Notes

Make

- "The Marlin Firearms Co." is marked on the barrel.
- "J.M. Marlin", "Marlin", "Marlin Safety", "Marlin Firearms Co.", "Marlin Fire-Arms Co.", "Marlin Fire Arms Co.", "Marlin-Rockwell Corp.", "The Marlin Firearms Co.", and "The Marlin Firearms Corporation" are some of the trade names/trademarks observed on firearms manufactured by Marlin and Marlin Rockwell Corporation.
- Marlin firearms were manufactured in the U.S.A. at NEW HAVEN, CONNECTICUT from 1870 to 1969, and NORTH HAVEN, CONNECTICUT from 1969 to 2011.
- Marlin firearms which are marked "THE MARLIN FIREARMS CO." and "ILION, NEW YORK, U.S.A." or "MAYFIELD, KY, U.S.A." are manufactured by Remington.

Model

- much confusion surrounds the history of model 101 and its variants. Reference sources conflict when stating dates of manufacture for the model 101. Most authoritative sources place the introduction of the model 101 as 1940/1 with production halting when the United States entered into World War II. Production was resumed in 1945 but the model 101 was again dropped in 1946. In 1951 the model 101 was resurrected yet again and production continued until its final demise in 1977. The model 101 went through many design changes throughout its history and was offered in at least four variations.
- prior to 1960 all variations featured a smooth cocking knob, between 1960 and 1966 the cocking knob was a large ring (reminiscent of the Swiss made Schmidt-Rubin rifle), from 1966 to the end of production the cocking knob was in a "T" shape.
- features of the standard model 101 included: blued finish; walnut, one-piece stock with a straight (early production) or Monte Carlo style (from about 1959/60) comb; barrel mounted semi-buckhorn (folding on later production) rear sight and a blade with brass bead (early), ramp style blade or hooded blade front sight; receiver/frame is grooved for scope mounts; flush fit take-down screw.
- the model 101DL was offered in 1941 and 1945 as an enhanced version of the model 101 with a receiver/frame mounted rear peep sight and a hooded ramp front sight.
- the model 101 was also available with a smooth-bore barrel (no rifling) as the model 101SB in 1940 and 1941, intended for use with calibre 22 LR ammunition loaded with "shot".
- in 1959 Marlin offered the model "101 Crown Prince" which was a deluxe version of the standard model 101. The "Crown Prince" version shared the same features as the model 101 but came equipped with a 4-power Marlin Micro-Vue telescopic sight and was packaged in a carry-case cardboard box that included a tube of Marlin Rustopper, a wild game map, a Marlin "target and game" record book and 50 assorted targets.

Type

- this firearm resembles a traditional bolt operated rifle.

Model	- manufactured from 1898 to 1905. - model designation is not marked on the firearm. - when introduced in 1898 this model was described as being available in one style only, In 1899 the model 1898 was listed as being available in four grades: - "A"; was in "Field/Standard" configuration (1899-1905) with a plain walnut buttstock and forend with a 711mm, 762mm or 813mm "Special Rolled Steel" barrel or Brush/Riot configuration (1899-1902) with a 660mm barrel. - "B"; available from 1899 to 1905, was essentially the same as the "A" grade but equipped with a "Special Smokeless Steel" barrel and had hand cut checkering on the buttstock and forend. - "C"; available from 1899 to 1905, also uses the "Special Smokeless Steel" barrel but features a select walnut buttstock and forend with hand cut checkering and a modest amount of engraving on the receiver/frame. - "D"; available from 1899 to 1905, fitted with a high quality Damascus barrel and Circassian walnut buttstock and forend with hand cut checkering and more elaborate engraving on the receiver/frame. - all grades feature: visible hammer; single action bar; side ejection; plain barrel with a bead sight. - earliest versions were not fitted with an action release/bolt unlocking mechanism, to unlock a "cocked" action the firing pin had to be depressed while pulling the forend to the rear. Later versions, introduced in 1899 had a serrated action release/bolt-unlocking button mounted on the rear right side of the receiver/frame. - early Marlin catalogues list a wide variety of extra cost options that include upgrades to the quality of wood used for the stock, installation of a recoil pad and finish options that included engraving as well as silver and gold plating. - the same design, proportioned for the 16 GA X 2 3/4" cartridge was available as the model 16.
Serial Number	- marked on the underside of the receiver/frame, incorporates sequential numbers. - barrels and receiver/frame were serial numbered however, the numbers for each are different.
