FRT Report

Firearm Reference Number (FRN): 75492
Make: High Standard Auto Mag
Model: 160

Summary

Make:	High Standard Auto Mag
Model:	160
Manufacturer:	Trust Deed Estates (TDE)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
75492 - 1	357 AUTO MAG	7	165	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "AUTO MAG" is not marked on pistol, but handgun is recognizable as an "Auto Mag".
- Auto Mag was originally manufactured by Auto Mag. Corp. of Pasadena, California between 1971 and 1972.
- Auto Mag was manufactured by Trust Deed Estates (TDE) Corporation of North Hollywood, and El Monte, California between 1972 and 1980.
- Auto Mag (High Standard Auto Mag) responsibilities for sales, and distribution were assumed by High Standard from 1974 to 1977. Actual manufacture was still done by Trust Deed Estates (TDE).
- Auto Mag was manufactured by Arcadia Machine & Tool (AMT) Corporation in the early 1980's.
- Auto Mag (Harry Sanford Commemorative) was manufactured by Galena Industries of Sturgis, South Dakota.

Model

- this is one of only 113 Auto Mag pistols produced under the High Standard name (they were actually produced by TDE/Trust Deed Estates, using the High Standard name).
- stainless-steel construction, adjustable sights, ventilated-rib on barrel, and specific serial-number range.

Manufacturer

- manufacture's name is not marked on the firearm, only the manufacturer's address.
- "TDE" in a circle is the monogram/abbreviation for Trust Deeds Estates Corp.
- Trust Deed Estates (TDE) Corporation was located in North Hollywood, and El Monte, California, U.S.A. between 1972 and 1980.

Action

- recoil-operated.

Serial Number

- serial number is marked on the bottom of the grip strap of the receiver/frame.
- serail number should have a prefix of "AO" or "H".

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- the Auto Mag pistol was originally designed and produced at "Sanford Arms" (Pasadena, California) in the early 1960s: - all essentially hand-made.
- by 1970, production had been taken over by the "Auto Mag Corp" (also located at Pasadena, California), production costs of these handguns were too great to be a commercial success and the "Auto Mag Corp" went out of business in 1972.
- following the bankruptcy of the "Auto Mag Corp", the Thomas Oil Company bought the assets of the "Auto Mag Corp", and formed "Trust Deed Estates" (AKA - "TDE") to produce these pistols (first in North Hollywood, California, then in El Monte, California).
- production costs were still too high for the Auto Mag pistol to be a commercial success, so the rights to manufacture the pistol were sold to High Standard, of New Haven, Connecticut (actual production still took place at the TDE plant in El Monte, Calif.).
- in 1977, High Standard ceased production of the pistol, and the rights to the Auto Mag were returned to the original designer, Harry Sanford. Using the name of "TDE-OMC", Harry Sanford began producing the "Model B" Auto Mag pistol, which had a solid bolt, rather than the skeletonized bolt of earlier Auto Mags. However, production costs were still too high to make the pistol a successful commercial venture, and once again in 1980, production ceased.
- after TDE-OMC ceased production, Arcadia Machine & Tool (AMT), also attempted to produce the Auto Mag pistol in commercial quantities, but only succeeded in manufacturing 100 pistols before conceeding defeat.
- at various different times, both Lee Jurras and Kent Lomont have made prototype quantities of the Auto Mag pistol (including some in very unusual calibres and configurations). In 1999, Galena Industries announced that they would be producing 1000 commemorative pistols honoring Harry Sanford.

- turn bolt operated.

Serial Number

- serial number was observed marked on the left side of the receiver/frame and on the barrel.
- observed serial number consisted of a letter "F" prefix and four numbers.

Calibre

- calibre was observed marked on the barrel.

Shots

- internal magazine with hinged floor plate.

Firearm Reference Number (FRN): 122751
Make: Hispano
Model: 1918 Automatic Pistol

Summary

Make:	Hispano
Model:	1918 Automatic Pistol
Manufacturer:	
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
122751 - 2	25 AUTO	6	53	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
122751 - 1	6.35MM	6	53	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- sample examined had both grips marked "Hispano" below a rendering of a woman's head.
Model	- this is a copy of a John M. Browning design. - sample examined was marked "6.35 1918 MODEL AUTOMATIC PISTOL" on the left side of the slide. - features include: blued finish; heel mounted magazine release; no sights; grasping grooves on the rear of the slide.
Action	- blowback operated.
Serial Number	- sample examined was numbered on the right side of the receiver/frame.
Calibre	- marked on the left side of the slide.
Shots	- detachable box magazine housed in the grip.

Notes

Make

- the Societe Francaise Hispano-Suiza S.A. was first organized in 1904 to build automobiles and automobile engines in Barcelona, Spain, by a Swiss engineer by the name of Marc Birkigt with financial support by the King of Spain, Alphonso XIII. (hence the name Hispano-Suiza which translates to Spanish-Swiss.)

Model

- the USA Model designation AN-M2 means: "Army & Navy Model M2".
- this firearm has non-adjustable headspace and does not have a quick change barrel.
- method of charging the firearm is manual or pneumatic.
- either drum fed or continuous feed employing metal disintegrating links.
- Rate-of-fire is 600 - 700 shots per minute.
- air cooled, automatic cannon for both aircraft mounting and anti-aircraft mountings.

Manufacturer

- the Eclipse Machine Tool Division of Bendix Aviation Corporation was awarded a contract to build 1,202 Aircraft Cannon of 20MM Hispano-Suiza calibre on 23 September, 1940. The Gun was originally named the M-1 but the name was subsequently changed to Gun, Automatic, 20MM AN-M2 (Aircraft). Bendix began shipping completed guns in late 1941 and by December 1943 had produced 22,642 examples.
- Hispano-Suiza cannon were manufactured by the three Hispano-Suiza factories (Spain, France and England) and in several factories/government arsenals in the USA, at least two factories/arsenals in the United Kingdon and by the John Inglis Company, Limited in Canada.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- blowback operated with gas assisted unlocking.
Shots	- belt fed cannon mechanism with a power operated feeder.

119173 - 2	20X110 HISPANO-SUIZA	60	1715	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the Societe Francaise Hispano-Suiza S.A. was first organized in 1904 to build automobiles and automobile engines in Barcelona, Spain, by a Swiss engineer by the name of Marc Birkigt with financial support by the King of Spain, Alphonso XIII. (hence the name Hispano-Suiza which translates to Spanish-Swiss.)

Model

- this model of the Hispano-Suiza Automatic Gun was manufactured in France at all three Hispano-Suiza factories, in the United Kingdom by two State Arsenals as the Hispano-Suiza, Type 404 Model MARK 1, it was also manufactured by the Bendix Aviation Corporation, Eclipse Machine Division in the USA as the Automatic Aircraft Cannon US M1.
- this original model Hispano-Suiza Cannon has non-adjustable headspace and the barrel is semi-permanently fixed in place.
- the Hispano-Suiza, Birkigt Type 404, 20MM Cannon is fed from a sixty-shot drum magazine, from the top of the receiver/frame.
- features include: rate of fire is 700 shots per minute and the method of charging/cocking the gun is by separate charging mechanism.
- air cooled, automatic cannon for both aircraft mounting and anti-aircraft mountings.

Manufacturer

- normally marked on the firearm.
- in 1936/1937 the Hispano-Suiza factory was nationalised by the French government.
- Hispano-Suiza cannon were manufactured by the three Hispano-Suiza factories in France, Spain and England and in several factories/government arsenals in the USA, at least two factories/arsenals in the United Kingdon and by the John Inglis Company, Limited in Canada.

Action

- gas assisted unlocking, once unlocked, functions as a blowback operated mechanism.

Serial Number

- numbered sequentially starting at 1001 and continuing on, without prefix or suffix. The reason for this serial number rationale was to avoid confusion with the earlier production of a similar gun in 20MM OERLIKON calibre.

Barrel

- it may be possible to find other barrel lengths as several different types of barrels were manufactured that could be fitted at the factory overhaul level of remanufacture/repair/rebuild.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - fed by a rotary, spring driven, sixty-shot magazine, the ammunition must be lubricated to enable the firearm to function properly.

Notes

Make

- the Societe Francaise Hispano-Suiza S.A. was first organized in 1904 to build automobiles and automobile engines in Barcelona, Spain, by a Swiss engineer by the name of Marc Birkigt with financial support by the King of Spain, Alphonso XIII. (hence the name Hispano-Suiza which translates to Spanish-Swiss.)

Model

- Bendix Aviation Corporation Eclipse Machine Division was the only manufacturer of this cannon model.
- the total manufactured of this M1 Model was only 20.
- this firearm is essentially a made in USA version of the 20MM Automatic Aircraft Cannon, Birkigt Type 404.
- this firearm was also manufactured in the United Kingdom by two State Arsenals as the Hispano-Suiza, Type 404 Model MARK I,
- air cooled, automatic cannon for both aircraft mounting and anti-aircraft mountings.
- the specification for this firearm changed to the M2 design which was later called the AN-M2 Model before delivery of any quantity was achieved.
- the M1, 20MM Automatic Cannon was less robust than the M2 / AN-M2 in the receiver/frame.

Manufacturer

- the Eclipse Machine Tool Division of Bendix Aviation Corporation was awarded a contract to build 1,202 Aircraft Cannon of 20MM Hispano-Suiza calibre on 23 September, 1940. The Gun was originally named the M1 but the name was subsequently changed to Gun, Automatic, 20MM AN-M2 (Aircraft). 119174 - 3	20X110 HISPANO-SUIZA	60	1715	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the Societe Francaise Hispano-Suiza S.A. was first organized in 1904 to build automobiles and automobile engines in Barcelona, Spain, by a Swiss engineer by the name of Marc Birkigt with financial support by the King of Spain, Alphonso XIII. (hence the name Hispano-Suiza which translates to Spanish-Swiss.)

Model

- this model of the Hispano-Suiza Automatic Gun was manufactured at all three Hispano-Suiza factories, in France, Spain and Switzerland as the Hispano-Suiza, Birkigt Type 404; in the United Kingdom by two State Arsenals as the Hispano-Suiza, Type 404 Model MARK I and by the Bendix Aviation Corporation, Eclipse Machine Division in the USA as the Automatic Aircraft Cannon US M1.
- this model Hispano-Suiza Cannon has non-adjustable headspace and the barrel is semi-permanently fixed in place.
- the Hispano-Suiza, Birkigt Type 404, MARK I, 20MM Cannon is fed from a sixty-shot drum magazine, from the top of the receiver/frame.
- features include: rate of fire is 600 - 650 shots per minute and the method of charging/cocking the gun is by separate charging mechanism which may be either manually operated or hydraulic pressure operated.
- air cooled, automatic cannon for both aircraft mounting and anti-aircraft mountings.

Manufacturer

- the manufacturer is normally marked on the firearm.
- the Hispano-Suiza firm built a factory at Grantham, England, upon the receipt of a contract to build aircraft cannon for the United Kingdom. This Hispano-Suiza factory was named "British Manufacture & Research Company". Construction started in June 1938 and the first Aircraft Cannon came off the production line in December 1938.
- Hispano-Suiza Aircraft Cannon were manufactured by the three Hispano-Suiza factories (Spain, France and England) and in several factories/government arsenals in the USA, at least two factories/arsenals in the United Kingdon and by the John Inglis Company, Limited in Canada.

Action

- blowback operated with gas assisted unlocking.

Shots

- drum fed cannon mechanism with a power operated feeder.

Notes

Make

- the Societe Francaise Hispano-Suiza S.A. was first organized in 1904 to build automobiles and automobile engines in Barcelona, Spain, by a Swiss engineer by the name of Marc Birkigt with financial support by the King of Spain, Alphonso XIII. (hence the name Hispano-Suiza, which translates to Spanish-Swiss.)

Model

- this variant of the Hispano-Suiza Automatic Gun was manufactured in Canada by John Inglis and differs from all other Hispano-Suiza Automatic Aircraft Cannon in that the headspace is adjustable and it has a "quick change" barrel. All other versions of this gun manufactured during World War II had non-adjustable headspace and fixed barrels.
- the Inglis version of this cannon is fed from either the left or right side and employs disintegrating link, belted ammunition, feeding through the top of the receiver/frame.
- features include: full gun length including the flash hider is 97 inches, gun weight including the feeder is 135 pounds, rate of fire is 750 to 800 shots per minute and the method of charging/cocking the gun is by hydraulic pressure.
- the John Inglis Company Ltd was the only manufacturer of this model of Hispano-Suiza Automatic Aircraft Cannon during World War II.

Manufacturer

- the manufacturer is normally marked on the firearm.
- Hispano-Suiza cannon were manufactured by the three Hispano-Suiza factories (Spain, France and England) and in several factories/government arsenals in the USA, at least two factories/arsenals in the United Kingdon and by the John Inglis Company, Limited in Canada.

Action

- blowback operated with gas assisted unlocking.

Barrel

- the overall length of the barrel is 2464MM including the flame/flash hider and 1715MM without the flame/flash hider attached.

Shots

- belt fed cannon mechanism with a power operated feeder.

Notes

Make

- "HJS ARMS, INC." over "BROWNSVILLE" over "TEXAS, U.S.A." is marked on the left side of the receiver/frame.

Model

- manufactured from 1993 to 1998.
- model designation is usually not marked on the firearm.
- features include: stainless steel construction; barrel assembly slides forward for loading and unloading; exposed spur hammer with rotating firing pin; sheathed trigge; single action trigger mechanism; two piece brown plastic grip.

Manufacturer

- "HJS ARMS, INC." over "BROWNSVILLE" over "TEXAS, U.S.A." is marked on the left side of the receiver/frame.
- "HJS Arms Incorporated" was located in Brownsville, Texas, U.S.A.
- "HJS Arms Incorporated" was founded by Herman J. Seminiano in 1991.
- "HJS Arms Incorporated" was in business from 1991 to 1998.

Action

- side by side and over & under barrel configuration.
- barrel assembly consists of a single piece of steel with four integral rifled barrels.

Serial Number

- serial number is usually marked on the bottom of the grip strap.

Calibre

- calibre is marked on the right side of the receiver/frame.

Firearm Reference Number (FRN): 82732
Make: Hoban
Model: 45

Summary

Make:	Hoban
Model:	45
Manufacturer:	Hoban Manufacturing
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
82732 - 1	22 LR	1	508	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- known example marked, "Hoban Rifle" over "Mfg. by Hoban Mfg. Company" over "Salem, Mich., U.S.A." on receiver ring.

Model

- "Hoban Rifle" or "Hoban Rifle No. 45" is marked on the receiver ring.
- turn bolt operated, single shot rifle with manually cocked striker.
- produced circa 1945 to 1956; exact quantities produced unknown, however it is thought that several thousand were made.
- very similar in appearance to a miniature, Italian Carcano rifle with a one piece military style stock, wooden handguard over the top of the barrel which is secured at the front by a metal barrel band, has a sheet metal imitation box magazine located in front of the trigger guard which is welded to the underside of the receiver/frame and a 'dummy' recoil bolt through the stock, under the breech end of the barrel.
- has a knurled-head takedown screw located ahead of the trigger guard.
- blade front sight, elevation adjustable rear sight.
- blued finish.

Manufacturer

- Hoban Manufacturing Company was established by John D. Hoban in March 1945 at Salem, Michigan, U.S.A.
- the business ceased operations in 1956 with the death of John Hoban.

Action

- turn bolt operated.

Calibre

- known example had calibre designation marked on the receiver ring, eg., ".22 Cal. S-L + L.R."

Make:	Holden, C B
Model:	Single Shot Rifle
Manufacturer:	Holden, C B
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
119365 - 2	32 RF	1	610	Antique AFR, Section 1, para. 2	Non-Commercial Customization	

Notes

Make

- make normally marked on barrel as "C.B. HOLDEN".

