Notes

Make

- "Italian Service" is not marked on the firearm.
- this revolver was adopted as an Italian Service sidearm.

Model

- the "Bodeo" in the model designation is in reference to the name of the man who headed the commision that recommended the adoption of this model.
- this model was adopted into Italian service in 1891, although the Italians adopted a new design in 1910.
- the 1889 Bodeo was never declared obsolete and remained in service until the end of World War II. During World War I these firearms were produced in Spain under Italian contract.
- this model was available in three different configurations, one version had a folding trigger with no guard with octagonal barrel (De Trup or Trooper - for issue to enlisted men), another had a conventional trigger protected by a guard with an octagonal barrel (Du Officiali - or Officer's Model) and one was introduced circa 1920 (Alleggerito - or Light Weight Model), differing from all previous models by having a round barrel.
- this model was loaded by a loading gate on the right side that rotates rearward.

Manufacturer

- "Antonio Errasti" was a handgun manufacturer located in Eibar, Spain from approximately 1900 to 1936.
- "AE" is the abbreviation for "Antonio Errasti".

Serial Number

- usually marked on the right side of the receiver/frame, may have alpha prefix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Firearm Reference Number (FRN): 137777
Make: Italian Service
Model: 1889 Bodeo

Summary

Make:	Italian Service
Model:	1889 Bodeo
Manufacturer:	Mida Gia Castelli
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	ITALY
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
137777 - 1	10.4MM ITALIAN REV	6	115	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Italian Service" is not marked on the firearm.
- this revolver was adopted as an Italian Service sidearm.

Model

- this model was adopted into Italian service in 1891, although the Italians adopted a new design in 1910.
- the 1889 Bodeo was never declared obsolete and remained in service until the end of World War II.
- the "Bodeo" in the model designation is in reference to the name of the man who headed the commision that recommended the adoption of this model.
- this model was available in 3 different configurations, one version had a folding trigger with no guard with octagonal barrel (De Trup or Trooper - for issue enlisted men), another had a conventional trigger protected by a guard with an octagonal barrel (Du Officiali - or Officer's Model) and one was introduced circa 1920 (Alleggerito - or Light Weight Model), differing from all previous models by having a round barrel.
- this model was loaded by a loading gate on the right side that rotates rearward.
- this model firearm was manufactured continuously from adoption in 1891 to the mid 1920's. Most revolvers are dated on the receiver/frame, left side forward of the cylinder.

Manufacturer

- "MIDA" over "GIA" over "CASTELLI" over "the manufacture date" over "BRESCIA" is usually marked on left side of receiver/frame.
- "MIDA GIA CASTELLI" (Manifattura Italiana d'Armi) was formerly Castelli of Brescia.
- "MIDA GIA CASTELLI" was founded in 1917.
- "MIDA GIA CASTELLI" manufactured Mannlicher-Carcano rifles and carbines and Italian Service revolvers for the Wartime Italian Army.
- "MIDA GIA CASTELLI" ceased military production in 1919.

Serial Number

- serial number is usually marked on the right side of the receiver/frame.
- observed serial number consisted of a letter prefix and four or five numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make

- Italian Service is not marked on the firearm.
- Italian Service, the make is derived from the fact that this handgun was adopted as the official Italian service sidearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "1889 Bodeo" is not marked on this firearm.
- "1889" is the year that this handgun was officially adopted by the Italian Army.
- "Bodeo" in the model designation is in reference to the name of the man who headed the commision that recommended the adoption of this model.
- 1889 Bodeo went into Italian service in 1891; the Italians adopted a new design in 1910.
- 1889 Bodeo was never declared obsolete and remained in service until the end of World War II.
- 1889 Bodeo was manufactured continuously from adoption in 1891 to the mid-1920's. These revolvers are usually dated on the rear right side of the receiver/frame, underneath the serial number.
- features include: octagonal barrel; solid top receiver/frame with fluted cylinder and loading gate located on right rear of standing breech, the loading gate pivots to the rear; ejector rod is housed within the cylinder axis pin underneath the barrel and swivels to the right to eject empty casings; exposed rebounding-type hammer; single/double action trigger mechanism; may have a folding trigger with no trigger guard or a conventional trigger with guard; lanyard ring on the bottom of the butt grip; checkered wood grips; blued finish.
- the left lockplate on this firearm is usually held in place by a screw with an external lever and is mounted on the rear left side of the receiver/frame above the left grip plate, revolving this lever allows the lock plate to be removed thereby exposing the lockwork for cleaning or repairs.
- this model was available in three different configurations; one version had a folding trigger with no guard with octagonal barrel (De Trup or Trooper - for issue to enlisted men); a second version had a conventional trigger protected by a guard with an octagonal barrel (Du Officiali - or Officer's Model); the third version was introduced circa 1920 (Alleggerito - or Light Weight Model), differing from all previous models by having a round barrel.

Manufacturer

- "SFARE" over "GVT" in an oval surmounted by a crown was observed mark on the left side of the receiver/frame in front of the cylinder.
- "SFARE" over "GVT" was the logo used by Sezzione Fabbrica d'Armi del Regio Esercito in Gardone Val Trompia, Italy (Section of the Royal Army's Weapons Factory in Gardone Val Trompia).

Serial Number

- serial number was observed marked on the rear right side of the receiver/frame above the year of manufacture, ie: 1926.
- observed serial numbers consisted of a two letter prefix and four numbers.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Other Markings

- observed example was marked with a crown or the letters "RE"; these letters stands for "Regio esercito" in Italian which translates into English as Italian Royal Army.

Manufacturer

- "TOSCHI" over rampant lion over "CASTELLI" over "BRESCIA" over the manufacture date, is marked on the right side of the receiver frame.
- Toschi & Castelli of Brescia, Italy manufactured the model 1889 Bodelo from 1911 to 1916.
- Toschi & Castelli was a company formed by the partnership of Giuseppi Toschi and G.A. Castelli circa 1900.

Serial Number

- serial number is marked on the right side of the receiver/frame
- observed sample had alpha prefix followed by four numbers
- observed sample did not have a letter prefix and consisted of four numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - calibre is usually marked on the barrel.

Other Markings - possible regimental markings: A crowned shield with a cross on the inside of the shield, stamped under the serial number and "R. Guardia Di Finan" stamped above the trigger guard.
- may have "HEGE" marked on the firearm and German proof marks.

122665 - 4	9MM LUGER	40	292	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is not marked on the firearm.

Model

- the model designation is marked on the firearm.
- the OG 44 was designed in 1944 as an easy-to-manufacture submachine gun for the Italian military, then fighting a losing war against the Allied forces; although the OG 44 was never produced on a large scale, it showed considerable forethought in its design, and many of its features were later copied in other designs.
- the model designation represents the reversed initials of the designer, Giovanni Oliani, and the year of manufacture.
- features include: stamped and welded construction, with a minimum of machining required; "overhanging bolt" layout, with the upper part of the bolt extending forward over the barrel and chamber (resembling the Franchi LF-57); ventilated shroud surrounding the barrel; and the rear of the pistol-grip is hinged so as to fold-down, allowing the internal components (bolt, springs, barrel) to be removed for cleaning and lubrication; the recoil-spring guide also serves as a cleaning-rod, with an eyelet inletted through one end. Versions of this submachine gun were produced with both solid wooden and stamped metal under-folding stocks.
- because Italy was overrun fairly soon after this design was finalized, it was never put into large-scale production.

Manufacturer

- the manufacturer is marked on the firearm AS "ARMAGUERRA - CREMONA".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- blowback operated.
Serial Number	- numbered on the frame/receiver.
Shots	- detachable box magazine. - most versions of this firearm use Beretta Model 12 magazines.

Notes

Make

- "Ithaca Gun Co., Inc., Ithaca, N.Y." may be marked on the barrel, or "Ithaca Gun Company" may be marked on the side of the receiver/frame.

Model

- "MODEL - 37" is marked on the barrel.
- introduced in 1937 by Ithaca Gun Company, Incorporated as the model "37".
- "37" model was later renamed the model "37 Featherlight" in 1939.
- "37" model was manufactured by Ithaca Gun Company LLC from 1996 to 2005.
- "37" model has been manufactured since 2007 by Ithaca Gun Company of Upper Sandusky, Ohio.
- this is a takedown hammerless pump action repeating shotgun with right or left hand safety.
- smoothbore barrel available with different chokes, in several different lengths.
- roll-stamped or engraved receiver depending on grade: most models are roll-stamp marked on the receiver depicting three ducks in a marsh setting, and a bird dog with two rising ringneck pheasants.
- hardwood stock available in various finishes; some firearms made in the 1950-60 have grooved slide handles, plain or checkered pistol grips.
- hardware blued, parkerized or chromed, smooth bore barrel with or without a rib and shotgun bead, or rifled with rifle type open sights.
- Ithaca also produced several high grade model 37's, sometimes referred to as "37 $1000 Grade" to "37 $5000 Grade" depending on the amount of embellishing.
- this record is ONLY for those Model 37s with steel receivers and with 2 3/4" chambers; shotguns with aluminium receivers are known as the model "37 Ultralight", and shotguns chambered for 3" shells are known as the model "37 Magnum".

Action

- slide action.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the right side of the receiver/frame of stock model 37s.
- serial number is marked on the FRONT of the receiver/frame on models 37R, 37S, or 37T.
- model 37shotguns with a letter prefix or suffix of "MAG" denotes a model "37 Magnum"," ULT" denotes "Ultralight" series," USA" denotes model "37 Bicentennial Commemorative"," DU" in a serial number denotes a "Ducks Unlimited" variant, these variants all have their own FRT record.
- later production used a prefix of "371" in the serial number.
- those examples with an 'M37" prefix are correctly identified as manufactured by Ithaca Gun Company, LLC in 1996 and 1997.
- NOTE: do not confuse patent number "1849982" with a serial number, this patent number is marked on the barrel.

Calibre

- the gauge and chamber length are marked on the barrel.
- the Ithaca Model 37 and 37 Featherlight were manufactured with 2 3/4" chambers only.
- 3" chambers were introduced with the model "37 Magnum", these will be found in the model 37 Magnum entry.

Shots

- this model feeds from a fixed underbarrel tubular magazine.
- may be plugged to 3 shots total capacity for hunting under the Migratory Birds Regulation.
- though Ithaca advertised Model 37s as having a five-shot capacity, this includes a round in the chamber; the actual capacity of the tube magazine is FOUR rounds.
- some specific model variations were supplied with a SEVEN shot, full-length magazine.

Other Markings

- barrel markings:
"ITHACA GUN CO. INC., ITHACA N.Y. - PATENT NO. 1849982 - MODEL-37" and
"12 GA or 20 GA - 2 3/4 CHAMBER - MADE IN U.S.A."

Notes

Make

- "ITHACA GUN CO. LLC" is marked on the barrel.

Model

- manufactured from 1996 to 2005.
- this is a generic record for the Ithaca model 37, as built by the Ithaca Gun Company, LLC.
- these shotguns were all based on the 37 Magnum receiver/frame.
- "M37" was marked on the right side of the receiver/frame as the serial number prefix in 1996 and 1997
- "Model 37" or "M37" is marked on the barrel.
- receiver/frame is roll-marked with the standard Ithaca scene of three rising mallards on one side, and a retriever and two pheasant on the other side.
- these shotguns are available with straight or pistol-grip walnut stocks, "ringtail" or beavertail forearms, fixed or screw-in chokes, blued or camouflage-painted finishes, and barrels with rifle-sights (rifle-sighted variations available in both smooth and rifled barrels).

Manufacturer

- "ITHACA GUN CO. LLC, KING FERRY, NY" and "MADE IN USA" is marked on the barrel.

Serial Number

- serial number is marked on the right side of the receiver/frame.
- observed serial number consisted of a "M37" prefix and six numbers.
- serial number range in 1996 and 1997 was from M37000001 to M37007300.
- serial number range (1998 to 2005) was from 370007312 to 370026272.

Shots

- tubular magazine is mounted under the barrel.

Make: Ithaca
Model: 37 Bear Stopper

Summary

Make:	Ithaca
Model:	37 Bear Stopper
Manufacturer:	Ithaca
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Pump Action
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
32491 - 3	12 GA X 2 3/4"	4	470	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
32491 - 4	12 GA X 2 3/4"	7	508	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- marked on the barrel.

Model

- manufactured circa 1982.
- on barrel, Model 37.
- this is a short-barreled version of the Model 37 sold as a easy-to-carry self-defense shotgun for hunters, campers, fishermen, etc.
- black synthetic pistol-grip and forearm, available in Parkerized or chrome finishes, safety at rear of trigger-guard, and sling swivels.

Action

- bottom load and ejection.

Serial Number

- stock model 37s will be serial-numbered on the right side of the receiver/frame; shotguns numbered on the FRONT of the receiver will be model 37Rs, 37Ss, or 37Ts.
- model 37shotguns with a letter prefix or suffix of "MAG" denotes a model "37 Magnum"," ULT" denotes "Ultralight" series," USA" denotes model "37 Bicentennial Commerorative"," DU" in a serial number denotes a "Ducks Unlimited" variant, these variants all have their own FRT record.
- later production used a prefix of "371" in the serial number.
- those examples with an 'M37" prefix are correctly identified as the model "M37".

Barrel

- these shotguns left the factory with 18.5"/470mm and 20"/508mm barrels, but will accept any other Model 37 barrel.

Shots

- though Ithaca advertised Model 37s as having a five-shot capacity, this includes a round in the chamber; the actual capacity of the tube magazine is FOUR rounds, unless increased to SEVEN with a full-length magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - barrel markings read, "37 Featherlight, 12 Gauge, 2 3/4 Chamber Proof Tested. Ithaca Arms Co. Inc, Ithaca NY".

Notes

Make - "ITHACA GUN CO. LLC, KING FERRY, NY" and "MADE IN USA" is marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured from 1998 to 2005.
- this is a new-production version of the Ithaca Model 37, only produced by the Ithaca Gun Company LLC, and manufactured with a long receiver capable of handling 3" shells
- walnut pistol-grip stock and "ringtail" forearm (with deep grooves running around the forearm, perpendicular to the barrel), ventilated rubber "sunburst" recoil pad, ventilated rib, screw-in interchangeable choke tubes, and gold-plated trigger and action release.
- "Model 37" or "M37" is marked on the barrel.
- receiver/frame is roll-marked with the standard Ithaca scene of three rising mallards on one side, and a retriever and two pheasant on the other
- available with fixed-choke and interchangeable screw-in choke tubes, and with smooth-bore Deerslayer barrels with rifle sights.
- DO NOT CONFUSE this shotgun with the earlier 37 Featherlight made by the original Ithaca; the M37 has a longer receiver, a specific serial number range, and will accept screw-in choke tubes.

Manufacturer

- "ITHACA GUN CO. LLC, KING FERRY, NY" and "MADE IN USA" is marked on the barrel.

Serial Number

- serial number is marked on the right side of the receiver/frame.
- "M37" serial number prefix was used in 1996 and 1997.
- serial number range was from M37000001 to M37007300.
- serial number range (1998 to 2005) was from 370007312 to 370026272.

Notes

Make

- "ITHACA GUN CO. LLC, KING FERRY, NY" and "MADE IN USA" is marked on the barrel.

Model

- introduced in 1996.
- this is a new-production version of the Ithaca Model 37, only produced by the Ithaca Gun Company LLC, and manufactured with a long receiver capable of handling 3" shells
- walnut pistol-grip stock and "beavertail" forearm), ventilated rubber recoil pad, adjustable rifle sights with red fluorescent front beads
- "DEERSLAYER" over "Model 37" or "M37" is marked on the barrel.
- "M37" was the prefix in the serial number marked on the right side of the receiver/frame in 1996 and 1997.
- receiver/frame is roll-marked with the standard Ithaca scene of three rising mallards on one side, and a retriever and two pheasant on the other
- take-down, with interchangeable barrels: available in both fully-rifled (DSR) and smooth-bore (DS) versions
- DO NOT CONFUSE this shotgun with the M37 Deerslayer II; the M37 Deerslayer II has a permanently-attached free-floating barrel (without any attachment lug at the front of the magazine tube). Also, the Deerslayer II is manufactured without the standard M37 receiver roll-markings.

Manufacturer

- "ITHACA GUN CO. LLC, KING FERRY, NY" and "MADE IN USA" is marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the right side of the receiver/frame.
- "M37" serial number prefix was used in 1996 and 1997.
- serial number range was from M37000001 to M37007300.
- serial number range (1998 to 2005) was from 370007312 to 370026272.

Shots

- tubular magazine is mounted under the barrel.

70709 - 1	12 GA X 2 3/4"	4	711	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- marked on the barrel.

Model

- this is a variation of the standard Model 37 Featherlight made during 1975 only, as a way of reducing Ithaca's stock of "Supreme"-grade wood stocks and forearms.
- these shotguns were offered as "customize-it-yourself" items, with plain blued, unmarked receivers (other than the serial number), and uncheckered, high-gloss Supreme-grade wood, that "stands proud" of the receiver; this allowed the eventual owner to engrave the receiver and checker the wood to his/her liking, then re-finish everything back to a high polish.
- approximately 1000 of these shotguns were built.

Serial Number

- numbered on the right side of the receiver, above the trigger-guard.
- will incorporate a "371" or "381" prefix.

Shots

- fixed underbarrel tubular magazine.
- may be plugged to 3 shots total capacity for hunting under the Migratory Birds Regulation.
- though Ithaca advertised Model 37s as having a five-shot capacity, this includes a round in the chamber; the actual capacity of the tube magazine is FOUR rounds.

Notes

Make

- "ITHACA GUN CO. INC., ITHACA N.Y." is marked on the side of the barrel.

Model

- "MODEL 37 - FEATHERLIGHT" is marked on the side of the barrel.
- introduced in 1937 as the model "37".
- "37" model was later renamed the model "37 Featherlight" in 1939.
- "37" model was manufactured by Ithaca Gun Company LLC from 1996 to 2005.
- "37" model has been manufactured since 2007 by Ithaca Gun Company of Upper Sandusky, Ohio.
- hammerless pump action; take down, right or left hand safety.
- smoothbore barrel available with different chokes, in several different lengths.
- roll-stamped or engraved receiver/frame depending on grade: most models are roll-stamp marked on the left side of the receiver/frame depicting three ducks in a marsh setting and a bird dog with two rising ringneck pheasants on the right side; or more elaborately engraved receiver/frame in higher grades.
- hardwood stock available in various finishes; some firearms made in the 1950-60 have grooved slide handles, plain or checkered pistol grips.
- hardware blued, parkerized or chromed, smooth bore barrel with or without a rib and shotgun bead, or rifled with rifle type open sights.
- Ithaca also produced several high grade model 37's, sometimes referred to as "37 $1000 Grade" to "37 $5000 Grade" depending on the amount of embellishing.
- this record is ONLY for those Model 37s with steel receiver/frames and with 2 3/4" chambers; shotguns with aluminum receiver/frames are known as the model "37 Ultralight", and shotguns chambered for 3" shells are known as the model "37 Magnum".

Manufacturer

- "ITHACA GUN CO., INC., ITHACA N.Y. - MADE IN U.S.A." is marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- load magazine through the bottom; ejection is out of the same port.

Serial Number

- serial number is marked on the right side of the receiver/frame.
- shotguns numbered on the FRONT of the receiver/frame will be model 37Rs, 37Ss, or 37Ts.
- model 37 shotguns with a letter prefix or suffix of "MAG" denotes a model "37 Magnum"," ULT" denotes "Ultralight" series," USA" denotes model "37 Bicentennial Commemorative"," DU" in a serial number denotes a "Ducks Unlimited" variant, these variants all have their own FRT record.
- later production used a prefix of "371" or "M37" in the serial number.
- NOTE: do not confuse the patent number "1849982" with a serial number.
- patent number "1849982"is marked on the barrel.

Calibre

- marked on the breech end, left side of the barrel.
- the Ithaca Model 37 and 37 Featherlight were manufactured with 2 3/4" chambers only.
- 3" chambers were introduced with the model "37 Magnum", these will be found in the model 37 Magnum entry.

Shots

- fixed underbarrel tubular magazine.
- may be plugged to 3 shots total capacity for hunting under the Migratory Birds Regulation.
- though Ithaca advertised Model 37 Featherlights as having a five-shot capacity, this includes a round in the chamber; the actual capacity of the tube magazine is FOUR rounds.

Remarks

- Hammerless pump action; take down, right or left hand safety. Barrel available with different chokes, in several different lengths.
- Most models are roll-stamp marked on the right side of the receiver depicting three ducks in a marsh setting, and a bird dog with two rising ringneck pheasants on the left, (or more elaborately engraved receiver in higher grades).
- Some variations made in the 1950-60 have grooved slide handles, plain or checkered pistol grips. Hardwood stock available in various finishes. Hardware blued, parkerized or chromed. Barrel smooth bore with or without a rib and shotgun bead, or rifled with rifle type open sights.
- do not confuse with its predecessor the model 37,
- the model 37 series of firearms was renamed MODEL 87 in 1987 after take-over by the Ithaca Acquisition Corp; renamed again to M37 in May 1996 upon purchase by the Ithaca Gun Company LLC.

Notes

Make

- "Ithaca Gun Company" is usually marked on the left side of the receiver/frame.
- "ITHACA GUN COMPANY, UPPER SANDUSKY, OH MADE IN U.S.A." is usually marked on the left side of the barrel.

Model

- "MODEL 37 - FEATHERLIGHT" is usually marked on the side of the barrel.
- introduced in 1937 as the model "37" by Ithaca.
- "37" model was later renamed the model "37 Featherlight" in 1939.
- "37" model was manufactured by Ithaca Gun Company LLC from 1996 to 2005.
- "37" model has been manufactured since 2007 by Ithaca Gun Company of Upper Sandusky, Ohio.
- features include: fiber optic bead front sight or rifle type sights; round, interchangeable, rifled or smooth bore barrel with or without a ventilated rib, and with or without interchangeable choke tube; tubular magazine is mounted under the barrel; engraved solid top aluminum or steel receiver/frame with bottom ejection and loading; hammerless; gold plated trigger; single action trigger mechanism; action release is mounted on the front right side of the trigger guard; cross bolt safety is mounted on the rear of the trigger guard; checkered synthetic or wood forearm and pistol grip buttstock with recoil pad; blued finish.
- overall length with a 610 mm (24") barrel is 1124 mm (44.25"), and the average weight is from 2.77 kgs (6.1 lbs) to 3.45 kg (7.6 lbs).

Manufacturer

- "Ithaca Gun Company" is usually marked on the left side of the receiver/frame.
- "ITHACA GUN COMPANY, UPPER SANDUSKY, OH MADE IN U.S.A." is usually marked on the left side of the barrel.

Serial Number

- serial number was observed marked on the right side of the receiver/frame.
- serial number observed consisted of a "M37" prefix and eight numbers.

Calibre

- gauge and chamber length are usually marked on the side of the barrel.

Shots

- tubular magazine is mounted under the barrel.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
30474 - 4	12 GA X 2 3/4"	4	711	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	
30474 - 3	12 GA X 2 3/4"	4	762	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "ITHACA GUN CO., INC. ITHACA N.Y. MADE IN U.S.A." is marked on the left side of the barrel.

Model

- "MODEL 37 - FEATHERLIGHT" is marked on the left side of the barrel.
- "37 Featherlight American Bicentennial Commemorative" is a special run of Ithaca model 37 Featherlights made to commemorate the United States of America Bicentennial in 1976.
- deluxe-grade checkered pistol-grip walnut stock and forearm, ventilated rubber recoil pad, ventilated rib, with special serial-numbering sequence and receiver markings.
- these shotguns were serial-numbered "USA 0001" through "USA 1976", and have an eagle with spread wings engraved on the left side of the receiver, below "Ithacagun" and above a banner reading "Heritage, Craftsmanship, Pride". The right side of the receiver is engraved with a banner reading "1776 American Bicentennial 1976", and "The right of the people to keep and bear arms shall not be infringed."
- these shotguns were also shipped with a like-serial-numbered pewter belt buckle in the shape of the same eagle on the left side of the shotgun, and came complete with a hard-shell carrying case.

Manufacturer

- "ITHACA GUN CO., INC. ITHACA N.Y. MADE IN U.S.A." is marked on the left side of the barrel.

Serial Number

- serial number is located on the right side of the receiver/frame, directly above the trigger group.
- serial number consists of a three letter "USA" prefix and four numbers.
- serial number range is from USA0001 to USA1975.

Barrel

- these shotguns were originally shipped with 30"/762mm barrels, but will accept any other 37 Featherlight barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- plug supplied to conform with 3-shot Migratory Bird Law as required.
- though Ithaca advertised all Model 37s as having a five-shot capacity, this includes a round in the chamber; the actual capacity of the tube magazine is FOUR rounds.

Notes

Make

- "Ithaca" is marked on the barrel and receiver/frame.

Model

- manufactured circa 1972.
- this is a specially-marked version of the standard Model 37 Featherlight.
- walnut pistol-grip stock and "ringtail" forearm (with grooves running around the forearm perpendicular to the barrel), ventilated rib on barrel, Raybar fluorescent red sight, a special roll-marked engraving on each side of the receiver, and a special serial number series.
- these shotguns had an American eagle with outstretched wings on both sides of the receiver, standing on a banner reading "Heritage", "The Ithaca Gun Company", and "Pride"

Serial Number

- serial number is marked on the right side of the receiver/frame.
- serial number range is from A0001 to A2200.

Shots

- fixed underbarrel tubular magazine.
- may be plugged to 3 shots total capacity for hunting under the Migratory Birds Regulation.
- though Ithaca advertised Model 37s as having a five-shot capacity, this includes a round in the chamber; the actual capacity of the tube magazine is FOUR rounds.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "ITHACA GUN CO., INC." is marked on the left side of the barrel.
Model	- "DEERSLAYER" over "MODEL 37 - FEATHERLIGHT" is marked on the left side of the barrel. - this is a variation of the Ithaca Model 37 Featherlight, made specifically for shooting rifled slugs through a smooth bore. - depending on the grade, this shotgun was offered with several features and options, including walnut pistol-grip stock (with or without checkering or recoil pad), sling swivels (higher grades included a leather sling), barrel-mounted open or tang-mounted peep sights with Raybar fluorescent front sight, and roll-engraved receiver scene showing a retriever and two pheasant on the right side and three rising ducks on the left side. - do not confuse this record with that for the 37 UltraLight Deerslayer (aluminium receiver, w. "ULT" serial number prefix), the M37 Deerslayer II (a longer-receiver, 3"-chambered shotgun w. "M37" serial number prefix), 37 Deerslayer Police Special (plain walnut stock with ringtail forearm with barrel marked "DS Police Special"), the 87 DS Police Special (same as above, with plain, Parkerized receiver and "MAG" serial-number prefix), the 87 Deerslayer (same as above, with a polished and blued steel receiver and "MAG" serial-number prefix), or the 87 Deerslayer II (a version of the 87 Deerslayer with fully-rifled, non-detachable barrel and "MAG" serial-number prefix).
Manufacturer	- "ITHACA GUN CO., INC. ITHACA, N.Y." and "MADE IN U.S.A." are marked on the left side of the barrel.
Action	- bottom load and ejection.
Serial Number	- stock model 37s will be serial-numbered on the right side of the receiver/frame; shotguns numbered on the FRONT of the receiver will be model 37Rs, 37Ss, or 37Ts. - model 37shotguns with a letter prefix or suffix of "MAG" denotes a model "37 Magnum"," ULT" denotes "Ultralight" series," USA" denotes model "37 Bicentennial Commerorative"," DU" in a serial number denotes a "Ducks Unlimited" variant, these variants all have their own FRT record. - later production used a prefix of "371" in the serial number. - those examples with an 'M37" prefix are correctly identified as the model "M37" which has its own FRT entry.
Calibre	- the gauge and chamber length are marked on the side of the barrel.
Shots	- plug supplied to conform with three-shot Migratory Game Bird Act as required. - though Ithaca advertised Model 37s as having a five-shot capacity, this includes a round in the chamber; the actual capacity of the tube magazine is FOUR rounds, unless increased to SEVEN by the addition of a full-length magazine extension.

Notes

Make

- "ITHACA GUN CO., ITHACA, N.Y." is marked on the side of the barrel.

Model

- "D.S. POLICE SPECIAL" over "MODEL 37 - FEATHERLIGHT" is marked on the left side of the barrel.
- manufactured from 1980 to 1989.
- "D.S." means Deer Slayer.
- take down, right or left hand safety, ray bar front sight, V-type rear sporting sight, slug barrel.
- this is a stock model 37 Featherlight made specifically for police use, with walnut stock (versions made with both plain and checkered wood), "ringtail" forearm (cylindrical, with multiple deep grooves running around the forearm, perpendicular to the barrel), and "Deerslayer"-type rifle sights, with either a fluorescent Raybar or plain blade front sight.
- do not confuse this shotgun with the 37 DS Police Special II, which has a black synthetic buttstock and pistol-grip.
- this shotgun also has a "commercial"-type finish, with a blued or chrome matte finished, and roll-engraved receiver, showing three rising mallards on one side, and a retriever and two pheasant on the other.

Manufacturer

- "ITHACA GUN CO., ITHACA, N.Y. - MADE IN U.S.A." is marked on the side of the barrel.

Action

- bottom load and ejection.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on right side of receiver, directly above the trigger group.
- serial number observed consisted of seven numbers without a letter prefix or suffix.
- serial number observed consisted of nine numbers without a letter prefix or suffix.
- serial number observed consisted of a two letter prefix and nine numbers, example: DU370408579.

Calibre

- the gauge and chamber length are marked on the side of the barrel.

Shots

- tubular magazine mounted under the barrel.
- though Ithaca advertised Model 37s as having a five-shot capacity, this includes a round in the chamber; the actual capacity of the tube magazine is FOUR rounds, unless increased to SEVEN with a full-length magazine.

30480 - 3	12 GA X 2 3/4"	4	762	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "ITHACA GUN CO. INC., ITHACA N.Y." is marked on the side of the barrel.

Model

- this is a Model 37 Featherlight made in 1977, to commemorate Ducks Unlimited's 40th anniversary
- these shotguns were made in two variations; an Auction variation, featuring acid-etched receiver markings, deluxe-grade wood, gold-plated trigger and slide release, and jeweled bolt, and a Trade variation, which was a stock Model 37 with special roll-engraved receiver markings and a Sid Bell-designed grip-cap with a flying duck superimposed on a "40".
- where the Auction variation was manufactured specifically as a high-grade "showpiece" (to be auctioned off at Ducks Unlimited dinners, to raise funds for the organization), the Trade variation was manufactured as a "workhorse" gun, with a portion of Ithaca's proceeds being donated to DU.
- the Auction grade guns also had a mid-rib sighting bead, and were shipped with a red velvet-lined hard case and a Ducks Unlimited belt buckle, serial-numbered to the shotgun.
- these shotguns are recognizable by several unique features; a checkered walnut pistol-grip stock and forearm (with recoil pad and "40 and duck" grip-cap), a specially-engraved receiver with DU's crest on one side (a mallard within a shield, topped by "Ducks Unlimited", topped by the US, Canadian, and Mexican flags), all superimposed on a banner reading "1937 Four Decades of Conservation Pioneering 1977". The same DU crest is also on the other side of the receiver, superimposed on "40", and surrounded by a waterfowl and cat-tails scene.

Manufacturer

- "ITHACA GUN CO., INC., ITHACA N.Y. - MADE IN U.S.A." is marked on the side of the barrel.

Serial Number

- serial number is located on bottom or right side of receiver/frame, directly above the trigger group.
- depending on the grade, these shotguns had one of two serial-number ranges; - "Auction" grade shotguns were numbered on the bottom of the receiver/frame, between "40-DU0001" and "40-DU1125"; and
- "Trade" grade shotguns were numbered on the right side of the receiver/frame, with a specific serial-number prefix of "DU37040", followed by four digits.
- "DU" = Ducks Unlimited, 370 = model 37, 40 = anniversary, last four digits are sequential numbers for the manufactured firearms. Series started at 5001.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel	- these shotguns were all shipped with 30"/762mm barrels, but will accept any Model 37 barrel.
Shots	- plug supplied to conform with 3-shot Migratory Game Bird Act as required. - though Ithaca advertised all Model 37s as having a five-shot capacity, this includes a round in the chamber; the actual capacity of the tube magazine is FOUR rounds.
Other Markings	- barel markings read "37 Featherlight, 12 Gauge - 2 3/4 Chamber Proof Tested. Ithaca Arms Co. Inc, Ithaca NY. Made in U.S.A. Roto Forged".

