Notes

Make

- "FREEDOM ARMS" is marked on the right side of the receiver/frame and on the left side of the barrel.

Model

- may also be known as "Field Grade" or "Casull Field Grade".
- began manufacture in 1988.
- is a convertible firearm. It is available with interchangeable cylinders for 45 COLT, 45 AUTO, and 45 WIN MAG.
- The difference between the "Field Grade" and "Premier Grade" Models is the finish and grip type. "Field Grade" Models are stainless steel with matte finish and Pachmayr grips.

Manufacturer

- "FREEDOM ARMS" is marked on the right side of the receiver/frame.
- Freedom Arms was established in Freedom, Wyoming, U.S.A. in 1983.
- Freedom Arms is a manufacturer specialized in producing single-action revolvers for hunting, silhouette-shooting, and self-defense

Serial Number

- alpha/numeric serial number is marked on the underside of the receiver/frame forward of the trigger guard.

Other Markings

- "PAT. NO. 4126953" is marked on the left side of the receiver/frame.

Notes

Make

- "FREEDOM ARMS" is marked on the right side of the receiver/frame and on the left side of the barrel.

Model

- "MODEL 83" is marked on the left side of the barrel.
- "FIELD GRADE" is marked on the right side of the receiver/frame.
- features include: stainless steel construction with matte finish; adjustable rear sight; non-fluted cylinder; blade front sight; single action trigger mechanism; Pachmayr or micarta grips, and sliding safety bar.
- extra cylinders are available for the 454 CASULL: 45 COLT; 45 AUTO; 45 WIN MAG; 22 LR and 22 MAG.
- chambering in the calibre "500 WE" was introduced in 2006.

Manufacturer

- "FREEDOM ARMS" is marked on the right side of the receiver/frame.
- Freedom Arms was established in Freedom, Wyoming, U.S.A. in 1983.
- Freedom Arms is a manufacturer specialized in producing single-action revolvers for hunting, silhouette-shooting, and self-defense

Serial Number

- serial number is marked on the bottom of the receiver/frame in ahead of the trigger.
- serialization for the model 83 has a single or two letter prefix as follows:
  D represents 454 CASULL (Premier Grade)
  DF represents 454 CASULL (Field Grade)
  F represents 44 MAG (Premier Grade)
  FF represents 44 MAG (Field Grade)
  G represents 22 LR (Field Grade only)
  H represents 357 MAG (Premier Grade)
  HF represents 357 MAG (Field Grade)
  I represents 50 A.E. (Premier Grade)
  IF represents 50 A.E. (Field Grade)
  J represents 41 MAG (Premier Grade)
  JF represents 41 MAG (Field Grade)
  K represents 475 Linebaugh (Premier Grade)
  KF represents 475 Linebaugh (Field Grade)
- no definite number sequence known but the lower range (approximately 7000 and below) are reserved in each series for special editions.

Calibre

- calibre designation ie.".500WE" was observed marked on the left side of the barrel.

Notes

Make

- "FREEDOM ARMS" is marked on the right side of the receiver/frame and on the left side of the barrel.

Model

- model designation is marked on the left side of the barrel as "83", and on the right side of the receiver/frame ahead of the trigger guard as: "PREMIER GRADE"
- features include: stainless steel construction with bright brushed finish; adjustable rear sight; blade front sight; laminated hardwood grip; single action trigger mechanism and sliding safety bar.
- extra cylinders are available in: 454 CASULL, 45 COLT, 45 AUTO, 45 WIN MAG, 22 LR and 22 MAG.
- chambering in the calibre "500 WE" was introduced in 2006.

Manufacturer

- "FREEDOM ARMS" is marked on the right side of the receiver/frame.
- Freedom Arms was established in Freedom, Wyoming, U.S.A. in 1983.
- Freedom Arms is a manufacturer specialized in producing single-action revolvers for hunting, silhouette-shooting, and self-defense

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the bottom of the receiver/frame ahead of the trigger guard.
- serialization for the model 83 has a one or two letter prefix.
- serial number rationalization unknown, but lower range (approximately 7000 and below) are reserved in each series for special editions.

Calibre

- calibre designation ie.".500WE" was observed marked on the left side of the barrel.

Notes

Make

- "FREEDOM ARMS" is marked on the right side of the receiver/frame.

Model

- "MINI REVOLVER" is not marked on the firearm.
- discontinued in 1989.
- this is a small stainless-steel single-action revolver intended for use for self-defense.
- features include: round barrel; solid top receiver/frame with removable cylinder; serrated spur hammer; spur trigger; fixed sights; birds' head grip; ebony, plastic, simulated ivory, or rosewood grip plates; polished stainless-steel finish.
- "Mini Revolver" was available in three sub models the FA-BG-22 with a 76mm (3") barrel, FA-L-22 with a 44 mm (1 3/4") barrel, and a FA-S-22 with a 25 mm (1") barrel.
- Mini Revolver sub model was also available in sub-sub models based on the calibre of 22 LR, 22 MAGNUM, and 22 PERCUSSION.
- ""CASULL'S IMPROVEMENT" FREEDOM ARMS FREEDOM WYO. PAT PEND" or ""CASULL'S IMPROVEMENT" FREEDOM ARMS FREEDOM WYO. PATENTED", along with the calibre, in a circle around the hammer pin may be marked on the right side of the receiver/frame.
- factory options included plain engraving or gold filled engraving. The 25mm barrel version was available with a belt buckle holster that allowed the firearm to worn around the waist as part of the belt buckle.
- do not confuse these revolvers with a very similar line of revolvers currently being made by North American Arms; though they look very similar, the markings and mechanical features of these revolvers are sufficient to distinguish between them.

Manufacturer

- "FREEDOM ARMS" is marked on the right side of the receiver/frame.
- Freedom Arms was established in Freedom, Wyoming, U.S.A. in 1983.
- Freedom Arms is a manufacturer specialized in producing single-action revolvers for hunting, silhouette-shooting, and self-defense

Serial Number

- serial number is marked on the underside of the receiver/frame.
- observed serial number consisted of a letter "A" prefix followed by five numbers.

FRT Report

Firearm Reference Number (FRN): 19164
Make: Freedom Arms
Model: Mini Revolver FA-BG-22

Summary

Make:	Freedom Arms
Model:	Mini Revolver FA-BG-22
Manufacturer:	Freedom Arms (FA)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
19164 - 2	22 LR	5	76	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	
19164 - 3	22 MAG	4	76	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	
19164 - 1	22 PERCUSSION	5	76	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "FREEDOM ARMS" is marked on the right side of the receiver/frame.

Model

- "MINI REVOLVER FA-BG-22" is not marked on the firearm.
- discontinued in 1989.
- this is a small stainless-steel single-action revolver intended for use for self-defense.
- features include: round barrel; solid top receiver/frame with removable cylinder; serrated spur hammer; spur trigger; fixed sights; birds' head grip; ebony, plastic, simulated ivory, or rosewood grip plates; polished stainless-steel finish.
- "Mini Revolver" was available in three sub models the FA-BG-22 with a 76mm (3") barrel, FA-L-22 with a 44 mm (1 3/4") barrel, and a FA-S-22 with a 25 mm (1") barrel.
- Mini Revolver sub model was also available in sub-sub models based on the calibre of 22 LR, 22 MAGNUM, and 22 PERCUSSION.
- ""CASULL'S IMPROVEMENT" FREEDOM ARMS FREEDOM WYO. PAT PEND" or ""CASULL'S IMPROVEMENT" FREEDOM ARMS FREEDOM WYO. PATENTED", along with the calibre, in a circle around the hammer pin may be marked on the right side of the receiver/frame.
- factory options included plain engraving or gold filled engraving. The 25mm barrel version was available with a belt buckle holster that allowed the firearm to worn around the waist as part of the belt buckle.
- do not confuse these revolvers with a very similar line of revolvers currently being made by North American Arms; though they look very similar, the markings and mechanical features of these revolvers are sufficient to distinguish between them.

Manufacturer

- "FREEDOM ARMS" is marked on the right side of the receiver/frame.
- Freedom Arms was established in Freedom, Wyoming, U.S.A. in 1983.
- Freedom Arms is a manufacturer specialized in producing single-action revolvers for hunting, silhouette-shooting, and self-defense

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the underside of the receiver/frame just below the cylinder.
- observed serial number consisted of a letter "A" prefix followed by five numbers.

FRT Report

Firearm Reference Number (FRN): 19169
Make: Freedom Arms
Model: Mini Revolver FA-S-22LR Patriot

Summary

Make:	Freedom Arms
Model:	Mini Revolver FA-S-22LR Patriot
Manufacturer:	Freedom Arms (FA)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
19169 - 1	22 LR	5	25	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "FREEDOM ARMS" is marked on the right side of the receiver/frame.

Model

- "MINI REVOLVER FA-S-22LR Patriot" is not marked on the firearm.
- discontinued in 1989.
- this is a small stainless-steel single-action revolver intended for use for self-defense.
- features include: round barrel; solid top receiver/frame with removable fluted cylinder; serrated spur hammer; spur trigger; fixed sights; birds' head grip; ebony, plastic, simulated ivory, or rosewood grip plates; polished stainless-steel finish.
- "Mini Revolver" was available in three sub models the FA-BG-22 with a 76mm (3") barrel, FA-L-22 with a 44 mm (1 3/4") barrel, and a FA-S-22 with a 25 mm (1") barrel.
- Mini Revolver sub model was also available in sub-sub models based on the calibre of 22 LR, 22 MAGNUM, and 22 PERCUSSION.
- ""CASULL'S IMPROVEMENT" FREEDOM ARMS FREEDOM WYO. PAT PEND" or ""CASULL'S IMPROVEMENT" FREEDOM ARMS FREEDOM WYO. PATENTED", along with the calibre, in a circle around the hammer pin may be marked on the right side of the receiver/frame.
- factory options included plain engraving or gold filled engraving. The 25mm barrel version was available with a belt buckle holster that allowed the firearm to worn around the waist as part of the belt buckle.
- do not confuse these revolvers with a very similar line of revolvers currently being made by North American Arms; though they look very similar, the markings and mechanical features of these revolvers are sufficient to distinguish between them.

Manufacturer

- "FREEDOM ARMS" is marked on the right side of the receiver/frame.
- Freedom Arms was established in Freedom, Wyoming, U.S.A. in 1983.
- Freedom Arms is a manufacturer specialized in producing single-action revolvers for hunting, silhouette-shooting, and self-defense

136765 - 1	454 CASULL	5	76	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "FREEDOM ARMS" is marked on the left side of the barrel and may also be marked on the receiver/frame.

Model

- model name is marked on the right side of the barrel as "PACKER".
- this is the standard frame size for the 454 Casull model line with the exception of having a 3"/ 76 mm barrel length.
- features include: solid receiver/frame; single action trigger; spur hammer; loading gate on right side of standing breech; due to its short barrel, this model does not have the right-side mounted ejector rod; brushed stainless steel finish; fixed front sight; may have a ported barrel.

Manufacturer

- "FREEDOM ARMS" over "PREMIER GRADE" is marked on the left side of the receiver/frame.
- Freedom Arms was established in Freedom, Wyoming, U.S.A. in 1983.
- Freedom Arms is a manufacturer of firearms specializing in the production of single-action revolvers for hunting, silhouette-shooting, and self-defense.

Serial Number

- serial number is marked on the front underside of the receiver/frame ahead of the trigger guard.
- known example had a five digit number with a letter prefix.
- letter prefix "D" has been observed.

Other Markings

- "PAT. NO. 4126953" is marked on the left side of the receiver/frame.

Firearm Reference Number (FRN): 127534
Make: Freeman, Austin Tyler
Model: Army

Summary

Make:	Freeman, Austin Tyler
Model:	Army
Manufacturer:	Hoard's Armory
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
127534 - 1	44 PERCUSSION	6	191	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "FREEMAN'S PAT. DECR. 9, 1862" is marked on the top strap.
- Austin Tyler Freeman was located in Binghamton, New York, U.S.A. from 1861 to 1874.
- Austin Tyler Freeman was assigned patent number 37,091 for a single action revolver on December, 09, 1862.
- Austin Tyler Freeman's patent single action revolver was manufactured by Hoard's Armory of Watertown, New York.
- Freeman's Patent was purchased by Henry S. Roger of Roger, Spencer & Company, circa 1864.
- Freeman's Patent was refined to produce the Roger & Spencer Army revolver.

Model

- model designation is not marked on the firearm.
- "FREEMAN'S PAT. DECR. 9, 1862" and "HOARD'S ARMORY, WATERTOWN, N.Y." are marked on the top strap.
- manufactured circa 1863 or 1864.
- total production of 2,000 units.
- features include: round barrel with blade front sight; rammer assembly located under the barrel; solid top receiver/frame with removeable unfluted round cylinder and groove in the top strap for a rear sight; cylinder has recessed percussion nipples; exposed spurred hammer; single action trigger mechanism; saw handle grip strap with square butt; one piece walnut grip; blued finish; case hardened rammer lever and hammer.

Manufacturer

- "HOARD'S ARMORY, WATERTOWN, N.Y." is marked on the top strap.
- Hoard's Armory was located in Watertown, New York, U.S.A. and was active from 1861 to 1864.
- Hoard's Armory was owned by Charles Brook Hoard.
- Hoard's Armory manufactured Government contracts from the United States of America.
- Hoard's Armory manufactured approximately 2,000 Freeman's Army percussion revolvers and 12,800 Springfield 1861 US rifle-muskets.
- Charles Brook Hoard & Son were listed as firearms makers in Pamelia, New York from 1864 to 1865.

Serial Number

- serial number range begins at one (1).

Notes

Make - make is not marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- usually marked on the left side cover of the receiver/frame: MITRAILLEUSE Mle. 1907 - the development work of this machine gun was conducted at the Manufacture Nationale d'Armes de St. Etienne and is often referred to as the "St. Etienne Mle. 1907". - gas operated, air cooled heavy machine gun. - this heavy firearm features an unusual forward propelled gas piston which actions a rack and geared pinion working an over center bolt locking cam; an unusual exposed gas cylinder assembly with exposed under barrel return spring coiled about the gas piston rod; cyclic rate of fire varied by altering the gas cylinder volume; half length barrel jacket; dual spade grips with thumb trigger. - Do not confuse with the modified Mitrailleuse Modele 1907, known correctly as the "Mitrailleuse Modele 1907 Transformee 1916", abbreviated as "Mle. 07T16": modified by replacement of the original leaf rear sight with a form of drum sight, new pattern gas regulators, new pattern firing pin and foresight.
Manufacturer	- usually marked on the left side-cover of the receiver/frame, with date of manufacture and serial number, example: Chatellerault 1910 - No. 321. - "Manufacture Nationale d'Armes de Chatellerault (MAC)" was established in Chatellerault, France in 1819. - "Manufacture Nationale d'Armes de Chatellerault (MAC)" manufactured small arms for the French government including machine-guns, rifles and pistols between 1822 and 1968.
Action	- no longer capable of full automatic fire.
Serial Number	- usually marked on the left side cover of the receiver/frame, example: Chatellerault 1910 - No. 321
Calibre	- calibre designation is not marked on the firearm.
Shots	- cartridges are fed from metallic strips holding 24 or 30 cartridges, as on the Hotchkiss pattern machine guns.

Notes

Make

- the make is not marked on the firearm.

Model

- the model designation may not be marked on the firearm.
- this is a gas-operated machinegun, adopted in 1924 as the standard-issue machinegun of the French armed forces.
- at the end of the First World War, and with the poor performance of their then-standard Chauchat/CSRG machinegun in mind, the French military decided to adopt a more suitable general-purpose machinegun; the first order of business was to adopt a cartridge that was more suitable for functioning in full-automatic firearms than the existing sharply-tapered 8mm Lebel round. After adopting the 7.5x58mm Mle 1924 cartridge, and marrying it to a top-feeding adaptation of the M1918 Browning Automatic Rifle, the French found that they had a suitable combination (the Chatellerault Mle 1924), but experienced some feeding difficulties with the 7.5x58mm case; therefore, they shortened their adopted case by 4mm to produce the 7.5x54mm cartridge and solved the feeding problems encountered with the longer case. The combination of the 7.5x54mm MAS cartridge and the Mle 1924 machinegun became known as the "Mle 1924/29".
- features include: walnut buttstock, pistol-grip, and low-hanging horizontal fore-grip; double triggers (the front trigger fires in the semi-automatic mode, and the rear trigger fires full-automatically); top-feeding box magazine; cone-shaped flash-hider and a muzzle-mounted bipod.

Manufacturer

- the manufacturer (or logo thereof) is marked on the firearm.
- "Manufacture Nationale d'Armes de Chatellerault (MAC)" was established in Chatellerault, France in 1819.
- "Manufacture Nationale d'Armes de Chatellerault (MAC)" manufactured small arms for the French government including machine-guns, rifles and pistols between 1822 and 1968.

Action

- gas operated.

Notes

Make

- the make is not marked on the firearm.

Model

- the model designation may not be marked on the firearm.
- this is a modification of the earlier Mle 1924/29 French machinegun specifically for use in tanks and emplaced fortifications.
- features include: oddly-curved pistol-grip with wooden grip-panels; single trigger (unlike the Mle 1924/29, this firearm fires ONLY in the full-automatic mode); side-mounted 150-round drum or top-mounted 36-round box magazine; cone-shaped flash-hider; very heavy barrel; and most versions of this machinegun were designed to be fired from a pintle or gimbal mount.

Manufacturer

- the manufacturer (or logo thereof) is marked on the firearm.
- "Manufacture Nationale d'Armes de Chatellerault (MAC)" was established in Chatellerault, France in 1819.
- "Manufacture Nationale d'Armes de Chatellerault (MAC)" manufactured small arms for the French government including machine-guns, rifles and pistols between 1822 and 1968.

Action

- gas-operated.

FRT Report

Firearm Reference Number (FRN): 120529
Make: French Machine Gun
Model: AAT-52

Summary

Make:	French Machine Gun
Model:	AAT-52
Manufacturer:	Manufacture d'Armes de Tulle (MAT)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	FRANCE
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
120529 - 1	7.5X54 FRENCH MAS	N/A	488	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	
120529 - 2	7.5X54 FRENCH MAS	N/A	599	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is not marked on the firearm.

Model

- the model designation is marked on the firearm.
- this is a general-purpose machine-gun adopted by the French armed forces in 1952; "AAT-52" stands for "Arme Automatique Transferable Modele 52".
- features include: delayed-blowback operation; bipod or tripod mount; quick-change barrel; hinged top-cover; cocking handle on the right; monopod at the rear of the receiver/frame; fluted chamber to assist with primary extraction; a collapsible sliding stamped stock; and a two-piece bolt to delay the opening of the chamber momentarily; despite this, the AAT-52 still exhibits very violent case extraction/ejection.
- after the adoption of NATO standards by the French, this firearm was subsequently re-chambered in 7.62mm NATO (and re-designated) as the "AA-F1".

Manufacturer

- the manufacturer is marked on the firearm.

Action

- delayed blowback operation.

Serial Number

- numbered on the receiver/frame.

Shots

- belt-fed firearm.

146760 - 2	77 FLINTLOCK	1	1188	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model is not marked on the firearm.
- this is an example of the first standardized French military musket, adopted in 1717 to an approved master pattern, and manufactured at imperial French arsenals until it was replaced by the 1728 Musket.
- features include: browned finish; fixed front sight blade on the barrel (also acting as a bayonet lug); a full-length walnut straight-grip stock with square nose-cap pinned to the barrel and held with a mid-barrel band having a sling swivel on the side (the 1728 Musket replaced the stock pins with three barrel bands); a round barrel with single flat surface on the top; four under-barrel iron ramrod thimbles; and all-iron mountings with iron sideplate, sling loop on the left side (opposite the lockplate) buttplate, detachable spike bayonet, and trigger-guard.
- a "rampart" musket (intended for use from fortified positions) was also issued, with essentially identical characteristics, but in 77 calibre.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle-loaded flintlock single-shot.

Barrel

- barrel lengths may vary slightly.

Firearm Reference Number (FRN): 146767
Make: French Service
Model: 1733 Dragoon Musket

Summary

Make:	French Service
Model:	1733 Dragoon Musket
Manufacturer:	Manufacture d'Armes de Maubeuge
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	FRANCE
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
146767 - 1	67 FLINTLOCK	1	1150	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model is not marked on the firearm.
- this is an example of the 1733 Dragoon Musket adopted in 1733 to an approved master pattern, and manufactured at Imperial French arsenals; this musket was designed specifically for French mounted infantry, known as "dragoons", and was a shortened version of the 1728 Musket designed for infantry issue, with an overall length of 1530mm.
- features include: "in-the-white" finish; fixed front sight blade (also acting as a bayonet lug); a full-length walnut straight-grip stock with split front barrel band and two mid-barrel bands; a round barrel; and all-brass mountings except for the buttplate and the sling loop.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle loader.

Barrel

- barrel lengths may vary slightly.

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- model is not marked on the firearm.
- this is an example of the 1731 'Gardes du Corps' side arm commonly known as the 1733 Pistol, that was produced between 1731 and 1743 when replacements were required by the government. As an approved master pattern, many of the 1731 parts, barrels, brass furniture, etc. were still in use when the 1743-1745 models had been commissioned.
- features include: nickeled finish or 'in the white' finished round barrel with flat top surface extending to the fixed front sight blade; a full-length walnut straight-grip stock with a brass band at the tip of the forearm; two brass ramrod thimbles; trigger and trigger guard; grip-cap with extensions up the sides of the grip; various brass furnishings.

