Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
140996 - 1	34 PERCUSSION	6	95	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "EDWIN LADMORE, HEREFORD" is marked on the barrel.
- Edwin Ladmore's name is associated with at least two British gunmakers located in Birmingham or Hereford, Herefordshire, England.
- Edwin Ladmore was located at Widemarsh Street in Hereford, Herefordshire, England, circa 1841 to 1870.
- Edwin Ladmore was located in Birmingham, England at 74 1/2 Hight Street in 1851 and at 5 Caroline Street, St. Paul's in 1853.

Model

- model name is not marked on the firearm.
- this is an open top receiver/frame, percussion revolver with a long flat spur hammer.
- manufactured circa 1853 to 1899.
- the 1853 Longspur Model came in three sizes: Holster size, normally five shots and a 178mm (7") barrel, Belt size, normally five shots and a 121 - 127mm (4.75 - 5") barrel, and Pocket size, six shots and a 89 -102mm (3.5 - 4") barrel.
- there may be a safety lever on the left side of the receiver/frame that when pressed forward the hammer is held safely in either the cocked or uncocked position.
- the First model can be distinguished by the absence of a rammer and a partially enclosed hammer.
- the Second model incorporates an Adams-type rammer secured to the receiver/frame by a spring clip.
- the Third model can be determined by the compound rammer (patented by James Kerr in 1955, No. 1722) that is mounted to the barrel web and lays flat along the left side of the barrel, instead of being hinged is screwed onto the end of the cylinder axis rod and then secured by a horizontal screw entering from the front of the lug into the receiver/frame.

Manufacturer

- "JAMES WEBLEY PATENTEE", or "JAMES WEBLEY ST. MARY'S SQUARE, BIRMINGHAM", or "WEBLEY'S PATENT" may be marked on the firearm.

Action

- percussion ignition.

Serial Number

- serial number is marked on the front right side of the receiver/frame.
- known examples had three numbers without prefix or suffix.

Notes

Make

- "LAHTI" is not marked on the firearm.
- "Lahti" is derived from the last name of the Finnish inventor Aimo Johannes Lahti (1896 - 1970).

Model

- marked on top of upper receiver.
- fixed rear sight.
- bakelite grips.
- Valmet produced examples of this model differing from VKT production in having the rear "hump" on the slide ending in a line rather than a curve perpendicular to the bore, and the absence of a loaded chamber indicator.

Manufacturer

- "VALMET" is marked on top of receiver.
- "VALMET" marked pistols may be encountered with "VKT" marked parts.

Serial Number

- located on the left side of the firearm.
- the serial number may range from 6800 to 9300.
- may be encountered with a "'VO" prefix.
- an additional 100 units were produced in 1985 and are numbered 50001 to 50100.

Shots

- detachable box magazine.

Other Markings

- some firearms may be found with variant national markings, i.e. Israeli marks, etc.

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
20490 - 2	9MM LUGER	8	120	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "LAHTI" is not marked on the firearm. - "Lahti" is derived from the last name of the Finnish inventor Aimo Johannes Lahti (1896 - 1970).
Model	- marked on top of upper reveiver. - fixed rear sight. - bakelite grips. - Valmet produced examples of this model differ from VKT production by having the rear "hump" on the slide ending in a line rather than a curve perpendicular to the bore, and the absence of a loaded chamber indicator.
Manufacturer	- "VKT" inside a diamond on top of the receiver and moulded into the butt plate/grips. - marked on top of receiver. - "VKT" became Valmet (who continued to produce this model) after World War 2. - pistols marked "VALMET," may be encountered with "VKT" marked parts.
Serial Number	- located on the side of the receiver/frame. - may also be marked on other componants.
Shots	- detachable box magazine.
Other Markings	- some firearms may be found with variant national markings, i.e. Israeli marks, etc.

20489 - 3	9MM LUGER	10	198	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "LAHTI" is not marked on the firearm.
- "Lahti" is derived from the last name of the Finnish inventor Aimo Johannes Lahti (1896 - 1970).

Model

- model does not appear on firearm.
- introduced in 1940.
- approximately 83,950 pistols were made before production stopped in 1946.
- similar in appearance to the Lahti model "L-35", but the trigger guard is more squared and has a barrel with a hexagonal shape at the breech.
- the grip plates will normally carry the "crowned" letter "H" emblem.
- Sweden had adopted the German made "P38" pistol in 1939, with the outbreak of the Second World War these were no longer available. The Finnish "Lahti" pistol was substituted in its place. Demands were too great for the original manufacturer (VKT of Finland) so a licence was granted to produce this model in Sweden.

Manufacturer

- the manufacturer's name is marked on the left side of the slide.
- originally licenced to "Svenska Automatvapen AB" for manufacture, but this firm liquidated before production began. The contract was then given to "Husqvarna Vapenfabrik AB" who produced this model until 1946.

Serial Number

- serial number on left side of receiver over grip.

Shots

- detachable box magazine.

Notes

Make

- "LAHTI-SALORANTA" is not marked on the firearm.
- "Lahti-Saloranta" is derived from the last name of the Finnish inventors Aimo Lahti and Arvo Saloranta.

Model

- the model designation may not be marked on the firearm.
- designed in 1926.
- this machine gun served as the Finnish Army's primary machine gun.
- features include: milled rectangular receiver/frame; slot-ventilated barrel shroud; open adjustable sights; wooden buttstock and separate pistol-grip; curved detachable box magazine; folding bipod, and recoil operation.

Manufacturer

- the manufacturer or logo thereof will be marked on the firearm.

Action

- recoil operated.

Serial Number

- serial number is marked on the firearm.
- example observed with four numbers without a letter prefix or suffix.

Firearm Reference Number (FRN): 148835
Make: Laird Menteyne Degaille
Model: Machine Gun

Summary

Make:	Laird Menteyne Degaille
Model:	Machine Gun
Manufacturer:	Coventry Ordnance Works (COW)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
148835 - 1	303 BRITISH	25	642	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "LAIRD, MENTEYNE, DEGAILLE" is marked on the left side of the receiver/frame.
- "LAIRD" stands for Charles W. Laird, the British engineer associated with the Coventry Ordnance Works Company.
- "MENTEYNE" stands for Paul M. Menteyne, the French mechanical engineer and inventor.
- "DEGAILLE" stands for Pierre A. Degaille, the French mechanical engineer and inventor.
- "LAIRD, MENTEYNE, DEGAILLE" have filed for patents on firearms and magazine/belt improvement in the 1909-1912 era.

Model

- model is not marked on the firearm.
- the date "1913" is marked on one specimen.
- features include: tapered and fluteb barrel; front sight assembly is attached to the receiver/frame extension; receiver/frame extension has at half of its length a perpendicular attachment point for the tripod; rectangular shaped receiver/frame with right side cocking handle and left side magazine housing; ladder type rear sight mounted at the rear of the receiver/frame; trigger guard with a front mounting hole for the tripod; curved pistol grip; straight recoil buffer tube with no stock attachment; blued finish.
- overall length with a 642mm (25.25") barrel is 1130mm (44.5")

Manufacturer

- "COVENTRY ORDNANCE WORKS" is marked on the left side of the receiver/frame.
- "COVENTRY ORDNANCE WORKS" was located in Coventry, England.
- "COVENTRY ORDNANCE WORKS" was mainly a manufacturer of heavy guns and mounts.
- "COVENTRY ORDNANCE WORKS" was founded in 1905 by a consortium of shipbuilding firms.
- "COVENTRY ORDNANCE WORKS" was taken over in 1919 by the English Electric Co.
- "COVENTRY ORDNANCE WORKS" closed in 1925.

Serial Number

- serial number of a referenced example consisted of three numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- magazine fed.
- open box type magazine looking similar to a stripper clip.

Notes

Make

- "LAKEFIELD MOSSBERG" is marked on the bottom of the receiver/frame in front of the loading gate.

Model

- introduced in 1980.
- "500" is marked on front underside of receiver/frame.
- Lakefield/Mossberg model 500 was available in several series based on the gauge.
- "500A" series was in 12 Gauge.
- "500C" series was in 20 Gauge.
- "500E" series was in 410 Gauge.
- features include: round smoothbore barrel with bead front sight; flat side receiver/frame with right side ejection and bottom loading port; top tang mounted safety; auction release is located behind the trigger on the left side of the receiver/frame; checkered wooden forearm and pistol grip buttstock with recoil pad; blued finish; .

Manufacturer

- "LAKEFIELD MOSSBERG" is marked on the bottom of the receiver/frame in front of the loading gate.

Action

- slide action operated.

Serial Number

- located on the left rear of receiver/frame.
- observed serial number consisted of a letter "H" prefix and six numbers.

Barrel

- chamber, gauge, choke and barrel length marked on left rear of barrel.

Calibre

- calibre is marked on the barrel and may also be found on the bottom of the receiver/frame in front of the loading gate.

Shots

- tubular magazine is mounted under the barrel.

Notes

Make

- the maker's name was not marked on this prototype firearm.

Model

- no model name is marked on this firearm.
- this was a prototype semi-automatic rimfire carbine-type rifle designed by Mossberg in North Haven, Conn. U.S.A. for possible manufacture at Lakefield Arms in Peterborough, Ontario, Canada in the early 1970's; it was characterized by its short barrel length and its Mannlicher-style stock.
- research revealed that this rifle would have been designated the MARK 4 by Lakefield, it did not however proceed past the prototype stage.
- only one such example of this firearm is known to exist.
- this is a blowback operated, semi-automatic rifle with a detachable box magazine.
- features include: full Mannlicher-style stock with Schnabel forend; blued finish.
- overall length is 800 mm (31-1/2").

Manufacturer

- manufacturer's name is not marked on this example.

Action

- blowback operated.

Serial Number

- research has determined that this prototype rifle was not serialized.

Shots

- detachable box magazine.

Notes

Make

- "L&T" was observed marked on the left side of the receiver/frame.
- "L&T" is a trademark used by Lambin & Theate.

Model

- manufactured prior to 1895.
- "BRITISH" over "BULL DOG" was observed marked on the top strap of the receiver/frame.
- "British Bulldog" in general terms, this type of Belgian handgun was a copy of the Webley No.2 "British Bulldog".
- "British Bulldog" is typified as a short barreled, solid top receiver/frame handgun with a right side swing down loading gate and bird's herad grip strap.
- "British Bulldog" usually has an empty case ejecting rod with the rod sheathed within the cylinder axis pin; this rod is pivot mounted on the right side of the receiver/frame and is capable of swinging to the right.
- barrel may be ovate, round or multi-sided, trigger may be fixed (with a trigger guard), folding or hidden (folds flush with the receiver/frame when not in use).
- barrel and receiver/frame are usually forged integrally as one piece. It may or may not have a noticeable "hump" on the grip backstrap behind the hammer.

Manufacturer

- "Lambin & Theate" was located in Liege, Belgium from 1877 to 1894.
- "Leon Lambin" established a company in 1862.
- "Leon Lambin was located in Liege, Belgium from 1862 to 1877.
- "Leon Lambin" joined "E. Theate" to form "Lambin - Theate" in 1877.
- "Lambin - Theate" title was used from 1877 to 1886.
- "Lambin - Theate" title was ammended to "Lambin & Theate" in 1886.
- "Lambin & Theate" was located a 5 Trappe Street in Liege from 1886 to 1894.
- "Lambin & Theate" company is taken over by "T. Theate & Company" in 1894.
- "Toussaint Theate & Company" was in business in Liege from 1894 to 1907.

Serial Number

- serial number was observed marked on the left side of the receiver/frame under the grip plate.
- observed serial number consisted of four numbers without a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - removable cylinder.

FRT Report

Firearm Reference Number (FRN): 15717
Make: Lamotte, Jean-Baptiste
Model: Flintlock Pistol

Summary

Make:	Lamotte, Jean-Baptiste
Model:	Flintlock Pistol
Manufacturer:	Lamotte, Jean-Baptiste
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	FRANCE
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
15717 - 1	63 FLINTLOCK	1	273	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "J.B. LaMotte" is usually marked on the lockplate.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is a flintlock pistol manufactured prior to 1856 by Jean-Baptiste LaMotte of St. Etienne, France.
- features include: octagonal barrel (may include precious metal inlays); full stock; under-barrel ramrod; cock, frizzen, and flash-pan mounted on right side; and brass or German silver fittings, which may include a grotesque face grip-cap.
- also seen as cased sets of duelling pistols.

Manufacturer

- "J.B. LaMotte" is usually marked on the lockplate.
- Jean-Baptiste LaMotte was a St. Etienne, France-based gunmaker from the late 1700's to the mid-1800's, who specialized in making guns for the aristocracy.

Action

- muzzle-loaded flintlock single-shot.

Notes

Make

- known example marked "Supreme - Lanber" on the left rear of the top barrel.

Model

- known example had "Model 844" marked on the right rear of the top barrel.
- manufactured from 1981 to 1986.
- features include: boxlock; top lever opening; checkered walnut pistol-grip stock and forend; single trigger or double triggers; top tang mounted sliding-type safety on top of which is mounted a button-type barrel selector; extractors or ejectors; engraved receiver/frame; blued finish; Spanish proofmarks are apparent on the barrels and/or receiver/frame.

Manufacturer

- "Lanber" is usually marked on the barrels and/or receiver/frame.
- the manufacturers code initials "I.G." are usually marked on the action flats and on the barrel lugs.
- Lanber Armas S.A. is located in Zaldibar, Spain.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- over and under configuration.
Serial Number	- known example had a six digit number without prefix or suffix marked on the action flats of the receiver/frame. - the makers initials are also marked in front of and a slight distance away from the serial number and should not be taken as part of the serial number; the initials are marked on the action flats as "I.G.". - serial number may also be marked on the top tang of the receiver/frame underneath the action release lever.
Calibre	- calibre is usually marked on the barrels.
Remarks	- Variations within the model 844 series are: - 844 E (automatic ejectors) - 844 EST (automatic ejectors/single selective trigger) - 844 ST (single selective trigger) - 844 MST (magnum/single selective trigger)

Notes

Make

- "Charles Lancaster (Patent) 151 New Bond St London" is marked on the top of the top barrel.

Model

- no model name is marked on this firearm; model designation is derived from the characteristics of the firearm.
- this handgun was advertised by the firm of Charles Lancaster as the "Double-Barrel Breech-Loading Hammerless Pistol"; it is very similar in overall appearance to the Lancaster Four-Barrel Breech-Loading Hammerless Pistol.
- introduced circa mid-1880's; produced into the mid-late 1890's.
- features include: over/under barrel configuration, hinged receiver/frame construction; left side mounted side lever opening; the standing breech carries two firing pins which are activated by zig-zag type of striker which rotates with each pull of the trigger, later versions used a firing-pin integral with the revolving striker to replace the older system of a firing-pin for each barrel; rebounding lock work; hammerless; all cases are ejected upon opening of the action; barrels rifled with the Lancaster patented (1850 British Patent 13161) smooth oval-bore system; also produced with a ring-type trigger beneath the trigger guard giving the appearance of a "double trigger"; round grip frame which may have a lanyard ring; hardwood checkered grips; blued or nickel plated finish.
- this firearm would also be produced in any special calibre pattern according to the customer's specifications.
- British proofmarks are apparent on the barrels and receiver/frame of this firearm.

Manufacturer

- "Charles Lancaster (Patent) 151 New Bond St London" is marked on the top of the top barrel.

Action

- over/under barrel configuration.

Serial Number

- serial number is located on the front strap of the pistol grip.
- number is numeric only without prefix or suffix.

Notes

Make

- "CHARLES LANCASTER" is marked on the barrels and on the receiver/frame.

Model

- model designation is not marked on the firearm
- features include: blued side by side barrels; front hinged receiver/frame with top tang mounted break open lever; hammerless; top tang safety; two triggers; checkered pistol grip butt stock and forend.
- this rifle would have been produced circa 1870's to the early 1900's in black powder cartridges (Black Powder Express) and until the early 1930's in Nitro powders (Nitro Express) at which time the firm was sold.

Manufacturer

- "C Lancaster" and/or "Charles Lancaster" is marked on the barrels and/or on the receiver/frame.
- Lancaster manufactured multi barrel handguns, revolvers, bolt action rifles, boxlock & sidelock rifles and shotguns.

Action

- side by side configuration, break open action.

Serial Number

- the serial number is located on the water table.
- observed specimen had four digits.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "Charles Lancaster (Patent) 151 New Bond St London" is marked on the top of the rib between the top two barrels.

Model

- no model name is marked on this firearm; model designation is derived from the characteristics of the firearm.
- this handgun was advertised by the firm of Charles Lancaster as the "Four-Barrel Breech-Loading Hammerless Pistol".
- introduced circa 1881 (British Patent 1242 dated 1881); produced into the mid-late 1890's.
- this handgun saw military service within the British Army, primarily in calibres 455 REV and 476 REV.
- features include: four barreled, hinged receiver/frame construction with the barrels placed in an over/under configuration; left side mounted side lever opening; the standing breech carries four firing pins which are activated by zig-zag type of striker which rotates 90 degrees with each pull of the trigger, later versions used a firing-pin integral with the revolving striker to replace the older system of a firing-pin for each barrel; rebounding lock work; hammerless; all cases are ejected upon opening of the action; barrels rifled with the Lancaster patented (1850 British Patent 13161) smooth oval-bore system; also produced with a ring-type trigger beneath the trigger guard giving the appearance of a "double trigger"; round grip frame which may have a lanyard ring; hardwood checkered grips; blued or nickel plated finish.
- British proofmarks are apparent on the barrels and receiver/frame of this firearm.

Manufacturer

- "Charles Lancaster (Patent) 151 New Bond St London" is marked on the top of the rib between the top two barrels.
- face of the standing breech may also be marked, "Patent Charles Lancaster" in a circular manner.

Action

- four barrel cluster with barrels in an over/under configuration.

Serial Number

- serial number is located on the underside of the receiver/frame and on the underside of the barrels.

Calibre

- calibre is usually marked on the left side of the rib between the top and bottom barrels.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- "CHARLES LANCASTER 151 NEW BOND ST. LONDON" was observed marked on the left side of the barrel.
- "CHARLES LANCASTER NON-FOULING SMOOTH OVAL BORE RIFLING" was observed marked on the right side of the barrel.
- House of Lancaster located in London, England
- Charles Lancaster had a gun barrel manufacturing business at 10 Craven Building, Drury Lane from 1811 to 1818, 26 York Street, Gloucester Road Coach and Horse Yard, Gt Titchfield Street from 1822 to 1824, and 151 New Bond Street and 2 Thomas Place, Hampstead Road from 1826 to 1829.
- Charles Lancaster, the founder had a gunmaking business at 151 New Bond Street from 1829 to 1847.
- Charles Lancaster had two sons, Charles William Lancaster and Alfred Lancaster.
- Charles Lancaster died in 1847 and his two sons, Charles William and Alfred, inherited the family business.
- Charles Lancaster business name was used by Charles William and Alfred Lancaster from 1847 to 1854.
- Charles Lancaster business name was changed to Charles William & Alfred Lancaster.
- Charles William & Alfred Lancaster were located at 151 New Bond Lancaster and 2 Little Burton Street from 1855 to 1859.
- Charles William & Alfred Lancaster partnership was dissolved when Alfred Lancaster left the firm in 1860 and set up his own business at 27 South Audley Street.
- Alfred Lancaster was at 27 South Audley Street from 1860 to 1885 and 50 Green Street Gosvenor Square from 1886 to 1892.
- Alfred Lancasters business was acquired by Charles Lancaster & Company in 1892.
- Charles William Lancaster operated a business under his own name from 151 New Bond Street from 1860 to 1867.
- Charles William Lancaster was one of the pioneers of cartridge case development.
- Charles William Lancaster's business name was shortened to Charles Lancaster from 1868 to 1871 and reverted back to the full title from 1872 to 1878.
- Charles William Lancaster died in 1878 and the business was acquired by Henry Alfred Alexander Thorn.
- Charles William Lancaster's business continued under the name of "Charles Lancaster & Company" from 1879 to 1904.
- Charles Lancaster & Company acquired Alfred Lancaster's business in 1892.
- Charles Lancaster & Company was located at 11 Panton Street from 1904 to 1909.
- Charles Lancaster & Company name was changed to "Charles Lancaster & Company, Limited" or "Charles Lancaster Ltd." in 1909.
- Charles Lancaster & Company, Limited moved to 99 Mount Street in 1925 and then to 7 Bury Street in 1932.
- Charles Lancaster Limited was purchased in 1932 by Stephen Grant and Joseph Lang. This business would eventually become Atkin, Grant & Lang, and subsequently, Churchill, Atkin, Grant & Lang, until they ceased to trade in 1980.

Model

- "LEE-SPEED" over "PATENTS" was observed marked on the right side of the receiver ring.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Speed" is for "Joseph J. Speed", the senior manager at the Royal Small Arms Factory at Enfield Lock between 1891 and 1909.
- "LEE-SPEED" was manufactured by Birmingham Small Arms & Metal Company from 1892 to 1897 and by Birmingham Small Arms Company from 1897 to circa 1910.
- "Lee-Speed" was a commercial version of the British military Lee-Metford or Lee-Enfield (depending on the type of rifling) models MARK 1* or MARK 2 Carbine or Rifle.
- "Lee-Speed" Military Pattern commercial carbines and rifles are void of any British government ownership markings and usually have a better grade of wood and higher degree of finish than their government issue counterparts.
- "Lee-Speed" was also available in a sporting model with flat rib along the top of the barrel.
- "Lee-Speed Patents" were manufactured by the Birmingham Small Arms & Metal Company (BSA&M Co) circa 1894/1895 and several thousand were supplied to the British South Africa Company in Lee-Metford Military and Sporting Patterns.
- "Lee-Speed" should not to be confused with the later patterns of the Lee-Enfield No 1 (Short Magazine Lee-Enfield / Sht L.E.).

Manufacturer

- "B.S.A. Co" was observed marked on the right side of the butt socket.
- "B.S.A. Co" is the abbreviation for the Birmingham Small Arms Company.
- "B.S.A.& M. Co" is the abbreviation for the Birmingham Small Arms & Metal Company.

Action

- turn bolt design.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Shots

- detachable box magazine.

Notes

Make

- "CHARLES LANCASTER, 151 NEW BOND ST. LONDON" is marked on the top of the barrel.
- Charles Lancaster was in operation at 151 New Bond Street, London circa until 1826 until his death in 1845.
- Charles William Lancaster and his brother Alfred took over operation at 151 New Bond St, London circa 1845.
- Alfred Lancaster left and opened his own shop circa 1859 and Charles William continued alone until his death circa 1878.
- The business was acquired by Henry Alfred Alexander Thorn and renamed "Charles William Lancaster & Co" circa 1879 to 1894.
- "Charles Lancaster & Co" became "Charles Lancaster Ltd" and was located at 11 Panton street circa 1904-1925.

Model

- The model designation is not marked on the firearm.
- This is a top-break double action revolver based on Charles Pryse patent, characterized by a "tong"-style opening system where two levers at the rear of the recoil shield are squeezed in to allow the barrel and cylinder to tip down for loading/reloading/unloading.
- Features include: front hinged receiver/frame; cylinder removal knob located on the left side of the firearm ahead of the cylinder; twin action release-latches are placed vertically on the receiver/frame behind the cylinder; manual safety located on the left side of the receiver/frame; exposed spur hammer; single/double action checkered wood grip plates with a metal buttcap and lanyard loop.

Serial Number

- The serial number was not marked by the manufacturer.

Calibre

- The calibre designation is not marked on the firearm.

Canadian Law Comments

69947 - 1	370 EXPRESS	5	662	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "CHARLES LANCASTER, 151 NEW BOND ST. LONDON" is marked on the top of the barrel, forward of the rear sight.
- the firm of Charles Lancaster imported Ross receiver/frames to stock, barrel and finish to the customers specifications.

Model

- not marked with model designation.
- "ROSS PATENTS" and "HARTFORD, CONN. U.S.A." are marked on the left side of the receiver/frame.
- features determines model; the "E" designation denotes superior wood and finish of a commercial sporter (a opposed to the plain commercial sporter designated "R", or to others with military finish and fittings for the Canadian Army).
- rifle built on the 1903 action designed by Sir Charles Ross, uses straight-pull action, opposed dual lugs, rotating bolt-head, with safety button on the bolt-handle root.
- blued tapered barrel with rear-sight base on top ahead of the chamber area, blade front sight on faired rear-sight base, optional rear peep-sight mounted on the bolt striker; bore rifling cross-section is oval (eliptical) without noticeably pronounced lands or grooves.
- walnut sporter stock with fine checkered pistolgrip, and forend panels; sling loops on the barrel underside ahead of the forend, and the butt-toe.
- "Harris" designed magazine with follower lowering plate on the right side of the barrel ahead of the receiver, magazine cut-off on right side, about one-half inch above the trigger guard, cut-off release button on the inside front of the trigger guard.
- as these rifles were built on a semi custom basis features will vary considerably.

Manufacturer

- the riflemaker Charles Lancaster built rifles on the Ross 1903 action.
- "CHARLES LANCASTER, 151 NEW BOND ST. LONDON" is marked on the top of the barrel, forward of the rear sight.