Model

- this is an unusual single-shot rifle designed and built by C.B. Holden, of Worcester, Massachusetts.
- the right side of the rifle is skeletonized, allowing access to the wholly internal hammer and breechblock, each of which has a large aperture for a finger. To operate this rifle, the user would pull back the upper slider (hammer) to cock it, then pull back the lower slider (breechblock) to allow access to the chamber; after inserting a cartridge, the user would close the breech block and grasp the lever around the bottom of the stock wrist. This lever has an internal projection that prevents the breechblock from opening under the pressure of firing.

Manufacturer

- manufacturer normally marked on barrel as "C.B. HOLDEN".
- C.B. Holden was a gunmaker/designer who at one time worked for Frank Wesson; after his employment with Frank Wesson ceased, he built a number of his own designs.

Action

- single-shot rimfire, with the breech locked by pressure of the firing hand against the lower lever.

34397 - 1	50 FLINTLOCK	1	102	Antique CC 84(1) "antique firearm"	Non-Commercial Customization	

Notes

Make

- "HOLE" is marked on the right side of the receiver/frame of an observed example.

Model

- model is not marked on the firearm.
- this is a unique, double barrel, over and under pistol where each barrel incorporates its own flintlock ignition.
- made circa 1811 to 1815.
- features include: blade front sight; octagonal, superposed barrels; front hinged, under barrel mounted ramrod; Damascus pattern finish; gold bands at the breech; engraved and case hardened locks; two triggers; sliding safety levers on each cock; finely checkered grip.

Manufacturer

- "HOLE" is marked on the right side of the receiver/frame of an observed example.
- William Hole was a gunmaker located at 21 Clare St, Bristol, Gloucester 1811 to 1815, 12 St. Augustines Back from 1816 to 1835 and 27 High St. Birmingham, England from 1839 to 1844.

Action

- muzzle loading, over and under barrel configuration.

139879 - 1	36 PERCUSSION	1	48	Antique CC 84(1) "antique firearm"	Non-Commercial Customization	

Notes

Make

- "HOLE" was observed marked on the left side of the receiver/frame.
- "BRISTOL" was observed marked on the right side of the receiver/frame.

Model

- manufactured prior to 1845.
- model designation is not marked on the firearm.
- model designation is derived from the method by which this pistol is loaded; loading was accomplished by unscrewing the barrel.
- this is a single shot pistol with a removable barrel and an exposed hammer centrally located on the receiver/frame behind the chamber.
- this handgun is intended to be loaded from the breech end of the barrel and as such was originally suppied with a wrench to unscrew the barrel from the receiver/frame in order that a lead ball and loose powder could be inserted into the chamber end of the barrel and then the barrel screwed back onto the receiver/frame.
- features observed: no front sight; removable, tapered round barrel with an under lug; central hammer; folding trigger; sliding safety lever behind ther hammer; wood grips; nickel finish with light engraving.

Manufacturer

- "HOLE" was observed marked on the left side of the receiver/frame.
- "BRISTOL" was observed marked on the right side of the receiver/frame.
- William Hole was a gunmaker located in Bristol, Gloucester, England at 21 Clare Street from 1811 to 1815, 12 St. Augustines Back from 1816 to 1835, and 27 High Street from 1839 to 1844.

Action

- the barrel unscrews in front of the chamber, so it can be loaded with a ball that fits the barrel more tightly than is possible with a muzzle loader.
- the turnoff barrel may be rifled.

Notes

Make

- "HOLEK" and the Holek logo of three interesection lines in a circle (forming an "H") are marked on top of the upper receiver.
- Emanuel Holek (the brother of Vaclav Holek) was an arms designer in pre-WW2 Czechoslovakia who played a large part in the design of the Bren light machine gun, the ZH29 rifle, and subsequent designs.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- Introduced in 1938. - "ATOMAT" is marked on top of the upper receiver/frame. - this is an example of a relatively rare gas-operated semi-automatic hunting rifle designed by Emanuel Holek and manufactured for him by CZ at Brno; these rifles were manufactured up to the end of World War Two. - features include: blued finish; open adjustable or "express sights"; an under barrel gas tube that supports a cocking handle (this rifle would be cocked by pulling rearward on a sling attached to the sling swivel attached to a tube surrounding the gas tube); checkered walnut pistol-grip stock with cheekpiece; ejection port on top of the receiver/frame; bolt tips vertically to lock and unlock; bottom-mounted box magazine; oval trigger guard; wing safety at the rear of the receiver/frame.
Manufacturer	- the manufacturer is not marked on the firearm.
Action	- gas-operated.
Serial Number	- serial-numbered on the receiver/frame.
Shots	- Magazines available with 2 and 3 shot capacity. - detachable box magazine.

Notes

Make

- "H&H", "HOLLAND & HOLLAND", "HOLLAND & HOLLAND LONDON", or "HOLLAND & HOLLAND LONDON ENGLAND" is usually marked on the receiver/frame.

Model

- "THE CAVALIER" is marked on the centre rib of the barrel assembly.
- production of this model began in 1986.
- features include: Anson & Deeley boxlock design; fixed, bored chokes; high grade walnut stock with a straight hand, half pistol or full pistol grip buttstock; splinter forend as standard with an option to have a beavertail style forend; wood surfaces are chequered and oil finished; metal surfaces may be blued, colour case hardened or brushed bright metal; the firearm may be engraved to the customers specifications and will have "HOLLAND & HOLLAND" as a gold inlay on the receiver/frame; tang safety; top lever opening; double triggers are standard though single trigger mechanisms are an option; barrel rib may be of a standard or Churchill pattern; interchangeable barrel units are available for a single receiver/frame; side clips are a receiver styling option.
- this model may be found with any possible custom feature which its design would allow.

Manufacturer

- "H&H", "HOLLAND & HOLLAND", "HOLLAND & HOLLAND LONDON", or "HOLLAND & HOLLAND LONDON ENGLAND" is usually marked on the receiver/frame.
- "HOLLAND & HOLLAND", "HOLLAND & HOLLAND - LONDON", "HOLLAND & HOLLAND 98 NEW BOND STREET LONDON", "HOLLAND & HOLLAND 33 BRUTON STREET LONDON", or "HOLLAND & HOLLAND BRUTON STREET LONDON" may be marked on the barrel or barrel assembly.

Action

- side by side configuration.
- Anson & Deeley boxlock action is used.

Serial Number

- serial numbers for this model began in 1986 with # 50001, and had reached 50250 by 1992.
- marked on the watertable of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel

- Holland & Holland specify that barrels for this model have as standard lengths the range of 25 to 30 inches (635mm to 762mm).
- as this is a bespoke firearm any barrel length may be encountered having been produced by the manufacturer.

Calibre

- Holland & Holland specify production in 12, 20 and 28 GA in 2 1/2", 2 3/4" and 3" chamberings.

Make

- "H&H", "HOLLAND & HOLLAND", "HOLLAND & HOLLAND LONDON", or "HOLLAND & HOLLAND LONDON ENGLAND" may be marked on the receiver/frame.
- Holland & Holland history:
- established by Harris John Holland, at 5 King Street, Holborn, London, England, 1835; the firm was not listed as Holland & Holland at this time; it was listed under the name of Harris John Holland.
- Harris John Holland relocated to 9 King Street, Holborn, London, from 1841 to 1848.
- the business relocated to 98 New Bond Street, London, in 1860.
- in 1867, Henry William Holland, the nephew of Harris John Holland, joined the business as a partner; firearms from this date were marked "H.HOLLAND" or "H.J.HOLLAND" until 1867 when the company name was changed to "HOLLAND & HOLLAND".
- in 1899, the company name was again changed to, "HOLLAND & HOLLAND LIMITED".
- the firm was located at 98 New Bond Street, London, England from 1860 to 1959.
- in 1960 the firm moved to 13 Bruton Street, Mayfair.
- in 1982 the firm moved to 33 Bruton Street, Mayfair.

Model

- model designation may not be marked on the firearm.
- this is a "Webley No 4" (Pryse Pattern) that was retailed by "Holland & Holland".
- "Webleys No 4" was introduced in 1877 and discontinued in 1896.
- features include: fixed sights; octangular barrel with raised top rib or ovate barrel; front hinged receiver/frame with a fluted on non fluted cylinder, with or without automatic ejection, and with twin break open levers mounted on the standing breech; exposed spur hammer; double/single action trigger mechanism; saw handle type grip strap with metal butt cap and lanyard ring; checkered solid walnut grip; blued or nickel plated finish.

Manufacturer

- "WEBLEY'S" or "WEBLEY" over "PATENTS" is usually marked on the side of the receiver/frame.
- "P. Webley & Son / Webley & Scott" trademark logo of a "Winged Bullet" over "W&S" is usually marked on the side of the receiver/frame.
- "P. Webley & Son" manufactured this model for many different retailers, such as "Holland & Holland", "Army & Navy", "Garden & Son", and "Cogswell & Harrison".

Serial Number

- serial number is usually marked on the left side of the receiver/frame.

Barrel

- the "Webley No 4" revolver was available in barrel lengths from 76mm to 146mm.

Calibre

- calibre is usually marked on the left side of the barrel.

Notes

Make

- "HOLLAND & HOLLAND 98 NEW BOND ST LONDON" is marked on the top of the barrel rib.
- this is a Webley revolver marked for and sold by Holland & Holland.
- Holland & Holland history:
- established by Harris John Holland, at 5 King Street, Holborn, London, England, 1835; the firm was not listed as Holland & Holland at this time; it was listed under the name of Harris John Holland.
- Harris John Holland relocated to 9 King Street, Holborn, London, from 1841 to 1848.
- the business relocated to 98 New Bond Street, London, in 1860.
- in 1867, Henry William Holland, the nephew of Harris John Holland, joined the business as a partner; firearms from this date were marked "H.HOLLAND" or "H.J.HOLLAND" until 1867 when the company name was changed to "HOLLAND & HOLLAND".
- in 1899, the company name was again changed to, "HOLLAND & HOLLAND LIMITED".
- the firm was located at 98 New Bond Street, London, England from 1860 to 1959.
- in 1960 the firm moved to 13 Bruton Street, Mayfair.
- in 1982 the firm moved to 33 Bruton Street, Mayfair.

Model

- known example was not marked with a model name; the model designation is derived from the characteristics of the firearm and the Webley company markings.
- model designation may be marked on the left side of the top strap which is how Webley usually marked these revolvers; markings could read, "WG", "WG Model" or "WG Model" with the date of manufacture, eg., "WG Model 1892" or a variation thereof.
- manufactured by Webley from 1886 until circa 1902.
- double action, top break with simultaneous ejection.
- typical characteristics;
- large rounded barrel-to-frame hinge at front of receiver/frame designed for greater rigidity and strength.
- large thumb-actuated barrel release lever on left side of receiver/frame; this latch may also be referred to as the Webley "stirrup" or "bridle" latch.
- may have bird's head type grip or square butt configuration, with or without lanyard ring on bottom butt strap.
- trigger guard is forged integrally with the receiver/frame.
- grip frame is noticeably humped behind the hammer.
- left side of receiver/frame has a removable "access" plate held in place by two slot-head screws.
- may have distinctively shaped "church steeple" type cylinder fluting with later models having the more traditional round shaped fluting; research has indicated that the use of the "church steeple" type of fluting ceased circa 1893.
- available in blued or nickel plated finish.
- various minor design changes occured through-out series production.
- sub-calibre conversion units were available for this firearm.

Manufacturer

- "WEBLEY'S" or "WEBLEY" over "PATENTS" is usually marked on the side of the receiver/frame.
- "P. Webley & Son / Webley & Scott" trademark logo of a "Winged Bullet" over "W&S" is usually marked on the side of the receiver/frame.

Serial Number

- serial number usually marked on right side of receiver/frame.
- known examples have had four and five digit numbers without prefix or suffix.

Calibre

- calibre usually marked on left side of barrel lug or left side of top strap.
- typical examples of calibre markings include; .450, .455, .450/.455, .455/.476, .476.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
161286 - 1	38 PERCUSSION	6	127	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "HOLLIS & SHEATH - LONDON" is marked on top of the barrel.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is an early form of double-action revolver, based in large part on the earlier "pepperbox" pattern, but having a short cylinder and a barrel mounted in front of the cylinder by way of a thumbscrew on the front of the receiver/frame.
- features include: blued or browned finish; fixed sight; octagonal barrel bearing "Hollis & Sheath" markings; lightly-engraved receiver/frame with integral cap-guard; bar hammer; double action only trigger mechanism; checkered walnut grip.

Manufacturer

- "HOLLIS & SHEATH - LONDON" is marked on top of the barrel.
- Hollis & Sheath was founded by Isaac Hollis and Brentall Sheath.
- Hollis & Sheath was located in Birmingham, England from 1849 to 1861.
- Hollis & Sheath was a gun and pistol maker.
- Hollis & Sheath also manufactured a six shot percussion revolver.
- Hollis & Sheath was located at 10-11 Weaman Row from 1849 to 1850, 49 Whittaill Street from 1851 to 1853, and 5-11 Weaman Row from 1853 to 1861.
- Hollis & Sheath became Isaac Hollis & Sons in 1861.
- Isaac Hollis & Sons was located at 5-11 Weaman Row, Birmingham, England circa 1861.
- Isaac Hollis & Sons formed a joint venture with Bentley & Playfair which was known as Hollis, Bentley & Playfair circa 1911.

Serial Number

- serial-numbered on the receiver/frame.

Notes

Make

- "I Hollis & Sons London" is marked on the top strap.
- Isaac Hollis & Sons manufactured handguns, rifles and shotguns and military firearms for the British Government from circa 1861 to circa 1955.
- Isaac Hollis & Sons had facilities in both Birmingham and London at the following locations 5-11 Weaman Row, Lench Street, London circa 1861; 44a Cannon Street, London circa 1870; 83 Cheapside, London circa 1871; 6 Great Winchester Street, London office circa 1884; 26 Billiter Building, London office circa 1892; 101 Leadenhall Street, London office circa 1899; 9 New Bond Street, London office circa 1903; 91-92 Lower Loveday Street, Birmingham factory circa 1911; 16-17 Loveday Street, Birmingham factory circa 1915; 54 Clerkenwell Road, London office circa 1920; and 84 Goswell Road, London office circa 1933.
- Isaac Hollis & Sons became a limited liability company circa 1876/1877.
- Isaac Hollis & Sons formed a joint venture with Bentley & Playfair, this company was known as Hollis, Bentley & Playfair circa 1911.
- "Issac Hollis & Sons" and "Hollis, Bentley & Playfair" also traded under their own names between 1911 and 1955.

Model

- manufactured prior to 1886.
- model designation is not marked on the firearm.
- "W. TRANTER" and "PATENT" are marked on the firearm.
- this model is based on the British patent of 1868.
- features include: octagonal barrel; solid top receiver/frame with round fixed cylinder and right side loading gate; swing out ejector rod assembly located on the front of the receiver/frame, under the barrel; exposed spur hammer; single/double action trigger mechanism; saw handle type checkered wood grips with lanyard ring.

Manufacturer

- "Tranter's Patent" or "W. Tranter's Patent" is usually marked on the firearm.

Serial Number

- serial number is located on the receiver/frame.
- on observed specimen was marked CPFxx.

Notes

Make

- "HOLLOWAY & COMPANY" and "BIRMINGHAM" were observed on the top strap of the receiver/frame.
- Holloway & Company was established by G. O'Connor Holloway.
- Holloway and Company was initially a hardware merchant who retailed quality firearms from Lionel Street in Birmingham, England.
- Holloway & Company manufactured quality side by side shotguns during the period 1887 to 1909.
- Holloway & Company had manufacturing facilities at the Vesey Street Gun Works located at 10, 12 and 14 Vesey Street, Birmingham, England.
- Holloway & Company was acquired by Thomas Naughton and the name was changed to Holloway & Naughton in 1909.