Manufacturer

- manufacturer may be marked on the right side plate of the firearm.
- Carrier, Jean-Louis was appointed gunmaker to the king from 1729-1754, along with his fellow gunmakers Jourjon and Barallon, at a time when French Service firearms were being produced.
- Carrier, Jean-Louis was an independent gunmaker located at Saint-Étienne.

Action

- muzzle loader.

Other Markings

- "Gardes du Corps" may be marked on the firearm.

FRT Report

Firearm Reference Number (FRN): 146785
Make: French Service
Model: 1754 Dragoon Musket

Summary

Make:	French Service
Model:	1754 Dragoon Musket
Manufacturer:	Manufacture d'Armes de Charleville
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	FRANCE
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
146785 - 1	67 FLINTLOCK	1	1151	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model is not marked on the firearm.
- this is an example of the French military musket adopted and standardized in 1754 as a shortened version of the 1754 musket for issue to "dragoons" (mounted infantry).
- features include: "in-the-white" finish; fixed sights; a bayonet lug on the right side of the muzzle; a full-length walnut straight-grip stock with two forward split barrel bands and a "scoop"-style rear barrel band (the mid barrel band having a sling loop below the barrel, rather than off to one side); a round barrel with eight flat surfaces at the breech extending approximately 200mm forward of the breech plug; and all-brass mountings with iron sideplate, buttplate, detachable triangular spike bayonet, and sling loop in front of the trigger guard.
- "Officer's" and "Infantry" models of the 1754 Musket were also produced, with different barrel lengths, and in different calibres.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle loader.

Barrel

- barrel lengths may vary slightly.

FRT Report

Firearm Reference Number (FRN): 146794
Make: French Service
Model: 1763 Dragoon Musket

Summary

Make:	French Service
Model:	1763 Dragoon Musket
Manufacturer:	Manufacture d'Armes de Charleville
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	FRANCE
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
146794 - 1	69 FLINTLOCK	1	1137	Antique CC 84(1) "antique firearm"	Manufacturer Specifications and Commercial Customization	
146794 - 2	69 PERCUSSION	1	1137	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model is marked on the tang as "M1763".
- this is an example of the French military musket adopted and standardized in 1766 as a shortened version of the 1763 musket for issue to "dragoons" (mounted infantry).
- features include: "in-the-white" finish; fixed sights (front sight integral to the front band); a bayonet lug on the right side of the muzzle; a full-length walnut straight-grip stock with two forward split barrel bands and a "scoop"-style rear barrel band (the mid barrel band having a sling loop below the barrel, rather than off to one side); and brass mountings with iron lockplate, buttplate, detachable spike bayonet, and sling loop in front of the trigger-guard.
- examples of these firearms may also be seen converted to percussion ignition.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle loader.

Barrel

- barrel lengths may vary slightly.

FRT Report

Firearm Reference Number (FRN): 92815
Make: French Service
Model: 1763 Musket

Summary

Make:	French Service
Model:	1763 Musket
Manufacturer:	Manufacture d'Armes de Charleville
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	FRANCE
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
92815 - 1	69 FLINTLOCK	1	1137	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
92815 - 2	69 PERCUSSION	1	1137	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- the French service requested the model 1763 after their defeat in the Seven Year War.
- the most well known is the Charleville produced version, this has led to this model being commonly known as "1763 Charleville" or the "Charleville Rifle".

Model

- model designation is marked on the tang as: "M1763".
- features include: full length oil finished walnut stock, round barrel, three barrel bands, bayonet lug on the underside of the barrel behind the muzzle, sling swivels suspended from the middle band and through the front of the trigger guard, steel ramrod with a trumpet shaped head, brass front sight riveted to the front band, and a metal buttplate.
- a lightened version of the 1763 Musket (3.8 kg/8.3 lbs, vs. 4.65 kg/10.25 lbs), known as the 1766, or 1763 Legere, was adopted in 1766 with identical calibre and barrel length, but with slightly changed fittings; like the 1763, the 1766 has a front sight blade that is integral to the front barrel band.
- examples of these firearms may also be seen converted to percussion ignition.

Manufacturer

- manufacturer is marked on the lockplate.

Action

- muzzle loading, flintlock ignition.

Other Markings

- tang is engraved with "M1763" in semi script.
- barrel is marked with small crown over two initials.
- lockplate is marked with a small crown over "V" or "AE" and engraved with semi script "Charleville".
- sideplate is marked with one or two inspectors' initials.

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model is marked on the tang of the firearm as "1763"; these pistols were converted from the longer, heavier 1763 pattern, but the markings remained unchanged.
- this is an example of the 1763 Cavalry and Dragoon flintlock pistol adopted in 1763 to an approved master pattern, and manufactured at Imperial French arsenals, then converted to an easier-to-use format; this pistol was designed specifically for French cavalry and dragoons, who would be expected to load and fire these pistols from horseback.
- features include: "in-the-white" finish; a full-length walnut straight-grip stock with barrel band having two barrel loops; a round 229mm barrel; and all-brass mountings, with a rounded grip-cap with a short extension up the backstrap of the grip.
- this pistol replaced the earlier 1763 model, which had two barrel bands and a longer 305mm/12" barrel.
- may also be seen converted to percussion ignition.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle loader.

Barrel

- barrel lengths may vary slightly.

160626 - 1	67 FLINTLOCK	1	229	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- "M.1736" is marked on the tang of the firearm; these pistols were converted from the longer, heavier 1763 pattern in 1766, but the markings remained unchanged.
- this is an example of the 1763 Cavalry and Dragoon flintlock pistol adopted in 1763 to an approved master pattern, and manufactured at imperial French arsenals, then converted to an easier-to-use format; this pistol was designed specifically for French cavalry and dragoons, who would be expected to load and fire these pistols from horseback.
- features include: "in-the-white" finish; a full-length walnut straight-grip stock with barrel band having two barrel loops; a round 229mm barrel; and all-brass mountings, with a rounded grip-cap with a short extension up the back strap of the grip.
- this pistol replaced the earlier 1763 model, which had two barrel bands and a longer 305mm/12" barrel.
- may also be seen converted to percussion ignition.

Manufacturer

- "Mr. de Libreville" is marked on the right side plate.
- Libreville was the brief name change; of what is known today as 'Charleville, Ardennes, France'; during the time of the French Revolution.
- only 35000 were produce with the marking of "Libreville" from the Charleville location.
- the manufacture of the firearms during the time of the French Revolution was produced through an assembly of firearms recycled parts ranging from the 1763 pistol to the 1777 musket and flintlock rifles, as well as producing original 1763 parts and furniture of less quality to the originals.
- Libreville also produced a 1786 Musketoon, which may be marked with another model date.

Action

- muzzle loader.

Other Markings

- "RN" may be marked on the top of the barrel/receiver/frame forward of the model.

146797 - 2	67 FLINTLOCK	1	785	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
146797 - 1	67 PERCUSSION	1	785	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model is not marked on the firearm.
- this is an example of the 1763/66 Cavalry Musketoon adopted in 1766 to an approved master pattern, and manufactured at Imperial French arsenals; this musketoon (a drastically-shortened musket) was designed specifically for French cavalry, who would be expected to load and fire these muskets from horseback, and was a shortened version of the 1763 Musket designed for infantry issue, with an overall length of 1149mm (versus the 1529mm of the Infantry musket).
- features include: "in-the-white" finish; fixed front sight blade integral to the split front barrel band; a full-length walnut straight-grip stock with three barrel bands (the front two with dual barrel loops) a swivelling sling loop screwed to the mid-band, below the barrel; a round barrel; detachable triangular blade bayonet, and all-brass mountings.
- may also be seen converted to percussion ignition.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle loader.

Barrel

- barrel lengths may vary slightly.

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model is marked on the tang of the firearm as "1767"; these pistols were adopted as replacements for the longer, heavier 1763/66 pattern, for issue to officers of the cavalry and "dragoons" (mounted infantry).
- this is an example of the 1767 Cavalry and Dragoon flintlock pistol adopted in 1763 to an approved master pattern, and manufactured at imperial French arsenals, then converted to an easier-to-use format; this pistol was designed specifically for French cavalry and dragoons, who would be expected to load and fire these pistols from horseback.
- features include: browned finish; a full-length walnut straight-grip stock with barrel band having two barrel loops; a round 216mm barrel; and iron trigger guard, and a rounded grip-cap; and an iron sideplate.
- this pistol replaced the earlier 1763/66 model, which had a longer 229mm/9" barrel.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle-loaded flintlock single-shot.

Barrel

- barrel lengths may vary slightly.

- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model may or may not be marked on the firearm.
- this is an example of the French military musket adopted and standardized in 1767 as a shortened version of the 1763 musket, for issue to officers of the infantry and the "dragoons" (mounted infantry).
- features include: "in-the-white" finish; fixed sights (front sight integral to the front band on the Dragoons model); a bayonet lug on the underside of the muzzle; a full-length walnut straight-grip stock with three barrel bands (the mid-barrel band having a sling loop below the barrel, rather than off to one side); and sling loop in front of the trigger guard.
- where the Infantry Officer's version of this musket was issued with all-iron mountings, the Dragoon Officer's version was issued with all brass mountings.
- examples of these firearms may also be seen converted to percussion ignition.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle loader.

Barrel

- barrel lengths may vary slightly.

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the full model is not marked on the firearm; may only be marked "Mle 1770" or "M1770".
- this is an example of the 1770 Constabulary Musketoon adopted in 1770 to an approved master pattern, and manufactured at the Imperial French arsenals; this musketoon (a drastically-shortened musket) was designed specifically for French police, and was a shortened, lighter version of the 1763 Musket designed for infantry issue, with an overall length of 1149mm (versus the 1529mm of the Infantry musket). This musketoon was fitted with a detachable spike bayonet.
- features include: "in-the-white" finish; fixed front sight on barrel; a full-length walnut straight-grip stock with three barrel bands; and iron mountings with iron sideplate, buttplate, and trigger guard with a sling-loop at the bottom of the wrist.
- a very similar musketoon in 66 FLINTLOCK with a half-stock was also adopted as the 1767 Hussar's Musketoon.
- may also be seen converted to percussion ignition.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle loader.

Barrel

- barrel lengths may vary slightly.

146821 - 2	69 PERCUSSION	1	1137	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model may or may not be marked on the firearm.
- this is an example of the French military musket adopted and standardized in 1771 as a replacement for the 1754 infantry musket; this musket was shortened to the "dragoon" length due to the realization that the shorter length would be just as effective at most ranges, and provide greater ease of use.
- features include: "in-the-white" finish; fixed sights; a bayonet lug on the underside of the muzzle; a full-length walnut straight-grip stock with two forward barrel bands (the front having two barrel loops) and a "scoop"-style rear barrel band (the mid barrel band having a sling loop below the barrel, rather than off to one side); and all-iron mountings with iron side plate, butt plate, detachable, angular bayonet, and sling loop in front of the trigger guard.
- examples of these firearms may also be seen converted to percussion ignition.n.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle loader.

Barrel

- barrel lengths may vary slightly.

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- model designation may be marked on the breech tang as: "Mle 1777" in italics.
- distinguished by the absence of a forend and barrel band.
- features include: tapered round barrel; steel ramrod mounted under the barrel that extends into the grip; brass lock mechanism, flash pan, trigger guard and butt cap; no sights.
- these pistols were made in two versions: one, a version with a belt hook on the left side (intended for issue to the cavalry), and the second, a version without that hook, for issue to infantry officers.

Manufacturer

- "MRERE de CHARLEVILLE" or variation thereof may be marked on the right lock plate.
- may also be marked with a fleur-de-lis.
- the pistol was produced from 1777 to the mid 1790's at various armories in France that included St.Étienne, Charleville, Tulle and Maubeuge.

Action

- muzzle loading, flint-lock ignition.

Barrel

- barrel lengths may vary slightly.

Calibre

- may have been converted to percussion ignition circa 1841.

92756 - 5	69 FLINTLOCK	1	1137	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the French service adopted the model 1777 (an improved version of the model 1774), it remained in use until the end of the flint-lock period in France.
- the first issue of 1777 Muskets went to the United States between 1780 and 1783 to serve the forces under the command of General Rochambeau.
- variations were created during the French post-revolutionary and Napoleonic wars.
- the most well known is the Charleville produced version, this has led to this model being commonly known as "1777 Charleville" or the "Charleville Rifle".

Model

- designed by Honoré Blanc from the Royal Manufactory at Saint Étienne, as an improvement of the model 1774.
- there exists at least ten variations of the French 1777 Musket and carbines, all are based on the 1777 system.
- model designation may be marked on the breech tang as: "Mle 1777" in italics.
- features include: full length walnut straight stock with oval cheek piece, round barrel, steel ramrod, rounded trigger guard with two rear finger ridges, brass pan, and front sight, three barrel bands: front sight is riveted to front barrel ring, the middle one has the sling swivel lug at the bottom, iron butt plate, and side plate is a modified "L"-shape.
- the model 1777 could be equipped with a bayonet.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "Manuf Rle" over "Charleville" is marked under the pan.
- may also be marked with a fleur-de-lis.
- the musket was produced from 1777 to the mid 1790's at the armories in St. Étienne, Charleville, Tulle, and Mauberge.

Action

- muzzle loading, flint-lock ignition.

Other Markings

- barrel may be marked "Mle 1777" in italics.
- may be marked in script under the flash pan "Manuf Rle" over "Charleville".
- other markings observed are: a "crown" over "S (fleur-de-lis) E" or a "fleur-de-lis" or "MBE" or "TVLLE".

Notes

Make

- the French service adopted the model 1777 (an improved version of the model 1774), it remained in use until the end of the flint-lock period in France.
- the first issue of 1777 Muskets went to the United States between 1780 and 1783 to serve the forces under the command General Rochambeau.
- variations were created during the French post-revolutionary and Napoleonic wars.
- the most well known is the Charleville produced version, this has led to this model being commonly known as "1777 Charleville" or the "Charleville Rifle".

Model

- designed by Honoré Blanc from the Royal Manufactory at Saint Étienne, as an improvement of the model 1774.
- there exists at least ten variations of the French 1777 Musket and carbines, all are based on the 1777 system.
- model designation may be marked on the breech tang as: "Mle 1777" in italics.
- features include: full length walnut straight stock with oval cheek piece, round barrel, steel ramrod, rounded trigger guard with two rear finger ridges, brass pan, and front sight, three barrel bands: front sight is riveted to front barrel ring, the middle one has the sling swivel lug at the bottom, iron butt plate, and side plate is a modified "L"-shape.
- the model 1777 could be equipped with a bayonet.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "MBE" is marked on the firearm. - the musket was produced from 1777 to the mid 1790's at the armories in St. Étienne, Charleville, Tulle, and Mauberge.
Action	- muzzle loading, flintlock ignition.
Other Markings	- barrel may be marked "Mle 1777" in italics. - other markings observed are: a "crown" over "S (fleur-de-lis) E" or a "fleur-de-lis" or "MBE" or "TVLLE".

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model may or may not be marked on the firearm, as "Mle 1777"; this is a shortened conversion of the 1777 musket, specifically for the French "Royal Carabiniers", circa 1781.
- features include: browned finish; fixed sights (front sight integral to the front band); a bayonet lug on the underside of the muzzle; a full-length walnut straight-grip stock with a single forward split barrel band and a "scoop"-style rear barrel band (the mid barrel band having a sling loop below the barrel, rather than off to one side); and all-iron mountings with iron side plate, butt plate, detachable, angular bayonet, and sling loop in front of the trigger-guard.
- examples of these firearms may also be seen converted to percussion ignition.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle loader.

Barrel

- barrel lengths may vary slightly.

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- model designation may be marked on the barrel or breech tang as "Mle 1779" or "79".
- designed specifically for naval use.
- although resembling the model 1777, it differed by having a clipped tail on the lock; the barrel is held by a solid band that forms a front sight and utilizes a rounded ring cock vs. the earlier heart shaped design
- features include: tapered round barrel; steel ramrod mounted under the barrel that extends into the grip; brass lock mechanism, flash pan, trigger guard and butt cap.

Manufacturer

- "MR/ De Tulle" or variation thereof may be marked on the right lock plate.
- may also be marked with a fleur-de-lis.
- the pistol was produced from 1779 to the mid 1790's.

Action

- muzzle loading, flint-lock ignition.

Calibre

- may have been converted to percussion ignition circa 1840.

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the full model is not marked on the firearm; may only be marked "Mle 1786".
- this is an example of the 1786 Hussar's Musketoon adopted in 1786 to an approved master pattern, and manufactured at Imperial French arsenals; this musketoon (a drastically-shortened musket) was designed specifically for French Hussars (heavy mounted infantry), who would be expected to load and fire these muskets from horseback, and was a shortened, lighter version of the 1777 Musket designed for infantry issue, with an overall length of 1065mm (versus the 1520mm of the Infantry musket). To save weight, this musketoon has a half-length stock.
- features include: browned finish; fixed sights; a half-length walnut straight-grip stock with two barrel bands; a side sling rail with ring; and all-iron mountings with iron side plate, butt plate, and trigger guard.
- may also be seen converted to percussion ignition.

Manufacturer

- the manufacturer is marked on the lockplate.

Model

- the full model is not marked on the firearm; may only be marked "Mle 1786".
- this is an example of the 1786 Hussar's Musketoon adopted in 1786 to an approved master pattern, and manufactured at the Imperial French arsenals; this musketoon (a drastically-shortened musket) was designed specifically for French Hussars (heavy mounted infantry), who would be expected to load and fire these muskets from horseback, and was a shortened, lighter version of the 1777 Musket designed for infantry issue, with an overall length of 1065mm (versus the 1520mm of the Infantry musket). To save weight, this musketoon has a half-length stock.
- features include: browned finish; fixed sights; a half-length walnut straight-grip stock with two barrel bands; a side sling rail with ring; and iron mountings with iron side plate, butt plate, and trigger guard.
- may also be seen converted to percussion ignition.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle loader.

Barrel

- barrel lengths may vary slightly.

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the full model is not marked on the firearm; may only be marked "Mle 1793". - this is an example of the 1793 Versailles carbine adopted in 1793 to an approved master pattern, and manufactured at the (then) newly instituted arsenal at Versailles; at this time, France was entering the initial stages of the French Revolution, and desperately needed arms to counter the anti-revolutionary forces of its monarchist European neighbours. This rifled musket was adopted in response to the threat posed by Prussian armies, which included snipers armed with "Jaeger" rifled muskets, and an arsenal at Versailles was founded to produce several versions of these rifles. - these rifles were produced in both Infantry (650mm barrel) and Cavalry (407mm barrel) versions, and an almost identical firearm was produced under the Republican calendar designation of "AN XII" (1803-1804), with a slightly-changed stock. - features include: browned finish; fixed sights; a full-length walnut straight-grip stock pinned to the barrel (no barrel bands); an octagonal barrel; under-barrel ramrod with three brass ramrod thimbles; sling loops on the bottom of the stock at the fore-end and bottom of the wrist; brass trigger guard and pan; and iron side plate, butt plate, and ramrod. - may also be seen converted to percussion ignition. - this musket can be distinguished from the AN XII musket by the placement of the forward sling loop (the 1793 has this loop either in the middle of the front ramrod thimble, or between the front two ramrod thimbles, while the AN XII places this loop in the middle of the second thimble), and by the shape of the buttstock (where both the 1793 Cavalry and the AN XII have a distinct cheekpiece on the left side of the straight-grip stock, the 1793 Infantry has a stock without a cheekpiece).
Manufacturer	- the manufacturer is marked on the lockplate.
Action	- muzzle loader.
Barrel	- barrel lengths may vary slightly.

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model is marked on the tang as "Mle 1816" or "1816".
- this is an example of the French military musket adopted and standardized in 1816 as a replacement for the 1777 infantry musket; this musket was issued to heavily burdened artillery troops, so the muskets they were issued were shorter and lighter (1305mm, and 3.6 kg) than the standard issue 1816 musket.
- features include: "in-the-white" finish; fixed sights; a front sight integral to the split front band; a full-length walnut straight-grip stock with two forward barrel bands (the front having two barrel loops) and a "scoop"-style rear barrel band (the mid barrel band having a sling loop below the barrel, rather than off to one side); and all-brass mountings with brass bands, trigger guard and butt plate, and an iron gripstrap and sling loop in front of the trigger guard.
- examples of these firearms may also be seen converted to percussion ignition.
- other versions of the 1816 Musket (in different barrel lengths), were made for the Grenadiers, the Infantry (the Infantry and Grenadier versions being identical), the Cavalry, and the Voltigeurs.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle loader.

Barrel

- barrel lengths may vary slightly.

146884 - 2	67 PERCUSSION	1	200	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model is marked on the tang of the firearm as "Mle 1816"; these pistols were adopted in 1816 for issue to French cavalry.
- this is an example of the 1816 Cavalry flintlock pistol adopted in 1816 to an approved master pattern, and manufactured at imperial French arsenals; this pistol was designed specifically for French cavalry, who would be expected to load and fire these pistols from horseback.
- features include: "in the white" finish; a half-length walnut bird's-head stock with brass fittings, including a barrel band and side plate that share a common screw on the left side of the pistol; a round 200mm barrel; an under-barrel ramrod that inserts into the stock; an all-brass trigger guard and a rounded grip-cap; and an iron lanyard loop at the butt.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle loader.

