197444 - 1	7.62X39 RUSSIAN	5	508	Prohibited PFR, Part 1, para. 64	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Maadi Company" is marked on the left side of the receiver/frame.
- The company logo is marked on the firearm.
- The company logo is a side view, stylized line drawing of an "Ancient Egyptian Crown", called a "Pschent", also known as the double crown of Egypt.

Model

- "R.P.M. Semi-Automatic" is marked on the left side of the receiver/frame.
- The "R.P.M." model is classified as a "Copy Type B" under the Kalashnikov Classification Flowchart, whereby system parts of the weapon are one hundred percent (100%) interchangeable with the "original" model used to create this version, in this case the one commonly known as "AK".
- Features include: round barrel with gas piston tube mounted over the barrel; machined steel receiver/frame in semi-automatic action; adjustable ladder rear sight; foldable bipod; standard finished wood shoulder, pistol grip stock, with or without integrated "thumb hole"; metal should plate; sling swivels.
- Stock options: standard wood stock with matching pistol grip and two-piece forearm covers; one piece thumbhole, pistol grip stock with matching two-piece forearm covers; black polymer folding shoulder stock with pistol grip and polymer forearm with accessory rail.
- Overall length with a 508 mm (20 inches) barrel is 972 mm (38.25 inches), average weight is 4.2 kg (9.3 lbs).

Manufacturer

- "Maadi Company" is marked on the left side of the receiver/frame.

Action

- Gas operated.

Serial Number

- The serial number is marked on the left side of the firearm.
- The serial number rationalization is unknown.
- Observed sample consisted of two (2) Cyrillic letters, followed by five (5) numbers.

Shots

- Unknown Date: Introduced with 5 shot capacity, magazine.
- Detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- "LHV-47" followed "Tdi Arms" may be marked on a black plastic/polymer type handguard with an accessory underneath, on the forearm and is not deemed the make, model or manufacture of this firearm. This is an aftermarket handguard replacer.
- "A.C.C. INT/INTRAC" (over) "Knox. TN." (over) "Egypt" may be marked on the right side of the receiver/frame. They are known as the importer of this firearm.

Notes

Make

- "MAB" is marked on the slide, receiver/frame and on the grip plates.
- "MAB" was an acronym used by "Manufacture d'Armes de Bayonne" of France.
- "MAB" was a trademark used by "Martin A. Bascaran" of Eibar, Spain.

Model

- manufactured from 1921 to 1965.
- model designation is not marked on early versions.
- "Modele A" is usually marked on the left side of the slide of later production versions.
- "A" model was also known as "Le Defendeur".
- "A" model is based on the FN-Browning 1906.
- features include: fixed blade front sights and groove in the top of the slide for a rear sight; flat sided, open top slide with rear grip serrations; striker fired; receiver/frame has a grip safety; single action trigger mechanism; manual safety lever is mounted on the left side of the receiver/frame; detachable box magazine release is mounted on the bottom of the rear grip strap; checkered plastic or hard rubber grip plates; blued finish.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "MAB" is marked on the slide and on the grip plates. - "MAB" was an acronym used by "Manufacture d'Armes de Bayonne" of France. - "Manufacture d'Armes de Bayonne (MAB)" was founded in 1921. - "Manufacture d'Armes de Bayonne (MAB)" ceased in 1985.
Action	- blowback operated.
Serial Number	- serial number is usually marked on the right side of the receiver/frame, above the trigger or on the slide.
Calibre	- calibre is usually marked on the slide or the chamber of the barrel.
Shots	- detachable box magazine.
Importer	- there is confusion, caused by conflicting references, whether "WAC" is Winfield Arms Corporation (WAC) or Western Arms Canada (WAC). - the worst possible case is both are correct and it is impossible to differentiate between these two importers who market "MAB" firearms under their own "Brand Name".

Notes

Make

- "MAB" is marked on the left side of the slide.
- "MAB" was an acronym used by "Manufacture d'Armes de Bayonne" of France.
- "MAB" was a trademark used by "Martin A. Bascaran" of Eibar, Spain.

Model

- manufactured from 1932 to 1949.
- the model may or may not be marked on the fireearm, depending on the period of manufacture; early pistols were marked only "Pistolet Automatique 6.35" over "MAB Brevete", with later pistols being marked "MAB Brevete" over "Modele B".
- this is a French-produced copy of the Walther Model 9, with a grip safety.
- features include: blued finish; fixed open sights; fixed barrel with open-topped slide at the front; single-action striker-fired mechanism; rotating safety lever on the left that locks the slide and the trigger-bar; synthetic grips with the "MAB" logo; heel magazine release; a downward-sliding takedown plate at the rear of the receiver/frame; and a Browning 1906-style grip safety.

Manufacturer

- "MAB" is marked on the slide and on the grip plates.
- "MAB" was an acronym used by "Manufacture d'Armes de Bayonne" of France.
- "Manufacture d'Armes de Bayonne (MAB)" was founded in 1921.
- "Manufacture d'Armes de Bayonne (MAB)" ceased in 1985.

Action

- single action, blowback operation.

Serial Number

- serial-numbered on the right side of the slide (with or without a partial serial number on the receiver/frame), or serial-numbered on both the right side of the receiver/frame and slide.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine.
Other Markings	- marked on the left side of the slide: "PISTOLET AUTOMATIQUE MAB BREVETE MODELE B".

Notes

Make

- "MAB" is marked on the slide, receiver/frame and grip panels.
- "MAB" was an acronym used by "Manufacture d'Armes de Bayonne" of France.
- "MAB" was a trademark used by "Martin A. Bascaran" of Eibar, Spain.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "D" was manufactured from 1933 to 1965.
- "MODÈLE D" is marked on the left side of the slide.
- "D" was manufactured for and under German military occupation during WWII and will be marked: "Pistole MAB Kaliber 7.65mm" or with a German army acceptance mark.
- "D" manufacture in 1945, after German occupation, was resumed by MAB with a number of changes in its design; the most obvious is the elimination of the unlocking lever for the barrel bushing under the front of the slide.
- "D" was also imported and sold under the "WAC" trade name .
- features include: fixed front and dovetailed rear sights; serrated or knurled barrel bushing end; rear grasping serrations; slide mounted external extractor; hammerless; striker fired; rear grip safety; left side slide locking lever and magazine release; synthetic, checkered black grips; blue finish.

Manufacturer

- "MAB" is marked on the firearm.
- "MAB" was an acronym used by "Manufacture d'Armes de Bayonne" of France.
- "Manufacture d'Armes de Bayonne (MAB)" was founded in 1921.
- "Manufacture d'Armes de Bayonne (MAB)" ceased in 1985.

Action

- single action, blow-back operation.
- blowback operated.

Serial Number

- serial number is marked on the right side of the receiver/frame above the trigger.
- some serial numbers issued for the Bank of France are marked with a "BF" prefix followed by three or four digits.
- serial number may have up to six numbers.
- serial number followed, but not part of it, with the letters "MAB" denote a prewar manufacture.
- serial numbers began in 1945 around 97 000, where German production ended when MAB resume manufacture.
- MAB made around 17 000 pistols a year under German supervision.

Calibre

- calibre designation is marked on the left side of the slide.
- calibre designation is also marked on the barrel, visible through the ejection port.

Shots

- detachable box magazine.

Other Markings

- some markings noted on the left side of slide:
- sample one: "Pistolet Automatique Cal 7.65" / "MAB Brevete Modele D"
- sample two: "Pistolet Automatique MAB Brevete - S.G.D.G." / "Modele D"
- sample three: "Pistole MAB Kaliber 7.65mm" (mfg for the German military - WWII)

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make	- "MAB" is marked on the slide and on the grip panels. - "MAB" was an acronym used by "Manufacture d'Armes de Bayonne" of France. - "MAB" was a trademark used by "Martin A. Bascaran" of Eibar, Spain.
Model	- produced from 1950 to 1963. - "MODELE F" is marked on the left side of the slide. - "MODELE F" was marketed in North America under the WAC trade name. - features include: various types of sights; interchangeable, flat-sided barrel; open-top slide; safety located on the left side of the slide; hammerless; magazine safety consisting of a spring-loaded lever on the left side of the frame; thumbrest type plastic grips; blue finish. - MAB produced these pistols in two distinct versions, a "Type 1" with a frame-mounted manual safety on the left side of the tang, and a "Type 2" with both a frame-mounted manual safety on the left tang and a breech-locking lever on the left side of the slide, which prevents the slide from operating in the semi-automatic mode.
Manufacturer	- "MAB" is marked on the slide and on the grip plates. - "MAB" was an acronym used by "Manufacture d'Armes de Bayonne" of France. - "Manufacture d'Armes de Bayonne (MAB)" was founded in 1921. - "Manufacture d'Armes de Bayonne (MAB)" ceased in 1985.
Action	- blowback operated.
Serial Number	- serial number is marked on the right side of the receiver/frame. - serial numbered from one up to five numbers.
Calibre	- "CAL 22 LONG" is marked on the grip plate.
Shots	- detachable box magazine.
Other Markings	- left slide usually marked: "Pistolet Automatique MAB Brevete", placed over model name usually marked as "Modele F".

Notes

Make

- "Echasa - Eibar (Espana)" over "Modelo GZ - MAB Espagnol" over "Made in Spain" may be marked on the left side of the slide.
- "MAB" may be marked on the grip plates.
- "MAB" was an acronym used by "Manufacture d'Armes de Bayonne" of France.
- "MAB" was a trademark used by "Martin A. Bascaran" of Eibar, Spain.

Model

- manufactured in the 1950s and 1960s.
- "MODELO GZ" is essentially a "Fast" or "Basque" model manufactured by Echave & Arizmendi, under the MAB trade name.
- "GZ" pistols manufactured in Spain will be marked on the slide "Echasa-Eibar (Espana) Cal 32 (7.65mm) Modelo GZ-MAB Espagnol".
- usually the "MAB" logo will be found moulded into the plastic grips.
- easily recognizable by it's method of dismantling, a sliding catch at the rear of the receiver/frame allows the slide to be removed.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "Echasa - Eibar (Espana)" over "Modelo GZ - MAB Espagnol" over "Made in Spain" may be marked on the left side of the slide. - this model was also produced in France by Manufacture d'Armes de Bayonne.
Action	- blow back operated.
Serial Number	- serial number may marked on the right side of the receiver/frame or on the bottom of the pistol grip.
Calibre	- the calibre designation is marked on the left side of the slide, eg. "CAL 25 (6.35 m/m.)".
Shots	- detachable box magazine.

180922 - 1	8MM LEBEL REV	5	64	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- Martin A. Bascaran's "MAB" logo is marked on the firearm.

Model

- "Velo-Mith" may or may not be marked on the firearm; "velo-mith" was a name used by a number of manufacturers.
- this is a style of "velo-dog" top-break revolver popular for a short time shortly after the First World War, meant to replicate the look of the Browning 1900 pistol at a lower cost; a "velo-mith" revolver will invariably have a tubular barrel joined to a tubular underlug (which acts to support the cylinder axis pin), and this produces an appearance resembling that of the Browning, which has a recoil spring contained in a barrel-like assembly over the true barrel.
- features include: blued finish; open fixed sights (usually with the rear sight moved forward, over the hinge pin); a folding trigger; fluted five-shot cylinder; an opening lever at the rear of the receiver/frame that resembles a hammer; and synthetic or gutta percha grips.

Manufacturer

- Martin A. Bascaran's "MAB" logo is marked on the firearm.

Action

- double-action folding-trigger "velo-mith"-style revolver.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number - serial-numbered on the receiver/frame, the cylinder, and the bottom of the barrel hood.

Notes

Make

- "MAB" in a circle with the words "TRADE" over and "MARK" under the circle was observed marked on the left side of the receiver/frame.
- "MAB" was a trademark used by "Martin A. Bascaran" of Eibar, Spain.
- "MAB" was an acronym used by "Manufacture d'Armes de Bayonne" of France.

Model

- "VELO MITH" may be marked on the left side of the barrel.
- manufactured prior to 1936.
- features include: round barrel; fixed sights; front hinged receiver/frame with fluted cylinder; break open release located at the rear upper part of the receiver/frame and resembles a hammer; folding trigger; double action only trigger mechanism; black checkered hard rubber grip panels; lanyard ring; blued finish.

Manufacturer

- Retolaza Hermanos is not marked on the firearm.
- "R.H." in a circle is the manufacturer's initials and may be marked on the receiver/frame and grip plates.
- Retolaza Hermanos of Eibar, Spain was in business from 1895 to 1936.
- Retolaza Hermanos manufactured Velo-Dog pocket revolvers under the names of Brompetier, Puppy, Velo-Brom and Velo-Mith.
- Retolaza Hermanos started manufacturing semi-automatic pistols circa 1906.
- Retolaza Hermanos manufactured semi-automatic pistols under the names of Gallus, Liberty, Military, Paramount, Retolaza, Stosel, Titan, and Titanic.

Serial Number

- serial number is marked on the right side of the receiver/frame under the grip plate.

Notes

Make

- "MADSON" over "LABRON" over "& MADSON" was observed marked on the left side of the receiver/frame.

Model

- manufactured prior to 1834.
- model designation is not marked on the firearm.
- model designation is derived from the method by which this pistol is loaded; loading was accomplished by unscrewing the barrel.
- this is a single shot pistol with a removable barrel and an exposed hammer centrally located on the receiver/frame behind the chamber.
- this handgun is intended to be loaded from the breech end of the barrel and as such was originally suppied with a wrench to unscrew the barrel from the receiver/frame in order that a lead ball and loose powder could be inserted into the chamber end of the barrel and then the barrel screwed back onto the receiver/frame.
- features include: removable barrel, either conventional trigger with trigger guard or forward folding trigger, hammer located in the centre of the receiver/frame, one piece wooden grips.

Manufacturer

- Mabson & Labron was located on Russell Street in Birmingham, England in 1822.
- Mabson, Labron & Mabson was located at 25 Russell Street in Birmingham, England from 1827 to 1833.

Action

- the barrel unscrews in front of the chamber, so it can be loaded with a ball that fits the barrel more tightly than is possible with a muzzle loader.
- the turnoff barrel may be rifled.

FRT Report

Firearm Reference Number (FRN): 121783
Make: MAC
Model: 1929

Summary

Make:	MAC
Model:	1929
Manufacturer:	Manufacture d'Armes de Chatellerault (MAC)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	FRANCE
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
121783 - 1	7.5X54 FRENCH MAS	5	600	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make, acronym, or logo thereof is marked on the firearm.

Model

- the model designation may not be marked on the firearm.
- this was a rifle designed and offered by the Chatellerault arsenal in 1929, for possible adoption by the French military (who had been looking for a new service rifle since 1921); although this rifle fulfilled some of the requirements of the ordnance committee, it was needlessly complex and suffered from numerous feeding failures, and was not adopted.
- features include: an unusual method of "pull-forward" gas-piston operation (similar to the St. Etienne Mle 1907 machinegun) that required a separate lever at the front right side of the receiver to reverse the piston's impetus; walnut pistol-grip stock and upper handguard; internal box magazine; side-folding blade bayonet; sling swivels; open adjustable sights; and a strong resemblance to the later model SAFN49.

Manufacturer

- the manufacturer, acronym, or logo thereof is marked on the firearm.
- "Manufacture Nationale d'Armes de Chatellerault (MAC)" was established in Chatellerault, France in 1819.
- "Manufacture Nationale d'Armes de Chatellerault (MAC)" manufactured small arms for the French government including machine-guns, rifles and pistols between 1822 and 1968.

Action

- gas-operated.

Serial Number

- numbered on the frame/receiver.

Shots

- internal box magazine.

Model: 1935S

Summary

Make:	MAC
Model:	1935S
Manufacturer:	Manufacture d'Armes de Chatellerault (MAC)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	FRANCE
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
76173 - 1	7.65MM FRENCH LONG	8	106	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MAC" is marked on the left side of the slide and on the right side of the receiver/frame.
- "MAC" the abbreviation for Manufacture Nationale d'Armes de Chatellerault.

Model

- introduced by Manufacture d'Armes de St-Etienne (MAS) in 1935 for French military service pistol trials and officially adopted in 1937.
- "MODELE 1935 S" or "MODELO 1935 S M1" is marked on the right side of the slide.
- "S" denotes the arsenal that designed the firearm, Manufacture d'Armes de St-Etienne (MAS).
- early samples of the 1935S were simply marked with the model designation "1935S", when a safety modification was implemented an "M1" marking was added to the right of the model designation.
- as all SAGEM pistols were produced after the modification, all have the designation "M1" marked on the right side.
- features include: curved backstrap; manual safety; lanyard ring; external hammer; fixed sights; checkered grips; semi-beavertail grip; barrel protrudes from the slide.

Manufacturer

- "MAC" is marked on the left side of the slide.
- "MAC" is marked on the right side of the receiver/frame.
- "MAC" the abbreviation for Manufacture Nationale d'Armes de Chatellerault.
- "Manufacture Nationale d'Armes de Chatellerault (MAC)" was established in Chatellerault, France in 1819.
- "Manufacture Nationale d'Armes de Chatellerault (MAC)" manufactured small arms for the French government including machine-guns, rifles and pistols between 1822 and 1968.

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the right side of the receiver/frame.
- "MAC" or "MAC" and a dash (-) in front of the serial number is not a prefix to the serial number.
- serial number observed consisted of a letter "F" prefix and three numbers.

- serial number ranges: A1 to A10000, B10000 to B20000, C1 to C10000, D1 to D10000, E1 to E10000, and F1 to F6087.

Shots

- detachable box magazine.

Canadian Law Comments

- Handguns chambered for the cartridge 7.65MM FRENCH LONG, also known as 32 FRENCH LONG, 7.65MM LONG AND 7.65MM MAS, are deemed exempt from CC 84(1) "prohibited firearm" para. (a)(ii), which states:
"prohibited firearm" means
(a) a handgun that
(ii) is designed or adapted to discharge a 25 or 32 calibre cartridge,

Notes

Make

- "MACCABEE DEFENSE INC" is marked on the right side of the firearm underneath the accessory rail and on the left side of the receiver/frame directly under the magazine release lever.
- the make may be marked as the accronym "MDI".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- introduced in 2017. - "SLR-MULTI" is marked on the left side of the receiver/frame. - "SLR-MULTI" main features are the use of a T-Slot assembly interface reminiscent of the prototype AR-10A serial number XN03 locked by a captive take down screw or pin, a removable trigger housing and compatibility with many AR-15 components. - features include: threaded muzzle for flash hider/muzzle brake; may have adjustable, folding or optical sights; round, stainless steel barrel; gas block that may be adjustable, free floating handguard, accessory rail flat top upper receiver; ambidextrous cocking handle; right hand only or ambidextrous bolt catch, synthetic pistol grip and collapsible, standard or custom rifle buttstock; various colour finishes. - overall length with a 473mm (18.63") barrel is 875mm (34.45") with the stock collapsed and 955mm (37 5/8") with the stock extended.
Manufacturer	- "MACCABEE DEFENSE INC." is marked on the right side of the magazine housing of the receiver/frame and on the left side of the firearm. - the make may be marked as the accronym "MDI".
Action	- gas operated.
Serial Number	- serial number is marked on the left side of the receiver/frame directly under the Make and Model. - serial number of a referenced example consisted of a two letter prefix (AB) and eight numbers. - serial number of production models may consist of a two letter prefix and seven or eight numbers.
Calibre	- ".223 Wylde" calibre is marked on the barrel of this firearm. This designation is not the calibre of the firearm but a description of the chamber dimensions. - the Wylde chamber is identical to the NATO STANAG chamber with a longer freebore to accommodate .224 inches (5.6MM) diameter commercial projectiles up to 80grs (5.18gm) mass.
Shots	- detachable box magazine

Notes

Make	- "MACK BROTHERS" is marked on the receiver/frame.
Model	- "EVO" is marked on the receiver ring. - this is a lightweight Remington 700-compatible receiver/frame manufactured from titanium to provide the lightest and strongest rifle action possible. These receivers are commonly assembled with other lightweight parts (synthetic stocks, carbon fibre-wrapped barrels, etc.) to produce lightweight rifles. - sold as an action only, therefore may be seen in a wide variety of configurations, chamberings, and barrel lengths. - features may include: rifled barrel with threaded muzzle or integral muzzle brake; sight-mounting accessory rail; detachable box magazine; adjustable trigger; and various forms of target, varmint, or sporter stock; matte coloured, bead-blasted, or camouflaged finish.
Manufacturer	- "MACK BROTHERS" is marked on the receiver/frame. - Mack Brothers is a Sturgis, South Dakota-based manufacturer that specializes in the production of suppressors and rifle actions.
Action	- turn-bolt design.
Serial Number	- serial number is marked on the receiver/frame.
Barrel	- this model is sold as an action only; other barrel lengths available.
Calibre	- this model is sold as an action only; other calibres available.

Notes

Make

- "MADSEN" as a make is derived from the last name of Vilhelm Herman Oluf Madsen.
- Vilhelm Herman Oluf Madsen was born in 1844 and died in 1917.
- Vilhelm Herman Oluf Madsen was a Danish politician, minister, army officer, businessman and inventor.
- Vilhelm Herman Oluf Madsen was one of the founders of Dansk Rekylriffel Syndikat.
- Vilhelm Herman Oluf Madsen was the Danish Minister of War from 1901 to 1905.
- Vilhelm Herman Oluf Madsen was responsible for the adoption of the Madsen machine gun by the Danish Armed Forces in 1902.

Model

- folding stock, this model also has a safety lever behind the magazine well that must be depressed for the weapon to fire.
- this model is derived from the model 1946, the cocking handle was changed to a small knob attached to the top of the bolt.The earlier model had a small metal plate on the top of the bolt that acted as a cocking handle.
- Barrel is easily removed by unscrewing barrel retaining nut.
- receiver is hinged at rear and opens like a clamshell when barrel nut is removed.

Action

- blowback operated.

Serial Number

- Serial number was originally stamped at forward end of barrel retaining blocks. These numbers are not visible when the barrel nut is attached. Some have a serial number stamped on the receiver side that may or may not match the original number.

Shots

- detachable box magazine.

Notes

Make

- "MADSEN" as a make is derived from the last name of Vilhelm Herman Oluf Madsen.
- Vilhelm Herman Oluf Madsen was born in 1844 and died in 1917.
- Vilhelm Herman Oluf Madsen was a Danish politician, minister, army officer, businessman and inventor.
- Vilhelm Herman Oluf Madsen was one of the founders of Dansk Rekylriffel Syndikat.
- Vilhelm Herman Oluf Madsen was the Danish Minister of War from 1901 to 1905.
- Vilhelm Herman Oluf Madsen was responsible for the adoption of the Madsen machine gun by the Danish Armed Forces in 1902.

Model

- the 1953 has a folding stock and a safety lever behind the magazine well that must be depressed for the weapon to fire.
- this model is similar to the model Mark II, and both the 1953 and the Mark II are derived from the model 1946, the cocking handle was changed to a small knob attached to the top of the bolt, the barrel locking nut screws onto the barrel instead of the receiver and the magazine has a curve to it. The earlier version (M46) had a small metal plate that acted as a cocking handle,a straight magazine and the barrel locking nut screws onto the receiver.
- like the other Madsen submachine guns the 1953 receiver can be split in-half by unscrewing the barrel lock nut.

Serial Number

- serial number was originally stamped at forward end of barrel retaining blocks. These numbers are not visible when the barrel nut is attached. Some have a serial number stamped on the receiver side that may or may not match the original number.

Shots

Notes

Make

- "MADSEN" is not usually marked on the firearm.
- "HTK" under a crown is marked on the right side of the receiver/frame
- "HTK" stands for Haerens Tekniske Korps (Army Technical Corps) of the Danish military.
- "MADSEN" as a make is derived from the last name of Vilhelm Herman Oluf Madsen.
- Vilhelm Herman Oluf Madsen was born in 1844 and died in 1917.
- Vilhelm Herman Oluf Madsen was a Danish politician, minister, army officer, businessman and inventor.
- Vilhelm Herman Oluf Madsen was one of the founders of Dansk Rekylriffel Syndikat.
- Vilhelm Herman Oluf Madsen was the Danish Minister of War from 1901 to 1905.
- Vilhelm Herman Oluf Madsen was responsible for the adoption of the Madsen machine gun by the Danish Armed Forces in 1902.
- Madsen machine guns were manufactured by Dansk Rekylriffel Syndikat from 1902 to 1936 and by Dansk Industri Syndikat from 1936 to 1955.

Model

- "7.62 mm MG m/48" is marked on the right side of the receiver/frame.
- "7.62 mm" stands for "7.62X63 mm", the metric nomenclature of the "30-06 SPRG" (Springfield) calibre.
- "MG" stands for "Maskingevaer" (Machine Gun).
- "m/48" stands for "Model of 1948".
- "HTK" under a crown is also marked on the right side of the receiver/frame.
- "HTK" stands for Haerens Tekniske Korps (Army Technical Corps) of the Danish military.
- "m/48" is a top loaded, magazine fed, selective fire, machine gun.
- features include: front post sight bracket with protective ears and notched tangent rear sight mounted on the barrel jacket graduated from 200 to 1900 meters; cone shaped flash hider; internal recoil booster; slotted, perforated barrel shroud; usually has a bipod installed behind the front sight; pivoting, wood carrying handle; short, square receiver/frame; top mounted, offset to the left, magazine well; three position safety selector on the left side of the receiver/frame; right side cocking lever with wood knob; wood buttstock; blued finish.
- overall length with a 477mm (18.75") barrel is 1160mm (45.625"), average weight is 9.2 kg (20.28lbs).

Action

- long recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the right side of the receiver/frame.
- serial number of a referenced example consisted of four numbers.
- serial number is also marked on the bolt, visible through the magazine well.
- serial number has the prefix "Nr" that stands for "No", for "Number" that is not part of the serial number.

Shots

- detachable box magazine.

Notes

Make

- "MADSEN" may be marked on the side of the receiver/frame.
- "MADSEN" as a make is derived from the last name of Vilhelm Herman Oluf Madsen.
- Vilhelm Herman Oluf Madsen was born in 1844 and died in 1917.
- Vilhelm Herman Oluf Madsen was a Danish politician, minister, army officer, businessman and inventor.
- Vilhelm Herman Oluf Madsen was one of the founders of Dansk Rekylriffel Syndikat.
- Vilhelm Herman Oluf Madsen was the Danish Minister of War from 1901 to 1905.
- Vilhelm Herman Oluf Madsen was responsible for the adoption of the Madsen machine gun by the Danish Armed Forces in 1902.
- Madsen machine guns were manufactured by Dansk Rekylriffel Syndikat from 1902 to 1936 and by Dansk Industri Syndikat from 1936 to 1955.

Model

- Madsen Model (year) may be marked on the right side of the receiver/frame.
- manufactured from 1902 to 1955.
- this firearm has been manufactured both as an air-cooled and as a water-cooled machine gun.
- two model/variants were built of most guns; a so-called Infantry Model with a barrel length of 587MM (23 1/8") and a so-called Cavalry Model with a 477MM (18.8") barrel length.
- this firearm works on the "long recoil" principle with a fairly low cyclic rate of fire of approximately 400 shots per minute. Some of the variant models have been fitted with a muzzle booster to increase the cyclic rate of fire by utilizing the muzzle gasses to accelerate the rearward movement of the barrel.

Type

- air or water cooled, light machine gun.

Action

- long recoil operated.

Serial Number

- serial number located on the right side of the receiver.

Barrel

- two model/variants were built of most guns; a so-called Infantry Model with a barrel length of 587MM (23 1/8") and a so-called Cavalry Model with a 477MM (18.8") barrel length.

Calibre

- the Madsen machine gun has been chambered for just about every calibre of cartridge that has seen military use between 1900 and 1950.

Shots

- top-loading, detachable box magazine.

Remarks

- Madsen machine guns were used by the following countries: Argentina, Bolivia, Brazil, Bulgaria, Chile, China, Czechoslovakia, Denmark, El Salvador, England (Great Britain), Estonia, Ethiopia, Finland, France, Germany, Holland, Honduras, Hungary, Indonesia, Italy, Lithuania, Mexico, Norway, Pakistan, Paraguay, Peru, Portugal, Russia, Spain, Sweden, Thailand (Siam), Turkey, Uruguay, and Yugoslavia.
- the action and operating mechanism of the Madsen machine gun have been utilized and modified as much as any automatic mechanism in history. This has resulted in literally hundreds of different variations/models that have been used by the armed forces of most of the smaller nations in the Balkans and in South America.
- the Madsen machine gun has been chambered for just about every calibre of military cartridge in use between 1900 and 1950.

Notes

Make

- "MADSEN" may be marked on the side of the receiver/frame.
- "MADSEN" as a make is derived from the last name of Vilhelm Herman Oluf Madsen.
- Vilhelm Herman Oluf Madsen was born in 1844 and died in 1917.
- Vilhelm Herman Oluf Madsen was a Danish politician, minister, army officer, businessman and inventor.
- Vilhelm Herman Oluf Madsen was one of the founders of Dansk Rekylriffel Syndikat.
- Vilhelm Herman Oluf Madsen was the Danish Minister of War from 1901 to 1905.
- Vilhelm Herman Oluf Madsen was responsible for the adoption of the Madsen machine gun by the Danish Armed Forces in 1902.

Model

- model marked on the right side: Madsen Model (year).
- manufactured from 1902 to 1955.
- this firearm has been manufactured both as an air-cooled and as a water-cooled machine gun.
- two model/variants were built of most guns; a so-called Infantry Model with a barrel length of 587MM (23 1/8") and a so-called Cavalry Model with a 477MM (18.8") barrel length.
- this firearm works on the "long recoil" principle with a fairly low cyclic rate of fire of approximately 400 shots per minute. Some of the variant models have been fitted with a muzzle booster to increase the cyclic rate of fire by utilizing the muzzle gasses to accelerate the rearward movement of the barrel.

Type

- air or water cooled, light machine gun.

Action

- long recoil operated.

Serial Number

- serial number located on the right side of the receiver.

Barrel

- two model/variants were built of most guns; a so-called Infantry Model with a barrel length of 587MM (23 1/8") and a so-called Cavalry Model with a 477MM (18.8") barrel length.

Calibre

- the Madsen machine gun has been chambered for just about every calibre of cartridge that has seen military use between 1900 and 1950.

Shots

- top-loading, detachable box magazine.

Remarks

- Madsen machine guns were used by the following countries: Argentina, Bolivia, Brazil, Bulgaria, Chile, China, Czechoslovakia, Denmark, El Salvador, England (Great Britain), Estonia, Ethiopia, Finland, France, Germany, Holland, Honduras, Hungary, Indonesia, Italy, Lithuania, Mexico, Norway, Pakistan, Paraguay, Peru, Portugal, Russia, Spain, Sweden, Thailand (Siam), Turkey, Uruguay, and Yugoslavia.
- the action and operating mechanism of the Madsen machine gun have been utilized and modified as much as any automatic mechanism in history. This has resulted in literally hundreds of different variations/models that have been used by the armed forces of most of the smaller nations in the Balkans and in South America.
- the Madsen machine gun has been chambered for just about every calibre of military cartridge in use between 1900 and 1950.

Make

- "MADSEN" is not marked on the firearm.
- "MADSEN" may be marked on the side of the receiver/frame.
- "MADSEN" as a make is derived from the last name of Vilhelm Herman Oluf Madsen.
- Vilhelm Herman Oluf Madsen was born in 1844 and died in 1917.
- Vilhelm Herman Oluf Madsen was a Danish politician, minister, army officer, businessman and inventor.
- Vilhelm Herman Oluf Madsen was one of the founders of Dansk Rekylriffel Syndikat.
- Vilhelm Herman Oluf Madsen was the Danish Minister of War from 1901 to 1905.
- Vilhelm Herman Oluf Madsen was responsible for the adoption of the Madsen machine gun by the Danish Armed Forces in 1902.

Model

- model is not marked on the firearm.
- features include: top loading magazine; bipod; ventilated barrel jacket; full length buttstock or pistol style rear grip;
- this firearm works on the "long recoil" principle with a fairly low cyclic rate of fire of approximately 400 shots per minute. Some of the variant models have been fitted with a muzzle booster to increase the cyclic rate of fire by utilizing the muzzle gasses to accelerate the rearward movement of the barrel.

Manufacturer

- marked on the right side or top of the receiver/frame.
- may be marked as "REXER" or "THE REXER ARMS COMPANY LIMITED LONDON".

Type

- air cooled, light machine gun.

Action

- no longer capable of full-automatic fire.

Serial Number

- marked on the top of the receiver/frame.
- serial number rationalization unknown.
- observed specimen serial number consisted of three digits without prefix or suffix.

Calibre

- the Madsen machine gun has been chambered for just about every calibre of cartridge that has seen military use between 1900 and 1950.

Shots

- detachable box magazine.

Remarks

- Madsen machine guns were used by the following countries: Argentina, Bolivia, Brazil, Bulgaria, Chile, China, Czechoslovakia, Denmark, El Salvador, England (Great Britain), Estonia, Ethiopia, Finland, France, Germany, Holland, Honduras, Hungary, Indonesia, Italy, Lithuania, Mexico, Norway, Pakistan, Paraguay, Peru, Portugal, Russia, Spain, Sweden, Thailand (Siam), Turkey, Uruguay, and Yugoslavia.
- the action and operating mechanism of the Madsen machine gun have been utilized and modified as much as any automatic mechanism in history. This has resulted in literally hundreds of different variations/models that have been used by the armed forces of most of the smaller nations in the Balkans and in South America.
- the Madsen machine gun has been chambered for just about every calibre of military cartridge in use between 1900 and 1950.

- long recoil operated.

Serial Number

- marked on the top of the receiver/frame.
- serial number rationalization unknown.
- observed specimen serial number consisted of three digits without prefix or suffix.

Calibre

- the Madsen machine gun has been chambered for just about every calibre of cartridge that has seen military use between 1900 and 1950.

Shots

- detachable box magazine.

Remarks

- Madsen machine guns were used by the following countries: Argentina, Bolivia, Brazil, Bulgaria, Chile, China, Czechoslovakia, Denmark, El Salvador, England (Great Britain), Estonia, Ethiopia, Finland, France, Germany, Holland, Honduras, Hungary, Indonesia, Italy, Lithuania, Mexico, Norway, Pakistan, Paraguay, Peru, Portugal, Russia, Spain, Sweden, Thailand (Siam), Turkey, Uruguay, and Yugoslavia.
- the action and operating mechanism of the Madsen machine gun have been utilized and modified as much as any automatic mechanism in history. This has resulted in literally hundreds of different variations/models that have been used by the armed forces of most of the smaller nations in the Balkans and in South America.
- the Madsen machine gun has been chambered for just about every calibre of military cartridge in use between 1900 and 1950.

Notes

Make

- "MADSEN" may be marked on the side of the receiver/frame.
- "MADSEN" as a make is derived from the last name of Vilhelm Herman Oluf Madsen.
- Vilhelm Herman Oluf Madsen was born in 1844 and died in 1917.
- Vilhelm Herman Oluf Madsen was a Danish politician, minister, army officer, businessman and inventor.
- Vilhelm Herman Oluf Madsen was one of the founders of Dansk Rekylriffel Syndikat.
- Vilhelm Herman Oluf Madsen was the Danish Minister of War from 1901 to 1905.
- Vilhelm Herman Oluf Madsen was responsible for the adoption of the Madsen machine gun by the Danish Armed Forces in 1902.
- Madsen machine guns were manufactured by Dansk Rekylriffel Syndikat from 1902 to 1936 and by Dansk Industri Syndikat from 1936 to 1955.

Model

- model marked on the right side: Madsen Model (year).
- manufactured from 1902 to 1955.
- this firearm has been manufactured both as an air-cooled and as a water-cooled machine gun.
- two model/variants were built of most guns; a so-called Infantry Model with a barrel length of 587MM (23 1/8") and a so-called Cavalry Model with a 477MM (18.8") barrel length.
- this firearm works on the "long recoil" principle with a fairly low cyclic rate of fire of approximately 400 shots per minute. Some of the variant models have been fitted with a muzzle booster to increase the cyclic rate of fire by utilizing the muzzle gasses to accelerate the rearward movement of the barrel.

Type

- air or water cooled, light machine gun.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number located on the right side of the receiver.

Barrel

- two model/variants were built of most guns; a so-called Infantry Model with a barrel length of 587MM (23 1/8") and a so-called Cavalry Model with a 476MM (18 3/4") barrel length.

Calibre

- the Madsen machine gun has been chambered for just about every calibre of military cartridge in use between 1900 and 1950.

Shots

- top-loading, detachable box magazine.

Remarks

- Madsen machine guns were used by the following countries: Argentina, Bolivia, Brazil, Bulgaria, Chile, China, Czechoslovakia, Denmark, El Salvador, England (Great Britain), Estonia, Ethiopia, Finland, France, Germany, Holland, Honduras, Hungary, Indonesia, Italy, Lithuania, Mexico, Norway, Pakistan, Paraguay, Peru, Portugal, Russia, Spain, Sweden, Thailand (Siam), Turkey, Uruguay, and Yugoslavia.
- the action and operating mechanism of the Madsen machine gun have been utilized and modified as much as any automatic mechanism in history. This has resulted in literally hundreds of different variations/models that have been used by the armed forces of most of the smaller nations in the Balkans and in South America.
- the Madsen machine gun has been chambered for just about every calibre of military cartridge in use between 1900 and 1950.

FRT Report

Firearm Reference Number (FRN): 64666
Make: Madsen
Model: Madsen Belt Fed Machine Gun

Summary

Make:	Madsen
Model:	Madsen Belt Fed Machine Gun
Manufacturer:	Dansk Rekylriffel Syndikat
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	DENMARK
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
64666 - 2	303 BRITISH	N/A	645	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	
64666 - 1	8MM MAUSER	N/A	478	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MADSEN" may be marked on the side of the receiver/frame.
- "MADSEN" as a make is derived from the last name of Vilhelm Herman Oluf Madsen.
- Vilhelm Herman Oluf Madsen was born in 1844 and died in 1917.
- Vilhelm Herman Oluf Madsen was a Danish politician, minister, army officer, businessman and inventor.
- Vilhelm Herman Oluf Madsen was one of the founders of Dansk Rekylriffel Syndikat.
- Vilhelm Herman Oluf Madsen was the Danish Minister of War from 1901 to 1905.
- Vilhelm Herman Oluf Madsen was responsible for the adoption of the Madsen machine gun by the Danish Armed Forces in 1902.
- Madsen machine guns were manufactured by Dansk Rekylriffel Syndikat from 1902 to 1936 and by Dansk Industri Syndikat from 1936 to 1955.

Model

- model marked on the right side: Madsen Model (year).
- this firearm is an air-cooled machine gun.
- this firearm works on the "long recoil" principle with a fairly low cyclic rate of fire of approximately 400 shots per minute. Some of the variant models have been fitted with a muzzle booster to increase the cyclic rate of fire by utilizing the muzzle gasses to accelerate the rearward movement of the barrel.

Manufacturer

- manufacturer's name may not be marked on the firearm.

Type

- medium machine gun.

Action

- long recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number
- the serial number is traditionally marked on the receiver.
- serial number rationalization unknown.

Shots
- belt fed machine gun.

Remarks
- the action and operating mechanism of the Madsen machine gun have been utilized and modified as much as any automatic mechanism in history. This has resulted in literally hundreds of different variations/models that have been used by the armed forces of most of the smaller nations in the Balkans and in South America and to some extent the British and Germans.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- May also be known as a Post 1945 "Prototype". - this is a post World War 2 modified and improved version of the Swedish AG42 semi automatic rifle manufactured in very limited quantities in Denmark for commercial sales to foreign governments. - it differs from the original Swedish rifle in being chambered for more powerful cartridges, 7MM MAUSER, 8MM MAUSER and 30-06 SPRG and having the gas system modified so that the Ljungman's breech system will safely handle these cartridges.
Manufacturer	- appears on the receiver/frame.
Action	- gas operated.
Serial Number	- appears on the receiver/frame.
Shots	- Introduced with magazine with a 10 shot capacity. - detachable box magazine.

Model: MARK 2

Summary

Make:	Madsen
Model:	MARK 2
Manufacturer:	Dansk Industri Syndikat
Level:	Converted Automatics
Type:	Submachine Gun
Action:	Converted Automatic
Country of Manufacturer:	DENMARK
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
67705 - 1	9MM LUGER	5	200	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
67705 - 2	9MM LUGER	32	200	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- "MADSEN" is marked on the side of the receiver/frame.
- "MADSEN" as a make is derived from the last name of Vilhelm Herman Oluf Madsen.
- Vilhelm Herman Oluf Madsen was born in 1844 and died in 1917.
- Vilhelm Herman Oluf Madsen was a Danish politician, minister, army officer, businessman and inventor.
- Vilhelm Herman Oluf Madsen was one of the founders of Dansk Rekylriffel Syndikat.
- Vilhelm Herman Oluf Madsen was the Danish Minister of War from 1901 to 1905.
- Vilhelm Herman Oluf Madsen was responsible for the adoption of the Madsen machine gun by the Danish Armed Forces in 1902.

Model

- MARK 2 has a removable barrel jacket with two different styles of bayonets, wood or some other type of heat insulating material pistol grips, folding stock and this model also has a safety lever behind the magazine well that must be depressed for the firearm to fire.
- MARK 2 model is similar to the model M53, and both the M53.
- MARK 2 was derived from the model 1946, the cocking handle was changed to a small knob attached to the top of the bolt, the barrel locking nut screws onto the barrel instead of the receiver and the magazine has a curve to it. The earlier version (M46) had a small metal plate that acted as a cocking handle,a straight magazine and the barrel locking nut screws onto the receiver.
- like the other Madsen submachine guns the MARK 2 receiver can be split in-half by unscrewing the barrel lock nut.

Serial Number

- serial number was originally stamped at forward end of barrel retaining blocks. These numbers are not visible when the barrel nut is attached. Some have a serial number stamped on the receiver side that may or may not match the original number.

Shots

- detachable box magazine.

Notes

Make

- "MADSEN - SAETTER" may be marked on the left side of the receiver/frame.
- "MADSEN" is derived from the last name of Vilhelm Herman Oluf Madsen.
- Vilhelm Herman Oluf Madsen was born in 1844 and died in 1917.
- Vilhelm Herman Oluf Madsen was a Danish politician, minister, army officer, businessman and inventor.
- Vilhelm Herman Oluf Madsen was one of the founders of Dansk Rekylriffel Syndikat.
- Vilhelm Herman Oluf Madsen was the Danish Minister of War from 1901 to 1905.
- Vilhelm Herman Oluf Madsen was responsible for the adoption of the Madsen machine gun by the Danish Armed Forces in 1902.
- "SAETTER" is derived for the last name of Eric Larsen Saetter.
- Eric Larsen Saetter was the inventor of the Madsen-Saetter gas operated machine gun.
- there is no design lineage between the Madsen machine gun design and the Madsen-Saetter machine gun design.

Model

- model marked on the left side of the receiver.
- manufactured from 1952 to 1960.

Type

- air-cooled, medium machine gun.

Action

- gas operated.

Serial Number

- serial number is located on the left side of the receiver.

Calibre

- this machine gun was manufactured in any military rimless cartridge from 6.5mm to 8mm.

Shots

- belt fed machine gun.
- ammunition is packaged in 50 cartridge non-disintegrating link belts.
- belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 cartridge belt may be inserted into a 50 or a 100 cartridge container/drum in rifle calibres.

Notes

Make

- "MADSEN - SAETTER" may be marked on the left side of the receiver/frame.
- "MADSEN" is derived from the last name of Vilhelm Herman Oluf Madsen.
- Vilhelm Herman Oluf Madsen was born in 1844 and died in 1917.
- Vilhelm Herman Oluf Madsen was a Danish politician, minister, army officer, businessman and inventor.
- Vilhelm Herman Oluf Madsen was one of the founders of Dansk Rekylriffel Syndikat.
- Vilhelm Herman Oluf Madsen was the Danish Minister of War from 1901 to 1905.
- Vilhelm Herman Oluf Madsen was responsible for the adoption of the Madsen machine gun by the Danish Armed Forces in 1902.
- "SAETTER" is derived for the last name of Eric Larsen Saetter.
- Eric Larsen Saetter was the inventor of the Madsen-Saetter gas operated machine gun.
- there is no design lineage between the Madsen machine gun design and the Madsen-Saetter machine gun design.

Model

- model marked on the left side of the receiver.
- manufactured from 1952 to 1960.

Type

- air-cooled, gas operated.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number is located on the left side of the receiver/frame.

Calibre

- this machine gun was manufactured in any military rimless cartridge from 6.5mm to 8mm.

Shots

- belt fed machine gun.
- ammunition is packaged in 50 cartridge non-disintegrating link belts.
- belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 cartridge belt may be inserted into a 50 or a 100 cartridge container/drum in rifle calibres.