70707 - 1	12 GA X 2 3/4"	4	711	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Model

- this is a standard Model 37 Featherlight manufactured in 1980, to commemorate the 100th anniversary of the Ithaca Gun Company.
- made in three grades; a "Presentation" grade (200 guns produced), with an engraved and gold-highlighted receiver, a "2500" grade (approx. 950 guns produced), with an engraved and silver-plated receiver, and a "Blued 2500" grade (approx. 950 guns produced), with an engraved and blued receiver. The "Blued 2500" grade was actually an afterthought to the 2500, as sales did not reach expectations, and there were problems with the silver plating peeling off of the 2500's receivers.
- these guns were all produced with the same engraving pattern on the receiver, showing a likeness of Ithaca's original factory and Lou Smith (an early Ithaca director) with a shotgun over his right shoulder on the left side, and a hunter, his son, and a retriever on the right side. Both of these scenes are surrounded with an intricate scroll pattern.
- deluxe-grade walnut pistol-grip stock and forearm, ventilated rubber recoil-pad, and ventilated rib on barrel.
- similar Centennial Commemoratives were also made in both the Model 51 and Mag-10 shotgun models, and buyers had the option of ordering a three-gun set.
- most of these shotguns were originally shipped with 28"/711mm barrels, but they could also be special-ordered with any other Model 37 barrel, including "Deerslayer" rifle-sighted barrels.

Serial Number

- the "Presentation" grade, and the "2500" grades had their own serial number ranges; "Presentation"-grade Model 37s were serial numbered "1 of 200-3" through "200 of 200-3", while "2500"-grade Model 37s were serial-numbered "CENT-0001" through approx. "CENT-1900".

Shots

- fixed underbarrel tubular magazine.
- may be plugged to 3 shots total capacity for hunting under the Migratory Birds Regulation.
- though Ithaca advertised Model 37s as having a five-shot capacity, this includes a round in the chamber; the actual capacity of the tube magazine is FOUR rounds.

Notes

Make

- marked on barrel.

Model

- manufactured during 1981 only.
- approximately 1,300 guns made.
- take down, right or left hand safety, was available as a two-barrel set, with a slug barrel with brass front sight blade and one-piece drift-adjustable rear sight, and with a shot barrel with ventilated rib.
- this is a Model 37 Featherlight made to commemorate the 200th anniversary of the city of Los Angeles. This shotgun was sold only to members of the Los Angeles Police Department, and members could specify that their badge number would be used as the shotgun's serial number.
- deluxe-grade walnut stock and beavertail forearm, ventilated rubber recoil pad, a pistol-grip cap resembling an LAPD badge, specially-engraved receiver, and special serial number prefix.
- these shotguns have blued, scroll-engraved receivers showing "City of Los Angeles 200th Anniversary 1781-1981 Commemorative", the LAPD Police Academy, and the LA city hall on the left side, and "To Protect and Serve", with three circular seals on the right side. All of these elements are highlighted in gold.

Action

- bottom load and ejection.

Serial Number

- serial number is marked on right side of receiver/frame.
- LAPD Commemoratives shotguns had an "LAPD" serial number prefix, but individual officers could specify that their badge number be used as the shotgun's serial number.
- serial number range is from LAPD0001 to LAPD1299.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - though Ithaca advertised Model 37s as having a five-shot capacity, this includes a round in the chamber, the actual capacity of the tube magazine is four rounds.

FRT Report

Firearm Reference Number (FRN): 30545
Make: Ithaca
Model: 37 Handgrip

Summary

Make:	Ithaca
Model:	37 Handgrip
Manufacturer:	Ithaca
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Pump Action
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
30545 - 5	12 GA X 2 3/4"	4	470	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
30545 - 6	12 GA X 2 3/4"	7	508	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Model

- these are variations of the standard Model 37 made specifically for law enforcement and self-defense use
- can be distinguished from a standard Model 37 by the fact that the 37 Handgrip is made without any receiver roll markings, and has a black plastic pistol-grip and forearm, with sling swivel attachments at the top of the pistol-grip and front of the magazine.
- seen in Parkerized and chrome finishes, and with either a five-shot or eight-shot tube magazine.
- all 37 Handgrip models were made in 12 GA x 2 3/4" only; do not confuse these shotguns with the 37 Bear Stopper (engraved receiver) or the 37 Stakeout, two similar-appearing shotguns.

Action

- pump action, bottom load and ejection.

Serial Number

- all 37 Hand Grip shotguns were made at a time when all Model 37s had a "371" serial number prefix.
- stock model 37s will be serial-numbered on the right side of the receiver/frame; shotguns numbered on the FRONT of the receiver will be model 37Rs, 37Ss, or 37Ts.
- model 37shotguns with a letter prefix or suffix of "MAG" denotes a model "37 Magnum"," ULT" denotes "Ultralight" series," USA" denotes model "37 Bicentennial Commerorative"," DU" in a serial number denotes a "Ducks Unlimited" variant, these variants all have their own FRT record.
- those examples with an 'M37" prefix are correctly identified as the model "M37" which has its own FRT entry.

Barrel

- these shotguns were shipped with 18.5"/470mm and 20"/508mm barrels, but will accept any standard Model 37 barrel.

Shots

- though Ithaca advertised Model 37s as having a five-shot capacity, this includes a round in the chamber; the actual capacity of the tube magazine is FOUR rounds, unless increased to SEVEN by the addition of a full-length magazine extension.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - barrel markings read "Model 37 Featherlight 12 Guage-2 3/4 Chamber Proof Tested. Ithaca Arms Co. Inc, Ithaca NY. Made in U.S.A. Roto Forged".

Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
139562 - 1	12 GA X 3"	4	356	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Ithaca Gun Company" was observed marked on the left side of the receiver/frame.
- "ITHACA GUN COMPANY, UPPER SANDUSKY, OH MADE IN U.S.A." was observed marked on the left side of the barrel.

Model

- "M37 CLASS 3" and "LE 14" was observed marked on the left side of the barrel.
- "LE-M3712" is marked on the right side of the receiver/frame as part of the serial number.
- "Class 3" is also known as an "Any Other Weapon (AOW)" in the USA.
- "37 LE 14" Class 3" is based on Ithaca Stakeout model.
- features observed: round smoothbore barrel with brass bead front sight; solid top machine steel receiver/frame with bottom ejection and loading; cross bolt safety is mounted on the rear of the trigger guard; synthetic forearm and permanent fixed pistol grip; sling swivel studs; parkerized finish.
- overall length with a 356 mm barrel is 597 mm (23.5").

Manufacturer

- "Ithaca Gun Company" was observed marked on the left side of the receiver/frame.
- "ITHACA GUN COMPANY, UPPER SANDUSKY, OH MADE IN U.S.A." was observed marked on the left side of the barrel.

Serial Number

- serial number is marked on the right side of the receiver/frame.
- observed serial number consisted of a "LE-M3712" prefix and four numbers.

Shots

- tubular magazine is mounted under the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- this firearm is normally Non-Restricted unless affected by the following conditions:

1) by combining a barrel from a licensed firearms manufacture that is less than 406mm (16.0") in length and a receiver/frame fitted with a pistol grip only, this firearm may be deemed a "handgun" and therefore "RESTRICTED" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (a) of the Criminal Code of Canada.
- "handgun" means a firearm that is designed, altered or intended to be aimed and fired by the action of one hand, whether or not it has been redesigned or subsequently altered to be aimed and fired by the action of both hands.

2) "a firearm that is designed or adapted to be fired when reduced to a length of less than 660 mm by folding, telescoping or otherwise" and therefore "Restricted" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (c) of the Criminal Code of Canada.

3) by combining a barrel that has been altered to less than 457mm (18.0") in length by a non-licensed firearms manufacturer (cottage industry, individual or gunsmith) regardless of whether the shotgun has a pistol grip or conventional stock, this firearm is "PROHIBITED" and subject to the definition of a "prohibited firearm" in Part III/Firearms and Other Weapons of Section 84 of the Criminal Code of Canada.
- "prohibited firearm" means a firearm that is adapted from a rifle or shotgun, whether by sawing, cutting or any other alteration, and that, as so adapted,
(i) is less than 660 mm in length, or
(ii) is 660mm or greater in length and has a barrel less than 457 mm in length.

70609 - 3	20 GA X 3"	4	711	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Model

- this is a variation of the Model 37 with a slightly lengthened receiver, to enable 3" magnum shells to be worked through the action
- walnut pistol-grip stock and forearm with ventilated recoil pad, fluorescent Raybar front sight, a "flying mallard" Sid Bell grip-cap, and a distinct serial number range (all with "MAG" as a prefix or suffix; early guns used "MAG" as a suffix, but this was changed in 1986.)
- do not confuse these shotguns with Model 87s, which have "MAG-87" prefixes in the serial number.

Serial Number

- numbered on the right side of the receiver, above the trigger-guard; all 37 Magnums will have a "MAG" prefix or suffix on the serial number, along with a "37" prefix (marking practice changed during the production run).
- stock model 37s will be serial-numbered on the right side of the receiver/frame; shotguns numbered on the FRONT of the receiver will be model 37Rs, 37Ss, or 37Ts.
- model 37shotguns with a letter prefix or suffix of "MAG" denotes a model "37 Magnum"," ULT" denotes "Ultralight" series," USA" denotes model "37 Bicentennial Commerorative"," DU" in a serial number denotes a "Ducks Unlimited" variant, these variants all have their own FRT record.
- later production used a prefix of "371" in the serial number.
- those examples with an 'M37" prefix are correctly identified as the model "M37" which has its own FRT entry.

Shots

- fixed underbarrel tubular magazine.
- may be plugged to 3 shots total capacity for hunting under the Migratory Birds Regulation.
- though Ithaca advertised Model 37s as having a five-shot capacity, this includes a round in the chamber; the actual capacity of the tube magazine is FOUR rounds.

30524 - 7	12 GA X 2 3/4"	4	508	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
30524 - 8	12 GA X 2 3/4"	7	508	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Model

- the 37 Military & Police is a variation of the standard Model 37, with some specific features; these shotguns were also known as the "37 Trench" and "37 Riot" shotguns.
- all 37 M&Ps will have walnut pistol-grip stocks (with or without checkering and/or recoil-pads; these options were offered at different times in the production run) and "ringtail"-style forearms (with deep grooves running around the forearm, perpendicular to the barrel), with plain, un-roll-marked receivers
- these shotguns could be ordered with or without ventilated barrel shrouds and/or bayonet lugs, with four or seven shot magazines, and in matte blued or satin chrome finishes.
- another option on these shotguns was a "slam-fire" trigger group, which allows someone to fire merely by holding the trigger down and working the action, or a "fire interruptor" trigger group which requires the firer to fully release the trigger between shots. All standard Model 37s built after 1976 come fitted with the "fire interruptor" trigger group.
- do not confuse these shotguns with either the 37 Military & Police II (which has a black synthetic buttstock and pistol-grip), or the 37 DS Police Special, which all have rifle sights for shooting slugs. The 37 Military & Police came ONLY with bead front sights, though, depending on the choke, they could also be used to fire slugs.

Action

- bottom load and ejection.

Serial Number

- stock model 37s will be serial-numbered on the right side of the receiver/frame; shotguns numbered on the FRONT of the receiver will be model 37Rs, 37Ss, or 37Ts.
- model 37shotguns with a letter prefix or suffix of "MAG" denotes a model "37 Magnum"," ULT" denotes "Ultra-Featherlight" series," USA" denotes model "37 Bicentennial Commerorative"," DU" in a serial number denotes a "Ducks Unlimited" variant, these variants all have their own FRT record.
- later production used a prefix of "371" in the serial number.
- those examples with an 'M37" prefix are correctly identified as the model "M37" which has its own FRT entry.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel	- these shotguns were shipped only with 18.5"/470mm, and 20"/508mm barrel lengths, but could accept any standard Model 37 barrel.
Shots	- though Ithaca advertised Model 37s as having a five-shot capacity, this includes a round in the chamber; the actual capacity of the tube magazine is FOUR rounds, unless increased to SEVEN by the addition of a full-length magazine extension.
Other Markings	- barrel markings will normally read "37 M & P, 12 Gauge - 2 3/4 Chamber Proof Tested. Ithaca Arms Co. Inc, Ithaca NY. Made in U.S.A. Roto Forged".

Notes

Model

- manufactured from 1984 to 1986.
- 37 Military & Police 2 is a variation of the standard Model 37 Military & Police, but with a black synthetic one-piece buttstock and pistol-grip
-these shotguns came with "ringtail" forearms (with deep cylindrical grooves running around the forearm, perpendicular to the barrel), and a matte, Parkerized finish with a plain receiver (no standard Model 37 roll-markings)
- do not confuse these shotguns with either the 37 Military & Police (which has a walnut pistol-grip buttstock), or any of the 37 DS Deerslayer Police Special, which all have rifle sights for shooting slugs. The 37 M&P II came ONLY with bead front sights, though, depending on the choke, they could also be used to fire slugs.

Action

- bottom load and ejection.

Serial Number

- located on right side of receiver, directly above the trigger group; all 37 Military & Police IIs were made at a time when all Model 37s had "371" serial number prefixes.

Barrel

- these shotguns were shipped only with 20"/508mm barrels, but could accept any standard Model 37 barrel.

Shots

- though Ithaca advertised Model 37s as having a five-shot capacity, this includes a round in the chamber; the actual capacity of the tube magazine is FOUR rounds, unless increased to SEVEN by the addition of a full-length magazine extension.

FRT Report

Firearm Reference Number (FRN): 70790
Make: Ithaca
Model: 37 Sid Bell Special Edition

Summary

Make:	Ithaca
Model:	37 Sid Bell Special Edition
Manufacturer:	Ithaca
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Pump Action
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
70790 - 1	12 GA X 2 3/4"	4	711	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Model

- this is a variation of the standard Model 37 Featherlight made in 1977, as a specially-decorated "bonus" to distributors who ordered a sufficient number of other Ithaca shotguns.
- Sid Bell was a silversmith who was known for his realistic depictions of wildlife in precious metals (he designed most of the different "bird" and "animal" grip-caps seen on Ithaca shotguns), and this shotgun was intended to showcase his work.
- this shotgun was essentially a 37 Deluxe Ventilated Rib (high-gloss checkered walnut pistol-grip stock and forearm, deep blue receiver and barrel, and ventilated rib on barrel), with a grip-cap depicting Lou Smith (an early director of Ithaca) with a shotgun over his shoulder, and carved silver birds and animals replacing the engraved birds and animals seen on most Model 37s (three rising mallards on the right side, and a retriever and two pheasant on the other).

Serial Number

- serial-numbered in sequence with other Model 37s of the time; right side of receiver, above trigger-guard, with "371" serial number prefix.

Shots

- fixed underbarrel tubular magazine.
- may be plugged to 3 shots total capacity for hunting under the Migratory Birds Regulation.
- though Ithaca advertised Model 37s as having a five-shot capacity, this includes a round in the chamber; the actual capacity of the tube magazine is FOUR rounds.

30541 - 4	20 GA X 2 3/4"	4	343	Restricted CC 84(1) "restricted firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "ITHACA GUN, KING FERRY, N.Y. MADE IN U.S.A." is usually be marked on the left side of the barrel.
Model	- this was a special variation of the Model 37 made as a short, lightweight, concealable, yet powerful firearm, primarily for police work - these shotguns were made in both 12- and 20-gauge versions, but were all made with 13 ½"/ 343mm barrels, hand-guard straps on the forearms (to prevent the firer's hand from slipping in front of the muzzle when firing), no sights, and either black synthetic or wooden "saw-handle"pistol grips. - a special cased set of these shotguns were offered in 1984, as the "Bonnie and Clyde" Deluxe models, after the infamous bandits of the 1930s; this set included a chromed 12-gauge Deluxe Stakeout with a steel receiver ("Clyde"), and a blued 20-gauge Deluxe Stakeout with an aluminium receiver ("Bonnie"), both with deluxe wooden saw-handle pistol-grips, in a red-velvet-lined case. - overall length with a 343 mm (13.5") barrel is 597 mm (23.5").
Manufacturer	- "ITHACA GUN, KING FERRY, N.Y. MADE IN U.S.A." is usually be marked on the left side of the barrel.
Action	- bottom load and ejection.
Serial Number	- serial number is marked on the right side of the receiver/frame, directly above the trigger group. - these shotguns were serial-numbered in sequence with other Model 37s of the time ("371" prefix), but also include an "HG" suffix.
Calibre	- the Model 37 was made with 2 ¾" chambers ONLY (in both 12 and 20 gauges), barrels are marked "2 3/4" .

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - tubular magazine is mounted under the barrel.

Canadian Law Comments - as it was produced from the factory, this firearm has a length less than 660mm (26") and is restricted. Addition of a conventional buttstock or a longer barrel to the receiver/frame will increase the length to greater than 660mm (26") and will be classed as non-restricted.

Notes

Make

- "ITHACA GUN CO. LLC, KING FERRY, NY" and "MADE IN USA" is marked on the barrel, or "ITHACA GUN COMPANY" is marked on the receiver/frame.

Model

- "37 Ultralight" model was manufactured by Ithaca Gun Company LLC from 1996 to 2002.
- "37 Ultralight" model has been manufactured since 2007 by Ithaca Gun Company of Upper Sandusky, Ohio.
- this is a variation of the Model 37 made with an all-aluminium receiver/frame, rather than the steel receiver/frame of previous Model 37s (hence "Ultralight").
- walnut stock and forearm (full-length pistol-grip, "slim-grip" pistol-grip, and straight-grip versions made), ventilated recoil pad, thin rubber buttpad, or no buttpad, "flying quail" grip-cap on full-length pistol-grip versions, fixed chokes or interchangeable choke tubes, ventilated rib on barrel, and Raybar red fluorescent bead sight.
- standard Model 37 receiver roll-markings of three flying mallards on one side, and a retriever and two pheasants on the other.
- all 37 Ultralight models have a "ULT" prefix or suffix in the serial number (marking practice changed midway through production).

Action

- slide action.

Serial Number

- serial numbered is marked on the right side of the receiver/frame.
- all 37 Ultralights have a "ULT" prefix or suffix (early guns used "ULT" as a suffix, but marking practice changed partway through production).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel	- these shotguns were shipped with 25"/635mm and 26"/660mm barrels, but will accept any Model 37 barrel.
Shots	- this model feeds from a fixed underbarrel tubular magazine. - may be plugged to 3 shots total capacity for hunting under the Migratory Birds Regulation. - though Ithaca advertised Model 37s as having a five-shot capacity, this includes a round in the chamber; the actual capacity of the tube magazine is FOUR rounds.

- manufactured from 1996 to 2004 by Ithaca Gun Company, LLC.
- manufactured since 2007 by Ithaca Gun Company of Upper Sandusky, Ohio.
- "Model 37" or "M37" is marked on the barrel.
- features include: round barrel with a ventilated top rib, bead front sight and a screw-in interchangeable extended full choke tube; solid top, flat sided receiver/frame is roll-marked with the standard Ithaca scene of three rising mallards on one side, and a retriever and two pheasant on the other; cross bolt safety; walnut "ringtail" forearm (with deep grooves running around the forearm, perpendicular to the barrel) and pistol-grip buttstock with a ventilated rubber recoil pad; black or camoflauge finish,
- DO NOT CONFUSE this shotgun with the earlier 37 models made by the original Ithaca; the M37 has a longer receiver, a specific serial number range, and has an extended screw-in choke tube.

Manufacturer

- "ITHACA GUN COMPANY" is usually marked on the side of the receiver/frame.
- "ITHACA GUN CO. LLC, KING FERRY, NY" and "MADE IN USA" is usually marked on the barrel.

Serial Number

- serial number is marked on the right side of the receiver/frame.
- all 37 models have a "M37" serial number prefix.

Shots

- tubular magazine mounted under the barrel.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "ITHACA GUN CO., INC., ITHACA, N.Y. - PATENT NO. 1849982 - MODEL - 37R" is marked on the left side of the barrel.
Model	- manufactured from 1937 to 1967. - "37R", "37R DELUXE", "37R DELUXE FEATHERLIGHT" or "37R FEATHERLIGHT" is marked on the left side of the barrel. - 'R' in the model designation denotes a raised rib on the barrel. - this is a variation of the standard Model 37 pump-action shotgun. - "37R" shotguns had raised ribs on the barrel, and their own serial-number location and sequence. - deluxe or standard grade walnut pistol-grip stocks and forearms (some forearms were of the "ringtail" type, with deep grooves running around the forearm, perpendicular to the barrel), and receivers were all roll-marked with the standard Model 37 scene (three rising mallards on one side, a retriever and two pheasant on the other). - these shotguns could be special-ordered with a large number of options, but were all marked alike; the serial number and grade (either "R" or "RD") are marked at the FRONT of the receiver (not the side, as with more modern 37s), and the serial number is repeated on the barrel, as the barrel was fitted to the receiver. The barrel serial number is followed by a dash, then a number signifying the amount of choke in that barrel.
Manufacturer	- "ITHACA GUN CO., INC., ITHACA, N.Y. - PATENT NO. 1849982 - MODEL - 37R" is marked on the left side of the barrel.
Action	- bottom load and ejection.
Serial Number	- serial number and grade are marked on the front of the receiver/frame (eg. "R" or "RD" over 12345); serial number alone is marked on the original matching barrel that came with that receiver/frame. Serial numbers of this period will be either a five or six-digit numeral. - "PATENT NO. 1849982" may be marked on the barrel. This is not the serial number.
Calibre	- gauge and chamber length are marked on the barrel.
Shots	- fixed underbarrel tubular magazine. - may be plugged to 3 shots total capacity for hunting under the Migratory Birds Regulation. - though Ithaca advertised Model 37s as having a five-shot capacity, this includes a round in the chamber; the actual capacity of the tube magazine is FOUR rounds.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- this model designation is used for two variations of the standard Model 37 Featherlight pump-action shotgun that were made from 1937 through 1962, the 37 Trap and the 37 Target. - these shotguns all had wide, ventilated ribs on the barrel (barrels marked "37T"), and their own serial-number location and sequence. - deluxe or standard grade walnut pistol grip stocks and forearms, and receivers were all roll-marked with the standard Model 37 scene (three rising mallards on one side, a retriever and two pheasant on the other). - these shotguns could be special-ordered with a large number of options, but were all marked alike; the serial number and grade ("T") are marked at the FRONT of the receiver (not the side, as with more modern 37s), and the serial number is repeated on the barrel, as the barrel was fitted to the receiver. - while original 37 T(trap) guns had ivory beads, later 37 T(target) models came with brass beads or Raybar red fluorescent sights. - 37 Trap guns are exclusively confined to long-barreled, 12-gauge, deluxe grade shotguns meant for trap shooting, while 37 Target guns are seen in 12, 16, and 20 gauge with a variety of barrel lengths; a similar grade (the "37S") was made specifically for skeet shooting.
Action	- bottom load and ejection.
Serial Number	- serial number and grade marked on the FRONT of the receiver (eg. "T" over 12345); serial number alone marked on the original matching barrel that came with that receiver. Serial numbers of this period will be either a five- or six-digit numeral.
Shots	- fixed underbarrel tubular magazine. - may be plugged to 3 shots total capacity for hunting under the Migratory Birds Regulation. - though Ithaca advertised Model 37s as having a five-shot capacity, this includes a round in the chamber; the actual capacity of the tube magazine is FOUR rounds.
Other Markings	- 37 Featherlight, XX Gauge, 2 3/4 Chamber Proof Tested. Ithaca Arms Co. Inc, Ithaca NY.
Remarks	- Take down, right or left hand safety. Vent rib, ray bar front sight, full, modified, improved cylinder choke. Finger groove beavertail forearm. Trap or skeet configuaration hand checkered beavertail forend. Waterfowl scene on left side of received shows three ducks in a nature setting. Bird dog with two rising pheasants on right side of receiver.

Notes

Make

- "ITHACA GUN CO., INC. ITHACA, N.Y. MADE IN JAPAN" is marked on the left side of the upper barrel.
- "CUSTOM CRAFED FOR ITHACA BY SKB" is marked on the right side of the upper barrel.

Model

- "MODEL 500" is marked on the left side of the upper barrel.
- available between 1966 and 1979.
- features include: round over & under chrome lined barrels with a ventilated top rib and bead front sight; front hinged receiver/frame with a top tang mounted break open action release lever and safety; scroll engraved boxlock action with a Kirsten locking mechanism; selective ejectors; single selective gold or silver plated trigger; checkered walnut forearm and a straight grip buttstock or a pistol grip buttstock with a pistol grip cap and a ventilated rubber recoil pad; blued finish.

Manufacturer

- "CUSTOM CRAFED FOR ITHACA BY SKB" is marked on the right side of the upper barrel.

Action

- over & under barrel configuration, hinged barrel design.

Serial Number

- serial number is marked on the underside of the receiver/frame.
- serial number observed consisted of a two letter "CF" prefix and six numbers.

Calibre

- gauge and chamber length are marked on the left side of the upper barrel.

Notes

Make

- "ITHACA GUN CO., INC., ITHACA, N.Y. MADE IN JAPAN", or
- "ITHACA GUN CO., (CANADA) LTD., DUNNVILLE, ONT." over "MADE IN JAPAN" is usually marked on the left side of the upper barrel.
- "CUSTOM CRAFTED FOR ITHACA BY SKB" is marked on the right side of the upper barrel.

Model

- this FRT screen is a generic entry for the model 600 as offered by Ithaca (Sakaba (SKB) also sold the model 600 under its own name) that are otherwise unidentifiable, other model 600 entries exist which might better describe the firearm being examined.
- Ithaca announced its affiliation with Sakaba (SKB) of Japan in their "Winter 1966-1967" catalogue. One of the first models to be listed was the model 600. Originally offered in three "grades" which included "Trap", "Skeet" and "Field", the model 600 was eventually also available in a "Magnum" and "Doubles Gun" version. All variations were available with a variety of features intended to enhance the performance of the shooter/gun in a given discipline.
- the basic model 600, also known as the "600 Field" was available in 12 GA X 2 3/4" or 20 GA X 3" with a blued (very early production in limited numbers) or silver plated receiver/frame, a hard rubber butt plate (higher grades featured recoil pads) and white line spacers for the pistol grip cap and butt plate.
- the model 600 Skeet was available in 12 GA X 2 3/4", 20 GA X 2 3/4", 28 GA X 2 3/4" or 410 GA X 2 1/2" with a single 660mm (in 12 or 20 gauge only) or 711mm barrel assembly or as a set that included multiple barrel assemblies. The 600 Skeet featured a standard style (non-Monte Carlo) buttstock fitted with a recoil pad and a Bradley type front sight with a middle bead.
- the model 600 Trap was available in 12 GA X 2 3/4" only with a 762mm or 813mm barrel assembly and a standard or Monte Carlo style buttstock fitted with a recoil pad and a Bradley type front sight with a middle bead. Barrels were choked Full and Improved Modified.
- the model 600 Doubles Gun was the same as the 600 Trap but was choked specifically for use as a doubles gun in Trap.
- the model 600 Magnum featured was available in 12 GA X 3" (all others featured a 2 ¾" chamber in 12 gauge).

Manufacturer

- "ITHACA GUN CO., INC., ITHACA, N.Y. MADE IN JAPAN", or
- "ITHACA GUN CO., (CANADA) LTD., DUNNVILLE, ONT." over "MADE IN JAPAN" is usually marked on the left side of the upper barrel.
- "CUSTOM CRAFTED FOR ITHACA BY SKB" is marked on the right side of the upper barrel.

Action

- over & under barrel configuration, hinged barrel design.

Serial Number

- serial numbers on examined samples have been marked on the underside of the receiver/frame. Sample numbers have incorporated an alpha character(s) prefix followed by sequential numbers.

Calibre

- gauge and chamber length are marked on the barrel assembly.

Notes

Make

- "ITHACA GUN CO., INC., ITHACA, N.Y. MADE IN JAPAN", or
- "ITHACA GUN CO., (CANADA) LTD., DUNNVILLE, ONT." over "MADE IN JAPAN" is usually marked on the left side of the upper barrel.
- "CUSTOM CRAFTED FOR ITHACA BY SKB" is marked on the right side of the upper barrel.

Model

- Ithaca announced its affiliation with Sakaba (SKB) of Japan in their "Winter 1966-1967" catalogue. One of the first models to be listed was the model 600. Originally offered in three "grades" which included "Trap", "Skeet" and "Field", the model 600 was eventually also available in a "Magnum" and "Doubles Gun" version. All variations were available with a variety of features intended to enhance the performance of the shooter/gun in a given discipline.
- the model 600 Magnum featured was available in 12 GA X 3" (all others featured a 2 ¾" chamber in 12 gauge).
- the model 600 Skeet was available in 12 GA X 2 3/4", 20 GA X 2 3/4", 28 GA X 2 3/4" or 410 GA X 2 1/2" with a single 660mm (in 12 or 20 gauge only) or 711mm barrel assembly or as a set that included multiple barrel assemblies. The 600 Skeet featured a standard style (non-Monte Carlo) buttstock fitted with a recoil pad and a Bradley type front sight with a middle bead.
- the basic model 600, also known as the "600 Field" was available in 12 GA X 2 3/4" or 20 GA X 3" with a blued (very early production in limited numbers) or silver plated receiver/frame, a hard rubber butt plate (higher grades featured recoil pads) and white line spacers for the pistol grip cap and butt plate.
- the model 600 Trap was available in 12 GA X 2 3/4" only with a 762mm or 813mm barrel assembly and a standard or Monte Carlo style buttstock fitted with a recoil pad and a Bradley type front sight with a middle bead. Barrels were choked Full and Improved Modified.
- the model 600 Doubles Gun was the same as the 600 Trap but was choked specifically for use as a doubles gun in Trap.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "ITHACA GUN CO., INC., ITHACA, N.Y. MADE IN JAPAN", or - "ITHACA GUN CO., (CANADA) LTD., DUNNVILLE, ONT." over "MADE IN JAPAN" is usually marked on the left side of the upper barrel. - "CUSTOM CRAFTED FOR ITHACA BY SKB" is marked on the right side of the upper barrel.
Action	- over/under barrel configuration.
Serial Number	- serial numbers on examined samples have been marked on the underside of the receiver/frame. Sample numbers have incorporated an alpha character(s) prefix followed by sequential numbers.
Calibre	- the calibre designation is marked on the barrel assembly.

-"Ithaca Gun Co., Inc. Ithaca, N.Y." or "Ithaca Gun Co. (Canada) Ltd. Dunnville, Ont." is marked on the left side of the barrel.

Model

- "Model 72 Deluxe" is marked on the barrel.
- 72 Deluxe and the 72A Deluxe were manufactured from 1972 to 1976.
- features include: octagonal barrel with blade front sight and adjustable rear sight; front loading tubular magazine mounted under the barrel; engraved silver-finished solid top receiver/frame with right side ejection; receiver/frame is grooved for scope mounts; exposed spur hammer; single action trigger mechanism; loop operating lever; walnut forearm with barrel band and straight grip buttstock with steel buttplate; blued finish.
- "72 Deluxe" is similar to the model "72 Saddlegun" except for the octagonal barrel and engraved silver-finished receiver/frame.

Manufacturer

- "ERMA Werke" is not marked on the firearm.
- "ERMA" inside a circle may be marked on the rear left side of barrel.
- "Made in West-Germany" is usually marked on the right side of the barrel.

Serial Number

- serial number is marked on the underside of the receiver/frame.
- observed serial number consisted of eight numbers without a letter prefix or suffix, example: 72044544.
- "72", the first two numbers are the year of production, with a zero used as place holders to maintain an eight digit serial number.

Calibre

- calibre is marked on the left side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - tubular magazine mounted under the barrel.

Other Markings - "Made in West Germany" is marked on right side of barrel.

Notes

Make	- "ITHACA GUN, KING FERRY, N.Y. MADE IN U.S.A." is usually be marked on the left side of the barrel.
Model	- this FRT screen is a generic for the model 87's. Other Model 87 entries exist which might better describe the firearm. - the Ithaca Model 87 was manufactured by the Ithaca Acquisition Corporation (IAC) between 1987 and 1996, when Ithaca again declared bankruptcy, and was re-organized as the Ithaca Gun Company Limited Liability Corporation (LLC). - these shotguns all had 3" chambers, and will all have serial numbers prefixed with "MAG-87" (except for certain limited-edition commemoratives, and some firearms that were put together from previously-existing receivers.) - do not confuse these shotguns with either original Model 37s produced by the original Ithaca (all variations), or the later M37 (all variations; all have "M37" serial number prefixes), produced by Ithaca LLC. - most versions of the Model 87 came with walnut pistol-grip stocks and forearms and the "37 Featherlight" type receiver/frame rollmarkings (three rising mallards on one side, with a retriever and two pheasant on the other) with options available such as ventilated barrel ribs, screw-in choke tubes, camouflage-painted, nickeled, Parkerized, or polished and blued finish, and smoothbore or rifled barrels (slug barrels came with open adjustable sights). Still other variations came with black synthetic stocks or pistol-grips; Military & Police, Stakeout, PD Special, Handgrip, and DS Police Special shotguns were made without receiver/frame scenes.
Manufacturer	- "ITHACA GUN, KING FERRY, N.Y. MADE IN U.S.A." is usually be marked on the left side of the barrel.
Action	- bottom load and ejection.
Serial Number	- numbered on right side of receiver/frame, above trigger group; except for certain commemorative shotguns, all Model 87s will have a serial number with a "MAG-87" prefix followed by seven digits; commemorative shotguns will have identifiable receiver markings.
Calibre	- the Model 87 was made with 3" chambers only.
Shots	- normally plugged to three rounds, to conform with the Migratory Game Bird Act. - fixed underbarrel tubular magazine, with capacity of four rounds. - may be plugged to 3 shots total capacity for hunting under the Migratory Birds Regulation. - some specific model variations were supplied with a seven shot, full-length magazine.
Remarks	- Hammerless pump action. Available in full, modified, improved cylinder, or open choke. Take down, right or left hand safety. Current models (1987--) have "Featherlight" as part of the Manufacturer's identification. Hardwood stock available in various finishes. Hardware blued, parkerized or chrome. Barrel either smooth bore or rifled with shotgun bead or rifle type open sights, with or without a rib.