Barrel

- barrel lengths may vary slightly.

128056 - 3	69 PERCUSSION	1	1137	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model is marked on the tang as "Mle 1816" or "1816".
- this is an example of the French military musket adopted and standardized in 1816 as a replacement for the 1777 infantry musket; this musket was standardized on the "dragoon" length (and was issued to both grenadiers and the infantry) due to the realization that the shorter length would be just as effective at most ranges, and provide greater ease of use. This musket was essentially identical to the 1777 musket, but with a 9mm longer overall length (1529mm, versus 1520mm).
- features include: "in-the-white" finish; fixed sights; a front sight integral to the split front band; a full-length walnut straight-grip stock with two forward barrel bands (the front having two barrel loops) and a "scoop"-style rear barrel band (the mid barrel band having a sling loop below the barrel, rather than off to one side); and iron mountings with iron side plate, butt plate, detachable, angular bayonet, and sling loop in front of the trigger guard.
- examples of these firearms may also be seen converted to percussion ignition.
- many of these firearms were later converted to the 1822 pattern, with shortened barrels.
- other versions of the 1816 Musket (in different barrel lengths), were made for the Voltigeurs, the Cavalry, and the Artillery.

Manufacturer

- "Manuf. Roy. de Charleville" or variation thereof in script may be marked on the right lock plate ahead of the cock.
- also made at other French State Arsenals.
- may also be marked with a fleur-de-lis.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- muzzle loader.
Barrel	- barrel lengths may vary slightly.

- this is an example of the French military musket adopted and standardized in 1816 as a replacement for the 1777 infantry musket; this musket was standardized on the "dragoon" length (and was issued to both grenadiers and the infantry) due to the realization that the shorter length would be just as effective at most ranges, and provide greater ease of use. This musket was essentially identical to the 1777 musket, but with a 9mm longer overall length (1529mm, versus 1520mm).
- features include: "in-the-white" finish; fixed sights; a front sight integral to the split front band; a full-length walnut straight-grip stock with two forward barrel bands (the front having two barrel loops) and a "scoop"-style rear barrel band (the mid barrel band having a sling loop below the barrel, rather than off to one side); and all-iron mountings with iron side plate, butt plate, detachable, angular bayonet, and sling loop in front of the trigger guard.
- examples of these firearms may also be seen converted to percussion ignition.
- many of these firearms were later converted to the 1822 pattern, with shortened barrels.
- other versions of the 1816 Musket (in different barrel lengths), were made for the Voltigeurs, the Cavalry, and the Artillery.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle-loaded flintlock single-shot.

Barrel

- barrel lengths may vary slightly.

146889 - 2	67 PERCUSSION	1	200	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model may or may not be marked on the tang of the firearm as "Mle 1816"; these pistols were adopted in 1816 for issue to French infantry officers.
- this is an example of the 1816 Officer's flintlock pistol adopted in 1816 to an approved master pattern, and manufactured at Imperial French arsenals.
- features include: "in the white" finish; a half-length walnut stock with brass grip cap, trigger guard, pan, and forearm tip; a round 200mm barrel; and a checkered "duelling"-style grip.
- a very similar pistol was adopted concurrently for issue to cavalry troops, with the same calibre and barrel length, but with a "bird's-head"-style butt having an iron lanyard loop.
- these firearms may also be seen converted to percussion ignition.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle loader.

Barrel

- barrel lengths may vary slightly.

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model is marked on the tang as "Mle 1822" or "1822".
- this is an example of the French military musket adopted and standardized in 1822 as a replacement for the 1816 cavalry musketoon; this short musket was issued to cavalry troops, who were expected to be able to load and fire these muskets from horseback, so the muskets they were issued were shorter and lighter than the standard issue 1822 musket. The 1822 Cavalry Musketoon was a slightly modified version of the 1816 Cavalry Musketoon, with a modified lock work and a screw in a brass rosette holding the sling rail to the left side of the musketoon.
- features include: "in-the-white" finish; fixed sights; a front sight mounted on the barrel; a short walnut straight grip stock with a single barrel band; a short sling rail with two sling rings on the left side of the musket that is bent forward at a sharp angle to join the rear of the side plate; and brass mountings with an iron sling rail and rings.
- examples of these firearms may also be seen converted to percussion ignition; the "1822T" ("Transformee") was a factory conversion to percussion after flintlock ignition became obsolete.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle loader.

Barrel

- barrel lengths may vary slightly.

The 1822 Cavalry Musketoon was a slightly modified version of the 1816 Cavalry Musketoon, with a modified lock work and a screw in a brass rosette holding the sling rail to the left side of the musketoon.
- features include: "in-the-white" finish; fixed sights; a front sight mounted on the barrel; a short walnut straight-grip stock with a single barrel band; a short sling rail with two sling rings on the left side of the musket that is bent forward at a sharp angle to join the rear of the side plate; and brass mountings with an iron sling rail and rings.
- examples of these firearms may also be seen converted to percussion ignition; the "1822T" ("Transformee") was a factory conversion to percussion after flintlock ignition became obsolete.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle loader.

Barrel

- barrel lengths may vary slightly.

Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	FRANCE
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
146926 - 1	67 FLINTLOCK	1	500	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
146926 - 2	67 PERCUSSION	1	500	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model is marked on the tang as "Mle 1822" or "1822".
- this is an example of the French military musket adopted and standardized in 1822 as a replacement for the 1816 cavalry musketoon; this short musket was issued to cavalry troops, who were expected to be able to load and fire these muskets from horseback, so the muskets they were issued were shorter and lighter than the standard-issue 1822 musket. The 1822 Cavalry Musketoon was a slightly-modified version of the 1816 Cavalry Musketoon, with a modified lock work and a screw in a brass rosette holding the sling rail to the left side of the musketoon.
- features include: "in-the-white" finish; fixed sights; a front sight mounted on the barrel; a short walnut straight-grip stock with a single barrel band; a short sling rail with two sling rings on the left side of the musket that is bent forward at a sharp angle to join the rear of the side plate; and all-brass mountings with an iron sling rail and rings.
- examples of these firearms may also be seen converted to percussion ignition; the "1822T" ("Transformee") was a factory conversion to percussion after flintlock ignition became obsolete.

Manufacturer

- the manufacturer is marked on the lock plate.

Action

- muzzle loader.

Barrel

- barrel lengths may vary slightly.

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model is marked on the tang of the firearm as "Mle 1822"; these pistols were adopted in 1822 for issue to French cavalry.
- this is an example of the 1822 Cavalry flintlock pistol adopted in 1822 to an approved master pattern, and manufactured at Imperial French arsenals; this pistol was designed specifically for French cavalry, who would be expected to load and fire these pistols from horseback. These pistols differ from the earlier 1816 Cavalry Pistols in having an improved lock mechanism, and a brass pan.
- features include: "in the white" finish; a half length walnut bird's-head stock with brass fittings, including a barrel band and sideplate that share a common screw on the left side of the pistol; a round barrel; an under-barrel ramrod that inserts into the stock; an iron backstrap; an all-brass trigger guard and a rounded grip cap; and an iron lanyard loop at the butt. These pistols may also be seen with a flat "belt-hook" on the left side of the pistol, allowing them to be carried tucked into a belt or sash.
- examples of these firearms may also be seen converted to percussion ignition; the "1822T" ("Transformee") was a factory conversion to percussion after flintlock ignition became obsolete.

Manufacturer

- the manufacturer is marked on the lock plate.

Action

- muzzle-loaded flintlock single-shot.

Barrel

- barrel lengths may vary slightly.

146970 - 2	60 PERCUSSION	1	128	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model is marked on the tang of the firearm as "Mle 1822"; these pistols were adopted in 1822 for issue to French police.
- this is an example of the 1822 Gendarmerie flintlock pistol adopted in 1822 to an approved master pattern, and manufactured at Imperial French arsenals; this pistol was designed specifically for French police, and was an updated version of the 1816 gendarmerie pistol, with a lock having a brass pan.
- features include: "in the white" finish; a half-length walnut bird's-head stock with "in-the-white" fittings, including a barrel band and side plate that share a common screw on the left side of the pistol; a round barrel; an under barrel ramrod that inserts into the stock; an iron back strap; an iron trigger guard and a rounded grip cap.
- an earlier version of this pistol was also produced as the "1816 Gendarmerie Pistol", with markings reading "Mle 1816", and an iron pan.
- these firearms may also be seen converted to percussion ignition.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle loader.

Barrel

- barrel lengths may vary slightly.

- this is an example of the 1822 Officer's flintlock pistol adopted in 1822 to an approved master pattern, and manufactured at Imperial French arsenals.
- features include: "in the white" finish; a half-length walnut stock with brass grip cap, trigger guard, pan, and forearm tip; a round barrel; and a checkered "duelling"-style grip.
- a very similar pistol was adopted concurrently for issue to cavalry troops, with the same calibre and barrel length, but with a "bird's-head"-style butt having an iron lanyard loop.
- examples of these firearms may also be seen converted to percussion ignition; the "1822T" ("Transformee") was a factory conversion to percussion after flintlock ignition became obsolete.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle loader.

Barrel

- barrel lengths may vary slightly.

FRT Report

Firearm Reference Number (FRN): 146905
Make: French Service
Model: 1822 Voltigeur Musket

Summary

Make:	French Service
Model:	1822 Voltigeur Musket
Manufacturer:	Manufacture d'Armes de Charleville
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	FRANCE
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
146905 - 1	69 FLINTLOCK	1	1029	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
146905 - 2	69 PERCUSSION	1	1029	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model is marked on the tang as "Mle 1822" or "1822".
- this is an example of the French military musket adopted and standardized in 1822 as a replacement for the 1816 voltigeur musket; this musket was issued to "voltigeurs" (light, mobile infantry, who were expected to act as a rapid skirmishers) so the muskets they were issued were shorter and lighter than the standard-issue 1822 musket. The 1822 Voltigeur Musket was physically identical to the 1816 Voltigeur Musket, except for changing the lockwork to the 1822 pattern, with a brass pan.
- features include: "in-the-white" finish; fixed sights; a front sight integral to the split front band; a full-length walnut straight-grip stock with two forward barrel bands (the front having two barrel loops) and a "scoop"-style rear barrel band (the mid barrel band having a sling loop below the barrel, rather than off to one side); and brass mountings with brass side plate, trigger guard, butt plate and pan, a detachable bayonet, and an iron sling loop in front of the trigger guard.
- examples of these firearms may also be seen converted to percussion ignition; the "1822T" ("Transformee") was a factory conversion to percussion after flintlock ignition became obsolete.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle loader.

Barrel

- barrel lengths may vary slightly.

146941 - 1	86 FLINTLOCK	1	1300	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model is not marked on the firearm.
- this is an unusual style of single-shot breech-loaded flintlock rifle with a tipping breech, manufactured by the French for use as defensive armament from fortified positions.
- this rifle has a "tip-up" block (containing the chamber) at the rear of the barrel, that can be lifted by pulling up on a horn-shaped latch attached to the breech block behind the rear sight; this block also has a flash-hole leading from a flintlock pan into the powder chamber, allowing a greater rate of fire than the more common muzzle-loaded rifle.
- these rifles were designed for firing at entrenched snipers and troops attacking a fortified position, and were provided with a folding spike monopod and folding "ears" on either side of the breech, that could be braced against walls to take up the recoil of firing.
- features include: "in-the-white" finish; open sights with a small front sight and flip-up rear sight; an under-barrel folding spike monopod (below where the forearm would normally be); grasping "horns" to allow the breechblock to be tipped up; a single-action trigger mechanism; and walnut straight-grip butt stock with an iron butt plate.
- these rifles will be marked on the tang and side with the date of manufacture.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- hinged breech block design.

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model is marked on the tang as "Mle 1829" or "1829".
- this is an example of the French military musket adopted and standardized in 1829 as armament for French artillery troops; this musketoon was issued to heavily burdened artillery troops, so the muskets they were issued were shorter and lighter (960mm, and 2.6 kg) than the standard issue 1822 musket.
- features include: "in-the-white" finish; fixed sights; a front sight mounted on the barrel; a short walnut straight-grip stock with a single barrel band; sling loops at the brass forearm tip and the toe of the stock; and brass mountings with an iron grip strap.
- overall length is 958mm/37 3/4".
- examples of these firearms may also be seen converted to percussion ignition; the "1829T" ("Transformee") was a factory conversion to percussion after flintlock ignition became obsolete.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle loader.

Barrel

- barrel lengths may vary slightly.

- the model is marked on the tang as "Mle 1829" or "1829".
- this is an example of the French military musket adopted and standardized in 1829 as armament for French artillery troops; this musketoon was issued to heavily burdened artillery troops, so the muskets they were issued were shorter and lighter (960mm, and 2.6 kg) than the standard issue 1822 musket.
- features include: "in-the-white" finish; fixed sights; a front sight mounted on the barrel; a short walnut straight-grip stock with a single barrel band; sling loops at the brass forearm tip and the toe of the stock; and brass mountings with an iron grip strap.
- overall length is 958mm/37 3/4".
- examples of these firearms may also be seen converted to percussion ignition; the "1829T" ("Transformee") was a factory conversion to percussion after flintlock ignition became obsolete.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle loader.

Barrel

- barrel lengths may vary slightly.

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model is marked on the tang as "Mle 1836" or "1836".
- this is an example of the French military musket adopted and standardized in 1836 as armament for "lancers" (light cavalry who were armed with spears, and used as "shock" troops during charges; though their primary armament was expected to be their spears, they were also issued with short muskets for use once battle had been joined).
- features include: "in-the-white" finish; fixed sights; a front sight mounted on the barrel; a short walnut straight-grip stock with a single barrel band/forearm tip; sling loops at the barrel band/forearm cap and the butt; and all-brass mountings with iron grip strap, brass butt plate, and brass trigger guard.
- overall length is 875mm/34 1/2".
- examples of these firearms may also be seen converted to percussion ignition; the "1836T" ("Transformee") was a factory conversion to percussion after flintlock ignition became obsolete.

Manufacturer

- the manufacturer is marked on the lockplate.

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model is marked on the tang of the firearm as "Mle 1837"; these pistols were adopted in 1837 for issue to French sailors and marines.
- this is an example of the 1837 percussion pistol adopted in 1837 to an approved master pattern, and manufactured at Imperial French arsenals. This pistol differs from the later 1849 Marine Pistol in that the 1837 pistol has the ram-rod attached to the pistol barrel by a swinging hinge, rather than a chain.
- features include: "in the white" finish; a half-length walnut round-butt stock with brass fittings, including a barrel band, trigger guard and grip-cap; an iron belt hook on the left side of the pistol; a round 152mm barrel; an under-barrel ramrod that inserts into the stock and is linked to the bottom of the barrel via a swinging hinge; an iron back strap and grip strap; an all-brass trigger guard and a rounded grip cap; and an iron lanyard loop at the butt.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle loader.

Barrel

- barrel lengths may vary slightly.

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military, police and civilian use by France and her colonies.

Model

- "Mle. 1842" or variation thereof may be marked on the barrel at the breech or on the top tang.
- manufactured from circa 1842 to 1849.
- 1842 Gendarmerie was the evolution of the 1822 model.
- features include: no iron sights; tapered round barrel with five flattened sides at the breech; tear shaped rosette inletted into the stock on the left side; spurred, round headed hammer; integral forend cap and trigger guard supporting the steel button headed ramrod; steel back action lock and grip cap.
- 1842 Gendarmerie was also manufactured at other French state arsenals.

Manufacturer

- "Mre Rle" over "de Mutzig" in script was observed marked on the side plate of an example.

Action

- muzzle loading, percussion ignition.

Other Markings

- a circular, partitioned, cartouche and various inspector initials and a crown were located on the left side of the stock of an observed example.

Model: 1842 Rifle-Musket

Summary

Make:	French Service
Model:	1842 Rifle-Musket
Manufacturer:	Unknown French
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	FRANCE
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
200516 - 1	18MM PERCUSSION	1	940	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- The make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies

Model

- "Mle 1842" in script is marked on the upper tang of the breech assembly.
-The year of manufacture may be marked on the barrel.
- Features may include: three barrel bands with the muzzle band incorporating a front sight and ramrod guide port and the middle band incorporating a sling swivel; raised V-notch rear sight and may have an additional adjustable ramp rear sight; bayonet locking lug under the barrel at the muzzle; tall hammer spur; back action lock; steel ramrod; rounded trigger guard with integral sling swivel and two rear finger ridges.
- Overall length with a 1061 mm (41.8 inches) barrel is 1421 mm (56 inches).

Manufacturer

- The manufacturer is not marked on the firearm.

Action

- Muzzle loading, percussion ignition.

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model is marked on the tang of the firearm as "Mle 1849"; these pistols were adopted in 1849 for issue to French sailors and marines.
- this is an example of the 1849 percussion pistol adopted in 1849 to an approved master pattern, and manufactured at Imperial French arsenals. This pistol differs from the earlier 1837 Marine Pistol in that the 1837 pistol has the ram-rod attached to the pistol barrel by a swinging hinge, rather than a chain.
- features include: "in the white" finish; a half-length walnut round butt stock with brass fittings, including a barrel band, trigger guard and grip cap; an iron belt-hook on the left side of the pistol; round barrel; under-barrel ramrod that inserts into the stock and is chained to the bottom of the barrel; iron back strap and grip strap; brass trigger guard and a rounded grip cap; and an iron lanyard loop at the butt.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle loader.

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model is marked on the tang as "Mle 1850".
- this is an unusual side by side smoothbore musket that could be loaded with ball or shot, intended for issue in French possessions in Africa, and issued with a blade-style bayonet that locks into place via a small bayonet lug on the right side of the muzzles.
- features include: blued finish; side by side configuration; open fixed sights; bayonet lug on the right side of the muzzles; an under-barrel steel ramrod; all-iron mountings; sling swivels below barrel and butt; back-action side locks with two triggers; steel butt plate; and a detachable blade bayonet.
- a similar side by side double musket was also made as the 1861 model, with a shorter 655mm barrel, for issue to Senegalese troops in French Africa.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- side by side muzzle loader.

Notes

Make

- the make is not marked on the firearm; this make is applied because this firearm was manufactured for the French armed forces at a French national arsenal.

Model

- model is marked on the barrel.
- manufactured between 1857 and 1862.
- this revolver differs from the 1858 model in having a rear sight on the rear of the barrel; the 1858 eliminated the rear sight, and used a notch in the cocked hammer as a rear sight.
- converted to center-fire circa 1872.
- this is the Lefaucheux 1858 pin-fire revolver adopted by the France.
- features include: open-top receiver/frame; chamber loading gate located on the right side, opens upwards
- this revolver was originally chambered for pin-fire ammunition, during its service life it was modified to use rim-fire and finally centre-fire ammunition.

Manufacturer

- manufacturer's name is marked on the receiver/frame in script.

Action

- single-action revolver.

Serial Number

- serial-numbered on the receiver/frame.

Notes

Make

- the make is not marked on the firearm.

Model

- the model is not marked on the firearm; this is a double-action revolver of the type commonly known as a "Chamelot-Delvigne-Schmidt", after the surnames of the three inventors who patented it, and which was adopted by the Belgian military in 1871. These revolvers are commonly marked "CDS" in an oval, at the front of the receiver/frame, in front of the cylinder.
- features include: typical Chamelot-Delvigne layout, appearance and operation, blued finish; octagonal or half-round/half-octagonal barrel; open fixed sights; a sliding ejector-rod mounted on the lower right side of the barrel in a slotted tube; a double-action trigger mechanism; a vertical loading gate at the right rear of the cylinder that swings down toward the rear to allow loading/unloading; checkered walnut grips; and a lanyard ring at the butt.

Manufacturer

- "PIRLOT FRERES A LIEGE" is usually marked on the left side of the receiver/frame, forward of the cylinder.
- Pirlot Freres ("Pirlot Brothers") was a manufacturer based in Liege, Belgium, between 1836 and 1879; in 1888. they patented a trademark reading "PF" under a crown, all in an oval, that somewhat resembles the Belgian "ELG" proofmark. In 1879, Pirlot Freres dissolved, and went into business with Edouard Fresart as "Pirlot & Fresart", which lasted between 1879 and 1890.

Action

- double-action revolver.

Serial Number

- serial-numbered on the receiver/frame.

66644 - 4	8MM LEBEL REV	6	120	Antique AFR, Section 1, para. 7	Non-Commercial Customization	

Notes

Make

- adopted into French service for a very short time.
- intended to replace the earlier service model.

