and night sights; folding bipod on the under-barrel gas tube; receiver and furniture finished in black or desert colour schemes; and this machine gun may be seen in a variety of roles and configurations, including LMG, bipod or tripod mount, vehicle mount with spade grips; or coaxial mount.

Manufacturer

- "Heckler & Koch", "HK" or the "HK" logo is marked on the firearm.

Action

- gas-operated.

Serial Number

- serial-numbered on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - belt-fed firearm.

FRT Report

Firearm Reference Number (FRN): 130281
Make: German Mortar
Model: 1916 Leichte Minenwerfer

Summary

Make:	German Mortar
Model:	1916 Leichte Minenwerfer
Manufacturer:	Rheinische Metallwaaren & Maschinenfabrik
Level:	Manufacturer Specifications and Commercial Customization
Type:	Mortar
Action:	Single-Shot
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
130281 - 2	76MM MORTAR	1	359	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	
130281 - 1	76MM MORTAR	1	416	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is not marked on the firearm; the make designation is derived from the characteristics of the device.

Model

- WW I German designation was "7.58 cm leMW" which stands for "7.58 cm leichte Minenwerfer" (light mine launcher).
- adopted for service circa 1916 by the German Armed Forces; it remained in limited service until 1940. Production ceased at the end of WW I.
- this weapon was produced in two versions, the original design had a barrel length of 359 mm and was known as the "7.58 cm leMW a.A" (alter Art) or "old model"; the second version had a barrel length of 416 mm and was known as the "7.58 cm leMW n.A" (neuer Art) or "new model".
- features include: this firearm can be described as light, short-barreled rifled muzzle loading mortar; trigger fired; usually mounted on a two wheeled carriage, it could be drawn by a single horse or three to four men; it was also available on a rectangular platform which could be carried by six men; it employed dual hydaulic cylinders on either side of the barrel to absorb recoil forces and spring recupeators to return the barrel to firing position; the newer version had a circular firing platform with a turntable which pemitted a full 360 degree traverse.
- the neurer Art/new model was also capable of direct fire between 0 and 27 degrees elevation which made it possible to use as an anti-tank gun if required.
- shell weight: 4.6 kg.
- velocity of projectile: 90 m/s (259 fps).
- weight of gun without carriage: 147 kg.
- range: 300 m to 1300 m.

Manufacturer

- manufacturer's name and/or trademark is usually marked on the firearm.

Action

- muzzle loaded, trigger fired.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number - known example was marked with a five digit number without prefix or suffix.

Notes

Make

- make is not marked on the firearm; the make designation is derived from the characteristics of the device.

Model

- WW II German designation; 8 cm GrW 34, which means 8 cm Granatwerfer 1934 ("grenade launcher" in English); also known as 8 cm sGrW 34 which means 8 cm schwere Granatwerfer 1934 ("heavy grenade launcher" in English).
- adopted for service in 1934 by the German Armed Forces; remained in service throughout WW II; production ceased at the end of WW II.
- weight; 62 kg with steel barrel; 57 kg with alloy barrel.
- weight of projectile/bomb; 3.5 kg.
- muzzle velocity; 174 mps / 571 fps.
- maximum range; 2400 m.
- Note re ammunition: official German calibre designation is 8 cm / 80 mm, however, actual/physical bore diameter is listed as 81.4 mm.

Manufacturer

- manufacturer's name or WW II wartime code is usually marked on the firearm.
- original design and manufacture accomplished by Rheinmetall-Borsig AG, however, by 1943 other firms were producing this piece.
- other manufacturers:
- 1) Gellnow, Oberdorla/Thuringia.
- 2) Ruhrstahl AG, Hattingen.
- 3) Guttler, Brieg n. Breslau.
- 4) Haas und Sohn, Neuhoffnungshutte n. Wetzlar.

Action

- muzzle loaded, drop fired.

Calibre

- official German calibre designation is 8 cm / 80 mm, however, actual/physical bore diameter is listed as 81.4 mm.

FRT Report

Firearm Reference Number (FRN): 44847
Make: German Service Rifle
Model: G41

Summary

Make:	German Service Rifle
Model:	G41
Manufacturer:	Berlin-Lubecker Maschinenfabriken (duv)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
44847 - 2	8MM MAUSER	5	550	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
44847 - 1	8MM MAUSER	10	550	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- developed by Walther during WW II, and used by the German Army of that era.

Model

- marked on the left side forward receiver as: G.41 duv (G.41 denotes model; Gewehr (rifle) adopted in 1941; duv denotes the manufacturer's code)
- do not confuse with the G.41 (M) which is a different firearm, or the G.41 (W), an earlier trial model.
- designated the G.41 upon official adoption in Dec. 1942; this is virtually the same firearm as the G.41(W) except for minor differences, which was initially developed and produced for trials by Walther, in competition with the G.41 (M) by Mauser.
- this firearm features a muzzle mounted gas system, comprising a 102mm long gas cylinder-sleeve enveloping the muzzle, a ring-piston encircling the barrel, and a cone-shaped muzzle blast-cup to concentrate and redirect the muzzle gases against the ring-piston.
- the breech-block is activated by the carrier, and comprises dual horizontally opposed lug-dogs which cam and lock into the front receiver recess as the breech-block and carrier moves into firing position.
- on the G41, the stamped sheet-metal operating rod is over the barrel, concealed by the synthetic top handguard, the cocking handle* is on the right top-rear of the breech-block carrier angled to the right; the manual hold-open**is on the left top-rear of the breech-block carrier, the last-shot hold open engages when the last shot has been discharged; and the manual safety is an "L" shaped flip-lever which protrudes from the rear of the receiver (SAFE to the right, FIRE to the left).
- *a number were built with the cocking handle on the LEFT, angled to the left, and with the integral dovetail scope-mount base on the right receiver.
- **a number were built without the manual hold-open latch feature.
- the stock is made of chemical and pressure bonded laminated birch and/or beechwood.

Manufacturer

- manufacturer identified only by the wartime code letters: duv
- note: the G.41 was also produced by Walther (ac)

Action

- gas operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- found on the left foreward receiver, below the rear sight.
- the serial number usually consists of the code letters of the manufacturer, the last two digits of the year of manufacture, a space, up to four digits and a letter suffix (except for the initial 9999 units of that year). example: duv43 1234e

Shots

- non-detachable box magazine.

FRT Report

Firearm Reference Number (FRN): 44905
Make: German Service Rifle
Model: G41(M)

Summary

Make:	German Service Rifle
Model:	G41(M)
Manufacturer:	Mauser
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
44905 - 2	8MM MAUSER	5	550	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
44905 - 1	8MM MAUSER	10	550	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is not marked on the firearm.
- developed by Mauser during WW II, and used by the German Army of that era.

Model

- Introduced in 1941.
- "G.41 (M) over the year of manufacturer is marked on the top of the receiver ring.
- G.41 in the model denotes Gewehr (rifle) of 1941, and (M) for Mauser.
- do not confuse with the G.41; or the G.41 (W).
- the G.41(M) was initially developed and 6700 units were produced for trials by Mauser, in competition with the G.41 (W) by Walther.
- this firearm features a muzzle mounted gas system, comprising a gas cylinder-sleeve enveloping the muzzle, a ring-piston encircling the barrel, and a cone-shaped muzzle blast-cup to concentrate and redirect the muzzle gases against the ring-piston.
- the yoked under-barrel operating rod engages a cam in the breech-block assembly, which rotates the front-locking lugged breech-bolt to lock/unlock it, in/out of the front receiver recess.
- on the G.41(M) the cocking handle looks like a bolt of a bolt-action rifle, it is rotated upward and drawn back to cock and activate the rifle; then returned to the forward horizontal position; during subsequent shots the cocking handle does not reciprocate.
- the stock is made of chemical and pressure bonded laminated birch and/or beechwood.
- the top handguard is of laminated wood; (on the G.41(W) and G.41 it is of synthetic plastic)

Manufacturer

- "(M)" in the model denotes the manufacture of Mauser-Werke AG, Oberndorf.

Action

- gas operation.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number usually consists of up to four digits and a letter suffix (except for the initial 9999 units of that year), approximately 20,000 made.
- the year-date is found on the top of the receiver ring, example: 1942
- the serial number is usually marked on the left side of the receiver/frame, example: 1234d

Shots

- non-detachable box magazine.

Notes

Make

- the make is not marked on the firearm.
- developed by Walther during WW II, and used by the German Army of that era.

Model

- Introduced in 1941.
- "G.41 (W)" is usually marked on the left side of the receiver/frame.
- G.41 in the model denotes, Gewehr (rifle) of 1941, and (W) for Walther.
- the G.41(W) was initially developed and produced for trials by Walther, in competition with the G.41 (M) by Mauser.
- do not confuse with the G.41 (M) which is a different firearm; or the almost identical rifle designated G.41 upon official adoption in 1942.
- this firearm features a muzzle mounted gas system, comprising a 102mm long gas cylinder-sleeve enveloping the muzzle, a ring-piston encircling the barrel, and a cone-shaped muzzle blast-cup to concentrate and redirect the muzzle gases against the ring-piston.
- the breech-block is activated by the carrier, and comprises dual horizontally opposed lug-dogs which cam and lock into the front receiver recess as the breech-block and carrier moves into firing position.
- on the G.41(W), the stamped sheet-metal operating rod over the barrel is concealed by the synthetic top handguard, the cocking handle is on the right top-rear of the breech-block carrier angled to the right; the manual hold-open latch is on the left top-rear of the breech-block carrier, the last-shot hold-open is engages when the last shot has been discharged; and the manual safety is an "L" shaped flip-lever which protrudes from the rear of the receiver (SAFE to the right, FIRE to the left).
- the stock and top handguard is made of chemical and pressure bonded laminated birch and/or beechwood.

Manufacturer

- the letter "(W)" in the model designation denotes Walther.
- the "Walther's" manufacturer code of "ac" may be marked on the left side of the receiver/frame.
- the "G.41 (W)" was developed and manufactured by Carl Walther Waffenfabrik of Zella-Mehlis, Thuringen, Germany.

46024 - 3	8MM MAUSER	10	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make - developed by Walther during WW II, and used by the German Army of that era.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- marked on the left side forward receiver/frame as: G.43 (G.43 denotes model; Gewehr (rifle) adopted in 1943)
- designated the G.43 upon official adoption on April 30 1943; this is virtually the same firearm as the K.43 except for minor differences.
- this firearm features an over-barrel gas system just ahead of mid-barrel, comprising a top-barrel gas-port, housing, cylinder, piston, and operating rod.
- the breech-block is activated by the breech-block carrier, and comprises dual horizontally opposed lug-dogs which cam and lock into the front receiver/frame recess as the breech-block and carrier moves into firing position.
- the cocking handle is on the left top-rear of the breech-block carrier angled to the left; the manual hold-open* is on the right top-rear of the breech-block carrier, the last-shot hold-open engages when the last shot has been discharged.

* a number were built without the manual hold-open latch feature.

- on the right side to the rear, usually there is an integral scope-mounting rail.**

** some production units lack this feature.

- the manual safety is an "L" shaped flip-lever which protrudes from the rear of the receiver (SAFE to the right, FIRE to the left).
- the stock is usually made of chemical and pressure bonded laminated birch and/or beechwood.
- the top handguard may be of natural wood, laminated wood, or synthetic plastic.
- the receiver/frame and breechblock carrier are rough steel forging or casting, machined only in the essential areas.

Manufacturer

- manufacturer Berliner-Lubecker Maschinenfabriken, identified only by the wartime code letters: duv
- note: the G.43 was also produced by Carl Walther, Zella-Mehlis, Thuringen (ac), and Gustloff Werke (bcd).

Action

- gas operated.

Serial Number

- found on the left foreward receiver.
- the serial number usually consists of the manufacturer's code, the last two digits of the year of manufacture, up to four digits and a letter suffix (except for the initial 9999 units of that year). example 1: duv44 1234d example 2: 3456e duv45 example 3: duv44 678

Barrel

- the normal barrel length is 550mm, however several sources report lengths of 610mm.

Shots

- detachable box magazine.

Other Markings

- markings on the receiver/frame include: FP; WaA214(also marked on the stock, front sight base, firing pin housing etc.).

Remarks

- total production, all manufacturers, educated estimation, 430,000; 1943: just over 3000 units, 1944: approx. 299,800 units, balance in 1945. Another 15,000 units made in April of 1945 by Berliner-Lubecker Maschinenfabrik.

46029 - 3	8MM MAUSER	10	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make - originally developed by Walther during WW II, and used by the German Army of that era.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- marked on the left side forward receiver/frame as: G.43 (G.43 denotes model; Gewehr (rifle) adopted in 1943)
- designated the G.43 upon official adoption on April 30 1943; this is virtually the same firearm as the K.43 except for minor differences.
- this firearm features an over-barrel gas system just ahead of mid-barrel, comprising a top-barrel gas-port, housing, cylinder, piston, and operating rod.
- the breech-block is activated by the breech-block carrier, and comprises dual horizontally opposed lug-dogs which cam and lock into the front receiver/frame recess as the breech-block and carrier moves into firing position.
- the cocking handle is on the left top-rear of the breech-block carrier angled to the left; the manual hold-open* is on the right top-rear of the breech-block carrier, the last-shot hold-open engages when the last shot has been discharged.

* a number were built without the manual hold-open latch feature.

- on the right side to the rear, usually there is an integral scope-mounting rail.**

** some production units lack this feature.

- the manual safety is an "L" shaped flip-lever which protrudes from the rear of the receiver/frame (SAFE to the right, FIRE to the left).
- the stock is usually made of chemical and pressure bonded laminated birch and/or beechwood.
- the top handguard may be of natural wood, laminated wood, or synthetic plastic.
- the receiver/frame and breechblock carrier are rough steel forging or casting, machined only in the essential areas.

Manufacturer

- Gustloff-Werke (bcd), manufacturer located in Weimar, identified only by the wartime code letters: bcd
- note: the G.43 was also produced by Walther (ac), and Berliner-Lubecker Machinenfabrik (duv).

Action

- gas operated.

Serial Number

- marked on the left side of the receiver/frame.
- the serial number usually consists of the manufacturer's code and up to four digits and a letter suffix (except for the initial 9999 units of that year). example 1: bcd 1234d example 2: 3456e bcd example 3: 678 bcd

Barrel

- the normal barrel length is 550mm, however several sources report lengths of 610mm.

Shots

- detachable box magazine.

Other Markings

- observed receiver/frame markings include: a star; FP; WaA134; WaA749; WaAA44(on action housing).
- other markings observed: "Heeresbergfuhrer" under an eidelweiss floral emblem is carved or stamped on the right side of the buttstock.
- most small components are marked "v" within a circle and an "A" within a circle is reported on a few examples.

Remarks

- total production, all manufacturers is estimated at 430,000; 1943: just over 3000 units, 1944: approx. 299,800 units, balance in 1945. Another 15,000 units made in April of 1945 by Berliner-Lubecker Maschinenfabrik.

Notes

Make

- the maker's designation of "ac" followed by a two digit date is usually marked on the left side of the receiver/frame.
- developed by Walther during WW II, and used by the German Army of that era.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "G.43" is marked on the left side of the receiver/frame.
- "G.43" denotes Gewehr (rifle) adopted in 1943.
- designated the G.43 upon official adoption on April 30 1943; this is virtually the same firearm as the K.43 except for minor differences.
- this firearm features an over-barrel gas system just ahead of mid-barrel, comprising a top-barrel gas-port, housing, cylinder, piston, and operating rod.
- the breech-block is activated by the breech-block carrier, and comprises dual horizontally opposed lug-dogs which cam and lock into the front receiver/frame recess as the breech-block and carrier moves into firing position.
- the cocking handle is on the left top-rear of the breech-block carrier angled to the left; the manual hold-open* is on the right top-rear of the breech-block carrier, the last-shot hold-open engages when the last shot has been discharged.

* a number were built without the hold-open latch feature.

- on the right side to the rear, usually there is an integral scope-mounting rail.**

** some production units lack this feature.

- the manual safety is an "L" shaped flip-lever which protrudes from the rear of the receiver (SAFE to the right, FIRE to the left).
- the stock is usually made of chemical and pressure bonded laminated birch and/or beechwood.
- the top handguard may be of natural wood, laminated wood, or synthetic plastic.
- the receiver/frame and breechblock carrier are rough steel forging or casting, machined only in the essential areas.

Manufacturer

- the "Walther's" manufacture wartime code of "ac" is usually marked on the left side of the receiver/frame.
- the G43 firearm was developed and manufactured by Walther (ac).
- the G43 was also produced by Berliner-Lubecker Machinenfabrik (duv) & (qve), and Gustloff Werke (bcd).

Action

- gas operated.

Serial Number

- the serial number is marked on the left side of the receiver/frame.
- the serial number is marked between the model "G.43" and the manufacturer's code "ac" and the last two digits of the year of manufacturer.
- example of markings on the left side of the receiver/frame: "G.43 977 ac 44".
- the serial number rationalization as follows: 1 to 9999, 1a to 9999a, 1b to 9999b and so on.

Barrel

- the normal barrel length is 550mm, however several sources report lengths of 610mm.

Shots

- detachable box magazine.

Other Markings

- markings on the receiver/frame include: FP; WaA359 (also marked on the stock, front sight base, firing pin housing etc.).
- WaAC10 is marked on the trigger guard of the early produced models.

Remarks

- total production, all manufacturers is estimated at 430,000.

339 - 1	8MM MAUSER	10	550	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- developed by Walther during WW II, and used by the German Army of that era.

Model

- Introduced in 1943.
- marked on the left side forward receiver as: K.43 (Karabiner (short rifle) adopted in 1943)
- do not confuse with the G.43.
- this firearm features an over-barrel gas system just ahead of mid-barrel, comprising a top-barrel gas-port, housing, cylinder, piston, and operating rod.
- the breech-block is activated by the breech-block carrier, and comprises dual horizontally opposed lug-dogs which cam and lock into the front receiver recess as the breech-block and carrier moves into firing position.
- the cocking handle is on the left top-rear of the breech-block carrier angled to the left, the last-shot hold-open engages when the last shot has been discharged.
- the manual safety is an "L" shaped flip-lever which protrudes from the rear of the receiver (SAFE to the right, FIRE to the left).
- the stock is usually made of chemical and pressure bonded laminated birch and/or beechwood.
- the top handguard may be of natural wood, laminated wood, or synthetic plastic.