Model

- model designation does not appear on the firearm.
- features are similar to the "Royal Irish Constabulary" revolvers produced by Webley during the late 1800s and early 1900s.
- this is a solid receiver/frame, double action revolver.
- hinged loading gate located on left side of receiver/frame, swing-out ejector rod located on the underside of the barrel.
- checkered one piece wooden grips.
- lanyard ring on butt of pistol grip.

Serial Number

- serial number was located on left side of receiver/frame, under the wooden grips.
- serial number rationalization unknown.
- observed sample serial number consisted of a single letter prefix followed by five numbers.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Firearm Reference Number (FRN): 34046
Make: Holmes
Model: 88

Summary

Make:	Holmes
Model:	88
Manufacturer:	Holmes Firearms
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Pump Action
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
34046 - 1	12 GA X 2 3/4"	5	463	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
34046 - 2	12 GA X 2 3/4"	5	508	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
34046 - 3	12 GA X 2 3/4"	10	463	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
34046 - 4	12 GA X 2 3/4"	10	508	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Model

- This was an unusual appearing pump action shotgun that looked somewhat like the AR-16/M-16 series, with a raised post front sight and a carrying handle above the receiver; the pump handle completely surrounded the barrel, and it had a large, curved magazine to handle the rimmed 12 gauge shell.

Manufacturer

- Holmes Firearms was a small-scale manufacturer based in Wheeler, AR. Most of their firearms were produced in very limited or prototype-only quantities.

Shots

- detachable box magazine.
- was manufactured in 5 and 10 round capacities.

FRT Report

Firearm Reference Number (FRN): 200732
Make: Homemade
Model: Ingram M11 Copy

Summary

Make:	Homemade
Model:	Ingram M11 Copy
Manufacturer:	Unknown
Level:	Non-Commercial Customization
Type:	Submachine Gun
Action:	Full Automatic
Country of Manufacturer:	
Serial Numbering:	
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
200732 - 1	380 AUTO	28	98	Prohibited CC 84(1) "prohibited firearm" para. (c)	Non-Commercial Customization	

Notes

Make

- This is a generic screen for a firearm that has been specifically made by an individual such as the owner, machinist, or a local gunsmith.

Model

- The model designation is not marked on the firearm.
- Based on the Ingram M11 submachine gun design.
- Features include: protected post front sight and fixed aperture rear sight; rectangular press sheet metal receiver/frame; bolt is of the telescoping type which encloses the rear of the barrel; cocking handle is located on the top of the receiver/frame; magazine release located at the bottom rear of the grip; safety/selector lever may be located on the left or right side of the receiver/frame; box magazine housing located in the pistol grip; may have a telescoping and top folding wire buttstock.
- Overall length with a 98 mm (3.875 inches) barrel is 211 mm (8.25 inches).

Action

- Blowback operated.

Barrel

- The barrel length does not include any attached device such as flash-hider or muzzle brake.

Shots

- Detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- This firearm design incorporates a split receiver/frame: the lower receiver is the master component considered to be the receiver/frame for all purposes of the Criminal Code and the Firearms Act.
- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada.

If the complete sound suppressor/silencer (prohibited device) is removed, the firearm remains a "Prohibited Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), when removed will not change the "Prohibited Firearm" classification.

Notes

Make

- this is a generic screen for a firearm that has been specifically made by an individual such as the owner, machinist, or a local gunsmith.
- this does not include firearms that have been manufactured by a known manufacturing firm or business licensed for making firearms.

Model

- model designation is not marked on the firearm.
- based on an early 16th century "Monk's Gun".
- a transitional design between a matchlock and a wheel-lock where by drawing a ring attached to a serrated tinder box located beneath a spring held cock with flint produces the ignition.
- features include: all metal construction; no sights; octagonal barrel assembly; belt hook.

Type

- in order to operate the Monk Gun, the firearm is held in one hand while the other hand pulls the opearting mechanism to the rear and pushes it forward to produce a spark for ignition.

Action

- muzzle loader.

Serial Number

- a serial number may not be marked on the firearm.

Canadian Law Comments

- this firearm does not meet the definition of a handgun:
- CC S.84 part 2 (1) "handgun means a firearm, altered, or intended to aimed and fired by the action of one hand"

Notes

Make

- this is a generic screen for a firearm that has been specifically made by an individual such as the owner, machinist, or a local gunsmith.
- this does not include firearms that have been manufactured by a known manufacturing firm or business licensed for making firearms.

Model

- "RUGER 10/22 COPY" is not marked on the firearm.
- this is a homemade "Ruger 10/22" rifle that is not identifiable as to make or manufacturer.
- this firearm incorporates a homemade receiver/frame and includes original Ruger factory 10/22 parts such as the barrel, bolt, trigger group and stock.
- features observed: bead front sight and an adjustable folding-leaf rear sight; round rifled barrel; flat sided receiver/frame is drilled and tapped for scope mounts; cross bolt safety; one piece wood pistol grip stock.

Action

- blowback operated.

Shots

- detachable rotary box magazine.

Remarks

- this firearm is a homemade "Ruger 10/22" type rifle receiver/frame assembled with genuine Ruger parts and components that is not identifiable as to make or manufacturer.

Notes

Make

- this is a generic screen for a firearm that has been specifically made by an individual such as the owner, machinist, or a local gunsmith.
- this does not include firearms that have been manufactured by a known manufacturing firm or business licensed for making firearms.

Model

- this is a generic screen for a rifle, chambered for cartridge ammunition, for which there is no known model type or designation, which encompass the following features: i.) it has a rifled bore. ii.) it is a manually operated bolt action. iii.) it is a repeating firearm with a magazine.
- it may be of a singular or unique design, or embody a known design with unusual features.
- secondary features of the firearm may differ in many aspects, such as: unusual cartridge feed device, non-standard stock or furniture, unusual trigger or initiating device, auto-ejecting, etc.

Serial Number

- may not be marked with a serial number.
- the serial number may be of any configuration.
- the serial number may be hidden (usually under the stock furniture or other part).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments - current Canadian Law requires the serial number to be permanently marked on the receiver/frame of the firearm.

Remarks - may be made by an individual such as the owner, machinist, or a local gunsmith, but not by any known manufacturer, or business licensed for the manufacture of firearms.

Notes

Make

- Hood Firearms is not marked on the firearm.
- Hood's patent date of "April 6 1875" was observed marked on the left side of the barrel.

Model

- "LONE STAR No. 2" is marked on the top strap.
- manufactured before 1882.
- this firearm is also generically known as a Suicide Special type of handgun.
- features include: octagonal barrel; solid top receiver/frame with fluted cylinder; has a cutaway in the right side of the standing breech for loading; cylinder pin release is located at the front of the receiver/frame; spur hammer; single action trigger mechanism; sheathed trigger; blade front sight and a groove in the top strap for a rear sight; birds head pistol grip with wooden panels; usually nickel plated finish.

Manufacturer

- Hood Firearms Company is not marked on the firearm
- Hood's patent date of "April 6 1875" was observed marked on the left side of the barrel.

Serial Number

- serial number is located on butt strap.
- observed serial numbers consisted of three or four numbers without a letter prefix or suffix.

Other Markings

- patent date "APL 6 1875" marked on side of barrel on sample examined.

19847 - 5	32 RF	5	72	Antique AFR, Section 1, para. 6	Non-Commercial Customization	

Notes

Make

- makers name is not marked on this firearm.

Model

- model name is usually marked on the top strap as "MARQUIS OF LORNE" or "MARQUIS OF LORN"; the last marking seems to be the result of the hammer firing pin slot extending into the word "Lorne", thereby removing the letter "e" and reducing the name to "Lorn".
- manufactured before 1882.
- solid frame, single action, spur trigger revolver; this pistol was cheaply made and fits a category of handgun typically known as the "Suicide Special".
- features may include; nickel plated finish; case hardened hammer; fluted or plain cylinder with horizontal locking notches at the rear; bird's head or square type butt grip; round or octagonal barrel with half-disc blade front sight; blade-type cylinder axis pin release lever located in the front of the receiver/frame underneath the cylinder axis pin; circular plate located on the left side of the receiver/frame which acts as a fastening nut for the hammer screw.

Manufacturer

- makers name is not marked on this firearm.

Action

- single action.

Serial Number

- three and four digit numbers without prefix or suffix have been observed.
- serial number is usually marked on the left side of the grip frame underneath the grip plate.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel

- 32 & 22 is unrifled. This feature is a definite trait of products manufactured by HOOD FIREARMS COMPANY.
- a known trait of Hood firearms was to leave the bore of the barrels unrifled except for, approximately, the last one-half inch which was rifled; this "so-called" rifling at the end of the barrel was intended to reduce production costs while at the same time deceiving prospective buyers into believing that the barrel was actually rifled.

Notes

Make

- maker's name is not marked on the firearm.

Model

- "RUSSIAN MODEL" is marked on the top strap or the top of the barrel and was a trade name used by Hood Firearms, Smith & Wesson and others.
- "CAST STEEL PAT. FEB 23, 75 MAR. 14. 76" is marked on the side of the barrel of an observed example.
- manufactured circa 1880.
- this revolver is representative of a typical "suicide special" type of handgun.
- features include: round or octagonal barrel; solid top receiver/frame with removable fluted or plain cylinder; exposed spurred hammer; spur/sheathed-type trigger; single action trigger mechanism; knurled cylinder axis pin protrudes from front of receiver/frame underneath the barrel with the axis pin release button located on left side of receiver/frame in front of the cylinder; release button is plain or slotted, and the right rear of receiver/frame behind standing breech is fluted for loading of cartridges; saw handle or bird's head grip profile; blued or nickel plated finish; may be engraved.

Manufacturer

- maker's name is not marked on the firearm.

Serial Number

- serial number is usually marked on the left side grip frame under the grip panel or on the butt of the receiver/frame.
- an observed example consisted of five numbers without a letter prefix or suffix.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

44727 - 2	32 RF	5	87	Antique AFR, Section 1, para. 6	Manufacturer Specifications and Commercial Customization	

Notes

Make

- maker's name is not marked on the firearm.

Model

- "Victoria" is marked on the top strap or the top of the barrel.
- "PAT. APR. 6, 1875" is usually marked on the top or left side of the barrel.
- manufactured before 1882.
- single action, solid receiver/frame, with spur/sheathed-type trigger.
- this revolver is representative of a typical 'suicide special' type of handgun.
- cylinder axis pin protrudes from front of receiver/frame underneath the barrel with the axis pin release button located on left side of receiver/frame in front of the cylinder; this release button is usually slotted.
- right rear of receiver/frame behind standing breech is grooved for loading of cartridges.
- fluted cylinder.
- round or octagonal barrel.
- usually nickel plated finish, may be engraved.

Serial Number

- serial number is marked on the bottom of the grip, with partial serial numbers on the cylinder, cylinder axis pin, and inside of grip panels.

Remarks

- "Apr. 6, 1875" patent date as marked on this firearm is one of the means of identification of Hood manufacture; on this date, Letters of Patent # 161,615 was issued to Freeman W. Hood of Norwich, Connecticut on behalf of the Hood Firearms Company also of Norwich, Connecticut.

Notes

Make

- "HY. HOOK, TENTERDEN, KENT" is marked on the barrel.
- Henry Hook was located at High Street, Tenterden, Ashford, Kent, England from circa 1878 to circa 1886.

Model

- model name is not marked on the firearm.
- this is an open top receiver/frame, percussion revolver with a long flat spur hammer.
- manufactured circa 1853 to 1899.
- the 1853 Longspur Model came in three sizes: Holster size, normally five shots and a 178mm (7") barrel, Belt size, normally five shots and a 121 - 127mm (4.75 - 5") barrel, and Pocket size, six shots and a 89 -102mm (3.5 - 4") barrel.
- there may be a safety lever on the left side of the receiver/frame that when pressed foreward the hammer is held safely in either the cocked or uncocked position.
- the First model can be distinguished by the absence of a rammer and a partially enclosed hammer.
- the Second model incorporates an Adams-type rammer secured to the receiver/frame by a spring clip.
- the Third model can be determined by the compound rammer (patented by James Kerr in 1955, No. 1722) that is mounted to the barrel web and lays flat along the left side of the barrel, instead of being hinged is screwed onto the end of the cylinder axis rod and then secured by a horizontal screw entering from the front of the lug into the receiver/frame.

Manufacturer

- "JAMES WEBLEY PATENTEE", or "JAMES WEBLEY ST. MARY'S SQUARE, BIRMINGHAM", or "WEBLEY'S PATENT" may be marked on the firearm.

Action

- percussion ignition.

Serial Number

- serial number is marked on the front right side of the receiver/frame.
- known examples had three numbers without prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "DICTATOR" or "DICTATOR" over "PAT MAY 27. 79" is marked on the top of the barrel and/or the top strap, over the cylinder. - single action, spur trigger revolver which may be of solid frame construction with a top strap or of the open frame type without a top strap. - features include: plain unfluted cylinder with locking grooves at the rear and three knurled bands around the circumference; bird head or square butt grip frame; cylinder axis pin may be threaded into the front of the frame or it may be held in place by a wire spring mounted release lever on the left side of the receiver/frame; loading groove located on the right side of the receiver/frame through the standing breech; usually a nickel plated finish with case hardened trigger and hammer; grip plates may be hard rubber with "fleur de luis" scroll design or plain walnut. - a version of this model were originally made as percussion guns, the majority of which were factory converted to .38 RF; this version would not have a top strap; approximately 5000 were produced between 1869 to 1872; on these models the model name "DICTATOR" appears on the top of the barrel. - the patent date of May 27, 79 refers to George W. Cilley's patent no. 215,721 for an improved cylinder hand arrangement.
Action	- single action.
Serial Number	- known example had a four digit number without prefix or suffix marked on the left side of the grip frame underneath the grip plates. - research literature also indicates that the serial number is usually marked on the underside of the barrel in front of the receiver/frame and the rear face of the cylinder.
Remarks	- original configuration includes a loading lever under the barrel - guns that were converted from percussion to rimfire will have machining cuts on the barrel and frame where loading levers have been removed

Notes

Make

- "Made by the Hopkins & Allen Manfg Co Norwich Conn U.S.A" over "Merwin, Hulbert & Co. New York, U.S.A. Sole Agents" was observed marked on the top of the barrel of an example.
- "Hopkins & Allen" trade name was used by the Hopkins & Allen Manufacturing Company of Norwich, Connecticut, U.S.A. from 1868 to 1898.
- "Hopkins & Allen" trade name was used by the Hopkins & Allen Arms Company of Norwich, Connecticut, U.S.A. from 1898 to 1917.
- "Hopkins & Allen" trade name was reintroduced circa 1968 on reproductions of black powder firearms.
- "Hopkins & Allen" trade name has been used by "Numrich Arms Corporation" of West Hurley, New York, U.S.A.
- "Hopkins & Allen" trade name has been used by "Hopkins & Allen Arms" of Hawthorne, New Jersey, U.S.A.
- "Hopkins & Allen" trade name has been used by "Mowery Gun Works, Inc." of Waldren, Indiana, U.S.A.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- model designation is not marked on the firearm. - this is a generic entry encompassing all Hopkins & Allen Falling Block Rifles that do not have a model designation marked on them. - Hopkins & Allen produced the falling block rifle circa 1887 to 1915. - characteristics: - falling block action operated by under finger lever, - manually cocked centrally located hammer, - full arc finger lever that acts as the trigger guard when action is closed, - machined steel receiver/frame with integral upper and lower tangs, - takedown style of construction with the takedown screw located on the underside or the right side of the receiver/frame, - rebounding lock. - features may also include; - colour case hardened or blued receiver/frame, - round or octagonal barrel, - set triggers, - hard wood stock and forend, - hard rubber, steel or hooked-type Schuetzen-style butt plate, - checkered semi pistol grip, - variety of sights including tang mounted peep sight, - saddle ring mounted on left side of receiver/frame, - carbine versions with shorter barrels. - also available as a "Combination Gun" supplied with smooth bore barrels for a variety of rifle-type shot cartridges as well as 12 GA, 16 GA and 20 GA shotgun cartridges.
Action	- under lever operated, falling/dropping block design. - solid metal breechblock slides vertically in grooves cut into the receiver/frame.
Serial Number	- serial number when present, is usually numeric only, without prefix or suffix marked on the front face of the receiver/frame; this number can only be seen when the barrel has been removed. - known numbers have consisted of three, four and five digit numbers.
Calibre	- calibre designation may be marked on the rear of the barrel.
Other Markings	- patent markings are usually located on the barrel and may read as follows: "Pat. June 23.85 Oct 2.88", or "Pat. June 23, '85, Oct. 2, '88, Dec. 9, '90".