Model

- "Mle 1887" is marked on the barrel.
- this is an intermediate step in the design phase of the French 1892 Nagant/Lebel revolver, between the 1885 revolver and the 1892. Three different versions of this revolver were built in France (a "trials" version, with a finger extension at the rear of the trigger guard, a "civil" version, with a manual safety on the left side of the receiver/frame, and a "civil" version without a safety, sold as the MAS "New Military Revolver"), in addition to a Belgian manufactured "civil" version without a manual safety.
- approximately 1000 of these revolvers were manufactured in France in 1888.
- features include: "in-the-white" or blued finish; fixed open sights; a round barrel with a captured rotating ejector-rod on a ring at the front of the frame; a solid receiver/frame, a fluted six-shot cylinder with an interrupted raised ring around the mid-point; a single-action/double-action trigger mechanism; a loading gate on the right side of the frame that rotates to the rear for loading and ejection; a floating firing pin at the top rear of the frame; a large srew at the right rear of the frame that can be unscrewed to allow the frame to open like a clamshell; thin grips with checkered wooden grip plates; and a lanyard loop at the base of the butt..
- the French "civil" or "commercial" version of these revolvers were also fitted with a manual safety lever at the left rear of the receiver/frame, at the prawl.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- marked on the receiver in script & the letter "S" on the barrel for St. Etienne arsenal. - French Government/State factories involved in handgun manufacture and their identification letters are as follows: - Manufacture d'Armes de Saint Etienne (MAS) = "S". - Manufacture d'Armes de Chatellerault (MAC) = "C". - Manufacture d'Armes de Tulle (MAT) = "T".
Serial Number	- marked on the barrel and the last two digits of the serial number on other parts.
Calibre	- not marked on the firearm.
Other Markings	- may be marked on top of the barrel: controller's initials in ovals = "M" "L", model = "Mle. 1887", the arsenal's initial "S" and the year of manufacture "1888".

Notes

Make

- French Government/State factories involved in handgun manufacture and their identification letters are as follows:
- Manufacture Nationle d'Armes de Saint Etienne (MAS) = "S".
- Manufacture Nationle d'Armes de Chatellerault (MAC) = "C".
- Manufacture Nationle d'Armes de Tulle (MAT) = "T".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "Mle 1892" is marked on the barrel. - in service from 1893 to 1945. - features include: blade front sight and a notch in the lip of the top strap for a rear sight; round or round to octagonal, rifled barrel; solid top receiver/frame with right side swing-out fluted cylinder and right side loading gate; exposed spurred hammer with removable firing pin; double/single action trigger mechanism; left side plate is hinged at the front of the receiver/frame to allow access to the interior lock work mechanism; rounded butt with lanyard ring; checkered wood grip plates; blued finish. - overall length with a 117 mm barrel is 240 mm, and the average weight is 0.84 kg.
Manufacturer	- manufacturer's name is marked on the right side of the receiver/frame in script. - "S" and the year of manufacture are marked on the barrel. - the letter "S" is the manufacturer's code for Manufacture d'Armes de St-Etienne.
Action	- double action.
Serial Number	- serial number is marked on the right side of the receiver/frame and the last two digits of the serial number may be marked on other parts.
Shots	- swing-out cylinder.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "ANTIQUE" in Canada.
Other Markings	- may be marked on top of the barrel: controller's initials in ovals = "M" "L", model = "Mle. 1892", the arsenal's initial "S" and the year of manufacture "1894".

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- "Mle. AN 9" or variation thereof may be marked on the barrel at the breech.
- manufactured circa 1780 to 1800 and is the evolution of the 1763 model.
- features include: tapered round barrel with five flattened sides at the breech; rounded hammer profile with a heart shaped opening under the flint platform; straight trigger; dual brass barrel bands joined underneath to support the steel button headed ramrod; brass flash pan, trigger guard and butt cap; no sights.
- also made in the "Gendarmerie" version for police use that featured a 128mm barrel and iron furniture.

Manufacturer

- "de Charleville" or variation thereof may be marked on the right side of the lock plate.

Action

- muzzle loading, flint-lock ignition.

Calibre

- many of these pistols were converted to percussion ignition circa 1841.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the full model is not marked on the firearm; may only be marked "AN 9" or "AN IX".
- this is an example of the AN IX Cavalry Musketoon adopted in 1800/1801 (the ninth year of the Republican calendar) to an approved master pattern, and manufactured at Imperial French arsenals; this musketoon (a drastically-shortened musket) was designed specifically for French cavalry, who would be expected to load and fire these muskets from horseback, and was a shortened version of the 1777 Musket designed for infantry issue, with an overall length of 1145mm (versus the 1529mm of the Infantry musket).
- features include: browned finish; fixed front sight blade integral to the front barrel band; a three-quarter-length walnut straight-grip stock with two barrel bands (the front with dual barrel loops) and a swivelling sling loop at the mid-band, below the barrel; a round barrel; detachable triangular blade bayonet, and iron mountings with iron side plate, butt plate, and trigger guard.
- may also be seen converted to percussion ignition.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle-loaded flintlock single-shot.

Barrel

- barrel lengths may vary slightly.

Firearm Reference Number (FRN): 146861
Make: French Service
Model: AN IX Musket

Summary

Make:	French Service
Model:	AN IX Musket
Manufacturer:	Manufacture d'Armes de Charleville
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	FRANCE
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
146861 - 1	69 FLINTLOCK	1	1137	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
146861 - 2	69 PERCUSSION	1	1137	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the model is marked on the tang as "An 9" or "An IX.
- this is an example of the French military musket adopted and standardized in 1800/1801 (the ninth year of the Republican calendar) as a "corrected" replacement for the 1777 infantry musket; this musket was shortened to the "dragoon" length due to the realization that the shorter length would be just as effective at most ranges, and provide greater ease of use. This musket was essentially identical to the 1777 musket, but with a slightly changed stock form (more in-line), and a 5mm shorter overall length (1515mm, versus 1520mm).
- features include: browned finish; fixed sights; a front sight integral to the split front band; a full-length walnut straight-grip stock with two forward barrel bands (the front having two barrel loops) and a "scoop"-style rear barrel band (the mid barrel band having a sling loop below the barrel, rather than off to one side); and iron mountings with iron side plate, butt plate, detachable, angular bayonet, and sling loop in front of the trigger guard.
- examples of these firearms may also be seen converted to percussion ignition.

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle loader.

Barrel

- barrel lengths may vary slightly.

146840 - 1	53 FLINTLOCK	1	650	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
146840 - 2	53 PERCUSSION	1	650	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- the full model is not marked on the firearm; may only be marked "AN XII".
- this is an example of the AN XII ("Year 12") Versailles carbine adopted in 1803 to an approved master pattern, and manufactured at the (then) newly instituted arsenal at Versailles; at this time, France was entering the initial stages of the French Revolution, and desperately needed arms to counter the anti-revolutionary forces of its monarchist European neighbours. This rifled musket was adopted in response to the threat posed by Prussian armies, which included snipers armed with "Jaeger" rifled muskets, and an arsenal at Versailles was founded to produce several versions of these rifles.
- these rifles were almost identical to the infantry version of the 1793 Versailles Rifled Musket, but with a slightly-changed stock.
- features include: browned finish; fixed sights; a full-length walnut straight-grip stock pinned to the barrel (no barrel bands); an octagonal barrel; under-barrel ramrod with three brass ramrod thimbles; sling loops on the bottom of the stock at the fore-end and bottom of the wrist; brass trigger-guard and pan; and iron sideplate, buttplate, and ramrod.
- may also be seen converted to percussion ignition.
- this musket can be distinguished from the 1793 musket by the placement of the forward sling loop (the 1793 has this loop either in the middle of the front ramrod thimble, or between the front two ramrod thimbles, while the AN XII places this loop in the middle of the second thimble), and by the shape of the butt stock (where both the 1793 Cavalry and the AN XII have a distinct cheek piece on the left side of the straight-grip stock, the 1793 Infantry has a stock without a cheek piece).

Manufacturer

- the manufacturer is marked on the lockplate.

Action

- muzzle-loaded flintlock single-shot.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel - barrel lengths may vary slightly.

Notes

Make

- make is not marked on the firearm.
- "French Service" refers to those firearms that were requisitioned by the government of France and produced by the various government sanctioned arsenals for military and civilian use by France and her colonies.

Model

- "M.AN 13" or "XIII" or variation thereof may be marked on the barrel at the breech.
- manufactured circa 1804 to 1819.
- model evolved from the AN IX and the 1777 Cavalry model.
- features include: tapered round barrel with five flattened sides at the breech; brass barrel band, pan, trigger guard and butt cap; steel ramrod mounted beneath the barrel; no sights.

Manufacturer

- manufacturer's designation is usually marked on the right lock plate as: "de Charleville" or "Manuf'r Nat'le de Charleville" or variation thereof.

Action

- muzzle loading, flint-lock ignition.

Calibre

- many of these pistols were converted to percussion ignition circa 1841.

Notes

Make

- not marked as "French Service".

Model

- this firearm is not marked with a model designation; features determine the model.
- distinguishable by an "L" shaped latch on the lower left foreframe, when rotated upwards toward the barrel it permits the left side-plate to swing rearward at the prawl, releasing the left hand-grip plate to reveal the inner lockwork: the internal parts are numbered from 1 through to 5, denoting the order of dis-assembly; the latch also releases the cylinder axis rod for withdrawal which permits removal of the cylinder.
- a solid receiver/frame Chamelot-Delvigne type revolver with an integral stepped octagonal barrel, blade front sight, fluted cylinder, fully guarded trigger, ejector rod and housing mounted on the right side of the barrel, loading gate on the right side of the receiver/frame, spurred hammer, pronounced grip-prawl, checkered walnut grips, steel capped butt-plate with lanyard ring.
- marked on the left barrel-flat, in script: Acier Fondu

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- a number of these firearms and parts were sub-contracted in Belgium with several makers, which manufactured them for the French firm "Manufacture Armes & Cycles de St-Etienne"; these may bear Belgian proofs.
Serial Number	- marked on the left side foreframe, ahead of the cylinder.
Calibre	- not marked with cartridge designation.

Notes

Make

- "T. FRENCH" and "CANTON" may be marked on the firearm.

Model

- manufactured prior to 1821.
- model designation is not marked on the firearm.
- this is a muzzle-loading flintlock single-shot pistol.
- these pistols can be distinguished by their calibre (64), their barrel length (10"/254mm or 10 5/8"/270mm), and their markings.
- features include: round barrel; full stock; lockplate marked "T.FRENCH" under a martial eagle; under-barrel ramrod; cock, frizzen, and flash-pan mounted on right side; and brass grip-cap.
- examples of this firearm may also be seen converted to percussion ignition.

Manufacturer

- "T. FRENCH" and "CANTON" may be marked on the firearm.
- Thomas French was located in Canton, Massachusetts, U.S.A. from 1808 to 1820.

Action

- muzzle-loading.

Notes

Make

- "FRONTIER" over "BULL-DOG" is marked on topstrap.
- "Made in Belgium" and/or Belgian proofmarks will usually appear on the firearm, usually on the receiver/frame and/or rear of cylinder.
- no markings that indicate the actual manufacturer appear on the firearm. This type of firearm was built by several firms that remain unidentified.

Model

- "FRONTIER" over "BULL-DOG" is marked on topstrap.
- features observed: blade front sight and groove in the top strap for a rear sight; octagonal barrel; solid top receiver/frame with removable fluted cylinder, ejector rod assembly and right side loading gate; exposed spurred hammer; single/double action trigger mechanism; round trigger guard; lanyard ring.

Manufacturer

- "Made in Belgium" and/or Belgian proofmarks will usually appear on the firearm, usually on the receiver/frame and/or rear of cylinder.
- no markings that indicate the actual manufacturer appear on the firearm. This type of firearm was built by several firms that remain unidentified.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - Belgian proofmark on cylinder (ELG* in an oval without a crown) indicates manufacture prior to August 1893.

Notes

Make

- Fulton Armory is a rifle manufacturer and parts supplier located in Savage, M.D.

Model

- Introduced in the mid-1990's.
- Based on the "M1 Garand" design.
- model designation is not marked on the firearm.
- the M1 is a gas operated, semi-automatic service rifle designed by John Garand.
- the M1 Garand was adopted by the U.S. in 1936, and saw service through World War II, Korea and beyond.
- features include: parkerized metal surfaces; walnut stock; post foresight with protective side wings and rear aperture sight adjustable for both windage and elevation; detachable trigger group; bayonet lug forged as part of the gas assembly.

Manufacturer

- Fulton Armory uses new and used parts to manufacturer this line of firearms.

Action

- gas operated.

Serial Number

- the serial number is marked on the top rear of the receiver/frame.

Shots

- Introduced in the mid-1990's with an 8 shot enbloc clip.
- The "M1 Garand" was introduced in 1936 with an 8 shot enbloc clip.
- This firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, eight cartridge, enbloc clip; once inserted into the firearm, this clip cannot be recharged.

Notes

Make

- the make is marked on the firearm.

Model

- the model is not marked on the firearm; this is a side by side combination gun of the type known to the Germans as a "buchseflinte" ("rifle shotgun"), or, commonly in English, as a "Cape Gun".
- these guns may be seen in hammerless or external hammer versions.
- features include: blued barrels; open fixed, leaf, or adjustable sights (optional quick-detachable scope mounts); sling swivels; checkered walnut forearm and straight or pistol-grip stock; coin-finished and engraved boxlock or sidelock receiver/frame (some with vertical Kersten cross-bolt locking lugs); double triggers; may have a horn trigger guard; top or under-lever opening; may have a tang safety; may include carved figures on the furniture.

Manufacturer

- the manufacturer is marked on the firearm.
- Christoph Funk was a gun maker located in Suhl, Thuringen, Germany from the 1840s to the late 1890s.
- Christoph Funk's business was operated by Albert. & Oskar Funk in 1900.
- Christoph Funk's business was operated by Ernst & Oskar Funk in 1914.
- Christoph Funk's business was operated by Ernst Funk from 1920 to 1939.
- Christoph Funk's business was owned Emil Funk in 1940.
- Christoph Funk specialized in hunting and sporting rifles and shotguns.

Action

- side by side configuration.

Serial Number

- serial-numbered on the receiver/frame.

- "Karl Furr & Paul J. Kuhni" or "Karl Furr" and "Paul J. Kuni" are usually marked on the underside of the firearm.

Model

- introduced in the 1960's.
- this is modern reproduction of a Gatling Gun model 1874, but in 1/3 scale and weighs approximately 20.4 kgs (45 lbs).
- Gatling Gun model 1874 was originally manufactured by Colt in 45-70 GOVT and weighed approximately 93 kgs (205 lbs)..
- "1874" model is a multi-barreled, trunnion mounted, rapid fire firearm.
- "1874" model has an exposed barrel cluster.
- "1874" model had a two-plane traverse mechanism allowing for both lateral and horizontal movement during discharge, a top-centre mounted forty round detachable steel magazine, continued use of the "Broadwell drum" and the sights were moved to the right side of the gun.
- "1874" model was chambered in calibre 45-70 GOVT.
- "1874" Army and Navy models had 813 mm (32") barrels.
- "1874" model was also introduced with 457 mm (18") barrels, which permitted various mounting possibilities.
- "1874" model with shorter barrels became known as the "camel gun", from advertising literature shown with the gun mounted atop a camel.
- features include: hand cranked, rotating, ten barrel cluster utilizing a top-centre mounted gravity feed straight, detachable box magazine or Broadwell drum; mounted on a yoke, and attached to any artillery type carriage, cavalry cart, tripod, or camel saddle; blued barrels; bronze cylindrical breech and main body with bolt access port; right side crank handle which passed through the gun body to engage a dual action cam on the left side for traversing capability; crank lock (safety); right side mounted adjustable rear sight, fixed front sight; some camel guns had a folding front sight; sighting elevation was controlled by a rear-mounted jack-screw; lateral adjustment was attained by moving the yoke assembly.
- Gatling guns were model designated by year, therefore if the year date was encountered, one would know the model.
- year of manufacture may be located on the breech of the firearm.
- overall weight of the 1874 model with 813 mm (32") barrels was approximately 93 kgs (205 lbs).
- overall weight of the 1874 camel gun version with 457 mm (18") barrels was approximately 61.2 kgs (135 lbs).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- Karl J. Furr was a master machinist and Paul J. Kuhni was an engineer, originally employed at the U.S. Steel's Geneva Works
- Karl J. Furr and Paul J. Kuhni of Orem, Utah, U.S.A. manufactured scaled down versions of Gatling Guns in the 1960s and 1970s.
- Karl J. Furr and Paul J. Kuhni also manufactured scaled down Gatling Guns under their own names.
- Karl J. Furr manufactured his first scaled down versions of muzzle loading cannons in 1954.
- Karl J. Furr with his family established a business in Orem, Utah circa 1959.
- Karl Farr business has been known as Furr Arms, Furr Arms' Gatling Gun Company, and Furr Arms & Machine.
- Furr Arms' Gatling Gun Company was located a 76 E. 350 North, Orem in 1964.

Action

- hand crank operation.

Serial Number

- serial number is usually marked on the top of the bronze breech housing.

Calibre

- "CAL. 22" is marked on top of the bronze breech housing.

Other Markings

- original Gatling Gun marks may be reproduced on the firearm.
- "GATLING BATTERY GUN" over "PAT. MAY 3, 1865" over "MANUFACTURED BY" over "COLT'S PT. FIRE ARMS MFG. CO." over "HARTFORD, CONN. U.S.A." was observed marked on a bronze plate attached to the top rear of the breech housing of the receiver/frame of a model 1866.
- "GATLING'S" over "BATTERY" over "GUN" over "PAT. NOV 4.1862" over "MAY 9.1865" over "FEB 28.1871" over "APR 9.1872" over "MADE BY COLTS'S PT. FIRE ARMS MFG CO HARTFORD, CONN U.S.A." was observed marked on an oval bronze plate attached to the top rear of the breech housing of the receiver/frame of a model 1874, 1875, and 1876.
- "GATLING GUN" over "PATENTED" on a round plate over "MODEL 1883" over "CAL. 45" and "MANUFD BY" over "Colts Pat. F.A. Mfg. Co." over "HARTFORD CONN." was observed marked on the receiver/frame of a model 1883.
- "GATLING GUN PATENTED" over "Manufactured by" over "Colt's Pt. F.A. Mfg. Co." over "HARTFORD, CONN. U.S.A." over "Model of 1903" over "Cal. .30" was observed marked on the receiver/frame of a model 1903.

Remarks

- the activation of this firearm is entirely dependent on manual cranking of the crank handle and requires neither energy from the recoil, or energy from tapping gas pressure from the barrel: the rate of fire is adjusted by varying the speed of cranking of the handle.

- GATLING GUN designation is derived for the name of the designer of this Revolving Battery Gun, Richard Jordan Gatling.
- Richard Jordan Gatling was born in 1818 and died in 1903.
- Richard Jordan Gatling was assigned patent number 36,836 on November 4, 1862 for a Revolving Battery Gun.
- Richard Jordan Gatling's first Revolving Battery Guns were built in 1862 at the Miles Greenwood Foundry & Machine Works of Cincinnati, Ohio, U.S.A..
- Richard Jordan Gatling's first six Revolving Battery Guns were destroyed by fire before they were delivered.
- Richard Jordan Gatling resumed production of the Revolving Battery Gun at the Cincinnati Type Foundry in 1863.
- Cincinnati Type Foundry manufactured thirteen Gatling Revolving Battery Guns from 1863 to 1865.
- Richard Jordan Gatling's Revolving Battery Gun production was moved to the Cooper Firearms Manufacturing Company in Philadelphia, Pennsylvania, U.S.A. in 1865.
- Cooper Firearms Manufacturing Company manufactured eight Revolving Battery Guns from 1865 to 1866.
- Richard Jordan Gatling's Revolving Battery Gun production was transferred to Colt's Patent Fire Arms Manufacturing Company, of Hartford, Connecticut, U.S.A. in late 1866.

- Gatling Gun Company was established at 24 ½ East Washington Street, Indianapolis, Indiana, U.S.A. in 1866.
- Gatling Gun Company was a sales arm of Colt's Patent Fire Arms Manufacturing Company.
- Gatling Gun Company was relocated to Hartford, Connecticut, U.S.A. in 1874.
- Gatling Gun Company's president was Richard Jordan Gatling until 1897.
- Gatling Gun Company ceased operations in 1909.
- Gatling Gun Limited/Gatling Arms & Ammunition Company Limited was located in Birmingham, England from 1888 to 1890.

Notes

Make

- "Karl Furr & Paul J. Kuhni" or "Karl Furr" and "Paul J. Kuni" are usually marked on the underside of the firearm.

Model

- introduced in the 1960s.
- this is modern reproduction of a Gatling Gun model 1883, but in 1/3 scale and weighs approximately 20.4 kgs (45 lbs).
- Gatling Gun model 1883 was originally manufactured by Colt in 45-70 GOVT and weighed approximately 117.94 kgs (260 lbs).
- "GATLING GUN" over "PATENTED" and "MODEL 1883" over "CAL. 22" and "MANUFD BY" over "Colts Pat F A Mfg Co" over "HARTFORD CONN." are usually marked on the bronze breech housing.
- this is a multi-barreled, trunnion mounted, rapid fire firearm.
- this model has a barrels cluster enclosed in a tubular bronze barrel jacket to give an overall "cannon like" appearance.
- cartridges are fed from a top mounted Accles Drum; earlier models were fed by hopper, stick/strip, box magazine, or Broadwell drum.
- this model is often found mounted on a two wheeled field carriage (land service), or on a pedestal mount (sea service, or static defense).
- this is a hand crank operated firearm with a set of ten barrels revolving about a central axis, which successively loads each barrel with a cartridge from the top mounted "Accles Positive Feed Drum" (a flat sided doughnut shaped cartridge magazine), fires each barrel, extracts and ejects the spent cartridge casing; the firearm fires each of the ten barrels in succession with each complete rotation of the set of barrels.
- the mechanism of the Model 1883 was more robust than previous models, it had longer breech bolts to permit use of the Accles feed mechanism, rebounding firing pins and stronger wider extractors.
- the normal reduced ratio side crank could be detached and the crank fitted to the direct drive end shaft protruding from the rear of the firearm, which permitted the increase of the maximum cyclic rate of fire from approximately 800 RPM, to up to 1500 RPM.