Model

- manufactured from 1988 to 1994.
- model designation is not marked on the left side of the barrel.
- features include: fully-rifled barrel permanently mounted to the receiver/frame, plain blued receiver/frame, walnut Monte Carlo pistol grip stock with ventilated rubber recoil pad, adjustable open rifle style sights, receiver/frame is drilled and tapped for scope mounts, checkered beavertail forearm, bottom load and ejection.
- this model does not have the standard Ithaca game scene of three rising mallards on one side and a retriever and two pheasant on the other.
- some variations of this shotgun were built specifically for use with Brenneke's "Golden Slug" discarding-sabot ammunition; these variations are called "Fast Twist" models (rifled with a 1:25 twist, instead of 1:34), and will have "BRENNEKE" marked on each side of the receiver/frame.

Serial Number

- serial number is marked on the right side of receiver/frame above the trigger group, will have a "MAG-87" prefix followed by seven digits. Commemorative shotguns will have identifiable receiver/frame markings.
- the Model 37 Deerslayers that were produced by the original Ithaca will have no serial number prefix, model 87 Deerslayers have interchangeable barrels, 87 Ultralight Deerslayers use an aluminium receiver/frame, 2 3/4" chambers, and incorporate a "ULT" serial number prefix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- fixed under barrel tubular magazine.
Remarks	- the "Fast Twist" Deerslayer IIs were offered only in 12 GA, with a 635mm barrel.

70771 - 1	12 GA X 3"	4	711	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "ITHACA" is marked on the left side of the barrel.

Model

- "M-87 FEATHERLIGHT" is marked on the left side of the barrel.
- "DUCKS UNLIMITED" or "DUCK UNLIMITED CANADA" and a duck head logo may appear on the receiver/frame.
- this is a limited edition of the Model 87 pump-action shotgun made for Canadian and American chapters of Ducks Unlimited, as a fund raising auction item.
- these shotguns came with a special run of uncheckered, laminated pistol grip stocks and forearms (coloured green, orange, and grey), a camouflaged nylon sling, a ventilated recoil pad, a "DU" pistol-grip-cap, two separate barrels (a 28"/711mm barrel with 3 interchangeable choke tubes, and a 20"/508mm rifled Deerslayer barrel), and a specially marked matte blue receiver with distinct serial-number range.
- these shotguns were marked with a "guide" logo on the left side of the receiver, depicting a hunting guide in a marsh (in a silver cartouche), surrounded by engraved cat-tails or swamp-grass.

Serial Number

- these shotguns were numbered with specific serial number ranges, but had different ranges depending on whether they were intended for the Canadian or US markets; guns made for Canadian DU chapters were serial numbered 91DUC0001 through 91DUC0650, while guns made for American DU chapters were serial numbered 90DU370001 through 90DU373000.

Shots

- tubular magazine is mounted under the barrel.

Notes

Make

- "ITHACA GUN, KING FERRY, N.Y. MADE IN U.S.A." is usually be marked on the left side of the barrel.

Model

- the Ithaca Model 87 Handgrip was manufactured by the Ithaca Acquisition Corporation (IAC) between 1987 and 1996, when Ithaca again declared bankruptcy, and was re-organized as the Ithaca Gun Company Limited Liability Corporation (LLC)
- this was a special variation of the Model 87 made as a short, lightweight, concealable, yet powerful firearm
- these shotguns were made in both 12- and 20-gauge versions, with 18.5"/470mm or 20"/508mm barrels, no sights, and black synthetic pistol grips.
- these shotguns all had 3" chambers, and will all have serial numbers prefixed with "MAG-87"
- these shotguns were offered in both 5- and 8-shot versions (4- or 7-shot magazines), but all had "ringtail"-style forearms (with deep grooves running around the forearm, perpendicular to the barrel) with hand-guard straps, and plain receivers, WITHOUT the standard Ithaca scene of three rising mallards one one side and a retriever with two pheasant on the other.
- Parkerized or matte blue finish

71975 - 7	20 GA X 3"	4	343	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "ITHACA GUN, KING FERRY, N.Y. MADE IN U.S.A." is usually be marked on the left side of the barrel.

Model

- the Ithaca Model 87 Stakeout was manufactured by the Ithaca Acquisition Corporation (IAC) between 1988 and 1996, when Ithaca again declared bankruptcy, and was re-organized as the Ithaca Gun Company Limited Liability Corporation (LLC)
- this was a special variation of the Model 87 made as a short, lightweight, concealable, yet powerful firearm, primarily for police work
- these shotguns were made in both 12- and 20-gauge versions, but were all made with 13 ½"/ 343mm barrels, hand-guard straps on the forearms (to prevent the firer's hand from slipping in front of the muzzle when firing), no sights, and black synthetic pistol grips.
- these shotguns all had 3" chambers, and will all have serial numbers prefixed with "372"
- do not confuse these shotguns with original Model 37 Stakeouts produced by the original Ithaca (all have "HG" serial number suffixes)
- these shotguns were offered in 5-shot versions ONLY (4-shot magazines), but all had "ringtail"-style forearms (with deep grooves running around the forearm, perpendicular to the barrel) with hand-guard straps, and plain receivers, WITHOUT the standard Ithaca scene of three rising mallards one one side and a retriever with two pheasant on the other.
- Parkerized or matte blue finish

Manufacturer

- "ITHACA GUN, KING FERRY, N.Y. MADE IN U.S.A." is usually be marked on the left side of the barrel.

Action

- bottom load and ejection.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- numbered on right side of receiver, above trigger group; Model 87 Stakeouts will have a serial number with a "372" prefix followed by six digits. - serial number may include a two letter suffix (HG).
Barrel	- the 87 Stakeout was shipped with 13.5"/343mm barrels, but could accept any other Model 87 / Model 37 / M37 barrel.
Calibre	- the Model 87 was made with 3" chambers ONLY (in both 12 and 20 gauges), barrels are marked "2 3/4" and 3"".
Shots	- fixed underbarrel tubular magazine, with capacity of FOUR rounds. - may be plugged to 3 shots total capacity for hunting under the Migratory Birds Regulation.
Canadian Law Comments	- as it was produced from the factory, this firearm has a length less than 660mm (26") and is restricted. Addition of a conventional buttstock or a longer barrel to the receiver/frame will increase the length to greater than 660mm (26") and will be classed as non-restricted.

Notes

Make - the "Ithaca" trade name is marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- these shotguns were assembled by the Ithaca Acquisition Corporation (IAC) from aluminium receivers/frame that had already been manufactured by the previous owners of Ithaca; for all intents and purposes, these shotguns are identical to the 37 Ultralight, only sold as "87 Ultralights"; to accurately distinguish a 37 Ultralight from an 87 Ultralight, you must take the trigger-group out of the shotgun. 87 Ultralights will have an "N" ("New Build") stamped on the inside of the receiver/frame, on the right side. - this model was manufactured from 1985 to 1986 and reintroduced in 1988. - features include: walnut stock and forearm (full-length pistol-grip, "slim-grip" pistol-grip, and straight-grip versions made), ventilated recoil pad, thin rubber buttpad, or no buttpad, "flying quail" grip-cap on full-length pistol-grip versions, fixed chokes or interchangeable choke tubes, ventilated rib on barrel, and Raybar red fluorescent bead sight. - standard Ithaca receiver roll-markings of three flying mallards on one side, and a retriever and two pheasants on the other.
Manufacturer	- Ithaca Acquisition Corporation (IAC); these shotguns were assembled and sold by the Ithaca Acquisition Corporation, but the receivers/frame were actually manufactured by the "General Recreation Inc." incarnation of Ithaca.
Action	- slide action.
Serial Number	- numbered on the right side of the receiver/frame, above the trigger-guard; all 87 Ultralights have a "ULT" prefix.
Barrel	- these shotguns were shipped with 25"/635mm barrels, but will accept any Model 37 / Model 87 / M37 barrel.
Calibre	- these shotguns were chambered ONLY for 2 3/4" shells, unlike true Model 87s.
Shots	- this model feeds from a fixed underbarrel tubular magazine. - though Ithaca advertised Model 87s as having a five-shot capacity, this includes a round in the chamber; the actual capacity of the tube magazine is four rounds.

Manufacturer:	Ithaca Gun/Ithaca Acquisition Corporation (IAC)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Pump Action
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
71974 - 1	20 GA X 2 3/4"	4	508	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
71974 - 2	20 GA X 2 3/4"	4	635	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Model

- these shotguns were assembled by the Ithaca Acquisition Corporation (IAC) from aluminium receivers that had already been manufactured by the previous owners of Ithaca; for all intents and purposes, these shotguns are identical to the 37 Ultralight Deerslayer, only sold as "87 Ultralight Deerslayers"; to accurately distinguish a 37 Ultralight Deerslayer from an 87 Ultralight Deerslayer, you must take the trigger-group out of the shotgun. 87 Ultralight Deerslayers will have an "N" ("New Build") stamped on the inside of the receiver/frame, on the right side.
- features include: walnut stock and forearm (full-length pistol-grip, "slim-grip" pistol-grip, and straight-grip versions made), ventilated recoil pad, thin rubber buttpad, or no buttpad, and smooth-bore Deerslayer rifle-sighted barrel.
- standard Ithaca receiver roll-markings of three flying mallards on one side, and a retriever and two pheasants on the other.

Manufacturer

- Ithaca Acquisition Corporation (IAC); these shotguns were assembled and sold by the Ithaca Acquisition Corporation, but the receivers were actually manufactured by the "General Recreation Inc." incarnation of Ithaca.

Action

- bottom load and ejection.

Serial Number

- numbered on the right side of the receiver/frame, above the trigger-guard; all 87 Ultralight Deerslayers have a "ULT" prefix.

Calibre

- the Ultralight Deerslayer was only produced in 20 GA x 2 3/4", but Deerslayer barrels were produced that could be attached to the 12 GA X 2 3/4" Ultralight; 12 GA guns are actually 87 Ultralights with accessory barrels.

Shots

- fixed underbarrel tubular magazine.

30589 - 2	12 GA X 2 3/4"	1	864	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "ITHACA" is marked on the firearm.

Model

- the model is not marked on the firearm; this is an example of the 5E Grade Ithaca "Knickerbocker" (commonly abbreviated as "Knick" or "Nick") Single Barrel Trap shotgun, manufactured from 1925 to 1986, and resuming in 1988 to 1991.
- the 5E Grade differs from other grades in having small amounts of gold-filled engraving (usually a single game bird on each side) on an engraved colour-case-hardened frame, while less-expensive grades have no gold-filled engraving, and more expensive grades have both more extensive and more gold-filled engraving.
- features include: blued barrel; ventilated rib; bead sight; checkered walnut forearm and pistol-grip stock; colour-case-hardened engraved receiver/frame with small amounts of gold-filled engraving; tang opening mechanism; no safety; high comb on the butt; rubber recoil pad.

Manufacturer

- "ITHACA" is marked on the firearm.

Action

- hinged barrel design.

Serial Number

- serial-numbered on the receiver/frame, in the range of 400000-402789, with a "T" suffix.

Notes

Make

- "ITHACA GUN, ITHACA, N.Y. - MADE IN U.S.A." was observed marked on the barrel.

Model

- "X-CALIBER" was observed marked on the barrel.
- this is a single-shot handgun that Ithaca attempted to market during the late 1980's, in an attempt to capitalize on the growing popularity of metallic silhouette shooting.
- T/C Contender-like break-open design, anatomical wooden grips and forearm, manually-cocked hammer with rotating striker to allow the user to choose centrefire or rimfire positions, and adjustable open sights that can be replaced with a scope mount.
- this model was also advertised as a combination package that included two (2) barrels.
- only limited numbers of these pistols were ever built, as Ithaca couldn't solve several manufacturing problems

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "ITHACA GUN, ITHACA, N.Y. - MADE IN U.S.A." was observed marked on the barrel.
Action	- break-barrel, single-shot, similar to the T/C Contender.
Serial Number	- numbered on receiver/frame.
Calibre	- calibre is marked on the barrel.

FRT Report

Firearm Reference Number (FRN): 30999
Make: Ithaca
Model: X15 Lightning

Summary

Make:	Ithaca
Model:	X15 Lightning
Manufacturer:	Ithaca
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
30999 - 1	22 LR	7	559	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
30999 - 2	22 LR	10	559	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is marked on the barrel and/or receiver/frame.

Model

- model designation is marked on the firearm as "X15 Lightning" or "X-15 Lightning".
- this is an updated, secondary production version of the original X5C Lightning, produced from 1964 to 1967. In 1964 the X5 series ceased production and in 1967 the entire X15 series was dropped from the Ithaca line.
- magazine fed blowback 22 LR semi-automatic rifle, with a one piece walnut pistol grip stock. This rifle differs from the X5C Lightning only in that the X15 has a stock without a finger-groove along the forearm, while the X5C has a finger groove.
- open adjustable sights with Raybar fluorescent red front sight insert, receiver grooved for scope mounts, bolt hold open button on left side of receiver, rotating safety on right side above trigger, take-down screw through bottom of stock and a spring steel magazine release.

Manufacturer

- marked on the barrel and/or receiver/frame.

Action

- direct blowback.

Serial Number

- serial number is marked on the receiver/frame.

Calibre

- marked on the left side.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Notes

Make

- make is marked on the barrel and/or receiver/frame.

Model

- manufactured from 1958 until 1964.
- "X5 LIGHTNING" is marked on the barrel.
- "C" in the model designation denotes the 'clip' magazine.
- "X5C Lightning" is a box magazine fed, blowback operated semi-automatic rifle.
- "X5C Lightning" was replaced by the "X15 Lightning" in 1964.
- "X5C Lightning" rifle differs from the "X15 Lightning" only in that the X-15 has a stock without a finger groove along the forearm, while the X5C has a finger groove.
- features include: walnut or curly maple one piece stock; open adjustable sights with Raybar fluorescent red front sight insert; receiver/frame is grooved for scope mounts; bolt hold open button on left side of receiver/frame; rotating safety on right side above trigger; take down screw through bottom of stock, and a spring steel magazine release.
- "X5 Lightning" rifle with an integral tubular magazine was known as the "X5T Lightning".
- "X5T Lightning" was manufactured from 1959 to 1963.

Manufacturer

- "ITHACA GUN CO., ITHACA, N.Y. MADE IN U.S.A." is marked on the left side of the barrel.

Action

- blowback operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the side of the receiver/frame. - X5C Lightning's serial number has a letter "A" suffix. - X5T Lightning's serial number has a letter "T" suffix or a two letter "AT" suffix.
Calibre	- ".22 CAL. LONG RIFLE" is marked on the left side of the barrel.
Shots	- detachable box magazine.

Notes

Make

- "IVER JOHNSON'S" over "FITCHBURG - MASS - U.S.A." was observed marked on the left side of the receiver/frame.

Model

- "CATTLEMAN" was observed marked on the barrel.
- "1873 Cattleman" is a reproduction of the "Colt model 1873 Single Action Army".
- features include: ramp and blade front sight and fixed or adjustable rear sight; round rifled barrel with a ejection rod assembly; solid top receiver/frame with a removable fluted cylinder and right side loading gate; exposed spur hammer; single action trigger mechanism; walnut grip plates; blue barrel and cylinder, case-hardened receiver/frame, brass trigger guard and backstrap.

Manufacturer

- "A. UBERTI & C. GARDONE V.T. ITALY" was observed marked on the left side of the barrel.
- Uberti logo of a "U" inside an octagonal barrel may be marked on the bottom of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number was observed marked on the underside of the receiver/frame, forward of the trigger guard.
Calibre	- calibre was observed marked on the barrel.
Shots	- removable cylinder.

Make: Iver Johnson
Model: 1879 Hyde's Patent Swing-Out Cylinder Double Action

Summary

Make:	Iver Johnson
Model:	1879 Hyde's Patent Swing-Out Cylinder Double Action
Manufacturer:	Iver Johnson
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
136278 - 1	38 S&W	5	73	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "IVER JOHNSON & CO. MAKERS", and "WORCHESTER" over "MASS. USA" and "PAT'D" and "NOV. 4, '79" over "MARCH 6, '83" was observed marked on the rib of the barrel.

Model

- model designation is not marked on the firearm.
- "IVER JOHNSON & CO. MAKERS", and "WORCHESTER" over "MASS. USA" and "PAT'D" and "NOV. 4, '79" over "MARCH 6, '83" was observed marked on the rib of the barrel.
- Andre Hyde applied for a patents for a side swinging cylinder and was granted Patent Number 221,171 on November 4th of 1879 and Patent Number 273,282 on March 06th of 1883.
- J. P. Lovell Company advertised this revover as the Lovell Safety Double Action Revolver from 1883 to 1887.
- Manhattan Arms Company of Belgium also sold a revolver with this feature, but the cylinder swung out to the left side versus the right side.
- "1879 Hyde's Patent Swing Out Cylinder Double Action" is a double action revolver with a horizontally right side swing-out cylinder.
- features include: blade front sight and a notch in the rear of the top strap for the rear sight; barrel and receiver/frame are a one piece forging; round rifled barrel with solid top rib; solid top receiver/frame with right side swing-out fluted cylinder and loading gate; exposed spur hammer; traditional trigger with trigger guard; double/single action trigger mechanism; square bottom grip strap; rubber grip plates; nickel finish.
- cylinder crane pivots on a screw located on the front under side of the receiver/frame, this allows the cylinder to swing out to the right side for loading and unloading.

Manufacturer

- "IVER JOHNSON & CO. MAKERS", and "WORCHESTER" over "MASS. USA" and "PAT'D" and "NOV. 4, '79" over "MARCH 6, '83" was observed marked on the rib of the barrel.

Serial Number

- serial number is usually marked on the left side of the butt strap, under the grip plate and is repeated on the cylinder tang.
- serial number rationalization unknown.

Shots

- cylinder swings out to the right on a parallel axis to the barrel, on a lever mounted under the barrel. It does not swing down as a conventional cylinder does.

Notes

Make

- "I.J." may be marked on the top strap, this was the abbreviation for "Iver Johnson".

Model

- "I.J. DOUBLE ACTION" and "MODEL 1900" or "I.J. DOUBLE ACTION", "FITCHBURG, MASS." and "MODEL 1900 U.S.A." may be marked on the top strap.
- manufactured from 1900 to 1941.
- features include: octagonal barrel with a blade front sight; solid top receiver/frame with removeable fluted cylinder and a groove in the top strap for a rear sight; cylinder axis pin can be removed thru the front of the receiver/frame; exposed spurred hammer; single/double action trigger mechanism; black plastic grips with the Iver Johnson logo (an owl head within a circle); nickel plated finish.

Manufacturer

- "I.J." may be marked on the top strap, this was the abbreviation for "Iver Johnson".

Serial Number

- primary serial number located under left grip.
- serial number (less prefix letter is also located either on the butt, below the trigger guard or under the top-strap)
- serial ranges are for:
- 22 calibre Small Frame: "1" to "100,000" from 1900 to 1908, "D0001" to "D100,000" from 1909 to 1917, and "A0001" to "A37,700" from 1918 to 1941.
- 32 calibre Medium Frame (5 shot): "1" to "100,000" from 1900 to 1908, "E00001" to "E100,000" from 1909 to 1917, and "B0001" to "B19700" from 1918 to 1941.
- 32 and 38 calibre Large Frame: "1" to "100,000" from 1900 to 1908, "F00001" to "F100,000" from 1909 to 1917, and "C001" to "C20500" from 1918 to 1941.

Other Markings

- Top strap marked as; I.J. DOUBLE ACTION / MODEL 1900 in two lines. This style is also known as Type I, and
I.J. DOUBLE ACTION / FITCHBURG, MASS / MODEL 1900 in three lines, this is the Type II marking.
Type I dates the firearm from 1900 to 1917 and Type II from 1918 to 1941.

31080 - 1	22 LR	9	152	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- shoud be marked on top of the barrel.

Model

- model designation appears in script letters on left side of the barrel as "22 SUPERSHOT"
- top break, automatic ejecting double action revolver with adjustable rear sidght and patent "hammer safety" system.
- manufactured in seven and nine shot versions.
- seven shot version produced from 1928-1931, nine shot version produced 1929 - 1941.
- total production 22,650.

Manufacturer

- should be marked on the top of the barrel, markings read " * IVER JOHHSON'S ARMS & CYCLE WORKS * * FITCHBURG.MASS.U.S.A. *

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number rationalization: the primary reference indicates the rationalization includes the letter "K" as a prefix followed by a series of digits with zeros used as place holders up to the number 1000.
- it is known that there are exceptions to this rationalization.
- the 9 shot "Supershot" and 7 shot "Supershot" variations were serial numbered together. These numbers all start with the "K" prefix. The ranges, in accordance to year dates, are as follows:

1928 K0001 - K3900 (Supershot 7 shot introduced)
1929 K3901 - K6400 (Supershot 9 shot introduced)
1930 K6401 - K10700
1931 K10701 - K15600 (Supershot 7 shot dropped)
1932 K15601 - K19600
1933 K19601 - K19700
1934 K19701 - K19800
1935 K19801 - K19900
1936 K19901 - K20100
1937 K20101 - K20200
1938 K20201 - K21000
1939 K21001 - K21450
1940 K21451 - K21700
1941 K21701 - K22650 (Series discontinued)

- the serial number can be found on the bottom of the top strap and the bottom of the trigger guard. The serial number with the letter code "K" can be found on the left side of the grip strap.

511 - 1	50 BMG	1	840	Prohibited PFR, Part 1, para. 12	Manufacturer Specifications and Commercial Customization	

Notes

Make	- the make may not be marked on the firearm.
Model	- the model designation may not be marked on the firearm, some early samples may be marked "R.A.P." on the right side of the receiver/frame. - features include: no sights, top of receiver/frame designed for optical sight, free floating fluted barrel with flash hider and compensator, bipod, parkerized finish, adjustable synthetic buttstock, pistol grip and forearm. - to load this firearm, the bolt is removed from the receiver/frame and the ammunition is inserted on the bolt face. Then the bolt is inserted back in the receiver/frame. - this rifle was designed by Jerry Haskins who was a Gunmaker in Colorado. Haskins had worked a deal with Iver Johnson and intended for his rifle, originally designated as the "R.A.P. 50" to be handled by them. It would appear that some early samples only bear the original Haskins applied markings with no mention of Iver Johnson. In 1987 this rifle design rights were acquired by AMAC (American Military Arms Corporation) who continued production until operations ceased in 1993.
Manufacturer	- the manufacturer's name may not be marked on the firearm.
Action	- turn bolt operated.
Serial Number	- the serial number is located on the right side of the receiver/frame.
Calibre	- the calibre designation may not be marked on the firearm.

Firearm Reference Number (FRN): 20185
Make: Iver Johnson
Model: 55A Target

Summary

Make:	Iver Johnson
Model:	55A Target
Manufacturer:	Iver Johnson
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
20185 - 1	22 LR	8	114	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
20185 - 2	22 LR	8	152	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- marked on the top of the receiver/frame just above the model designation and manufacturer. Markings may read "IVER JOHNSON" followed by "TARGET".

Model

- manufactured from 1961 to 1975 as the Target 55A and from 1975 to 1979 it was marketed as the Sportsman 55A.
- marked on the top of the receiver/frame just above the manufacturers name, markings may read:
- IVER JOHNSON TARGET
- MOD 55.A PAT.PEND.-
- same specs as Target 55 except the 55A has a loading gate on the right side of the receiver/frame
- double action, solid frame.
- pull pin cylinder release.
- fluted cylinder.
- cylinder has flash control front rim with recessed cylinder chambers.
- fixed channel / grooved rear sight and a fixed blade patridge style front sight.
- one piece walnut or plastic grip .
- oversize, molded one-piece target type grips.

Manufacturer

- "I .J.A.& C.WKS." and "FITCHBURG. MASS .U.S.A." should be marked on the top of the receiver/frame.
- "I .J.A.& C.WKS." is the abbreviation for "Iver Johnson's Arms & Cycle Works"

Serial Number

- the serial number should be located on the front right side of the receiver/frame.
- the serial number should have a letter prefix.

Firearm Reference Number (FRN): 157606
Make: Iver Johnson
Model: Ajax Army

Summary

Make:	Iver Johnson
Model:	Ajax Army
Manufacturer:	Iver Johnson
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
157606 - 1	44 WEBLEY	5	152	Antique AFR, Section 1, para. 7	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Iver Johnson" is not marked on the firearm, but the Iver Johnson grip trademark of an American eagle holding a laurel branch and a sheaf of arrows in its talons is on the grips.

Model

- "Ajax Army" is marked on the barrel.
- manufactured from 1882 to 1886.
- "Ajax Army" is a trade name used by Iver Johnson to sell its largest version of the American Bulldog revolver.
- features include: nickeled finish; octagonal barrel; fixed blade and groove sights; double-action trigger mechanism with the sear trip at the rear of the trigger-guard; trigger-guard screwed and pinned to the frame; a square-backed "saw-handle" style of grip frame that was changed to a rounded style in 1887; and black synthetic grips with the Iver Johnson "eagle" grip logo.

Manufacturer

- "Iver Johnson" is not marked on the firearm, but the Iver Johnson grip trademark of an American eagle holding a laurel branch and a sheaf of arrows in its talons is on the grips.

Action

- double-action revolver.

Serial Number

- serial number is marked on the receiver/frame; these serial numbers are known to have been repeated in each year of production (i.e.: each year, numbering was reset to "1").

Notes

Make

- make is not usually marked on this firearm but the Iver Johnson logo is apparent on the grips.
- original grip plates were usually marked with a "dog's head" motif.

Model

- "American Bull Dog" is marked on the barrel or on the top strap.
- "American Bull Dog" was introduced as a successor to the "British Bull Dog".
- introduced in 1883 and remained in production until 1899.
- features include: fixed sights; octagonal barrel; solid top receiver/frame with a fluted cylinder; exposed spurred hammer; single/double action trigger mechanism; checkered grip plates; blue or nickel-plated finish.
- the right side of the receiver/frame has a machined loading slot cut into it through the standing breech to allow access to the cylinder for loading the chambers.
- cylinder axis pin is removable by means of a spring-loaded release lever that is located underneath the axis pin directly in front of the receiver/frame.
- original grips were usually black composite material with the distinctive Iver Johnson "dogs head" grip logo readily apparent.
- known examples have fluted cylinders and octagonal barrels with fixed blade-type front sight.
- later examples were re-designated as the "American Bulldog Model 1898" and so marked.
- in the 1970, Iver Johnson introduced a new version of this model in 22 LR, 22 MAG with a six shot cylinder and 38 SPL with a five shot cylinder and with barrel lengths of 64 mm (2 1/2") and 102 mm (4").

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- the manufacturers name is not marked on the firearm.
- most credible reference sources place the date of introduction by Johnson, Bye & Company as 1882 or 1883. These same references note that production ended in 1889 or 1900. These dates indicate that the American Bulldog model was produced by the firms of "Johnson, Bye & Company" and its successor "Iver Johnson Arms & Cycle Works".
- as these firearms were typically only marked "American Bulldog" on the top of the barrel the only identifier of the actual manufacturer is the grip plates. Johnson, Bye & Company grips were usually black composite material with the distinctive Johnson & Bye grip logo readily apparent. This logo was a stylized American eagle grasping an olive branch and arrows in its claws with its wings spread over the entire length of the grip plate. Iver Johnson grip plates had a "dog's head" logo surrounding the grip screw.
- it must be noted that as grips are easily interchangeable and remaining stocks of grip plates would have been available after Johnson, Bye & Company became Iver Johnson's Arms & Cycle Works early samples are extremely difficult to associate to either company. Samples have also been noted with spurious "American Bulldog" markings that are believed to be either domestic or foreign copies.

Serial Number

- serialization unknown, but four numerical digits observed.
- may be located on left side of backstrap edge, under the grip.

Remarks

- the "American Bulldog" is the most common of the five known variations of the solid receiver/frame, double action revolvers offered by Johnson, Bye & Company and Iver Johnson. The "American Bulldog" was produced in large, medium or small receiver/frame size variations. Other models produced during this time frame were the Boston Bulldog, British Bulldog, Eagle and Old Hickory.

Make - the "Iver Johnson" name is marked on the firearm and the trade mark "Owl" head is inlaid into the top of the grip plates.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "American Bull Dog" or "Bulldog" may be marked on the firearm. - this double action revolver was manufactured from 1974 to 1979. - features include: blued or nickel finish; round barrel with full length rib; ramp front sight and adjustable rear sight; large solid receiver/frame; loading gate located on the right side of the receiver/frame; double action; round butt with plasitc grip plates. - the model designation includes the words "New Model" to distinguish it from the earlier "American Bull Dog" that was manufactured pre 1900. - do not confuse with the original Iver Johnson "American Bull Dog" which was introduced in 1882/3 and remained in production until 1899/1900. The original "American Bull Dog" model had fixed sights and an octagonal barrel with no rib.
Manufacturer	- the "Iver Johnson" name is marked on the firearm and the trade mark "Owl" head is inlaid into the top of the grip plates.
Action	- double-action revolver.
Serial Number	- the serial number should be located on the front right side of the receiver/frame.

Notes

Make

- the Iver Johnson name is usually marked on the barrel.

Model

- the "Champion" (also known as the Champion Single Action Target) was manufactured from 1939 to 1941 and again from 1946 to 1954 when it was renamed as the "Armsworth". Production was halted during World War II.
- the model designation is marked on the barrel as "IJ Champion" or "- IJ CHAMPION 22 TARGET - " over "SINGLE ACTION FOR LONG RIFLE GTGS".
- features include: blued finish; single action trigger mechanism; break-open design, adjustable rear sight also serves as the opening latch; wood grip; adjustable finger grip on the front-strap.

Manufacturer

- the Iver Johnson name is usually marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial numbers incorporate an "S" prefix.
- the following numbers are reported to have been produced in the noted years.
- 1939; 1,900 examples produced, numbered between S001 and S1900.
- 1940; 200 examples produced, numbered between S1901 and S2100.
- 1941; 200 examples produced, numbered between S2101 and S2300.
- 1942; none produced.
- 1943; none produced.
- 1944; none produced.
- 1945; none produced.
- 1946; 700 examples produced, numbered between S2301 and S3000.
- 1947; 700 examples produced, numbered between S3001 and S3700.
- 1948; 700 examples produced, numbered between S2701 and S4400.
- 1949; 700 examples produced, numbered between S4401 and S5100.
- 1950; 700 examples produced, numbered between S5101 and S5800.
- 1951; 700 examples produced, numbered between S5801 and S6500.
- 1952; 700 examples produced, numbered between S6501 and S7200.
- 1953; 700 examples produced, numbered between S7201 and S7900.
- 1954; 700 examples produced, numbered between S7901 and S8600.
- in 1955 this model became the "Armsworth" or "855" model. Serial numbering continued from S8601 upwards.

Calibre

- marked on top of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make	- "IVER JOHNSON'S ARMS" is marked on the top of the receiver ring.
Model	- "PP" may be marked on the top of the receiver/frame. - features include: blue finish on the receiver/frame and round barrel; adjustable rear sights; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; wooden pistol grip stock with grooved forend, wooden or ventilated metal handguard; front sight mounted on the front barrel band. - overall length with a 229mm (9") barrel is 432mm (17") and average weight is 1.70kgs (3.75lbs). - "PP" or "ENFORCER" may be marked on the top of the receiver/frame. - this firearm is a variant of the Universal Model 3000 Enforcer. - features include: blue finish on the receiver/frame and round barrel; adjustable rear sights; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; wooden pistol grip stock with grooved forend, wooden or ventilated metal handguard; front sight mounted on the front barrel band. - overall length with a 286mm (11.25") barrel is 483mm (19") and average weight is 1.70kgs (3.75lbs).
Manufacturer	- "IVER JOHNSON'S ARMS" and "MIDDLESEX, NEW JERSEY" are marked on the top of the receiver ring.
Action	- gas operated.
Serial Number	- serial number is usually found on the top rear of the receiver/frame or on the left side of the receiver/frame parallel to the breech.
Calibre	- "CAL.30" may be marked on the receiver/frame.
Shots	- detachable box magazine.
Remarks	- manufacturer's names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fitting, sights and other gadgets may also confuse the issue of specific model identification.

Notes

Make

- known example is marked on the rear right side of the barrel as, "IVER JOHNSON'S" over "FITCHBURG, MASS., U.S.A.".

Model

- "HIJO QUIKBREAK" is marked on the rear left side of the barrel.
- introduced/mfg'd 1961.
- this model is very similar to the Iver Johnson, Trailsman Model 66.
- features include: top break with action release lever located on the rear of the top strap; double action trigger; exposed spur hammer; does not have the "hammer-the-hammer" safety system; adjustable sights; cylinder has recessed chambers for centre-fire, the rimfire model has a flash control front rim; manual ejection; two piece plastic grips; blue or nickel plated finish.