Manufacturer

- manufacturer code 'duv' changed to 'qve' in 1945.

Action

- gas operated.

Serial Number

- found on the left front of the receiver.
- serial number rationalization as follows: 1 to 9999, 1a to 9999a, 1b to 9999b and so on.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Other Markings - manufacturer code three letters or numbers, model and proofs.

Remarks
- this model is virtually identical to the G43, it was re-designated the K.43 during German wartime armament standardization in April 1944.
- this firearm incorporates minor design differences intended to expedite production, such as further simplified machining, and elimination or simplification of some features.
- some may be found with or without any of the following: hold-open latch on the breech-block carrier, a right bolt guide-rib, or cleaning rod.
- on the right side to the rear, usually there is an integral scope-mounting rail. (some production units lack this feature).
- the receiver and breechblock carrier are rough steel forging or casting, machined only in the essential areas.
- total production of the K43 by all manufacturers as of May 1945 is believed to be approx. 500,000.

Notes

Make

- "GSG" is marked on the left side of the slide and on the grip panels.
- "MADE IN GERMANY" is marked on the left side of the slide.

Model

- "GSG" is marked on the left side of the slide.
- "FireFly" is marked on the right side of the slide.
- "FireFly" is a zinc alloy 22LR pistol made to resemble the Sig-Sauer P226 pistol, previously manufactured for Sig-Sauer as the "Mosquito".
- features include: dovetail front and rear sight with colour inserts; round, fixed barrel with or without a threaded muzzle; threaded barrel may have a screw protector cap; flat sided slide with rear gripping serrations; slide mounted ambidextrous safety; dust-cover accessory rail on the receiver/frame; takedown lever, decocking lever, action release lever and magazine release button are mounted on the left side of the receiver/frame; synthetic grip plates; single/double action trigger mechanism; black or tan finish.
- overall length with a 102mm (4") barrel is 182.88mm (7.2"), average weight is 0.7kg (24.6oz).
- metal receiver/frame housed within a synthetic grip

Manufacturer

- "GSG" is marked on the left side of the slide and on the grip panels.
- "MADE IN GERMANY" is marked on the left side of the slide.

Action

- blowback operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial-number is marked on the right side of the receiver/frame above the grip. - serial number of a referenced example consisted of a one letter prefix and six numbers. - the serial number is found on the right side trigger plate, visible through a cut-out in the synthetic grip frame in a manner similar to the SIG Sauer Model P250.
Calibre	- calibre designation is marked on the barrel, visible through the ejection port.
Shots	- detachable box magazine.

Notes

Make

- "GSG - 1911" was observed marked on the right side of the slide.
- "MADE IN GERMANY" and the "G.S.G." logo over "GERMAN SPORT GUNS" was observed marked on the side of the slide.

Model

- "GSG - 1911" was observed marked on the side of the slide.
- introduced in 2010.
- "GSG-1911" resembles a Colt model 1911A1 semi-automatic pistol.
- features include: fixed or adjustable sights; round barrel with a threaded muzzle; steel flat sided slide with rear grip serrations; 1911-A1 type steel receiver/frame with or without a Picatinny type accessory rail and a beavertail grip safety; ambidextrous manual thumb safety; exposed hammer; single action trigger mechanism; action release lever and magazine release button are mounted on the left side of the receiver/frame; checkered grip plates; blued, OD green, or tan finish.
- available with a dummy/fake sound suppressor/silencer.
- overall length with a 127 mm barrel is 216 mm.
- overall length with a 127 mm barrel and the fake suppressor installed is 320 mm.
- average weight is from 0.975 kg to 1.076 kgs.

Manufacturer

- German Sport Guns GmbH is a manufacturer of semi-automatic firearms located in Arnsberg, Germany.
- "MADE IN GERMANY" and the "G.S.G." logo over "GERMAN SPORT GUNS" was observed marked on the side of the slide.
- "German Sport Guns" also use the acronym "G.S.G".
- "German Sport Guns" was founded in 2002.
- "German Sport Guns" logo is an oval shape superpose over a circle having "G.S.G" at it centre.
- "G.S.G" and "Made in Germany" is marked on the left side of the receiver/frame.
- "German Sport Guns" is a manufacturer of semi-automatic firearms and airsoft versions of popular weapons.
- "German Sport Guns" was located in Arnsberg, and now Ense-Höingen Germany.

Action

- simple blowback operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number was observed marked on the right side of the receiver/frame forward of the trigger, and repeated on the slide and barrel. - observed serial number consisted of a letter "A" prefix and six numbers. - observed serial number consisted of a letter "M" prefix and six numbers.
Calibre	- marked on the side of the slide.
Shots	- detachable box magazine.
Canadian Law Comments	- the German Sports Guns, Model GSG1911 is also sold as the GSG - 1911 AD - OPS; this variant model is available with a "Faux Supressor" (GSG part number 411.30.0002.0). - this dummy Supressor accessory for the GSG1911 handgun does not fall into the ambit of "prohibited device" as "a device or contrivance designed or intended to muffle or stop the sound or report of a firearm".

Notes

Make

- "G.S.G" or "German Sport Guns" may be marked on the left side of the firearm.
- "German Sport Guns" also use the acronym "G.S.G".
- "German Sport Guns" logo is an oval shape superpose over a circle having "G.S.G" at it centre.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "GSG-5" is marked on both side of the receiver/frame.
- "GSG-5" variants are based on the Heckler & Koch MP5 submachine gun.
- introduced in 2002 with American importation beginning in 2008.
- "GSG-5" was produced in several variants:
GSG-5 A: with a 229mm (9") barrel.
GSG-5 L: with a 414mm (16.3") barrel, designed to meet the legal requirements for minimum barrel length and overall length in several countries (including the United States). The longer barrel is covered with a barrel shroud (mock suppressor) for aesthetic purposes.
GSG-5 SD: Similar to GSG-5 L but with both a larger fore grip and mock suppressor, similar in look to a MP5-SD. Pre 2010 manufactured mock suppressor may actually act as suppressor.
GSG-5P: Pistol variant with an end cap instead of a buttstock. Barrel length is identical to the "A" version.
GSG-5PK: Similar to the GSG-5P, with a 119mm (4.7") barrel and shorter handguard.
- features include: threaded fake suppressor going over a smooth barrel or threaded muzzle for flash hider; circular front sight protector and adjustable rotating drum rear sight; two aluminum halves receiver/frame construction which are joined together with a series of screws; cocking handle located on the forward top left side of the receiver/frame; wood or synthetic handguard; pistol grip and trigger guard assembly is made of synthetic material and is housing the trigger mechanism; magazine disconnect safety; ambidextrous safety selector; wood or synthetic rifle, folding or collapsible stock; black, nickel, applied coloured or camouflage finish.
- overall length with a 414mm (16.3") barrel is 854mm (33.6") and the average weight is 2.54kgs (5.6lbs).

Manufacturer

- "German Sport Guns" also use the acronym "G.S.G".
- "German Sport Guns" was founded in 2002.
- "German Sport Guns" logo is an oval shape superpose over a circle having "G.S.G" at it centre.
- "G.S.G" and "Made in Germany" is marked on the left side of the receiver/frame.
- "German Sport Guns" is a manufacturer of semi-automatic firearms and airsoft versions of popular weapons.
- "German Sport Guns" was located in Arnsberg, and now Ense-Höingen Germany.

Action

- blowback operated.

Serial Number

- serial number of an observed example is marked on the right side of the receiver/frame and on the bolt housing and consisted of a letter prefix and six numbers.

Calibre

- "cal. 22lr" or "cal.22LR HV" may be marked on the side of the firearm.

Shots

- detachable box magazine.

Other Markings

- an observed specimen was marked "Canadian Version" and "Blue Line".
- other markings may include: "Made in Germany" and "READ MANUAL BEFORE USE".

Notes

Make	- "German Sport Guns" also use the acronym "G.S.G". - "German Sport Guns" logo is an oval shape superpose over a circle having "G.S.G" at it centre.
Model	- "GSG-522" is marked on the magazine well of an observed example. - "GSG522" is a 22 version of the Heckler & Koch model MP5 submachine gun. - features include: post front sight with protectors and rotary aperture rear sight; round rifled barrel with flash hider, barrel shroud or faux sound suppressor; receiver/frame has a removable Picatinny/Weaver equipment rail; cocking lever is mounted on the left side of the cocking tube; ambidextrous safety lever is mounted on the trigger group housing; magazine release lever is located on the rear of the magazine well; wood or synthetic forearm; pistol grip is an integral part of the removable trigger housing; integral sling attachment point in front of the trigger guard; removable wood fixed stock or synthetic fixed, folding or retractable buttstock; removable bipod; black, camouflage or nickel finish. - overall length with a 230 mm barrel and a fixed stock is 714 mm, and average weight is 3 kgs. - overall length with a 414 mm barrel and a fixed stock is 855 mm, and average weight is 3. 06 kgs.
Manufacturer	- "German Sport Guns" also use the acronym "G.S.G". - "German Sport Guns" was founded in 2002. - "German Sport Guns" logo is an oval shape superpose over a circle having "G.S.G" at it centre. - "G.S.G" and "Made in Germany" is marked on the left side of the receiver/frame. - "German Sport Guns" is a manufacturer of semi-automatic firearms and airsoft versions of popular weapons. - "German Sport Guns" was located in Arnsberg, and now Ense-Höingen Germany.
Action	- blowback operated.
Serial Number	- the serial number is marked on the right side of the receiver/frame. - serial number of a referenced example consisted of a one letter (A) prefix and six numbers.
Calibre	- "cal. 22lr" or "cal.22LR HV" is marked on the right side of the receiver/frame.
Shots	- detachable box magazine.
Canadian Law Comments	- there is a 2, 10, 15, 22, and 110 shot magazine available for this Model firearm. - this firearm Model is manufactured in both rifle and handgun configurations. The magazine is interchangeable between the two configurations and is considered a "handgun" magazine. Because handguns are limited to a ten shot magazine capacity in accordance with the CC PART III, S. 84, Regulations PART 4 Para 3. (1) (b) "The Former Cartridge Magazine Control Regulations", this limits the magazine capacity for the rifle configuration to ten (10) shots, despite the firearm being designed to use rim-fire ammunition.

FRT Report

Firearm Reference Number (FRN): 133659
Make: German Sport Guns
Model: GSG-92

Summary

Make:	German Sport Guns
Model:	GSG-92
Manufacturer:	Cybergun
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Air,Spring or Gas
Country of Manufacturer:	TAIWAN
Serial Numbering:	See Note
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
133659 - 2	BB	28	105	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	
133659 - 1	BB	28	113	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Non-Commercial Customization	

Notes

Make

- "GSG 92" was observed marked on the right side of the slide.
- "MADE IN GERMANY" and the "G.S.G." logo over "GERMAN SPORT GUNS" was observed marked on the side of the slide.
- "GSG 92" is manufactured in Taiwan for Cybergun S.A.

Model

- "GSG 92" was observed marked on the side of the slide.
- "GSG-92" resembles a Beretta model 92F semi-automatic pistol.
- features include: smooth bore, round barrel; flat sided slide with grip serrations and fixed or drift adjustable sights; ambidextrous manual thumb safety; exposed hammer; double action trigger mechanism; checkered, plastic grip plates; blue/black finish.
- overall length is 216 mm (8.5") and average weight is approximately 1.2kgs (2.42lbs.)

Manufacturer

- Cybergun was formally known as Les 3 Pylones.
- Les 3 Pylones was owned by Jerome Marsac and Vincent Bouvet.
- Les 3 Pylones launched Air Soft Guns in 1993.
- Les 3 Pylines changed it's name to CYBERGUN in 1999.
- Cybergun S.A. has air guns and airsoft products manufactured under various tradenames.
- Cybergun S.A. of France has licensed the use of the following trademarks: Auto Ordnance 1911A1, Blaser, Colt, Desert Eagle, DPMS, FAMAS, FN (FN Herstal), Galil, GSG (German Sport Guns), Jericho, Kalashnikov, Magnum Research, Mauser, Mossberg, Sauer, Shmeisser, Sig Sauer, Sigpro, Smith & Wesson, Swiss Arms, Tanfoglio, Taurus, Tavor 21, Thompson, and Uzi.
- Cybergun established Softair Depot stores in the U.S.A. and and acquired Softair USA of San Francisco in 2004.
- Cybergun acquired Palco Marketing, a wholesaler based in Minnesota in 2007.
- Cybergun acquired Tech Group in 2008.
- Cybergun aquired the Taiwanese company Inokatsu in 2010.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- CO2 operated. - does not discharge a projectile at a muzzle velocity exceeding 152.4 mps and/or a muzzle energy exceeding 5.7 Joules.
Serial Number	- serial number was observed marked on the right side of the receiver/frame. - observed serial number consisted of a letter "W" prefix and eleven numbers.
Calibre	- ".177 CAL 4.5mm" is marked on the side of the receiver/frame.
Shots	- removable CO2 cylinder holder and magazine.

144006 - 2	22 LR	10	127	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "German Sport Guns" also use the acronym "G.S.G".
- "German Sport Guns" logo is an oval shape superpose over a circle having "G.S.G" at it centre.

Model

- "GSG - 9" and "22" in a smaller font is marked on the left side of the slide.
- "GSG - 922" is a variant of the Colt 1911-A1 pistol.
- "GSG - 922" was introduced in 2013.
- features include: fixed blade front sight and a dovetailed, adjustable rear sights; round barrel with a threaded muzzle; flat sided slide with front and rear grasping serrations; 1911-A1 type receiver/frame with a screw on accessory rail and an extended beavertail grip safety; exposed skeletonized hammer; skeleton trigger; single action trigger mechanism; ambidextrous, extended manual safety lever; action release lever and magazine release button are mounted on the left side of the receiver/frame; checkered grip plates; black/blue, green, tan and black/red finish.
- available with a dummy/fake sound suppressor/silencer.
- overall length with a 86 mm barrel is 178 mm, and the average weight is 0.905 kg.
- overall length with a 86 mm barrel and the fake sound suppessor installed is 279 mm, and the average weight is 0.977 kg.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "MADE IN GERMANY" and the "G.S.G." logo over "GERMAN SPORT GUNS" was observed marked on the side of the slide. - "German Sport Guns" also use the acronym "G.S.G". - "German Sport Guns" was founded in 2002. - "German Sport Guns" logo is an oval over a circle with "G.S.G" at it centre. - "G.S.G" and "Made in Germany" are marked on the left side of the receiver/frame. - "German Sport Guns" is a manufacturer of semi-automatic firearms and airsoft versions of popular weapons. - "German Sport Guns" was located in Arnsberg, and now Ense-Höingen Germany.
Action	- blowback operated.
Serial Number	- serial number was observed marked on the right side of the receiver/frame, and repeated on the slide and barrel. - serial number observed consisted of a letter prefix and six numbers.
Calibre	- "cal.22LR HV" is marked on the right side of the slide.
Shots	- detachable box magazine.

120456 - 2	9MM LUGER	50	248	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is not marked on the firearm.

Model

- the model designation is marked on the firearm.
- this is a standard-pattern open-bolt submachinegun, based in large part on the Finnish M44 (which was itself based on the Soviet PPS-43); this firearm was designed by Messrs. Daugs and Vorgrimmler as the DUX 51, who had the design built in Spain, at the Oviedo Arsenal. After testing the DUX 51, the German Border Police adopted a slightly modified version as the DUX 53. Later testing and modification by the German armed forces/ "Bundeswehr" resulted in the DUX 59.
- features include: stamped, folded, and welded construction; synthetic or wooden pistol-grip; square barrel shroud with ventilation/cooling holes and a folded "muzzle brake"; open "L"-type sights; PPS-43-type safety lever that intrudes into the trigger-guard when set on "safe"; and an over-folding stamped steel stock.

Manufacturer

- the manufacturer may not be marked on the firearm; this firearm was manufactured for the German Border Police by the Oviedo Arsenal, who obtained the rights to manufacture this firearm from its inventor(s).

Action

- recoil-operated; full-automatic only.

Serial Number

- numbered on receiver/frame.

Shots

- detachable box magazine; this firearm uses the staggered four-column box magazine originally used in the Suomi submachinegun.

120458 - 2	9MM LUGER	32	250	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	
120458 - 3	9MM LUGER	40	250	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is not marked on the firearm.

Model

- the model designation is marked on the firearm.
- this is a standard pattern, "open bolt" submachine gun, based in large part on the Finnish M44 (which was itself based on the Soviet PPS-43); this firearm was designed by Messrs. Daugs and Vorgrimmler as the DUX 51, who had the design built in Spain, at the Oviedo Arsenal. After testing the DUX 51, the German Border Police adopted a slightly modified version as the DUX 53. Later testing and modification by the German armed forces/ "Bundeswehr" resulted in the DUX 59.
- features include: stamped, folded, and welded construction; cocking handle on the left side of the firearm; synthetic or wooden pistol-grip; round barrel shroud with ventilation/cooling holes; open "L"-type sights; sliding safety on the left side of the receiver/frame above the pistol-grip; and an over-folding stamped steel stock.
- unlike the parent DUX 53 design (which uses the four column staggered box magazine of the Suomi), this submachine gun uses a standard pattern dual-position curved box magazine, available in capacities of 32 and 40 cartridges.

Manufacturer

- manufacturer markings unknown, this firearm was manufactured for the German armed forces by Anschutz (although due to delays in development it was never officially adopted into service).

Action

- blowback operated, full-automatic only.

Serial Number

- numbered on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Notes

Make

- a copy of the British Sten Machine Carbine, (sub-machinegun) manufactured in Germany during late 1944 and early 1945 (World War II), intended for covert and guerilla operations.

Model

- visually duplicates the British Sten Machine Carbine, Mark II, but parts are metric dimensioned and not usually interchangeable.
- may be distinguished from the original by careful examination of details such as: comparison of dimensions, thread diameter and pitch, weld charactaristics, etc.
- these firearms are marked to replicate the original British Sten Machine Carbine, Mark II, including British proof-marks.
- 25,000 ordered from Mauser in late 1944, approximately 28,000 delivered before February 1945.
- DO NOT CONFUSE WITH THE (BRITISH) STEN MARK II, OR WITH THE MP3008 (manufactured after completion of the Geraet Potsdam order), which is also based on the "STEN GUN" design, was produced with altered features with German proof and inspection marks.