Manufacturer

- "Made by Karl Furr & Paul J. Kuhni Orem, UT" and the date of manufacure or "Made by Karl Furr" and "Paul J. Kuni, Orem, UT." and the year of manufacturer are usually marked on the underside of the firearm.
- Karl J. Furr was a master machinist and Paul J. Kuhni was an engineer, originally employed at the U.S. Steel's Geneva Works
- Karl J. Furr and Paul J. Kuhni of Orem, Utah, U.S.A. manufactured scaled down versions of Gatling Guns in the 1960s and 1970s.
- Karl J. Furr and Paul J. Kuhni also manufactured scaled down Gatling Guns under their own names.
- Karl J. Furr manufactured his first scaled down versions of muzzle loading cannons in 1954.
- Karl J. Furr with his family established a business in Orem, Utah circa 1959.
- Karl Farr business has been known as Furr Arms, Furr Arms' Gatling Gun Company, and Furr Arms & Machine.
- Furr Arms' Gatling Gun Company was located a 76 E. 350 North, Orem in 1964.
- Paul J. Kuhni was born in 1921 and died in 2013.
- Paul J. Kuhni also manufactured scaled down versions of Gardner and Hotchiss guns.

Action

- hand crank operation.

Serial Number

- serial number is usually marked on the top of the bronze breech housing.

Calibre

- "CAL. 22" is marked on top of the bronze breech housing.

Other Markings

- original Gatling Gun marks may be reproduced on the firearm.
- "GATLING BATTERY GUN" over "PAT. MAY 3, 1865" over "MANUFACTURED BY" over "COLT'S PT. FIRE ARMS MFG. CO." over "HARTFORD, CONN. U.S.A." was observed marked on a bronze plate attached to the top rear of the breech housing of the receiver/frame of a model 1866.
- "GATLING'S" over "BATTERY" over "GUN" over "PAT. NOV 4.1862" over "MAY 9.1865" over "FEB 28.1871" over "APR 9.1872" over "MADE BY COLTS'S PT. FIRE ARMS MFG CO HARTFORD, CONN U.S.A." was observed marked on an oval bronze plate attached to the top rear of the breech housing of the receiver/frame of a model 1874, 1875, and 1876.
- "GATLING GUN" over "PATENTED" on a round plate over "MODEL 1883" over "CAL. 45" and "MANUFD BY" over "Colts Pat. F.A. Mfg. Co." over "HARTFORD CONN." was observed marked on the receiver/frame of a model 1883.
- "GATLING GUN PATENTED" over "Manufactured by" over "Colt's Pt. F.A. Mfg. Co." over "HARTFORD, CONN. U.S.A." over "Model of 1903" over "Cal. .30" was observed marked on the receiver/frame of a model 1903.

Remarks

- the activation of this firearm is entirely dependent on manual cranking of the crank handle and requires neither energy from the recoil, or energy from tapping gas pressure from the barrel: the rate of fire is adjusted by varying the speed of cranking of the handle.

Manufacturer

- "Made by Karl Furr & Paul J. Kuhni Orem, UT" and the date of manufacure or "Made by Karl Furr" and "Paul J. Kuni, Orem, UT." and the year of manufacturer are usually marked on the underside of the firearm.
- Karl J. Furr was a master machinist and Paul J. Kuhni was an engineer, originally employed at the U.S. Steel's Geneva Works
- Karl J. Furr and Paul J. Kuhni of Orem, Utah, U.S.A. manufactured scaled down versions of Gatling Guns in the 1960s and 1970s.
- Karl J. Furr and Paul J. Kuhni also manufactured scaled down Gatling Guns under their own names.
- Karl J. Furr manufactured his first scaled down versions of muzzle loading cannons in 1954.
- Karl J. Furr with his family established a business in Orem, Utah circa 1959.
- Karl Farr business has been known as Furr Arms, Furr Arms' Gatling Gun Company, and Furr Arms & Machine.
- Furr Arms' Gatling Gun Company was located a 76 E. 350 North, Orem in 1964.
- Paul J. Kuhni was born in 1921 and died in 2013.
- Paul J. Kuhni also manufactured scaled down versions of Gardner and Hotchiss guns.

Action

- hand crank operation.

Serial Number

- serial number is usually marked on the top of the bronze breech housing.

Calibre

- "CAL. 22" is marked on top of the bronze breech housing.

Other Markings

- original Gatling Gun marks may be reproduced on the firearm.
- "GATLING BATTERY GUN" over "PAT. MAY 3, 1865" over "MANUFACTURED BY" over "COLT'S PT. FIRE ARMS MFG. CO." over "HARTFORD, CONN. U.S.A." was observed marked on a bronze plate attached to the top rear of the breech housing of the receiver/frame of a model 1866.
- "GATLING'S" over "BATTERY" over "GUN" over "PAT. NOV 4.1862" over "MAY 9.1865" over "FEB 28.1871" over "APR 9.1872" over "MADE BY COLTS'S PT. FIRE ARMS MFG CO HARTFORD, CONN U.S.A." was observed marked on an oval bronze plate attached to the top rear of the breech housing of the receiver/frame of a model 1874, 1875, and 1876.
- "GATLING GUN" over "PATENTED" on a round plate over "MODEL 1883" over "CAL. 45" and "MANUFD BY" over "Colts Pat. F.A. Mfg. Co." over "HARTFORD CONN." was observed marked on the receiver/frame of a model 1883.
- "GATLING GUN PATENTED" over "Manufactured by" over "Colt's Pt. F.A. Mfg. Co." over "HARTFORD, CONN. U.S.A." over "Model of 1903" over "Cal. .30" was observed marked on the receiver/frame of a model 1903.

Remarks

- the activation of this firearm is entirely dependent on manual cranking of the crank handle and requires neither energy from the recoil, nor energy from tapping gas pressure from the barrel: the rate of fire is adjusted by varying the speed of cranking of the handle.

- GATLING GUN designation is derived for the name of the designer of this Revolving Battery Gun, Richard Jordan Gatling.
- Richard Jordan Gatling was born in 1818 and died in 1903.
- Richard Jordan Gatling was assigned patent number 36,836 on November 4, 1862 for a Revolving Battery Gun.
- Richard Jordan Gatling's first Revolving Battery Guns were built in 1862 at the Miles Greenwood Foundry & Machine Works of Cincinnati, Ohio, U.S.A..
- Richard Jordan Gatling's first six Revolving Battery Guns were destroyed by fire before they were delivered.
- Richard Jordan Gatling resumed production of the Revolving Battery Gun at the Cincinnati Type Foundry in 1863.
- Cincinnati Type Foundry manufactured thirteen Gatling Revolving Battery Guns from 1863 to 1865.
- Richard Jordan Gatling's Revolving Battery Gun production was moved to the Cooper Firearms Manufacturing Company in Philadelphia, Pennsylvania, U.S.A. in 1865.
- Cooper Firearms Manufacturing Company manufactured eight Revolving Battery Guns from 1865 to 1866.
- Richard Jordan Gatling's Revolving Battery Gun production was transferred to Colt's Patent Fire Arms Manufacturing Company, of Hartford, Connecticut, U.S.A. in late 1866.

- Gatling Gun Company was established at 24 ½ East Washington Street, Indianapolis, Indiana, U.S.A. in 1866.
- Gatling Gun Company was a sales arm of Colt's Patent Fire Arms Manufacturing Company.
- Gatling Gun Company was relocated to Hartford, Connecticut, U.S.A. in 1874.
- Gatling Gun Company's president was Richard Jordan Gatling until 1897.
- Gatling Gun Company ceased operations in 1909.
- Gatling Gun Limited/Gatling Arms & Ammunition Company Limited was located in Birmingham, England from 1888 to 1890.

Notes

Make

- "FXcutlas" and " MADE IN SWEDEN" was observed marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "FXdreamline" is marked on the left side of the receiver/frame. - "smooth twist X" is also marked on the left side of the receiver/frame. - "smooth twist X" refers to a barrel system that allows a rapid change of barrel. - Features include: round, free floating match grade barrel with interchangeable liner, with or without a shrouded muzzle/sound suppressor; pre-charged pneumatic (PCP) cylinder with pressure gauge and quick fill adapter is mounted under the barrel; receiver/frame is dovetailed for accessories; straight pull biathlon style cocking system with thumb return; adjustable knob for power setting; manual safety; adjustable match grade trigger; ambidextrous laminated, walnut, synthetic adjustable, skeleton, or bull-pup stock with adjustable recoil pad; blued finish. - Overall length with a 500mm (19.68") barrel without the shroud is 737mm (29") when equipped with the bull-pup stock.
Manufacturer	- "FXcutlas" and " MADE IN SWEDEN" was observed marked on the left side of the receiver/frame.
Action	- pre-charged pneumatic (PCP) design. - discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.
Serial Number	- serial number is marked on the left side of the receiver/frame. - serial number of a referenced example consisted of a letter prefix "D", a space and six numbers.
Shots	- removable rotary magazine.
Canadian Law Comments	- Discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules. - This firearm, as it left the factory, is fitted with a "bull-pup" stock ("Prohibited Device" PDR, Part 4, Sec. 2). When the "bull-pup" stock ("Prohibited Device" PDR, Part 4, Sec. 2) is removed the receiver/frame/barrel assembly may be correctly classified as "Non-Restricted" or "Restricted". - This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. - If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

Notes

Make

- "FX" and/or "FX AIRGUNS SWEDEN" and/or "FX MADE IN SWEDEN" may be marked on the left side of the receiver/frame.

Model

- "FX gladiator" was observed marked on the left side of the receiver/frame.
- features include: top mounted round free floating Lothar-Walther match grade barrel with threaded muzzle; receiver/frame is grooved for scope mounting; straight pull cocking lever with automatic return; removable rotary magazine; removable dual air cylinders (forearm - 145cc and buttstock - 500cc); adjustable power level; pressure gauge built-in to air cylinder; adjustable match trigger; manual safety; ambidextrous synthetic pistol grip stock with adjustable recoil pad; blued finish.
- "FX GLADIATOR" is available in a tactical edition with a sound moderator/silencer.
- overall length is 950 mm, and average weight is 3.2 kgs.

Manufacturer

- "MADE IN SWEDEN" and/or "SWEDEN" is marked on the side of the receiver/frame.

Action

- pneumatic powered.
- pre-charged pneumatic cylinders.
- discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number was observed marked on the left side of the receiver/frame. - observed serial number consisted of a two letter "FX" prefix and five numbers.
Calibre	- "Cal. 5.5" over "Max pressure 220 bar" over "Made in Sweden" was observed marked on the left side of the receiver/frame of one sample.
Shots	- removable rotary magazine.
Canadian Law Comments	- as it left the factory, this firearm may be equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada. - when the sound suppressor/silencer (prohibited device) is removed from the barrel the firearm is correctly identified as a "Non Restricted Firearm".

Notes

Make

- "FX" is marked on the firearm in various places.

Model

- Introduced in 2023.
- "Panthera" is marked on the right side of the lower receiver/frame.
- The model was observed marked on the right side of the receiver/frame written all in lower case letters, "panthera".
- A model logo may be marked on the right side of the receiver/frame depicting a stylized shield with the head of a "Panther" inside.
- Extended thumb safety located on the side of the receiver/frame.
- Features include: pistol grip style receiver/frame with magazine loading port on top; left side air regulators, one above another; rear air canister load (for standard model) or front air canister load (for compact model); FX (smooth twist X superior) proprietary barrel with threaded sleeve; ambidextrous stock configuration.
- Overall length with a 300 mm (11.5 inches) barrel is 660 mm (26 inches) with the stock collapsed.
- Overall length with a 300 mm (11.75 inches) barrel is 775 mm (30.5 inches), average weight is 2.85 kg (6.25 lbs).

Manufacturer

- "FX" is marked on the firearm in various places.
- "Made in Sweden by FX Airguns" is marked on the right side of the receiver/frame.

Action

- CO2 powered.

Serial Number

- The serial number is usually marked on the right side of the receiver/frame.
- The serial number rationalization is unknown.
- Observed serial number sample consisted of seven (7) numbers without letter prefix or suffix.

Calibre

- The calibre designation is usually marked on the left side of the firearm.

Shots

- Detachable rotary disc magazine.

Canadian Law Comments

- Discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

- "FX" and/or "FX AIRGUNS SWEDEN" and/or "FX MADE IN SWEDEN" may be marked on the left side of the receiver/frame.

Model

- introduced in 2016.
- "FX streamline" is marked on the right side of the receiver/frame.
- features include: round Lothar-Walther free floating barrel with a shrouded muzzle/sound suppressor or a free floating barrel with a muzzle break; non removable air cylinder mounted under the barrel; receiver/frame is grooved for scope mounts; bolt action cocking system; bolt action safety; removable rotary magazine; adjustable Match trigger; ambidextrous synthetic, laminated or walnut stock with adjustable recoil pad; blued finish.
- overall length with the 500mm (23 5/8") barrel is 975mm (38 3/8").

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "FX" and/or "FX AIRGUNS SWEDEN" and/or "FX MADE IN SWEDEN" may be marked on the left side of the receiver/frame.
Action	- removable air cylinder mounted under the barrel. - discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
Serial Number	- serial number is usually marked on the left side of the receiver/frame.
Shots	- removable rotary magazine.
Canadian Law Comments	- as it left the factory, some versions of this firearm are equipped with a barrel shroud/integral sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada. - when the sound suppressor/silencer (prohibited device) is removed from the barrel the firearm is correctly identified as a "Non Restricted Firearm".

Canadian Law Comments

- NOTE # 1: as it left the factory, this firearm is equipped with an integral sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 (1) of the Criminal Code of Canada.
- NOTE # 2: as it left the factory, this firearm is fitted with a "bull-pup" stock ("Prohibited Device" PDR, Part 4, para. 2).
- NOTE # 3: When ALL prohibited devices are removed, the receiver/frame or complete barrelled action may be correctly classified as "Non-Restricted". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

140072 - 1	6MM AIRSOFT BB	450	400	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "G&G" or "G&G Armament" may be marked on the airsoft.

Model

- "GF85-GL FN FNC AK5 AIRSOFT" is not marked on the firearm.
- this airsoft firearm resembles a FN model "FNC AK5" automatic rifle originally manufactured by Forenade Fabriksverken (FFV) of Sweden.
- features include: aluminum outer barrel/sleeve and smoothbore inner barrel; aluminum receiver/frame; synthetic forearm/heat shield assembly, pistol grip and side folding buttstock.
- GF85-GL FN FNC AK5 Airsoft with the stock in the folded position has an overall length of 760 mm and with the stock extended has an overall length of 1010 mm.
- average weight is 4100 grams.

Manufacturer

- Guay & Guay Armament (G&G Armament or Guay Guay Trading Company Limited) was established in Taiwan in 1986.
- some examples of the G&G Armament model GF85-GL FN FNC AK5 Airsoft have been upgraded to discharge a 0.20 gram 6MM AIRSOFT BB projectile at a muzzle velocity exceeding 111.6 mps (366 fps) and a muzzle energy exceeding 1.2 Joules by Red Alert Technologies (RA Tech) of Taiwan.

Type

- this is an airsoft rifle.

Action

- spring piston is powered by an electric motor, gear box and battery.
- selective fire.
- at least two variants of this particular model exist:

Variant #1) does not discharge a 0.20 gram 6MM AIRSOFT BB projectile at a muzzle velocity exceeding 238.7 mps (783 fps) and/or a muzzle energy exceeding 5.7 Joules, and

Variant #2) does not discharge a 0.20 gram 6MM AIRSOFT BB projectile at a muzzle velocity exceeding 111.6 mps (366 fps) and/or a muzzle energy exceeding 1.2 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine.
Canadian Law Comments	- this airsoft is available in two variants: Variant #1) CC 2 "firearm" / CC 84 (3) Exempted: muzzle velocity exceeds 111.6 mps (366 fps) and/or muzzle energy exceeds 1.2 Joules, when discharging a 0.2 gram 6MM AIRSOFT BB, and Variant #2) CC 84 (1) "replica firearm": muzzle velocity is less than 111.6 mps (366 fps) and/or muzzle energy is less than 1.2 Joules, when discharging a 0.2 gram 6MM AIRSOFT BB.

Notes

Make

- G&P trademark was not observed marked on the airsoft grenade launcher.
- G&P sold this Colt M203 Airsoft Grenade Launcher with their Colt M4A1 Airsoft Carbine as a combo package.
- G&P Industrial Company Limited was established in 1995.
- G&P Industrial Company Limited is located in Kwun Tong, Hong Kong, China.

Model

- Colt's logo over "COLT'S INC" over "HARTFORD" over " CONN, USA" was observed marked on the left side of the airsoft grenade launcher.
- "LAUNCHER, GRENADE" over "40 MM : M 203" "over "S/N 101389" over "U.S.A." was observed marked on the left side of the airsoft grenade launcher.
- Colt trademark and Colt Logo are the property of the New Colt Holding Corporation.
- Colt M203 Airsoft Grenade Launcher is manufactured by King Arms under license from Cybergun.
- Colt M4A1 Airsoft Carbine and Colt M203 Airsoft Grenade Launcher were sold as the G&P M4 RAS with M203 Grenade Launcher AEG by EHobby Asia in 2011.
- "COLT M203 AIRSOFT GRENADE LAUNCHER" is a breech loading, forward sliding barrel, single shot, manually operated airsoft grenade launcher designed to be attach under the barrel of an airsoft military carbine/rifle by the interface of a attached mounting bracket.
- features include: straight rifled barrel sliding on the receiver/frame extension; round, ribbed synthetic handguard; safety lever incorporated inside the trigger guard; barrel latch located on the left side over the handguard; may have a sighting system attached to the launcher; matte black anodized and parkerized finish.
- overall length with a 305mm barrel is 381 mm, and average weight is 1.05 kgs.

Manufacturer

- King Arms trademark is not marked on the Airsoft Grenade Launcher.
- King Arms is located in Hong Kong, China.

Type

- this airsoft firearm resembles a Colt M203 Grenade Launcher.

Action

- does not discharge a projectile at a muzzle velocity exceeding 152.4 mps and/or a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- "S/N 101389" was observed marked on the left side of the airsoft grenade launcher.
- "S/N 101389" was observed marked on numerous other airsoft grenade launchers.
- "S/N 101389" does not appear to be a true serial number but rather a copied marking from an true Colt model M203 40 MM Grenade Laucher.

Other Markings

- Colt's logo over "COLT'S INC" over "HARTFORD" over " CONN, USA" was observed marked on the left side of the airsoft grenade launcher.

Make

- "GA PRECISION" was observed marked on the left side of the magazine housing of the receiver/frame.
- "MADE IN USA" may be marked on the side of the receiver/frame and magazine housing of the firearm, under the model designation.

Model

- introduced in 2016.
- "GAP 10-G2" is marked on the right side of the magazine housing of the receiver/frame.
- this model is built on the "AR-10" platform produced by the Seekins Precision's model "SPX" and specifically manufactured for GA Precision by Seekins.
- features include: upper assembly system consisting of a stainless steel round or fluted rifled barrel with ventilated cover with top accessory rail and threaded muzzle; custom 7075 billet lower receiver/frame assembly system with integral magazine housing and trigger guard; ambidextrous bolt release; ambidextrous safety; detachable box magazine; two stage trigger; sling swivel studs; synthetic ergo pistol grip; fully adjustable shoulder stock with adjustable cheekpiece and recoil pad; matte black or matte Cerakote finish.
- overall firearm length for 559mm (22") barrel is 914mm (36") at the shortest stock configuration.

Manufacturer

- manufacturer is not marked on the firearm.
- "MADE IN USA" may be marked on the side of the receiver/frame and magazine housing of the firearm, under the model designation.
- "Seekins Precision" is located in Lewiston Idaho U.S.A..
- "Seekins Precision" was founded in 2003 by Glen and Katie Seekins.
- "Seekins Precision" also manufactures AR15 and precision rifle accessories.

Action

- gas-operated.

Serial Number

- serial number is marked on the receiver/frame.
- observed serial number was marked on the left side of the magazine housing and consisted of three letters, "GAP", followed by five numbers.
- serial number rationalization is not known.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- "CALIBER MULTI" is marked on the magazine housing of the receiver/frame of the firearm.
Shots	- detachable box magazine.

Notes

Make

- make may not be marked on the firearm.
- General Gahendra Rana was an advisor to the Ghurka regiments of Nepal and a proponent for the development of this rifle and also their version of the twin barrel Gardner machine gun.