Action

- straight pull operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- marked on the bottom of the trigger guard, example: 0012345 - the serial number must be marked on the receiver/frame.
Shots	- integral box magazine.
Other Markings	- the following markings were noted on one sample examined. - marked on the top of the barrel below maker's name and address, forward of the rear sight: NON-FOULING SMOOTH OVAL BORE RIFLING - marked on the right side of the barrel above the chamber: 40 GRS CORDITE 270 GRS BULLET MAX - marked on the underside of the magazine well cover-plate: 40 GRS CORDITE 270 GRS BULLET

Notes

Make

- make is marked on the magazine housing as: "LANCHESTER".
- the Lanchester was named after George Lanchester. George Lanchester was the designer and was in charge of the production of the Lanchester when the initial contract was place by the British Royal Navy and Royal Air Force for 50,000 units on June, 1941.

Model

- production started in 1941 and stopped in 1943, but continued to be used by the British Royal Navy until 1978.
- the model designation is normally marked on the magazine housing as, "MK.1." or "MARK 1".
- the rate of fire is 600 rounds per minute.
- features include: blued receiver/frame and barrel with a heat shield, a magazine housing on the left side of the receiver/frame, fixed front sight with tangent or flip up 100-200 yard rear sight, a curved handle on the breech block, safety located at the back of the receiver/frame, and a beech stock with a brass, steel or alloy butt plate.

Manufacturer

- the manufacturer's name may not be marked on the firearm. The manufacturer's code "S230", may be marked on the breech casing or the barrel.

Action

- capable of semi automatic and full automatic fire.

Serial Number

- the serial number is marked on the magazine housing of the receiver/frame.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- the Lanchester Mark 1 was based on the Bergmann MP28. The original Lanchester was designed for select fire capabilities and a tangent rear sight. The rear sight was later replaced with a 100-200 yard flip over rear sight. The stock was made of beech with a brass butt plate, later the butt plate was made of a pressed steel then an alloy. The original magazine housing was made of fabricated steel, later it was made of machined brass or a bronze casting.
- January 1942, the trigger was redesigned for automatic fire capabilities. The handle on the breechblock was also redesigned. The Mark 1 breech block handle was redesigned and the curved breech block handle was replaced with a straight handle. The new Lanchester was designated the Mark 1* and some of the original Lanchester Mark 1 were redesigned and marked with as Mark 1*.
- the Lanchester Mark1 and Mark1* remained in service with the British Royal Navy until 1978.

Notes

Make

- "LANCHESTER" is stamped on the magazine housing.
- "LANCHESTER" name is derived from George Lanchester, a designer who worked for the Sterling Engineering Company. At the outbreak of World War II, Lanchester was appointed to produce a copy of the German MP-28 submachine gun, and this firearm has become known as the "Lanchester".
- "LANCHESTER" was produced by three firms, W. W. Greener, identified by the code M94, Boss & Co., identified by the code S156, and Sterling. The Sterling assembly of the Lanchester was divided between Sterling Engineering Co. Ltd. in Dagenham, code marked S109, and Sterling Armaments Company, code marked M619.

Model

- "MK. 1." is stamped on the magazine housing.
- Lanchester model MARK 1 submachine gun is as close a copy to the German MP-28 submachine gun as could be built; this firearm was adopted early during the Second World War, when the UK desperately needed firearms of all kinds, and submachine guns in particular. To this end, the UK examined those submachine guns they had access to, including the World War I era MP-28, and put a direct copy into production.
- features include: half length wooden pistol grip stock; selector lever at the front of the trigger guard (one of the few features in which this firearm differs from the MP-28); ventilated barrel shroud; open adjustable sights; provision for mounting a bayonet at the muzzle and a magazine housing which holds the magazine horizontally to the left.
- almost all Lanchesters were made with machined brass or bronze magazine housings (which made them suitable for naval use, for which they are most well-known).
- the vast majority of Mk 1 Lanchesters (selective fire) were later converted to the Mark 1* pattern (full automatic only).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "S.E.C.O.", "STERLING" or "S109" is marked on the firearm. - Sterling Telephone & Electric Company of Dagenham, Essex, England was established in 1909. - Sterling Telephone & Electric Company was known as Sterling Works (Dagenham) Limited in 1932. - Sterling Telephone & Electric Company became Sterling Electric Holding Limited in 1933. - Sterling Electric Holding Limited was the parent company of Sterling Armaments and Sterling Engineering. - STERLING ARMAMENTS was located in Northampton, England circa 1940 to circa 1943. - Sterling Armaments was one of the secondary companies assigned to produce the Lanchester submachine gun. - Sterling Armaments was a satellite factory to the original "Sterling Engineering" of Dagenham. - Sterling Armaments' wartime production code was "M619". - STERLING ENGINEERING was located on Dagenham, Essex, England. - Sterling Engineering Company Limited's parent company was Sterling Electric Holding Limited from 1939 to 1972. - Sterling Engineering was the original company assigned to produce the Lanchester submachine gun. - Sterling Engineering's wartime production code was "S109". - Sterling Engineering became Sterling Armament Company Limited. - STERLING ARMAMENT COMPANY LIMITED was purchased by James Edminston in 1972. - Sterling Armament and Armalite signed a manufacturing agreement in 1974. - Sterling Armament was sold by James Edminston in 1983/1984. - Sterling Armament was purchased by British Aerospace in 1989. - Sterling Armament ceased operations in the early 1990's.
Action	- advanced primer ignition; the Mark 1 differs from the Mark 1* in that the Mark 1* offers full-automatic fire only, while the Mark 1 has a selector lever for semi-automatic or full-automatic fire.
Serial Number	- numbered on top of the magazine housing, some MK 1s have an "A" suffix, denoting non-interchangeable (ie. welded in place) component parts.
Shots	- side mounted detachable box magazine.

FRT Report

Firearm Reference Number (FRN): 119410
Make: Lanchester
Model: MARK 1*

Summary

Make:	Lanchester
Model:	MARK 1*
Manufacturer:	Sterling Armaments (M619)
Level:	Converted Automatics
Type:	Submachine Gun
Action:	Converted Automatic
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
119410 - 1	9MM LUGER	5	200	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
119410 - 2	9MM LUGER	50	200	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- "LANCHESTER" is stamped on the magazine housing.
- "LANCHESTER" name is derived from George Lanchester, a designer who worked for the Sterling Engineering Company. At the outbreak of World War II, Lanchester was appointed to produce a copy of the German MP-28 submachine gun, and this firearm has become known as the "Lanchester".
- "LANCHESTER" was produced by three firms, W. W. Greener, identified by the code M94, Boss & Co., identified by the code S156, and Sterling. The Sterling assembly of the Lanchester was divided between Sterling Engineering Co. Ltd. in Dagenham, code marked S109, and Sterling Armaments Company, code marked M619.

Model

- model designation is marked on the magazine housing as "MK. 1*".
- the Lanchester Mark 1* submachine gun is a simplified version of the Mark 1, made without provision for semi-automatic fire; the Mark 1 has a rotating selector lever at the front of the trigger-guard.
- features include: half-length wooden pistol grip stock; ventilated barrel shroud; adjustable sights; provision for mounting a bayonet at the muzzle and a magazine housing which holds the magazine horizontally to the left.
- almost all Lanchesters were made with machined brass or bronze magazine housings (which made them suitable for naval use, for which they are most well known).
- the vast majority of Mk 1 Lanchesters (full or semi-automatic fire) were later converted to the Mark 1* pattern (full automatic only).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "M619" is marked on the firearm. - Sterling Telephone & Electric Company of Dagenham, Essex, England was established in 1909. - Sterling Telephone & Electric Company was known as Sterling Works (Dagenham) Limited in 1932. - Sterling Telephone & Electric Company became Sterling Electric Holding Limited in 1933. - Sterling Electric Holding Limited was the parent company of Sterling Armaments and Sterling Engineering. - STERLING ARMAMENTS was located in Northampton, England circa 1940 to circa 1943. - Sterling Armaments was one of the secondary companies assigned to produce the Lanchester submachine gun. - Sterling Armaments was a satellite factory to the original "Sterling Engineering" of Dagenham. - Sterling Armaments' wartime production code was "M619". - STERLING ENGINEERING was located on Dagenham, Essex, England. - Sterling Engineering Company Limited's parent company was Sterling Electric Holding Limited from 1939 to 1972. - Sterling Engineering was the original company assigned to produce the Lanchester submachine gun. - Sterling Engineering's wartime production code was "S109". - Sterling Engineering became Sterling Armament Company Limited. - STERLING ARMAMENT COMPANY LIMITED was purchased by James Edminston in 1972. - Sterling Armament and Armalite signed a manufacturing agreement in 1974. - Sterling Armament was sold by James Edminston in 1983/1984. - Sterling Armament was purchased by British Aerospace in 1989. - Sterling Armament ceased operations in the early 1990's.
Action	- no longer capable of full automatic fire.
Serial Number	- numbered on top of the magazine housing, some MK 1*s have an "A" suffix, denoting non-interchangeable (ie. welded in place) component parts.
Shots	- side mounted detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "M619" is marked on the firearm.
- Sterling Armaments' wartime production code was "M619".
- Sterling Telephone & Electric Company of Dagenham, Essex, England was established in 1909.
- Sterling Telephone & Electric Company was known as Sterling Works (Dagenham) Limited in 1932.
- Sterling Telephone & Electric Company became Sterling Electric Holding Limited in 1933.
- Sterling Electric Holding Limited was the parent company of Sterling Armaments and Sterling Engineering.
- STERLING ARMAMENTS was located in Northampton, England circa 1940 to circa 1943.
- Sterling Armaments was one of the secondary companies assigned to produce the Lanchester submachine gun.
- Sterling Armaments was a satellite factory to the original "Sterling Engineering" of Dagenham.
- STERLING ENGINEERING was located on Dagenham, Essex, England.
- Sterling Engineering Company Limited's parent company was Sterling Electric Holding Limited from 1939 to 1972.
- Sterling Engineering was the original company assigned to produce the Lanchester submachine gun.
- Sterling Engineering's wartime production code was "S109".
- Sterling Engineering became Sterling Armament Company Limited.

- STERLING ARMAMENT COMPANY LIMITED was purchased by James Edminston in 1972.
- Sterling Armament and Armalite signed a manufacturing agreement in 1974.
- Sterling Armament was sold by James Edminston in 1983/1984.
- Sterling Armament was purchased by British Aerospace in 1989.
- Sterling Armament ceased operations in the early 1990's.

Action

- advanced primer ignition; the Mark 1 differs from the Mark 1* in that the Mark 1* offers full-automatic fire only, while the Mark 1 has a selector lever for semi-automatic or full-automatic fire.

Serial Number

- numbered on top of the magazine housing, some MK 1*s have an "A" suffix, denoting non-interchangeable (ie. welded in place) component parts.

Shots

- side mounted detachable box magazine.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
197541 - 1	38 PERCUSSION	1	67	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "LANE & READ BOSTON" is marked on top of the receiver/frame.
- "Lane & Read" were firearm importers and wholesalers in Boston, Massachusetts, United States Of America circa 1826 to 1849.

Model

- The model designation is not marked on the firearm.
- This handgun is intended to be loaded from the breech end of the barrel and as such was originally supplied with a wrench to unscrew the barrel from the receiver/frame in order that a lead ball and loose powder could be inserted into the chamber end of the barrel and then the barrel screwed back onto the receiver/frame.
- Features include: tapered, octagonal, screw-off barrel; engraved box-lock receiver/frame with right side mounted hammer; folding trigger; checkered wood grips with flat metal butt cap.

Action

- The barrel unscrews in front of the chamber, so it can be loaded with a ball that fits the barrel more tightly than is possible with a muzzle loader.

Serial Number

- The serial number is not marked on the firearm.

Calibre

- The calibre designation is not marked on the firearm.

Other Markings

- Birmingham proof marks may be marked on the firearm.

Notes

Make

- "F.L. SELESTLADER" is marked on the side of the firearm.
- "FL" is usually marked on the grip plates.
- "FL", "F.L." and "FLZ" are trademark used by "Friedrich Langenham".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- this pistol was produced in quantity and used during WWI for the German military as a "Behelfspistole" which means "Makeshift pistol". - few if any were offered commercially. - development began in 1914, and the production started in 1915 for the German military. - approximately 50,000 were produced. - the early models were marked "DRP Angem FL Selbstlader 7,65" on the left side of the slide. - later with the adoption of the flush sided breech block the markings were placed on the right side of the block and read as follows: "FL Selbstlader DRGM 625263". - replacing the trigger bar and the disconnector was the final change, and the design number "633251" was added to the inscription. - blue finish with wooden or black plastic grips. - "Selbstlader" is the German equivalent of "self loader".
Manufacturer	- "LANGENHAM" was founded by Valentin Friedrich Langenham in 1842. - "LANGENHAM" was located in Zella Mehlis and Zella St. Balsii, Germany. - "LANGENHAM" manufactured airguns, bicycles, single shot pistols, semi-automatic pistols, revolvers, rifles, and shotguns. - "LANGENHAM" manufactured products under the the trademarks of "Ace", "Favorit", "FL", "F.L. Karabiner", "F.L. Kleinkaliberbuchse", "F.L. Selestlader", "FLZ", "Langenham", and "Meteor". - "LANGENHAM" trademark logo is the letters "FLZ" in a three segmented circle. - "FLZ" denoted "Fredrich Langenham Zell-Mehlis". - "LANGENHAM" ceased operations circa 1945.
Action	- blowback operated.
Serial Number	- located behind the trigger on the right side of the receiver/frame. - observed examples were four and five numbers. - NOTE: the numbers 625263 and 683251 marked on the barrel and/or receiver/frame are believed to be patent numbers and are not serial numbers.
Shots	- detachable box magazine.
Other Markings	- "DRP Angem FL Selbstlader 7.65" translates to: Registered German National Patent Friedrich Langenhan Selfloader 7.65 - "FL Selbstlader DRGM 625263 633251" translates to: Friedrich Langenhan Selfloader German Registered Design 625263 633251

129601 - 2	9.5X47R	1	724	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "T.Langer in Lorrach" was observed marked on the barrel.

Model

- model designation is not marked on the firearm.
- this martini type action is operated by a right side mounted spurred lever which drops the front face of the breech-block.
- features include: blued round or octagonal barrel; blade front and provision for a tang mounted aperture-type sight; breech block hinged at the rear of the receiver/frame that swings downward at the front to open; tang safety; double set triggers; fancy trigger guard; steel capped, pinned forend and a deluxe pistol grip or straight stock with "schuetzen" style hooked buttplate and high comb cheek rest.

Manufacturer

- Tobias Langer was a gun maker located in Lorrach Germany from 1880 to the early 1900's.
- the Langer Martini System is credited as being the predecessor to the Von Shatzel System.

Action

- rear hinged, lever operated tipping block design.
- Martini action is locked in the firing position by the tip of the operating lever holding the breech block face up and in line with the chamber.

Serial Number

- serial number was observed marked on the action face.
- observed serial number consisted of two numbers without a letter prefix or suffix.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
16031 - 1	7.65MM	9	89	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- the make is marked on the frame as "LC" inside an oval, at the left rear of the tang.
Model	- the model is not marked on the firearm; this is the common name by which these pistols are known. - this is a standard-pattern "Ruby" style 32 AUTO pistol manufactured for the French government during the opening years of World War One, when French industry could not meet the demand for armaments; as a result, contracts were issued to Spanish manufacturers to supply large numbers of pistols. - features include: blued finish; blowback operation, enlarged Browning 1906 design with a rotating barrel takedown; fixed open sights; rotating safety/slide latch on the left side of the receiver/frame; checkered wooden grips; heel magazine release.
Manufacturer	- the manufacturer is marked on the receiver/frame as "LC" inside an oval, at the left rear of the tang.
Action	- blowback operated.
Serial Number	- serial-numbered on the receiver/frame.
Shots	- detachable box magazine.

Notes

Make

- "F.LAROSE BREVETE" is marked on the firearm.

Model

- the model is not marked on the firearm; this designation comes from the fact that this revolver is based on a patent awarded to Jean-Francois Larose in 1869.
- the major identifying feature of this revolver is a large checkered thumb button on the left side of the under-barrel axis pin lug, that, when pressed, allows the barrel and two-piece cylinder to slide forward along the cylinder axis pin, simultaneously extract the cartridges or cases in the cylinder.
- this is a simultaneously-extracting revolver manufactured by JF Larose based on his patent for a quick-loading centrefire revolver, which involves a two-part cylinder (cylinder and extractor-plate) that slides forward on the cylinder axis pin to extract fired cases.
- features include: steel or steel and brass construction; blued, gilt, or engraved finish; fixed open sights; octagonal barrel; hollow under-barrel extension lug to house the extended cylinder axis pin; two-piece cylinder; single- and double-action trigger mechanism; walnut, ivory or synthetic grips; a butt lanyard; may have different styles and lengths of grip-strap prawl extensions.

Action

- double-action revolver.

Serial Number

- serial-numbered on the receiver/frame.

Notes

Make

- "H. LARSEN DRAMMEN" was observed marked on the barrel.

Model

- no model name appears on this firearm.
- this is generic entry for single shot rifles produced by H. Larsen that have no model designation marked on them.
- H. Larsen was a gunsmith in Drammen, Norway, circa 1850 to early 1880's.
- known example featured:
- a Martini-style pivoting breech block, i.e., hinged at the top rear of the breech block and tilting downwards at the front; breech block is actuated by a hand-operated lever mounted on the right side of the receiver/frame,
- exposed hammer located in the right rear of receiver/frame behind the breech block so as not to interfere with the operating lever when the lever is pulled rearward to open the action.
- octagonal barrel.

Manufacturer

- "H. LARSEN DRAMMEN" was observed marked on the barrel.
- Hans Larsen was a gunsmith in Drammen, Norway from circa 1850 to the early 1880's.
- Hans Larsen also established "Larsen's/Larsens" in Christiania/Kristiania (Oslo), Norway circa 1876.
- Hans Larsen established "H. Larsen & Fils" in Liege, Belgium from 1877 to 1882.
- Hans Larsen established "Larsen's Rifle Co. S.A." in Liege, Belgium from 1882 to 1887.

Serial Number

- known example had a four digit number without prefix or suffix marked on right side of receiver/frame.

Canadian Law Comments

- firearms that meet the parameters of the Antique Firearms Regulation are considered Antique in Canada and are not subject to registration.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - known example had following markings; "STAAL" on left rear of barrel, "PATENT" on right rear of barrel.

79672 - 1	12 GA	1	700	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "H. LARSEN DRAMMEN" was observed marked on the top of the tipping breechblock.

Model

- single shot, breech loading, underhammer shotgun utilizing the action of the Norwegian Model 1842 military rifle in which the rear hinged breechblock tilts upwards, to expose the chamber, when a lever located on the right side of the receiver is swung in an arc to the rear. Reversing the direction of the operating lever closes and locks the breechblock. A hammer located on the underside of the receiver must be manually cocked before a pressure on the trigger will fire the gun.
- while the stocks of Norwegian Model 1842 military rifles are one piece and extend to within 130 mm of the muzzle, the Larsen shotgun has a buttstock but no forearm.

Manufacturer

- "H. LARSEN DRAMMEN" was observed marked on the top of the tipping breechblock.
- Hans Larsen was a gunsmith in Drammen, Norway from circa 1850 to the early 1880's.
- Hans Larsen also established "Larsen's/Larsens" in Christiania/Kristiania (Oslo), Norway circa 1876.
- Hans Larsen established "H. Larsen & Fils" in Liege, Belgium from 1877 to 1882.

137708 - 1	16 GA X 2 3/4"	5	735	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "LARSEN - WINTERROS" over "PATENT" is marked on the semi-circular action plate which is mounted on the right side of the receiver/frame.

Model

- no model name is marked on this firearm; the model designation is derived from the characteristics of the firearm.
- this firearm is based on a lever action patented design of Auguste Larsen and Clas Erik Winterros; patent was granted as, #5935 dated 29 Dec 1883. Two other patents are also referenced to this design circa 1884.
- features; under-lever operated, repeating shotgun utilizing a half-length under-barrel tubular magazine housed within the forearm; cocking indicator is located on the left side of the receiver/frame; sliding breech-block actuates straight back when the lever is operated; checkered half-pistol grip hardwood buttstock; checkered hardwood forearm; blued finish; may have an engraved receiver/frame.

Manufacturer

- "LARSEN - WINTERROS" over "PATENT" is marked on the semi-circular action plate which is mounted on the right side of the receiver/frame.
- Auguste Larsen was a firearms designer and manufacturer located in Liege, Belgium, circa early 1870's to late 1880's.

Action

- under-lever operated; very similar in appearance to the loop-style of lever used on Winchester lever action rifles.

Serial Number

- serial numbering is numeric only without prefix or suffix.
- a number of known examples are not numbered and one example had a four digit serial number marked vertically on the wooden forearm directly in front of the receiver/frame; it is assumed that the serial number is also marked on the receiver/frame.

Shots

- under-barrel tubular magazine housed within the forearm.

Notes

Make - the make is normally marked on the right side of the slide as, "LASERAIM".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- introduced in 1993 and discontinued in 1999.
- the model designation is not marked on the firearm. The model designation is determined by the slide and the ports that may be on the slide. See "Remarks".
- features include: single action trigger mechanism, stainless steel receiver/frame and slide, the barrel has compensator ahead of the front sight with two ports, ambidextrous safety catch, combat hammer, fixed front sight, the rear sight may be adjustable, the slide lock and magazine release are located on the left hand side of the receive/frame, the receiver/frame has a intergral mount for a laser in front of the trigger, and serrations on the rear of the slide.
- available in a "compact" version with a shorter barrel.

Manufacturer

- the manufacturer is normally marked on the right side of the receiver/frame as, "LASERAIM ARMS INC." over "LITTLE ROCK, ARKANSAS U.S.A.".

Action

- recoil operated.

Serial Number

- the serial number is marked on the butt of the receiver/frame behind the magazine well as one alpha character followed by five sequential numbers.

Calibre

- the calibre designation is normally marked on the barrel and visible through the ejection port.

Shots

- detachable box magazine.

Remarks

- the slide features that indicate which model in the Laseraim Series of handguns are as follows;
Series I - the barrel has a compensator ahead of the front sight with two ports.
Series II - the barrel has no compensator or porting.
Series III - the barrel has compensator behind the front sight with two ports.
Series IV - the slide is ventilated with channels cut along the top of the slide.

FRT Report

Firearm Reference Number (FRN): 125602
Make: Lauer Custom Weaponry
Model: LCW15

Summary

Make:	Lauer Custom Weaponry
Model:	LCW15
Manufacturer:	Lewis Machine & Tool (LMT)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
125602 - 1	5.56MM NATO	5	406	Prohibited PFR, Part 1, para. 87(z.491)	Manufacturer Specifications and Commercial Customization	
125602 - 2	5.56MM NATO	20	406	Prohibited PFR, Part 1, para. 87(z.491)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- Lauer Custom Weaponry's cross rifles logo and "LAUER CUSOM WEAPONRY" are marked on the left side of the magazine housing of the lower receiver/frame.

Model

- model designation is marked on the left side of the magazine housing of the receiver/frame.
- this firearm is a variant of the AR-15/M-16 rifle.
- features include: threaded muzzle for flash hider/muzzle brake; round rifled barrel; standard, accessory rail or single post front sight/gas block with or without bayonet lug; accessory rail or standard handguard; flat top upper assembly with integral optic/accessory rail; may have a detachable carrying handle with adjustable rear sight; fixed or collapsible rifle buttstock; synthetic pistol grip; matte black finish.

Manufacturer

- "LEWIS MACHINE & TOOL CO." may be marked on the receiver/frame.
- "Lewis Machine & Tool (LMT)" was established in 1980.
- "Lewis Machine & Tool (LMT)" is located in Milan, Illinois U.S.A..

Action

- gas operated.

Serial Number

- serial number is marked on the left side of the lower receiver/frame on the magazine well.
- observed serial number had a three letter prefix of "SML" followed by four numbers.

Calibre

- "Cal. 5.56mm" is marked on the side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.
- this model will accept any M16/AR-15 magazine, as such it may be encountered with a higher or lower capacity magazine.

Remarks

- as a large variety of after-market parts are available for this design external appearance may vary greatly from the original configuration.

Firearm Reference Number (FRN): 195122
Make: Laugo Arms
Model: Alien

Summary

Make:	Laugo Arms
Model:	Alien
Manufacturer:	Laugo Arms
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	CZECH REPUBLIC
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
195122 - 1	9MM LUGER	10	124	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
195122 - 2	9MM LUGER	17	124	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "LAUGO ARMS" was observed on the right side of the receiver/frame.