Notes

Make	- "M.A.G." or "Vittorio Giani" is marked on the firearm.
Model	- "GS/97" is not marked on the firearm. - this is a semi-custom rifle built on a Dakota Arms, Mauser, or Truvelo Armoury action; available in both "Standard" (big game) and "African" (dangerous game) formats. - features include: deluxe walnut Monte Carlo pistol-grip stock with recoil pad and contrasting forearm tip; blued finish; drilled and tapped for scope mounts (no open sights); detachable box magazine; integral muzzle brake; and engraving and precious-metal inlay to customer's taste.
Manufacturer	- "M.A.G." or "Vittorio Giani" is marked on the firearm. - Manifattura Armi Giani (M.A.G.) is a custom manufacturer based in Ponte Zanano, Italy, that builds custom and semi-custom bolt action and side by side rifles and shotguns. - they use both the "M.A.G." and "Vittorio Giani" trademarks on their firearms.
Action	- turn-bolt design.
Serial Number	- the serial number is marked on the receiver/frame. - the serial number rationalization is unknown. - a catalogue number is also marked on the firearm.
Barrel	- these rifles can be ordered with any barrel length between 500mm and 660mm, depending on the customer's wishes.
Calibre	- the calibre designation is marked on the firearm.
Shots	- detachable box magazine.

Notes

Make

- "Mag-na-port" is marked on the barrel.
- Mag-na-port is a large-scale customizer based in Harrison Township, Michigan, that specializes in modifying handguns, shotguns, and rifles by cutting (through EDM) recoil reducing ports in barrels; they also do general custom gunsmithing work.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- this is an "N" frame Smith & Wesson revolver that has been specially customized by Mag-na-port for concealability and recoil control when firing. - standard features include: a 2.5"/63mm or 3"/76mm barrel with two ports, the grip frame reduced to "K' frame size, deep-crowned barrel, bobbed hammer, trigger tuning, and a Baughman front sight.
Manufacturer	- Mag-na-port performs these conversions on Smith & Wesson "N" frame revolvers (29, 629, 25, 625, 57, 657, etc.), and then marks the barrel and side-plate "Mag-na-port".
Serial Number	- Mag-na-port leaves the existing Smith & Wesson serial number when converting revolvers which is marked on the receiver/frame.
Calibre	- calibre designation is marked on the barrel.

Notes

Make

- the make "MAGNUM RESEARCH INC." is marked on the right side of the firearm.

Model

- "DESERT EAGLE PISTOL" is marked on the left side of the receiver/frame.
- "Baby Desert Eagle Pistol" uses a smaller receiver/frame compared to the model "Desert Eagle Pistol" in calibres 357 MAG, 44 MAG and 50 AE.
- features include: polymer receiver/frame; fixed dovetailed sights; angular shaped slide with finger grooves at the rear; ambidextrous safety/decocker mounted at the rear of the slide; exposed hammer; rear upper tang; full length guide rod; a slide release is located on the left side of the receiver/frame; single or double action trigger mechanism; squared trigger guard; a magazine release is located at the rear of the trigger guard; serrated front strap and front of trigger guard.
- may have a picatinny rail located in front of the trigger guard.
- overall length for a 93mm (3.64") barrel is 184mm (7.25") and average weight is 0.75kg (1.65lbs).
- "Baby Desert Eagle Pistol" is available in several configurations:
- "Baby Desert Eagle" Full Size/Standard is available with a 144 mm (4.52") barrel, full size grip and an overall length of 210 mm (8.25").
- "Baby Desert Eagle Sub-Compact" is available with a 100 mm (3.93" barrel, full size grip and an overall length of 197 mm (7.75").
- "Baby Desert Eagle Compact" is available with a 93 mm (3.64") barrel, short grip and an overall length of 184 mm (7.25").

Manufacturer

- "ISRAEL WEAPON INDUSTRIES (IWI) LTD" was observer marked on the side of the receiver/frame.
- the "I.W.I." logo is marked on the grip panels.
- "I.W.I" is the acronym for Israel Weapons Industries, formerly a division of Israel Military Industries Ltd.(I.M.I).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action - recoil operated.

Shots - detachable box magazine.

Notes

Make

- "MAGNUM RESEARCH INC." was observed marked on the side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "DESERT EAGLE PISTOL" is marked on the left side of the receiver/frame.
- "Baby Desert Eagle Pistol" uses a smaller receiver/frame compared to the model "Desert Eagle Pistol" in calibre 357 MAG, 44 MAG and 50 AE.
- features include: fixed dovetailed sights; triangular shaped slide with finger grooves at the rear; ambidextrous safety/decocker mounted at the rear of the slide; exposed hammer; rear upper tang; full length guide rod; a slide release is located on the left side of the receiver/frame; single or double action trigger mechanism; squared trigger guard; a magazine release is located at the rear of the trigger guard; serrated front strap and front of trigger guard.
- picatinny rail located in front of the trigger guard.
- overall length for a 99mm (3.93") barrel is 197mm (7.75"), average weight is 0.772kg (1.7lbs).
- "Baby Desert Eagle Pistol" is available in several configurations:
- "Baby Desert Eagle" Full Size/Standard is available with a 144 mm (4.52") barrel, full size grip and an overall length of 210 mm (8.25").
- "Baby Desert Eagle Sub-Compact" is available with a 100 mm (3.93" barrel, full size grip and an overall length of 197 mm (7.75").
- "Baby Desert Eagle Compact" is available with a 93 mm (3.64") barrel, short grip and an overall length of 184 mm (7.25").

Manufacturer

- "ISRAEL WEAPON INDUSTRIES (IWI) LTD" was observer marked on the side of the receiver/frame.
- the "I.W.I." logo is marked on the grip panels.
- "I.W.I" is the acronym for Israel Weapons Industries, formerly a division of Israel Military Industries Ltd.(I.M.I).

Action

- recoil operated.

Shots

- detachable box magazine.

Notes

Make

- the make is marked on the firearm.

Model

- "Magnum's BFR" is marked on the right side of the receiver/frame.
- "BFR" is the abbreviation for "Biggest Finest Revolver".
- this is a very large stainless-steel revolver made for hunters and silhouette shooters.
- features include: round barrel with ejector assembly; solid flat top receiver/frame with non-fluted removeable cylinder and right side loading gate; exposed spurred hammer; single action trigger mechanism; Hogue rubber grips; ramp front sight and adjustable rear sight and also available with a vent rib and a bead front sight.
- can also be ordered with scope mounts or custom grips.
- overall length with long cylinder version and 191mm barrel length is 381mm (15"), average weight is 1.81kg (4lbs).

Manufacturer

- Magnum Research. Inc. began as an importer based in MN, that specialized primarily in importing IMI and CZ handguns; today, they manufacture several varieties of handguns and rifles.

Serial Number

- marked on bottom of receiver/frame, ahead of the trigger guard.

Calibre

- the 45 COLT/410 GA X 3" version of this revolver comes with an interchangeable choke tube that installs in the barrel.
- rifling caracteristics in 500S&W: 1 turn in 381mm (15").
- calibre designation is marked on the left side of the barrel.

Notes

Make

- "MAGNUM RESEARCH INC. MINNEAPOLIS MINN." is marked on the side of the slide.

Model

- "DESERT EAGLE PISTOL" is marked on the side of the slide.
- beginning in 1995, the Mark VII was partially replaced by the Mark XIX, which has been built for Magnum Research by SACO Defence Corporation.
- the characteristics of this firearm are that it is a very large, very heavy, gas operated, single action, semi automatic pistol.
- there are currently at least three distinct versions of the Desert Eagle pistol: the Mark I, the Mark VII, and the Mark XIX, which share the same general appearance.
- the Desert Eagle Mark XIX is the third production version of this pistol, the primary difference between this version and other versions of the Desert Eagle is that the Mark XIX is built on a single frame size.
- earlier Desert Eagles used different receiver/frames sizes for the .357 Mag, .41/.44 Mag, and .50 AE calibre pistols; the Mark XIX uses ONLY the largest (50 AE calibre) receiver/frame. Barrels, magazines, and bolt-heads for different calibres can be quickly interchanged.
- the Mark XIX has a unique serial number prefix "MR" and also has a ONE-PIECE barrel. Earlier Desert Eagles (Mark VII & Mark I) had a two-piece barrel with a visible line where the pieces join.
- these pistols are available in steel, aluminum, and stainless-steel, with a wide variety of finishes, including matte blue/"parkerized", bright polished blue, matte and bright nickel, matte and bright chrome, matte or bright gold, or any combination of these finishes.
- these pistols come factory standard with 152mm barrels, but additional barrels in other lengths are available.
- these pistols were designed to have interchangeable barrels and bolt assemblies; barrels, magazines, and bolt-heads have their calibre designations stamped on them.(Except for the Mark I pistol and any calibre conversion units designed for use with the Mark I.)

Manufacturer

- Mark I & Mark VII are marked "MADE IN ISRAEL" on the right side and ISRAEL MILITARY INDUSTRIES" on the left side of the slide.
- Saco-built pistols are marked "MADE IN USA", while IMI-built pistols are marked "MADE IN ISRAEL".

Action

- gas operated semi automatic.

Serial Number

- numbered on the right side of the receiver/frame, above the grip panel.
- should the serial number have a prefix "MR", the model designation is probably the Mark XIX.

Calibre

- the calibre designation will be marked on the left side of the barrel shroud assembly at the muzzle on all but the Mark I version.

Shots

- detachable box magazine.

Other Markings

- Saco-built pistols are marked "MADE IN USA", while IMI-built pistols are marked "MADE IN ISRAEL".

Remarks

- the Desert Eagle Mark VII was the second production version of this pistol, and the differences between this version and other versions of the Desert Eagle is that the Mark VII has a safety with a protruding serrated hook-shaped arm, and an adjustable trigger-pack: the adjustable trigger model can be recognized by a 1/4" adjustment hole in the front of the hammer assembly, visible inside the magazine well when the pistol is field-stripped.
- the Desert Eagle Mark XIX is the third production version of this pistol, the primary difference between this version and other versions of the Desert Eagle is that the Mark XIX is built on a single frame size.
- the Mark XIX has a unique serial number prefix "MR" and also has a ONE-PIECE barrel. Earlier Desert Eagles (Mark VII & Mark I) had a two-piece barrel with a visible line where the pieces join.
- the Mark XIX also has a safety with a protruding serrated hook-shaped arm, and an adjustable trigger-pack: the adjustable trigger model can be recognized by a 1/4" adjustment hole in the front of the hammer assembly, visible inside the magazine well when the pistol is field-stripped.
- the grip panels are screwed to the receiver/frame on the Mark XIX while on the Mark I & Mark VII the grip panels are retained by a plunger on the bottom of the butt hand grip.
- the Desert Eagle series of pistols were designed from the outset to have interchangeable barrel/slide/bolt assemblies, so each of these components will have their proper calibre stamped on them (except for the Mark I pistol and any calibre conversion units designed for use with the Mark I).
- the calibre designation will be marked on the left side of the barrel shroud assembly at the muzzle on all but the Mark I version of this firearm.

FRT Report

Firearm Reference Number (FRN): 125465
Make: Magnum Research
Model: Desert Eagle

Summary

Make:	Magnum Research
Model:	Desert Eagle
Manufacturer:	Umarex
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Air,Spring or Gas
Country of Manufacturer:	
Serial Numbering:	
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
125465 - 1	177 PELLET	8	144	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MAGNUM RESEARCH INC. MINNEAPOLIS MINN." is marked on the left side of the air pistol.

Model

- "Desert Eagle Pistol" is marked on the left side of the air pistol.
- also available in a smaller version as the "Baby Desert Eagle".
- features include: ramp front and adjustable rear sight; upper and lower mounted accessory rails; single and double action; squared trigger guard; removable cylinder/drum for reloading; left side mounted unlocking lever; external hammer; safety lever mounted on the left rear of the slide; CO2 cylinder is housed in the grip.
- do not confuse this with the "Airsoft" 6mm version made in France for Magnum Research by Cybergun.

Manufacturer

- manufacturer's name is marked on the right side of the air pistol.

Action

- CO2 powered, blowback operated.
- does not discharge a projectile at a muzzle velocity exceeding 152.4 mps and/or a muzzle energy exceeding 5.7 Joules.

Shots

- drum/rotary magazine.

Notes

Make

- "Magnum Research Minneapolis MN" was observed marked on the right side of the receiver/frame.
- "BUL LTD" and "MADE IN ISRAEL" was observed marked on the right side of the receiver/frame.

Model

- introduced in 2010.
- "DESERT EAGLE 1911 C." was observed marked on the right side of the slide.
- this is a compact version of a 1911 style pistol.
- features include: round rifled barrel; flat sided slide with right side ejection, rear grip serrations and fixed sights; carbon steel 1911-A1 type receiver/frame with bevelled magazine well; skeletonized hammer and trigger; single action trigger mechanism; enhanced beaver tail grip safety; action release lever, extended manual thumb safety, and magazine release button are mounted on the left side of the receiver/frame; checkered wooden grip plates; stainless or blue/black oxide finish; coin finished trigger and grip safety.
- overall length is 200 mm (7.87"), overall height is 133 mm (5.25"), overall width is (1.3"), and average weight is 0.96 kgs (2.1 lbs).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "BUL LTD" and "MADE IN ISRAEL" was observed marked on the right side of the receiver/frame.
- Bul Transmark Limited is a manufacturer located in Tel Aviv, Israel.
- Bul Transmark Limited manufactures several handguns based on the 1911 and CZ-75 lines.
- Bul Transmark Limited firearms have been imported and distributed in North America by the following companies:
- All American Sales, Incorporated of Memphis, TN, USA in 1966 and 1997.
- International Security Academy (ISA) of Los Angeles, CA, USA from 1997 to 2001.
- European American Armory Corporation (EAA Corp) of Sharpes, FL, USA in 2002.
- Legacy Sports International of Reno, NV, USA since 2003.
- Charles Daly and K.B.I. Incorporated of Harrisburg, PA, USA from 2003 to 2009.
- Charles Daly has been a trade name used by K.B.I. Incorporated since 1996.
- Magnum Research, Incorporated of Minneapolis, MN, USA since 2010.

Action

- recoil operated.

Serial Number

- serial number is marked on the receiver/frame.
- observed serial number consisted of a letter "C" prefix and six numbers.

Shots

- detachable box magazine.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "MAGNUM RESEARCH INC. MINNEAPOLIS MINN." is marked on the right side of the slide.
Model	- complete model designation is not marked on pistol. - firearm slide marked "Desert Eagle / calibre (as applicable)". - manufactured between 1982 and 1989. - this is a large, heavy, gas operated, single action, semi automatic pistol designed by Magnum Research, and originally manufactured by IMI in Israel. - there are currently at least three distinct versions of the Desert Eagle (the Mark I, the Mark VII, and the Mark XIX), and they all share the same general appearance; - the Desert Eagle Mark I was the first production version of this pistol. - the only obvious external difference between this version and later versions of the Desert Eagle is that the Mark I has a tear-drop shaped safety WITHOUT a protruding serrated hook-shaped arm, the Mark I gas piston is not permanently pinned to the slide and is readily removable, as is the gas piston of the Mark XIX, on the Mark VII the gas piston is permanently pinned to the slide. - Mark I Desert Eagles originally came with a non-adjustable trigger pack (although the adjustable trigger can be retro-fitted): the adjustable trigger can be recognized by a 1/4" adjustment hole in the front of the hammer assembly, visible inside the magazine well when the pistol is field stripped. - these pistols were available in steel, aluminium, and stainless-steel, with a wide variety of finishes, including matte blue/"parkerized", bright polished blue, matte and bright nickel, matte and bright chrome, gold, or any combination of these finishes. - rubber wrap around grips were standard on these pistols, but laser-engraved wooden grips were a factory option. - these pistols came factory standard with 152mm barrels, but additional barrels in 254mm and 356mm could also be ordered; - the original Mark I's were only made in 357 Mag and 44 Mag, however, the 41 Mag (the same frame as the 44 Mag) was offered for approximately a year before the Mark VII was introduced.
Manufacturer	- Mark I & Mark VII are marked "MADE IN ISRAEL" on the right side and ISRAEL MILITARY INDUSTRIES" on the left side of the slide.
Action	- gas operated.
Serial Number	- numbered on the right side of the receiver/frame, above the grip panel. - serial number rationalization unknown. - observed specimen serial number consisted of a letter prefix and four numbers.
Calibre	- the calibre designation will be marked on the left side of the barrel shroud assembly at the muzzle on all but the Mark I pistol.
Shots	- detachable box magazine.
Other Markings	- Maganum Reasearch / Saco-built pistols are marked "MADE IN USA", while IMI-built pistols are marked "MADE IN ISRAEL".
Remarks	- some of the earliest Desert Eagle Mark I's bear no Magnum Research markings; these pistols can be found under make "IMI" ("Israel Military Industries"). - the calibre designation will be marked on the left side of the barrel shroud assembly at the muzzle on all but the Mark I pistol. - the Mark I gas piston is not permanently pinned to the slide and is readily removable as is the Mark XIX gas piston, on the Mark VII the gas piston is permanently pinned to the slide.

Notes

Make - "MAGNUM RESEARCH INC. MINNEAPOLIS MINN." is marked on the right side of the slide.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- complete model designation is not marked on pistol. - firearm slide marked "Desert Eagle - calibre (as applicable) Pistol". - this is a large, heavy, gas operated, single action, semi automatic pistol designed by Magnum Research, manufactured by IMI in Israel, between 1989 and 1995, then re-introduced in 1998. - in 1995, the Mark VII was partially replaced by the Mark XIX, which has been built by Saco in the United States. - there are currently at least three distinct versions of the Desert Eagle (the Mark I, the Mark VII, and the Mark XIX), and they all share the same general appearance. - the Desert Eagle Mark VII was the second production version of this pistol, and the differences between this version and other versions of the Desert Eagle is that the Mark VII has a safety with a protruding serrated hook-shaped arm, and an adjustable trigger-pack: the adjustable trigger model can be recognized by a 1/4" adjustment hole in the front of the hammer assembly, visible inside the magazine well when the pistol is field-stripped, the Mark VII gas piston is permanently pinned to the slide. - these pistols were available in steel, aluminium, and stainless-steel, with a wide variety of finishes, including matte blue/"parkerized", bright polished blue, matte and bright nickel, matte and bright chrome, gold, or any combination of these finishes. - rubber wrap around grips were standard on these pistols, but laser-engraved wooden grips were a factory option. - these pistols came factory standard with 152mm barrels, but additional barrels in 254mm and 356mm could also be ordered. - these pistols were manufactured in 357 Mag, 41 Mag, 44 Mag, and 50 AE, but the 41 Mag chambering was dropped when production was changed to the Mark XIX model. - these pistols were designed from the outset to have interchangeable barrel/slide/bolt assemblies, so each of these components will have their proper calibre designation stamped on them (unlike the Mark I).
Manufacturer	- Mark I & Mark VII are marked "MADE IN ISRAEL" on the right side and "ISRAEL MILITARY INDUSTRIES" on the left side of the slide.
Action	- gas operated.
Serial Number	- numbered on the right side of the receiver/frame, above the grip panel. - serial number rationalization unknown. - observed specimen serial number consisted of five digits without prefix or suffix.
Calibre	- the calibre designation will be marked on the left side of the barrel shroud assembly at the muzzle.
Shots	- detachable box magazine.
Other Markings	- Magnum Research / Saco-built pistols are marked "MADE IN USA", while IMI-built pistols are marked "MADE IN ISRAEL".
Remarks	- the Desert Eagle Mark VII was the second production version of this pistol, and the differences between this version and other versions of the Desert Eagle is that the Mark VII has a safety with a protruding serrated hook-shaped arm, and an adjustable trigger-pack: the adjustable trigger model can be recognized by a 1/4" adjustment hole in the front of the hammer assembly, visible inside the magazine well when the pistol is field-stripped. - the calibre designation will be marked on the left side of the barrel shroud assembly at the muzzle on all but the Mark I pistol. - the Mark I gas piston is not permanently pinned to the slide and is readily removable, as is the Mark XIX on the Mark VII the gas piston is permanently pinned to the slide.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "MAGNUM RESEARCH INC. / MINNEAPOLIS MN" marked on the side of the slide.
Model	- complete model designation is not marked on pistol. - firearm marked "Desert Eagle Pistol" or "Desert Eagle". - this is a very large gas operated single action semi automatic pistol designed by Magnum Research; beginning in 1995, the Desert Eagle Mark XIX has been built both by Saco in the United States and by IMI in Israel. - there are currently at least three distinct versions of the Desert Eagle (the Mark I, the Mark VII, and the Mark XIX), and they all share the same general appearance. - the Desert Eagle Mark XIX is the third production version of this pistol, and the primary difference between this version and other versions of the Desert Eagle is that the Mark XIX is built on a single frame size. - earlier Desert Eagles used different frames for the .357 Mag, .41/.44 Mag, and .50 AE pistols, the Mark XIX uses ONLY the 50 AE frame, and barrels, magazines, and bolt-heads for different calibres can be quickly interchanged. - the Mark XIX has a safety with a protruding serrated hook-shaped arm, and an adjustable trigger-pack; the Mark XIX also has a ONE-PIECE barrel. Earlier Desert Eagles had a two-piece barrel with a separate portion where the locking lugs engage; these pistols have a line visible where the pieces join. - these pistols are available in steel, aluminum, and stainless-steel, with a wide variety of finishes, including matte blue/"parkerized", bright polished blue, matte and bright nickel, matte and bright chrome, matte or bright gold, or any combination of these finishes. - rubber wrap around grips are standard on these pistols, but laser-engraved wooden grips are a factory option. - these pistols come factory standard with 152mm barrels, but additional barrels in 254mm can also be ordered. - these pistols were designed from the outset to have interchangeable barrel/slide/bolt assemblies, so barrels, magazines, and bolt-heads will have their proper calibre stamped on them. (Except for the Mark I pistol and any early calibre conversion units.)
Manufacturer	- "MADE IN ISRAEL" may be marked on the side of the receiver/frame. - "ISRAEL MILITARY INDUSTRIES (IMI)" marked on the left side of the slide.
Action	- gas operated.
Serial Number	- serial number is marked on the right side of the receiver/frame.
Shots	- detachable box magazine.
Other Markings	- Saco-built pistols are marked "MADE IN USA", while IMI-built pistols are marked "MADE IN ISRAEL".

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "MAGNUM RESEARCH INC." over "MINNEAPOLIS MN USA" is marked on the right side of the slide.
Model	- complete model designation is not marked on pistol. - "DESERT EAGLE PISTOL" over "MADE IN THE U.S.A." is marked on the left side of the slide. - Desert Eagle Mark XIX pistols were manufactured in the USA for Magnum Research by SACO Defence Corporation from 1995 to 1998. - the characteristics of this firearm are that it is a very large, very heavy, gas operated, single action, semi automatic pistol. - there are currently at least three distinct versions of the Desert Eagle pistol: the Mark I, the Mark VII, and the Mark XIX, which share the same general appearance. - the Mark I gas piston is not permanently pinned to the slide and is readily removable as is the Mark XIX gas piston, on the Mark VII the gas piston is permanently pinned to the slide. - the Desert Eagle Mark XIX is the third production version of this pistol, the primary difference between this version and other versions of the Desert Eagle is that the Mark XIX is built on a single frame size. - earlier Desert Eagles used different receiver/frames sizes for the .357 Mag, .41/.44 Mag, and .50 AE calibre pistols, the Mark XIX uses ONLY the largest (50 AE calibre) receiver/frame, barrels, magazines, and bolt-heads for different calibres can be quickly interchanged. - the Mark XIX has a unique serial number prefix "MR" and also has a ONE-PIECE barrel. Earlier Desert Eagles (Mark VII & Mark I) had a two-piece barrel with a visible line where the pieces join. - these pistols are available in steel, aluminium, and stainless-steel, with a wide variety of finishes, including matte blue/"parkerized", bright polished blue, matte and bright nickel, matte and bright chrome, matte or bright gold, or any combination of these finishes. - these pistols come factory standard with 152mm barrels, but additional barrels in other lengths are available. - these pistols were designed to have interchangeable barrels and bolt assemblies; barrels, magazines, and bolt-heads have their calibre designation stamped on them. (Except for the Mark I pistol.)
Manufacturer	- manufacturer's designation is not marked on the firearm. - these pistols were manufactured for Magnum Research by Saco Defense Corp. of Maine, U.S.A. - Saco Defense of Saco, Maine, U.S.A. was acquired by General Dynamics in 2000.
Action	- gas operated firearm. - rotary locking bolt similar to the Colt AR-15 rifle.
Serial Number	- the serial numbered is marked on the right side of the receiver/frame above the hand grip plates. - serial number rationalization unknown. - sample serial number observed on firearm marked "DESERT EAGLE PISTOL" "MADE IN USA" on the left side of the slide consisted of a two letter prefix "MR" followed by six digits without a suffix. - NOTE: zeros are used as place holders to produce a six digit serial number.
Shots	- detachable box magazine.
Other Markings	- Saco-built pistols are marked "MADE IN USA", while IMI-built pistols are marked "MADE IN ISRAEL".

Notes

Make

- "MAGNUM RESEARCH INC." over "MINNEAPOLIS MN USA" was observed marked on the side of the slide.

Model

- introduced in 2009.
- limited edition of 250 units celebrating 25 years of the Desert Eagle Pistol.
- Desert Eagle Mark XIX's are being manufactured by Magnum Research in Pillager, Minnesota, USA beginning in 2009.
- features include: silver titanium finish with gold appointments and laser engraved walnut wood grips; right side magazine release; right side slide lock; ambidextrious safety; exposed hammer; Picatinny top rail; front blade and rear fixed sight.
- overall length with a 152 mm barrel is 273.05 mm (10.75") and average weight is 2.04kgs (4.5lbs).
- delivered in a walnut display case.

Manufacturer

- "MAGNUM RESEARCH INC." over "MINNEAPOLIS MN USA" was observed marked on the side of the slide.

Action

- gas operated.

Serial Number

- serial number was observed marked on the right side of the receiver/frame.
- observed serial number consisted of eight numbers without a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- calibre was observed marked on the forward left side of the barrrel.
- rifling characteristics in calibre 357 MAG: polygonal rifling, 1 turn in 14 inches, right hand twist.
- rifling characteristics in calibre 44 MAG: polygonal rifling, 1 turn in 18 inches, right hand twist.
- rifling characteristics in calibre 50 AE: polygonal rifling, 1 turn in 19 inches, right hand twist.

Shots

- detachable box magazine.

Notes

Make

- Magnum Research. Inc. began as an importer that specialized primarily in importing IMI and CZ handguns; today, they manufacture several varieties of handguns and rifles.

Model

- introduced in 2007.
- "Model MLP-1722" is marked on the left side of the receiver/frame.
- "MLP" stands for "Magnum Lite Pistol".
- remarkably similarity to a Ruger 10-22 rifle action with the Ruger trigger mechanism and housing and the Ruger rotary magazine; the Receiver/frame is manufactured by Magnum Research with a ventilated, integral, Picatinny-style rail for Weaver-style rings.
- features include: one piece custom receiver/frame with integral scope base and target trigger; match bolt and oversized bolt handle; no sights; large diameter steel liner barrel wrapped with carbon fibers layers (the carbon layers are uni-directional and parallel to the bore axis); conventional vertical laminated "Barracuda" style stock available in forest camo (green & tan), nutmeg (coffee colored) or pepper (grey & black) finish.
- overall length with a 254mm (10") barrel is 520mm (20.5") average weight is 1.36kg (3lbs).

Manufacturer

- "Magnum Research MPLS, MN" is marked on the left side of the receiver/frame.
- "MPLS" is an acronym for Minneapolis and "MN" is for "Minnesota".

Action

- blowback operated.

Serial Number

- serial number is marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre is marked on the barrel.
Shots	- detachable rotary magazine.

Notes

Make

- may not be marked on the firearm.
- Magnum Research. Inc. began as an importer based in MN, that specialized primarily in importing IMI and CZ handguns; today, they manufacture several varieties of handguns and rifles.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "MAGNUM LITE" may be marked on the barrel near the muzzle. - "Ruger 10/22" is marked on the receiver/frame. - this is a standard Ruger 10/22 that has been customized by Magnum Research; the most obvious change is that the barrel has been replaced with a large-diameter carbon-fiber wrapped barrel with an integral compensator, and the rifle has been fitted with the customer's choice of synthetic or laminated stock (sporter or thumbhole style) - these rifles have also been fitted with one or more "upgrades", in the form of a Clark trigger, bolt-release, magazine-release, or other custom accessories.
Manufacturer	- Magnum Research performs these conversions on both factory-new Ruger 10/22 rifles and on 10/22 rifles that customers send to them.
Action	- direct blow-back.
Serial Number	- the serial number is located on the front left side of the receiver/frame. - Ruger's serial numbering is not changed by Magnum Research. - observed specimen had eight digits.
Shots	- detachable rotary magazine; aftermarket magazines available in capacities up to 50 rounds.

Firearm Reference Number (FRN): 197910
Make: Magyar
Model: Flat Foot

Summary

Make:	Magyar
Model:	Flat Foot
Manufacturer:	Almassy, Paul
Level:	Manufacturer Specifications and Commercial Customization
Type:	Cannon
Action:	Single-Shot
Country of Manufacturer:	
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
197910 - 1	1.75" MATCHLOCK	1	450	Antique AFR, Section 1, para. 1	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "MAGYAR" is marked on a plaque attached to the two-wheeled frame from which the cannon is mounted on.
Model	- "FLAT FOOT" is marked on a plaque attached to the two-wheeled frame from which the cannon is mounted on. - This 'cannon' appears to have been made in extremely limited quantities, as marked on the plaque that it is "One of Three". - Features include: short, squat receiver/frame mounted on (wagon-like) carriage/frame with two unique flatfooted wheels; three handled, height adjusting/leveling vertical crank/toggle; wooden ram rod mounted on the guns carriage.
Manufacturer	- "Paul Almassy" followed by "1927" is marked on a plaque attached to the two-wheeled frame from which the cannon is mounted on.
Action	- Muzzle loading.
Calibre	- The calibre designation is not marked on the firearm.
Remarks	- The cannon is mounted on a two wheeled extended metal frame. The "wheels" of the frame are unique in that they resembles flat, tan/light brown, disks with approximately twelve (12) separate plates or feet screwed into/onto the disk wheels, held in place with brass nuts and bolts.

Notes

Make

- "Mais du Chasseur E Mahillon" over "Bruxelles" was observed marked on the barrel.

Model

- model designation is not marked on the firearm.
- this model is based on a Mauser 98 type action.
- features observed: blued, round stepped rifled barrel with hooded blade front sight and flip-up adjustable express type open rear sight; receiver/frame is drilled and tapped for scope mounts; bolt release located on the left side of the receiver/frame; wing type safety located on the bolt; magazine floor plate release is located on the front of the trigger guard; one piece walnut pistol grip stock with black forearm tip, cheek piece, pistol grip cap and rubber recoil pad; sling swivels; blued finish.

Action

- turn-bolt design.

Serial Number

- "023" was observed marked on the underside of the receiver/frame.
- "12023" was observed marked on the right side of the barrel, underside of the bolt body and on the inside of the stock.
- "23" was observed marked on the underside of the bolt release.

Calibre

- calibre was observed marked on the left side of the barrel.

Shots

- integral box magazine with front hinged floor plate.

Firearm Reference Number (FRN): 78715
Make: Mahillon, H
Model: Custom Target

Summary

Make:	Mahillon, H
Model:	Custom Target
Manufacturer:	
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	BELGIUM
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
78715 - 1	6MM FLOBERT RF	1	660	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- may be marked "H.Mahillon A.Bruxelles"

Model

- model designation is not marked on the firearm.
- features include:
- heavy octagonal target barrel with a rail cut in the top rear of the barrel so the rear sight may be moved forward or backward about one 1/4 of the length of the barrel.
- adjustable front sight.
- this firearm uses the Flobert "plain" system type action.
- this system differs from the original Flobert System, with the primary difference being the separate extractor.
- the extractor is a half circle type that pivots on a pin in the frame. To extract a case from the chamber one must pull back on this lever that extends out to the side.
- hammer spur extends to the side, hammer face is smooth except for two half moons/scallops which form a striker bar type firing pin.

Action

- single shot Flobert "plain" system.

Serial Number

- examples observed have sequential numbers and a letter suffix.

Other Markings

- usually marked with Belgium proof marks.

Notes

Make

- the "Mainardi" name is not marked on the firearm.
- the "Mainardi" interlocking double diamond logo is marked on the underside of the barrel.

Model

- model designation is not marked on this firearm.
- this is a modern reproduction of the "Colt 1838 Paterson No.5 Holster Model" black powder percussion revolver, originally manufactured from 1838 to 1840.
- this model was also known as the "Texas Paterson".
- features include: five shot percussion ignition cylinder; single action folding trigger with no trigger guard; blued steel receiver/frame with no top strap over the cylinder; octagonal barrel with or without attached loading lever; single bead front sight; blued finish; walnut grips.
- the trigger drops down when the hammer is cocked.
- the cylinder is engraved with the scene of a stagecoach hold up.

Manufacturer

- the manufacturer's name is not marked on the firearm, however, the interlocking double diamond "Mainardi" trademark logo is marked on the underside of the barrel and may be repeated on the receiver/frame.
- "Made in Italy" is also marked on the barrel.
- Italian proofmarks are marked on the receiver/frame/barrel.
- "M.O.F.R.A. di Mainardi A" trademark logo consists of an interlocking double diamond.
- "M.O.F.R.A. di Mainardi A was located in Brescia, Italy circa 1971.
- "Palmetto di Mainardi Vila" logo consists of a palm tree inside a circle.
- "Palmetto di Mainardi Vila" was located in Brescia, Italy circa 1980.

Serial Number

- serial number is marked on the front underside of the receiver/frame.
- known example had a three digit number without prefix or suffix.

Calibre

- calibre designation is marked on the right rear side of the barrel as, "CAL 36".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - known example was marked "BLACK POWDER ONLY" on the left side of the barrel.

Notes

Make

- the "Mainardi" name is not marked on the firearm.
- the "Mainardi" interlocking double diamond logo will be marked on the underside of the barrel and/or the receiver/frame and/or the cylinder.

Model

- "Spiller and Burr" is marked on the top of the barrel.
- this is a reproduction of the Spiller & Burr, Whitney Type revolver which they originally produced for the Confederate States of America from approximately 1862 to 1865.
- features include: single action, percussion ignition; a brass receiver/frame; blued cylinder and octagonal barrel; colour case-hardened trigger, hammer and rammer.
- Italian proofmarks are apparent on the barrel and receiver/frame of this firearm.

Manufacturer

- the manufacturer's name is not marked on the firearm.
- "MADE IN ITALY" and the interlocking double diamond "Mainardi" logo will be marked on the barrel and/or the receiver/frame and/or the cylinder.
- Italian proofmarks are marked on the receiver/frame, barrel and cylinder.
- "M.O.F.R.A. di Mainardi A" logo consists of an interlocking double diamond.
- "M.O.F.R.A. di Mainardi A was located in Brescia, Italy circa 1971.
- "Palmetto di Mainardi Vila" logo consists of a palm tree inside a circle.
- "Palmetto di Mainardi Vila" was located in Brescia, Italy circa 1980.

Serial Number

- serial number is usually marked on the underside of the receiver/frame, the bottom of the grip frame and/or the side of the grip frame underneath the grip plates.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - known example was marked, "Cal. 36 Black Powder Only" on the right side of barrel.

Firearm Reference Number (FRN): 119058
Make: Makarov
Model: M

Summary

Make:	Makarov
Model:	M
Manufacturer:	Thalmann
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	GERMANY, EAST
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
119058 - 1	9MM MAKAROV	8	91	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Makorov" is marked on the right side of the receiver/frame.
- "Makarov" is derived from the last name of the Russian designer, Nikolay F. Makarov.
- Nikolay Fedorovich Makarov was born in 1914 and died in 1988.
- Nikolay Fedorovich Makarov's 9mm pistol was adopted by the Russian/Soviet military in 1951 as the "Pistolet Makarov" or "PM".

Model

- model is usually not marked on the firearm. This is a commercial version of the military pistol designed by N.F. Makarov as a replacement for the TT series of pistols.
- features include: disassembly by lowering the trigger guard and lifting the slide and return spring off of the receiver/frame for disassembly; slide mounted safety catch which also releases the hammer when applied, lowering the hammer onto a hammer block; double/single action trigger mechanism; magazine release catch located on the bottom of the hand grip/butt; the extractor functions as a loaded chamber indicator by standing proud of the slide when a cartridge is chambered; wrap-around grip plates; unlike the Walther PP or PPK pistol the Makarov pistol has a slide release lever on the left side.

Manufacturer

-"Ernst Thaelmann, Germany" is marked on the right side of the receiver/frame.
- the firearm was manufactured after 1945.

Action

- blowback operated.

Serial Number

- in compliance with U.S. importation requirements, the sample observed had a newly applied 5 digit serial number located on the bottom left side of the receiver/frame underneath the grip panel.
- the original factory applied serial number is located on the left side of the receiver/frame above the grip panel and above the trigger on the left side of the slide.
- serial number rationalization unknown.
- observed specimen serial number consisted of five digits without prefix or suffix.
- sample imaged has a two letter prefix "AY" followed by four numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre designation is marked on the right side of the receiver/frame.
Shots	- detachable box magazine.
Importer	- "G.P.Trading Ltd" was located in St.Albin, Vermont, U.S.A. from 1989 to 1997 and was an importer of Eastern bloc firearms.
Other Markings	- marked "Makarov mod.M 9x18 mm" over "Ernst Thaelmann,Germany" over "G P TRAD. St. Alb. Vt." on the right side of the receiver/frame.

129275 - 2	9MM MAKAROV	8	93	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MAKAROV" is marked on the left side of the slide.
- "Makarov" is derived from the last name of the Russian designer, Nikolay F. Makarov.
- Nikolay Fedorovich Makarov was born in 1914 and died in 1988.
- Nikolay Fedorovich Makarov's 9mm pistol was adopted by the Russian/Soviet military in 1951 as the "Pistolet Makarov" or "PM".

Model

- "MAKAROV" is marked on the left side of the slide of an observed example.
- known as the Pistol Makarov or PM.
- this firearm is the standard Russian Armed Forces issue side arm, as manufactured in Bulgaria, for commercial export sales.
- this firearm has distinct similarities to the Walther PP and PPK as manufactured in Germany prior to and during the Second World War.
- features include: disassembly by lowering the trigger guard and lifting the slide and return spring off of the receiver/frame for disassembly; slide mounted safety catch which also releases the hammer when applied, lowering the hammer onto a hammer block; double/single action trigger mechanism; magazine release catch located on the bottom of the hand grip/butt; the extractor functions as a loaded chamber indicator by standing proud of the slide when a cartridge is chambered; wrap-around grip plates; unlike the Walther PP or PPK pistol the Makarov pistol has a slide release lever on the left side.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "10" inside two circles and/or "Arsenal" and "Made in Bulgaria" may be marked on the side of the slide.
- "Arsenal" is a manufacturer located in Kazanlak, Bulgaria.
- "Bulgarian Artillery Arsenal" was originally established in Rousse, Bulgaria circa 1878 for the Bulgarian Army.
- "Artillery Arsenal" was transferred to Sofia and became the "Sofia Artillery Arsenal" in 1891.
- "Sofia Artillery Arsenal" was moved to Kazanlak in 1924 and became the "State Military Factory".
- "State Military Factory" in Kazanlak, Bulgaria was given the code name "Factory 10" in 1948.
- "Factory 10" was identified by a "10" in a double circle.
- "Factory 10" started production of assault rifles circa 1958.
- "Factory 10" was renamed the "United Industrial Plant Friedrich Engles" circa 1964.
- "United Industrial Plant Friedrich Engles" was known as "F. Engles Machine Building Plant" from 1977 to 1987.
- "Arsenal/Arsenal Limited/Arsenal JSCo/Arsenal 2000 JSCo" was established in 1987.
- "Arsenal Bulgaria" also uses the logo of "10" in a double circle.
- "Arsenal" was exclusively imported from 1994 to 1996 by Sentinel Arms.
- "Sentinel Arms" was located in Detroit, Michigan U.S.A.
- "Arsenal" is exclusively imported by "Arsenal Incorporated".
- "Arsenal Inc." was established in 2001.
- "Arsenal Inc." is located in Las Vegas, Nevada U.S.A.

Action

- blowback operated.

Serial Number

- the serial number is marked on the left side of the receiver/frame above the grip and may be repeated on the right side of the slide.
- serial number observed had a two letter prefix followed by a space followed by a two digit number followed by a space and a four digit number.

Shots

- detachable box magazine.

FRT Report

Firearm Reference Number (FRN): 143385
Make: Makarov
Model: PB

Summary

Make:	Makarov
Model:	PB
Manufacturer:	Russian State Arsenals
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
143385 - 1	9MM MAKAROV	8	105	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Makarov" is not marked on the firearm.
- "Makarov" is derived from the last name of the Russian designer, Nikolay F. Makarov.
- Nikolay Fedorovich Makarov was born in 1914 and died in 1988.
- Nikolay Fedorovich Makarov's 9mm pistol was adopted by the Russian/Soviet military in 1951 as the "Pistolet Makarov" or "PM".

Model

- the model is not marked on the firearm.
- "PB" stands for "Pistolet Besshumny", or "Pistol, Silent"
- this is a variant of the Makarov PM made with an integral two-piece suppressor (the front half of the suppressor is removable for transport), for use by scout and special operations troops, or for espionage operatives, designed by A.A. Deryagin in the 1960s.
- features include: blued finish, noticeably thicker muzzle than the standard PM, fixed sights, brown synthetic grip panels, slide-mounted safety/decocking lever, SA/DA operation, heel-mounted magazine release, and a number of internal changes to allow operation with the suppressor.
- the first stage of the suppressor consists of a mesh-wrapped cylinder surrounding the ported barrel (all inside the forward half of the slide), while the detachable second/forward half of the suppressor is a multi-chamber design inside a quick-detachable tube that twists to lock onto an interrupted thread inside the muzzle.
- because the location of the suppressor interferes with the location of the recoil spring in the standard PM, the PB uses a spring-loaded rocking lever beneath one of the grip plates to give spring pressure to cycle the slide.

Manufacturer

- the manufacturer may or may not be marked on the firearm, in the form of a factory code or insignia.

Action

- blowback operated.

Serial Number

- numbered on the slide and frame, in the normal Russian style of two Cyrillic letters followed by two or more numbers, and sometimes with a Cyrillic suffix letter.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine.
Canadian Law Comments	- this firearm left the factory equipped with an integral sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada. - if the prohibited device (sound suppressor/silencer) were to be removed from the handgun, the firearm is correctly identified as a "Prohibited Firearm".

Notes

Make

- "Makarov" is not marked on the firearm.
- "Makarov" is derived from the last name of the Russian designer, Nikolay F. Makarov.
- Nikolay Fedorovich Makarov was born in 1914 and died in 1988.
- Nikolay Fedorovich Makarov's 9mm pistol was adopted by the Russian/Soviet military in 1951 as the "Pistolet Makarov" or "PM".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model may be marked on the right side of the slide. - this model was manufactured in the former "East Germany" for use as the DDR armed forces service pistol. - this firearm is an almost exact copy of the Russian (PM) Makarov pistol. The differences were minor. The "Pistol M" did not have a loaded chamber indicator on top of the receiver/frame, and hammer used a leaf spring instead of a coil spring. - features include: a double action trigger mechanism; blued receiver/frame and slide; a fixed front sight with a fixed rear sight; serration's on the rear of the slide; rounded hammer; safety located at the rear of the slide; no lanyard loop; magazine release located on the butt of the grip; may have checkered grip panels.
Manufacturer	- the manufacturer may not be marked on the firearm.
Action	- blowback operated.
Serial Number	- the serial number is marked on the left side of the receiver/frame. - the serial number may have one alpha letter character followed by four sequential numbers. - the same number may be marked on the left side of the slide.
Calibre	- the calibre designation is marked on the left side of the firearm.
Shots	- detachable box magazine.
Other Markings	- the left side of the receiver/frame may have a diamond enclosing a circle followed by a "K100" within a rectangle. - the probable manufacturer of this pistol is the East German State Arsenal known as the Ernst Thaelmann Werke. Most records and archives of the former DDR have been lost since the former East Germany was amalgamated into the Federal Republic of Germany.

59438 - 1	9MM MAKAROV	8	93	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MAKAROV" is marked on the left side of the slide.
- "Makarov" is derived from the last name of the Russian designer, Nikolay F. Makarov.
- Nikolay Fedorovich Makarov was born in 1914 and died in 1988.
- Nikolay Fedorovich Makarov's 9mm pistol was adopted by the Russian/Soviet military in 1951 as the "Pistolet Makarov" or "PM".