Manufacturer

- not marked: the only manufacturer was reported to be Mauser, but may be almost impossible to determine without careful detailed examination, as it was intended to be a near-exact copy of the Sten Mark II, and is not marked with any markings to disclose its German origin of manufacture.

Action

- blowback operated.

Serial Number

- marked on the top of the magazine housing or on the body of the receiver/frame.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - the select fire button is marked "R" on the left side for "Rounds" (single round), and "A" on the right side for Automatic fire.

57601 - 2	9MM LUGER	32	197	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- make is not marked on the firearm.
- a copy based on the general design of the British Sten Machine Carbine (sub-machinegun) mostly manufactured during the closing year of World War II (1945) for the German Military, principally used by the Volkstrum (People's Militia).

Model

- these firearms are not marked as to model, or caliber.
- a copy based on the general design of the British Sten Machine Carbine; German production models were usually built with vertical magazine attachment (vs. horizontal left-side magazine attachment of the Sten) to use the magazine of the MP38/40 and most non-moving components, such as the trigger housing and magazine housing were welded together (vs. dis-mantleable feature of the Sten)
- incorporates many features of the Sten Mark II, modified for speedy manufacture of the era, mainly for simplicity and ease of production: stamped sheet steel or tube receiver-body with weld attached barrel, steel pipe or stamped steel skeleton butt-stock or slab-sided wood buttstock, usually lacks the tubular steel forward handguard.
- the select fire button is marked "E" on the left side for "Einzelfeuer" (single fire), and "D" on the right side for "Dauerfeuer" (full-automatic fire).
- Do Not Confuse with "Geraet Potsdam", which were virtually exact duplicates of the British Sten Machine Carbine, Mark II, including British proof-marks. (see Sten Mark II)

Manufacturer

- most manufacturers may be determined by manufacturer's wartime code, or by the "Waffenamnt" [German inspector's mark, or proof mark].
- specimens which display the following codes have been reported:

fxo.....manufacturer identified as Haenel CG.
byf.....manufacturer identified as Mauser.
nea.....manufacturer identified as Walter Steiner Eisenkonstruktionen.
tjk.....(manufacturer unidentified)
tvw.....(manufacturer unidentified)
rde.....(manufacturer unidentified)

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- no longer capable of full automatic fire.
Serial Number	- may be marked on the body or the magazine housing. - the serial number usually consists of the code letters of the manufacturer, the last two digits of the year of manufacture, up to four digits and a letter suffix (except for the initial 9999 units of that year). example: fxo 45 1234e - some firearms reported to be un-numbered/undated.
Shots	- detachable box magazine, designed for the MP38/40.

Action:	Full Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
57503 - 2	9MM LUGER	5	197	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	
57503 - 1	9MM LUGER	32	197	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- a copy based on the general design of the British Sten Machine Carbine (sub-machinegun) mostly manufactured during the closing year of World War II (1945) for the German Military, principally used by the Volkstrum (People's Militia).

Model

- these firearms are not marked as to model, or caliber.
- a copy based on the general design of the British Sten Machine Carbine; German production models were usually built with vertical magazine attachment (vs. horizontal left-side magazine attachment of the Sten) to use the magazine of the MP38/40 and most non-moving components, such as the trigger housing and magazine housing were welded together (vs. dis-mantleable feature of the Sten)
- incorporates many features of the Sten Mark II, modified for speedy manufacture of the era, mainly for simplicity and ease of production: stamped sheet steel or tube receiver-body with weld attached barrel, steel pipe or stamped steel skeleton butt-stock or slab-sided wood buttstock, usually lacks the tubular steel forward handguard.
- the select fire button is marked "E" on the left side for "Einzelfeuer" (single fire), and "D" on the right side for "Dauerfeuer" (full-automatic fire).
- Do Not Confuse with "Geraet Potsdam", which were virtually exact duplicates of the British Sten Machine Carbine, Mark II, including British proof-marks. (see Sten Mark II)

Manufacturer

- most manufacturers may be determined by manufacturer's wartime code, or by the "Waffenamnt" [German inspector's mark, or proof mark].
- specimens which display the following codes have been reported:

fxo.....manufacturer identified as Haenel CG.
byf.....manufacturer identified as Mauser.
nea.....manufacturer identified as Walter Steiner Eisenkonstruktionen.
tjk.....(manufacturer unidentified)
tvw.....(manufacturer unidentified)
rde.....(manufacturer unidentified)

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- select fire, straight blow back operation.
Serial Number	- may be marked on the body or the magazine housing. - the serial number usually consists of the code letters of the manufacturer, the last two digits of the year of manufacture, up to four digits and a letter suffix (except for the initial 9999 units of that year). example: byf 45 1234e - some firearms reported to be un-numbered/undated.
Shots	- detachable box magazine, designed for the MP38/40.

Notes

Make

- GERMANIA WAFFENWERKE" is marked on the barrel.
- "GERMANIA" was a trade-name owned by JG Anschutz.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is a hinge action single-shot target pistol, manufactured by Anschutz under the "Germania" trade-name prior to World War Two.
- these pistols were often used for indoor or "schuetzen"-style target-shooting, and are commonly called "kipplaufpistolen" (tipping-barrel pistols).
- features include: blued finish; open adjustable sights; round or octagonal barrel; walnut forearm and grip-plates; a thumb-operated opening lever on the left side of the receiver/frame; and an exposed, manually-cocked hammer on the rear of a sloped receiver/frame.

Manufacturer

- GERMANIA WAFFENWERKE" is marked on the barrel.
- "GERMANIA" was a trade-name owned by JG Anschutz.

Action

- break open barrel.

Serial Number

- stamped on bottom of the pistol grip.

Notes

Make

- the "GEVARM" logo is marked on the left side on the receiver/frame.
- "Gevarm" is a trade name used by Gevelot.

Model

- model designation is marked on the trigger guard in two lines as "920" and "C".
- this is a "Manufrance" model "Perfex" sold by "Gevolt" under the "Gevarm" trade name and the model "920C" designation.
- features include: interchangeable plain round barrel with bead front sight; solid top receiver/frame with right side ejection port and bottom loading port; tubular magazine; cartridge cut off lever mounted on the left side and action release button mounted on the right side of the receiver/frame; cross bolt safety mounted on the rear of the trigger guard; checkered hardwood forearm and pistol grip butt stock with pistol grip cap and ventilated brown rubber recoil pad with white line spacer; blued finish.

Manufacturer

- "ManuFrance - St. Etienne" is marked on the right hand side of the barrel.
- "MANUFRANCE" is the trade name for "Manufacture Francaise d'Armes et Cycles de Saint-Etienne" of St. Etienne, France.
- gun maker since 1893.

Action

- gas operated.

Serial Number

- serial number is marked on the receiver/frame.

Calibre

- gauge and chamber length are marked on the side of the barrel.

Shots

- tubular magazine mounted under the barrel.

Notes

Make

- the "GEVARM" logo is marked on the left side on the receiver/frame.
- "Gevarm" is a trade name used by Gevelot.

Model

- the model designation may be marked on the rear trigger guard tang.
- this is a "Manufrance" model "Perfex" sold by "Gevelot" under the "Gevarm" trade name and the model "920P" designation.
- features include: chrome lined plain blued round removable barrel with bead front sight; solid top black anodize aluminum alloy receiver/frame with bottom feed, and side ejection port; cross bolt safety at the back of the trigger guard; breech block release on the right side of the receiver/frame; magazine cut off lever located on the lower front on the left side of the receiver/frame; gas piston and recoil spring located inside the front of the tubular magazine; sling swivels; checkered wooden pistol grip stock and forearm.
- overall length for 711mm barrel is 1222mm (48 1/4"), average weight is 2.95kg (6lbs).
- also available as the Gevarm model 920 VR which comes with a ventilated rib barrel.

Manufacturer

- "ManuFrance - St. Etienne" is marked on the right side of the barrel.
- "MANUFRANCE" is the trade name for "Manufacture Francaise d'Armes et Cycles de Saint-Etienne" of St. Etienne, France.
- gun maker since 1893.

Action

- gas operated.

Serial Number

- serial number is marked on the lower front left side of the receiver/frame.
- sample examined consits of six sequential numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- the calibre designation is marked on the left side of the barrel, eg. 12 GAUGE 2 3/4.
Shots	- tubular magazine mounted below the barrel.
Other Markings	- the left side of the barrel is marked "FUSIL PERFEX BREVETE S.G.D.G. FRANCE ET ETRANGER" over "MADE IN FRANCE" over "CHROME LINED FOR 12 GAUGE 2 3/4 CHOKE". - "PERFEX" is marked in front of the trigger guard. - the buttplate is marked with Manufacture Francaise d'Armes & Cycles de St-Etienne's logo, eg. the letters MF surrounded by a laurel wreath.

FRT Report

Firearm Reference Number (FRN): 4659
Make: Gevarm
Model: A3

Summary

Make:	Gevarm
Model:	A3
Manufacturer:	Manufacture Francaise d'Armes & Cycles de St-Etienne (MF)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	FRANCE
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
4659 - 4	22 LR	8	495	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
4659 - 1	22 LR	8	533	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
4659 - 5	22 LR	20	495	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make appears on the barrel.

Model

- this is one of a series of 22 LR semi-automatic rifles built by Gevelot/Gevarm; these rifles are all very similar in general shape and functioning (and are all characteristically marked "Carabine Automatique"), but do have specific characteristics that allow them to be uniquely identified.
- the A 3 version of this series was built primarily as a target rifle that could also be used as a hunting or plinking rifle; to this end, they have a tangent-adjustable rear sight, and a hooded front sight that can accept various "Globe"-type front sight inserts; Gevarm made a similar rifle with similar sights (known as the A 7) that differs only in that the A 7 has a conventional separate firing pin, rather than the machined "vertical wedge" firing pin across the bolt face of the A 3.
- all of Gevarm's 22 LR rifles except for the E 1 share a one-piece pistol-grip stock, and a tubular one-piece receiver; the E 1 has a two piece stock.

Manufacturer

- the manufacturer's name does not appear on the firearm.

Action

- blowback operated.

Serial Number

- appears on the barrel or the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- marked on the left side.
Shots	- This rifle uses an 8 round detachable box magazine. Rifles chambered for 22LR with serial numbers over 200,000 use either an 8 round or 20 round detachable box magazine.
Canadian Law Comments	- some examples of this model are known to have the serial number marked on the barrel only. In Canada there is a requirement that each firearm have a serial number (or other approved, unique, identifier) on the receiver/frame.
Other Markings	- French proof marks and patent numbers appear on the barrel.

Notes

Make

- company name/trademark is usually marked on the left side of the barrel.
- trademark symbol is the name GEVARM superimposed on an oblong horizontal diamond.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "Carbine Automatique" usually marked on left side of barrel. - blowback operated, detachable box magazine fed, semi-automatic repeating firearm; may fire from the open-bolt or closed-bolt position depending of model version. - this is a generic screen for the model line of firearms marketed by Gevarm as the "Carabine Automatique "; other screens exist which may better identify a particular model. - French proof marks are apparent on the barrel. - A 3 rifles feature: a tubular receiver, a fixed firing-pin and fires from an open bolt (the bolt is in the rearward or "open" position when cocked), fully-adjustable rear sights with hooded globe insert front sight, and a one-piece wood pistol-grip stock with schnabel forearm; - A 6 rifles feature: a tubular receiver, a fixed firing-pin and fires from an open bolt (the bolt is in the rearward or "open" position when cocked), elevation-adjustable rear sights with plain blade front sight, and a one-piece wood pistol-grip stock with schnabel forearm; - A 7 rifles feature: a tubular receiver, a conventional firing-pin and fire from a closed bolt, fully-adjustable rear sights with hooded globe insert front sight, and a one-piece wood pistol-grip stock with schnabel forearm; and - E 1 rifles feature: a die-cast rectangular receiver, a fixed firing-pin and fire from an open bolt, elevation-adjustable rear sights with plain blade front sight and a two-piece wood pistol-grip stock; the E 1 can also be taken down into two major groups by loosening a knurled screw at the front of the forearm.
Manufacturer	- manufacturer's designation may be marked on the firearm. - observed sample marked on the barrel beneath the top piece of the forend wood.
Action	- blowback operated.
Serial Number	- known examples have had five or six digit numbers without prefix or suffix.
Calibre	- marked on the left side.
Shots	- this rifle originally designed to use an 8 shot detachable box magazine; rifles chambered for 22 LR with serial numbers over 200,000 will use either 8 shot or 20 shot detachable box magazines. - rifles chambered for 22 SHORT cartridges will have a capacity of 6 shots.

FRT Report

Firearm Reference Number (FRN): 4656
Make: Gevarm
Model: E1

Summary

Make:	Gevarm
Model:	E1
Manufacturer:	Manufacture Francaise d'Armes & Cycles de St-Etienne (MF)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	FRANCE
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
4656 - 3	22 LR	8	157	Prohibited CC 84(1) "prohibited firearm" para. (b)	Non-Commercial Customization	
4656 - 4	22 LR	8	426	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	
4656 - 1	22 LR	8	495	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
4656 - 5	22 LR	20	325	Prohibited CC 84(1) "prohibited firearm" para. (b)(i)	Non-Commercial Customization	
4656 - 2	22 LR	20	495	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- appears on the barrel.

Model

- this is one of a series of 22 LR semi-automatic rifles built by Gevelot/Gevarm; these rifles are all very similar in general shape and functioning (and are all characteristically marked "Carabine Automatique"), but do have specific characteristics that allow them to be uniquely identified.
- the E 1 version of this series was built primarily as a back-packing/plinking/hunting rifle, and they can be seen with a variety of adjustable sights; this rifle can be taken down into two major groups by loosening a knurled screw at the front of the forearm. The E 1 (like several of Gevarm's other 22 LR rifles) also fires from an open bolt, and has a fixed firing pin (a vertical "wedge" running across the bolt face).
- all of Gevarm's 22 LR rifles except for the E 1 share a one-piece pistol-grip stock, and a tubular one-piece receiver; the E 1 has a two-piece stock and a die-cast receiver with crinkle finish.

Manufacturer

- does not appear on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- appears on the left side of the barrel, ahead of the the rear sight and in larger type than the roll stamp markings which follow. - serial number rationalization unknown. - observed specimen serial number consisted of five digits without prefix or suffix.
Shots	- detachable box magazine.
Other Markings	- a French St Etienne proof mark appear on the top rear of the barrel and US PATENT number 5998 is marked on the barrel left side.

Notes

Make

- company name/trademark is usually marked on the left side of the barrel.
- trademark symbol is the name GEVARM superimposed on an oblong horizontal diamond.

Model

- "Carbine Automatique" is marked on left side of barrel.
- "E 1" is not marked on the firearm.
- "E 1" is one of a series of 22 LR semi-automatic rifles built by Gevelot/Gevarm; these rifles are all very similar in general shape and functioning (and are all characteristically marked "Carabine Automatique"), but do have specific characteristics that allow them to be uniquely identified.
- "E 1" version of this series was built primarily as a back-packing/plinking/hunting rifle, and they can be seen with a variety of adjustable sights; this rifle can be taken down into two major groups by loosening a knurled screw at the front of the forearm.
- "E 1" has a two-piece stock and a die-cast receiver with crinkle finish. All of Gevarm's 22 LR rifles share a one-piece pistol-grip stock, and a tubular one-piece receiver.
- "E 1" (like several of Gevarm's other 22 LR rifles) also fires from an open bolt, and has a fixed firing pin (a vertical "wedge" running across the bolt face).
- "Carbine Automatique" has four variants:
- "E 1" rifles feature: a die-cast rectangular receiver, a fixed firing-pin and fire from an open bolt, elevation-adjustable rear sights with plain blade front sight and a two-piece wood pistol-grip stock; the E 1 can also be taken down into two major groups by loosening a knurled screw at the front of the forearm;
- "A 3" rifles feature: a tubular receiver, a fixed firing-pin and fires from an open bolt (the bolt is in the rearward or "open" position when cocked), fully-adjustable rear sights with hooded globe insert front sight, and a one-piece wood pistol-grip stock with schnabel forearm;
- "A 6" rifles feature: a tubular receiver, a fixed firing-pin and fires from an open bolt (the bolt is in the rearward or "open" position when cocked), elevation-adjustable rear sights with plain blade front sight, and a one-piece wood pistol-grip stock with schnabel forearm;
- "A 7" rifles feature: a tubular receiver, a conventional firing-pin and fire from a closed bolt, fully-adjustable rear sights with hooded globe insert front sight, and a one-piece wood pistol-grip stock with schnabel forearm.
- "Carbine Automatique" has French proof marks on the barrel.

Manufacturer

- "AR" under a crown with "ST ETIENNE" is marked beside it on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- blowback operated.
Serial Number	- serial number of a referenced example consisted of five numbers.
Calibre	- calibre designation is marked on the left side of the barrel.
Shots	- detachable box magazine. - this rifle was originally designed to use an 8 shots magazine, 20 shots magazines were also available.

Make

- The make is marked on the right side of the receiver/frame.
- "IMPORTED BY GFORCE ARMS/RENO,NV" is usually marked on the barrel left side.
- "GForce Arms" is a importer and distributor of Turkish shotgun.

Model

- "MODEL SAX" is marked on the right side of the barrel.
- "GF1" is marked on the right side of the receiver/frame.
- "Sax GF1" is a semi-automatic shotgun with synthetic furniture.
- Features include: solid top receiver/frame; cross-bolt safety at the rear of the trigger guard; action release button located on the forward right side of the receiver/frame.

Manufacturer

- "MANUFACTURED IN TURKEY BY FRANCOLIN" is marked on the right side of the barrel.
- "Francolin Arms" was founded in 1994 under the name "Lazer Arms".
- "Francolin Arms" brand started in 2012.
- "Francolin Arms" is located in Konya, Turkey.

Serial Number

- The serial number is marked on the underside of the receiver/frame.
- Serial number of a referenced example consisted of two numbers, two letter, a dash and four numbers.

Calibre

- The calibre designation is marked on the barrel assembly.

Shots

- Fixed tube magazine.

