- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Model

- model designation is not marked on this firearm.
- this rifle is basically an identical copy of the German 98K Mauser as made for the Israeli Government by FN circa early 1950's.
- features include: Mauser action; turn bolt operated; single shot only; scalloped recess in the stock under the turned down bolt handle; sling cut out in the buttstock; large front barrel band with an integral sling loop on the left side; tangent rear sight; may have a protective hood over the front sight; blued finish.

Manufacturer

- known example had the FN name marked on the left side of the receiver/frame as, "FAB.NAT.D'ARMES DE GUERRE HERSTAL-BELGIQUE".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- turn bolt operated.
Serial Number	- serial number is usually marked on the right side of the receiver ring. - known example had a four digit number without prefix or suffix.
Calibre	- known example had the calibre designation marked on the right side of the butt stock as, "0.22".
Other Markings	- the Israeli National Crest is marked on the top of the receiver ring. - Belgian proof marks are apparent on the barrel and/or receiver/frame.

Notes

Make

- "MAUSER" is not marked on the firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model designation does not appear on the firearm however the original model designation appears on the left side of the receiver/frame. - marked in Norwegian on a milled flat along the left side of the receiver ring: "HAER" (Army) or: "FLYs" (Airforce). - these rifles are reworked German Military rifles, model Karbiner 98 kurtz (K 98k), that have been modified to handle the current cartridge of the Norwegian Armed Forces, 30-06 SPRG or 7.62 NATO ammunition. (to accommodate clip loading of the longer 30-06 SPRG cartridge, a semi-circular notch has been put in the rear of the receiver ring.) - the receiver/frames utilize the Mauser M98 configuration, and may be variously marked with German Military manufacturers' names or codes, or any of Belgian (M24), Czechoslovakian (VZ24), Yugoslav (M24), or Polish (29/40) markings. The original manufacturer's markings and model designation were not removed during the refurbishing process.
Manufacturer	- the manufacturer's (refurbisher's) name does not appear on the firearm.
Serial Number	- appears on the left side of the receiver ring with the abbreviation "HAER" (army) or "FLYS" (airforce). - observed examples consisted of five digits.
Calibre	- the calibre designation appears on the breech of the barrel as "KAL 7.62mm".
Shots	- flush integral box magazine.
Other Markings	- original manufacturer's markings appear on the receiver ring.
Remarks	- this is nothing more than a refurbished and rebarreled (from 8MM MAUSER to 30-06 SPRG or 7.62MM NATO) World War II, German 98 K Carbine.

Notes

Make

- "MAUSER" is marked on top of the barrel.
- The company logo is marked on the receiver/frame.

Model

- Introduced in 2016.
- "AM03" is marked on top of the barrel.
- Features include: steel break barrel receiver/frame with front and rear sights; one-piece, adjustable cheek-piece, synthetic stock which comes in variety of colour options.
- Overall length with a 495 mm (19.5 inches) barrel is 1160 mm (45.7 inches), average weight is 3.6 kg (7.9 lbs).

Manufacturer

- The manufacturer is not marked on the firearm.

Action

- Break open action.

Serial Number

- The serial number is usually marked on the left side of the receiver/frame.
- The serial number rationalization is unknown.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- The calibre designation is usually marked on the barrel.

Canadian Law Comments

- Discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.
- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada.

If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- introduced in 1955. - this is a true single shot action, with a solid bottom receiver, less any magazine-well cuts. The trigger guard was made with a long foward strap or tang through which the front guard screw is utilised. - this was sold as an action only and can be found in a variety of caliber/barrel length/stock configurations that the customer wished.
Action	- bolt operated.
Serial Number	- serial number rationalization unknown, but four numerical digits observed.
Barrel	- can be found in a variety of barrel lengths, and contours.
Calibre	- can be found in a variety of calibres, including "wildcats".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make	- "MAUSER", "SYSTEM MAUSER", or "WAFFENFABRIK MAUSER" is usually marked on the firearm.
Model	- manufactured from 1896 to 1936. - "C96 Broomhandle" is not marked on the firearm. - "C96" is derived from the abbreviation for "Construction 1896" - "Broomhandle" is derived for the popular name for the tubular-shaped grip. - "C96 Broomhandle" is unlike most semi-automatic pistols, the magazine is not inserted into the grip, but is located forward of the trigger. - "C96 Broomhandle" reloading is via a "charger clip". - "C96 Broomhandle" pistols, the original versions were "Safe" when the safety lever was down. - "C96 Broomhandle" pistols, later versions, this is reversed and the pistol is on "Safe" when the safety lever is up. These new safeties can be recognised by the intertwined letters "NS" engraved on the safety lever. This represents "Neues Sicherung" (New Safety).
Manufacturer	- "WAFFENFABRIK MAUSER" and "OBERNDORF A/N" was observed marked on the barrel. - "WAFFENFABRIK MAUSER" and "OBERNDORF A NECKAR" was observed marked on the side of the receiver/frame.
Serial Number	- serialization started at 1 and continued, skipping entire number blocks. An exception to this are "contract" pistols. - the full serial number will be found stamped on any one or combination of the following locations: the left side of the barrel ahead of the ejection port, the top of the rear grip strap and/or the bottom of the magazine floor plate. - it is possible to have serial number duplication in this family of firearms.
Shots	- integral box magazine. - detachable box magazine was introduced in 1930.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- make is not marked on the firearm.

Model

- introduced in 2014.
- "WAFFENFABRICK" over "C96" is marked on the right side of the firearm.
- this is a very detailed air-pistol version of the original Mauser C96 Broomhandle semi-automatic handgun replicating both the size and weight of the original model.
- "C96" is derived from the abbreviation for "Construction 1896"
- "Broomhandle" is derived for the popular name for the tubular-shaped grip.
- features include: fixed front sight and adjustable rear sight; magazine housing is part of the trigger guard; safety on the left side; magazine release button on the right side; ring hammer; lanyard ring.
- overall length is 292mm (11 1/2"), weight is 793gr (1.75lb).

Manufacturer

- may be marked on the firearm.

Action

- CO2 powered.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Calibre

- calibre is marked on the right side of the firearm.

Shots

- detachable box magazine.

Notes

Make

- the make designation is marked on the top of the receiver/frame as:
"WAFFENFABRIK" over "MAUSER" over "OBERNDORF A/N".

Model

- C96 Broomhandle models were manufactured from 1896 to 1936.
- Flatside, Slab Side or Slab-Side was introduced in 1899.
- the "flatside" describes this Model variant. Instead of the usual machined recessed panels on the sides of the frame, the frame is manufactured with completely flat sides.
- may also be known as "Slab-side".

Manufacturer

- the manufactuer designation is marked on the top of the receiver/frame as:
"WAFFENFABRIK" over "MAUSER" over "OBERNDORF A/N".

Serial Number

- will be below 1000 for the early production and between 20000 and 30000 for the standard production.

Notes

Model

- C96 Broomhandle models were manufactured from 1896 to 1936.
- C96 Broomhandle 1930 was manufactured from 1930 to 1936.
- available with or without a removable magazine.
- the 1930 is more of a collectors variant than an official factory designation. These pistols normally display the MAUSER trademark "banner" on the left side of the receiver/frame, usually in the rear-most recessed panel.

Serial Number

- some specimens may have the complete serial number marked on barrel assembly only.
- there is also a possibilty that some specimens will have a partial or complete serial number marked on top front of receiver, only visible when firearm is disassembled.
- Range: from approximately 730000 to 900000.

Shots

- internal magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make	- the make designation is marked on the right side of the receiver/frame as "WAFFENFABRIK MAUSER" over "OBERNDORF a NECKAR" and over the chamber as "WAFFENFABRIK" over "MAUSER" over "OBERNDORF A/N" or a variation thereof.
Model	- model designation is not marked on the firearm. - C96 Broomhandle models were manufactured from 1896 to 1936. - manufactured pre World War I and manufactured after World War I from 1920 to the 1930s to meet the requirements of the Russians and various police agencies. The Versailles Treaty forbade the manufacture of small arms in calibre 9MM or with barrel lengths greater than 100mm. - the model derives its name from the word "Bolshevik", hence "Bolo". - features include: large or small ring hammer; wood or plastic squared grip panels (smaller than the standard C96); lanyard ring; ladder type adjustable rear sight graduated from 50 to 1000 meters; shoulder stock slot at rear of grip and blued finish.
Manufacturer	- the manufacturer's name and address are marked on the right side of the receiver/frame as "WAFFENFABRIK MAUSER" over "OBERNDORF a NECKAR".
Action	- recoil operated.
Serial Number	- the serial number is located on the rear of the receiver/frame below the hammer and above the grip and is repeated on the upper assembly and on the left side of the slide/barrel at the breech. - the serial number ranges are from approximately "29,000 to 44,000" and "440,000 to 800,000".
Shots	- top loading, internal box magazine.

Notes

Make - "SYSTEM MAUSER", or "WAFFENFABRIK MAUSER" is usually marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- Model designation is not marked on the firearm. - Manufactured from 1896 to circa 1900. - This pistol derives its name from the abbreviation for "Construction 1896" - hence "C96". The popular name of "broomhandle" is due to its almost tubular-shaped grip. - "Conehammer" refers to the consecutive stacked ring construction of the grasping grooves on the hammer. Later versions incorporated a "Large Ring" hammer and later a "Small Ring" hammer. - Unlike most semi-automatic pistols, the magazine is not inserted into the grip, but is located forward of the trigger. - Reloading is via a "charger clip". - The original pistols were "Safe" when the lever was down. On later pistols this is reversed and the pistol is on "Safe" when the lever is up. These new safeties can be recognised by the intertwined letters "NS" engraved on the safety lever. This represents "Neues Sicherung" (New Safety).
Manufacturer	- "WAFFENFABRIK MAUSER" and "OBENDORF A/N" may be marked on the barrel. - "WAFFENFABRIK MAUSER" and "OBENDORF A NECKAR" may be marked on the left side of the receiver/frame.
Action	- Recoil operated.
Serial Number	- Serialization started in the low three digits and continued to five digits skipping entire number blocks. An exception to this are "contract" pistols. - The full serial number will be found stamped on any one or combination of the following locations: the left side of the barrel ahead of the ejection port, the top of the rear grip strap and/or the bottom of the magazine floor plate, on the hammer assembly and internally on the side of the follower or on the top of the receiver/frame under the barrel assembly. - Possible to have serial number duplication in this family of firearms.
Shots	- fixed box magazine.
Canadian Law Comments	- Some examples of this model, when manufactured prior to 1898 may be considered Antique in Canada.
Other Markings	- "NOT ENGLISH MAKE" was marked on the right side of the barrel assembly of an observed example.

25331 - 4	45 AUTO	10	159	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is not marked on the firearm.

Model

- model designation is not marked on the firearm.
- up to 8000 units produced between 1925 and 1932.
- characterized by Chinese markings on both left and right rear sides of the receiver/frame. Markings will usually indicate the manufacturer and the date of production.
- the overall dimensions are larger than the standard C96 model in order to accommodate the larger calibre.
- this pistol derives its name from the abbreviation for "Construction 1896", hence "C96". The popular name of "broomhandle" is due to the odd shape of the grip.
- unlike most semi-automatic pistols, the magazine is not inserted into the grip, but is located forward of the trigger.
- reloading is via a top loading "charger clip" but a box magazine may be encountered.
- other features include: blued finish; tapered upper barrel assembly; stepped, block front sight and adjustable tangent rear sight; manual lever safety located at the left rear of the receiver/frame; small ring, exposed hammer; horizontally ringed wooden grips; lanyard ring.
- may be encountered with a wood, combination shoulder stock/holster.

Manufacturer

- arsenal may be marked on the side of the receiver/frame in Chinese characters.
- the Shansei and Hanyang arsenals produced copies of the Mauser C96 either under contract or for commercial sales.

Action

- recoil operated.

Serial Number

- serial number is usually marked on the left side of the barrel and/or barrel extension in either English or Chinese characters.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - internal box magazine located forward of the trigger.

Notes

Make

- "MAUSER", "WAFFENFABRIK MAUSER", "OBERNDORF A/N" and/or "OBERNDORF A NECKAR" is usually marked on the firearm.
- "MAUSER" logo is usually marked on the receiver/frame.
- "C96 Broomhandle Copy" made in China generally have wrongful spelling, inverted letter and/or irregular font size in their markings.

Model

- The model designation is not marked on the firearm.
- "C96 Broomhandle Copy" stands for "Construktion 1896" and "Broomhandle" after its rounded wood grip panels that resembled a broom handle end.
- "C96 Broomhandle Copy" of this listing has no Chinese marking on the firearm.
- "C96 Broomhandle Copy" made in China usually have wrongful spelling, inverted letter in their markings.
- "C96 Broomhandle" in China was nicknamed the "Box Cannon" because of its rectangular internal magazine and it could be holstered in its wooden box-like detachable stock.
- Features include: inverted "V" front with an adjustable "V" notch tangent rear with graduations out to 1,000 meters; top loading magazine by single round or by using stripper clip; manual lever safety located at the left rear of the receiver/frame; small ring, exposed hammer; horizontally ringed wooden grips; lanyard ring.

Manufacturer

- The manufacturer is not marked on the firearm.

Action

- Recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- The serial number is marked on top of the rear grip strap.
- The serial number on some examples were not marked on top of the rear grip strap.
- The serial number is repeated on the left side of the barrel ahead of the ejection port.
- The serial number is also completely or partially repeated on a multitude of parts.

Calibre

- The calibre designation is not marked on the firearm.

Shots

- Integral box magazine

Notes

Make

- "MAUSER" logo is usually marked on the left side of the receiver/frame.
- "WAFFENFABRIK MAUSER", "OBERNDORF A. NECKAR" or "WAFFENFABRIK MAUSER", "OBERNDORF A. NECKAR" and "D.R.P.u.A.P." is usually marked on the right side of the receiver/frame.
- "WAFFENFABRIK MAUSER OBERNDORF A/N" is usually marked on the upper barrel flat.

Model

- model designation is not marked on the firearm.
- MAUSER developed a selective-fire model of the "C96", circa 1930.
- C96 Broomhandle Schnellfeuer/Reihenfeuer was in response to the popularity of such look-alikes as the ASTRA and ROYAL pistols.
- Mauser's first patent for the C96 Broomhandle Schnellfeuer pistol was applied for in Germany on November 5th, 1930 by Josef Nickl.
- Mauser's second patent for the C96 Broomhandle Schnellfeuer pistol was applied for in Germany on April 13th, 1932 by Karl Westinger.
- C96 Broomhandle Schnellfeuer is easily identified by the selective-fire lever on the left side of the receiver/frame.
- "N" denotes semi-automatic, "R" denotes full automatic.
- C96 Broomhandle Schnellfeuer was originally available with a fixed/integral box magazine and then with a removeable box magazine.
- C96 Broomhandle Schnellfeuer with fixed box magazine may be known as the C96 Broomhandle 1930 Schnellfeuer.
- C96 Broomhandle Schnellfeuer with detachable box magazine may be known as the C96 Broomhandle 1932 Schnellfeuer.
- C96 Broomhandle 1932 Schnellfeuer were sold in North America by Stoeger as the "Model 712".
- C96 Broomhandle Schnellfeur is sometimes found with Chinese characters.
- crude Chinese copies were also made.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "MAUSER" logo is usually marked on the left side of the receiver/frame. - "WAFFENFABRIK MAUSER", "OBERNDORF A. NECKAR" or "WAFFENFABRIK MAUSER", "OBERNDORF A. NECKAR" and "D.R.P.u.A.P." is usually marked on the right side of the receiver/frame. - "WAFFENFABRIK MAUSER OBERNDORF A/N" is usually marked on the upper barrel flat.
Action	- no longer capable of full automatic fire.
Serial Number	- serial number rationalization unknown. - contracts for differing nations and organizations are reported to have had their own serial number rationalizations resulting in duplications of serial numbers. - a partial serial number is marked on top front of receiver/frame, in front of the magazine well but is not visible unless firearm is disassembled. - partial serial numbers may be found marked on several other componants.
Shots	- 10 shot fixed/integral box magazine, or - 10 or 20 shot detachable box magazine.
Canadian Law Comments	- CC PART III, S. 84, Regulations appended thereto: - PART 4 "Prohibited Devices"; Paragraph 3.; "The Former Cartridge Magazine Control Regulations"; - (1) Any Cartridge Magazine - (a) that is capable of containing more than five cartridges of the type for which the magazine was originally designed and that is designed or manufactured for use in - (2) Paragraph (1) (a) does not include any cartridge magazine that - (c) was originally designed or manufactured as an integral part of the firearm known as the Mauser Selbstladepistole C96 ("broomhandle"), or any variant or modified version of it; including the model 1895, Model 1896, Model 1902, Model 1905, Model 1915, Model 1930, Model 1931, M711 and M712 or
Other Markings	- a partial serial number is marked on top front of receiver/frame, in front of the magazine well but is not visible unless firearm is disassembled.
Remarks	- C96 Broomhandle Schnellfeuer is easily identified by the selective-fire lever on the left side of the receiver/frame. - "N" denotes semi-automatic, "R" denotes full automatic.

Notes

Make

- "MAUSER" logo is usually marked on the left side of the receiver/frame.
- "WAFFENFABRIK MAUSER", "OBERNDORF A. NECKAR" and "D.R.P.u.A.P." is usually marked on the right side of the receiver/frame.
- "WAFFENFABRIK MAUSER OBERNDORF A/N" is usually marked on the upper barrel flat.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- model designation is not marked on the firearm. - MAUSER developed a selective-fire model of the "C96", circa 1930. - C96 Broomhandle Schnellfeuer/Reihenfeuer was in response to the popularity of such look-alikes as the ASTRA and ROYAL pistols. - Mauser's first patent for the C96 Broomhandle Schnellfeuer pistol was applied for in Germany on November 5th, 1930 by Josef Nickl. - Mauser's second patent for the C96 Broomhandle Schnellfeuer pistol was applied for in Germany on April 13th, 1932 by Karl Westinger. - C96 Broomhandle Schnellfeuer is easily identified by the selective-fire lever on the left side of the receiver/frame. - "N" denotes semi-automatic, "R" denotes full automatic. - C96 Broomhandle Schnellfeuer was originally available with a fixed/integral box magazine and then with a removeable box magazine. - C96 Broomhandle Schnellfeuer with fixed box magazine may be known as the C96 Broomhandle 1930 Schnellfeuer. - C96 Broomhandle Schnellfeuer with detachable box magazine may be known as the C96 Broomhandle 1932 Schnellfeuer. - C96 Broomhandle 1932 Schnellfeuer were sold in North America by Stoeger as the "Model 712". - C96 Broomhandle Schnellfeur is sometimes found with Chinese characters. - crude Chinese copies were also made.
Manufacturer	- "MAUSER" logo is usually marked on the left side of the receiver/frame. - "WAFFENFABRIK MAUSER", "OBERNDORF A. NECKAR" or "WAFFENFABRIK MAUSER", "OBERNDORF A. NECKAR" and "D.R.P.u.A.P." is usually marked on the right side of the receiver/frame. - "WAFFENFABRIK MAUSER OBERNDORF A/N" is usually marked on the upper barrel flat.
Action	- recoil operated.
Serial Number	- serial number rationalization unknown. - contracts for differing nations and organizations are reported to have had their own serial number rationalizations resulting in duplications of serial numbers. - a partial serial number is marked on top front of receiver/frame, in front of the magazine well but is not visible unless firearm is disassembled. - partial serial numbers may be found marked on several other componants.
Shots	- 10 shot fixed/integral box magazine, or - 10 or 20 shot detachable box magazine.
Canadian Law Comments	- CC PART III, S. 84, Regulations appended thereto: - PART 4 "Prohibited Devices"; Paragraph 3.; "The Former Cartridge Magazine Control Regulations"; - (1) Any Cartridge Magazine - (a) that is capable of containing more than five cartridges of the type for which the magazine was originally designed and that is designed or manufactured for use in - (2) Paragraph (1) (a) does not include any cartridge magazine that - (c) was originally designed or manufactured as an integral part of the firearm known as the Mauser Selbstladepistole C96 ("broomhandle"), or any variant or modified version of it; including the model 1895, Model 1896, Model 1902, Model 1905, Model 1915, Model 1930, Model 1931, M711 and M712 or
Other Markings	- a partial serial number is marked on top front of receiver/frame, in front of the magazine well but is not visible unless firearm is disassembled.
Remarks	- C96 Broomhandle Schnellfeuer is easily identified by the selective-fire lever on the left side of the receiver/frame. - "N" denotes semi-automatic, "R" denotes full automatic.