37009 - 1	22 LR	1	489	Prohibited CC 84(1) "prohibited device" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Hopkins & Allen" is usually marked on the firearm.
- "Hopkins & Allen" trade name was used by the Hopkins & Allen Manufacturing Company of Norwich, Connecticut, U.S.A. from 1868 to 1898.
- "Hopkins & Allen" trade name was used by the Hopkins & Allen Arms Company of Norwich, Connecticut, U.S.A. from 1898 to 1917.
- "Hopkins & Allen" trade name was reintroduced circa 1968 on reproductions of black powder firearms.
- "Hopkins & Allen" trade name has been used by "Numrich Arms Corporation" of West Hurley, New York, U.S.A.
- "Hopkins & Allen" trade name has been used by "Hopkins & Allen Arms" of Hawthorne, New Jersey, U.S.A.
- "Hopkins & Allen" trade name has been used by "Mowery Gun Works, Inc." of Waldren, Indiana, U.S.A.

Model

- the model designation is usually marked on the top of the barrel just ahead of the receiver/frame.
- this is a falling block, single-shot rifle with a sound suppressor/silencer mated to the barrel, the action is operated by pulling down on the rear of the trigger-guard, which drops the breech-block; these rifles had color-case-hardened receiver/frames and straight grip shotgun style buttstocks, and a looped takedown screw at the bottom front of the receiver/frame.
- the fit and finish of the firearm is such that the sound suppressor/silencer looks as if it is integral to the barrel.

Action

- falling-block mechanism.

Serial Number

- samples have been noted with sequential numbers.

Barrel

- the barrel is equipped with a removable 171mm sound suppressor/silencer.
- length with sound suppressor/silencer attached is 660mm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- as it left the factory, this firearm is equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada.
- when the sound suppressor/silencer (prohibited device) is removed from the barrel the firearm is correctly identified as a "Non Restricted Firearm".

Notes

Make

- "HOPKINS & ALLEN MFG. CO. - NORWICH, CONN." is marked on the barrel.

Model

- manufactured circa 1867.
- Hopkins & Allen took over Bacon Manufacturing Company in 1867.
- this is Bacon's Third Model Pocket Percussion Revolver manufactured by Hopkins & Allen.
- this is a single action percussion revolver with an open top receiver/frame and a traditional trigger guard.
- features include: fixed sights; round or octagonal barrel with rammer/loading lever; open top receiver/frame with a removable fluted or round cylinder; exposed spurred hammer; single action trigger mechanism; rounded trigger guard; flat bottom grip strap; wood grips; blued finish; plain or engraved barrel, cylinder and receiver/frame.
- Bacon Manufacturing Company model Pocket Percussion Revolver bears a strong resemblance to a "Manhattan" model Pocket Percussion Revolver.
- Bacon had worked for Manhattan before forming his own company.

Manufacturer

- "HOPKINS & ALLEN MFG. CO. - NORWICH, CONN." is marked on the barrel.

Other Markings

- Barrels marked "HOPKINS & ALLEN MFG. CO. - NORWICH, CONN."

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- Bacon was bought-out by Hopkins & Allen in 1867 with production of this revolver continuing under the Hopkins & Allen name for approximately 250 examples.
- Total production of this model is approximately 3500 examples broken into production marked Bacon Mfg Co about 1400 specimens and production for other firms totalling approximately 2100 specimens.
- Bacon manufactured for several other firms as follows: - Fitch & Waldo (approx 100 examples), B J Hart & Bro, NY (approximately 600 examples), Tomes, Melvain & Co (approximately 100 examples) NY, and Western Arms Co (approximately 400 examples).

- example observed with three or four digits with neither letter prefix nor suffix.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Remarks

- in the Ranger series model numbers denote frame size and calibre.
- No 1 frames were intended for 22 RF, No 2 for 32 RF, and No 3 for 38 RF calibres.
- Ranger series handgun were close relatives to the XL and Blue jacket series of revolvers produced by Hopkins and Allen during the heyday of pocket pistols.
- differences in fit, finish and overall quality were the distinguishing characteristics between these three model series with Ranger being the low end and XL the higher quality product.

Notes

Make

- "HOPKINS & ALLEN ARMS CO." over "NORWICH, CONN. U.S.A." is usually marked on the left side of the barrel.
- "Hopkins & Allen" trade name was used by the Hopkins & Allen Manufacturing Company of Norwich, Connecticut, U.S.A. from 1868 to 1898.
- "Hopkins & Allen" trade name was used by the Hopkins & Allen Arms Company of Norwich, Connecticut, U.S.A. from 1898 to 1917.
- "Hopkins & Allen" trade name was reintroduced circa 1968 on reproductions of black powder firearms.
- "Hopkins & Allen" trade name has been used by "Numrich Arms Corporation" of West Hurley, New York, U.S.A.
- "Hopkins & Allen" trade name has been used by "Hopkins & Allen Arms" of Hawthorne, New Jersey, U.S.A.
- "Hopkins & Allen" trade name has been used by "Mowery Gun Works, Inc." of Waldren, Indiana, U.S.A.

Model

- introduced in 1911 and discontinued in 1915.
- this is an oddly-shaped single-shot derringer made by Hopkins and Allen.
- the model designation is not marked on the firearm.
- features include: folding trigger, nickle or blue finished receiver/frame and barrel, may be engraved, hammerless, small front sight, a very small bird's-head grip with pearl or ivory grips, and the barrel release button is located on the left hand side of the receiver/frame.
- the barrel on this derringer tips up to load/unload, and extract. The cartridges must be extracted by using your fingernails and the grooves on the sides of the barrel.

Action

- the barrel tips up at the breach.

Serial Number

- the serial number is marked on the butt of the receiver/frame as sequential numbers.

19909 - 2	30 RF	5	64	Antique AFR, Section 1, para. 6	Non-Commercial Customization	

Notes

Make

- "Hopkins & Allen" is usually marked on the firearm.
- "Hopkins & Allen" trade name was used by the Hopkins & Allen Manufacturing Company of Norwich, Connecticut, U.S.A. from 1868 to 1898.
- "Hopkins & Allen" trade name was used by the Hopkins & Allen Arms Company of Norwich, Connecticut, U.S.A. from 1898 to 1917.
- "Hopkins & Allen" trade name was reintroduced circa 1968 on reproductions of black powder firearms.
- "Hopkins & Allen" trade name has been used by "Numrich Arms Corporation" of West Hurley, New York, U.S.A.
- "Hopkins & Allen" trade name has been used by "Hopkins & Allen Arms" of Hawthorne, New Jersey, U.S.A.
- "Hopkins & Allen" trade name has been used by "Mowery Gun Works, Inc." of Waldren, Indiana, U.S.A.

Model

- "XL. 30 Long" is marked on the top strap.
- manufactured from 1879 to circa 1898.
- features include: solid frame single action revolver with fixed cylinder; round barrel; fluted cylinder with locking notches to the rear; flat sided frame with removable side plate on the left side; sheathed trigger; cylinder pin release is a push in blade type on the left side of the frame; brass half-moon blade front sight and a constricted full length groove in the top strap for the rear sight; birdshead grip with walnut plates; nickel finish.

Serial Number

- serial number is usually marked on the side of the grip frame underneath the grip plates; it may also be repeated on the underside of the barrel.
- serial numbers were numerical only without prefix or suffix.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Other Markings

- may be marked:
"Hopkins & Allen Mfg. Co." "XL. 30 Long" "Pat. Mar. 28,1871, Apr. 27, 1875"

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks - research indicates that Hopkins & Allen discontinued the manufacture of single action spur trigger pocket-type revolvers circa 1898.

Notes

Make

- "Hopkins & Allen" is usually marked on the firearm.
- "Hopkins & Allen" trade name was used by the Hopkins & Allen Manufacturing Company of Norwich, Connecticut, U.S.A. from 1868 to 1898.
- "Hopkins & Allen" trade name was used by the Hopkins & Allen Arms Company of Norwich, Connecticut, U.S.A. from 1898 to 1917.
- "Hopkins & Allen" trade name was reintroduced circa 1968 on reproductions of black powder firearms.
- "Hopkins & Allen" trade name has been used by "Numrich Arms Corporation" of West Hurley, New York, U.S.A.
- "Hopkins & Allen" trade name has been used by "Hopkins & Allen Arms" of Hawthorne, New Jersey, U.S.A.
- "Hopkins & Allen" trade name has been used by "Mowery Gun Works, Inc." of Waldren, Indiana, U.S.A.

Model

- model designation is marked on the top strap along with the calibre designation.
- manufactured from 1875 to 1907.
- double action model with conventional trigger and trigger guard.
- two different features have been made for this model, one has a regular hammer and one has a hammer with folding spur.
- square butt.
- the loading gate on some of these firearms were made with a "finger nail" to open it, and on some others the loading gate has a small knurled knob to open it, the later one probably being an improvement over the first issue.
- some of these firearms have been observed with a cartridge case extractor mounted under the barrel.
- octagonal barrel.
- some models have been observed with a lanyard ring.

Serial Number

- serialization unknown, but four numerical digits observed.

Calibre

- calibre is usually marked on the top strap.

Notes

Make

- "Hopkins & Allen" is usually marked on the firearm.
- "Hopkins & Allen" trade name was used by the Hopkins & Allen Manufacturing Company of Norwich, Connecticut, U.S.A. from 1868 to 1898.
- "Hopkins & Allen" trade name was used by the Hopkins & Allen Arms Company of Norwich, Connecticut, U.S.A. from 1898 to 1917.
- "Hopkins & Allen" trade name was reintroduced circa 1968 on reproductions of black powder firearms.
- "Hopkins & Allen" trade name has been used by "Numrich Arms Corporation" of West Hurley, New York, U.S.A.
- "Hopkins & Allen" trade name has been used by "Hopkins & Allen Arms" of Hawthorne, New Jersey, U.S.A.
- "Hopkins & Allen" trade name has been used by "Mowery Gun Works, Inc." of Waldren, Indiana, U.S.A.

Model

- introduced in 1875 and discontinued in 1916.
- "XL DOUBLE ACTION" is marked on the top strap or on the barrel.
- features include: double action trigger mechanism, blued or nickel solid receiver/frame, octagonal barrel, and fluted cylinder, exposed cylinder pin located under the barrel, may have a loading gate on the right side of the receiver/frame with a channel to load and unload cartridges, fixed blade front sight with a fixed channel on the top strap for a rear sight, and may have checkered black grip panels with a circle at the top. The circle may be marked, "H&A".
- the loading gate may have a finger nail groove or a round knob to open the gate.
- some revolvers may have an ejector rod located on the left side of the barrel.
- may have a solid spurred hammer, bobbed hammer or a hammer with a folding spur. Revolvers with a folding spur hammer may have a patent date marked on the hammer of, "JAN. 27, 85.".

Serial Number

- sample reported has a four digit serial number.
- serial number is marked on the receiver/frame, either on the front of the grip, or on the left side under the grip panel.

Calibre

- calibre designation may be marked on the topstrap as:
"38 CAL CENTER FIRE"
or
"32 CAL CENTER FIRE"
or
"32 CAL RIM FIRE".

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- top strap may be marked as:
"HOPKINS & ALLEN MFG. CO."
"PAT. MARCH 28, 1871, JAN. 5, 86"
"XL DOUBLE ACTION"
"32 CAL RIM FIRE"
or
"HOPKINS & ALLEN MFG. CO."
"PAT. MARCH 28, 1871, JAN. 5, 86"
"XL DOUBLE ACTION"
"32 CAL CENTRE FIRE"
or
"HOPKINS & ALLEN MFG. CO."
"PAT. MARCH 28, 1871, JAN. 5, 86"
"XL DOUBLE ACTION"
"38 CAL CENTRE FIRE"
or
"XL DOUBLE ACTION"
"HOPKINS & ALLEN ARMS CO."
"NORWICH, CONN. U.S.A.". or
"HOPKINS & ALLEN MFG. CO."
"PAT. JAN. 5. 86"
"XL DOUBLE ACTION"
"32 CAL RIM FIRE"

Remarks

- the Hopkins & Allen "XL DOUBLE ACTION" revolvers may be found in three variations:
- Variation 1 - manufactured from 1875 to 1907. This version was the Merwin, Hulbert & Company revolver manufactured and marked by Hopkins & Allen. This version had the cylinder release lever located on the left side of the receiver/frame in front of the cylinder. The front sight blade has a unique shape; it is low and flat towards the front with a distinct hump towards the rear.
- Variation 2 - manufactured from 1886 to 1907. This version had the cylinder release lever located below the cylinder pin on the front of the receiver/frame. The front sight is a half moon blade.
- Variation 3 - manufactured from 1908 to1916. This version combined the best features of Variation 1 and 2. The cylinder release lever located below the cylinder pin on the front of the receiver/frame. The front sight is a half moon blade.

Notes

Make

- "Hopkins & Allen" is usually marked on the firearm.
- "Hopkins & Allen" trade name was used by the Hopkins & Allen Manufacturing Company of Norwich, Connecticut, U.S.A. from 1868 to 1898.
- "Hopkins & Allen" trade name was used by the Hopkins & Allen Arms Company of Norwich, Connecticut, U.S.A. from 1898 to 1917.
- "Hopkins & Allen" trade name was reintroduced circa 1968 on reproductions of black powder firearms.
- "Hopkins & Allen" trade name has been used by "Numrich Arms Corporation" of West Hurley, New York, U.S.A.
- "Hopkins & Allen" trade name has been used by "Hopkins & Allen Arms" of Hawthorne, New Jersey, U.S.A.
- "Hopkins & Allen" trade name has been used by "Mowery Gun Works, Inc." of Waldren, Indiana, U.S.A.

Model

- manufactured from the late 1870's to the early 1880's.
- marked "XL NAVY" on the topstrap, and "HOPKINS AND ALLEN MFG. CO. PAT. MAR. 28, '71, APR. 27, '75" on the barrel.
- this is a single action revolver that resembles a double action revolver
- features include: swing out cylinder, blued or nickel finish, walnut grips, fixed sights, and a square butt with a backstrap that curves gradually up into the major portion of the frame; the "Army" version of this revolver (marked "XL NO. 8", and chambered for 44 RF), has a "hump" on the backstrap, making for a sharper grip-to-frame angle.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured from approximately 1871 to 1898 with sales continuing into the early 1900's.
- "XL No. 2" is usually marked on the top strap of the receiver/frame.
- "Pat. Mar. 28, 1871, Apr. 27, 1875" or a variation thereof, i.e., one or the other of these dates, is usually marked on the top strap and/or the barrel.
- "XL No 2" is a solid frame single action revolver with removable cylinder, spur (sheathed) trigger and exposed hammer centrally located at the rear of the standing breech.
- features usually include: brass half-moon blade front sight and a raised notch on the top strap for the rear sight; round or octagonal barrel; solid top, flat sided receiver/frame with a removable side plate on the left side of the receiver/frame, loading groove machined into the right side of receiver/frame and through the standing breech, and a removable fluted cylinder with Hopkins & Allen's patented safety locking notches on the rear of the cylinder face; push-in blade type cylinder axis pin release lever is located on the left side of the receiver/frame; bird's head grip with walnut plates; nickel plated or blued finish; may be engraved.