Model

- "ALIEN" was observed on the left side of the slide.
- "ALIEN" is an unusually-styled, gas-delayed-blowback pistol designed to give the appearance of the alien from the "Alien" movies.
- This pistol operates using a gas-delayed-blowback system, similar to the H&K P7 series, but with the gas piston placed above the barrel, rather than below it; this allows a further lowering of the bore axis, and moves the hot gas chamber and piston away from the user's hand.
- Features include: fixed barrel; open adjustable or red dot sight; above-barrel gas piston; skeletonized slide; non-reciprocating, removable upper slide rail (allowing ribs with different sighting options to easily be interchanged); fore and aft slide gripping grooves; accessory rail on the dust cover; left-side slide stop; ambidextrous magazine release; squared serrated trigger-guard; single-action trigger mechanism with a Glock-style trigger-bar safety; exchangeable synthetic grips and back strap; black nitride finish.
- Overall length with 124mm barrel is 210mm (8.27"), weight is 1kg (2.2lbs)
- Colour scheme may be as follows; matte black and tan, matte black and rose gold or matte black and black gold.

Manufacturer

- "LAUGO ARMS CZECHOSLOVAKIA" was observed on the right side of the receiver/frame.

Action

- gas-delayed blowback.

Serial Number

- serial-numbered on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre designation was observed on the receiver/frame.
Shots	- detachable box magazine.

Notes

Make

- "LAUGO ARMS CZECHOSLOVAKIA" was observed on the right side of the receiver/frame.
- "LAUGO ARMS CZECHOSLOVAKIA" is the name of the manufacturer and is not a reference to the country of the manufacturer. The company is based in the Czech Republic.

Model

- "ALIEN" was observed on the left side of the slide.
- this is a limited edition first-release of the "ALIEN" pistol manufactured by Laugo Arms introduced in 2019
- first edition of 500 pistols were marked from 1/500 to 500/500 and were sold with full accessories.
- "ALIEN" is an unusually-styled, gas-delayed-blowback pistol designed to give the appearance of the alien from the "Alien" movies.
- this pistol operates using a gas-delayed-blowback system, similar to the H&K P7 series, but with the gas piston placed above the barrel, rather than below it; this allows a further lowering of the bore axis, and moves the hot gas chamber and piston away from the user's hand.
- features include: fixed barrel; open adjustable or red dot sight; above-barrel gas piston; skeletonized slide; non-reciprocating, removable upper slide rail (allowing ribs with different sighting options to easily be interchanged); fore and aft slide gripping grooves; accessory rail on the dust cover; left-side slide stop; ambidextrous magazine release; squared serrated trigger-guard; single-action trigger mechanism with a Glock-style trigger-bar safety; exchangeable synthetic grips and back strap; black nitride finish.
- overall length with 124mm barrel is 210mm (8.27"), weight is 1kg (2.2lbs)

Manufacturer

- "LAUGO ARMS CZECHOSLOVAKIA" was observed on the right side of the receiver/frame.
- "LAUGO ARMS CZECHOSLOVAKIA" is the name of the manufacturer and is not a reference to the country of the manufacturer. The company is based in the Czech Republic.

Action

- gas-delayed blowback.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is usually marked on the receiver/frame.
Calibre	- calibre designation was observed on the receiver/frame.
Shots	- detachable box magazine.
Other Markings	- first edition of 500 pistols were marked from 1/500 to 500/500 and were sold with full accessories.

Notes

Make

- The company logo is marked on the firearm.
- The company logo is a stylized letters "L" and "A" joined together to form a vaguely triangular shape
- "LAUGO ARMS CZECHOSLOVAKIA" is marked on the right side of the receiver/frame.

Model

- Introduced in 2025.
- "ALIEN REMUS" is marked on the left side of the firearm.
- "ALIEN REMUS" is available in a left-handed version where all features are reversed.
- Features include: integral accessory rail located on the underside of the receiver/frame ahead of the trigger guard; front and rear slide serrations; action release located on the left side of the receiver/frame; magazine release located on the left side of the receiver/frame; interchangeable backstraps; interchangeable grip plates; may come in a variety of colour finishes.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- The company logo is marked on the receiver/frame. - The company logo is a stylized letters "L" and "A" joined together to form a vaguely triangular shape - "LAUGO ARMS" is marked on the right side of the receiver/frame. - "LAUGO ARMS CZECHOSLOVAKIA" is the name of the manufacturer and is not a reference to the country of the manufacturer. The company is based in the Czech Republic.
Action	- Blowback operated.
Serial Number	- The serial number is marked on the underside of the receiver/frame. - The initial production run of five hundred (500) Alien Remus handguns feature a serial number composed of a "500/" followed by a number with leading zeros from "001" to "500". - The rationalization of serial numbers beyond the initial production run is unknown
Calibre	- The calibre designation is marked on the barrel, visible through the ejection port.
Shots	- Detachable box magazine housed in the grip.
Other Markings	- "FIRST EDITION" may be marked on the left side of the firearm.

Notes

Make

- The company logo is marked on the firearm.
- The company logo is comprised of two graphically stylized, capitol letters of "LA" shaped into a triangle.
- "LAUGO ARMS CZECHOSLOVAKIA" is marked on the right side of the receiver/frame.

Model

- "ALIEN" is marked on the left side of the firearm.
- "RETRO" is marked on both sides of the firearm.
- "ALIEN RETRO" model was designed to conform with the rules of IPSC's Production Optics Division, which requires the ret dot sight to reciprocate along with the slide. Regular "ALIEN" models do not have a reciprocating sight system.
- "ALIEN RETRO" is also available as an "upgrade kit", which will convert any "ALIEN" model handgun into a "RETRO" version.
- Features include: integral accessory rail on the underside of the receiver/frame ahead of the trigger guard; front and rear slide serrations; action release located on the left side of the receiver/frame; magazine release located on the left receiver/frame; textured grip plates.

196664 - 2	12 GA X 3"	2	711	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "LAZER" is usually marked on the under side of the receiver/frame.
- "Lazer Silah Sanayii" or "Lazer Arms Company" is marked on the left side of the barrel.
- "Made in Turkey" is also marked on the left side of the barrel.

Model

- "XO12" is marked on both side of the receiver/frame.
- "XO12" is a over & under barrel configured shotgun.

Features include: hinged receiver/frame with tang mounted break-open lever; tang mounted safety and barrel selector; hammerless mechanism; light engraving.

Manufacturer

- "LAZER" is usually marked on the under side of the receiver/frame.
- "Lazer Silah Sanayii" or "Lazer Arms Company" is marked on the left side of the barrel.
- "Made in Turkey" is also marked on the left side of the barrel.

Action

- Hinged barrel design.

Serial Number

- Serial number is marked under the barrel unlocking lever on top of the receiver/frame.
- Serial number of referenced examples consisted of two numbers for the year and two letter for the country of importation, a dash, two letter (OU) and four numbers.

Calibre

- The calibre designation is marked on the barrel assembly.

Notes

Make

- "Lazzeroni" is marked on the side of the receiver/frame.

Model

- "Lazzeroni Model 2000" marked on left side of receiver/frame for right-hand actions, and on right side of receiver/frame for left-hand actions.
- basically a custom-made rifle with many options. Standard barrel lengths are offered, however, custom lengths are available per customer request.
- available in right or left hand actions, pillar bedding is standard.
- black fiberglass or fibregrain stocks in various configuarations including thumbhole.
- adjustable stainless steel bench rest trigger, matte finished metal, helically fluted bolt, internal magazine.
- stainless steel barrels can be standard taper, heavy configuration or fluted.
- metal parts are finished in black polymer coating or electroless nickel for corrosion resistance.
- no open sights.
- may have a removable muzzle brake with muzzle thread protector.
- chambered only for Lazzeroni's proprietary calibres.

Action

- turn bolt operated.

Serial Number

- usually located on right side of receiver ring.

Barrel

- muzzle may be threaded for a removable muzzle brake, this accessory should not be included in the barrel measurement.

Shots

- integral magazine.

Remarks

- In Lazzeroni terms the following designations apply to the model 2000 series: - L2000ST = Lazzeroni, Model 2000, Standard Sporter; - L2000SP = Thumbhole Stock version; - L2000DG = Dangerous Game version; - L2000SA = Short Action version; - L2000SLR = Special Long Range version.

128923 - 2	9MM LUGER	25	210	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- LDP" is moulded into both sides of the forward portion of the trigger/grip frame assembly.
- LDP denotes LaCoste Engineering, DuPless and Ponter it was later dubbed or nicknamed the "Land's Defence Pistol" by the local farmers in Rhodesia and South Africa.

Model

- "LDP" was introduced circa 1976 or 1977.
- "LDP" was observed marked on both sides of the forward portion of the trigger/grip frame assembly.
- there are five known version of the LDP and only the fifth was semiautomatic-only.
- features include: round barrel, removable by means of a barrel Knurled nut located around the muzzle end of the barrel just in front sight; tubular steel upper receiver/frame with upper right side ejection port; cocking handle is mounted on the left side of the receiver/frame; one peace bolt assembly has no safety position available for locking the cocking handle to the rear; extractor claw mounted on the bolt and the ejector; bolt body envelops/surrounds the barrel assembly, uses a fixed firing pin and has a bolt face which fully supports the cartridge rim.
- safety selector lever is mounted on the right side of the trigger/grip frame assembly just above the trigger, may have a second grip safety "passive trigger safety" that must be depressed so the trigger can be fully depressed is pined at the bottom rear portion of the trigger guard.
- crudely made front sight that is part of the trigger grip frame assembly that is used to lock the barrel and receiver to the front portion of the grip/frame assembly and a large knurled end cap is used at the rear.
- molded black plastic lower trigger grip frame assembly with serrations on the forearm and pistol grip; under folding wire stock that when folded acts as a forearm pistol grip; blued or black/green parkerized finish.
- magazine housing is part of the grip; magazine release is a hinged metal clip on the right side of the pistol grip that is held in place by a metal clamp.
- overall length with 210 mm barrel and butt stock folded is 415mm and 615 with the stock extended.

Manufacturer

- in 1976, LaCoste Engineering, Pvt. Ltd of South Africa developed the LDP and it is beleived they had them manufactured in Salisbury Rhodesia.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- blowback operated. - "LDP" uses advanced primer ignition and is not striker fired.
Serial Number	- the serial number is marked on the top surface of the upper receiver/frame forward of the rear sight assembly. - observed serial number sequences have consisted of a two letters followed by six digits .
Calibre	- 9MM PARABELLUM was observed marked on the left sides of the forward portion of the trigger/grip frame assembly.
Shots	- detachable box magazine. - this firearm uses Uzi magazines.
Other Markings	- the letter "P" inside a triangle is found stamped on the bolt, barrel and on the receiver/frame this is believed to be a Rhodesian proof mark and that the firearm was manufactured in Salisbury Rhodesia. - when found with proof mark that denotes the antlers of a Springbok (South African Antelope) with the letter " T " in the middle, on the bolt, barrel and on the receiver/frame this is believed to be a South African proof mark and that the firearm was manufactured in South Africa - the serial number maybe repeated on the bolt and barrel. - British proof marks were observed marked on the top of the receiver/frame, bolt and at the muzzle end of the barrel. - British proof marks only mean this firearm was at one time proofed in England for import/export.
Remarks	- with the interchangeability of parts from other versions and different models such as the Kommando the model description my very.

FRT Report

Firearm Reference Number (FRN): 128922
Make: LDP
Model: LDP

Summary

Make:	LDP
Model:	LDP
Manufacturer:	Lacoste Engineering
Level:	Manufacturer Specifications and Commercial Customization
Type:	Commercial Version
Action:	Semi-Automatic
Country of Manufacturer:	RHODESIA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
128922 - 2	9MM LUGER	5	210	Prohibited PFR, Part 1, para. 156	Non-Commercial Customization	
128922 - 1	9MM LUGER	25	210	Prohibited PFR, Part 1, para. 156	Manufacturer Specifications and Commercial Customization	

Notes

Make

- LDP" is moulded into both sides of the forward portion of the trigger/grip frame assembly.
- LDP denotes LaCoste Engineering, DuPless and Ponter it was later dubbed or nicknamed the "Land's Defence Pistol" by the local farmers in Rhodesia and South Africa.

Model

- "LDP" was introduced circa 1976 or 1977.
- "LDP" was observed marked on both sides of the forward portion of the trigger/grip frame assembly.
- there are five known version of the LDP and only the fifth was semiautomatic-only.
- features include: round barrel, removable by means of a barrel Knurled nut located around the muzzle end of the barrel just in front sight; tubular steel upper receiver/frame with upper right side ejection port; cocking handle is mounted on the left side of the receiver/frame; one peace bolt assembly has no safety position available for locking the cocking handle to the rear; extractor claw mounted on the bolt and the ejector; bolt body envelops/surrounds the barrel assembly, uses a fixed firing pin and has a bolt face which fully supports the cartridge rim;
- safety selector lever F and S is mounted on the right side of the trigger/grip frame assembly just above the trigger, may have a second grip safety "passive trigger safety that must be depressed so the trigger can be fully depressed is pined at the bottom rear portion of the trigger guard;
- crudely made front sight that is part of the trigger grip frame assembly that is used to lock the barrel and receiver to the front portion of the grip/frame assembly and a large knurled end cap is used at the rear ;
-molded black plastic lower trigger grip frame assembly with serrations on the forearm and pistol grip; under folding wire stock that when folded acts as a forearm pistol grip; blued or black/green parkerized finish.
- magazine housing is part of the grip; magazine release is a hinged metal clip on the right side of the pistol grip that is held in place by a metal clamp.
- overall length with 210 mm barrel and butt stock folded is 415mm and 615 with the stock extended.

Manufacturer

- in 1976 LaCoste Engineering, Pvt.Ltd of South Africa developed the LDP and it is belived they had them manufactured in Salisbury, Rhodesia.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- blowback operated. - "LDP" uses advanced primer ignition and is not striker fired.
Serial Number	- the serial number is marked on the top surface of the upper receiver/frame forward of the rear sight assembly. - observed serial number sequences have consisted of a two letters followed by six digits (SV# # # # # #).
Calibre	- 9MM PARABELLUM was observed marked on the left sides of the forward portion of the trigger/grip frame assembly and on the right side of the barrel.
Shots	- detachable box magazine. - this firearm uses Uzi magazines.
Other Markings	- the letter "P" inside a triangle is found stamped on the bolt, barrel and on the receiver/frame this is believed to be a Rhodesian proof mark and that the firearm was manufactured in Salisbury Rhodesia. - when found with proof mark that denotes the antlers of a Springbok (South African Antelope) with the letter " T " in the middle, on the bolt, barrel and on the receiver/frame this is believed to be a South African proof mark and that the firearm was manufactured in South Africa - the serial number maybe repeated on the bolt and barrel. - British proof marks were observed marked on the top of the receiver/frame, bolt and at the muzzle end of the barrel. - British proof marks only mean this firearm was at one time proofed in England for import/export.
Remarks	- with the interchangeability of parts from other versions and different models such as the Kommando the model description my very.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
15449 - 1	25 AUTO	6	55	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
15449 - 2	6.35MM	6	55	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "CAL 6.35 MODEL AUTOMATIC PISTOL" over "LE DRAGON" is usually marked on the left side of the slide.
- "BASCULANT" and "LE DRAGON" were trademarks manufactured by Aguirre y Cia and Aguirre, Zamacolas y Cia of Spain prior to 1934.

Model

- "LE DRAGON" is marked on the left side of the slide.
- this is virtually the same as the Basculant made by Aguirre, but given a different name apparently for sale in Belgium and France. It is usually found with Liege proof marks and often assumed to be of Belgian origin.
- produced circa 1920 to 1933.
- blow-back operated, detachable box magazine.
- features may include:
- thumb safety located on the left side of the receiver/frame.
- magazine release located on the bottom of the grip.
- proof marks may be located on the slide and/or receiver/frame.
- the left and right grips are marked with the Aguirre logo/trademark consisting of a stylized dragon within a circle above the word "TRADEMARK".

Manufacturer

- manufacturer's name is not marked on the firearm.
- the left and right grips are marked with the Aguirre logo/trademark consisting of a stylized dragon within a circle above the word "TRADEMARK".
- Aguirre Y Cia was a Spanish manufacturer of firearms located in Spain, circa 1920 to 1933.

Action

- blowback operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is usually marked on the receiver/frame.
Calibre	- calibre is usually marked on the left side of the slide.
Shots	- detachable box magazine.
Other Markings	- "Cal 6.35 Model Automatic Pistol" is usually marked on the left side of the slide.

Firearm Reference Number (FRN): 20521
Make: Le Francais
Model: Le Francais

Summary

Make:	Le Francais
Model:	Le Francais
Manufacturer:	Manufacture Francaise d'Armes & Cycles de St-Etienne (MF)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	FRANCE
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
20521 - 1	6.35MM	7	60	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Le Francais" is usually marked on the left side of the receiver/frame.
- "Le Francais" was a trade mark used by Manufacturer Francaise d'Armes & Cycles de St Etienne.

Model

- "Le Francais" is marked on the firearm.
- introduced in 1914.
- production ceased circa 1970.
- this is a blowback operated, striker fired, double action only trigger mechanism semi-automatic pistol which utilizes a detachable box magazine and featuring a hinged drop-down barrel which is actuated by a barrel release lever located on the right side of the receiver/frame.
- barrel opens automatically with the removal of the magazine.
- this pistol does not have an extractor; extraction of the empty casing is achieved through the utilization of residual gas pressure as the side opens.
- earlier production models did not have finger grasping grooves on the slide.
- a "lightened" version of this model was also produced which had flute-like cut-outs machined lengthwise on the barrel and receiver/frame.
- blued finish.
- overall length with a 60 mm (2 3/8") barrel is 112 mm (4.41"), and average weight is 300 grams (10.6 oz).

Manufacturer

- "Manufacture de Francaise D'Armes et Cycles de Saint-Etienne" is usually marked on the right side of the receiver/frame.
- the company monogram/trademark are also usually marked on the right side of the receiver/frame as;
- the letters "MF" on either side of crossed cannons with an arrow pointing downwards through the middle of the emblem,
- the letters "MF" in a partial circle with the word "Saint" on the top and the word "Etienne" underneath,
- the letters "MF" within a wreath embossed on each grip plate.

Action

- blowback operated, hinged barrel design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is usually marked on the receiver/frame. - known example had a five digit number without prefix or suffix.
Calibre	- "Cal. 6.35" is usually marked on the left side of the receiver/frame.
Shots	- detachable box magazine.

Firearm Reference Number (FRN): 25941
Make: Le Tout Acier
Model: FN Browning 1906 Copy

Summary

Make:	Le Tout Acier
Model:	FN Browning 1906 Copy
Manufacturer:	Manufacture d'Armes des Pyrenees Francaises (MAPF)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	FRANCE
Serial Numbering:	
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
25941 - 2	25 AUTO	6	55	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
25941 - 1	6.35MM	6	55	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "LE TOUT ACIER" may be marked on the slide and/or the grip panels. - this was a tradename used by l'armurerie Lemasson of Paris on pistols produced for the company by various manufacturers.
Model	- model designation does not appear on the firearm. - manufactured from approximately 1923 to 1940. - features include: left side thumb safety in front of grip plate, no sights, hammerless and butt magazine release, there is a rounded cutout in the slide for the safety lever's nib to rest in when the safety is applied.
Manufacturer	- manufacturer's designation is not marked on the firearm.
Action	- blowback operation.
Shots	- detachable box magazine.
Remarks	- the slight forward tilt to the slide serrations and the more angular lines of the top rear of the frame/receiver distinguish MAPF's production from those manufactured by Seytres.

Notes

Make

- "AUG. LEBEAU - COURALLY" may be marked on the firearm.
- "Armes De Grand Luxe A Liege" was observed marked on the barrel assembly.

Model

- model designation may be marked on the firearm.
- this is a custom made firearm.
- features include: express rifle sights installed on the rib; Anson & Deeley locking system; break open side by side boxlock double rifle; engraved receiver/frame; double trigger mechanism; checkered pistol grip stock and forearm; blued barrels.

Manufacturer

- "AUG. LEBEAU - COURALLY" may be marked on the firearm.
- Lebeau-Courally was founded by Auguste Lebeau in 1865, a gunmaker in Liege, Belgium, who specialized in handmaking rifles and shotguns to order. In 1896, the business was bought out by Ferdinand Courally, who renamed it as "Lebeau-Courally". In 1919, Ferdinand Courally retired, and sold the business to Philippe Reeve, an English industrialist who extended the company's product line and popularity among European royalty. After World War Two, the company name and assets were taken over by Joseph Verres, a Belgian gunsmith who continued to produce made-to-order long-guns . Verres' niece, Anne-Marie Moermans-Ramakers, assumed control of the company in 1982, and in 2010, the company was rescued from bankruptcy by Joris Ide, and the company today manufactures luxury firearms, watches, leather accessories, and other custom accoutrements.

Action

- side by side barrel configuration.

Calibre

- may be marked on the barrel assembly.

55678 - 1	7X65R BRENNEKE	1	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Aug. Lebeau-Courally" or variations, may be marked on the receiver/frame.

Model

- the model name may be marked on the firearm.
- features include: blued octagonal rifled barrel with open express sights; coin-finished engraved receiver/frame and sideplates; single trigger; ejectors or extractors; scope bases installed on the rib above the chambers; walnut pistol grip stock and forearm.

Manufacturer

- "Aug. Lebeau-Courally" or variations, may be marked on the receiver/frame.
- Lebeau-Courally was founded by Auguste Lebeau in 1865, a gunmaker in Liege, Belgium, who specialized in handmaking rifles and shotguns to order. In 1896, the business was bought out by Ferdinand Courally, who renamed it as "Lebeau-Courally". In 1919, Ferdinand Courally retired, and sold the business to Philippe Reeve, an English industrialist who extended the company's product line and popularity among European royalty. After World War Two, the company name and assets were taken over by Joseph Verres, a Belgian gunsmith who continued to produce made-to-order long-guns . Verres' niece, Anne-Marie Moermans-Ramakers, assumed control of the company in 1982, and in 2010, the company was rescued from bankruptcy by Joris Ide, and the company today manufactures luxury firearms, watches, leather accessories, and other custom accoutrements.

Action

- top lever break-open single-shot.

Serial Number

- serial-numbered on the receiver/frame.

161487 - 1	47 PERCUSSION	1	260	Antique CC 84(1) "antique firearm"	Non-Commercial Customization	

Notes

Make

- "LEBEDA", "A.V. LEBEDA", or "ANTON VINCENT LEBEDA" is usually marked on the firearm.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is a standard-pattern single-shot duelling or target pistol, manufactured by A.V. Lebeda between 1797 and 1857; these pistols may be seen in a variety of configurations and stock styles, as well as in numbered cased pairs.
- features may include: octagonal barrels; fixed sights; half-length carved and checkered walnut stocks (with or without grip-caps); precious metal inlays; a manually-cocked hammer on a right sideplate; single or double-set triggers; finial or hooked trigger guard.

Manufacturer

- "LEBEDA", "A.V. LEBEDA", or "ANTON VINCENT LEBEDA" is usually marked on the firearm.
- Anton Vincenc Lebeda's firm was in operation in the city of Prague, producing fine quality firearms, from circa 1820 to 1888.
- both Anton Lebeda (Anton Vincent's father) and Ferdinand Lebeda (his brother) were also Czech gunmakers in Prague.

Action

- muzzle-loaded, percussion ignition.

Serial Number

- these pistols may or may not bear numbers; where present, they may be "set" numbers, indicating numbers 1 or 2 of a cased pair.

Barrel

- barrel lengths may vary.

Calibre

- calibres may vary.

199147 - 2	7.5X58 FRENCH	5	600	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- The make is not marked on the firearm.

Model

- "MLE1886 M 27" is marked on the left side of the receiver/frame.
- This is a Lebel "1886/93" that was adapted by Manufacture D'armes Tulle for a 7.5mm cartridge and a Mauser-type magazine.
- Approximately 5000 rifles were ordered to be adapted in 1927 but only approximately 1500 were converted between 1827 and 1940, very few examples remain in existence.
- These conversions were abandoned in favour of lighter, less expensive Mannlicher-Berthier "1907/15/34" and the Lebel "1886/93/35" conversions.
- Features include: wooden forearm with barrel band; may or may not have a metal nose cap bayonet attachment, or bayonet stored in a tube under the barrel.

Manufacturer

- "MANUFACTURE D'ARMES Tulle" is marked on the left side of the receiver/frame.
- "MAT" is marked on the side of the chamber on the barrel.

Action

- Turn bolt operated.

Serial Number

- The serial number is marked on the side of the chamber on the barrel.

Calibre

- " 7m/m5" is marked on the top of the receiver/frame.
- "PAS 235 G" is marked on the top of the receiver/frame indicating 1:235 mm rifling with a left-hand twist.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - Integral box magazine

Other Markings - The year of manufacture (conversion) appears on the side of the chamber of the barrel.

Notes

Make

- the make may not be marked on the firearm.

Model

- the model designation may not be marked on the firearm.
- "Populaire" refers to the action on the firearm. A Populaire action is a single shot rifle, which has a simple locking devise. Normally the bolt handle locks against part of the receiver/frame.
- this style of firearm was also known as a "Populaire Carbine", "Populaire Junior", Populaire Scolaire", "Populaire Sport", "Scolaire".
- a Lebel action will normally have a flat-sided receiver/frame. The bolt will slide in a channel along the top of the receiver/frame when unlocked.
- features may include: blued receiver/frame and round barrel; a right-handed bolt handle which may fold downward beside the stock or protrude straight outward from the receiver/frame when locked; may have a fixed front sight with an adjustable rear sight.
- a wooden stock, which may not have a pistol, grip; a wooden forend which may have one or more barrel bands.
- the receiver/frame and barrel may be a takedown style which break down into two pieces.