147284 - 2	7.63MM MAUSER	10	368	Restricted CC 84(1) "restricted firearm" para. (b)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SYSTEM MAUSER", or "WAFFENFABRIK MAUSER" is usually marked on the firearm.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this record is ONLY for specific versions of the C96 Carbine made with either a full rifle stock (where the barrelled action drops into the stock, as with other rifle actions), or where the receiver/frame is slotted horizontally, in order to allow a detachable shoulder-stock/holster to be slid onto the frame from the rear; this second version is NOT to be confused with the more common "broomhandle" style of pistol, where a slot in the backstrap of the pistol will accept a detachable shoulder-stock/holster. In the rifle version of this firearm, the entire "broomhandle" shape of the grip is milled away, leaving a horizontal T-shaped lug that matches up to a horizontal slot in the grip-frame attached to the stock.
- features include: blued finish; open adjustable sights; either a full rifle-style stock (less common), or a two-piece stock with an L-shaped forearm and a detachable buttstock that resembles the "broomhandle" stock, but slides horizontally onto the bottom of the grip-frame.

Manufacturer

- "WAFFENFABRIK MAUSER" and "OBENDORF A/N" may be marked on the barrel.
- "WAFFENFABRIK MAUSER" and "OBENDORF A NECKAR" may be marked on the left side of the receiver/frame.

Action

- recoil-operated.

Serial Number

- numbered on the receiver/frame.

Shots

- fixed internal box magazine, fed via stripper clips.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

28908 - 3	7.63MM MAUSER	10	413	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SYSTEM MAUSER", or "WAFFENFABRIK MAUSER" is usually marked on the firearm.

Model

- this is an extremely rare version of the 1896 Mauser "Broomhandle" pistol.
- MAUSER manufactured a large number, and variety, of the C96 Carbine.
- these firearms will often have the name of the retailer engraved on the receiver/frame or barrel which could be mistaken for the manufacturer's name.
- most carbines were produced prior to the 1930's.

Manufacturer

- "WAFFENFABRIK MAUSER" and "OBENDORF A/N" may be marked on the barrel.
- "WAFFENFABRIK MAUSER" and "OBENDORF A NECKAR" may be marked on the left side of the receiver/frame.

Action

- recoil-operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serialization was within the standard number ranges, although most carbines were produced prior to the 1930's.
Barrel	- carbines can be found with a variety of barrel lengths.
Calibre	- some additional calibres may be encountered, however, the factory produced the carbines in calibre 7.63MM MAUSER almost exclusively.
Shots	- usually has a fixed box magazine located in front of the triggerguard.

Notes

Make

- "MAUSER" is not marked on the firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Model

- military training rifle.
- resembles the Mauser K98k military rifle.
- "Deutsches Sportmodell 34" was manufactured by approximately 15 other manufacturers.

Manufacturer

- "JGA" in a circle, with a semi-cirular "THURINGEN" under it, is marked on the top of receiver.

Action

- bolt-operated single-shot.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- found on barrel.
- numbers seen have no prefix or suffix and range from 5,741 to 8,741
- an estimated production of less than 3,000 rifles.

- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Model

- "Deutsches Sportmodell" is marked on the right side of the receiver/frame.
- this is a military training rifle.
- resembles the Mauser 98K military rifle.
- the "Deutsches Sportmodell 34" was manufactured by many other manufacturers.

Manufacturer

- the "GECO" logo is marked on the top of the receiver ring, it is a large "G" with "eco" sitting on the cross bar of the G.
- "GECO" is a acronym, brandname, and trademark used by the "Gustav Genschow & Company, AG" of Germany prior to 1959.
- "Gustav Genshow & Co." is marked on the left side of the receiver/frame.
- "Gustav Genschow & Company AG" was a manufacturer and distributor of ammunition and firearms from the 1920s to 1959.
- the manufacturer had facilities in Alsadt, Berlin, Durlach, Hachenburg, Hamburg, Hamm, Koln, Koningsberg, Suhl, Wien, and Wolfartsweier.
- "Dynamite Noble" purchased the company in 1959.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- turn bolt operated, single-shot.

Serial Number

- the serial number may be marked on the receiver/frame or on the barrel.
- first range of numbers seen have no prefix or suffux and range from 118 to 12,082, the second range of number seen have a "A, B, or H" prefix and range from "a 138" to "h 7151".
- estimated 10,000 rifles were manufactured.

Notes

Make

- "MAUSER" is marked on the firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Model

- model designation is not marked on the firearm.
- this is an over and under hunting rifle made in West Germany; action opened with tang lever, single or double triggers, and engraving/finish options available.

Manufacturer

- "Mauser" is marked on the receiver/frame.

Action

- over & under barrel configuration.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number - serial number is located on the receiver/frame.

Notes

Make

- "MAUSER" banner is marked on the top of the receiver/frame.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Model

- the model designation is not marked on the firearm.
- introduced in the 1920's and manufactured into the 1930's.
- the "EL" in the model designation is interpreted as, "E" = Einzellader (single loader/single shot) and "L" is believed to denote leichtlauf (light pattern barrel).
- features include: round barrel; receiver/frame was not grooved for a scope mount; oval ejection port; no safety; dovetail front sight; adjustable open rear sight; checkered walnut, semi pistol grip stock and no butt plate; front sling swivel is soldered onto the barrel and rear sling swivel is screwed onto the butt stock.
- Mauser manufactured three "Boy's" type rifles, the model "EB 300" had a 500mm barrel and beechwood stock, the model "EN 310" had a 500mm barrel and a walnut stock, and the "EL 320" had a 600mm barrel, sling swivels and a walnut stock.

Manufacturer

- "MAUSER-WERKE A.G. OBERNDORF A.N." is marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- turn-bolt operated.
Serial Number	- serial number is located on the left side of the receiver/frame.
Calibre	- "PATRONE 22 LONG RIFLE" is usually marked on the barrel.

Notes

Make

- "MAUSER" is not marked on the firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- model designation stamped on left side of the receiver/frame. - this is a modernized, sporter version of a Mauser M98 action. - features include; - turn down bolt handle, to clear low mounted scope. - no stripper-clip guide, and thumb notch, which leave the receiver/frame wall solid. - bolt stop and ejector located on left side of receiver/frame. - hinged floor-plate magazine type. - safety located on right side of the receiver/frame. - fixed rear sight, ramped front. - checkered hardwood stock, with an English style cheekpiece.
Action	- turn-bolt design.
Serial Number	- serial number located on left side of barrel and receiver/frame, specimen observed with five numerical digits. Other combinations are possoble.
Calibre	- caliber designation located on left side of barrel.
Shots	- internal box magazine with a front hinged floor plate.

Notes

Make

- "MAUSER" is not marked on the firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Model

- "FR7" is marked on the left side of the receiver/frame.
- this rifle is a rework of the Spanish Model 1916 Short Rifle.
- converted in the 1950s.
- conversion entailed rebarreling from the original 7MM MAUSER to 7.62MM NATO; shortening the stock; fitting a rotary aperture rear sight to the receiver bridge; a hooded front sight and muzzle brake to the barrel.
- has a distinctive appearance imparted by the presence of an exposed tube under the barrel resembling the gas cylinder of a semi automatic rifle.

Manufacturer

- the manufacturer's name is marked on the top of the receiver ring.

Action

- turn-bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number is marked on the left side of the receiver/frame. - the model designation "FR7" is marked just in front of the serial number.
Calibre	- the calibre designation may be marked on the right side of the receiver ring.
Shots	- internal box magazine.

Notes

Make

- "Mauser" is not usually marked on the firearm.

Model

- this model was made by the conversion of a 1898 Mausers military rifle in the early 1920's.
- "Germany" is usually stamped on the receiver ring.
- some Geha stocks are converted from Mauser 98, service issue stocks, some observed specimens have been seen manufactured specially from a very light wood of unknown type with a rubber butt plate, the common characteristic is a circular sheet metal medallion or carved wood emblem bearing the name "GEHA" placed in what was formerly the firing pin disassembly device in the military buttstock or inlet into the wood on the side of the commercial stock.

Manufacturer

- the manufacturer's name is not marked on the firearm.

Action

- turn-bolt design.

Serial Number

- one sample observed featured the serial number marked on the underside of the receiver/frame ring and on the left side of the firearm and consisted of four digits.

Shots

- integral box magazine.
- Geha has a two shot capacity with one round in the magazine and one round in the chamber.

Notes

Make

- "MAUSER" is marked on the right side of the receiver/frame.
- "MAUSER" is marked on top of the barrel.
- The company logo is marked on the firearm.
- "Mauser" airguns are not manufactured by Mauser-Werke.
- "Mauser" airguns are produced by various subcontractors.

Model

- "K98" is marked on the right side of the receiver/frame.
- "Mod. K98" is marked on top of the barrel.
- This model comes in two action configurations: 1) an underlever spring-piston or 2) PCP, air rifle made to resemble the Mauser Kar 98 bolt-action rifle issued by Germany through the Second World War.
- Features include: hooded front sight with adjustable rear (scope mounting rail at the rear of the compression chamber); underlever cocking mechanism; barrel band with upper handguard; military-style stock with sling cut-outs, firing-pin cocking-cup, and metal buttcap; and an ambidextrous thumb-operated safety at the rear of the compression chamber.
- Overall length with a 545 mm (21.5 inches) barrel is 1090 mm (42.9 inches), average weight is 3.0 kg (6.6 lbs).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- The manufacturer is not marked on the receiver/frame.
Action	- Velocities have been reported as 245 mps/800 fps and 320 mps/1050 fps. - There are two action types for this model of firearm, described as follows: 1) sliding breech action (spring), under lever operated & 2) PCP. - Pre charged pneumatic. - Compressed spring air piston.
Serial Number	- The serial number is marked on the right side of the receiver/frame. - The serial number rationalization is unknown. - Observed serial number consisted of the following configuration: sixteen (16) numbers followed by a single letter suffix.
Calibre	- The calibre designation is usually marked on the right side of the receiver/frame.
Shots	- The compressed spring or sliding breech action is deemed a "Single Shot" firearm. - Detachable rotary disc magazine. - The PCP (pre charge pneumatic) version incorporates a detachable magazine, that loads in the top of the receiver/frame.
Canadian Law Comments	- Discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.
Other Markings	- "WARNING NOT A TOY, ADULT SUPERVISION REQUIRED" over "MISUSE OR CARELESS USE MAY CAUSE SERIOUS INJURY OR DEATH", followed by Made In China, over, "Before using read Owner's Manual"

Notes

Make

- "MAUSER" is not marked on the firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Model

- this is a single shot, training version of the German "98k Carbine".
- KKW is an acronym for Kleinkaliber-Wehrsportgewehr (small calibre military and sporting rifle).

Action

- bolt action.

Serial Number

- serial number stamped on the receiver, usually with letter prefix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make

- "MAUSER" is not marked on the firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Model

- this is a single shot, training version of the German "98k Carbine".
- KKW is an acronym for Kleinkaliber-Wehrsportgewehr (small calibre military and sporting rifle).

Action

- bolt action.

Serial Number

- serial number stamped on the receiver, usually with letter prefix.

Notes

Make

- "MAUSER" and "Made in Germany" are marked on the side of the receiver/frame.
- "Original" and "MAUSER" inside a banner may be marked on the barrel.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "M 03" is marked on the receiver/frame and barrel. - introduced in 2005. - features include: round or fluted tapered barrel with or without iron sights; iron sights consist of a windage adjustable blade rear sight and an elevation adjustable ramped bead front sight; double square bridge receiver/frame prepared for a double square scope mount; turn bolt action; safety system for manual cocking located on the rear of the bolt; single stage or adjustable set trigger; one piece synthetic stock with black or orange checkered rubber inserts or oil finished walnut Monte Carlo stock with checkered forearm and pistol grip; sling swivels; magazine lock; interchangeable barrel and bolt head system. Available in a left hand version. - overall length is from 991 mm (39") to 1168 mm (46"), average weight is from 3.52 kg (7.75 lbs) to 4.4 kg (9.75 lbs).
Manufacturer	- manufacturer's name is not marked on the firearm. - "Made in Germany" are marked on the rear right side of the receiver/frame. - in April 2001, SIG-Blaser purchased the rights for Mauser sporting rifles, in 2005 Blaser in Isny began manufacturing these rifles.
Action	- turn-bolt design.
Serial Number	- serial number is marked on the left side of the receiver/frame before the chamber.
Barrel	- 470mm (18 1/2") barrel advertised on the M03 Trail is for the complete barrel assembly muzzle to end of barrel (actual barrel length from muzzle to end of the chamber is 450MM).
Calibre	- 520 mm, 540 mm and 560 mm barrels are available for standard calibers. - 600 mm and 620 mm barrels are available for magnum calibers.
Shots	- detachable box magazine.
Other Markings	- left handed version have an "L" stamped on the bolt head alongside the marking for caliber group.
Remarks	- available in either left handed version with reversed cocking safety system and left handed stock or with right handed action and left handed stock.

Notes

Make

- "MAUSER" logo is marked on the barrel and magazine.
- "MAUSER" is marked on the left side of the receiver/frame.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Model

- introduced in 2013.
- "MAUSER M12" is marked on the left side of the receiver/frame.
- features include: open iron sights or no iron sights; threaded or unthreaded, round tapered barrel; open top, tubular steel receiver/frame is drilled and tapped for scope mounts or with an accessory rail; six locking lugs on the bolt; three position manual safety mounted on the bolt; set trigger; one piece checkered grey synthetic or walnut, Monte Carlo pistol grip stock with butt pad; sling swivels; blued metal finish.
- overall length with a 559 mm (22") barrel is approximately 1067 mm (42").
- overall length with a 622 mm (24 1/2") barrel is approximately 1125 mm (44 1/3").
- average weight is from 3.1 kgs (6 3/4 lbs) to 3.2 kgs (7.0 lbs).

Manufacturer

- "MAUSER" logo is marked on the barrel and magazine.
- "MAUSER M12" and "MADE IN GERMANY" are marked on the left side of the receiver/frame.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the side of the receiver/frame.

Calibre

- calibre is usually marked on the barrel.

Shots

- detachable box magazine.

Notes

Make

- "MAUSER" is marked on the left side firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- "MAUSER" was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- introduced in 2018 as a rebranding of the "German Sport Guns GSG-15" rifle.
- "MAUSER" is marked on the left side of the receiver/frame.
- "M15" is marked on the right side of the receiver/frame.
- "M15" resembles with near precision an ISSC model MK22, 22LR rifle.
- "M15" has a two piece split receiver/frame.
- features observed: muzzle flash hider; round barrel inside a barrel shroud; 400mm top rail and three, 170mm hand guard rails for accessories; ambidextrous safety lever; black and color furniture, synthetic stock which both folds and telescopes, adjustable check piece; left or right side cocking lever.
- overall length with a 415 mm barrel (16 3/8") is 913 mm with a fully extended butt stock, and 689 mm with the butt stock folded, and the average weight is 3.400 kg (7.5 lbs).

Manufacturer

- "MADE IN GERMANY" is marked on the left side of the receiver/frame.
- "German Sport Guns" also use the acronym "G.S.G".
- "German Sport Guns" was founded in 2002.
- "German Sport Guns" logo is an oval over a circle with "G.S.G" at it centre.
- "G.S.G" and "Made in Germany" are usually marked on the firearm.
- "German Sport Guns" is a manufacturer of semi-automatic firearms and airsoft versions of popular weapons.
- "German Sport Guns" was located in Arnsberg, and now Ense-Höingen Germany.

Action

- Blowback operated.

Serial Number

- serial number was marked on the right side of the receiver/frame just below the ejection port.
- serial number is repeated on the breech block, barrel and trigger mechanism on one example.
- serial number of referenced examples consisted of a two letter prefix (BL) and five numbers.

Calibre

- "cal.22LR HV" was observed marked on the right side of the receiver/frame.

Shots

- detachable box magazine.

Notes

Make

- "MAUSER" is not marked on the firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Model

- does not appear on fiream.
- designed in 1934.
- built on a 98 Mauser model action.

Manufacturer

- "VALMET" is stamped on barrel over the serial number.
- original manufacturer or proof marks may have been removed and the receiver refinished.

Action

- magazine well has been permanently altered to single shot feed ramp configuration.

Serial Number

- on the observed sample, the serial number was marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- magazine-well cutout has been filled with a welded plate to make this firearm a single shot rifle and to add support to the receiver for 300m competition.
- very long and heavy, (approximately 1.2m and 5kg), this firearm is optimized for 300m competition.
- bolt handle may be straight or turned down.
- aperture foresight, and target type rear-aperture sight assembly mounted on right side of the receiver.
- adjustable hooked buttplate.
- three-position style wood stock.

Notes

Make

- the make is not marked on the air gun; this is an air pistol reproduction of the Mauser M712 selective-fire "Broomhandle" pistol.

Model

- "WAFFENFABRIK" over "M712" is marked on the right side of the firearm.
- this is a very detailed air-pistol version of the original Mauser M712 Broomhandle selective-fire handgun replicating both the size and weight of the original model.
- "Broomhandle" is derived for the popular name for the tubular-shaped grip.
- features include: fixed front sight and adjustable rear sight; magazine housing is part of the trigger guard; smoothbore; safety on the left side; steel construction; magazine release button on the right side; slotted rear grip strap; ring hammer; lanyard ring.
- overall length is 304mm (12"), weight is 1.4 kg (3.1lb).

Manufacturer

- "UMAREX" is marked on the air gun..
- Umarex was established in 1972 as UMA Mayer & Ussfeller GmbH.
- UMA Mayer & Ussfeller GmbH acquired Reck Sportwaffenfabrik Karl Arndt.
- UMA was reorganized as "UMARECK" and finally as "UMAREX".
- Umarex is located in Arnsberg, Germany.
- Umarex purchased Walther in 1996.
- Umarex manufactures firearms, airguns, signal pistols, ammunition, soft air, optics and accessories.
- Umarex manufactures extremely detailed air-pistol versions of genuine handguns and rifles.
- Umarex also contracts other manufactures in China, Mexico, Spain, Taiwan and Turkey to produce firearms under various licensed trade marks.
- Umarex Sportwaffen GmbH & Company KG established a distribution company in North America called "UMAREX USA".
- Umarex USA acquired Ruag Ammotec USA the distributor of the RWS brand of airgun and acquired Crosman Corporation in 1997.
- Umarex distributes produces under the following trade names/trademarks: Ares, Beretta, Browning, Colt, Combat Zone, Elite Force, FN Browning, Hammerli, Heckler & Koch (HK), KWA, Legends, Magnum Research, Mauser, Makarov, Norica, Perfecta, PTS, PTSxKWA, RAM (Real Action Marker), Reck International, Ruger, RWS, Smith & Wesson (S&W), Tactical Force, Tokyo Soldier, Umarex, Walther, and Webley & Scott.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- CO2 powered. - does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.
Serial Number	- serial-numbered on the receiver/frame.
Shots	- detachable box magazine.

Notes

Make

- "MAUSER" is marked on the firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Model

- introduced in 1998.
- "M98" is marked on the left side of the receiver/frame.
- this is a newly produced Mauser rifle manufactured after the original Mauser drawings of 1936 and the respective Mauser patents.
- features include: Mauser 98 action machined out of a solid piece of high grade steel; single stage trigger; select hardwood stock with Rigby style cheek piece; checkered grip and forearm; folding leaves or peep rear sight; three position safety with locking lever and gold inlays "F" and "S"; inlaid butt stock sling swivels.
- various options available.
- this model is also available in magnum/safari calibers as the Model M98 Magnum.
- overall length with a 610mm barrel is 1140mm, average weight is 3.6kg.