Model

- known as the Pistol Makarov or PM.
- this firearm is the standard Russian Armed Forces issue side arm, as manufactured in Bulgaria, for commercial export sales.
- this firearm has distinct similarities to the Walther PP and PPK as manufactured in Germany prior to and during the Second World War.
- features include: disassembly by lowering the trigger guard and lifting the slide and return spring off of the receiver/frame for disassembly; slide mounted safety catch which also releases the hammer when applied, lowering the hammer onto a hammer block; double/single action trigger mechanism; magazine release catch located on the bottom of the hand grip/butt; the extractor functions as a loaded chamber indicator by standing proud of the slide when a cartridge is chambered; wrap-around grip plates; unlike the Walther PP or PPK pistol the Makarov pistol has a slide release lever on the left side.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "10" inside two circles and/or "Arsenal" and "Made in Bulgaria" may be marked on the side of the slide.
- "Arsenal" is a manufacturer located in Kazanlak, Bulgaria.
- "Bulgarian Artillery Arsenal" was originally established in Rousse, Bulgaria circa 1878 for the Bulgarian Army.
- "Artillery Arsenal" was transferred to Sofia and became the "Sofia Artillery Arsenal" in 1891.
- "Sofia Artillery Arsenal" was moved to Kazanlak in 1924 and became the "State Military Factory".
- "State Military Factory" in Kazanlak, Bulgaria was given the code name "Factory 10" in 1948.
- "Factory 10" was identified by a "10" in a double circle.
- "Factory 10" started production of assault rifles circa 1958.
- "Factory 10" was renamed the "United Industrial Plant Friedrich Engles" circa 1964.
- "United Industrial Plant Friedrich Engles" was known as "F. Engles Machine Building Plant" from 1977 to 1987.
- "Arsenal/Arsenal Limited/Arsenal JSCo/Arsenal 2000 JSCo" was established in 1987.
- "Arsenal Bulgaria" also uses the logo of "10" in a double circle.
- "Arsenal" was exclusively imported from 1994 to 1996 by Sentinel Arms.
- "Sentinel Arms" was located in Detroit, Michigan U.S.A..
- "Arsenal" is exclusively imported by "Arsenal Incorporated".
- "Arsenal Inc" was established in 2001.
- "Arsenal Inc" is located in Las Vegas, Nevada U.S.A.

Action

- blowback operated.

Serial Number

- the serial number is marked on the left side of the receiver/frame above the grip and may be repeated on the right side of the slide.
- serial number observed had a two letter prefix followed by a space followed by a two digit number followed by a space and a four digit number, eg. "AD 39 1216".

Shots

- detachable box magazine.

Serial Number

- the serial number will be found on the left side of the receiver/frame above the grip. Whole or partial serial numbers may be found on other components of the firearm such as the slide.
- observed/reported specimen serial numbers consisted of a 2 letter Cyrillic alphabet prefix followed by a space, followed by a 4 digit number, followed by a space, followed by the arsenal mark (Izhevsk or Tula), followed by a full year date or a cyrillic letter code indicating the year of production.
- NOTE: the year of manufacture component of the serial number may be found as a year date in full or the last two digits of the year date or a cyrillic letter code indicating the year of production.

Calibre

- there are two different versions of the 9MM MAKAROV cartridge in Russian Service. The 9 MM MAKAROV (57-N-181-S) "Standard" cartridge, and the 9MM MAKAROV (57-N-181-M) "High Penetration" cartridge.
- the particular cartridge intended for use with this firearm is the 9MM MAKAROV "Standard" cartridge, identified as 57-N-181-S in Russian Service.

Shots

- detachable box magazine with unique cut-aways on both sides.

Remarks

- this firearm is the standard Russian Armed Forces issue side arm and is not intended to be used for identification of any commercial production Makarov pistol sold by the Baikal Marketing Agency or IZMASH / IMEZ.

Notes

Make

- "MAKAROV" is marked on left side of the slide.
- "Makarov" is derived from the last name of the Russian designer, Nikolay F. Makarov.
- Nikolay Fedorovich Makarov was born in 1914 and died in 1988.
- Nikolay Fedorovich Makarov's 9mm pistol was adopted by the Russian/Soviet military in 1951 as the "Pistolet Makarov" or "PM".

Model

- "MAKAROV" is marked on left side of the slide.
- introduce in 2009.
- features include: all metal copy of the original Makarov pistol; weight is very similar to the original pistol; fixed front and rear sights; safety lever located on the left side of the slide; single and double action trigger; brown plastic grip with checkering and a star in a circle emblem; magazine release is at the front bottom of the pistol grip in front of locking key for the CO2 cartridge; blue finish.
- overall length with a 73mm (2.8") barrel is 159mm (6¼"), average weight is .68kg (1½lbs).
- overall length with a 95mm (3.75") barrel is 162mm (6 3/8"), average weight is .68kg (1½lbs).

Action

- uses a 12 gram CO2 cartridge.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is alpha/numeric and marked on the right side of the receiver/frame.
- serial number rationalization is unknown.

Shots

- detachable box magazine.

Notes

Make

- "MAKAROV" is marked on left side of the slide.
- "Makarov" is derived from the last name of the Russian designer, Nikolay F. Makarov.
- Nikolay Fedorovich Makarov was born in 1914 and died in 1988.
- Nikolay Fedorovich Makarov's 9mm pistol was adopted by the Russian/Soviet military in 1951 as the "Pistolet Makarov" or "PM".

Model

- "MAKAROV" over "ULTRA" is marked on left side of the slide.
- "MAKAROV ULTRA" is made to resemble the actual Makarov Soviet service pistol.
- "MAKAROV ULTRA" is an all metal copy of the original pistol and is CO2, blowback operated.
- introduced in 2014.
- features include: fixed front and rear sights; safety lever located on the left side of the slide; working slide catch that lock back the slide after last shot; single action trigger mechanism; brown plastic grip with checkering and a star in a circle emblem; magazine release at the rear bottom of the pistol grip; magazine house the BB and the CO2 cartridge; weight is very similar to the original pistol; metallic dark grey finish.
- overall length with a 89mm (3.5") barrel is 163mm (6.375"), average weight is 0.635kg (1.4lbs).

Manufacturer

- "UMAREX" is marked on the right side of the slide.
- "MADE IN TAIWAN" is also marked on the right side of the slide.

Action

- CO2 powered.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the right side of the slide. - serial number of a referenced example consisted of two numbers, one letter (M) and five numbers.
Calibre	- calibre identification is marked on the right side of the slide. - calibre is 4.5mm (.177") diameter BB.
Shots	- detachable box magazine.

FRT Report

Firearm Reference Number (FRN): 58739
Make: Makarov
Model: PMM

Summary

Make:	Makarov
Model:	PMM
Manufacturer:	Russian State Arsenals
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
58739 - 1	9MM MAKAROV	8	94	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Makarov" is not marked on the firearm.
- "Makarov" is derived from the last name of the Russian designer, Nikolay F. Makarov.
- Nikolay Fedorovich Makarov was born in 1914 and died in 1988.
- Nikolay Fedorovich Makarov's 9mm pistol was adopted by the Russian/Soviet military in 1951 as the "Pistolet Makarov" or "PM".

Model

- Pistolet Makarovka Modernizirirovannyi or PMM - Pistol Makarov Modified.
- this firearm is a substitute standard Russian Armed Forces and MVD Forces issue side arm.
- features include: disassembly by lowering the trigger guard and lifting the slide and return spring off of the receiver/frame for disassembly; slide mounted safety catch which also releases the hammer when applied, lowering the hammer onto a hammer block; double/single action trigger mechanism; magazine release catch located on the bottom of the hand grip/butt; the extractor functions as a loaded chamber indicator by standing proud of the slide when a cartridge is chambered; wrap-around grip plates; unlike the Walther PP or PPK pistol the Makarov pistol has a slide release lever on the left side.

Manufacturer

- the two most prominent manufacturers of Makarov PMM pistols are the Izhevsk Arsenal and the Tula Arsenal.

Action

- delayed blow-back operated.
- delay accomplished by cutting a spiral groove in the chamber.

Serial Number

- serial number is marked on the left side of the receiver/frame above the grip.
- serial number rationalization unknown.
- specimens observed have a 2 letter Cyrillic alphabet prefix followed by a space followed by the arsenal mark (Izhevsk or Tula) followed by the year date of manufacture.
- the year of manufacture component of the serial number may be found as a year date in full or the last two digits of the year date.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- there are two different versions of the 9MM MAKAROV cartridge in Russian Service. The 9 MM MAKAROV (57-N-181-S) "Standard" cartridge, and the 9MM MAKAROV (57-N-181-M) "High Penetration" cartridge.
- the particular cartridge intended for use with this firearm is the 9MM MAKAROV "High Penetration" cartridge, identified as 57-N-181-M in Russian Service. This cartridge may be readily identified as it's shape is a truncated-cone compared to the almost round shape of the "Standard" 9MM MAKAROV cartridge.

Shots

- detachable box magazine.

Remarks

- The firearm identified here on FRT # 58739 is the standard Russian Armed Forces issue side arm and is not intended to be used for identification of any commercial production Makarov pistol sold by the Baikal Marketing Agency or IZMASH / IMEZ.
- Post 1991- sections of the Russian State Arsenal at Izhevsk have been privatised. The IJ series of firearms are the product of what is known as IMEZ. IMEZ stands for Izhevskii Mechanicheskii Zavod (which translates to - Izhevsk Mechanical Factory). IMEZ produces Makarov pistols, the PSM, air guns and various shotguns.

Notes

Make

- "Makarov" is not marked on the firearm.
- "Makarov" is derived from the last name of the Russian designer, Nikolay F. Makarov.
- Nikolay Fedorovich Makarov was born in 1914 and died in 1988.
- Nikolay Fedorovich Makarov's 9mm pistol was adopted by the Russian/Soviet military in 1951 as the "Pistolet Makarov" or "PM".
- Russians sold the design and manufacturing rights to the Chinese government.
- Makarov general design appears to be very similar to the German, Walther PPK.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the general design appears to be very similar to the German, Walther PPK.
- variations of this firearm meant for commercial export sales in U.S.A. may be found with target sights. For the most part these firearms will not be identified as Makarov MAKE firearms, they will be Brand named to the importer or the Chinese export agency and are usually renamed for MODEL as well.
- NORINCO is a Chinese State marketing agency that sells products of the Chinese State Arsenals.
- features include: disassembly by lowering the trigger guard and lifting the slide and return spring off of the receiver/frame for disassembly; slide mounted safety catch which also releases the hammer when applied, lowering the hammer onto a hammer block; double/single action trigger mechanism; magazine release catch located on the bottom of the hand grip/butt; the extractor functions as a loaded chamber indicator by standing proud of the slide when a cartridge is chambered; wrap-around grip plates; unlike the Walther PP or PPK pistol the Makarov pistol has a slide release lever on the left side.

Action

- blow-back operated.

Serial Number

- serial number rationalization unknown.
- specimen serial numbers have been observed as follows:
- observed serial number consisted of seven numbers, a space, factory number "66", a space, and the year of manufacture, EXAMPLE: "3452357 66 1967".
- observed serial number consisted of a letter "Z" prefix and seven numbers.
- observed serial number consisted of a two letter "ZZ" prefix and six numbers.
- observed serial number consisted of a two letter "AR" prefix and four numbers.

Shots

- detachable box magazine.

Remarks

- Variations of this firearm meant for commercial export sales in U.S.A. may be found with target sights. For the most part these firearms will not be identified as Makarov MAKE firearms, they will be Brand named to the importer or the Chinese export agency and are usually renamed for MODEL as well.
- There are three Chinese State owned / controlled marketing agencies:
- NORINCO is a Chinese State marketing agency that sells products of the Chinese State Arsenals.
- "Poly Technologies" is the trade name of "Poly Technologies International Incorporated", a marketing agency which is a subsidiary of the Chinese People's Liberation Army.
- China Jin An is the sales branch of the Ministry of Public Security.

Firearm Reference Number (FRN): 142524
Make: Malchair, H
Model: British Constabulary

Summary

Make:	Malchair, H
Model:	British Constabulary
Manufacturer:	Malchair, H
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	BELGIUM
Serial Numbering:	
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
142524 - 1	380 REV SHORT CF	6	79	Antique AFR, Section 1, para. 7	Non-Commercial Customization	
142524 - 2	380 REV SHORT CF	6	79	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Non-Commercial Customization	

Notes

Make

- "H. MALCHAIR" was observed marked on the left side of the grip frame underneath the grip plate.

Model

- "BRITISH" over "CONSTABULARY" was observed marked on the top strap of the receiver/frame.
- this type of handgun would have been produced circa 1870's to the early 1900's.
- features: round or ovate barrel; solid top receiver/frame with a fluted or unfluted cylinder and right side loading gate; ejector rod housed is mounted within the cylinder axis pin; ejector rod swings to the right to eject the empty shell cases; exposed rebounding hammer; double/single action trigger mechanism; checkered hardwood grips; may have a lanyard ring on the bottom of the grip frame.
- Belgian proofmarks are apparent on the receiver/frame, barrel and/or the cylinder of this firearm.

Manufacturer

- H. Malchair was a Belgian gunmaker located in Leige, Belgium, circa 1856.
- H. Malchair had two patents registered in his name circa 1869.
- research has been unable to determine exactly how long this firm was in business.

Calibre

- calibre designation was observed marked on the left side of the receiver/frame in front of the cylinder.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

127948 - 3	9MM PIN-FIRE	6	146	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "H.Malchair" was observed marked on the left side of the grip frame underneath the grip plate.

Model

- model designation is not marked on this firearm.
- features include: round or octagonal barrel; rod-type ejector mounted on the right rear of the barrel; open top receiver/frame with round cylinder and loading gate on the right side of the standing breech that swings out to the right; exposed spurred hammer; double action trigger mechanism; conventional or folding trigger; with or without a trigger guard and lanyard ring; receiver/frame may be engraved.
- observed examples of this firearm have been in pin-fire or centre-fire configuration.
- Belgian proof marks are apparent on the cylinder, barrel and/or receiver/frame.

Manufacturer

- H. Malchair was located in Liege, Belgium, circa 1860.
- research has been unable to determine the duration of manufacture for this firm.

Action

- double action.

Serial Number

- observed serial number was marked on the front right side of the receiver/frame.
- observed serial number consisted of a three numbers without a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments - some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Other Markings
- "F. W. ORTMANN IN SOLINGEN" was observed marked on the barrel of one example.
- "F. W. ORTMANN" was located in Solingen, circa 1860.

Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	BELGIUM
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
102015 - 1	32 CF	1	620	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "H. MALCHAIR" was observed marked on the under side of the barrel.

Model

- model designation is not marked on the firearm, but rather is a description of the action.
- this was the last and final improvement on the Flobert rifle, later called the "Warnant Springfield"; the breech block is attached to the breech end of the barrel and is swung up to open the action for loading and unloading.
- since the action was much stronger than all other Flobert actions previously made, it was available in stronger calibers and heavier barrels.
- the barrel is octagon with fixed front and rear sights.

Manufacturer

- "H. MALCHAIR" was observed marked on the under side of the barrel.
- H. Malchair was located in Leige, Belgium circa 1860.

37711 - 2	20 GA X 2 3/4"	2	699	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- make is marked on the firearm.

Model

- model is not marked on the firearm.
- this is a generic entry for those F. E. Malin side by side shotguns that are not identifiable as to model.
- this is a custom-made side by side shotgun made to a given customer's specifications.
- features may include: double triggers; choice of game scenes and engraving; the wood used for the stock may vary.

Manufacturer

- F. E. Malin was located in London, England, circa 1890.
- Malin and Boswell manufactured firearms together for a short period of time. Eventually, Malin acquired Charles Boswell company. In 1984, Malin moved the entire company to Clearwater, Florida, U.S.A.

Action

- side by side pattern.

Barrel

- Other barrel lengths available; 28"/711mm is a typical "field" length.

Calibre

- other gauges/chamber lengths available on order.

73689 - 2	16 GA X 2 1/2"	2	711	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make	- marked "Maloch Michie & Crockart" on both sideplates, and the same on the top rib, with an address of "55 King St., Stirling".
Model	- this is a side by side back action, side lock shotgun opened with an under-lever, top-lever, or thumb-snap-lever. - walnut pistol-grip stock and forearm, finely-engraved sideplates, Damascus barrels, and double triggers.
Manufacturer	- Maloch, Michie, & Crockart was a partnership between three gunmakers founded in 1877, in Scotland; Peter Maloch and David Crockart were established gunmakers, and it's believed that Michie funded the new company. This partnership lasted until 1890, when Malock & Crockart went back to manufacturing guns under their respective names.
Action	- side by side pattern.
Serial Number	- numbered on barrels.
Canadian Law Comments	- Canadian law requires the serial number be marked on the receiver/frame.

Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
24276 - 2	32 LONG RF	5	76	Antique AFR, Section 1, para. 6	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MALTBY, CURTISS & CO.NEW YORK, U.S.A." is marked on the left side of the barrel.
- Maltby, Curtiss & Company was located in New York City from 1873 to 1887.
- Maltby, Curtiss & Company was formed by Maltby, Curtis and Turner.
- Maltby, Curtiss and Turner also owned part of the Norwich Pistol Co. until 1881.
- Maltby, Curtiss and Turner were also part owners in the Norwich Falls Pistol Co. until 1887.
- Maltby, Curtiss & Company was succeeded by Maltby, Henley & Company.
- Maltby, Henley & Company was located in New York City from 1888 to 1893.

Model

- "METROPOLITAN POLICE" is marked on the top of the barrel.
- "PAT'D APR. 23, 78 AUG. 28, 83 FEB. 26, 84" is marked on the left side of the barrel; these represent the dates that patent numbers 202,627; 283,854; 294,188 were assigned to W.H. Bliss of Norwich, Connecticut.
- this firearm would have been manufactured circa 1883 to 1888.
- "METROPOLITAN POLICE" is a model name that was used on revolvers distributed by the Maltby, Curtiss & Company of New York city, New York.
- this firearm resembles a front hinged, break open revolver, but it is actually a solid top receiver/frame construction.
- features include: fixed blade front sight and a sliding rear sight; rear sight when slid to the rear blocks the hammer and acts as a safety; will have the W.H. Bliss patented removable circular side plate located on the rear left side of the receiver/frame; octagonal barrel; solid top receiver/frame with a removable fluted cylinder; knurled cylinder axis pin; cylinder axis pin release button is located on the front left side of the receiver/frame and is made to look like a slotted screw for the non-existent front hinge; exposed spur hammer; single/double action trigger mechanism; rounded trigger guard; nickel plated finish; hard black rubber grip plates are ornately decorated and have the Maltby, Curtiss & Co trademark logo in a circle at the top each grip plate.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- manufacturer's name is not marked on this firearm; based on the patent dates as marked on the barrel, this firearm was made by the Norwich Falls Pistol Company of Norwich, Connecticut for retail by Maltby, Curtiss & Company. - "PAT'D APR. 23, 78 AUG. 28, 83 FEB. 26, 84" is marked on the left side of the barrel; these represent the dates that patent numbers 202,627; 283,854; 294,188 were assigned to W.H. Bliss of Norwich, Connecticut. - W.H. Bliss was the plant superintendent of the Norwich Pistol Co. (circa 1873-75 to 1881) and its successor the Norwich Falls Pistol Co.(1881 to 1887). He was not affiliated in any way with the company of Bliss & Goodyear of New Haven, Connecticut. - the Norwich Pistol Company was organized circa 1873-75 and went into bankruptcy in 1881; the Norwich Falls Pistol Company of Norwich, Connecticut was incorporated on October 6, 1881 and was essentially a reorganization of the former Norwich Pistol Company. The principals in the new company were, Douglas F. Maltby, Benjamine D. Curtiss and Sidney Turner.
Serial Number	- serial number is marked on the left side of the grip frame of the receiver/frame, under the grip plate. - observed serial number consisted of four numbers without a letter prefix or suffix.
Shots	- removable cylinder.

- "MALTBY, HENLEY & CO., NEW YORK, N.Y." is marked on the barrel.
- "MALTBY, HENLEY & COMPANY" stylized monogram can be found on the grip plates.
- Maltby, Henley & Company was a sales agent/ditributor located in New York City, New York, U.S.A. from 1888 to 1893.
- Maltby, Henley & Company sold pistols manufactured by Otis A. Smith, under the trade name of "Columbia Armory", "Columbian", "Parker" and "Spencer".
- Maltby, Henley & Company was the successor to Maltby, Curtis & Company.
- Maltby, Curtis & Company was located in New York City from 1873 to 1887.
- Maltby, Curtis & Company was formed by Maltby, Curtis and Turner.
- Maltby, Curtis and Turner also owned part of the Norwich Pistol Co. until 1881.
- Maltby, Curtis and Turner were also part owners in the Norwich Falls Pistol Co. until 1887.

Model

- "MODEL 1892" is marked on the top of the barrel.
- this is a double action only, solid frame revolver.
- has an unusual cylinder stop catch that when pressed, released the cylinder to rotate freely.
- this model was also sold as the "Spencer Safety Hammerless Model 1892" or "Parker Safety Hammerless Model 1892".

Manufacturer

- "OTIS A. SMITH ROCKFALL, CONN." may be marked on the barrel.

Other Markings

- "PAT. MAY. 17 1885. OCT. 29 1889, MODEL 1892" is marked on the top of the barrel.

20753 - 2	9MM LUGER	15	125	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- marked "MAMBA" over "9mm Parabellum" on the left side of the slide.

Model

- model designation will be found marked on the left side of the slide.
- an all stainless double action semi-automatic pistol made as a possible replacement sidearm for the South African Defense Forces during the mid-1970s.
- black synthetic grip panels, fixed sights, and a Colt/Browning parallel ruler locking mechanism.
- this pistol somewhat resembles a S&W Model 59, but in stainless steel and with a hooked trigger guard for a finger forward hold.
- receiver/frame mounted Colt/Browning-style ambidextrous manual safety.
- though this pistol wasn't adopted by the SADF due to reliability problems, it remained in production until the early 1980s.
- button rifled with twelve shallow micro-grooves.

Action

- recoil-operated.

Serial Number

- serial number is marked on the receiver/frame.

Shots

- detachable box magazine.

Other Markings

- made in S. Africa appears on the receiver/frame just above the right hand grip.

Notes

Make

- "Manhattan Arms Co." or "Manhattan Arms Company" may be marked on the lock plate or barrel assembly.
- "Manhattan Arms Company" was a trade name used by Schoverling, Daly & Gales and Von Lengerke & Detmold of New York City, New York, U.S.A..
- "Manhattan Arms Company" firearms were manufactured in Belgium by Neuman Freres before 19003 and by F. Dumoulin & Company after 1903.
- "Manhattan Arms Company" firearms were manufactured in Germany by J.P. Sauer & Sohn.
- "Manhattan Arms Company" double barrel boxlock shotguns were manufactured in North America by Hunter Arms Company.
- "Manhattan Arms Company" single barrel shotguns were manufactured in North America by Harrington & Richardson Arms Company.
- Schoverling, Daly & Gales was located in New York City from 1873 to 1940.
- Von Lengerke & Detmold was located in New York City from 1884 to 1932.

Model

- model designation is not marked on the firearm.
- features may include: side by side twist steel, laminated or Damascus barrels with a bead front sight and a rib extension; front hinged receiver/frame with a top tang mounted break open action release lever; extractors; hammerless or exposed hammers; double triggers; wood splinter forearm and semi-pistol grip buttstock; engraving.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- manufacturer's name is not marked on firearm.
- Neumann Freres (Neumann Brothers) was located in Belgium from the 1860s to the 1930s.
- Neumann Freres logo is the letter "N" inside the outline of a hunting horn.
- Neumann Freres (NF) logo is a plain or stylized letter "F" superimposed on the letter "N" without any border or enclosure or within an oval or circle.
- not to be confused with the "FN" logo for Fabrique Nationale d'Armes de Guerre of Herstal, Belgium.

Action

- side by side barrel configuration, hinged barrel design.

72396 - 6	36 PERCUSSION	1	102	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is marked on the left side of the firearm.

Model

- features include: double action trigger mechanism; single shot muzzle loading pistol with a "bar" shaped hammer and a cup to strike the percussion cap
- "bag" shaped grip with walnut grip panels; half round/half octagon barrel; blued finish normally with some engraving on the receiver/frame.
- normally marked "MANHATTAN F.A. MFG. CO. NEW YORK" on the hammer.
- manufactured from 1856 to late 1850s.

Action

- muzzle loader.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number - the serial number is marked on the right side of the firearm.

20754 - 2	22 RF	7	76	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Non-Commercial Customization	

Notes

Make

- "MANHATTAN FIRE ARMS MFG CO NEW YORK" or "MANHATTAN FIRE ARMS MFG CO N.Y." is usually marked on the barrel.
- "PATENTED DEC. 27, 1859" is usually marked on the underside of the barrel

Model

- manufactured prior to 1869.
- the model is not marked on the firearm.
- this is a single-action Smith & Wesson No. 1-style "tip-up" revolver, manufactured by the Manhattan Fire Arms Manufacturing Company of New York (actually based in New Jersey), after Samuel Colt's revolver patent expired in 1857. These revolvers were made in two basic models, a First and a Second, with the First having the cylinder stop-slots/bolt notches at the rear of the cylinder, and the Second having the cylinder stop-slots/bolt notches in the front third of the cylinder.
- features include: nickeled brass receiver/frame; fixed open sights; ribbed octagonal barrel with three rifling grooves; an under-barrel ejector-pin; hinged barrel that lifts up to allow the cylinder to be removed for loading/unloading; single-action spur trigger mechanism; and varnished wooden grips on a square butt.

Manufacturer

- "MANHATTAN FIRE ARMS MFG CO NEW YORK" or "MANHATTAN FIRE ARMS MFG CO N.Y." is usually marked on the barrel.
- "PATENTED DEC. 27, 1859" is usually marked on the underside of the barrel

Action

- tip up barrel design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial-numbered on the grip frame under the grips, and on the rear face of the barrel lug (visible when broken open).
- serial-numbered in five distinct ranges, as manufacture progressed:
- 1st Model, First Variant: #1-#1600
- 1st Model Second Variant: #1600-#4800
- 1st Model Third Variant: #4800-#7000
- 1st Model Fourth Variant: #7000-#9000
- 2nd Model: #1-#8000.

Other Markings

- patent dates will normally be marked on the top or bottom of the barrel.

Notes

Model

- model designation does not appear on firearm.
- "Vest Pocket" is used to differentiate this pistol from a larger pistol that appears in several reference sources with the same name, but has a different external appearance.
- "Mann" also produced a 7.65MM version of this pistol, known as the "Pocket".
- solid frame with a removeable barrel.
- produced in the early 1920's.

Manufacturer

- founded in Suhl, Germany in 1919.
- manufacturers complete name is not usually marked on firearm.

Action

- blowback operated.

Serial Number

- sample examined is numbered on front of grip.
- rationalization unknown.

Shots

- detachable box magazine.

1131 - 1	11.15X58R AUSTRIAN WERNDL	5	806	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Mannlicher" is not marked on the firearm.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.

Model

- the model designation may not be marked on the receiver.
- most of these firearm models were altered between 1890 and 1893 and became the Model 1886/90 when the new service calibre 8X50R, utilizing smokeless propellant was adopted.
- this rifle was adopted by the armed forces of Austria-Hungary in 1886. It uses a straight-pull bolt action and the Mannlicher magazine system which requires a clip holding five rounds of ammunition be inserted into the rifle's magazine.
- this rifle was a standard issue firearm in the Austro-Hungarian Empire and was widely used in World War I and World War II by the Austrian, Hungarian and German forces. Large numbers were turned over to the Italian Government as "war booty" in 1917-18 and these rifles saw use by the Italian forces in World War II.
- features: the magazine and trigger guard are formed as a single component, the magazine is open for a distance long enough to permit the cartridge clip to drop through when empty, fixed vertical box magazine holding five cartridges in a clip;
as the breech bolt is actuated, the magazine springs acting upon their levers thrust the cartridges successively up between the side walls of the clip, bringing each one into line in its turn with the forward moving bolt for chambering; straight-pull bolt action mechanism; a distinctive flat plate with a thumb piece at the left rear side of the receiver/frame forms the manual safety; sights are graduated from 200 paces to 2300 paces.
- weight: 9 lb, 15 oz
- rifling characteristics: 6 grooves, depth of groove 0.0079 inches, one turn in 24.8 inches.

Manufacturer

- the manufacturer's name appears on the receiver as OEWG.
- total production by this manufacturer is approximately 90,000 specimens.

Action

- manually operated straight-pull bolt action.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number - the serial number appears on the left rear of the barrel and may incorporate a letter suffix.

Other Markings - proof markings may be found on the barrel with either Vienna (WN) or Budapest (Bt) Arsenal proof marks.

Make

- "Mannlicher" is not marked on the firearm.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.

Model

- the model designation may not be marked on the receiver.
- this firearm is the military rifle adopted by Austria-Hungary in 1888.
- the Rifle Model of 1888 was manufactured and intended for use with the original 8X50R black powder cartridge.
- these firearms are virtually identical to the Rifles Model of 1888/90, which are Rifles Model of 1888 altered after 1890 by rebarrelling to a barrel having a chamber and rifling characteristics for the new service calibre cartridge 8X52R which utilized smokeless propellant.
- this firearm model employs a straight-pull bolt action and the Mannlicher magazine system which requires a clip holding five rounds of ammunition be inserted into the rifle's magazine.
- this rifle was a standard issue firearm in the Austro-Hungarian Empire and was widely used in World War I and World War II by the Austrian, Hungarian and German forces.
- this firearm model was also adopted by Bulgaria and Greece.
- large numbers of these firearm models were turned over to the Italian Government as "war booty" in 1917-18 and these rifles saw use by the Italian forces in World War II.
- features: the magazine and trigger guard are formed as a single component, the magazine is open for a distance long enough to permit the cartridge clip to drop through when empty, fixed vertical box magazine holding five cartridges in a clip;
as the breech bolt is actuated, the magazine springs acting upon their levers thrust the cartridges successively up between the side walls of the clip, bringing each one into line in its turn with the forward moving bolt for chambering; straight-pull bolt action mechanism; a distinctive flat plate with a thumb piece at the left rear side of the receiver/frame forms the manual safety.
- NOTE: the 1888 Rifle has a rear-sight graduated from 200 to 2500 paces for the original 8X50R Black Powder cartridge.
- rifling characteristics not available for the 8X50R black powder cartridge.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the manufacturer's name normally appears on the receiver/frame as OEWG.
Action	- manually operated straight-pull bolt action.
Serial Number	- the serial number appears on the left rear of the barrel and may incorporate a letter suffix.
Shots	- bottom-protruding, non-detachable, clip-fed box magazine.
Other Markings	- proof markings may be found on the barrel with either Vienna (WN) or Budapest (Bt) Arsenal proof marks.
Remarks	- this is the military rifle adopted by Austria-Hungary in 1888. It has a straight pull bolt and uses the Mannlicher magazine system which requires a clip holding five rounds of ammunition be inserted into the rifle's magazine. This rifle is mechanically identical to the Model 1886 except for the reduction of calibre from 11.15MM to 8MM.

Notes

Make

- "Mannlicher" is not marked on the firearm.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.

Model

- the model designation is not marked on the firearm.
- this is the model 1888 Austrian Rifle with Siamese markings (the "Chakra" logo and the serial number in Sanskrit in the same area) applied to it. Siam used the model 1888 Rifle and the subsequent upgraded version, the model 1888/90 Rifle in the 1890s. In 1902 Siam adopted a Japanese-made Mauser design.
- features a straight-pull bolt with a short stemmed ball handle on the right rear of the action, blade front sight and elevating open rear sight, walnut full length military stock with sling swivels.
- the original 1888 Siamese Rifle has the original deep range trajectory scale rear sight graduated for 1700 paces (equal to about 1395 yards) for the less powerful 8 X 50R AUSTRIAN black powder cartridge.
- DO NOT CONFUSE WITH THE 1888/90 Siamese Rifle, which has the modified rear sight (graduated for 1800 paces or about 1475 yards) attachment for the shallower trajectory for the higher powered 8 X 50R AUSTRIAN smokeless powder cartridge. The 1888/90 Rifle also has long-range sights on the left side of the firearm. This system adds an extension to the rear sight slider and a protruding pin on the front barrel band; intended to be used for distances up to 3000 paces (2460 yards).

Manufacturer

- the manufacturer's designation is normally marked on the receiver/frame as OEWG.

Action

- straight-pull bolt.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number in Sanskrit is usually marked on top of the receiver/frame. - the serial number in normal Western numerals may sometimes be found on the left side of the barrel or on others on the left top of the receiver ring.
Shots	- bottom protruding, non detachable, clip-fed box magazine.
Other Markings	- proof markings may be found on the barrel with either Vienna (WN) or Budapest (Bt) Arsenal proof marks.
Remarks	- this is identical to the military rifle adopted by Austria-Hungary in 1888. It has a straight pull bolt and uses the Mannlicher magazine system which requires a clip holding five rounds of ammunition be inserted into the rifle's magazine. This rifle is mechanically identical to the Model 1886 except for the reduction of calibre from 11.15MM to 8MM.

FRT Report

Firearm Reference Number (FRN): 1133
Make: Mannlicher
Model: 1888/90 Austrian Rifle

Summary

Make:	Mannlicher
Model:	1888/90 Austrian Rifle
Manufacturer:	Oesterreichische Waffenfabriks Gesellschaft, Steyr
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	AUSTRIA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
1133 - 1	8X50R AUSTRIAN MANNLICHER	5	766	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Mannlicher" is not marked on the firearm.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.

Model

- the model designation may not be marked on the receiver/frame.
- this is the military rifle adopted by Austria-Hungary in 1888.
- these firearms are Rifles, Model of 1888 altered after 1890 by rebarrelling to the new service calibre 8X50R, a cartridge utilizing smokeless propellant.
- the basic rifle in a larger calibre had been adopted by the armed forces of Austria-Hungary in 1886. This firearm employs a straight-pull bolt action and the Mannlicher magazine system which requires a clip holding five rounds of ammunition be inserted into the rifle's magazine.
- this rifle was a standard issue firearm in the Austro-Hungarian Empire and was widely used in World War I and World War II by the Austrian, Hungarian and German forces.
- this firearm model was also adopted by Bulgaria and Greece.
- large numbers of these firearm models were turned over to the Italian Government as "war booty" in 1917-18 and these rifles saw use by the Italian forces in World War II.
- features: the magazine and trigger guard are formed as a single component, the magazine is open for a distance long enough to permit the cartridge clip to drop through when empty, fixed vertical box magazine holding five cartridges in a clip; as the breech bolt is actuated, the magazine springs acting upon their levers thrust the cartridges successively up between the side walls of the clip, bringing each one into line in its turn with the forward moving bolt for chambering; straight-pull bolt action mechanism; a distinctive flat plate with a thumb piece at the left rear side of the receiver/frame forms the manual safety; sights are graduated from 300 paces to 3000 paces.
- weight: 9 lb, 15 oz.

Manufacturer

- the manufacturer's name appears on the receiver as OEWG.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- manually operated straight-pull bolt action.
Serial Number	- the serial number appears on the left rear of the barrel and may incorporate a letter suffix.
Calibre	- the 8X52R cartridge loaded with smokeless propellant was introduced into Austrian service in 1890 to replace the 8X50R black powder cartridge. - the Austrians subsequently changed back to the original 8x50R case length in 1893 when it was concluded that the additional 2MM of cartridge length was not required to achieve the desired performance.
Other Markings	- proof markings may be found on the barrel with either Vienna (WN) or Budapest (Bt) Arsenal proof marks.
Remarks	- This rifle military rifle is identical in all respects to the Model 1888 Austrian rifle except for the graduations on the rear sight which conform to the flatter trajectory of the smokeless powder loading of the 8X50R AUSTRIAN cartridge which was introduced to the Austrian service in 1890.

Notes

Make

- "Mannlicher" is not marked on the firearm.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.

Model

- model designation not marked on firearm, features determine model.
- this firearm is the Austrian 1888/90 with Siamese markings.
- distinguishing features: a) the "Chakra" logo (Siamese War-Quoit, ["Shuriken" throwing star]; appears as a five tipped clock-wise whorl emanating from a central circlular circle) over the top of the rear receiver bridge, b) serial numbers in Sanskrit in the same area, c) straight pull action.
- features: a) straight-pull bolt with a short stemmed ball-handle at the rear right side of the action, b) clip-fed protruding fixed five round box magazine, c) full length military stock with three bands and front and butt sling swivels, d) under-barrel mounted cleaning rod.
- do not confuse this rifle with the Austrian M88/90 (smokeless 8X50R), or the original Austrian 1888 rifle (blackpowder 8X50R), or the latter rifle with Siamese markings.
- the principal difference between the 1888 rifle and the 1888/90 rifle was the lower rear tangent sight gradations of the smokeless cartridge with its' flatter trajectory.

Manufacturer

- the 1888/90 rifle was manufactured by Osterrieichische Waffenfabrik Gesellschaft, Steyr, the receiver of the firearm was retained through the conversions.
- the name usually appears on the receiver as OE GW, or OE GW Steyr.

Action

- straight pull bolt, dropping wedge locking system.

Serial Number

- the serial number in Sanskrit is usually marked on top of the receiver bridge.
- a serial number in normal Western numerals may be found: a) on the left side of the barrel. b) on others on the left top of the receiver ring.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- the 8X52R cartridge loaded with smokeless propellant was introduced into Austrian service in 1890 to replace the 8X50R black powder cartridge. - the Austrians subsequently changed back to the original 8x50R case length in 1893 when it was concluded that the additional 2MM of cartridge length was not required to achieve the desired performance.
Shots	- fixed box magazine.
Other Markings	- proof markings may be found on the barrel with either Vienna (WN) or Budapest (Bt) Arsenal proof marks.
Remarks	- Cartridge information, the Austrian 8 X 50R cartridge (smokeless, adopted 1890) is slightly larger than the 8 X 50R Siamese cartridge (adopted 1902): rim dia.- .553 vs .550, base dia.- .501 vs .480, shoulder dia.- .462 vs .450, neck dia.- .351 vs .347, bullet dia.- .323 (both), case 1.98 (both), cartridge length - 3.00 vs 2.97, bullet wt., ball - 244 gr. vs 237 gr. - the 8mm Siamese cartridge will fit the chamber of the 1888/90 Austrian rifle.

Action:	Bolt Action
Country of Manufacturer:	AUSTRIA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
1134 - 2	8MM MAUSER	5	553	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
1134 - 1	8MM MAUSER	5	600	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Mannlicher" is not marked on the firearm.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.

Model

- may not be marked with model designation.
- the model 1888/90/24 Greek Rifle (8MM Mauser) was reconfigured and upgraded from of the Austrian M88/90 (smokeless 8X50R), which in turn was upgraded from the original Austrian 1888 rifle (blackpowder 8X50R).
- features: a) shortened barrel rechambered to 8MM Mauser (7.92X57) and reproofed, b) altered bolt-face and extractor, c) addition of full top wood handguard, d) new tangent rear-sight for the 8MM Mauser cartridge, e) new cartridge guides for 8MM Mauser permanently attached to the inside of the fixed box magazine.
- retained features of the original rifle: f) straight-pull bolt with a short stemmed ball-handle at the rear right side of the action, g) clip-fed protruding fixed five round box magazine, h) full length military stock with three bands and front and butt sling swivels, g) under-barrel mounted cleaning rod.

Manufacturer

- the original 1888 rifle was manufacturered by Osterrieichische Waffenfabrik Gesellschaft, Steyr, the original receiver of the firearm was retained through the conversions.
- the name may appear on the receiver as OWG Steyr, or the name may have been removed during conversion.
- although the firearms were converted in Belgium and bears Belgian proofmarks, the name of the firm is not known.

Action

- straight pull action.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number found on the top left side of the receiver ring (with Belgian proof), example: 3210
Calibre	- sample marked on the left side of the barrel behind the rear sight with Belgian proof-marks: 7.9 MM / B. BLINDEE
Shots	- non-detachable box magazine
Remarks	- this firearm model is a modification of the original Austrian M-1888/90 straight pull bolt action rifle carried out by the Greek government in the 1920's (it is believed that the work was actually carried out in Belgium). - the modification included fitting a new barrel in calibre 8x57mm Mauser, tangent rear sight, shortening the forearm, fitting a handguard, modifying the bolt head and the magazine to negate the necessity of using Mannlicher clips.

1136 - 2	8X52R AUSTRIAN MANNLICHER	5	495	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Mannlicher" is not marked on the firearm.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.

Model

- the model designation may not appear on the firearm.
- this model of Mannlicher carbine was adopted as a purpose designed, short firearm for general issue to the Austrian cavalry forces.
- these firearms are new, purpose-built firearms, manufactured between 1890 and 1895, chambered for the new service cartridge designated 8X52R, a cartridge utilizing smokeless propellant.
- this firearm employs a straight-pull bolt action and the Mannlicher magazine system which requires a clip holding five rounds of ammunition be inserted into the rifle's magazine.
- this rifle was a standard issue firearm in the Austro-Hungarian Empire.
- this basic firearm model was also adopted with only slight modification and a longer barrel as the Model 1895 Austrian Rifle.
- large numbers of these firearm models were turned over to the Italian Government as "war booty" in 1917-18 and these rifles saw use by the Italian forces in World War II.
- features: the magazine and trigger guard are formed as a single component, the magazine is open for a distance long enough to permit the cartridge clip to drop through when empty, fixed vertical box magazine holding five cartridges in a clip;
as the breech bolt is actuated, the magazine springs acting upon their levers thrust the cartridges successively up between the side walls of the clip, bringing each one into line in its turn with the forward moving bolt for chambering; straight-pull bolt action mechanism, differs from all previous models as it has two opposed front locking lugs; it is identical to the Model 1895 Austrian Carbine except that it has a knurled circular cocking piece as opposed to the latter model's more elaborate contoured cocking piece; the safety mechanism is a distinctive flat plate with a thumb piece at the left rear side of the receiver/frame; sights are graduated only to 2,200 paces.
- weight: 7 lb, 2 oz.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the manufacturer's name appears on the top of the receiver ring.
Action	- manually operated straight-pull bolt action. - differs from all previous models of Mannlicher straight-pull bolt action mechanism as it has two horizontally opposed front locking lugs.
Serial Number	- appears on the left rear of the barrel shank, may have a letter prefix.
Calibre	- the 8X52R cartridge loaded with smokeless propellant was introduced into Austrian service in 1890 to replace the 8X50R black powder cartridge. - the Austrians subsequently changed back to the original 8x50R case length in 1893 when it was concluded that the additional 2MM of cartridge length was not required to achieve the desired performance.
Other Markings	- proofmarkings may be found on the barrel with either Vienna (WN) or Budapest (Bt) Arsenal proof marks.
Remarks	- this military carbine is similar to all other Austrian rifles from 1888 to 1890 except for the calibre, bolt locking lugs which are located on the front of the bolt and the graduations on the rear sight which conform to the flatter trajectory of the smokeless powder loading of the 8X52R AUSTRIAN MANNLICHER cartridge which was introduced to the Austrian service in 1890. - the Austrians subsequently changed back to the original 8x50R case length in 1893 when it was concluded that the additional 2MM of cartridge length was not required to achieve the desired performance. - this Carbine differs only slightly from the Austrian Mannlicher M95 which it evolved into.

Notes

Make

- "Mannlicher" is not marked on the firearm.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi-automatic, some manually operated, others full automatic and several models of semi-automatic, recoil operated handguns.

Model

- the model designation may not be marked on the receiver.
- this is the military rifle adopted by Austria-Hungary in 1890.
- these firearms are new, purpose-built Rifles, Model of 1888, manufactured between 1890 and 1895, chambered for the new service cartridge designated 8X52R, a cartridge utilizing smokeless propellant.
- the same basic rifle in a larger calibre had been adopted by the armed forces of Austria-Hungary in 1886. This firearm employs a modified straight-pull bolt action with the locking lugs moved to the front of the bolt and the Mannlicher magazine system which requires a clip holding five rounds of ammunition be inserted into the rifle's magazine.
- this rifle was a standard issue firearm in the Austro-Hungarian Empire and was widely used in World War I and World War II by the Austrian, Hungarian and German forces.
- this basic firearm model was also adopted by Bulgaria and Greece.
- large numbers of these firearm models were turned over to the Italian Government as "war booty" in 1917-18 and these rifles saw use by the Italian forces in World War II.
- features: the magazine and trigger guard are formed as a single component, the magazine is open for a distance long enough to permit the cartridge clip to drop through when empty, fixed vertical box magazine holding five cartridges in a clip, straight-pull bolt action mechanism; a distinctive flat plate with a thumb piece at the left rear side of the receiver/frame forms the manual safety; sights are graduated from 300 paces to 3000 paces.
- weight: 9 lb, 15 oz.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the manufacturer's name appears on the receiver as OEWG.
Action	- manually operated straight-pull bolt action.
Serial Number	- the serial number appears on the left rear of the barrel and may incorporate a letter suffix.
Calibre	- the calibre 8X52R Austrian Mannlicher was a short lived cartridge introduced in 1890 and discontinued in 1893. It was supposed that 2MM additional length was required to produce the required performance when the change was made from black powder loaded 8X50R ammunition to smokeless powder, when this proved not to be the case the cartridge case length was once again reduced to 8X50R dimensions or a 50 MM length cartridge case.
Other Markings	- proof markings may be found on the barrel with either Vienna (WN) or Budapest (Bt) Arsenal proof marks.
Remarks	- this rifle military rifle is identical in all respects to the Model 1888 Austrian rifle except for the calibre and the graduations on the rear sight which conform to the flatter trajectory of the smokeless powder loading of the 8X52R AUSTRIAN MANNLICHER cartridge which was introduced to the Austrian service in 1890. - the Austrians subsequently changed back to the original 8x50R case length in 1893 when it was concluded that the additional 2MM of cartridge length was not required to achieve the desired performance. - this rifle differs only slightly from the Austrian Mannlicher M95 which it evolved into.