Serial Number

- known example had a numeric number without prefix or suffix marked on the left side of the grip frame underneath the left grip plate.
- three and four digit numbers have been observed.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "Hopkins & Allen" is usually marked on the firearm.
- "Hopkins & Allen" trade name was used by the Hopkins & Allen Manufacturing Company of Norwich, Connecticut, U.S.A. from 1868 to 1898.
- "Hopkins & Allen" trade name was used by the Hopkins & Allen Arms Company of Norwich, Connecticut, U.S.A. from 1898 to 1917.
- "Hopkins & Allen" trade name was reintroduced circa 1968 on reproductions of black powder firearms.
- "Hopkins & Allen" trade name has been used by "Numrich Arms Corporation" of West Hurley, New York, U.S.A.
- "Hopkins & Allen" trade name has been used by "Hopkins & Allen Arms" of Hawthorne, New Jersey, U.S.A.
- "Hopkins & Allen" trade name has been used by "Mowery Gun Works, Inc." of Waldren, Indiana, U.S.A.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation is marked on the top-strap.
- this is a small "bird's-head" single-action revolver, made by the Hopkins & Allen Manufacturing Company between 1871 and the late 1890s.
- features include: one-piece receiver/frame with a "bird's-head" grip; varnished walnut grips; rudimentary fixed sights; spur trigger; a cylinder-pin locking-catch on the left side of the receiver/frame; blued, nickeled, or colour-case-hardened finish; and may or may not have various engraving present.
- as a general rule, early Hopkins & Allen revolvers of this type will have rounded receivers/frames; later H&A revolvers were generally made with flat-sided receivers/frames and both will still bear the same patent markings.
- discontinued the manufacture of single action, spur trigger, pocket-type revolvers, circa 1898.

Serial Number

- serial numbered on the receiver/frame (usually under the grips), on the bottom of the barrel and on the rear of the cylinder.

Canadian Law Comments

- these revolvers were made from the early 1870's until the late 1890's; individual examples may or may not be considered "Antiques".

Notes

Make

- "HOPKINS & ALLEN MFG. CO." over "PAT. MCH 28, 71 MAY 27, 79" overv "XL. No 5" over "38 CAL. RIM FIRE" was observed marked on the topstrap of one example.
- "Hopkins & Allen" trade name was used by the Hopkins & Allen Manufacturing Company of Norwich, Connecticut, U.S.A. from 1868 to 1898.
- "Hopkins & Allen" trade name was used by the Hopkins & Allen Arms Company of Norwich, Connecticut, U.S.A. from 1898 to 1917.
- "Hopkins & Allen" trade name was reintroduced circa 1968 on reproductions of black powder firearms.
- "Hopkins & Allen" trade name has been used by "Numrich Arms Corporation" of West Hurley, New York, U.S.A.
- "Hopkins & Allen" trade name has been used by "Hopkins & Allen Arms" of Hawthorne, New Jersey, U.S.A.
- "Hopkins & Allen" trade name has been used by "Mowery Gun Works, Inc." of Waldren, Indiana, U.S.A.

Model

- "XL. No 5" was observed marked on the top strap of one example.
- manufactured from 1879 to circa 1898.
- receiver/frame is flat or round sided with or without the a removable left sideplate.
- features include: brass half-disc front sight and a raised, notched lip in the topstrap for a rear sight; octagonal barrel; solid top receiver/frame with a removable fluted cylinder; exposed spur hammer; sheathed spur trigger; single action trigger mechanism; birdshead-type grip strap; nickel finish.

Serial Number

- serial number is usually marked on the side of the grip frame underneath the grip plates; it may also be repeated on the underside of the barrel.
- observed serial number consisted of four numbers without a letter prefix or suffix.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Other Markings

- rimfire versions are marked on the topstrap with:
 "HOPKINS & ALLEN M'F'G CO. XL No 5 PAT. MAR. 28, 1871."
- the military and police style variant in 38 S&W centrefire is rare, but does exist and is marked "HOPKINS & ALLEN M'F'G. CO." " PAT. MCH. 28, '71, May 27," "79 XL No. 5 38 CAL. CENTRE FIRE".

Remarks

- research indicates that Hopkins & Allen discontinued the manufacture of single action spur trigger pocket-type revolvers circa 1898.

Make:	Hoppes
Model:	Ethan Allen Side By Side
Manufacturer:	
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Multi-Barrel
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
73810 - 3	36 PERCUSSION	2	86	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	
73810 - 2	36 PERCUSSION	2	102	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	
73810 - 1	36 PERCUSSION	2	108	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Hoppes" may be marked on rib between the barrels.

Model

- model name may not be marked on the firearm.
- "Ethan Allen by Hoppes" is marked on the rib between the barrels.
- this is a copy of the double barrel pistol produced circa 1850's by Allen & Thurber or Allen & Wheelock. It would appear that the use of the Ethan Allen name on this pistol is for modern marketing purposes only; research has indicated that there was no relationship between Ethan Allen, the arms inventor/manufacturer (1806-1871), to the American Revolutionary War hero who had the same name.
- characterized by an unusual boxlock receiver/frame construction whereby the barrels and receiver/frame are cast integrally with the grip frame.
- features include: double exposed hammers which are top-mounted directly behind each smoothbored barrels; single trigger; blued finish; available finished or in kit form and in an engraved version known as the "Model 100F".
- also commonly referred to as a 'boot pistol'.
- Hoppe's advertising for this model states that it is completely manufactured in the United States of America, but does indicate by whom.

Serial Number

- known example had five digit number with letter prefix marked on front grip strap behind the trigger guard.

140126 - 1	41 CF	1	705	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	
140126 - 2	41 CF	1	705	Antique AFR, Section 1, para. 3	Non-Commercial Customization	

Notes

Make

- "W.HORTON. GLASGOW." was observed marked on the top of the barrel.

Model

- model designation is not marked on the firearm.
- features include: blued semi octagonal and semi round barrel with rear and front sight; engraved colour case-hardened front hinged receiver/frame; break opening lever located on the underside of the receiver/frame in front of the trigger guard; external hammer; single trigger mechanism; wooden checkered semi-pistol grip buttstock and splinter style forearm which is held in place by a wedge.

Manufacturer

- "W.HORTON. GLASGOW." was observed marked on the top of the barrel.
- references confirm the existence of several "William Horton" in the United Kingdom between 1859 and the 1920s.
-1: William Horton of Glasgow, Scotland founded a business at 29 Union Street in 1864.
- William Horton business was taken over by Oliver Horton in 1896.
- Horton's business was located at 98 Buchanan Street in 1900.
- Horton's of Glasgow, Scotland were located at the following addresses 29 Union Street, Royal Exchange Square, 98 Buchanan Street, 199 Buchanan Street, 11 Prince Street and 64 Osborne Street between 1864 and the 1920s.
-2: William Horton of Whitehaven, England was located at 16 Roper Street from 1859 to 1862.
-3: William Horton of Birmingham, England was located at 13 Moat Row and 8 Steelhouse Lane from 1856 to 1858.

Action

- hinged barrel design.

Canadian Law Comments

- some examples of this firearm when manufactured before 1898, may be considered Antique in Canada.

Notes

Make

- "W.HORTON, 29 UNION ST. GLASGOW" is marked on the barrel sleeve.
- references confirm the existance of several "William Horton" in the United Kingdom between 1859 and the 1920s.
-1: William Horton of Glasgow, Scotland founded a business at 29 Union Street in 1864.
- William Horton business was taken over by Oliver Horton in 1896.
- Horton's business was located at 98 Buchanan Street in 1900.
- Horton's of Glasgow, Scotland were located at the following adresses 29 Union Street, Royal Exchange Square, 98 Buchanan Street, 199 Buchanan Street, 11 Prince Street and 64 Osborne Street between 1864 and the 1920s.
-2: William Horton of Whitehaven, England was located at 16 Roper Street from 1859 to 1862.
-3: William Horton of Birmingham, England was located at 13 Moat Row and 8 Steelhouse Lane from 1856 to 1858.

Model

- "THOMAS'S PATENT NO. 779" may be marked on the left side of the receiver/frame.
- British Patent Number 779 was granted to John Thomas on March 13, 1896.
- John Thomas was a manager for the firm of Tipping & Lawden.
- 1,200 revolvers were manufactured under license from Thomas from 1870 to 1877.
- features include: blued finish; round barrel with octagonal shroud; solid top receiver/frame; right side mounted, hinged loading gate; external spurred hammer; saw handle, checkered, wood grips; lanyard loop.
- NOTE: the lever on the right side of the receiver/frame unlocks the barrel and cylinder. A knob mounted under the barrel rotates to the left and is then pushed forward. As the cylinder moves forward the cartridge cases are pulled from the cylinder by a fixed ejector plate.
- John Thomas was granted British patent No. 779 in 1869 for a self extracting revolver; No. 324 in 1870 and No. 3091 in 1871 fo a Wedge Bolt action; and No. 3548 in 1874 with T.T. Lawden for a drop down barrel action.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- manufacturer's name may not be marked on the firearm.
- Thomas Tipping-Lawden was located at Legge Street, Birmingham, England in 1821.
- Thomas Tipping-Lawden moved to 40 Constitution Hill, Birmingham in 1828.
- Caleb & Thomas Tipping-Lawden formed a partnership known as "Tipping & Lawden" in 1837.
- Tipping & Lawden traded from 40 and 41 Constitution Hill and 18 Buckingham Street in Birmingham.
- Tipping & Lawden also had facilities in London, England at Cheapside from 1837 to 1840, 18 Pancras Lane in 1842, 9 Dyers Buildings, Holborn in 1843, 20 Barlett's Buildings from 1844 to 1851, 26 Barlett's Buildings from 1852 to 1854, and 17 Woodstock Street from 1871 to 1877.
- Tipping & Lawden was sold to P.Webley & Son in 1877.

Serial Number

- serial number was observed marked on the left side of the receiver/frame, below "THOMAS'S PATENT NO. 779". Do not confuse the patent number "779" as the serial number.
- observed serial number was prefixed by "No.", example "No. 366".

-3: William Horton of Birmingham, England was located at 13 Moat Row and 8 Steelhouse Lane from 1856 to 1858.

Model

- "WEBLEY" over "PATENTS" is marked on the right side of the receiver/frame.
- "MARK III" is marked on the left side of the top strap..
- Webley's "MARK III" line was manufactured between 1894 and 1945.
- features include: receiver/frame mounted firing pin; cylinder axis pin is part of the cylinder; fluted cylinder; fixed front and rear sight; top break design; double action trigger mechanism; pronounced hump or "prawl" at the back of the receiver/frame above the grips; may have a lanyard ring; optional safety lever; grips were a two piece design, small black plastic or wood grips.

Manufacturer

- "WEBLEY'S" or "WEBLEY" over "PATENTS" is usually marked on the side of the receiver/frame.
- "P. Webley & Son / Webley & Scott" trademark logo of a "Winged Bullet" over "W&S" is usually marked on the side of the receiver/frame.

Action

- hinged barrel design.

Serial Number

- serial number is marked on the right side of the receiver/frame above the trigger.
- example observed with four numbers without a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - also marked on the right side of the receiver/frame: "WEBLEY PATENTS".

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- the make is normally marked on the left side of the receiver/frame as: "MITRAILLEUSE AUTOMATIQUE HOTCHKISS".
Model	- introduced in 1914 and discontinued in 1930. - remained in service with the French Army until 1945. - the model designation may be marked on the left side of the receiver/frame as, "M1914". - this was a World War Two conversion of surplus Hotchkiss 1914 machine guns to 7.62x54R, by the Van Karner Ordnance Corporation, of New York City, for sale to the Dutch East Indies, who were at that time, in danger of being over-run by the Imperial Japanese. - features include: steel receiver/frame, the barrel has five large, round cooling fins located at the rear of the barrel, the gas system is located under the barrel, a brass pistol grip & triggerguard is located at the rear underside of the firearm, and a large oval grip is located at the back of the firearm. - the Hotchkiss machine gun was developed between 1893 and 1900. The Hotchkiss machine gun operating system was based on a mechanism designed in 1893 by Captain, Baron Adolph von Odkolek of the Austrian Army and further developed/modified by Lawrence Benet, the Chief Engineer at the Hotchkiss factory at St Denis, France, assisted by Henri Mercie. - the Hotchkiss machine gun proved to be a great success during World War I, eventually being adopted by France, Great Britain, Japan, Norway, Spain, China and the United States of America.
Manufacturer	- the manufacturer is normally marked on the left side of the receiver/frame as: "MITRAILLEUSE AUTOMATIQUE HOTCHKISS". - the Hotchkiss machine gun has been manufactured by several nations in many different configurations and variant models. - the principal manufacturer was the Hotchkiss factory at Saint Denis, France, until the commencement of World War I when manufacture was taken-up by the French Government arsenals at St Etienne and Chatellerault.
Type	- air cooled, gas operated, heavy machine gun.
Action	- gas operated.
Serial Number	- serial number may be found located on the rear left side of the receiver/frame. - serial number rationalization unknown. - observed specimen serial number consisted of five digits without prefix or suffix.
Calibre	- the calibre designation is normally marked on the left side of the receiver/frame.
Shots	- the 24 and 30 round shot capacities are by means of a "metallic strip" feed device. - the 249 round shots capacity is by means of an articulated strip "belt" made up of hinged three round strips.
Canadian Law Comments	- is of the "metallic strip" type, is not a reproduction and was originally designed or manufactured for use in conjunction with the firearm known as the Hotchkiss machine-gun, Model 1895 or Model 1897, or any variant or modified version of it, including the Hotchkiss machine-gun model 1900, Model 1909, Model 1914 and Model 1917 and the Hotchkiss Model (Enfield) Number 2, Mark I and Mark I*: - is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted". - For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".
Remarks	- the Hotchkiss machine gun was developed from 1893 to 1900. It was based on a mechanism developed by Captain, Baron Adolph von Odkolek of the Austrian Army and further developed by Lawrence Benet, the Chief Engineer at the Hotchkiss factory at St Denis, France, assisted by Henri Mercie. This mechanism was of great interest as it was an air cooled, gas operated, automatic mechanism and the patents for a water cooled, recoil operated machine gun operating mechanism were locked-up solid during this era by Hiram Maxim. There was a huge advantage for Hotchkiss to own the patent for an air cooled, gas operating system for automatic weapons as this would permit the evasion of the Maxim-held patents (recoil operated mechanism patents) and would allow the Hotchkiss firm to take its place in sales and revenue along-side of the manufacturers of the water cooled, recoil operated guns which were pre-eminent at the turn of the century. - the first Hotchkiss machine gun adopted for service by France was the Model 1900, heavy machine gun, followed by the Hotchkiss Model 1909 Benet-Mercie light machine gun, followed by a slightly altered/modified version of the same machine gun during World War I known as the Hotchkiss Model 1914 heavy machine gun. - the Hotchkiss machine gun proved to be a great success in the era 1900 to 1914 and during World War I, eventually being adopted by France, Great Britain, Japan, Norway,Spain, China and the United States of America.

Notes

Make

- "HOTCHKISS" is marked on the left side of the receiver/frame.
- the Hotchkiss machine gun was developed from 1893 to 1900. It was based on a mechanism devloped by Captain, Baron Adolph von Odkolek of the Austrian Army and further developed by Lawrence Benet, the Chief Engineer at the Hotchkiss factory at St Denis, France, assisted by Henri Mercie.

Model

- the Model 1926 is essentially an improvement on the Hotchkiss, Heavy Machine Gun, Model 1900 and/or the Model 1914, and incorporates some of the features of the Hotchkiss, Benet-Mercie Machine Gun, Model 1909 in a new model light machine gun specifically manufactured for the Government of Greece.
- features include: a shoulder stock, does not have the traditional cooling fins on the rear portion of the barrel, has a flash hider, bipod and a monopod on the butt stock, the gas system is located under the barrel, feed is accomplished by the traditional Hotchkiss feed strip holding 25 cartridges only.
- model may not be found marked on the firearm in English.
- prolific markings in Greek script.
- the contract for the Greek Model 1926, Hotchkiss Machine Gun was for approximately 5000 examples.