Action

- turn bolt design.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- the serial number rationalization is unknown.

Calibre

- the calibre designation is marked on the barrel.

Shots

- internal magazine.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "MAUSER" is marked on the left side firearm. - "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser. - Wilhelm Mauser was born in 1834 and died in 1882. - Paul Mauser was born in 1838 and died in 1914. - Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles.. - Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872. - Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874. - Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884. - "MAUSER" was established under the German proof law as a proof house in 1898. - Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923. - Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975. - Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.
Model	- Introduced in 2018 as a rebranding of the "German Sport Guns, GSG MP40 Carbine" rifle. - "MAUSER MP40" is marked on the left side of the receiver/frame. - "MAUSER MP40" is a modern 22 LR semi-automatic "look-alike" of the German MP40 submachine gun, made with a 415mm/16.3" extended barrel, with a dummy shroud resembling a suppressor. - "MAUSER MP40" has a version of this firearm with a 253mm/10" barrel. - Features include: typical MP40 layout and appearance; rifled barrel with fake suppressor shroud; open fixed sights or accessory rail for optics mounting; vertical box magazine; rotary safety at the bottom of the forearm behind the magazine housing made to resemble the take-down nut on a genuine MP40; left-side operating handle; single-action trigger with an internal hammer; under-folding wire-frame stock with folding buttplate; black synthetic and anodized finish. - Overall length with a 415 mm barrel (16 3/8") is 913 mm with a fully extended butt stock, and 689 mm with the butt stock folded, and the average weight is 3.400 kg (7.5 lbs).
Manufacturer	- "German Sport Guns" and/or the German Sport Guns logo of "GSG" inside two overlapping circles is marked on the firearm. - "German Sport Guns" was founded in 2002. - "German Sport Guns" logo is an oval over a circle with "G.S.G" at it centre. - "G.S.G" and "Made in Germany" are marked on the left side of the receiver/frame. - "German Sport Guns" is a manufacturer of semi-automatic firearms and airsoft versions of popular weapons. - "German Sport Guns" was located in Arnsberg, and now Ense-Höingen Germany.
Action	- Blowback operated.
Serial Number	- Serial-numbered on the right side of the receiver/frame, above the magazine housing. - Serial number of referenced examples consisted of a two letter prefix (BL) and five numbers.
Calibre	- "cal .22 LR" is marked on the right side of the magazine housing.
Shots	- Detachable box magazine.

16132 - 1	20X139 HISPANO-SUIZA	N/A	1840	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- the manufacturer may be marked on the cannon; Mauser-werke Waffensysteme is today a subsidiary of Rheinmetall.
Model	- the model is marked on the cannon; "MK 20 Rh 202" stands for "Maschinen Kanone 20 Rheinmetall 202"/"Machine Cannon 20 Rheinmetall 202". After World War Two, Rheinmetall took over the cannon development subsidiary of Mauser, and today produces designs based on that work, in calibres up to 30mm. - this is a 20mm automatic cannon designed in the 1960s, and produced through the 1970s, with a "soft recoil system" allowing it to be fitted to a variety of mounts that were previously unable to accept the recoil levels produced by 20mm cannon, and allowing this cannon to be seen on a range of vehicle, towed, armoured fighting vehicle, and shipboard mountings. During operation, this cannon fires the next round of a burst before the barrel and bolt return to their full-forward position, cushioning the recoil forces. - features include: parkerized/phosphated finish; various forms of muzzle brake; tapered barrel; hydraulic buffer tubes and a gas tube; a square receiver; belt-feed mechanism; remote aiming devices; and an electronic solenoid trigger.
Manufacturer	- the manufacturer may be marked on the cannon; Mauser-werke Waffensysteme is today a subsidiary of Rheinmetall.
Action	- combined gas/recoil operation.
Serial Number	- serial numbered on the receiver/frame.
Shots	- belt fed firearm.

Notes

Make

- this is a conversion of an original German WW I or WW II Mauser bolt action rifle into a single shot shotgun; Make is derived from the fact that the action and characteristics of this firearm are known as "Mauser".
- original manufacturer's markings or code letters may still be apparent although many times these markings are removed during the refinishing of these firearms.

Model

- no model name is marked on this firearm; model name is derived from the characteristics of the firearm.
- this type of firearm was remanufactured usually by converting either the 1898 Mauser or the K98 Mauser military rifles into single shot shotguns.
- features include: turn-bolt operated; fixed magazine follower; internal box magazine no longer operational; rifled barrel replaced with a smooth bore shotgun barrel; original stock or replacement sporter stock; usually blued finish.
- original model markings may still be apparent on the left side of the receiver/frame as, but not limited to; "Gew. 98", "Mod. 98".

Action

- turn-bolt design.

Serial Number

- serial numbering rationalization is unknown, however, a numeric number only usually without prefix or suffix may be marked on the receiver ring of the receiver/frame.
- the original serial number as applied by the producing arsenal may not have been removed from the receiver ring, in this instance, an alpha letter suffix may still be apparent.

Calibre

- known example had the calibre marked on the rear of the barrel as, "CAL 12K.".

Notes

Make

- "MAUSER" is not marked on the firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Model

- model is not marked on the firearm.
- military version Mausers were subsequently reworked to a "sporterized" version by FN after 1945 and may have the original markings removed.
- FN commercial rifles were made circa 1950.
- commercial rifles may be marked with the FN logo within a circle and "Made in Belgium" on the receiver/frame.

Manufacturer

- usually marked with the FN name on the receiver/frame.
- may be marked on the left side of the receiver/frame:
"FAB.NAT.D'ARMES de GUERRE HERSTAL - BELGIQUE".

Action

- turn-bolt design.

Serial Number

- original serial number may or may not be present.
- commercial actions may or may not have a serial number.

Notes

Make

- "WAFFENFABRIK MAUSER A.-G. OBERDORF A/N" or the "MAUSER" banner trademark or the Waffenfabrik Mauser monogram of "WM" or "WFM" is marked on the firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Model

- Model designation is not marked on the firearm.
- Production started in 1899.
- This model is based on the Mauser 96 or 98 type action and was available as a new product or as a re-worked military rifle.
- Features may include: round, octagonal or part octagonal and round barrel; wing safety on the bolt or slide safety located on the receiver/frame; single or double set trigger; full or semi-pistol grip; half or full synthetic or wood stock; open, peep or optical sights.
- This is a generic entry for a Mauser Sporting Rifle, a more accurate entry may exist to better describe the firearm being examined.

Manufacturer

- manufacturer is marked on the firearm.

Action

- turn-bolt operated.

Serial Number

- serial number is usually located on the left side of the receiver/frame.

Barrel

- barrels are available in various contours and lengths.

Shots

- single column integral box magazine.

- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Manufacturer

- marked on top of barrel left side " VOERE KUFSTEIN AUSTRIA ".

Action

- Mauser 98 bolt action.

Serial Number

- serialization rationalization unknown, but six numerical digits observed, on right side of the barrel just ahead of receiver ring.

Calibre

- marked on left side of the barrel just ahead of receiver/frame.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- "MAUSER" is not marked on the firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.
- Mauser brothers developed and produced what has become one of the most famous and commonly copied bolt operated action designs in history. The basic design is known worldwide simply as being a "Mauser". As the basic design has been produced in the millions in both military (usually found with a charging clip guide on the top of the receiver/frame and a thumb cut on the left side) and commercial configurations it is also one of the most commonly encountered "sporterized" rifles encountered. Many of the receiver/frames used as the basis for these "Sporter" rifles will have the original manufacturer and model markings removed. As such it is difficult to determine the manufacturer or unique model designation.

Model

- model is not marked on the firearm.
- this is a generic screen, to be used for the purpose of identifying otherwise unidentifiable single shot Mauser Sporter Rifles, when all original markings have been removed and no markings have been added by the person customizing the firearm.

Action

- the firearm is modified permanently to single shot configuration and a magazine can no longer be fitted.

Serial Number

- the original serial number may or may not be present.

Notes

Make

- "MAUSER" is not marked on the firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.
- Mauser brothers developed and produced what has become one of the most famous and commonly copied bolt operated action designs in history. The basic design is known worldwide simply as being a "Mauser". As the basic design has been produced in the millions in both military (usually found with a charging clip guide on the top of the receiver/frame and a thumb cut on the left side) and commercial configurations it is also one of the most commonly encountered "sporterized" rifles encountered. Many of the receiver/frames used as the basis for these "Sporter" rifles will have the original manufacturer and model markings removed. As such it is difficult to determine the manufacturer or unique model designation.

Model

- this is a generic screen for the purpose of identifying Mauser based "Sporter" rifles when markings may have been removed and no markings are added by the person or firm customizing the firearm.
- as there are a vast number of aftermarket and custom components available for the Mauser design features will vary, many will be converted military rifles that feature a cut-down laminated stock and the original, "stepped' barrel and sights. Others will be completely re-worked actions that have the charger clip guide milled off, a new barrel and stock attached and feature iron or telescopic (or both) sighting systems.

Action

- turn-bolt design.

Serial Number

- the original serial number may or may not be present; as such the serial number could be marked anywhere on the receiver/frame or other major component.

Calibre

- calibre designation may be marked on the barrel.

Canadian Law Comments

- the original, receiver/frame stamped serial number may or may not be present. Many military Mauser rifles had a full or partial serial number marked on the other major components (barrel, bolt etc.), these can not be used as the serial number under Canadian law unless the same number is marked on the receiver/frame.

Notes

Make

- "Mauser" is not marked on the firearm; this is the common name by which these C-96-style pistols are known.

Model

- the model is not marked on the firearm.
- this is a semi-automatic-only Mauser C96-style pistol made in China to resemble the Mauser 712 "Schnellfeuer" ("Rapid-fire") machine pistol, which saw widespread use in China from the 1937 invasion of China by Japan (the "Second Sino-Japanese War") through to the end of the Chinese Civil War in 1950.
- this pistol was refurbished from existing Mauser pistols, with new barrel liners installed to enable 9mm Luger ammunition to be fired, and a completely new lower receiver/frame to eliminate any automatic fire capability.
- features include: standard Mauser 712 layout and operation (minus the ability for selective-fire, and the associated controls for such); blued finish; open adjustable sights calibrated to 1000 yards; tapered barrel; detachable box magazine in a well forward of the trigger-guard; a "yin-yang" symbol on one side of the lower receiver, topped with a line of Chinese ideographs, a loop hammer with manual safety at the rear of the pistol, a "broomhandle"-style grip with grooved wooden grip-plates; and a lanyard loop at the butt.

Manufacturer

- the manufacturer may be marked in Chinese characters.

Action

- recoil-operated.

Serial Number

- serial-numbered on the left side of the upper receiver.

Calibre

- "9MM" is marked on top of the chamber.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Notes

Make

- "MAUSER" is not marked on the firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Model

- this is a generic entry to cover Mauser Short Rifles without country or date markings.
- there are no model specific identifying marks. The markings are often removed or obscured by addition of optical sights.
- features include: wooden pistol grip stock, and an upper handguard that extends from the front of the receiver to about one inch past the forward barrel band; steel buttplate, steel trigger guard and magazine floor plate; round steel barrel with fixed post front sight and elevation adjustable sliding rear sight; sling swivels; a cleaning rod may be found under the barrel.

Manufacturer

- "FAB. NAT. D'ARMES de GUERRE HERSTAL- BELGIQUE" is marked on the left side of the receiver/frame.

Action

- turn bolt design.

Model

- "Mod. W 625 C" is marked on the top of the receiver ring.
- this model resembles the Mauser 98K and has a recess in the stock under the bolt handle.

Manufacturer

- "BSW" and "SUHL" are marked on the receiver ring.
- "BSW" denotes Berlin-Suhler Waffenfabrik und Fahrzeugwerke.

Action

- turn bolt operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number may be marked on the left side of the receiver/frame and/or barrel.
Calibre	- "KAL. 22 LONG RIFLE" is marked on the left side of the barrel.
Other Markings	- German proof marks of a Crown and a "U" anther crown and a "B" are marked on the barrel. - "FLUSS-STAHL KRUPP-ESSEN" may be marked on top of the barrel. - "Made in Germany" may be marked on the left side of the receiver/frame.

FRT Report

Firearm Reference Number (FRN): 20796
Make: Mauser
Model: WTP 1

Summary

Make:	Mauser
Model:	WTP 1
Manufacturer:	Mauser
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
20796 - 2	25 AUTO	6	60	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
20796 - 1	6.35MM	6	60	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "WAFFENFABRIK MAUSER A.G. OBERNDORF a.N." is marked on the left side of the slide, with "MAUSER" in a barrel-shaped logo on the grips.

Model

- "W.T.P." stands for "Westen-taschen-pistolen" (Vest Pocket Pistol).
- production for this pistol began in late 1921.
- manufacturing ceased around 1938, when the "WTP 2" was introduced. This new Model is very similar to the "WTP 1" except it has a 51mm barrel.
- WTP 1 is not marked on the firearm. This term has evolved as a method of determining the progression of Model over the years.
- early production of the "WTP" model only had the letter "T" stamped on the left slide. Only around 500 are believed to have been marked this way.

Manufacturer

- "WAFFENFABRIK MAUSER A.G. OBERNDORF a.N." is marked on the left side of the slide, with "MAUSER" in a barrel-shaped logo on the grips.

Action

- blowback operated.

Serial Number

- began at 1 or 100 and continued to approximately 50000.
- the numbers are normally found on the front left of the slide, but may also be found on the right side of the slide.
- the duplication of serial numbers between the two Models can be rationalized by mechanical differences. If the serial number is between 1 and 1000 and the grip is held in place with one screw through the back, it is a "WTP I". If the grip is held in place by a screw through each side of the grip, it is a "WTP II".

30085 - 1	6.35MM	6	51	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Model

- WTP stands for "Westentaschenpistolen" (Vest Pocket Pistol).
- WTP 2 was introduced around 1938 and production ran to approximately 1947. - WTP 2 model is very similar to the "WTP 1" except with a 51mm barrel.
- WTP 2 is not marked on the firearm. This term has evolved as a method of determining the progression of Model over the years.
- early production of the "WTP" model only had the letter "T" stamped on the left slide. Only around 500 are believed to have been marked this way.

Manufacturer

- German production ceased with the end of the war in 1945.

Serial Number

- may range from approximately 50000 to 75000 and then start again at 1 to approximately 1000.
- the duplication of serial numbers between the two Models can be rationalized by mechanical differences. If the serial number is between 1 and 1000 and the grip is held in place with one screw through the back, it is a "WTP I". If the grip is held in place by a screw through each side of the grip, it is a "WTP II".

Notes

Make

- "MAUSER-VERGUEIRO" is not marked on the firearm.
- "MAUSER" is derived from the last name of Paul and Wilhelm Mauser.
- "VERGUEIRO" is derived from the last name of Jose Alberto Vergueiro.
- "VERGUEIRO" was an officer in the Portuguese Army and the designer of the "Mauser-Vergueiro" model 1904.

Model

- the coat of arms of Brazil an "enwreathed Star" and "F.P.D.F" is marked on top of the receiver ring.
- 1904 model was sold to Brazil between 1910 and 1912.
- the Brazilian federal police purchased approximately 5000 firearms from DWM.
- "F.P.D.F." is the abbreviation for "Forca Policia Distrito Federal" (Military Police of the National Capital).
- this firearm was based on the best features of the Mauser 1898 and the split bridge receiver/frame and simplified bolt of the Mannlicher-Schoenauer rifle.
- features include: round barrel, Mannlicher type bolt action with dual opposed forward locking lugs and a separate non-rotating bolt head, Mauser 98 type bolt mounted wing safety, ejector, bolt stop, trigger mechanism, magazine floor plate that is hinged with a thumb operated magazine release inside the trigger guard, left wall of receiver/frame has a thumb notch for top loading, inverted "V" front sight and "V" notch adjustable rear sight, two piece wood semi pistol grip stock with sling swivel brackets and the cleaning rod is mounted under the barrel.
- the overall length of the firearm with a 739 mm barrel is 1222 millimeters.

Manufacturer

- "DEUTSCHE WAFFEN-UND MUNITIONSFABRIKEN BERLIN" is marked on the left side of the receiver/frame.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the right side of the receiver ring.
- serial number observed consisted of four numbers without a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - calibre designation is not marked on the firearm.

Shots - internal box magazine.

Notes

Make

- "MAUSER-VERGUEIRO" is not marked on the firearm.
- "MAUSER" is derived from the last name of Paul and Wilhelm Mauser.
- "VERGUEIRO" is derived from the last name of Jose Alberto Vergueiro.
- "VERGUEIRO" was an officer in the Portuguese Army and the designer of the "Mauser-Vergueiro" model 1904.
- King Carlos the 1st (1889 to 1909) crest, a crown and interlocked "CI" or his successor King Manual the 2nd (1909 - 1910) crest, a crown and "M2" is marked on top of the receiver ring.

Model

- manufactured between 1904 and 1909.
- "ESPINGARDA PORTUGUEZA 6.5 MOD. 1904." is marked on the left side of the receiver/frame.
- features include: fixed front sight, adjustable tangent rear sight, split bridge receiver, box magazine, sling swivels, "H" type bayonet lug, blued finish, one piece pistol grip stock and a half length upper handguard.
- issued with a cleaning rod under the barrel.
- "1904" model was converted in the 1930's by the Portuguese military to fire 8MM MAUSER. This modification was known as the 1904/39 model, the 6.5 calibre markings may be "X" out.

Manufacturer

- "DEUTSCHE WAFFEN-UND MUNITIONSFABRIKEN BERLIN" is marked on the left side of the receiver/frame.

Action

- turn-bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the right side of the receiver ring.
Calibre	- the caliber is marked on the left side of the receiver as "6.5".
Shots	- internal box magazine.
Other Markings	- the Portuguese logo is marked on top of the receiver/frame ring (a crown on top of the superimposed letters "C" and "I"). - the left side of the receiver is marked: ESPINGARDA PORTUGUEZA 6.5 MOD. 1904. DEUTSCHE WAFFEN - UND MUNITIONSFABRIKEN BERLIN
Remarks	- the Portuguese army adopted the Mauser-Vergueiro rifle in 1904.

Notes

Make

- "MAUSER-VERGUEIRO" is not marked on the firearm.
- "MAUSER" is derived from the last name of Paul and Wilhelm Mauser.
- "VERGUEIRO" is derived from the last name of Jose Alberto Vergueiro.
- "VERGUEIRO" was an officer in the Portuguese Army and the designer of the "Mauser-Vergueiro" model 1904.
- King Carlos the 1st (1889 to 1909) crest, a crown and interlocked "CI" or his successor King Manual the 2nd (1909 - 1910) crest, a crown and "M2" is marked on top of the receiver ring.

Model

- model designation is not marked on the firearm.
- "ESPINGARDA PORTUGUEZA 6.5 MOD. 1904." or "ESPINGARDA PORTUGUEZA XX MOD. 1904." is marked on the left side of the receiver/frame.
- "1904" model was manufactured between 1904 and 1909.
- Lisbon arsenal commenced conversion of the model 1904 to conform more closely to the specifications of the model 1937-A in 1939.
- 1939 modifications consisted of reboring and rechambering to 8mm Mauser, shortening the barrel and forend, modifying the sights, and add a traverse bolt beneath the chamber to handle increased recoil.
- Portuguese government had originally purchased approximately 100,000 model 1904s from DWM.
- this firearm was base on the best features of the Mauser 1898 and the split bridge receiver/frame and simplified bolt of the Mannlicher-Schoenauer rifle.
- features include: round barrel, Mannlicher type bolt action with dual opposed forward locking lugs and a separate non-rotating bolt head, Mauser 98 type bolt mounted wing safety, ejector, bolt stop, trigger mechanism, magazine floor plate that is hinged with a thumb operated magazine release inside the trigger guard, left wall of receiver/frame has a thumb notch for top loading, square top blade front sight with protective wings and "U" notch adjustable rear sight, two piece wood semi pistol grip stock with sling swivel brackets and the cleaning rod is mounted under the barrel.
- overall length with a 600 mm barrel is 1089 mm.