Notes

Make

- "Mannlicher" is not marked on the firearm.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.

Model

- "Md. 1892" or variation thereof is marked on the receiver ring.
- this rifle was manufactured and issued in limited numbers for troop trials by the Romanian Army.
- this model of Mannlicher rifle was adopted in 1892 as the first small bore smokeless cartridge service rifle to be used by the Kingdom of Romania.
- features include: Mannlicher turn bolt action with two opposed locking lugs on the front of the bolt; a Mannlicher magazine in which a clip holding 5 cartridges is inserted into the rifle's magazine; a "split bridge" receiver/frame in which the bolt handle turns down to lock ahead of the receiver bridge, in effect the receiver bridge acts as a third safety lug to lock the bolt handle; sights are graduated in meters from 400 to 2000, a few of these rifles may have the sights graduated in paces.
- rifling characteristics: 4 grooves, concentric rifling with the edges of the rifling slightly rounded, right hand twist, rate of twist 1 turn in 7.87 inches, depth of rifling .0059 inches.
- weight: 8 lbs, 12 ozs.

Manufacturer

- "STEYR" and the date of manufacture are marked on the left side of the receiver/frame.

Action

- manually operated turn-bolt action.

Serial Number

- the serial number is marked on the right front of the receiver/frame and may have a letter prefix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - this cartridge was also used by the Netherlands.

Other Markings - the Romanian crown and model designation is located on the receiver ring.

- the model designation appears on the receiver ring.
- this model of Mannlicher carbine was adopted as a purpose designed, short firearm for general issue to the Romanian cavalry forces.
- this carbine is mechanically identical to Model 1893 Romanian Rifle differing in barrel length and by having no provision for a handguard or for mounting a bayonet, sling swivels are mounted on the left side of the buttstock and left side of barrel band; the bolt handle is turned down to reduce the width/thickness of the package for mounted use.
- features include: Mannlicher turn bolt action with two opposed locking lugs; a Mannlicher magazine in which a clip holding 5 cartridges is inserted into the rifle's magazine; a "split bridge" receiver/frame in which the bolt handle turns down to lock ahead of the receiver bridge, in effect the receiver bridge acts as a third safety lug to lock the bolt handle; sights are graduated in meters from 600 to 1800 with a 500 meter "battle sight", a few of these rifles may have the sights graduated in paces.
- the bolt handle is bent downward to reduce the width of the carbine.

Manufacturer

- the manufacturer's name appears on the left side of the receiver/frame.

Action

- manually operated turn-bolt action.

Serial Number

- the serial number appears on the right front end of the receiver and may have a letter prefix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - this cartridge was also used by the Netherlands.

Other Markings - the Romanian crown and model designation appears on the receiver ring.

1238 - 2	8X50R AUSTRIAN MANNLICHER	5	740	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "Mannlicher" is not marked on the firearm.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.

Model

- the model designation appears on the receiver ring as Md 1893.
- this rifle is similar to the Romanian trials rifle of 1892 differing in minor mechanical details, visually distinctive is the presence of a stacking hook on the nosecap of the Model 1893 which is lacking on the Model 1892.
- this rifle was adopted for general issue to the Romanian armed forces, the Romanian property mark - the crown of King Carol Ist is located on the receiver ring along with the model designation.
- features include: Mannlicher turn bolt action with two opposed locking lugs on the front of the bolt; a Mannlicher magazine in which a clip holding 5 cartridges is inserted into the rifle's magazine; a "split bridge" receiver/frame in which the bolt handle turns down to lock ahead of the receiver bridge, in effect the receiver bridge acts as a third safety lug to lock the bolt handle; sights are graduated in meters from 400 to 2000, a few of these rifles may have the sights graduated in paces.
- rifling characteristics: 4 grooves, concentric rifling with the edges of the rifling slightly rounded, right hand twist, rate of twist 1 turn in 7.87 inches, depth of rifling .0065 inches.
- weight: 8 lbs, 12 ozs.

Manufacturer

- the manufacturer's name appears on the left side of the receiver/frame.

Action

- manually operated turn-bolt action.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number appears on the right front of the receiver and usually has a letter prefix.
Calibre	- this cartridge was also used by the Netherlands.
Other Markings	- the Romanian crown and model designation apepars on receiver ring.

Notes

Make

- "Mannlicher" is not marked on the firearm.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.

Model

- not marked with model designation; the features determine the model.
- distinguishable by: a) the straight-pull bolt with a short stemmed ball-handle at the rear right side of the action. b) detachable six round box magazine which slightly protrudes below the stock. c) full length straight-gripped military stock with a middle band, and nose-cap and band. d) full length top-wood. e) side-sling swivel on the left middle band with sling stock-slot in the stock. f) front-sight guard-ears mounted on the notably short muzzle protrusion. g) absence of bayonet mounting.
- the top of the receiver ring is marked with: a) Swiss cross outline. b) an "S" surmounted by a small "+" within an oval. c) a "V" surmounted by a "+" within a upright truncated cornered rectangle.

Manufacturer

- manufacturer's name does not usually appear on the firearm.

Action

- straight pull bolt action.

Serial Number

- usually found on the top left side of the receiver ring.

Calibre

- cartridge designation not marked.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine.
Remarks	- this firearm model is a Mannlicher designed straight-pull carbine designed for mounted troops. - it features a removeable box magazine, full length forearm with metal nosecap and an arrangement for a side mounted sling.

Notes

Make

- "MANNLICHER" is marked on top of the barrel.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi-automatic, some manually operated, others full automatic and several models of semi-automatic, recoil operated handguns.

Model

- "1894" is marked on top of the barrel.
- production ceased in 1897.
- features include: barrel moves forward against a spring when fired, an extractor on the standing breech holds the fired cartridge case until it is ejected by the subsequent cartridge rising under it. When the trigger is released the barrel moves backwards to chamber the next round.

Manufacturer

- manufacturer is not marked on the firearm.

Action

- blow-forward design.

Serial Number

- serial number is marked on the left side of the receiver/frame and barrel.

Shots

- charger loaded, internal box magazine.

Notes

Make

- "Mannlicher" is not marked on the firearm.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.

Model

- the model designation appears on the receiver as "M95".
- recognition feature: the Austrian Cavalry Carbine M95 does not have an attachment point for a bayonet nor a "stacking rod" while the Austrian Short Rifle M95 has both a bayonet lug and a stacking rod.
- this model of Mannlicher carbine was adopted as a purpose designed, "Carbine" for general issue to the Austrian cavalry forces and is an evolution of the Austrian Carbine, Model of 1890. These firearms are new, purpose-built firearms, adopted in 1895.
- this rifle was a standard issue firearm in the Austro-Hungarian Empire. This basic firearm model was also adopted with only slight modification by the governments of Bulgaria and Greece.
- large numbers of these firearm models were turned over to the Italian Government as "war booty" in 1917-18 and these rifles saw use by the Italian forces in World War II.
- features: the magazine and trigger guard are formed as a single component, the magazine is open for a distance long enough to permit the cartridge clip to drop through when empty, fixed vertical box magazine holding five cartridges in a clip;
as the breech bolt is actuated, the magazine springs acting upon their levers thrust the cartridges successively up between the side walls of the clip, bringing each one into line in its turn with the forward moving bolt for chambering; straight-pull bolt action mechanism, the bolt has two opposed front locking lugs; it is identical to the Model 1895 Austrian Short Rifle except that it has no bayonet attachment point nor is there a "stacking rod; the M95 Cavalry Carbine has an elaborate contoured cocking piece; sights are graduated from 500 to 2000 meters.
- weight: 7 lb, 12oz.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- manufacturer's name is not marked on the firearm.
- "BUDAPEST" is marked on the receiver ring.
- "FEG", "FEGYVER", "FEGYVERGYAR", "FEMARU", "FEMARU ES SZERSZAMGEPGYAR NV", "FEMARU FEGYVER ES GEPGYAR RT", "FFG", "FIREBIRD", "FROMMER", "HUNGARIAN ARMS WORKS", "TOKAGYPT", "WALAM", and "BUDAPEST" are trade names/trademarks used on firearms manufactured by "Femaru Fegyver es Gepygar / Fegyver es Gazkeszuelekgyara".

Action

- manually operated straight-pull bolt action.

Serial Number

- the serial number appears on the left front of the receiver/frame and usually has a letter suffix.

Calibre

- firearms of this model have unique markings on the receiver ring and/or chamber which can help determine the calibre for which the firearm has been chambered.
- if marked "BUDAPEST M95" or "STEYR M.95" on the receiver ring, the calibre should be 8X50R AUSTRIAN MANNLICHER.
- starting in 1930 Austria and later in 1931 the Hungarian government converted many Mannlicher, M95 firearms to 8X56R HUNGARIAN calibre. This conversion was accomplished by rechambering the existing barrel for the new calibre cartridge. The firearms were marked after conversion in the following manner; Austrian conversions were marked with a 12MM high letter "S", Hungarian conversions were marked with a 12MM high letter "H" on the top rear portion of the barrel.
- any Mannlicher, Model 1895 rifle, Short Rifle or Carbine marked with the 12MM high letter "S" or "H" may be assumed to have been rechambered to accept 8X56R HUNGARIAN calibre ammunition.
- between 1918 and 1939, Yugoslavia convert many 1895s to fire 8MM MAUSER in a short rifle configuration with a 610mm (24") barrel and using the standard Mauser stripper clip instead of the Mannlicher en-bloc clip.
- if marked "M95/24," or "M95M" on the receiver ring, the firearm may be chambered for 8MM MAUSER.

Shots

- integral box magazine.
- originally manufactured with a Mannlicher type integral clip loaded box magazine, where the loading is accomplished by en-bloc clip, and the clip is ejected from the bottom of the magazine housing when empty.
- when converted to fire 8MM MAUSER, the magazine was modified to a Mauser type integral box magazine, which is top loaded from a charger/stripper clip.

Other Markings

- the year of manufacture is marked on the chamber of the barrel in conjunction with Austrian military proof marks ('15 for 1915).
- starting in 1930 Austria and later in 1931 the Hungarian government converted many Mannlicher, M95 firearms to 8X56R HUNGARIAN calibre. This conversion was accomplished by rechambering the existing barrel for the new calibre cartridge. The firearms were marked after conversion in the following manner; Austrian conversions were marked with a 12MM high letter "S", Hungarian conversions were marked with a 12MM high letter "H" on the top rear portion of the barrel.
- any Mannlicher, Model 1895 Rifle, Short Rifle or Carbine marked with the 12MM high letter "S" or "H" may be assumed to have been rechambered to accept 8X56R HUNGARIAN calibre ammunition.

Remarks

- this firearm is a carbine version of the Model 1895 Austrian Rifle designed specifically for use by mounted troops.
- it has no bayonet attaching point nor does it have a stacking rod.

Notes

Make

- "Mannlicher" is not marked on the firearm.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation appears on the top of the receiver ring as "95" or "M95", examples have been noted with no model markings.
- recognition feature: the Austrian Rifle Model 95 has an attachment point for a bayonet and a "stacking rod" and a longer barrel than either the Short Rifle or the Cavalry Carbine.
- this firearm is an evolution of the Austrian Carbine, Model of 1890. These firearms are new, purpose-built firearms, adopted in 1895.
- this rifle was a standard issue firearm in the Austro-Hungarian Empire. This basic firearm model was also adopted with only slight modification by the governments of Bulgaria, Greece, Yugoslavia and Germany.
- large numbers of these firearm models were turned over to the Italian Government as "war booty" in 1917-18 and these rifles saw use by the Italian forces in World War II.
- features: the magazine and trigger guard are formed as a single component, the magazine is open for a distance long enough to permit the cartridge clip to drop through when empty, fixed vertical box magazine holding five cartridges in a clip;
as the breech bolt is actuated, the magazine springs acting upon their levers thrust the cartridges successively up between the side walls of the clip, bringing each one into line in its turn with the forward moving bolt for chambering; straight-pull bolt action mechanism, the bolt has two opposed front locking lugs; it is identical to the Model 1895 Austrian Carbine except for barrel length and that the forward barrel band has an attachment point for a bayonet and a "stacking rod"; the M95 Austrian Rifle has an elaborate, contoured cocking piece; the sights are graduated from 600 to 2600 paces.
- total production between 1895 and 1918 is estimated at approximately 3 million.
- weight: 3.950 gms (7 lb, 14oz.).
- rifling characteristics: 4 grooves, concentric, right hand twist, 1 turn in 9.842 inches.

Manufacturer

- manufacturer's name is not marked on the firearm.
- "BUDAPEST" is marked on the receiver ring.
- "FEG", "FEGYVER", "FEGYVERGYAR", "FEMARU", "FEMARU ES SZERSZAMGEPGYAR NV", "FEMARU FEGYVER ES GEPGYAR RT", "FFG", "FIREBIRD", "FROMMER", "HUNGARIAN ARMS WORKS", "TOKAGYPT", "WALAM", and "BUDAPEST" are trade names/trademarks used on firearms manufactured by "Femaru Fegyver es Gepygar / Fegyver es Gazkeszuelekgyara".

Action

- straight pull action.

Serial Number

- the serial number appears on the left front of the receiver/frame, may have a letter suffix.

Calibre

- firearms of this model have unique markings on the receiver ring and/or chamber which can help determine the calibre for which the firearm has been chambered.
- if marked "BUDAPEST M95" or "STEYR M.95" on the receiver ring, the calibre should be 8X50R AUSTRIAN MANNLICHER.
- starting in 1930 Austria and later in 1931 the Hungarian government converted many Mannlicher, M95 firearms to 8X56R HUNGARIAN calibre. This conversion was accomplished by rechambering the existing barrel for the new calibre cartridge. The firearms were marked after conversion in the following manner; Austrian conversions were marked with a 12MM high letter "S", Hungarian conversions were marked with a 12MM high letter "H" on the top rear portion of the barrel.
- any Mannlicher, Model 1895 rifle, Short Rifle or Carbine marked with the 12MM high letter "S" or "H" may be assumed to have been rechambered to accept 8X56R HUNGARIAN calibre ammunition.
- between 1918 and 1939, Yugoslavia convert many 1895s to fire 8MM MAUSER in a short rifle configuration with a 610mm (24") barrel and using the standard Mauser stripper clip instead of the Mannlicher en-bloc clip.
- if marked "M95/24," or "M95M" on the receiver ring, the firearm may be chambered for 8MM MAUSER.

Shots

- integral box magazine.
- originally manufactured with a Mannlicher type integral clip loaded box magazine, where the loading is accomplished by en-bloc clip, and the clip is ejected from the bottom of the magazine housing when empty.
- when converted to fire 8MM MAUSER, the magazine was modified to a Mauser type integral box magazine, which is top loaded from a charger/stripper clip.

Other Markings

- year of manufacture is marked on the chamber of the barrel in conjunction with Austrian military proof marks ('16 for 1916).
- starting in 1930 Austria and later in 1931 the Hungarian government converted many Mannlicher, M95 firearms to 8X56R HUNGARIAN calibre. This conversion was accomplished by rechambering the existing barrel for the new calibre cartridge. The firearms were marked after conversion in the following manner; Austrian conversions were marked with a 12MM high letter "S", Hungarian conversions were marked with a 12MM high letter "H" on the top rear portion of the barrel.
- any Mannlicher, Model 1895 rifle, Short Rifle or Carbine marked with the 12MM high letter "S" or "H" may be assumed to have been rechambered to accept 8X56R HUNGARIAN calibre ammunition.

Notes

Make

- "Mannlicher" is not marked on the firearm.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation appears on the top of the receiver ring as "M95", examples have been noted with no model markings.
- recognition feature: the Austrian Rifle Model 95 has an attachment point for a bayonet and a "stacking rod" and a longer barrel than either the Short Rifle or the Cavalary Carbine.
- this firearm is an evolution of the Austrian Carbine, Model of 1890. These firearms are new, purpose-built firearms, adopted in 1895.
- this rifle was a standard issue firearm in the Austro-Hungarian Empire. This basic firearm model was also adopted with only slight modification by the governments of Bulgaria, Greece, Yugoslavia and Germany.
- large numbers of these firearm models were turned over to the Italian Government as "war booty" in 1917-18 and these rifles saw use by the Italian forces in World War II.
- features: the magazine and trigger guard are formed as a single component, the magazine is open for a distance long enough to permit the cartridge clip to drop through when empty, fixed vertical box magazine holding five cartridges in a clip;
as the breech bolt is actuated, the magazine springs acting upon their levers thrust the cartridges successively up between the side walls of the clip, bringing each one into line in its turn with the forward moving bolt for chambering; straight-pull bolt action mechanism, the bolt has two opposed front locking lugs; it is identical to the Model 1895 Austrian Carbine except for barrel length and that the forward barrel band has an attachment point for a bayonet and a "stacking rod; the M95 Austrian Rifle has an elaborate, contoured cocking piece; the sights are graduated from 600 to 2600 paces.
- total production between 1895 and 1918 is estimated at approximately 3 million.
- weight: 3.950 gms (7 lb, 14oz.).
- rifling characteristics: 4 grooves, concentric, right hand twist, 1 turn in 9.842 inches.

Manufacturer

- the manufacturer's full name is not marked on the firearm.
- "STEYR" is marked on the receiver/frame ring.

Action

- straight pull action.

Serial Number

- the serial number is marked on the side of the receiver ring.
- the serial number may have a letter suffix, eg. "4193S".

Calibre

- firearms of this model have unique markings on the receiver ring and/or chamber which can help determine the calibre for which the firearm has been chambered.
- if marked "BUDAPEST M95" or "STEYR M.95" on the receiver ring, the calibre should be 8X50R AUSTRIAN MANNLICHER.
- starting in 1930 Austria and later in 1931 the Hungarian government converted many Mannlicher, M95 firearms to 8X56R HUNGARIAN calibre. This conversion was accomplished by rechambering the existing barrel for the new calibre cartridge. The firearms were marked after conversion in the following manner; Austrian conversions were marked with a 12MM high letter "S", Hungarian conversions were marked with a 12MM high letter "H" on the top rear portion of the barrel.
- any Mannlicher, Model 1895 rifle or carbine marked with the 12MM high letter "S" or "H" may be assumed to have been rechambered to accept 8X56R HUNGARIAN calibre ammunition.
- between 1918 and 1939, Yugoslavia convert many 1895s to fire 8MM MAUSER in a short rifle configuration with a 610mm (24") barrel and using the standard Mauser stripper clip instead of the Mannlicher en-bloc clip.
- if marked "M95/24," or "M95M" on the receiver ring, the firearm may be chambered for 8MM MAUSER.

Shots

- integral box magazine.
- originally manufactured with a Mannlicher type integral clip loaded box magazine, where the loading is accomplished by en-bloc clip, and the clip is ejected from the bottom of the magazine housing when empty.
- when converted to fire 8MM MAUSER, the magazine was modified to a Mauser type integral box magazine, which is top loaded from a charger/stripper clip.

Other Markings

- year of manufacture appears on the chamber of the barrel in conjuction with Austrian military proof marks ('16 for 1916).
- starting in 1930 Austria and later in 1931 the Hungarian government converted many Mannlicher, M95 firearms to 8X56R HUNGARIAN calibre. This conversion was accomplished by rechambering the existing barrel for the new calibre cartridge. The firearms were marked after conversion in the following manner; Austrian conversions were marked with a 12MM high letter "S", Hungarian conversions were marked with a 12MM high letter "H" on the top rear portion of the barrel.
- any Mannlicher, Model 1895 rifle, Short Rifle or Carbine marked with the 12MM high letter "S" or "H" may be assumed to have been rechambered to accept 8X56R HUNGARIAN calibre ammunition.

Notes

Make

- "Mannlicher" is not marked on the firearm.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.

Model

- the model designation appears on the top of the receiver ring as "M95", examples have been noted with no model markings.
- recognition feature: the Short Rifle Model 95 has an attachment point for a bayonet and a "stacking rod" while the Artillery Carbine Model 95 has neither feature.
- this model of Mannlicher short rifle, was intended for general issue to the Austrian artillery and line of communication troops and is an evolution of the Austrian Carbine, Model of 1890. These firearms are new, purpose-built firearms, adopted in 1895.
- this rifle was a standard issue firearm in the Austro-Hungarian Empire. This basic firearm model was also adopted with only slight modification by the governments of Bulgaria and Greece.
- large numbers of these firearm models were turned over to the Italian Government as "war booty" in 1917-18 and these rifles saw use by the Italian forces in World War II.
- features: the magazine and trigger guard are formed as a single component, the magazine is open for a distance long enough to permit the cartridge clip to drop through when empty, fixed vertical box magazine holding five cartridges in a clip;
as the breech bolt is actuated, the magazine springs acting upon their levers thrust the cartridges successively up between the side walls of the clip, bringing each one into line in its turn with the forward moving bolt for chambering; straight-pull bolt action mechanism, the bolt has two opposed front locking lugs; it is identical to the Model 1895 Austrian Carbine except that the forward barrel band has an attachment point for a bayonet and a "stacking rod; the M95 Austrian Short Rifle has an elaborate, contoured cocking piece; sights are graduated from 500 to 2000 meters.
- total production between 1895 and 1918 is estimated at approximately 1 million.
- weight: 7 lb, 14oz.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "CS.ST. ZBROJOVKA BRNO" or "CS. ZAVODY NA VYROBU ZBRANI BRNO" is marked on top of the receiver ring.
- this manufacturing facility was located in "BRNO", Czechoslovakia.
- in 1918, the "BRNO Arms Works" was originally known as the "State Armament and Engineering Works".
- in 1919, the factory name changed to the "Czechoslovak State Armament Works".
- in 1924, the manufactures named was change to "Ceskoslovenska Zbrojovka A.S." or the "Czechoslovakian Arms Factory Ltd.".

Action

- manually operated straight-pull bolt action.

Serial Number

- the serial number is marked on the left front of the receiver ring.
- the serial number may have a letter suffix.

Calibre

- firearms of this model have unique markings on the receiver ring and/or chamber which can help determine the calibre for which the firearm has been chambered.
- if marked "BUDAPEST M95" or "STEYR M.95" on the receiver ring, the calibre should be 8X50R AUSTRIAN MANNLICHER.
- starting in 1930 Austria and later in 1931 the Hungarian government converted many Mannlicher, M95 firearms to 8X56R HUNGARIAN calibre. This conversion was accomplished by rechambering the existing barrel for the new calibre cartridge. The firearms were marked after conversion in the following manner; Austrian conversions were marked with a 12MM high letter "S", Hungarian conversions were marked with a 12MM high letter "H" on the top rear portion of the barrel.
- any Mannlicher, Model 1895 rifle, Short Rifle or Carbine marked with the 12MM high letter "S" or "H" may be assumed to have been rechambered to accept 8X56R HUNGARIAN calibre ammunition.
- between 1918 and 1939, Yugoslavia convert many 1895s to fire 8MM MAUSER in a short rifle configuration with a 610mm (24") barrel and using the standard Mauser stripper clip instead of the Mannlicher en-bloc clip.
- if marked "M95/24," or "M95M" on the receiver ring, the firearm may be chambered for 8MM MAUSER.

Shots

- integral box magazine.
- originally manufactured with a Mannlicher type integral clip loaded box magazine, where the loading is accomplished by en-bloc clip, and the clip is ejected from the bottom of the magazine housing when empty.
- when converted to fire 8MM MAUSER, the magazine was modified to a Mauser type integral box magazine, which is top loaded from a charger/stripper clip.

Other Markings

- starting in 1930 Austria and later in 1931 the Hungarian government converted many Mannlicher, M95 firearms to 8X56R HUNGARIAN calibre. This conversion was accomplished by rechambering the existing barrel for the new calibre cartridge. The firearms were marked after conversion in the following manner; Austrian conversions were marked with a 12MM high letter "S", Hungarian conversions were marked with a 12MM high letter "H" on the top rear portion of the barrel.
- any Mannlicher, Model 1895 rifle, Short Rifle or Carbine marked with the 12MM high letter "S" or "H" may be assumed to have been rechambered to accept 8X56R HUNGARIAN calibre ammunition.

Remarks

- This short rifle is an abbreviated version of the Model 1895 Austrian Rifle being identical in all respects to the Model 1895 Austrian Cavalry Carbine except that the front barrel band has a bayonet mounting lug and a "stacking rod". This short rifle (stutzen) was standard issue to Austro-Hungarian artillery and line of communication troops during World War I.

Notes

Make

- "Mannlicher" is not marked on the firearm.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation appears on the top of the receiver ring as "M95", examples have been noted with no model markings.
- recognition feature: the Short Rifle Model 95 has an attachment point for a bayonet and a "stacking rod" while the Artillery Carbine Model 95 has neither feature.
- this model of Mannlicher short rifle, was intended for general issue to the Austrian artillery and line of communication troops and is an evolution of the Austrian Carbine, Model of 1890. These firearms are new, purpose-built firearms, adopted in 1895.
- this rifle was a standard issue firearm in the Austro-Hungarian Empire. This basic firearm model was also adopted with only slight modification by the governments of Bulgaria and Greece.
- large numbers of these firearm models were turned over to the Italian Government as "war booty" in 1917-18 and these rifles saw use by the Italian forces in World War II.
- features: the magazine and trigger guard are formed as a single component, the magazine is open for a distance long enough to permit the cartridge clip to drop through when empty, fixed vertical box magazine holding five cartridges in a clip;
as the breech bolt is actuated, the magazine springs acting upon their levers thrust the cartridges successively up between the side walls of the clip, bringing each one into line in its turn with the forward moving bolt for chambering; straight-pull bolt action mechanism, the bolt has two opposed front locking lugs; it is identical to the Model 1895 Austrian Carbine except that the forward barrel band has an attachment point for a bayonet and a "stacking rod; the M95 Austrian Short Rifle has an elaborate, contoured cocking piece; sights are graduated from 500 to 2000 meters.
- total production between 1895 and 1918 is estimated at approximately 1 million.
- weight: 7 lb, 14oz.

Manufacturer

- manufacturer's name is not marked on the firearm.
- "BUDAPEST" is marked on the receiver ring.
- "FEG", "FEGYVER", "FEGYVERGYAR", "FEMARU", "FEMARU ES SZERSZAMGEPGYAR NV", "FEMARU FEGYVER ES GEPGYAR RT", "FFG", "FIREBIRD", "FROMMER", "HUNGARIAN ARMS WORKS", "TOKAGYPT", "WALAM", and "BUDAPEST" are trade names/trademarks used on firearms manufactured by "Femaru Fegyver es Gepygar / Fegyver es Gazkeszuelekgyara".

Action

- manually operated straight-pull bolt action.

Serial Number

- the serial number is marked on the left front of the receiver ring.
- the serial number may have a letter suffix.

Calibre

- firearms of this model have unique markings on the receiver ring and/or chamber which can help determine the calibre for which the firearm has been chambered.
- if marked "BUDAPEST M95" or "STEYR M.95" on the receiver ring, the calibre should be 8X50R AUSTRIAN MANNLICHER.
- starting in 1930 Austria and later in 1931 the Hungarian government converted many Mannlicher, M95 firearms to 8X56R HUNGARIAN calibre. This conversion was accomplished by rechambering the existing barrel for the new calibre cartridge. The firearms were marked after conversion in the following manner; Austrian conversions were marked with a 12MM high letter "S", Hungarian conversions were marked with a 12MM high letter "H" on the top rear portion of the barrel.
- any Mannlicher, Model 1895 rifle, Short Rifle or Carbine marked with the 12MM high letter "S" or "H" may be assumed to have been rechambered to accept 8X56R HUNGARIAN calibre ammunition.
- between 1918 and 1939, Yugoslavia convert many 1895s to fire 8MM MAUSER in a short rifle configuration with a 610mm (24") barrel and using the standard Mauser stripper clip instead of the Mannlicher en-bloc clip.
- if marked "M95/24," or "M95M" on the receiver ring, the firearm may be chambered for 8MM MAUSER.

Shots

- integral box magazine.
- originally manufactured with a Mannlicher type integral clip loaded box magazine, where the loading is accomplished by en-bloc clip, and the clip is ejected from the bottom of the magazine housing when empty.
- when converted to fire 8MM MAUSER, the magazine was modified to a Mauser type integral box magazine, which is top loaded from a charger/stripper clip.

Other Markings

- starting in 1930 Austria and later in 1931 the Hungarian government converted many Mannlicher, M95 firearms to 8X56R HUNGARIAN calibre. This conversion was accomplished by rechambering the existing barrel for the new calibre cartridge. The firearms were marked after conversion in the following manner; Austrian conversions were marked with a 12MM high letter "S", Hungarian conversions were marked with a 12MM high letter "H" on the top rear portion of the barrel.
- any Mannlicher, Model 1895 rifle, Short Rifle or Carbine marked with the 12MM high letter "S" or "H" may be assumed to have been rechambered to accept 8X56R HUNGARIAN calibre ammunition.

Remarks

- This short rifle rifle is an abbreviated version of the Model 1895 Austrian Rifle being identical in all respects to the Model 1895 Austrian Cavalry Carbine except that the front barrel band has a bayonet mounting lug and a "stacking rod". This short rifle (stutzen) was standard issue to Austro-Hungarian artillery and line of communication troops during World War I.

Notes

Make

- "Mannlicher" is not marked on the firearm.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model designation appears on the top of the receiver ring as "M95", examples have been noted with no model markings. - recognition feature: the Short Rifle Model 95 has an attachment point for a bayonet and a "stacking rod" while the Artillery Carbine Model 95 has neither feature. - this model of Mannlicher short rifle, was intended for general issue to the Austrian artillery and line of communication troops and is an evolution of the Austrian Carbine, Model of 1890. These firearms are new, purpose-built firearms, adopted in 1895. - this rifle was a standard issue firearm in the Austro-Hungarian Empire. This basic firearm model was also adopted with only slight modification by the governments of Bulgaria and Greece. - large numbers of these firearm models were turned over to the Italian Government as "war booty" in 1917-18 and these rifles saw use by the Italian forces in World War II. - features: the magazine and trigger guard are formed as a single component, the magazine is open for a distance long enough to permit the cartridge clip to drop through when empty, fixed vertical box magazine holding five cartridges in a clip; as the breech bolt is actuated, the magazine springs acting upon their levers thrust the cartridges successively up between the side walls of the clip, bringing each one into line in its turn with the forward moving bolt for chambering; straight-pull bolt action mechanism, the bolt has two opposed front locking lugs; it is identical to the Model 1895 Austrian Carbine except that the forward barrel band has an attachment point for a bayonet and a "stacking rod; the M95 Austrian Short Rifle has an elaborate, contoured cocking piece; sights are graduated from 500 to 2000 meters. - total production between 1895 and 1918 is estimated at approximately 1 million. - weight: 7 lb, 14oz.
Manufacturer	- the manufacturer's full name is not marked on the firearm. - "STEYR" is marked on the receiver ring or on the left side of the receiver/frame.
Action	- manually operated straight-pull bolt action.
Serial Number	- the serial number is marked on the left front of the receiver ring. - the serial number may have a letter suffix.
Calibre	- firearms of this model have unique markings on the receiver ring and/or chamber which can help determine the calibre for which the firearm has been chambered. - if marked "BUDAPEST M95" or "STEYR M.95" on the receiver ring, the calibre should be 8X50R AUSTRIAN MANNLICHER. - starting in 1930 Austria and later in 1931 the Hungarian government converted many Mannlicher, M95 firearms to 8X56R HUNGARIAN calibre. This conversion was accomplished by rechambering the existing barrel for the new calibre cartridge. The firearms were marked after conversion in the following manner; Austrian conversions were marked with a 12MM high letter "S", Hungarian conversions were marked with a 12MM high letter "H" on the top rear portion of the barrel. - any Mannlicher, Model 1895 rifle, Short Rifle or Carbine marked with the 12MM high letter "S" or "H" may be assumed to have been rechambered to accept 8X56R HUNGARIAN calibre ammunition. - between 1918 and 1939, Yugoslavia convert many 1895s to fire 8MM MAUSER in a short rifle configuration with a 610mm (24") barrel and using the standard Mauser stripper clip instead of the Mannlicher en-bloc clip. - if marked "M95/24," or "M95M" on the receiver ring, the firearm may be chambered for 8MM MAUSER.
Shots	- integral box magazine. - originally manufactured with a Mannlicher type integral clip loaded box magazine, where the loading is accomplished by en-bloc clip, and the clip is ejected from the bottom of the magazine housing when empty. - when converted to fire 8MM MAUSER, the magazine was modified to a Mauser type integral box magazine, which is top loaded from a charger/stripper clip.
Other Markings	- The year of manufacture appears on the chamber of the barrel in conjunction with Austrian military proofs ('15 for 1915). - starting in 1930 Austria and later in 1931 the Hungarian government converted many Mannlicher, M95 firearms to 8X56R HUNGARIAN calibre. This conversion was accomplished by rechambering the existing barrel for the new calibre cartridge. The firearms were marked after conversion in the following manner; Austrian conversions were marked with a 12MM high letter "S", Hungarian conversions were marked with a 12MM high letter "H" on the top rear portion of the barrel. - any Mannlicher, Model 1895 rifle, Short Rifle or Carbine marked with the 12MM high letter "S" or "H" may be assumed to have been rechambered to accept 8X56R HUNGARIAN calibre ammunition.
Remarks	- This short rifle rifle is an abbreviated version of the Model 1895 Austrian Rifle being identical in all respects to the Model 1895 Austrian Cavalry Carbine except that the front barrel band has a bayonet mounting lug and a "stacking rod". This short rifle (stutzen) was standard issue to Austro-Hungarian artillery and line of communication troops during World War I.

Notes

Make

- "Mannlicher" is not marked on the firearm.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi-automatic, some manually operated, others full automatic and several models of semi-automatic, recoil operated handguns.

Model

- the full model designation is not marked on the firearm.
- "M.95" is marked on the receiver ring with the Bulgarian national crest.
- this rifle was adopted by the Bulgarian armed forces in 1895; it is identical (except for markings) to the "1895 Austrian Rifle".
- manufactured from 1895 to 1918.
- features include: blued finish; straight-pull bolt-action; semi-pistol-grip wooden stock and upper handguard; open sights with flip-up adjustable "ladder" for extended ranges; sling swivels at wrist and first band; a combination bayonet lug/rod and ball stacking lug at the muzzle; and the Bulgarian national crest on the top of the receiver/frame (a standing lion within a shield, surmounted by a crown).

Manufacturer

- the manufacturer's full name is not marked on the firearm.
- "STEYR" is marked on the receiver ring or left side of the receiver/frame.
- the date of manufacturer may be marked on the left side of the receiver/frame.

Action

- straight pull bolt.

Serial Number

- the serial number is marked on the side of the receiver ring.
- the serial number may have a letter suffix

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- firearms of this model have unique markings on the receiver ring and/or chamber which can help determine the calibre for which the firearm has been chambered.
- if marked "BUDAPEST M95" or "STEYR M.95" on the receiver ring, the calibre should be 8X50R AUSTRIAN MANNLICHER.
- starting in 1930 Austria and later in 1931 the Hungarian government converted many Mannlicher, M95 firearms to 8X56R HUNGARIAN calibre. This conversion was accomplished by rechambering the existing barrel for the new calibre cartridge. The firearms were marked after conversion in the following manner; Austrian conversions were marked with a 12MM high letter "S", Hungarian conversions were marked with a 12MM high letter "H" on the top rear portion of the barrel.
- any Mannlicher, Model 1895 rifle, Short Rifle or Carbine marked with the 12MM high letter "S" or "H" may be assumed to have been rechambered to accept 8X56R HUNGARIAN calibre ammunition.
- between 1918 and 1939, Yugoslavia convert many 1895s to fire 8MM MAUSER in a short rifle configuration with a 610mm (24") barrel and using the standard Mauser stripper clip instead of the Mannlicher en-bloc clip.
- if marked "M95/24," or "M95M" on the receiver ring, the firearm may be chambered for 8MM MAUSER.

Shots

- integral box magazine.
- originally manufactured with a Mannlicher type integral clip loaded box magazine, where the loading is accomplished by en-bloc clip, and the clip is ejected from the bottom of the magazine housing when empty.
- when converted to fire 8MM MAUSER, the magazine was modified to a Mauser type integral box magazine, which is top loaded from a charger/stripper clip.

Other Markings

- starting in 1930 Austria and later in 1931 the Hungarian government converted many Mannlicher, M95 firearms to 8X56R HUNGARIAN calibre. This conversion was accomplished by rechambering the existing barrel for the new calibre cartridge. The firearms were marked after conversion in the following manner; Austrian conversions were marked with a 12MM high letter "S", Hungarian conversions were marked with a 12MM high letter "H" on the top rear portion of the barrel.
- any Mannlicher, Model 1895 rifle, Short Rifle or Carbine marked with the 12MM high letter "S" or "H" may be assumed to have been rechambered to accept 8X56R HUNGARIAN calibre ammunition.

Notes

Make

- "Mannlicher" is not marked on the firearm.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.

Model

- model is not marked on firearm.
- manufactured from 1902 to 1920.
- date of manufacture is marked on the receiver/frame.
- this is a generic entry for the 1895 Dutch Carbine, other entries exist that may better identify the firearm being examined.
- this carbine is mechanically identical to the Model 1895 Dutch Rifle differing only in barrel length, rear sight and butt stock configuration .
- several variations of this model were produced.
- features may include:
- full or half length stock.
- straight or turned down bolt handle.
- nose cap with bayonet stud, or front sight that receives a socket bayonet, or folding bayonet.
- front handguard or no provision for a handguard.
- the left side of the projecting magazine may be covered by a piece of wood which is pinned and glued to the stock.
- various sling swivel locations.

Manufacturer

- "HEMBRUG" and the year of manufacturer are marked on the left side of the receiver/frame.

Serial Number

- serial number is marked on the receiver/frame and may have a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- integral box magazine.
- magazine is loaded by using a Mannlicher type clip.

- this carbine is mechanically identical to the Model 1895 Dutch Rifle differing only in barrel length, rear sight and butt stock configuration .
- several variations of this model were produced.
- features may include: full or half length stock; straight or turned down bolt handle; nose cap with bayonet stud, or front sight that receives a socket bayonet or folding bayonet; front handguard or no provision for a handguard; the left side of the projecting magazine may be covered by a piece of wood which is pinned and glued to the stock; various sling swivel locations.
- NOTE: the Indonesian Government, after gaining their independence from the Dutch in 1949, had their Mannlicher 1895 carbines and rifles rebarreled to fire 303 BRITISH.

Manufacturer

- manufacturer's identifier is marked on the receiver/frame.

Serial Number

- serial number is marked on the receiver/frame and may have a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- integral box magazine.
- magazine is loaded by using a Mannlicher type clip.

Firearm Reference Number (FRN): 1218
Make: Mannlicher
Model: 1895 Dutch Carbine No 3 Modified

Summary

Make:	Mannlicher
Model:	1895 Dutch Carbine No 3 Modified
Manufacturer:	Oesterreichische Waffenfabriks Gesellschaft, Steyr
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	AUSTRIA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
1218 - 1	6.5X53R MANNLICHER	5	450	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make	- named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century. - von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi-automatic, some manually operated, others full automatic and several models of semi-automatic, recoil operated handguns. - the Mannlicher name does not appear on the firearm.
Model	- model designation does not appear on the firearm.
Manufacturer	- manufacturer's name is marked on the receiver/frame.
Serial Number	- serial number is marked on the front end of the receiver/frame and may have a letter prefix or suffix.
Other Markings	- date of manufacture is marked on the receiver/frame.
Remarks	- this carbine is mechanically identical to the Model 1895 Dutch Rifle differing only in barrel length, rear sight and butt stock configuration. This carbine is a modification to the No 3 New Model Carbine in which the sling swivels are moved from the underside of the nosecap and buttstock to the side of the forestock and buttstock.

1228 - 1	6.5X53R MANNLICHER	5	790	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.
- the Mannlicher name does not appear on the firearm.

Model

- the model designation does not appear on the firearm.
- manufactured between 1901 and 1920.
- this rifle is similar to the Romanian rifle model of 1893 differing in minor mechanical details, visually distinctive is the under barrel bayonet mounting point which differs from the Romanian M93 which mounts the bayonet on the right side of the barrel. This rifle was adopted for general issue to the Netherlands armed forces, Colonial troops and the Gendarmerie.
- features include: Mannlicher turn bolt action with two opposed locking lugs; the Dutch bolt has a strengthening rib in line with the bolt handle which is not present on the Romanian Model M93; Mannlicher magazine in which a clip holding 5 cartridges is inserted into the rifle's magazine; a "split bridge" receiver/frame in which the bolt handle turns down to lock ahead of the receiver bridge, in effect the receiver bridge acts as a third safety lug to lock the bolt handle; sights are graduated in meters from 200 to 2000 in increments of 100 meters; the safety on the Netherlands variants of this Mannlicher Rifle, unlike the Romanian versions, cannot be engaged when the striker is in the fired position.
-NOTE: the bayonet is fixed on the attaching point underneath the barrel.
- rifling characteristics: 4 grooves, right hand twist, rate of twist 1 turn in 7.874 inches.
- weight: approximately 9 lbs 4 oz.

Manufacturer

- "HEMBRUG" and the year of manufacture are marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- manually operated bolt action mechanism.
Serial Number	- the serial number is marked on the front end of the receiver/frame, may have a letter prefix or suffix.
Other Markings	- the date of manufacture appears on receiver. - some examples have been observed with information/data stamped on the right rear of the butt together with the Netherlands Government property stamp which consists of the royal crown over the letter "W" for Queen Wilhelmina.
Remarks	- this firearm was the first small bore, smokeless powder cartridge service rifle adopted by the Netherlands. The 1895 Dutch Rifle closely resembles the Model 1893 Romanian Rifle differing in minor details such as sights, barrel length and bolt rib guide. It uses the same cartridge and Mannlicher clip as the Romanian rifle.

FRT Report

Firearm Reference Number (FRN): 1229
Make: Mannlicher
Model: 1895 Dutch Rifle

Summary

Make:	Mannlicher
Model:	1895 Dutch Rifle
Manufacturer:	Oesterreichische Waffenfabriks Gesellschaft, Steyr
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	AUSTRIA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
1229 - 1	6.5X53R MANNLICHER	5	790	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.
- the Mannlicher name does not appear on the firearm.

Model

- the model designation does not appear on the firearm.
- this rifle is similar to the Romanian rifle model of 1893 differing in minor mechanical details, visually distinctive is the under barrel bayonet mounting point which differs from the Romanian M93 which mounts the bayonet on the right side of the barrel. This rifle was adopted for general issue to the Netherlands armed forces, Colonial troops and the Gendarmerie.
- features include: Mannlicher turn bolt action with two opposed locking lugs; the Dutch bolt has a strengthening rib in line with the bolt handle which is not present on the Romanian Model M93; Mannlicher magazine in which a clip holding 5 cartridges is inserted into the rifle's magazine; a "split bridge" receiver/frame in which the bolt handle turns down to lock ahead of the receiver bridge, in effect the receiver bridge acts as a third safety lug to lock the bolt handle; sights are graduated in meters from 200 to 2000 in increments of 100 meters; the safety on the Netherlands variants of this Mannlicher Rifle, unlike the Romanian versions, cannot be engaged when the striker is in the fired position.
-NOTE: the bayonet is fixed on the attaching point underneath the barrel.
- rifling characteristics: 4 grooves, right hand twist, rate of twist 1 turn in 7.874 inches.
- weight: approximately 9 lbs 4 oz.

Manufacturer

- the manufacturer's name is marked on the receiver/frame.

Action

- manually operated bolt action mechanism.

Serial Number

- the serial number is marked on the front end of the receiver/frame and may have a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- the date of manufacture is marked on the receiver/frame.
- some examples have been observed with information/data stamped on the right rear of the butt together with the Netherlands Government property stamp which consists of the royal crown over the letter "W" for Queen Wilhelmina.

Remarks

- this firearm was the first small bore, smokeless powder cartridge service rifle adopted by the Netherlands. The 1895 Dutch Rifle closely resembles the Model 1893 Romanian Rifle differing in minor details such as sights, barrel length and bolt rib guide. It uses the same cartridge and Mannlicher clip as the Romanian rifle.

Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	HUNGARY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
1149 - 1	8MM MAUSER	5	600	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Mannlicher" is not marked on the firearm.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.