Firearm Reference Number (FRN): 135357
Make: GHK
Model: Knights Armament Company PDW Airsoft

Summary

Make:	GHK
Model:	Knights Armament Company PDW Airsoft
Manufacturer:	Daw Shiun (GHK)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Airsoft
Action:	Air,Spring or Gas
Country of Manufacturer:	TAIWAN
Serial Numbering:	
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
135357 - 1	6MM AIRSOFT BB	40	260	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GHK" was not observed marked on the firearm.
- "GHK" is a brand name used by Daw Shiun Company Limited of Taiwan.

Model

- "KNIGHTS ARMAMENT COMPANY PDW AIRSOFT" is not marked on the firearm.
- this airsoft firearm resembles a "Knight's Armament Company model PDW" automatic firearm.
- features include: aluminum outer barrel/sleeve and smoothbore inner barrel; aluminum receiver/frame; synthetic forearm assembly, pistol grip and a side folding buttstock; black finish.
- Knights Armament Company PDW Airsoft has an overall length of 480 mm in the folded position and 713 mm in the extended position.
- average weight without the battery is 3.30 kg and with the battery is 3.5 kg.

Manufacturer

- manufacturer's name was not observed marked on the firearm.
- Daw Shiun Company Limited is located in Zhongli City, Taoyuan County, Taiwan.

Type

- this airsoft firearm resembles the Knight's Armament Company model PDW.

Action

- CO2 cylinder inside the detachable box magazine.
- selective fire.
- does not discharge a projectile at a muzzle velocity exceeding 152.4 mps and/or a muzzle energy exceeding 5.7 Joules.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

KNIGHT'S ARMAMENT CO.
TITUSVILLE, FL
was observed marked on the left side, above the trigger of an example.

Knight's Armament Company logo
CAL. 6X35mm
PDW SN#
KNIGHT'S ARMAMENT CO.
TITUSVILLE, FL, U.S.A.
was observed marked on the right side of the magazine housing of an example.

FRT Report

Firearm Reference Number (FRN): 88975
Make: Giacomelli, Celeste
Model: Side By Side

Summary

Make:	Giacomelli, Celeste
Model:	Side By Side
Manufacturer:	Giacomelli, Celeste
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Multi-Barrel
Country of Manufacturer:	ITALY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
88975 - 2	12 GA X 2 3/4"	2	700	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	
88975 - 1	16 GA X 2 3/4"	2	711	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- Giacomelli Celeste is not marked on the firearm.
- the only identification to the maker are the letters "G.C" within a horizontal oval, found on the watertable of the receiver/frame, and on the under-barrel flats.
- "G.C" are the initials of Giacomelli Celeste of Gardone V.T.

Model

- not marked as to model or make.
- features: double barreled side by side without monobloc, matted top mid-rib, hammers or hammerless; double triggers, front hinged receiver/frame, top tang mounted opening lever, checkered walnut buttstock and forend.
- the year of manufacture, serial number, Italian proof, and acceptance marks (circular crest over "FINITO"), are found on the watertable of the receiver/frame, and on the under-barrel flats.
- the gauge and choke are marked on the barrel round, just forward of the under-barrel flats.
- the receiver/frame is often decorated with engraving and stippling, along with the outside rear of the barrel.

Manufacturer

- the manufacturer's name is not marked on the firearm.
- the only identification to the manufacturer are the letters "G.C" within a horizontal oval, found on the watertable of the receiver, and on the under-barrel flats.
- do not confuse this maker's mark of "G.C" ("Giacomelli. Celeste") with that of Giulio Caem ("CG").

Action

- side by side barrel configuration.

Serial Number

- the serial number is found on the watertable of the receiver/frame, and on the under-barrel flats.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- the gauge and choke are marked under the barrel, just forward of the under-barrel flats.
Other Markings	- samples have been noted with the following markings; over the left chamber is engraved the word "ACCIAIO", and over the right, "VICKERS" (translates "Vickers Steel").

145330 - 1	20X102	N/A	1500	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make or logo thereof is marked on the firearm.

Model

- the model is marked on the firearm.
- this is a light cannon developed by GIAT for use on airplanes, helicopters, small boats, and light armoured vehicles.
- this cannon operates in an unusual gas-operated manner, whereby locking arms on the bolt swing into recesses in the receiver, and gas-operated pistons are used to push those locking arms back into the bolt after the chamber pressure drops. Depending on gunner preference, this cannon will fire from either the closed-bolt position (low rates of fire) or the open-bolt position (high rates of fire).
- features include: parkerized or phosphated finish; various forms of muzzle brake; tapered and stepped barrel; dual gas pistons; feed housing with flexible chute on top of the receiver; solenoid firing controls, and hydraulically-buffered mount.
- this cannon fires electrically-primed ammunition, and requires an electrical circuit to function.

Manufacturer

- the manufacturer or logo thereof is marked on the firearm.

Action

- gas operated.

Serial Number

- numbered on the receiver/frame.

Shots

- belt fed.

Notes

Make

- the make or logo thereof is marked on the cannon.

Model

- the model may or may not be marked on the cannon.
- this is a 30mm automatic cannon designed by GIAT in the early 1980s as a gun system that could be mounted on a variety of platforms, including vehicle, helicopter, or shipboard mounts.
- this cannon operates as an externally-powered firearm that functions through the use of an electrical motor rotating a shaft with a cam groove milled into it; that groove drives a bolt carrier back and forth, simultaneously drawing a linked belt of ammunition into the gun, firing the cannon as the bolt-head locks into battery.
- this cannon may be seen on a remote vehicle, ship, or helicopter mount, with an effective range of 1.5 km
- features include: blue/black parkerized/phosphated finish; various styles of flash-hiders/muzzle brakes; tapered barrel; ventilated barrel shroud; left-side feed chutes; and various styles of mounts and aiming systems.
- licenced copies of these cannon are produced by a number of other manufacturers.

Manufacturer

- the manufacturer or logo thereof is marked on the cannon.

Action

- electrically powered cannon.

Serial Number

- serial-numbered on the receiver/frame.

Shots

- belt fed firearm.

Notes

Make

- the make may or may not be marked on the cannon.

Model

- the model may or may not be marked on the cannon.
- this is a 25mm automatic cannon designed by GIAT in the early 1980s as primary armament for the VBCI armoured fighting vehicle (the French equivalent of the US LAV).
- this cannon operates as an externally-powered firearm that functions through the use of an electrical motor rotating a shaft with a cam groove milled into it; that groove drives a bolt carrier back and forth, simultaneously drawing a linked belt of ammunition into the gun, firing the cannon as the bolt-head locks into battery.
- this cannon is normally mounted on a powered rotating turret with elevation and depression capability, with an effective range of 1.5 km, and is usually seen paired with a general-purpose coaxial machine gun for close-in infantry engagements.
- features include: blue/black parkerized/phosphated finish; various styles of flash-hiders/muzzle brakes; tapered barrel; ventilated barrel shroud; ambidextrous feed chutes; and various styles of mounts and aiming systems.
- licenced copies of these cannon are produced by a number of other manufacturers.

Firearm Reference Number (FRN): 132818
Make: Gibbs Rifle
Model: 1903/A3 US Rifle Rework

Summary

Make:	Gibbs Rifle
Model:	1903/A3 US Rifle Rework
Manufacturer:	Gibbs Rifle Company
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
132818 - 1	30-06 SPRG	5	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GIBBS RIFLE" is marked on the rear optic mount.
- "G.R." over a crown and a date is marked on the top of the barrel at the muzzle.
- do not confuse the Gibbs Rifle Company founded in 1991 in the U.S.A. with the George Gibbs Gun Works operating in the United Kingdom from circa 1850 to 1989 with the purchase by I.M.Crudington who continues to use the Gibbs name.

Model

- introduced in 2010
- this is a reworked 1903/A3 US Rifle action manufactured by Remington, reworked and reassembled into its original 1903/A4 US Rifle Sniper configuration.
- this rifle replicates the original military issue rifle of 1941.
- the US Rifle 1903/A3 is a parkerized version of the US Rifle 1903 manufactured by Remington and Smith-Corona.
- the US Rifle 1903/A4 is a scoped version of the 1903/A3.
- original receiver/frame markings are retained on this firearm.
- model is marked on the receiver/frame as "1903A3" but is advertised in the 1903/A4 configuration.
- features include: parkerized original Remington 1903A3 receiver/frame with original bolt assembly; bolt mounted wing safety; three position left side bolt release lever which also functions as a magazine cut-off; reproduction Redfield Jr. one-piece optic mount stamped with the Gibbs Rifle name; Chinese manufactured Weaver 330C scope; parkerized barrel made by Pedersoli complete with 1903/A3 type markings (manufacturer initials over insignia over the month/year date format) on the top side front of barrel; no sights; Boyd reproduction "C" type walnut and linseed finish stock and wooden upper barrel shroud; pistol grip "P" proofmark and left side inspector mark "FJA" (which stands for Frank J Attwood); mid length blued barrel band; blued steel forend cap; blued steel butt plate with storage compartment; two forend swivels and one butt mounted sling swivel.
- overall length is 1092mm (43") and overall weight is 4.35kgs (9lbs).
- available as the 1903/A4-82 which is identical to the 1903/A4, but with a reproduction U.S. Military M82 riflescope.
- this model also available as the 1903/A4-84 which is identical to the 1903/A4, but with a reproduction U.S. Military M84 riflescope.

Manufacturer

- Gibbs Rifle Company of Martinsburg, West Virginia, U.S.A. was established in 1991.
- Gibbs Rifle Company is an affiliate of Forgett Militaria, which also owns Navy Arms and the Old Western Scounger companies and trademarks.
- Gibbs Rifle Company, Incorporated is a manufacturer, importer and distributor.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- turn-bolt design.
Serial Number	- serial number is marked on the right side of the front receiver ring. - observed serial number had seven numbers.
Calibre	- four internal rifling grooves.
Shots	- internal box magazine.

36256 - 1	577 PERCUSSION	1	991	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make	- Parker-Hale and Gibbs Rifle Co. are trade names acquired by Navy Arms in the 1980's.
Model	- the model designation does not appear on the firearm.
Action	- muzzle loading, side hammer, percussion rifle.
Other Markings	- italian proof marks and "Made in Italy" on barrel, crown over "PH" and Parker-Hale on lockplate.
Remarks	- This is a reproduction of a Pattern 1853 British Enfield percussion infantry rifle. It features a European walnut stock, three barrel bands, brass trigger guard, buttplate and nose cap, colour case hardened lock, blade front and adjustable open rear sights. Initially this firearm was manufactured in England by Parker-Hale and a similar firearm manufactured by Euro Arms has been on the market for some time and may be mistaken for the Gibbs/Parker-Hale Italian manufactured version.

Notes

Make

- "George Gibbs 29 Corn St., Bristol" and "PATENT No. 1207" were observed marked on the barrel.
- George Gibbs was born in 1811, in Bristol, England. He began his gunmaking business in 1830, under the "J & G. Gibbs" name, at 4 Redcliffe St., Bristol. In 1841, the business name changed to "George Gibbs", and the business moved to various Bristol addresses; 142 Thomas St., Clare St., 29 Corn St. (1858), as well as, a new factory at St. John's Bridge (1873). Gibbs acquired the sole rights to the use of Metford rifling between 1865 and 1879 which brought prominence to the Gibbs name. In 1872, Gibbs also acquired the rights to the Farquharson falling block action patented in 1870. The business name changed to "Gibbs & Pitt" and was located at 43 High Street circa 1873-74, when the Gibbs & Pitt Patent No. 284 for a trigger-plate action under-lever gun was patented. George Gibbs died in 1884. In 1890, the name changed to "George Gibbs Gunmakers", and the business was located at 39 Corn St. until 1924. In 1906, they opened a London branch at 35 Saville Row. There was also a branch in Vancouver, Canada. In 1912, the business had become "George Gibbs Ltd.", the name it retains to this day. The London branch closed in 1929, and much of the stock was purchased by Rigbys. In 1931 the business moved from 39 Corn St. to 37 Baldwin St., and in 1952, the business moved to 3-4 Perry Rd., Park Row. In June, 1989, the business transferred to IM Crudgington's premises at 37 Broad St., Bath, from which it still operates.

Model

- "PATENT ARTURO HEEREN Y MASSA" was observed marked on the left side of the receiver/frame.
- year of manufacture may be marked on the front side of the receiver/frame, under the wood.
- Heeren's Patent was designed by Christiano Arturo Juan Antonio Heeren Y Massia.
- Heeren was born in Hamburg, Germany in 1844.
- Heeren became an engineer and settled in Paris, France before 1880.
- Heeren's design received a British Patent No. 243 on the 15th June 1880, under the name of Johnson.
- Heeren's design was also granted a United States Patent No. 239,496 on the 29th of March 1881, under the name of C.A. C.J. Heeren.
- features include: round tapered barrel; flat sided receiver/frame; falling block action operated by the trigger guard assembly being pivoted down and to the rear to open the breech; hammerless; wood forearm and straight grip stock.

Manufacturer

- "NAGEL & MENZ", "HOFBUCHSENMACHER" and "BADEN BADEN" were observed marked on the right side of the receiver/frame.
- year of manufacturer and "N&M" inside an oval may be marked on the front of the receiver/frame, under the wood forearm.
- Carl Georg Nagel & Gottlieb Menz were in business from 1880 to circa 1940.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- falling block design.
Serial Number	- year of manufacturer, "N&M" inside an oval and the serial number may be marked on the front of the receiver/frame, under the wood forearm.

In 1841, the business name changed to "George Gibbs", and the business moved to various Bristol addresses; 142 Thomas St., Clare St., 29 Corn St. (1858), as well as, a new factory at St. John's Bridge (1873). Gibbs acquired the sole rights to the use of Metford rifling between 1865 and 1879 which brought prominence to the Gibbs name. In 1872, Gibbs also acquired the rights to the Farquharson falling block action patented in 1870. The business name changed to "Gibbs & Pitt" and was located at 43 High Street circa 1873-74, when the Gibbs & Pitt Patent No. 284 for a trigger-plate action under-lever gun was patented. George Gibbs died in 1884. In 1890, the name changed to "George Gibbs Gunmakers", and the business was located at 39 Corn St. until 1924. In 1906, they opened a London branch at 35 Saville Row. There was also a branch in Vancouver, Canada. In 1912, the business had become "George Gibbs Ltd.", the name it retains to this day. The London branch closed in 1929, and much of the stock was purchased by Rigbys. In 1931 the business moved from 39 Corn St. to 37 Baldwin St., and in 1952, the business moved to 3-4 Perry Rd., Park Row. In June, 1989, the business transferred to IM Crudgington's premises at 37 Broad St., Bath, from which it still operates.

Model

- "WEBLEY'S" over "No 2" over "calibre" was observed marked on the left side of the receiver/frame.
- features include: half moon blade front sight and a groove in the top strap for a rear sight; ovate barrel; solid top receiver/frame with a fluted cylinder, and right side swing down loading gate; swing-out case ejector rod stored within the cylinder axis rod; exposed spur hammer; double/single action trigger mechanism; birds-head style grip strap; checkered wood grip plates; blued finish.
- NOTE: barrel is ovate and may have an unusual taper with the diameter at the muzzle end being greater in diameter than where the barrel meets the receiver/frame.

Manufacturer

- "WEBLEY'S" was observed marked on the left side of the receiver/frame.
- "P. Webley & Son / Webley & Scott" trademark logo of a "Winged Bullet" over "W&S" may be marked on the side of the firearm.

Serial Number

- serial number was observed marked on the left side of the receiver/frame.
- observed serial numbers consisted of five numbers without a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - "calibre" was observed marked on the left side of the receiver/frame.

116175 - 4	450 REV CF	6	114	Antique AFR, Section 1, para. 7	Non-Commercial Customization	

Notes

Make

- known example was marked, "GEO GIBBS" on the left side of the top strap and "29 CORN ST. BRISTOL" on the right side of the top strap.

Model

- no model name is marked on this firearm; model designation is derived from the characteristics of the firearm and the fact that the Webley firm made this type of handgun for sale "to the trade" where is was retailed by such firms as George Gibbs; Webley referred to this type of handgun as "solid frame revolvers".
- this firearm would have been made circa 1870's to the 1880's.
- features include: solid receiver/frame; non-fluted cylinder; double action trigger; spurred hammer; loading gate located on right side of standing breech which may swing to the rear or outwards to the right; cylinder axis pin release lever located in the front of the frame; octagonal barrel; blade front sight; Tranter-type compound ejection lever attached to the right side of the receiver/frame with the lever handle extending forward on the right side of the barrel; checkered hardwood grips; lanyard ring on bottom of grip frame; blued finish.

Manufacturer

- "WEBLEY" and/or "WEBLEY'S" and/or the "P. Webley & Son / Webley & Scott" trademark logo of a "Winged Bullet" over "W&S" may be marked on the side of the firearm.
- this type of handgun was made by Webley for the "gun trade" where is was sold by other retailers/distributors or gun makers such as the firm of George Gibbs.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action - double action.

Canadian Law Comments - some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

68025 - 1	52 PERCUSSION	1	559	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "L.H. GIBBS / PAT'D / JANY 8, 1856" is marked on the left side of the breech.
- Gibbs carbine was designed by Lucius H. Gibbs and manufactured by William F. Brooks.
- Lucius H. Gibbs was granted patent number 5,316 on October 2, 1847 for a breechloading firearm.
- Lucius H. Gibbs was granted patent number 14,057 on January 8, 1856 for a breechloading firearm.
- Lucius Gibbs was granted patent number 21,924 on October 26, 1858 for a patching ball.

Model

- manufactured circa 1863.
- side hammer, under lever operated, percussion breechloading carbine requiring a separate percussion cap.
- under lever causes barrel to slide forward for loading.
- walnut half stock.
- sling bar and ring on left side.

Manufacturer

- "W.F. BROOKS" and "MANFED NEW YORK" are marked on the lockplate.
- William F. Brooks was a manufacturer located in New York City, New York, U.S.A. from 1861 to 1865.

Serial Number

- normally marked on the lockplate.

Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
145786 - 1	28 PERCUSSION	1	76	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GIBBS TIFFANY & CO." over "STURBRIDGE, MASS." is marked on the firearm.