Serial Number

- may have a serial number marked on the receiver/frame.
- one observed model did have a serial number marked on the left side of the receiver/frame.

Calibre

- the calibre designation may not be marked on the firearm.

Other Markings

- this firearm may have markings of "Societes de Tir", a target rifle organization in France. This may be a stamp on the stock in the form of a crest with " MODELE DE L'UNION NATIONALE Des SOCIETES DE TIR DE FRANCE" and "FRANCAISE" marked within the crest.

138967 - 1	8.15X46R	1	723	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "H. Lechner" or "Hans Lechner" and "Nurnberg" will be marked on the barrel and/or the receiver/frame of this firearm.

Model

- no model name is marked on this firearm; the model name is derived from the characteristics of the firearm.
- Hans Lechner produced custom made breech loading Schuetzen-type target rifles using lever operated falling block designs; two known action types that were used by him to produce his rifles were, "Original System-Aydt" and the Buchel "Konkurrenz", which was also spelled "Conkerrenz".
- features include: lever operated, single shot, breech loading, falling block-type action; double set triggers; various types of adjustable sights; Swiss-style buttstock with raised cheekpiece; usually octagonal barrel; operating lever usually designed with a skeleton-type hand grip for better control; usually ornately engraved receiver/frame, trigger guard, buttstock and forend; buttstock and forend are of the best quality walnut.
- German proofmarks are apparent on the barrel and/or receiver/frame.

Manufacturer

- "H. Lechner" or "Hans Lechner" and "Nurnberg" will be marked on the barrel and/or the receiver/frame of this firearm.
- Hans Lechner was a German gunmaker located in the city of Nurnberg.
- Hans Lechner produced custom made breech loading Schuetzen-type target rifles using lever operated falling block designs; two known patented action types produced by him were, "Original System-Aydt" and the Buchel "Konkurrenz", which was also spelled "Conkerrenz".
- dates of production for Lechner are not known, however, research indicates early 1900's based on a known example of his which was stamped with a 1916 proof mark.

Action

- Hans Lechner produced custom made breech loading Schuetzen-type target rifles using lever operated falling block designs; two known patented action types produced by him were, "Original System-Aydt" and the Buchel "Konkurrenz", which was also spelled "Conkerrenz".

Serial Number

- known example had a four digit number without prefix or suffix marked on the breech block.

Notes

Make

- "Lee's Fire Arms Co. Milwaukee, Wisc., Pat'd July 22D, 1862" is marked on the top of the barrel.

Model

- model is not marked on the firearm.
- manufactured from 1865 to 1866.
- single-shot with a side-swinging barrel and manually-operated extractor.
- most of these rifles were carbines, made for a Union Civil War contract, but quickly lost favour to items like the Spencer repeating carbine; however, Lee's company also made longer-barrelled sporting rifles on the same action.
- features include: walnut stock without forearm; hammer-mounted firing pin/blade; manual extractor on the right side of the barrel; a sliding ring and bar on the left side of the receiver/frame for attaching a sling.
- this rifle was also known as the Lee Side-Swing Rifle.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "Lee Firearms Company" manufactured single-shot carbines for a Union Civil War contract between 1864 to 1866.
- "Lee Firearms Company" was located in Milwaukee, Wisconsin, U.S.A.
- "Lee Firearms Company" was founded by James Paris Lee, an inventor and small arms designer.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- "LNG .22" and the Roman numeral one (I.) is marked on the left side of the butt socket.
- this rifle was converted by Enfield in 1912.
- this Lee-Metford MARK 2 rifle was originally manufactured by Sparkbrook in 1894 and converted to single shot .22 calibre.
- this conversion required replacing the .303 calibre barrel with a .22 calibre barrel and modifying the bolt head and extractor.
- 22 Long Rifle MARK 1 rifles were intended for use by the Royal Navy.

Manufacturer

- "ENFIELD" and "1912" are marked on the left side of the butt socket.

Action

- turn-bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- appears on right front end of the receiver and usually has a letter prefix or suffix.
Barrel	- these rifles are fitted with a new .22 calibre barrel.
Other Markings	- original arsenal of manufacture, date and model on right side of butt socket.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
593 - 1	22 LR	1	767	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- The model designation appears on the left side of the butt socket. These rifles were manufactured (converted) in 1912.

Manufacturer

- "ENFIELD" and "1912" are marked on the left side of the butt socket.

Action

- turn-bolt design.

Serial Number

- appears on right front end of the receiver and usually has a letter prefix or suffix.

Barrel

- these rifles are fitted with a new .22 calibre barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings	- original arsenal of manufacture, date and model on right side of butt socket.
Remarks	- This is a conversion of Lee Metford MARK 2* and Lee Enfield MARKS 1 and 1* to rimfire .22 calibre by replacing the .303 calibre barrel with a .22 calibre barrel and modifying the bolt head and extractor. These rifles were intended for use by the Royal Navy.

- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- ".22 PATT '18" is marked on the right side of butt socket (below the original markings of the king's crown, "G.R.", "ENFIELD", "1915", "Sht L.E." and "III").
- converted between 1918 and 1920.

Manufacturer

- the manufacturer's (converter's) name does not appear on the firearm.

Action

- turn-bolt design.

Serial Number

- the serial number is marked on right front side of the receiver/frame.
- the serial number usually has a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine.
Other Markings	- original markings on right side of butt socket. - "Parkerifled" and "Parker Hale .303 cum .22 System" may be marked on the barrel knox form and the top of the receiver/frame.
Remarks	- This is a conversion of Short Magazine Lee Enfield MARK 3 (Rifle No 1 MARK 3) rifles to rimfire .22 calibre by sleeving the original .303 calibre barrel with a .22 calibre insert. This converted rifle was chambered for an auxiliary or "conveyor" cartridge which resembled a 303 BRITISH cartridge but fired a 22 LR cartridge. This rifle was a 10 shot repeater.

Firearm Reference Number (FRN): 598
Make: Lee-Enfield
Model: 22 Short Rifle MARK 1

Summary

Make:	Lee-Enfield
Model:	22 Short Rifle MARK 1
Manufacturer:	Royal Small Arms Factory, Enfield (RSAF(E))
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
598 - 1	22 LR	1	640	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- The model designation appears on the left side of the butt socket as the Roman numeral one. These rifles were converted from 1907 to 1910.

Manufacturer

- the manufacturer's (converter's) name appears on the left side of the butt socket.

Action

- turn-bolt design.

Serial Number

- appears on right front end of the receiver and usually has a letter prefix or suffix.

Other Markings

- original arsenal of manufacture, date and model on right side of butt socket.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks - this is a Lee Metford MARK 1* rifle converted to single shot rimfire .22 calibre by replacing the .303 calibre barrel with a .22 calibre barrel, shortening the forearm and modifying the bolt head and extractor.

- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- in production from 1921 to 1925.
- "IV" is marked on the the right side of the buttsocket.
- "IV" is the Roman numeral (4) four.
- 22 Short Rifle Mark 4 is Lee-Enfield No 1 MARK 3 or No 1 MARK 3* rifle with a 22 LR barrel or barrel liner, a special bolt head, firing pin, striker, extractor, and forend that is reduced in length.
- British government changed the model designation of the rifle ".22 Short Rifle MARK 4" to "Rifle No 2 MARK 4*" in 1926.

Manufacturer

- the manufacturer's designation is usually marked on the right side of the buttsocket as "LSA Co".

Serial Number

- marked on the right forward side of the receiver/frame .

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - the right side of the buttsocket is marked ".22"

Remarks - this is a conversion of existing Short Magazine Lee Enfield rifles MARKS 3 and 3* (Rifles No 1 MARK 3 and 3*) to rimfire .22 calibre by replacing the original barrel with a new .22 calibre barrel, modifying the bolt head and extractor. In 1925 the British government changed the model terminology of these rifles from .22 Short Rifle MARK 4 to 22 Short Rifle MARK IV* (indicating minor modifications), and in 1926 it was again changed to Rifle No 2 MARK 4*.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- "SHT 22" over "IV" is usually marked on the right side of the butt socket.
- "SHT" is the abbreviation for "Short Rifle".
- "22" is the calibre.
- "IV" is the Roman numeral (4) four.
- these rifles were converted, or of new manufacture from 1921 to 1925.
- British government changed the model designation of the rifle ".22 Short Rifle MARK 4" to "Rifle No 2 MARK 4*" in 1926.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "ENFIELD" is usually marked on the right side of the butt socket.
Action	- turn-bolt design.
Serial Number	- located on right front end of the receiver/frame, usually has a letter prefix or suffix.
Other Markings	- original markings on right side of butt socket may be partially present (cypher and original manufacturer and date of manufacture).
Remarks	- this is a conversion of existing Short Magazine Lee Enfield rifles MARKS 3 and 3* (Rifles No 1 MARK 3 and 3*) to rimfire .22 calibre by replacing the original barrel with a new .22 calibre barrel, modifying the bolt head and extractor. In 1925 the British government changed the model terminology of these rifles from .22 Short Rifle MARK 4 to 22 Short Rifle MARK IV* (indicating minor modifications), and in 1926 it was again changed to Rifle No 2 MARK 4*.

- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model/calibre designation appears on the left side of the butt socket. These muskets were manufactured (converted) from 1927 to 1945.

Manufacturer

- the manufacturer's (converter's) name appears on the left side of the butt socket as "RFI" (Rifle Factory Ishapore).
- the original manufacturer of the receiver/frame may be marked on the right side of the butt socket.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- turn-bolt design.
Serial Number	- serial number located on right front end of the receiver/frame.
Calibre	- as originally manufactured these arms are chambered for a brass cartridge case based on the .303 BRITISH cartridge. An American importer is known to have rechambered a number of these arms to accept commercial 410 shot cartridges.
Other Markings	- original arsenal markings and model designation on right side of butt socket.
Remarks	- these "muskets" are Indian conversions of No.I Mk III and No.I Mk III* rifles to smooth bore 410 single shot shotguns for use by police and military in crowd control. The right side of the butt sockets retain the original markings. New markings indicating the conversion were applied to the left side of the butt socket.

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- "C No 4 MARK 1*" and "No 4 MARK 1*" were manufactured from 1942 to approximately 1956.
- "C No 4 MK I*" is marked on the left side of the receiver/frame.
- features include: fixed blade front sight with ear protectors and a flip over, two aperture or an adjustable rear sight; round, rifled barrel with bayonet lugs; flat sided, open top receiver/frame with an integral butt socket; turn bolt action; No 4 bolt body; safety lever is mounted on the left side of the receiver/frame; detachable box magazine case release is mounted inside the trigger guard; wood upper hand guard; forearm with two barrel bands and a hand guard retaining ring, and a semi-pistol grip buttstock with a metal butt plate; three sling attachments; parkerized finish.
- overall length with a 640 mm (25.2") barrel is 1128 mm (44.4"), and the average weight is 3.9 kgs (8 lbs 10 oz).
- many of theses rifles were subsequently converted to calibre 7.62MM NATO. This conversion consisted of replacing the barrel, changing the extractor and sometimes added an insert in the charger guide. The barrels were supplied with no bayonet lug. As they left the factory these rifles kept the original magazine designed for calibre 303 BRITISH to be used as a loading platform for a single cartridge, accessory magazines were commercially available with a ten shot capacity.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "LONG BRANCH" over the year of manufacture is marked on the left side of the receiver/frame.
Action	- turn bolt design.
Serial Number	- serial number is marked on the left side of the butt socket of the receiver/frame. - Long Branch serial number rationalization: - the first thirteen thousand rifles may have been serialized without the capital letter "L" as the serial number rationalization was not formalized until production had reached 13,000 examples. - serial number rationalization starting in 1942 consisted of a number, the capital letter "L" and four numbers. - serial number observed consisted of one or two numbers, the capital letter "L", and four numbers, examples: "0L0001" and "95L8888". - when these rifles were converted to calibre 7.62MM NATO or when they were accepted into service in New Zealand they were often reserialized (without the L), the original serial number may or may not be present.
Shots	- detachable box magazine.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation appears on the left side of the receiver.
- this model differs from the "L39A1" by having a sporting style buttstock and markings.
- intended for use by cadets, unknown how many were manufactured as this project was cancelled early in production.

Manufacturer

- the name of the manufacturer (Enfield) appears on the left side of the receiver/frame as the E in the manufactuer code UE.

Action

- turn-bolt design.
- these rifles left the factory as single shot rifles.
- magazines that function with 7.62MM NATO ammunition may be interchanged with the original box magazine that functioned as a loading platform only. As manufactured these rifles are correctly identified as single shot firearms, subsequent use of interchangeable magazines does not change the action type.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the left side of the receiver/frame.
Shots	- these rifles left the factory as single shot rifles. - magazines that function with 7.62MM NATO ammunition may be interchanged with the original box magazine that functioned as a loading platform only. As manufactured these rifles are correctly identified as single shot firearms, subsequent use of interchangeable magazines does not change the action type.
Remarks	- this single shot rifle is manufactured from No 4 MARK 2 and No 4 MARK 1/2 actions specifically for military target match purpose. These rifles are usually found with a heavy contour barrel, elaborate front and rear target sights and a 303 BRITISH calibre magazine which although is non-functional as a magazine, serves as a loading platform for the rifle.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- The model designation Charger loading Lee Enfield Rifle MARK 1 appears as the abbreviation C.L.L.E. and the Roman numeral one on the left side of the butt socket. These rifles were manufactured (converted) from 1910 to 1912.

Manufacturer

- manufactured from 1910 to 1912.

Action

- turn-bolt design.

Serial Number

- serial number located on right front end of receiver and usually has a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Other Markings

- original arsenal markings & model designation on right side of butt socket.

Remarks

- This rifle is a conversion of existing Lee Enfield MARK 1 rifles to utilise 5 round charger clips. Conversion entailed removal of the sheet metal dust cover on the bolt and brazing a charger guide bridge to the top of the receiver. Original markings were retained on the right side of the butt socket and new markings were added to the left side of the butt socket.

- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation appears on the left side of the butt socket as the abbreviation C.L. and the Roman numeral one.

Manufacturer

- the manufacturer's (converter's) name appears on the left side of the butt socket. - these rifles were manufactured circa 1914.

Action

- turn-bolt design.

Serial Number

- located on right front end of the receiver and usually has a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Other Markings

- Original model designation, manufacturer's name and date of manufacture located on right side of the butt socket.

Remarks

- This is a conversion of existing Lee Enfield MARK 1 rifles to utilise 5 round charger clips. Conversion entailed removing the sheet metal dust cover from the bolt and brazing a charger guide bridge to the top of the receiver.
Original markings were retained on the right side of the butt socket and new markings were added to the left side of the butt socket.

606 - 1	303 BRITISH	10	767	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- The model designation Charger Loading MARK 1 India Pattern appears as the abbreviation C.L.L.E., Roman numeral one and I.P. (India Pattern) on the left side of the butt socket. These rifles were manufactured (converted) from 1905 to 1914.

Manufacturer

- the manufacturer's name appears on the left side of the buttstock and in a circular stamp on the right side of the buttstock.

Action

- turn-bolt design.

Serial Number

- serial number appears on right front end of receiver, may have a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Other Markings

- original model designation, arsenal and date of manufacture on right side of butt socket.

Remarks

- This is an Indian conversion of existing Lee Enfield MARK 1 and MARK 1* rifles to utilise 5 round charger clips. Conversion entailed discarding the bolt's sheet metal dust cover and fitting a new bolt head with a sliding charger clip guide. The original markings on the right side of the butt socket were retained and new markings were added to the left side of the butt socket indicating the new model, converting arsenal (Ishapore)
and date of conversion.

- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation appears on the left side of the receiver.

Manufacturer

- the manufacturer's name appears on the left side of the receiver as an interlocked E D.

Action

- turn-bolt design.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- This is a specialty rifle designed for police departments, it closely resembles the British military issue L42A1 but has commercial style butt stock, target front sight, and a commercial German "Pecar" brand variable telescopic sight.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- "L39A1" is marked on the left side of the receiver/frame.
- introduced in the late 1960s.

Manufacturer

- the name of the manufacturer (Enfield) appears on the left side of the receiver as the E in the manufactuer code UE.

Action

- turn-bolt design.
- these rifles left the factory as single shot rifles, magazines that function with 7.62MM NATO ammunition may be interchanged with the original box magazine that functioned as a loading platform only. As manufactured these rifles are correctly identified as single shot firearms, susequent use of interchangeable magazines does not change the action type.

Serial Number

- serial number on left side of the receiver, usually has a letter prefix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel	- heavy contour barrel.
Shots	- these rifles left the factory as single shot rifles, magazines that function with 7.62MM NATO ammunition may be interchanged with the original box magazine that functioned as a loading platform only. As manufactured these rifles are correctly identified as single shot firearms, susequent use of interchangeable magazines does not change the action type.
Other Markings	- calibre designation (7.62mm) appears on left side of the receiver.
Remarks	- This single shot rifle is manufactured from No 4 MARK 2 and No 4 MARK 1/2 actions specifically for military target match purpose. These rifles are usually found with elaborate front and rear target sights and a 303 BRITISH calibre magazine which although is non-functional as a magazine, serves as a loading platform for the rifle.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- The model designation appears as a Roman numeral one on the right side of the butt socket. These rifles were manufactured from 1895 to 1899.

Manufacturer

- the manufacturer's name appears on the right side of the butt socket.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- turn-bolt design.
Serial Number	- the serial number is located on the right front end of the receiver and usually has a letter prefix of suffix.
Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Other Markings	- Year of manufacture marked directly under the manufacturer's name, crown and "VR" cypher on right side of the butt socket together with the model designation. A capital letter E appears on the Knox form of the barrel.
Remarks	- This is a bolt action repeating rifle utilising a 10 round detachable box magazine, safety mounted on the cocking piece and Enfield pattern rifling. This rifle is identical to the Lee Metford MARK 2* differing only in markings and type of rifling.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation appears as a Roman numeral one (I) on the right side of the butt socket.
- this is a converted "MARK 1" magazine feed rifle.
- the original "MARK 1" rifles were manufactured from 1895 to 1899.
- this conversion was carried out on approximately 2,000 rifles by Royal Small Arms Factory Enfield in 1911 and 1912.
- features include: no magazine fitted, the magazine way has been blocked and a sheet metal loading platform was used for positioning the cartridge into the chamber.
- this rifles was approved for Frontier Levies in India on December 1, 1909.

Manufacturer

- the original manufacturer's name appears on the right side of the butt socket.
- Royal Small Arms Factory Enfield converted this rifle in 1911 and 1912.

Action

- turn-bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is located on the right front end of the receiver/frame. - example reported with four digits followed by a letter.
Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Other Markings	- Year of manufacture marked directly under the manufacturer's name, crown and "VR" cypher on right side of the butt socket together with the model designation. A capital letter E appears on the Knox form of the barrel.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- manufactured from 1899 to 1903.
- "MARK 1*" is not marked on the firearm.
- "L.E." over "I*" is usually marked on the right side of the butt socket in the form a Roman numeral one "I") and a star "*".

Manufacturer

- manufactured from 1899 to 1903.

Action

- turn-bolt design.

Serial Number

- the serial number appears on the right front end of the receiver and usually has a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Other Markings

- Year of manufacture marked directly under the manufacturer's name, crown and "VR" cypher on right side of the butt socket together with the model designation, the Knox form of the barrel is marked with a capital letter E.

Remarks

- This is a bolt action repeating rifle utilising a 10 round detachable box magazine, safety mounted on the cocking piece and Enfield pattern rifling. This rifle is identical to the Lee Enfield MARK 1 except that there is no provision in the nose cap or forend for a cleaning rod.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- model designation is not marked on this firearm. - manufactured/converted from approximately 1903 to 1914. - turn bolt operated, detachable box magazine. - this carbine was specifically designed and manufactured for use by the Royal Irish Constabulary (RIC) and was a conversion from existing stocks of Lee Metford Mark 1, Lee Enfield Mark 1 and Lee Enfield Mark 1* cavalry carbines. - the conversions were carried out by RSAF Enfield and RSAF/RSARF Sparkbrook (Birmingham); as the original manufacturers markings on the left side of the butt socket were not removed during the conversion process, the only indication of the manufacturer responsible for the conversion is the RSAF Enfield or RSAF/RSARF Sparkbrook (Birmingham) roundel impressed on the right side of the buttstock. - the conversion involved the reworking of the forend to accommodate the use of the Pattern 1888 sword-bayonet. - additional conversion features: - the lower band was removed and replaced with a wood-filled patch, - the cavalry nosecap was removed, the forend cutback thus exposing four to five inches of the barrel and a Lee-Enfield type rifle nosecap assembly fitted in its place, - a one inch long barrel collar was fitted to the muzzle end of the barrel for the Pattern 1888 bayonet muzzle ring, - the screws on the forestock for the leather rear sight protector were removed and the holes filled, - those models converted from the Lee-Metford Mark 1 carbine may still have the sling bar in the right side of the buttstock.
Manufacturer	- the manufacturer's name appears on the left side of the butt socket.
Serial Number	- appears on right front end of the receiver and usually has a letter prefix.
Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- model designation is not marked on this firearm. - manufactured/converted from approximately 1903 to 1914. - turn bolt operated, detachable box magazine. - this carbine was specifically designed and manufactured for use by the Royal Irish Constabulary (RIC) and was a conversion from existing stocks of Lee Metford Mark 1, Lee Enfield Mark 1 and Lee Enfield Mark 1* cavalry carbines. - the conversions were carried out by RSAF Enfield and RSAF/RSARF Sparkbrook (Birmingham); as the original manufacturers markings on the left side of the butt socket were not removed during the conversion process, the only indication of the manufacturer responsible for the conversion is the RSAF Enfield or RSAF/RSARF Sparkbrook (Birmingham) roundel impressed on the right side of the buttstock. - the conversion involved the reworking of the forend to accommodate the use of the Pattern 1888 sword-bayonet. - additional conversion features: - the lower band was removed and replaced with a wood-filled patch, - the cavalry nosecap was removed, the forend cutback thus exposing four to five inches of the barrel and a Lee-Enfield type rifle nosecap assembly fitted in its place, - a one inch long barrel collar was fitted to the muzzle end of the barrel for the Pattern 1888 bayonet muzzle ring, - the screws on the forestock for the leather rear sight protector were removed and the holes filled, - those models converted from the Lee-Metford Mark 1 carbine may still have the sling bar in the right side of the buttstock.
Manufacturer	- the only indication of the Royal Manufactory (RM) responsible for this conversion is the presence of the Manufactory's roundel as was impressed on the right side of the buttstock. - the roundel insignia for RSARF Sparkbrook (Birmingham) consists of two concentric circles/one within the other, with the name "Birmingham" over the date of conversion written in the outer circle, and the British War Department "broad arrow" insignia in the inner circle. - RSAF Sparkbrook was a Royal Manufactory established by the British Government circa 1886 at Montgomery St., Sparkbrook, Birmingham; it ceased operations circa 1906; its roundel had the letters "R M" separated by a Crown over the word "Sparkbrook" with the British "broad-arrow" insignia in the inner circle. - RSARF Birmingham was a British Government repair facility located at Bagot St., Birmingham; it ceased operations in 1894; its insignia apparently consisted of the roundel as noted above for RSARF Sparkbrook; with the closing of RSARF Birmingham, repair work formerly done at RSARF Birmingham was re-assigned to RSAF Sparkbrook (Birmingham); it would appear that the former RSARF Birmingham's roundel marking was continued in use by the RSAF Sparkbrook facility for repair/conversion work.
Action	- turn bolt operated.
Serial Number	- serial number is usually marked on the right side of the receiver ring and may have a letter prefix.
Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable steel box magazine.
Other Markings	- known example had the RSARF Sparkbrook (Birmingham) roundel impressed on the right side of the buttstock with the date as "1902".

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- model designation is marked on the right side of the butt socket as: "AI* "
- additional markings on the right butt socket are: Crown-over-VR cypher, over the name "Enfield" over the date "1901" over the letters "LE" over the model designation "AI* ".
- the unique model designation marked on this firearm indicates a rifle that had been selected for particular tests or trials by the British military and as such can be considered a "prototype" model never officially adopted.
- turn bolt operated, detachable steel box magazine.
- this rifle is a Lee Enfield Mark 1* with minor differences.
- features which characterize this model:
- brass buttplate with extended top tang,
- hooded front sight,
- circa 1900/1901 trials-type adjustable rear sight; known example had no yardage graduation markings on the leaf.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the name "Enfield" under the Crown/VR cypher is marked on the right side of the butt socket.
Action	- turn bolt operated.
Serial Number	- known example had a four digit number with a letter suffix marked on the right side of the receiver ring. - the letter suffix "Y" has been observed.
Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable steel box magazine.
Other Markings	- known example had the model designation "AI* " marked on the right side of the butt stock, the letter "A" marked on both sides of the fore stock over the trigger guard and the letter "E" stamped on the top of the Knox form of the barrel.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- "No 1 Mark 1" is not marked on the firearm, this is the nomenclature the British service adopted for this small arm in 1926.
- the following is usually marked on the right side of the butt socket: the Kings crown over the letters "E.R.", the year of manufacturer, and the letters "Sht L.E." over the Roman numeral one "I".
- manufactured between 1903 and 1906.
- total production between the Mark 1 and Mark 1* of approximately 150,000 units.