Model

- "M 95/24" is marked on the receiver ring.
- this is a modification of existing Model 1895 Austrian straight pull bolt action rifle, Short Rifle or Carbine carried out by the Bulgarian government in the 1920's.
- features: modification included fitting a new barrel in calibre 8MM MAUSER, fitting a new tangent rear sight, shortening the forearm, fitting a new handguard and modifying the bolt head and the magazine to negate the necessity of using Mannlicher clips; straight-pull bolt action mechanism, the bolt has two opposed front locking lugs; the forward barrel band has an attachment point for a bayonet and a "stacking rod.

Manufacturer

- manufacturer's name is not marked on the firearm.
- "BUDAPEST" is marked on the receiver ring.
- "FEG", "FEGYVER", "FEGYVERGYAR", "FEMARU", "FEMARU ES SZERSZAMGEPGYAR NV", "FEMARU FEGYVER ES GEPGYAR RT", "FFG", "FIREBIRD", "FROMMER", "HUNGARIAN ARMS WORKS", "TOKAGYPT", "WALAM", and "BUDAPEST" are trade names/trademarks used on firearms manufactured by "Femaru Fegyver es Gepygar / Fegyver es Gazkeszuelekgyara".

Action

- straight-pull bolt design.

Serial Number

- the serial number is marked on the side of the receiver ring.
- the serial number may have a letter suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- firearms of this model have unique markings on the receiver ring and/or chamber which can help determine the calibre for which the firearm has been chambered. - if marked "BUDAPEST M95" or "STEYR M.95" on the receiver ring, the calibre should be 8X50R AUSTRIAN MANNLICHER. - in the 1930s, both Austria and Hungary converted many model 1895s to 8X56R HUNGARIAN. - if marked with a 12mm high letter "H" or "S" on the chamber, the firearm should be chambered for 8X56R HUNGARIAN. - between 1918 and 1939, Yugoslavia convert many 1895s to fire 8MM MAUSER in a short rifle configuration with a 610mm (24") barrel and using the standard Mauser stripper clip instead of the Mannlicher en-bloc clip. - if marked "M95/24," or "M95M" on the receiver ring, the firearm may be chambered for 8MM MAUSER.
Shots	- integral box magazine. - originally manufactured with a Mannlicher type integral clip loaded box magazine, where the loading is accomplished by en-bloc clip, and the clip is ejected from the bottom of the magazine housing when empty. - when converted to fire 8MM MAUSER, the magazine was modified to a Mauser type integral box magazine, which is top loaded from a charger/stripper clip.
Other Markings	- will normally bear the "rampant lion" inspectors' mark and the "crowned F" cypher of Prince Ferdinand.
Remarks	- this firearm is a modification of existing Model 1895 Austrian straight pull bolt action rifles carried out by the Bulgarian government in the 1920's. Modification included fitting a new barrel in 8MM MAUSER, tangent rear sight, shortening the forearm, fitting a new handguard and modifying the bolt head and magazine to negate the necessity of using Mannlicher loading clips.

- the model designation appears on the receiver ring as "M 95" and will have a large "S" on the chamber of the barrel.
- this is a 1930's arsenal modification to existing Model 1895 Austrian Short Rifles (Stutzen) whereby they were rechambered from the original 8X50R AUSTRIAN calibre to the 8X56R; in addition, the original year of manufacture usually appears on the chamber of the barrel in conjunction with the Austrian military proof marks, e.g., "16" for the year of 1916.
- features include: a bayonet stud, sling swivels fitted to underside and left side of buttstock and forestock; a short, balled stacking rod which screws into the upper barrel band.

Manufacturer

- the manufacturer's name appears on the receiver ring.

Action

- straight pull, bolt action.

Serial Number

- the serial number is marked on the side of the receiver ring.
- the serial number may have a letter suffix

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- firearms of this model have unique markings on the receiver ring and/or chamber which can help determine the calibre for which the firearm has been chambered.
- if marked "BUDAPEST M95" or "STEYR M.95" on the receiver ring, the calibre should be 8X50R AUSTRIAN MANNLICHER.
- in the 1930s, both Austria and Hungary converted many model 1895s to 8X56R HUNGARIAN.
- if marked with a 12mm high letter "H" or "S" on the chamber, the firearm should be chambered for 8X56R HUNGARIAN.
- between 1918 and 1939, Yugoslavia convert many 1895s to fire 8MM MAUSER in a short rifle configuration with a 610mm (24") barrel and using the standard Mauser stripper clip instead of the Mannlicher en-bloc clip.
- if marked "M95/24," or "M95M" on the receiver ring, the firearm may be chambered for 8MM MAUSER.

Shots

- integral box magazine.
- originally manufactured with a Mannlicher type integral clip loaded box magazine, where the loading is accomplished by en-bloc clip, and the clip is ejected from the bottom of the magazine housing when empty.
- when converted to fire 8MM MAUSER, the magazine was modified to a Mauser type integral box magazine, which is top loaded from a charger/stripper clip.

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
27799 - 1	8X56R	5	482	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Mannlicher" is not marked on the firearm.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.

Model

- the model designation appears on the receiver ring as "M 95" and a large "S" or "H" on the chamber of the barrel.

Manufacturer

- manufacturer's name is not marked on the firearm.
- "BUDAPEST" is marked on the receiver ring.
- "FEG", "FEGYVER", "FEGYVERGYAR", "FEMARU", "FEMARU ES SZERSZAMGEPGYAR NV", "FEMARU FEGYVER ES GEPGYAR RT", "FFG", "FIREBIRD", "FROMMER", "HUNGARIAN ARMS WORKS", "TOKAGYPT", "WALAM", and "BUDAPEST" are trade names/trademarks used on firearms manufactured by "Femaru Fegyver es Gepygar / Fegyver es Gazkeszuelekgyara".

Action

- straight pull action.

Serial Number

- the serial number is marked on the side of the receiver ring.
- the serial number may have a letter suffix

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- firearms of this model have unique markings on the receiver ring and/or chamber which can help determine the calibre for which the firearm has been chambered.
- if marked "BUDAPEST M95" or "STEYR M.95" on the receiver ring, the calibre should be 8X50R AUSTRIAN MANNLICHER.
- in the 1930s, both Austria and Hungary converted many model 1895s to 8X56R HUNGARIAN.
- if marked with a 12mm high letter "H" or "S" on the chamber, the firearm should be chambered for 8X56R HUNGARIAN.
- between 1918 and 1939, Yugoslavia convert many 1895s to fire 8MM MAUSER in a short rifle configuration with a 610mm (24") barrel and using the standard Mauser stripper clip instead of the Mannlicher en-bloc clip.
- if marked "M95/24," or "M95M" on the receiver ring, the firearm may be chambered for 8MM MAUSER.

Shots

- integral box magazine.
- originally manufactured with a Mannlicher type integral clip loaded box magazine, where the loading is accomplished by en-bloc clip, and the clip is ejected from the bottom of the magazine housing when empty.
- when converted to fire 8MM MAUSER, the magazine was modified to a Mauser type integral box magazine, which is top loaded from a charger/stripper clip.

Other Markings

- marked with a large S or H stamped over the chamber of the barrel indicating the rifle has been rechambered for the 8X56R cartridge. Original year of manufacture appears on the chamber of the barrel in conjunction with the Austrian military proof marks ('16 for 1916).

Remarks

- this is a 1930's modification to existing Model 1895 Austrian Rifles whereby they were shortened to "short rifle" (stutzen) configuration and re-chambered to the 8X56R cartridge. This rifle is readily identified by the presence of the original long rifle sight.

Notes

Make

- named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.
- the Mannlicher name does not appear on the firearm.

Model

- "M.95 M" is marked on the top of the receiver ring.
- "M.95 M" is a converted Mannlicher model 1895 rifle.
- "M.95 M" converted rifle were made by Steyr in the 1920's.
- "M.95 M" were also made in Yugoslavia for the Yugoslav military in 1938 and 1939.
- "M.95" converted under a Bulgaria contract are marked with the Bulgarian Rampant Lion crest under a crown over "M.95 M" and the original manufacturer (Budapest or Steyr) will be roll-stamped on the side-wall receiver/frame.
- features include: round modified barrel in 8mm Mauser calibre, called the Model 1924S round in Yugoslav service; Mauser type ramp front and notched tangent rear sight; shortened forearm, fitting of a new handguard; shortened bolt with modified bolt head and new extractor; rear bridge of the receiver/frame have been machine for the use of Mauser type stripper clip; original clip ejection slot at the bottom of the magazine housing has been filled by a sheet metal cover and welding; blue finish.
- many "M.95 M" military rifles have been sporterized by the cutting and refinishing of its furniture and metal parts.

Manufacturer

- The manufactuer's name appears on the receiver ring.

Action

- Straight pull action.

Serial Number

- serial number was observed marked on the left side of the receiver/frame and is repeated on the barrel.
- observed serial number consisted of five numbers without a letter prefix or suffix.
- serial number rationalization is unknown, serial number may have a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- firearms of this model have unique markings on the receiver ring and/or chamber which can help determine the calibre for which the firearm has been chambered.
- if marked "BUDAPEST M95" or "STEYR M.95" on the receiver ring, the calibre should be 8X50R AUSTRIAN MANNLICHER.
- in the 1930s, both Austria and Hungary converted many model 1895s to 8X56R HUNGARIAN.
- if marked with a 12mm high letter "H" or "S" on the chamber, the firearm should be chambered for 8X56R HUNGARIAN.
- between 1918 and 1939, Yugoslavia convert many 1895s to fire 8MM MAUSER in a short rifle configuration with a 610mm (24") barrel and using the standard Mauser stripper clip instead of the Mannlicher en-bloc clip.
- if marked "M95/24," or "M95M" on the receiver ring, the firearm may be chambered for 8MM MAUSER.

Shots

- integral box magazine.

1143 - 1	8MM MAUSER	5	600	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.
- the Mannlicher name does not appear on the firearm.

Model

- the model designation is marked on the receiver/frame ring as "M 95 M".

Manufacturer

- the converters name is not usually marked on the firearm.
- original "Budapest" marking will usually remain on the firearm.

Action

- straight pull bolt.

Serial Number

- marked on the side of the receiver/frame, may have a letter prefix or suffix.

Calibre

- firearms of this model have unique markings on the receiver ring and/or chamber which can help determine the calibre for which the firearm has been chambered.
- if marked "BUDAPEST M95" or "STEYR M.95" on the receiver ring, the calibre should be 8X50R AUSTRIAN MANNLICHER.

- if marked "M95/24," or "M95M" on the receiver ring, the firearm may be chambered for 8MM MAUSER.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - integral box magazine.

Remarks - this is a modification of existing Model 1895 Austrian straight pull bolt action rifles carried out by the Yugoslavian government in the 1920's. This modification included fitting a new barrel in calibre 8MM MAUSER, tangent rear sight, shortening the forearm, fitting a new handguard and modifying the bolt head and the magazine to negate the necessity of using Mannlicher clips. After the modification was carried out an "M" was added to the model designation. This rifle is identical to the Bulgarian Model 1895/24 except for markings.

Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	AUSTRIA
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
24745 - 1	7.63MM MANNLICHER	8	142	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
24745 - 2	7.63MM MANNLICHER	8	160	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- the Mannlicher name does not appear on the firearm.
Model	- the earliest pistols were dated from the year the first patents were granted, starting in 1898. - the early firearms had little or no markings. Pre 1900 pistols may have a crowned "M" in a circle or on a cross. 1900 pistols and the first two to three hundred 1901 pistols may have "PATENT MANNLICHER" on the left slide arm. Later pistols were manufactured by Steyr. - may have a pistol grip safety, or a large lever safety on the left side of the pistol grip, or simple safety catch on the rear of the slide. - do not confuse the 1901 which is a delayed blowback, with the 1903 which is a locked breach handgun.
Manufacturer	- manufacturer may not be marked on the firearm.
Action	- delayed blowback.
Serial Number	- serial number is marked on the under side of the receiver/frame and on the upper left side of the barrel and slide.
Shots	- charger loaded enternal box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- Handguns chambered for the cartridge 7.63MM MANNLICHER, also known as 7.65MM MANNLICHER are deemed exempt from CC 84(1) "prohibited firearm" para. (a)(ii), which states:
"prohibited firearm" means
(a) a handgun that
(ii) is designed or adapted to discharge a 25 or 32 calibre cartridge,

Notes

Make

- named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.

Model

- the earliest versions of the M1901 are dated from the year the first patents were granted, starting in 1898.
- the early guns had little or no markings. Pre-1900 pistols may have a crowned "M" in a circle or on a cross.
- 1900 pistols and the first two to three hundred 1901 pistols may have "PATENT MANNLICHER" on the left slide arm. (see FRT 24745)
- later pistols were manufactured by Steyr and are marked "WAFFENFABRIK STYER" on the left side lock cover plate for the remainder of 1901.
- in 1902 the marking became "PATENT MANNLICHER Md 1902 WAFFENFABRIK STYER".
- the year marking was changed annually to the end of production in 1910.
- the Model 1901 was adopted by the Argentine army in 1905 as the "MODELO 1905".
- may have a pistol grip safety, or a large lever safety on the left side of the pistol grip, or a simple safety catch on the rear of the slide.
- do not confuse the 1901 which is a delayed blowback, with the 1903 which is a locked breach handgun.

Manufacturer

- the early proto-types and the 1900-1901 pistols were manufactured by Waffenfabrik Von Dreyse until it closed down and was taken over by Rhienische Metallwaaren und Maschinenfabrik.
- from 1901 through 1905 production was manufactured by Styer.

Action

- delayed blowback.

Serial Number

- serial number is marked on the under side of the receiver/frame and on the upper left side of the barrel and slide.

Shots

- charger loaded external box magazine.

1234 - 1	8MM MAUSER	5	450	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.
- the Mannlicher name does not appear on the firearm.

Model

- the 1904 Export Carbine is mechanically and visually identical to the Model 1893 Romanian Carbine. It differs in being chambered for the 8MM MAUSER cartridge and designed to accept the German 1888 Mannlicher clip as opposed to the Romanian 1893 Mannlicher clip.
- it is believed that these rifles were manufactured for sale to China.
- a number of these carbines have been observed with Irish markings on the right side of the buttstock.

Manufacturer

- the manufacturer's designation appears on the left side of the receiver/frame as "Steyr".

Serial Number

- appears on right front of the receiver.

Calibre

- the cartridge intended for use in this carbine is loaded with a .318" diameter bullet.

Other Markings

- the date of manufacture will be found on the left side of receiver.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make	- "SYSTEM MANNLICHER" is usually marked on the side of the receiver/frame. - named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century. - von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.
Model	- "Md 1905" is marked on the left side of the receiver/frame.
Manufacturer	- "WAFFENFABRIK STEYR" is marked on the left side of the receiver/frame.
Action	- delayed blowback operated. - single action.
Serial Number	- serial number will normally be marked on the underside of the receiver/frame. - may also be marked on other componants.
Calibre	- not marked with caliber/cartridge designation.
Shots	- non detachable box magazine.
Canadian Law Comments	- Handguns chambered for the cartridge 7.63MM MANNLICHER, also known as 7.65MM MANNLICHER are deemed exempt from CC 84(1) "prohibited firearm" para. (a)(ii), which states: "prohibited firearm" means (a) a handgun that (ii) is designed or adapted to discharge a 25 or 32 calibre cartridge

FRT Report

Firearm Reference Number (FRN): 1230
Make: Mannlicher
Model: 1917 Dutch Rifle

Summary

Make:	Mannlicher
Model:	1917 Dutch Rifle
Manufacturer:	Artillerie-Inrichtingen, Hembrug
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	NETHERLANDS
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
1230 - 1	7.9X57R DUTCH	5	790	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.
- the Mannlicher name does not appear on the firearm.

Model

- the model designation may appear on the receiver/frame of the firearm.
- this rifle was adopted in 1917 for issue to Dutch machine gun troops. It is identical to the standard Model 1895 Dutch Rifle except that it is chambered for the 7.9X57R cartridge which was used in the Dutch versions of the Schwarzlose and Lewis Machine guns.
- the 1895 Dutch Rifle is itself similar to the Romanian Rifle Model 1893, differing in minor mechanical details, visually distinctive is the under barrel bayonet mounting point which differs from the Romanian M93 which mounts the bayonet on the right side of the barrel.
- the 1895 Dutch Mannlicher Rifle was adopted for general issue to the Netherlands armed forces, Colonial troops and the Gendarmerie.
- features include: Mannlicher turn bolt action with two opposed locking lugs; the Dutch bolt has a strengthening rib in line with the bolt handle which is not present on the Romanian Model M93; Mannlicher magazine in which a clip holding 5 cartridges is inserted into the rifle's magazine; a "split bridge" receiver/frame in which the bolt handle turns down to lock ahead of the receiver bridge, in effect the receiver bridge acts as a third safety lug to lock the bolt handle; sights are graduated in meters from 200 to 2000 in increments of 100 meters.
- the safety catch on the Dutch variants of this Mannlicher Rifle, unlike the Romanian versions, cannot be engaged when the striker is in the fired position.
-NOTE: the bayonet is fixed on the attaching point underneath the barrel.

Manufacturer

- "HEMBRUG" and the year of manufacture are marked on the left side of the receiver/frame.

Action

- manually operated turn bolt action.

Serial Number

- the serial number appears on the front of the receiver/frame and may have a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - the date of manufacture appears on the receiver/frame.

Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	HUNGARY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
1232 - 1	8X56R	5	600	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Mannlicher" is not marked on the firearm.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.

Model

- the model designation is marked on the receiver/frame ring as "35M".
- produced between 1936 and 1942.

Manufacturer

- manufacturer's name is not marked on the firearm.
- "BUDAPEST" is marked on the receiver ring.
- "FEG", "FEGYVER", "FEGYVERGYAR", "FEMARU", "FEMARU ES SZERSZAMGEPGYAR NV", "FEMARU FEGYVER ES GEPGYAR RT", "FFG", "FIREBIRD", "FROMMER", "HUNGARIAN ARMS WORKS", "TOKAGYPT", "WALAM", and "BUDAPEST" are trade names/trademarks used on firearms manufactured by "Femaru Fegyver es Gepygar / Fegyver es Gazkeszuelekgyara".

Action

- manually operated turn bolt action.

Serial Number

- serial number is marked on the front end of the receiver/frame, may have a letter prefix or suffix.

Shots

- integral box magazine.
- Mannlicher type integral clip loaded box magazine, where the loading is accomplished by en-bloc clip, and the clip is ejected from the bottom of the magazine housing when empty.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - the coat of arms of Hungary (shield and crown) on the chamber of the barrel.

Remarks - this is a Hungarian service rifle adopted in 1935 of standard turn bolt design utilising the Mannlicher magazine system which requires a five shot clip which is inserted into the rifle's magazine. This rifle is visually distinctive in that it has a two piece stock and a butt socket much like the British Lee-Enfield. This rifle was replaced in 1943 by a considerably modified version of the same rifle.

Notes

Make

- named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.
- the Mannlicher name does not appear on the firearm.

Model

- the model designation appears on the receiver ring as "43M". These rifles were produced from 1943 to 1950.
- this rifle was intoduced into the Hungarian Army in 1943 as a replacement for the Model 1935 Hungarian Rifle and is direct derivative of the German G 98/40 differing in minor details such as bayonet lug designed to mount the Hungarian pattern bayonet.

Manufacturer

- the manufacturer's name appears on the receiver ring as the code jhv.

Action

- manually operated turn bolt action.

Serial Number

- the serial number appears on the front end of the receiver.
- the serial numbering system includes a letter suffix, except for the first 9999 firearms made in each year which have no letter suffix.

Shots

- integral box magazine.

Other Markings

- Date of manufacture appears on the receiver ring below the manufacturer's code as the last two digits of the year.

Notes

Make

- "Mannlicher" is not marked on the firearm.
- "Mannlicher" as a make is named after Ferdinand Ritter von Mannlicher a prolific, inventive genius who created and pioneered his designs in the last quarter of the 19th century.
- Ferdinand Ritter von Mannlicher died in 1903 leaving behind a rich legacy of approximately 150 firearm designs, mostly repeating rifles, some semi automatic, some manually operated, others full automatic and several models of semi automatic, recoil operated handguns.

Model

- "G 98/40" is marked on the left side of the receiver/frame.
- manufactured from 1941 to 1944.
- this is a German World War II redesign of the Model 1935 Hungarian Rifle for use by German troops. It is mechanically identical to the Model 1935 Hungarian Rifle differing in the type of magazine (Mauser type as opposed to the Mannlicher type as used with the original Model 1935) and bayonet fittings. The calibre was changed from the original 8X56R HUNGARIAN to 8MM MAUSER to standardize with other W.W.II German infantry weapons.

Manufacturer

- "jhv" over the year of manufacturer is marked on the receiver ring.
- "jhv" is the German manufacturer's code for "Metallwaren Waffen und Maschinenfabrik".

Action

- manually operated turn bolt action.

Serial Number

- the serial number is marked on the left side of the receiver ring.
- serial number includes a letter suffix, except for the first 9999 firearms made in each year which have no letter suffix.

Shots

- internal box magazine.

Firearm Reference Number (FRN): 1153
Make: Mannlicher-Berthier
Model: 1890 Cavalry Carbine

Summary

Make:	Mannlicher-Berthier
Model:	1890 Cavalry Carbine
Manufacturer:	Manufacture d'Armes de Chatellerault (MAC)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	FRANCE
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
1153 - 1	8X50R LEBEL	3	450	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- "Mle 1890" appears on the left side of the receiver/frame.
- manufactured between 1891 and 1900.
- approximately 250,000 examples of all types of Mannlicher-Berthier Mle 1890 Carbines were produced.
- features include: one-piece stock, does not have a top handguard; bolt with two locking lugs located at the front of the bolt and a turned down bolt handle, the safety is located at the rear of the bolt, blade front sight with a quadrant rear sight graduated to 2000 meters, the sights were regulated for use with the Model 1886 Balle "M" ammunition and subsequently modified after 1909 for use with the Balle "D".

Manufacturer

- the manufacturer's name, or "Chatellerault" appears on the left side of the receiver/frame.
- "Manufacture Nationale d'Armes de Chatellerault (MAC)" was established in Chatellerault, France in 1819.
- "Manufacture Nationale d'Armes de Chatellerault (MAC)" manufactured small arms for the French government including machine-guns, rifles and pistols between 1822 and 1968.

Action

- manually operated, bolt action, repeating rifle.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number appears on the left side of the chamber of the barrel, and may also be found marked on the bolt and/or butt plate, the serial number has a script letter prefix, followed by up to five digits.
- the arsenal of production may be determined by the letter prefix code as follows:
Chatellerault - A, B, C, D & E
St Etienne - F, G, H, I, J, K, L, M, N, P & Q
Tulle - R, S & T

Shots

- this firearm has a Mannlicher style magazine loaded from the top with a three shot traditional Mannlicher clip which falls through the bottom of the magazine when the last cartridge is chambered.

Other Markings

- the year of manufacture appears on the side of the chamber of the barrel.
- these firearms may have been through one or more major rebuilds and possibly have had several barrel changes. There may be a profusion of markings found on the barrel or receiver/frame which will complicate identification.
- receiver/frame markings of "MD" (on the left rear of the receiver/frame usually after the model designation) indicate that the firearm and sights have been regulated for use with Balle "D" ammunition.
- barrels marked "N" indicate that the barrel and sights have been regulated for use with Model 1932, Balle "N" ammunition.

Remarks

- the Mannlicher-Berthier Model 1890 Cavalry Carbine requires a three shot Mannlicher clip to be inserted from the top of the action into the Mannlicher style magazine, the empty clip falls out through the bottom of the magazine when the last cartridge is chambered.
- this carbine differs from the other Mannlicher-Berthier carbines by having a metal buttplate and not having provision for a bayonet. Many specimens were altered to conform to subsequent models of the Berthier carbine.

1156 - 1	8X50R LEBEL	3	450	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- "Mle 1890" appears on the left side of the receiver/frame.
- manufactured between 1891 and 1900.
- approximately 250,000 examples of all types of Mannlicher-Berthier Mle 1890 Carbines were produced.
- features include: one-piece stock, does not have a top handguard; bolt with two locking lugs located at the front of the bolt and a turned down bolt handle, the safety is located at the rear of the bolt, blade front sight with a quadrant rear sight graduated to 2000 meters, the sights were regulated for use with the Model 1886 Balle "M" ammunition and subsequently modified after 1909 for use with the Balle "D".

Manufacturer

- "St. Etienne" appears on the left side of the receiver/frame.

Action

- manually operated, bolt action, repeating rifle.

Serial Number

- the serial number appears on the left side of the chamber of the barrel, and may also be found marked on the bolt and/or butt plate, the serial number has a script letter prefix, followed by up to five digits.
- the arsenal of production may be determined by the letter prefix code as follows:

Chatellerault - A, B, C, D & E
St Etienne - F, G, H, I, J, K, L, M, N, P & Q
Tulle - R, S & T

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- this firearm has a Mannlicher style magazine loaded from the top with a three shot traditional Mannlicher clip which falls through the bottom of the magazine when the last cartridge is chambered.

Other Markings

- the year of manufacture appears on the side of the chamber of the barrel.
- these firearms may have been through one or more major rebuilds and possibly have had several barrel changes. There may be a profusion of markings found on the barrel or receiver/frame which will complicate identification.
- receiver/frame markings of "MD" (on the left rear of the receiver/frame usually after the model designation) indicate that the firearm and sights have been regulated for use with Balle "D" ammunition.
- barrels marked "N" indicate that the barrel and sights have been regulated for use with Model 1932, Balle "N" ammunition.

Remarks

- the Mannlicher-Berthier Model 1890 Cavalry Carbine requires a three shot Mannlicher clip to be inserted from the top of the action into the Mannlicher style magazine, the empty clip falls out through the bottom of the magazine when the last cartridge is chambered.
- this carbine differs from the other Mannlicher-Berthier carbines by having a metal buttplate and not having provision for a bayonet. Many specimens were altered to conform to subsequent models of the Berthier carbine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number appears on the left side of the chamber of the barrel, and may also be found marked on the bolt and/or butt plate, the serial number has a script letter prefix, followed by up to five digits.
- the arsenal of production may be determined by the letter prefix code as follows:
Chatellerault - A, B, C, D & E
St Etienne - F, G, H, I, J, K, L, M, N, P & Q
Tulle - R, S & T

Shots

- this firearm has a Mannlicher style magazine loaded from the top with a three shot traditional Mannlicher clip which falls through the bottom of the magazine when the last cartridge is chambered.

Other Markings

- the year of manufacture appears on the side of the chamber of the barrel.
- these firearms may have been through one or more major rebuilds and possibly have had several barrel changes. There may be a profusion of markings found on the barrel or receiver/frame which will complicate identification.
- receiver/frame markings of "MD" (on the left rear of the receiver/frame usually after the model designation) indicate that the firearm and sights have been regulated for use with Balle "D" ammunition.
- barrels marked "N" indicate that the barrel and sights have been regulated for use with Model 1932, Balle "N" ammunition.

Remarks

- the Mannlicher-Berthier Model 1890 Gendarmerie Carbine requires a three shot Mannlicher clip to be inserted from the top of the action into the Mannlicher style magazine, the empty clip falls out through the bottom of the magazine when the last cartridge is chambered.
- this carbine differs from the other Mannlicher-Berthier carbines by having a metal buttplate and a nose cap with provision for a bayonet. Many specimens were altered to conform to subsequent models of the Berthier carbine.

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- "Mle 1890" appears on the left side of the receiver/frame.
- manufactured between 1891 and 1900.
- approximately 250,000 examples of all types of Mannlicher-Berthier Mle 1890 Carbines were produced.
- the Mle 1890 Gendarmerie Carbine differs from other Mannlicher-Berthier Carbines by having a metal buttplate and a nose cap with provision for a bayonet.
- features include: one-piece stock, does not have a top handguard; bolt with two locking lugs located at the front of the bolt and a turned down bolt handle, the safety is located at the rear of the bolt, blade front sight with a quadrant rear sight graduated to 2000 meters, the sights were regulated for use with the Model 1886 Balle "M" ammunition and subsequently modified after 1909 for use with the Balle "D".

Manufacturer

- "St. Etienne" appears on the left side of the receiver/frame.

Action

- manually operated, bolt action, repeating rifle.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number appears on the left side of the chamber of the barrel, and may also be found marked on the bolt and/or butt plate, the serial number has a script letter prefix, followed by up to five digits.
- the arsenal of production may be determined by the letter prefix code as follows:
Chatellerault - A, B, C, D & E
St Etienne - F, G, H, I, J, K, L, M, N, P & Q
Tulle - R, S & T

Shots

- this firearm has a Mannlicher style magazine loaded from the top with a three shot traditional Mannlicher clip which falls through the bottom of the magazine when the last cartridge is chambered.

Other Markings

- the year of manufacture appears on the side of the chamber of the barrel.
- these firearms may have been through one or more major rebuilds and possibly have had several barrel changes. There may be a profusion of markings found on the barrel or receiver/frame which will complicate identification.
- receiver/frame markings of "MD" (on the left rear of the receiver/frame usually after the model designation) indicate that the firearm and sights have been regulated for use with Balle "D" ammunition.
- barrels marked "N" indicate that the barrel and sights have been regulated for use with Model 1932, Balle "N" ammunition.

Remarks

- the Mannlicher-Berthier Model 1890 Gendarmerie Carbine requires a three shot Mannlicher clip to be inserted from the top of the action into the Mannlicher style magazine, the empty clip falls out through the bottom of the magazine when the last cartridge is chambered.
- this carbine differs from the other Mannlicher-Berthier carbines by having a metal buttplate and a nose cap with provision for a bayonet. Many specimens were altered to conform to subsequent models of the Berthier carbine.

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- "Mle 1892" is marked on the left side of the receiver/frame.
- manufactured between 1892 and 1918.
- approximately 900,000 examples of Mannlicher-Berthier Mle 1892 Carbines were produced by the French State Arsenal System, two private companies named "CONTINSOUZA" and "DELAUNAY - BELLEVILLE" supplied the Arsenals with receiver/frames.
- features include: one-piece stock, does not have a top handguard; the cleaning rod is located on the left side of the fore end, there are two handguard retaining bands; saddle ring mounted on the rear handguard retaining band; bolt with two front locking lugs and a turned down bolt handle, the safety is located at the rear of the bolt and a blade front sight with a quadrant rear sight graduated to 2000 meters.
- the sights were regulated for use with the Model 1886 Balle "M" ammunition and subsequently modified after 1909 for use with the Balle "D".

Manufacturer

- the manufacturer's name appears on the left side of the receiver/frame.

Action

- turn bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number appears on the left side of the chamber of the barrel, and may also be found marked on the bolt and/or butt plate, the serial number has a script letter prefix, followed by up to five digits.
- the arsenal of production may be determined by the letter prefix code as follows:
Chatellerault - A, B, C, D & E
St Etienne - F, G, H, I, J, K, L, M, N, P & Q
Tulle - R, S & T
- the French serial number rationalization of the era placed the serial number on the left side of the chamber of the barrel. Since "CONTINSOUZA" and "DELAUNAY-BELLEVILLE" supplied only the receiver/frame to the French Arsenal System, there is no serial number rationalization for those two "manufacturers".

Shots

- this firearm has a Mannlicher style magazine loaded from the top with a three shot traditional Mannlicher clip which falls through the bottom of the magazine when the last cartridge is chambered.

Other Markings

- the year of manufacture appears on the side of the chamber of the barrel.
- these firearms may have been through one or more major rebuilds and possibly have had several barrel changes. There may be a profusion of markings found on the barrel or receiver/frame which will complicate identification.
- receiver/frame markings of "MD" (on the left rear of the receiver/frame usually after the model designation) indicate that the firearm and sights have been regulated for use with Balle "D" ammunition.
- barrels marked "N" indicate that the barrel and sights have been regulated for use with Model 1932, Balle "N" ammunition.

Remarks

- the Mannlicher-Berthier Mle 1892 Artillery Carbine requires a three shot Mannlicher clip to be inserted from the top of the action into the Mannlicher style magazine, the empty clip falls out through the bottom of the magazine when the last cartridge is chambered.
- this carbine differs from other Mannlicher-Berthier carbines by having a metal buttplate, provision for a bayonet and a saddle ring. Many specimens were altered to conform to subsequent models of the Berthier carbine.

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- "Mle 1892" is marked on the left side of the receiver/frame.
- manufactured between 1892 and 1918.
- approximately 900,000 examples of Mannlicher-Berthier Mle 1892 Carbines were produced by the French State Arsenal System, two private companies named "CONTINSOUZA" and "DELAUNNAY - BELLEVILLE" supplied the Arsenals with receiver/frames.
- features include: one-piece stock, does not have a top handguard; the cleaning rod is located on the left side of the fore end, there are two handguard retaining bands; saddle ring mounted on the rear handguard retaining band; bolt with two front locking lugs and a turned down bolt handle, the safety is located at the rear of the bolt and a blade front sight with a quadrant rear sight graduated to 2000 meters.
- the sights were regulated for use with the Model 1886 Balle "M" ammunition and subsequently modified after 1909 for use with the Balle "D".

Manufacturer

- the manufacturer's name, or "Chatellerault" appears on the left side of the receiver/frame.
- "Manufacture Nationale d'Armes de Chatellerault (MAC)" was established in Chatellerault, France in 1819.
- "Manufacture Nationale d'Armes de Chatellerault (MAC)" manufactured small arms for the French government including machine-guns, rifles and pistols between 1822 and 1968.

Action

- manually operated, bolt action, repeating rifle.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number appears on the left side of the chamber of the barrel, and may also be found marked on the bolt and/or butt plate, the serial number has a script letter prefix, followed by up to five digits.
- the arsenal of production may be determined by the letter prefix code as follows:
Chatellerault - A, B, C, D & E
St Etienne - F, G, H, I, J, K, L, M, N, P & Q
Tulle - R, S & T
- the French serial number rationalization of the era placed the serial number on the left side of the chamber of the barrel. Since "CONTINSOUZA" and "DELAUNNAY" supplied only the receiver/frame to the French Arsenal System, there is no serial number rationalization for those two "manufacturers".

Shots

- this firearm has a Mannlicher style magazine loaded from the top with a three shot traditional Mannlicher clip which falls through the bottom of the magazine when the last cartridge is chambered.

Other Markings

- the year of manufacture appears on the side of the chamber of the barrel.
- these firearms may have been through one or more major rebuilds and possibly have had several barrel changes. There may be a profusion of markings found on the barrel or receiver/frame which will complicate identification.
- receiver/frame markings of "MD" (on the left rear of the receiver/frame usually after the model designation) indicate that the firearm and sights have been regulated for use with Balle "D" ammunition.
- barrels marked "N" indicate that the barrel and sights have been regulated for use with Model 1932, Balle "N" ammunition.

Remarks

- the Mannlicher-Berthier Mle 1892 Artillery Carbine requires a three shot Mannlicher clip to be inserted from the top of the action into the Mannlicher style magazine, the empty clip falls out through the bottom of the magazine when the last cartridge is chambered.
- this carbine differs from other Mannlicher-Berthier carbines by having a metal buttplate, provision for a bayonet and a saddle ring. Many specimens were altered to conform to subsequent models of the Berthier carbine.

FRT Report

Firearm Reference Number (FRN): 1163
Make: Mannlicher-Berthier
Model: 1892 Artillery Carbine

Summary

Make:	Mannlicher-Berthier
Model:	1892 Artillery Carbine
Manufacturer:	Manufacture d'Armes de St-Etienne (MAS)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	FRANCE
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
1163 - 2	8X50R LEBEL	3	440	Prohibited CC 84(1) "prohibited firearm" para. (b)	Non-Commercial Customization	
1163 - 1	8X50R LEBEL	3	450	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- "Mle 1892" is marked on the left side of the receiver/frame.
- manufactured between 1892 and 1918.
- approximately 900,000 examples of Mannlicher-Berthier Mle 1892 Carbines were produced by the French State Arsenal System, two private companies named "CONTINSOUZA" and "DELAUNNAY - BELLEVILLE" supplied the Arsenals with receiver/frames.
- features include: one-piece stock, does not have a top handguard; the cleaning rod is located on the left side of the fore end, there are two handguard retaining bands; saddle ring mounted on the rear handguard retaining band; bolt with two front locking lugs and a turned down bolt handle, the safety is located at the rear of the bolt and a blade front sight with a quadrant rear sight graduated to 2000 meters.
- the sights were regulated for use with the Model 1886 Balle "M" ammunition and subsequently modified after 1909 for use with the Balle "D".

Manufacturer

- "St. Etienne" appears on the left side of the receiver/frame.

Action

- manually operated, bolt action, repeating rifle.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number appears on the left side of the chamber of the barrel, and may also be found marked on the bolt and/or butt plate, the serial number has a script letter prefix, followed by up to five digits.
- the arsenal of production may be determined by the letter prefix code as follows:
Chatellerault - A, B, C, D & E
St Etienne - F, G, H, I, J, K, L, M, N, P & Q
Tulle - R, S & T
- the French serial number rationalization of the era placed the serial number on the left side of the chamber of the barrel. Since "CONTINSOUZA" and "DELAUNNAY" supplied only the receiver/frame to the French Arsenal System, there is no serial number rationalization for those two "manufacturers".

Shots

- this firearm has a Mannlicher style magazine loaded from the top with a three shot traditional Mannlicher clip which falls through the bottom of the magazine when the last cartridge is chambered.

Other Markings

- the year of manufacture appears on the side of the chamber of the barrel.
- these firearms may have been through one or more major rebuilds and possibly have had several barrel changes. There may be a profusion of markings found on the barrel or receiver/frame which will complicate identification.
- receiver/frame markings of "MD" (on the left rear of the receiver/frame usually after the model designation) indicate that the firearm and sights have been regulated for use with Balle "D" ammunition.
- barrels marked "N" indicate that the barrel and sights have been regulated for use with Model 1932, Balle "N" ammunition.

Remarks

- the Mannlicher-Berthier Mle 1892 Artillery Carbine requires a three shot Mannlicher clip to be inserted from the top of the action into the Mannlicher style magazine, the empty clip falls out through the bottom of the magazine when the last cartridge is chambered.
- this carbine differs from other Mannlicher-Berthier carbines by having a metal buttplate, provision for a bayonet and a saddle ring. Many specimens were altered to conform to subsequent models of the Berthier carbine.

125401 - 1	8X50R LEBEL	5	454	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when the last cartridge is chambered.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- the model designation is marked on the left side of the receiver as: "1916" and/or "Mle 1892" and "M. 16".
- these firearms were converted from Model 1892 Artillery Carbines by the French State Arsenals between 1916 and 1918.
- this firearm model is essentially a Model 1892 Mannlicher-Berthier, French service carbine altered from three to five shot magazine capacity and re-designated as the "Model of 1916".
- features include: originally introduced for Cavalry use; bolt with two locking lugs located at the front of the bolt and a turned down bolt handle, safety is located at the rear of the bolt, blade front sight with graduated rear sight which is located at the rear of the barrel, one-piece stock with two barrel bands; short wood top handguard; the rear barrel band may have an attached saddle ring.

Manufacturer

- manufacturer's name is marked on the left side of the receiver/frame.

Action

- turn bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number appears on the left side of the chamber of the barrel, and may also be found marked on the bolt and/or butt plate, the serial number has a script letter prefix, followed by up to five digits.
- the arsenal of production may be determined by the letter prefix code as follows:
Chatellerault - A, B, C, D & E
St Etienne - F, G, H, I, J, K, L, M, N, P & Q
Tulle - R, S & T
- the French serial number rationalization of the era placed the serial number on the left side of the chamber of the barrel. Since "CONTINSOUZA" and "DELAUNAY-BELLEVILLE" supplied only the receiver/frame to the French Arsenal System, there is no serial number rationalization for those two "manufacturers".

Shots

- fixed Mannlicher box magazine.
- the Mannlicher style magazine was modified, circa 1916, replacing the three shot capacity Mannlicher magazine with a five shot capacity Mannlicher integral box magazine which has a bottom cover to prevent the entry of dirt & mud. This magazine utilizes a five shot Mannlicher cartridge clip which falls out through the bottom of the magazine when the last cartridge is chambered provided the bottom cover has been opened.

Other Markings

- take note that firearms converted from Model 1892 Artillery Carbines by the French State Arsenals between 1916 and 1918 will identified as "Mle 1892" (space) "M. 16" while original manufacture Model 1916 Carbines will be marked as "Mle M.16 or "Mle-M-16" depending on the manufacturer.
- these firearms have been through one or more major rebuilds and possibly have had several barrel changes. There may be a profusion of markings found on the barrel or receiver/frame which will complicate identification.
- receiver/frame markings of "MD" (on the left rear of the receiver/frame usually after the model designation) indicate that the firearm and sights have been regulated for use with Balle "D" ammunition.
- barrels marked "N" indicate that the barrel and sights have been regulated for use with Model 1932, Balle "N" ammunition.

Remarks

- the vast majority of the Mannlicher-Berthier, Model 1992 Artillery Carbines were converted to Mle 1916.
- the Mannlicher style magazine was modified, circa 1916, replacing the three shot capacity Mannlicher magazine with a five shot capacity Mannlicher magazine which has a bottom cover to prevent the entry of dirt & mud. This magazine utilizes a five shot Mannlicher cartridge clip which falls out through the bottom of the magazine when the last cartridge is chambered provided the bottom cover has been opened.
- in 1927 these Mannlicher-Berthier Model 1892/16 Carbines were further modified by deleting the cleaning rod, they were then redesignated M1916/27 or "Mle - M - 16/27". - take note that the redesignation to M1916/27 was not necessarily marked on the firearm.

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when the last cartridge is chambered.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- the model designation is marked on the left side of the receiver as: "1916" and/or "Mle 1892" and "M. 16".
- these firearms were converted from Model 1892 Artillery Carbines by the French State Arsenals between 1916 and 1918.
- this firearm model is essentially a Model 1892 Mannlicher-Berthier, French service carbine altered from three to five shot magazine capacity and re-designated as the "Model of 1916".
- features include: originally introduced for Cavalry use; bolt with two locking lugs located at the front of the bolt and a turned down bolt handle, safety is located at the rear of the bolt, blade front sight with graduated rear sight which is located at the rear of the barrel, one-piece stock with two barrel bands; short wood top handguard; the rear barrel band may have an attached saddle ring.

Manufacturer

- manufacturer's name will be found marked on the left side of the receiver/frame.

Action

- turn bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number appears on the left side of the chamber of the barrel, and may also be found marked on the bolt and/or butt plate, the serial number has a script letter prefix, followed by up to five digits.
- the arsenal of production may be determined by the letter prefix code as follows:
Chatellerault - A, B, C, D & E
St Etienne - F, G, H, I, J, K, L, M, N, P & Q
Tulle - R, S & T
- the French serial number rationalization of the era placed the serial number on the left side of the chamber of the barrel. Since "CONTINSOUZA" and "DELAUNAY-BELLEVILLE" supplied only the receiver/frame to the French Arsenal System, there is no serial number rationalization for those two "manufacturers".

Shots

- fixed Mannlicher box magazine.
- the Mannlicher style magazine was modified, circa 1916, replacing the three shot capacity Mannlicher magazine with a five shot capacity Mannlicher integral box magazine which has a bottom cover to prevent the entry of dirt & mud. This magazine utilizes a five shot Mannlicher cartridge clip which falls out through the bottom of the magazine when the last cartridge is chambered provided the bottom cover has been opened.

Other Markings

- take note that firearms converted from Model 1892 Artillery Carbines by the French State Arsenals between 1916 and 1918 will identified as "Mle 1892" (space) "M. 16" while original manufacture Model 1916 Carbines will be marked as "Mle M.16 or "Mle-M-16" depending on the manufacturer.
- these firearms have been through one or more major rebuilds and possibly have had several barrel changes. There may be a profusion of markings found on the barrel or receiver/frame which will complicate identification.
- receiver/frame markings of "MD" (on the left rear of the receiver/frame usually after the model designation) indicate that the firearm and sights have been regulated for use with Balle "D" ammunition.
- barrels marked "N" indicate that the barrel and sights have been regulated for use with Model 1932, Balle "N" ammunition.

Remarks

- the vast majority of the Mannlicher-Berthier, Model 1992 Artillery Carbines were converted to Mle 1916.
- the Mannlicher style magazine was modified, circa 1916, replacing the three shot capacity Mannlicher magazine with a five shot capacity Mannlicher magazine which has a bottom cover to prevent the entry of dirt & mud. This magazine utilizes a five shot Mannlicher cartridge clip which falls out through the bottom of the magazine when the last cartridge is chambered provided the bottom cover has been opened.
- in 1927 these Mannlicher-Berthier Model 1892/16 Carbines were further modified by deleting the cleaning rod, they were then redesignated M1916/27 or "Mle - M - 16/27". - take note that the redesignation to M1916/27 was not necessarily marked on the firearm.