Model

- manufactured priotr to 1839.
- model designation is not marked on the firearm.
- this is a standard-pattern underhammer percussion "saw-handle"-style pistol, made using Ruggles' 1826/28 patent for an underhammer lock.
- features include: blued/browned finish; part-round/part-octagon barrel; fixed open sights; underhammer percussion lock; varying styles of triggers; and a "saw-handle"-profile of the grip, generally coming down to a rounded point at the butt. These pistols almost universally have a brass or German silver strap running around the grip of the pistol, may have brass or German silver inlays, and are stamped or engraved with a variety of leaves, vines, stars, and so on.

Manufacturer

- "GIBBS TIFFANY & CO." over "STURBRIDGE, MASS." is marked on the firearm.
- Gibbs, Tiffany & Company was located in Sturbridge, Massachusetts, U.S.A. from 1820 to 1838.
- Gibbs, Tiffany & Company was the partnership of Enoch Gibbs and Lucian Tiffany.
- Gibbs, Tiffany & Company produced underhamer rifles and pistols based on the popular Adin Ruggles patent of 1828.

Action

- muzzle-loading.

- The partnership of Stephen Gilbert and John Bales was a gun-making operation active in Penn Yan, New York, during the mid-to-late1800s, known for their percussion hunting guns.

Model

- model designation is not marked on the firearm.
- this is an unusual style of "swivel gun" (a long-arm with multiple barrels, chambers and individual nipples that are rotated by hand around a central axis pin) manufactured by Gilbert & Bales prior to 1885.
- features include: browned or blued finish; open fixed or adjustable sights; ramrod thimbles may be seen on the side of the barrels; straight-grip maple or walnut stock (no forearm) with brass or German silver finishings (may include patch box); external manually-cocked hammer on a back-action lock; single trigger; finial trigger-guard/grip strap; and a crescent butt.

Manufacturer

- "GILBERT & BALES" is usually marked on the firearm.
- The partnership of Stephen Gilbert and John Bales was a gun-making operation active in Penn Yan, New York, during the mid-to-late1800s, known for their percussion hunting guns.

Action

- this is a firearm with multiple barrels and chambers that "swivel" around a central axis pin (in the manner of a revolver), but which are rotated by hand for each shot.

Barrel

- barrel lengths may vary.

Calibre

- calibres/gauges may vary.

60298 - 2	7.62MM NATO	1	762	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is marked on the left side of the receiver/frame.

Model

- the model designation is not marked on the firearm.
- this is a semi-custom bolt-operated single-shot target rifle with an aluminum receiver/frame that is able to withstand the pressures of firing due in part to a steel insert that supports the barrel threads at one end and the locking lugs of the bolt at the other.
- these rifles are anchored to the stock by means of four bolts that go upwards into the receiver/frame at 45-degree angles, two on each side; as this is a custom/semi-custom rifle, the type of stock is left up to the owner, as is the final barrel profile, length, and material.

Manufacturer

- Anthony W. Gilkes is a custom gunsmith based in Arvada, Colorado, who specializes in producing a lightweight target rifle of his own design.

Action

- turn-bolt operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial numbered is marked on the receiver/frame. - this manufacturer will supply custom serial numbers on request.
Barrel	- barrel lengths on these firearms can vary by two inches/50mm or more in either direction, depending on the length of the original barrel blank, and how many times the barrel has been cut back and re-crowned to preserve accuracy.

Notes

Make

- "GILKS & Co. TOWER HILL, LONDON" was observed marked on the right side of the barrel of a known example.
- "Cs Hy Gilks, Sword Cutler, Gun & Rifle Maker 3 Union Row, Tower Hill, London" was observed marked on the blade of a sword.

Model

- manufactured between 1856 and 1881.
- model designation is not marked on this firearm.
- features observed: post front sight and the rear sight is a groove in the top of the standing breech of the receiver/frame; octagonal barrel with right side mounted sliding-type ejector rod assembly; open top receiver/frame with right side loading gate and round un-fluted cylinder; bobbed hammer; double action only trigger mechanism; checkered hardwood grip plates; nickel plated finish.
- British proof marks are apparent on this firearm.

Manufacturer

- Gilks' business was located in the Tower of London area in London, England from 1857 to 1880.
- Charles Henry Gilks was listed as a sword cutler, gun and rifle maker.
- Charles Henry Gilks was located at 3 Union Row, Tower Hill East and 37 Minories in 1857.
- Charles Henry Gilks was located at 3 Union Row, and 67 Minories from 1858 to 1859.
- Charles Henry Gilks was located at 3 Union Row, 67 Minories and 327 Wapping High Street from 1860 to 1861.
- Charles Henry Gilks was renamed Charles Henry Gilks & Company in 1861.
- Charles Henry Gilks & Company was located at 3 Union Row, Minories, East and Tower Hill, East from 1861 to 1863.
- Charles Henry Gilks & Company was renamed Gilks, Wilson & Company in 1864.
- Gilks, Wilson & Company (Iron & Brass) was located at 3 Union Row, Minories from 1864 to 1868.
- Gilks, Wilson & Company became C.H. Gilks & Company in 1869.
- C.H. Gilks & Company (Iron & Brass) was located at 3 Union Row, Minories from 1869 to 1875.
- C.H. Gilks & Company was located at 3 Union Row, Minories from 1875 to1880.

Serial Number

- serial number was observed marked on the face of the standing breech of the receiver/frame, and repeated on the cylinder.
- observed serial number consisted of a single number without a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - observed example had the name "David Legault" in script-type lettering engraved on the left side of the barrel, and the script-type initials "DL" engraved on the rear left side of the barrel in front of the cylinder.

FRT Report

Firearm Reference Number (FRN): 140063
Make: Gill, John
Model: Northwest Trade Gun Chief's Grade

Summary

Make:	Gill, John
Model:	Northwest Trade Gun Chief's Grade
Manufacturer:	Gill, John
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
140063 - 1	60 FLINTLOCK	1	914	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- known example was marked "GILL" on the lockplate in front of the hammer.
- the top of the barrel is marked with the trade mark symbol of the North West Company which is comprised of a sitting fox facing to the right within a circle; it is also marked with the word "LONDON".

Model

- no model name appears on this firearm; the model name is derived from the specific characteristics of this type of trade gun as manufactured for the North West Company for the North American market by various British gunmakers.
- the "Chief's Grade" of the Northwest Trade Gun was a specific version of better quality and was considered a "give-away" gun by the British Indian Department typically during the War of 1812 era. Has also been referred to as a British "war trade gun" and will be marked with the British Indian Department insignia of the capital letter "I" followed by the "Broad Arrow" ordnance mark, followed by the capital letter "D"; this insignia is usually found "burned" into the right side of the butt stock.
- features: muzzle loading, side hammer, smooth bore, flintlock ignition; stocked to the muzzle without a metal nosecap; all furniture is brass and lightly engraved; oversize brass triggerguard; cast butt plate with a top tang that extends up the comb of the stock; will have a distinctive Silver Indian medallion on the top of the wrist of the butt stock, this medallion depicts an Indian Chief wearing a feathered head dress with a bow and a quiver of arrows; brass side plate will be flat with a bow-and-arrow engraving in the middle; tail of the lock plate is engraved with a boar's head and hunting horn as is the bottom of the trigger guard; the stock is of a better grade of hardwood and it is not as heavy in configuration as the standard Northwest Trade Gun.

Manufacturer

- known example was marked "GILL" on the lock plate in front of the hammer.
- John Gill & Co. was an English gunmaker located in Birmingham, England, circa 1802 to 1828. He was known to mark his guns with the name "LONDON" on the barrel.
- his firm was a contractor for the "Board of Ordnance 1813 Contract Indian Rifles" circa 1813 to 1815; it also made Baker Rifles for the British military circa 1805 to 1813.
- John Gill was the son of Thomas Gill who started the original gunmaking business in Birmingham; Thomas Gill died in 1801 and the firm of John Gill & Co. continued the business until circa 1828.

Type

- this firearm is in fact a smooth bore musket.

Action

- muzzle loading, flintlock ignition.

Notes

Make

- "GILLESPIE" is normally marked either on the barrel or the lockplate.

Model

- manufactured prior to 1870.
- model designation is not marked on the firearm.
- model designation is a descriptor of the firearm type.
- this is a single-shot percussion pocket pistol of the type popularized by Henry Deringer, with a short barrel, large calibre, and bird's-head walnut stock.
- features include: round or octagonal barrel; fixed sights; brass or German silver mountings; manually-cocked hammer on a back-action lockplate; and walnut grip/stock.

Manufacturer

- George D.H. Gillespie was located in New York City, New York, U.S.A. from 1848 to 1870.
- George D.H. Gillespie also imported and distributed firearms and hardware.
- George D.H. Gillespie was also in a business known as "Wolff & Gillespie" from 1848 to 1852.

Action

- muzzle loader.

Barrel

- other barrel lengths likely.

Calibre

- other calibres likely.

FRT Report

Firearm Reference Number (FRN): 128465
Make: Gilon
Model: Velo Dog Type

Summary

Make:	Gilon
Model:	Velo Dog Type
Manufacturer:	Gilon
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	BELGIUM
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
128465 - 2	5.75MM VELO DOG	5	40	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	
128465 - 1	5.75MM VELO DOG	5	60	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make may not be marked on the firearm.

Model

- model is not marked on the firearm.
- the term "Velo Dog" was originated by Charles Francois Galand (Paris) in 1894 combining "velocipedist" (bicyclist) and "dog".
- originally intended for use by cyclists to dispatch/repell chasing dogs during the late eighteenth and early nineteenth century, when dog rabies was a dreaded common disease.
- the term initially defined a compact stream-lined revolver, initially in 5.75mm (also known as 5.5mm) long centerfire, or the 6mm "Type Francaise" long rimfire cartridge.
- the "Velodog" customarily features a folding trigger, elongated cylinder (fluted or unfluted), 5 to 7 shots (or more), usually a shrouded or enclosed hammer, often a safety lever on the side or rear of the receiver/frame, most have a yoke mounted ejector that tucks away into the cylinder axis pin, bird's head or square hand-grips, round or octagon barrel (often with rudimentary sights).
- by 1900 the name evolved to define a small calibered compact self-defense revolver with similar features (usually chambered for a 22 rimfire cartridge), which became popular throughout Europe.
- Do not confuse with the "Puppy" revolvers in .25 caliber / 6.35mm, or firearms with similar features of larger calibers (.320 / 7.65mm caliber or greater).

Manufacturer

- manufacturer may not be marked on the firearm.

Serial Number

- serial number is usually marked on the receiver/frame or under the grip panel.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make

- "Girsan" may be marked on the left side of the receiver/frame, bottom of pistol grip.
- "4G" may be marked in a circle inlay on the right side of the receiver/frame, bottom of the pistol grip.
- "Made in TURKIYE" or "Made in TURKEY" is marked on the right side of the receiver/frame above the pistol grip, under the slide.

Model

- introduced in 2015.
- "MC 28 SA" is marked on the left side of the slide.
- this is a version of the MC 28 pistol made as a single-action striker-fired pistol, with a Glock-style pivoting safety blade on the trigger; a version of this pistol with a conventional double-action trigger is also available as the "MC 28 DA".
- features include: round barrel with black oxide/phosphate finish on the slide; black synthetic frame; fixed dovetail front sight and notched dovetail rear sight with option for adjustable sights; an accessory rail under barrel; take-down lever, magazine release and slide latch on the left side of the pistol; and a red dot cocking indicator on the backplate.
- optional colours: two tone configuration with black slide with army tan receiver/frame pistol grip.
- overall length with 108mm (4.25") barrel is 193.8mm (7 5/8") and overall weight is 730gm (25.76 oz).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "Girsan" may be marked on the left side of the receiver/frame, bottom of pistol grip. - "4G" may be marked in a circle inlay on the right side of the receiver/frame, bottom of the pistol grip. - "Made in TURKIYE" or "Made in TURKEY" is marked on the right side of the receiver/frame above the pistol grip, under the slide.
Action	- recoil operated.
Serial Number	- serial number is marked on the receiver/frame, in an open window under the barrel and may be repeated on the barrel as viewed through the ejection port window and on the right side of the slide. - observed serial number consisted of a letter prefix "T" followed by four numbers, a dash "-", two numbers, followed by two letters "AV", followed by five numbers, example: T0000-00 AV00000. - serial number rationalization is not known.
Calibre	- calibre is marked on the firearm. - observed marked on the left side of the slide.
Shots	- detachable box magazine.

Notes

Make

- "GIRSAN" was observed marked on the left side of the slide.

Model

- "MC 39" is marked on the right side of the slide.
- introduced in 2014.
- externally this firearm is similar to the Beretta 92FS.
- the top of the slide is cut out forward of the extractor up to the front sight, exposing part of the barrel creating a large ejection port.
- features include: cold forged steel barrel; fixed front and dovetail rear sight (adjustable rear sight optional); double action trigger; ambidextrous safety; chamber loaded indicator; skeleton hammer; magazine release is located at the base of the trigger guard; smooth grip strap with front vertical serrations; finished in black; black plastic grips.
- overall length is 200.5mm and a weight of 730 grams without a magazine.

Manufacturer

- "GIRSAN" was observed marked on the left side of the slide.

Action

- recoil operated.

Serial Number

- serial number is marked on the right side of the receiver/frame and repeated on the barrel and the slide.
- example observed with a letter "T" followed by four number, a dash and two numbers, a space, two letters "AH" and five numbers.

Calibre

- rifling characteristics: 6 grooves right hand twist, 1 in 250mm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Notes

Make

- "GIRSAN" is marked on the left side of the slide.

Model

- "BORA LIGHT" over "YAVUZ 16" is marked on the right side of the slide.
- introduced in 2006.
- externally this firearm is similar to the Beretta 92FS in the way it is operated; internally it uses a Walther P-38 type of vertically tilting locking mechanism to lock the barrel and slide.
- features include: the front portion of the side and receiver/frame are milled thinner; slide and the front end of the receiver/frame are flush with the barrel; top of slide is solid with small right side ejection port; a portion of the hand web guard was removed from the rear of the receiver/frame making the receiver/frame flush with the slide, giving a squared/flat look at the rear; the top rear portion of the slide has a rectangular grove cut into it allowing access to the semi concealed hammer; cold forged steel barrel; low profile combat sights; trigger guard is squared off at the front; ambidextrous safety/slide lever; double action trigger; magazine release is located at the base of the trigger guard; finished in black, bright white, white gold, gold plated, black & white; engraved; black plastic or wood grips.
- overall length of 197.5mm (7 3/4") and a weight of 880 grams (1.7 lbs) without a magazine.

Manufacturer

- "GIRSAN" is marked on the left side of the slide.
- "MADE IN TURKIYE" is marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- recoil operated.
Serial Number	- serial number is located on the right side of the receiver/frame and repeated on the barrel and the slide. - samples observed with "T6368-06" prefix followed by a six alpha numeric sequence. - serial number rationalization is unknown.
Calibre	- marked on the left side of the slide as "9mm Parabellum". - rifling characteristics: 6-grooves with a right hand twist.
Shots	- detachable box magazine.

Notes

Make

- "GIRSAN" is marked on the left side of the slide.

Model

- "YAVUZ 16 TUGRA " is marked on the right side of the slide.
- introduced in 2006.
- externally this firearm is similar to the Beretta 92FS; internally it uses a Walther P-38 type of vertically tilting locking mechanism to lock the barrel and slide.
- the top of the slide is cut out forward of the extractor up to the front sight, exposing part of the barrel creating a large ejection port; the front of the slide is angled back and has four serrations on each side with part of the slide being milled just above the serrations.
- features include: cold forged steel barrel; low profile combat sights; ambidextrous safety/slide catch/decocking lever; double action trigger; magazine release is located at the base of the triggerguard; finished in black, bright white, white with gold accents; gold plated or black & white; black plastic or wood grips.
- overall length of 221.3mm (8 3/4") and a weight of 905 grams (1.9 lbs) without a magazine.

Manufacturer

- " GIRSAN " is marked on the left side of the slide.
- "MADE IN TURKIYE " is marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- recoil operated.
Serial Number	- serial number is located on the right side of the receiver/frame and repeated on the barrel and the slide. - serial number rationalization is unknown.
Calibre	- calibre is marked on the left side of the slide. - rifling characteristics: 6 grooves with a right hand twist.
Shots	- detachable box magazine.

117953 - 2	9.3X72R/12 GA X 2 3/4"	3	680	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- known example marked "M. Gladbach" on the top of the left barrel.

Model

- no model name is marked on this firearm.
- this is a generic entry for drilling configured firearms produced by M. Gladbach that have no model designation marked on them.
- the term drilling refers to a firearm with three barrels; barrel configuration can vary and may include any combination of shotgun and rifle barrels, i.e., two shotgun barrels over one rifle barrel, one rifle barrel over two shotgun barrels, one rifle barrel side-mounted on either the left or right side of the shotgun barrels, one shotgun barrel with two rifle barrels, etc.
- features may include: back action side locks; top break, under-lever opening with lever extending under the trigger guard; external hammers; double triggers; Doll's Head Extension at the rear of the top rib; barrel selector lever located on the top tang extension.
- known example had German proofmarks on the barrels and the receiver/frame.

Manufacturer

- known example marked "M. Gladbach" on the top of the left barrel.

Action

- hinged barrel design.
- barrel assembly consists of three barrels: one rifled barrel and two smoothbore barrels or two rifled barrels and one smoothbore barrel.

Serial Number

- known example had a five digit number without prefix or suffix marked on the left action flat.

Notes

Make

- "GLARNER WAFFEN MANUFAKTUR AG" and "GWM+H AG" are marked on the firearm.

Model

- "SPC-A2" is marked on the sides of the magazine well; "SPC" is an acronym for "Swiss Pistol Carbine".
- this is an AR-15-styled pistol-calibre carbine made to take Glock pistol magazine, and produced in barrel lengths from 89mm (3.5") up to 432mm (17").
- features include: matte black, olive drab, or sand/flat dark earth finishes; various styles of muzzle brakes; ventilated forearm, with or without accessory rails; angled magazine well adapted for Glock pistol magazines; flat-top sight-mounting rail, for open or optical sights; left-side bolt release; right-side index finger magazine release; side-charging or T-handle operating handle; AR-style lockwork and ambidextrous safety; right-side ejection port; and a fixed or telescoping buttstock on a buffer tube.