Manufacturer

- known example is marked on the rear right side of the barrel as "IVER JOHNSON'S" over "FITCHBURG, MASS., U.S.A.".

Serial Number

- known example had a three digit serial number with a letter prefix marked on the front right side of the receiver/frame.
- letter prefix "R" has been observed.

Calibre

- known example had the calibre designation marked on the front left side of the receiver/frame as "32 S&W".

Notes

Make

- " IVER JOHNSON'S ARMS " is usually marked on the top of the receiver ring.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- this is a variant of the standard U.S. military M1 Carbine. - "US CARBINE" with "CAL.30 M1" or variation thereof may be marked on the top of the receiver/frame in front of the ejection opening. - features include: stainless steel or blued finish on the receiver/frame and round barrel; fixed front sight; knob adjustable rear sights; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; folding or fixed synthetic or hardwood pistol grip stock with perforated metal handguard; left side mounted front sling swivel; may be inletted oil holder/ sling attachment at the buttstock; G.I type front barrel band which may include a bayonet lug. - overall length with a 457mm (18") barrel is 903.73mm (35.58") and average weight is 2.49kgs (5.5lbs).
Manufacturer	- "IVER JOHNSON / N.J." , " IVER JOHNSON'S ARMS / JACKSONVILLE, AR" or " IVER JOHNSON'S ARMS / MIDDLESEX, NEW JERSEY" may be marked on the top of the receiver ring. "IVER JOHNSON'S ARMS /MIDDLESEX, N.J / U.S.A." may be marked on the left rear side of the receiver/frame.
Action	- gas operated.
Serial Number	- serial number is usually found on the top rear of the receiver/frame or on the left side of the receiver/frame parallel to the breech.
Calibre	- "CAL. 30" is normally marked on the top of the receiver/frame. - "CAL.30 M-1 " may be marked on the receiver/frame.
Shots	- detachable box magazine.
Remarks	- manufacturer names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fitting, sights and other gadgets may also confuse the issue of specific model identification.

Notes

Make

- " IVER JOHNSON'S ARMS " is usually marked on the top of the receiver ring.

Model

- this is a variant of the standard U.S. military M1 Carbine.
- "US CARBINE" with "CAL.30 M1" or variation thereof may be marked on the top of the receiver/frame in front of the ejection opening.
- features include: stainless steel or blued finish on the receiver/frame and round barrel; fixed front sight; knob adjustable rear sights; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; folding synthetic or hardwood pistol grip stock with perforated metal handguard; left side mounted front sling swivel; G.I type front barrel band which may include a bayonet lug.

Manufacturer

- "IVER JOHNSON / N.J." , " IVER JOHNSON'S ARMS / JACKSONVILLE, AR" or " IVER JOHNSON'S ARMS / MIDDLESEX, NEW JERSEY" may be marked on the top of the receiver ring. "IVER JOHNSON'S ARMS /MIDDLESEX, N.J / U.S.A." may be marked on the left rear side of the receiver/frame.

Action

- gas operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is usually found on the top rear of the receiver/frame or on the left side of the receiver/frame parallel to the breech.
Calibre	- "CAL.30 M-1 " may be marked on the receiver/frame.
Shots	- detachable box magazine.
Remarks	- Gas operated, semi automatic carbine based on the U.S. Carbine M 1. The "Paratrooper" is visually distinctive in that it has a retractable wire buttstock and a wooded pistol and foregrip, most of these carbines have a metal ventilated handguard. - manufacturer names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fitting, sights and other gadgets may also confuse the issue of specific model identification.

Notes

Make

- " IVER JOHNSON'S ARMS " is usually marked on the top of the receiver ring.

Model

- this is a commerical variant of the standard U.S. military M1 Carbine.
- "US CARBINE" with "CAL.30 M1" or variation thereof may be marked on the top of the receiver/frame in front of the ejection opening.
- features include: blued or stainless steel finish on the receiver/frame and round barrel; fixed front sight; knob adjustable rear sights; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; folding or fixed synthetic pistol grip stock with perforated metal handguard; left side mounted front sling swivel; G.I type front barrel band which may include a bayonet lug.
- overall length with a 457mm (18") barrel is 903.73mm (35.58") and average weight is 2.49kgs (5.5lbs).

Manufacturer

- "IVER JOHNSON / N.J." , " IVER JOHNSON'S ARMS / JACKSONVILLE, AR" or " IVER JOHNSON'S ARMS / MIDDLESEX, NEW JERSEY" may be marked on the top of the receiver ring. "IVER JOHNSON'S ARMS /MIDDLESEX, N.J / U.S.A." may be marked on the left rear side of the receiver/frame.
- " IVER JOHNSON ARMS INC." may also be found on the side of the stock.

Action

- gas operated.

Serial Number

- serial number is located on receiver, either on left front side or top rear.
- serial number is usually found on the top rear of the receiver/frame or on the left side of the receiver/frame parallel to the breech.

Calibre

- "CAL.30 M-1 " may be marked on the receiver/frame.

Shots

- detachable box magazine.

Remarks

- Identical to the Iver Johnson carbine Model PM30 HB except has black plastic (Zytel) stock with vertical pistol grip. The Iver Johnson 'Survival Carbine' was available with a folding stock and stainless steel receiver, as options. - manufacturer names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fitting, sights and other gadgets may also confuse the issue of specific model identification.

- overall length with a 457mm (18") barrel is 903.73mm (35.58") and average weight is 2.49kgs (5.5lbs).

Manufacturer

- "IVER JOHNSON / N.J." , " IVER JOHNSON'S ARMS / JACKSONVILLE, AR" or " IVER JOHNSON'S ARMS / MIDDLESEX, NEW JERSEY" may be marked on the top of the receiver ring. "IVER JOHNSON'S ARMS /MIDDLESEX, N.J / U.S.A." may be marked on the left rear side of the receiver/frame.

Action

- gas operated.

Serial Number

- serial number is usually found on the top rear of the receiver/frame or on the left side of the receiver/frame parallel to the breech.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- "CAL.30 M-1 " may be marked on the receiver/frame.
Shots	- detachable box magazine.
Remarks	- manufacturer names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fitting, sights and other gadgets may also confuse the issue of specific model identification.

Notes

Make

- " IVER JOHNSON'S ARMS " or a variation thereof is usually marked on the top of the receiver ring.

Model

- this is a commercial version of the standard U.S. military M1 Carbine.
- "US CARBINE" with "CAL.30 M1" or variation thereof may be marked on the top of the receiver/frame in front of the ejection opening.
- features include: blue stainless steel finish on the receiver/frame and round barrel; fixed front sight; knob adjustable rear sights; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; hardwood pistol grip stock with matching or perforated metal handguard; may be inletted oil holder/ sling attachment at the buttstock; left side mounted front sling swivel; G.I type front barrel band which may include a bayonet lug.
- overall length with a 457mm (18") barrel is 903.73mm (35.58") and average weight is 2.49kgs (5.5lbs).

Manufacturer

- "IVER JOHNSON / N.J." , " IVER JOHNSON'S ARMS / JACKSONVILLE, AR" or " IVER JOHNSON'S ARMS / MIDDLESEX, NEW JERSEY" may be marked on the top of the receiver ring. "IVER JOHNSON'S ARMS /MIDDLESEX, N.J / U.S.A." may be marked on the left rear side of the receiver/frame.

Action

- gas operated.

Serial Number

- serial number is usually found on the top rear of the receiver/frame or on the left side of the receiver/frame parallel to the breech.

Calibre

- "CAL.30 M-1 " may be marked on the receiver/frame.

Shots

- Uses detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Also Known As/Product Code

- The Iver Johnson PM 30 HB is identical, except for markings, to the U.S. government issue 30 M1 Carbine

Remarks

- Gas operated, semi automatic carbine identical in all respects to the U.S. government issue M1 Carbine. - manufacturer names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fitting, sights and other gadgets may also confuse the issue of specific model identification.

FRT Report

Firearm Reference Number (FRN): 20194
Make: Iver Johnson
Model: Protector Sealed Eight

Summary

Make:	Iver Johnson
Model:	Protector Sealed Eight
Manufacturer:	Iver Johnson
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
20194 - 1	22 LR	8	64	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is marked on top of the barrel as:
"IVER JOHNSON ARMS & CYCLE WORKS" over "FITCHBURG MASS.U.S.A.".

Model

- introduced in 1934 and discontinued in 1941.
- "PROTECTOR" over "SEALED EIGHT" is marked on the left side of the barrel.
- the left side of the barrel lug is normally marked, "I.J".
- also known as the "Model 84".
- features include: double action, top break, blued receiver/frame and barrel, spurred hammer, fixed or adjustable rear sight with a fixed blade front sight, fluted cylinder, automatic ejection, recessed cylinders and may have walnut grips.

Manufacturer

- manufacturer's designation is marked on top of the barrel as:
"IVER JOHNSON ARMS & CYCLE WORKS" over "FITCHBURG MASS.U.S.A.".

Serial Number

- serial number is marked on the receiver/frame and may also be marked on the trigger guard and the left side of the grip strap.
- serial number may consist of a "L" prefix followed by four or five sequential numbers.

Notes

Make

- "IVER JOHNSON'S ARMS & CYCLE WORKS" and "FITCHBURG, MASS. U.S.A." is marked on the barrel.

Model

- model is not marked on the firearm.
- "PAT'D.APR.6.86.FEB.15.87.MAY10.87.AUG.25.96.PAT'S.PENDING"or *PAT'D.APR.6.86.FEB.15.87.MAY10.87.** over **MAR.13.88.AUG.25.96.PAT'SPENDING** or "PAT'D.JUNE16.96.AUG.25.96" over "SEPT.4.04.PAT'S.PENDING is marked on the barrel rib, on the side of the barrel or on the butt.
- 650,000 of the Safety Hammerless Second Models were made from 1897 to 1908.
- the "Cycle" designation is derived from the factory advertising claim that this is ideal for cyclists and autoists due to the hammerless feature and short barrel (51mm/2").
- available in a small receiver/frame and a large receiver/frame versions.
- features include: blued or nickel finish; half moon front sight and a raised rear sight on a ribbed barrel; top break, automatic ejecting design; double action only trigger mechanism; black plastic grips with the "owl's head" logo.
- also offered in an external hammer version and in several variations.
- see other notes for Patent markings.
- identification features for the "Safety Cycle Hammerless Automatic Model 2" are: a 51mm/2" barrel; a T-shaped top-latch with knurled buttons on each side, allowing the latch to be lifted to open the revolver; a twin rectangular top-post at the top of the receiver/frame, that the lock latch sits over; a double-action trigger mechanism with a Glock-style safety blade inset into the trigger; two pins at the top of the trigger-guard (one for the trigger, and one to anchor the rear of the trigger-guard); a flat S-shaped mainspring inside the grip; and, on original grips, an owl's-head pointing towards the trigger-guard.
- "Safety Cycle Hammerless Automatic Model 3s" repeat these features, except they have THREE pins at the top of the trigger-guard (to handle the greater pressures of smokeless ammunition), they dispense with the trigger-blade safety, they use a coil mainspring inside the grip, and, on original grips, the beak of the owl's-head will be pointing towards the grip-screw.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "IVER JOHNSON'S ARMS & CYCLE WORKS" and "FITCHBURG, MASS. U.S.A." was observed marked on the barrel.
Action	- double-action-only revolver.
Serial Number	- serial number may be marked in the following locations: bottom of butt strap, bottom of trigger guard, underside of the top strap and on the receiver/frame under the grip plates. - numbered within the Safety Automatic series with a letter prefix and five or six numbers.
Other Markings	- Patent Markings: - "First Model" on the top of the barrel rib: "PAT'D.APR.6.86.FEB.15.87.MAY10.87.DEC.26.93.PAT'S.PENDING". - "Second Model" on the top of the barrel rib: "PAT'D.APR.6.86.FEB.15.87.MAY10.87.AUG.25.96.PAT'S.PENDING" or on the left side of the barrel or on the butt: *PAT'D.APR.6.86.FEB.15.87.MAY10.87.** over **MAR.13.88.AUG.25.96.PAT'SPENDING** or "PAT'D.JUNE16.96.AUG.25.96" over "SEPT.4.04.PAT'S.PENDING. - "Third Model" on top of the barrel or on the bottom of the butt: "PAT.'D.AUG.25.96" over "PAT'S PENDING" or "PAT.'D.NOV.17.08" over "PAT'S PENDING".

Notes

Make

- make appears on the barrel.

Model

- was manufactured from 1894 to 1946.
- official production of the small frame 22 LR versions ran from 1900 to 1941.
- production of the small frame 32 versions ran from 1894 to 1941.
- production of the large frame 38 & 32 versions ran from 1894 to 1946.
- model designation does not appear on the firearm.
- features include: top break receiver/frame; exposed hammer; automatic shell ejection upon opening; double action trigger mechanism; sight rib on barrel; nickel or blued finish.
- also available with a Bourne Knuckleduster grip extension.
- identification features for the "Safety Hammer Automatic" are: a top-latch with a knurled button only on the left side, allowing the latch to be lifted to open the revolver; a single square top-post at the top of the receiver/frame, that the lock latch sits over; a double-action trigger mechanism with the single-action sear at the rear of the trigger-guard; two pins at the top of the trigger-guard (one for the trigger, and one to anchor the rear of the trigger-guard); a flat S-shaped mainspring inside the grip; and, on original grips, an owl's-head with the beak pointing towards the trigger-guard.

Manufacturer

- the manufacturers name appears on the barrel.

Action

- double action, top break revolver.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the only firearms of this model line produced after 1945 were large frame variations, with hammer, in the serial number range of H94251 to approximately H96250.
- all special orders where numbered from 1 & up without a prefix.
- Iver Johnson revolvers of this model may have serial numbers stamped on the bottom of the top strap, the bottom of the trigger guard, the bottom of the butt and/or the left side of the grip frame underneath the grips. The complete serial number usually has a letter prefix. It is essential to check all possible locations and use the number which includes the letter prefix. Only centrefire revolvers made prior to 1896 and rimfire revolvers made prior to 1911 will not have a letter prefix.

Notes

Make

- make appears on the barrel.

Model

- manufactured from 1897 to 1908.
- the "second model" differs from the first in only one way - a stronger top latch. It has a double top post-type latch instead of a single top post latch.
- the firearm in 32 S&W LONG is built on the 38 receiver.
- model does not appear on the firearm.
- features include: top break frame; exposed hammer; automatic shell ejection upon opening; double action; sight rib on barrel; nickel or blued finish.
- identification features for the "Safety Hammer Automatic Model 2" are: a T-shaped top-latch with knurled buttons on each side, allowing the latch to be lifted to open the revolver; a twin rectangular top-post at the top of the receiver/frame, that the lock latch sits over; a trigger mechanism with a single-action sear at the rear of the trigger-guard; two pins at the top of the trigger-guard (one for the trigger, and one to anchor the rear of the trigger-guard); a flat S-shaped mainspring inside the grip; and, on original grips, an owl's-head pointing towards the trigger-guard.
- "Safety Hammer Automatic Model 3s" repeat these features, except they have THREE pins at the top of the trigger-guard (to handle the greater pressures of smokeless ammunition), and they use a coil mainspring inside the grip.

Manufacturer

- manufacturer is marked on the barrel.

Action

- double action, top break revolver.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- located under the left grip panel.
- different ranges were used according to the year of manufacture:

1897 A50001 - A100000
1898 E00001 - E100000
1899 F00001 - F100000
1900 A00001 - A100000
1901 E00001 - E100000
1902 F00001 - F50000
1903 F50001 - F100000
1904 K00001 - K100000
1905 N00001 - N100000
1906 P00001 - P100000
1907 S00001 - S50000
1908 S50001 - S100000

- all special orders were numbered from 1 & up without a prefix.
- a "T" prefix has been observed for production in 1907 and 1908.

Remarks

- Iver Johnson revolvers of this model may have serial numbers stamped on the bottom of the top strap, the bottom of the trigger guard, the bottom of the butt and/or the left side of the grip frame underneath the grips. The complete serial number usually has a letter prefix. It is essential to check all possible locations and use the number which includes the letter prefix. Only centrefire revolvers made prior to 1896 and rimfire revolvers made prior to 1911 will not have a letter prefix.

Notes

Make

- "IVER JOHNSON'S ARMS & CYCLE WORKS" was observed marked on the barrel.

Model

- manufactured from 1909 to 1946.
- model not marked on firearm.
- western walnut or hard oversize rubber grips was an option.
- nickel finish was standard and blue finish was optional.
- features include: top break frame; exposed spur hammer; automatic shell ejection upon opening; single/double action trigger mechanism; sight rib on barrel.
- the owl on the original grips of this model faces the grips screw, rather than the trigger as was the case in earlier models.
- this model variation was specifically designed to handle smokeless powder cartridges.
- readily identifiable by the additional trigger guard pin located at the front of the trigger guard; the previous two versions of this firearm were only pinned at the rear of the trigger guard.
- also known as the Third Model or New Model of 1909.
- this entry is designed to encompass all of the variations for this model series: this includes, large frame and small frame versions in both central fire and rimfire calibres.
- identification features for the "Safety Hammer Automatic Model 3" are: a T-shaped top-latch with knurled buttons on each side, allowing the latch to be lifted to open the revolver; a twin rectangular top-post at the top of the receiver/frame, that the lock latch sits over; a double-action trigger mechanism with a single-action sear at the rear of the trigger-guard; three pins at the top of the trigger-guard (one for the trigger, and one each to anchor the front and rear of the trigger-guard); a coil mainspring inside the grip; and, on original grips, an owl's-head with the beak pointing towards the grip-screw.

Manufacturer

- "IVER JOHNSON'S ARMS & CYCLE WORKS" and "FITCHBURG, MASS. U.S.A." was observed marked on the barrel.

Action

- break open action.

Serial Number

- serial number may be marked in the following locations: bottom of butt strap, bottom of trigger guard, underside of top strap, grip frame underneath grip plates.
- the complete serial number usually has a letter prefix. It is essential to check all possible locations and use the number which includes the letter prefix.
- the 38 S&W has a letter code in front of the serial number.
- the 32 S&W LONG did not have the letter code in front of the serial number, the highest number encountered was 87422.
- all special orders were numbered from 1 & up without a letter prefix.

Notes

Make

- make appears on the barrel.

Model

- was manufactured from 1894 to 1941.
- model does not appear on the firearm.
- features include: top break frame; hammerless; automatic cartridge case ejection upon opening; double action; sight rib on barrel; nickel or blued finish.
- also available with a Bourne Knuckleduster grip extension.
- identification features for the "Safety Hammerless Automatic" are: a top-latch with a knurled button only on the left side, allowing the latch to be lifted to open the revolver; a single square top-post at the top of the receiver/frame, that the lock latch sits over; a double-action trigger mechanism with the single-action sear at the rear of the trigger-guard; two pins at the top of the trigger-guard (one for the trigger, and one to anchor the rear of the trigger-guard); a flat S-shaped mainspring inside the grip; and, on original grips, an owl's-head with the beak pointing towards the trigger-guard.

Manufacturer

- appears on the barrel.

Action

- double action, top break revolver.

Serial Number

- serial number may be found on the bottom of the top strap, the bottom of the trigger guard, the bottom of the butt and/or the left side of the grip frame underneath the grips. The complete serial number usually has a letter prefix.
- all special orders where numbered from 1 & up without a prefix.

Remarks

- Iver Johnson revolvers of this model may have serial numbers stamped on the bottom of the top strap, the bottom of the trigger guard, the bottom of the butt and/or the left side of the grip frame underneath the grips. The complete serial number usually has a letter prefix. It is essential to check all possible locations and use the number which includes the letter prefix. Only centrefire revolvers made prior to 1896, rimfire revolvers made prior to 1911, and special orders, will not have a letter prefix.

Notes

Make	- make appears on the barrel.
Model	- model does not appear on the firearm. - made in nine variations from 1895 to 1908. - this model uses a double post latch system, the earlier version used a single post. - features include: fixed sights; round barrel with top rib; front hinged receiver/frame with fluted cylinder, automatic ejection and break open release located on the top strap; concealed hammer; double action trigger mechanism; checkered grip plates; blue or nickel plated finish. - identification features for the "Safety Hammerless Automatic Model 2" are: a T-shaped top-latch with knurled buttons on each side, allowing the latch to be lifted to open the revolver; a twin rectangular top-post at the top of the receiver/frame, that the lock latch sits over; a double-action trigger mechanism with a safety blade inset into the trigger; two pins at the top of the trigger-guard (one for the trigger, and one to anchor the rear of the trigger-guard); a flat S-shaped mainspring inside the grip; and, on original grips, an owl's-head pointing towards the trigger-guard. - "Safety Cycle Hammerless Automatic Model 3s" repeat these features, except they have THREE pins at the top of the trigger-guard (to handle the greater pressures of smokeless ammunition), they dispense with the trigger-blade safety, they use a coil mainspring inside the grip, and the owl's-head on original grips will have the beak pointing towards the grip-screw.
Manufacturer	- appears on the barrel.
Action	- double action, top break revolver.
Serial Number	- all special orders where numbered from 1 & up without a prefix - as there are many variations within this Model, serial numbers are the most practical means to identify firearms of this model. - range: 1 - 100000, D1 - D100000, J1 - J100000, R1 - R100000
Barrel	- the 51mm was introduced in 1904. - the 89mm was discontinued in 1904.
Remarks	- Iver Johnson revolvers of this model may have serial numbers stamped on the bottom of the top strap, the bottom of the trigger guard, the bottom of the butt and/or the left side of the grip frame underneath the grips. The complete serial number usually has a letter prefix. It is essential to check all possible locations and use the number which includes the letter prefix. Only centrefire revolvers made prior to 1896, rimfire revolvers made prior to 1911, and special orders, will not have a letter prefix.

Notes

Make

- "IVER JOHNSON'S ARMS & CYCLE WORKS" over "FITCHBURG MASS. U.S.A." is marked on the rib of the barrel.
- "PAT'D.JUNE16.96.AUG.25.96" over "SEPT.4.04. PAT'S. PENDING" or "PAT'D.AUG.25.96.NOV.17.08" over "PAT'S.PENDING" or "PAT'D.NOV.17.08" over "PAT'S.PENDING" is usually marked on the bottom of the grip strap of the receiver/frame.

Model

- "Safety Hammerless Automatic Model 3" is not marked on the firearm.
- manufactured from 1909 to 1941.
- 100,800 produced.
- Safety Hammerless Automatic Model 3 was specifically designed to handle smokeless powder cartridges.
- Safety Hammerless Automatic Model 3 is readily identifiable by the additional trigger guard pin located at the front of the trigger guard; the two previous Safety Hammerless Automatic versions were only pinned at the rear of the trigger guard.
- Safety Hammerless Automatic Models were available in small and large frame versions in both central fire and rim fire calibres.
- Safety Hammerless Automatic Model 3 with a 51mm (2") barrel was known as the Safety Cycle Hammerless Automatic Model 3.
- features include: fixed sights; round barrel with top rib; front hinged receiver/frame with a fluted cylinder, automatic ejection and break open release located on the top strap; concealed hammer; double action trigger mechanism; mother-of-pearl, western walnut or hard oversize rubber grip plates; blue or nickel plate finish.
- the "Owl" logo on the grips of the Safety Hammerless Automatic Model 3 faces the grips screw, rather than the trigger as was the case in earlier models.
- identification features for the "Safety Hammerless Automatic Model 3" are: a T-shaped top-latch with knurled buttons on each side, allowing the latch to be lifted to open the revolver; a twin rectangular top-post at the top of the receiver/frame, that the lock latch sits over; a double-action trigger mechanism WITHOUT a safety blade inset into the trigger; three pins at the top of the trigger-guard (one for the trigger, and one each to anchor the front and rear of the trigger-guard); a coil mainspring inside the grip; and, on original grips, an owl's-head with the beak pointing towards the grip-screw.

Manufacturer

- "IVER JOHNSON'S ARMS & CYCLE WORKS" over "FITCHBURG MASS. U.S.A." is marked on the rib of the barrel.
- "PAT'D.JUNE16.96.AUG.25.96" over "SEPT.4.04. PAT'S. PENDING" or "PAT'D.AUG.25.96.NOV.17.08" over "PAT'S.PENDING" or "PAT'D.NOV.17.08" over "PAT'S.PENDING" is usually marked on the bottom of the grip strap of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- hinged barrel design.

Serial Number

- serial number may be marked in the following locations: bottom of butt strap, bottom of trigger guard, underside of top strap, on the grip frame underneath the grip plates.
- the complete serial number usually has a letter prefix. It is essential to check all possible locations and use the number which includes the letter prefix.
- the 38 S&W has a letter code "D" or "N" in front of the serial number.
- the 32 S&W LONG has a letter code "B" or "I" in front of the serial number, last know highest number recorded was: I 38550.
- all special orders were numbered from 1 & up without a letter prefix.

Notes

Make

- " IVER JOHNSON'S ARMS " or some variation thereof is usually marked on the top of the receiver ring. The Iver Johnson Owl Logo may be found on the side of some synthetic stocks.

Model

- this is a commercial variant of the standard U.S. military M1 Carbine.
- "US CARBINE" with "CAL.30 M-1" or variation thereof may be marked on the top of the receiver/frame in front of the ejection opening.
- features include: blue finish on the receiver/frame and round barrel; fixed front sight; knob adjustable rear sights; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; folding black synthetic pistol grip stock with perforated metal handguard; sling attachment at the pistol grip; left side mounted front sling swivel; G.I type front barrel band which may include a bayonet lug.
- overall length with a 457mm (18") barrel is 959mm (37.75") and average weight is 2.94kgs (6.5lbs).

Manufacturer

- "IVER JOHNSON / N.J." , " IVER JOHNSON'S ARMS / JACKSONVILLE, AR" or " IVER JOHNSON'S ARMS / MIDDLESEX, NEW JERSEY" may be marked on the top of the receiver ring.
- "IVER JOHNSON'S ARMS /MIDDLESEX, N.J / U.S.A." may be marked on the left rear side of the receiver/frame.

Action

- gas operated.

Serial Number

- serial number is usually found on the top rear of the receiver/frame or on the left side of the receiver/frame parallel to the breech.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- "CAL.30 M-1 " may be marked on the receiver/frame.
Shots	- detachable box magazine.
Remarks	- manufacturer names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fitting, sights and other gadgets may also confuse the issue of specific model identification.

FRT Report

Firearm Reference Number (FRN): 128717
Make: Iver Johnson
Model: SC30FS

Summary

Make:	Iver Johnson
Model:	SC30FS
Manufacturer:	Iver Johnson
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
128717 - 1	30 CARBINE	5	457	Prohibited PFR, Part 1, para. 236(z.17)	Manufacturer Specifications and Commercial Customization	
128717 - 2	30 CARBINE	15	457	Prohibited PFR, Part 1, para. 236(z.17)	Manufacturer Specifications and Commercial Customization	
128717 - 3	30 CARBINE	30	457	Prohibited PFR, Part 1, para. 236(z.17)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- " IVER JOHNSON'S ARMS " or some variation thereof is usually marked on the top of the receiver ring. The Iver Johnson Owl Logo may be found on the side of some synthetic stocks.

Model

- this is a commercial variant of the standard U.S. military M1 Carbine.
- "US CARBINE" with "CAL.30 M-1" or variation thereof may be marked on the top of the receiver/frame in front of the ejection opening.
- features include: stainless finish on the receiver/frame and round barrel; fixed front sight; knob adjustable rear sights; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; folding black synthetic pistol grip stock with perforated metal handguard; sling attachment at the pistol grip; left side mounted front sling swivel; G.I type front barrel band which may include a bayonet lug.
- overall length with a 457mm (18") barrel is 959mm (37.75") and average weight is 2.94kgs (6.5lbs).

Manufacturer

- "IVER JOHNSON / N.J." , " IVER JOHNSON'S ARMS / JACKSONVILLE, AR" or " IVER JOHNSON'S ARMS / MIDDLESEX, NEW JERSEY" may be marked on the top of the receiver ring.
- "IVER JOHNSON'S ARMS /MIDDLESEX, N.J / U.S.A." may be marked on the left rear side of the receiver/frame.

Action

- gas operated.

Serial Number

- serial number is usually found on the top rear of the receiver/frame or on the left side of the receiver/frame parallel to the breech.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- "CAL.30 M-1 " may be marked on the receiver/frame.
Shots	- detachable box magazine.
Remarks	- manufacturer names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fitting, sights and other gadgets may also confuse the issue of specific model identification.

- " IVER JOHNSON'S ARMS " or some variation thereof is usually marked on the top of the receiver ring. The Iver Johnson Owl Logo may be found on the side of some synthetic stocks.

Model

- this is a commercial variant of the standard U.S. military M1 Carbine.
- "US CARBINE" with "CAL.5.7" or variation thereof may be marked on the top of the receiver/frame in front of the ejection opening.
- features include: stainless steel finish on the receiver/frame and round barrel; fixed front sight; knob adjustable rear sights; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; black synthetic pistol grip stock with perforated metal handguard; sling attachment at the pistol grip; left side mounted front sling swivel; G.I type front barrel band which may include a bayonet lug.
- overall length with a 457mm (18") barrel is 940mm (37") and average weight is 2.49kgs (5.5lbs).

Manufacturer

- "IVER JOHNSON / N.J." , " IVER JOHNSON'S ARMS / JACKSONVILLE, AR" or " IVER JOHNSON'S ARMS / MIDDLESEX, NEW JERSEY" may be marked on the top of the receiver ring.
- "IVER JOHNSON'S ARMS /MIDDLESEX, N.J / U.S.A." may be marked on the left rear side of the receiver/frame.

Action

- gas operated.

Serial Number

- serial number is usually found on the top rear of the receiver/frame or on the left side of the receiver/frame parallel to the breech.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- "CAL.5.7 " may be marked on the receiver/frame.
Shots	- detachable box magazine.
Remarks	- manufacturer names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fitting, sights and other gadgets may also confuse the issue of specific model identification.

FRT Report

Firearm Reference Number (FRN): 20192
Make: Iver Johnson
Model: Sealed 8

Summary

Make:	Iver Johnson
Model:	Sealed 8
Manufacturer:	Iver Johnson
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
20192 - 1	22 LR	8	64	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "I.J. SEALED 8" over "I.J.A. & C. WKS." over "FITCHBURG, MASS. U.S.A." was observed marked on the top strap of the receiver/frame.
- "I.J." is the abbreviation for "Iver Johnson".
- "I.J.A. & C. WKS." is the abbreviation for "Iver Johnson Arms & Cycle Works".

Model

- "I.J. SEALED 8" was observed marked on the top strap of the receiver/frame.
- manufactured from 1952 to 1954.
- features include: round barrel with half-moon blade front sight; solid top receiver/frame with removable fluted cylinder, right side cut-out for loading and a groove in the top strap for the rear sight; exposed spur hammer; single/double action trigger mechanism; pull pin cylinder release is located on the front of the receiver/frame; walnut grip plates; blued finish.

Manufacturer

- "I.J. SEALED 8" over "I.J.A. & C. WKS." over "FITCHBURG, MASS. U.S.A." was observed marked on the top strap of the receiver/frame.
- "I.J." is the abbreviation for "Iver Johnson".
- "I.J.A. & C. WKS." is the abbreviation for "Iver Johnson Arms & Cycle Works".

Serial Number

- serial number was observed marked on the left side of the grip strap of the receiver/frame and repeated on the trigger guard.
- observed serial number consisted of a letter "N" prefix and five numbers.

20258 - 4	38 S&W	5	127	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Iver Johnson" is not marked on the firearm.

Model

- "Secret Service Special" is marked on the left side of the barrel.
- "Secret Service Special" was believed to have began manufacture in 1917. However, these firearms could have been manufactured as early as 1912.
- this particular model represents the small receiver/frame version of this handgun series as made by Iver Johnson. A large receiver/frame model also exists. This model also represents the 1917 series of pistols by having the "hammer safety block system" as patented number 1,227,531 granted on May 22, 1917.
- a second series of revolvers produced in 1923 did not have the "hammer safety block system".
- "Secret Service Special" was a trade brand/name on revolvers sold by Fred Biffar Company of Chicago, Illionois, U.S.A.
- "Secret Service Special" revolvers were manufactured in North America by Harrington & Richardson Arms Company, Hopkins & Allen Firearms Company, Iver Johnson's Arms & Cycle Works, and Meriden Arms Company.
- "SSS" monogram inside a circle is usually moulded into the grip plates.
- "SSS" is the abbreviation for "Secret Service Special".

Manufacturer

- manufacturer's name is not marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number range begain at 1 and went up to at least 25,100. - serial number is marked on the side of the grip strap of the receiver/frame and may be repeated on the underside of the top strap and trigger guard. - observed serial number had a letter "A" prefix followed by five numbers marked on the grip strap of the receiver/frame and only the five digits were marked on the trigger guard and top strap.
Calibre	- calibre designation is marked on the top of the barrel.
Other Markings	- "PAT. MAY 22 1917" may be marked on the right side of the receiver/frame.