Manufacturer

- "HOTCHKISS" is marked on the left side of the receiver/frame.
- the Hotchkiss machine gun has been manufactured by several nations in many different configurations and variant models.
- the principal manufacturer was the Hotchkiss factory at Saint Denis, France.
- the first Hotchkiss machine gun adopted for service by France was the Model 1900, followed by a slightly altered/modified version of the same machine gun during World War I known as the Model 1914.
- this machine gun proved to be a great success during World War I, eventually being adopted by France, Great Britain, Japan, Norway,Spain, China and the United States of America.

Type

- air cooled, gas operated, heavy machine gun.

Action

- gas operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the right side of the receiver/frame. - the serial number may be preceded in the Greek version with "AP18", this is not to be included in the serial number. - serial number rationalization unknown. - specimen serial number observed consisted of four digits without prefix or suffix.
Calibre	- the calibre may be marked on the firearm.
Shots	- utilizes a feed strip similar to the one employed by the Hotchkiss, Heavy Machine Gun, Model 1900 and/or the Hotchkiss, Heavy Machine Gun, Model 1914, however in 25 cartridge capacity strips rather than 30 cartridge capacity strips.
Canadian Law Comments	- is of the "metallic strip" type, is not a reproduction and was originally designed or manufactured for use in conjunction with the firearm known as the Hotchkiss machine-gun, Model 1895 or Model 1897, or any variant or modified version of it, including the Hotchkiss machine-gun model 1900, Model 1909, Model 1914 and Model 1917 and the Hotchkiss Model (Enfield) Number 2, Mark I and Mark I*: - is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted". - For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".
Other Markings	- the Hotchkiss, Greek contract Model 1926 machine gun has has a Greek Cypher (logo) of a horse-back figure with a spear over a dragon, marked on the top of the barrel ring.
Remarks	- the Hotchkiss machine gun was developed from 1893 to 1900. It was based on a mechanism developed by Captain, Baron Adolph von Odkolek of the Austrian Army and further developed by Lawrence Benet, the Chief Engineer at the Hotchkiss factory at St Denis, France, assisted by Henri Mercie. This mechanism was of great interest as it was an air cooled, gas operated, automatic mechanism and the patents for a water cooled, recoil operated machine gun operating mechanism were locked-up solid during this era by Hiram Maxim. There was a huge advantage to an air cooled, gas operating system for automatic weapons as the evasion of the Maxim-held patents would allow the Hotchkiss firm to take its place in sales and revenue along-side of the manufacturers of the water cooled, recoil operated guns which were pre-eminent at the turn of the century. - the first Hotchkiss machine gun adopted for service by France was the Model 1900, heavy machine gun, followed by the Hotchkiss Model 1909 Benet-Mercie light machine gun, followed by a slightly altered/modified version of the same machine gun during World War I known as the Hotchkiss Model 1914 heavy machine gun. - this machine gun proved to be a great success in the era 1900 to 1914 and during World War I, eventually being adopted by France, Great Britain, Japan, Norway,Spain, China and the United States of America.

Notes

Make

- "HOTCHKISS" is marked on the left side of the receiver/frame.
- the Hotchkiss machine gun was developed from 1893 to 1900. It was based on a mechanism devloped by Captain, Baron Adolph von Odkolek of the Austrian Army and further developed by Lawrence Benet, the Chief Engineer at the Hotchkiss factory at St Denis, France, assisted by Henri Mercie.

Model

- the Model 1926 is essentially a Hotchkiss Model 1914 machine gun specifically manufactured for the Government of Greece.
- features include: flash hider, bipod and a monopod on the butt stock.
- the first Hotchkiss machine gun adopted for service by France was the Model 1900, followed by a slightly altered/modified version of the same machine gun during World War I known as the Model 1914.
- the contract for the Greek Model 1926, Hotchkiss Machine Gun was for approximately 5000 examples.

Manufacturer

- "HOTCHKISS" is marked on the left side of the receiver/frame.
- the Hotchkiss machine gun has been manufactured by several nations in many different configurations and variant models.
- the principal manufacturer was the Hotchkiss factory at Saint Denis, France.
- the first Hotchkiss machine gun adopted for service by France was the Model 1900, followed by a slightly altered/modified version of the same machine gun during World War I known as the Model 1914.
- this machine gun proved to be a great success during World War I, eventually being adopted by France, Great Britain, Japan, Norway,Spain, China and the United States of America.

Type

- air cooled, gas operated, heavy machine gun.

Action

- no longer capable of full automatic fire.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the right side of the receiver/frame.
- the serial number may be preceeded in the Greek version with "AP18", this is not to be included in the serail number.
- serial number rationalization unknown.
- specimen serial number observed consisted of four digits without prefix or suffix.

Calibre

- the calibre may be marked on the firearm.

Shots

- 25 round strip feed.

Canadian Law Comments

- is of the "metallic strip" type, is not a reproduction and was originally designed or manufactured for use in conjunction with the firearm known as the Hotchkiss machine-gun, Model 1895 or Model 1897, or any variant or modified version of it, including the Hotchkiss machine-gun model 1900, Model 1909, Model 1914 and Model 1917 and the Hotchkiss Model (Enfield) Number 2, Mark I and Mark I*:
- is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

Other Markings

- the Hotchkiss, Greek contract Model 1926 machine gun has has a Greek Cypher (logo) of a horse-back figure with a spear over a dragon, marked on the top of the barrel ring.

Remarks

- the Hotchkiss machine gun was developed from 1893 to 1900. It was based on a mechanism developed by Captain, Baron Adolph von Odkolek of the Austrian Army and further developed by Lawrence Benet, the Chief Engineer at the Hotchkiss factory at St Denis, France, assisted by Henri Mercie. This mechanism was of great interest as it was an air cooled, gas operated, automatic mechanism and the patents for a water cooled, recoil operated machine gun operating mechanism were locked-up solid during this era by Hiram Maxim. There was a huge advantage to an air cooled, gas operating system for automatic weapons as the evasion of the Maxim-held patents would allow the Hotchkiss firm to take its place in sales and revenue along-side of the manufacturers of the water cooled, recoil operated guns which were pre-eminent at the turn of the century.
- the first Hotchkiss machine gun adopted for service by France was the Model 1900, heavy machine gun, followed by the Hotchkiss Model 1909 Benet-Mercie light machine gun, followed by a slightly altered/modified version of the same machine gun during World War I known as the Hotchkiss Model 1914 heavy machine gun.
- this machine gun proved to be a great success in the era 1900 to 1914 and during World War I, eventually being adopted by France, Great Britain, Japan, Norway,Spain, China and the United States of America.

Notes

Make

- make is not marked on the firearm.

Model

- the Hotchkiss, Benet-Mercie Machine Gun, Model 1909, differs from the normal Hotchkiss machine gun visually, as it is the only one of the early Hotchkiss designs that has a shoulder stock.
- the model name is not usually found marked on the firearm.
- the Hotchkiss, Benet-Mercie Machine Gun, Model 1909 strongly resembles a Hotchkiss, Heavy Machine Gun, Model 1900 and/or the Hotchkiss, Heavy Machine Gun, Model 1914.
- the Hotchkiss, Benet-Mercie Machine Gun, Model 1909, has a simplified mechanism having only 25 component parts, with the feed mechanism feeding the feed strip up-side-down to the method of feed utilized by the other Hotchkiss machine gun models.
- features include: steel receiver/frame, the barrel has five large, round cooling fins located at the rear of the barrel, the gas system is located under the barrel, feed is accomplished by the traditional Hotchkiss feed strip only.
- this machine gun has a buttstock, adjustable rear peep sight, the safety and selector are located at the end of the bolt handle, and the gun may be found mounted on a bipod or tripod.
- the Hotchkiss, Benet-Mercie (Light) Machine Gun, Model 1909 was adopted by the armed forces of both France & United States of America in 1910.
- remained in United States military service until 1917.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- " ANCIENS ETABLISSMENTs NAGANT / LIEGE " is marked on the left side of the receiver/frame.
- Hotchkiss, Benet-Mercie (Light) Machine Gun, Model 1909 was manufactured in the U.S.A. by Colt, Belgium by Nagant, England by Royal Small Arms Factory Enfield (RSAF[E]) and the French national arsenals of St Etienne and Chatellerault as well as Hotchkiss et Cie.
- Emile & (Henri) Leon Nagant (Fabrique d'Armes Em. et L. Nagant) was a Belgium gunmaker located in Liege between 1859 and 1896.
- Leon Nagant (L. Nagant & Cie) was a Belgium gunmaker between 1896 and 1903.
- Nagant Freres (Fabrique d'Armes et d'Automobiles Nagant Freres) (Charles & Maurice Nagant) was a Belgium gunmaker between 1903 and 1935.

Type

- air cooled, gas operated, light machine gun.

Action

- no longer capable of full automatic fire.

Serial Number

- the serial number may be found located on the rear left side of the receiver/frame on some firearms.
- serial number rationalization unknown.
- observed specimen serial number consisted of five digits without prefix or suffix.

Shots

- utilizes a feed strip similar to the one employed by the Hotchkiss, Heavy Machine Gun, Model 1900 and/or the Hotchkiss, Heavy Machine Gun, Model 1914.
- feeds from the right side and up-side-down to the method utilized by the Hotchkiss, Heavy Machine Gun, Model 1900 and/or the Hotchkiss, Heavy Machine Gun, Model 1914.

Canadian Law Comments

- is of the "metallic strip" type, is not a reproduction and was originally designed or manufactured for use in conjunction with the firearm known as the Hotchkiss machine-gun, Model 1895 or Model 1897, or any variant or modified version of it, including the Hotchkiss machine-gun model 1900, Model 1909, Model 1914 and Model 1917 and the Hotchkiss Model (Enfield) Number 2, Mark I and Mark I*:
- is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

Remarks

- the Hotchkiss machine gun was developed from 1893 to 1900. It was based on a mechanism developed by Captain, Baron Adolph von Odkolek of the Austrian Army and further developed by Lawrence Benet, the Chief Engineer at the Hotchkiss factory at St Denis, France, assisted by Henri Mercie. Notes

Make

- Benjamin B. Hotchkiss designed this bolt action rifle and sold the rights to Winchester in 1877.
- Hotchkiss designed rifles appeared on the market in 1883.
- Hotchkiss design was manufactured as a carbine, musket, sporter/sporting rifle, U.S. Army carbine, U.S. Army rifle, U.S. Navy carbine and U.S. Navy Rifle.
- Hotchkiss design was manufactured primary by Winchester, but also by the U.S. Springfield Armory.

Model

- model designation at serial numbers >16,000, third model guns may have 'Model of 1883" after the receiver/frame - marking: Sporting Rifle
- manufactured from 1879 to 1899.
- features include: magazine in the butt loaded from the top of the receiver/frame; leaf rear and blade front sights; round or octagonal barrel; straight or pistol grip stock with fluted forearm;

first variation: one piece stock with circular cut-off device on the right side above the trigger guard;
second variation: safety on the left side of the receiver/frame; magazine cut-off device on the top right side behind bolt handle;
third variation: two piece stock with exposed receiver/frame.

Manufacturer

- manufacturer's name is marked on the barrel or side of the receiver/frame.

Serial Number

- serial number range from 1 up to 84555.
- serial number may be marked on the top left side of receiver/frame or underside of receiver/frame, in front of trigger guard.

Shots

- tubular magazine located in the butt stock.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- may be marked on the left side of the receiver/frame as:
"MANUFACTURED BY THE WINCHESTER REPEATING ARMS CO."
"NEW HAVEN CONN. U.S.A."
"PATENTED OCT 16, 1863, JUNE 18, 1863. JUNE 25, 1872. JULY 23, 1878"
"AND UNDER B. HOTCHKISS' PAT'S AUG. 17, 1869"
"FEB. 15, 1870, NOV. 9, 1875, NOV. 14, 1876, JAN. 23, 1877", or on the lower tang as:
"PAT. OCT.16. 1860. JUNE 25. 1872. JULY 23, 1878"
"<AND UNDER B.B. HOTCHKISS' PATS. AUG 17. 1869>"

Model

- this model was originally known as the "MARK 1" in 1926 the British changed the model designation to "Gun, Machine, Hotchkiss, No 2 MARK 1".
- the first Hotchkiss machine gun adopted for service by France was the Model 1900, heavy machine gun, followed by the Hotchkiss Model 1909 Benet-Mercie light machine gun, followed by a slightly altered/modified version of the same machine gun during World War I known as the Hotchkiss Model 1914 heavy machine gun.
- the No 2 MARK 1 is basically a British copy of the Hotchkiss Model 1909 Benet-Mercie light machine gun, AKA "Mle. 09" or "Modele 1909" machine gun as manufactured by Hotchkiss and fitted with a wooden butt stock and a bipod; take note that this machine gun may also be mounted on a tripod.
- introduced in 1916.
- the No 2 MARK 1 feeds from the standard 30 shot metal strip only. This being the only difference between the No 2 MARK 1 and the No 2 MARK 1*. The No 2 MARK 1* use's both, the 30 round metal strip and a metal belt consisting of three round strips that are hinged together to form the belt.

Manufacturer

- the British purchased the rights to manufacture the Hotchkiss in Britain at their Ordnance Factory located at Enfield Lock.

Type

- air cooled, gas operated, light machine gun.

Action

- no longer capable of full automatic fire.

Serial Number

- the serial number may be found located on the rear left side of the receiver/frame on some firearms.
- serial number rationalization unknown.
- observed specimen serial number consisted of five digits without prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- the 30 round shot capacities are by means of a "metallic strip" feed device.

Canadian Law Comments

- is of the "metallic strip" type, is not a reproduction and was originally designed or manufactured for use in conjunction with the firearm known as the Hotchkiss machine-gun, Model 1895 or Model 1897, or any variant or modified version of it, including the Hotchkiss machine-gun model 1900, Model 1909, Model 1914 and Model 1917 and the Hotchkiss Model (Enfield) Number 2, Mark I and Mark I*:
- is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
- For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".

Remarks

- the Hotchkiss machine gun was developed from 1893 to 1900. It was based on a mechanism developed by Captain, Baron Adolph von Odkolek of the Austrian Army and further developed by Lawrence Benet, the Chief Engineer at the Hotchkiss factory at St Denis, France, assisted by Henri Mercie. This mechanism was of great interest as it was an air cooled, gas operated, automatic mechanism and the patents for a water cooled, recoil operated machine gun operating mechanism were locked-up solid during this era by Hiram Maxim. There was a huge advantage to an air cooled, gas operating system for automatic weapons as the evasion of the Maxim-held patents would allow the Hotchkiss firm to take its place in sales and revenue along-side of the manufacturers of the water cooled, recoil operated guns which were pre-eminent at the turn of the century.
- the first Hotchkiss machine gun adopted for service by France was the Model 1900, heavy machine gun, followed by the Hotchkiss Model 1909 Benet-Mercie light machine gun, followed by a slightly altered/modified version of the same machine gun during World War I known as the Hotchkiss Model 1914 heavy machine gun.
- this machine gun proved to be a great success in the era 1900 to 1914 and during World War I, eventually being adopted by France, Great Britain, Japan, Norway,Spain, China and the United States of America.

Level:	Manufacturer Specifications and Commercial Customization
Type:	Cannon
Action:	Other
Country of Manufacturer:	FRANCE
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
159866 - 1	37X94R	N/A	740	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Hotchkiss" is marked on the firearm.