Manufacturer

- "GLARNER WAFFEN MANUFAKTUR AG" and "GWM+H AG" are marked on the firearm.
- Glarner Waffen Manufaktur + Handelshaus AktienGesellschaft ("Glarner Weapons Manufacturer + Sales Limited") is a manufacturer based in Rutli, Switzerland, that produces an AR-15-styled pistol-calibre carbine, as well as retailing numerous other firearms.

Action

- blowback operated.

Serial Number

- serial-numbered on the receiver/frame.

Shots

- detachable box magazine.
- this firearm uses Glock pistol magazines.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
357 - 1	22 LR	1	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Glenfield" and/or "Glenfield Products, New Haven, Conn., U.S.A." is marked on the firearm.
- the use of the "Glenfield" brand name was two-fold, it satisfied the demand by large retail and chain outlets who wanted trade names that could be identified to their businesses and it helped protect the small Marlin dealers from the mass merchandisers who, with increased buying power could sell products at a reduced cost. Many of the firearms models sold under the Glenfield name were continued with new "Marlin" model designations when the use of the Glenfield name ended in 1983.

Model

- manufactured from 1966 to 1978.
- manually operated, rim fire, bolt action, take down rifle.
- features include: plain one piece birch stock, with impressed checkering and side safety.
- similar to the Marlin model 100 G, and Glenfield model 101, except for Model number, and old style trigger guard.

Manufacturer

- the manufacturer's name is marked on the barrel.

Action

- single shot, manually operated, bolt actuated rifle.

Barrel

- round, tapered, blued, micro groove.

Other Markings

- Marlin Firearms Co.-----Model 10---- -New Haven Conn U.S.A.---22 S.L.LR.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make

- "Glenfield" and/or "Glenfield Products, New Haven, Conn., U.S.A." is marked on the top of the barrel.
- the use of the "Glenfield" brand name was two-fold, it satisfied the demand by large retail and chain outlets who wanted trade names that could be identified to their businesses and it helped protect the small Marlin dealers from the mass merchandisers who, with increased buying power could sell products at a reduced cost. Many of the firearms models sold under the Glenfield name were continued with new "Marlin" model designations when the use of the Glenfield name ended in 1983.

Model

- the Glenfield model 100G was the same as the Marlin model 101 but for the stock. The Glenfield version used a birch stock with no Monte Carlo comb, pistol grip cap or white line spacers and an older style trigger guard.
- "Model 100 G" is marked on the top of the barrel.
- the "G" suffix in the model designation is to denote "Glenfield".
- manufactured from 1960 to 1965.
- features include: blued finish; barrel mounted sights; take-down screw located on the underside of the stock; round, tapered barrel with Micro-Groove rifling.

Manufacturer

- "Marlin" is marked on the top of the barrel.

Action

- turn-bolt operated.

Calibre

- "Cal. 22 S, L, & L.R." is marked on top of the barrel.

Notes

Make

- "GLENFIELD" trade name is usually marked on the left side of the barrel.
- the use of the "Glenfield" brand name was two-fold, it satisfied the demand by large retail and chain outlets who wanted trade names that could be identified to their businesses and it helped protect the small Marlin dealers from the mass merchandisers who, with increased buying power could sell products at a reduced cost. Many of the firearms models sold under the Glenfield name were continued with new "Marlin" model designations when the use of the Glenfield name ended in 1983.

Model

- a total of 79,815 model 30's were manufactured from 1966 to 1971/2. This model was originally offered as the Glenfield model 36G (an economy version of the standard Marlin model 336) which was re-designated as the model 30 in 1966 although no changes other than to the model designation were made. In 1971/2 the half-length magazine was changed to a full-length tube and this model became the model 30A.
- "GLENFIELD MOD. 30" is marked on the barrel.
- features include: beaded and dovetailed front sight and an adjustable buckhorn, open rear sight; round, rifled barrel; fixed, half-length tubular magazine is mounted under the barrel; solid top receiver/frame with right side ejection port and loading gate; receiver/frame is drilled and tapped for scope mounts; exposed spur hammer; single action trigger mechanism; close loop operating lever; birch, forearm with metal end cap and a semi-pistol grip buttstock with hard rubber butt plate with no white line spacer (only units produced in 1969 and later had impressed checkering on the wrist and forend, prior to 1969 the buttstock and forend were plain); blued finish.

Manufacturer

- "THE MARLIN FIREARMS CO." over "NEW HAVEN, CONN. U.S.A." is usually marked on the left side of the barrel

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number
- serial number is marked on the receiver/frame.
- serial number rationalization is unknown.
- observed serial number consisted of five numbers without a letter prefix or suffix.

Calibre
- calibre is usually marked on the left side of the barrel.

Shots
- tubular magazine is mounted under the barrel.

- Glenfield markings will be found on the barrel.
- the use of the "Glenfield" brand name was two-fold, it satisfied the demand by large retail and chain outlets who wanted trade names that could be identified to their businesses and it helped protect the small Marlin dealers from the mass merchandisers who, with increased buying power could sell products at a reduced cost. Many of the firearms models sold under the Glenfield name were continued with new "Marlin" model designations when the use of the Glenfield name ended in 1983.

Model

- a total of 5,930 model 36G's were produced in 1964 and 1965. In 1966 the model 36G became the model 30 (although no changes other than to the model designation were made).
- this model was an economy version of the standard Marlin model 336, it was only available in one calibre, shot capacity, barrel length configuration.
- features include: birch, pistol grip buttstock and forend; blued finish; hard rubber butt plate with no white line spacer; buckhorn, open rear sight with a beaded and dovetailed front sight; solid receiver/frame with side ejection, drilled and tapped for scope mounts.

Manufacturer

- Marlin markings are found on the barrel.

Serial Number

- numbered on the receiver/frame, rationalization unknown.

Shots

- half-length tubular magazine mounted under the barrel.

Notes

Make

- the use of the "Glenfield" brand name was two-fold, it satisfied the demand by large retail and chain outlets who wanted trade names that could be identified to their businesses and it helped protect the small Marlin dealers from the mass merchandisers who, with increased buying power could sell products at a reduced cost. Many of the firearms models sold under the Glenfield name were continued with new "Marlin" model designations when the use of the Glenfield name ended in 1983.

Model

- manufactured in 1979. This is the Marlin model 49DL marketed under the Glenfield trade name. The model 40 did not feature the walnut furniture, butt plate spacer, damascened bolt or gold plated trigger of the model 49DL.
- features include: two-piece, Monte Carlo, walnut finished hardwood stock with a checked pistol grip and forend; blued finish; chromed trigger; receiver/frame has scroll work on both sides and a grooved (for scope mounts) and serrated top to reduce glare; cross-bolt safety; bolt hold-open device; adjustable, open rear sight with a ramp front sight.

Manufacturer

- Marlin markings are usually found on the barrel.

Action

- blowback operated.

Shots

- tubular magazine mounted under the barrel.

Notes

Make

- the Glenfield trade name will be found marked on the barrel.
- the use of the "Glenfield" brand name was two-fold, it satisfied the demand by large retail and chain outlets who wanted trade names that could be identified to their businesses and it helped protect the small Marlin dealers from the mass merchandisers who, with increased buying power could sell products at a reduced cost. Many of the firearms models sold under the Glenfield name were continued with new "Marlin" model designations when the use of the Glenfield name ended in 1983.

Model

- the Glenfield model 50 was introduced in 1966 as a progression of the model 55G. The change in the model designation was made because the design was now offered with a 3" chamber. Production of the model 50 ceased in 1973 although it was reinstated for one year in 1979. Slightly less than 90,000 examples in 12 gauge were produced and just under 9,000 examples in 20 gauge were produced.
- features include: blued finish; one-piece, walnut finished hardwood stock; rubber butt plate; will usually be fitted with a fixed choke barrel (the Marlin Micro-Choke was only available in 1966).

Manufacturer

- the manufacturer's name is marked on the barrel.

Action

- turn-bolt operated.

Shots

- detachable box magazine.

375 - 2	22 LR	8	235	Prohibited CC 84(1) "prohibited firearm" para. (b)(i)	Non-Commercial Customization	
375 - 1	22 LR	8	559	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Glenfield" is marked on the barrel.
- the use of the "Glenfield" brand name was two-fold, it satisfied the demand by large retail and chain outlets who wanted trade names that could be identified to their businesses and it helped protect the small Marlin dealers from the mass merchandisers who, with increased buying power could sell products at a reduced cost. Many of the firearms models sold under the Glenfield name were continued with new "Marlin" model designations when the use of the Glenfield name ended in 1983.

Model

- the Glenfield model 80G was the same as the Marlin model 80C but for the stock. The Glenfield version used a birch stock with no Monte Carlo comb, pistol grip cap or white line spacers and an older style trigger guard.
- the model designation is marked on the top of the barrel.
- the "G" suffix in the model designation is to denote "Glenfield".
- manufactured from 1960 to 1965.
- features include: blued finish; barrel mounted sights; round, tapered barrel with Micro-Groove® rifling.

Manufacturer

- "The Marlin Firearms Co." is marked on the barrel.

Action

- turn-bolt operated.

Calibre

- the calibre designation is marked on the barrel.

Shots

- detachable box magazine.

Firearm Reference Number (FRN): 153478
Make: Gletcher
Model: CLT 1911

Summary

Make:	Gletcher
Model:	CLT 1911
Manufacturer:	Sport Manufacturing Group (SMG)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Air,Spring or Gas
Country of Manufacturer:	TAIWAN
Serial Numbering:	See Note
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
153478 - 1	BB	17	127	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "Gletcher" is marked on the air pistol.
Model	- "CLT 1911" is marked on the left side of the air pistol. - this is a CO2-powered air pistol that fires BBs; this air pistol resembles a WW2-production Colt 1911A1 pistol, with a "parkerized"-style finish and brown synthetic grips. - features include: greyish "parkerized" finish; open fixed sights; rear vertical slide grasping-grooves; a SA trigger mechanism; blowback operation; spur hammer; arched mainspring housing; and brown synthetic checkered grips.
Manufacturer	- "SMG Inc." is marked on the right side of the air pistol.
Action	- CO2 powered air pistol with a velocity below 152.4 mps.
Serial Number	- serial numbered on the receiver/frame.
Calibre	- calibre may be marked on the right side of the slide.
Shots	- detachable combination CO2 holder/BB "magazine".
Canadian Law Comments	- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. Deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations to Transport.

Notes

Make

- "Gletcher" is marked on the left side of the receiver/frame.
- "Gletcher" is a brand established by SMG Inc.(Sport Manufacturing Group).
- "Gletcher" logo is the letter "G" in an oval shape.

Model

- "NGT" is marked on the left side of the receiver/frame.
- "NGT" stands for "Nagant".
- "NGT" is a metal copy of the Russian Nagant 1895 revolver.
- "NGT" is also available with a manual safety as the "NGT F".
- "NGT" is CO2 powered, cartridges have to be loaded with a BB prior to loading the revolver, one cartridge at a time in the cylinder.
- features include: blade front sight and a grooved notch in the rear, top strap for a rear sight; round barrel; extractor rod is mounted on the underside of the barrel and rotates to the right so it can be aligned with the chambers; solid top receiver/frame with a removable fluted cylinder and right side swing down loading gate; exposed spur hammer; double/single action trigger mechanism; checkered wooden grips with a metal butt cap and lanyard ring; blue/black or silver finish.
- overall length with a 102mm (4") barrel is 229mm (9") average weight is 0.7kg (1.54 lbs).

Manufacturer

- "SMG Inc." is marked on the right side of the receiver/frame.
- "SMG" stand for "Sport Manufacturing Group".
- "SMG" is located in New York, U.S.A..
- "SMG" has a warehouse and distribution center in Huntingdon Valley, Pennsylvania U.S.A..
- "SMG" was established in 2008.

Action

- CO2 cartridge powered.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps (500fps) and/or a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the right side of the receiver/frame. - serial number of a referenced example consisted of two numbers, three letter prefix (NGT) and four numbers.
Calibre	- calibre identification is marked on the right side of the barrel.
Shots	- cartridges have to be loaded with a BB prior to loading the revolver, one cartridge at a time in the cylinder.
Canadian Law Comments	- does not discharge a projectile at a muzzle velocity exceeding 152.4mps (500fps) and/or a muzzle energy exceeding 5.7 Joules.

- "SMG" was established in 2008.

Action

- CO2 cartridge powered.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps (500fps) and/or a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the right side of the receiver/frame. - serial number of a referenced example consisted of two numbers, three letter prefix (NGF) and four numbers.
Calibre	- calibre identification is marked on the right side of the barrel.
Shots	- cartridges have to be loaded with a BB prior to loading the revolver, one cartridge at a time in the cylinder.
Canadian Law Comments	- does not discharge a projectile at a muzzle velocity exceeding 152.4mps (500fps) and/or a muzzle energy exceeding 5.7 Joules.

FRT Report

Firearm Reference Number (FRN): 153473
Make: Gletcher
Model: P08

Summary

Make:	Gletcher
Model:	P08
Manufacturer:	Sport Manufacturing Group (SMG)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Air,Spring or Gas
Country of Manufacturer:	TAIWAN
Serial Numbering:	See Note
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
153473 - 1	BB	20	108	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "Gletcher" is marked on the air pistol.
Model	- "P08" is marked on the left side of the air pistol. - this is a CO2-powered air pistol that fires BBs; this air pistol resembles a Luger P08 pistol with red/brown synthetic checkered grips. - features include: anodized blue/black finish; open fixed sights; tapered round barrel; toggle repeating action; a lever manual safety at the left rear of the frame; synthetic wood-look grips; CO2 receptacle inside the grip frame; and a thin magazine that slides up into the front of the grip frame. - Gletcher also produces a very similar-appearing "Parabellum" pistol, with a removable magazine that contains both BBs and a CO2 cartridge.
Manufacturer	- "SMG" is marked on the right side of the air pistol.
Action	- CO2 powered air pistol with a velocity below 152.4 mps.
Serial Number	- serial numbered on the receiver/frame.
Calibre	- calibre may be marked on the right side of the air pistol.
Shots	- in-line "magazine" that slides into the frontstrap of the air pistol.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments - does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. Deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations to Transport.

Firearm Reference Number (FRN): 16207
Make: Glisenti
Model: 1910

Summary

Make:	Glisenti
Model:	1910
Manufacturer:	Societa Siderugica Glisenti
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	ITALY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
16207 - 1	9MM GLISENTI	7	95	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GLISENTI" is normally not marked on the firearm.

Model

- this firearm was tested and trialed in 1909 and adopted as the Model 1910.
- manufactured from 1909 to 1934.
- the model designation may be marked on the right side of the right side of the receiver/frame as, "FAB 1909" or "FAB 1910".
- this model was the predecessor to the Brixia model "1912".
- features include; single action trigger mechanism, blued receiver/frame and barrel, fixed sights, serration's on the rear of the bolt, the safety is located on the rear of the bolt and this firearm has a checkered grip safety.
- a unique feature on this model is a dismounting screw, which is located on the front of the receiver/frame below the barrel. Turning this dismounting screw unlocks a panel which covers the left side of the receiver/frame and permits access to the internal mechanism.

Manufacturer

- manufacturer's name is normally not marked on the firearm.
- Glisenti was a name applied to firearms made by Societa Siderugica Glisenti.
- "Societa Siderugica Glisenti" was located in Italy between 1906 and 1920.

Action

- recoil operated.

Serial Number

- the serial number is marked on the receiver/frame at the front of the triggerguard.
- the serial number may have a letter prefix followed by sequential numbers and the serial number may be marked on various components of the firearm.

Calibre

- the 9X19 Glisenti cartridge is dimensionally identical to the 9MM LUGER cartridge but loaded to a lower pressure and velocity level.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.

Remarks

- Fabbrica d'Armi Glisenti, Brescia developed this firearm. In 1907 Glisenti sold the rights for this firearm to Metallurgica Brescia gia Tempini (MBT). The further development of the firearm took two more years at which time it was submitted as model 1909 to the Italian Armed Forces for evaluation with the purpose of replacing Italian Service revolvers as the military standard. This firearm design was successful and replaced the previous Italian Service series of revolvers as the Italian Service pistol M1910 Glisenti.
- MBT later emitted a commercial model known as the M1912 BRIXIA without a grip safety and with a slight strengthening of the frame which resulted in a flat side rather than a stepped side as in the Glisenti. The differences between the two pistols are small and there is little advantage of one over the other. The Italian authorities declined to replace the Glisenti Model 1910 with the Brixia Model 1912.
- the difference between the M1910 Glisenti and the M1912 Brixia.
- If the firearm has a grip safety and the magazine release is on the bottom left side at the rear of the grip - it is an M1910 Glisenti (FAB 1909 or FAB 1910).
- if the firearm has no grip safety, the magazine release is in the center bottom rear of the grip (as per the Walther P-38) and the capitol letters MBT are moulded into the grips - it is an M1912 Brixia Pistol.

Notes

Make

- called "Glisenti", but not so marked on the firearm.
- based on the design commencing in 1902 and patented in June 1905 (model 1906) by Bethel Abiel Revelli, and initially manufactured by Siderugica Glisenti in 7.65mm X 22 Glisenti, subsequently the firm of "Metallurgica Bresciana Gia Tempini" acquired the rights to manufacture and to the name "Glisenti".

Model

- not marked with model designation.
- the model commonly known as the 1910, (manufacturer's model 1909) was adopted in 1910 for the Italian Army and Navy in 9mm X 19 Glisenti ("Pistola Italiana Mod. 1910, calibro mm. 9).
- marked within an oval on the right side of the receiver/frame, examples: FAB 1909 or FAB 1910 (denotes "Fabrica Armi Bresciana", and year of manufacture) surmounted by an Italian Crown.
- checkered front grip safety that prevents depression of the trigger until compressed, machine cuts on the frame and upper receiver to reduce weight, hand-grip panels may be of plain, checkered walnut, or dark moulded thermo plastic usually with a crest (shield bearing a crowned, out-spread right-facing eagle wearing a cross on its chest) and the letters "MBT" in a rectangle below.
- the flat on top of the slide often bears an elaborate circular logo (with a "B" in the centre) of the manufacturer, Metallurgica Bresciana Gia Tempini".
- similar to the almost identical appearing "Brixia" Model 1912 pistol, also in 9mm Glisenti calibre, which does not have a grip safety and the earlier "Glisenti" Model 1906 in 7.65mm X 22 Glisenti.
- overall length is 220mm and average is 860grams.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- Metallurgica Bresciana Gia Tempimi (MBT) was established in 1884. - Metallurgica Bresciana Gia Tempimi (MBT) was located in Brescia, Italy. - Metallurgica Bresciana Gia Tempimi (MBT) was a large arms and metallurgy factory with over 1,100 employees in 1923.
Action	- recoil operated.
Serial Number	- alpha/numeric serial number is marked on the front of the receiver/frame and repeated on other components.
Shots	- detachable box magazine.