46728 - 8	16 GA	1	914	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Model

- manufactured from 1900 to 1908.
- model name is not marked on this firearm.
- exposed, rebounding hammer is centrally located at the rear of the action; hammer is unusual in that it has a shortened hammer spur - hence the name, "semi-hammerless".
- this firearm is also characterized by its "ring-action" type method of opening the action; it has a ring located within the trigger guard in front of the trigger which is pulled to break open the action only when the hammer is fully forward.
- extractor or auto-ejecting.
- plain walnut stock and forend.

Action

- hinged barrel design.

Serial Number

- known example had a five digit number without prefix or suffix marked on the bottom of the trigger guard and repeated on the barrel lug.

Notes

Make

- may be marked on the receiver/frame or barrel assembly.

Model

- this is a generic record; other records may exist which may better describe the firearm being identified.
- features may include:
- boxlock design;
- top lever-opening;
- double triggers or single selective trigger;
- walnut buttstock and forend;
- automatic safety;
- automatic ejectors;
- bead foresight.

Manufacturer

- may be marked on the receiver/frame or barrel assembly.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- may be marked on the barrel.
Remarks	- Iver Johnson produced a hammerless side by side shotgun without a model designation between 1913 and 1923. - as this record is a generic entry, it may serve to identify both this unnamed model and other examples which may not bear specific model markings.

FRT Report

Firearm Reference Number (FRN): 117222
Make: Iver Johnson
Model: Slide Action

Summary

Make:	Iver Johnson
Model:	Slide Action
Manufacturer:	ERMA Werke
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Pump Action
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
117222 - 2	22 LR	12	470	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- known example is marked with "Iver Johnson Arms, Jacksonville. AR" and "Iver Johnson" in two different locations on the barrel.

Model

- known example marked "Slide Action" on the rear of the barrel.
- introduced 1985, discontinued 1986; re-introduced 1988, discontinued 1990.
- features include:
- pump action, solid receiver/frame, exposed hammer, right side ejection,
- hooded front sight and step adjustable rear sight,
- walnut finish hardwood buttstock and forearm,
- plastic buttplate, blued finish.
- West German proofmarks may be apparent on the receiver/frame and/or barrel.

Manufacturer

- known example had the letters ERMA within a circle marked on the underside of the receiver/frame.

Serial Number

- known example had a six digit number without prefix or suffix marked on the underside of the receiver/frame.

Calibre

- known example had the calibre designation marked on the rear of the barrel, eg., "Cal. .22 S.L.LR".

Shots

- under barrel tubular magazine.
- factory listed magazine capacities: 19 Short, 15 Long, 12 Long Rifle.

Other Markings

- known example was marked "Made in West-Germany" on the rear of the barrel.

128701 - 3	30 CARBINE	30	229	Prohibited PFR, Part 1, para. 39	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "IVER JOHNSON'S ARMS" or variation thereof is usually marked on the top of the receiver ring.

Model

- "PP" may be marked on the top of the receiver/frame.
- features include: blue or stainless steel finish on the receiver/frame and round barrel; adjustable rear sights; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; wooden pistol grip stock with grooved forend, wooden or ventilated metal handguard; front sight mounted on the front barrel band.
- overall length with a 229mm (9") barrel is 432mm (17") and average weight is 1.70kgs (3.75lbs).

Manufacturer

- "IVER JOHNSON / N.J." , " IVER JOHNSON'S ARMS / JACKSONVILLE, AR" or " IVER JOHNSON'S ARMS / MIDDLESEX, NEW JERSEY" may be marked on the top of the receiver ring. "IVER JOHNSON'S ARMS /MIDDLESEX, N.J / U.S.A." may be marked on the left rear side of the receiver/frame.

Action

- gas operated.

Serial Number

- serial number is usually found on the top rear of the receiver/frame or on the left side of the receiver/frame parallel to the breech.

Calibre

- "CAL.30 M-1" may be marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.

Remarks

- manufacturer names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fitting, sights and other gadgets may also confuse the issue of specific model identification.

Notes

Make

- "I.J.A. & C.W FITCHBURG. MASS. U.S.A." should be marked on the top of the barrel of the first model.
- "I.J.A. & C. WKS." and "FITCHBURG MASS.U.S.A." should be marked on the on the top strap of the second model.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured between 1932 and 1954.
- "I.J. TARGET SEALED 8" should be marked on the left side of the barrel, on the first model.
- "I.J. TARGET SEALED 8" should be marked on the on the top strap, on the second model.
- "I.J. SEALED 8" was observed marked on the top strap of a sample second model with a round 64mm (2 1/2") barrel.
- features include: octagonal or round barrel; solid top receiver/frame with removeable recessed/counterbored fluted cylinder; cylinder pin release is located on the front of the receiver/frame; exposed spurred hammer; single/double action trigger mechanism; case color or blued receiver/frame, blued barrel and cylinder; fixed channel/grooved rear sight and a fixed blade patridge style front sight; one piece walnut or plastic grip
- first model had an octagonal barrel.
- second model had a round barrel.

Manufacturer

- "I .J.A.& C.W FITCHBURG. MASS. U.S.A." should be marked on the top of the barrel of the first model.
- "I.J.A. & C. WKS." and "FITCHBURG MASS.U.S.A." should be marked on the on the top strap of the second model.

Serial Number

- serial number can be found on the bottom of the top strap and the bottom of the trigger guard.
- serial number with the letter code "M or N" can be found on the left side of the grip strap.
- serial number rationalization: - a primary reference indicates that the rationalization includes the letter M or N as a prefix followed by a series of digits with zeros used as place holders up to the number 1000.
- It is known that there are exceptions to this rationalization.
- These following serial numbers all start with the "M or N" prefix.
- The ranges, in accordance to year dates, are as follows:

1932 M0001 - M1400
1933 M1401 - M3300
1934 M3301 - M3900
1935
1936
1937 M3901 - M5700

Notes

Make

- the Iver Johnson trademark will normally appear on the slide.
- Iver Johnson has used different variations of its trademark over the years.
- the Iver Johnson trade mark has an owl prominently displayed, either in a circle, square or circle with the words TRADE MARK on top and IVER JOHNSON on the bottom.

Model

- model designation is marked on the right side of the slide.
- manufactured between 1981 and 1988.
- designed by "ERMA WERKES" of Germany.
- this model is advertised in factory literature as the "Pocket Pistol" model "TP25".
- this model resembles the Walther PPK.
- the TP was also sold in calibre 22 LR as the "TP22".
- features include: double action trigger mechanism: exposed hammer: slide mounted safety: fixed sights: plastic wrap around grips: blued or nickel finish.

Manufacturer

- "IVER JOHNSON" and "JACKSONVILLE, AR." will be marked on the left side of the firearm.

Action

- blowback operated.

Shots

- detachable box magazine.

Notes

Make

- the make is normally marked on both sides of the slide as, "IVER JOHNSON" with the owl logo. The right side of the slide may have the Iver Johnson address, "JACKSONVILLE,AR.".

Model

- introduced in 1984.
- the first 500 Iver Johnson model "Trailsman" were manufactured by Fundalum in Argentina, then they were manufactured by Iver Johnson in the U.S.A.
- the model "Trailman" model was discontinued in 1988.
- the model is normally marked on top of the barrel as, "TRAILSMAN".
- features include: single action, blued receiver/frame and barrel, internal hammer, spurred hammer, fixed sights, serration on the rear of the slide, the safety, slide lock and magazine release are located on the right side of the receiver/frame, and the grips may be black plastic with a thumb rest.

Manufacturer

- the manufacturer is normally marked on the right side of the receiver/frame over the trigger as, "MADE IN ARGENTINA / BY / FUNDALUM".

Serial Number

- the serial number is maked on the receiver/frame above the trigger as sequential numbers.
- the first 500 Iver Johnson model "Trailsman" were manufactured by Fundalum in Argentina.

Calibre

- the calibre designation is normally marked on top of the barrel as, "CAL. .22LR".

Shots

- detachable box magazine.

44047 - 2	38 S&W	5	70	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is marked on the right side of the barrel.

Model

- model designation is marked on the rear left side of the barrel in front of the cylinder; it may read, "TRAILSMAN 66" or "MODEL 66".
- Iver Johnson advertised this handgun as the Model 66 Trailsman.
- introduced in 1958.
- features include: top break design; double action trigger; rebounding hammer; adjustable rear sights; ribbed barrel; usually plastic grips; blued finish.

Manufacturer

- "IVER JOHNSON'S FITCHBURG, MASS., U.S.A." is marked on the right side of the barrel group.

Serial Number

- serial number is usually marked on the right side of the receiver/frame or on the front gripstrap.
- letter prefix and suffix may be encountered.
- central fire models were given a prefix letter code that denotes the calibre e.g., "B" is for 32 S&W; "P" is for 38 S&W.
- prefix letter "K" with a five digit number followed by the suffix letter "D" has been observed on a 22 LR version.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - calibre may be marked on the left side of the barrel and on the left side of the receiver/frame.

Notes

Make

- The company logo is marked on the receiver/frame.
- The company logo consists of the letters IWI with 5 lines extending up from the middle of the W where the middle line is the tallest.
- "IWI" is marked on both sides of the firearm.

Model

- Based on the "IWI CARMEL" design, introduced in 2019.
- "CARMEL" is marked on the left side of the receiver/frame.
- This semi-automatic version of the model "CARMEL" and was introduced for the United States market in 2023.
- Features include: adjustable cheekpiece; ambidextrous 45 degree safety selector lever; ambidextrous magazine release button; ambidextrous bolt catch/bolt release; right-side ejection port with folding dust cover; case deflector; ambidextrous cocking handle; three (3) position adjustable gas regulator; chrome lined barrel.
- Overall length with a 406 mm (16 inches) barrel is 668 mm (26.3 inches) with the stock collapsed, average weight is 3.65 kg (8.05 lbs).
- Overall length with a 472 mm (18.5 inches) barrel is 734 mm (28.8 inches).

Manufacturer

- The company logo is marked on the receiver/frame.
- The company logo consists of the letters "IWI" with 5 lines extending up from the middle of the "W" where the middle line is the tallest.
- "IWI" is marked on both sides of the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- Gas operated. - Short stroke, gas piston.
Serial Number	- The serial number is marked on the left side of the receiver/frame. - The serial number of a referenced example consisted of a two-letter prefix followed by six digits.
Barrel	- The barrel length does not include any attached device such as flash-hider or muzzle brake.
Calibre	- The calibre designation is marked on the left side of the receiver/frame. - Rifling characteristics in calibre 5.56mm NATO: 6 grooves, 1 turn in 7 inches, right hand twist.
Shots	- Detachable box magazine. - Designed to accept "AR15" type magazines.
Canadian Law Comments	- This firearm design incorporates a two-piece receiver/frame: the upper receiver is the master component considered to be the receiver/frame for all purposes of the Criminal Code and the Firearms Act.
Other Markings	- A data matrix code is engraved on the left side of the receiver/frame, to the right of the serial number. - "IWI Israel" is marked on the plastic clamshell when removed. The bare receiver frame is marked "IWI Middletown PA" denoting that the place of manufacture is the United States of America.

FRT Report

Firearm Reference Number (FRN): 146303
Make: IXL
Model: Navy

Summary

Make:	IXL
Model:	Navy
Manufacturer:	Mueller, Louis
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	BELGIUM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
146303 - 1	36 PERCUSSION	6	178	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is marked on the revolver as "IXL".
- "IXL" is a name used by an unknown manufacturer of revolvers in the 1850s; they are seen with an address marking of "N. YORK".

Model

- manufactured prior to 1860.
- the model is not marked on the firearm.
- this is one of the two largest of three versions of percussion revolvers manufactured under the "IXL" name, being a double-action 36-calibre revolver with either a spurless centre hammer or a side-mounted spurred hammer; the two larger "Navy" versions were in 36 PERCUSSION (the smaller "Pocket" was in 31 PERCUSSION), with one resembling the "Pocket", and one having a side-mounted spurred hammer.
- features include: blued finish; hexagonal barrel; fixed blade and groove sights; under-barrel loading rammer; solid frame; double action trigger mechanism; either a side-mounted spurred hammer or a centre-mounted hammer; and walnut grips.

Serial Number

- numbered on the receiver/frame.

16688 - 4	7.65MM	9	120	Prohibited CC 84(1) "prohibited firearm" para. (a)(ii)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "IZARRA" is marked on the left side of the receiver/frame.
- "Izarra" was a tradename used by "Bonafacio Eschevarria" of Eibar, Spain.
- "Izarra" is the Basque word for "star".
- the letter "I" inside a circle on the left rear side of the receiver/frame is the manufacture's code for "Izarra".

Model

- "Pistola Automatica" and "IZARRA" are marked on the left side of the slide.
- manufactured from 1914 to 1922.
- this model is different from all other Bonifacio Echeverria/Star designs, this is a common "Eibar" pattern or "Ruby type" pistol.
- features include fixed sights, slide hold open lever, black plastic grips, blow back operation and hammerless design. May have a lanyard ring on the left side of the grip.
- it is believed that this model was manufactured until the post-war range of Star pistol models were established.
- some were used by the French forces during WWI.
- some specimens may be found with long barrels protruding from the slide.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "Bonifacio Echeverria" is marked on the left side of the slide. - noted variations on the company name: - ECHEVERRIA - B. ECHEVERRIA - B. ECHEVERRIA S.A. - BONIFACIO ECHEVERRIA - BONIFACIO ECHEVERRIA S.A.
Serial Number	- the serial number is marked on the left side of receiver/frame, above the trigger and may be repeated on the slide. - the serial number is usually composed of numerical digits only.
Calibre	- calibre designation is marked on the left side of the slide.
Shots	- detachable box magazine.
Other Markings	- may be marked on the left side of the slide in two rows: BONIFACIO ECHEVERRIA (ESPANA) EIBAR "IZARRA" CAL 7.65. PISTOLA AUTOMATICA

Notes

Make

- the make is usually marked on the left side of receiver/frame as, "Made in Russia By Izhmash".

Model

- model is sometimes translated in literature as "SM-2". The receiver/frame markings read in English as CM-2, and the model is therefore marketed as such in North America.
- the difference between this Model and the "CM-2-1" is the limit of the butt comb adjustment.
- this is a turn-bolt operated single shot light match rifle.
- features include: hammer forged barrel, micrometer-adjustable aperture rear sight, adjustable trigger, target-contour wood stock w/accessory rail, spacer length-of-pull, vertically adjustable butt pad.
- also available in a shorter, lighter version known as the CM-2 Cadet.

Manufacturer

- left side of receiver/frame usually marked, "Made in Russia By Izhmash".

Serial Number

- 6 digits, engraved on top of rear tang.

Other Markings

- left receiver may have "CM-2 (company logo) MADE IN RUSSIA BY IZMASH 22 LR"
- right receiver may be marked "KALASHNIKOV - USA Pt. St. Lucie, FL. USA" or "ARMAMENT TECHNOLOGY, Halifax, NS, CANADA".

84552 - 2	7.62X54R RUSSIAN	10	650	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make may be marked on the firearm.

Model

- introduced in 1998.
- the model designation may be marked on the firearm.
- "SV" is for "Snaiperskaya Vintovka" in Russian. In English, "Sniper Rifle".
- this firearm was built for the Russian armed forces and for export.
- features include: adjustable single action trigger mechanism; blued receiver/frame and barrel; a dove-tail rail is located on top of the receiver/frame to accommodate a telescope and the safety lever is located behind the bolt on the right side of the receiver/frame.
- the stock has a pistol grip, adjustable cheek piece and buttplate. The stock and forend may be made of reinforced fiberglass polyamide or laminated plywood. The stock may be skeletonized and the forend may be slotted for ventilation openings. A telescopic bipod can be attached to the forend.
- the end of the barrel will accommodate a flash suppressor that can be removed to mount a silencer/suppressor.
- unlike earlier Russian sniper rifles, this rifle has the scope base located on top of the receiver/frame.

Manufacturer

- the manufacture may be marked on the firearm.

Serial Number

- the serial number is marked on the receiver/frame.

Barrel

- barrel measurement does not include flash hider.

Notes

Make	- the Izhmash name and/or corporate logo will usually be marked on the firearm. - early samples may be marked as "IZHMACH" due to a translation problem (Cyrillic character "C" translates to "S").
Model	- "TIGR" or "TIGER" is marked on the receiver/frame, the designation may also be repeated in Cyrillic characters. - this semi-automatic rifle is based on a modified SVD design. - general layout and appearance remain distinctively "AK". - features include: wood (walnut or hardwood) or synthetic buttstock (fixed or side-folding) and forearm; standard AK-47 style safety catch on the right side of the receiver/frame; scope-mounting rail mounted on the left side of the receiver/frame; blued or black finish.
Manufacturer	- the Izhmash name and/or corporate logo will usually be marked on the firearm. - early samples may be marked as "IZHMACH" due to a translation problem (Cyrillic character "C" translates to "S").
Action	- gas operated.
Serial Number	- numbered on the side of the receiver/frame, may or may not incorporate a Cyrillic character .
Calibre	- marked on the right side of the firearm.
Shots	- detachable box magazine.
Importer	- importer's name is usually marked on the side of the receiver/frame.

Notes

Make

- the make (or logo thereof) is marked on the firearm; may consist of Cyrillic characters.

Model

- left receiver/frame flat (forward) may have, in Cyrillic, "URAL 5-1 IZHMASH".
- left side of receiver/frame (rear) may have "22LR 5,6" and "MADE IN RUSSIA BY IZHMASH".
- right side of receiver/frame may be marked "KALASHNIKOV USA Pt. St. Lucie, FL. USA" or "ARMAMENT TECHNOLOGY, Halifax, NS, CANADA".
- may also be marked "EAA"
- this is a single-shot, bolt operated target rifle, made for 50 metre ISU "free rifle" competition.
- features include: blued finish; micrometer-adjustable open peep sights with globe front; adjustable match trigger; hardwood thumbhole stock with stippled gripping areas, an adjustable comb, an adjustable hooked buttplate, an off-hand palm-rest, and dampening weights mounted on a rod off of the forearm.

Manufacturer

- the manufacturer (or logo thereof) is marked on the firearm; may consist of Cyrillic characters.

Action

- bolt operated.

Serial Number

- samples have been noted with six numbers engraved on the top of the rear tang.

Calibre

- marked as "22 LR 5,6".

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatization of the Russian State Arsenal at Izhevsk (circa) 1994.
Model	- this firearm model is a generic model to cover all IZHMECH model IZH-27 shotguns. - this firearm is a conventional over & under boxlock shotgun; may or may not be marked "IZH-27" (or marking may appear in Cyrillic as "I3H-27") - available in different grades of engraving and embellishment. - features include: hammer forged barrels, automatic tang safety, forearm and buttstock with pistol-grip of hardwood, extractors and selective ejectors, single selective or double triggers, single sight-bead ventilated-rib barrels with fixed chokes or screw in chokes, and blued metal finish. - shotguns of this design (or other variants of similar design) are sold by other retailers as the IJ-27 or IJ-27EM .
Manufacturer	- manufactured at the Izhevsky Mekhanichesky Zavod (Izhmech) on the site of the former Russian State Arsenal, Izhevsk in the Republic of Udmurtia.
Action	- over & under pattern.
Serial Number	- serial number is marked on the receiver/frame.
Remarks	- Formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold. - After the demise of the Soviet Union, RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading. - When the Izhevsk Mechanical Plant (Izhmech) launched its own export sales branch it also took the "brand name" Baikal. - Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.

Notes

Make

- Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatization of the Russian State Arsenal at Izhevsk (circa) 1994.

Model

- this firearm is a model IZH-27 with selective ejectors.
- this firearm is a conventional over & under boxlock shotgun; may or may not be marked "IZH-27EM" (or marking may appear in Cyrillic as "I3H-27EM")
- available in different grades of engraving and embellishment.
- features include: automatic tang safety; hardwood forearm and buttstock with pistol-grip; extractors and selective ejectors; double triggers; single sight-bead ventilated-rib barrels with fixed chokes (full & modified) and blued metal finish.
- shotguns of this design (or other variants of similar design) are sold by other retailers as the IJ-27 or IJ-27EM .

Manufacturer

- manufactured at the Izhevsky Mekhanichesky Zavod (Izhmech) on the site of the former Russian State Arsenal, Izhevsk in the Republic of Udmurtia.

Action

- over & under barrel configuration.

Serial Number

- serial number is marked on the receiver/frame; usually located on the upper receiver tang (under opening lever), or on the water-table flats and on bottom of the barrel mono-block.

Remarks

- Formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold.
- After the demise of the Soviet Union, RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading.
- When the Izhevsk Mechanical Plant (Izhmech) launched its own export sales branch it also took the "brand name" Baikal.
- Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.

Notes

Make

- Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatization of the Russian State Arsenal at Izhevsk (circa) 1994.

Model

- this firearm is a model IZH-27 with double non-selective triggers and selective ejectors.
- this firearm model denotes a firearm that comes complete with two or even three sets of barrels; as a Skeet model it comes with 675MM barrels with fixed chokes in Cylinder & Skeet and has a spare set of barrels in 725MM (Field - chokes Full & Modified).
- this firearm is a conventional over & under boxlock shotgun; may or may not be marked "IZH-27EM-CTK" (or marking may appear in Cyrillic as "I3H-27EM-CTK")
- available in different grades of engraving and embellishment.
- features include: automatic tang safety; hardwood forearm and buttstock with pistol-grip; extractors and selective ejectors; double non-selective triggers; single sight-bead ventilated-rib barrels with fixed chokes and blued metal finish.
- shotguns of this design (or other variants of similar design) are sold by other retailers as the IJ-27 or IZH-27 .

Manufacturer

- manufactured at the Izhevsky Mekhanichesky Zavod (Izhmech) on the site of the former Russian State Arsenal, Izhevsk in the Republic of Udmurtia.

Action

- over & under barrel configuration.

Serial Number

- serial number is marked on the receiver/frame; usually located on the upper receiver tang (under opening lever), or on the water-table flats, and on bottom of the barrel mono-block.

Remarks

- Formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold.
- After the demise of the Soviet Union, RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading.
- When the Izhevsk Mechanical Plant (Izhmech) launched its own export sales branch it also took the "brand name" Baikal.
- Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.

Notes

Make

- Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatization of the Russian State Arsenal at Izhevsk (circa) 1994.

Model

- this firearm is a conventional side by side boxlock shotgun,
- may or may not be marked "IZH-43" (or marking may appear in Cyrillic as "I3H-43").
- features of this firearm:
- equipped with double triggers, checkered pistol-grip buttstock and forearm of walnut.
- blued barrels and receiver/frame.
- options available:
- single trigger, ejectors, engraving and screw-in choke tubes (full/modified/ improved cylinder).
- shotguns of this approximate design, or other variants of similar design are sold by other importers, distributors and retailers.

NOTE:
- there is a variant of this design with external hammers and visible firing pins, which is known as the model "IZH-43K" when manufactured by Izhmech. This firearm is sold as the E A A "Bounty Hunter II".
- there is a variant of this design with Automatic Selective Ejectors, which is known as the model "IZH-43E" when manufactured by Izhmech. Although the factory marketing organization would have us believe that this is sufficient cause to name a new model, in the absence of a specimen with markings, the "IZH-43E" model has been melded into the "IZH-43" model as an AKA.

Manufacturer

- Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatization of the Russian State Arsenal at Izhevsk (circa) 1994.
- the product line of Izhevsky Mekhanichesky Zavod (Izhmech) consists of Baikal "Brand name" sporting firearms, Makarov and other pistols under the IZH model prefixes and parts for Kalashnikov type firearms.
- MANUFACTURER: The Russian Arsenal code for Izhevsky Mekhanichesky Zavod (Izhmech) is a vertical, stylized arrow in a shield preceded by the number five.
- the tradename "Baikal" may be found stamped or engraved on the receiver/frame.

Action

- front hinged, tip down, break action, top-lever, box-lock, side by side, hammerless, shotgun.

Serial Number

- serial number rationalization unknown.
- marked on the receiver/frame; usually located on the upper receiver tang, (under opening lever), or on the water-table flats.

Remarks

- Formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold.
- After the demise of the Soviet Union, RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading.
- When the Izhevsk Mechanical Plant (Izhmech) launched its own export sales branch it also took the "brand name" Baikal.
- Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.

Notes

Make

- may or may not be marked "BAIKAL".
- Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatization of the Russian State Arsenal at Izhevsk (circa) 1994.

Model

- "IZH-43K" or Cyrillic "I3H-43K" is usually marked on the receiver/frame.
- "BOUNTY HUNTER II" may be marked on the left barrel of some example.
- this is a conventional side by side box lock shotgun with side plates and exposed oversize spur hammers.
- features include: round side by side smoothbore barrels with screw-in choke tubes (full/modified/improved cylinder) and a bead front sight; front hinged receiver/frame with a top tang mounted break open lever and safety; side lock action with exposed side hammers; single or double triggers; automatic ejectors; checkered walnut forearm and semi-pistol grip buttstock; blued metal finish.
- this shotgun type is popular with re-enactors and competitors involved in "Old West" style action shooting.
- there is a variant of this design with internal hammers, which is also known as the model IZH-43 when manufactured by Izhmech.

Manufacturer

- Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatisation of the Russian State Arsenal at Izhevsk (circa) 1994.
- the product line of Izhevsky Mekhanichesky Zavod (Izhmech) consists of Baikal "Brand name" sporting firearms, Makarov and other pistols under the IZH model prefixes and parts for Kalashnikov type firearms.
- MANUFACTURER: The Russian Arsenal code for Izhevsky Mekhanichesky Zavod (Izhmech) is a vertical, stylized arrow in a shield preceded by the number five.
- the tradename "Baikal" may be found moulded into the plastic grips or engraved on the receiver/frame.

Action

- front hinged, tip down, break action, top-lever, box-lock, side by side, hammer, shotgun.

Serial Number

- serial number rationalization unknown.
- marked on the receiver/frame; usually located on the upper receiver tang, (under opening lever), or on the water-table flats.

Remarks

- Formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold.
- After the demise of the Soviet Union, RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading.
- When the Izhevsk Mechanical Plant (Izhmech) launched its own export sales branch it also took the "brand name" Baikal.
- Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.

Notes

Make

- Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatization of the Russian State Arsenal at Izhevsk (circa) 1994.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this firearm is a commercial version of the PM Makarov with an adjustable rear sight.
- the model designation and the calibre are marked on the right side of the slide as "IZH70 cal..380ACP".
- at present (1999) the IZH-70 pistol is a product of the Izhevsky Mekhanichesky Zavod (Izhmech) and is featured in their 1999 catalog.
- the IZH-70 has been sold in the past as IJ-70, IJ-70 A and IJ70 17A. These codes represent the calibre of the hand gun and whether or not it has a "high capacity" magazine.
- the firearm identified here on FRT # 59685 is the commercial production Makarov pistol sold by the Baikal Marketing Agency or by IZHMECH / IZMASH / IMEZ and is not intended to be used for identification of any standard Russian Armed Forces issue side arm
- this firearm was manufactured at Izhevsk circa 1991 - 1999, during the period that the Russian Arms Industry was in the process of privatization. The variety of "Brand Names", (Baikal / IZHMECH / IZMASH / IMEZ) that appear on these firearms is a result of the uncertainty caused by the turmoil of privatization and imperfect translation of the manufacturer's name or designation by foreign importers.
- features include: disassembly by lowering the trigger guard and lifting the slide and return spring off of the receiver/frame for disassembly; slide mounted safety catch which also releases the hammer when applied, lowering the hammer onto a hammer block; double/single action trigger mechanism; magazine release catch located on the bottom of the hand grip/butt; the extractor functions as a loaded chamber indicator by standing proud of the slide when a cartridge is chambered; wrap-around grip plates; unlike the Walther PP or PPK pistol the Makarov pistol has a slide release lever on the left side.

Manufacturer

- Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatisation of the Russian State Arsenal at Izhevsk (circa) 1994.
- the product line of Izhevsky Mekhanichesky Zavod (Izhmech) consists of Baikal "Brand name" sporting firearms, Makarov and other pistols under the IZH model prefixes and parts for Kalashnikov type firearms.
- MANUFACTURER: The Russian Arsenal code for Izhevsky Mekhanichesky Zavod (Izhmech) is a vertical, stylized arrow in a shield preceded by the number five.
- the tradename "Baikal" may be found moulded into the plastic grips or engraved on the pistol slide.

Action

- blowback operated in 9MM MAKAROV & 380 AUTO calibres and delayed blow-back in 9MM LUGER calibre.
- delayed blowback accomplished by grooves cut into the chamber of the firearm.

Serial Number

- serial number rationalization unknown.
- all recent imports into the United States must be marked with the importer's name and address. These recent imports may also have been re-serial numbered, at the instruction of the US BATF, to avoid confusion caused by non-roman alphabet letters and non-Arabic numerals. In all cases the original serial number is still visible.

Shots

- detachable box magazine.

Other Markings

- when IMEZ is found marked on a Makarov pistol; IMEZ is an imperfect translation of Izhevsky Mekhanichesky Zavod - Izhmech (which means - Izhevsk Mechanical Factory). Makarov pistols, PSM pistols, air guns and various shotguns have been produced and identified by the IMEZ name.

Remarks

- The production of Makarov pistols at Izhevsky Mekhanichesky Zavod (Izhmech) spans the time period from the early 1960's to date (2003). During this time period the Union of Soviet Socialist Republics (USSR) disintegrated and became the Confederation of Independent States (CIS) and subsequently reverted to Russia. During this time period the Arsenal at Izhevsk reverted from military production of Makarov pistols, to a mix of military production and foreign export sales.
- Also during this time period, the North American importers experienced a variety of changes in import regulations. This history of change has produced a myriad of differences in the "tradenames" used by export or import agencies. Business practice changes or translation practices have changed the name of the manufacturer several times, and importers have used imperfect translations to advertise their products.
- The United States Government has insisted upon re-serializing the Makarov family of firearms, commencing in the late 1980's / early 1990's, so as to reduce confusion arising from the use of Cyrillic letters in the serial numbers of firearms destined for import into the USA.
- Formerly the firm "RAZNOEXPORT" handled all production from the Russian Arsenal system destined for foreign sales or export. "Baikal" and "Vostok" were brand or trade names used by the "RAZNOEXPORT" firm. These brand names were used regardless of the origin/manufacturer of the firearms being sold.
- After the demise of the Soviet Union, "RAZNOEXPORT" was phased-out and a new export firm was founded to meet the needs of the Russian Department of Defence Industry, this firm was called "TEKHMASHEXPORT" which had in its structure another firm called Baikal International Trading.
- When the Izhevsk Mechanical Plant launched its own export sales branch it also took the "brand name" Baikal.
- Izhmech was permitted to retain the name "Baikal" and "TECHMASHEXPORT" had to dismantle Baikal International.

Notes

Make

- may be marked "BAIKAL" (RUSSIA) on the left side of the receiver/frame.
- Baikal is a trade name used by IZHMECH for export to foreign countries.

Model

- this firearm is a variant of the IZH-27 shotgun design, with double non-selective triggers and selective ejectors.
- this firearm model denotes a combination gun with a shotgun barrel over a rifle barrel.
- this firearm is a conventional over/under boxlock shotgun design and may or may not be marked "IZH-94" (or marking may appear in Cyrillic as "I3H-94")
- available in different grades of engraving and embellishment.
- features include; automatic tang safety, forearm and buttstock with pistol-grip of hardwood, extractors and non-selective ejectors, double non-selective triggers, rifle sights and blued metal finish.
- combination guns of this design (or other variants of similar design) may be sold by other retailers.

Manufacturer

- manufactured at the Izhevsky Mekhanichesky Zavod (Izhmech) on the site of the former Russian State Arsenal, Izhevsk in the Republic of Udmurtia.

Type

- over/under design with the shotgun barrel over the rifle barrel.

Action

- top lever, front hinged, tipping barrel, "break-open sub-action type".
- over / under barrel configuration.

Serial Number

- serial number rationalization unknown.
- marked on the receiver; usually located on the upper receiver tang (under opening lever), or on the water-table flats, and on bottom of the barrel mono-block.

Remarks

- Formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold.
- After the demise of the Soviet Union, RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading.
- When the Izhevsk Mechanical Plant (Izhmech) launched its own export sales branch it also took the "brand name" Baikal.
- Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.

Notes

Make

- Izhmech is a privatised portion of the old Russian Arsenal at Izhevsk.

Model

- "Margolin" is not marked on the firearm.
- "Margolin" target pistol was designed in the early 1950s by Mikhail Margolin.
- "MUM" may be marked on the left side of the slide.
- the Russian cyrillic character "U" with a tail, has no direct English translation but is pronounced as "tse" and has been translated as "Ts" as in "cats" or "Tz".
- Russian manufactures have substituted this letter with a "C" in their advertisments.
- "MUM" has been amended to the model designation of "MCM".

Manufacturer

- roughly translates into Izhevsk Mechanical Factory.

Action

- blow-back operated, self-loading, magazine fed, pistol.

Serial Number

- serial number rationalization unknown.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- Formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold.
- After the demise of the Soviet Union, RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading.