Manufacturer

- "DEUTSCHE WAFFEN-UND MUNITIONSFABRIKEN BERLIN" is marked on the left side of the receiver/frame.
- this modification was carried out by the Portuguese Military Arsenal in Lisbon.

Action

- turn-bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the right side of the receiver ring.
Calibre	- calibre designation is not marked on the firearm.
Shots	- internal box magazine.

Notes

Make

- the "Maverick" trade mark and/or "Maverick Arms Inc" is marked on the bottom of the receiver/frame and on the barrel.

Model

- model designation appears on bottom of receiver/frame as " 88".
- introduced in 1988.
- this is a pump action repeating shotgun.
- features include: interchangeable plain or ventilated rib round barrel with bead front sight or rifle sights; solid top alloy receiver/frame with right side ejector port and bottom loading port; single or dual slide action bars; hammerless; cross-bolt type safety located at top front of trigger guard and action release located at the back of the trigger guard; tubular magazine with barrel takedown screw cap; wood or black synthetic ribbed forearm and straight buttstock with palm swell pistol grip with recoil pad or black synthetic pistol grip stock; blued finish; optional barrel heat shield.
- a version of the model 88 was offered with a "Bull-Pup" stock as the model 88 Bullpup.
- available in various "Combo" packages.
- Note: barrels are not interchangeable between the six and eight shot models.

Manufacturer

- "Maverick Arms Inc." and "Eagle Pass, TX" and "Made in U.S.A" may be marked on the bottom of the receiver/frame.

Serial Number

- the serial number is located on the left rear side of the receiver/frame.
- typical examples are characterized by two letter alpha prefix with five numbers followed by one alpha character; eg., MVxxxxxB, MVxxxxxC, MVxxxxxD, MVxxxxxL and MVxxxxxM etc.
- note that the numeric portion of the serial number may be repeated.

Barrel

- the barrel length is usually marked on the left rear side of the barrel; eg. "24 IN.".

Calibre

- "Chambered for 2 3/4 & 3 in. Shells" and "12 GA" and barrel length is usually marked on the left rear side of the barrel and "12 GA" is marked on the bottom of the receiver/frame.

Shots

- this shotgun feeds from a tubular magazine located under the barrel.

Canadian Law Comments

- some versions of the Maverick model 88 left the factory equipped with a Prohibited Device commonly known as a "bull-pup" stock. When the "bull-pup" stock ("Prohibited Device" PDR, Part 4, para. 2) is removed the receiver/frame or barrelled action may be correctly classified as "Non-Restricted"

Model

- "MODEL 88" is usually marked on the left side of the receiver/frame.
- introduced in 1988.
- "88" model is a pump action repeating shotgun.
- features include: interchangeable plain or ventilated rib round barrel with bead front sight or rifle sights; solid top alloy receiver/frame with right side ejector port and bottom loading port; single or dual slide action bars; hammerless; cross-bolt type safety located at top front of trigger guard and action release located at the back of the trigger guard; tubular magazine with barrel takedown screw cap; wood or black synthetic ribbed forearm and straight buttstock with palm swell pistol grip with recoil pad or black synthetic pistol grip stock blued finish; optional barrel heat shield.
- a version of the model 88 was offered with a "Bull-Pup" stock as the model 88 Bullpup.
- available in various "Combo" packages.
- Note: barrels are not interchangeable between the six and eight shot models.

Manufacturer

- "MAVERICK" over "BY MOSSBERG" is usually marked on the left side of the receiver/frame.

Serial Number

- serial number is marked on the left rear side of the receiver/frame.
- serial number observed consisted of a two letter "MV" prefix, five (5) numbers, and a letter suffix.
- since 2016 the letter suffix has been dropped and the MV prefix is followed by up to (8) numbers.

Calibre

- may be marked "CHAMBERED FOR 2 3/4 & 3 IN. SHELLS" and "12GA."

Shots

- this shotgun feeds from a tubular magazine located under the barrel.

Canadian Law Comments

- some versions of the Maverick model 88 left the factory equipped with a Prohibited Device commonly known as a "bull-pup" stock. When the "bull-pup" stock ("Prohibited Device" PDR, Part 4, para. 2) is removed the receiver/frame or barrelled action may be correctly classified as "Non-Restricted"

41301 - 1	12 GA X 3 1/2"	4	711	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the "Maverick" trade mark is located on the bottom of the receiver/frame.

Model

- model designation is marked on the bottom front of the receiver/frame.
- this model was introduced in 1991.
- this is a pump action repeating shotgun.
- features include: plain or ventilated rib round barrel with screw in choke tubes; solid receiver/frame with right side ejection and bottom loading port; duall action bars; tubular magazine; hammerless; black synthetic forearm and pistol grip buttstock with recoil pad.

Manufacturer

- "Maverick Arms Inc." and "Eagles Pass, TX" and "Made in U.S.A." should be marked on the bottom of the receiver/frame.

Action

- slide action.
- plain bolt, a double slide bar and a forged anodized aluminum receiver.
- the bolt locks to the barrel.
- cross bolt trigger safety and a disconnecting trigger.

Serial Number

- the serial number is located on the left rear side of the receiver/frame.
- the serial number should have the letter prefix "MV" with 5 numbers and 1 alpha character suffix.

Barrel

- any Maverick 91/Mossberg 835 UNTI-MAG series 12 Ga. barrel could be fitted.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- the calibre designation is stamped on left rear side of the barrel.
Shots	- this shotgun feeds from a tubular magazine located under the barrel.

Notes

Make

- "MAVERICK" over "BY MOSSBERG" may be marked on the left side of the barrel.

Model

- introduced in 2010.
- model designation is not marked on the firearm.
- features include: free floating, button rifled barrel; recessed muzzle crown; no sights; factory installed weaver type scope bases; black checkered synthetic stock with rubber recoil pad; safety located on the rear right side of the stock; matte black finish on metal surfaces.
- overall length with a 559 mm (22") barrel is 1067mm (42.0"), average weight is 3.18kg (7lbs).
- Maverick is available in two actions length, short action and long action.
- this firearm is also available with a synthetic stock and additional spacers for length of pull adjustment known as the "Super Bantam".

Manufacturer

- "MAVERICK" over "BY MOSSBERG" may be marked on the left side of the barrel.

Action

- turn bolt design.

Serial Number

- serial number is marked on the rear left side of the receiver/frame.
- observed serial number consisted of a two letter prefix and six numbers.

Calibre

- caliber is marked on the left side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - internal box magazine.

Other Markings -"EAGLE PASS, TX USA " is marked on the left side of the barrel.

Notes

Make

- "MAXIM PAT." is marked on the identification plaque.

Model

- "3.7cm Masch.K." is usually marked on the identification plaque.
- this is an example of the "Pom-Pom" 37mm automatic cannon developed by Hiram Maxim in 1885, based on his successful rifle-calibre machine gun, but enlarged so as to chamber a 37mm cartridge (37mm being the smallest calibre that explosive shells were allowed under the St. Petersburg Declaration of 1863). Early versions of this automatic cannon were manufactured by the Maxim-Nordenfelt Company of Sweden (after Nordenfelt had been bought out by Maxim to eliminate a rival), with licenced copies also being made by DWM of Germany. After Britain had been on the receiving end of German-made "pom-poms" in South Africa, during the early part of the Boer War, they ordered their own versions of the "pom-pom" from Maxim's English subsidiary, Vickers-Maxim.
- features include: greatly-enlarged Maxim machine gun layout and operation, with a brass water-jacket surrounding the barrel, a brass belt feed-guide on the right side, and a cocking handle that reciprocates as the gun fires; open adjustable sights (sights could vary, depending on whether the particular gun was intended for carriage use, naval use, or anti-aircraft use); a square/rectangular receiver/frame with an identification plaque riveted to the top; and a brass grip/trigger assembly at the bottom rear of the receiver.
- depending on the particular version, these cannon may also be seen with an unusual style of brace/shoulder-stock with one or more hand-grips, to allow a gunner to adjust their aim while leaning into the gun with their left shoulder, and firing with the right hand.
- these cannon saw widespread use on ships as a response to the threat of fast motor-torpedo boats, with examples being used on ground mounts through the First World War.
-186 kg/410 pounds, with an overall length of 1850mm.

Manufacturer

- "DEUTSCHE WAFFEN UND MUNITIONSFABRIKEN BERLIN" is marked on the identification plaque.
- DWM was the German licensee of the Maxim Nordenfelt Gun & Ammunition Company, licenced to produce machine guns and cannon based on Hiram Maxim's patents.

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number - serial numbered on an identification plaque on the left side of the cannon.

Shots - belt fed firearm.

Notes

Make

- "MAXIM NORDENFELT G&A Co Ld" is marked on an identification plaque on top of the cannon.

Model

- "37m/m REKUL KANON" is usually marked on the identification plaque.
- this is an example of the "Pom-Pom" 37mm automatic cannon developed by Hiram Maxim in 1885, based on his successful rifle-calibre machine gun, but enlarged so as to chamber a 37mm cartridge (37mm being the smallest calibre that explosive shells were allowed under the St. Petersburg Declaration of 1863). Early versions of this automatic cannon were manufactured by the Maxim-Nordenfelt Company of Sweden (after Nordenfelt had been bought out by Maxim to eliminate a rival), with licenced copies also being made by DWM of Germany. After Britain had been on the receiving end of German-made "pom-poms" in South Africa, during the early part of the Boer War, they ordered their own versions of the "pom-pom" from Maxim's English subsidiary, Vickers-Maxim.
- features include: greatly-enlarged Maxim machine gun layout and operation, with a brass water-jacket surrounding the barrel, a brass belt feed-guide on the right side, and a cocking handle that reciprocates as the gun fires; open adjustable sights (sights could vary, depending on whether the particular gun was intended for carriage use, naval use, or anti-aircraft use); a square/rectangular receiver/frame with an identification plaque riveted to the top; and a brass grip/trigger assembly at the bottom rear of the receiver.
- depending on the particular version, these cannon may also be seen with an unusual style of brace/shoulder-stock with one or more hand-grips, to allow a gunner to adjust their aim while leaning into the gun with their left shoulder, and firing with the right hand.
-186 kg/410 pounds, with an overall length of 1850mm.

Manufacturer

- "MAXIM NORDENFELT G&A Co Ld" is marked on an identification plaque on top of the cannon.
- the Maxim Nordenfelt Gun & Ammunition Company, Limited, was a short-lived hostile takeover by Hiram Maxim in 1888 of the "Nordenfelt Guns and Ammunition Company", of Sweden. When Hiram Maxim began selling his recoil-operated machine gun in Europe, his main competitor was seen to be Nordenfelt (the manufacturer of a quick-firing manually-operated multi-barrelled gun, in calibres suitable from infantry to ship-board use), so he purchased the company outright from Nordenfelt. Maxim Nordenfelt licenced the manufacture and use of Maxim-patented machine guns and light cannon to various European powers, including Germany, but the company became defunct after Maxim moved his European operations to his British licensee, Vickers.

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number - serial numbered on an identification plaque on top of the cannon.

Notes

Make

- "MAXIM DEFENSE" is marked on both sides of the firearm.
- "MAXIM DEFENSE INDUSTRIES, LLC" is marked on the left side of the receiver/frame.
- The company logo is marked on the receiver/frame.
- The company logo is comprised of the capital letter "M" inside a hexagon shape or hexagon line-drawing.

Model

- Introduced in 2020.
- "MDX" is marked on the left side of the receiver/frame.
- Combines firearms design features of more than one firearm including "COLT AR15/M16".
- The model "MDX" is available in various manufacturer configurations, including, but not limited to: 1) pistol formation with including pistol brace stock, 2) carbine formation with longer barrel and fore-end stock, & 3) rifle formation with varied shoulder stock options and longer barrel options.
- The model "MDX", as marked on the firearm, may also be known as "SDX" denoting integrated sound suppressor and "PDX" denoting `pistol' configuration.
- Features include: machined, aluminum/titanium/stainless-steel receiver/frame with integral, angled magazine well; interchangeable upper receiver; varied colour and stock options.
- Magazine release located on the side of the firearm.
- Takedown catch/lever located on the side of the firearm.

Manufacturer

- "MAXIM DEFENSE INDUSTRIES, LLC" is marked on the left side of the receiver/frame.
- "MAXIM DEFENSE" is marked on both sides of the firearm.
- The company logo is marked on the receiver/frame.
- The company logo is comprised of the capital letter "M" inside a hexagon shape or hexagon line-drawing.
- "MAXIM DEFENSE" was established in 2013.
- "MAXIM DEFENSE INDUSTRIES, LLC" is located in Saint Cloud, Minnesota, USA.
- "Maxim Defense" began with research and development (R&D) into firearm products, such as varied accessories, stock options and lighter configurations of most common items.
- "Maxim Defense Industries" focused their skill into R&D and in manufacturing weapons and firearms for the U.S. and NATO military forces, government agencies and homeland first responders.
- "Maxim Defense Industries", through sponsorship from the U.S. Army's MCoE (Maneuver Center of Excellence) to become part of the Army Expeditionary Warrior Experiment (AEWE), and produced several specific firearms and associated products for military testing and use, in 2020.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- Gas operated.
Serial Number	- The serial number is marked on the left side of the receiver/frame.
Calibre	- The calibre designation is usually marked on the barrel.
Shots	- Detachable box magazine. - Designed to accept "AR Pattern" type magazines. - Designed to accept "STANAG Pattern" type magazines. - Designed to accept "LANCER" type magazines.
Canadian Law Comments	- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm remains a "Prohibited Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), when removed will not change the "Prohibited Firearm" classification.

Firearm Reference Number (FRN): 118300
Make: Maxim Machine Gun
Model: 1895 Argentine

Summary

Make:	Maxim Machine Gun
Model:	1895 Argentine
Manufacturer:	Deutsche Waffen und Munitionsfabriken (DWM)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
118300 - 1	7.65X53 MAUSER	N/A	720	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MAXIM MACHINE GUN" is not marked on the firearm.
- "MAXIM'S PATENT" is marked on the brass fusee cover.
- "Maxim Machine Gun" is named after it's inventor "Hiram Stevens Maxim".
- Hiram Stevens Maxim was born on February 05, 1840 in Sangerville, Maine, U.S.A.
- Hiram Stevens Maxim founded "The Maxim Gun Company Limited" in London, England, circa 1884.
- "The Maxim Gun Company Limited" merged with "The Nordenfelt Gun & Ammunition Company Limited" to create the "The Maxim-Nordenfelt Guns & Ammunition Company Limited", circa 1888.
- "The Maxim-Nordenfelt Guns & Ammunition Company Limited" and "Vickers, Sons & Company" merged to form "Vickers, Sons & Maxim Limited", circa 1897.
- Hiram Stevens Maxim became a British subject and was knighted by Queen Victory in 1901.
- "Vickers, Sons & Maxim Limited" was succeeded by "Vickers Limited" in 1911.
- Hiram Stevens Maxim died on the 24th of November 1916.

Model

- model designation is not marked on the firearm.
- known as the Model 1895 Argentine, this is the Maxim Nordenfelt pattern 1891 machine gun.
- marked on the brass fusee cover with name of manufacturer (arranged in an oval) and serial number, patent name and date of manufacture (horizontally within the oval), example: DEUTSCHE WAFFEN UND MUNITIONSFABRIKEN . BERLIN . / No. 123 / MAXIM'S PATENT / 1900
- a water cooled medium/heavy machine gun.
- the distinguishing features of all Argentine Model 1895 Maxim machine guns are: the cartridge markings and the cartridge used (7.65mm X 53 Mauser), low serial numbers (1 to 200) and heavy bronze un-fluted cylindrical water jacket.
- other features include: long rectangular steel receiver/frame on trunnions, large brass cartridge feed guide, dual spade grips, thumb trigger, 'old style' charging lever on the right side, folding bar rear sight with V-notch and barley corn front sight.
- this entry represents the second contract of 150 units of Model 1895 Argentine's, manufactured from 1898 to 1901 by Deutsche Waffen und Munitionsfabriken (DWM) with Argentine Army serial numbers 51 to 200.

Manufacturer

- marked on the brass fusee cover:
DEUTSCHE WAFFEN UND MUNITIONSFABRIKEN . BERLIN .

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- recoil operated.
Serial Number	- the serial number on the receiver/frame is usually marked on the left side, above the fusee cover. - serial number range from 51 to 200. - as manufactured, other parts of the firearm bore matching serial numbers.
Calibre	- marked on the brass plate riveted to the top cover adjacent to the feed-guides, in three lines: CARTUCHO / MAUSER ARGENTINO / 1909
Shots	- belt fed machine gun.
Remarks	- Argentina sent out two contracts for the 1895 Maxim machine guns that were virtually identical, except for the serial number and the manufacturer's markings. The 1895 contract was for 50 units, with serial numbers 1 to 50 and was manufactured by Maxim Nordenfelt Guns & Ammunition Co. Ltd., England. The 1898 contract was for 150 units, with serial numbers 51 to 200 and was manufactured by Deutsche Waffen und Munitionsfabriken (DWM), Berlin from 1898 to 1901.

- marked on the brass fusee cover with name of manufacturer (arranged in an oval) and serial number, patent name and date of manufacture (horizontally within the oval), example: MAXIM NORDENFELT GUNS AND AMMUNITION Co. LT . / No. 50 / MAXIM'S PATENT / 1896
- water cooled medium/heavy machine gun.
- the distinguishing features of all Argentine Model 1895 Maxim machine guns are: the cartridge markings and the cartridge used (7.65mm X 53 Mauser), low serial numbers (1 to 200) and heavy bronze un-fluted cylindrical water jacket.
- other features include: long rectangular steel receiver/frame on trunnions, large brass cartridge feed-guide, dual spade grips, thumb trigger, 'old-style' charging lever on the right side, folding bar rear sight with V-notch and barley corn front sight.
- this entry represents the first contract of 50 units of Model 1895 Argentine's manufactured by Maxim Nordenfelt Guns & Ammunition Co. Ltd. starting in 1895. These 50 units originally were marked with Maxim Nordenfelt factory serial numbers from 5537 to 5586 and were re-numbered with Argentine Army serial numbers from 1 to 50.

Manufacturer

- marked on the brass fusee cover:
MAXIM NORDENFELT GUNS AND AMMUNITION Co. LD.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- recoil operated.
Serial Number	- the serial number on the receiver/frame is usually marked on the left side, above the fusee cover. - serial number range from 1 to 50. - as manufactured, other parts of the firearm bore matching serial numbers.
Calibre	- marked on the brass plate riveted to the top cover adjacent to the feed-guides, in three lines: CARTUCHO / MAUSER ARGENTINO / 1909
Shots	- belt fed machine gun.
Remarks	- Argentina sent out two contracts for the 1895 Maxim machine guns that were virtually identical, except for the serial number and the manufacturer's markings. The 1895 contract was for 50 units, with serial numbers 1 to 50 and was manufactured by Maxim Nordenfelt Guns & Ammunition Co. Ltd., England. The 1898 contract was for 150 units, with serial numbers 51 to 200 and was manufactured by Deutsche Waffen und Munitionsfabriken (DWM), Berlin from 1898 to 1901.

Make

- "MAXIM MACHINE GUN" is not marked on the firearm.
- "Maxim Machine Gun" is named after it's inventor "Hiram Stevens Maxim".
- Hiram Stevens Maxim was born on February 05, 1840 in Sangerville, Maine, U.S.A.
- Hiram Stevens Maxim founded "The Maxim Gun Company Limited" in London, England, circa 1884.
- "The Maxim Gun Company Limited" merged with "The Nordenfelt Gun & Ammunition Company Limited" to create the "The Maxim-Nordenfelt Guns & Ammunition Company Limited", circa 1888.
- "The Maxim-Nordenfelt Guns & Ammunition Company Limited" and "Vickers, Sons & Company" merged to form "Vickers, Sons & Maxim Limited", circa 1897.
- Hiram Stevens Maxim became a British subject and was knighted by Queen Victory in 1901.
- "Vickers, Sons & Maxim Limited" was succeeded by "Vickers Limited" in 1911.
- Hiram Stevens Maxim died on the 24th of November 1916.