Model

- model designation is not marked on the firearm.
- various Nepalese markings will be encountered.
- up to 10,000 produced.
- a short lived design, based on the 1869 Westley Richards patent, produced under the direction of General Gahendra Rana in the 1880's for use by the Nepalese Army.
- externally resembles the Martini Henry rifle but features a loop tipped loading lever and a rear hinged tipping breech assembly.
- features include: blade front and ladder type rear sight; under barrel mounted cleaning rod; two barrel bands (rifle) or one barrel band (carbine); two piece stock.
- originally made in a rifle version prior to 1890 and subsequently manufactured in a rifle and carbine version circa 1910 to 1913 incorporating better materials.These later versions may be date marked on the side of the receiver/frame.
- overall length is 1264mm (49.75").

Manufacturer

- the manufacturer's designation may not be marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- radial designed breech assembly.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in canada.
Other Markings	- marked on the top of the receiver/frame is a diagonal series of Nagari characters that translate to "General Gehendra". - marked on the underside of the operating lever are characters which represent "tin sri", which is a title of nobility followed by an abreviation of "Gehendra" and the Nepalese word for rifle.

Notes

Make

- "CFG", "CF Galand Paris", "Galand", "Galand Arms", "Galand Arms Factory", "Galand Arms Factory Paris", "Galand Fabt", "Galand Paris", or a variation thereof may be marked on the firearm.

Model

- model designation is not usually marked on the firearm.
- some firearms are marked with the patent date "5 October 1868" or the patent number "3039".
- manufactured between 1868 and 1880.
- this is a modification of the Lefaucheux-Chaineux revolver, with the cartridge extraction system designed and patented by Galand & Sommerville in 1868.
- features include: octagonal or round barrel; five or six chamber cylinder; unfluted cylinder; self extracting system; exposed spurred hammer; wooden grip plates; noticeable "prawl" or hump on the top of the grip frame behind the hammer; with or without steel butt plate and butt-swivel.
- Simultaneous Extraction: the distinguishing feature is the "Self Extracting" or "Articulated Extraction" system, that when the operating lever was manually un-latched, the linked lever is swung down and forward draws the barrel with barrel-lug, and cylinder with circular extractor plate forward along the cylinder axis for a short distance until the extractor plate stops, while the barrel and cylinder continues further forward for a short distance to extract the cartridges from the chamber.
- Trigger Guard Actuating Lever - there are two different methods of latching down the trigger-guard lever: 1) with a latch at the rear of the trigger guard, released by a circular button; 2) by a lever inside the front trigger-guard that latches to a port in the frame just ahead of the trigger.
- Shortened Actuating Lever - short lever is located under the barrel and locks into the front of the receiver/frame, this type may have a conventional trigger guard or a folding trigger.
- Galand 1868 self extracting revolvers were manufacture in large frame and pocket size models.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "CFG", "CF Galand Paris", "Galand", "Galand Arms", "Galand Arms Factory", "Galand Arms Factory Paris", "Galand Fabt", "Galand Paris", or a variation thereof may be marked on the firearm.
- Charles Francois Galand (CFG) was a French firearms designer.
- Galand established a business in the 1860s.
- Galand had manufacturing facilities in Liege, Belgium and in Paris, France.
- Galand also had an office in Birmingham, England.
- Charles Francois Galand died circa 1900.
- Galand's business ceased operations circa 1920.
- Rene Galand the son of Charles was in business from 1920 to 1942.

Action

- double action.

Model

- no model name is marked on this firearm; model designation is derived from the patent design characteristics of the firearm.
- this handgun was manufactured circa 1868 to the early-mid 1880's.
- this is a generic entry for all revolvers of the "self-extracting" type as patented and produced by C.F. Galand of Paris, France and Liege, Belgium.
- design was patented in 1868 in France and England.
- open frame, double action.
- this patented "self-extracting" system is characterized by its one piece trigger guard/extracting lever located under the barrel and extending backwards to subsequently form the trigger guard; this lever is locked in place by a frame extension located behind the trigger.
- when manually unlatched, the trigger guard becomes a linked lever which, when swung down and forward draws the barrel/cylinder unit complete with a circular extractor plate forward along the cylinder axis pin for a short distance until the extractor plate stops; the barrel and cylinder continue their forward motion for a short distance to complete the extraction of the spent casings from the chambers.
- additional features may include:
- octagonal or round barrel,
- five or six chamber cylinder,
- unfluted cylinder,
- exposed spurred hammer,
- wooden grip plates,
- noticeable "prawl" or hump on the top of the grip frame behind the hammer,
- steel butt plate and butt-swivel.
- Belgian proof marks are frequently encountered on this firearm.

Manufacturer

- "CFG", "CF Galand Paris", "Galand", "Galand Arms", "Galand Arms Factory", "Galand Arms Factory Paris", "Galand Fabt", "Galand Paris", or a variation thereof may be marked on the firearm.
- Charles Francois Galand (CFG) was a French firearms designer.
- Galand established a business in the 1860s.
- Galand had manufacturing facilities in Liege, Belgium and in Paris, France.
- Galand also had an office in Birmingham, England.
- Charles Francois Galand died circa 1900.
- Galand's business ceased operations circa 1920.
- Rene Galand the son of Charles was in business from 1920 to 1942.

Serial Number

- serial number may be marked on the face of the standing breech, the receiver/frame flats underneath the cylinder and/or the grip frame underneath the grip plates.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "CFG", "CF Galand Paris", "Galand", "Galand Arms", "Galand Arms Factory", "Galand Arms Factory Paris", "Galand Fabt", "Galand Paris", or a variation thereof may be marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- model is not marked on firearm.
- features may include:
- open top receiver/frame with standard trigger and trigger guard or folding trigger.
- solid top receiver/frame with standard trigger and trigger guard or folding trigger.
- fixed cylinder with swing out ejector rod or removable cylinder.
- gate loading, hammerless design, checkered grips, blade front sight and grooved rear sight.
- Galand is credited as inventing the Velo Dog which was manufactured from 1894 to approximately 1910 and copied by many other companies.

Manufacturer

- "CFG", "CF Galand Paris", "Galand", "Galand Arms", "Galand Arms Factory", "Galand Arms Factory Paris", "Galand Fabt", "Galand Paris", or a variation thereof may be marked on the firearm.
- Charles Francois Galand (CFG) was a French firearms designer.
- Galand established a business in the 1860s.
- Galand had manufacturing facilities in Liege, Belgium and in Paris, France.
- Galand also had an office in Birmingham, England.
- Charles Francois Galand died circa 1900.
- Galand's business ceased operations circa 1920.
- Rene Galand the son of Charles was in business from 1920 to 1942.

Serial Number

- serial number on observed example marked on the bottom of the grip frame and consisted of five digits.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Other Markings

- firearm may be marked with Belgian or French proof marks.

Remarks

- the Velo Dog was originally marketed to bicyclists in the late 1800's. It was considered the perfect defense against dogs when traveling in rural areas. The Velo Dog model designation was derived from the words bicyclist or Velocipede and dog.

27352 - 3	410 GA X 3"	1	762	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "M.A.V.I." and "Gardone V.T. Italy" is usually marked on the left side of the receiver/frame.
- "MAVI" is usually marked on the watertable of the receiver/frame.

Model

- introduced 1968.
- "COMPANION" over "Pat.n. 45382-54476" is usually marked on the left side of the receiver/frame.
- "Companion" was imported and distributed by Eagle Arms and Galef.
- "Companion" is a folding shotgun
- features include: round, blued smoothbore barrel with a ventilated top rib and bead front sight; front hinged coin finished receiver/frame with scroll engraving and top tang mounted safety; break open lever is located on the underside of the receiver/frame, ahead of the trigger guard; extractor only; hammerless; folding mechanism allows the barrel to be rotated under the buttstock for storage; walnut forearm and pistol grip buttstock.

Manufacturer

- "M.A.V.I." and "Gardone V.T. Italy" is usually marked on the left side of the receiver/frame.
- "MAVI" is usually marked on the watertable of the receiver/frame.

Action

- break-open design.

Serial Number

- the serial number is marked on the flat edge of the receiver/frame wall and is only visible when the action is open.
- observed serial number sequences have consisted of five numbers with neither prefix nor suffix.

Calibre

- the calibre designation is marked on the right side of the receiver/frame; i.e. "20 GAUGE 3" MAGNUM"

Other Markings

- "J.L. Galef and Son N.Y. N.Y." or "Galef's" crest of a knight's plumed helmet set on a shield with the letters J, and L, and G inset at the corners of the shield and the words "Arms" and "Ammunition" within the circular boss of the shield may be marked on the side of the receiver/frame.
- "J.L. Galef & Son, Incorporated" was an importer/distributor located in New York City, New York, U.S.A.
- "EAGLE ARMS N.Y.N.Y." may be marked right side of the receiver/frame.

Firearm Reference Number (FRN): 102116
Make: Galef
Model: Gecado

Summary

Make:	Galef
Model:	Gecado
Manufacturer:	Rohm
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
102116 - 1	22 SHORT	6	74	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GALEF - NEW YORK" was observed marked on the top of the barrel.
- "J.L. Galef & Son, Inc" was an importer/distributor located in New York City, New York, U.S.A.

Model

- "GECADO" was observed marked on the grip panels.
- this model is based on the Rohm model RG-10.
- features normally include: double action, a solid receiver/frame with fixed sights, fluted cylinder, various styles of hammers, exposed cylinder pin under the barrel, and the grip frame will vary, the grips were usually plastic.
- these models may have one of the following cylinder designs. A cylinder with a loading gate on the right side of the receiver/frame only, or with a ejector rod located on the right side of the firearm.
- the finish on the firearm may be blued, nickled, or a mixture of both.

Manufacturer

- the Rohm logo of an "R" inside a football shaped oval is usually marked on the grip strap.

Serial Number

- the serial number is normally marked on the left side of the receiver/frame in front of the cylinder as sequential numbers.
- the serial number may also be marked on left side of the barrel.

Calibre

- the calibre is normally marked on the left side of the barrel. Example "CAL. 22 SHORT".

Notes

Make

- "Armi Galesi-Brescia Brevetto-Cal.", "Armi Galesi-Brescia-Cal." or "Soc. It. F.lli Galesi Brescia cal." is usually marked on the left side of the slide.
- "Made in Italy" is usually marked on the right side of the slide.
- "AG" inside a wreath may be marked on the grip plates.
- "AG" is the abbreviation for "Armi Galesi".
- "IAG" is the abbreviation for "Industria Armi Galesi".

Model

- "500" is not marked on the firearm.
- the model 500 series replaced the Galesi Model 9 in the 1960s.
- features include: round rifled barrel; fixed or groove in the top of the slide for a sight; flat side slide with rear grip serrations; safety lever is mounted on the left side of the receiver/frame; magazine release is mounted on the bottom of the rear grip strap; grip plates; various finishes.

- MODELS: 503, 504 and 505 had an overall length of 114 mm (4.5") and were available in calibres 22 SHORT, 22 LONG and 6.35 MM (25 AUTO).
- 503: blue finish and plastic moulded grip plates. grips. Model 503 is also known as the 503A or 503B. The 503A had black grips and the 503B had white grips.
- 504: chrome finish and plastic white grip plates.
- 505: chrome finish, fully engraved and white grip plates. Model 505 is also known as the 505B.
- 505EL: gold gilt finish, fully engraved and mother-of-pearl grip plates.

- MODELS: 506, 507 and 508 had an overall length of 131 mm (5.1") and were available in calibres 22 LR and 6.35MM (25 AUTO).
- 506: blue finish and plastic moulded grip plates. Model 506 is also known as the 506A or 506B. The 506A had black grips and the 506B had white grips.
- 507: chrome finish, and white plastic grip plates.
- 508: chrome finish, fully engraved and white plastic grip plates. Model 508 is also known as the 508B.
- 508EL: gold finish, fully engraved and Mother-of-Pearl grip plates.

- MODELS: 512, 513 and 514 had an overall length of 158 mm (6.2") and were available in calibre 7.65MM (32 AUTO).
- 512: blue finish and plastic moulded grip plates. Model 512 is also known as the 512A or 5123B. The 512A had black grips and the 512B had white grips.
- 513: chromed finish and white plastic grip plates.
- 514: chromed finish, fully engraved and white plastic grip plates. Model 514 is also known as the 514B.
- 514EL: gold gilt finish, fully engraved and Mother-of-Pearl grip plates.

- MODELS: 515, 516 and 517 had an overall length of 172 mm (6 3/4") and were available in calibre 7.65MM (32 AUTO).
- 515: blue finish and plastic moulded grip plates. Model 515 is also known as the 515A or 515B. The 515A had black grips and the 515B had white grips.
- 516: chrome finish and white plastic grip plates.
- 517: chrome finish, fully engraved and white plastic grip plates. Model 517 is also known as the 517B.
- 517EL: gold finish, fully engraved and Mother-of-Pearl grip plates.

Manufacturer

- "Armi Galesi-Brescia Brevetto-Cal.", "Armi Galesi-Brescia-Cal." or "Soc. It. F.lli Galesi Brescia cal." is usually marked on the left side of the slide.
- "Made in Italy" is usually marked on the right side of the slide.
- "AG" inside a wreath may be marked on the grip plates.
- "AG" is the abbreviation for "Armi Galesi".
- "IAG" is the abbreviation for "Industria Armi Galesi".
- the year of manufacture is usually marked on the right side of the receiver/frame, eg 1957 or "XV" = 1959.

Action

- blowback operated.

Calibre

- calibre is usually marked on the left side of the slide.

Shots

- detachable box magazine.

Notes

Make

- "Armi Galesi-Brescia Brevetto-Cal.", "Armi Galesi-Brescia-Cal." or "Soc. It. F.lli Galesi Brescia cal." is usually marked on the left side of the slide.
- "Made in Italy" is usually marked on the right side of the slide.
- "AG" inside a wreath may be marked on the grip plates.
- "AG" is the abbreviation for "Armi Galesi".
- "IAG" is the abbreviation for "Industria Armi Galesi".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "505EL" is not marked on the firearm.
- the model 500 series replaced the Galesi Model 9 in the 1960s.
- features include: round rifled barrel; groove in the top of the slide for a sight; flat side slide with rear grip serrations; safety lever is mounted on the left side of the receiver/frame; magazine release is mounted on the bottom of the rear grip strap; mother-of-pearl grip plates; gold gilt finish, engraved.

- MODELS: 503, 504 and 505 had an overall length of 114 mm (4.5") and were available in calibres 22 SHORT, 22 LONG and 6.35 MM (25 AUTO).
- 503: blue finish and plastic moulded grip plates. grips. Model 503 is also known as the 503A or 503B. The 503A had black grips and the 503B had white grips.
- 504: chrome finish and plastic white grip plates.
- 505: chrome finish, fully engraved and white grip plates. Model 505 is also known as the 505B.
- 505EL: gold gilt finish, fully engraved and mother-of-pearl grip plates.

- NOTE: see Other Notes / Remarks for the other 500 models in calibres 22 LR, 6.35MM (32 AUTO) and 7.65MM (32 AUTO).

Manufacturer

- "Armi Galesi-Brescia Brevetto-Cal.", "Armi Galesi-Brescia-Cal." or "Soc. It. F.lli Galesi Brescia cal." is usually marked on the left side of the slide.
- "Made in Italy" is usually marked on the right side of the slide.
- "AG" inside a wreath may be marked on the grip plates.
- "AG" is the abbreviation for "Armi Galesi".
- "IAG" is the abbreviation for "Industria Armi Galesi".
- the year of manufacture is usually marked on the right side of the receiver/frame, eg 1957 or "XVI" = 1960.

Action

- blowback operated.

Serial Number

- serial number is usually marked on the front grip strap of the receiver/frame.

Calibre

- calibre is usually marked on the left side of the slide.

Shots

- detachable box magazine.

Remarks

- MODELS: 506, 507 and 508 had an overall length of 131 mm (5.1") and were available in calibres 22 LR and 6.35MM (25 AUTO).
- Model 506: blue finish and plastic moulded grip plates. Model 506 is also known as the 506A or 506B. The 506A had black grips and the 506B had white grips.
- Model 507: chrome finish and white plastic grip plates.
- Model 508: chrome finish, fully engraved and white plastic grip plates. Model 508 is also known as the 508B.
- Model 508EL: gold finish, fully engraved and Mother-of-Pearl grip plates.

- MODELS: 512, 513 and 514 had an overall length of 158 mm (6.2") and were available in calibre 7.65MM (32 AUTO).
- Model 512: blue finish and plastic moulded grip plates. Model 512 is also known as the 512A or 5123B. The 512A had black grips and the 512B had white grips.
- Model 513: chromed finish and white plastic grip plates.
- Model 514: chromed finish, fully engraved and white plastic grip plates. Model 514 is also known as the 514B.
- Model 514EL: gold gilt finish, fully engraved and Mother-of-Pearl grip plates.

- MODELS: 515 and 516 had an overall length of 172 mm (6 3/4") and were available in calibre 7.65MM (32 AUTO).
- Model 515: blue finish and plastic moulded grip plates. Model 515 is also known as the 515A or 515B. The 515A had black grips and the 515B had white grips.
- Model 516: chrome finish and white plastic grip plates.
- Model 517: chrome finish, fully engraved and white plastic grip plates. Model 517 is also known as the 517B.
- Model 517EL: gold finish, fully engraved and Mother-of-Pearl grip plates.

Manufacturer

- "Armi Galesi-Brescia Brevetto-Cal.", "Armi Galesi-Brescia-Cal." or "Soc. It. F.lli Galesi Brescia cal." is usually marked on the left side of the slide.
- "Made in Italy" is usually marked on the right side of the slide.
- "AG" inside a wreath may be marked on the grip plates.
- "AG" is the abbreviation for "Armi Galesi".
- "IAG" is the abbreviation for "Industria Armi Galesi".
- the year of manufacture is usually marked on the right side of the receiver/frame, eg 1957 or "XV" = 1959.

Action

- blowback operated.

Serial Number

- serial number is usually marked on the front grip strap of the receiver/frame.

Calibre

- calibre is usually marked on the left side of the slide.

Shots

- detachable box magazine.

Remarks

- MODELS: 503, 504 and 505 had an overall length of 114 mm (4.5") and were available in calibres 22 SHORT, 22 LONG and 6.35 MM (25 AUTO).
- Model 503: blue finish and plastic moulded grip plates. grips. Model 503 is also known as the 503A or 503B. The 503A had black grips and the 503B had white grips.
- Model 504: chrome finish and plastic white grip plates.
- Model 505: chrome finish, fully engraved and white grip plates. Model 505 is also known as the 505B.
- Model 505EL: gold gilt finish, fully engraved and mother-of-pearl grip plates.

- MODELS: 512, 513 and 514 had an overall length of 158 mm (6.2") and were available in calibre 7.65MM (32 AUTO).
- Model 512: blue finish and plastic moulded grip plates. Model 512 is also known as the 512A or 5123B. The 512A had black grips and the 512B had white grips.
- Model 513: chromed finish and white plastic grip plates.
- Model 514: chromed finish, fully engraved and white plastic grip plates. Model 514 is also known as the 514B.
- Model 514EL: gold gilt finish, fully engraved and Mother-of-Pearl grip plates.

- MODELS: 515 and 516 had an overall length of 172 mm (6 3/4") and were available in calibre 7.65MM (32 AUTO).
- Model 515: blue finish and plastic moulded grip plates. Model 515 is also known as the 515A or 515B. The 515A had black grips and the 515B had white grips.
- Model 516: chrome finish and white plastic grip plates.
- Model 517: chrome finish, fully engraved and white plastic grip plates. Model 517 is also known as the 517B.
- Model 517EL: gold finish, fully engraved and Mother-of-Pearl grip plates.

- Galil is based on the M62 rifle manufactured in Finland by Valmet.
- the M62 rifle was derived from the design of the Kalashnikov AK-47 assault rifle.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- model and calibre designation is marked in 4 lines on the left rear of the receiver/frame as:
"S. Auto Galil"
"CALIBER 7.62/308"
"MODEL 331"
" IMI - Israel"
- features include:
- skeleton type side folding stock.
- stock: black synthetic material.
- safety at left rear of receiver/frame marked "F & S".
- gas operated, rotating bolt mechanism.
- detachable box magazine.
- "L" flip type rear sight, tritium sights available as an option.
- flash suppressor and bayonet lug standard.
- cocking handle, safety catch, and magazine catch can be operated from either side of the firearm.

Manufacturer

- "IMI - ISRAEL" is marked on the left side of the receiver/frame.
- "IMI" is the abbreviation for "Israel Military Industries".

Action

- gas operated.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- observed serial number consisted of eight digits without a letter prefix or suffix.
- observed serial number consisted of a three letter prefix of "AAL" followed by a dash and seven digits.
- serial numbers with the letter prefix of "AA" or "AAL" are associated with the importer: Action Arms.
- serial numbers with the letter prefix of "GS" are associated with the importer: Springfield Armory.
- serial numbers with the letter prefix of "MR" are associated to the importer: Magnum Research.

Calibre

- "CALIBER 7.62/.308" is marked on the left side of the receiver/frame.

Shots

- detachable box magazine.

Other Markings

- on left side of receiver/frame as follows:
"MANUFACTURED FOR RUKO OF CANADA"

Notes

Make

- "GALIL" as a make is used for a family of Israeli small arms designed by Yisrael Galili and Yaacov Lior.
- Galil is based on the M62 rifle manufactured in Finland by Valmet.
- the M62 rifle was derived from the design of the Kalashnikov AK-47 assault rifle.