Notes

Make

- "S. JACKSON" is usually marked on the firearm.
- Stillman Jackson was a gunsmith, based in Palmyra, New York, known for his "mule-ear" style percussion hunting and target guns between 1829 and 1869.

Model

- the model is not marked on the firearm; this is a description of the firearm type.
- this is a percussion hunting or target rifle manufactured by Stillman Jackson prior to 1869, using a "mule ear" percussion side lock.
- features include: browned or blued finish; open fixed or adjustable sights; octagonal barrel; under barrel ramrod thimbles; half-length straight-grip walnut butt with brass or German silver finishings; external manually-cocked hammer on the lock plate; finial trigger-guard/grip strap; and a crescent butt.

Manufacturer

- "S. JACKSON" is usually marked on the firearm.
- Stillman Jackson was a gunsmith, based in Palmyra, New York, known for his "mule-ear" style percussion hunting and target guns between 1829 and 1869.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- muzzle loaded percussion single-shot.
Barrel	- barrel lengths may vary.
Calibre	- calibres may vary.

Summary

Make:	Jacob Grey
Model:	TWC Black
Manufacturer:	Jacob Grey Firearms
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
199715 - 1	9MM LUGER	10	108	Restricted CC 84(1) "restricted firearm" para. (b)	Non-Commercial Customization	
199715 - 2	9MM LUGER	17	108	Restricted CC 84(1) "restricted firearm" para. (b)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "JACOB GREY" is marked on the right side of the receiver/frame.
- "JG" is marked on the firearm in various places.
- The company logo is marked on the firearm.
- The company logo is comprised of the company's primary letters of "JG" with a horizontal line either in full or in contrasted silhouette through the center of the two letters with the full company name, "Jacob Grey" under the initial letters.

Model

- Introduced in 2025.
- "TWC Black" is marked on the left side of the firearm.
- Combines firearms design features of more than one firearm including "STI INTERNATIONAL 2011" and "STACCATO 2011".
- "2011" is a modular design consisting of a barrel and slide assembly, a synthetic trigger guard and grip assembly and a steel or alloy receiver/frame. This differs from the traditional 1911A1 design whereby the grip/trigger guard are not integral to the receiver/frame.
- Features include: pistol grip, CNC machined aluminum steel receiver/frame with ejection port and integral magazine well; steel slide with rear and front "X" shaped serrations; rear, grip safety; solid/filled trigger; polymer grip with or without "hex"/"X" patterned checkering.
- Extended ambidextrous thumb safety located on the receiver/frame.
- Magazine release located on the side of the firearm.
- Slide lock lever located on the side of the firearm.
- Slide stop lever located on the side of the firearm.
- Overall length with a 108 mm (4.25 inches) barrel is 197 mm (7.75 inches), average weight is 0.85 kg (1.88 lbs).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "JACOB GREY" is marked on the right side of the receiver/frame.
- "JG" is marked on the firearm in various places.
- "Jacob Grey" was established in 2010, when the owner began making custom 1911 handguns.
- "Jacob Grey" established an aerospace machine shop in 2012, producing various parts specifically for the aerospace industry, eventually branching out into the defense industry.
- "Jacob Grey" began production in the firearm industry in 2022, beginning with the JG15, an AR-style rifle followed by a handgun in 2023.
- "Jacob Grey" is located in Prosperity, SC, United States of America.
- The company logo is marked on the firearm.
- The company logo is comprised of the company's primary letters of "JG" with a horizontal line either in full or in contrasted silhouette through the center of the two letters with the full company name, "Jacob Grey" under the initial letters.

Action

- Recoil operated.

Serial Number

- The serial number is marked on the right side of the receiver/frame.

Calibre

- The calibre designation is usually marked on the barrel, visible through the ejection port.

Shots

- Detachable box magazine housed in the grip.
- Designed to accept "CHECKMATE" type magazines.

Firearm Reference Number (FRN): 125206
Make: Jacobi
Model: Wheel-Lock Reproduction

Summary

Make:	Jacobi
Model:	Wheel-Lock Reproduction
Manufacturer:	
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
125206 - 1	45 WHEEL-LOCK	1	390	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "JACOBI ISERLOHN" is marked on the top of the barrel.
- Paul Jacobi has been in business since 1996.
- Paul Jacobi is located in Iserlohn, Germany.
- Paul Jacobi is a distributor of muzzle loading and western style firearms and accessories.

Model

- model designation is not marked on the firearm.
- this is a modern reproduction of a German Wheel-Lock pistol.
- Wheel-Lock firearms were originally manufactured in Europe during the 16th and 17th century.
- the system uses a iron pyrites pressed against a revolving toothed wheel to provide the sparks for igniting the powder in the priming pan, which in turn ignites the main powder charge in the barrel. The toothed wheel is made to rotate, when the trigger was pulled, by a spring that was wound by a key in a similar fashion to a mechanical clock.
- features include: no sights; octagonal steel barrel; steel side plate; single trigger; walnut semi-pistol grip stock.

Action

- muzzle loader, spring driven rotating gear action.

Serial Number

- located on the receiver/frame/barrel asembly.
- observed specimen had five numbers.

Notes

Make

- "JJ" under a line is marked on the right side of the frame.
- "Jacquemart Made in Belgium" may be marked on the barrel.
- "JJ" monogram inside a circle may be marked on the grip plate.
- "JJ" monogram and "Le Monobloc" are attributed to Jules Jacquemart of Liege, Belgium.
- Jules Jacquemart died circa 1912 and his business ceases operations in 1914.
- "J J" or "J.J.", side by side, with or without a crown, inside a circle or without were markings attributed to "J. Jacquemart & Fils" and "Joseph Jacquemart.
- "J. Jacquemart & Fils" was located in Liege, Belgium circa 1869.
- "Joseph Jacquemart" was located in Herstal, Belgium from circa 1926 to 1943.
- "J" over "a line" over "J" inside an oval or circle was a marking attributed to the following:
- Joseph Joiris of Liege, Belgium circa 1925,
- Joiris & Geurten of Liege, Belgium from circa 1925 to 1927, and
- Joiris, Vandenbergh & Geurten of Liege, Belgium circa 1928.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is an example of a "constabulary" type revolver, common in Europe during the early 1900s, and usually having a short barrel, a five-shot cylinder, and folding trigger.
- features may include: blued or nickeled finish; fixed open sights; round or "teardrop" shaped barrel; a swing out ejector rod mounted in the cylinder axis pin; fluted five shot cylinder; folding double action trigger; single action or double action trigger mechanism; checkered wooden or plastic grips; and may or may not have a lanyard loop at the butt.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

198510 - 1	320 REV SHORT CF	6	90	Antique AFR, Section 1, para. 7	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "JJ" is marked on the right side of the receiver/frame.
- "J J" or "J.J." monogram with or without a crown, inside a circle or with no circle has been attributed to "J. JACQUEMART & FILS" circa 1869, "Joseph JACQUEMART-PIROTTE" 1908 to 1926, and "Joseph JACQUEMART" (successor of "Joseph and Sons") 1926 to 1943.

Model

- The model designation is not marked on the firearm.
- This is a self extracting revolver manufactured by "D.D. Levaux Bte" and retailed by "Jules Jacquemart".
- Features include: hinged receiver/frame with thumb-actuated action release lever protrudes noticeably from the top rear of the cylinder strap directly above the hammer; folding trigger; extraction is by means of an extractor-plate which is actuated when the action is opened and the barrel hinged downwards thereby removing the spent casings from the cylinder chambers; this extractor-plate is removable; unfluted cylinder; may have lanyard ring on bottom of butt grip.

Manufacturer

- "D.D.L. BTE" is marked on the left side of the receiver/frame on the recoil shield.
- "G. LEVAUX" is marked on the left side of the frame under the grips.
- "Guillaume Levaux" was a gunmaker who made firearms for his brother "Dieudonne (DD)" under contract prior to 1880 when "Dieudonne" joined with his other brother, "Jean Mathieu" to form "Levaux Freres".
- "Dieudonne Levaux" was an inventor located in Liege, Belgium with various firearms patents dating between 1870 and 1877 with production to the early 1900's.

- Firms that manufactured or distributed firearms with these patents included: "G. Mercenier", "L. Ancion-Marx", "Braedlin", "Bodeo E Carral" of Italy, "Ferran y Turdera" of Argentina, "A.D.Jansen" of Brussels and "Hughes" of England, among others.

Serial Number

- The serial number is marked on the left side of the receiver/frame on the recoil shield.

Calibre

- The calibre designation is not marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments
- Some examples of this model, when manufactured prior to 1898 may be considered Antique in Canada.

Other Markings
- Belgian proof of an oval containing "ELG" over a star is marked on the cylinder.
- Belgian proof marks and Inspectors marks may be marked on the firearm.

Notes

Make

- "JJ" under a crown is marked on the right side under the grips.
"J J" or "J.J.", side by side, with or without a crown, inside a circle or with no circle has been attributed to J. JACQUEMART & FILS circa 1869, Joseph JACQUEMART-PIROTTE 1908 to 1926, and Joseph JACQUEMART (widow of Joseph and sons) 1926 to 1943.

Model

- model designation is not marked on the firearm.
- this firearm resembles the "Smith & Wesson Top Break 38 No 2 Double Action" revolvers Third and Fourth Model except for the rear notch on the cylinder and the solid trigger back.
- features include: round barrel with blade front sight and notched rear sight; nickel finish; front hinged receiver/frame with break open latch located on the top strap; fluted cylinder; double action trigger mechanism; exposed spur hammer; squared back trigger guard; checkered hard rubber grips.
- imitation Smith & Wesson patent markings "SMITH & WESSON SPRINGFIELD MASS. PATENTS AP.8.05.JULY 6.59.NOV.24.93" were observed on the top strap of the barrel.

Manufacturer

- "JJ" under a crown is marked on the right side under the grips.
- "J J" or "J.J.", side by side, with or without a crown, inside a circle or with no circle has been attributed to J. JACQUEMART & FILS circa 1869, Joseph JACQUEMART-PIROTTE 1908 to 1926, and Joseph JACQUEMART (widow of Joseph and sons) 1926 to 1943.
- "J. Jacquemart & Fils" was located in Liege, Belgium circa 1869 (likely predecessor of Joseph)
- "Jacquemart-Pirotte" (Joseph) was located at the quay of channel 28 in Herstal, Belgium from 1908-1926.
- "Joseph Jacquemart" was located at the quay of channel 28 in Herstal with offices and factories on Rue de Poncay in Herstal, Belgium from circa 1926 to 1943.
- "Jacquemart Ateliers" were gunmakers in Liege, Belgium, 114 Zenobe Gramme Blvd circa 1943-1952. They were succeeded by "Jacquemart Ateliers S.A" circa 1952-1966.

Serial Number

- no serial number was observed

Calibre

- calibre was marked on the left side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- Belgian proof of "ELG" inside an oval with a star was observed on the cylinder face.
- imitation Smith & Wesson patent markings "SMITH & WESSON SPRINGFIELD MASS. PATENTS AP.8.05.JULY 6.59.NOV.25.93" were observed on the top strap of the barrel.

Notes

Make

- "F.W. JAEHNE" is usually marked on the firearm.
- Frederick W. Jaehne was a gunsmith based in New York, New York, known for his percussion target guns during the mid-to-late 1800s.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is a percussion muzzle-loaded "schuetzen"-style target rifle.
- features include: a wide range of possible finishes and engraving styles, but usually blued with octagonal barrel; a one-piece walnut butt (with varying degrees of carving, checkering, and inlay); open adjustable sights; single or double set triggers; an ornate filigree frame grip; and a butt with a cheek rest and hooked butt plate.
- may also be seen with an off-hand palm-rest.

Manufacturer

- "F.W. JAEHNE" is usually marked on the firearm.
- Frederick W. Jaehne was a gunsmith based in New York, New York, known for his percussion target guns during the mid-to-late 1800s.

Action

- muzzle loaded percussion single-shot.

Barrel

- barrel lengths may vary.

Calibre

- calibres may vary.

Notes

Make

- "AUTOMAT. PISTOLE >>JAGA<< 6.35" is usually marked on the left side of the slide.
- "JAGA" is usually embossed in the grips.
- "JAGA" was a tradename used by Frantisek Dusek on pistols made for the German market.

Model

- "AUTOMAT. PISTOLE >>JAGA<< 6.35" is usually marked on the left side of the slide.
- the Jaga tradename was applied to pistols intended for the German market in place of the original "DUO" tradename.
- actual manufacture of this model pistol by Dusek began in 1938 and carried on until 1948, with over 110,000 pistols being made before 1946, it is unknown how many were produced with the JAGA tradename.
- features include: butt mounted magazine release; blued or nickel finish; left side thumb safety; black or pearl synthetic grips; no sights.
- was renamed model "Z" when the manufacture was taken over by Ceska Zbrojovka.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "F. DUSEK OPOCO", "F. DUSEK OPOTSCHNO" or "aek" may be marked on the slide.
- Dusek was founded by Frantisek Dusek of Opocno, Czechoslovakia in 1908.
- Dusek's products included airguns, rifles, shotguns and pistols between 1908 and 1948.
- Dusek's semi-automatic pistols were sold under the following brand/trade names: Duo, Ideal, Jaga, Perla, and Singer.
- Dusek manufactured weapons components during the German occupation of World War Two
- Dusek was assigned the German code "aek".
- Dusek's business was nationalization by the Communist Government in 1948.
- Dusek's business was transferred to the CESKA ZBROJOVKA plant in 1948.

Action

- blowback operated.

Serial Number

- serial number rationalization is unknown.

Calibre

- "6.35" is usually marked on the left side of the slide.

Shots

- detachable box magazine.

Other Markings

- a Czechosovakian proofmark may appear on the left side of the slide next to the last two digits of year the pistol was proof tested.
- there may be reference made to "Eblen", the German distributor of this gun.
- the logos of various German retailers may be marked on the pistol.

Notes

Make

- "JAGER" was observed marked on both sides of the pistol grip.
- "ADLER ITALY MOD. JAGER AP-74 - 22 LR - CAT. 1406" over "IMPORTED BY MITCHELL ARMS ANAHEIM CA USA" was observed marked on the right side of the firearm.

Model

- "ADLER ITALY MOD. JAGER AP-74 - 22 LR - CAT. 1406" over "IMPORTED BY MITCHELL ARMS ANAHEIM CA USA" was observed marked on the right side of the firearm.
- AP74 resembles an AR15/M16 rifle.
- AP74 uses a two piece split receiver/frame similar to the AR15/M16 rifle.
- features include: adjustable rear sight located at the rear of the carry handle and post front sight located on a high ramp; round barrel with flash hider; bayonet lug; ejector port with dust cover; cross bolt safety located above the single trigger mechanism; magazine release is located on the right bottom side of the dummy AR15/M16 magazine which is permanently attached to the lower receiver/frame in which a 22 LR magazine is inserted through the botton; AR15/M16 style buttstock, pistol grip and forearm; blued and black painted finish.

Manufacturer

- "ADLER ITALY MOD. JAGER AP-74 - 22 LR - CAT. 1406" over "IMPORTED BY MITCHELL ARMS ANAHEIM CA USA" was observed marked on the right side of the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- blowback operated.
Serial Number	- one example observed and featured the serial number located on the left side of the receiver/frame below the carying handle which consisted of six digits.
Calibre	- 22 LR was observed marked on the right side of the firearm.
Shots	- detachable box magazine.
Importer	- "IMPORTED BY MITCHELL ARMS ANAHEIM CA USA" was observed marked on the right side of the firearm.

Notes

Make	- "JAKELE" is marked on the left side of the barrel. - "JAKELE" is marked on the bottom of the receiver/frame, under the front handguard.
Model	- "J1" is marked on the left side of the barrel. - "J1" is marked on the bottom of the receiver/frame, under the front handguard. - The Jakele J1 is a straight-pull hunting rifle designed with a cocking lever that resembles a second trigger located outside the trigger guard that cocks the action. The rifle can not be fired if this cocking trigger is not held to the rear. - Features include: spring loaded front handguard removal button under receiver/frame; folding disassembly tool integrated inside front handguard; magazine unloading button on the right side of the receiver/frame, ahead of the trigger guard; two position trigger pull weight switch inside the trigger guard; left or right sided oversize bolt knob; cocking trigger below trigger guard; bolt lock switch located at rear of bolt; may come equipped with a thumbhole stock; may come equipped with a synthetic stock and forend; may come equipped with engraving on the receiver.
Manufacturer	- "JAKELE" is marked on the left side of the barrel. - "JAKELE" is marked on the bottom of the receiver/frame, under the front handguard.
Action	- Straight-pull bolt operated.
Serial Number	- The serial number is marked on the bottom of the receiver/frame, under the front handguard. - The serial number of a referenced example consisted of the prefix "J1", followed by a letter and five digits.
Calibre	- The calibre designation is marked on the barrel assembly.
Shots	- Two shots magazine with interchangeable follower to allow for different calibers.

Notes

Make

- "JAMES RIVER ARMORY" is marked on the top of the receiver/frame.

Model

- "M14" is marked on the top rear of the receiver/frame.
- these rifles may be seen in left- and right-handed versions.
- the M14 is an M1A-type semi-automatic recreation of the US M14 rifle, intended for hunting and target competition with open sights.
- features include: round rifled barrel with slotted muzzle brake; forged receiver/frame with top right ejection port; detachable magazine; magazine release lever in front of the trigger guard; walnut pistol grip stock; and sling swivels.
- overall length with the 489mm (19.25") barrel is 1041mm (41"), and average weight 4.08kg (9lbs).

Manufacturer

- "BULA DEFENSE SYSTEMS" is not marked on the firearm.
- Bula Defense Systems have been producing 'ready-to-install' components for firearms for several years and have moved into producing complete rifle systems in recent years as of 2018.

Action

- gas operated.

Serial Number

- serial number is marked on the top rear of the receiver/frame.
- serial number of a referenced example consisted five numbers without a letter prefix or suffix.

Shots

- detachable box magazine.

Other Markings

- "FORGED IN THE USA" was observed on the right side of the receiver/frame.

FRT Report

Firearm Reference Number (FRN): 20390
Make: Janssen Fils & Cie
Model: British Bulldog

Summary

Make:	Janssen Fils & Cie
Model:	British Bulldog
Manufacturer:	Janssen Fils & Cie (JF&C)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	BELGIUM
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
20390 - 1	455 REV	5	64	Antique AFR, Section 1, para. 7	Non-Commercial Customization	
20390 - 2	455 REV	5	64	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Non-Commercial Customization	

Notes

Make

- "JF" was observed, on a referenced example, marked on the front of the receiver/frame, under the cartridge ejector rod.
- Belgian proofmarks marked on the left side of the receiver/frame and rear cylinder face.

Model

- manufactured circa 1880's to circa 1914.
- "BRITISH" over "BULL DOG" was observed marked on the top of the receiver/frame.
- this firearm is similar to the Webley No.2 "British Bulldog".
- features include: grooved top strap for rear sight and fixed half coin front sight; rifled bore; solid top receiver/frame; ejector rod sheathed within the cylinder axis pin; right side loading gate; double action trigger mechanism; spur hammer; non-fluted cylinder; bird's head grip.

Manufacturer

- "JF" was observed marked on the receiver/frame, forward of the trigger guard and under the cartridge ejecting rod.

Serial Number

- serial number is marked on the bottom of the pistol grip.
- observed serial number consisted of four digits.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada. A Belgian proofmark of "ELG*" within an oval is a good indication that a firearm was made prior to July, 1893. In July of 1893 a crown was added to the top of the oval which encircles "ELG*".

Notes

Make

- "JFC" the company abbreviation for Janssen Fils et Cie is marked on the right side of the receiver/frame.

Model

- model designation is not marked on the firearm.
- manufactured from the late 1800's to the early 1900's.
- features simulate the popular "British Bulldog" by Webley.
- may also be known as British Bulldog, English Bulldog, Ulster Bulldog, Tower Bulldog, or American Bulldog.
- this firearm is characterized as a compact, solid receiver/framed, short barreled revolver, often with an integral barrel and receiver/frame.
- features may include: right side loading gate, swing out case ejector rod stored within the cylinder axis rod, bird's head style handgrip, no sights or rudimentary sights and of a large cartridge (rim-fire or centrefire) calibre (such as 32, 38, 41, 44, 450 or larger).

Manufacturer

- manufacturer's logo appears on the right side of the receiver/frame, forward of the trigger guard and is comprised of the letters "J F C" and a star, all in a circle.

Serial Number

- serial number is marked on the inside of the top strap directly above the cylinder and may be repeated on other parts.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- the make is usually marked on the firearm in a variety of ways. Samples have been noted marked "Janssen Fils & Cie", "JF&C" or "Janssen Sons & Co". - also noted in reference material as "Jannsen Fils & Cie".
Model	- model is not marked on the firearm. - this is a generic entry for those Jannsen Fils & Cie side by side shotguns that are not identifiable as a unique model. - features include: side by side configuration; hinged receiver/frame which was available in many grades and may have some of the following features: back-action sidelocks or bar-front sidelocks or boxlocks; external hammers or hammerless; double triggers; Damascus or steel barrels; checkered wood pistol grip buttstock.
Manufacturer	- Janssen Fils & Co. or their logo is marked on the firearm.
Action	- side by side configuration.
Serial Number	- numeric serial number found on watertable and bottom of barrels.
Calibre	- calibre designation may be marked on the water-table and/or the barrel flats. - one known example was marked: "12-70", which indicates a chambering of 12 GA X 2-3/4".
Other Markings	- known example marked "Fine Steel" on the top of the rib between the barrels.

Notes

Make

- the Janz name is marked on the receiver/frame.
- the Janz logo (the name "Janz" in script within a triangle) is marked on the grips.
- "Janz JTL" is marked on the right side of the receiver/frame; "JTL" stands for "Janz Technic and Laboratory".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- features include: a non-fluted cylinder (fluted available on request); blued or stainless finish; full-length underlug; adjustable open sights; adjustable trigger; and barrel lengths available from 4"/102mm up to 10"/254mm. - Janz also manufactures a similar revolver, the JTL-S, that enables the owner to quickly change both barrel lengths and calibres on the same receiver/frame - no model name appears on this firearm.
Manufacturer	- Janz Gmbh is a manufacturer of precision engineered parts in Malente, Germany. They currently produce two versions of a revolver of their own design.
Serial Number	- marked on receiver/frame.
Calibre	- calibre is marked on the left side of the barrel.

Notes

Make

- the Janz name is marked on the receiver/frame.
- the Janz logo (the name "Janz" in script within a triangle) is marked on the grip

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this is a double-action revolver similar in concept to the Dan Wesson Pistol Pak, with easily-interchangeable barrels and cylinders; this allows an owner to change not only the barrel length, but the cylinder and calibre.
- features a non-fluted cylinder (fluted available on request), blued or stainless finish, full-length underlug, adjustable open sights, adjustable trigger, and barrel lengths available from 4"/102mm up to 12"/305mm.
- Janz also manufactures a similar revolver, the JTL-E, that enables the owner to quickly change only barrel length.

Manufacturer

- Janz Gmbh is a manufacturer of precision engineered parts in Malente, Germany. They currently produce two versions of a revolver of their own design.

Serial Number

- marked on receiver/frame.

FRT Report

Firearm Reference Number (FRN): 147301
Make: Japanese Anti-Tank Rifle
Model: Type 97

Summary

Make:	Japanese Anti-Tank Rifle
Model:	Type 97
Manufacturer:	Japanese State Arsenal, Kokura
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	JAPAN
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
147301 - 1	20X125 JAPANESE TYPE 97	7	1195	Prohibited PFR, Part 1, para. 95(z.087)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is not marked on the firearm.

Model

- the model is marked on the firearm in Japanese ideographs.
- this is a heavy anti-tank rifle developed by Japan based on licenced Hotchkiss designs prior to World War Two; this rifle was adopted in 1937, and used by Japan through its campaigns in Asia and the Pacific until the end of the Second World War.
- features include: large size and weight (2035mm/6.67 feet and 69 kg/152 pounds); blued finish; a large DShK-style muzzle brake; a below-barrel gas piston; ribbed chamber portion of the barrel; a bipod at the mid-point; a top-mounted box magazine; a wooden pistol-grip with a strap-style trigger-guard for the entire hand; a cheekpiece arranged for a right-handed firer; an adjustable rear monopod; and a large buttpad with a shoulder-strap.
- this anti-tank rifle may be seen with or without a "yoke"-style carrying frame and a heavy shield to protect the gunner from rifle-calibre fire, but these features were often removed in use.

Manufacturer

- the manufacturer or logo thereof is marked on the firearm; the logo of the Kokura Arsenal consists of four overlaid circles (one on top of the other three), resembling a stack of four cannonballs, as seen from the top.

Action

- gas-operated.

Serial Number

- numbered on top of the receiver/frame.

Shots

- detachable box magazine.

Notes

Make

- the make is not marked on the firearm.

Model

- the model is marked on the firearm, in Japanese ideographs, as "Ho-1".
- this is a domestic Japanese flexible aircraft cannon adopted by the Japanese army for use on its Nakajima Ki-49 ("Helen") medium bombers, as top-mounted turret armament.
- this cannon is a redesigned version of the Type 97 anti-tank rifle, modified to allow full-automatic fire, and lightened and placed in a pintle mount to allow for a wider field of fire; however, this cannon still had such a relatively low rate of fire (~400 rpm), that it was not successful in service.
- features include: large size and weight (1750mm long and weighing 43 kg); blued finish; a large muzzle brake; a below-barrel gas piston; a 15-round drum magazine; and remote cocking and firing controls and sights on the mount.
- a fixed version of this cannon, feeding from a 50-round drum and installed in a belly mount, was also adopted as the "Ho-3".

Manufacturer

- the manufacturer or logo thereof is marked on the firearm.

Action

- gas operated.

Serial Number

- numbered on the receiver/frame.

Shots

- detachable drum magazine.

Notes

Make

- the make is not marked on the firearm.

Model

- the model is marked on the firearm, in Japanese ideographs, as "Ho-3".
- this is a domestic Japanese fixed aircraft cannon adopted by the Japanese army for use on its Kawasaki Ki-45 ("Nick") heavy fighters, as belly-mounted armament.
- this cannon is a redesigned version of the Type 97 anti-tank rifle, modified to allow full-automatic fire, and lightened and placed in a forward-firing under-wing mount; however, this cannon still had such a relatively low rate of fire (~400 rpm), that it was not successful in service.
- features include: large size and weight (1750mm long and weighing 43 kg); blued finish; a large muzzle brake; a below-barrel gas piston; a 50-round drum magazine; and remote cocking and firing controls.
- a flexible version of this cannon, feeding from a 15-round drum and installed in a turret mount, was also adopted as the "Ho-1".

Notes

Make

- the make is not marked on the firearm.

Model

- the model is marked on the firearm, in Japanese ideographs, as "Type 2".
- this is an up scaled copy of the Browning 50-calibre M3 machine gun, put into production by the Japanese army in 1942 as armament for their fighter planes and light bombers.
- this light cannon is functionally identical to the Browning machine gun design, but scaled up and manufactured to fire the 20x94mm cartridge.
- features include: standard Browning layout; blued finish; cone flash hider with recoil booster; ventilated barrel shroud; riveted receiver with hinged top cover; buffer assembly on backplate; and solenoid firing controls.
- this cannon should not be confused with the similar Type 1 Browning machine gun copy adopted by the Japanese in 1941, in 12.7x81SR, or the Type 3 Browning machine gun copy adopted in 1942, in 13.2x99.

Manufacturer

- the manufacturer or logo thereof is marked on the firearm.

Action

- recoil operated.

Serial Number

- numbered on the receiver/frame.

Shots

- belt fed.

Country of Manufacturer:	JAPAN
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
145235 - 1	25X163	15	1500	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- the make is not marked on the firearm.
Model	- the model is marked on the firearm, in Japanese ideographs, as "Type 96"; this is a licenced copy of the Hotchkiss M1938 anti-aircraft cannon, adopted in 1936 primarily for naval use against aircraft, but also used in that role on land and against tanks during fighting in the Pacific. - features include: standard Hotchkiss layout, blued finish; cone-shaped flash hider; thickened rear portion of the barrel with radiating ribs to allow for heat dispersal; rectangular receiver; detachable 15-round top-mounted magazines; and these cannon were commonly seen in double, triple, or quadruple mounts, fired by gunners who sat in seats on the sides of the mount and fired them with foot pedals, aiming via hand-operated cranks.
Manufacturer	- the manufacturer or logo thereof is marked on the firearm.
Action	- gas operated.
Serial Number	- numbered on the receiver/frame.
Shots	- detachable box magazine.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
145234 - 1	20X142	20	1260	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- the make is not marked on the firearm.
Model	- the model is marked on the firearm; this is a light automatic cannon adopted by the Japanese army in 1938, for use as a multi-purpose anti-tank/anti-aircraft weapon, and based on the same operating principles as their previously-adopted Hotchkiss machine guns. - features include: blued finish; DShK-style muzzle brake; under-barrel gas piston; top-mounted box magazine; and this cannon was normally seen on a wheeled carriage that could be transformed into a tripod mount by spreading the trail and raising the wheels.
Manufacturer	- the manufacturer or logo thereof is marked on the firearm.
Action	- gas operated.
Serial Number	- numbered on the receiver/frame.
Shots	- detachable box magazine.

Firearm Reference Number (FRN): 119283
Make: Japanese Machine Gun
Model: Type 62

Summary

Make:	Japanese Machine Gun
Model:	Type 62
Manufacturer:	Nittoku Metal Industry
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	JAPAN
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
119283 - 1	7.62MM NATO	N/A	599	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is not marked on firearm.

Model

- model marked on top of receiver as "62", followed by a string of Japanese ideographs, and the calibre "7.62mm".
- these machineguns somewhat resemble a MAG-58, but fitted with a finned quick-change barrel assembly; internally, they resemble an upside-down belt-fed Bren more than anything else, with a bolt that cams down to lock.
- these machineguns were the first wholly Japanese-designed machineguns to be used by the Japanese forces post-World War Two; they incorporate a number of elements from other designs to produce a reliable and effective GPMG.
- these machineguns may be seen in use on a bipod, a tripod or other style of trunnion mount, with or without telescopic sights.
- a similar GPMG known as the Type 74 is in Japanese service as secondary armament on armoured vehicles; the Type 74 is most often seen with spade grips at the rear of the receiver, and a smooth, non-finned barrel.

Manufacturer

- manufacturer marked on top of receiver as "NTK".
- approximately 3500 of these machineguns were manufactured for the Japanese Self-Defence Forces by the Nittoku Metal Industry Company, Ltd. (NTK), of Tokyo, Japan.

Action

- full-automatic ONLY; no provision for semi-automatic fire.

Serial Number

- numbered on the receiver/frame.

Shots

- belt-fed firearm; fed from disintegrating metallic linked belts.

82231 - 1	6.5X50SR JAPANESE ARISAKA	5	488	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
82231 - 2	6.5X50SR JAPANESE ARISAKA	50	488	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- not marked on firearm.
- may also be know as Nambu or Nambu Machine Gun.

Model

- model may be marked on the top of the receiver/frame as three Japanese characters.
- appearance and operation of the Type 91 are almost identical to the Type 11, the major changes being appearance in the grip handle on the the cocking slide the feed hopper having vertical sides and in the ejector having been modified for mounting in tanks and has a 50 round hopper.
- may have the optional, optic sight, butt stock and bipode for infantry use.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- manufacturers logo may be marked on the right side of the receiver/frame.
- the logo/symbol resembles the top view of four cannonballs in a pile, a three petaled flower or a circle superimposed in the center of three other circles.
- Koishikawa Arsenal (Tokyo) used this symbol from 1870 to 1935 and from 1935 to 1945 it was used by Kokura Arsenal.
- date of manufacture is marked on right side of receiver/frame using the Japanese calendar.

Examples:
a) 16.10
- 16 is the Japanese year and 10 is the month (1941, October).

b) 15.2
- 15 is the Japanese year and 2 is the month (1940, February).

- date can be determined by the following:

Western Calendar Year / Japanese Calendar Year
1935 / 10
1936 / 11
1937 / 12
1938 / 13
1939 / 14
1940 / 15
1941 / 16
1942 / 17
1943 / 18
1944 / 19
1945 / 20

- the months are numbered 1 to 12 (January to December).

Action

- no longer capable of full automatic fire.

Serial Number

- serial number may be marked on the top of the receiver/frame.
- the Japanese stopped serializing firearms in ascending order in the 1930's. A new system was introduced using a block of numbers that never exceeded 99,999. Once a manufacturer reached 99,999 a Kana syllable/Japanese character was added to the serial number and so on.
- duplication of serial numbers may be incountered but they should have different year date's and Kana syllable/Japanese character.

FRT Report

Firearm Reference Number (FRN): 120643
Make: Japanese Machine Gun
Model: Type 93

Summary

Make:	Japanese Machine Gun
Model:	Type 93
Manufacturer:	Japanese State Arsenals
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	JAPAN
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
120643 - 1	13.2X99 HOTCHKISS LONG	30	1435	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is not marked on the firearm.