Model

- "MODEL OF 1904" is marked on top of the receiver/frame.
- this is a water cooled, recoil operated, right hand belt fed, tripod mounted machine gun.

Manufacturer

- "MADE BY" and "VICKERS, SONS & MAXIM LTD" is marked on top of the receiver/frame.

Action

- no longer capable of full automatic fire.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number is located on top cover data plate.
- serial number rationalization as follows:
- the first 90 guns in the USA contract were produced by Vickers Sons & Maxim in England and serial numbered from 1 through 90.
- the next 197 guns were produced by Colt and were serial numbered from 91 to 287.
- the serial numbers are found without prefix or suffix.

Calibre

- "CAL. 30" is marked on top of the receiver/frame.
- the USA Government changed the service cartridge in 1908 from 30-03 GOVT to 30-06 SPRG.

Shots

- belt-fed mechanism.

Other Markings

- marked on the top of the receiver/frame:

- Hiram Stevens Maxim died on the 24th of November 1916.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- not marked as model 1905, or PM1905. - production commenced at Tula in Russia in 1904 and was officially adopted in 1905. - referred to by the Russians as the "Pulemet Maxim 1905" (translates as Machinegun Maxim, Model 1905), usually abbreviated as PM1905. - water cooled, belt fed, medium/heavy machine gun. - the principal distinguishing features of the Russian model 1905 Maxim machinegun are: - the heavy bronze un-fluted cylindrical water jacket, - large cartridge belt feed guides of brass, - fusee cover of brass marked in Cyrillic with the name of the manufacturer, serial number and date of manufacture, and carrying the Imperial Russian Eagle crest. - other features include: long rectangular steel receiver/frame on trunnions, dual spade grips, thumb trigger, right hand charging lever, folding bar rear sight with aperture and barley corn front sight off set to the left. - for Land Service, usually mounted on a universal "Sokolov" mount that has elevating and traversing mechanisms and which consists of a small two wheeled carriage, with a "U" shaped trail and two legs to raise the gun up to form a tri-pod. - mounted on a tripod for Sea Service or static defense. - some have a small dismountable asymmetric gunner's shield of steel mounted ahead of the receiver/frame, behind the barrel jacket. Note 1: Do not confuse with the lighter Russian Model 1910 Maxim machine gun which can be differentiated from the 1905, by the cylindrical smooth or fluted water jacket of fabricated sheet steel and which has a muzzle booster; the 1910 is also often found on a Sokolov mount, some with the asymmetric gunner's shield. Note 2: many of these firearms were up-graded at a later date to then-current standards and may be encountered with parts and features of later models, usually without any markings to indicate up-grading.
Manufacturer	- marked on the fusee cover on the left side in Cyrillic, with the serial number, manufacturer, date of manufacture and caliber (as three-line) in Russian.
Action	- recoil operation.
Serial Number	- serial number on the receiver/frame is usually found on the left side above the fusee cover. Note: as manufactured, the original parts bore matching serial numbers, however, during service maintenance, repair, or re-build, the parts frequently became mis-matched and numbers on other parts of the firearm may not be the same as the serial number on the receiver/frame.
Calibre	- not marked with cartridge designation, bore diameter given as "Three-Line" in Cyrillic on the fusee cover. Note: a large number of Russian Maxim guns PM1905 and PM1910 captured by the Imperial German Forces were converted during World War I to function with the narrower longer rimless 8MM Mauser (7.92mm) German Service cartridge.
Shots	- belt fed. - early Russian Maxims used a cotton cartridge belt and later used the non-disintegrating metal link belt.

Notes

Make

- "MAXIM MACHINE GUN" is not marked on the firearm.
- "Maxim Machine Gun" is named after it's inventor "Hiram Stevens Maxim".
- Hiram Stevens Maxim was born on February 05, 1840 in Sangerville, Maine, U.S.A.
- Hiram Stevens Maxim founded "The Maxim Gun Company Limited" in London, England, circa 1884.
- "The Maxim Gun Company Limited" merged with "The Nordenfelt Gun & Ammunition Company Limited" to create the "The Maxim-Nordenfelt Guns & Ammunition Company Limited", circa 1888.
- "The Maxim-Nordenfelt Guns & Ammunition Company Limited" and "Vickers, Sons & Company" merged to form "Vickers, Sons & Maxim Limited", circa 1897.
- Hiram Stevens Maxim became a British subject and was knighted by Queen Victory in 1901.
- "Vickers, Sons & Maxim Limited" was succeeded by "Vickers Limited" in 1911.
- Hiram Stevens Maxim died on the 24th of November 1916.

Model

- the model designation may not be marked on the firearm.
- features include: typical MG 08 appearance, with steel water jacket; dual spade grips; thumb trigger; muzzle booster; dimensionally smaller lock mechanism than previous models.
- these machineguns saw use in a variety of mountings (tripod, anti-aircraft, wheeled, etc.).

Manufacturer

- the manufacturer or logo thereof is marked on the firearm.

Action

- recoil-operated.

Serial Number

- numbered on the frame/receiver and major component parts.
- national marking practices often applied to these firearms by the purchaser.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - belt-fed firearm.

Remarks
- this model was extensively sold overseas by DWM, with records showing purchases by Belgium, Brazil, Bulgaria, China, Costa Rica, Mexico, Persia, Peru, Romania, Serbia, Switzerland and Turkey.
- both Switzerland and China undertook licenced production of this model after their initial purchases from DWM.

- Hiram Stevens Maxim became a British subject and was knighted by Queen Victory in 1901.
- "Vickers, Sons & Maxim Limited" was succeeded by "Vickers Limited" in 1911.
- Hiram Stevens Maxim died on the 24th of November 1916.

Model

- manufactured from 1910 to 1950.
- unfluted or corrugated steel, water jacket.
- automatic fire: 550 rds/min.
- overall length: 1107 mm.

Type

- medium water-cooled machine gun.

Action

- no longer capable of full automatic fire.

Serial Number

- after 1937 two Cyrillic letters were added to the serial number range as a prefix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- it is a belt-fed firearm.
Other Markings	- The following markings may be located on the spring cover, left or top of the receiver: factory identifier, year and serial number.

- "Vickers, Sons & Maxim Limited" was succeeded by "Vickers Limited" in 1911.
- Hiram Stevens Maxim died on the 24th of November 1916.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- may not be marked on the firearm with model designation; or as "Mark I". - usually marked on the fusee cover with the name of the manufacturer and date of manufacture, example: MAXIM NORDENFELT GUNS & AMMUNITION Co. LD. / 1895 - new manufactured (not converted) watercooled, British Military Service medium/heavy machinegun, known as "Gun, Maxim, .303 Inch, Mark I" adopted in July 1893. - the distinguishing features of this firearm are: no muzzle booster, smaller and lighter receiver/frame and mechanism (than the MARK 1and 2 303 Converted), the cartridge for which it is chambered (303 BRITISH), the Maxim Nordenfelt markings on the fusee cover on the left side of the receiver/frame dated from 1893 to 1897 and the heavy bronze un-fluted cylindrical water jacket. (Bare Weight: 27.22 Kg/60 lb., overall length 107.65cm/42.38 inches) - other features include: long rectangular steel receiver/frame on trunnions, brass cartridge feed guide, dual spade grips, thumb trigger, charging lever on the right side frame, folding bar rear-sight with a V-notch and a Barley-Corn front sight. - Do not confuse with: - the identical firearm marked "Vickers, Sons & Maxim" dated 1898 to 1904. - the identical firearm manufactured by "RSAF, Enfield", dated 1897 to 1917. - the similar but larger "Maxim MARK 1 303 Converted" with muzzle booster, adopted in 1897. (Bare Weight: 29.04Kg/64 lb., overall length 114.3cm/45.0 inches) - the similar but larger "Maxim MARK 2 303 Converted" with muzzle booster, adopted in 1901. (Bare Weight: 18.15Kg/40 lb., overall length 118.1cm/46.5 inches) - a similar firearm named "Vickers Machine Gun (Various MARKS) 303 BRITISH". - the captured German Maxim Machine Gun in 8MM MAUSER, converted to use the 303 BRITISH ammunition, known by the British as the "Gun, Maxim, 'G' .303 Inch".
Manufacturer	- marked as manufactured by "Maxim Nordenfelt Guns & Ammunition Co. Ltd." until 1897, when the name of the firm changed to "Vickers, Sons & Maxim".
Action	- no longer capable of full automatic fire.
Serial Number	- usually number on the receiver/frame above the fusee cover. Note: as manufactured, the original parts bore matching serial numbers; however, during repair or re-build, the parts may become mis-matched, and numbers on other parts of the firearm may not be the same as on the receiver/frame.
Shots	- fed by a 250 cartridge canvas machine gun belt.

- new manufactured (not converted) watercooled, British Military Service medium/heavy machinegun, known as "Gun, Maxim, .303 Inch, Mark I" adopted in July 1893.
- the distinguishing features of this firearm are: no muzzle booster, smaller and lighter receiver/frame and mechanism (than the "MARK 1 and 2 Converted in 303 BRITISH), the cartridge for which it is chambered (303 BRITISH), "ENFIELD" markings on the fusee cover on the left side of the receiver/frame dated from 1896, and the heavy bronze or steel un-fluted cylindrical water jacket. (Bare Weight: 27.22Kg/60 lb., overall length 107.65cm/42.38 inches)
- other features include: long rectangular steel receiver/frame on trunnions, base metal cartridge feed guide, dual spade grips, thumb trigger, charging lever on the right side frame, folding bar rear sight with a V-notch and a Barley-Corn front sight.
- Do not confuse with:
- the identical firearm marked "Maxim Nordenfelt Guns & Ammunition Co. Ltd." dated 1898 to 1904.
- the identical firearm manufactured by "Vickers, Sons & Maxim", dated from 1893.
- the similar but larger "Maxim MARK 1 303 Converted" with muzzle booster, adopted in 1897. (Bare Weight: 29.04Kg/64 lb., overall length 114.3cm/45.0 inches)
- the similar but larger "Maxim MARK 2 303 Converted" with muzzle booster, adopted in 1901. (Bare Weight: 18.15Kg/40 lb., overall length 118.1cm/46.5 inches)
- a similar firearm named "Gun, Machine, Vickers, .303 Inch" (Various MARKS).
- the captured German Maxim Machine Gun in 8MM MAUSER, converted to use the 303 BRITISH ammunition, known by the British as the "Gun, Maxim, 'G' .303 Inch".

Manufacturer

- usually marked on the fusee cover with name of manufacturer and date of manufacture.

Action

- no longer capable of full automatic fire.

Serial Number

- usually number on the receiver/frame, the fusee cover, cartridge feed guides, top of the water jacket, etc.

Note: as manufactured, the original parts bore matching serial numbers; however, during repair or re-build, the parts may become mis-matched, and numbers on other parts of the firearm may not be the same as on the receiver/frame.

Shots

- fed by a 250 cartridge canvas machine gun belt.

- Hiram Stevens Maxim died on the 24th of November 1916.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- may not be marked with model designation; or as "Mark I".
- a watercooled medium/heavy machinegun adopted in 1897 by the British Military Service as "Gun, Maxim, .303 Inch Converted, Mark I".
- markings on the brass fusee cover retain the name of the manufacturer (arranged in an oval), patent name and date of manufacture (1889 to 1892), example: MAXIM NORDENFELT GUNS AND AMMUNITION Co. LT. / MAXIM'S PATENT / 1895
- usually marked on a brass plate on the top cover as: CARTRIDGE / MAGAZINE RIFLE / CORDITE
- other features include: heavy bronze un-fluted cylindrical water jacket, long rectangular steel receiver/frame on trunnions, modified brass cartridge feed guide, dual spade grips, thumb trigger, charging lever on the right side frame, folding bar rear sight with a V-notch off set to the left and a Barley-Corn front sight, likewise off set to the left.
- modifications required to convert this firearm to use 303 BRITISH included: changing to the non-standard light barrel, with adapters, addition of a muzzle booster, new light weight breech mechanism, modified cartridge feed guides and rear sight for 303 BRITISH. (Bare Weight: 30.04Kg/64lb., overall length 114.3cm/45.0 inches)

Note: the muzzle booster attachment is essential to reliably cycle the action of this firearm; it is usually marked, example: MAXIM 303 MK I / AND 303 COND MK II / ATTACHT BALL FIRING / MK II / 1915

- Do not confuse with:
- the similar but smaller, new manufactured "Maxim, MARK 1 303" introduced in 1889, manufactured by Vickers, Sons & Maxim Ltd., or by RSAF Enfield since 1896. (Weight: 27.22Kg/60 lb., overall length 107.65cm/42.38 inches)
- the almost identical "Maxim, MARK 2 303 Converted", adopted in 1901. (Weight: 18.15Kg/40 lb., overall length 118.1cm/46.5 inches)
- the captured German Maxim Machine Gun originally in 8MM MAUSER, converted to use the 303 BRITISH ammunition, known by the British as the "Gun, Maxim, 'G' .303 Inch".

Manufacturer

- the original firearm was manufactured by Maxim Nordenfelt Guns & Ammunition Company Limited, most were converted (but unmarked) by Royal Small Arms Factory, Enfield.

Action

- no longer capable of full automatic fire.

Serial Number

- usually number on the receiver/frame above the fusee cover.

Note: as manufactured, the original parts bore matching serial numbers; however, during repair or re-build, the parts may become mis-matched, and numbers on other parts of the firearm may not be the same as on the receiver/frame.

Calibre

- usually marked on a brass plate on the top cover as:
CARTRIDGE / MAGAZINE RIFLE / CORDITE

Shots

- belt fed, using 250 round canvas machine gun belt.

Remarks

- the original firearm before conversion was the Maxim Gun .45 Inch Mark I. chambered for the British Army in .450 Martini Henry cartridge, and for the British Navy in .45 British Machine Gun Cartridge (sometimes referred to as the Gardner/Gatling cartridge).
- all of the original firearms known as the "Maxim Gun, .45 Inch, Mark I" in military service by the Army and the Navy (except those in Colonial Service), were converted to use the British .303 cartridge by 1915.

Firearm Reference Number (FRN): 118390
Make: Maxim Machine Gun
Model: MARK 2 303 Converted

Summary

Make:	Maxim Machine Gun
Model:	MARK 2 303 Converted
Manufacturer:	Maxim Nordenfelt Guns & Ammunition
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
118390 - 1	303 BRITISH	N/A	718	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MAXIM MACHINE GUN" is not marked on the firearm.
- "MAXIM" or "MAXIM'S PATENT" may be marked on the fusee cover.
- "Maxim Machine Gun" is named after it's inventor "Hiram Stevens Maxim".
- Hiram Stevens Maxim was born on February 05, 1840 in Sangerville, Maine, U.S.A.
- Hiram Stevens Maxim founded "The Maxim Gun Company Limited" in London, England, circa 1884.
- "The Maxim Gun Company Limited" merged with "The Nordenfelt Gun & Ammunition Company Limited" to create the "The Maxim-Nordenfelt Guns & Ammunition Company Limited", circa 1888.
- "The Maxim-Nordenfelt Guns & Ammunition Company Limited" and "Vickers, Sons & Company" merged to form "Vickers, Sons & Maxim Limited", circa 1897.
- Hiram Stevens Maxim became a British subject and was knighted by Queen Victory in 1901.
- "Vickers, Sons & Maxim Limited" was succeeded by "Vickers Limited" in 1911.
- Hiram Stevens Maxim died on the 24th of November 1916.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- model designation on the firearm usually marked: MARK II
- a watercooled medium/heavy machinegun adopted in 1901 by the British Military Service as "Gun, Maxim, .303 Inch Converted, Mark II
- modifications required to convert this firearm to use 303 BRITISH included: changing to the then currently produced service heavy barrel, with adapters, addition of a muzzle booster, new lighter breech mechanism, modified cartridge feed guides and new rear sight for 303 BRITISH. (Bare Weight: 18.15Kg/40lb., overall length 118.1cm/46.5 inches)
- usually marked on a brass plate on the top-cover as: CARTRIDGE / MAGAZINE RIFLE / CORDITE
- markings on the brass fusee cover retains the name of the manufacturer (arranged in an oval), patent name and date of manufacture (1889 to 1892), example: MAXIM NORDENFELT GUNS AND AMMUNITION Co. LT. / MAXIM'S PATENT / 1895
- other features include: the heavy bronze un-fluted cylindrical water jacket, long rectangular steel receiver/frame on trunnions, large brass cartridge feed guide, dual spade grips, thumb trigger, charging lever on the right side frame, folding bar rear sight with a V-notch off set to the left and a Barley-Corn front sight, likewise off set to the left.
- Do not confuse with:
- the similar but smaller, new manufactured British "Maxim MARK 1 303" introduced in 1889, manufactured by Vickers, Sons & Maxim Ltd., or by RSAF Enfield commencing in 1896. (Bare Weight: 27.22Kg/60 lb., overall length 107.65cm/42.38 inches)
- the initial conversion of this gun to use the 303 BRITISH cartridge with the light weight barrel, adopted in 1897 as the "Maxim MARK 1 303 Converted". (Bare Weight: 29.04Kg/64 lb., overall length 114.3cm/45.0 inches)
- the captured German Maxim Machine Gun originally in 8MM MAUSER converted to use the 303 BRITISH ammunition, known by the British as the "Gun, Maxim, 'G' .303 Inch".

Manufacturer

- the original firearm was manufactured by Maxim Nordenfelt Guns & Ammunition Company Limited, most were converted (but unmarked) by Royal Small Arms Factory, Enfield.

Action

- muzzle-boosted, recoil operation.

Serial Number

- usually number on the receiver/frame above the fusee cover.
Note: as manufactured, the original parts bore matching serial numbers; however, during repair or re-build, the parts may become mis-matched, and numbers on other parts of the firearm may not be the same as on the receiver/frame.

Calibre

- usually marked on a brass plate on the top cover adjacent to the cartridge feed guides, as: CARTRIDGE / MAGAZINE RIFLE / CORDITE

Shots

- belt fed, using 250 round canvas machine gun belt.

Remarks

- the original firearm was the Maxim Gun .45 Inch Mark I, chambered for the British Army in .450 Martini Henry cartridge, and for the British Navy in .45 British Machine Gun Cartridge (sometimes referred to as the Gardner/Gatling cartridge): this firearm may also have been up-dated from the "Maxim Gun, .303 Converted, Mark I".
- all of the original firearms known as the "Maxim Gun, .45 Inch, Mark I" in military service by the Army and the Navy (except those in Colonial Service), were converted to use the British .303 cartridge by 1915.

48548 - 1	8MM MAUSER	N/A	718	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MAXIM MACHINE GUN" is not marked on the firearm.
- "Maxim Machine Gun" is named after it's inventor "Hiram Stevens Maxim".
- Hiram Stevens Maxim was born on February 05, 1840 in Sangerville, Maine, U.S.A.
- Hiram Stevens Maxim founded "The Maxim Gun Company Limited" in London, England, circa 1884.
- "The Maxim Gun Company Limited" merged with "The Nordenfelt Gun & Ammunition Company Limited" to create the "The Maxim-Nordenfelt Guns & Ammunition Company Limited", circa 1888.
- "The Maxim-Nordenfelt Guns & Ammunition Company Limited" and "Vickers, Sons & Company" merged to form "Vickers, Sons & Maxim Limited", circa 1897.
- Hiram Stevens Maxim became a British subject and was knighted by Queen Victory in 1901.
- "Vickers, Sons & Maxim Limited" was succeeded by "Vickers Limited" in 1911.
- Hiram Stevens Maxim died on the 24th of November 1916.