Model

- "Revolving Cannon" is not marked on the firearm; this is a descriptor of the firearm type. These cannon were sold under a variety of "year" names, depending on the calibre and mounting, and that "year" designation may or may not be found marked on the cannon.
- this is an example of the revolving cannon patented by Benjamin Hotchkiss in 1871, and which was widely used around the world, as both a form of light artillery on land, and as a defence against fast motor torpedo boats at sea. Depending on the intended use, explosive, armour-piercing, tracer, and shrapnel shells could be used. Hotchkiss eventually produced versions of these cannon in 37mm, 47mm, and 57mm, with all versions functioning the same way.
- this cannon operates as a repeating firearm by rotating a crank handle, which causes a cluster of five barrels to rotate (with intermittent pauses to allow for cartridges to be fired, extracted, loaded, and chambered at each station). The gunner would aim with the left hand, and crank the operating handle with the right hand; some versions of this cannon were fitted with vertical shoulder-boards, allowing the gunner to aim by leaning his weight into the cannon. These cannon were made obsolete by the introduction of fast-firing automatic types, such as the Maxim 1-pounder ("pom-pom").
- features usually include: a barrel cluster of five barrels inside an iron or bronze framework; a brass housing at the rear of the cannon, with a lid that flips down to allow access to the firing-pin spring (mounted on the inside of the lid) and the other internals; a right-side operating crank (that may be mounted perpendicularly or at an angle to the cannon, depending on the particular version); open adjustable "ladder"-style sights; and a "hopper"-style feed chute that is replenished by an assistant gunner during operation.

Manufacturer

- "Hotchkiss" is marked on the firearm.

Action

- manually operated revolving cannon, in the manner of a "Gatling" gun.

Serial Number

- serial numbered on the receiver/frame or mount with an identification plaque.

Notes

Make
- may or may not be marked on the left side of the receiver/frame.

Model
- model designation may or may not be marked on the firearm.
- first introduced as a semi-automatic firearm and shortly after it was produced in a version capable of full-automatic fire in 1949.
- this firearm has some unique features that make it capable of folding or collapsing, which make the firearm very compact, that may help to identify it.
- barrel telescopes into the receiver.
- magazine and magazine housing fold under the receiver.
- under folding metal stock.

Manufacturer
- may be marked on the left side of the receiver/frame.

Action
- blowback operated.

Serial Number
- examples observed are marked on the left side of the receiver/frame.

Shots
- detachable box magazines.

Notes

Make

- "Howa" is marked on the left side of the receiver/frame and on the right side of the barrel.

Model

- this is a generic entry for the Howa "1500" series; other records exist which will better descibe the firearm being identified.
- "Howa Model 1500 / Made in Japan" is marked on the left side of the receiver/frame.
- "Made By Howa / In Japan" is marked on the right side of the barrel.
- features include: hammer forged barrel; forged receiver/frame and bolt; blued or stainless steel construction/finish; receiver/frame is drilled and tapped for scope mounting; available with standard or heavy barrel profiles; available with either a checkered laminated, walnut or synthetic stock; adjustable trigger; cocking indicator at rear of bolt; fitted recoil pad; safety lever is mounted on the right hand side of the receiver/frame behind the bolt handle;hinged magazine floorplate with release latch mounted inside the trigger guard.
- also available as a barreled action only.

Manufacturer

- "Howa" is marked on both the receiver/frame and the barrel assembly.

Action

- turn bolt operated.

Serial Number

- serial numbers was observed marked on the right side of the receiver/frame.
-observed serial numbers consisted of a letter "B" prefix and six numbers.

Calibre

- calibre designations are marked on the left side of the barrel.

Shots

- intergral box magazine with hinged floorplate.
- some variants were imported into Canada with provision for a detachable box magazine.

Importer

- Importer/Distributor marks may be stamped on the barrel or receiver/frame of the firearm.

Remarks

- a series of models based on the Howa 1500 have been produced and marketed with model names reflecting thier envisioned sporting use.
- Howa manufactures both long and short actions appropriate to cartridge case lengths for magnum and non-magnum cartridges; no model differentiation is made by the manufacturer soley on this basis.

Notes

Make

- "Howa" is marked on the left side of the receiver/frame and on the right side of the barrel.

Model

- "Howa Model 1500" over "MADE IN JAPAN, IMPORTED BY LSI, RENO, NEVADA" was observed marked on the left side of the receiver/frame.
- introduced in 2007.
- features include: free-floating heavy barrel; forged steel receiver/frame with scope rail; three position safety; Knoxx adjustable aluminum or synthetic black or camo stock with recoil suppression and rubber butt plate.
- combo version with a scope and ring matching the firearm and stock finish.
- also a bipod is available.
- this rifle differs from the "1500 Talon" in that the "1500 Axiom" has a vertical pistol-grip stock with recoil-compensation, while the "1500 Talon" has a "frame"-style thumbhole pistol-grip stock with recoil compensation.

Manufacturer

- "Howa" is marked on the receiver/frame and the barrel assembly.

Action

- turn bolt operated.

Serial Number

- serial number is marked on the side of the receiver/frame.
- observed serial number consisted of a letter prefix and six numbers.

Calibre

- calibre is marked on the right side of the barrel.

Shots

- internal box magazine with front hinged floor plate.

Notes

Make

- "Howa" may be marked on the left side of the receiver/frame.

Model

- "Howa Model 1500 / Made in Japan, imported by Legacgy Sports, Reno, NY" may be marked on the left side of the receiver/frame.
- "HCR" stands for "Howa Chassis Rifle".
- features include: hammer forged barrel which may be threaded at the muzzle; available with standard or heavy barrel profiles; forged steel receiver/frame and bolt in black finish; accessory rail mounted above receiver/frame; cocking indicator at rear of bolt; safety lever is mounted on the right hand side of the receiver/frame behind the bolt handle; aluminum chassis available in black or camouflage finish; adjustable trigger; polymer pistol grip; polymer buttstock with adjustable length of pull and comb.
- overall length with a 610mm (24") barrel is 1092mm (43"), average weight is 4.62 kgs (10.2lbs).

Manufacturer

- "Howa" may be marked on the left side of the receiver/frame.

Action

- turn-bolt design.

Serial Number

- serial number may be marked on the right side of the receiver/frame.
- observed serial numbers consisted of a letter "B" prefix and six numbers.

Calibre

- rifling characteristics in 223 REM: 1 turn in 9 inches.
- rifling characteristics in 243 WIN: 1 turn in 10 inches.
- rifling characteristics in 6.5MM Creedmoor: 1 turn in 8 inches.
- rifling characteristics in 308 WIN: 1 turn in 10 inches.

58938 - 5	38 S&W	5	127	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- Either "Howard Arms Co" or "FOR .38 (or .32) SMITH & WESSON CTGS." appears on the top of the barrel.
- Howard Arms appears to be a tradename used by Fred Biffar Co. of Chicago on firearms they contracted various manufacturers to produce.

Model

- "Secret Service Special" usually appears on the left side of the barrel.
- features include: top break; double action; auto-ejecting; blued or nickel finish; ribbed barrel; fixed sights; exposed hammer or hammerless.
- "Secret Service Special" revolvers produced by Harrington & Richardson are distinguished by a pin (not a screw) which secures the front of the trigger guard, a frame mounted firing pin and a conventional front sight (semi-circle when viewed from the side).
- manufactured during the early 1900s.
- "Secret Service Special" was a trade brand/name on revolvers sold by Fred Biffar Company of Chicago, Illionois, U.S.A.
- "Secret Service Special" revolvers were manufactured in North America by Harrington & Richardson Arms Company, Hopkins & Allen Firearms Company, Iver Johnson's Arms & Cycle Works, and Meriden Arms Company.
- "SSS" monogram inside a circle is usually moulded into the grip plates.
- "SSS" is the abbreviation for "Secret Service Special".

- Either "Howard Arms Co" or "FOR .38 (or .32) SMITH & WESSON CTGS." appears on the top of the barrel.
- Howard Arms appears to be a tradename used by Fred Biffar Co. of Chicago on firearms they contracted various manufacturers to produce.

Model

- features include: top break; double action; auto-ejecting; blued or nickel finish; ribbed barrel; fixed sights; exposed hammer
- "Secret Service Special" revolvers produced by Iver Johnson are distinguished by the presence of a screw coming down through the frame to secure the front of the trigger guard and a frame mounted firing pin. Those produced circa 1917 have a safety on the right side just above the grip. The second series produced circa 1923 lacked this safety.
- "Secret Service Special" was a trade brand/name on revolvers sold by Fred Biffar Company of Chicago, Illionois, U.S.A.
- "Secret Service Special" revolvers were manufactured in North America by Harrington & Richardson Arms Company, Hopkins & Allen Firearms Company, Iver Johnson's Arms & Cycle Works, and Meriden Arms Company.
- "SSS" monogram inside a circle is usually moulded into the grip plates.
- "SSS" is the abbreviation for "Secret Service Special".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer - manufacturer is usually not marked on the firearm.

Serial Number - should be located on the under side of the top strap, trigger guard and left grip strap.

Notes

Make

- "HOWARD ARMS CO." and "CHICAGO. U.S.A." is marked on the top of the barrel rib.
- "HOWARD ARMS CO." is a trade name used on single and double barrel shotguns sold by Fred Biffar & Company and manufactured by the Crescent Arms Company.
- "HOWARD ARMS CO." is a trade name used on double action top break revolvers sold by Fred Biffar & Company and manufactured by the Meriden Firearms Company.
- Fred Biffar & Company was located in Chicago and Oak Park, Illinois, U.S.A. between 1895 and 1930.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured during the early 1900s.
- "SECRET SERVICE SPECIAL" is usually marked on the left side of the barrel.
- features include: fixed sights; round rifled barrel with solid top rib; front hinged receiver/frame with a fluted cylinder and with the break open release mounted on the top strap; automatic ejection; hammerless or exposed hammer; double/single action or double action only trigger mechanism; checkered grip plates; blued or nickel finish.
- "Secret Service Special" revolvers produced by Meriden are distinguished by a frame mounted firing pin and a front sight that had the front and rear ends turned up in a scroll pattern.
- "Secret Service Special" was a trade brand/name on revolvers sold by Fred Biffar Company of Chicago, Illinois, U.S.A.
- "Secret Service Special" revolvers were manufactured in North America by Harrington & Richardson Arms Company, Hopkins & Allen Firearms Company, Iver Johnson's Arms & Cycle Works, and Meriden Arms Company.
- "SSS" monogram inside a circle is usually moulded into the grip plates.
- "SSS" is the abbreviation for "Secret Service Special".

Serial Number

- serial number is marked on the bottom of the grip strap of the receiver/frame.
- observed serial number consisted of six numbers without a letter prefix or suffix.

Make

- "RJ HOWLAND" is usually marked on the firearm.
- Rufus J. Howland was a gunsmith, based in New York and Pennsylvania, known for his percussion target and hunting guns between 1840 and 1890.

Model

- the model is not marked on the firearm; this is a description of the firearm type.
- this is a side by side percussion double rifle manufactured by Rufus J. Howland prior to 1890.
- features include: browned or blued finish; open fixed or adjustable sights (examples known with adjustable tang peep sights); under barrel ramrod thimbles; half-length straight-grip maple or walnut stock with brass or German silver finishings (may include patch box); external manually-cocked hammers; double triggers; finial trigger guard/grip strap; and a crescent butt.

Manufacturer

- "RJ HOWLAND" is usually marked on the firearm.
- Rufus J. Howland was a gunsmith, based in New York and Pennsylvania, known for his percussion target and hunting guns between 1840 and 1890.

Action

- side by side muzzle loaded percussion.

Notes

Make	- "HS Produkt" and/or the HS Produkt logo of an angular "HS" is marked on the firearm.
Model	- "HS-45ACP" is marked on the slide; do not confuse this pistol with the "HS45 Standard", which has identical slide markings, but no manual frame mounted safety. - this is a 45 calibre version of the "HS9" pistol, which is itself an upgraded version of the "HS2000" pistol. - features include: black, brown, or olive drab polymer receiver/frame with an integral light mounting rail; Bruniral (black) or stainless steel finished slide and cold hammer forged barrel; four mechanical safeties, trigger safety, firing pin safety, grip safety, and manual safety; loaded chamber indicator; ambidextrous magazine release; captive, dual recoil spring guide assembly; dovetailed three-dot sight system.
Manufacturer	- "HS Produkt" and/or the HS Produkt logo of an angular "HS" is marked on the firearm.
Action	- recoil operated.
Serial Number	- serial numbered on a plate inset into the bottom of the dust cover, in front of the trigger guard.
Shots	- detachable box magazine.

Notes

Make

- "HS" is marked on the left side of the slide.
- "HS" (Hrvatski Samokres) translates to "Croatian Pistol".

Model

- "HS", "HS 9", "HS 95" or variation thereof and "9 X 19" is marked on the side of the firearm.
- this firearm loosely resembles a Sig-Sauer P 229.
- approximately 500 were manufactured in 1995.
- this is a transition model based on an improved PHP model and the predecessor to the HS 2000 model.
- features include: blade dovetail front sight and a square notch dovetail rear sight; steel receiver/frame; hammer forged steel barrel; grooved trigger guard; ambidextrous, receiver/frame mounted combination slide release/decocking lever and magazine release; black synthetic grips;

Manufacturer

- manufacturer's name is not marked on the firearm.

Action

- short recoil operated.

Serial Number

- serial number is marked on the left side of the receiver/frame and the left side of the slide.

Calibre

- calibre is marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Notes

Make

- "HS Produkt" and/or the HS Produkt logo of an angular "HS" is marked on the firearm.

Model

- the model is marked on the firearm; "VHS" is an acronym for "Visenamjenska Hrvatska Strojnica"/"Multipurpose Croatian Automatic".
- this is a domestic Croatian-designed "bullpup"-style rifle that greatly resembles the French FAMAS, but with a variety of internal changes.
- features include: matte parkerized/phosphated metal finish; black synthetic "bullpup" receiver; a 22mm flash-hider (to allow the launching of standard rifle grenades); a ribbed barrel; multiple "Picatinny"-style mounting rails on the sides and bottom of the forearm; a FAMAS-style long carry handle/sight base, enclosing the side-folding cocking handle; a rotating safety/selector inside the front half of the trigger-guard; and an ejection port on the right side of the buttstock.
- made in carbine (VHS-K; 675mm OAL) and rifle (VHS-D; 765mm OAL) lengths.
- this rifle has since been replaced by the "VHS-2", which retains the same basic layout, but replaces the in-trigger-guard selector with a rotating ambidextrous selector above the trigger-guard, and has a reversable ejector to allow use by left-handed shooters.

Manufacturer

- "HS Produkt" and/or the HS Produkt logo of an angular "HS" is marked on the firearm.

Action

- gas-operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make

- The company logo is marked on the receiver/frame.
- "HUBEN" is marked on the right side of the receiver/frame.

Model

- "GK1" is marked on the right side of the receiver/frame.
- Features include: shrouded barrel; under-barrel air cylinder filled from the left side; fixed, self-indexing cylinder; left side magazine release lever, pressure gauge and thumb safety lever; hexagonal trigger guard; pressure adjustment screw located on the front of the grip under the trigger; ergonomic walnut grips.

Manufacturer

- The company logo is marked on the receiver/frame.
- "HUBEN" is marked on the right side of the receiver/frame.

Action

- Pre charged pneumatic.
- Manufacturer's referenced velocity for 22 PELLET is 274 mps (900 FPS).
- Manufacturers referenced velocity for 25 PELLET is 219 mps (720 FPS).
- Referenced velocity for Canadian version for 25 PELLET weighing 1.65 grams is 86.5 mps (284 FPS).

Serial Number

- The serial number is marked on the right side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- The calibre designation is marked on the right side of the receiver/frame.
Shots	- Fixed, self-indexing cylinder.
Canadian Law Comments	- At least two variants of this particular model exist: Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport. Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

Notes

Make

- "HUBEN" and the Huben logo of a cat-like dragon is marked on the air rifle.
- Huben is a Chinese manufacturer that specializes in producing PCP air guns for use in field, target and competition shooting.