Model

- "SAR GALIL" may be marked on the firearm.
- "SAR" is a short-barrelled version of the Galil AR ("Assault Rifle"), which is the rifle version of the Galil ARM light machinegun/Squad Automatic Weapon.
- the Galil series combines features of both the AK-47/Kalashnikov series (stamped receiver/frame with a gas piston riding in a tube above the barrel) and the M16 series (rotating multi-lugged bolt-head).
- features include: black synthetic pistol-grip and forearm; folding tubular buttstock; ambidextrous safety/selector system with a thumb-operated lever on the left side (above the pistol-grip), and an AK-style lever on the right side of the receiver/frame that blocks the movement of the bolt carrier when set to "Safe"; vertical cocking handle that allows for both left and right hand use; flip-up tritium night-sights; bayonet lug; and a flash suppressor that allows the launching of grenades/flares (with the proper ammunition); no bipod or carrying handle.
- when built for the Israeli Defence Forces, these firearms bear markings ONLY in Hebrew; those versions built for export sales bear markings in English or other languages.

Manufacturer

- "IMI - ISRAEL" may be marked on the left side of the receiver/frame.
- "IMI" is the abbreviation for "Israel Military Industries".

Action

- gas operated, rotating bolt.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number - serial number is marked on the left side of the receiver/frame.

Notes

Make

- "SN. R. GALIL" is marked on the left side of the receiver/frame.
- "GALIL" as a make is used for a family of Israeli small arms designed by Yisrael Galili and Yaacov Lior.
- Galil is based on the M62 rifle manufactured in Finland by Valmet.
- the M62 rifle was derived from the design of the Kalashnikov AK-47 assault rifle.

Model

- "SN.R. GALIL" is usually marked on the left side of the receiver/frame.
- "SN.R." is the abbreviation for Sniper Rifle.
- this is a specially tuned "Sniper" version of the Galil rifle, in 7.62 NATO.
- features include: barrel muzzle is threaded for a compensator/muzzle brake or silencer; wooden forearm and folding buttstock with adjustable cheekpiece and butt plate; integral bipod folds up under the handguard when not in use; iron sights and an offset telescopic sight that mounts on the left side of the receiver/frame.

Manufacturer

- "IMI" and "ISRAEL" are marked on the left side of the receiver/frame.
- "IMI" is the abbreviation for "Israel Military Industries".

Action

- gas-operated.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- observed serial number had a number prefix followed by six to seven sequential numbers, eg. "9-2000106".
- serial numbers with the letter prefix of "AA" or "AAL" are associated with the importer: Action Arms.
- serial numbers with the letter prefix of "GS" are associated with the importer: Springfield Armory.
- serial numbers with the letter prefix of "MR" are associated to the importer: Magnum Research.

65324 - 2	56-52 SPENCER RF	1	565	Antique AFR, Section 1, para. 2	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GALLAGER" over "PATENTED JULY 17TH 1860" or "GALLAGER'S PATENT" over "JULY 17TH 1860" is marked on the lock plate to the rear of the hammer.
- this firearm was manufactured using Mahlon J. Gallager's patent of July 17th, 1860 (U.S. Patent 29,157).

Model

- manufactured between 1861 and 1865.
- approximately 23,000 were made as percussion models and 5,000 for cartridges.
- features include: round barrel; breechloader, barrel moves forward to load; long, iron patch box; straight grip buttstock.
- on early models, lockplate is marked:
  GALLAGER / PATENTED JULY 17TH 1860 / (followed by serial number)
- later marked:
  MANUFACTURD BY RICHARDSON & OVERMAN / PHILAD / (followed by a serial number), and GALLAGER'S PATENT / JULY 17TH 1860.

Manufacturer

- "MANUFACTURD BY" over "RICHARDSON & OVERMAN" over "PHILADA" over the serial number may be marked on the lockplate.
- Richardson & Overman was located in Philadelphia, Pennsylvania, U.S.A. from 1860 to 1874.

Action

- operating lever causes the barrel to move forward, then tips down for loading.
- originally designed for percussion, approximately 5000 were manufactured for rim fire cartridges.

Serial Number

- serial number started at 1 and went up to 28,000 approximately.

Notes

Make

- "GALLAGER" over "PATENTED JULY 17TH 1860" or "GALLAGER'S PATENT" over "JULY 17TH 1860" is marked on the lock plate to the rear of the hammer.
- this firearm was manufactured using Mahlon J. Gallager's patent of July 17th, 1860 (U.S. Patent 29,157).

Model

- "JULY 17TH 1860" is marked on the lockplate.
- features include: round barrel; lever operated tipping barrel action; right side external hammer; straight grip buttstock; sling ring rod on the left side.
- Note: operating lever causes barrel to move forward, then tips down for loading.

Manufacturer

- "MANUFACTURD BY" over "RICHARDSON & OVERMAN" over "PHILADA" over the serial number may be marked on the lockplate.
- Richardson & Overman was located in Philadelphia, Pennsylvania, U.S.A. from 1860 to 1874.

Action

- operating lever causes the barrel to move forward, then tips down for loading.

Serial Number

- serial number is marked below the manufacturer's name.

Firearm Reference Number (FRN): 129648
Make: Galway
Model: FP105 Hushpower

Summary

Make:	Galway
Model:	FP105 Hushpower
Manufacturer:	Pedretti, Francesco
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Single-Shot
Country of Manufacturer:	ITALY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
129648 - 1	12 GA X 2 3/4"	1	622	Prohibited CC 84(1) "prohibited device" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GALWAY" was observed marked on right side of the barrel.

Model

- "Hushpower" is not marked on the firearm.
- Hushpower sound moderator/suppressor are manufactured by The Saddlery & Gunroom of Westerham, Kent, England.
- this is a Pedretti model FP105 modified with a Hushpower sound moderator.
- Hushpower sound moderator is available in a kit form.
- features include: round smooth bore barrel; 50mm by 780mm long tubing mounted over the barrel; front hinged receiver/frame with top tang mounted break open lever; hammerless; cross bolt safety located behind the trigger; no forearm; checkered wood semi-pistol grip buttstock; engraved receiver/frame; blue finish.

Manufacturer

- manufacturer's name is not marked on the firearm.
- "made in Italy" is marked on the side of the barrel.
- Francesco Pedretti (FP) was founded in 1957.
- Francesco Pedretti was located in Gardone, Val Trompe, Italy in the 1990s.

Action

- top lever break open.

Serial Number

- serial number was observed on the water table and repeated under the barrel.
- observed serial number consisted of seven numbers without a letter prefix or suffix.

Canadian Law Comments

- as it left the factory, this firearm is equipped with an integral sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada.
- when the sound suppressor/silencer (prohibited device) is removed the firearm is correctly identified as a "Non Restricted Firearm".

28978 - 1	410 GA	1	392	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "A.W. GAMAGE Ltd" with an address of "Holhorn, London" is usually marked on the firearm.
- Albert Walter Gamage founded a general supply store in the Holborn Circus area of London, England, in 1844, eventually expanding to retail bicycles, clothing, hunting and fishing gear (including firearms), motorcycles, and furniture. He subcontracted with a number of English and foreign manufacturers to supply products.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is a simple "tip-up" style of single-shot "garden gun" made or converted for use as a close-range pest-control firearm.
- features include: blued or browned finish; round barrel; colour-case-hardened receiver/frame with a button underlever to open the gun; an external, manually-cocked hammer; and checkered walnut grip.

Action

- underlever "tip-up" single-shot.

Firearm Reference Number (FRN): 110295
Make: Gamo
Model: 126

Summary

Make:	Gamo
Model:	126
Manufacturer:	Industrias El Gamo
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
110295 - 1	177 PELLET	1	445	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "El Gamo" or "Gamo" is marked on the firearm.

Model

- manufactured from 1984 to 1994.
- features include: match grade barrel; pellet port; match style hardwood stock with stippled grip and forend; adjustable buttplate; hooded front sight and adjustable rear sight; adjustable trigger.

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- single pump pneumatic.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the receiver/frame
- observed serial number consisted of six numbers without a letter prefix or suffix.

- Spanish government instituted a new system for firearm's serial numbering in 1995.
- Spanish system incorporated the gunmaker/manufactuer code, weapon code, serial number sequence, and year of manufacturer. examples: 04-1C-101010-96, 04-4C-101010-96, and 04-5C-101010-96.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter are the code for an air carbine/rifle (1C), air pistol (4C), and air revolver (05), the next six numbers are the serial number sequence, and the last two numbers (96) are the year of manufacture.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - calibre designation is marked on the receiver/frame as 4.5(177).

Notes

Make

- the "GAMO" logo was observed marked on the grip.

Model

- cocked by lifting the back of the "slide" up and forward in an arc over the muzzle.
- features include: black overall finish and a plastic grip frame; adjustable rear sight; cross-bolt safety at the rear of the trigger guard.

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- single stroke pneumatic.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is usually marked on the butt.
- Spanish government instituted a new system for firearm's serial numbering in 1995.
- Spanish system incorporated the gunmaker/manufactuer code, weapon code, serial number sequence, and year of manufacturer. examples: 04-1C-101010-96, 04-4C-101010-96, and 04-5C-101010-96.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter are the code for an air carbine/rifle (1C), air pistol (4C), and air revolver (05), the next six numbers are the serial number sequence, and the last two numbers (96) are the year of manufacture.

Shots

- internal tube magazine, with spring follower for BB's and single load capability for pellet.

198033 - 1	22 PELLET	10	510	Prohibited CC 84(1) "prohibited device" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GAMO" is marked on the left side of the receiver/frame.

Model

- "ARROW" is marked on the right side of the receiver/frame.
- Features include: integral suppressor with red inner cover visible through barrel shroud; under barrel air tank with front mounted pressure gauge; magazine well located on the left side of the receiver/frame; wing shaped, straight-pull cocking piece at the rear of the receiver/frame; safety lever is located inside the trigger guard, ahead of the trigger.

Manufacturer

- "GAMO" is marked on the left side of the receiver/frame.

Action

- Straight-pull bolt operated.
- Pre charged pneumatic.

Serial Number

- The serial number is marked on the right side of the receiver/frame.
- The serial numbers of referenced examples had the suffix "04 - 1C -" followed by six digits, a dash, and two digits representing the year of production.
- The serial number of referenced examples followed the standardized Spanish serial number format with the first two digits representing the manufacturer code, a dash, a second pair of characters representing the type of firearm, a dash, a sequential serial number, a dash, and two digits representing the year of production.

Calibre

- The calibre designation is marked on the right side of the firearm.
- The calibre of a referenced example was marked as ``Cal 5,5``.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- Detachable rotary disc magazine.

Canadian Law Comments

- Discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.
- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada.

If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
200661 - 1	22 PELLET	10	370	Prohibited CC 84(1) "prohibited device" para. (c)	Manufacturer Specifications and Commercial Customization	
200661 - 2	22 PELLET	10	370	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- The company logo is marked on the firearm.
- The make is marked on the left side of the receiver/frame.

Model

- Introduced in 2026.
- "ARROW SLT" is marked on the right side of the receiver/frame.
- Gamo "Arrow SLT" is a version of the Gamo "Arrow" pre-charged pneumatic air rifle with a side cocking lever.
- "SLT" stand for "Side Lever Technology".
- Features include: may have a sound suppressor/silencer or a synthetic barrel shroud (faux suppressor); under barrel air tank with front mounted pressure gauge; magazine well located on the left side of the receiver/frame; safety lever is located inside the trigger guard, ahead of the trigger.

Manufacturer

- "GAMO" is marked on the left side of the receiver/frame.

Action

- Pre charged pneumatic.

Serial Number

- The serial number is marked on the right side of the receiver/frame.
- The serial numbers of referenced examples had the suffix "04 - 1C -" followed by six digits, a dash, and two digits representing the year of production.

Barrel

- The barrel length does not include any attached device such as flash-hider or muzzle brake.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- The calibre designation is marked on the right side of the firearm. - Calibre designation of a referenced example was marked as "Cal. 5,5 (.22)".
Shots	- Detachable rotary disc magazine.
Canadian Law Comments	- Discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules. - This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.
Other Markings	- Versions manufactured by Gamo without a "prohibited device" sound suppressor/silencer will be marked "NS" after the model designation and may include "NS" as part of the product code which stands for "No Silencer".

FRT Report

Firearm Reference Number (FRN): 47966
Make: Gamo
Model: Auto 45

Summary

Make:	Gamo
Model:	Auto 45
Manufacturer:	Industrias El Gamo
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Air,Spring or Gas
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
47966 - 2	177 PELLET	1	108	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	
47966 - 1	BB	12	108	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- marked on the left side: GAMO (with logo)

Model

- marked on the left side: AUTO 45
- this is a CO2 powered air pistol that very strongly resembles a Glock 19
- all black finish, receiver/frame mounted rotating safety on the left side, barrel tips up to single-load pellets and the CO2 cartridges are held in the grip.

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the right side of the slide.
- observed serial number consisted of number "04", a dash (-), "4C", a dash (-), six numbers, a dash (-) and "00".
- Spanish government instituted a new system for firearm's serial numbering in 1995. This system incorporated the gunmaker/manufacturer code, weapon code, serial number sequence, and year of manufacturer.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter (4C) are the code for an air pistol, the next six numbers are the serial number sequence, and the last two numbers (00) are the year of manufacture.

Shots

- the GAMO Auto 45 may be loaded with a single 177 PELLET by tilting up the barrel assembly; or with twelve .177 calibre BBs.

- introduced in 2012.
- "Bone Collector" over "Bull Whisper" is marked on the receiver/frame.
- features include: no iron sights; polymer jacketed, round fluted rifled bull barrel fitted with an intergrated silencer; front hinged cylindrical receiver/frame with a groove for a scope mount; two stage adjustable trigger mechanism; manual safety mounted inside the trigger guard; green and black synthetic one piece pistol grip stock with cheeckpiece and recoil pad; black finish.
- overall length with a 488 mm (19.2") is 1133 mm (44.6"), and the average weight is 2.4 kgs (5.28 lbs).

Manufacturer

- "MADE IN SPAIN" is usually marked on the firearm.
- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- gas piston powered, hinged barrel design.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- may be marked on the firearm.
Canadian Law Comments	- as it left the factory, this firearm is equipped with an integral sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada. - when the sound suppressor/silencer (prohibited device) is removed from the firearm it would be correctly identified as a "Non Restricted Firearm".

Notes

Make

- "GAMO" is marked on the receiver/frame.

Model

- model designation is marked on the barrel-block.
- this is a standard pattern, break barrel spring piston air rifle.
- updated version of the model "Delta 10".
- features include: pistol grip stock with a black plastic butt and Monte Carlo cheekpiece; either fluorescent red and green optical-fiber sights or standard post and notch open sights; manual safety inside the trigger guard, forward of the trigger; grooved receiver/frame to accommodate a scope.
- barrel covered with a matte black plastic coating.

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- spring piston, hinged barrel design.
- at least two variants of this particular model exist:

Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial numbered was observed marked on the left side of the receiver/frame.
- observed serial number consisted of number "04", a dash (-), "1C", a dash (-), six numbers, a dash (-), and "98".
- Spanish government instituted a new system for firearm's serial numbering in 1995.
- Spanish system incorporated the gunmaker/manufactuer code, weapon code, serial number sequence, and year of manufacturer. examples: 04-1C-101010-96, 04-4C-101010-96, and 04-5C-101010-96.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter are the code for an air carbine/rifle (1C), air pistol (4C), and air revolver (05), the next six numbers are the serial number sequence, and the last two numbers (96) are the year of manufacture.

120768 - 2	22 PELLET	1	451	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- Gamo is a manufacturer based in Spain.

Model

- model designation may be marked on the firearm.
- features include: open adjustable rear sight; checkered pistol grip beech stock with rubber buttpad and a manual safety inside the trigger guard in front of the trigger; loading gate that pops up to accept a pellet each time the rifle is cocked.

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- under-lever spring-piston air rifle.
- in calibre 177 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.
- in calibre 22 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- observed serial number consisted of seven numbers without a letter prefix or suffix.
- Spanish government instituted a new system for firearm's serial numbering in 1995.
- Spanish system incorporated the gunmaker/manufacturer code, weapon code, serial number sequence, and year of manufacturer. examples: 04-1C-101010-96, 04-4C-101010-96, and 04-5C-101010-96.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter are the code for an air carbine/rifle (1C), air pistol (4C), and air revolver (05), the next six numbers are the serial number sequence, and the last two numbers (96) are the year of manufacture.

Manufacturer:	Industrias El Gamo
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
154810 - 1	177 PELLET	10	470	Prohibited CC 84(1) "prohibited device" para. (c)	Non-Commercial Customization	
154810 - 2	177 PELLET	10	470	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "GAMO" over "Precision Airguns" was observed marked on both sides of the receiver/frame.
- "Made in E.U." was observed marked on the left side of the receiver/frame.

Model

- "COYOTE" was observed marked on both sides of the receiver/frame.
- features include: no iron sights; round, rifled BSA barrel with a threaded muzzle for a muzzle cap, muzzle brake or sound moderator/suppressor/silencer; pre-charged pneumatic cylinder with a built in pressure gauge is mounted under the barrel; flat sided receiver/frame is dovetail grooved for scope mounts; turn bolt operated; two stage adjustable trigger; manual safety lever is located inside the trigger guard, in front of the trigger; one piece beechwood semi-pistol grip stock with ambidextrous cheekpiece and ventilated rubber butt pad.
- overall length with a 470 mm (18.5") barrel is 991 mm (39"), and the average weight is 3 kg (6.6 lbs).
- accessories include: volumetric silencer; and a removeable rotary magazine.

Manufacturer

- "GAMO" was observed marked on both sides of the receiver/frame.
- "Made in E.U." was observed marked on the left side of the receiver/frame.

Action

- pneumatic powered.
- pre-charged pneumatic (PCP) cylinder.
- discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number was observed marked on the right side of the receiver/frame.
- serial number observed consisted of two letter "CY" prefix, six numbers, a dash (-), and two numbers.
- serial number rationalization is not known.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre was observed marked on the right side of the receiver/frame.
Shots	- removable rotary magazine.
Canadian Law Comments	- this firearm may have left the factory with a suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada. - if the prohibited device (sound suppressor/silencer) were to be removed from the firearm, the firearm is correctly identified as a "Non Restricted Firearm".

Notes

Make

- "GAMO" followed by the company logo is usually marked on the left side of the barrel block and on the left side of the receiver/frame tube.

Model

- "DELTA" may be marked on the firearm.
- features include: fixed fibre optic front sight and adjustable rear sight; grooved receiver/frame tube for an optical mount; polymer coated, rifled barrel; break barrel action; two stage single trigger mechanism with cocking safety and trigger safety; black synthetic ambidextrous one piece semi-pistol grip stock with white line spacer.

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- spring-piston powered.
- at least two variants of this particular model exist:

Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- Spanish government instituted a new system for firearm's serial numbering in 1995.
- Spanish system incorporated the gunmaker/manufacturer code, weapon code, serial number sequence, and year of manufacturer. examples: 04-1C-101010-96, 04-4C-101010-96, and 04-5C-101010-96.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter are the code for an air carbine/rifle (1C), air pistol (4C), and air revolver (05), the next six numbers are the serial number sequence, and the last two numbers (96) are the year of manufacture.

FRT Report

Firearm Reference Number (FRN): 130952
Make: Gamo
Model: DynaMax Multishot

Summary

Make:	Gamo
Model:	DynaMax Multishot
Manufacturer:	Birmingham Small Arms (BSA)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
130952 - 1	177 PELLET	10	520	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
130952 - 2	22 PELLET	10	520	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GAMO" and the company logo are marked on the right side of the receiver/frame.

Model

- introduced in 2010.
- "DynaMax Multishot" is marked on the right side of the receiver/frame.
- features include: blued match grade full floated barrel with muzzle weight/compensator; charging reservoir located under the barrel; spring loaded "press-to-load" feature; recoilless action; press button cocking; two stage, adjustable trigger; manual safety located on the right rear side of the receiver/frame; black synthetic high comb tactical stock; 3-9X50 scope included.
- overall length with a 520mm barrel is 970mm (38.25"), average weight is (with scope) 3.9kg (8.75lbs).

Manufacturer

- "BSA GUNS UK LTD ENGLAND" and the BSA stacked rifle logo is marked on the barrel of an observed example.
- "MADE IN BIRMINGHAM, ENGLAND." is marked on the right side of the receiver/frame.

Action

- pre-charged pneumatic.
- discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Shots

- removable rotary magazine.

Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
43752 - 1	177 PELLET	12	451	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is marked on the firearm.

Model

- model is marked on the left side of the firearm as "G-1200".
- this is a CO2 powered pump action air rifle, that resembles a Remington 760 pump action rifle;
- features include: beech forearm and pistol grip Monte Carlo stock, cross-bolt safety, 12-shot tubular magazine that feeds into a sliding shutter, and adjustable sights.
- the CO2 on this rifle is supplied either by 12-gram cartridges that drops into a tube in the forearm, or by a 74-gram screw-in tank that threads into the front of the forearm.

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- CO2 powered air rifle.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the right side.