Model

- in production from 1916 to 1918.
- model designation is marked on the top cover as "M.G.08/15."
- features include: water cooling jacket surrounding the barrel, charging handle located on the right side of the receiver/frame, wood buttstock and pistol grip and a bipod mounted forward of the receiver/frame.
- a drum that holds a 100 round metal reinforced cloth belt may be mounted on the right side of the receiver/frame.

Manufacturer

- manufacturer's designation is usually marked on the top cover as:
"M.A.N. NURNBERG".

Action

- gas assisted recoil operated.

Serial Number

- serial number is usually marked on the top cover and on several other critical components.
- usually has four digits and may include a lower case letter.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - belt fed.

Remarks
- the MG08/15 was a lightened version of the MG08 intended to be used as a light machine gun.
- the weight reduction was accomplished by thinning the sides of the receiver/frame and reducing the volume of the water jacket.

Notes

Make

- "MAXIM MACHINE GUN" is not marked on the firearm.
- "Maxim Machine Gun" is named after its inventor "Hiram Stevens Maxim".
- Hiram Stevens Maxim was born on February 05, 1840 in Sangerville, Maine, U.S.A.
- Hiram Stevens Maxim founded "The Maxim Gun Company Limited" in London, England, circa 1884.
- "The Maxim Gun Company Limited" merged with "The Nordenfelt Gun & Ammunition Company Limited" to create the "The Maxim-Nordenfelt Guns & Ammunition Company Limited", circa 1888.
- "The Maxim-Nordenfelt Guns & Ammunition Company Limited" and "Vickers, Sons & Company" merged to form "Vickers, Sons & Maxim Limited", circa 1897.
- Hiram Stevens Maxim became a British subject and was knighted by Queen Victory in 1901.
- "Vickers, Sons & Maxim Limited" was succeeded by "Vickers Limited" in 1911.
- Hiram Stevens Maxim died on the 24th of November 1916.

Model

- model designation appears on the top cover as: M.G.08/15
- manufactured from 1916 to 1918.
- the Maxim designed MG 08 machine gun was redesigned, modified, and lightened, to increase its portability: this variant was adopted in 1915, and designated as the M.G.08/15.
- medium machine gun, water cooled.
- features a stepped receiver/frame, lightened barrel, reduced water capacity barrel jacket, fitted with a sling, barrel jacket mounted bi-pod, wood shoulder stock and a trigger group with a pistol grip under the receiver/frame.
- the canvas cartridge belt feeds from the right side to the left: the firearm is often encountered with an attached drum housing a 100 round belt.
- may or may not be equipped with a muzzle booster/flash suppressor.

Manufacturer

- manufacturer's name is marked on the top-cover as "S.& H." and may be marked in full on the fusee spring-cover on the left side of the receiver/frame.

Action

- full automatic only.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the receiver/frame serial number is usually located on the left side of the receiver/frame hump, above the fusee spring-cover. - these machineguns were sequentially serial numbered by each manufacturer, at the beginning of each year of production (1916, 1917, and 1918), usually starting at 1 or 0001 and going to 9999, then proceeding to 1a or 0001a up to 9999a, then 1b to 9999b, then 1c to 9999c, and so on. - Note 1: some have been reported with five digits. - Note 2: as manufactured, the original parts bore matching serial numbers, however, during service maintenance or repair the parts frequently became mis-matched and numbers on other parts of the firearm may not be the same as the serial number on the receiver/frame.
Shots	- belt fed machine gun.
Other Markings	- the top cover is usually marked in five lines, starting with the serial number and ending with the date of manufacture; example: 1234a / M.G.08/15 / S.&H. / BERLIN / 1917
Remarks	- because the principal manufacturer of this firearm was Spandau, and most MG08/15s carried that name, the troops frequently referred to these machineguns as "Spandaus".

Notes

Make

- "C.MAYBURY" is usually marked on the firearm.

Model

- the model is not marked on the firearm.
- this is a large-calibre handgun of the type known as a "howdah pistol", named after the palanquin used on top of elephants when hunting tigers in India; these pistols were normally carried in holsters on the side of the basket, for emergency use when a tiger came too close to the elephant, the howdah, or its occupants.
- features include: blued or browned finish; Damascus barrels; open fixed sights; hinged under-barrel ram-rod; checkered walnut forearm and grip; dual triggers; and exposed manually-cocked hammers on back-action sideplates.

Manufacturer

- "C.MAYBURY" is usually marked on the firearm.
- Charles Maybury was a gunmaker in Birmingham, England from 1834 to 1886.

Action

- side by side configuration

Firearm Reference Number (FRN): 80071
Make: Mayer, R A
Model: Crossbow

Summary

Make:	Mayer, R A
Model:	Crossbow
Manufacturer:	Aguirre y Aranzabal (AYA)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Multi-Barrel
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
80071 - 1	12 GA X 2 3/4"	2	480	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	
80071 - 2	16 GA X 2 3/4"	2	711	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "CROSSBOW " and "R. A. MAYER & CO." was observed marked on the right barrel.
- "Made in Spain" was observed marked on the left barrel.

Model

- "CROSSBOW " and "R. A. MAYER & CO." was observed marked on the right barrel.
- features include: round side by side barrels; front hinged receiver/frame with top tang mounted break open action release lever; hammerless; wood forearm and semi-pistol grip buttstock; blued barrels; silver, engraved receiver/frame.

Manufacturer

- the "AYA" logo is marked on the water table of an observed example.

Action

- side by side barrel configuration, hinged barrel design.

Serial Number

- serial number is marked on the water table of the receiver/frame.
- observed serial numbers consisted of five numbers without a letter prefix or suffix.
- "No" in front of the serial number is not a letter prefix.
- in 1995, the Spanish government instituted a new system for firearm's serial numbering. This system incorporated the code number of the gunmaker/manufacturer, weapon code, serial number sequence, and year of manufacturer.
- an example of a serial number is as follows: "16 - 03 - #0# - 95".
- serial number break down, the first two numbers (16) are the code numbers for the manufacture, the next two numbers (03) are the code numbers for shotgun, the next Numbers are the serial number sequence and the last two numbers (95) are the year of manufacture.

Notes

Make

- appears on the left side of the receiver/frame as "EDWARD MAYNARD PATENTEE"
- designed by Edward Maynard in the 1850's.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this is a entry encompassing all Maynard Sporting Rifles manufactured by Massachusetts Arms from 1873 to 1890.
- basic model designation (1873 or 1882) appears on the side of the receiver/frame, sub model designation not marked.
- under lever tipping barrel breech loading rifle.
- exposed center hammer.
- American walnut buttstock and may or may not have a forearm.
- may have simple sporting rifle or elaborate target sights.
- noticeable gap between breech of barrel and front of the face of the receiver to accommodate Maynard center fire proprietary cartridges which have an extremely thick rim, exceptions being rifles chambered for 22 RF LONG and 45-70 GOVT.
- offered also in smoothbore configuration utilizing Maynard center fire proprietary shotshells.
- auxiliary barrel in other calibres were available from the manufacturer.

Manufacturer

- appears on the right side of the receiver/frame as:
"MANUFACTURED BY MASS ARMS CO. CHICOPEE FALLS"

Make: MB
Model: MB

Summary

Make:	MB
Model:	MB
Manufacturer:	Verney-Carron
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Semi-Automatic
Country of Manufacturer:	FRANCE
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
118807 - 2	12 GA X 2 3/4"	3	660	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
118807 - 1	12 GA X 2 3/4"	3	711	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "MB" and "Baschieri & Pellagri" is marked on the bottom of the receiver/frame forward of the loading port. - MB is believed to be the acronym for Manfredi & Baschieri and Baschieri & Pellagri (B&P) is an ammunition manufacturer located in Bolonia, Italy since 1885.
Model	- "MB" is marked on the firearm. - features include: a very unique, modular designed firearm that incorporates a black or dual finished alloy lower receiver/frame; bead front sight; blued barrel with a vented rib; checkered European walnut buttstock and forearm and a cross bolt safety located behind the trigger.
Manufacturer	- "VERNEY-CARRON" and "SAINT-ETIENNE" are marked on the firearm.
Action	- gas operated.
Serial Number	- serial number is marked on the bottom of the receiver/frame forward of the loading port. - observed serial number had a "A" prefix followed by five numbers.
Calibre	- the calibre designation is marked on the barrel.
Shots	- tubular magazine mounted under the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- the lower assembly that contains the trigger group and is marked with the serial number is the receiver/frame.

Other Markings

- the barrels may have a different maker's designation. Samples were presented that were marked "VERNEY-CARRON", a barrel maker in France.
- "Baschieri & Pellagri", an Italian ammunition manufacturer and importer may be marked on the upper assembly.

- 50 BMG Tactical was originally sold as the Boomer Tactical and than as the TAC-50.
- 50 BMG Tactical is a manually operated, turn-bolt design, single shot rifle with a McMillan fiberglass stock with a detachable butt stock.
- features include: free floating, heavy round fluted barrel with a threaded muzzle for a muzzle break; 50 BMG receiver/frame is drilled and tapped for scope mounts; exterior surface of the bolt has spiral flutes; adjustable trigger; two piece McMillan TAC-50 pistol grip stock with a detachable butt stock and bipod stud; matte black, O.D. green, tan, dark gray finish or camouflage colour schemes finish.
- 50 BMG Tactical is normally fitted with a bi-pod.
- overall length is 1448 mm (57.0"), and average weight is 11.8 kgs (26 lbs).
- 50 BMG Tactical was also available as a repeater version.
- Rifling characteristics: 6 grooves, right hand pitch, 1 turn in 15 inches. (381mm)

Action

- turn-bolt design.

Serial Number

- serial number is usually marked on the left side of the receiver/frame.
- serial number rationalization:
- observed serial number consisted of a three letter "BMG" prefix, three numbers, and a letter suffix.

Calibre

- calibre is marked on the barrel.

Notes

Make

- "McBros" and "Phoenix, AZ, USA" is usually marked on the side of the receiver/frame.
- "McBros" and "McMillan Bros" were trade names/trademarks used by the "McMillan Brothers".
- "McBros Rifle" and "McMillan Brothers Rifle Company" were owned by Rock McMillan and Kelly McMillan.

Model

- introduced in 1993.
- model is intended for use by precision shooters.
- "MCR" is built on a Remington model 700 receiver/frame mated to a pillar bedded McMillan Fiberglass Stocks Inc stock with an adjustable butt spacer system.
- features include: "match grade" stainless steel barrel, matte black polymer finish, and a tuned Remington "style" trigger.
- options include; stocks with adjustable cheek piece, accessory rail, muzzle brake, bi-pod, fluted barrel and upgraded trigger.
- this particular version is also known as the "MCR" model which denotes "McBros Company Remington" receiver/frame, not to be confused with the "MCRT" which uses a McMillan produced Remington "type' receiver/frame.

Manufacturer

- MCR Tactical is built on a Remington receiver/frame all of the original Remington markings remain intact.

Serial Number

- serial number is stamped on receiver/frame, this model uses the Remington serial number rationalization.

Calibre

- calibre is marked on the barrel, other calibres are available on customer request.

Notes

Make

- "McBros" and "Phoenix, AZ, USA" is usually marked on the side of the receiver/frame.
- "McBros" and "McMillan Bros" were trade names/trademarks used by the "McMillan Brothers".
- "McBros Rifle" and "McMillan Brothers Rifle Company" were owned by Rock McMillan and Kelly McMillan.

Model

- introduced in 1993.
- "McBros, Phoenix AZ Model MCRT" is marked on the right side of the receiver/frame.
- features include: "match grade" stainless steel barrel, matte black polymer finish and a tuned Remington-style trigger.
- options include: stocks with adjustable cheek piece; accessory rail; muzzle brake; left or right hand action; bi-pod; fluted barrel and upgraded trigger.
- this is a single shot version of MCRT action series.
- this is a generic entry for those models with "Model MCRT" marked on the receiver/frame, this receiver/frame is used as the basis for several McBros rifles, all of which are simply marked as model "MCRT". Other entries exist that may better identify the firearm being examined.
- all variants are built on a McBros produced Remington model 700 "type" (styled after the model 700, but not identical to it) receiver/frame mated to a pillar bedded McMillan Fiberglass Stocks Inc stock with an adjustable butt spacer system.
- available in long or short action lengths and in left or right hand versions.
- features normally include: "match grade" stainless steel barrel, matte black polymer finish, and a tuned Remington "style" trigger.
- options include; stocks with adjustable cheek piece, accessory rail, muzzle brake, bi-pod, fluted barrel and upgraded trigger.
- variants include the "Hunter" series of rifles, which includes the "American", "Yukon" and "Outdoorsman", and the "Tactical" model..
- McBros also produces rifles built on a Remington model 700 receiver/frame known as the "MCR" model which denotes "McBros Company Remington" receiver/frame, not to be confused with the "MCRT" which uses a McBros produced Remington "type" receiver/frame.

Serial Number

- serial number is marked on the front of the receiver/frame.
- example observed with three digits followed by one letter, one digit and one letter (000X0X).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre is marked on the barrel, other calibres are available on customer request.
Other Markings	- also may be marked on the barrel: "LAZZORONI TITAN 8.59".

Notes

Make

- "McBros" and "Phoenix, AZ, USA" is usually marked on the side of the receiver/frame.
- "McBros" and "McMillan Bros" were trade names/trademarks used by the "McMillan Brothers".
- "McBros Rifle" and "McMillan Brothers Rifle Company" were owned by Rock McMillan and Kelly McMillan.

Model

- introduced in 1993.
- "McBros, Phoenix AZ Model MCRT" is marked on the side of the receiver/frame.
- "MCRT American Hunter" is built on a McBros produced Remington model 700 "type" (styled after the model 700, but not identical to it) receiver/frame mated to a pillar bedded McMillan Fiberglass Stocks Inc stock.
- available in long or short action lengths and in left or right hand versions.
- features normally include: no iron sights, Sako style extractor, "match grade" stainless steel barrel, matte black polymer finish, and a tuned Remington "style" trigger and safety.
- other variants of the "Hunter" series of rifles, include the "Yukon" (distinguished by the large No 6 barrel contour and iron sights) and "Outdoorsman" (a complete package including an optical sight).
- McBros also produces rifles built on a Remington model 700 receiver/frame known as the "MCR" model which denotes "McBros Company Remington" receiver/frame, not to be confused with the "MCRT" which uses a McBros produced Remington "type" receiver/frame.

Serial Number

- serial number is stamped on receiver/frame, normally incorporates an alpha prefix.
- custom serial numbers are available on request.

Calibre

- calibre is marked on the barrel.

Notes

Make

- "McBros" and "Phoenix, AZ, USA" is usually marked on the side of the receiver/frame.
- "McBros" and "McMillan Bros" were trade names/trademarks used by the "McMillan Brothers".
- "McBros Rifle" and "McMillan Brothers Rifle Company" were owned by Rock McMillan and Kelly McMillan.

Model

- introduced in 1996.
- "McBros, Phoenix AZ Model MCRT" is marked on the side of the receiver/frame.
- "MCRT Outdoorsman Hunter" is marketed as a complete "Package" with optical sights, the firearm is built on a McBros produced Remington model 700 "type" (styled after the model 700, but not identical to it) receiver/frame mated to a pillar bedded McMillan Fiberglass Stocks Inc stock.
- available in long or short action lengths and in left or right hand versions.
- features normally include: optical sights, Sako style extractor, "match grade" fluted stainless steel barrel, muzzle brake, matte black polymer finish, and a tuned Remington "style" trigger and safety.
- other variants of the "Hunter" series of rifles, include the "Yukon" (distinguished by the large No 6 barrel contour and iron sights) and "American" (same as the Outdoorsman but as a rifle only).
- McBros also produces rifles built on a Remington model 700 receiver/frame known as the "MCR" model which denotes "McBros Company Remington" receiver/frame, not to be confused with the "MCRT" which uses a McBros produced Remington "type" receiver/frame.

Serial Number

- serial number is stamped on receiver/frame, normally incorporates an alpha prefix.
- custom serial numbers are available on request.

Calibre

- calibre is marked on the barrel.

Notes

Make

- "McBros" and "Phoenix, AZ, USA" is usually marked on the side of the receiver/frame.
- "McBros" and "McMillan Bros" were trade names/trademarks used by the "McMillan Brothers".
- "McBros Rifle" and "McMillan Brothers Rifle Company" were owned by Rock McMillan and Kelly McMillan.

Model

- introduced in 1993.
- "McBros, Phoenix AZ Model MCRT" is marked on the side of the receiver/frame.
- "MCRT Tactical" is intended for use by precision shooters.
- "MCRT Tactical" is built on a McBros produced Remington model 700 "type" (styled after the model 700, but not identical) receiver/frame mated to a pillar bedded McMillan Fiberglass Stocks Inc stock with an adjustable butt spacer system.
- features include: "match grade" stainless steel barrel, matte black polymer finish, and a tuned Remington "style" trigger.
- options include; stocks with adjustable cheek piece, accessory rail, muzzle brake, bi-pod, fluted barrel and upgraded trigger.
- this particular version, when built on a Remington model 700 receiver/frame is known as the "Tactical" or "MCR" model which denotes "McBros Company Remington" receiver/frame, not to be confused with the "MCRT" which uses a McBros produced Remington "type" receiver/frame.

Action

- turn bolt design.

Serial Number

- serial number is stamped on receiver/frame, this model uses the Remington serial number rationalization.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre is marked on the barrel, other calibres are available on customer request.
Shots	- detachable box magazine.
Other Markings	- the "MCRT" receiver/frame is used as the basis for several McBros rifles, all variants are simply marked as model "MCRT".

Firearm Reference Number (FRN): 5030
Make: McComas, Alexander
Model: Single Barrel

Summary

Make:	McComas, Alexander
Model:	Single Barrel
Manufacturer:	
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
5030 - 1	4 GA X 4"	1	1143	Antique AFR, Section 1, para. 5	Non-Commercial Customization	

Notes

Make	- "ALEXANDER McCOMAS" is usually marked on the firearm. - Alexander McComas was a gunsmith, manufacturer and importer based at 51 South Calvert Street, Baltimore, Maryland, between 1821 and 1889.
Model	- the model is not marked on the firearm; this is a descriptor of the firearm type. - this is one of several versions of a single-barrel hinge-action shotgun manufactured by or for Alexander McComas prior to 1889. - features usually include: blued or browned finish; round barrel with octagonal breech; checkered walnut forearm and pistol-grip stock;manually-cocked hammer on a sideplate; top, side, or bottom lever opening.
Action	- "tip-down" single-shot.
Serial Number	- serial-numbered on the receiver/frame.

Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
146727 - 1	69 FLINTLOCK	1	1111	Antique CC 84(1) "antique firearm"	Manufacturer Specifications and Commercial Customization	
146727 - 2	69 PERCUSSION	1	1111	Antique CC 84(1) "antique firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the manufacturer is marked on the lockplate as "MCCORMICK".

Model

- the model is not marked on the firearm
- this is an example of the 1797 Pennsylvania Contract Flintlock Musket (a copy of the French Charleville 1763 Flintlock Musket), adopted by the State of Pennsylvania in 1797 and supplied by Robert McCormick, of Globe Mills, Pennsylvania,, under a contract issued by the state government to arm the state militia.
- known McCormick 1797 muskets are marked "MCCORMICK" on the lock plate, along with a Pennsylvania property mark of "CP" (Commonwealth of Pennsylvania); Henry also produced identical muskets for the US government, with a property mark of "US", and for the State of Virginia, with barrels marked with county and/or regimental numbers.
- these muskets may or may not have lock plate dates indicating manufacture in the years immediately post-dating 1797 (1797 through circa 1808).
- features include: browned finish; fixed open sights; iron mountings and three barrel bands; an under barrel ram-rod; flintlock mechanism with cock and frizzen on the right-side lock plate; sling swivels at second barrel band and front of trigger-guard; and maple straight-grip stock with an iron butt plate.
- these firearms may also be seen converted to percussion ignition.