Manufacturer

- "B.S.A. Co" is marked on the right side of the butt socket, this is the abbreviation for the "Birmingham Small Arms Company".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the right side of the receiver ring.
- the serial number range started at one and progressed to 99,999, when the first 99,999 units had been produced by the factory, an alpha character was then added to the serial number sequence.
- the alpha character may be located above or to the left of (prefix) or below (suffix) the serial number.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Shots

- detachable box magazine.

Other Markings

- the year of manufacture is marked directly under the manufacturer's identifier.

Remarks

- this is a bolt action, repeating rifle utilizing a ten shot detachable box magazine and a sliding charger clip guide located on the bolt head. It is historically significant as it is the first of the Short Magazine Lee Enfield family of British service rifles. In 1926 the British government changed the model terminology of this rifle from Short Magazine Lee Enfield MARK 1 to Rifle No 1 MARK 1 (no new markings were applied to the firearm to reflect this change).

- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- The model designation MARK 1 Converted appears on the left side of the butt socket in abbreviated form with the Roman numeral one. These rifles were manufactured (converted) from 1903 to 1906.

Manufacturer

- the manufacturer's name appears on the left side of the butt socket.

Serial Number

- serial number appears on the right front end of the receiver and usually has a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Other Markings

- original arsenal and model designation retained on right side of butt socket.

Remarks

- This rifle is a conversion of existing MARK 1 Lee Metford rifles to Short Magazine Lee Enfield MARK 1 rifle configuration. The original manufacturer's marks are retained on the right side of the butt socket and new markings are applied to the left side. In 1926 the British government changed the model terminology of this rifle from Short Magazine Lee Enfield Mark 1 (Converted) to Rifle No 1 MARK 1 (Converted) but no new markings were applied to the firearm to reflect this change.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation MARK 1** appears as a Roman numeral one ** on the right side of the butt socket. These rifles were manufactured (converted) from 1908 to 1914.

Manufacturer

- the manufacturer's (converter's) name, Royal Navy Ordnance Depots, does not appear on the firearm however, the the original manufacturer's name (Enfield, Sparkbrook, B.S.A. Co. or L.S.A. Co.) appears on the right side of the butt socket.

Serial Number

- serial number located on right front end of the receiver and usually has a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Shots

- detachable box magazine.

Other Markings

- original date of manufacture and manufacturer's name retained on right side of the butt socket.

Remarks

- this is a conversion of S.M.L.E. MARK 1 rifles for exclusive use by the Royal Navy. Work was carried out at Royal Naval Ordnance Depot workshops without altering the original arsenal or date of manufacture markings. The original S.M.L.E. MARK 1** had a sliding charger guide on the bolt head but after 1912 these rifles were further modified by having the sliding charger guide removed and a charger guide bridge brazed to the top of the receiver. In 1926 the British government changed the model terminology of this rifle from Short Magazine Lee Enfield MARK 1** to Rifle No 1 MARK 1** but no new markings were applied to the firearm to reflect this change.

- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Other Markings

- original arsenal and date of manufacture on right side of butt socket.

Remarks

- This is an Indian conversion of Short Magazine Lee Enfield MARK 1* I.P. (Indian Pattern), Short Magazine Lee Enfield MARK 1 and Short Magazine Lee Enfield MARK 2 Converted rifles to Short Magazine Lee Enfield MARK 3 specifications. The original markings were retained on the right side of the butt socket to which additional markings indicating the conversion were applied. In 1926 the British government changed the model terminology of this rifle from Short Magazine Lee Enfield MARK 1** (I.P.) to Rifle No 1 MARK 1** (I.P.), no new markings were added to the firearm to reflect this change.

Firearm Reference Number (FRN): 663
Make: Lee-Enfield
Model: No 1 MARK 1***

Summary

Make:	Lee-Enfield
Model:	No 1 MARK 1***
Manufacturer:	Royal Small Arms Factory, Enfield (RSAF(E))
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
663 - 1	303 BRITISH	10	640	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation MARK 1*** appears on the right side of the butt socket as a Roman numeral one ***. These rifles were manufactured (converted) in 1914-15.

Manufacturer

- the manufacturer's name Enfield appears on the right side of the butt socket of only those rifles which were originally manufactured by Enfield. The original manufacturer's name (BSA Co, Ishapore & LSA Co) only appears on the others.

Serial Number

- serial number appears on right front end of the receiver and usually has a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable box magazine.
Other Markings	- converted rifles were marked with two asterisks applied behind the existing asterisk.
Remarks	- this is a conversion of S M L E MARK 1* rifles to accomodate MARK 7 ammunition. The conversion involved regraduating the rear sight to agree with the trajectory curve of the new ammunition. In 1926 the British government changed the model terminology of this rifle from Short Magazine Lee Enfield MARK 1*** to Rifle No 1 MARK 1*** but no new markings were applied to the firearm to reflect this change.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation MARK 2** Converted is marked on the left side of the butt socket as the Roman numeral two** and the abbreviation" Cond." These rifles were converted from 1908 to 1914.

Manufacturer

- the manufacturer's (converter's) name Royal Navy Ordnance Depots is marked as a capital letter N on the left side of the butt socket.

Serial Number

- serial number located on right front end of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Other Markings

- original date of manufacture and manufacturer's markings retained on the right side of the butt socket, original converter's name and date retained on left side of the butt socket. A capital letter N on the left side of the butt socket indicates that the last conversion was carried out at a Royal Navy Ordnance Depot.

Remarks

- this is a conversion of S.M.L.E. MARK 2 Converted rifles for exclusive use by the Royal Navy. The original S.M.L.E. MARK 2** Converted rifles had a sliding charger guide on the bolt head, in 1912 existing specimens were further modified by having this charger guide removed and a charger guide bridge brazed to the top of the receiver. In 1926 the British government changed the model terminology of this rifle from Short Magazine Lee Enfield MARK 2** Converted to Rifle No 1 MARK 2** Converted but no new markings were applied to the firearm to reflect this change.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation appears as the Roman numeral three (III) on the right side of the butt socket.
- manufactured from 1907 to 1916.

Manufacturer

- the manufacturer's name appears on the right side of the butt socket.

Action

- turn-bolt design.

Serial Number

- serial number is located on right front end of the receiver/frame.
- serial number may have a letter prefix.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Shots

- detachable box magazine.

Other Markings

- year of manufacture marked directly under the manufacturer's name, crown and "ER" or "GR" cypher on right side of the butt socket together with the pre 1926 model designation.

Remarks

- this is an improved version of the earlier Short Magazine Lee Enfield rifles. It is more sturdily constructed and features a charger clip guide brazed to the top of the receiver. This rifle is historically significant as it (with the Short Magazine Lee Enfield MARK 3*) was the standard service rifle of the British Empire forces in World War One and saw service with Australian and Indian troops as late as the Korean War (1950-1953). In 1926 the British government changed the terminology of this rifle from Short Magazine Lee Enfield MARK 3 to Rifle No 1 MARK 3 (no new markings were added to the firearm to reflect this change).

- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured from circa 1909 to 1945.
- "No 1 MARK 3" is not marked on the firearm.
- "SHT. LE" or "SMLE" over "III" is marked on the right side of the butt socket.
 "SMLE" denotes "Short Magazine Lee Enfield".
- "SHT. LE." denotes "Short Lee Enfield".
- "III" is the Roman numeral for "3".
- Rifle, Short, Magazine Lee Enfield MARK 3 and MARK 3* were standard issue in the British Empire forces in World War One, the early stages of World War Two and for the Australian and Indian forces in the Korean War (1950-1953).
- Rifle, Short, Magazine Lee Enfield MARK 3 model designation was changed to Rifle No. 1 MARK 3 by the British government in 1926 (no new markings were added to the firearm to reflect this change).
- features include: round barrel with a foresight block with a removable blade front sight and an adjustable leaf type back sight; MARK 3 receiver/frame with an integral bridge charger guide and butt socket; safety lever is mounted on the left side of the receiver/frame; magazine release is mounted inside the trigger guard; metal nosecap with integral foresight protector ears, bayonet boss and mount and sling swivel hole; wood, two piece top handguard, one piece forearm with a barrel band, and a semi-pistol grip buttstock with metal butt plate with butt trap; sling swivels.
- overall length with a 640 mm (25.2") barrel is 1130 mm (44.5"), and the average weight is 4.1 kgs (8 lbs 15 oz).
- "No 1 MARK 3" have been sporterized over the years by removing the nosecap, replacing or shortening the barrel, modifying or changing the sights, removing the top hand guards, and reshaping the forearm and buttstock.
- "No 1 MARK 3*" is an improved version of the Rifle, Short, Magazine Lee Enfield MARK 3 (Rifle, Short, MLE Mk III or SMLE MARK 3).
- "No 1 MARK 3*" was redesigned for economical production by eliminating the volley sights on the left side of the receiver/frame and forearm, magazine cutoff and brass marking disc in the buttstock.

Manufacturer

- "LITHGOW" is marked on the right side of the butt socket of the receiver/frame.

Action

- turn-bolt design.

Serial Number

- serial number is located on right front side of the receiver/frame.
- serial number may have a letter prefix.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Shots

- detachable box magazine.

Other Markings

- year of manufacture marked under the manufacturer's name on right side of butt socket together with model designation.

Remarks

- this is an improved version of the earlier Short Magazine Lee Enfield rifles. It is more sturdily constructed and features a charger clip guide brazed to the top of the receiver/frame. This rifle (and the Short Magazine Lee Enfield MARK 3*) was the standard service rifle of Australian forces in World War One and saw service as late as the Korean War (1950-1953). In 1926 the model terminology of this rifle was changed from Short Magazine Lee Enfield MARK 3 to Rifle No 1 MARK 3 (no new markings were added to the firearm to reflect this change).

121180 - 1	303 BRITISH	10	223	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the "No 1 MARK 3 Cutaway" was usually built from condemned rifles but some have been noted as "built up" units that used available parts from stores.
- used for instructional purposes, viewing slots were usually cut in the sides of the receiver/frame, bolt, bolthead, cocking piece, and magazine.
- a similar training aid was built using the No 1 MARK 3* rifle. The only difference between the two would be the No 1 MARK 3 will have a longitudinal slot cut into the right side of the receiver/frame for a magazine cut-off plate.
- the original Lee-Enfield No 1 MARK 3 action was skeletonized by Royal Small Arms Factory - Enfield in England, Small Arms Factory - Ishapore in India and Small Arms Factory - Lithgow in Australia.
- Note: as the portion of the butt socket that would normally bear the model and manufacturer markings has usually been milled away as part of the conversion the actual manufacturer will be difficult to determine.

Action

- turn-bolt operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is usually marked on the receiver/frame and barrel. - it is possible that some firearms will not be serialized.
Barrel	- as these were all basically built by hand variances in barrel lengths will be encountered.
Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable box magazine.
Remarks	- the Short Magazine Lee Enfield rifles MARK 3 and 3* were standard issue of the British Empire forces in World War I, the early stages of World War II and of Australian and Indian forces in the Korean War (1950-1953). In 1926 the British government changed the model terminology from Short Magazine Lee Enfield MARK 3 to Rifle No 1 MARK 3 and Rifle No 1 MARK 3* (no new markings were added to the firearm to reflect this change).

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation appears as a Roman numeral three on the right side of the butt socket, the designation "Sniper" does not appear. These rifles were manufactured from 1907 to 1916.

Manufacturer

- the manufacturer's name appears on the right side of the butt socket.

Serial Number

- appears on right front end of the receiver/frame, usually has a letter prefix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Other Markings

- Year of manufacture marked directly under the manufacturer's name, crown and "ER" or "GR" cypher on right side of butt socket together with the pre 1926 model designation. No markings appear on the firearm to indicate that it is anything but a standard No 1 MARK 3 rifle.

Remarks

- This is a standard Short Magazine Lee Enfield MARK 3 adapted for the use with a telescopic sight by having a base pinned, screwed or soft soldered to the receiver to accept a telescopic sight. In 1926 the British government changed the model terminology of the basic rifle from Short Magazine Lee Enfield MARK 3 to Rifle No 1 MARK 3 (no new markings were added to the firearm to reflect this change).

- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured from 1909 to 1941.
- "No 1 MARK 3 Sniper " is not marked on the firearm.
- "SHT. LE" or "SMLE" over "III" is marked on the right side of the butt socket.
 "SMLE" denotes "Short Magazine Lee Enfield".
- "SHT. LE." denotes "Short Lee Enfield".
- "III" is the Roman numeral for "3".
- Rifle, Short, Magazine Lee Enfield MARK 3 and MARK 3* were standard issue in the British Empire forces in World War One, the early stages of World War Two and for the Australian and Indian forces in the Korean War (1950-1953).
- Rifle, Short, Magazine Lee Enfield MARK 3 model designation was changed to Rifle No. 1 MARK 3 by the British government in 1926 (no new markings were added to the firearm to reflect this change).
- features include: round barrel with a foresight block with a removable blade front sight and an adjustable leaf type back sight; MARK 3 receiver/frame with an integral bridge charger guide and butt socket; safety lever is mounted on the left side of the receiver/frame; magazine release is mounted inside the trigger guard; metal nosecap with integral foresight protector ears, bayonet boss and mount and sling swivel hole; wood, two piece top handguard, one piece forearm with a barrel band, and a semi-pistol grip buttstock with metal butt plate with butt trap; sling swivels.
- overall length with a 640 mm (25.2") barrel is 1130 mm (44.5"), and the average weight is 4.1 kgs (8 lbs 15 oz).
- "No 1 MARK 3" have been sporterized over the years by removing the nosecap, replacing or shortening the barrel, modifying or changing the sights, removing the top hand guards, and reshaping the forearm and buttstock.
- "No 1 MARK 3*" is an improved version of the Rifle, Short, Magazine Lee Enfield MARK 3 (Rifle, Short, MLE Mk III or SMLE MARK 3).
- "No 1 MARK 3*" was redesigned for economical production by eliminating the volley sights on the left side of the receiver/frame and forearm, magazine cutoff and brass marking disc in the buttstock.

Manufacturer

- "LITHGOW" is marked on the right side of the butt socket of the receiver/frame.

Action

- turn-bolt design.

Serial Number

- serial number is marked on right front side of receiver/frame.
- serial number may have a letter prefix.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Shots

- detachable box magazine.

Other Markings

- the year of manufacture is marked directly under the manufacturer's name, crown, shield or star with "ER" or "GR" cypher on right side of the butt socket together with the pre 1926 model designation. No markings appear on the firearm to indicate that it is anything but a standard No 1 MARK 3 rifle.

Remarks

- this is a standard Short Magazine Lee Enfield MARK 3 rifle adapted for use with a telescopic sight by having a base pinned, screwed or soft soldered to the receiver/frame to accept a telescopic sight. In 1926 the British government changed the model terminology of the basic rifle from Short Magazine Lee Enfield MARK 3 to Rifle No 1 MARK 3 (no new markings were added to the firearm to reflect this change).

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- manufactured from 1915 to 1943.
- "No 1 MARK 3*" is not marked on the firearm.
- "SHT. L.E." and "III *" is usually marked on the right side of the butt socket.
- "SHT." denotes "Short".
- "L.E." denotes "Lee Enfield".
- "III" is the Roman numeral for "3".
- " * " is the symbol for "star.
- "No 1 MARK 3*" is an improved version of the Rifle, Short, Magazine Lee Enfield MARK 3 (Rifle, Short, MLE Mk III or SMLE MARK 3).
- "No 1 MARK 3" was redesigned for economical production by eliminating the volley sights on the left side of the receiver/frame and forearm, magazine cutoff and brass marking disc in the buttstock.
- Rifle, Short, Magazine Lee Enfield MARK 3 and MARK 3* were standard issue in the British Empire forces in World War One, the early stages of World War Two and for the Australian and Indian forces in the Korean War (1950-1953).
- Rifle, Short, Magazine Lee Enfield MARK 3* model designation was changed to Rifle No. 1 MARK 3* by the British government in 1926 (no new markings were added to the firearm to reflect this change).
- features include: round barrel with a foresight block with a removable blade front sight and an adjustable leaf type back sight; MARK 3* receiver/frame with an integral bridge charger guide and butt socket; safety lever is mounted on the left side of the receiver/frame; magazine release is mounted inside the trigger guard; metal nosecap with integral foresight protector ears, bayonet boss and mount and sling swivel hole; wood, two piece top handguard, one piece forearm with a barrel band, and a semi-pistol grip buttstock with metal butt plate with butt trap; sling swivels.
- overall length with a 640 mm (25.2") barrel is 1130 mm (44.5"), and the average weight is 4.1 kgs (8 lbs 15 oz).
- "No 1 MARK 3*" have been sporterized over the years by removing the nosecap, replacing or shortening the barrel, modifying or changing the sights, removing the top hand guards, and reshaping the forearm and buttstock.

Manufacturer

- "B" or "B.S.A. Co " and the year of manufacturer are usually marked on the right side of the butt socket of the receiver/frame.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the right side of the receiver ring of the receiver/frame, and may be repeated on the barrel and bolt handle.
- serial numbers applied in 1916 may not have a letter prefix.
- serial number usually has a letter prefix.
- serial number prefix was marked to the left side, above, right side or below the serial number.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Shots

- detachable box magazine.

- Rifle, Short, Magazine Lee Enfield MARK 3 and MARK 3* were standard issue in the British Empire forces in World War One, the early stages of World War Two and for the Australian and Indian forces in the Korean War (1950-1953).
- Rifle, Short, Magazine Lee Enfield MARK 3* model designation was changed to Rifle No. 1 MARK 3* by the British government in 1926 (no new markings were added to the firearm to reflect this change).
- features include: round barrel with a foresight block with a removable blade front sight and an adjustable leaf type back sight; MARK 3* receiver/frame with an integral bridge charger guide and butt socket; safety lever is mounted on the left side of the receiver/frame; magazine release is mounted inside the trigger guard; metal nosecap with integral foresight protector ears, bayonet boss and mount and sling swivel hole; wood, two piece top handguard, one piece forearm with a barrel band, and a semi-pistol grip buttstock with metal butt plate with butt trap; sling swivels.
- overall length with a 640 mm (25.2") barrel is 1130 mm (44.5"), and the average weight is 4.1 kgs (8 lbs 15 oz).
- "No 1 MARK 3*" have been sporterized over the years by removing the nosecap, replacing or shortening the barrel, modifying or changing the sights, removing the top hand guards, and reshaping the forearm and buttstock.

Manufacturer

- - "L.S.A. Co L" and the year of manufacturer are usually marked on the right side of the butt socket of the receiver/frame.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the right side of the receiver ring of the receiver/frame.
- serial number has a letter prefix.
- serial number prefix is usually marked above the serial number.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Shots

- detachable box magazine.

Other Markings

- year of manufacture marked directly under the manufacturer's name, crown and "GR" cypher on right side of butt socket together with the pre 1926 model designation.

Remarks

- this rifle is a version of the Short Magazine Lee Enfield MARK 3 redesigned for economical production by eliminating the volley sights on the left side of the receiver/frame and forearm, magazine cutoff and brass marking disc in the buttstock. The Short Magazine Lee Enfield rifles MARK 3 and MARK 3* were standard issue of the British Empire forces in World War I, the early stages of World War II and of Australian and Indian forces in the Korean War (1950-1953). In 1926 the British government changed the model terminology from Short Magazine Lee Enfield MARK 3* to Rifle No 1 MARK 3* (no new markings were added to the firearm to reflect this change).

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- manufactured from 1915 to 1930.
- "No 1 MARK 3*" is not marked on the firearm.
- "SHT. L.E." and "III *" is usually marked on the right side of the butt socket.
- "SHT." denotes "Short".
- "L.E." denotes "Lee Enfield".
- "III" is the Roman numeral for "3".
- " * " is the symbol for "star.
- "No 1 MARK 3*" is an improved version of the Rifle, Short, Magazine Lee Enfield MARK 3 (Rifle, Short, MLE Mk III or SMLE MARK 3).
- "No 1 MARK 3" was redesigned for economical production by eliminating the volley sights on the left side of the receiver/frame and forearm, magazine cutoff and brass marking disc in the buttstock.
- Rifle, Short, Magazine Lee Enfield MARK 3 and MARK 3* were standard issue in the British Empire forces in World War One, the early stages of World War Two and for the Australian and Indian forces in the Korean War (1950-1953).
- Rifle, Short, Magazine Lee Enfield MARK 3* model designation was changed to Rifle No. 1 MARK 3* by the British government in 1926 (no new markings were added to the firearm to reflect this change).
- features include: round barrel with a foresight block with a removable blade front sight and an adjustable leaf type back sight; MARK 3* receiver/frame with an integral bridge charger guide and butt socket; safety lever is mounted on the left side of the receiver/frame; magazine release is mounted inside the trigger guard; metal nosecap with integral foresight protector ears, bayonet boss and mount and sling swivel hole; wood, two piece top handguard, one piece forearm with a barrel band, and a semi-pistol grip buttstock with metal butt plate with butt trap; sling swivels.
- overall length with a 640 mm (25.2") barrel is 1130 mm (44.5"), and the average weight is 4.1 kgs (8 lbs 15 oz).
- "No 1 MARK 3*" have been sporterized over the years by removing the nosecap, replacing or shortening the barrel, modifying or changing the sights, removing the top hand guards, and reshaping the forearm and buttstock.

Manufacturer

- "ENFIELD" over the year of manufacture are usually marked on the right side of the butt socket of the receiver/frame.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the right side of the receiver ring of the receiver/frame, and may be repeated on the barrel and bolt handle.
- serial numbers applied in 1916 may not have a letter prefix.
- serial number usually has a letter prefix.

- serial number prefix is marked to the left side, above, and serial number suffix to the right side or below the serial number.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - year of manufacture marked directly under the manufacturer's name, crown and "G.R." cypher on right side of the butt socket together the pre 1926 model designation.

Manufacturer

- "SSA" is marked on the left top rear of the receiver/frame.
- "SSA" are the initials for Standard Small Arms Company Limited.
- Standard Small Arms Company Limited was located at the Standard Works, Lench Street, Birmingham, England from 1913 to 1918.
- Standard Small Arms Company Limited was formed by the firms of Clabrough & Johnstone and Hollis Bentley & Playfair for wartime production.
- Standard Small Arms Company Limited also had facilities in London circa 1913.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the right side of the receiver ring of the receiver/frame, and may be repeated on the barrel and bolt handle.
- serial number may not have a letter prefix.
- serial number usually has a letter prefix.
- serial number prefix was marked to the left side, above, right side or below the serial number.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Shots

- detachable box magazine.

Other Markings

- the year of manufacture is marked directly beneath the crown and "GR" cypher on the right side of the butt socket together with the pre 1926 model designation.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the "No 1 MARK 3* Cutaway" was usually built from condemned rifles but some have been noted as "built up" units that used available parts from stores.
- used for instructional purposes, viewing slots were usually cut in the sides of the receiver/frame, bolt, bolthead, cocking piece, and magazine.
- a similar training aid was built using the No 1 MARK 3 rifle. The only difference between the two would be the No 1 MARK 3 will have a longitudinal slot cut into the right side of the receiver/frame for a magazine cut-off plate.
- the original Lee-Enfield No 1 MARK 3* action was skeletonized by Royal Small Arms Factory - Enfield in England, Small Arms Factory - Ishapore in India and Small Arms Factory - Lithgow in Australia.
- Note: as the portion of the butt socket that would normally bear the model and manufacturer markings has usually been milled away as part of the conversion the actual manufacturer will be difficult to determine.

Action

- turn bolt operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is usually marked on the receiver/frame.
- it is possible that some firearms will not be serialized.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Shots

- detachable box magazine.

Remarks

- this rifle is a version of the Short Magazine Lee Enfield MARK 3 redesigned for economical production by eliminating the volley sights on the left side of the receiver/frame and forearm, magazine cutoff and brass marking disc in the buttstock. The Short Magazine Lee Enfield rifles MARK 3 and 3* were standard issue of the British Empire forces in World War One, the early stages of World War Two and of Australian and Indian forces in the Korean War (1950-1953). In 1926 the British government changed the model terminology from Short Magazine Lee Enfield MARK 3* to Rifle No 1 MARK 3* (no new markings were added to the firearm to reflect this change).

FRT Report

Firearm Reference Number (FRN): 671
Make: Lee-Enfield
Model: No 1 MARK 3* Sniper

Summary

Make:	Lee-Enfield
Model:	No 1 MARK 3* Sniper
Manufacturer:	Birmingham Small Arms (BSA)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
671 - 1	303 BRITISH	10	640	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation appears on the right side of the butt socket as a Roman numeral three*.
- these rifles were manufactured from 1916 to 1940.

Manufacturer

- the manufacturer's name appears on the right side of the butt socket.