Notes

Make

- "GLOBCO" or "GLOBCO" and "GLOBE FIREARMS LTD" or "GLOBCO" and "GLOBE FIREARMS LTD. OTTAWA - CANADA" or "GLOBE FIREARMS LTD" is normally marked on the barrel.
- Globe Firearms Limited/Globe Hunting Sales was a Canadian firm that marketed commercial sporting firearms and military rifles that were converted to sporting configuration.
- Globe Firearms Limited/Globe Hunting Sales products were also sold under the "GLOBCO" name.

Model

- "Model 200" is marked on the barrel.
- "200" model was also known as the "Mountaineer 200 Deluxe Carbine"
- "200" model is a Lee-Enfield No 4 Mark 1 or No 4 Mark 1* military rifle converted to a sporter configuration by Globe Firearms Ltd. for the Canadian market.
- features include: fixed front sight and an adjustable rear sight; round barrel; Lee-Enfield No 4 MARK 1 or MARK 1* turn bolt action; detachable box magazine; two piece stock.
- "200" model conversion from military to sporting rifle involved: relacing the front sight with a hooded, ramp mounted, bead front sight; shortening and re-crowning the muzzle of the barrel; receiver/frme was drilled and tapped for scope mounts; original two piece stock was replaced with a checkered walnut forearm with a black Ebonite forearm tip and a checkered walnut Monte Carlo buttstock with pistol grip cap and buttplate with white line spacers; sling swivels; refinishing the barrel and receiver/frame with a blued finish.
- overall length with a 559 mm (22") barrel is 1067mm (42"), and the average weight is 3.4 kgs (7.5 lbs).
- original military markings may or may not have been removed during the conversion/refinishing process.

Manufacturer

- Globe Firearms was located in Ottawa, Ontario, Canada from circa 1958 to 1982.
- original manufacturer's name may still be marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- turn bolt design.
Serial Number	- serial number is usually marked on the left side of the buttsocket of the receiver/frame.
Calibre	- "CAL. .303 BRITISH" may be marked on the barrel.
Shots	- detachable box magazine.
Remarks	- This is a No 4 MARK 1 or No 4 MARK 1* Lee Enfield military rifle converted to sporter configuration by Globe Firearms for the Canadian market. Conversion from military to sporting rifle involved shortening the barrel, mounting a ramp front sight and replacing the original stock with a checkered sporting stock with Monte Carlo comb and contrasting wood forend tip and pistol grip with white line spacers and recoil pad.

Notes

Make

- "GLOBCO" or "GLOBCO" and "GLOBE FIREARMS LTD" or "GLOBCO" and "GLOBE FIREARMS LTD. OTTAWA - CANADA" or "GLOBE FIREARMS LTD" is normally marked on the barrel.
- Globe Firearms Limited/Globe Hunting Sales was a Canadian firm that marketed commercial sporting firearms and military rifles that were converted to sporting configuration.
- Globe Firearms Limited/Globe Hunting Sales products were also sold under the "GLOBCO" name.

Model

- model designation is stamped on the barrel.
- originally a Lee-Enfield No 4 bolt action rifle which was re-manufactured to sporter style including: new wood stock and fore arm, new open sights, high polish blue finish and the original sight bridge removed to lighten the weight.
- this is a slight variation of the Globe Model 333F sporterized Lee Enfield No 4 MARK 1 and No 4 MARK 1* sporting rifles. It differs from the Model 333F by having a recoil pad.

Manufacturer

- Globe Firearms was located in Ottawa, Ontario, Canada from circa 1958 to 1982.

Serial Number

- serial number may be marked on the left side of the receiver/frame.

Calibre

- calibre designation is marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.
- may also accept 10 round Lee-Enfield magazine.

Notes

Make

- "GLOBCO" or "GLOBCO" and "GLOBE FIREARMS LTD" or "GLOBCO" and "GLOBE FIREARMS LTD. OTTAWA - CANADA" or "GLOBE FIREARMS LTD" is normally marked on the barrel.
- Globe Firearms Limited/Globe Hunting Sales was a Canadian firm that marketed commercial sporting firearms and military rifles that were converted to sporting configuration.
- Globe Firearms Limited/Globe Hunting Sales products were also sold under the "GLOBCO" name.

Model

- this is a Mosin Nagant rifle that has been converted to sporting configuration by cutting the original military stock, removeing the bayonet and bayonet lug and refinishing the exterior surfaces.
- features include; straight or turned down bolt handle, barleycorn front sight with adjustable rear sight, tapered barrel and blued finish.

Manufacturer

- Globe Firearms was located in Ottawa, Ontario, Canada from circa 1958 to 1982.

Serial Number

- the serial number is normally marked on the receiver/frame.
- may also appear on other componants.

Shots

- non detachable box magazine.

Other Markings

- the original Russian military markings may still be present on the firearm.

Notes

Make

- "GLOBE FIREARMS LTD" is marked on the barrel.
- Globe Firearms Limited/Globe Hunting Sales was a Canadian firm that marketed commercial sporting firearms and military rifles that were converted to sporting configuration.
- Globe Firearms Limited/Globe Hunting Sales products were also sold under the "GLOBCO" name.

Model

- "MODEL 555" is marked on the top of the barrel.
- this rifle is a major rework of surplus Russian Model 1940 Tokarev rifles to sporter configuration by Globe Firearms for the Canadian market. Conversion from military to sporter configuration included changing the calibre to 303 BRITISH either by replacing the original barrel with a new one chambered for the 303 BRITISH cartridge or altering the original barrel, altering the gas system, replacing the military stock with a sporting stock, altering the original ten shot detachable box magazine to hold only five cartridges and mounting a hooded ramp front sight. All metal parts were heavily polished and then blued.

Manufacturer

- Globe Firearms was located in Ottawa, Ontario, Canada from circa 1958 to 1982.

Action

- gas operated.

Serial Number

- serial number is marked on the underside of the bolt visible through the magazine port.

Calibre

- ".303 BRITISH" is marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Remarks - this rifle is a major rework of surplus Russian Model 1940 Tokarev rifles to sporter configuration by Globe Firearms for the Canadian market.

Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	CANADA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
4787 - 1	8MM MAUSER	5	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GLOBCO" or "GLOBCO" and "GLOBE FIREARMS LTD" or "GLOBCO" and "GLOBE FIREARMS LTD. OTTAWA - CANADA" or "GLOBE FIREARMS LTD" is normally marked on the barrel.
- Globe Firearms Limited/Globe Hunting Sales was a Canadian firm that marketed commercial sporting firearms and military rifles that were converted to sporting configuration.
- Globe Firearms Limited/Globe Hunting Sales products were also sold under the "GLOBCO" name.

Manufacturer

- Globe Firearms was located in Ottawa, Ontario, Canada from circa 1958 to 1982.

Action

- this rifle utilises a "straight pull" bolt action which requires a rearward pull on the bolt handle to open the bolt and eject the fired cartridge case and forward push to chamber a new cartridge and cock and close the bolt.

Serial Number

- apparently Globe Firearms did not serial number these rifles, however the original Yugoslavian serial numbers were usually left intact on the side of the receiver.

Remarks

- This rifle is a rework of surplus Yugoslavian Model 1895/24 "straight pull" military rifles to sporting configuration by Globe Firearms for the Canadian market. Conversion from military to sporter involved removing the handguard, barrel bands, nosecap and shorting the forearm. A weak point of these rifles is the ejector which is prone to breaking.

Notes

Make

- "GLOBCO" and "GLOBE FIREARMS LTD. OTTAWA - CANADA" was observed marked on the barrel assembly.
- Globe Firearms Limited/Globe Hunting Sales was a Canadian firm that marketed commercial sporting firearms and military rifles that were converted to sporting configuration.
- Globe Firearms Limited/Globe Hunting Sales products were also sold under the "GLOBCO" name.
- Globe Firearms was located in Ottawa, Ontario, Canada from circa 1958 to 1982.

Model

- "GLOBCO SILVER EAGLE" was observed marked on the barrel assembly.
- this is a side by side, top break, hammerless, box lock shotgun. It features double triggers, automatic safety, checkered European walnut stock and engraving on the receiver/frame.

Manufacturer

- "MADE IN SPAIN" is marked on the barrel assembly.
- "IMA" is marked on the watertable and barrel flats.

Action

- side by side configuration.

Serial Number

- serial number was observed marked on the watertable of the receiver/frame and repeated on the barrel flats.
- observed serial number consisted of five numbers without a letter prefix or suffix.
- observed serial number consisted of a letter "L" prefix and six numbers.
- the letters "IMA" marked just in front of the serial number is the manufactures code for "Marixa".

Other Markings

- Spanish proof marks on underside of the barrels.

Notes

Make

- "GLOBCO" or "GLOBCO" and "GLOBE FIREARMS LTD" or "GLOBCO" and "GLOBE FIREARMS LTD. OTTAWA - CANADA" or "GLOBE FIREARMS LTD" is normally marked on the barrel.
- Globe Firearms Limited/Globe Hunting Sales was a Canadian firm that marketed commercial sporting firearms and military rifles that were converted to sporting configuration.
- Globe Firearms Limited/Globe Hunting Sales products were also sold under the "GLOBCO" name.

Model

- the model designation may not appear on the firearm.
- this model is a "sporterized" Schmidt Rubin model "1889" rifle.
- the Schmidt Rubin featured a straight pull action. The model "1889" featured locking lugs on the rear of the bolt. Later Schmidt Rubin models featured locking lugs on the front of the bolt.
- conversion consisted of reshaping the military stock, rechambering to 30-30 WIN and the addition of barrel mounted sporting type sights.

Manufacturer

- some of these rifles may have been converted for Globe in Switzerland and may be marked "Made in Switzerland".
- Globe Firearms was located in Ottawa, Ontario, Canada from circa 1958 to 1982.

Serial Number

- the serial number is marked on the left receiver/frame.
- may also appear as a complete or partial number on other componants.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- the calibre is normally marked on the barrel.
Shots	- detachable box magazine. - samples will be found with a modified (five shot) or original (twelve shot) magazine.

Notes

Make

- "GLOCK" is normally marked on the firearm as the Glock logo.
- Glock logo is a large letter "G" with the word "LOCK" appearing inside the "G".
- Glock logo may be marked on both sides of the slide, on the barrel visible through the ejection port, and on the lower left grip of the receiver/frame.
- "MADE IN AUSTRIA" over "GLOCK, INC., SMYRNA, GA." or "GLOCK, INC., SMYRNA, GA." may be marked on the right side of the receiver/frame, above the grip.

Model

- this is a semi-automatic Glock model 17 that has been modified with the addition of a drop-in, full-automatic conversion device mounted on the rear of the slide that replaces the original rear slide cover plate.
- "GLOCK", "17", "AUSTRIA" and the calibre are marked on the left side of the slide.
- Glock pistols are equipped with their proprietary "Safe Action" system, which does not use a traditional single action or double action trigger mechanism.
- Glock's "Safe Action" system is a partly tensioned firing pin/striker, which is moved further back by the trigger bar when the trigger is pulled. When the trigger is pulled, three safety features (trigger safety, firing pin safety, and drop safety) are automatically deactivated one after another. When doing so, the trigger bar is deflected downward by the connector and the firing pin is released under full load. When the trigger is released, all three safety features re-engage.
- features include: round steel barrel with right hand, hexagonal/polygonal rifling; flat sided steel slide with right side ejection, rear grip serrations, and interchangeable sights; polymer receiver/frame with squared trigger guard; single trigger with integral safety lever; slide lock/release and magazine release are located on the left side of the receiver/frame; black finish.
- overall length with a 114 mm barrel is 186 mm, and the average weight, less a box magazine is 625 grams.
- Glock pistols are available with adjustable rear sight (Sport model) or with fixed sights (Service model).
- Glock pistols has become increasingly popular and a large number of accessory items have become available that will alter the pistols appearance.
- Glock pistol accessories include: laser and optical sights; mounting systems; barrels that feature cut rifling and/or compensator ports; extended slide release and magazine release buttons; grip adapters or grip reductions.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "GLOCK" is normally marked on the firearm as the Glock logo. - "GLOCK" logo is a large letter "G" with the word "LOCK" appearing inside the "G". - "GLOCK" logo may be marked on both sides of the slide, on the barrel visible through the ejection port, and on the lower left grip of the receiver/frame. - "AUSTRIA" is usually marked on the left side of the slide.
Action	- recoil operated.
Serial Number	- serial number is marked on a metal plate/strip attached to the underside of the receiver/frame, in front of the trigger guard and may be repeated on the slide and barrel. - observed serial number consisted of a two or three letter prefix, three numbers, and/or with a two letter suffix.
Calibre	- calibre designation is marked on the barrel, visible through the ejection port. - calibre designation is also marked on the left side of the slide as 9x19.
Shots	- detachable box magazine.
Canadian Law Comments	- this is a semi-automatic Glock model 17 that has been modified with the addition of a drop-in, full-automatic conversion device mounted on the rear of the slide that replaces the original rear slide cover plate.

Notes

Make

- "GLOCK" is normally marked on the firearm as the Glock logo.
- Glock logo is a large letter "G" with the word "LOCK" appearing inside the "G".
- Glock logo may be marked on both sides of the slide, on the barrel visible through the ejection port, and on the lower left grip of the receiver/frame.
- "MADE IN AUSTRIA" over "GLOCK, INC., SMYRNA, GA." or "GLOCK, INC., SMYRNA, GA." may be marked on the right side of the receiver/frame, above the grip.

Model

- introduced in 1983.
- "GLOCK", "17", "AUSTRIA" and the calibre are marked on the left side of the slide.
- Glock semi-automatic pistols are equipped with their proprietary "Safe Action" system, which does not use a traditional single action or double action trigger mechanism.
- Glock's "Safe Action" system is a partly tensioned firing pin/striker, which is moved further back by the trigger bar when the trigger is pulled. When the trigger is pulled, three safety features (trigger safety, firing pin safety, and drop safety) are automatically deactivated one after another. When doing so, the trigger bar is deflected downward by the connector and the firing pin is released under full load. When the trigger is released, all three safety features re-engage.
- features include: round steel barrel with right hand, hexagonal/polygonal rifling; flat sided steel slide with right side ejection, rear grip serrations, and interchangeable sights; polymer receiver/frame with squared trigger guard; single trigger with integral safety lever; slide lock/release and magazine release are located on the left side of the receiver/frame; black finish.
- overall length with a 114 mm barrel is 186 mm, and the average weight, less a box magazine is 625 grams.
- Glock pistols are available with adjustable rear sight (Sport model) or with fixed sights (Service model).
- Glock pistols has become increasingly popular and a large number of accessory items have become available that will alter the pistols appearance.
- Glock pistol accessories include: laser and optical sights; mounting systems; barrels that feature cut rifling and/or compensator ports; extended slide release and magazine release buttons; grip adapters or grip reductions.

Action

- recoil operated.

Serial Number

- serial number is marked on a metal plate/strip attached to the underside of the receiver/frame, in front of the trigger guard and may be repeated on the slide and barrel.
- observed serial number consisted of a two or three letter prefix, three numbers, and/or with a two letter suffix.

Calibre

- "9x19" is marked on the left side of the slide.
- rifling characteristics: right hand twist, hexagonal rifling, 1 turn in 250mm.

Shots

- detachable box magazine.
- extended floorplates are available for the magazine that will increase the capacity.

Importer

- the importer may be marked on the right side of the receiver/frame above the grip as, "GLOCK. INC., SMYRNA, GA.".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- Glock's "Safe Action" safeties are:

-1) TRIGGER SAFETY: trigger safety is incorporated into the trigger in the form of a lever and when in the forward position, blocks the trigger from moving rearward. To fire the pistol, the trigger safety and the trigger itself, must be deliberately depressed at the same time. If the trigger safety is not depressed, the trigger will not move rearwards and allow the pistol to fire.

-2) FIRING PIN SAFETY: spring-loaded firing pin safety projects into the firing pin channel and mechanically blocks the firing pin from moving forward. When the trigger is being moved rearwards, a vertical extension of the trigger bar pushes the firing pin safety upwards, clearing the firing pin channel. During the slide cycling process, the firing pin safety automatically re-engages.

-3) DROP SAFETY: rear part of the trigger bar, which has a cruciform shape, rests with both arms on the drop safety shelf located in the trigger mechanism housing. When the trigger is pulled to the rear, the trigger bar begins to move down off the shelf until finally separating from the firing pin lug. During the slide cycling process, the trigger bar is lifted and caught by the firing pin lug. The trigger bar is re-engaged by the firing pin lug.

Notes

Make

- "GLOCK" is normally marked on the firearm as the Glock logo.
- Glock logo is a large letter "G" with the word "LOCK" appearing inside the "G".
- Glock logo may be marked on both sides of the slide, on the barrel visible through the ejection port, and on the lower left grip of the receiver/frame.
- "MADE IN USA" over "GLOCK, INC., SMYRNA, GA." or "GLOCK, INC., SMYRNA, GA." may be marked on the right side of the receiver/frame, above the grip.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- introduced in 1988 by Glock GmbH.
- "GLOCK, "17", "USA" and the calibre are marked on the left side of the slide.
- "17" may also be known as the "G17".
- Glock semi-automatic pistols are equipped with their proprietary "Safe Action" system, which does not use a traditional single action or double action trigger mechanism.
- Glock's "Safe Action" system is a partly tensioned firing pin/striker, which is moved further back by the trigger bar when the trigger is pulled. When the trigger is pulled, three safety features (trigger safety, firing pin safety, and drop safety) are automatically deactivated one after another. When doing so, the trigger bar is deflected downward by the connector and the firing pin is released under full load. When the trigger is released, all three safety features re-engage.
- features include: round steel barrel with right hand, hexagonal/polygonal rifling; flat sided steel slide with right side ejection, rear grip serrations, and interchangeable sights; polymer receiver/frame with squared trigger guard; single trigger with integral safety lever; slide lock/release and magazine release are located on the left side of the receiver/frame; black finish.
- overall length with a 114 mm barrel is 204 mm, and the average weight, less a box magazine is 620 grams.
- Glock pistols are available with adjustable rear sight (Sport model) or with fixed sights (Service model).
- Glock pistols has become increasingly popular and a large number of accessory items have become available that will alter the pistols appearance.
- Glock pistol accessories include: laser and optical sights; mounting systems; barrels that feature cut rifling and/or compensator ports; extended slide release and magazine release buttons; grip adapters or grip reductions.