Manufacturer

- the manufacturer is marked on the lock plate as "MCCORMICK".
- Robert McCormick was an industrialist based in Globe Mills, Pennsylvania from the mid-1700s to early 1800s, who produced 1798-pattern muskets under contract to the United States, the State of Virginia and the State of Pennsylvania.

Action

- muzzle loaded flintlock single-shot.

Barrel

- barrel lengths may vary slightly.

Firearm Reference Number (FRN): 24606
Make: McLoughlin, Charles & Sons
Model: Webley WG

Summary

Make:	McLoughlin, Charles & Sons
Model:	Webley WG
Manufacturer:	Webley
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
24606 - 1	455 REV	6	152	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
24606 - 2	455 REV	6	152	Antique AFR, Section 1, para. 7	Manufacturer Specifications and Commercial Customization	

Notes

Make

- Charles McLoughlin & Sons, Cheltenham" retailed this "Webley W.G. Model 1889".
- Charles McLoughlin was a gun maker located at 89 High Street, Cheltenham, Gloucestershire, England from 1858 to circa 1894.
- Charles McLoughlin also had facilities at Moddle Street, Stroud, England circa 1878.
- Charles McLoughlin & Sons was a gun maker located at 89 High Street, Cheltenham, Gloucestershire, England from circa 1889 to circa 1901.

Model

- ""W.G." MODEL 1889" is marked on the left side of the firearm.
- "WG" model series is a design-improved version of the former Webley Improved Government revolver of circa 1881-1885. The letters WG are often associated with the name Webley-Green, however, research has indicated that WG is understood to be the acronym for "Webley Government".
- manufactured from1886 until circa 1902.
- double action, top breaking with simultaneous ejection.
- typical characteristics;
- large rounded barrel-to-frame hinge at front of receiver/frame designed for greater rigidity and strength.
- large thumb-actuated barrel release lever on left side of receiver/frame; this latch may also be referred to as the Webley "stirrup" or "bridle" latch.
- may have bird's head type grip or square butt configuration, with or without lanyard ring on bottom butt strap.
- trigger guard is forged integrally with the receiver/frame.
- grip frame is noticeably humped behind the hammer.
- left side of receiver/frame has a removable "access" plate held in place by two slot-head screws.
- may have distinctively shaped "church steeple" type cylinder fluting with later models having the more traditional round shaped fluting; research has indicated that the use of the "church steeple" type of fluting ceased circa 1893.
- research indicates that the practice of putting the date of manufacture on the firearm ceased circa 1893.
- available in blued or nickel plated finish.
- sub-calibre conversion units were available for this firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer
- "WEBLEY'S" or "WEBLEY" over "PATENTS" is usually marked on the side of the receiver/frame.
- "P. Webley & Son / Webley & Scott" trademark logo of a "Winged Bullet" over "W&S" is usually marked on the side of the receiver/frame.

Canadian Law Comments
- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- McMillan Firearms' "M" logo is usually marked on the right side of the receiver/frame.
- McMillan Firearms' "M" logo and "McMILLAN" over "PHOENIX, ARIZONA USA" is usually marked on the left side of the receiver/frame.

Model

- introduced in 2007 by McMillan Firearms Manufacturing, LLC of Phoenix, Arizona.
- TAC-50 was originally manufactured by McMillan Brothers.
- TAC-50 was originally sold as the Boomer Tactical (50 BMG Tactical) by McBros and McMillan Brothers from 1993 to 2007.
- TAC-50 is a manually operated, turn-bolt design, repeating rifle with a McMillan fiberglass stock with a detachable butt stock.
- features include: free floating, heavy round fluted barrel with a threaded muzzle for a muzzle break; 50 BMG receiver/frame is drilled and tapped for scope mounts; exterior surface of the bolt has spiral flutes; adjustable trigger; two piece McMillan TAC-50 pistol grip stock with a detachable butt stock and bipod stud; matte black, O.D. green, tan, dark earth, gray finish or camouflage colour schemes finish.
- TAC-50 is normally fitted with a bi-pod.
- overall length is 1448 mm (57.0"), and average weight is 11.8 kgs (26 lbs).
- Rifling Characteristics: 6 grooves, right hand pitch, 1 turn in 15 inches. (381mm)

Manufacturer

- McMillan Firearms' "M" logo is usually marked on the right side of the receiver/frame.
- McMillan Firearms' "M" logo and "McMILLAN" over "PHOENIX, ARIZONA USA" is usually marked on the left side of the receiver/frame.

Action

- turn-bolt design.

Serial Number

- serial number is usually marked on the left side of the receiver/frame.
- observed serial number consisted of a three letter "BMG" prefix, three numbers, and a letter suffix.

Barrel

- special order customized barrels are available in any length, with or without flutes, tapered or straight.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre is marked on the barrel.
Shots	- detachable box magazine.
Remarks	- the muzzle brake has a model number stamped on the top surface: "McMillan Bros MODEL 98A". It is not clear whether this is the model name / number of the muzzle brake or an AKA for the firearm. - the McMillan fiberglass stock is adjustable for length-of-pull, has a pistol grip and is specifically designed for use with a bi-pod.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make	- "MCMILLAN & CO. PHOENIX AZ" is usually marked on the right side of the slide.
Model	- "WOLVERINE" is marked on the right side of the receiver/frame. - imported between 1992 and 1995. - Wolverine Competition Match has a 6 inch/152MM non-compensated barrel. - Wolverine Combat has a 5 1/2 inch/140MM compensated barrel. - features include: Colt 1911-A1 style receiver/frame; interchangeable barrels; wood or synthetic grips; various finishes; adjustable rear sight; extended slide stop; skelotonized trigger.
Manufacturer	- "CASPIAN ARMS LTD. HARDWICK VT USA" is marked on the right side of the slide. - Caspian Arms Limited has been in business since 1983. - Caspian Arms Limited moved to Wolcott, Virginia circa 2004. - Caspian Arms Limited is a manufacturer of carbon steel, stainless steel, titanium or alunimum alloy 1911-A1 receivers. - Caspian Arms Limited is a manufacturer of carbon steel, stainless steel or titanium slides for 1911-A1 receivers. - Caspian Arms Limited sells just slides, or just receivers, or a combination, as requested by the customer. In many cases, the customer may choose to complete the receiver with components from other industry manufacturers. - McMillan pistols were assembled using Caspian Arms receivers/frames and Peters-Stahl barrels and slides. - Peters-Stahl is a manufacturer based in Paderborn, Germany, that specializes in producing several types of 1911-style semi-automatic pistols; their factory logo consists of "PETERS" over "STAHL", with the loop of the "P" in "Peters" extending out over both words. This logo is marked on the left side of the slide and on the right side of the barrel and is visible through the ejection port.
Action	- recoil operated.
Serial Number	- the serial number is marked on the right side of the receiver/frame. - unknown serial number rationalization. - observed serial number consisted of five sequential numbers without a letter prefix or suffix.
Calibre	- calibre designation is marked on the barrel and is visible through the ejection port.
Shots	- detachable box magazine.

Notes

Make

- "McMillan Bros" and "Phoenix, AZ, USA" is usually marked on the side of the receiver/frame.
- "McBros" and "McMillan Bros" were trade names/trademarks used by the "McMillan Brothers".
- "McBros Rifle" and "McMillan Brothers Rifle Company" were owned by Rock McMillan and Kelly McMillan.

Model

- manufactured from 1998 to 2007.
- TAC-50 is a manually operated, turn-bolt design, single shot rifle with a McMillan fiberglass stock with a detachable butt stock.
- features include: free floating, heavy round fluted barrel with a threaded muzzle for a muzzle break; 50 BMG receiver/frame is drilled and tapped for scope mounts; exterior surface of the bolt has spiral flutes; adjustable trigger; two piece McMillan TAC-50 pistol grip stock with a detachable butt stock and bipod stud; matte black, O.D. green, tan, dark gray finish or camouflage colour schemes finish.
- TAC-50 is normally fitted with a bi-pod.
- overall length is 1448 mm (57.0"), and average weight is 11.8 kgs (26 lbs).
- TAC-50 is also available as a repeater.
- rifling characteristics: 6 grooves, right hand pitch, 1 turn in 15 inches (381mm).

Action

- turn-bolt design.

Serial Number

- serial number is usually marked on the left side of the receiver/frame.
- observed serial number consisted of a three letter "BMG" prefix, three numbers, and a letter suffix.

Notes

Make

- "McMillan Bros" and "Phoenix, AZ, USA" is usually marked on the side of the receiver/frame.
- "McBros" and "McMillan Bros" were trade names/trademarks used by the "McMillan Brothers".
- "McBros Rifle" and "McMillan Brothers Rifle Company" were owned by Rock McMillan and Kelly McMillan.

Model

- manufactured from 1998 to 2007.
- TAC-50 was originally sold as the Boomer Tactical (50 BMG Tactical).
- TAC-50 is a manually operated, turn-bolt design, repeating rifle with a McMillan fiberglass stock with a detachable butt stock.
- features include: free floating, heavy round fluted barrel with a threaded muzzle for a muzzle break; 50 BMG receiver/frame is drilled and tapped for scope mounts; exterior surface of the bolt has spiral flutes; adjustable trigger; two piece McMillan TAC-50 pistol grip stock with a detachable butt stock and bipod stud; matte black, O.D. green, tan, dark gray finish or camouflage colour schemes finish.
- TAC-50 is normally fitted with a bi-pod.
- overall length is 1448 mm (57.0"), and average weight is 11.8 kgs (26 lbs).
- TAC-50 is also available as a single-shot.
- rifling characteristics: 6 grooves, right hand pitch, 1 turn in 15 inches. (381mm)

Action

- turn-bolt design.

Serial Number

- serial number is usually marked on the left side of the receiver/frame.
- serial number rationalization:
- observed serial number consisted of a three letter "BMG" prefix, three or four numbers with or without a letter suffix.

Barrel

- special order customized barrels are available in any length, with or without flutes, tapered or straight.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre is marked on the barrel.
Shots	- detachable box magazine.
Remarks	- the muzzle brake has a model number stamped on the top surface: "McMillan Bros MODEL 98A. It is not clear whether this is the model name / number of the muzzle brake or an AKA for the firearm. - the McMillan fibreglass stock is adjustable for length-of-pull, has a pistol grip and is specifically designed for use with a bi-pod.

Notes

Make

- "McMillan Bros" and "Phoenix, AZ, USA" is usually marked on the side of the receiver/frame.
- "McBros" and "McMillan Bros" were trade names/trademarks used by the "McMillan Brothers".
- "McBros Rifle" and "McMillan Brothers Rifle Company" were owned by Rock McMillan and Kelly McMillan.

Model

- "TUBB 2000" is marked on the right side of the receiver/frame.
- introduced 2000.
- TUBB is an acronym for "Tubb Universal Bi-camming Bolt-action".
- turn bolt operated, detachable box magazine.
- this is a precision-built target rifle designed with "switch barrel" technology to accommodate ease of barrel/calibre changing.
- has many fully adjustable components, i.e., trigger, buttstock, tubular forend.
- full pistol grip, patented adjustable elastomer recoil reducer.
- action is designed with a solid top and angled loading port on right side of receiver/frame for ease of loading single rounds.
- the "Bi-camming" bolt design allows for a very smooth and easy operation of the bolt handle; this design is touted as being fully operational with a 'single finger'.
- available in various colours and tactical black.
- will be produced to suit any customer barrel/calibre specifications.
- fully adjustable iron sights or full-length picatinny rail for optical mounts.
- available with single-round loading device to meet NRA High Power Rifle Rules.
- "TUBB 2000" is also for David Tubb, eleven times American national high power shooting champion and rifle co-designer of the rifle introduced in 2000.
- precision built target rifle with a "switch barrel" design to accommodate ease of barrel/calibre changes.
- "TUBB 2000t" or "Tactical" feature an all black finish.
- features include: unthreaded muzzle; attached bracket for tunnel front sight and a level used as a "cant indicator"; free floating stainless steel match grade barrel; tubular handguard with elongated ventilation slots; round stainless steel receiver/frame; elevated Picatinny rail mount for target rear sight or scope; grip and magazine housing assembly has the look alike of a AR-15; synthetic or wood pistol grip; integral trigger guard; available with single-round loading device to meet NRA High Power Rifle Rules; right hand bolt handle and ejection port; two parallel sliding tubular pieces stock design held by a bracket having the top tube with a adjustable cheek rest and lower one with the recoil pad; barrel/ receiver/frame stainless steel finish and other parts can be black, bright blue and orange or other anodized color finish.

Action

- turn-bolt design.

Serial Number

- serial number was observed marked on the left side of the receiver/frame and some samples the serial number was observed marked on the right side of the receiver/frame.
- serial number of referenced examples consisted of four numbers.

Calibre

- calibre identification is marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.
- may have a single-round loading device to meet NRA High Power Rifle Rules
- uses all magazines available for the 308 WIN/7.62MM calibre variant of the AR15/M16 type rifles from DPMS (LR-308) and Knights Manufacturing (SR25).

Notes

Make

- the make name, "MCS Inc", appears on the left side of the receiver/frame.
- MCS stand for Master Class Sports of Brookfield CT, USA.

Model

- the model designation, "PALMA" is marked on the barrel.
- firearms assembled in this configuration are intended for use in "Palma" type rifle matches which involve the use of iron sights at ranges of 800, 900, and 1000 yards from the prone, unsupported position.
- features include: flat bottomed, rectangular shaped receiver/frame which uses a Remington Model 700-type bolt design; capable of mounting a target trigger mechanism; fitted with rear aperture sights; stainless steel light Palma profile barrel; aperture fore sight assembly; one piece, synthetic stocks; pillar bedding; sling rail and hand stop; adjustable butt stock and butt plate; adjustable cheek piece.

Action

- turn-bolt design.

Serial Number

- appears on the left side of the receiver/frame.
- observed specimen had a two letter prefix followed by three numbers.
- serial numbers may be a custom number as specified by the purchaser (example observed at 1999 DCRA matches had a 6 digit serial number representing the owner's daughter's date of birth).

Barrel

- all custom barrel lengths are available and may be observed fitted.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - the calibre designation appears on the left side of the chamber area of the barrel and may be marked as "7.62MM PALMA".

Manufacturer

- The company logo is marked on the firearm.
- The "MDC Defence" logo consists of a line drawing of a wolf head inside a circle with the letter "M" near the left ear, "D" at the top of the head, "C" near the right ear and "DEFENCE" below the head all around the perimeter, all inside another circle.
- "MDC DEFENCE" is marked on the right side of the receiver/frame.

Serial Number

- The serial number is marked on the right side of the firearm.

Calibre

- The calibre designation is marked on the barrel, visible through the ejection port.

Shots

- Detachable box magazine housed in the grip.

FRT Report

Firearm Reference Number (FRN): 117986
Make: ME Sportwaffen
Model: 1860 Lindsay

Summary

Make:	ME Sportwaffen
Model:	1860 Lindsay
Manufacturer:	Cuno Melcher
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	GERMANY
Serial Numbering:	
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
117986 - 1	44 PERCUSSION	1	210	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- ME-LINDSAY MOD. 1860 CAL. 44 SP" is marked on the left side of the barrel.

Model

- "LINDSAY MOD. 1860" is marked on the left side of the barrel.
- "UNITED STATES" over "the outline of a wagon" over "1860" inside a circle may be marked on both sides of the receiver/frame.
- manufactured in 1977.
- features include: fixed blade front sight and a fixed notch rear sight; round barrel; flat sided receiver/frame; exposed spur hammer; single action trigger mechanism, brass trigger guard and grip strap; wooden grip panels; blued barrel and receiver/frame.
- "1860 Lindsay" model was also available with a barrel insert in 4.5mm or 177 Pellet, 198mm in length. The barrel is inserted and screwed into the 44 Cal. barrel. A 177 Pellet is pushed down the barrel and a percussion cap is placed on the nipple. When the hammer falls on the percussion cap, the pellet is forced down of the barrel.
- "1860 Lindsay" model is manufactured in the style of the John Parker Lindsay single barrel percussion handguns of 1860. The original Lindsay handgun design features a single barrel, one trigger and two hammers. The single barrel is loaded with two black powder loads placed one in front of the other. The right hammer falls on a percussion cap to discharge the forward load and the left hammer falls on a second percussion cap to discharge the rear load.

Manufacturer

- Cuno Melcher is a manufacturer based in Solingen, Germany.
- Cuno Melcher was established in 1911.

Calibre

- ME-LINDSAY MOD. 1860 CAL. 44 SP" is marked on the left side of the barrel.

Firearm Reference Number (FRN): 105655
Make: ME Sportwaffen
Model: 9 Para - 4.5D

Summary

Make:	ME Sportwaffen
Model:	9 Para - 4.5D
Manufacturer:	Cuno Melcher
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Air,Spring or Gas
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
105655 - 1	177 PELLET	7	76	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is marked on the left side of the barrel as: "ME".

Model

- "9 mod. Para - 4.5D" is marked on the left side of the slide.
- this pistol is based on the same receiver/frame as Melcher's "9 Para" gas or blank pistol.
- this is an air pistol built to resemble a Walther PP/PPK-style pistol, that uses Brocock-style pre-charged air cartridges.
- features include: checkered wood or black plastic grips, blued or nickel finished receiver/frame, safety, ring hammer, front blade sight and V-notch rear sight.

Manufacturer

- Cuno Melcher is a manufacturer based in Solingen, Germany, that specializes in producing gas, blank, and air guns, as well as rimfire handguns.

Action

- compressed air operated; cartridge filled with air by hand pump.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- numbered on the right side of the receiver/frame.

Calibre

- uses Brocock-style pre-charged air cartridges.
- the Brocock firm has an innovative "cartridge" which may be charged with compressed air. A pellet is inserted into the front portion of the cartridge and the assembly is loaded as if it were a conventional cartridge into the chamber. When the firing pin strikes the rear of the cartridge, air pressure is released, propelling the lead waisted pellet out of the cartridge and accelerating it through the barrel.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - markings on the left side of the slide are: "ME 9 mod. Para-4,5D".

125616 - 2	32 MILLER SHORT	1	762	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- make may be marked on the left side of the receiver/frame as "S.D. Meachham T & H Co. Inc.".

Model

- model designation may be marked on the left side of the receiver/frame as "Hoch".
- this model of rifle was originally developed by Richard Hoch during the mid 1980's using a newly designed falling block action. During late 1989, S.D. Meacham purchased the rights to manufacture this action from Richard Hoch. After the introduction of a number of minor improvements, manufacture of this firearm continued in kit form (action only) or as a complete un-assembled rifle at the S.D. Meacham company until 1996.
- features may include: under lever opening; blued or colour case-hardened receiver/frame; single trigger; and wing safety lever behind trigger.
- as this is a custom rifle features such as: sight configurations; barrel contours and lengths; finishes of walnut furniture; and forend and buttstock configurations may vary greatly between individual examples.

Manufacturer

- S.D. Meachham Tool & Hardware Co. Inc. is a current custom gunmaker located in Peck, Idaho who specializing in high quality reproductions of Winchester High Wall and Low Wall rifles.
- this company also makes replacement parts for the original 1885 High Wall and Low Wall Rifles.

Action

- lever operated.

Serial Number

- serial number may be marked on the left side of the receiver/frame.
- observed example consisted of a series of four numbers preceeded by a letter prefix.