Serial Number

- appears on the right front end of the receiver and usually has a letter prefix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Other Markings

- Year of manufacture marked directly under the manufacturer's name, crown and "GR" cypher on right side of the butt socket together with the pre 1926 model designation. No markings appear on the firearm to indicate that this is anything but a standard No 1 MARK 3* rifle.

Remarks

- This is a standard Short Magazine Lee Enfield MARK 3* rifle adapted for use with a telescopic sight by having a base pinned, screwed or soft soldered to the receiver to accept a telescopic sight. In 1926 the British government changed the model terminology of this rifle from Short Magazine Lee Enfield MARK 3* to Rifle No 1 MARK 3* (no new markings were added to the firearm to reflect this change).

- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- The model designation appears on the right side of the butt socket as the Roman numeral 3* and an alpha numeric inscription. These rifles were manufactured from 1916 to the mid 1950's.

Manufacturer

- "ISHAPORE" or "R.F.I." is usually marked on the right side of the butt socket.
- "R.F.I." is the abbreviation for "Rifle Factory Ishapore".
- some rifles manufactured in the 1940's do not have the manufacturer's name on the butt socket.

Serial Number

- appears on right front end of the receiver and usually has a letter prefix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Other Markings

- Year of manufacture marked under the manufacturer's name, crown and "GRI" cypher or three tiger symbol on right side of the butt socket together with the model designation. No markings appear on the firearm to indicate that it is anything but a standard No 1 MARK 3* rifle.

Remarks

- This is a standard Short Magazine Lee Enfield MARK 3* rifle adapted for use with a telescopic sight by having a base pinned, screwed or soft soldered to the receiver to accept a telescopic sight. In 1926 the model terminology of this rifle was changed from Short Magazine Lee Enfield MARK 3* to Rifle No 1 MARK 3*, rifles manufactured until the mid 1940's used the pre 1926 model designation markings, later manufacture rifles used the post 1926 model designation markings.

- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured from 1916 to 1956.
- "No 1 MARK 3* Sniper" is not marked on the firearm.
- "SMLE" or "SHT. LE." and "III *" is usually marked on the right side of the butt socket.
- "No I. Mk 3*" may be marked on the left side of the butt socket on firearms which were converted to 22 RF.
- "SMLE" denotes "Short Magazine Lee Enfield".
- "SHT. LE." denotes "Short Lee Enfield".
- "III" is the Roman numeral for "3".
- " * " is the symbol for "star.
- "No 1 MARK 3*" is an improved version of the Rifle, Short, Magazine Lee Enfield MARK 3 (Rifle, Short, MLE Mk III or SMLE MARK 3).
- "No 1 MARK 3" was redesigned for economical production by eliminating the volley sights on the left side of the receiver/frame and forearm, magazine cutoff and brass marking disc in the buttstock.
- Rifle, Short, Magazine Lee Enfield MARK 3 and MARK 3* were standard issue in the British Empire forces in World War One, the early stages of World War Two and for the Australian and Indian forces in the Korean War (1950-1953).
- Rifle, Short, Magazine Lee Enfield MARK 3* model designation was changed to Rifle No. 1 MARK 3* by the British government in 1926 (no new markings were added to the firearm to reflect this change).
- features include: round barrel with a foresight block with a removable blade front sight and an adjustable leaf type back sight; MARK 3* receiver/frame with an integral bridge charger guide and butt socket; safety lever is mounted on the left side of the receiver/frame; magazine release is mounted inside the trigger guard; metal nosecap with integral foresight protector ears, bayonet boss and mount and sling swivel hole; wood, two piece top handguard, one piece forearm with a barrel band, and a semi-pistol grip buttstock with metal butt plate with butt trap; sling swivels.
- overall length with a 640 mm (25.2") barrel is 1130 mm (44.5"), and the average weight is 4.1 kgs (8 lbs 15 oz).
- "No 1 MARK 3*" have been sporterized over the years by removing the nosecap, replacing or shortening the barrel, modifying or changing the sights, removing the top hand guards, and reshaping the forearm and buttstock.

Manufacturer

- "LITHGOW" is marked on the right side of the butt socket of the receiver/frame.

Action

- turn-bolt design.

Serial Number

- serial number is marked on right front side of the receiver/frame.
- serial number may have a letter prefix.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Shots

- detachable box magazine.

Other Markings

- the year of manufacture is marked under the manufacturer's name on the right side of the butt socket together with the model designation. No markings appear on the firearm to indicate that it is anything but a standard No 1 MARK 3* rifle.

Remarks

- this is a standard Short Magazine Lee Enfield MARK 3* adapted to use a telescopic sight by having a base pinned, screwed or soft soldered to the receiver to accept a telescopic sight. In 1926 the model terminology was changed from Short Magazine Lee Enfield MARK 3* to Rifle No 1 MARK 3* (no new markings were added to the firearm to reflect this change).

FRT Report

Firearm Reference Number (FRN): 677
Make: Lee-Enfield
Model: No 1 MARK 3* Sniper

Summary

Make:	Lee-Enfield
Model:	No 1 MARK 3* Sniper
Manufacturer:	Standard Small Arms (SSA)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
677 - 1	303 BRITISH	10	640	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- The model designation appears on the right side of the butt socket as a Roman numeral three*. These rifles were manufactured from 1916 to 1919.

Manufacturer

- "SSA" is marked on the left top rear of the receiver/frame.
- "SSA" are the initials for Standard Small Arms Company Limited.
- Standard Small Arms Company Limited was located at the Standard Works, Lench Street, Birmingham, England from 1913 to 1918.
- Standard Small Arms Company Limited was formed by the firms of Clabrough & Johnstone and Hollis Bentley & Playfair for wartime production.
- Standard Small Arms Company Limited also had facilities in London circa 1913.

Serial Number

- appears on right front end of the receiver and usually has a letter prefix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Other Markings

- Year of manufacture marked directly beneath crown and "GR" cypher on right side of butt socket togethr with pre 1926 model designation. No markings appear on the firearm to indicate that it is anything but a standard No 1 MARK 3* rifle.

Remarks

- This is a standard Short Magazine Lee Enfield MARK 3* rifle adapted for use with a telescopic sight by having a base pinned, screwed or soft soldered to the receiver to accept a telescopic sight. In 1926 the British government changed the model terminology of the basic rifle from Short Magazine Lee Enfield MARK 3* to Rifle No 1 MARK 3* (no new markings were added to the firearm to reflect this change).

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- serial number and model designation are marked on the right side of the butt socket in Siamese/Thai script.
- Type 2462 is a standard Short Magazine Lee-Enfield MARK 3* (Rifle No 1 MARK 3*) manufactured on contract for the Kingdom of Siam in the early 1920's.
- Type 2462 is identical to its British government issue counterpart in all respects except for markings and sight graduations which are in Thai script and numerals.
- features include: three-piece wood stock set, buttstock features a semi pistol grip, forend and upper handguard extend to the front sight on this model; sling swivels; bayonet lug mounted on the nose cap; blued finish; sliding adjustable rear sight mounted to the barrel with a protected blade front sight; safety catch mounted on the left side of the receiver/frame; action "cocks" on closing of the bolt.

Manufacturer

- the manufacturer's name appears on the Knox form of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- turn bolt design.
Serial Number	- located on right front end of the receiver/frame, numerals are normally in Thai script, some examples have been noted with arabic numbers.
Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable box magazine.
Other Markings	- Tiger motif surrounded by Thai script on right side of butt socket.

- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation appears as the abbreviation Cond and the Roman numeral four on the left side of the butt socket. These rifles were manufactured (converted) from 1907 to 1912.

Manufacturer

- the manufacturer's (converter's) name appears on the left side of the butt socket.

Serial Number

- serial number appears on right front end of the receiver and usually has a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable box magazine.
Other Markings	- original markings on right side of butt socket, conversion markings on left side of butt socket.
Remarks	- This is a converion of existing MARK 2 and MARK 2* Lee Metford and MARK 1 and MARK 1* Lee Enfield rifles to Short Magazine Lee Enfield Mark 3 (Rifle No 1 MARK 3) configuration. Original manufacturer markings and model designation were left intact on the right side of the butt socket while conversion markings were added to the left side of the butt socket. In 1926 the British government changed the model terminology of this rifle from Short Magazine Lee Enfield MARK 4 Converted to Rifle No 1 MARK 4 Converted (no new markings were added to the firearm to reflect this change).

- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation is marked on the right side of the butt socket as a Roman numeral five (V). These rifles were manufactured from 1922 to 1924.

Manufacturer

- the manufacturer's name appears on the right side of the butt socket as 'ENFIELD'.

Serial Number

- serial number is located on the right front end of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable box magazine.
Other Markings	- year of manufacture is marked directly under the manufacturer's name, crown and "GR" cypher on right side of butt socket together with the pre 1926 model designation.
Remarks	- this is a post World War I experimental development intended as an improvement over the Short Magazine Lee Enfield MARK 3 rifle. It featured an adjustable aperture rear sight mounted on the receiver bridge and an extra barrel band located behind the nosecap. It was manufactured in relatively small quantities (20,000) for troop trials. In 1926 the British government changed the model terminology of this rifle from Short Magazine Lee Enfield MARK 5 to Rifle No 1 MARK 5 (no new markings were applied to the firearm to reflect this change).

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation appears on the left side of the butt socket as a combination of abbreviation, Arabic and Roman numerals. These rifles were manuactured from 1926 to 1935.

Manufacturer

- the manufactuer's name appears on the left side of the butt socket.

Serial Number

- serial number located on left side of the butt socket, has letter (A,B or C) prefix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Other Markings	- year of manufacture marked directly under manufacturer's name, crown with "GR" cypher on left side of butt socket complete with model designation.
Remarks	- This is an experimental rifle based on the Short Magazine Lee Enfield No 1 MARK 3 rifle and the modifications introduced with the Short Lee Enfield No 1 MARK 5 rifle. The later Lee Enfield No 4 MARK 1 series of rifles are based on and visually resemble the Short Magazine Lee Enfield No 1 MARK 6.

121608 - 1	303 BRITISH	10	640	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- no model name is marked on this firearm.
- this entry is designed to encompass all of the SMLE rifles in both Marks, i.e., Mark 3 and Mark 3*, that were refurbished by the Indonesian Government after World War II.
- these Lee-Enfield rifles had all of the original markings removed; the new Indonesian markings were subsequently placed on the right side of the butt socket; these markings included the calibre marking of "Cal.7.7", over the Indonesian State cypher of the five pointed star, over the date of the rework (e.g. 1956).
- these rifles were brought into Indonesian service circa mid-1950's.
- one adaptation that may be present on this model series is a modified nosecap that has an extended bayonet mount on the underside suitable for attaching a Japanese Arisaka rifle bayonet; this was done presumably because of the abundance of Japanese bayonets left in the region after WW II.

Manufacturer

- the original British arsenal markings were removed during the Indonesian refurbishing of these rifles and were replaced by the Indonesian marking of a five pointed star below which is the year date of the conversion/rework.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- turn bolt operated.
Serial Number	- known example had a six digit number with a "number" prefix marked on the top of the receiver ring. - serial numbering system used for these rifles consists of the number prefix "0" separated from the remaining six digit number by a dash, i.e., 0-xxxxxx.
Calibre	- "CAL. 7.7" is usually marked on the right side of the butt socket. - 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable box magazine.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation does not appear on the rifle.

Manufacturer

- the manufacturer's name appears on the right side of the butt socket.

Serial Number

- located on right front end of the receiver/frame with prefix XP.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable box magazine.
Other Markings	- right side of the butt socket has standard No 1 MARK 3 rifle markings.
Remarks	- this is an Australian experimental development to create a lighter and more handy rifle than the standard No 1 MARK 3*. The barrel and forearm have been shortened by approximately 130mm and an aperture sight has been fitted to the charger bridge. Specimens are known to exist with barrel lengths different than given above and some specimens have open sights as found on the No 1 MARK 3*.

FRT Report

Firearm Reference Number (FRN): 113436
Make: Lee-Enfield
Model: No 2 MARK 4*

Summary

Make:	Lee-Enfield
Model:	No 2 MARK 4*
Manufacturer:	Birmingham Small Arms (BSA)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
113436 - 1	22 LR	1	640	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
113436 - 2	222 REM	1	640	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- "Sht .22" over "IV*" or "No.2" over "Mk IV*" is marked on the side of the butt socket.
- British government changed the model designation of this rifle from ".22 Short Rifle MARK 4" to "Rifle No 2 MARK 4*" in 1926.
- the vast majority of these firearms were conversions of existing Short Magazine Lee Enfield MARK 3 and 3* (Rifles No 1 MARK 3 and No 1 MARK 3*) to .22 RF calibre by replacing the original .303 calibre barrel with a new .22 calibre barrel and modifying the bolt head and extractor.

Manufacturer

- the manufacturers/converters name, if marked on the firearm, is usually found on the butt socket as "BSA".
- the original manufacturers name may appear on the firearm with the original date of manufacture.
- many of these rifles were converted by gunsmithing firms in England, Ordnance workshops, and individual armourers to meet the needs of governments that used this rifle for training purposes.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- turn-bolt design.
Serial Number	- located on right front end of the receiver/frame, usually has a letter prefix or suffix.
Shots	- this rifle is equipped with a standard No 1 MARK 3 detachable box magazine with the spring and follower removed to act as "shell catcher" for fired cartridge cases.

- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- "Sht .22 IV*" or "No.2 Mk IV*" is marked on the side of the butt socket.
- British government changed the model designation of this rifle from ".22 Short Rifle MARK 4" to "Rifle No 2 MARK 4*" in 1926.
- the vast majority of these firearms were conversions of existing Short Magazine Lee Enfield MARK 3 and 3* (Rifles No 1 MARK 3 and No 1 MARK 3*) to .22 RF calibre by replacing the original .303 calibre barrel with a new .22 calibre barrel and modifying the bolt head and extractor.
- this is a non-factory conversion of a conversion.
- the original rifles were bolt operated repeating rifles in calibre 303 BRITISH that were subsequently converted to calibre 22 RF (and re-designated as a new model) and operated as a single-shot only. At some point this rifle was re-converted for use a repeater by an individual or gunshop.

Action

- turn-bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- marked on the right forward side of the receiver/frame .
Shots	- detachable box magazine.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- conversion was approved in 1921.
- British government changed the model designation of this rifle from ".22 Short Rifle MARK 4" to "Rifle No 2 MARK 4*" in 1926.
- "No 2 MARK 4*" is not marked on the firearm.
- "SHT 22" over "IV*" or "No 2" over "Mk IV*" or "RIFLE No 2" over "MK 4" may be marked on the butt socket.
- "SMLE" or "SHT. LE." and "III" or "III *" is usually marked on the right side of the butt socket of converted rifles.
- "SHT" denotes "Short".
- "SMLE" denotes "Short Magazine Lee Enfield".
- "SHT. LE." denotes "Short Lee Enfield".
- "III" is the Roman numeral for "3".
- "IV" is the Roman numeral for (4) four.
- " * " is the symbol for "star.
- "Rifle, Short, Magazine Lee Enfield MARK 3 and MARK 3*" were standard issue in the British Empire forces in World War One, the early stages of World War Two and for the Australian and Indian forces in the Korean War (1950-1953).
- "Rifle, Short, Magazine Lee Enfield MARK 3 and MARK 3*" model designation was changed to Rifle No. 1 MARK 3 and MARK 3* by the British government in 1926 (no new markings were added to the firearm to reflect this change).
- features include: round barrel with a foresight block with a removable blade front sight and an adjustable leaf type back sight; MARK 3 or MARK 3* receiver/frame with an integral bridge charger guide and butt socket; safety lever is mounted on the left side of the receiver/frame; magazine release is mounted inside the trigger guard; metal nosecap with integral foresight protector ears, bayonet boss and mount and sling swivel hole; wood, two piece top handguard, one piece forearm with a barrel band, and a semi-pistol grip buttstock with metal butt plate with butt trap; sling swivels.
- overall length with a 640 mm (25.2") barrel is 1130 mm (44.5"), and the average weight is 4.1 kgs (8 lbs 15 oz).
- "No 1 MARK 3" and "No 1 MARK 3*" rifles have been sporterized over the years by removing the nosecap, replacing or shortening the barrel, modifying or changing the sights, removing the top hand guards, and reshaping the forearm and buttstock.

Action

- turn-bolt design.

Serial Number

- serial number is marked on right front side of the receiver/frame.
- serial number may have a letter prefix.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Shots

- this rifle is equipped with a standard No 1 MARK 3 detachable box magazine with the spring and follower removed to act as "shell catcher" for fired cartridge cases.

Other Markings

- the year of manufacture is marked under the manufacturer's name on the right side of the butt socket together with the model designation. No markings appear on the firearm to indicate that it is anything but a standard No 1 MARK 3* rifle.

Remarks

- this is a standard Short Magazine Lee Enfield MARK 3* adapted to use a telescopic sight by having a base pinned, screwed or soft soldered to the receiver to accept a telescopic sight. In 1926 the model terminology was changed from Short Magazine Lee Enfield MARK 3* to Rifle No 1 MARK 3* (no new markings were added to the firearm to reflect this change).

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- model designation does not appear on the rifle.
- these rifles were manufactured in 1945.

Manufacturer

- the manufacturer's name does not appear on the rifle.

Serial Number

- serial number located on left side of the receiver.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable box magazine.
Other Markings	- some parts are marked with a LB stamp indicating Long Branch manufacture and inspection.
Remarks	- This is a Canadian experimental development to create a lighter and more handy rifle than the standard issue No 4 MARK 1. In addition to shortening the barrel, most parts are lightened by removing surplus metal and the butt socket is eliminated permitting use of a one piece stock. The No 4 Canadian Lightweight Rifle is fitted with a commercial recoil pad. It is believed that only 50 of these rifles were manufactured for evaluation purposes.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation normally appears on the left side of the receiver/frame in abbreviated form (No 4 MK1).
- manufactured from 1941 to 1946.
- many of these rifles were converted to calibre 7.62MM NATO using commercially available "kits" that usually included a new barrel, bolt head and extractor, magazine (some will be found with the original 303 BRITISH magazine being used as a loading platform) and charger clip guide.

Manufacturer

- the manufacturer may be marked on the left side of the receiver/frame as a "M", "R.O.F.M.", "ROFM", "RM", "R.M.", or "O.F.M.".
- examples that were later converted to calibre 7.62MM NATO were usually not marked with the converters name.

Serial Number

- serial number is marked on left side of the receiver/frame and usually has a one or more letter prefix.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Shots

- detachable box magazine.

Remarks

- this rifle is a version of the No 4 MARK 1 Trials Rifle redesigned for rapid and economical production. This and the No 4 MARK 1* were the standard service rifles of the British armed forces from 1942 until the mid 1950's.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "Lee-Enfield" is not marked on the firearm. - "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle. - "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine. - "Enfield" is for the Enfield rifling system. - "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936". - "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE". - "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield". - "L.E." is the abbreviation for "Lee-Enfield". - "L.E.C." is the abbreviation for "Lee-Enfield Carbine". - "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield". - "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".
Model	- marked on the left side of the receiver/frame in abbreviated form.
Manufacturer	- "LONG BRANCH" is marked on the left side of the receiver/frame.
Serial Number	- located on left side of butt socket. - the serial number of these Long Branch produced rifles consisted of a number, followed by a capital letter L, followed by four numbers. - the first thirteen thousand rifles may have been serialized without the capital letter L as the serial number rationalization was not formalized until production had reached 13,000 examples.
Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable box magazine.
Other Markings	- date of manufacture on left side of receiver/frame.
Remarks	- this rifle is a version of the No 4 MARK 1 Trials Rifle re-designed for rapid and economical production. - most of these rifles were shipped to England in 1942.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "Lee-Enfield" is not marked on the firearm. - "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle. - "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine. - "Enfield" is for the Enfield rifling system. - "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936". - "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE". - "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield". - "L.E." is the abbreviation for "Lee-Enfield". - "L.E.C." is the abbreviation for "Lee-Enfield Carbine". - "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield". - "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".
Model	- the original model designation may still appear on the left side of the receiver/frame in abbreviated form. - these rifles were originally manufactured in 1941 and 1942. - this is a generic entry for Small Arms Limited, Long Branch produced rifles permanently converted to single shot configuration (by an individual or commercial establishment). As such, it may be encountered in any calibre or barrel length combination.
Manufacturer	- "LONG BRANCH" is marked on the left side of the receiver/frame.
Action	- though not originally produced in single shot versions, the No 4 MARK 1 has been widely converted to single-shot configuration for target and "wildcatting," purposes.
Serial Number	- located on left side of butt socket. - the serial number of these Long Branch produced rifles consisted of a number, followed by a capital letter L, followed by four numbers. - the first thirteen thousand rifles may have been serialized without the capital letter L as the serial number rationalization was not formalized until production had reached 13,000 examples.
Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- the original detachable box magazine (if present) is non-functional.
Other Markings	- date of manufacture on left side of receiver.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model designation appears on the left side of the receiver in abbreviated form. - produced in 1941 and 1942.
Manufacturer	- the manufacturer's identifier may appear on the left side of the receiver/frame as a squared capital letter S. (sometimes in a rectangle). - this also may resemble the number five (5).
Serial Number	- located on left side of the receiver/frame. - serial number consists of one or two digit number, capital letter C and a four digit number.
Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable box magazine.
Other Markings	- "U.S. Property" frequently appears on top flat of left side of receiver/frame with the year of manufacture on left side of the receiver/frame. - the U.S. military acceptance mark of a "Flaming Ball" resembling a figure "8" may appear below the serial number.
Remarks	- this rifle is a version of the No 4 MARK 1 Trials Rifle redesigned for rapid and economical production. Rifles manufactured by Stevens in the United States were produced on contract for Great Britain during World War II.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- usually built from condemned rifles but some have been noted as "built up" units that used available parts from stores.
- used for instructional purposes, viewing slots were usually cut in the sides of the receiver/frame, bolt, bolthead, cocking piece, and magazine.
- the original Lee-Enfield No 4 Mark 1 action was skeletonized by the Royal Small Arms Factory, Enfield in England or Small Arms Limited, Long Branch in Canada.
- Note: the original model markings and manufacturer's name or code and year of production are marked on the left side of the receiver/frame.

Action

- turn bolt operated.

Serial Number

- the serial number is marked on the receiver/frame and may be repeated on the bolt and magazine.
- the serial number should have a "SKN" prefix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Shots

- detachable box magazine.

- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- The model designation appears on the left side of the butt socket as a combination of abbreviation, Arabic and Roman numerals. The designation "Trials Model" doesn't appear.

Manufacturer

- the manufacturer's name appears on the left side of the butt socket.

Serial Number

- serial number located on left side of butt socket and has either "A" or "EX" prefix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable box magazine.
Other Markings	- year of manufacture marked directly under manufacturer's name, crown with "GR" cypher on left side of butt socket complete with model designation.
Remarks	- This rifle, a derivative of the Lee Enfield No 1 MARK 6, was manufactured in limited numbers for trial purposes and due to its favourable performance was further redesigned for mass production. The modified rifle was approved for production in November 1939. Surviving No.4 Mk I (Trials Model) rifles were issued during World War II and few survive in their original 1931 configuration.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation appears on the left side of the receiver and the butt socket.

Manufacturer

- "LONG BRANCH" is marked on the left side of the receiver/frame.

Serial Number

- located on left side of butt socket.
- the serial number of these Long Branch produced rifles consisted of a number, followed by a capital letter L, followed by four numbers.
- the first thirteen thousand rifles may have been serialized without the capital letter L as the serial number rationalization was not formalized until production had reached 13,000 examples.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable box magazine.
Other Markings	- "TR" and "T" appear on left side of the butt socket.
Remarks	- This is a No 4 MARK 1 rifle adapted to use a telescopic sight. Adaptation involved mounting telescopic sight bases (pads) to the left side of receiver and attaching a wooden cheekpiece to the comb of the butt stock.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- marked on the flat on the left side of the receiver/frame "No 4 MK I *".
- the distinguishing feature of the No 4 MK 1* is a small slot milled in the right bolt guide way near the front, to allow the bolt head to be rotated up for the removable of the bolt.