Model

- the model designation is marked on the firearm; all markings on these firearms will normally be marked in Oriental ideographs or non-Western characters.
- this is a heavy machinegun adopted by the Imperial Japanese armed forces in 1933 (the Japanese year 93 of the Showa era; hence "Type 93"); this machinegun was based on an enlarged Hotchkiss M1914 machinegun, and variations of this pattern were used around the world prior to the dominance of the Browning M2 50 BMG series.
- features include: typical "Hotchkiss" appearance, with radially-finned barrel; cone-type flash suppressor; top-mounted box magazine; this firearm was widely used by ground and sea forces as a general-purpose heavy machinegun and as a dedicated anti-aircraft machinegun; the anti-aircraft versions were most commonly seen in dual mountings on a tripod mount, where the gunner fired the guns with a foot pedal from a pivoting seat.

Manufacturer

- the manufacturer (or logo thereof) is marked on the firearm.

Action

- gas-operated.

Serial Number

- numbered on the receiver/frame; may contain Oriental ideographs or non-Roman alphabet characters.

Shots

- detachable top-mounted box magazine.

b) 8699
15.2
- serial number is 8699, 15 is the Japanese year and 2 is the month (1940, February).

- date can be determined by the following:

Western Calendar Year / Japanese Calendar Year
1935 / 10
1936 / 11
1937 / 12
1938 / 13
1939 / 14
1940 / 15
1941 / 16
1942 / 17
1943 / 18
1944 / 19
1945 / 20

- the months are numbered 1 to 12 (January to December).

Action

- no longer capable of full automatic fire.

Serial Number

- serial number may be marked on the right side of the receiver/frame.
- the Japanese stopped serializing firearms in ascending order in the 1930's. A new system was introduced using a block of numbers that never exceeded 99,999. Once a manufacturer reached 99,999 a Kana syllable/Japanese character was added to the serial number and so on.
- duplication of serial numbers may be encountered but they should have different year date's and Kana syllable/Japanese character.
- example of how the serial number and date of manufacture is marked on the firearm.

a) 48909
16.10
- serial number is 48909, 16 is the Japanese year and 10 is the month (1941, October).

b) 8699
15.2
- serial number is 8699, 15 is the Japanese year and 2 is the month (1940, February).

Notes

Make	- built for use in aircraft of the Japanese Army, entered service about 1938.
Model	- usually marked with model on the top of the receiver housing, behind the rear sight: Type 98 [Japanese characters: Ku (9) Hachi (8) Shiki (type)] - this firearm is a license built copy of the German MG15, virtually identical except for calibre. - cylindical sheet metal receiver-housing with lock-mechanism housing and pistol-grip underside, ventilated cylindrical sheet metal barrel shroud, takes dual saddle-drum magazine, large cylindrical reciprocating charging handle on the right side of receiver, part-rotational indexed ring-safety (safe or fire only) just ahead of the cylindrical rear-receiver extension of plastic composite. - the original version was manufactured by Rheinmetal Borsig, as a flexible-mount air-cooled machinegun for Luftwaffe bomber aircraft.
Manufacturer	- marking indicates manufacture by Nagoya Arsenal (1923 to 1945). - the Nagoya Arsenal "logo" comprises a circle, surmounted directly by a larger circle, circumscribed overall by a larger circle.
Action	- no longer capable of full automatic fire.
Serial Number	- serial numbered on the top rear of receiver housing in normal Western numerals, example: 3649.
Shots	- dual saddle-drum magazine.
Canadian Law Comments	- the saddle drum magazine used with this firearm is exempt from the "REGULATIONS PRESCRIBING CERTAIN FIREARMS AND OTHER WEAPONS, COMPONENTS AND PARTS OF WEAPONS, ACCESSORIES, CARTRIDGE MAGAZINES, AMMUNITION AND PROJECTILES AS PROHIBITED OR RESTRICTED". For further information or clarification see "Part 4, Prohibited Devices", "Former Cartridge Magazine Control Regulations".

Notes

Make

- not marked on firearm.
- may also be know as Nambu or Nambu Machine Gun.

Model

- model may be marked on the right side of the receiver/frame as three Japanese characters next to the manufacturers logo.
- appearance and operation of the Type 99 are almost identical to the Type 96, the major changes being different calibre, addition of a rear monopod and the type of barrel release.
- in some ways this firearm resembles the ZB 26 manufactured by Brno or Bren Gun.
- features include: quick change finned barrel with carrying handle; 30 round curved magazine that is loaded from the top; tangent rear sight with optional optic sight; bipod; bayonet stud.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- manufacturers logo may be marked on the right side of the receiver/frame.
- the logo/symbol resembles the top view of four cannonballs in a pile, a three petaled flower or a circle superimposed in the center of three other circles.
- Koishikawa Arsenal (Tokyo) used this symbol from 1870 to 1935 and from 1935 to 1945 it was used by Kokura Arsenal.
- date of manufacture is marked below the serial number on the firearm using the Japanese calendar.

Examples:
a) 48909
16.10
- serial number is 48909, 16 is the Japanese year and 10 is the month (1941, October).

b) 8699
15.2
- serial number is 8699, 15 is the Japanese year and 2 is the month (1940, February).
- date can be determined by the following:

Western Calendar Year / Japanese Calendar Year
1935 / 10
1936 / 11
1937 / 12
1938 / 13
1939 / 14
1940 / 15
1941 / 16
1942 / 17
1943 / 18
1944 / 19
1945 / 20
- the months are numbered 1 to 12 (January to December).

Action

- gas operated, air cooled.

Serial Number

- serial number may be marked on the right side of the receiver/frame.
- the Japanese stopped serializing firearms in ascending order in the 1930's. A new system was introduced using a block of numbers that never exceeded 99,999. Once a manufacturer reached 99,999 a Kana syllable/Japanese character was added to the serial number and so on.
- duplication of serial numbers may be incountered but they should have different year date's and Kana syllable/Japanese character.
- example of how the serial number and date of manufacture is marked on the firearm.

a) 48909
16.10
- serial number is 48909, 16 is the Japanese year and 10 is the month (1941, October).

b) 8699
15.2

Firearm Reference Number (FRN): 132273
Make: Japanese Mortar
Model: Type 89 Heavy Grenade Discharger

Summary

Make:	Japanese Mortar
Model:	Type 89 Heavy Grenade Discharger
Manufacturer:	Japanese State Arsenal, Nagoya
Level:	Manufacturer Specifications and Commercial Customization
Type:	Mortar
Action:	Single-Shot
Country of Manufacturer:	JAPAN
Serial Numbering:	See Note
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
132273 - 1	50MM JAPANESE GRENADE	1	254	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make designation is not marked on the firearm; the designation is based on the characteristics of the firearm.
- a mortar is a short barreled, smooth bore or rifled, muzzle or breech loading, low velocity, short range, high angle of fire weapon.
- mortars are classified as artillery although usually employed by infantry troops.

Model

- "89" in the Type 89 model desgination refers to when this item was introduced in the Japanese year 2589, which translates to 1929.
- "Type 89" is also known as the Model 89 (1929) 50-mm grenade discharger.
- this firearm is erroneously known as the "Knee Mortar"; it is not designed nor was it intended that any part of the human anatomy be used to support the baseplate on this weapon during firing; serious injury can result from such practice.
- features include: round rifled barrel/tube with screw on base cap; pedestal tube with mainspring, mainspring housing, firing pin, trigger mechanism and elevation mechanism; curved steel base plate.
- the standard projectile is a high explosive shell which contains the propellant charge in its base.
- ranges are controlled by rotation of the knurled range knob; rotation of the projectile is obtained because the rotating band is expanded against the rifling when the weapon is fired.
- may be fitted with a device to indicate the correct firing angle (45°) which gives two range scales, one gives the ranges (120 to 670 meters) governing the use of the Model 89 HE shell and the other (50 to 170 meters) is used for firing Model 91 grenades.
- overall length is 610 mm (24.0") and average weight is 4.66 kgs (10-1/4 lbs).

Action

- muzzle loading, trigger fired.
- does not discharge a projectile at a muzzle velocity exceeding 152.4 mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- known examples have had five digit numbers without prefix or suffix marked on the base of the barrel.

Calibre

- 50MM Japanese High Explosive Grenade shell consisted of a point detonating fuze, a mild steel body with TNT type explosive filler and a propellent assembly with a precusion cap, propellant and expanding coper rotating band.

Type:	Handgun
Action:	Revolver
Country of Manufacturer:	JAPAN
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
77634 - 1	9MM JAPANESE REVOLVER	6	120	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
77634 - 2	9MM JAPANESE REVOLVER	6	120	Antique AFR, Section 1, para. 7	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make does not appear on the firearm.

Model

- "Type 26" model designation appears on the right side of the receiver/frame in Japanese characters.
- "Type 26" early produced model had their serial number stamped on the left grip frame under the grip without external markings.
- "Type 26" had its "Limited Early Production" model had external arsenal and type markings with stamped, internal serial number.
- "Type 26" designation is indicating the model design adoption in the 26th year of the Meija emperor's reign, which corresponds to the year 1893 of the western calendar.
- "Type 26" production and adoption for military service in 1894.
- "Type 26"model was the standard side-arm for Non-commissioned Officers in the Japanese military until the Model 1904 pistol was adopted.
- "Type 26" was manufactured at the Tokyo Artillery Arsenal (Koishikawa, Tokyo) beginning in 1894.
- "Type 26" manufacture was terminated in 1925 at the Tokyo Artillery Arsenal.
- "Type 26" has an estimated production of 59,900 total copies produced in five major production runs.
- features include: pinned half round front sight blade and grooved top of the barrel ahead of the barrel latch; top break design revolver; double action only trigger mechanism; automatic ejector; rear of the trigger guard is acting as a lock for the left side plate giving access to the internal components; rectangular, block shaped hammer without spur; fixed firing pin in the receiver/frame; variations in grip checkering and finishes will be found; blue finish.
- overall length with a 120 mm (4.76") barrel is 231 mm (9.09"), and average weight is 907.18 grams (32 oz).

Manufacturer

- the manufacturers' mark appears on the receiver/frame as a three petaled flower.
- this manufacturer later became the Japanese State Arsenal, Kokura.

Action

- hinged breech, barrel tips down.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- "Type 26" production serial number is from "1" to "59227", the highest recorded in 2003.
- "Type 26" early produced model had their serial number stamped on the left grip frame under the grip.
- "Type 26" later produced model had their serial number stamped on right side of receiver/frame.
- "Type 26" numbered internal components are usually assembly numbers in Japanese characters.
- "Type 26" around serial number 58903, the "Limited Modified Final Production Variation", had parts marked with the last two digits of the serial number.

FRT Report

Firearm Reference Number (FRN): 78453
Make: Japanese Service Rifle
Model: Type 64

Summary

Make:	Japanese Service Rifle
Model:	Type 64
Manufacturer:	Howa Machinery
Level:	Converted Automatics
Type:	Rifle
Action:	Converted Automatic
Country of Manufacturer:	JAPAN
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
78453 - 1	7.62MM NATO	5	450	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
78453 - 2	7.62MM NATO	20	450	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make	- in use by Japanese Defence forces.
Model	- the model designation appears as an ideograph indicating 64 on the left side of the receiver/frame. - the formation of the "Japanese Defense Force" led to the development of the Type 64 rifle. - produced between 1964 and 1990. - features include: short overall length (990mm), folding bi-pod, ventilated handguard, pistol grip, blade front sight with rear aperture adjustable for windage and elevation.
Manufacturer	- an arsenal or manufacturers mark will normally appear on the left side of the receiver/frame. - Howa is located in Nagoya, Japan.
Action	- no longer capable of full automatic fire.
Serial Number	- the serial number is marked on the left side of the receiver/frame.
Calibre	- the Japanese service cartridge is dimensionally equivalent to the 7.62MM NATO but uses a reduced propellant load to give a lessened recoil impulse.
Shots	- detachable box magazine.

92315 - 2	8MM NAMBU	30	235	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Model

- model is not marked on the firearm.
- the Type 100/40 was introduced in two versions with a solid stock and a folding stock.
- it features a fixed firing pin that screws into the face of the bolt and a feeding chambering bar that insures the round is nearly chambered before the firing pin can touch the primer.
- year and month of manufacture can be determined by adding 1925 to the number with the decimal point, the number after the decimal point indicates the month.
IE: 17.8 = 1942 August.

Manufacturer

- the two symbols located on the top of the receiver/frame represent the Nambu Rifle Manufacturing Company, Tokyo, after it merged with Chuo Kogyo in 1936. In 1940 the Niikura factory, located in Saitama Prefecture was established to manufacture machine guns under these symbols.
- the third symbol that looks like a an "A" sitting a 45 degrees, resting on the upper left corner of a rectrangle. This is the mark of the "Department of Control (chief inspector), Nagoya Arsenal".

Action

- no longer capable of full automatic fire.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is located on top of the receiver/frame.
Barrel	- length does not include flash suppressor.
Shots	- detachable box magazine.

Notes

Make

- "JARD" over "SHELDON, IA" is usually marked on the side of the receiver/frame.

Model

- model may be marked on the firearm.
- introduced in 2015.
- "J1022" resembles a Ruger model 10/22 with an integral Picatinny accessory rail.
- features include: no iron sights; round barrel with or without flutes or ports; flat side receiver/frame with an integral Picatinny rail, right side ejection port and cocking handle; cross-bolt safety is mounted on the trigger guard; one piece synthetic or wood semi-pistol grip or thumbhole stock with a rubber butt plate; sling swivel studs; black or stainless finish.
- available with numerous upgrades and accessories.

Manufacturer

- "JARD" over "SHELDON, IA" is usually marked on the left side of the receiver/frame.
- Jard Incorporated is located in Sheldon, Indianna, U.S.A.
- the JARD business was formed in the year 2000 by Dean Van Marel.
- JARD is an acronym formed from the first letter of the names of the Marel family members; Jenna, Amy, Ryan & Dean = JARD.

Action

- blowback operated.

Shots

- detachable box magazine.

Notes

Make

- "J.B. Custom Incorporated" was previously located in Fort Wayne, Indiana, U.S.A.
- "J.B. Custom Incorporated" is now located in Huntertown, Indiana, U.S.A.

Model

- introduced in 2008.
- "Mare's Leg" is a registered trademark of J.B. Custom, Incorporated.
- originally offered in 2004 built with previously unused Winchester Model 94 actions until 2006 when Rossi Model 1892 actions were adapted.
- features include: dovetailed front sight and a ladder type rear sight; round or octagon barrel with a rifled bore; 1892 type flat sided, open top receiver/frame with a left side mounted saddle ring, top ejection, and a right side loading gate; external hammer; single action trigger mechanism; extra large closed loop operating lever; walnut forearm and a straight grip, shortened buttstock with metal butt plate; blued and/or casehardened finish.
- overall length with a 305 mm (12") barrel is 610 mm (24"), and the average weight is 1.4 kgs (3.1 lbs).
- the "Bounty Hunter" name was based on the role played by actor Steve McQueen in the televised series "Wanted Dead or Alive". This particular firearm consisted at the time of a Winchester model 1892 featuring a barrel reduced to 305mm (12") and a stock shortened to approximately 102mm (4") beyond the "large" loop lever.

Serial Number

- serial number is marked on the receiver/frame.

Calibre

- rifling charateristics for caliber 45 COLT: 1 turn in 406mm (16").

Shots

- tubular magazine is mounted under the barrel.

Notes

Make

- "J.B. CUSTOM, INC." was observed marked on the upper rear tang of the receiver/frame.
- "J.B. Custom Incorporated" was previously located in Fort Wayne, Indiana, U.S.A.
- "J.B. Custom Incorporated" is now located in Huntertown, Indiana, U.S.A.

Model

- introduced in 2006.
- "MARE'S LEG PISTOL" was observed marked on the top of the barrel on one sample.
- "Mare's Leg" is a registered trademark of J.B. Custom, Incorporated.
- "92 Mares Leg" firearm was based on a designed of a firearm used by actor Steve McQueen in the televised series "Wanted Dead or Alive". McQueen named the firearm "Mare's Leg" based on the fact that when using fully loaded blanks, it kicked harder than a hogs leg. This particular firearm consisted at the time of a Winchester model 1892 featuring a barrel reduced to 305mm (12") and a stock shortened to approximately 102mm (4") passed the "large" loop lever.
- features include: tapered round barrel; rifled bore; fixed front sight and adjustable rear sight; open top receiver/frame; external hammer; top ejection; safety lever located at the top rear of the breech block; lanyard ring; single trigger mechanism; large loop lever; two barrel bands; blued or antique finish; plain forearm and buttstock.
- overall length for a 305mm (12") barrel is 610mm (24"), average weight is 2.1kg (4lbs10oz).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "AMADEO ROSSI S.A. BRAZIL" was observed marked on the lower rear tang of an example.
- "Rossi" or "Amadeo Rossi" are registered trademarks of Amadeo Rossi, S.A.
- "ROSSI" trade name/trademark has been used on firearms manufactured by Amadeo Rossi S.A. of Sao Leopoldo, Brazil.
- "ROSSI" trade name/trade mark has been used on revolvers manufactured by Forjas Taurus S.A., since 2000/2001.
- "ROSSI" trade name/trade mark has been used on firearms manufactured by Forjas Taurus S.A., since 2008.
- Taurus has manufacturing facilities in Porto Alegre, and Sao Leopoldo, Brazil.

Serial Number

- one sample observed featured the serial number marked on the underside of the receiver/frame and consists of the prefix "JBCML" followed by three or more digits.
- "JBCML" stands for "Jim Buchanan Custom Mare's Leg".

Calibre

- one sample observed featured the calibre designation "44-40 WIN" marked on the left side of the barrel.

Shots

- tubular magazine fed.

Notes

Make

- "J.B. Custom Incorporated" was previously located in Fort Wayne, Indiana, U.S.A.
- "J.B. Custom Incorporated" is now located in Huntertown, Indiana, U.S.A.

Model

- manufactured from 2004 to 2006.
- "JB CUSTOM LEVER ACTION PISTOL" is marked on top of the barrel on an observed example.
- "Mare's Leg" is a registered trademark of J.B. Custom, Incorporated.
- this firearm is built using previously unused Winchester Model 94 actions.
- starting in 2006 it was manufactured on Rossi Model 1892 actions under the same model name.
- features include: tapered round barrel; rifled bore; two barrel bands; with or without fixed front sight and adjustable rear sight; open top receiver/frame; external hammer; top ejection; lanyard ring on the left side of receiver/frame; single trigger mechanism; large loop lever; blued, antique or nickel plated finish; wood forearm and buttstock.
- overall length for a 305mm (12") barrel is 610mm (24"), average weight is 2.1kg (4lbs10oz).
- the "Mare's Leg" firearm was based on a designed of a firearm used by actor Steve McQueen in the televised series "Wanted Dead or Alive". McQueen named the firearm "Mare's Leg" based on the fact that when using fully loaded blanks, it kicked harder than a hogs leg. This firearm consisted at the time of a Winchester model 1892 featuring a barrel reduced to 305mm (12") and a stock shortened to approximately 102mm (4") past the "large" loop lever.

Manufacturer

- manufacturer is not marked on the firearm.

Shots

- tubular magazine.

82692 - 2	577/450 MARTINI-HENRY	1	610	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Jeffery" and/or "W.J. Jeffery & Co.", or "W.J. Jeffery & Co. Ltd." and/or "Jeffery London" will be marked on the firearm.

Model

- model designation is not marked on the firearm.
- this is a Martini-Henry military rifle which has been remanufactured/sporterized by W.J. Jeffery.
- features include: straight grip buttstock with checkered wrist and forearm, two leaf folding rear sight with plain or Ivory bead front; round tapered barrel and blued finish.
- manufacture of this firearm was circa early 1870's to the mid-late 1890's.

Manufacturer

- "W.J. Jeffery & Co.", or "W.J. Jeffery & Co. Ltd." and/or "Jeffery London" will be marked on the barrel and/or receiver/frame.
- the "W.J. Jeffery & Company" was in business from 1891 to 1957.

Action

- rear hinged, lever operated tipping block design.
- Martini action is locked in the firing position by the tip of the operating lever holding the breech block face up and in line with the chamber.

Serial Number

- the serial number is usually marked on the receiver/frame and in some cases may be obscured by the forearm.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Firearm Reference Number (FRN): 77293
Make: Jelly
Model: Air Rifle

Summary

Make:	Jelly
Model:	Air Rifle
Manufacturer:	
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
77293 - 2	177 PELLET	1	400	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	
77293 - 1	22 PELLET	1	525	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Jelly" and "CAL 4.5" are marked on a brass disk inletted into the side of the stock.
- the word "Jelly" is within a bow and arrow and is spelled "Je(arrow shaft)ly".
- Relum Limited was established by George Muller in 1954.
- Relum Limited was located in England at Ossulton House, London and Carlton Park, Industrial Estate, Kelsole, Saxmundham, Suffolk.
- Relum Limited imported and distributed air rifles and pistols under the following trade/brand/model names: Relum, Jelly, FEG Telly, Foreign, Rapide, Repetier, Sport & Foreign, Super, Super Tornado, Taurus, Telly, Tornado and Zephyr from 1954 to the 1980s.
- Relum air guns were manufactured in Czechoslovakia or Hungary.
- Artex of Budapest was the Hungarian exporter for most of the air guns distributed by Relum.

Model

- model is not marked on the firearm.
- this is a standard pattern spring-piston air rifle with a one-piece stained beech pistol-grip stock with cheek-piece, finger-groove along forearm, stamped pistol-grip and butt-caps, stamped trigger-guard, sling swivels at butt and hinge-point and adjustable sights with a hooded front.
- these rifles have a brass marker disc hammered into the stock, with "Jelly" marked within a drawn bow, and the metric calibre of the given rifle.

Action

- break barrel spring-piston air rifle.

Serial Number

- may or may not be serial numbered, depending on the date of manufacture and/or importation; if a given rifle is numbered, it will be on the left side of the barrel block.

Calibre

- calibre is marked on the firearm in metric as:
- "5.5" or "4.5", which represents 22 PELLET or 177 PELLET.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments - Does not discharge a projectile at a muzzle velocity exceeding 152.4 mps and/or a muzzle energy exceeding 5.7 Joules.

Other Markings - observed example marked with an "E" within a circle. This is believed to be a final inspection mark.

Notes

Make

- "J.JENKINSON" is usually marked on the firearm, with a patent date of Dec. 1 or 2, 1862.
- James Jenkinson was a New York City inventor/designer who patented a method of combining a loading gate with the rotating pawl of a revolver to provide a revolver that could be loaded from the rear of the cylinder; in 1862, Jenkinson signed his patent over to Merwin & Bray.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is a brass-framed single-action spur trigger revolver built by or for James Jenkinson incorporating his patent for a slotted loading gate that slides horizontally into and through the frame to allow rimfire cartridges to be loaded from the rear of the cylinder.
- features include: octagonal iron barrel; fixed open sights; engraved brass frame; non-fluted cylinder; spur trigger; and walnut grips on a square butt.
- built in limited quantities circa 1861/2, before Jenkinson sold his patent to Merwin & Bray.

Manufacturer

- "J.JENKINSON" is usually marked on the firearm, with a patent date of Dec. 1 or 2, 1862.
- James Jenkinson was a New York City inventor/designer who patented a method of combining a loading gate with the rotating pawl of a revolver to provide a revolver that could be loaded from the rear of the cylinder; in 1862, Jenkinson signed his patent over to Merwin & Bray.

Action

- single-action spur trigger revolver.

68090 - 1	54 PERCUSSION	1	616	Antique CC 84(1) "antique firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "WM JENKS" appears on the lockplate.
- "WM JENKS", "USN", "inspectors' initials: RC, RP, JCB or JL", letter "P" and the "year of manufacture: 1841, 1842, 1843, 1844, 1845 or 1846" appears on the barrel breech.

Model

- model is not marked on the firearm.
- model designation is based on the 1841 contract to the United States Navy (USN) and United States Revenue Cutter Service Cutter Services (USR).
- first contract was issued in September 1841 for for 500 carbines and 1,000 rifles, second contract was issued in July 1842 for 1,000 carbines, third contract was issued in March 1843 for 1,200 carbines and a fourth contract was issued in July 1844 for 1,500 carbines.
- Jenks' top lever mechanism was designed by William Jenks of Columbia, South Carolina and was assigned U.S. Patent number 747 on May 25, 1838.
- Jenks breech loading, percussion carbine was contracted by the Board of Navy Commissioners in September 1841.
- 4,250 carbines were manufactured for the USN and USR from 1841 to 1846 by N.P. Ames and 1,000 carbines were manufactured by S. Remington between 1846 and 1848.
- a hooked lever on the breechblock, when pulled upwards and back, exposes a loading port, a separate percussion cap must be placed on the external nipple located on the right of the breech of the barrel.
- lock is of the "mule ear" type which is cocked by pulling the hammer out to the right, on pulling the trigger the hammer moves under spring tension, the nose of the hammer contacting and detonating the percussion cap on the nipple which projects at 90 degrees from the right side of the breech.
- one piece American walnut stock with two brass barrel bands, brass trigger guard and buttplate.
- sling ring located behind trigger guard.

Manufacturer

- "N.P. AMES", "SPRINGFIELD" and "MASS" appears on the lockplate.

Action

- breechloading percussion carbine.

Notes

Make

- "JERICHO" is marked on the side of the receiver/frame.
- "JERICHO" was a trade name used by Israel Military Industries (IMI) up to 2005.
- "JERICHO" is currently a trade name used by Israel Weapons Industries (IWI).
- "JERICHO" trade name was dropped by Israel Military Industries (IMI) for the United States market in favor of the "Baby Eagle" trade name.
- "Baby Eagle" trade name is linked to the very successful "Desert Eagle" line.

Model

- "JERICHO 941" is marked on the left side of the receiver/frame.
- "941" is derived from the two initial calibres 9MM LUGER and 41 AE.
- introduced in 1990.
- based on the Tanfoglio version of the CZ 75 design.
- originally offered with a 9MM LUGER barrel and a 41 AE barrel and after about a year the 41 AE was dropped in favour of the then new 40 S&W calibre.
- features include: blued, chrome or nickel finish; steel or polymer receiver/frame; double or single action; exposed hammer; slide or receiver/frame mounted, ambidextrous, safety; squared trigger guard; decocking lever; three dot sight system; polymer grips.
- also available as the model 941F (Frame safety), 941FS (Frame safety, Short version), 941FB (Frame safety, Baby version), 941FBL (Frame safety, Baby version, polymer), 941PS (Police Special, Frame safety, single action, with compensator)
- also offered in an I.P.S.C. version and a 45 AUTO version (model 945).

Manufacturer

- "ISRAEL MILITARY INDUSTRIES" is marked on the left side of the receiver/frame.

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number
- serial number is marked on the right side of the receiver/frame and may be repeated on the slide and barrel.
- observed serial number consisted of six numbers without a letter prefix or suffix.
- observed serial number consisted of eight numbers without a letter prefix or suffix.

Calibre
- marked on the chamber of the barrel.
- originally offered with polygonal rifling and switched to conventional land and groove rifling circa 2005.

Shots
- detachable box magazine.

Notes

Make

- "JIAN WEI" is not marked on the firearm.
- "JW" in the model designation denotes "Jian Wei".
- "Jian Wei" firearms are manufactured by Chinese State Arsenal, Zhongzhou.
- "Jian Wei" firearms are exported from China by Norinco.
- "NORINCO" is the trade-name of China North Industries Corporation.
- there are three Chinese State owned / controlled marketing agencies:
- "Norinco" is a Chinese State marketing agency that sells products of the Chinese State Arsenals.
- "Norinco" is not a manufacturer.
- "Poly Technologies" is the trade name of "Poly Technologies International Incorporated", a marketing agency which is a subsidiary of the Chinese People's Liberation Army.
- "China Jin An" is the sales branch of the Ministry of Public Security.

Model

- "JW-83 BACKPACKER" over "MADE IN CHINA" was observed marked on left side of the receiver/frame.
- "JW-83 BACKPACKER" is similar in design to the Harrington & Richardson model "Topper".
- features include: round smoothbore barrel with a bead front sight; front hinged receiver/frame with the break open release mounted on the top tang to the right side of the hammer; exposed spur hammer; single action trigger mechanism; cross-bolt safety is mounted on the rear of the trigger guard; ejector; checkered hardwood forearm and pistol grip buttstock with recoil pad; blued finish.
- overall length with a 343 mm (13 1/2") barrel is 718 mm (28 1/4").

Manufacturer

- "MADE IN CHINA" is marked on the firearm.

Action

- hinged barrel design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number
- serial number is marked on the underside of the receiver/frame.
- serial number observed consisted of seven numbers without a letter prefix or suffix.

Calibre
- gauge and chamber length are marked on the barrel.

Notes

Make

- JIEFFECO is a tradename used by "Jannsen Fils et Cie" and "Robar et Cie" and these firearms usually bear the JIEFFECO name, and/or the intertwined JFCo logo on the grip panels.
- the original JIEFFECO (J.F.Co) was designed by H. Rosier circa 1907 and was based on a Browning Model 1900 design. The patent (24875.08) was assigned to Janssen Fils et Cie who contracted Robar et Cie to produce this model. Known as the Old Model, this was replaced circa 1914 (patents 259178 and 265491) with the New Model and in 1920 was known as the New Model Melior. This model was also known as Liege and Liegeoise. Importation to the United States of America and subsequent manufacture began circa 1920 by Davis-Warner Arms Corp until 1930 when they were purchased by H.D.Fulsom, merged with Crescent Firearms Co. and were later purchased by Stevens/Savage.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- not marked with model designation, features determine the model.
- made circa 1907 to 1920.
- features include: dovetailed lock-plate located on top rear slide (behind rear sight) locks the internal breech block (removes to the rear) to the slide (removes forward).
- magazine release-latch on the heel of the receiver/frame.
- safety lever on the left side of the receiver/frame above the trigger.
- oval ejection port on the right side of slide.
- full height grip safety to approximately serial number 5000, then half height to approximately serial number 10000, then grip safety discontinued.
- resembles the Browning M1910 pistol.

Also produced on the 7.65mm receiver/frame:
- calibre 9mm Browning Short (380 Auto) and calibre 22LR.

The 6.35mm size firearm.
- features include:
- dovetailed lock-plate located on top rear slide (part of the rear sight), locks the internal breech block (removes to the rear) to the slide (removes forward).
- magazine release-latch on the heel of the receiver/frame.
- safety lever on the left side of the receiver/frame above the trigger.
- oval ejection port on the right side of slide.
- full length or half length grip safety to approximately serial number 10000, then discontinued.
- resembles a small Browning M1910 pistol.

Manufacturer

- observed samples were not marked with the name of the manufacturer.
- JIEFFECOs were manufactured by Robar & Kerkhove and Robar & Cie.

Action

- blow-back operation.

Serial Number

- usually marked on the right side of the receiver/frame above the trigger, and on the slide.

Shots

- detachable box magazine.

Remarks

- NOTE: this record encompasses two different sizes of frames: the 6.35mm size, and the 7.65mm size model firearms. Parts from one size firearm are different, and are not interchangeable with parts from the other size firearm.

DO NOT CONFUSE WITH THE FIREARMS MARKED 'MELIOR'.
- ROBAR also manufactured and marketed these two firearm models under their own tradename, 'MELIOR'.
- except for markings, the 'Melior' and 'Jieffeco' firearms of the same size/model are virtually identical, even to interchangeability of parts.

Level:	Manufacturer Specifications and Commercial Customization
Type:	Airsoft
Action:	Air,Spring or Gas
Country of Manufacturer:	CHINA
Serial Numbering:	
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
139962 - 1	6MM AIRSOFT BB	470	247	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "JG" or "Jing Gong" may be marked on the airsoft.
- Jing Gong (JG) is also known as "Golden Bow".

Model

- "HECKLER & KOCH G36C AIRSOFT" is not marked on the firearm.
- this airsoft firearm resembles a Heckler & Koch model "G36C" automatic rifle.
- features include: aluminum outer barrel/sleeve and smoothbore inner barrel; synthetic receiver/frame; synthetic forearm/heat shield assembly, pistol grip and side folding buttstock; black finish.
- Heckler & Koch G36C Airsoft with the stock in the folded position has an overall length of 500 mm and with the stock extended has an overall length of 720 mm.
- average weight is 2600 grams.

Manufacturer

- Jing Gong (JG) is located in China.

Type

- this is an airsoft rifle.

Action

- spring piston is powered by an electric motor, gear box and battery.
- selective fire.
- at least two variants of this particular model exist:

Variant #1) does not discharge a 0.20 gram 6MM AIRSOFT BB projectile at a muzzle velocity exceeding 238.7 mps (783 fps) and/or a muzzle energy exceeding 5.7 Joules, and

Variant #2) does not discharge a 0.20 gram 6MM AIRSOFT BB projectile at a muzzle velocity exceeding 111.6 mps (366 fps) and/or a muzzle energy exceeding 1.2 Joules.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- this airsoft is available in two variants:
Variant #1) CC 2 "firearm" / CC 84 (3) Exempted: muzzle velocity exceeds 111.6 mps (366 fps) and/or muzzle energy exceeds 1.2 Joules, when discharging a 0.2 gram 6MM AIRSOFT BB, and
Variant #2) CC 84 (1) "replica firearm": muzzle velocity is less than 111.6 mps (366 fps) and/or muzzle energy is less than 1.2 Joules, when discharging a 0.2 gram 6MM AIRSOFT BB.