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when the last cartridge is chambered.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- the model designation is marked on the left side of the receiver as: "1916" and/or "Mle 1892" and "M. 16".
- these firearms were converted from Model 1892 Artillery Carbines by the French State Arsenals between 1916 and 1918.
- this firearm model is essentially a Model 1892 Mannlicher-Berthier, French service carbine altered from three to five shot magazine capacity and re-designated as the "Model of 1916".
- features include: originally introduced for Cavalry use; bolt with two locking lugs located at the front of the bolt and a turned down bolt handle, safety is located at the rear of the bolt, blade front sight with graduated rear sight which is located at the rear of the barrel, one-piece stock with two barrel bands; short wood top handguard; the rear barrel band may have an attached saddle ring.

Manufacturer

- manufacturer is marked on the firearm.
- "Manufacture Nationale d'Armes de Chatellerault (MAC)" was established in Chatellerault, France in 1819.
- "Manufacture Nationale d'Armes de Chatellerault (MAC)" manufactured small arms for the French government including machine-guns, rifles and pistols between 1822 and 1968.

Action

- turn bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number will be found marked on the left rear of the barrel, and may also be found marked on the bolt and/or butt plate.
- these firearms have been through at least one if not more major rebuilds and possibly have had several barrel changes. There may be a profusion of markings found on the barrel or receiver/frame which will complicate identification.
- the serial number appears on the left side of the chamber of the barrel and has a one or more script letter prefix, followed by up to five digits.
- the arsenal of production may be determined by the letter prefix code as follows:

Chatellerault - A, B, C, D & E
St Etienne - F, G, H, I, J, K, L, M, N, P & Q
Tulle - R, S & T

Shots

- fixed Mannlicher box magazine.
- the Mannlicher style magazine was modified, circa 1916, replacing the three shot capacity Mannlicher magazine with a five shot capacity Mannlicher integral box magazine which has a bottom cover to prevent the entry of dirt & mud. This magazine utilizes a five shot Mannlicher cartridge clip which falls out through the bottom of the magazine when the last cartridge is chambered provided the bottom cover has been opened.

Other Markings

- take note that firearms converted from Model 1892 Artillery Carbines by the French State Arsenals between 1916 and 1918 will identified as "Mle 1892" (space) "M. 16" while original manufacture Model 1916 Carbines will be marked as "Mle M.16 or "Mle-M-16" depending on the manufacturer.
- these firearms have been through one or more major rebuilds and possibly have had several barrel changes. There may be a profusion of markings found on the barrel or receiver/frame which will complicate identification.
- receiver/frame markings of "MD" (on the left rear of the receiver/frame usually after the model designation) indicate that the firearm and sights have been regulated for use with Balle "D" ammunition.
- barrels marked "N" indicate that the barrel and sights have been regulated for use with Model 1932, Balle "N" ammunition.

Remarks

- the vast majority of the Mannlicher-Berthier, Model 1992 Artillery Carbines were converted to Mle 1916.
- the Mannlicher style magazine was modified, circa 1916, replacing the three shot capacity Mannlicher magazine with a five shot capacity Mannlicher magazine which has a bottom cover to prevent the entry of dirt & mud. This magazine utilizes a five shot Mannlicher cartridge clip which falls out through the bottom of the magazine when the last cartridge is chambered provided the bottom cover has been opened.
- in 1927 these Mannlicher-Berthier Mle 1892/16 Carbines were further modified by deleting the cleaning rod, they were then redesignated M1916/27 or "Mle - M - 16/27".
- take note that the redesignation to Mle M - 16/27 was not necessarily marked on the firearm.

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- the model designation is marked on the left side of the receiver/frame as: "Mle 1902".
- this firearm was originally introduced for Colonial use within the French Empire. It is essentially a Mannlicher Berthier, Model 1890 Cavalry Carbine modified with a longer barrel. This firearm has a Mannlicher style magazine loaded from the top with a three shot traditional Mannlicher clip which falls through the bottom of the magazine when the last cartridge is chambered.
- features include: one-piece stock, does not have a top handguard; bolt with two locking lugs located at the front of the bolt and a turned down bolt handle, the safety is located at the rear of the bolt, blade front sight with standing block rear sight regulated to 250 meters, a ramp rear sight graduated from 400 - 800 meters with a folding leaf sight graduated from 900 - 1900 meters, the sights were regulated for use with the Model 1886 Balle "M" ammunition and subsequently modified after 1909 for use with the Balle "D".

Manufacturer

- the manufacturer's name appears on the left side of the receiver.
- "Manufacture Nationale d'Armes de Chatellerault (MAC)" was established in Chatellerault, France in 1819.
- "Manufacture Nationale d'Armes de Chatellerault (MAC)" manufactured small arms for the French government including machine-guns, rifles and pistols between 1822 and 1968.

Action

- manually operated, bolt action, repeating rifle.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number appears on the left side of the chamber of the barrel, and may also be found marked on the bolt and/or butt plate, the serial number has a script letter prefix, followed by up to five digits.
- the arsenal of production may be determined by the letter prefix code as follows:
Chatellerault - A, B, C, D & E
St Etienne - F, G, H, I, J, K, L, M, N, P & Q
Tulle - R, S & T

Shots

- this firearm has a Mannlicher style magazine loaded from the top with a three shot traditional Mannlicher clip which falls through the bottom of the magazine when the last cartridge is chambered.

Other Markings

- the year of manufacture appears on the side of the chamber of the barrel.
- these firearms may have been through one or more major rebuilds and possibly have had several barrel changes. There may be a profusion of markings found on the barrel or receiver/frame which will complicate identification.
- receiver/frame markings of "MD" (on the left rear of the receiver/frame usually after the model designation) indicate that the firearm and sights have been regulated for use with Balle "D" ammunition.
- barrels marked "N" indicate that the barrel and sights have been regulated for use with Model 1932, Balle "N" ammunition.

Remarks

- the Mannlicher-Berthier Model 1902 Rifle is a true "Short Rifle" (632MM barrel) with a barrel longer than a "Carbine" (450MM barrel) and shorter barrel than a "Service Rifle" (798MM).
- the Mannlicher-Berthier Model 1902 Rifle rifle requires a three shot Mannlicher clip to be inserted from the top of the action into the Mannlicher style magazine, the empty clip falls out through the bottom of the magazine when the last cartridge is chambered.
- in 1937 a few surviving rifles were converted to Calibre 7.5X54 FRENCH MAS ammunition and redesignated "Model 1902/37".

- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- the model designation is marked on the left side of the receiver/frame as: "Mle 1902".
- this firearm was originally introduced for Colonial use within the French Empire. It is essentially a Mannlicher Berthier, Model 1890 Cavalry Carbine modified with a longer barrel. This firearm has a Mannlicher style magazine loaded from the top with a three shot traditional Mannlicher clip which falls through the bottom of the magazine when the last cartridge is chambered.
- features include: one-piece stock, does not have a top handguard; bolt with two locking lugs located at the front of the bolt and a turned down bolt handle, the safety is located at the rear of the bolt, blade front sight with standing block rear sight regulated to 250 meters, a ramp rear sight graduated from 400 - 800 meters with a folding leaf sight graduated from 900 - 1900 meters, the sights were regulated for use with the Model 1886 Balle "M" ammunition and subsequently modified after 1909 for use with the Balle "D".

Manufacturer

- "St. Etienne" appears on the left side of the receiver/frame.

Action

- manually operated, bolt action, repeating rifle.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number appears on the left side of the chamber of the barrel and has a one or more script letter prefix followed by up to five digits.
- the arsenal of production may be determined by the letter prefix code as follows:
Chatellerault - A, B, C, D & E
St Etienne - F, G, H, I, J, K, L, M, N, P & Q
Tulle - R, S & T

Shots

- this firearm has a Mannlicher style magazine loaded from the top with a three shot traditional Mannlicher clip which falls through the bottom of the magazine when the last cartridge is chambered.

Other Markings

- the year of manufacture appears on the side of the chamber of the barrel.
- these firearms may have been through one or more major rebuilds and possibly have had several barrel changes. There may be a profusion of markings found on the barrel or receiver/frame which will complicate identification.
- receiver/frame markings of "MD" (on the left rear of the receiver/frame usually after the model designation) indicate that the firearm and sights have been regulated for use with Balle "D" ammunition.
- barrels marked "N" indicate that the barrel and sights have been regulated for use with Model 1932, Balle "N" ammunition.

Remarks

- the Mannlicher-Berthier Model 1902 Rifle is a true "Short Rifle" (632MM barrel) with a barrel longer than a "Carbine" (450MM barrel) and shorter barrel than a "Service Rifle" (798MM).
- the Mannlicher-Berthier Model 1902 Rifle rifle requires a three shot Mannlicher clip to be inserted from the top of the action into the Mannlicher style magazine, the empty clip falls out through the bottom of the magazine when the last cartridge is chambered.
- in 1937 a few surviving rifles were converted to Calibre 7.5X54 FRENCH MAS ammunition and redesignated "Model 1902/37".

- this firearm has a Mannlicher style magazine loaded from the top with a three shot traditional Mannlicher clip which falls through the bottom of the magazine when the last cartridge is chambered.

Other Markings

- the year of manufacture appears on the side of the chamber of the barrel.
- these firearms may have been through one or more major rebuilds and possibly have had several barrel changes. There may be a profusion of markings found on the barrel or receiver/frame which will complicate identification.
- receiver/frame markings of "MD" (on the left rear of the receiver/frame usually after the model designation) indicate that the firearm and sights have been regulated for use with Balle "D" ammunition.
- barrels marked "N" indicate that the barrel and sights have been regulated for use with Model 1932, Balle "N" ammunition.

Remarks

- the Mannlicher-Berthier Model 1902 Rifle rifle requires a three shot Mannlicher clip to be inserted from the top of the action into the Mannlicher style magazine, the empty clip falls out through the bottom of the magazine when the last cartridge is chambered.

1170 - 1	8X50R LEBEL	3	798	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- the model designation is marked on the left side of the receiver/frame as: "Mle 1907".
- this firearm was originally introduced for Colonial use within the French Empire. It is essentially a Mannlicher Berthier, Model 1890 Cavalry Carbine modified with a longer barrel. This firearm has a Mannlicher style magazine loaded from the top with a three shot traditional Mannlicher clip which falls through the bottom of the magazine when the last cartridge is chambered.
- features include: one-piece stock, no handguard; bolt with two locking lugs located at the front of the bolt and a turned down bolt handle, the safety is located at the rear of the bolt, blade front sight with ramp rear sight graduated to 2000 meters with Balle "M" subsequently altered to 2400 meters with Balle "D".
-NOTE: this firearm has no provision for a cleaning rod.

Manufacturer

- the manufacturer's name, or "Tulle" appears on the left side of the receiver/frame.

Action

- manually operated, bolt action, repeating rifle.

Serial Number

- the serial number appears on the left side of the chamber of the barrel and has a one or more script letter prefix followed by up to five digits.
- the arsenal of production may be determined by the letter prefix code as follows:
Chatellerault - A, B, C, D & E
St Etienne - F, G, H, I, J, K, L, M, N, P & Q
Tulle - R, S & T

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- this firearm has a Mannlicher style magazine loaded from the top with a three shot traditional Mannlicher clip which falls through the bottom of the magazine when the last cartridge is chambered.

Other Markings

- the year of manufacture appears on the side of the chamber of the barrel.
- these firearms may have been through one or more major rebuilds and possibly have had several barrel changes. There may be a profusion of markings found on the barrel or receiver/frame which will complicate identification.
- receiver/frame markings of "MD" (on the left rear of the receiver/frame usually after the model designation) indicate that the firearm and sights have been regulated for use with Balle "D" ammunition.
- barrels marked "N" indicate that the barrel and sights have been regulated for use with Model 1932, Balle "N" ammunition.

Remarks

- the Mannlicher-Berthier Mle 1907 Rifle rifle requires a three shot Mannlicher clip to be inserted from the top of the action into the Mannlicher style magazine, the empty clip falls out through the bottom of the magazine when the last cartridge is chambered.

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- model designation is not marked on the firearm.
- an observed example was marked "St.Etienne" in script followed by "MLE 1907" on the left side of the receiver/frame and "N" over "T.C." over "ORMAN" over "1948" on the receiver/ring.
- "N" over "T.C." and "Orman" may represent "Turkish Republic" or "Turkish Forestry Service".
- the action is based on the Mannlicher Berthier Model 1890 carbine.
- features include: wing protected front sight; full length Mannilcher style stock with a German style forend cap; a 56mm (2.2") long hand guard retaining sleeve was added in front of the receiver ring; turned down bolt.
- overall length is 1059mm (41.7").

Manufacturer

- manufacturer may not be marked on the firearm.
- "N" over "T.C." over "ORMAN" over "1948" is marked on the receiver/ring.
- "T.C." may represent "Turkish Republic" or "Turkish Service".

Action

- turn-bolt design.

Serial Number

- on an observed example the serial number consisted of four numbers and was marked on the bolt handle and locking lug and may be repeated on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - integral single column box magazine.

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- "07/15" or "Mle 1907-15" is marked on the left side of the receiver/frame.
- this is an upgraded version of the Mannlicher-Berthier Model 1890 carbine.
- this is a carbine version of the Mannlicher-Berthier Model 1907/15 rifle which was originally introduced for Colonial use within the French Empire and incorporates a shortend barrel, a turned down bolt handle and new combination nose cap/bayonet lug.
- features include: this rifle requires a three shot Mannlicher clip which is inserted into the rifle's magazine and falls out through the bottom of the magazine when the last cartridge is chambered; straight bolt handle, the bolt has two locking lugs located at the front of the bolt; split receiver bridge, the bolt handle turns down ahead of the receiver bridge; wood one-piece butt, no top handguard; there are two handguard retaining bands; this model has a stacking rod; blade front sight with graduated rear sight which is located at the rear of the barrel.

Manufacturer

- the manufacturer's name appears on the left side of the receiver/frame.

Action

- turn-bolt design.

Serial Number

- known example had a five digit number with a letter prefix marked on the rear left side of the barrel.
- letter prefix "B" has been observed.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - known example was marked "EDB 1917" on the rear right side of the barrel

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when the last cartridge is chambered.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- the model designation appears on the left side of the receiver/frame as "07/15" or "Mle 1907-15".
- most specimens were altered to Model 1916 Rifle configuration.
- this firearm is an adaptation of the Mannlicher-Berthier Mle 1907 which was originally introduced for Colonial use within the French Empire. It is essentially a Mannlicher Berthier, Mle 1907 Rifle modified with a new nose cap which has a stacking rod and is adapted to accept the Model 1915 bayonet.
- features include: this rifle requires a three shot Mannlicher clip which is inserted into the rifle's magazine and falls out through the bottom of the magazine when the last cartridge is chambered; straight bolt handle, the bolt has two locking lugs located at the front of the bolt; split receiver bridge, the bolt handle turns down ahead of the receiver bridge; wood one-piece butt, no top handguard; there are two handguard retaining bands; this model has a stacking rod; blade front sight with graduated rear sight which is located at the rear of the barrel which is adjustable to 2,300 meters.

Manufacturer

- the manufacturer's name appears on the left side of the receiver/frame.

Action

- manually operated, bolt action repeating firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number appears on the left side of the chamber of the barrel and has a one or more script letter prefix followed by up to five digits.
- approximately 10,000 examples were manufactured by Remington, USA, serial number rationalization unknown.
- the arsenal of production may be determined by the letter prefix code as follows:
Chatellerault - A, B, C, D & E
St Etienne - F, G, H, I, J, K, L, M, N, P & Q
Tulle - R, S & T
- the French serial number rationalization of the era placed the serial number on the left side of the chamber of the barrel. Since "CONTINSOUZA" and "DELAUNAY-BELLEVILLE" supplied only the receiver/frame to the French Arsenal System, there is no serial number rationalization for those two "manufacturers".

Shots

- clip loaded integral box, Mannlicher type magazine.
- the Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when the last cartridge is chambered.

Other Markings

- the year of manufacture appears on the side of the chamber of the barrel.
- approximately 10,000 examples were manufactured by Remington, USA, and are so marked or may be marked "RAC".
- these firearms may have been through one or more major rebuilds and possibly have had several barrel changes. There may be a profusion of markings found on the barrel or receiver/frame which will complicate identification.
- receiver/frame markings of "MD" (on the left rear of the receiver/frame usually after the model designation) indicate that the firearm and sights have been regulated for use with Balle "D" ammunition.
- barrels marked "N" indicate that the barrel and sights have been regulated for use with Model 1932, Balle "N" ammunition.

Remarks

- the Mannlicher-Berthier Mle 1907-15 rifle requires a three shot Mannlicher clip to be inserted from the top of the action into the Mannlicher style magazine, the empty clip falls out through the bottom of the magazine when the last cartridge is chambered.
- the vast majority of Mle 1907-15 Rifles were converted to "Mle - M - 16" configuration circa 1916. The principle change was to modify the magazine, replacing the three shot capacity Mannlicher magazine with a five shot capacity Mannlicher magazine which has a bottom cover to prevent the entry of dirt & mud. This magazine utilizes a five shot Mannlicher cartridge clip which falls out through the bottom of the magazine when the last cartridge is chambered provided the bottom cover has been opened.

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when the last cartridge is chambered.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- the model designation appears on the left side of the receiver/frame as "07/15" or "Mle 1907-15".
- most specimens were altered to Model 1916 Rifle configuration.
- this firearm is an adaptation of the Mannlicher-Berthier Model 1907 which was originally introduced for Colonial use within the French Empire. It is essentially a Mannlicher Berthier, Mle 1907 Rifle modified with a new nose cap which has a stacking rod and is adapted to accept the Model 1915 bayonet.
- features include: this rifle requires a three shot Mannlicher clip which is inserted into the rifle's magazine and falls out through the bottom of the magazine when the last cartridge is chambered; straight bolt handle, the bolt has two locking lugs located at the front of the bolt; split receiver bridge, the bolt handle turns down ahead of the receiver bridge; wood one-piece butt, no top handguard; there are two handguard retaining bands; this model has a stacking rod; blade front sight with graduated rear sight which is located at the rear of the barrel which is adjustable to 2,300 meters.

Manufacturer

- the manufacturer's name, or "Chatellerault" appears on the left side of the receiver/frame.
- "Manufacture Nationale d'Armes de Chatellerault (MAC)" was established in Chatellerault, France in 1819.
- "Manufacture Nationale d'Armes de Chatellerault (MAC)" manufactured small arms for the French government including machine-guns, rifles and pistols between 1822 and 1968.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- manually operated, bolt action repeating firearm.

Serial Number

- the serial number appears on the left side of the chamber of the barrel and has a one or more script letter prefix followed by up to five digits.
- approximately 10,000 examples were manufactured by Remington, USA, serial number rationalization unknown.
- the arsenal of production may be determined by the letter prefix code as follows:
Chatellerault - A, B, C, D & E
St Etienne - F, G, H, I, J, K, L, M, N, P & Q
Tulle - R, S & T

Shots

- clip loaded integral box, Mannlicher type magazine.
- the Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when the last cartridge is chambered.

Other Markings

- the year of manufacture appears on the side of the chamber of the barrel.
- approximately 10,000 examples were manufactured by Remington, USA, and are so marked or may be marked "RAC".
- these firearms may have been through one or more major rebuilds and possibly have had several barrel changes. There may be a profusion of markings found on the barrel or receiver/frame which will complicate identification.
- receiver/frame markings of "MD" (on the left rear of the receiver/frame usually after the model designation) indicate that the firearm and sights have been regulated for use with Balle "D" ammunition.
- barrels marked "N" indicate that the barrel and sights have been regulated for use with Model 1932, Balle "N" ammunition.

Remarks

- the Mannlicher-Berthier Mle 1907-15 rifle requires a three shot Mannlicher clip to be inserted from the top of the action into the Mannlicher style magazine, the empty clip falls out through the bottom of the magazine when the last cartridge is chambered.
- the vast majority of Mle 1907-15 Rifles were converted to "Mle - M - 16" configuration circa 1916. The principle change was to modify the magazine, replacing the three shot capacity Mannlicher magazine with a five shot capacity Mannlicher magazine which has a bottom cover to prevent the entry of dirt & mud. This magazine utilizes a five shot Mannlicher cartridge clip which falls out through the bottom of the magazine when the last cartridge is chambered provided the bottom cover has been opened.

FRT Report

Firearm Reference Number (FRN): 1174
Make: Mannlicher-Berthier
Model: 1907/15 Rifle

Summary

Make:	Mannlicher-Berthier
Model:	1907/15 Rifle
Manufacturer:	Manufacture d'Armes de St-Etienne (MAS)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	FRANCE
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
1174 - 1	8X50R LEBEL	3	798	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
1174 - 2	8X50R LEBEL	5	550	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when the last cartridge is chambered.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- the model designation appears on the left side of the receiver/frame as "07/15" or "Mle 1907-15".
- most specimens were altered to Model 1916 Rifle configuration.
- this firearm is an adaptation of the Mannlicher-Berthier Model 1907 which was originally introduced for Colonial use within the French Empire. It is essentially a Mannlicher Berthier, Mle 1907 Rifle modified with a new nose cap which has a stacking rod and is adapted to accept the Model 1915 bayonet.
- features include: this rifle requires a three shot Mannlicher clip which is inserted into the rifle's magazine and falls out through the bottom of the magazine when the last cartridge is chambered; straight bolt handle, the bolt has two locking lugs located at the front of the bolt; split receiver bridge, the bolt handle turns down ahead of the receiver bridge; wood one-piece butt, no top handguard; there are two handguard retaining bands; this model has a stacking rod; blade front sight with graduated rear sight which is located at the rear of the barrel which is adjustable to 2,300 meters.

Manufacturer

- the manufacturer's name appears on the left side of the receiver/frame as "St. Etienne".

Action

- manually operated, bolt action repeating firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number appears on the left side of the chamber of the barrel and has a one or more script letter prefix followed by up to five digits.
- approximately 10,000 examples were manufactured by Remington, USA, serial number rationalization unknown.
- the arsenal of production may be determined by the letter prefix code as follows:

Chatellerault - A, B, C, D & E
St Etienne - F, G, H, I, J, K, L, M, N, P & Q
Tulle - R, S & T

Shots

- clip loaded integral box, Mannlicher type magazine.
- the Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when the last cartridge is chambered.

Other Markings

- the year of manufacture appears on the side of the chamber of the barrel.
- approximately 10,000 examples were manufactured by Remington, USA, and are so marked or may be marked "RAC".
- these firearms may have been through one or more major rebuilds and possibly have had several barrel changes. There may be a profusion of markings found on the barrel or receiver/frame which will complicate identification.
- receiver/frame markings of "MD" (on the left rear of the receiver/frame usually after the model designation) indicate that the firearm and sights have been regulated for use with Balle "D" ammunition.
- barrels marked "N" indicate that the barrel and sights have been regulated for use with Model 1932, Balle "N" ammunition.

Remarks

- the Mannlicher-Berthier Mle 1907-15 Rifle rifle requires a three shot Mannlicher clip to be inserted from the top of the action into the Mannlicher style magazine, the empty clip falls out through the bottom of the magazine when the last cartridge is chambered.
- the vast majority of Mle 1907-15 Rifles were converted to "Mle - M - 16" configuration circa 1916. The principle change was to modify the magazine, replacing the three shot capacity Mannlicher magazine with a five shot capacity Mannlicher magazine which has a bottom cover to prevent the entry of dirt & mud. This magazine utilizes a five shot Mannlicher cartridge clip which falls out through the bottom of the magazine when the last cartridge is chambered provided the bottom cover has been opened.

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when the last cartridge is chambered.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- the model designation appears on the left side of the receiver/frame as "07/15" or "Mle 1907-15".
- most specimens were altered to Model 1916 Rifle configuration.
- this firearm is an adaptation of the Mannlicher-Berthier Model 1907 which was originally introduced for Colonial use within the French Empire. It is essentially a Mannlicher Berthier, Mle 1907 Rifle modified with a new nose cap which has a stacking rod and is adapted to accept the Model 1915 bayonet.
- features include: this rifle requires a three shot Mannlicher clip which is inserted into the rifle's magazine and falls out through the bottom of the magazine when the last cartridge is chambered; straight bolt handle, the bolt has two locking lugs located at the front of the bolt; split receiver bridge, the bolt handle turns down ahead of the receiver bridge; wood one-piece butt, no top handguard; there are two handguard retaining bands; this model has a stacking rod; blade front sight with graduated rear sight which is located at the rear of the barrel which is adjustable to 2,300 meters.

Manufacturer

- the manufacturer's name appears on the left side of the receiver either in full or as "RAC".
- "RAC" was the abbreviation for Remington Arms Company.

Action

- manually operated, bolt action repeating firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number appears on the left side of the chamber of the barrel and has a one or more script letter prefix followed by up to five digits.
- approximately 10,000 examples were manufactured by Remington, USA, serial number rationalization unknown.
- the arsenal of production may be determined by the letter prefix code as follows:

Chatellerault - A, B, C, D & E
St Etienne - F, G, H, I, J, K, L, M, N, P & Q
Tulle - R, S & T

Shots

- clip loaded integral box, Mannlicher type magazine.
- the Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when the last cartridge is chambered.

Other Markings

- the year of manufacture appears on the side of the chamber of the barrel.
- approximately 10,000 examples were manufactured by Remington, USA, and are so marked or may be marked "RAC".
- these firearms may have been through one or more major rebuilds and possibly have had several barrel changes. There may be a profusion of markings found on the barrel or receiver/frame which will complicate identification.
- receiver/frame markings of "MD" (on the left rear of the receiver/frame usually after the model designation) indicate that the firearm and sights have been regulated for use with Balle "D" ammunition.
- barrels marked "N" indicate that the barrel and sights have been regulated for use with Model 1932, Balle "N" ammunition.

Remarks

- these Remington made rifles were produced on contract for the French Government during the First World War. A large proportion of the order was not delivered to France and were subsequently sold as surplus on the North American market during the 1920's. These rifles are identical in all respects, except for markings, to the French produced Mle 1907/15.
- the Mannlicher-Berthier Mle 1907-15 Rifle rifle requires a three shot Mannlicher clip to be inserted from the top of the action into the Mannlicher style magazine, the empty clip falls out through the bottom of the magazine when the last cartridge is chambered.
- the vast majority of the French produced Mle 1907-15 Rifles were converted to "Mle - M - 16" configuration circa 1916. The principle change was to modify the magazine, replacing the three shot capacity Mannlicher magazine with a five shot capacity Mannlicher magazine which has a bottom cover to prevent the entry of dirt & mud. This magazine utilizes a five shot Mannlicher cartridge clip which falls out through the bottom of the magazine when the last cartridge is chambered provided the bottom cover has been opened.

Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	TURKEY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
55536 - 1	8X50R LEBEL	3	559	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when the last cartridge is chambered.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- "07/15" or "Mle 1907-15" may be marked on the left side of the receiver/frame.
- "T.C." over "Orman" is usually marked on the top of the receiver/frame; these markings denote "Turkyie Cumhuriyeti" over "Orman" meaning "Turkish Republic" over "Forestry".
- this model was re-manufactured by the Turkish State Arsenals from surpluses and/or captured Mannlicher Berthier 1907/15 Infantry Rifles.
- re-manufactured circa 1948 for use by the Turkish Forestry Service.
- total production estimated between 8000-10000 units.
- conversion included: addition of upper hand-guard with a metal shroud; Turkish 1905 Mauser Carbine barrel band and nosecap; Turkish 1903 Mauser Rifle front sight and mount; alteration of stock to full length Mannlicher style; and addition of a slight bend to the original bolt handle.
- features include: blued receiver/frame and barrel; three shot Mannlicher clip which is inserted into the rifle's magazine and falls out through the bottom of the magazine when the last cartridge is chambered; graduated rear sight adjustable to 2,300 meters; and sling swivel underneath the butt and on left side of forearm.

Manufacturer

- original manufacturer's markings appears on firearm as "St. Etienne".
- Turkish State Arsenals markings do not usually appear on the firearm.

Action

- manually operated, bolt action repeating firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is usually marked on the left side of the receiver/frame. - during the re-manufacturing process the Turkish State Arsenals issued new serial numbers to this model of rifle. - observed examples have consisted of a series of up to four numbers without a letter prefix or suffix.
Calibre	- examples marked on the top of the barrel with the letter "N" were originally chambered for the 8x50R Lebel cartridge "Balle N".
Shots	- clip loaded integral box, Mannlicher type magazine. - the Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when the last cartridge is chambered.
Other Markings	- examples may be observed bearing the original manufacturers markings on the receiver/frame. - some examples have been observed with the original French serial numbers marked on the bolt, stock and other parts in addition to the newer Turkish Serial numbers.

FRT Report

Firearm Reference Number (FRN): 1176
Make: Mannlicher-Berthier
Model: 1907/15/34

Summary

Make:	Mannlicher-Berthier
Model:	1907/15/34
Manufacturer:	Manufacture d'Armes de Chatellerault (MAC)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	FRANCE
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
1176 - 1	7.5X54 FRENCH MAS	5	579	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when the last cartridge is chambered.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- "Mle 1907-15 M 34" is marked on the left side of the receiver/frame.
- manufactured between 1934 and 1939.
- this rifle is an upgrade of the 1907/15 Mannlicher Berthier rifle. This included replacing the 8X50R LEBEL calibre barrel with one of 7.5X54 FRENCH MAS calibre, modifying the magazine to accept Mauser charger loading clips, fitting a new bolt head, shortening the stock and fitting a handguard.

Manufacturer

- the manufacturer's name, or "Chatellerault" appears on the left side of the receiver/frame.
- "Manufacture Nationale d'Armes de Chatellerault (MAC)" was established in Chatellerault, France in 1819.
- "Manufacture Nationale d'Armes de Chatellerault (MAC)" manufactured small arms for the French government including machine-guns, rifles and pistols between 1822 and 1968.

Action

- manually operated, bolt action, magazine, repeating rifle.

Serial Number

- appears on the side of the chamber of the barrel and or the receiver and has a one or more script letter prefix.

Shots

- charger loaded, internal box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	FRANCE
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
117708 - 1	8X50R LEBEL	5	450	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when the last cartridge is chambered.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- introduced in 1916.
- the model designation appears on the left side of the receiver/frame and appears on observed example firearm as "Mle M. 16"
- this firearm model is essentially a Mannlicher-Berthier, French service carbine altered from three to five shot magazine capacity and redesignated as the "Model of 1916".
- some of these firearms will retain their original designations and may possibly be marked to indicate that they are redesignated to Model 1916, while other rifles retain their original model designation on their receiver/frame and may not carry altered markings.
- from 1916 onwards newly manufactured carbines will be found marked only as "Mle M. 16" or "Mle-M-16".
- features include: originally introduced for Cavalry use; bolt with two locking lugs located at the front of the bolt and a turned down bolt handle, safety is located at the rear of the bolt, blade front sight with graduated rear sight which is located at the rear of the barrel, one piece stock with two barrel bands; short wood top handguard; the rear barrel band may have a saddle ring.

Manufacturer

- manufacturer's designation is marked on the left side of the receiver/frame as:
"ET CONTINSOUZA".

Action

- manually operated turn bolt, repeating rifle.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number appears on the left side of the chamber of the barrel and has a one or more script letter prefix followed by up to five digits.
- the arsenal of production may be determined by the letter prefix code as follows:
Chatellerault - A, B, C, D & E
St Etienne - F, G, H, I, J, K, L, M, N, P & Q
Tulle - R, S & T
- the French serial number rationalization of the era placed the serial number on the left side of the chamber of the barrel. Since "CONTINSOUZA" and "DELAUNAY-BELLEVILLE" supplied only the receiver/frame to the French Arsenal System, there is no serial number rationalization for those two "manufacturers".

Shots

- fixed Mannlicher box magazine.
- the Mannlicher style magazine was modified, circa 1916, replacing the three shot capacity Mannlicher magazine with a five shot capacity Mannlicher integral box magazine which has a bottom cover to prevent the entry of dirt & mud. This magazine utilizes a five shot Mannlicher cartridge clip which falls out through the bottom of the magazine when the last cartridge is chambered provided the bottom cover has been opened.

Other Markings

- the year of manufacture appears on the side of the chamber of the barrel, earlier carbines altered to this pattern retain their original receiver/frame markings.
- take note that firearms converted from Model 1892 Artillery Carbines by the French State Arsenals between 1916 and 1918 will identified as "Mle 1892" (space) "M. 16" while original manufacture Model 1916 Carbines will be marked as "Mle M.16 or "Mle-M-16" depending on the manufacturer.

Remarks

- the Mannlicher style magazine was modified, circa 1916, replacing the three shot capacity Mannlicher magazine with a five shot capacity Mannlicher magazine which has a bottom cover to prevent the entry of dirt & mud. This magazine utilizes a five shot Mannlicher cartridge clip which falls out through the bottom of the magazine when the last cartridge is chambered provided the bottom cover has been opened.
- in 1927 these Mannlicher-Berthier Model 1916 Carbines were further modified by deleting the cleaning rod, they were then redesignated M1916/27 or "Mle - M - 16/27".

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when the last cartridge is chambered.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- introduced in 1916.
- the model designation appears on the left side of the receiver/frame and appears on observed example firearm as "Mle M. 16"
- this firearm model is essentially a Mannlicher-Berthier, French service carbine altered from three to five shot magazine capacity and redesignated as the "Model of 1916".
- some of these firearms will retain their original designations and may possibly be marked to indicate that they are redesignated to Model 1916, while other rifles retain their original model designation on their receiver/frame and may not carry altered markings.
- from 1916 onwards newly manufactured carbines will be found marked only as "Mle M. 16" or "Mle-M-16".
- features include: originally introduced for Cavalry use; bolt with two locking lugs located at the front of the bolt and a turned down bolt handle, safety is located at the rear of the bolt, blade front sight with graduated rear sight which is located at the rear of the barrel, one piece stock with two barrel bands; short wood top handguard; the rear barrel band may have a saddle ring.

Manufacturer

- the manufacturer's name appears on the left side of the receiver.

Action

- manually operated turn bolt, repeating rifle.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number appears on the left side of the chamber of the barrel and has a one or more script letter prefix followed by up to five digits.
- the arsenal of production may be determined by the letter prefix code as follows:
Chatellerault - A, B, C, D & E
St Etienne - F, G, H, I, J, K, L, M, N, P & Q
Tulle - R, S & T

Shots

- fixed Mannlicher box magazine.
- the Mannlicher style magazine was modified, circa 1916, replacing the three shot capacity Mannlicher magazine with a five shot capacity Mannlicher integral box magazine which has a bottom cover to prevent the entry of dirt & mud. This magazine utilizes a five shot Mannlicher cartridge clip which falls out through the bottom of the magazine when the last cartridge is chambered provided the bottom cover has been opened.

Other Markings

- the year of manufacture appears on the side of the chamber of the barrel, earlier carbines altered to this pattern retain their original receiver/frame markings.
- take note that firearms converted from Model 1892 Artillery Carbines by the French State Arsenals between 1916 and 1918 will identified as "Mle 1892" (space) "M. 16" while original manufacture Model 1916 Carbines will be marked as "Mle M.16 or "Mle-M-16" depending on the manufacturer.

Remarks

- the Mannlicher style magazine was modified, circa 1916, replacing the three shot capacity Mannlicher magazine with a five shot capacity Mannlicher magazine which has a bottom cover to prevent the entry of dirt & mud. This magazine utilizes a five shot Mannlicher cartridge clip which falls out through the bottom of the magazine when the last cartridge is chambered provided the bottom cover has been opened.
- in 1927 these Mannlicher-Berthier Model 1916 Carbines were further modified by deleting the cleaning rod, they were then redesignated M1916/27 or "Mle - M - 16/27".

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when the last cartridge is chambered.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- introduced in 1916.
- the model designation appears on the left side of the receiver/frame and appears on observed example firearm as "Mle M. 16"
- this firearm model is essentially a Mannlicher-Berthier, French service carbine altered from three to five shot magazine capacity and redesignated as the "Model of 1916".
- some of these firearms will retain their original designations and may possibly be marked to indicate that they are redesignated to Model 1916, while other rifles retain their original model designation on their receiver/frame and may not carry altered markings.
- from 1916 onwards newly manufactured carbines will be found marked only as "Mle M. 16" or "Mle-M-16".
- features include: originally introduced for Cavalry use; bolt with two locking lugs located at the front of the bolt and a turned down bolt handle, safety is located at the rear of the bolt, blade front sight with graduated rear sight which is located at the rear of the barrel, one piece stock with two barrel bands; short wood top handguard; the rear barrel band may have a saddle ring.

Manufacturer

- manufacturer's name, or "Tulle" appears on the left side of the receiver/frame.

Action

- manually operated turn bolt, repeating rifle.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number appears on the left side of the chamber of the barrel and has a one or more script letter prefix followed by up to five digits.
- the arsenal of production may be determined by the letter prefix code as follows:
Chatellerault - A, B, C, D & E
St Etienne - F, G, H, I, J, K, L, M, N, P & Q
Tulle - R, S & T

Shots

- fixed Mannlicher box magazine.
- the Mannlicher style magazine was modified, circa 1916, replacing the three shot capacity Mannlicher magazine with a five shot capacity Mannlicher integral box magazine which has a bottom cover to prevent the entry of dirt & mud. This magazine utilizes a five shot Mannlicher cartridge clip which falls out through the bottom of the magazine when the last cartridge is chambered provided the bottom cover has been opened.

Other Markings

- the year of manufacture appears on the side of the chamber of the barrel, earlier carbines altered to this pattern retain their original receiver/frame markings.
- take note that firearms converted from Model 1892 Artillery Carbines by the French State Arsenals between 1916 and 1918 will identified as "Mle 1892" (space) "M. 16" while original manufacture Model 1916 Carbines will be marked as "Mle M.16 or "Mle-M-16" depending on the manufacturer.

Remarks

- the Mannlicher style magazine was modified, circa 1916, replacing the three shot capacity Mannlicher magazine with a five shot capacity Mannlicher magazine which has a bottom cover to prevent the entry of dirt & mud. This magazine utilizes a five shot Mannlicher cartridge clip which falls out through the bottom of the magazine when the last cartridge is chambered provided the bottom cover has been opened.
- in 1927 these Mannlicher-Berthier Model 1916 Carbines were further modified by deleting the cleaning rod, they were then redesignated M1916/27 or "Mle - M - 16/27".

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when the last cartridge is chambered.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- the model designation appears on the left side of the receiver/frame and appears on observed example firearm as "Mle M. 16"
- this firearm model is essentially a Mannlicher-Berthier, French service rifle altered from three to five shot magazine capacity and redesignated as the "Model of 1916".
- some of these firearms will retain their original designations and may possibly be marked to indicate that they are redesignated to Model 1916, while other rifles retain their original model designation on their receiver/frame and may not carry altered markings.
- from 1916 onwards newly manufactured rifle will be found marked only as "Mle M. 16" or "Mle-M-16".
- features include: Mannlicher integral box magazine with a bottom cover to prevent the entry of dirt & mud, this magazine requires a Mannlicher clip to function as a repeating rifle; wood furniture, one-piece stock, no top handguard; two barrel bands, stacking rod; straight bolt handle; split receiver bridge, the bolt handle turns down ahead of the receiver bridge; rear quadrant type sight on a stepped base adjustable to 2,300 meters.

Manufacturer

- the manufacturer's name is marked on the left side of the receiver/frame.

Action

- manually operated turn bolt, repeating rifle.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number appears on the left side of the chamber of the barrel, and may also be found marked on the bolt and/or butt plate, the serial number has a script letter prefix, followed by up to five digits.
- the arsenal of production may be determined by the letter prefix code as follows:
Chatellerault - A, B, C, D & E
St Etienne - F, G, H, I, J, K, L, M, N, P & Q
Tulle - R, S & T
- the French serial number rationalization of the era placed the serial number on the left side of the chamber of the barrel. Since "CONTINSOUZA" and "DELAUNAY-BELLEVILLE" supplied only the receiver/frame to the French Arsenal System, there is no serial number rationalization for those two "manufacturers".

Shots

- fixed Mannlicher box magazine.
- the Mannlicher style magazine was modified, circa 1916, replacing the three shot capacity Mannlicher magazine with a five shot capacity Mannlicher integral box magazine which has a bottom cover to prevent the entry of dirt & mud. This magazine utilizes a five shot Mannlicher cartridge clip which falls out through the bottom of the magazine when the last cartridge is chambered provided the bottom cover has been opened.

Other Markings

- the year of manufacture is located on the left side of the chamber of the barrel.
- newly manufactured 1916 Rifles will be marked as "Mle M 16" or "Mle -M-16".
- some rifles converted from other Mannlicher-Berthier models to 1916 Rifle configuration will be found with the original model designation followed by "M16", while yet other models may not be marked M16 and retain their original model designation on their receiver/frame.
- receiver/frame markings of "MD" (on the left rear of the receiver/frame usually after the model designation) indicate that the firearm and sights have been regulated for use with Balle "D" ammunition.
- barrels marked "N" indicate that the barrel and sights have been regulated for use with Model 1932, Balle "N" ammunition.

Remarks

- the Mannlicher style magazine was modified, circa 1916, replacing the three shot capacity Mannlicher magazine with a five shot capacity Mannlicher magazine which has a bottom cover to prevent the entry of dirt & mud. This magazine utilizes a five shot Mannlicher cartridge clip which falls out through the bottom of the magazine when the last cartridge is chambered provided the bottom cover has been opened.

- some of these firearms will retain their original designations and may possibly be marked to indicate that they are redesignated to Model 1916, while other rifles retain their original model designation on their receiver/frame and may not carry altered markings.
- from 1916 onwards newly manufactured rifle will be found marked only as "Mle M. 16" or "Mle-M-16".
- features include: Mannlicher integral box magazine with a bottom cover to prevent the entry of dirt & mud, this magazine requires a Mannlicher clip to function as a repeating rifle; wood furniture, one-piece stock, no top handguard; two barrel bands, stacking rod; straight bolt handle; split receiver bridge, the bolt handle turns down ahead of the receiver bridge; rear quadrant type sight on a stepped base adjustable to 2,300 meters.

Manufacturer

- "St. Etienne" appears on the left side of the receiver/frame.

Action

- manually operated turn bolt, repeating rifle.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number appears on the left side of the chamber of the barrel and has a one or more script letter prefix followed by up to five digits.
- the arsenal of production may be determined by the letter prefix code as follows:
Chatellerault - A, B, C, D & E
St Etienne - F, G, H, I, J, K, L, M, N, P & Q
Tulle - R, S & T

Shots

- fixed Mannlicher box magazine.
- the Mannlicher style magazine was modified, circa 1916, replacing the three shot capacity Mannlicher magazine with a five shot capacity Mannlicher integral box magazine which has a bottom cover to prevent the entry of dirt & mud. This magazine utilizes a five shot Mannlicher cartridge clip which falls out through the bottom of the magazine when the last cartridge is chambered provided the bottom cover has been opened.

Other Markings

- the year of manufacture is located on the left side of the chamber of the barrel.
- newly manufactured 1916 Rifles will be marked as "Mle M 16" or "Mle -M-16".
- some rifles converted from other Mannlicher-Berthier models to 1916 Rifle configuration will be found with the original model designation followed by "M16", while yet other models may not be marked M16 and retain their original model designation on their receiver/frame.
- receiver/frame markings of "MD" (on the left rear of the receiver/frame usually after the model designation) indicate that the firearm and sights have been regulated for use with Balle "D" ammunition.
- barrels marked "N" indicate that the barrel and sights have been regulated for use with Model 1932, Balle "N" ammunition.

Remarks

- the Mannlicher style magazine was modified, circa 1916, replacing the three shot capacity Mannlicher magazine with a five shot capacity Mannlicher magazine which has a bottom cover to prevent the entry of dirt & mud. This magazine utilizes a five shot Mannlicher cartridge clip which falls out through the bottom of the magazine when the last cartridge is chambered provided the bottom cover has been opened.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
1181 - 1	8X50R LEBEL	5	798	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Mannlicher-Berthier" is not marked on the firearm.
- "Mannlicher-Berthier" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when the last cartridge is chambered.
- "Berthier" for Adolphe Berthier and his Berthier action which was a modified Lebel with the locking axis changed from horizontal to the vertical and the replacement of the fore-end tubular magazine with a Mannlicher magazine system.

Model

- the model designation appears on the left side of the receiver/frame and appears on observed example firearm as "Mle M. 16"
- this firearm model is essentially a Mannlicher-Berthier, French service rifle altered from three to five shot magazine capacity and redesignated as the "Model of 1916".
- some of these firearms will retain their original designations and may possibly be marked to indicate that they are redesignated to Model 1916, while other rifles retain their original model designation on their receiver/frame and may not carry altered markings.
- from 1916 onwards newly manufactured rifle will be found marked only as "Mle M. 16" or "Mle-M-16".
- features include: Mannlicher integral box magazine with a bottom cover to prevent the entry of dirt & mud, this magazine requires a Mannlicher clip to function as a repeating rifle; wood furniture, one-piece stock, no top handguard; two barrel bands, stacking rod; straight bolt handle; split receiver bridge, the bolt handle turns down ahead of the receiver bridge; rear quadrant type sight on a stepped base adjustable to 2,300 meters.

Manufacturer

- the manufacturer's name, or "Tulle" appears on the left side of the receiver/frame.