Manufacturer

- the manufacturer's name appears on the right side of the butt socket as "RFI".
- RFI is used as a manufacturer on rifles that have had all the original manufacturer's markings removed during a "Factory Thorough Repair" and have been remarked with "FR" or "FTR" and the year of the repair.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- marked on the right side of the receiver ring.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Remarks

- this is a version of the No 4 MK 1 rifle with a few modifications made for a more rapid and economical production.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "No 4 MK1*" is marked on the left side of the receiver/frame. - Note: research literature indicates that a number of rifles with the receiver/frames marked as No 4 MK 1* were "incorrectly" marked even though they were produced at ROF Maltby; the No 4 MK 1* model series was only produced by Small Arms Limited, Long Branch in Canada and Stevens-Savage Arms in the USA; no explanation for this supposed error has been determined. - despite the model marking of No 4 MK 1*, this rifle as produced by FOF Maltby will exhibit all of the usual features of the No 4 MK 1 model series, most noticeably, that the bolt head release catch is located behind the charger guide.
Manufacturer	- the manufacturer will be marked on the left side of the butt socket of the receiver/frame as, "M", "R.O.F.M.", "ROFM", "RM", "R.M.", or "O.F.M." as well as the date of manufacture.
Action	- turn bolt operated.
Serial Number	- serial number is usually marked on the left side of the butt socket of the receiver/frame. - serial number may consist of numbers only, or may have a single or double letter prefix.
Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable box magazine.
Remarks	- this rifle is a version of the No 4 MARK 1 Trials Rifle redesigned for rapid and economical production. This and the No 4 MARK 1* were the standard service rifles of the British armed forces from 1942 until the mid 1950's.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- "No 4 MARK 1*" and "C No 4 MARK 1*" were manufactured from 1942 to approximately 1956.
- "No 4 MK I*" is marked on the left side of the receiver/frame.
- features include: fixed blade front sight with ear protectors and a flip over, two aperture or an adjustable rear sight; round, rifled barrel with bayonet lugs; flat sided, open top receiver/frame with an integral butt socket; turn bolt action; No 4 bolt body; safety lever is mounted on the left side of the receiver/frame; detachable box magazine case release is mounted inside the trigger guard; wood upper hand guard; forearm with two barrel bands and a hand guard retaining ring, and a semi-pistol grip buttstock with a metal butt plate; three sling attachments; parkerized finish.
- overall length with a 640 mm (25.2") barrel is 1128 mm (44.4"), and the average weight is 3.9 kgs (8 lbs 10 oz).
- many of theses rifles were subsequently converted to calibre 7.62MM NATO. This conversion consisted of replacing the barrel, changing the extractor and sometimes added an insert in the charger guide. The barrels were supplied with no bayonet lug. As they left the factory these rifles kept the original magazine designed for calibre 303 BRITISH to be used as a loading platform for a single cartridge, accessory magazines were commercially available with a ten shot capacity.

Manufacturer

- "LONG BRANCH" over the year of manufacture is marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- turn bolt design.

Serial Number

- serial number is marked on the left side of the butt socket of the receiver/frame.
- Long Branch serial number rationalization:
- the first thirteen thousand rifles may have been serialized without the capital letter "L" as the serial number rationalization was not formalized until production had reached 13,000 examples.
- serial number rationalization starting in 1942 consisted of a number, the capital letter "L" and four numbers.
- serial number observed consisted of one or two numbers, the capital letter "L", and four numbers, examples: "0L0001" and "95L8888".
- when these rifles were converted to calibre 7.62MM NATO or when they were accepted into service in New Zealand they were often reserialized (without the L), the original serial number may or may not be present.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Shots

- detachable box magazine.

Remarks

- This is a version of the No 4 MARK 1 rifle redesigned for more rapid and economical production. This rifle was the standard service rifle of the Canadian forces from 1942 until the mid 1950's.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "Lee-Enfield" is not marked on the firearm. - "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle. - "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine. - "Enfield" is for the Enfield rifling system. - "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936". - "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE". - "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield". - "L.E." is the abbreviation for "Lee-Enfield". - "L.E.C." is the abbreviation for "Lee-Enfield Carbine". - "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield". - "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".
Model	- the original model designation may still appear on the left side of the receiver/frame in abbreviated form. - this is a generic entry for Small Arms Limited, Long Branch produced rifles permanently converted to single shot configuration (by an individual or commercial establishment). As such, it may be encountered in any calibre or barrel length combination.
Manufacturer	- "LONG BRANCH" is marked on the left side of the receiver/frame.
Action	- though not originally produced in single shot versions, the No 4 MARK 1 has been widely converted to single-shot configuration for target and "wildcatting," purposes.
Serial Number	- serial number located on left side of butt socket. - the second or third character will be the letter "L" and denotes "Long Branch".
Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- the original detachable box magazine (if present) is non-functional.
Other Markings	- date of manufacture on left side of receiver.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation appears on the flat on the left side of the receiver in abbreviated form.
- manufactured from 1942 to 1944.
- version of the No 4 MARK 1 rifle redesigned for more rapid and economical production. These rifles were manufactured in the United States on contract for Great Britain during World War 2.

Manufacturer

- the manufacturer's identifier appears on the left side of the receiver/frame as a squared capital letter S (sometimes in a rectangle).

Serial Number

- serial number is market on left side of the butt socket of the receiver/frame.
- second or third character of serial number will be the letter "C" and may range from 16C0000 to 99C9999, numbers above one million have five characters after the "C" (e.g.0C04512).
- the highest number will be 12C50000.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Shots

- detachable box magazine.

Other Markings

- "U.S. Property" frequently appears on top flat of left side of receiver, year of manufacture on left side of receiver.

- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation appears on the left side of the receiver/frame and the butt socket.

Manufacturer

- "LONG BRANCH" is marked on the left side of the receiver/frame.

Serial Number

- located on left side of butt socket.
- the serial number of these Long Branch produced rifles consisted of a number, followed by a capital letter L, followed by four numbers.
- the first thirteen thousand rifles may have been serialized without the capital letter L as the serial number rationalization was not formalized until production had reached 13,000 examples.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable box magazine.
Other Markings	- "TR" and "T" appear on left side of butt socket.
Remarks	- this firearm is a No 4 MARK 1* rifle adapted to use a telescopic sight. Adaptation involved mounting telescopic sight bases (pads) to the left side of the receiver and attaching a wooden cheekpiece to the comb of the butt stock.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- "No 4 MK 1/2" is marked on the left side of the receiver/frame.
- introduced in 1949.
- this is a conversion of a No 4 MARK 1 rifles to No 4 MARK 2 configuration.
- prior to the adoption of the 7.62MM NATO calibre in 1954, some of these rifles were converted from 303 BRITISH calibre to fire the 7.62MM NATO calibre ammunition.

Manufacturer

- The manufacturer's name appears on the right side of the butt socket as "RFI".

- RFI is used as a manufacturer on rifles that have had all the original manufacturer's markings removed during a "Factory Thorough Repair" and have been remarked with "FR" or "FTR" and the year of the repair.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- "No 4 MK 1/2 (F) FTR" is marked on the left side of the receiver/frame.
- introduced in 1949.
- "FTR" is the abbreviation for "Factory Through Repair".
- this is a conversion of a No 4 MARK 1 rifles to No 4 MARK 2 configuration.
- prior to the adoption of the 7.62MM NATO calibre in 1954, some of these rifles were converted from 303 BRITISH calibre to fire the 7.62MM NATO calibre ammunition.

Manufacturer

- the manufacturer's name is not marked on the firearm.
- the abbreviated model, and the letter "F" in brackets followed by the letters "FTR" and a two digit year code is marked on the left side of the receiver/frame, eg. "No 4 Mk 1/2 (F) FRT" over "/52".
- "F" in brackets is the manufacture's code for Royal Ordnance Factory Fazakerley (ROF(F)).
- "FRT" is the abbreviation for Factory Thorough Repair.
- ROF(F) performed these conversions from 1949 to 1956.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the left side of the receiver/frame and may also be repeated on the left side of butt socket
- serial number may have a letter or letters prefix and suffix, eg. "DB23235A".
- NOTE:
- in many instances the date of conversion of the firearm is marked on the left side of the receiver/frame immediately in front of the serial number, eg: "/52 DB23235A".
- "/52" or "1/52" may be marked in front of the serial number, as the case may be depending on the month and year of the arsenal reworking - in these examples the date of conversion is dated 1952 and January 1952 respectively; this series of numbers is not part of the serial number.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Shots

- detachable box magazine.

Other Markings

- left side of the receiver marked FTR (Factory Thorough Repair) and last two digits of the date.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- This rifle, in its original 303 British calibre, is a conversion of existing No 4 MARK 1 rifles to No 4 MARK 2 configuration and will be marked No 4 Mk 1/2.
- Conversion from MARK 1 to MARK 2 configuration involved reworking the mechanism to reposition the trigger from the trigger guard to the receiver, fitting a new forearm and refinishing the firearm.
- Subsequent to the (1954) adoption of 7.62MM NATO calibre some of these rifles were converted from 303 BRITISH calibre to fire 7.62MM NATO calibre ammunition.
- 7.62MM NATO calibre Conversions:
- these are original military rifles converted from 303 British calibre to 7.62MM Nato calibre through the use of a "Conversion Kit".
- One such kit was patented by Sterling Armament in 1959, with another one patented by RSAF Enfield in the early 1960's; kits to accomplish this conversion consisted of: new 7.62MM barrel, new bolthead, extractor, charger guide adaptor, ejector and magazine.
- The majority of these conversion kits were produced by Sterling Armament and will be so marked.
- Rifles converted by Sterling are marked with the Sterling logo which is "STERLING" within a rectangle. This marking will be found on the left rear side of the receiver and on the magazine.
- Rifles converted at Government Arsenals or Armed Forces Workshops utilizing the "kit" will not be marked with the Sterling name on the receiver.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation appears on the left side of the receiver in abbreviated form; i.e., No 4 MK 1/2.
- this rifle in its original 303 British calibre configuration is a conversion of existing No 4 MARK 1 rifles to No 4 MARK 2 configuration and will be marked No 4 Mk 1/2.
- subsequent to the (1954) adoption of 7.62MM NATO calibre some of these rifles were converted from 303 BRITISH calibre to fire 7.62MM NATO calibre ammunition.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer
- the manufacturer's name may appear as the letter E in brackets on the left side of the receiver.
- Enfield performed these conversions from 1956 to 1960.

Type
- magazine, repeating rifle.

Action
- manually operated turn-bolt.

Serial Number
- the serial number may be located on the left side of the butt socket and usually has a letter prefix.

Calibre
- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Shots
- detachable box magazine.

Other Markings
- left side of the receiver marked FTR (Factory Thorough Repair) and last two digits of the date.

Remarks
- this rifle, in its original 303 British calibre, is a conversion of existing No 4 MARK 1 rifles to No 4 MARK 2 configuration and will be marked No 4 Mk 1/2.
- conversion from MARK 1 to MARK 2 configuration involved reworking the mechanism to reposition the trigger from the trigger guard to the receiver, fitting a new forearm and refinishing the firearm.
- subsequent to the (1954) adoption of 7.62MM NATO calibre some of these rifles were converted from 303 BRITISH calibre to fire 7.62MM NATO calibre ammunition.
- 7.62MM NATO calibre Conversions:
- these are original military rifles converted from 303 British calibre to 7.62MM Nato calibre through the use of a "Conversion Kit".
- one such kit was patented by Sterling Armament in 1959, with another one patented by RSAF Enfield in the early 1960's; kits to accomplish this conversion consisted of: new 7.62MM barrel, new bolthead, extractor, charger guide adaptor, ejector and magazine.
- the majority of these conversion kits were produced by Sterling Armament and will be so marked.
- rifles converted by Sterling are marked with the Sterling logo which is "STERLING" within a rectangle. This marking will be found on the left rear side of the receiver and on the magazine.
- rifles converted at Government Arsenals or Armed Forces Workshops utilizing the "kit" will not be marked with the Sterling name on the receiver.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- The model designation appears on the left side of the receiver (either on the "flat" or on the "butt socket" in abbreviated form. These rifles were manufactured (converted) circa 1948-1955.

Manufacturer

- the manufacturer's designation appears as the letter "F" in brackets on the left side of the receiver/frame.

Serial Number

- serial number appears on left side of receiver (either on the "flat" or on the "butt socket" and usually has a letter prefix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable box magazine.
Other Markings	- Left side of the receiver marked FTR (Factory Thorough Repair), original markings left intact on left side of receiver but original manufacturer's name struck out and new markings applied.
Remarks	- This is a conversion of existing No 4 MARK 1 rifles to No 4 MARK 2 configuration. Conversion involved reworking the action to position the trigger on the receiver, modifying the forearm and refinishing the firearm to new condition.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation appears on the left side of the receiver in abbreviated form.

Manufacturer

- the manufacturer's name appears on the right side of the butt socket as "RFI".
- RFI is used as a manufacturer on rifles that have had all the original manufacturer's markings removed during a "Factory Thorough Repair" and have been remarked with "FR" or "FTR" and the year of the repair.

Serial Number

- serial number usually appears on front right side of receiver.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable box magazine.
Other Markings	- receiver marked FTR (Factory Thorough Repair) or FR (Factory Repair), original markings left intact on left side of receiver but original manufacturer's name struck out and new markings applied.
Remarks	- this is a conversion of existing No 4 MARK 1* rifles to No 4 MARK 2 configuration. Conversion involved reworking the action to pisition the trigger on the receiver, modifying the forearm and refinishing the firearm to new condition.

- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- "No 4. Mk.2" and "60/P.O.F/C36914" was observed marked on the left side of the receiver/frame.

Manufacturer

- "P.O.F." is marked on the left side receiver/frame.
- "P.O.F." stands for "Pakistan Ordnance Factories".
- "60/P.O.F./C36914" was observed marked on the left side of the receiver/frame.
- "60" indicates the year of refurbishment of 1960 and "C36914" is the serial number.
- "P.O.F." had all the original manufacturer's markings removed during a "Factory Thorough Repair" and would normally be remarked with "FR" or "FTR" and the year of the repair.
- "P.O.F." is an organisation operating under the Pakistan Ministry of Defence.
- "P.O.F." comprises of fourteen ordnance factories and three subsidiaries.
- "P.O.F." is manufacturing under license products from Heckler & Koch and is having other joint venture with China and Czechoslovakia.
- "P.O.F." headquarter is located in Wah Cantt, Pakistan.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number appears on left side of receiver and may incorporate an alpha prefix.
Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable box magazine.
Remarks	- this is an improved version of the No 4 MARK 1 rifle having a refined trigger mechanism mounted on the receiver in lieu of on the trigger guard assembly.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation appears on the left side of the receiver/frame.
- rifles were manufactured from 1949 to 1956.

Manufacturer

- the manufacturer's name appears on the left side of the receiver as the code letters UF which indicates Royal Ordnance Factory, Fazakerley.

Serial Number

- serial number appears on left side of receiver/frame.
- has either a "PF" or "A" prefix.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Shots

- detachable box magazine.

Remarks

- this is an improved version of the No 4 MARK 1 rifle having a refined trigger mechanism mounted on the receiver/frame in lieu of on the trigger guard assembly. These rifles are newly manufactured arms, not conversions of older rifles.
- rifles that were converted to this configuration from the "N0 4 MARK 1" were re-designated as "No 4 MARK1/2".
- rifles that were converted to this configuration from the "N0 4 MARK 1*" were re-designated as "No 4 MARK1/3".

129958 - 1	303 BRITISH	10	640	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Lee-Enfield" is not marked on the firearm; the make designation is derived from the characteristics of the Lee-Enfield action.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- no model name is marked on this firearm.
- this entry is designed to encompass all of the SMLE rifles in both Marks, i.e., Mark 4 and Mark 4*, that were refurbished by the Indonesian government after World War II.
- these Lee-Enfield rifles had all of the original markings removed; the new Indonesian markings were subsequently placed on the right side of the butt socket; these markings included the calibre marking of "Cal.7.7", over the Indonesian State cypher of the five pointed star, over the date of the rework (e.g. 1956).
- these rifles were brought into Indonesian service circa mid-1950's.
- one adaptation that may be present on this model series is a modified nosecap that has an extended bayonet mount on the underside suitable for attaching a Japanese Arisaka rifle bayonet; this was done presumably because of the abundance of Japanese bayonets left in the region after WW II.

Manufacturer

- the original British arsenal markings were removed during the Indonesian refurbishing of these rifles and were subsequently replaced by the Indonesian marking of a five pointed star below which is the year date of the conversion/rework.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- turn bolt design.
Serial Number	- known example had a six digit number with a "number" prefix marked on the top of the receiver ring. - serial numbering system used for these rifles consists of the number prefix "0" separated from the remaining six digit number by a dash, i.e., 0-xxxxxx. - an observed serial number consisted of a "2" prefix, a dash (-) and six numbers.
Calibre	- "CAL. 7.7" is usually marked on the right side of the butt socket. - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable box magazine.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation appears on the left side of the receiver/frame in abbreviated form as "No. 5 MK 1".
- these firearms were manufactured from 1944 to 1947.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the manufacturer's identifier appears as the code M47C on the left side of the receiver/frame.
Serial Number	- serial number located on left side of the receiver/frame and usually has a one or two letter prefix.
Barrel	- barrel has a conical flash eliminator permanently attached, this flash eliminator is 58 mm long giving an overall barrel length of 521 mm.
Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable box magazine.
Other Markings	- month and year of manufacture on left side of receiver under the model designation.
Remarks	- This is a lightened, shortened version of the No 4 MARK 1 Lee Enfield. It features a half length sporting rifle type forearm, rubber recoil pad and conical flash eliminator.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation appears on the left side of the receiver in abbvreviated form.

Manufacturer

- the manufacturer's name appears on the right side of the butt socket as "RFI".
- RFI is used as a manufacturer on rifles that have had all the original manufacturer's markings removed during a "Factory Thorough Repair" and have been remarked with "FR" or "FTR" and the year of the repair.

Serial Number

- serial number located on left side of the receiver may incorporate a letter prefix.

Barrel

- barrel has a conical flash eliminator permanently attached, this flash eliminator is not included in the barrel length.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable box magazine.
Other Markings	- month and year of manufacture on right side of receiver.
Remarks	- this is a lightened, shortened version of the No 4 MARK 1 Lee Enfield. It features a half length sporting rifle type forearm, rubber recoil pad and conical flash eliminator.

- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation No 6 MARK 1 (Aust) is not marked on the rifle. These rifles were manufactured in 1944 and 1945.

Manufacturer

- the manufacturer's name is marked on the left side of the butt socket.

Serial Number

- serial numbers are marked on the right front end of the receiver/frame.

Barrel

- overall length of barrel including flash hider is 521mm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable box magazine.
Other Markings	- the right side of the butt socket is marked MA Lithgow SMLE III* 1944 or 1945.
Remarks	- this is an Australian experimental development to create a lighter and more handy rifle than the standard No 1 MARK 3*. In addition to shortening the barrel and installing a flash eliminator, most parts are lightened by removing surplus metal. This rifle has a half stocked forearm much like that of the British manufactured No 5 MARK 1 Jungle Carbine and an open rear sight similar to that of the No 1 MARK 3* rifle. These rifles utilize standard Lithgow manufactured SMLE No 1 MARK 3* receiver/frames.

- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation is on left side of the receiver/frame in abbreviated form No 8 MK1.
- features include: fixed blade front sight with ear protectors and an adjustable rear sight; round, rifled barrel; flat sided, open top receiver/frame; bolt action; special 3.6 inch shorten bolt body which is not interchangeable with either No. 4 or No. 7 bolt bodies; special rimfire bolt head with 2 piece firing pin; safety lever is mounted on the left side of the receiver/frame; single shot fix magazine platform; fully adjustable trigger; wood upper hand guard; forearm with one barrel band and a semi-pistol grip buttstock with a rubber butt pad; three sling attachments; parkerized finish.
- NOTE: the special sheet metal plate fitted into magazine recess of trigger guard

Manufacturer

- Enfield markings may appear on the receiver, these markings were applied after examples went through FTR (Factory Thorough Repair).
- the manufacturer's name B.S.A SHIRLEY appears in coded form (M47C) on the left side of the receiver.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- marked on left side of the receiver. - the prefix "DA" was used on rifles manufactured for New Zealand.
Remarks	- this is a single shot rimfire .22 calibre training rifle built on a No 4 MARK 1 receiver. It features a heavy barrel, pistol grip stock, 2/3 length forearm and adjustable sights.

Notes

Make

- "Lee-Enfield" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Enfield" is for the Enfield rifling system.
- "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936".
- "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE".
- "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield".
- "L.E." is the abbreviation for "Lee-Enfield".
- "L.E.C." is the abbreviation for "Lee-Enfield Carbine".
- "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield".
- "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".

Model

- the model designation appears on the left side of the receiver.
- manufactured (converted) from 1956 to 1960.

Manufacturer

- the manufacturer's name appears as the abbreviation "P-H" on the left side of the receiver/frame.

Serial Number

- located on left side of the receiver. - usually has a letter "A" prefix.

Other Markings

- crown of muzzle stamped "Parkerified A.G.P.".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- This is a conversion of existing No 4 MARK 1 and No 4 MARK 1*, No 4 MARK 2 and No 4 MARK 1/2 rifles to rimfire .22 calibre by lining the .303 calibre barrel with a .22 calibre sleeve and modifying the bolt head and extractor.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "Lee-Enfield" is not marked on the firearm. - "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle. - "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine. - "Enfield" is for the Enfield rifling system. - "Enfield rifling" was introduced in 1895 and was originally five (5) groove concentric rifling with a left hand twist, 1 turn in 10", groove depth of .005", and land width of .0936". - "Lee-Enfield" carbines and rifles have been observed with following markings on the butt socket: "C.L.L.E.", "L.E.", "L.E.C", "SHT L.E." and "SMLE". - "C.L.L.E." is the abbreviation for "Charger Loading Lee-Enfield". - "L.E." is the abbreviation for "Lee-Enfield". - "L.E.C." is the abbreviation for "Lee-Enfield Carbine". - "SHT L.E." is the abbreviation for "Short Magazine Lee-Enfield". - "SMLE" is the abbreviation for "Short, Magazine Lee-Enfield".
Model	- "SPORTER" is not marked on the firearm. - as the Lee-Enfield family of firearms were produced in such great numbers and they were made available at a reasonable cost, many were converted from military configuration to "Sporting" rifles. Usually this consisted of removing the top handguard(s) and re-configuring the forend by reducing its length. Aftermarket sights or telescopic sighting systems were also frequently added. Although still easily recognized as a Lee-Enfield it is some times impossible to determine the original manufacturer and/or model. - many of these conversions were done on a commercial scale while others were done by individuals. - this is a generic entry for those "Lee-Enfield" Models from the Mark I's to the No 9's that have been modified/customized/sporterized to such a degree that the original model designation is no longer identifiable. - features usually include: original round barrel or a modified/shortened barrel; five or ten shot detachable box magazine; modified forend and butt stock or upgraded stock; original or upgraded sights; original or upgraded finish.
Action	- turn-bolt design.
Serial Number	- the original serial number may or may not be present.
Barrel	- may be found in any barrel length.
Calibre	- 303 BRITISH - METFORD rifling system: - Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888. - ENFIELD rifling system: - Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895. - Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves. - Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage). - Note: some barrels were manufactured with right hand rifling (Long Branch).
Shots	- detachable box magazine.

Notes

Make

- "Lee-Metford" is not marked on the firearm.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Metford" is for William Ellis Metford the designer of the Metford rifling system:
- "Metford rifling" was introduced in 1888 and is seven (7) groove polygonal rifling with a left hand twist, 1 turn in 10", groove depth .004", and land width .023".

Model

- Model designation in the form of a Roman numeral I is located on the right side of the butt socket (beneath year of manufacture). These rifles were manufactured from 1889 to 1891.

Manufacturer

- the manufacturer's name appears on the right side of the butt socket.

Serial Number

- serial number is located on the right front side of the receiver, usually has a letter suffix.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Shots

- uses a detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings	- year of manufacture marked directly under manufacturer's name, crown and "VR" cypher on right side of butt socket together with the model designation.
Remarks	- This is a bolt action repeating rifle utilising a detachable eight round box magazine, Metford patent segmental rifling and a thumb safety on the left side of the receiver. This model is historically significant as it is the first small bore repeating rifle to adopted by the British armed forces.

Notes

Make

- "Lee-Metford" is not marked on the firearm.
- "C.L.L.M." is marked on the left side of the butt socket.
- "C.L.L.M." is the abbreviation for "Charger Loading Lee Metford".
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Metford" is for William Ellis Metford the designer of the Metford rifling system:
- "Metford rifling" was introduced in 1888 and is seven (7) groove polygonal rifling with a left hand twist, 1 turn in 10", groove depth .004", and land width .023".

Model

- "C.L.L.M." and the Roman numeral two (II) are marked on the left side of the butt socket.
- "C.L.L.M." is the abbreviation for "Charger Loading Lee Metford".
- "MARK 2 Charger Loading Lee-Metford" rifles were manufactured (converted) in 1910.

Manufacturer

- "ENFIELD" and "1910" was observed marked on the left side of the butt socket.

Serial Number

- serial number is located on the right front end of the receiver/frame.
- serial number usually has a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- 303 BRITISH
- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Other Markings

- Right side of the butt socket has name of original manufacturer, date of original manufacture. Left side of butt socket has new model designation (C.C.L.M. & Roman numeral two), name of converting arsenal (Enfield) and date of conversion.

Remarks

- this is a conversion of Lee-Metford MARK 2 rifles to permit loading with five round charger clips. Conversion involved brazing a charger loading bridge to the top of the receiver. Work was carried out at Enfield and new markings were applied to the left side of the butt socket while the original markings on the right side of the butt socket were left intact.