Firearm Reference Number (FRN): 194745
Make: Jing Jhun
Model: PDS-1

Summary

Make:	Jing Jhun
Model:	PDS-1
Manufacturer:	Jing Jhun
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	TAIWAN
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
194745 - 1	22 PELLET	1	523	Restricted CC 84(1) "restricted firearm" para. (c)	Manufacturer Specifications and Commercial Customization	
194745 - 2	22 PELLET	1	523	Prohibited CC 84(1) "prohibited device" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- The make is not marked on the firearm.
Model	- "P.D.S-1" is marked on the right side of the lower receiver/frame. - Overall length with a 523 mm (20.5 inches) barrel is 643 mm (25.3 inches) with the stock collapsed.
Manufacturer	- The manufacturer is not marked on the firearm. - Jing Jhun was founded in 1990. - Jing Jhun is currently located in Kaohsiun City, Taiwan.
Action	- Pre charged pneumatic. - Velocity has been measured as 292.7 mps or 960.3 fps.
Serial Number	- The serial number is marked on the left side of the receiver/frame.
Barrel	- The barrel length does not include any attached device such as flash-hider or muzzle brake.
Calibre	- ".22 CAL" is marked on the left side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- Discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.
- This firearm has been determined to be a bull-pup design and does not incorporate a bull-pup stock.
- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada.

If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

Other Markings

- Image of a running "razorback" hog may be marked on the left side of the receiver/frame over "Dreamdblation".

Notes

Make

- "J.L.D. ENTERPRISES, INC." is marked on the right side of the magazine housing.

Model

- "PTR-91" is marked on the left side of the magazine housing.
- PTR-91 was introduced in 2003.
- PTR-91 C, PTR-91 F, PTR-91 R and PTR-91 RC are versions of the original PTR-91.
- PTR-91 A1, PTR-91 A1 C, PTR-91 A1 F, PTR-91 K, PTR-91 KC, PTR-91 KFM4, PTR-91 KFO, PTR-91 KP and PTR-91 T are versions of the PTR-91 model introduced in 2005.
- features include: front blade sight; four position peep diopter rear sight; powder coated match grade barrel; stamped steel parkerized and powder coated (scratch resistant) receiver/frame; CNC machined scope mounts; two stage trigger; fixed or collapsible buttstock; a variety of finishes are available such as winter camo, wood, or black polymer; may have a flash hider; hand guard may have bipod recesses.
- the G3 and HK91 pistol grips, handguard, buttstocks and magazines are interchangeable with the PTR-91.
- the collapsible buttstock, bolt carrier and flash hider are originally manufactured HK parts.
- overall length with 457mm barrel and fixed stock is 1016mm (40"), average weight is 4.16kg (9.17 lbs).

Manufacturer

- "J.L.D. ENTERPRISES, INC. FARMINGTON, C.T. USA" is marked on the right side of the magazine housing.
- the JLD Enterprises logo is marked on the left side of the magazine housing.
- Jose L. Diaz and Luis Gallardo formed a partnership in Buenos Aires, Argentina in 1995.
- in 1997, Jose L. Diaz and Luis Gallardo (JLD Enterprises, Inc.) expanded their company and moved the operation to Farmington, Connecticut, U.S.A.
- in 2003, JLD Enterprises, Inc. purchased and imported all of the tooling, machinery, dies, and blueprints along with spare parts from the H&K licensed G3 arms factory in Portugal (FMP) and began manufacturing the PTR-91.
- in 2006, JLD Enterprises, Inc. was sold and the new owners renamed the company "PTR 91, Incorporated".

Action

- recoil operated, delayed roller-locking system.

Serial Number

- the serial number is marked on the right side of the magazine housing.

Calibre

- rifling characteristics: 6-grooves, 1 turn in 12 inches, right hand twist.

Shots

- detachable box magazine.

Firearm Reference Number (FRN): 183705
Make: JMT
Model: GEN 2

Summary

Make:	JMT
Model:	GEN 2
Manufacturer:	James Madison Tactical (JMT)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Receiver Blank
Action:	Full Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

No Data

Notes

Make	- "JMT" is marked on the right side of the receiver at the top of the magazine well. - JMT is the abbreviation for "James Madison Tactical"
Model	- this record is for receiver/frame blanks sold under a percentage of completion (i.e.: 80%). - "JMT GEN 2" is marked on the right side of the receiver/frame blank. - this receiver frame is compatible with parts and components designed for AR-15 or M16 type rifles and is constructed of polymer. - Features include: integral trigger guard, brass coloured metal threaded insert in the pistol grip flange, serrations on the front of the magazine well, molded company markings "JMT GEN 2" on the right side of the receiver on the magazine well, "CAL MULTI" molded into the right side of the receiver above the trigger, "MADE IN THE U.S.A." on the left side of the receiver above the trigger, "SAFE" and "FIRE" markings on both sides of the receiver near the safety selector location, and raised grid lined styling on both sides of the magazine well. - Offered in a variety of colours including: Black, Olive Drab Green, Wolf Grey, and Flat Dark Earth colours. - This receiver may be sold individually, or as part of a polymer jig kit that is designed to simplify the process of completing the receiver blank into a "finished" receiver.
Manufacturer	- stylized letters "JMT" is the logo of James Madison Tactical LLC (JMT). - James Madison Tactical LLC (JMT) was founded in 2013 and is located in Richland, Washington, USA.
Type	- receiver/frame blanks are sold under a percentage of completion (i.e.:80%). - receiver/frame blanks that are partially completed require some tooling and minimal skill to be completed.
Canadian Law Comments	- this receiver/frame blank is a nearly complete receiver that falls within the adaptability clause of the Criminal Code Section 2 definition of "firearm".

Notes

Make

- "J.O.ARMS INC" over "HOU. Tx." is marked on the right side of the slide.
- "J.O.Arms Incorporated" was an importer located in Houston, Texas, U.S.A.
- "J.O. Arms Incorporated" imported KSN Industries pistols until 1996.

Model

- "GOLAN" is marked on the left side of the slide.
- features include: three dot, dovetail front and rear sight; round barrel with chrome plated bore; blued carbon steel slide with rear grip serrations; loaded chamber indicator; black anodized aluminium alloy receiver/frame; slide release is located on the left side of the receiver/frame; ambidextrous manual safety/decocker is located at the top of the grip; exposed spurred hammer; single/double action trigger mechanism; ambidextrous magazine release button is located behind the trigger guard; plastic or walnut grips.
- overall length is 170 mm and average weight is 835 gr.
- this firearm is a licenced copy of the Yugoslavian CZ-99 pistol made in limited quantities before production was moved to South Africa.
- manufactured in South Africa as the Tressitu TZ-99.

Manufacturer

- "GOLAN" over "K.S.N. INDUSTRIES LTD" over "ISRAEL" is marked on the left side of the slide.
- "K.S.N. Industries Limited" was a manufacturer located in Kfar Saba, Israel.
- "K.S.N. Industries Limited" was also an importer located in Houstan, Texas, U.S.A. from 1952 to 1996.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- recoil operated.
Serial Number	- serial number was observed marked on the right side of the receiver/frame and repeated on the slide. - observed serial number consisted of six numbers without a letter prefix or suffix.
Calibre	- calibre is usually marked on the chamber of the barrel.
Shots	- detachable box magazine.

Notes

Make

- "JO.LO.AR." is normally marked on the left side of the slide, the right side on the cocking arm and on the grip panels.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- this model is an improved version of the "Sharp-Shooter" model that was developed in 1917-1918. The original pistol used residual chamber pressure to extract spent cases. In 1919 an extractor designed and patented by Jose L. Arnaiz was incorporated into the design and was renamed the "JO LO AR". - this model has no trigger guard and most will be found with a hand cocking lever mounted on the right side. - the 9MM BAYARD version of the JO LO AR pistol was manufactured for the Government of Peru. - "JO.LO.AR." is normally marked on the left side of the slide, the right side on the cocking arm and on the grip panels. - features include: blued receiver/frame and barrel, round exposed hammer, round exposed tip up barrel with a fixed sight and a lug at the front of the barrel attaching the barrel to the receiver/frame, and black grip panels.
Manufacturer	- manufacturer name did not appear on sample examined, the country of manufacturer is normally marked on the left side of the slide as, "EIBAR (ESPANA)".
Action	- blowback operated.
Serial Number	- sample examined used sequential numbers marked on the left side of the receiver/frame. - the patent numbers 68027 and 70235 will be marked on the pistol, these should not be confused with the serial number.
Calibre	- the calibre designation is normally marked on the left side of the slide. Example "CAL 9m/m".
Shots	- detachable box magazine.

Notes

Make

- Johannsen is marketing "Express" rifles built on what they term "Reproductions of the Legendary Mauser magnum action".

Model

- the "Classic Safari" is offered with a single square bridge receiver/frame (rear of receiver) that features a thumb cutout on the left side, double pull trigger, a three position wing safety on the bolt, express rear sight with two leaves, a front sight that combines a two millimeter silver bead combined with a Holland & Holland style, fold away four millimeter ivory bead, a peep sight mounted on the cocking piece, button rifled barrel by Lothar Walther with barrel band, and high quality walnut stock with either rosewood, ebony, horn or hard rubber tip.
- available with basic, extensive or no engraving.
- Johannsen also offers a "Safari" model that uses a double square bridge (front and rear) receiver/frame without the thumb cutout, and a double pull trigger, and a "Tradition" model that uses a double square bridge (front and rear) receiver/frame without the thumb cutout, and a single pull trigger. Both the "Safari" and "Tradition" use a side mounted horizontal three position safety.

Manufacturer

- manufacturers name and "Made in Germany" are marked on the top of the left side receiver/frame rail.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- the serial number may be repeated on other components.
- may incorporate an alpha prefix.

Calibre

- the 375 H&H MAG and the 416 RIGBY are the standard calibres offered, others are available on request.

Shots

- available with an integral magazine with either a standard hinged floorplate or a "Rigby" style floorplate that increases the shot capacity by one.

- Johannsen is marketing "Express" rifles built on what they term "Reproductions of the Legendary Mauser magnum action".

Model

- the "Safari" is offered with a double square bridge receiver/frame (front and rear) that features no thumb cutout on the left side, double pull trigger, a three position horizontal safety on the bolt, express rear sight with two leaves, a front sight that combines a two millimeter silver bead combined with a Holland & Holland style, fold away four millimeter ivory bead, button rifled barrel by Lothar Walther with barrel band, and high quality walnut stock with either rosewood, ebony, horn or hard rubber tip.
- available with basic, extensive or no engraving.
- Johannsen also offers a "Classic Safari" model that uses a single square bridge receiver/frame (rear of receiver) with thumb cutout, and a double pull trigger, and a "Tradition" model that uses a double square bridge (front and rear) receiver/frame without the thumb cutout, and a single pull trigger. The "Classic Safari" uses a three position wing safety.

Manufacturer

- manufacturers name and "Made in Germany" are marked on the top of the left side receiver/frame rail.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- the serial number may be repeated on other components.
- may incorporate an alpha prefix.

Calibre

- the 375 H&H MAG and the 416 RIGBY are the standard calibres offered, others are available on request.

Shots

- available with an integral magazine with either a standard hinged floorplate or a "Rigby" style floorplate that increases the shot capacity by one.

Notes

Make - the make is not usually marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "American Bull Dog" is marked on the barrel or top strap.
- "American Bull Dog" was introduced as a successor to the "British Bull Dog".
- introduced in 1882/1883.
- features a solid receiver/frame, double action trigger mechanism, and a nickel-plated finish.
- the right side of the receiver/frame has a machined loading slot cut into it through the standing breech to allow access to the cylinder for loading the chambers.
- cylinder axis pin is removable by means of a spring-loaded release lever that is located underneath the axis pin directly in front of the receiver/frame.
- original grips were usually black composite material with the distinctive Johnson & Bye grip logo readily apparent. This logo was a stylized American eagle grasping an olive branch and arrows in its claws with its wings spread over the entire length of the grip plate.
- known examples have fluted cylinders and octagonal barrels with fixed blade-type front sight.

Manufacturer

- the manufacturers name is not marked on the firearm.
- exact dates of manufacture are unknown. Most credible reference sources place the date of introduction as 1882 or 1883. These same references note that production ended in 1899 or 1900. These dates indicate that the American Bulldog model was produced by the firms of "Johnson, Bye & Company" and its successor "Iver Johnson Arms & Cycle Works".
- as these firearms were typically only marked "American Bulldog" on the top of the barrel the only identifier of the actual manufacturer is the grip plates. Johnson, Bye & Company grips were usually black composite material with the distinctive Johnson & Bye grip logo readily apparent. This logo was a stylized American eagle grasping an olive branch and arrows in its claws with its wings spread over the entire length of the grip plate. Iver Johnson grip plates had a "dog's head" logo surrounding the grip screw.
- it must be noted that as grips are easily interchangeable and remaining stocks of grip plates would have been available after Johnson, Bye & Company became Iver Johnson's Arms & Cycle Works early samples are extremely difficult to associate to either company. Samples have also been noted with spurious "American Bulldog" markings that are believed to be either domestic or foreign copies.

Serial Number

- two known examples had four digit numbers without prefix or suffix.
- the serial number usually is located on the left grip-frame underneath the grip plate.

Barrel

- as is common for firearms manufactured in the late 1800's references vary as to barrel lengths. Most agree that the American Bulldog was offered with barrel lengths of between 64mm and 152mm

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Remarks

- the "American Bulldog" is the most common of the five known variations of the solid receiver/frame, double action revolvers offered by Johnson, Bye & Company and Iver Johnson. The "American Bulldog" was produced in large, medium or small receiver/frame size variations. Other names included Boston Bulldog, British Bulldog, Eagle and Old Hickory.

Notes

Make

- "Johnson & Bye" is not marked on the firearm.
- "Johnson & Bye's" logo may be marked on the panel grips.
- Johnson & Bye's first double action revolvers were sold under the brand names of "American Eagle", "British Bulldog", "Lion" and "Old Hickory".
- Johnson & Bye's first double action revolvers were distributed by J.P. Lovell Company of Boston, Massachusetts, U.S.A.
- "J.P. Lovell & Sons was in business from 1868 to 1890 and J.P. Lovell Arms Company was in business from 1890 to 1897.

Model

- "AMERICAN EAGLE" and "APT. JUN. 4, '78, FEB. 25 '79" or "PAT. FEB. 25 '78" is marked on the top strap.
- manufactured from 1878 to 1881.
- approximately 300,000 manufactured.
- features include: round rifled barrel with blade front sight; solid top receiver/frame with groove in the top strap for a rear sight and a removable fluted cylinder; cylinder axis pin is located on the front of the receiver/frame; exposed spur hammer; single/double action trigger mechanism; saw handle shape grip frame with a square butt and hard rubber grip panels.
- overall length of the 22 RF is 150mm (5 15/16") and average weight is 10 oz.
- overall length of the 32 RF is 160mm (6 7/16") and average weight is 11 7/8 oz.

Serial Number

- serial number is marked on the left side of the grip strap frame, under the grip panel.
- serial number is from 1 to 99,999. Serial number is repeated each year of production in each calibre/frame size.

Shots

- removable fluted cylinder.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - may be marked on the top strap: PAT. "JUNE 4, 78" and/or "FEB. 25, 79".

Notes

Make

- "Johnson & Bye" is not marked on the firearm.
- "BRITISH BULLDOG" is marked on the top strap.
- "BRITISH BULLDOG" was a trade name/trademark manufactured by Johnson, Bye & Company from 1878 to 1882.

Model

- "BRITISH BULLDOG" is marked on the top strap.
- Manufactured from 1878 to 1886.
- Features include: round or octagonal barrel with blade front sight; solid top receiver/frame with fluted removable cylinder and right side loading gate; exposed spur hammer; single/double action trigger mechanism; rounded trigger guard; vulcanized rubber grip panels.
- The first series of "BRITISH BULLDOG" was a branded version of the "American Eagle" series of revolvers from 1878-1881 and was distributed exclusively by J.P. Lovell co for both wholesale and retail.
- The second series of "BRITISH BULLDOG" was a branded version of the "American Bulldog" first model of 1882-1886. The British bulldog of this version differed from the American bulldog in that it had a different grip shape (birds head grip) creating a more European aesthetic. The American Bulldog and the British bulldog shared the same lock work. Large framed .44 caliber versions of this model had an octagonal barrel.
-

Manufacturer

- manufacturer's name is not marked on the firearm.

Serial Number

- the serial number is usually located on left side of backstrap edge, under the grip.

FRT Report

Firearm Reference Number (FRN): 33076
Make: Johnson & Company
Model: Screw Barrel Pistol

Summary

Make:	Johnson & Company
Model:	Screw Barrel Pistol
Manufacturer:	
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
33076 - 1	50 PERCUSSION	1	63	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Non-Commercial Customization	
33076 - 2	50 PERCUSSION	1	63	Antique CC 84(1) "antique firearm"	Non-Commercial Customization	

Notes

Make

- "JOHNSON" over "& CO." is marked on the left side of the receiver/frame.
- "LONDON" is marked on the right side of the receiver/frame.

Model

- Screw Barrel Pistols were popular in the period prior to 1880 and were commonly manufactured in Belgium and England.
- model designation is not marked on the firearm.
- model designation is derived from the method by which this pistol is loaded; loading was accomplished by unscrewing the barrel.
- this is a single shot pistol with a removable barrel and an exposed hammer centrally located on the receiver/frame behind the chamber.
- this handgun is intended to be loaded from the breech end of the barrel and as such was originally suppied with a wrench to unscrew the barrel from the receiver/frame in order that a lead ball and loose powder could be inserted into the chamber end of the barrel and then the barrel screwed back onto the receiver/frame.
- features include: no sights; round screw on barrel; engraved box lock action with centrally located percussion hammer and sliding type safety; standard trigger with trigger guard; single action trigger mechanism; wooden bag type grip.

Action

- the barrel unscrews in front of the chamber, so it can be loaded with a ball that fits the barrel more tightly than is possible with a muzzle loader.
- the turnoff barrel may be rifled.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "LIGHT MACHINE GUN" over "JOHNSON AUTOMATICS" are marked on the top of the receiver/frame.
- "Johnson Automatics" is named after the inventor, Captain Melvin M. Johnson, United States Marine Corps.

Model

- "MODEL OF 1941" is usually marked on the top of the receiver/frame.
- this firearm has a unique appearance.
- features include: half length wooden stock, integral ventilated upper handguard, fixed bipod and a side mounted magazine.
- this model was developed for military use during World War Two. The design was not adopted by the US Army, but was issued in limited numbers to the US Marine corps.
- a similar Model is also manufactured in Israel as the "DROR" Model.

Manufacturer

- "CRANSTON ARMS CO." in a triangle is marked on the right side of the receiver/frame near the butt stock.
- "MADE IN PROVIDENCE, R.I.,U.S.A." is marked on the top of the receiver/frame.

Action

- short recoil operated.

Serial Number

- serial number rationalization unknown.
- serial number is marked on the top of the receiver/frame.

Calibre

- "CAL.30-'06" is marked on the top of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine.
Other Markings	- "U.S. PATENT NOS. 2,049,156-2,146,743 2,181,131-2,215,470 AND OTHER US AND FOREIGN PATS. AND PATS. PENDING" is marked on the top of the receiver/frame.
Remarks	- the Johnson 1941 / 1944 machine gun was used by the joint US / Canadian Special Service Force (SSF) during its short 1942 - 1944 existence. - After the end of World War Two, the tooling and equipment to manufacture "Johnson" small arms was sold to the emerging state of Israel.

Notes

Make

- "CAL. .30-'06 SEMI-AUTO." over "JOHNSON AUTOMATICS" are marked on the top of the receiver/frame.
- "Johnson Automatics" is named after the inventor, Captain Melvin M. Johnson, United States Marine Corps.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- Introduced in 1942. - "MODEL OF 1941" is usually marked on the top of the receiver/frame. - manufactured between 1942 and 1944. - this model was developed for military use during World War II. The design was not adopted by the US Army, but was issued in limited numbers to the US Marine corps. - this firearm has a unique appearance, it has a half length stock and ventilated upper handguard. - features include: post front sight with protective ears and an adjustable aperture rear sight marked in meters; round, removable barrel; side loading rotary magazine port below the ejection port on the right side of the receiver/frame; safety is located in front of the trigger guard; ventilated steel upper handguard; plain walnut forearm and semi-pistol grip buttstock; checkered steel buttplate; sling swivels; blue or black parkerized finish.
Action	- short-recoil operated.
Serial Number	- serial number is marked on top of the receiver/frame. - serial number ranges from 0001 to 9999, and then continues with A0001 to A9999, followed by B0001 to end of production.
Calibre	- CAL. .30-'06 SEMI-AUTO." is marked on the top of the receiver/frame.
Shots	- non detachable, fixed rotary magazine that is loaded by stripper clip or individual cartridges.
Remarks	- approximately 70,000 Johnson M1941 rifles were manufactured between 1937 and 1944. - Most of these firearms sat in storage for the duration of World War II after being sold to the Netherlands for service in what is now Indonesia. The Dutch were unable to use them for the intended purpose after the Japanese had conquered their pacific colonies (Indonesia / Dutch East Indies). - After WWII the firm Winfield Arms Corporation (WAC) bought a large number of these Johnson rifles and sold them as war surplus. - the Johnson M1941 Rifle was used in limited quantities by the United States Marine Corps during the early part of World War II. - After the end of WW II, the tooling and equipment to manufacture the Johnson small arms was sold to the emerging state of Israel. - approximately 30,000 Johnson M1941 rifles were manufactured between 1937 and 1944. - After WWII the firm Winfield Arms Corporation (WAC) bought a large number of these Johnson rifles and sold them as war surplus. - the Johnson M1941 Rifle was used in limited quantities by the United States Marine Corps during the early part of World War II. - After the end of WW II, the tooling and equipment to manufacture the Johnson small arms was sold to the emerging state of Israel.

Notes

Make

- "W. P. JONES" may be marked on the receiver/frame.
- "WILLIAM P. JONES, 25 WHITTALL STREET, BIRMINGHAM" may be marked on the barrel assembly.

Model

- model is not marked on the firearm.
- this is a generic entry for those W.P. Jones side by side shotguns that are not identifiable as to model.
- features observed: side by side barrel with bead front sight; front hinged receiver/frame with top tang mounted break open lever; box lock action; double triggers; checkered wood splinter forearm and straight grip buttstock.

Action

- side by side barrel configuration; hinged barrel design.

Serial Number

- serial number was observed marked on the receiver/frame and repeated on the underside of the barrels.

Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	BELGIUM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
161310 - 1	7MM PIN-FIRE	6	106	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "JONGEN FRERES" is marked on the firearm.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is an early style of break-open revolver that "tips up" to allow the cylinder to slide forward off of the cylinder pin, for reloading/unloading, very similar to the system developed by Albert Spirlet.
- features include: blued or bare metal finish; open fixed sights; a spring-loaded spur at the lower front of the frame that allows the barrel to pivot upwards around a pin at the top rear of the frame; a folding double-action trigger; a cylinder with recesses for pin-fire cartridges; and a checkered walnut grip.

Manufacturer

- "JONGEN FRERES" is marked on the firearm.
- Jongen Freres ("Jongen Brothers") were Liege-based gunmakers from 1853 to 1874; in 1874, they were taken over by "Jamart-Smits".

Action

- double-action revolver.

Serial Number

- serial-numbered on the receiver/frame.

Notes

Make

- " H.N.C. JOOSTEN, HAMBURG" was observed marked on the barrel.
- "Henry N. C. Joosten" business is located in Hamburg, Germany.

Model

- " Model 29 D" is marked on the top of the barrel.
- this is a single shot turn-bolt operated rifle with the requirement to manual cock the mechanism after closing the bolt.
- features include: round tapered barrel with fixed front sight and adjustable rear sight; turn-bolt action; turned down bolt handle; take-down screw, one-piece stock with sling swivels; blued finish.

Action

- turn bolt rifle with the safety feature of requiring the manual cocking after closing the bolt.

Serial Number

- serial number was observed marked on the side of the barrel.
- observed serial number consisted of six numbers without a letter prefix or suffix.

Calibre

- "5.4 m/m" was observed marked on the side of the barrel.

Notes

Make

- "PATD BY" over "B.F. JOSLYN" over "AUG. 23, 1855" is marked on the breech lever.
- Benjamin F. Joslyn was granted patent number 13,507 on August 23, 1855 for a breechloading firearm.
- Benjamin F. Joslyn was located in Worcester, Massachusetts, U.S.A. from 1855 to 1861.
- Benjamin F. Joslyn was located in Stonington, Connecticut, U.S.A. from 1861 to 1879.
- Benjamin F. Joslyn patents were manufactured by A.H. Waters & Company of Milbury, Massachusetts and Joslyn Firearm Company of Stonington, Connecticut.

Model

- breech loading, percussion carbine designed B.F. Joslyn.
- Joslyn 1855 system of breech closure uses a lever on top of the breech, when pulled upwards and forward, exposes a loading port, uses a combustable cartridge, a separate percussion cap must be placed on the external nipple located on the right of the breech of the barrel.
- lock is of standard side hamer type.
- one piece American walnut stock with sling ring on left side, one barrel band, brass trigger guard and buttplate.
- total quantity produced 1,500, between 1855 and 1856.
- visually distinctive by the circular loop on the rear of the breech lever.

Manufacturer

- "A.H. WATERS & CO." over "MILBURY MASS." may be marked on the lock plate.

Serial Number

- appears on the breech lever.

Notes

Make

- "B.F. JOSLYN" over "PAT'D MAY 4 1858" is marked on the barrel.
- Joslyn 1858 Revolver was designed by Benjamin F. Joslyn.

Model

- this particular firearm is also known as the "Army Model" or "Standard Model". The 1858 designation is in reference to the patent date marked on the firearm.
- "B.F. JOSLYN" over "PAT'D MAY 4 1858" is marked on the top of the barrel..
- produced circa 1861 - 1862.
- this is a single-action percussion revolver somewhat resembling the Colt 1851, only with a side-mounted hammer.
- features include; solid receiver/frame; octagonal barrel; walnut grips; a cylinder axis pin that enters the receiver/frame from the rear, and a hammer mounted on the right side of the receiver/frame.
- early specimens of this revolver (those with a brass trigger guard) are believed to have been made by W.C Freeman.

Manufacturer

- "B.F. JOSLYN" over "PAT'D MAY 4 1858" is marked on the barrel.
- Joslyn Firearms Company manufactured revolvers and carbines under patents held by Benjamin F. Joslyn.
- Benjamin F. Joslyn was located in Worcester, Massachusetts, U.S.A. from 1855 to 1861 and Stonington, Connecticut, U.S.A. from 1861 to 1879.

Serial Number

- serial number is marked on the receiver/frame from "1" up.

FRT Report

Firearm Reference Number (FRN): 161208
Make: Joy, Andrew, S
Model: Percussion Rifle

Summary

Make:	Joy, Andrew, S
Model:	Percussion Rifle
Manufacturer:	Joy, Andrew, S
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
161208 - 1	45 PERCUSSION	1	1067	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "JOY", "ANDREW S. JOY", or "A.S. JOY" is usually marked on the firearm.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is an example of a percussion "Pennsylvania"-style rifle produced by Andrew S. Joy during the mid 1800's.
- features include: blued or browned octagonal barrel; fixed open sights; half-length straight-grip tiger-stripe maple stock with brass gripstrap/trigger guard and German silver decorative fitments; underbarrel ramrod; right-side lockplate and hammer; double-set triggers; crescent butt.

Manufacturer

- "JOY", "ANDREW S. JOY", or "A.S. JOY" is usually marked on the firearm.
- Andrew S. Joy was a Pittsburgh, Pennsylvania-based gunsmith from the 1830's until the US Civil War.

Action

- muzzle-loaded percussion single-shot

Notes

Make

- "JP ENTERPRISES, INC." is marked on right side of the magazine housing.

Model

- "CTR-02" is marked on the right side of the receiver/frame.
- "CTR-02"stands for "Competition Tactical Rifle of 2002".
- "CTR-02" variations are based on the Colt AR-15/M16 design.
- "CTR-02" is also sold as a receiver/frame.
- "CTR-02" was introduced in 2002.
- "CTR-02" introduced a "PSC-11" model in 2011 with the upper assembly having side and standard charging handles.
- features include: threaded muzzle for muzzle brake; medium or light profile stainless steel barrel; barrel may have a color finned thermal dissipater visible through the handguard elongated venting slots; Picatinny rail with adjustable gas system or low profile gas block; tubular with elongated venting slots, free floating handguard; A3 Picatinny rail flat top upper assembly with integral ACOG combat sight interface; upper assembly has no ejection port cover a screwed on shell deflector and vertically grooved sides; collapsible, fixe or custom rifle buttstock; synthetic pistol grip; matte black, multi color choice two tone anodized finish, color painted surfaces or Presentation Grade finish.

Manufacturer

- JP Enterprises, Inc. is a small scale manufacturer U.S.A. established in 1978.
- JP Enterprises, Inc. was based in Shoreview, Minnesota from 1995 to 1998, in Vadnais Heights, Minnesota from 1998 to 2000, and in White Bear Lake, Minnesota from 2000 to 2009.
- JP Enterprises, Inc. is located in Hugo, Minnesota since 2010.
- JP Enterprises, Inc. specialize in manufacturing custom and semi custom 1911 style handguns, AR-10 and 15 style rifles and 10/22 style rimfire rifles.
- the letters "JP" in JP Enterprises, Inc. are the initials of the founder "John Paul".

Action

- gas operated.

Serial Number

- serial number was observed marked on the right side of the receiver/frame, above the trigger.
- observed serial number consisted of a letter prefix and six numbers.

Calibre

- calibre identification is marked on the barrel.
- "223 Wylde" is a chamber design and not a calibre.
- Wylde chamber was designed by Bill Wylde for use with competition 223 Remington loads.
- Wylde chamber is designed to allow for the ability to shoot military 5.56 ammo, plus the ability to safely shoot .223 ammo with reliable extraction and match-like accuracy.
- Wylde chamber is an improvement on the SAAMI chamber that has traditionally been used in match rifles.
- Wylde chamber works with cartridges having an overall length of 2.445, as opposed to the SAAMI specifications of 2.410" for 223 Remington and 2.550" for 5.45x45mm NATO.
- 223 REM rifling characteristics: 1 turn in 8 inches, right hand twist.
- 204 RUGER rifling characteristics: 1 turn in 12 inches, right hand twist.
- 6.5 GRENDEL rifling characteristics: 1 turn in 10 inches, right hand twist.
- 300 AAC BLACKOUT rifling characteristics: 1 turn in 8 inches, right hand twist.

Shots

- detachable box magazine.

Notes

Make

- "JP Enterprises, Inc" is marked on the firearm.

Model

- "JP-15" is marked on the left side of the receiver/frame.
- "JP-15" variations are based on the Colt AR-15/M16 design.
- "JP-15" is also sold as a receiver/frame.
- "JP-15" was introduced in 1995.
- "JP-15" was introduced also as a "PSC-11" series in 2011 featuring a upper assembly with both, side and standard top charging handles.
- "PSC-11" stands for "Practical Side Charging 2011".
- features include: threaded muzzle for flash hider/muzzle brake; medium or heavy profile barrel that may be stainless steel; Picatinny rail with adjustable gas system or low profile gas block; tubular with elongated venting slots, free floating handguard; A3 Picatinny rail flat top upper assembly with left side charging handle; collapsible, fixe, thumb hole style or custom rifle buttstock; synthetic pistol grip; matte black finish or custom color painted surfaces.

Manufacturer

- JP Enterprises, Inc. is a small scale manufacturer U.S.A. established in 1978.
- JP Enterprises, Inc. was based in Shoreview, Minnesota from 1995 to 1998, in Vadnais Heights, Minnesota from 1998 to 2000, and in White Bear Lake, Minnesota from 2000 to 2009.
- JP Enterprises, Inc. is located in Hugo, Minnesota since 2010.
- JP Enterprises, Inc. specialize in manufacturing custom and semi custom 1911 style handguns, AR-10 and 15 style rifles and 10/22 style rimfire rifles.
- the letters "JP" in JP Enterprises, Inc. are the initials of the founder "John Paul".

Action

- gas operated.

Serial Number

- serial number is marked on the side of the receiver/frame.

Calibre

- calibre identification is marked on the barrel.
- 223 REM rifling characteristics: 1 turn in 8 inches, right hand twist.
- 204 RUGER rifling characteristics: 1 turn in 12 inches, right hand twist.
- 6.5 GRENDEL rifling characteristics: 1 turn in 10 inches, right hand twist.
- 300 AAC BLACKOUT rifling characteristics: 1 turn in 8 inches, right hand twist.

Shots

- detachable box magazine.
- uses all magazines available for AR15/M16 type rifles.