- Spanish government instituted a new system for firearm's serial numbering in 1995.
- Spanish system incorporated the gunmaker/manufacturer code, weapon code, serial number sequence, and year of manufacturer. examples: 04-1C-101010-96, 04-4C-101010-96, and 04-5C-101010-96.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter are the code for an air carbine/rifle (1C), air pistol (4C), and air revolver (05), the next six numbers are the serial number sequence, and the last two numbers (96) are the year of manufacture.

- "Gamo" is marked on the left side of the firearm.

Model

- "HUNTER 440" is marked on the left side of the firearm.
- Gamo markets their airguns with a velocity greater than 1000 fps (with the 177 PELLET) as their Hunter Series.
- features include: blued steel barrel; hooded front sight, adjustable rear sight; scope ramp; adjustable trigger; checkered hardwood pistol grip stock with cheek piece; rubber recoil pad with white line spacer.
- overall length is 1102mm (43.3"), average weight is 3kg (6.6 lbs).

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- in calibre 177 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.
- in calibre 22 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.
- spring piston air rifle.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number may be marked on either side of the breech.
- observed serial number consisted of number "04", a dash (-), "1C", a dash (-), six numbers, a dash (-), and "05".
- Spanish government instituted a new system for firearm's serial numbering in 1995. This system incorporated the gunmaker/manufactuer code, weapon code, serial number sequence, and year of manufacturer.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter (1C) are the code for an air carbine/rifle, the next six numbers are the serial number sequence, and the last two numbers (05) are the year of manufacture.

Calibre

- the calibre designation is marked on the left side of the firearm.

Other Markings

- "MADE IN SPAIN" is marked on the left side of the firearm.

FRT Report

Firearm Reference Number (FRN): 118610
Make: Gamo
Model: Hunter Realtree

Summary

Make:	Gamo
Model:	Hunter Realtree
Manufacturer:	Industrias El Gamo
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
118610 - 1	177 PELLET	1	457	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
118610 - 2	22 PELLET	1	457	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GAMO" is marked on the barrel and/or receiver/frame.

Model

- model designation "Hunter Realtree" is marked on the left side of the barrel in front of the barrel hinge pivot screw.
- introduced in 1999.
- break barrel cocking, spring driven piston type of action.
- features include:
- blued barrel and receiver/frame,
- one piece "Realtree" camouflage patterned hardwood stock with ventilated rubber butt pad,
- adjustable two-stage trigger,
- fully adjustable rear sight,
- raised scope ramp on the top rear of the receiver/frame.

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- break barrel cocking, spring driven piston air rifle.
- in calibre 177 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.
- in calibre 22 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the left side of the barrel.
- observed serial number consisted of number "04", a dash (-), "1C", a dash (-), six numbers, a dash (-), and "03".
- Spanish government instituted a new system for firearm's serial numbering in 1995. This system incorporated the gunmaker/manufacturer code, weapon code, serial number sequence, and year of manufacturer.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter (1C) are the code for an air carbine/rifle, the next six numbers are the serial number sequence, and the last two numbers (03) are the year of manufacture.

Calibre

- calibre designation is usually marked on the rear left side of the barrel.
- known example was marked, "Cal 4.5 (.177)".

Other Markings

- known example had the following markings on top of the receiver/frame immediately behind the rear sight:
1000
Feet per Second
Limited
Life Time
Warranty
- "Made in Spain" is usually marked on the barrel and/or the receiver/frame.

Notes

Make

- GAMO is usually marked on the top of the barrel with the company logo, just ahead of the chamber.

Model

- model designation is marked on the firearm.
- introduced during 2006.
- this is a standard pattern, break-barrel, spring-piston air rifle.
- features include: fluted barrel; semi-pistol grip beech stock with black rubber butt pad and raised cheek piece; grooved spring housing for the mounting of a scope; manual safety inside the trigger guard, forward of the trigger.
- overall length is 1099mm (43.25")

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- spring-piston design.
- at least two variants of this particular model exist:
Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Firearm Reference Number (FRN): 123349
Make: Gamo
Model: Maxima

Summary

Make:	Gamo
Model:	Maxima
Manufacturer:	Industrias El Gamo
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
123349 - 1	177 PELLET	1	508	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Gamo" and "Made in Spain" will be marked on the barrel and/or receiver/frame.

Model

- introduced in 2005.
- "Maxima" is usually marked on the firearm.
- Gamo markets their airguns with a velocity greater than 1000 fps (with the 177 PELLET) as their Hunter Series.
- features include: muzzle break doubles as cocking handle; blued finished barrel; Tru-Glo sights; checkered, hardwood stock; rubber forearm grip; adjustable two stage trigger; receiver/frame is grooved for a scope mount; ventilated rubber butt plate with white line spacer.
- available as a combo which includes a BSA airgun scope with rings.
- overall length is 1178mm (46.3"), average weight is 3.09kg (6.8 lbs).

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- spring pistol air rifle.
- in calibre 177 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the left side of the barrel.
- observed serial number consisted of number "04", a dash (-), "1C", a dash (-), six numbers, a dash (-), and "06".
- Spanish government instituted a new system for firearm's serial numbering in 1995. This system incorporated the gunmaker/manufacturer code, weapon code, serial number sequence, and year of manufacturer.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter (1C) are the code for an air carbine/rifle, the next six numbers are the serial number sequence, and the last two numbers (06) are the year of manufacture.

Calibre

- the calibre designation is usually marked on the left side of the firearm.

Notes

Make

- "Gamo" is marked on the firearm in various places.
- The company logo is marked on the receiver/frame.

Model

- "OUTBACK" is marked on the top of the receiver/frame.
- Features include: round or flute barrel with or without "Whisper" (silencer) technology; break barrel action receiver/frame, with or without mounted scope; manual trigger safety; one piece polymer semi-pistol grip stock with integrated raised cheek piece and black rubber recoil pad.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- Compressed spring air piston. - Hinged barrel design. - Break open action. - Velocities have been reported as 151 mps/495 fps and 396 mps/1300 fps.
Serial Number	- The serial number is usually marked on the left side of the firearm. - The serial number rationalization is unknown. - Observed sample serial number consisted of the following: two (2) numbers followed by a dash (-), followed by one (1) number and one letter, followed by a dash (-), followed by six (6) more numbers, followed by a dash (-) followed by two (2) numbers.
Calibre	- The calibre designation is marked on the left side of the firearm.
Canadian Law Comments	- At least two variants of this particular model exist: Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport. Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport. - This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

FRT Report

Firearm Reference Number (FRN): 103035
Make: Gamo
Model: P800

Summary

Make:	Gamo
Model:	P800
Manufacturer:	Industrias El Gamo
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Air,Spring or Gas
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
103035 - 1	177 PELLET	1	151	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the Gamo logo is marked on both grips.

Model

- model designation is marked on the left side of the pistol as: "P-800".
- features include: black finish, checkered grips, squared trigger guard, cocking and trigger safety, hooded front sight and adjustable rear sight.

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the side of the firearm.

- Spanish government instituted a new system for firearm's serial numbering in 1995.
- Spanish system incorporated the gunmaker/manufactuer code, weapon code, serial number sequence, and year of manufacturer. examples: 04-1C-101010-96, 04-4C-101010-96, and 04-5C-101010-96.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter are the code for an air carbine/rifle (1C), air pistol (4C), and air revolver (05), the next six numbers are the serial number sequence, and the last two numbers (96) are the year of manufacture.

Other Markings

- marked above the trigger guard: "MADE IN SPAIN CAL. 4.5 (177)".

FRT Report

Firearm Reference Number (FRN): 47973
Make: Gamo
Model: R77

Summary

Make:	Gamo
Model:	R77
Manufacturer:	Industrias El Gamo
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Air,Spring or Gas
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
47973 - 3	177 PELLET	8	64	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	
47973 - 2	177 PELLET	8	102	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	
47973 - 1	177 PELLET	8	152	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is marked on the receiver/frame.

Model

- this is a CO2 powered air pistol that resembles a Smith & Wesson style revolver.
- features include: all black finish; swing-out cylinder; adjustable sights; the CO2 cartridges are held in the grip.
- a version of this air pistol is also made with an integral laser in the barrel underlug, which is turned on by the pressure of a hand on the grip.

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- observed serial number consisted of number "04", a dash (-), "5C", a dash (-), six numbers, a dash (-), and "00".
- Spanish government instituted a new system for firearm's serial numbering in 1995. This system incorporated the gunmaker/manufactuer code, weapon code, serial number sequence, and year of manufacturer.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter (5C) are the code for an air powered revolver, the next six numbers are the serial number sequence, and the last two numbers (00) are the year of manufacture.

Notes

Make

- "GAMO" is marked on the top of the receiver/frame, on the grip cap and the buttstock.

Model

- introduced in 2015.
- "RAPTOR" over "WHISPER" is marked on the top of the receiver/frame.
- this is a hinged barrel, air rifle with an integrally suppressed barrel, designed for target shooting and pest control.
- features include: round fluted, polymer jacketed rifled steel barrel; grooved, tubular receiver/frame; adjustable trigger; automatic cocking safety; manual trigger safety; synthetic pistol grip stock with twin cheek pieces; synthetic recoil pad with coloured spacer; black finish.
- overall length is 1158mm (45.6"), and average weight is 2.35 kg (5.18 lbs).

Manufacturer

- "GAMO" is marked on the firearm.

Action

- spring-piston powered.
- discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- alpha/numeric serial number is marked on the left side of the barrel block.
Calibre	- calibre is marked on the left side of the barrel block.
Canadian Law Comments	- as it left the factory, this firearm is equipped with an integral sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada. - when the sound suppressor/silencer (prohibited device) is removed from the firearm it would be correctly identified as a "Non Restricted Firearm".
Other Markings	- "MADE IN SPAIN" is marked on the right side of the barrel block. - "Pat. US 8,261,651" is marked on the right side of the barrel block.

197609 - 5	22 PELLET	10	508	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- The company logo is marked on the receiver/frame.

Model

- Introduced in 2020.
- "ROADSTER G2" is marked on top of the receiver/frame of the firearm.
- May also be known as "Roadster 10X IGT GEN2".
- This model come equipped with a "Whisper Fusion" sound moderator.
- Features include: break action receiver/frame; "IGT" system (inert gas technology); horizontal top load magazine with load indicator; customized action trigger (CAT); shock wave absorber (SWA); recoil reducing rail (RRR); light weight polymer one-piece thumbhole stock.
- Overall length with a 508 mm (20 inches) barrel is 1309.9 mm (51.57 inches), average weight is 3.1 kg (6.83 lbs).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- Break open action. - Compressed gas piston. - Velocities have been reported as 280 (for 177 pellet) mps/918.6 fps and 1266 mps/385.9 fps. - Velocities have been reported as 208 (for 22 Pellet) mps/682.4 fps and 268.2 mps/880 fps. - Velocity is reported (for 177 Pellet) 150.9 mps or 495 fps.
Serial Number	- The serial number is marked on the left side of the receiver/frame. - The serial number rationalization is unknown. - Observed serial number sample consisted of the following format: two (2) numbers, followed by a dash, "-", followed by one (1) letter and one (1) number, followed by a dash, "-", finally followed by six (6) numbers, (example: 11-1A-123456).
Calibre	- "Cal. 5,5 (22)" is marked on the left side of the receiver/frame.
Shots	- Introduced in 2020 with a 10 shot detachable pellet magazine. - Detachable rotary disc magazine.
Canadian Law Comments	- At least two variants of this particular model exist: Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport. Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport. - This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
120050 - 1	177 PELLET	1	451	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	
120050 - 2	22 PELLET	1	451	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "Gamo" and "Made in Spain" will be marked on the barrel and/or receiver/frame.

Model

- model designation is usually marked on the firearm.
- "1000" in the model designation represents the velocity with a calibre .177 Pellet.
- features include: barrel-cocking mechanism; red and yellow fiber optic sights; laser checkered, synthetic, dark grey Monte Carlo style stock; adjustable two stage trigger; receiver/frame is grooved for a scope mount; ventilated rubber butt plate.
- available as a combo which includes a compact BSA 4x32mm airgun scope with rings.

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- in calibre 177 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
- in calibre 22 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the left side of the barrel.
- observed serial number consisted of number "04", a dash (-), "1C", a dash (-), six numbers, a dash (-), and "02".
- Spanish government instituted a new system for firearm's serial numbering in 1995. This system incorporated the gunmaker/manufacturer code, weapon code, serial number sequence, and year of manufacturer.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter (1C) are the code for an air carbine/rifle, the next six numbers are the serial number sequence, and the last two numbers (02) are the year of manufacture.

Calibre

- calibre designation is usually marked on the barrel and/or receiver/frame as "Cal 4.5 (.177)", 5.5 (.22)" or a variation thereof.

125916 - 1	177 PELLET	1	457	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Gamo" is marked on the firearm.

Model

- "Shadow Sport" is marked on the left side of the firearm.
- features include: blued steel fluted bull barrel; adjustable trigger; composite black synthetic pistol grip stock with double cheek piece; vented rubber recoil pad.
- equipped with a 3-9X40 scope.

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- spring piston air rifle.
- discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the left side of the barrel.
- observed serial number consisted of number "04", a dash (-), "1C", a dash (-), six numbers, a dash (-), and "06".
- Spanish government instituted a new system for firearm's serial numbering in 1995. This system incorporated the gunmaker/manufacturer code, weapon code, serial number sequence, and year of manufacturer.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter (1C) are the code for an air carbine/rifle, the next six numbers are the serial number sequence, and the last two numbers (06) are the year of manufacture.

Notes

Make

- The company logo is marked on the firearm.
- "GAMO" is marked on the top of the receiver frame.
- "GAMO" is a trade name/trademark of "Industrias El Gamo".

Model

- "SHADOW WHISPER" is marked on the top of the receiver/frame.
- Features include: safety lever located within the trigger guard.

Manufacturer

- The company logo is marked on the firearm.
- "GAMO" is marked on the top of the receiver frame.
- "Industrias El Gamo" use the trade name/trademark "Gamo".
- "GAMO" trade name/trademark has been imported into the USA by "Gamo USA, Corp." of Ft. Lauderdale, Florida, and by "Stoeger Industries" of Wayne, NJ and by "Dynamite Nobel", "RWS Inc." of Closter, NJ and by "Daisy".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- Break open action. - Hinged barrel design. - Velocity is reported 381 mps or 1250 fps.
Serial Number	- The serial number is marked on the left side of the firearm.
Calibre	- The calibre designation is marked on the barrel.
Canadian Law Comments	- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed. - Discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Model:	Silver Shadow Supreme
Manufacturer:	Industrias El Gamo
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
123300 - 1	177 PELLET	1	450	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "GAMO" is marked on the left side of the firearm.

Model

- introduced in 2003.
- "SILVER SHADOW 890" is marked on the left side of the firearm.
- Gamo markets their airguns with a velocity greater than 1000 fps (with the 177 PELLET) as their Hunter Series.
- features include: nickel finished barrel; BSA rifle scope; adjustable trigger; muzzle brake is also the cocking lever; black synthetic pistol grip stock with cheek piece; rubber recoil pad.
- overall length is 1130mm (44.5"), average weight is 3.23kg (7.1 lbs).

Manufacturer

- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain.
- Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy.
- Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s.
- Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s.
- Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.

Action

- spring piston air rifle.
- discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the left side of the barrel.
- observed serial number consisted of number "04", a dash (-), "1C", a dash (-), six numbers, a dash (-), and "05".
- Spanish government instituted a new system for firearm's serial numbering in 1995. This system incorporated the gunmaker/manufacturer code, weapon code, serial number sequence, and year of manufacturer.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter (1C) are the code for an air carbine/rifle, the next six numbers are the serial number sequence, and the last two numbers (05) are the year of manufacture.

Calibre

- the calibre designation is marked on the left side of the firearm.

Canadian Law Comments

- At least two variants of this particular model exist:
Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

Notes

Make

- The company logo is marked on the receiver/frame.

Model

- "SPEEDSTER IGT 10X GEN2" is marked on the top of the receiver/frame.
- Features include: safety located within the trigger trigger guard ahead to the trigger; magazine storage located under the grip cap; may come equipped with a barrel shroud suppressor.
- Overall length with a 500 mm (19.7 inches) barrel is 1117 mm (44 inches) with the stock collapsed, average weight is 2.72 kg (6 lbs).

Manufacturer

- The company logo is marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- Hinged barrel design. - Compressed gas piston. - Velocity is reported 386 mps or 1266 fps. - Velocity is reported 268 mps or 879 fps. - Velocity is reported 150 mps or 495 fps.
Serial Number	- The serial number is marked on the left side of the firearm.
Calibre	- The calibre designation is marked on the barrel.
Shots	- Detachable rotary disc magazine.
Canadian Law Comments	- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed. - At least two variants of this particular model exist: Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport. Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

FRT Report

Firearm Reference Number (FRN): 199671
Make: Gamo
Model: Swarm Bone Collector

Summary

Make:	Gamo
Model:	Swarm Bone Collector
Manufacturer:	Industrias El Gamo
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
199671 - 1	22 PELLET	10	505	Prohibited CC 84(1) "prohibited device" para. (c)	Manufacturer Specifications and Commercial Customization	
199671 - 2	22 PELLET	10	505	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- The company logo is marked on the firearm.
- The company logo is comprised of a circle overlaid with the end of an arrow or sideways check mark pointing towards the front of the firearm depending on the side the logo is marked.
- "GAMO" is marked on the top of the receiver/frame.

Model

- Introduced in 2019.
- "SWARM BONE COLLECTOR" is marked on the top of the receiver/frame.
- "BONE COLLECTOR" refers to specialized image of an engraved, printed or branded on either the receiver/frame or stock, specifically: a set of bone antlers on the skull of a deer, whereby the antlers form a very loose outline/cradle for a human skull image complete with a hallow nose and eye sockets.
- Features include: safety located within the trigger guard.
- Different versions of this model exist with a minor changes to the profile and markings, which may include, but not be limited to any of the following configurations, all at the top of the barrel at the break barrel point:
- 1) "Swarm Bone Collector" or "Swarm Bone Collector G1" or Gen 1, with simple addition of an elevated magazine attachment whereby the magazine inserts vertically,
- 2) "Swarm Bone Collector" or "Swarm Bone Collector G2", G2i or Gen2 or GEN2i, plus a lowered profile design to the vertical magazine attachment, loads the magazine horizontally rather than vertically, is lighter, contains fibre optic sight options,
- 3) "Swarm Bone Collector" or "Swarm Bone Collector GEN3i", G3i or Gen3 or G3, plus a lowered profile design to the magazine attachment, is lighter, contains fibre optic sight options, uses exclusive "inertia" fed magazine which load horizontally rather than vertically.

Manufacturer

- The company logo is marked on the firearm.
- The company logo is comprised of a circle overlaid with the end of an arrow or sideways check mark pointing towards the front of the firearm depending on the side the logo is marked.
- "GAMO" is marked on the top of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- Compressed gas piston. - Hinged barrel design. - Velocity is reported 297.2 mps or 975 fps.
Serial Number	- The serial number is marked on the left side of the receiver/frame.
Calibre	- The calibre designation is marked on the barrel.
Shots	- Detachable rotary disc magazine.
Canadian Law Comments	- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed. - Discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Notes

Make

- "Gamo" and "Made in Spain" will be marked on the barrel and/or receiver/frame.

Model

- introduced in 2017.
- "Swarm Maxxim" is usually marked on the firearm.
- features include: muzzle break doubles as cocking handle and sound suppressor; checkered synthetic stock; rubber forearm grip; adjustable two stage trigger; receiver/frame is grooved for a scope mount; ventilated rubber butt plate with red line spacer; blued finish.
- overall length is 1152mm (45.3"), average weight is 3.01kg (5.64 lbs).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- Gamo (El Gamo) trade name/trademark is manufactured by Industrias El Gamo located in Barcelona, Spain. - Gamo (El Gamo) trade name/trademark has been imported into the USA by Gamo USA, Corp. of Ft. Lauderdale, Florida, and by Stoeger Industries of Wayne, NJ and by Dynamite Nobel, RWS, Inc. of Closter, NJ and by Daisy. - Industrias El Gamo was founded by Antonio Casas of Barcelona, Spain in the 1880s. - Antonio Casas S.A. changed its name to Industrias El Gamo in the 1940s. - Industrias El Gamo produces spring-piston, CO2 powered and pre-charged pneumatic airguns.
Action	- spring-piston powered. - in calibre 177 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
Serial Number	- serial number is marked on the left side of the barrel. - observed serial number consisted of number "04", a dash (-), "1C", a dash (-), six numbers, a dash (-), and "06". - Spanish government instituted a new system for firearm's serial numbering in 1995. This system incorporated the gunmaker/manufacturer code, weapon code, serial number sequence, and year of manufacturer. - serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter (1C) are the code for an air carbine/rifle, the next six numbers are the serial number sequence, and the last two numbers (06) are the year of manufacture.
Calibre	- the calibre designation is usually marked on the left side of the firearm.
Shots	- detachable rotary box magazine mounted on top of the receiver/frame
Canadian Law Comments	- as it left the factory, this firearm is equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada. - when the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". - note that removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer (prohibited device) including all internal parts, baffles, wipes, end caps, mounting hardware and the device body must be removed.