Action

- manually operated turn bolt, repeating rifle.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number appears on the left side of the chamber of the barrel and has a one or more script letter prefix followed by up to 5 digits.
- the arsenal of production may be determined by the letter prefix code as follows:
Chatellerault - A, B, C, D & E
St Etienne - F, G, H, I, J, K, L, M, N, P & Q
Tulle - R, S & T

Shots

- fixed Mannlicher box magazine.
- the Mannlicher style magazine was modified, circa 1916, replacing the three shot capacity Mannlicher magazine with a five shot capacity Mannlicher integral box magazine which has a bottom cover to prevent the entry of dirt & mud. This magazine utilizes a five shot Mannlicher cartridge clip which falls out through the bottom of the magazine when the last cartridge is chambered provided the bottom cover has been opened.

Other Markings

- the year of manufacture is located on the left side of the chamber of the barrel.
- newly manufactured 1916 Rifles will be marked as "Mle M 16" or "Mle -M-16".
- some rifles converted from other Mannlicher-Berthier models to 1916 Rifle configuration will be found with the original model designation followed by "M16", while yet other models may not be marked M16 and retain their original model designation on their receiver/frame.
- receiver/frame markings of "MD" (on the left rear of the receiver/frame usually after the model designation) indicate that the firearm and sights have been regulated for use with Balle "D" ammunition.
- barrels marked "N" indicate that the barrel and sights have been regulated for use with Model 1932, Balle "N" ammunition.

Remarks

- the Mannlicher style magazine was modified, circa 1916, replacing the three shot capacity Mannlicher magazine with a five shot capacity Mannlicher magazine which has a bottom cover to prevent the entry of dirt & mud. This magazine utilizes a five shot Mannlicher cartridge clip which falls out through the bottom of the magazine when the last cartridge is chambered provided the bottom cover has been opened.

57056 - 1	6.5MM ITALIAN SPECIAL BLANK	6	362	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Mannlicher-Carcano" is not marked on the firearm.

Model

- this firearm is a blank cartridge-firing, miniature copy of the of the Mannlicher-Carcano, Model 1891Cavalry Carbine.
- this firearm, commonly known as the Balilla, was specifically designed by the Italian Fascist Government for use by the youth training program which was known by various different names over the years.
- these rifles were manufactured from 1926 until 1943.
- many of these firearms are crudely made, some are manufactured wholly or partially from brass and some are very high quality. All of these firearms are designed to fire blank ammunition only.
- these firearms which were primarily utilized for parade and demonstration purposes may be found partially or wholly painted with gilt (gold) lacquer.
- features include: a short barrel; reduced dimensions; half stock forearm; has a permanently attached bayonet which when not in use, folds downwards and locks into a recess in the forearm.
- the model designation does not appear on the firearm, however there may be initials or markings identifying the arm to the Italian Fascist Youth training program.
- this military bolt action rifles utilizes a modified Mauser type front locking bolt and incorporates a Mannlicher magazine utilizing a clip, holding 6 cartridges, which is inserted directly into the rifle's magazine and falls free when the last cartridge is chambered.

Manufacturer

- manufactured by at least three different companies; a reported example displays a circle stamped into the right side of the buttstock, marked "Leratelli Verona Grazian".
- early Balilla models were manufactured by FNA-Brescia - production estimated at 60,000 examples.
- Balilla models were manufactured by Fratelli Grazian, Verona - production estimated at 50,000 examples.
- Balilla models were manufactured by a firm known as Giocattolo - production figures unknown.

Action

- manually operated turn-bolt action.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- FNA-Brescia reported serial numbers have comprised a four digit number followed by a letter followed by a date. - production by Leratelli Verona Grazian serial numbers have comprised a five digit number followed by a date. - the serial number rationalization of examples produced by Giocattolo is unknown.
Calibre	- calibre is a special 6.5MM blank, it is reported that the rifle was incapable of discharging a bulleted cartridge. - the cartridge consists of a brass, bronze or steel chamber adapter, somewhat less than the dimensions of a 6.5X52 MM Italian Carcanno cartridge. Some of these adapters are similar to a sub calibre adapter cartridge in that the adapter will accept a long 6MM Rim-Fire Blank cartridge. These adapter cartridges are utilized in conjunction with a scaled-down Mannlicher style clip which is required to permit this miniaturized firearm to function as a repeater. - there are several different similar cartridges available for these firearms.
Other Markings	- this firearm was specifically designed by the Italian Fascist Government for use by a para military youth training program (similar to the German "Hitler Youth") which was known by various different names over the years 1926 to 1943. - the model designation does not appear on the firearm; however, there may be initials or markings identifying the arm to the Italian fascist youth training program. - some of these markings may include: Opera Nazionale Balilla or O.N.B. Gioventu Italiana del Littorio or G.I.L., Fasci Giovanili di Combattimento or FF. GG. C. - a reported example displays a circle stamped into the right side of the buttstock, marked "Leratelli Verona Grazian", this marking is suspected to be a reference to a manufacturer that is better known as Fratelli Grazian, located in Verona, Italy. - plates may be found attached to the butt stock, normally on the right side with various names of military heros, champion shooters or the name of the province in which the Balilla training rifle was issued or used.
Remarks	- this firearm is a blank cartridge-firing, reduced scale, copy of the of the Model 1891, Mannlicher-Carcano, Cavalry Carbine. It was specifically designed for use by the Italian Fascist Government, youth training program which was known by various different names over the years. The earliest name of the fascist youth program was the Opera Nazionale Balilla or O.N.B. which existed from 1926 to 1937. In 1937 the name of the organization changed to Gioventu Italiana del Littorio or G.I.L. The G.I.L. was in existence from 1937 to 1943 when the movement ceased to exist with the end of the Italian fascist state. - there was also a parallel fascist youth movement from 1937 to 1943 known as Fasci Giovanili di Combattimento or FF. GG. C.

Notes

Make

- "Mannlicher-Carcano" is not marked on the firearm.
- the "Mannlicher-Carcano" was selected by the Italian Commission of Small Arms located in Parma, Italy after the evaluation and selection trials of 1891.
- the Italian Commission of Small Arms adopted the model 1891 rifle in March of 1892, the model 1891 Calvary carbine in June of 1893, and the model 1891 TS carbine in 1897.
- "Mannlicher-Carcano" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Carcano" for Salvador Carcano the Chief Technician at Torino, Italy and his receiver/frame and bolt design.

Model

- the carbine version of the Mannlicher Carcano Model 1891 Rifle is mechanically identical to the rifle but differs in having a turned down bolt handle to permit use as a Cavalry arm for carrying in a saddle scabbard.
- features include: a considerably shorter barrel, half stock forearm and a permanently attached bayonet which when not in use folds downwards and locks into a recess in the forearm.
- the model designation does not appear on the firearm.
- these rifles were manufactured from 1893 until 1944.
- this military bolt action rifles utilizes a modified Mauser type front locking bolt and incorporates a Mannlicher magazine utilizing a clip, holding 6 cartridges, which is inserted directly into the rifle's magazine and falls free when the last cartridge is chambered.
- many of these rifles were officially modified in the 1920's and 1930's by having their barrels shortened.
- rifling characteristics: four grooves, right hand progressive gain twist.

Manufacturer

- the manufacturer's name appears on the chamber of the barrel.

Action

- manually operated turn-bolt action.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- appears on the left side of the chamber of the barrel and may have a letter prefix or suffix.
Shots	- Mannlicher style magazine with integral clip which falls out the bottom of the magazine opening when empty.
Other Markings	- The year of manufacture appears on the chamber of the barrel, either as the full or the last two digits of the year. Some carbines are marked RE on the buttstock indicating Regio Escercito (Royal Army).

Notes

Make

- "Mannlicher-Carcano" is not marked on the firearm.
- the "Mannlicher-Carcano" was selected by the Italian Commission of Small Arms located in Parma, Italy after the evaluation and selection trials of 1891.
- the Italian Commission of Small Arms adopted the model 1891 rifle in March of 1892, the model 1891 Calvary carbine in June of 1893, and the model 1891 TS carbine in 1897.
- "Mannlicher-Carcano" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Carcano" for Salvador Carcano the Chief Technician at Torino, Italy and his receiver/frame and bolt design.

Model

- the carbine version of the Mannlicher Carcano Model 1891 Rifle is mechanically identical to the rifle but differs in having a turned down bolt handle to permit use as a Cavalry arm for carrying in a saddle scabbard.
- features include: a considerably shorter barrel, half stock forearm and a permanently attached bayonet which when not in use folds downwards and locks into a recess in the forearm.
- the model designation does not appear on the firearm.
- these rifles were manufactured from 1893 until 1944.
- this military bolt action rifles utilizes a modified Mauser type front locking bolt and incorporates a Mannlicher magazine utilizing a clip, holding 6 cartridges, which is inserted directly into the rifle's magazine and falls free when the last cartridge is chambered.
- many of these rifles were officially modified in the 1920's and 1930's by having their barrels shortened.
- rifling characteristics: four grooves, right hand progressive gain twist.

Manufacturer

- the manufacturer's name originally appeared on the chamber of the barrel but may have been ground off during a refurbishing.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- manually operated turn-bolt action.
Serial Number	- the serial number appears on the left side of the chamber of the barrel and may have a letter prefix or suffix.
Shots	- Mannlicher style magazine with integral clip which falls out the bottom of the magazine opening when empty.
Other Markings	- the year of manufacture appears on the chamber of the barrel, either as the full or the last two digits of the year. Some carbines are marked RE on the buttstock indicating Regio Escercito (Royal Army).

Notes

Make

- "Mannlicher-Carcano" is not marked on the firearm.
- the "Mannlicher-Carcano" was selected by the Italian Commission of Small Arms located in Parma, Italy after the evaluation and selection trials of 1891.
- the Italian Commission of Small Arms adopted the model 1891 rifle in March of 1892, the model 1891 Calvary carbine in June of 1893, and the model 1891 TS carbine in 1897.
- "Mannlicher-Carcano" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Carcano" for Salvador Carcano the Chief Technician at Torino, Italy and his receiver/frame and bolt design.

Model

- the model designation does not appear on the firearm.
- these rifles were manufactured from 1892 until circa 1936.
- this military bolt action rifle utilizes a modified Mauser type, front-locking bolt and incorporates a Mannlicher style magazine with integral clip which falls out of the magazine opening when empty.
- the Model 1891 Rifle has a straight bolt handle and features "progressive twist" rifling in the barrel, (1 turn in 578mm at the throat and becomes 1 turn in 201mm at the muzzle). This rifle is of historical interest as it was the first small bore smokeless powder repeating rifle to be adopted by the Italian Armed Forces and was in service as late as 1943. Many of these rifles were officially modified in the 1920's and 1930's by having their barrels shortened.
- rifling characteristics: four grooves, right hand progressive gain twist - 1 turn in 19.25 inches at the throat and 1 turn in 8.25 inches at the muzzle.

Manufacturer

- "BERETTA GARDONE" may be marked on the receiver ring or on the breech end of the barrel.
- this manufacturer is purported to have been actively manufacturing the Mannlicher - Carcano Rifle in the late 1930's only.

Action

- manually operated turn-bolt action.

Serial Number

- appears on the left side of the chamber of the barrel and may have a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - Mannlicher style magazine with integral clip which falls out the bottom of the magazine opening when empty.

Other Markings - the year of manufacture appears on the chamber of the barrel, either in full or the last two digits of the year. Some rifles are marked RE on the buttstock indicating Regio Escercito (Royal Army).

Notes

Make

- "Mannlicher-Carcano" is not marked on the firearm.
- the "Mannlicher-Carcano" was selected by the Italian Commission of Small Arms located in Parma, Italy after the evaluation and selection trials of 1891.
- the Italian Commission of Small Arms adopted the model 1891 rifle in March of 1892, the model 1891 Calvary carbine in June of 1893, and the model 1891 TS carbine in 1897.
- "Mannlicher-Carcano" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Carcano" for Salvador Carcano the Chief Technician at Torino, Italy and his receiver/frame and bolt design.

Model

- the model designation does not appear on the firearm.
- these rifles were manufactured from 1892 until circa 1936.
- this military bolt action rifle utilizes a modified Mauser type, front-locking bolt and incorporates a Mannlicher style magazine with integral clip which falls out of the magazine opening when empty.
- the Model 1891 Rifle has a straight bolt handle and features "progressive twist" rifling in the barrel, (1 turn in 578mm at the throat and becomes 1 turn in 201mm at the muzzle). This rifle is of historical interest as it was the first small bore smokeless powder repeating rifle to be adopted by the Italian Armed Forces and was in service as late as 1943. Many of these rifles were officially modified in the 1920's and 1930's by having their barrels shortened.
- rifling characteristics: four grooves, right hand progressive gain twist - 1 turn in 19.25 inches at the throat and 1 turn in 8.25 inches at the muzzle.

Manufacturer

- the manufacturer's name or abbreviation is marked on the chamber of the barrel.

Action

- manually operated turn-bolt action.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number is marked on the left side of the chamber of the barrel. - observed serial number consisted of the letters "OR" followed by a dash and the letter "A" or "U" and four sequential numbers. - "OR" are the initials of "Ordnance Roma".
Shots	- Mannlicher style magazine with integral clip which falls out the bottom of the magazine opening when empty.
Other Markings	- the year of manufacture appears on the chamber of the barrel, either in full or the last two digits of the year. Some rifles are marked RE on the buttstock indicating Regio Escercito (Royal Army).

Notes

Make

- "Mannlicher-Carcano" is not marked on the firearm.
- the "Mannlicher-Carcano" was selected by the Italian Commission of Small Arms located in Parma, Italy after the evaluation and selection trials of 1891.
- the Italian Commission of Small Arms adopted the model 1891 rifle in March of 1892, the model 1891 Calvary carbine in June of 1893, and the model 1891 TS carbine in 1897.
- "Mannlicher-Carcano" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Carcano" for Salvador Carcano the Chief Technician at Torino, Italy and his receiver/frame and bolt design.

Model

- this target version of the Mannlicher Carcano Model 1891 Rifle is mechanically identical to the Infantry Rifle, but differs in having a double set triggers and a heavier stock, wider from the lower band to the butt plate.
- these rifles were used by military shooting teams in national and international shooting matches.
- this military bolt action rifle utilizes a modified Mauser type, front-locking bolt and incorporates a Mannlicher style magazine with integral clip which falls out of the magazine opening when empty.
- the Model 1891 Target Rifle has a straight bolt handle and features "progressive twist" rifling in the barrel.
- a substantial number of these Mannlicher Carcano Target Rifles were sold as surplus, circa 1920, in Austria where they were further modified to fire the 6.5X54MM cartridge; a pistol grip was added to a checkered, shortened stock; the barrel was also shortened and the bolt was bent. While these customized firearms no longer are Italian target shooting firearms they make a nice short Austrian style hunting rifle.

Action

- manually operated turn-bolt action.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- appears on the left side of the chamber of the barrel and may have a letter prefix or suffix.
Calibre	- in the 1920,s an unknown amount of these rifles were sold as surplus to an Austrian company, modifications made by this firm included the lengthening of the original 6.5 X 52mm caliber to 6.5 X 54mm caliber.
Shots	- Mannlicher style magazine with integral clip which falls out the bottom of the magazine opening when empty.
Remarks	- this rifle is of historical interest as it was the first small bore smokeless powder repeating rifle to be adopted by the Italian Armed Forces and was in service as late as 1943. Many of these rifles were officially modified in the 1920's and 1930's by having their barrels shortened.

Notes

Make

- "Mannlicher-Carcano" is not marked on the firearm.
- the "Mannlicher-Carcano" was selected by the Italian Commission of Small Arms located in Parma, Italy after the evaluation and selection trials of 1891.
- the Italian Commission of Small Arms adopted the model 1891 rifle in March of 1892, the model 1891 Calvary carbine in June of 1893, and the model 1891 TS carbine in 1897.
- "Mannlicher-Carcano" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Men bloc clip (on block clip) is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Carcano" for Salvador Carcano the Chief Technician at Torino, Italy and his receiver/frame and bolt design.

Model

- the model designation does not appear on the firearm.
- converted from 1924 to 1928 by FARE - Fabbrica Armi Regio Esercito - TERNI - Italy.
- the Mannlicher Carcano M91/24 is a modification of existing full length Mannlicher Carcano Model 1891 Rifles to Mannlicher Carcano Model 1891 TS Carbine configuration. Modification entailed shortening the barrel and forearm, bending the bolt handle and regraduating the original rifle to agree with the trajectory generated by the shorter barrel. Conversion work was carried out only at Terni and the original barrel markings were left intact.
- this firearm is a version of the Model 1891 Cavalry Carbine designed for use by special units (Engineers, Artillery etc.). It is mechanically identical to the Cavalry Carbine but differs visually in having normal length forearm with an unusual nosecap having a stud for mounting a regular knife bayonet under the barrel. The bayonet is mounted by engaging the stud and rotating the bayonet 1/4 turn clockwise. The barrel muzzle near the front sight has a two diameter step to better fit the bayonet mounting ring.
- this military bolt action rifles utilizes a modified Mauser type front locking bolt and incorporates a Mannlicher magazine utilizing a clip, holding 6 cartridges, which is inserted directly into the rifle's magazine and which falls out of the magazine opening when empty.
- the Model 1891/24 TS Rifle has a bent bolt handle and features "progressive twist" rifling in the barrel.
- rifling characteristics: four grooves, right hand progressive gain twist.

Manufacturer

- the manufacturer's name appears on the chamber of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- manually operated turn-bolt action.
Serial Number	- the serial number appears on the left side of the chamber of the barrel and may have a letter prefix or suffix.
Shots	- Mannlicher style magazine with integral clip which falls out the bottom of the magazine opening when empty.
Other Markings	- the year of manufacture appears on the chamber of the barrel, either as the full or the last two digits of the year. - some TS Carbines are marked RE on the buttstock indicating Regio Escercito (Royal Army). - the Mannlicher Carcano M91/24 TS Carbine is a modification of existing full length Mannlicher Carcano Model 1891 Rifles to Mannlicher Carcano Model 1891 TS Carbine configuration. - these firearms were converted between 1924 and 1928 by FARE - Fabbrica Armi Regio Esercito - TERNI - Italy and are so marked, as is the date of conversion.

Notes

Make

- "Mannlicher-Carcano" is not marked on the firearm.
- the "Mannlicher-Carcano" was selected by the Italian Commission of Small Arms located in Parma, Italy after the evaluation and selection trials of 1891.
- the Italian Commission of Small Arms adopted the model 1891 rifle in March of 1892, the model 1891 Calvary carbine in June of 1893, and the model 1891 TS carbine in 1897.
- "Mannlicher-Carcano" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Carcano" for Salvador Carcano the Chief Technician at Torino, Italy and his receiver/frame and bolt design.

Model

- the model designation does not appear on the firearm.
- manufactured from 1928 to 1938 by the Italian State Arsenals.
- the Mannlicher Carcano M91/28 is a newly manufactured Mannlicher Carcano Model 1891 TS Carbine.
- this firearm is a version of the Model 1891/24 TS Carbine originally designed for use by special units (Engineers, Artillery etc.). It is mechanically identical to the earlier 91/24 TS Carbine and utilizes the M91 type bayonet with the nosecap having a stud for mounting the regular knife bayonet under the barrel. The bayonet is mounted by engaging the stud and rotating the bayonet 1/4 turn clockwise.
- this military bolt action rifles utilizes a modified Mauser type front locking bolt and incorporates a Mannlicher magazine utilizing a clip, holding 6 cartridges, which is inserted directly into the rifle's magazine and which falls out of the magazine opening when empty.
- the Model 1891/28 TS Rifle has a bent bolt handle and features "progressive twist" rifling in the barrel.
- rifling characteristics: four grooves, right hand progressive gain twist.

Manufacturer

- the manufacturer's name appears on the chamber of the barrel.

Action

- manually operated turn-bolt action.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- appears on the left side of the chamber of the barrel and may have a letter prefix or suffix.
Calibre	- calibre designation appears on the top of the rear sight block.
Shots	- Mannlicher style magazine with integral clip which falls out the bottom of the magazine opening when empty.
Other Markings	- the year of manufacture appears on the chamber of the barrel, either as the full or the last two digits of the year and also in the Fascist dating system which uses Roman numerals with October 28, 1922 to October 27, 1923 as the year I, hence 1930 may appear as VIII or IX depending if manufacture was before or after October 27, 1930. - some carbines are marked RE on the buttstock indicating Regio Escercito (Royal Army).
Remarks	- there is a variation of the Mannlicher-Carcano Model 1891/28 TS Carbine with a grenade projecting barrel affixed to the right side of the forearm. The grenade projector utilises the same breech bolt as used in the carbine and a special grenade projecting blank cartridge. - some of these carbines had the grenade projecting barrel retrofitted while others were manufactured with the grenade projecting barrel in place.

Sometime in 1940 production changed to 6.5X52 ITALIAN calibre. - the Mannlicher-Carcano Model 1938 Cavalry Carbine is virtually identical to the Model 1891 Cavalry Carbine, differing in having a non adjustable rear sight and a slightly simplified locking arrangement for the permanently affixed folding bayonet. - features include: this military bolt action rifles utilizes a modified Mauser type front locking bolt and incorporates a Mannlicher magazine utilizing a clip, holding 6 cartridges, which is inserted directly into the rifle's magazine and which falls out of the magazine opening when empty; turned down bolt handle, 200 meter fixed rear sight, manufactured to accept the bomb throwing attachment; has a distinctive metal nose-cap that has rearward extensions let into the forend sides and held in place by two lateral pins, the stock has a slot on the underside of the forearm to accept the blade of a special folding blade bayonet designed specifically for this rifle. - rifling characteristics: four grooves, uniform right hand twist. - initially this rifle was chambered for the 7.35MM ITALIAN cartridge but the bulk of production were chambered for the 6.5X52 ITALIAN cartridge, those rifles in 6.5X52 ITALIAN calibre were standard issue of Italian forces in World War II.
Manufacturer	- the manufacturer's name appears on the chamber of the barrel.
Action	- manually operated turn-bolt action.
Serial Number	- appears on the left side of the chamber of the barrel and may have a letter prefix or suffix.
Calibre	- the calibre designation appears on the top of the rear sight block.
Shots	- Mannlicher style magazine with integral clip which falls out the bottom of the magazine opening when empty.
Other Markings	- the year of manufacture appears on the chamber of the barrel, either as the full or the last two digits of the year and also in the Fascist dating system which uses Roman numerals with October 28, 1922 to October 27, 1923 as the year I, hence 1940 appears as XVIII or XIX depending if manufacture was before or after October 27, 1940. - some carbines are marked RE on the buttstock indicating Regio Escercito (Royal Army).

Notes

Make

- "Mannlicher-Carcano" is not marked on the firearm.
- the "Mannlicher-Carcano" was selected by the Italian Commission of Small Arms located in Parma, Italy after the evaluation and selection trials of 1891.
- the Italian Commission of Small Arms adopted the model 1891 rifle in March of 1892, the model 1891 Calvary carbine in June of 1893, and the model 1891 TS carbine in 1897.
- "Mannlicher-Carcano" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Carcano" for Salvador Carcano the Chief Technician at Torino, Italy and his receiver/frame and bolt design.

Model

- the model designation does not appear on the firearm.
- these carbines were manufactured by FNA Brescia from 1940 to 1943.
- although the two models are similar in appearance and features, 1891 Cavalry Carbines will have dates of manufacture marked on the barrel ranging from 1894 through 1938 while the 1938 Cavalry Carbines will be marked with 1940 through 1943 production dates, with late 1943 production models bearing only serial numbers.
- the Model 38 Short Rifles, M38 Carbines and M38 TS Rifles were manufactured from 1938 to 1940/41 in calibre 7.35MM ITALIAN CARCANO. Sometime in 1940 production changed to 6.5X52 ITALIAN calibre.
- the Mannlicher-Carcano Model 1938 Cavalry Carbine is virtually identical to the Model 1891 Cavalry Carbine, differing in having a non adjustable rear sight and a slightly simplified locking arrangement for the permanently affixed folding bayonet. - features include: this military bolt action rifles utilizes a modified Mauser type front locking bolt and incorporates a Mannlicher magazine utilizing a clip, holding 6 cartridges, which is inserted directly into the rifle's magazine and which falls out of the magazine opening when empty; turned down bolt handle, 200 meter fixed rear sight, manufactured to accept the bomb throwing attachment; has a distinctive metal nose-cap that has rearward extensions let into the forend sides and held in place by two lateral pins, the stock has a slot on the underside of the forearm to accept the blade of a special folding blade bayonet designed specifically for this rifle.
- initially this rifle was chambered for the 7.35MM ITALIAN cartridge but the bulk of production were chambered for the 6.5X52 ITALIAN cartridge, those rifles in 6.5X52 ITALIAN calibre were standard issue of Italian forces in World War II.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the manufacturer's name appears on the chamber of the barrel.
Action	- manually operated turn-bolt action.
Serial Number	- appears on the left side of the chamber area of the barrel and may be marked with prefixes XA thru XX or YA through YH.
Calibre	- the calibre designation appears on the top of the rear sight block. - rifling characteristics: four grooves, uniform right hand twist.
Shots	- Mannlicher style magazine with integral clip which falls out the bottom of the magazine opening when empty.
Other Markings	- the year of manufacture appears on the chamber of the barrel, either as the full or the last two digits of the year and also in the Fascist dating system which uses Roman numerals with October 28, 1922 to October 27, 1923 as the year I, hence 1940 appears as XVIII or XIX depending if manufacture was before or after October 27, 1940. - some carbines are marked RE on the buttstock indicating Regio Escercito (Royal Army).

Notes

Make

- "Mannlicher-Carcano" is not marked on the firearm.
- the "Mannlicher-Carcano" was selected by the Italian Commission of Small Arms located in Parma, Italy after the evaluation and selection trials of 1891.
- the Italian Commission of Small Arms adopted the model 1891 rifle in March of 1892, the model 1891 Calvary carbine in June of 1893, and the model 1891 TS carbine in 1897.
- "Mannlicher-Carcano" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Carcano" for Salvador Carcano the Chief Technician at Torino, Italy and his receiver/frame and bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- this target version of the Mannlicher Carcano Model 1838 Short Rifle is mechanically identical to the Infantry Rifle, but differs in having double set triggers, barrels designated for accuracy; turned down bolt, and a special hardwood stock which is wider from the lower band to the butt plate. - these rifles were used by military shooting teams in national and international shooting matches. - features include: this military bolt action rifles utilizes a modified Mauser type front locking bolt and incorporates a Mannlicher magazine utilizing a clip, holding 6 cartridges, which is inserted directly into the rifle's magazine and which falls out of the magazine opening when empty. - this firearm may be encountered with no Italian acceptance marks, army star, or caliber markings on the butt stock, (in 1940, 94,000 non-issued brand new M38 short rifles including target models were sent to Finland for use in their war with the Soviet Union.).
Action	- manually operated turn-bolt action.
Shots	- the Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
Remarks	- this firearm may be encountered with no Italian acceptance marks, army star, or caliber markings on the butt stock, (in 1940, 94,000 non-issued brand new M38 short rifles including target models were sent to Finland for use in their war with the Soviet Union.).

Notes

Make

- "Mannlicher-Carcano" is not marked on the firearm.
- the "Mannlicher-Carcano" was selected by the Italian Commission of Small Arms located in Parma, Italy after the evaluation and selection trials of 1891.
- the Italian Commission of Small Arms adopted the model 1891 rifle in March of 1892, the model 1891 Calvary carbine in June of 1893, and the model 1891 TS carbine in 1897.
- "Mannlicher-Carcano" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Carcano" for Salvador Carcano the Chief Technician at Torino, Italy and his receiver/frame and bolt design.

Model

- the model designation does not appear on the firearm.
- manufactured from 1938 to 1943 by the Italian State Arsenals.
- this firearm is a version of the Model 1938 Short Rifle designed for use by special units (Engineers, Artillery etc.) with a 200 meter, fixed rear sight. It is mechanically identical to earlier versions of the Mannlicher-Carcano Rifles Model 1891 and utilizes the M91 type bayonet with the nosecap having a stud for mounting the regular knife bayonet under the barrel.
- features include: this military bolt action rifles utilizes a modified Mauser type front locking bolt and incorporates a Mannlicher magazine utilizing a clip, holding 6 cartridges, which is inserted directly into the rifle's magazine and which falls out of the magazine opening when empty; turned down bolt handle, 200 meter fixed rear sight; a distinctive metal nose-cap.
- the Model 1938 TS Rifle, when chambered for the 6.5X52MM ITALIAN calibre cartridge features "progressive twist" rifling in the barrel.
- the Model 1938 TS Rifle when chambered for the 7.35MM ITALIAN CARCANO calibre cartridge features a uniform right hand twist to the rifling.
- rifling characteristics: four grooves, right hand progressive gain twist or four groove uniform right hand twist depending on the calibre.

Manufacturer

- the manufacturer's name appears on the chamber of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- manually operated turn-bolt action.
Serial Number	- appears on the left side of the chamber of the barrel and may have a letter prefix or suffix.
Calibre	- calibre designation appears on the top of the rear sight block.
Shots	- the Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
Other Markings	- the year of manufacture appears on the chamber of the barrel, either as the full or the last two digits of the year and also in the Fascist dating system which uses Roman numerals with October 28, 1922 to October 27, 1923 as the year I, hence 1940 appears as XVIII or XIX depending if manufacture was before or after October 27, 1940. - some carbines are marked RE on the buttstock indicating Regio Escercito (Royal Army).

- rifling characteristics: four groove uniform right hand twist.

Manufacturer

- the manufacturer's name does not appear on the firearm.

Action

- manually operated bolt action.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- appears on the left side of the chamber of the barrel and may have a letter prefix or suffix.
Shots	- a standard Mannlicher clip modified for 8MM MAUSER calibre cartridges is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
Remarks	- the Model 1938 TS Fucilli Russi 8MM has a bent bolt handle and the top rear of the receiver/frame is ground away in a semi-circular groove to permit charger clip loading of the longer 8MM MAUSER cartridge.

FRT Report

Firearm Reference Number (FRN): 125079
Make: Mannlicher-Carcano
Model: 1941 Rifle

Summary

Make:	Mannlicher-Carcano
Model:	1941 Rifle
Manufacturer:	Armaguerra
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	ITALY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
125079 - 2	6.5X52 ITALIAN	6	690	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
125079 - 3	6.5X54 MANNLICHER-SCHOENAUER	6	600	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "Mannlicher-Carcano" is not marked on the firearm.
- the "Mannlicher-Carcano" was selected by the Italian Commission of Small Arms located in Parma, Italy after the evaluation and selection trials of 1891.
- the Italian Commission of Small Arms adopted the model 1891 rifle in March of 1892, the model 1891 Calvary carbine in June of 1893, and the model 1891 TS carbine in 1897.
- "Mannlicher-Carcano" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Carcano" for Salvador Carcano the Chief Technician at Torino, Italy and his receiver/frame and bolt design.

Model

- the model designation does not appear on the firearm.
- the Model 1941 Rifles were manufactured from 1941 to 1943 in calibre 6.5X52 ITALIAN.
- recognition features: 690MM barrel length, 1941, 1942 & 1943 manufacture dates and manufactured only by TERNI (FAT) & ARMAGUERRA CREMONA.
- features include: straight bolt handle (some M41 Rifles have been seen with replacement turn-down, carbine type, bolt handles), adjustable rear sight (300 - 1000 meters with a 200 meter battle sight), the nose-cap of the forestock has a conventional bayonet attaching lug which accepts the standard Italian knife style bayonet, similar to the original Model 1891 Mannlicher-Carcano bayonet.
- rifling characteristics: four grooves, uniform right hand twist.

Manufacturer

- "ARMAGUERRA CREMONA" appears on the top rear of the barrel.

Action

- manually operated turn-bolt action.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number appears on the left side of the chamber of the barrel.
- serial number rationalization for the 240,000 ARMAGUERRA produced M41 rifles is as follows: QA - QZ prefix and up to 4 digits followed by RA and up to 4 digits.

Shots

- the Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.

Other Markings

- the year of manufacture appears on the chamber of the barrel, either as the full or the last two digits of the year and also in the Fascist dating system which uses Roman numerals with October 28, 1922 to October 27, 1923 as the year I, hence 1940 appears as XVIII or XIX depending if manufacture was before or after October 27, 1940.
- TERNI did not use the Fascist date system on barrels at all and ceased dating barrels with Christian dates in 1943.
- ARMAGUERRA used both Fascist and Christian dates on barrels until 1943 when they stopped dating barrels completely.
- some rifles are marked RE on the buttstock indicating Regio Escercito (Royal Army).

Notes

Make

- "Mannlicher-Carcano" is not marked on the firearm.
- the "Mannlicher-Carcano" was selected by the Italian Commission of Small Arms located in Parma, Italy after the evaluation and selection trials of 1891.
- the Italian Commission of Small Arms adopted the model 1891 rifle in March of 1892, the model 1891 Calvary carbine in June of 1893, and the model 1891 TS carbine in 1897.
- "Mannlicher-Carcano" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Carcano" for Salvador Carcano the Chief Technician at Torino, Italy and his receiver/frame and bolt design.

Model

- the model designation does not appear on the firearm.
- the original Mannlicher-Carcano Model 1941 Rifles were manufactured from 1941 to 1943 in calibre 6.5X52 ITALIAN. This Mannlicher-Carcano Model 1941 8MM subvariant was manufactured only in calibre 8MM MAUSER during the period of the "SALO Republic" (1943 - 1945) in northern Italy. These firearms were manufactured to outfit those Italian troops that remained loyal to their AXIS partner Germany and to equip the co-belligerent Germans.
- recognition features: 600MM barrel length, the bolt release is a lever/catch found on the right rear of the receiver/frame and is unique to this model; the top rear of the receiver/frame is notched with a semi-circular groove, if dated, will be dated between 1943 and 1945; manufactured only by ARMAGUERRA CREMONA.
- features include: top rear of the receiver/frame notched to permit charger clip loading of the German service cartridge which is longer than the Italian service cartridge; turn-down, carbine type, bolt handle; adjustable rear sight; Mauser type non-detachable, internal magazine, the bolt release is a lever/catch found on the right rear of the receiver/frame; the nose-cap of the forestock has a conventional bayonet attaching lug which accepts the standard Italian knife style bayonet, similar to the original Model 1891 Mannlicher-Carcano bayonet.
- rifling characteristics: four grooves, uniform right hand twist.

Manufacturer

- the manufacturer's name does not appear on the firearm. The manufacturer can be assumed from the assigned serial number rationalization and the fact that the arsenal was located within the area of the "SALO Republic".

Action

- manually operated turn-bolt action.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number appears on the left side of the chamber of the barrel. - serial number rationalization for the Mannlicher-Carcano M41 8MM rifles is as follows: two letter prefix and up to 4 digits.
Shots	- the Mannlicher magazine is adjusted to accept the standard German Mauser 5 shot cartridge stripper clip.
Other Markings	- the barrel and bolt will be found to have German proof marks and Waffenamt stampings which may relate to the H Krieghof company.

Action:	Bolt Action
Country of Manufacturer:	CANADA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
78873 - 1	6.5MM	6	508	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- not marked on the firearm.

Model

- model not marked on the firearm, Sporter is not a model name, but rather a description of a style of firearm.
- this is a conversion of military Mannlicher-Carcano rifles into sporting configuration; the conversion was made by The Cooey Machine & Arms Company, under contract to the T. Eaton Co. of Toronto.
- conversion included:
- the removal of all military and proof marks.
- new barrel installed with 6.5mm markings on the knoxform of the receiver/frame.
- installation of a double set trigger mechanism, and turned down bolt handle.
- the original military stock was kept, with the addition of a pistol grip, filling of the stock nose, and location of lower military sling swivel and checkering of the pistol grip and forend.

Manufacturer

- not marked on the firearm.
- manufactured originally in Italy by one of the Italian State Arsenals and reconfigured by the Cooey Machine & Arms Company in Toronto, under contract to the T. Eaton Co. of Toronto.

Serial Number

- serial number rationalization unknown, but low three digit sequential number was marked on an observed specimen.

Calibre

- early in the 1930's, the CIL company (Canadian Industries Limited) manufactured 6.5mm ammunition under contract to the T. Eaton Co., they were headstamped R6.5mm, or just 6.5mm.

Shots

- fixed box magazine, with stripper clip system.

Notes

Make

- "Mannlicher-Carcano" is not marked on the firearm.
- the "Mannlicher-Carcano" was selected by the Italian Commission of Small Arms located in Parma, Italy after the evaluation and selection trials of 1891.
- the Italian Commission of Small Arms adopted the model 1891 rifle in March of 1892, the model 1891 Calvary carbine in June of 1893, and the model 1891 TS carbine in 1897.
- "Mannlicher-Carcano" is derived from the last name of the inventors of the major features incorporated into this firearm.
- "Mannlicher" for Ferdinand Mannlicher and his clip loaded integral box magazine system. The Mannlicher clip is loaded into the top of the firearm and falls out through the bottom of the magazine when empty.
- "Carcano" for Salvador Carcano the Chief Technician at Torino, Italy and his receiver/frame and bolt design.

Model

- the model designation does not appear on the firearm.
- manufactured from 1892 to 1938 by the Italian State Arsenals.
- this firearm is a commercially sporterized version of any of the Mannlicher-Carcano rifles and Carbines based on the 1891 action.
- this military bolt action rifles utilizes a modified Mauser type front locking turn-bolt and incorporates a Mannlicher magazine utilizing a clip, holding 6 cartridges, which is inserted directly into the rifle's magazine and falls through the bottom of the magazine opening when empty.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- turn bolt operated.
Serial Number	- the serial number may be marked on the left side of the chamber of the barrel and may have a letter prefix or suffix.
Shots	- integral box magazine.

Notes

Make

- appears on the receiver ring.

Model

- "MOD. 1956" appears on the receiver ring.
- "Made in Austria" marked on receiver ring.
- "Steyr" marked on left side of receiver.
- this is a generic screen designed to encompass all of the Model 1956 variations.
- introduced in 1956 and discontinued in 1960.
- available as a carbine version with 508mm barrel & Mannlicher-style stock, i.e., stocked to the muzzle or standard version with 559mm barrel & sporter-type stock which may also be referred to as the Custom Model.
- both stock designs characterized by high comb cheek piece, checkering, white-line spacers.
- single or double triggers.
- Austrian proof marks are apparent on the barrel and receiver.
- safety lever located at top rear right side of receiver.

Manufacturer

- appears on the receiver.

Action

- manually operated, bolt action, repeating firearm.

Serial Number

- appears on the receiver.

Calibre

- calibre designation usually marked on top of receiver ring.

Shots

- has an internal rotary "spool" magazine.

Notes

Make

- "Made in Austria" over "Original " over "Mannlicher Schoenauer" may be marked on the top of the receiver ring.

Model

- "Mod. GK" may be marked on the top of the receiver ring.
- this is a light-weight bolt action magazine fed hunting rifle based on the military Mannlicher-Schoenauer action.
- top of receiver ring may be marked, "Patent" over "Mannlicher".
- utilizes the Schoenauer designed internal drum shaped rotary magazine.
- butterknife style bolt handle that sweeps back down towards the trigger-guard from the bolt.
- spring-actuated bolt stop/release is located on left rear of receiver/frame.
- single or double trigger, ramp front sight, two-leaf folding rear sight, sling swivels, full-length Mannlicher stock with cheek-piece and pistol-grip.
- blued finish.

Manufacturer

- "OESTERR.WAFFENFABR. GES.STEYR" may be marked on the left side of receiver/frame and/or the "STEYR" name and crest may be marked on the under side of the receiver/frame.

Action

- turn-bolt design.

Serial Number

- known example had four digit number without prefix or suffix.
- the serial number is marked on the receiver ring and on the rear of the barrel.

Barrel

- Steyr factory literature lists two barrel lengths for the carbine model as follows: 18-1/8"/460mm in 6.5X54 Mannlicher-Schoenauer; 20"/508mm in all other calibres.

Calibre

- the calibre designation may be marked on the top of the receiver ring.

Shots

- Schoenauer-designed drum-shaped internal rotary magazine.

Notes

Make

- "Made in Austria" over "Original " over "Mannlicher Schoenauer" and/or "Mannlicher Scooenauer" may be marked on the top of the receiver ring.

Model

- "Mod. GK" is marked on the receiver/frame.
- this is a bolt-action hunting rifle based on the military Mannlicher-Schoenauer action.
- features include: butter-knife-style bolt handle that sweeps down toward the trigger-guard from the bolt; single or double trigger; ramp front sight; two-leaf folding rear sight; sling swivels; sporter-length stock with cheek-piece and pistol-grip.

Manufacturer

- the Steyr crest is marked on the under side of the receiver/frame.

Action

- turn bolt operated.

Serial Number

- serial number is marked on the right side of the receiver/frame and is repeated on the right side of the barrel.

Calibre

- calibre designation is marked on the receiver/frame.

Shots

- Schoenauer-designed drum-shaped internal rotary magazine.

Other Markings

- "MADE IN AUSTRIA
  Original
  Mannlicher
  Schoenauer
  Mod. GK" is marked on the receiver/frame

Remarks

- the last two digits of the date of manufacture may be marked on numerous locations on the firearm ie. "58".

Notes

Make - appears on the receiver.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- introduced 1922, discontinued 1937. - this is a bolt action sporting rifle utilising a rotary or "spool" magazine designed by Schoenauer and a bolt system designed by Mannlicher. - it is mechanically identical to the Mannlicher-Schoenauer Model 1903 Sporting Carbine but differing in having a considerably longer barrel, half length forearm stock, checkered trap buttplate and being available in a selection of larger and more powerful calibre. - as a special option, this model was offered in a "takedown" configuration in which the barreled receiver could be quickly dismounted from the stock for cleaning, storage and transportation.
Manufacturer	- appears on the receiver/frame.
Serial Number	- appears on the receiver/frame.
Shots	- internal rotary "spool" magazine.

Notes

Make	- the make appears on the lockplates or receiver/frame.
Model	- this is a generic record created to encompass European manufactured (usually Belgian) side by side shotguns marked "MANTON" in the effort to capitalize on the British quality gunmaking firm of Joseph Manton. European manufactured "MANTON" shotguns while, when new, are serviceable but do not display the fit, finish and overall high quality of the British Joseph Manton firearms. - European Mantons may be recognized by the presence of European and lack of British proofmarks. - "J. MANTON & CO,", "I. MANTON", or "MANTON" is marked on the receiver/frame or lockplates. - may also be marked: "Choke Bored", " Government Tested Laminated Steel." and/or "acier tordue". - features may include: Damascus or steel barrels; sidelocks; external hammers.
Other Markings	- known example marked "Machine Made" on the right side lockplate.

Notes

Make

- "J. MANTON & CO" is marked on the receiver/frame or lockplates.
- "J Manton & Co" trade name was used by Henri Pieper of Belgium on shotguns that were imported into North America by H. & D. Folsom Arms Company and Schoverling, Davis & Gales circa 1900.
- NOTE: do not confuse with J. Manton of London, England.

Model

- model designation is not marked on the firearm.
- this three barreled combination shotgun/rifle features the upper two barrels as smooth bored over a rifled lower barrel.
- features include: blued barrels; front dove-tailed and a folding rear sight; top break lever; sidelock action with manual top mounted safety; double triggers; extractors; lightly engraved receiver/frame; checkered, English-type straight, walnut buttstock.

Action

- hinged barrel design.
- barrel assembly consists of three barrels: one rifled barrel and two smoothbore barrels or two rifled barrels and one smoothbore barrel.

Serial Number

- serial number is marked on the receiver/frame.
- observed specimen had four numbers.

Summary

Make:	Manufacture Francaise d'Armes & Cycles de St Etienne
Model:	1892 French Service Type
Manufacturer:	Manufacture Francaise d'Armes & Cycles de St-Etienne (MF)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	FRANCE
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
195288 - 1	8MM LEBEL REV	6	117	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Manufacture Francaise d'Armes" over "& Cycles de Saint-Etienne" is marked on the top strap.
- "Manufacture Francaise d'Armes & Cycles de Saint-Etienne" is the altered name given in 1901 from "Manufacture Francaise d'Armes de Saint-Etienne".
- "Manufacture Francaise d'Armes & Cycles de Saint-Etienne" use the letter "MF" that may be part of their logo.
- "Manufacture Francaise d'Armes & Cycles de Saint-Etienne" logo is two crossed canon with a full length arrow going through its center that may have the letter "M" and "F" on the other side of the logo.
- "Manufacture Francaise d'Armes & Cycles de Saint-Etienne" also use the name "Manufacture Francaise".

Model

- "1892" is not marked on the firearm.
- "1892 French Service Type" is a civilian, commercial variant of the "1892 French Service" revolver.
- "1892 French Service Type" barrel is marked with the civilian proof mark of a crown over crossed branches with the word "St ETIENNE".
- features include: blade front sight and a notch in the lip of the top strap for a rear sight; round to octagonal, rifled barrel; solid top receiver/frame with right side swing-out fluted cylinder and right side loading gate; exposed spurred hammer with removable firing pin; double/single action trigger mechanism; left side plate/trigger guard is hinged at the front of the receiver/frame to allow access to the interior lock work mechanism; rounded butt with lanyard ring; checkered wood grip plates; blued finish.