Notes

Make

- "LEE-SPEED" over "PATENTS" was observed marked on the right side of the butt socket.
- "Lee" is for "James Paris Lee", the designer of the Lee magazine rifle.
- "Lee magazine rifle's" main features are rear locking bolt and detachable box magazine.
- "Speed" is for "Joseph J. Speed", the senior manager at the Royal Small Arms Factory at Enfield Lock between 1891 and 1909.
- "LEE-SPEED" was manufactured by Birmingham Small Arms & Metal Company from 1892 to 1897 and by Birmingham Small Arms Company from 1897 to circa 1910.
- "Lee-Speed" was a commercial version of the British military Lee-Metford or Lee-Enfield (depending on the type of rifling) models MARK 1* or MARK 2 Carbine or Rifle.
- "Lee-Speed" Military Pattern commercial carbines and rifles are void of any British government ownership markings and usually have a better grade of wood and higher degree of finish than their government issue counterparts.
- "Lee-Speed" was also available in a sporting model with flat rib along the top of the barrel.
- "Lee-Speed Patents" were manufactured by the Birmingham Small Arms & Metal Company (BSA&M Co) circa 1894/1895 and several thousand were supplied to the British South Africa Company in Lee-Metford Military and Sporting Patterns.
- "Lee-Speed" should not to be confused with the later patterns of the Lee-Enfield No 1 (Short Magazine Lee-Enfield / Sht L.E.).

Model

- "LEE-SPEED" over "PATENTS" over the manufactuer's abbreviation are usually marked on the right side of the butt socket.
- "LEE-SPEED" was manufactured by Birmingham Small Arms & Metal Company from 1892 to 1897 and by Birmingham Small Arms Company from 1897 to circa 1910.
- "Lee-Speed" was a commercial version of the British military Lee-Metford or Lee-Enfield (depending on the type of rifling) models MARK 1* or MARK 2 Carbine or Rifle.
- "Lee-Speed" Military Pattern commercial carbines and rifles are void of any British government ownership markings and usually have a better grade of wood and higher degree of finish than their government issue counterparts.
- "Lee-Speed" was also available in a sporting model with flat rib along the top of the barrel.
- "Lee-Speed Patents" were manufactured by the Birmingham Small Arms & Metal Company (BSA&M Co) circa 1894/1895 and several thousand were supplied to the British South Africa Company in Lee-Metford Military and Sporting Patterns.
- "Lee-Speed" should not to be confused with the later patterns of the Lee-Enfield No 1 (Short Magazine Lee-Enfield / Sht L.E.).

Manufacturer

- "B.S.A. Co" or "B.S.A.& M. Co" is usually marked on the right side of the butt socket.
- "B.S.A. Co" is the abbreviation for the Birmingham Small Arms Company.
- "B.S.A.& M. Co" is the abbreviation for the Birmingham Small Arms & Metal Company.

Action

- turn-bolt design.

Serial Number

- serial number is located on the front right of the receiver/frame.

Barrel

- the rifling may be either Metford or Enfield pattern.
- considerable variation in barrel lengths are possible.

Calibre

- METFORD rifling system:
- Metford rifling, left hand, polygonal, 7 grooves, groove depth .004", land width .023", 1 turn in 10", introduced in 1888.
- ENFIELD rifling system:
- Enfield rifling, left hand, concentric, 5 grooves, groove depth .005", land width .0936", 1 turn in 10", introduced in 1895.
- Note: some barrels were manufactured with 2, 3, 4, 5 and 6 grooves.
- Note: some barrels were manufactured with 1 turn in 10.5" (Stevens/Savage).
- Note: some barrels were manufactured with right hand rifling (Long Branch).

Shots

- detachable box magazine.

Other Markings

- although manufactured by B.S.A. various retailers names and addresses may appear on the barrel of these rifles.
- the B.S.A. logo of three stacked rifles may appear on butt socket or knox form of barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- this is a sporting rifle built on a commercially manufactured Lee Enfield action. There is considerable variety in style and features regarding quality of wood, checkering, engraving, sights, barrel contour, tang safety etc. Rifles chambered for the 8 X 50R AUSTRIAN cartridge were manufactured for sale in India where use of the 303 BRITISH cartridge was restricted to police and the military. Many of these rifles have a retailers name and address on the barrel.

25836 - 1	44 PERCUSSION	6	191	Antique CC 84(1) "antique firearm"	Non-Commercial Customization	

Notes

Make

- the barrel will usually be marked "Leech & Rigdon CSA" or a variation thereof.

Model

- about 1000 of these revolvers were produced by Leech & Rigdon in 1863-1864.
- another 500 were produced by Rigdon & Ansley circa 1864.
- this model resembles the Colt produced model 1851 Navy.
- features include: fixed sights; blued round to octagonal Dragoon type barrel; case-hardened open top receiver/frame with blued round non-fluted cylinder; exposed spur hammer; single action trigger mechanism; brass trigger-guard and grip frame; one piece walnut grips.

Manufacturer

- "LEECH & RIGDON CSA" is usually marked on top of the barrel lug.
- models serial numbered under 1501 were manufactured by Leech & Rigdon.
- models serial numbered above 1501 were manufactured by Rigdon & Ansley.

Action

- single-action black powder percussion revolver.

Serial Number

- serial numbers started at 1 and continued on upwards.
- will be marked on several components.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- some samples have been noted marked "Memphis Novelty Works", may also be marked with an inspection or assembly mark consisting of a capital letter (e.g. J or N) or a cross made of four square dots. Higher serial numbered samples may be marked with a C.S.A. inspector marking of "W.H" within a diamond or "W.H." within a parallelogram.
- the stamping of "C.S." (Confederate States [of America]) on the pistol constituted government acceptance and a property mark.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "Lefaucheux" stands for the last name of the inventor of the pin-fire metallic cartridge, "Casimir Lefaucheux". - "Casimir Lefaucheux" was a French gunmaker who designed and built some of the first firearms to use pin-fire ammunition. - "Casimir Lefaucheux" was born in 1802 and died 1852. - "Lefaucheux" is also associated with "Eugène Gabriel Lefaucheux", son of "Casimir Lefaucheux". - "Eugène Gabriel Lefaucheux" was born in 1832 and died in 1892. - "Eugène Gabriel Lefaucheux" was the inventor and manufacturer of open top frame, double action revolver that used "Casimir Lefaucheux" pin-fire metallic cartridge. - "L.F." or "LF" within a circle or shield, "Lefaucheux", "E. Lefaucheux", "E. Lefaucheux Bte a Paris", "E. Lefaucheux Inv Brevete", "Inv. Lefaucheux Brte S.G.D.G. Paris", "IVon E. Lefaucheux Brte S.D.G.D. a Paris" or a variation thereof will be marked on barrel and/or receiver/frame. "Eugène Lefaucheux" logo, Lefaucheux initials "LF" under a tip-down pistol open at the breech is usually in front of the serial number, but not part of it.
Model	- model designation is not marked on the firearm. - this was the first successful model Lefaucheux cylinder pin-fire revolver. - features include: fixed sight; round rifled barrel; loading gate and ejector rod located on the right side of the receiver/frame; engraved open top receiver/frame; spur hammer; trigger guard with or without finger rest; single or double action trigger mechanism; lanyard ring located at the bottom of the grip. - long barrel revolvers feature a folding leaf style rear sight and a detachable skeletonized buttstock. - numbers of these revolvers were converted to centrefire cartridges in the later part of the 1800's, as the pinfire system fell out of favour.
Manufacturer	- "Lefaucheux" stands for the last name of the inventor of the pin-fire metallic cartridge, "Casimir Lefaucheux". - "Casimir Lefaucheux" was a French gunmaker who designed and built some of the first firearms to use pin-fire ammunition. - "Casimir Lefaucheux" was born in 1802 and died 1852. - "Casimir Lefaucheux" business was located in Paris, France from 1827 to 1852. - "Lefaucheux" is also associated with "Eugène Gabriel Lefaucheux", son of "Casimir Lefaucheux". - "Eugène Gabriel Lefaucheux" was born in 1832 and died in 1892. - "Eugène Gabriel Lefaucheux" was the inventor and manufacturer of open top frame, double action revolver that used "Casimir Lefaucheux" pin-fire metallic cartridge. - "Eugène Lefaucheux" business was located in Paris, France from 1850 to 1871. - "Eugène Lefaucheux" logo, Lefaucheux initials "LF" under a tip-down pistol open at the breech is usually in front of the serial number, but not part of it. - "Eugène Lefaucheux" also owned "Lefaucheux & Company". - "Lefaucheux & Company" was located in Liege, Belgium from 1865 to 1873.
Action	- single-action revolver.
Serial Number	- "Eugène Lefaucheux" logo, Lefaucheux initials "LF" under a tip-down pistol open at the breech is usually in front of the serial number, but not part of it.
Calibre	- the "12MM PIN-FIRE" was later referred to as the calibre "11MM PIN-FIRE". - the rear of the chamber measured 12MM and the front of the chamber measured 10.7MM.
Other Markings	- "IVON E. LEFAUCHEUX BVTE SGDG A PARIS" was one of the markings found on the barrel of early production model 1854 revolvers. - "INV. E. LEFAUCHEUX BREVETTE" and "E LEFAUCHEUX 37 RUE VIVIENNE, PARIS" are other markings used on the Lefaucheux model 1854 revolver manufactured in Liege Belgium.

195125 - 1	9MM FRENCH REVOLVER CF	6	150	Antique AFR, Section 1, para. 7	Manufacturer Specifications and Commercial Customization	

Notes

Make

- The make is not marked on the firearm.
- "Lefaucheux" stands for the last name of the inventor of the pin-fire metallic cartridge, "Casimir Lefaucheux".
- "Casimir Lefaucheux" was a French gunmaker who designed and built some of the first firearms to use pin-fire ammunition.
- "Casimir Lefaucheux" was born in 1802 and died 1852.
- "Lefaucheux" is also associated with "Eugène Gabriel Lefaucheux", son of "Casimir Lefaucheux".
- "Eugène Gabriel Lefaucheux" was born in 1832 and died in 1892.
- "Eugène Gabriel Lefaucheux" was the inventor and manufacturer of open top frame, double action revolver that used "Casimir Lefaucheux" pin-fire metallic cartridge.
- "L.F." or "LF" within a circle or shield, "Lefaucheux", "E. Lefaucheux", "E. Lefaucheux Bte a Paris", "E. Lefaucheux Inv Brevete", "Inv. Lefaucheux Brte S.G.D.G. Paris", "IVon E. Lefaucheux Brte S.D.G.D. a Paris" or a variation thereof will be marked on the barrel and/or receiver/frame.

Model

- the model is not marked on the firearm.
- this is descriptor of the firearm type.
- the 1870 is an updated version of the 1854 Lefaucheux revolver, adapted to accept the centrefire cartridges that were just coming into use in the late 1800s; gunmakers were able to convert the earlier 1854 pattern to the 1870 pattern merely by changing the hammer and cylinder.
- in 1870, the French military adopted the new centrefire system as a replacement for their earlier 1854-pattern pinfires.
- features include: typical 1854 Lefaucheux-pattern appearance and construction, with an open-topped frame that is screwed together through a lug at the bottom rear of the barrel; octagonal barrel; open fixed sights; double-action trigger mechanism with centre-fire hammer nose; right-side loading gate; checkered walnut grips; and (usually) a butt-mounted lanyard ring.

Action

- double-action revolver.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number - may or may not be serial-numbered.

Notes

Make

- "MAISON LEFAUCHEUX" is marked on the top of the receiver/frame.

Model

- The model designation is not marked on the firearm.
- "Constabulary" refers to a variation of the British Bulldog revolvers.

- "Constabulary" is distinguished from the Bulldog revolvers by a lanyard ring and metal endcap on the bottom of the grip frame.
- Features include: spurred hammer; loading gate on the right side of the firearm; fluted cylinder; swivel-type ejector rod is housed within the cylinder axis pin and attached to the right front side of the receiver/frame; rounded trigger guard; checkered grips; lanyard loop.

Manufacturer

- "HENRY RIEGER Succr" over "37 RUE VIVIENNE" over "A PARIS" was marked on the top of the receiver/frame.
- Henry Rieger was a gunmaker in Paris circa 1860 to 1900.
- Henry Rieger was the successor to Lefaucheux.

Serial Number

- The serial number is marked on the left side of the receiver/frame.
- Serial number observed consisted of four digits.

Calibre

- The calibre designation is not marked on the firearm.

Canadian Law Comments

- Some examples of this model, when manufactured prior to 1898 may be considered Antique in Canada.

Other Markings

- Belgian proof mark of ELG over a star inside an oval may be marked on the face of the cylinder.

Notes

Make

- "Lefaucheux" is the last name of the inventor of the pin-fire metallic cartridge, "Casimir Lefaucheux".
- "Casimir Lefaucheux" was a French gunmaker who designed and built some of the first firearms to use pin-fire ammunition.
- "Casimir Lefaucheux" was born in 1802 and died 1852.
- "Lefaucheux" is also associated with "Eugène Gabriel Lefaucheux", son of "Casimir Lefaucheux".
- "Eugène Gabriel Lefaucheux" was born in 1832 and died in 1892.
- "Eugène Gabriel Lefaucheux" was the inventor and manufacturer of open top frame, double action revolver that used "Casimir Lefaucheux" pin-fire metallic cartridge.
- "L.F." or "LF" within a circle or shield, "Lefaucheux", "E. Lefaucheux", "E. Lefaucheux Bte a Paris", "E. Lefaucheux Inv Brevete", "Inv. Lefaucheux Brte S.G.D.G. Paris", "IVon E. Lefaucheux Brte S.D.G.D. a Paris" or a variation thereof will be marked on the barrel and/or receiver/frame.
- "Eugène Lefaucheux" logo, Lefaucheux initials "LF" under a tip-down pistol open at the breech is usually in front of the serial number, but not part of it.

Model

- The model designation is not marked on the firearm.
- "E. Lefaucheux Bté à Paris" is marked on the barrel.
- This is an unusual style of high-capacity revolver base on the patent of 1864 and its addition patent of 1865 from E. Lefaucheux, which uses two barrels and a cylinder with an inner and outer ring of chambers to achieve a shot capacity of 20 in 7MM pin-fire.
- The revolver outside chambers discharge through the top barrel and the inside chambers discharge through the lower barrel.
- This revolver firing sequence is normally outside chamber, inside chamber, outside chamber, until the ammunition is exhausted.
- This revolver has two manufacture, identical but of different manufacturer marking: French with the "LF" logo marking and Belgian with the Liege marking of "ELG" in an oval.
- Features include: blued or polished white finish; barrel with or without rifling; dovetailed blade with bead front sight; over and under barrel assembly screwed to the receiver/frame in the typical Lefaucheux open top frame style; a hinged ejector-rod, to allow empty cases to be ejected from both the inner and out chamber rings; folding trigger; a loading gate on the right recoil shield; hammer with two noses to impact the pin fire cartridge; checkered walnut grips of a broom handle style grip with lanyard loop.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "Lefaucheux" stands for the last name of the inventor of the pin-fire metallic cartridge, "Casimir Lefaucheux". - "Casimir Lefaucheux" was a French gunmaker who designed and built some of the first firearms to use pin-fire ammunition. - "Casimir Lefaucheux" business was located in Paris, France from 1827 to 1852. - "Lefaucheux" is also associated with "Eugène Gabriel Lefaucheux", son of "Casimir Lefaucheux". - "Eugène Gabriel Lefaucheux" was born in 1832 and died in 1892. - "Eugène Gabriel Lefaucheux" was the inventor and manufacturer of open top frame, double action revolver that used "Casimir Lefaucheux" pin-fire metallic cartridge. - "Eugène Lefaucheux" business was located in Paris, France from 1850 to 1871. - "Eugène Lefaucheux" logo, Lefaucheux initials "LF" under a tip-down pistol open at the breech is usually in front of the serial number, but not part of it. - "Eugène Lefaucheux" also owned "Lefaucheux & Company". - "Lefaucheux & Company" was located in Liege, Belgium from 1865 to 1873. - "Lefaucheux & Company" were marked with "E. Lefaucheux Invr Breveté" also using the trademark of a crown over "EL" and a number: 67,68,69 for the year of production.
Action	- two barrels and a cylinder with an inner and outer ring of chambers to achieve a higher shot capacity.
Serial Number	- "Eugène Lefaucheux" logo, Lefaucheux initials "LF" under a tip-down pistol open at the breech is usually in front of the serial number, but not part of it. - Serial number of referenced examples consisted of two to four numbers.
Calibre	- pin-fire ammunition.
Shots	- This revolver consist of two over and under barrels and a cylinder containing two concentric circles of chambers.
Other Markings	- Markings: may be "E. LEFAUCHEUX IN vr BREVETE".

Notes

Make

- "Lefaucheux" stands for the last name of the inventor of the pin-fire metallic cartridge, "Casimir Lefaucheux".
- "Casimir Lefaucheux" was a French gunmaker who designed and built some of the first firearms to use pin-fire ammunition.
- "Casimir Lefaucheux" was born in 1802 and died 1852.
- "Lefaucheux" is also associated with "Eugène Gabriel Lefaucheux", son of "Casimir Lefaucheux".
- "Eugène Gabriel Lefaucheux" was born in 1832 and died in 1892.
- "Eugène Gabriel Lefaucheux" was the inventor and manufacturer of open top frame, double action revolver that used "Casimir Lefaucheux" pin-fire metallic cartridge.
- "L.F." or "LF" within a circle or shield, "Lefaucheux", "E. Lefaucheux", "E. Lefaucheux Bte a Paris", "E. Lefaucheux Inv Brevete", "Inv. Lefaucheux Brte S.G.D.G. Paris", "IVon E. Lefaucheux Brte S.D.G.D. a Paris" or a variation thereof will be marked on the barrel and/or receiver/frame.

Model

- this is a single or double action revolver that was manufactured to chamber and fire the "Lefaucheux" pin fire cartridge.
- manufactured between 1854 and the beginning of World War One.
- features include: round or octagonal barrel; small, medium, or large size receiver/frame with open or solid top and with the loading gate on the right recoil shield; with or without ejector-rod assembly on the right side of the barrel lug; exposed spurred hammer; fold down trigger or a regular trigger and trigger guard; single or double action trigger mechanism; wood, ivory or black rubber hand grips; with or without lanyard loop.

Calibre

- pin-fire ammunition.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "LEFAUCHEUX" was marked on the top of the barrel of a known example.

- "Lefaucheux" stands for the last name of the inventor of the pin-fire metallic cartridge, "Casimir Lefaucheux".
- "Casimir Lefaucheux" was a French gunmaker who designed and built some of the first firearms to use pin-fire ammunition.
- "Casimir Lefaucheux" was born in 1802 and died 1852.
- "Lefaucheux" is also associated with "Eugène Gabriel Lefaucheux", son of "Casimir Lefaucheux".
- "Eugène Gabriel Lefaucheux" was born in 1832 and died in 1892.
- "Eugène Gabriel Lefaucheux" was the inventor and manufacturer of open top frame, double action revolver that used "Casimir Lefaucheux" pin-fire metallic cartridge.
- "L.F." or "LF" within a circle or shield, "Lefaucheux", "E. Lefaucheux", "E. Lefaucheux Bte a Paris", "E. Lefaucheux Inv Brevete", "Inv. Lefaucheux Brte S.G.D.G. Paris", "IVon E. Lefaucheux Brte S.D.G.D. a Paris" or a variation thereof will be marked on the barrel and/or receiver/frame.

Model

- manufactured between 1860 and 1890.
- no model name is marked on this firearm; the model designation is derived from the action of the firearm which is known as the Warnant System.
- single shot rifle utilizing an action called the Warnant System wherein the breech block is attached to the breech end of the barrel, so it could be swung up to open the action for loading and unloading the rifle.
- this type of action was also known as "The Warnant Springfield" and it represented the last and final improvement of the Flobert rifle.
- since this system was much stronger than all other Flobert-type actions previously made, it was available in stronger calibers and heavier barrels.
- features include: exposed hammer centrally located at the rear of the action; swing-up type breech block hinged at the breech end of the barrel which also acutates an extractor when the breech block is opened; octagonal-to-round barrel; fixed rear and front sights; one piece walnut English style stock with prominent flats on each side underneath the receiver; blued finish.

Manufacturer

- "LEFAUCHEUX HENRY RIEGER SUCC R RUE VIVIENNE 37 PARIS" was marked on the top of the barrel of a known example.
- Henri/Henry Rieger was located in Paris, France from 1860 to 1890.

Serial Number

- known example did not have a serial number marked on the receiver/frame.

Notes

Make

- "Lefever Arms Co." is marked on the sides of the receiver/frame.

Model

- the letter "A" is stamped on the water table, next to the serial number.
- manufactured between 1884 and 1915.
- manufactured approximately 1,000 units.
- the "A" grade was one of Lefever's highest-grade shotguns (only slightly less so than the "AA" grade), with gold inlays and ornately engraved sideplates (including screw-heads), usually with waterfowl, upland game birds or retrievers.
- these grades also came with much better woodwork than the lower grades, including horn inserts.

Manufacturer

- "Lefever Arms Co." is marked on the sides of the receiver/frame.

Action

- side by side pattern.

Serial Number

- the serial nmber appears on the water table, with grade identifier.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make	- "Lefever Arms Co." is marked on the sideplates of the receiver/frame.
Model	- the letter "E" is stamped on the action flats of the receiver/frame; an additional letter "E" would indicate that the particular model had automatic shell ejectors. - manufactured between 1889 and 1915 with a total production of approximately 9,500 units. - the "E" grade was a medium grade, with moderately-engraved sideplates, usually with waterfowl, upland game birds or retrievers. - features; box lock action with side plates; top lever opening; side by side barrels with doll's head rib extension; barrels were Fine Damascus Steel or Genuine Krupp Fluid Steel; top tang sliding-type safety; single or double triggers; cocking indicators; Walnut stock in English style or half pistol grip with hard rubber buttplate; extractor or automatic shell ejectors; stock and forend are checkered.
Manufacturer	- "Lefever Arms Co." is marked on the sideplates of the receiver/frame.
Action	- side by side pattern.
Serial Number	- the serial number is marked on the action flats of the receiver/frame along with the letter "grade" identifier. - serial numbers are numeric only without prefix or suffix. - research indicates that the last serial number produced by the Lefever Arms Company in 1897 was number 27,179.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.
Other Markings	- this model with Krupp steel barrels was marked, "KRUPP" on the right side barrel, "Fluid Steel" on the left side barrel and "Krupp Essen" on the barrel flats.

Notes

Make

- "LEFEVER ARMS CO." is marked on both sides of the receiver/frame.

Model

- "serial number" and the letter "F" are marked on the water table of the receiver/frame and repeated on the underside of the barrel assembly.
- "Patentd. 1872." over "1880, 85, 86, 87." may be marked on the underside of the receiver/frame.
- "F" Grade was manufactured between 1884 and 1915.
- total production of approximately 11,000 units.
- "F" Grade was a medium grade, with medium ornately-engraved sideplates, usually with waterfowl or upland game birds.
- features include: side by side Damascus or laminated steel barrels with matted rib with a doll's head extension and bead fron sight; front hinged receiver/frame with top tang mounted break open lever and safety; hammerless; cocking indicators; extractors; double triggers; checkered wood splinter forearm and straight grip, semi-pistol grip or full pistol grip buttstock with butt plate with "LACo" logo.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "LEFEVER ARMS CO." is marked on both sides of the receiver/frame.
Action	- side by side barrel configuration, hinged barrel design.
Serial Number	- "serial number" and a letter "F" are marked on the water table of the receiver/frame and repeated on the barrel assembly and metal work of the forearm assembly. - observed serial number consisted of five numbers without a letter prefix or suffix. - the letter "F" marked on the watertable and barrel assembly is not part of the serial number, this is the model/grade of the firearm.

Notes

Make

- "Lefever Arms Co." is marked on the sides of the receiver/frame.

Model

- Lefever made several versions of his double-barreled shotguns, in both side-hammer and hammerless versions. Some of his earliest designs opened by use of a push-forward "thumb latch", while later versions used the more conventional side-swinging lever.

Manufacturer

- "Lefever Arms Co." is marked on the sides of the receiver/frame.
- In 1879, Lefever formed the business of D.M. Lefever Company of Syracuse, New York State. The D.M. Lefever Company was in business from 1879 to 1883.
- In 1884, the Lefever Arms Company of Syracuse, New York State was incorporated. Lefever Arms Company was in business from 1884 to 1915.
- In 1901, the Lefever Arms Company was sold to the Durston family.

Action

- side by side pattern.

Notes

Make

- "D.M. Lefever" is marked on the side of the receiver/frame.

Model

- this was a "knock-about" style firearm, made without engraving.
- actually manufactured by Ithaca, who bought Lefever in 1915.
- the 410 versions of this firearm are known as "Baby Lefevers".
- the earlier company, D.M. Lefever, also made this type of firearm in both side-hammer and hammerless versions.

Manufacturer

- "D.M. Lefever" is marked on the side of the receiver/frame.

Action

- side by side pattern.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- located on flat of receiver, on bottom of barrel set(s), and on inside of forend.
- examples seen with varying lengths of serial number, but all numeric.

Notes

Make	- "Lefever Arms Co." is marked on the sides of the receiver/frame.
Model	- this is an early shotgun made by Lefever, most likely a conversion of a muzzle loading, Civil War surplus rifle into a sporting hunting shotgun - they hinged open to be loaded/unloaded, and used an exposed hammer to fire a chambered cartridge - these have also been seen in double-barreled versions.
Manufacturer	- "Lefever Arms Co." is marked on the sides of the receiver/frame.