Action

- recoil operated.

Serial Number

- serial number is marked on the metal insert on the underside of the receiver/frame, and repeated on the slide and barrel.
- serial number on Glocks manufactured in the U.S.A. consists of a four letter prefix and three numbers.

Calibre

- "9x19" is marked on the left side of the slide and on the barrel.

Shots

- detachable box magazine.

Notes

Make

- "GLOCK" is normally marked on the firearm as the Glock logo.
- Glock logo is a large letter "G" with the word "LOCK" appearing inside the "G".
- Glock logo may be marked on both sides of the slide, on the barrel visible through the ejection port, and on the lower left grip of the receiver/frame.
- "MADE IN AUSTRIA" over "GLOCK, INC., SMYRNA, GA." or "GLOCK, INC., SMYRNA, GA." may be marked on the right side of the receiver/frame, above the grip.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- introduced in 2002.
- "GLOCK", "17", "AUSTRIA" and the calibre are marked on the left side of the slide.
- "AMERICA'S HEROES" in a banner over "9-11-01", flanked by a New York City Police Department star and a New York City Fire Department shield is marked on the slide.
- 1,000 limited editions of Glock models 17, 21, and 22 pistols were produced to raise funds for the various charities set up to assist the survivors of the September 9, 2001 terrorist attacks in New York City, Washington, D.C., and Pennsylvania.
- Glock semi-automatic pistols are equipped with their proprietary "Safe Action" system, which does not use a traditional single action or double action trigger mechanism.
- Glock's "Safe Action" system is a partly tensioned firing pin/striker, which is moved further back by the trigger bar when the trigger is pulled. When the trigger is pulled, three safety features (trigger safety, firing pin safety, and drop safety) are automatically deactivated one after another. When doing so, the trigger bar is deflected downward by the connector and the firing pin is released under full load. When the trigger is released, all three safety features re-engage.
- features include: round steel barrel with right hand, hexagonal/polygonal rifling; flat sided steel slide with right side ejection, rear grip serrations, and interchangeable sights; polymer receiver/frame with squared trigger guard; single trigger with integral safety lever; slide lock/release and magazine release are located on the left side of the receiver/frame; black finish.
- overall length with a 114 mm barrel is 186 mm, and the average weight, less a box magazine is 625 grams.
- Glock pistols are available with adjustable rear sight (Sport model) or with fixed sights (Service model).
- Glock pistols has become increasingly popular and a large number of accessory items have become available that will alter the pistols appearance.
- Glock pistol accessories include: laser and optical sights; mounting systems; barrels that feature cut rifling and/or compensator ports; extended slide release and magazine release buttons; grip adapters or grip reductions.

Action

- recoil operated.

Serial Number

- serial number is marked on a metal strip on the underside of the receiver/frame, in front of the trigger guard and may be repeated on the slide and barrel.
- serial number range from "USA0000US" to "USA0990US".

Calibre

- "9x19" is marked on the left side of the slide.
- rifling characteristics: right hand twist, hexagonal rifling, 1 turn in 250mm.

Shots

- detachable box magazine.
- magazines with extended floor plates (plus 2 rounds) are available in calibers 9MM LUGER, 40 S&W, 380 AUTO and 357 SIG.

Remarks

- Glock's "Safe Action" safeties are:

-1) TRIGGER SAFETY: trigger safety is incorporated into the trigger in the form of a lever and when in the forward position, blocks the trigger from moving rearward. To fire the pistol, the trigger safety and the trigger itself, must be deliberately depressed at the same time. If the trigger safety is not depressed, the trigger will not move rearwards and allow the pistol to fire.

-2) FIRING PIN SAFETY: spring-loaded firing pin safety projects into the firing pin channel and mechanically blocks the firing pin from moving forward. When the trigger is being moved rearwards, a vertical extension of the trigger bar pushes the firing pin safety upwards, clearing the firing pin channel. During the slide cycling process, the firing pin safety automatically re-engages.

-3) DROP SAFETY: rear part of the trigger bar, which has a cruciform shape, rests with both arms on the drop safety shelf located in the trigger mechanism housing. When the trigger is pulled to the rear, the trigger bar begins to move down off the shelf until finally separating from the firing pin lug. During the slide cycling process, the trigger bar is lifted and caught by the firing pin lug. The trigger bar is re-engaged by the firing pin lug.

Notes

Make

- "GLOCK" is normally marked on the firearm as the Glock logo.
- Glock logo is a large letter "G" with the word "LOCK" appearing inside the "G".
- Glock logo may be marked on both sides of the slide, on the barrel visible through the ejection port, and on the lower left grip of the receiver/frame.
- "MADE IN AUSTRIA" over "GLOCK, INC., SMYRNA, GA." or "GLOCK, INC., SMYRNA, GA." may be marked on the right side of the receiver/frame, above the grip.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "GLOCK, "17" and "AUSTRIA" are marked on the left side of the slide.
- "WARNING - DANGER" over "Cutaway sample - do not" over "load or fire live ammunition" may be marked on the right side of the slide.
- "17 Cutaway" is an instructional training aid or a demonstration firearm.
- this model has been extensively cutaway to reveal the internal mechanism and its function, details follow:
- the right side of the receiver/frame is cutaway to permit the functioning of the trigger bar to be visible, there is a small cut at the right-rear of the receiver/frame to permit the sear and/or disconnector function to be seen, the left side of the receiver/frame is cutaway to permit the magazine function to be seen.
- the slide and barrel are extensively cutaway to permit the functioning of components contained within the slide and the barrel interior to be visible.
- Glock semi-automatic pistols are equipped with their proprietary "Safe Action" system, which does not use a traditional single action or double action trigger mechanism.
- Glock's "Safe Action" system is a partly tensioned firing pin/striker, which is moved further back by the trigger bar when the trigger is pulled. When the trigger is pulled, three safety features (trigger safety, firing pin safety, and drop safety) are automatically deactivated one after another. When doing so, the trigger bar is deflected downward by the connector and the firing pin is released under full load. When the trigger is released, all three safety features re-engage.
- "17 Cutaway" is an instructional training aid or a demonstration firearm.
- this Glock model 17 is extensively cutaway to reveal the internal mechanism and its function, details follow:
- the right-hand side of the receiver/frame is cutaway to permit the functioning of the trigger bar to be visible, there is a small cut at the right-rear of the receiver/frame to permit the sear and / or disconnector function to be seen, the left-hand side of the receiver/frame is cutaway to permit the magazine function to be seen.
- the slide and barrel are extensively cutaway to permit the functioning of components contained within the slide and the barrel interior to be visible.
- this firearm's receiver/frame has not been sufficiently deactivated as to prevent its further use as the master component of a firearm; for this reason this firearm has been assigned to the legal classification of "Restricted".
- overall length with a 114 mm barrel is 186mm, and the average weight is 625 grams.

Action

- recoil operated.

Serial Number

- serial number is marked on a metal strip on the underside of the receiver/frame, in front of the trigger guard and may be repeated on the slide and barrel.
- observed serial number consisted of a two letter prefix, three numbers, and a two letter suffix, eg: "JQ290US". Complete serial number was not repeated on the slide and barrel, eg: "JQ290".

Calibre

- "9x19" is marked on the left side of the slide.
- rifling characteristics: right hand twist, hexagonal rifling, 1 turn in 250mm.

Shots

- detachable box magazine.
- magazines with extended floor plates (plus 2 rounds) are available.

Other Markings

- the lower portion of the receiver/frame hand grip on the right side will be marked with a patent number molded into the receiver/frame.
- the slide is marked on the right-hand forward portion:

WARNING - DANGER
Cutaway sample - Do not load or fire live ammunition.

Remarks

- Glock's "Safe Action" safeties are:

-1) TRIGGER SAFETY: trigger safety is incorporated into the trigger in the form of a lever and when in the forward position, blocks the trigger from moving rearward. To fire the pistol, the trigger safety and the trigger itself, must be deliberately depressed at the same time. If the trigger safety is not depressed, the trigger will not move rearwards and allow the pistol to fire.

-2) FIRING PIN SAFETY: spring-loaded firing pin safety projects into the firing pin channel and mechanically blocks the firing pin from moving forward. When the trigger is being moved rearwards, a vertical extension of the trigger bar pushes the firing pin safety upwards, clearing the firing pin channel. During the slide cycling process, the firing pin safety automatically re-engages.

-3) DROP SAFETY: rear part of the trigger bar, which has a cruciform shape, rests with both arms on the drop safety shelf located in the trigger mechanism housing. When the trigger is pulled to the rear, the trigger bar begins to move down off the shelf until finally separating from the firing pin lug. During the slide cycling process, the trigger bar is lifted and caught by the firing pin lug. The trigger bar is re-engaged by the firing pin lug.

- 1,000 were manufactured.
- "GLOCK", "17", "AUSTRIA" and the calibre are marked on the left side of the slide.
- "NEW WORLD ORDER" and "OPERATION DESERT STORM, JANUARY 16 - FEBRUARY 27, 1991" inscription on the side of the slide and a listing of the coalition forces is marked on the top of the slide.
- "17 Desert Storm Commemorative" may also be known as "17 New World Order Commemorative" or "17 Operation Desert Storm Commemorative".
- Glock semi-automatic pistols are equipped with their proprietary "Safe Action" system, which does not use a traditional single action or double action trigger mechanism.
- Glock's "Safe Action" system is a partly tensioned firing pin/striker, which is moved further back by the trigger bar when the trigger is pulled. When the trigger is pulled, three safety features (trigger safety, firing pin safety, and drop safety) are automatically deactivated one after another. When doing so, the trigger bar is deflected downward by the connector and the firing pin is released under full load. When the trigger is released, all three safety features re-engage.
- features include: round steel barrel with right hand, hexagonal/polygonal rifling; flat sided steel slide with right side ejection, rear grip serrations, and interchangeable sights; polymer receiver/frame with squared trigger guard; single trigger with integral safety lever; slide lock/release and magazine release are located on the left side of the receiver/frame; black finish.
- overall length with a 114 mm barrel is 186 mm, and the average weight, less a box magazine is 625 grams.
- Glock pistols are available with adjustable rear sight (Sport model) or with fixed sights (Service model).
- Glock pistols has become increasingly popular and a large number of accessory items have become available that will alter the pistols appearance.
- Glock pistol accessories include: laser and optical sights; mounting systems; barrels that feature cut rifling and/or compensator ports; extended slide release and magazine release buttons; grip adapters or grip reductions.

Action

- recoil operated.

Serial Number

- serial number is marked on a metal strip on the underside of the receiver/frame, in front of the trigger guard and may be repeated on the slide and barrel.
- serial number range from "UD000US" to "UD999US".

Calibre

- "9x19" is marked on the left side of the slide.
- rifling characteristics: right hand twist, hexagonal rifling, 1 turn in 250mm.

Shots

- detachable box magazine.
- magazines with extended floor plates (plus 2 rounds) are available in calibers 9MM LUGER, 40 S&W, 380 AUTO and 357 SIG.

Remarks

- Glock's "Safe Action" safeties are:

-1) TRIGGER SAFETY: trigger safety is incorporated into the trigger in the form of a lever and when in the forward position, blocks the trigger from moving rearward. To fire the pistol, the trigger safety and the trigger itself, must be deliberately depressed at the same time. If the trigger safety is not depressed, the trigger will not move rearwards and allow the pistol to fire.

-2) FIRING PIN SAFETY: spring-loaded firing pin safety projects into the firing pin channel and mechanically blocks the firing pin from moving forward. When the trigger is being moved rearwards, a vertical extension of the trigger bar pushes the firing pin safety upwards, clearing the firing pin channel. During the slide cycling process, the firing pin safety automatically re-engages.

-3) DROP SAFETY: rear part of the trigger bar, which has a cruciform shape, rests with both arms on the drop safety shelf located in the trigger mechanism housing. When the trigger is pulled to the rear, the trigger bar begins to move down off the shelf until finally separating from the firing pin lug. During the slide cycling process, the trigger bar is lifted and caught by the firing pin lug. The trigger bar is re-engaged by the firing pin lug.

FRT Report

Firearm Reference Number (FRN): 195958
Make: Glock
Model: 17 Gen3

Summary

Make:	Glock
Model:	17 Gen3
Manufacturer:	Umarex
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Air,Spring or Gas
Country of Manufacturer:	TAIWAN
Serial Numbering:	See Note
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
195958 - 1	BB	18	102	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GLOCK" is marked on the airgun as the Glock logo.
- Glock logo is a large letter "G" with the word "LOCK" appearing inside the "G".
- Glock logo is marked on both sides of the slide, on the lower left grip of the receiver/frame, and on the floorplate of the magazine.
- "OFFICIALLY LICENSED" over PRODUCT OF GLOCK" is marked on the right side of the frame, above the grip.

Model

- this airgun is designed to resemble the Glock model 17 3rd generation firearm.
- "GLOCK", "17", and "AUSTRIA" is marked on the left side of the slide.
- features include: round smoothbore barrel recessed within a mock muzzle that resembles the original calibre barrel; integral fixed front and rear sights; flat sided metal slide with right side ejection port and vertical rear serrations; polymer receiver/frame with an integral accessory rail; manual safety on the underside of the accessory rail; squared trigger guard; finger grooves on the front strap; textured backstrap; rough texture surface finish (RTF) grip; single trigger with automatic trigger safety; slide lock/release is located on the left side of the receiver/frame; magazine release on left side of grip behind the trigger guard; black finish.
- Overall length is 197mm (7.75"); weight is 0.73kg (1.6lbs).

Manufacturer

- "UMAREX USA FORTH SMITH, AR" and "MADE IN TAIWAN" is marked on the underside of the trigger guard.

Action

- CO2 powered semi-automatic blowback operation.
- CO2 capsule housed within the magazine.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- marked on the underside of the accessory rail, forward of the trigger guard;
- an observed example consisted of a two letter prefix followed by six numbers.
- NOTE: a false serial number marked "GUW017" on the right side of the chamber, and on the slide below the ejection port, was observed marked on several different examples of this model. This number is not to be confused with the serial number.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre designation is marked on the underside of the accessory rail forward of the trigger guard.
Canadian Law Comments	- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Notes

Make

- "GLOCK" is normally marked on the firearm as the Glock logo.
- Glock logo is a large letter "G" with the word "LOCK" appearing inside the "G".
- Glock logo may be marked on both sides of the slide, on the barrel visible through the ejection port, and on the lower left grip of the receiver/frame.
- "MADE IN AUSTRIA" over "GLOCK, INC., SMYRNA, GA." or "GLOCK, INC., SMYRNA, GA." may be marked on the right side of the receiver/frame, above the grip.

Model

- introduced in 2010.
- "GLOCK", "17Gen", "AUSTRIA" and the calibre are marked on the left side of the slide.
- Glock semi-automatic pistols are equipped with their proprietary "Safe Action" system, which does not use a traditional single action or double action trigger mechanism.
- Glock's "Safe Action" system is a partly tensioned firing pin/striker, which is moved further back by the trigger bar when the trigger is pulled. When the trigger is pulled, three safety features (trigger safety, firing pin safety, and drop safety) are automatically deactivated one after another. When doing so, the trigger bar is deflected downward by the connector and the firing pin is released under full load. When the trigger is released, all three safety features re-engage.
- features include: round steel barrel with right hand, hexagonal/polygonal rifling; dual recoil spring assembly; flat sided steel slide with right side ejection, vertical rear grip serrations, and interchangeable sights; polymer receiver/frame with an integral equipment rail, squared trigger guard, finger grooves on the front strap, rough texture surface finish (RTF) grip, and an interchangeable back strap; single trigger with an integral safety lever; slide lock/release is located on the left side of the receiver/frame; enlarged and reversible magazine release; black finish.
- overall length with a 114 mm (4.5") barrel is 186 mm (7.32"), and the average weight, less a box magazine is 625 grams (22 oz.).
- Glock pistols are available with adjustable rear sight (Sport model) or with fixed sights (Service model).
- Glock pistols has become increasingly popular and a large number of accessory items have become available that will alter the pistols appearance.
- Glock pistol accessories include: laser and optical sights; mounting systems; barrels that feature cut rifling and/or compensator ports; extended slide release and magazine release buttons; grip adapters or grip reductions.

Action

- recoil operated.

Serial Number

- serial number is marked on a metal strip on the underside of the receiver/frame, in front of the trigger guard and may be repeated on the slide and barrel.

Calibre

- "9x19" is marked on the left side of the slide.
- rifling characteristics: right hand twist, hexagonal rifling, 1 turn in 250mm.

Shots

- detachable box magazine.

Remarks

- Glock's "Safe Action" safeties are:

-1) TRIGGER SAFETY: trigger safety is incorporated into the trigger in the form of a lever and when in the forward position, blocks the trigger from moving rearward. To fire the pistol, the trigger safety and the trigger itself, must be deliberately depressed at the same time. If the trigger safety is not depressed, the trigger will not move rearwards and allow the pistol to fire.

-2) FIRING PIN SAFETY: spring-loaded firing pin safety projects into the firing pin channel and mechanically blocks the firing pin from moving forward. When the trigger is being moved rearwards, a vertical extension of the trigger bar pushes the firing pin safety upwards, clearing the firing pin channel. During the slide cycling process, the firing pin safety automatically re-engages.

-3) DROP SAFETY: rear part of the trigger bar, which has a cruciform shape, rests with both arms on the drop safety shelf located in the trigger mechanism housing. When the trigger is pulled to the rear, the trigger bar begins to move down off the shelf until finally separating from the firing pin lug. During the slide cycling process, the trigger bar is lifted and caught by the firing pin lug. The trigger bar is re-engaged by the firing pin lug.