Manufacturer

- "Manufacture Francaise d'Armes" over "& Cycles de Saint-Etienne" is marked on the top strap.
- "Manufacture Francaise d'Armes & Cycles de Saint-Etienne" is the altered name given in 1901 from "Manufacture Francaise d'Armes de Saint-Etienne".
- "Manufacture Francaise d'Armes & Cycles de Saint-Etienne" use the letter "MF" that may be part of their logo.
- "Manufacture Francaise d'Armes & Cycles de Saint-Etienne" logo is two crossed canon with a full length arrow going through its center that may have the letter "M" and "F" on the other side of the logo.
- "Manufacture Francaise d'Armes & Cycles de Saint-Etienne" also use the name "Manufacture Francaise".

Serial Number

- serial number is usually repeated on the front of the cylinder, under the barrel and inside the trigger guard plate.
- serial number of a referenced example consisted of five numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - swing-out cylinder to the right.

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
160006 - 1	37MM RIMMED	1	1500	Prohibited PFR, Part 1, para. 95	Manufacturer Specifications and Commercial Customization	

Notes

Make	- the make or logo thereof is marked on the firearm.
Model	- the model is not marked on the firearm; this is a descriptor of the firearm type. - this is a large, single-shot "punt gun" shotgun, of the type used by market hunters prior to World War One, which could be seen mounted on a wheeled carriage or bolted to the deck of a small boat. - these shotguns were essentially small artillery-pieces, loaded with a large shot cartridge, that allowed a "hunter" to fire at a flock of waterfowl sitting on the water, then row out to collect as many of the birds as possible with a minimum amount of effort; this practice was banned in most parts of the world after it became clear that native stocks were in danger of extinction. - features usually include: "cannon"-like appearance, with a smooth bore; blued finish; open sighting posts; a swivel or carriage mount; a "cannon"-style breech mechanism, usually fired with a pistol-grip attached to the backplate; and these shotguns may be seen with a detachable shoulder-stock, to allow for better aiming.
Manufacturer	- the manufacturer or logo thereof is marked on the firearm.
Action	- cannon-breech single-shot, operated with a locking handle at the rear of the shotgun.
Barrel	- other barrel lengths possible.
Calibre	- other gauges/calibres possible.

134865 - 3	9MM CANE GUN	1	790	Antique AFR, Section 1, para. 5	Non-Commercial Customization	

Notes

Make

- the maker's complete name is marked on the front band of the receiver/frame/grip of the firearm.

Model

- model name is marked on the front band of the receiver/frame/grip as, "Canne Etoile". "Etoile" is French for the English word "Star".
- produced circa mid-1800's to circa 1950.
- features; single shot, smooth bore or rifled, breech loading cane gun; barrel is unscrewed from the grip frame in order to load a cartridge; a wooden tampion/plug with two metal hooks attached is housed with the grip frame and is withdrawn from the grip prior to loading, the tampion is then used to cock the hammer which is located in the rear of the grip handle, after firing the cartridge, the metal hooks are then used to extract the empty shell case; cocking the hammer also releases the trigger which is located directly underneath the hammer; rear of grip frame may also be threaded for the attachment of a wire-type butt stock; cane handle may be may from various materials such horn, hardwood, aluminum.

Manufacturer

- the manufacturer's complete name is marked on the front band of the receiver/frame/grip of the firearm.

Action

- breech loading is accomplished by removing the barrel section of the cane from the receiver/frame/handle.

Serial Number

- known example did not have a serial number.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- on known example, calibre was marked on the front band of the receiver/frame/grip as "12mm".
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "MANUFACTURE FRANCAISE d ARMES & CYCLES de SAINT-ETIENNE" is marked on the top-strap, with Manufacture Francaises's "arrow and crossed cannon flanked by MF" logo marked on the cylinder.

Model

- "LE MUNICIPAL" is marked on the barrel.
- this is one of a series of revolvers produced by ManuFrance beginning in 1906, as a lower-cost alternative to the Lebel 1892 service revolver, intended for arming watchmen and police forces.
- the "Agent" was a five-shot short-barrelled version (made with two different manual ejection systems), the "Municipal" was a six-shot longer-barrelled version with a fixed cylinder and tip-out loading gate, and the "Brigadier Municipal" was the "deluxe" version, with a cylinder that tipped out to the right, with simultaneous ejection.
- features include: blued finish; fixed open sights with rear sight groove machined into a hump on the topstrap; octagonal barrel; a rotating "plunger"-style ejector mounted on a screw at the front of the receiver frame, which is kept stored in the hollow cylinder axis pin; burnished or colour-case-hardened hammer, trigger, and ejection assembly; single-action/double-action trigger mechanism with spurred hammer; checkered walnut grip plates; and a lanyard loop at the butt.

Manufacturer

- "MANUFACTURE FRANCAISE d ARMES & CYCLES de SAINT-ETIENNE" is marked on the top-strap, with Manufacture Francaises's "arrow and crossed cannon flanked by MF" logo marked on the cylinder.

Action

- double-action revolver.

Serial Number

- serial-numbered on the receiver/frame; may be numbered underneath the grip panels.

103575 - 2	6.35MM	7	60	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Manufrance" may be marked on the slide, "MF" in a wreath is marked on each grip plate on the bottom of the barrel and "MF" and crossed cannon barrels are marked on the bottom of the barrel.
- the same pistol was also sold (and marked) under the "Le Francais" trade-name which was also used by Manufacture Francaise d'Armes & Cycles de St-Etienne.

Model

- model designation is not marked on the firearm.
- this is the first of a range of automatic pistols commonly known as "Le Francais" designed in 1913, and first made in 1914.
- features include: hinged drop down barrel, a novelty for the period, with the release lever located on the right side of the receiver/frame, this allows the breech to rise clear of the slide. The barrel catch is linked to the magazine, so when the magazine is withdrawn the barrel opens; self cocking striker; mno extractor, extraction is accomplished by residual gas pressure from the blowback action; checkered black plastic grips with the Manufrance logo, "MF" inside a wreath; - fixed front blade sight, notched rear.
- a longer barrelled version of this model was introduced shortly after and was sold as the "Policeman" or "Le Gendarme", it was essentially the same except for the barrel length.

Manufacturer

- "MANUFACTURE FRANCAISE D'ARMES ET CYCLES DE SAINT-ETIENNE" is marked on the right side of the slide.

Action

- blowback operated.

Serial Number

- serial number is marked on the right side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- caliber designation is marked on the underside of the barrel.
Shots	- detachable box magazine. - magazines are often found fitted with a spring clip at the bottom to hold a spare cartridge.
Other Markings	- "BREVETE S.G.D.G" is often marked on the underside of the barrel.

Summary

Make:	ManuFrance
Model:	Reina 446
Manufacturer:	Manufacture Francaise d'Armes & Cycles de St-Etienne (MF)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	FRANCE
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
71829 - 1	22 LR	8	559	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
71829 - 2	22 LR	15	559	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the ManuFrance name and logo were marked on the barrel of the sample examined.

Model

- this design, also known as the "Carabine Reina" was made in two distinct configurations. The model or number 446 was the basic offering that featured a one-piece half stock with a straight comb and finger grooves in the forend, and a semi-buckhorn rear sight. The model or number 450 was the deluxe offering that featured a longer 581mm barrel and a Monte Carlo style stock with white line spacers and checkering on the wrist and forend and a tangent-leaf rear sight.
- it is believed that these models were in production between about 1954 and 1975.
- on the sample examined the model designation was marked between the trigger guard and the magazine as "REINA" and on the barrel as "No 446".
- other features include: fixed front sight; safety is located on the trigger guard in front of the trigger; blued finish; cylindrical receiver/frame with vented sides and a groove for mounting a scope.

Manufacturer

- the manufacturer's full name is not marked on the firearm. After World War II Manufacture Francaise d'Armes & Cycles de St. Etienne (MF) adopted the "ManuFrance" name.

Action

- blowback operated.

Serial Number

- specimen observed had a five digit serial number without a prefix or suffix marked on the barrel only.

Calibre

- the calibre designation was marked on the barrel on the sample examined.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine.
Other Markings	- the barrel may also be marked "SGDG", this marking denotes "Sans Garantie du Gouvernament" (translates to "No Government Guarantee").

Notes

Make

- usually marked on the left side of the frame top-strap: MADE IN FRANCE.

Model

- "MR 88" is marked on the left side of the barrel.
- this is a 357 Magnum Ruger GP100-styled revolver previously manufactured by Manurhin in several barrel lengths, manufactured by Manufacture d'armes de tir Chapuis since 1998.
- features include: blued or stainless steel finish; open fixed or adjustable sights; full-length underlug; a fluted cylinder that swings out to the left; single/double-action trigger mechanism; a Ruger style cylinder latch; and synthetic finger-grooved grips.
- overall length with a 76mm (3") barrel is 206mm (8.11"), and weight 950gr (33.5oz).
- overall length with a 152mm (6") barrel is 282mm (11.10"), and weight 1.128kg (40oz).
- Personal Defense model in blue, model D, in stainless steel, model DX.
- Sporting model in stainless steel, model SX.

Manufacturer

- Chapuis Armes of Saint Bonnet Le Chateaux, France purchased the MANURHIN trade name and manufacturing equipment in 1998.
- MANURHIN (Manufacture de Machines du Haut Rhin) was in business at Mulhouse, Alsace, France from the 1950s to 1998.

Action

- double-action revolver.

Serial Number

- usually marked on the butt of the receiver/frame.
- serial number of a referenced example consisted of two letter prefix "FD" and five numbers.

Calibre

- marked on the left side of the barrel, along with model.

Other Markings

- official proofhouse marks on barrel, cylinder, and frame.

Notes

Make

- "MANVILLE" was marked on the side of the receiver/frame of an observed example and the "M" logo was marked on the grip panels.

Model

- introduced circa 1935.
- this is a combination shotgun/tear-gas launcher/dispenser built along the lines of a large, two handed revolver; the cylinder is wound manually, and the double action trigger mechanism advances the cylinder one chamber at a time.
- originally built in 12 GA and later offered with 10 GA and 12 GA cylinder adapters for the 25MM and 37MM versions.
- this launcher will also fire 25MM and 37MM flares, as the tear-gas load has not been manufactured for some time.
- also available with a sled mount.

Manufacturer

- this was a company based in Pontiac, Michigan that also produced several types of riot-control munitions prior to World War II.
- the company was purchased by the Lake Erie Chemical Company in 1946.

Type

- tear gas launcher.

Serial Number

- serial number on observed examples was marked on the underside of the rear pistol grip and/or the barrel support shroud and consisted of a letter prefix and three numbers.
- do not confuse the patent number "2101148" for the serial number as marked on the side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- chambered for the 25MM tear-gas cartridge and will also fire 25MM flare cartridges, which are in current production.
- originally offered in 12 GA and subsequently sold with 10 GA and 12 GA cylinder adapters for use in the 25MM Gas chambering.

Remarks

- "PATENT No. 2101148" was marked on an observed example on the side of the receiver/frame.

Notes

Make

- "MANVILLE MFG.CO." was marked on the top strap of an observed example.

Model

- "Tear Gas" is cast on the side of the grips of an observed example.
- introduced circa 1930.
- a tear-gas launcher utilizing a double-action, hammerless revolver; aluminium receiver/frame and barrel, and a cylinder made out of plastic or aluminum.
- other features include: left side mounted safety switch; right side mounted loading gate; with or without a humped receiver/frame; solid rib on barrel mounted on the top of the receiver/frame by two screws; silver finished trigger with the "M" logo and absence of trigger guard.

Manufacturer

- "MANVILLE MFG.CO." was marked on the top strap of an observed example.
- based in Pontiac, Michigan, and also produced several types of riot-control munitions prior to World War II.
- the company was purchased by the Lake Erie Chemical Company in 1946.

Serial Number

- located in a milled-out "bulls-eye" on the right side of the grip and consisted of four numbers.
- do not confuse the serial number with the patent number "100350" marked on the top strap.

Notes

Make

- "MAPLE RIDGE ARMOURY" is marked on the left side of the receiver/frame.
- The company logo is marked on the firearm.
- "MAPLE RIDGE ARMOURY" logo consists of the upper portion of a maple leaf with a triangle underneath. The company name "MAPLE RIDGE ARMOURY" is usually observed on the right side of the logo.

Model

- Introduced in 2021.
- "MODEL MAVERICK" is marked on the left side of the receiver/frame.
- "MAVERICK" is marked on the right side of the receiver/frame.
- Features include: free floating handguard with accessory rails ; Accessory rail on the top of the receiver/frame; Interchangeable left/right bolt handle; geometrical shape lightening cuts on the upper and lower receivers; flared magazine well; AR-15 type magazine release located ahead of the trigger; and ambidextrous safety lever.
- "Maverick" has a proprietary upper and lower receiver/frame designed not to be compatible with standard AR-10 receivers.
- The "Maverick" is a scaled up version of the "Renegade MARK 2".

Manufacturer

- "MAPLE RIDGE ARMOURY" is marked on the left side of the receiver/frame.
- The company logo is marked on the firearm.
- "MAPLE RIDGE ARMOURY" logo consists of the upper portion of a maple leaf with a triangle underneath. The company name "MAPLE RIDGE ARMOURY" is usually observed on the right side of the logo.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- Straight-pull bolt operated.
Serial Number	- The serial number is marked on the left side of the receiver/frame. - Serial number is prefixed by "S/N" followed by seven (7) digits.
Calibre	- "CALIBER MULTI" is marked on the left side of the receiver/frame. - The calibre designation is marked on the barrel.
Shots	- Detachable box magazine. - Designed to accept AR-10 type magazines.
Canadian Law Comments	- In the case of this firearm, it has been determined that the component commonly referred to as the upper receiver assembly, into which the barrel is mounted and which contains the breech mechanism and upon which the manufacturer's identification, model identification, proof information, and the full serial number is marked, is the receiver/frame for the purposes stated within the Firearms Act and the Criminal Code of Canada.

Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
196871 - 4	223 REM	5	406	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
196871 - 1	5.56MM NATO	5	406	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- The company logo is marked on the receiver/frame.
- The Maple Ridge Armoury logo consists of the upper portion of a maple leaf with a triangle underneath. The company name "MAPLE RIDGE ARMOURY" is usually observed on the right side of the logo.
- "MAPLE RIDGE ARMOURY" is marked on the firearm in various places.

Model

- "RENEGADE" is marked on the firearm in various places.
- "RENEGADE" is a straight pull, spring assisted, bolt action rifle with a split receiver/frame design.
- Available with a bolt catch variant as the "RENEGADE MARK 2".
- Features include: free floating handguard that may have integral top and bottom accessory rails and accessory anchor points on both sides; flat top upper assembly with integral accessory rail; grooved upper assembly for left or right side bolt handle; geometrical shape lightening cuts on the upper and lower receivers; flared magazine well; AR-15 type and location magazine release and ambidextrous safety lever; integral trigger guard.
- Overall length with a 406 mm (16 inches) barrel is 824 mm (32 3/8 inches) with the stock collapsed.

Manufacturer

- The company logo is marked on the receiver/frame.
- The Maple Ridge Armoury logo consists of the upper portion of a maple leaf with a triangle underneath. The company name "MAPLE RIDGE ARMOURY" is usually observed on the right side of the logo.
- "MAPLE RIDGE ARMOURY" is marked on the firearm in various places.

Action

- Straight-pull bolt operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- The serial number is marked on the left side of the receiver/frame. - Serial number of referenced examples consisted of seven numbers.
Barrel	- The barrel length does not include any attached device such as flash-hider or muzzle brake.
Calibre	- "CALIBER MULTI" is marked on the left side of the upper receiver/frame. - The calibre designation is marked on the barrel.
Shots	- Detachable box magazine.
Canadian Law Comments	- This firearm design incorporates a two-piece receiver/frame: the upper receiver is the master component for the receiver/frame for all purposes of the Criminal Code and the Firearms Act.

Notes

Make	- The company logo is marked on the firearm. - "MAPLE RIDGE ARMOURY" logo consists of the upper portion of a maple leaf with a triangle underneath. The company name "MAPLE RIDGE ARMOURY" is usually observed on the right side of the logo. - "MAPLE RIDGE ARMOURY" is marked on both sides of the firearm.
Model	- Introduced in 2021. - Based on the "RENEGADE MARK 1" design. - "RENEGADE" is marked on the firearm in various places. - "MARK 2" is not marked on the firearm. - "RENEGADE MARK 2" is marketed as a improved version of the "RENEGADE MARK 1" with additional features including a bolt stop and a redesigned magazine well. - "RENEGADE MARK 2" upper and lower receivers are not compatible with the "RENEGADE MARK 1" upper and lower receivers. - "RENEGADE MARK 2" is a straight pull, spring assisted, bolt action rifle with a split receiver/frame design. - Features include: free floating handguard that may have integral top and bottom accessory rails and accessory anchor points on both sides; flat top upper assembly with integral accessory rail; grooved upper assembly for left or right side bolt handle; geometrical shape lightening cuts on the upper and lower receivers; flared magazine well; AR-15 type and location magazine release and ambidextrous safety lever; integral trigger guard. - May be sold as receiver kit only.
Manufacturer	- The company logo is marked on the firearm. - "MAPLE RIDGE ARMOURY" logo consists of the upper portion of a maple leaf with a triangle underneath. The company name "MAPLE RIDGE ARMOURY" is usually observed on the right side of the logo. - "MAPLE RIDGE ARMOURY" is marked on both sides of the firearm.
Action	- Straight-pull bolt operated.
Serial Number	- The serial number is marked on the left side of the receiver/frame.
Barrel	- The barrel length does not include any attached device such as flash-hider or muzzle brake.
Calibre	- "CALIBER MULTI" is marked on the left side of the receiver/frame.
Shots	- Detachable box magazine. - Designed to accept AR-15/M16 type magazines.
Canadian Law Comments	- The upper receiver of this firearm is the receiver/frame for all purposes of the Firearms Act and the Criminal Code of Canada. - In the case of this firearm, it has been determined that the component commonly referred to as the upper receiver assembly, into which the barrel is mounted and which contains the breech mechanism and upon which the manufacturer's identification, model identification, proof information, and the full serial number is marked, is the receiver/frame for the purposes stated within the Firearms Act and the Criminal Code of Canada.
Other Markings	- "30" may be marked on the left side of the receiver/frame.

Notes

Make

- "Marble's" and/or "Marble Arms & Manufacturing Company" and/or "Marble Arms & Mfg. Co." and/or "Marble Safety Axe Co." and/or "Marble Safety Axe Company" may be marked on the firearm.

Model

- model designation was not marked on early production firearms.
- later guns may be marked "Game Getter" or "Marble's Game Getter Gun".
- features include: two barrels in an over/under configuration, the top barrel is usually chambered in a rifle calibre and the bottom barrel is usually chambered in a shotgun calibre; normally found with a folding shoulder stock; hinged frame with a moveable trigger guard which opens the action.
- the "Game Getter" was produced in two variations, the first variant is commonly known as the "1908" model which was produced from 1908 to 1914, the second variant is referred to as the "1921" model, this designation represents the year of reintroduction and was manufactured from 1921 to 1935.
- the different versions are identifiable by serial number and by the shape of the receiver. Later versions have a shorter receiver with curved lines.

Manufacturer

- "MARBLE SAFETY AXE CO." or "MARBLE ARMS & MFG. CO." may be marked on the firearm.
- the Game Getter pistol was apparently designed by Webster L Marble, and was originally manufactured by the "Marble Safety Axe Company" of Gladstone, Michigan, U.S.A. This firm became the "Marble Arms & Manufacturing Company" in 1911.

Action

- over and under barrel configuration.

Serial Number

- serial numbering for the "1908" version began at 1,500 and continued to 9,999 and the "1921" version started at 10,001 and continued to 21,000.
- serial number is normally marked on water table (action must be open to see number).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- calibre designation is usually marked on right side.
- a version with two rifled barrels of the same calibre was also available.
- example observed marked: "22 Short, Long, Long Rifle" on the upper barrel and "44GG & 410 2 1/2" on the lower barrel.
- example observed marked: 22 S.L.L.R. & N.R.A on the upper barrel and 44GG & 410 2" on the lower barrel.
- example observed marked on the right side: CALIBERS-22&44.

Firearm Reference Number (FRN): 183982
Make: Marchand, Hubert
Model: Pocket Bulldog Type

Summary

Make:	Marchand, Hubert
Model:	Pocket Bulldog Type
Manufacturer:	Marchand, Hubert
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	BELGIUM
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
183982 - 1	5MM PIN-FIRE	6	46	Antique CC 84(1) "antique firearm" para. (b)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Hubert Marchand" is not usually marked on the firearm.
- "Hubert Marchand" was a manufacturer in Liege having deposited in 1875 a patent for a revolver system.
- "Hubert Marchand" was using the letter "HM" as trademark.
- "HM", "HM BVT" or "HM Breveté" is marked under the left grip panel on the receiver/frame.

Model

- model designation is derived from the characteristics of the firearm.
- "Pocket Bulldog Type" would have been made circa early 1880's to the early 1900's.
- "Pocket Bulldog Type" is a small solid receiver/frame, double-action revolver that shares the characteristics of the larger "Bulldog Type" revolvers, but is chambered for a smaller cartridge than is customarily seen in the full-size "Bulldog" handgun (i.e. less than .44 calibre); it has a shorter barrel and smaller receiver/frame size.
- features include: fixe front blade and grooved top strap rear sight; round or octagon barrel; solid receiver/frame; folding or full trigger with guard; bird's-head or square butt grip frame; plain, round or fluted cylinder; right side loading gate; exposed hammer; wood or synthetic grip panels; chrome or blue finish.

Manufacturer

- "Hubert Marchand" is not usually marked on the firearm.
- "Hubert Marchand" was a manufacturer in Liege having deposited in 1875 a patent for a revolver system.
- "Hubert Marchand" was using the letter "HM" as trademark.
- "HM", "HM BVT" or "HM Breveté" is marked under the left grip panel on the receiver/frame.

Action

- double/single action trigger mechanism.

Type:	Commercial Version
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
196760 - 1	7.62X54R RUSSIAN	5	545	Prohibited PFR, Part 1, para. 118	Manufacturer Specifications and Commercial Customization	

Notes

Make

- The company logo is marked on the receiver/frame.

Model

- The model designation is marked on the top of the receiver/frame.
- The CZ VZ59 is a semi-automatic belt fed firearm that resembles the VZ59 machine gun.
- Belt feed tray release latch located on top of receiver/frame.
- Safety lever located on left side of pistol grip.
- Overall length with a 1,215 mm (47.8 inches) barrel is 545.0 mm (21.5 inches), average weight is 9.28 kg (20.5 lbs).

Manufacturer

- The company logo is marked on the receiver/frame.
- Firearm is marked on the bottom front of the receiver/frame "MARCOLMAR FIREARMS RICHMOND, IN 7.62X54R".
- Marcolmar was founded by Dave Bane in Richmond, Indiana in 2007. Marcolmar is an FFL and a class II manufacture.

Type

- This is a commercial version of the Cz vz 59 General Purpose machine Gun

Action

- Gas operated.

Serial Number

- The serial number is marked in two locations, on the top rear section of the receiver/frame, and on the left side of the trigger group.

Barrel

- The barrel length does not include any attached device such as flash-hider or muzzle brake.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- The calibre designation is marked on the barrel assembly.
Shots	- Belt fed firearm. - This belt fed firearm being designed after 1945, is limited to the use of 5 rounds of ammunition on the metallic belt.
Canadian Law Comments	- This belt fed firearm being designed after 1945, is limited to the use of 5 rounds of ammunition on the metallic belt.
Remarks	- The CZ VZ59 uses a newly designed and manufactured receiver/frame and barrel, and cannot fit any of the major operating components of the VZ59, such as the fire control group or the bolt carrier assembly.

Notes

Make

- "MARIETTE BREVETE" or "MARIETTE BTE" is marked on the firearm.
- "MARIETTE BREVETE" translates to "Mariette's Patent".

Model

- manufactured prior to 1898.
- model designation is not marked on the firearm.
- Pepperbox" is derived from the characteristics of the firearm.
- features include: open top receiver/frame with fluted cylinder/barrel assembly; exposed hammer with or without a spur; blade, ring or folding trigger; single or double action trigger mechanism; hardwood or ivory grip plates.
- Mariette's pepperbox pistols were available as muzzle loaders with percussion ignition or breech loaders in pin-fire, rimfire and possibly centre fire cartridges.

Manufacturer

- "MARIETTE BREVETE" or "MARIETTE BTE" is marked on the firearm.
- "MARIETTE BREVETE" translates to "Mariette's Patent".
- "MARIETTE BREVETE" marking was use by Guillaume Mariette.
- Guillaume Mariette de Cheratte was located in Liege, Belgium.
- Guillaume Mariette has over twenty patents made under his name between 1839 and 1872.
- Guillaume Mariette was in business from 1839 up to his death in in 1860.

179342 - 1	9MM PIN-FIRE	6	163	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "MARIETTE BREVETE" or "MARIETTE BTE" is marked on the firearm.
- "MARIETTE BREVETE" translates to "Mariette's Patent".
- "MARIETTE BREVETE" marking was use by Guillaume Mariette.

Model

- model designation is derived from the characteristics of the firearm.
- "Pin-Fire Revolver" is of a Lefaucheux type with a patented loading/unloading system.
- "MARIETTE BREVETE" or "MARIETTE BTE" is marked on the firearm.
- "MARIETTE BREVETE" translates to "Mariette's Patent".
- "Mariette's Patent" system allowed the pistol to be easily broken down into three major components; the barrel, the cylinder and the receiver/frame. A long, heavy arbor pin projected from the recoil shield at the rear of the receiver/frame and passed through center of the cylinder. The barrel assembly was secured to the arbor pin via a heavy screw. A large thumbscrew on the bottom of the barrel lug allowed the screw to be easily tightened or loosened, as required. Once the barrel assembly was removed, the cylinder could be easily slid off the arbor pin to allow the insertion of fresh cartridges in the chambers, or the arbor pin could be used to eject the spent cartridges from the chambers.
- features include: round or octagonal barrel; rifled bore; dovetailed front sight; rear sight may be dovetailed, monoblock humped barrel block or a notch on the top of the hammer; open top receiver/frame; unfluted cylinder; trigger guard may have a finger hook; no loading gate; top notched circular recoil shield; capped wood grip with or without lanyard loop; engraved.

Notes

Make

- "MARINA" is marked on the left side of the slide and may be repeated on the grip plates.
- "Marina" was a trade name used by Gregorio Bolumburu of Spain.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "Automatic Pistol MARINA", "Pistolet Automatique MARINA" or a variation thereof is usually marked on the left side of the slide. - Gregorio Bolumburu was a Spanish firearms manufacturer located in Eibar, Spain, circa early 1900's until circa 1936. - blowback operated, semi-automatic pistol utilizing a detachable box magazine. - features include: rotating lever-type safety located on the left side of the receiver/frame above the trigger; magazine release button located on the bottom rear of the grip frame; black plastic grip plates with various designs which may include the name "MARINA" within the design; may have a lanyard ring mounted on the bottom rear left side of the grip frame and blued finish.
Manufacturer	- Gregorio Bolumburu was a Spanish firearms manufacturer located in Eibar, Spain, circa early 1900's until circa 1936. - the letters "GB" or "GB" within a circle may be marked on the slide and/or receiver/frame of Bolumburu firearms. - the Bolumburu name is not usually marked on this model.
Action	- blow back operated.
Serial Number	- serial number rationalization unknown. - observed specimen serial number consisted of a three digit number without prefix or suffix. - the serial number was found marked on the right side of the receiver/frame, underneath the grip plate on one example.
Calibre	- calibre designation is usually marked on the left side of the slide.
Shots	- detachable box magazine.
Other Markings	- the following markings have been noted on the left side of the slide of this firearm; - "AUTOMATIC PISTOL CAL. 6.35 MARINA", - "PISTOLET AUTOMATIQUE "MARINA" BREVETTE S.G.D.G. CAL. 6.35", - "CAL. 7.65 AUTOMATIC PISTOL MARINA ".

FRT Report

Firearm Reference Number (FRN): 125029
Make: Marksman
Model: 0035

Summary

Make:	Marksman
Model:	0035
Manufacturer:	Norica Farmi
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
125029 - 1	177 PELLET	1	451	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MARKSMAN 0035" was observed marked on the receiver/frame tube on the sample examined.
- "MARKSMAN PRODUCTS" was observed marked on the right side of the barrel breech on the sample examined.
- "Marksman Products" is a division of "S/R Industries".
- "Marksman Products" is a manufacturer and importer.
- "Marksman Products" was located in Huntington Beach, California, U.S.A. until 2010.
- "Marksman Products" moved to Santa Fe Springs, California, U.S.A.

Model

- "Marksman 0035" was marked on the receiver/frame tube on the sample examined.

Manufacturer

- manufacturer's name was not marked on the sample examined.
- "Made in Spain" was marked on the barrel block.

Serial Number

- serial number is marked on the left side of the barrel.
- observed serial number consisted of number "44", a dash (-), "1C", a dash (-), six numbers, a dash (-), and "00".
- Spanish government instituted a new system for firearm's serial numbering in 1995. This system incorporated the gunmaker/manufacturer code, weapon code, serial number sequence, and year of manufacturer.
- serial number break down: the first two numbers (44) are the code for Norica, the next number and letter (1C) are the code for an air carbine/rifle, the next six numbers are the serial number sequence, and the last two numbers (00) are the year of manufacture.

Calibre

- calibre designation is marked on the barrel hinge assembly.

Importer

- importer/distributor is marked on the right side.

Notes

Make

- "MARKSMAN" and the company logo are marked on the right side of the receiver/frame.

Model

- "MODEL 1792" is marked on the left side of the receiver/frame.
- "MODEL 1792" was introduced in 1993.
- features include: round rifled steel barrel; barrel break cocking; skeletonized biathlon/target style synthetic stock; tunnel front sight and target dioptre type sight; automatic safety; color stock and black metal finish.

Manufacturer

- "Marksman Products" is a division of "S/R Industries".
- "Marksman Products" is a manufacturer and importer.
- "Marksman Products" was located in Huntington Beach, California, U.S.A. until 2010.
- "Marksman Products" moved to Santa Fe Springs, California, U.S.A.

Action

- spring-piston powered, hinged barrel design.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is usually marked on the left side of the receiver/frame.
- observed serial number consisted of eight numbers without a letter prefix or suffix.

Calibre

- calibre is marked on the left side of the receiver/frame.
- calibre may also be marked on the barrel.

Notes

Make

- MARKSMAN is marked on the firearm in various places.
- Marksman Products originated with Morton Harris under business name "Morton H. Harris Inc.", and a simple spring piston handgun, circa 1955-1957.
- Marksman manufactured firearms until 2010.
- Marksman became a division of S/R Industries, which is not marked on the firearm.
- Marksman Products acquired, "Healthways", which produced airguns under the name "Plainsman".
- "Marksman Products" are known importers of the following: Milbro and Diana from Scotland; BSA from England; Weihrauch/BSF and Anschutz from Germany.

Model

- Introduced in 2020.
- The model designation is marked on the left side of the receiver/frame.
- Trade name used by S/R Industries & Singapore Airgun Company.
- Features include: break-barrel loading receiver/frame; rear top mounted receiver/frame safety switch/toggle.

Manufacturer

- The manufacturer is not marked on the firearm.
- The working address for Beeman Precision Airguns and Marksman Products in the United States of America, are the same at Bloomfield Avenue, Sante Fe Springs.
- "Beeman's Precision Airguns" was a company created by Robert and Tosiko Beeman, located in San Anselmo, circa 1972.
- The name changed to "Beeman Precision Airguns", circa 1975, when the company moved to San Rafael.
- The company was mostly sold by the owners to "S/R Industries" of Maryland, circa 1993.
- In 2009, the Beeman brand was split and sold to the "Singapore Airgun Company", along with the rights to Marksman airguns and some Beeman Precision Airguns.
- Beeman Precision Airguns are known importers of the following: Weihrauch, Feinwerkbau, Webley, Dianawerk, Handler & Natermann, Hasuike and other overseas manufacturers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- Velocities have been reported as 183 mps/600 fps and 244 mps/800 fps.

Serial Number

- The serial number is marked on the left side of the receiver/frame.
- The serial number rationalization is unknown.
- Observed sample consisted of twelve (12) numbers followed by two letter suffix.

Canadian Law Comments

- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada.

If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

Notes

Make

- "Marksman" is marked on the firearm in various places.
- Marksman manufactured firearms until 2010.
- Marksman is currently a division of S/R Industries.

Model

- "2066LVC" is marked on top of the barrel.
- "2066LVC" is marked on the left side of the barrel.
- The Marksman 2066LVC is similar to the Marksman 2066 but features a lower muzzle velocity and no integral sound suppressor.
- Features include: Round, blued, reverse-tapered barrel; hooded fibre optic front sight and notch rear sight; accessory rail above the tubular receiver/frame; safety button on the rear left of the receiver/frame.

Manufacturer

- Trade name used by "S/R Industries Inc.".

Action

- Compressed air piston.
- Hinged barrel design.
- Velocity is reported 151 mps or 495 fps.
- Velocity has been measured as 129.9 mps or 426.2 fps.

Serial Number

- The serial number is marked on the left side of the firearm.

Calibre

- "Cal.4.5 (.177)" is marked on the left side of the barrel.

Canadian Law Comments

- Does not discharge a projectile at a muzzle velocity exceeding 152.4 mps and/or a muzzle energy exceeding 5.7 Joules.
- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of Prohibited Device in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada.

If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a CC 2 "firearm"/CC 84(3) Exempted firearm. NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed."

Firearm Reference Number (FRN): 195641
Make: Marksman
Model: 2070

Summary

Make:	Marksman
Model:	2070
Manufacturer:	
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	CHINA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
195641 - 1	177 PELLET	1	473	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MARKSMAN" with the Marksman target logo was observed on both sides of the receiver/frame housing.
- "MARKSMAN PRODUCTS" over "SANTA FE SPRINGS, CALIFORNIA USA" was observed on the right side of the receiver frame with the user warning.

Model

- "MODEL 2070" was observed on the left side of the receiver/frame.
- this is a single shot, break barrel, spring piston air rifle.
- features include: round, rifled steel barrel; fiber optic sights; grooved receiver/frame for scope mount; automatic-engaging cross bolt safety; synthetic stock with raised cheek piece and rubber butt pad; black finish.
- overall length 1136.65mm (44.75"), weight 5.65 lbs(2.52 kg).

Action

- break barrel, spring piston powered.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number was observed on the receiver/frame.
- observed serial number consisted of eleven digits with no letter prefix or suffix.

Calibre

- calibre designation was marked on the left side of the receiver/frame.

Canadian Law Comments

- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

81292 - 3	177 PELLET	1	348	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Non-Commercial Customization	

Notes

Make

- "MARLA" over the serial number was observed marked on the left side of barrel hinge, on one sample.
- "Made in Hungary" over the "serial number" over "MARLA" was observed marked on the left side of barrel hinge, on one sample.

Model

- "MARLA" over the "serial number" was observed marked on the left side of barrel hinge, on one sample.
- "Made in Hungary" over the "serial number" over "MARLA" was observed marked on the left side of barrel hinge, on one sample.
- this is a break-barrel spring-piston design rifle.
- features may include: round barrel with adjustable sights; round tubular receiver/frame; stamped trigger guard with access to allow the trigger mechanism to be adjusted; one piece beechwood semi-pistol grip stock with sculpted cheekpiece.

Action

- break-barrel spring-piston design.
- at least two variants of this particular model exist:

Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number rationalization is unknown.
- serial number was observed marked on the left side of the barrel hinge.
- observed serial number consisted of five or six numbers without a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- velocity testing may be required to determine which variant is being observed.
- at least two variants of this particular model exist:

Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

Notes

Make

- "MARLA SILAH" is marked on the left side of the receiver/frame.
- "MARLA SILAH SANAYI" may be marked on the barrel or other components.
- "MADE BY EUROPA STELLA" may be marked on the firearm and the history of Europa Stella is not known.
- "Huglu Turkey" is marked on the receiver/frame.

Model

- model designation is not marked on the firearm.
- model designation defines the firearm's operating action type.
- features include: round tapered steel barrel; fibre optic, ramped front and adjustable rear sight mounted on the barrel; aluminum receiver/frame with left side hinging cylinder; receiver/frame, left side mounted, push type cylinder release; double action trigger mechanism; spurred hammer; checkered walnut wood forend and pistol grip shoulder stock with black rubber pad; black finish.
- overall length with a 610mm (24") barrel is 1060mm (41.7") and average weight is 2.65 kg (5.8 lbs).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the receiver/frame. - observed serial number consisted of two numbers followed by a letter, "R", followed by five numbers. - serial number rationalization is not know. - note: any numbers found on the barrel are not considered the serial number, example: "NDB 36.76 TS 870 3".
Calibre	- calibre may be marked on the firearm. - calibre designation is usually marked on the barrel. - calibre designation on a referenced example was not marked on the firearm.
Canadian Law Comments	- CC 84 (2) a: Barrel length = (2) For the purposes of this Part, the length of a barrel of a firearm is; (a) in the case of a revolver, the distance from the muzzle of the barrel to the breach end immediately in front of the cylinder,

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
1465 - 1	22 LR	1	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Marlin" is marked on the barrel.
- "J.M. Marlin", "Marlin", "Marlin Safety", "Marlin Firearms Co.", "Marlin Fire-Arms Co.", "Marlin Fire Arms Co.", "Marlin-Rockwell Corp.", "The Marlin Firearms Co.", and "The Marlin Firearms Corporation" are some of the trade names/trademarks observed on firearms manufactured by Marlin and Marlin Rockwell Corporation.
- Marlin firearms were manufactured in the U.S.A. at NEW HAVEN, CONNECTICUT from 1870 to 1969, and NORTH HAVEN, CONNECTICUT from 1969 to 2011.
- Marlin firearms which are marked "THE MARLIN FIREARMS CO." and "ILION, NEW YORK, U.S.A." or "MAYFIELD, KY, U.S.A." are manufactured by Remington.

Model

- the model 100 was produced between 1935 and 1959/60 in three distinct variations. It was available in "standard" model 100 configuration with a barrel mounted rear sight, as the model 100S "Tom Mix Special" with target sights or with a smooth (no rifling) bore as the model 100SB.
- the model 100 series differed from the earlier model 65 in that the bolt handle and the loading /ejection port used the same receiver/frame cutout (the model 65 had a separate cutout for the bolt and loading port).
- model 100 features include: birch (early production) or walnut (late production) one-piece stock; blued finish on receiver/frame and barrel, chrome plated bolt, bolt handle and trigger; sheet steel (early production) or plastic (late production) trigger guard; cocking knob must be manually retracted to cock; barrel mounted rear sight with a dovetailed blade front sight with a brass bead; Ballard (early production) or Micro-Groove® rifling.
- the model 100S "Tom Mix Special" was introduced in 1937 and was meant to capitalize on the fame of Tom Mix, a well-known cowboy actor of the era. The model 100S was only available for a limited time as Tom Mix was killed unexpectedly in an automobile accident in 1940. The 100S was the same as the model 100 but featured a receiver/frame that was drilled and tapped for scope mounts, a receiver/frame mounted rear peep sight with a hooded front sight and a sling.
- the model 100SB was introduced circa 1941. This variation had a smooth bore barrel that was intended for use with calibre 22 LR ammunition loaded as a "shot" cartridge.

Action

- turn-bolt design.

26790 - 2	22 LR	1	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Marlin" is marked on the barrel.
- "J.M. Marlin", "Marlin", "Marlin Safety", "Marlin Firearms Co.", "Marlin Fire-Arms Co.", "Marlin Fire Arms Co.", "Marlin-Rockwell Corp.", "The Marlin Firearms Co.", and "The Marlin Firearms Corporation" are some of the trade names/trademarks observed on firearms manufactured by Marlin and Marlin Rockwell Corporation.
- Marlin firearms were manufactured in the U.S.A. at NEW HAVEN, CONNECTICUT from 1870 to 1969, and NORTH HAVEN, CONNECTICUT from 1969 to 2011.
- Marlin firearms which are marked "THE MARLIN FIREARMS CO." and "ILION, NEW YORK, U.S.A." or "MAYFIELD, KY, U.S.A." are manufactured by Remington.

Model

- much confusion surrounds the history of model 101 and its variants. Reference sources conflict when stating dates of manufacture for the model 101. Most authoritative sources place the introduction of the model 101 as 1940/1 with production halting when the United States entered into World War II. Production was resumed in 1945 but the model 101 was again dropped in 1946. In 1951 the model 101 was resurrected yet again and production continued until its final demise in 1977. The model 101 went through many design changes throughout its history and was offered in at least four variations.
- prior to 1960 all variations featured a smooth cocking knob, between 1960 and 1966 the cocking knob was a large ring (reminiscent of the Swiss made Schmidt-Rubin rifle), from 1966 to the end of production the cocking knob was in a "T" shape.
- features of the standard model 101 included: blued finish; walnut, one-piece stock with a straight (early production) or Monte Carlo style (from about 1959/60) comb; barrel mounted semi-buckhorn (folding on later production) rear sight and a blade with brass bead (early), ramp style blade or hooded blade front sight; receiver/frame is grooved for scope mounts; flush fit take-down screw.
- the model 101DL was offered in 1941 and 1945 as an enhanced version of the model 101 with a receiver/frame mounted rear peep sight and a hooded ramp front sight.
- the model 101 was also available with a smooth-bore barrel (no rifling) as the model 101SB in 1940 and 1941, intended for use with calibre 22 LR ammunition loaded with "shot".
- in 1959 Marlin offered the model "101 Crown Prince" which was a deluxe version of the standard model 101. The "Crown Prince" version shared the same features as the model 101 but came equipped with a 4-power Marlin Micro-Vue telescopic sight and was packaged in a carry-case cardboard box that included a tube of Marlin Rustopper, a wild game map, a Marlin "target and game" record book and 50 assorted targets.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- turn-bolt operated.
Serial Number	- samples produced prior to 1968 were not numbered.
Barrel	- very early production used a 610mm barrel, later examples had a 559mm barrel. - early barrels used Ballard type rifling, later production (1959/60) used Marlin Micro-Groove® rifling.

Marlin", "Marlin", "Marlin Safety", "Marlin Firearms Co.", "Marlin Fire-Arms Co.", "Marlin Fire Arms Co.", "Marlin-Rockwell Corp.", "The Marlin Firearms Co.", and "The Marlin Firearms Corporation" are some of the trade names/trademarks observed on firearms manufactured by Marlin and Marlin Rockwell Corporation.
- Marlin firearms were manufactured in the U.S.A. at NEW HAVEN, CONNECTICUT from 1870 to 1969, and NORTH HAVEN, CONNECTICUT from 1969 to 2011.
- Marlin firearms which are marked "THE MARLIN FIREARMS CO." and "ILION, NEW YORK, U.S.A." or "MAYFIELD, KY, U.S.A." are manufactured by Remington.

Model

- much confusion surrounds the history of model 101 and its variants. Reference sources conflict when stating dates of manufacture for the model 101. Most authoritative sources place the introduction of the model 101 as 1940/1 with production halting when the United States entered into World War II. Production was resumed in 1945 but the model 101 was again dropped in 1946. In 1951 the model 101 was resurrected yet again and production continued until its final demise in 1977. The model 101 went through many design changes throughout its history and was offered in at least four variations.
- prior to 1960 all variations featured a smooth cocking knob, between 1960 and 1966 the cocking knob was a large ring (reminiscent of the Swiss made Schmidt-Rubin rifle), from 1966 to the end of production the cocking knob was in a "T" shape.
- features of the standard model 101 included: blued finish; walnut, one-piece stock with a straight (early production) or Monte Carlo style (from about 1959/60) comb; barrel mounted semi-buckhorn (folding on later production) rear sight and a blade with brass bead (early), ramp style blade or hooded blade front sight; receiver/frame is grooved for scope mounts; flush fit take-down screw.
- the model 101DL was offered in 1941 and 1945 as an enhanced version of the model 101 with a receiver/frame mounted rear peep sight and a hooded ramp front sight.
- the model 101 was also available with a smooth-bore barrel (no rifling) as the model 101SB in 1940 and 1941, intended for use with calibre 22 LR ammunition loaded with "shot".
- in 1959 Marlin offered the model "101 Crown Prince" which was a deluxe version of the standard model 101. The "Crown Prince" version shared the same features as the model 101 but came equipped with a 4-power Marlin Micro-Vue telescopic sight and was packaged in a carry-case cardboard box that included a tube of Marlin Rustopper, a wild game map, a Marlin "target and game" record book and 50 assorted targets.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action - turn-bolt operated.

Barrel - very early production used a 610mm barrel, later examples had a 559mm barrel.