Model

- "K1" may or may not be marked on the air rifle.
- this is a standard-pattern pre-charged pneumatic / PCP air rifle designed for hunting and field target competition.
- features include: "bullpup" configuration; blue/black anodized finish; no open sights; barrel shroud with integral suppressor; a synthetic or wooden thumbhole-style "bullpup"-style stock with integral valve assembly and adjustable power wheel in the butt; Picatinny rail for mounting sights; air-pressure gauge at the left rear of the receiver; a detachable 19 shot rotary disk magazine; rubber buttpad.

Manufacturer

- "HUBEN" and the Huben logo of a cat-like dragon is marked on the air rifle.
- Huben is a Chinese manufacturer that specializes in producing PCP air guns for use in field target and competition shooting.

Action

- precharged pneumatic/PCP air rifle.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Shots

- rotary disk magazine.

Canadian Law Comments

- as it left the factory, this firearm is equipped with an integral sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada.
- when the sound suppressor/silencer (prohibited device) is removed the firearm is correctly identified as a "Non Restricted Firearm".

Notes

Make

- Hubertus was a trade name used by I. Meffert of Suhl Germany and post-1945 by the firm of VEB Ernst Thalmann of East Germany.
- Hubertus was a trade-name used by VEB Ernst Thalmann to sell multi-barreled shotguns and combination guns that were produced in the Suhl area of Germany during the 1950's; these firearms were manufactured at one or more of the factories that had been privately-owned prior to World War II, but which had been assimilated by VEB Ernst Thalmann after the end of the war.

Model

- this is a classic pattern boxlock "drilling" combination gun, with Greener cross-bolt lock-up, double triggers, duraluminium receiver/frame, pistol grip stock, scroll pattern engraved on receiver/frame, barrel selector plug on left side of tang, and tang safety.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- Suhl firearms are made in Suhl, Germany, in an area that was famous for the quality of its guns prior to World War Two; after the occupation of Eastern Europe by the Communists, these factories continued manufacturing hunting and target firearms both for domestic use and for export.
Type	- drilling pattern (three-barrel gun), with two side by side shotgun barrels over a single-shot rifle barrel.
Action	- three barrels; two side by side shotgun barrels over a single rifle barrel.
Calibre	- made in 12 GA X 2 3/4" or 16 GA X 2 3/4" over 7X57R or 8X57JRS.

16390 - 2	22 PELLET	1	127	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "D.R.G.M HUBERTUS GERMANY" is usually marked on the left side of the grip-frame, above the trigger guard.
- "HUBERTUS" is a common name amongst European firearm and air gun manufacturers, derived from "Saint Hubertus", the patron saint of hunters.

Model

- the model is not marked on the air pistol; this is a descriptor of the type.
- this is a break-open single-shot pistol using an unusual style of cocking mechanism, made in Germany prior to World War Two, and retailed by numerous resellers throughout Europe.
- features include: blued or polished metal finish; round barrel with ribs at the muzzle (to allow the barrel to be pulled forward after cocking and loading); a cylindrical air chamber hinged at the front, allowing the chamber to be tipped up for loading, with a ribbed moving collar that serves to lock the chamber in it's lowered position; fixed open sights; wooden grips.
- this pistol is operated by pressing the barrel rearward into the air cylinder (to cock the mainspring), then pulling the air chamber collar rearward to tip the air chamber upwards, exposing the rear of the barrel and allowing a pellet to be loaded. After loading a pellet, the barrel is pulled forward, and the air chamber is tipped down and relocked with the air chamber collar, then the air pistol is ready to be fired.

Manufacturer

- "D.R.G.M HUBERTUS GERMANY" is usually marked on the left side of the grip-frame, above the trigger guard.

Action

- spring-piston design.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial-numbered on the left side of the grip-frame at the tang.

By the end of the 20th century the Hudson's Bay Company had evolved into a chain of retail stores throughout Canada.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "THE IMPERIAL No. 1" is marked on the barrel assembly.
- research indicates that the Imperial line of single and double barrel shotguns in both percussion and breech loading was introduced by the HBCo. circa 1896.
- "Imperial No 1" is a double barrel muzzle loading percussion or a breech loading top break shotgun.
- muzzle loading features include: round side by side smoothbore barrels with a bead front sight; ram rod mounted underneath the barrels; side locks with external hammers; double triggers; one piece checkered wood semi-pistol grip stock.
- breech loading features include: round side by side smoothbore barrels with a bead front sight; front hinged receiver/frame with top tang mounted break open lever; side locks with external hammers; double triggers; checkered wood forearm and semi-pistol grip buttstock.
- some references indicate that orders for percussion muzzle loading shotguns were placed by the HBCo. with the English gunmakers trade as late as 1920. The 1911 HBCo. catalog lists Imperial models of muzzle loading shotguns.
- British proofmarks are apparent on this firearm.

Action

- side by side barrel configuration, muzzle loading, percussion ignition.
- side by side barrel configuration.
- muzzle loading, fixed barrel or breech loading, hinged barrel design.

Serial Number

- serial number was observed marked on the rear tang of the trigger guard.
- observed serial number consisted of five numbers without a letter prefix or suffix

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "HUDSON'S BAY COMPANY" and "MADE IN ENGLAND" is usually marked on the lock plate.
- Hudson's Bay Company was a trading company that was granted a Royal Charter of Incorporation by King Charles II on the 2nd of May in 1670. This new company had exclusive trading rights to acquire goods, such as furs, in the Canadian northwest during the latter part of the 17th century. During the latter half of the 19th century operations of the Hudson's Bay Company began to shift from a focus on trading, to retail sales of goods and merchandise. By the end of the 20th century the Hudson's Bay Company had evolved into a chain of retail stores throughout Canada.

Model

- "THE IMPERIAL No 1", is marked on the barrel.
- research indicates that the Imperial line of single and double barrel shotguns in both percussion and breech loading was introduced by the HBCo. circa 1896.
- "Imperial No 1" is a muzzle loading percussion or a breech loading top break shotgun.
- muzzle loading features include: round smoothbore barrels with a bead front sight; ram rod mounted underneath the barrels; side locks with external hammers; single action trigger mechanism; one piece checkered wood semi-pistol grip stock.
- breech loading features include: round smoothbore barrels with a bead front sight; front hinged receiver/frame with top tang mounted break open lever; side locks with external hammers; single action trigger mechanism; checkered wood forearm and semi-pistol grip buttstock.
- some references indicate that orders for percussion muzzle loading shotguns were placed by the HBCo. with the English gunmakers trade as late as 1920. The 1911 HBCo. catalog lists Imperial models of muzzle loading shotguns.
- British proofmarks are apparent on this firearm.

Action

- muzzle loading, percussion ignition, fixed barrel design or breech loading, hinged barrel design.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Anitque" in Canada.

By the end of the 20th century the Hudson's Bay Company had evolved into a chain of retail stores throughout Canada.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "IMPERIAL No. 4" is marked on the top of the rib between the barrels.
- "Made in England" may be marked on the top of the rib between the barrels or on the side of the receiver/frame.
- manufactured between 1860 and 1900.
- this firearm represents a "trade pattern gun" made by Isaac Hollis & Sons of England under contract for the Hudson's Bay Company.
- "Imperial No 4" is a double barrel muzzle loading percussion or a breech loading top break shotgun.
- muzzle loading features include: round side by side smoothbore barrels with a bead front sight; ram rod mounted underneath the barrels; side locks with external hammers; double triggers; one piece checkered wood semi-pistol grip stock.
- breech loading features include: round side by side smoothbore barrels with a bead front sight; front hinged receiver/frame with top tang mounted break open lever; side locks with external hammers; double triggers; checkered wood forearm and semi-pistol grip buttstock.
- British proofmarks are apparent on the barrels and/or receiver/frame of this firearm.

Manufacturer

- the manufacturer's name may not be marked on the firearm.
- "Made in England" is marked on the firearm.
- Isaac Hollis & Sons manufactured handguns, rifles and shotguns and military firearms for the British Government from circa 1861 to circa 1955.
- Isaac Hollis & Sons had facilities in both Birmingham and London at the following locations 5-11 Weaman Row, Lench Street, London circa 1861; 44a Cannon Street, London circa 1870; 83 Cheapside, London circa 1871; 6 Great Winchester Street, London office circa 1884; 26 Billiter Building, London office circa 1892; 101 Leadenhall Street, London office circa 1899; 9 New Bond Street, London office circa 1903; 91-92 Lower Loveday Street, Birmingham factory circa 1911; 16-17 Loveday Street, Birmingham factory circa 1915; 54 Clerkenwell Road, London office circa 1920; and 84 Goswell Road, London office circa 1933.
- Isaac Hollis & Sons became a limited liability company circa 1876/1877.
- Isaac Hollis & Sons formed a joint venture with Bentley & Playfair, this company was known as Hollis, Bentley & Playfair circa 1911.
- "Issac Hollis & Sons" and "Hollis, Bentley & Playfair" also traded under their own names between 1911 and 1955.

Action

- side by side barrel configuration, hinged barrel design.

Serial Number

- serial number was observed marked on the watertable of the receiver/frame.
- observed serial number consisted of six numbers without a letter prefix or suffix

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

- model designation is marked on this firearm.
- model designation is derived from the characteristics of the firearm and the Rotary Bolt Patent design of the receiver/frame.
- "ROTARY BOLT.PAT 26088/09" is marked on the underside of the receiver/frame.
- "MADE IN ENGLAND" is marked on the rear left side of the barrel.
- this firearm features a distinctive receiver/frame design which has a right side mounted break open lever that actuates an elongated bolt to open the action; the bolt is encased on the right side of the receiver/frame at the standing breech.
- features include: round smoothbore barrel with a bead front sight; front hinged receiver/frame with a right side mounted break open lever; exposed centrally mounted spur hammer; single action trigger mechanism; wood forearm and semi-pistol grip buttstock; blued finish.
- British proofmarks are apparent on the barrel and receiver/frame of this firearm.

Action

- hinged barrel design.

Serial Number

- serial number was observed marked on the rear of the trigger tang.
- observed serial number consisted of four numbers without a letter prefix or suffix.

Notes

Make

- "ROBERT HUGHES & SONS" is marked on the top of the barrel.

Model

- model is not marked on the firearm.
- this is a top break revolver of Webley design.
- revolver based on Charles Pryse's 1876 patent for a locking mechanism for use on top break revolvers, involving a pair of spring-loaded arms on either side of the recoil shield that must be squeezed together to release the top of the frame, allowing the ejection of empty cases once the barrel is tipped down.
- features include: fixed sights; octagonal barrel; front hinged receiver/frame with fluted cylinder and automatic extractor; break open release levers; exposed spur hammer; double/single action trigger mechanism; one-piece checkered wooden grip and butt-cap with lanyard-ring; blued finish.

Manufacturer

- "ROBERT HUGHES & SONS" is marked on the top of the barrel.
- Robert Hughes was a gunmaker in Birmingham, England from 1855 to 1897.
- Robert Hughes factory was known as the "Universal Fire Arms Works".
- Universal Fire Arm Works was established in 1868.
- Robert Hughes business was renamed "Robert Hughes & Sons" in 1897.
- Robert Hughes & Sons was in business from 1897 to 1905.

Action

- hinged barrel design.

Serial Number

- a referenced example had no factory applied serial number.
- a referenced example had an applied serial number on the front grip strap.

Notes

Make - "HUGLU" logo and/or "HUGLU" or "HUGLU AV TUFEKLERI KOOPERATIFI" and "MADE IN TURKEY" are usually marked on the receiver/frame and/or barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- introduced in 1995.
- model designation may be marked on the firearm.
- features include: tapered, round, black plated, barrels with ventilated top rib and open side ribs; chromed smooth bore; fixed or interchangeable chokes; bead sight; extractor; engraved white or black plated front hinged box lock chromed receiver/frame with or without false side plates; hammerless; break opening lever and manual safety/selector are located on the upper rear tang; single trigger; checkered schnabel forearm and semi-pistol grip buttstock; sling swivels; butt plate and pistol grip cap.
- average weight is 3.2kg (7.04lbs).
- similar to the Huglu model 103CE which features an ejector.

Manufacturer

- "HUGLU" logo and/or "HUGLU" or "HUGLU AV TUFEKLERI KOOPERATIFI" and "MADE IN TURKEY" are usually marked on the receiver/frame and/or barrel.

Action

- over and under barrel configuration, hinged barrel design.

Calibre

- calibre designation may be marked on the barrel assembly.

Notes

Make - "HUGLU" logo and/or "HUGLU" or "HUGLU AV TUFEKLERI KOOPERATIFI" and "MADE IN TURKEY" are usually marked on the receiver/frame and/or barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- introduced in 1995.
- model designation may be marked on the firearm.
- features include: tapered, round, black plated barrels with ventilated top and side ribs; chromed smooth bore; fixed or interchangeable chokes; bead sight; extractor; engraved white or black plated front hinged box lock receiver/frame with or without false side plates; hammerless; break opening lever and manual safety/selector are located on the upper rear tang; single trigger; checkered, fluted or schnabel forearm and semi-pistol grip or straight English style buttstock; sling swivels; butt plate and pistol grip cap.
- average weight is 3.2kg (7.04lbs).
- similar to the Huglu model 103DE which features an ejector.

Manufacturer

- "HUGLU" logo and/or "HUGLU" or "HUGLU AV TUFEKLERI KOOPERATIFI" and "MADE IN TURKEY" are usually marked on the receiver/frame and/or barrel.

Action

- over and under barrel configuration, hinged barrel design.

Calibre

- calibre designation may be marked on the barrel assembly.

Notes

Make

- "HUGLU" logo and/or "HUGLU" or "HUGLU AV TUFEKLERI KOOPERATIFI" and "MADE IN TURKEY" are usually marked on the receiver/frame and/or barrel.

Model

- may be marked on the firearm.
- features include: blued round tapered barrels with a solid bottom rib and sunken or raised top rib; bead front sight; fixed or interchangeable chokes; engraved old silver or blued finish front hinged box lock receiver/frame; hammerless; break opening lever and manual safety lever are located on the upper rear tang; double trigger mechanism; checkered splinter style forearm and semi-pistol grip with cheekpiece buttstock; sling swivels.
- similar to the Huglu model 202B which features a semi-pistol grip buttstock without the cheekpiece.

Manufacturer

- "HUGLU" logo and/or "HUGLU" or "HUGLU AV TUFEKLERI KOOPERATIFI" and "MADE IN TURKEY" are usually marked on the receiver/frame and/or barrel.

Action

- side by side barrel configuration.

Serial Number

- serial number is usually marked on the water table.

Calibre

- calibre and chamber length are usually marked on the barrel.

Notes

Make

- "HUGLU" logo and/or "HUGLU" or "HUGLU AV TUFEKLERI KOOPERATIFI" and "MADE IN TURKEY" are usually marked on the receiver/frame and/or barrel.

Model

- may be marked on the firearm.
- features include: blued round tapered barrels with a solid bottom rib and sunken or raised top rib; bead front sight; fixed or interchangeable chokes; engraved old silver or blued finish front hinged box lock receiver/frame; hammerless; break opening lever and manual safety lever are located on the upper rear tang; double trigger mechanism; checkered splinter style forearm and semi-pistol grip buttstock; sling swivels.
- samples have been observed with a factory logo medallion on the buttstock.
- similar to the Huglu model 202A which features a semi-pistol grip buttstock with cheekpiece.

Manufacturer

- "HUGLU" logo and/or "HUGLU" or "HUGLU AV TUFEKLERI KOOPERATIFI" and "MADE IN TURKEY" are usually marked on the receiver/frame and/or barrel.

Action

- side by side barrel configuration.

Calibre

- calibre designation eg. "28 GA 2 3/4" was observed on the left side of the left barrel.