Notes

Make - not marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- model is marked on the receiver/frame inside the cylinder crane cut out as "47". - features include: - matte blue metal finish on all surfaces; - double and single action capable; - swing-out cylinder (to the left); - cylinder release mechanism located on left side of the receiver/frame; - smooth cylinder; - exposed hammer; - flat sided, rectangular barrel with fluted sides; - ejector rod assembly rests in a barrel cut-out; - adjustable rear sight, fixed foresight; - unique extractor system permits use of rimless cartridges without the use of clips or alternate cylinders; see calibre notes.
Manufacturer	- marked on the left side of the receiver/frame under the cylinder release as "Made in USA / Phillips & Rodgers inc. / Conroe, TX / 77301 Reg U.S. Pat. Off."
Action	- single and double action capable.
Serial Number	- serial numbers are located on the front of the receiver/frame below the barrel. - serial number rationalization consists of a three letter prefix of either "AAA" or "BBD" followed by four digits.
Calibre	- calibre is marked on the left top of the barrel as "38/357/9mm" - this revolver, due to the use of its unique cylinder/extractor design, is capable of chambering and firing rimmed and rimless cartridges. - this calibre has been designated as it is the chamber dimension used by the manufacturer to ensure cartridge interchangeability in their handgun.
Canadian Law Comments	- notwithstanding the manufacturer's claim that 24 different calibres may be fired in this model, for the purposes of identification and registration in Canada, the calibre of this model is 357 MAG.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
117464 - 1	22 LR	1	700	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "IMMAN MEFFERT" is marked on the top of the barrel.
Model	- this is an unusual single-shot target rifle built in pre-World War Two Germany, on a patent issued to "Grothe". - blued finish, wooden pistol grip stock with Bavarian style cheekpiece, sling swivels, adjustable peep sights with aperture plate and insert front and a sliding breech-block that is opened by pressing a small button at the rear of the block; this releases the block, which can then be pulled rearward to expose the chamber for loading/extraction. - examined sample marked "IMMAN MEFFERT SUHL" on the top of the barrel, with "System Grothe" in script on the left side of the breech-block and numerous pre-war proofs on the barrel, receiver/frame and breech block.
Manufacturer	- "IMMAN MEFFERT SUHL" is marked on the top of the barrel.
Action	- unusual sliding block single-shot rifle.
Serial Number	- serial number is marked on the receiver/frame.

137856 - 1	8.15X46R	1	715	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "I. MEFFERT", "J. MEFFERT" or "IMMAN. MEFFERT, SUHL" may be marked on the firearm.

Model

- model designation is not marked on the firearm.
- this is a modified Martini action used by gunmakers to build "Off-Hand" or "Schuetzen" or "Schuetzenfest" target rifles which were used in target matches.
- features include: breech block hinged at the rear of the receiver/frame that swings downward at the front to open; usually these actions were made so that the essential parts of the receiver/frame, including the trigger plate could be disassembled quickly; elaborately shaped trigger guard which serves a triple purpose, that of the trigger guard, operating lever and type of grip to support the hand in firing; straight stock with "schuetzen" style hooked buttplate and high comb cheek rest; octagonal or round barrel; and double set triggers.

Manufacturer

- "I. MEFFERT", "J. MEFFERT" or "IMMAN. MEFFERT, SUHL" may be marked on the firearm.

Action

- rear hinged, lever operated tipping block design.
- Martini action is locked in the firing position by the tip of the operating lever holding the breech block face up and in line with the chamber.

Serial Number

- serial number may or may not be marked on the receiver/frame.
- observed serial number consisted of five numbers without a letter prefix or suffix.

Notes

Make

- make is marked on the left side of the slide and on the grip plates.
- trade name used by Robar et Cie, Liege, Belgium.

Model

- model is not marked on the firearm.
- may also be known as "Model 1909" or "Old Model".
- may be marked in two lines on the left side of the slide: "Melior" and "Brevete S.G.D.G. Patent 24875.08" or in three line: "Melior", "Brevete Cal. **", and "Liege Belgium".
- manufactured from 1910 to 1920.
- the design was changed in 1920 but it was still called a "Melior". As a result, the terminology of "Old Model" and "New Model" was developed, but there is no reference to these names on the pistols.
- no grip safety.
- additional retraction grips are located on the front side surfaces of the slide.

Manufacturer

- manufacturer is not marked on the firearm.
- this company has gone through several name changes. It may also be known as "Manufacture Liegeoise D'Armes A Feu Robar Et Cie" or "Societe Anonyme Robar Et Cie".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number located on the right side of the firearm. - serial number range: 6.35mm is No. 1 to 38,978 and for 7.65mm is No. 1 to 27,350.
Calibre	- calibre designation is marked on the left side of the receiver/frame.
Shots	- detachable box magazine.
Remarks	- NOTE: this record encompasses two different sizes of frames: the 6.35mm size, and the 7.65mm size model firearms. Parts from one size firearm are different, and are not interchangeable with parts from the other size firearm. DO NOT CONFUSE WITH THE FIREARMS MARKED 'JIEFFECO'. - ROBAR also manufactured and marketed these two firearm models under their own tradename, 'JIEFFECO'. - except for markings, the 'Melior' and 'Jieffeco' firearms of the same size/model are virtually identical, even to interchangeability of parts.

FRT Report

Firearm Reference Number (FRN): 20850
Make: Mendi
Model: Blunderbuss Reproduction

Summary

Make:	Mendi
Model:	Blunderbuss Reproduction
Manufacturer:	Mendi
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Single-Shot
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
20850 - 1	58 PERCUSSION	1	335	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MENDI" and/or the Mendi's logo is marked on the barrel.
- Mendi's logo consists of a small case letter "m" inside a circle (the letter "m" central line resembles a rifle).

Model

- model designation is not marked on the firearm.
- this is a modern reproduction of a Blunderbuss firearm made circa 1600 to 1800.
- "Blunderbuss" is a smooth-bored firearm with a large, belled muzzle, to allow fast reloading.
- features include: muzzle-loading firearm with a flared muzzle; semi-octagonal barrel; ram rod; walnut one piece stock with patch box.
- overall length 760mm (30"), weight 2kg.

Manufacturer

- "MENDI" and/or the Mendi's logo is marked on the barrel.
- Mendi's logo consists of a small case letter "m" inside a circle (the letter "m" central line resembles a rifle).
- "Mendi" manufactured reproductions of muzzle loading, black powder firearms.
- "Mendi" was located in Spain.

Action

- muzzle loading.

Serial Number

- serial number was observed marked on the barrel.
- example observed with three digits without letter prefix or suffix.
- serial number rationalization is unknown.
- Spanish government instituted a new system for firearm serial numbering in 1995.
- Spanish system incorporated the code number of the gunmaker/manufacturer, weapon code, serial number sequence, and year of manufacturer.
- serial number break down, the first two numbers (61) are the code numbers for the manufacture, the next two numbers (13) are the code numbers for muzzle loader, the next numbers are the serial number sequence, and the last two numbers (97) are the year of manufacture.

Notes

Make

- "MENDI" and/or the Mendi's logo is marked on the barrel.
- Mendi's logo consists of a small case letter "m" inside a circle (the letter "m" central line resembles a rifle).

Model

- no model name appears on this firearm.
- "Mendi" is marked on the rear of the barrel.
- features include: muzzle loading; side hammer; percussion ignition; octagonal barrel; walnut stock extends to within 25mm from muzzle; brass trigger guard; blued barrel, lock, hammer and trigger and usually sold as a 'cased' set of two pistols.

Manufacturer

- "MENDI" and/or the Mendi's logo is marked on the barrel.
- Mendi's logo consists of a small case letter "m" inside a circle (the letter "m" central line resembles a rifle).
- "Mendi" manufactured reproductions of muzzle loading, black powder firearms.
- "Mendi" was located in Spain.

Action

- muzzle loader.

Serial Number

- examples had a two, three or five digit number with or without a two letter prefix.

Calibre

- one known sample was marked 12mm within a circle on the rear left side of the barrel.
- one known sample was marked 41 CAL on rear left side of barrel.

Firearm Reference Number (FRN): 16437
Make: Mendi
Model: Overcoat Pistol

Summary

Make:	Mendi
Model:	Overcoat Pistol
Manufacturer:	Mendi
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
16437 - 1	12MM PERCUSSION	1	90	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "MENDI" in an oval is marked on the firearm.
Model	- model designation is not marked on the firearm, "Overcoat Pistol" consists more in a description of a style, than a model name. - this is a reproduction of a small percussion pistol of the type originally meant to be carried in an overcoat pocket, similar to a derringer, but without the "bird's-head" grip and bulbous outline of the classic Philadelphia derringer. - features include: blued finish; hardwood checkered one piece stock; octagonal barrel with brass bead font sight; ramrod mounted directly underneath the barrel; and a manually cocked hammer on a back-action lockplate.
Manufacturer	- "MENDI" in an oval is marked on the firearm.
Action	- muzzle-loaded percussion single-shot.
Serial Number	- serial-numbered on the breech-plug.

Notes

Make

- "MENDI" and/or the Mendi's logo is marked on the barrel.
- Mendi's logo consists of a small case letter "m" inside a circle (the letter "m" central line resembles a rifle).

Model

- model designation does not appear on firearm.
- this is a reproduction of the famous "Deringer" pistol originally produced in the early 1800's.
- features include: bird's head grip; octagonal blued barrel; standard trigger; engraved sideplate; external hammer; escutcheon and fixed front sight.
- available in kit form.

Manufacturer

- "MENDI" and/or the Mendi's logo is marked on the barrel.
- Mendi's logo consists of a small case letter "m" inside a circle (the letter "m" central line resembles a rifle).
- "Mendi" manufactured reproductions of muzzle loading, black powder firearms.
- "Mendi" was located in Spain.

Action

- muzzle loading.
- muzzle loading, percussion ignition.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number usually marked on the barrel. - example reported with five digits.
Calibre	- calibre may be marked on the barrel. - calibre designation for the 45 Percussion is marked on the rear of the barrel as "12M/M" within an elongated oval.
Other Markings	- may be marked "MADE IN SPAIN" on the barrel. - Spanish proof marks usually on the barrel.

Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
143958 - 1	45 WHEEL-LOCK	1	425	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "MENDI" over "Made in SPAIN" is marked on the receiver/frame/barrel.

Model

- model designation is not marked on the firearm.
- this is a modern reproduction of a Wheel-Lock pistol.
- Wheel-Lock firearms were originally manufactured in Europe during the 16th and 17th century.
- the system uses a iron pyrites pressed against a revolving toothed wheel to provide the sparks for igniting the powder in the priming pan, which in turn ignites the main powder charge in the barrel. The toothed wheel is made to rotate, when the trigger was pulled, by a spring that was wound by a key in a similar fashion to a mechanical clock.
- features include: steel barrel and side plate; brass muzzle cap, trigger guard and escutcheon; no sight; single trigger; walnut semi-pistol grip stock; and ramrod.
- overall length with a 425mm (16 3/4") barrel is 640mm (25 1/4"), average weight 2.05kg (4.52lb).

Manufacturer

- "MENDI" and/or the Mendi's logo is marked on the barrel.
- Mendi's logo consists of a small case letter "m" inside a circle (the letter "m" central line resembles a rifle).
- "Mendi" manufactured reproductions of muzzle loading, black powder firearms.
- "Mendi" was located in Spain.

Action

- muzzle loading, spring driven, rotating gear action.

Serial Number

- serial number is marked on the receiver/frame/barrel assembly.
- observed specimen had a two letter prefix (MS) and five numbers.

Calibre

- calibre is marked on the barrel.

FRT Report

Firearm Reference Number (FRN): 121682
Make: Mendoza
Model: 33

Summary

Make:	Mendoza
Model:	33
Manufacturer:	Mendoza
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	MEXICO
Serial Numbering:	
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
121682 - 1	7MM MAUSER	5	635	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make may not be marked on the firearm.

Model

- the model designation may not be marked on the firearm.
- this is a wholly indigenous Mexican medium machine gun designed by Rafael Mendoza, combining elements of both the Lewis and Hotchkiss designs.
- features include: very "bare", rudimentary appearance with no wooden or synthetic furniture; slim, tapered barrel with long cone flash hider and radial cooling fins; carrying/quick barrel change handle on the right side of the barrel; box magazine fed from the top of the receiver/frame; safety/selector at the left front of the lower receiver/frame; fold down bipod legs at the front of the receiver/frame; hollow tubular receiver/frame buttstock and this machine gun may be seen on a folding tripod for semi-permanent emplacements.
- was superceded in 1945 by the Mendoza 45, which was itself replaced by the Mendoza RM-2.

Manufacturer

- "MENDOZA" and/or the "MENDOZA" logo is usually marked on the firearm.

Action

- gas operated.

Shots

- detachable box magazine.

121683 - 1	30-06 SPRG	5	622	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make or logo thereof may not be marked on the firearm.

Model

- the model designation may not be marked on the firearm.
- this is a further refinement of the basic Mendoza 33 design, utilizing a full length wooden stock and a more "finished" appearance.
- features include: wooden stock with separate vertical pistol grip; fold-down bipod; radially finned barrel up to the gas block; top mounted box magazine; safety/selector on the left side of the receiver/frame above the trigger guard and a cylindrical muzzle brake to moderate the recoil of the .30-06 Springfield cartridge.
- after a short period in service, this machine gun was replaced by another Mendoza design, the RM-2; the RM-2 can be distinguished from the 45 by the stock and method of field-stripping. Where the 45 has a solid full-length stock, the RM-2 has a two-piece stock (very reminiscent of the Browning BAR-D) and is field-stripped by pulling a pin to allow the lower receiver/frame to hinge down below the upper receiver/frame.

Manufacturer

- "MENDOZA" and/or the "MENDOZA" logo is usually marked on the firearm.

Action

- gas operated.

Shots

- detachable box magazine.

Notes

Make

- "MENDOZA" or the Mendoza globe logo is marked on the firearm.

Model

- the model is marked on the firearm.
- this is a modified version of the Mendoza HM-3 submachine gun, manufactured with an emphasis on ease of manufacture (through the use of steel tubing and synthetics in production).
- a standard-size version of this submachinegun is also produced as the "Cobra 380".
- features include: matte black oxide/phosphate or crinkle paint finish; synthetic furniture (may be seen with or without a vertical fore-grip); open adjustable sights; overhanging bolt; magazine that inserts through the pistol-grip; sling swivels; and side-folding tubular frame or solid synthetic stock.
- Mendoza also produces an identical series of submachine guns chambered for the 9mm Luger cartridge, with the large version known as the "HM-3S" and the mini version known as the "HM-3S Mini" or "Bulldog"

Manufacturer

- "MENDOZA" or the Mendoza globe logo is marked on the firearm.

Action

- blowback operated.

Serial Number

- numbered on the receiver/frame.

Shots

- detachable box magazine.

Notes

Make

- the make is not marked on the firearm.

Model

- the model designation may not be marked on the firearm.
- this is a standard-pattern "open-bolt" submachine gun that combines features of several other well-known designs; this submachine gun was adopted and issued to the Mexican armed forces for a short time during the 1970's, but has since been phased out in favour of the MP-5 series.
- features include: tubular receiver/frame; "Uzi"-style layout (with magazine inserted through pistol-grip); grip safety and manual safety; wooden or synthetic grip panels and forearm; open adjustable sights; fixed or folding tubular stock; and an overall appearance reminiscent of the Czechoslovakian CZ 25, only with a "loop" stock.

Manufacturer

- the manufacturer may not be marked on the firearm.
- "MENDOZA" name was first used on products offered by Rafael Mendoza in 1911.
- "MENDOZA" has produced machine guns, artillery cannons, hand grenades, rifles and a number of signaling devices and sporting goods.

Action

- blowback operated.

Serial Number

- numbered on the receiver/frame.

Shots

- detachable box magazine.

Notes

Make

- the make is not marked on the firearm.

Model

- the model may not be marked on the firearm.
- this is an unusual submachine gun / "machine pistol" designed by Rafael Mendoza (owner of the Mendoza firearms manufacturing concern) during the late 1950s; at one point, these submachine guns were issued to the Mexican military.
- features include: heavy slide to retard cyclic rate; magazine well through pistol-grip; open fixed sights; folded tubular buttstock; wooden and/or synthetic grip panels and forearm; and manufactured in two variants; a selective-fire version with a 254mm barrel, and a full-automatic-only version with a 406mm barrel.

Manufacturer

- the manufacturer may not be marked on the firearm.
- "MENDOZA" name was first used on products offered by Rafael Mendoza in 1911.
- "MENDOZA" has produced machine guns, artillery cannons, hand grenades, rifles and a number of signaling devices and sporting goods.

Action

- blowback operation.

Shots

- detachable box magazine.

Model

- the model is not marked on the firearm; this is an 1861 US Percussion Rifle-Musket, converted to a breech loader by the Meriden Manufacturing Company, of Meriden, Connecticut. These conversions were performed following William H. and George W. Miler's 1865 patent for such a conversion, and the patent date of May 23, 1865 is marked on top of the lifting breech-block.
- this conversion involved removing the breech-plug and replacing it with a threaded breech section with a hinged top-lever (similar to the Springfield "Trapdoor"), that, when lifted, also operates an extractor. These firearms were converted to fire a copper-cased 58-calibre rimfire cartridge.
- features include: side hammer; straight-grip walnut stock; round browned barrel, trigger guard; three barrel bands; sling swivels mounted under the barrel band and on the front of the trigger-guard

Manufacturer

- "MERIDEN MAN'FG. CO." is marked on top of the breech-block; these conversions were performed on 1861 US Muskets, and the original manufacturer's markings on the lockplates were not removed.

Action

- hinged-breech single-shot.

Serial Number

- numbered on the bottom of the breechblock.

Notes

Make

- Meriden's monogram logo of "MFACo" interlaced inside a circle is marked on the grip plates.

Model

- manufactured during the early 1900s.
- "SECRET SERVICE SPECIAL" is usually marked on the left side of the barrel.
- features include: fixed sights; round rifled barrel with solid top rib; front hinged receiver/frame with a fluted cylinder and with the break open release mounted on the top strap; automatic ejection; hammerless or exposed hammer; double/single action or double action only trigger mechanism; checkered grip plates; blued or nickel finish.
- "Secret Service Special" revolvers produced by Meriden are distinguished by a frame mounted firing pin and a front sight that had the front and rear ends turned up in a scroll pattern.
- "Secret Service Special" was a trade brand/name on revolvers sold by Fred Biffar Company of Chicago, Illionois, U.S.A.
- "Secret Service Special" revolvers were manufactured in North America by Harrington & Richardson Arms Company, Hopkins & Allen Firearms Company, Iver Johnson's Arms & Cycle Works, and Meriden Arms Company.
- "SSS" monogram inside a circle is usually moulded into the grip plates.
- "SSS" is the abbreviation for "Secret Service Special".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the butt of the grip.
- observed serial number consisted of six numbers without a letter prefix or suffix.

Other Markings

- was observed marked on the barrel: "FOR .32 SMITH & WESSON C.T.G.E.".

Notes

Make

- "MERIDEN FIREARMS CO." is marked on the top rib of the barrel.

Model

- manufactured between 1894 and 1915.
- model designation is not marked on the firearm.
- "top-break" denotes a hinge frame mechanism which opens for loading and unloading or removal of spent cartridge cases, cartridges are partly raised by the extractor "star" as it opens; and when fully opened, the star drops to the normal position, flush with the rear of the cylinder.
- feature include: round ribbed barrel; front hinged receiver/frame with top strap mounted locking mechanism; internal hammer; double action trigger mechanism; fixed sights; plastic panel grips; nickel finish.

Manufacturer

- "MERIDEN FIREARMS CO." and "MERIDEN,CONN. U.S.A." is marked on the top rib of the barrel.
- a main distinguishing feature found on all Meriden manufactured handguns is a front sight blade with a decorative swirl on both ends.
- a logo of a geometeric pattern resembling a button or wheel may be found on the top of the grip plates.

Action

- top break.

Serial Number

- serial number may be found stamped on the bottom of the grip frame.
- rationalization and range are unknown.

Shots

- revolving cylinder.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- revolvers like this were manufactured by Meriden with other trade and model names. The front sight blade with a decorative swirl on both ends is the best clue to the manufacturer.

Notes

Make

- "MERIDIAN FIRE ARMS CO" is marked on the top of the barrel.

Model

- manufactured between 1894 and 1915.
- model designation is not marked on the firearm.
- "top-break" denotes a hinge frame mechanism which opens for loading and unloading or removal of spent cartridge cases.
- "self-extracting" denotes the cartridges are partly raised by the extractor "star" as it opens; and when fully opened, the star drops to the normal position, flush with the rear of the cylinder.
- feature include: round ribbed barrel; front hinged receiver/frame with top strap mounted locking mechanism; internal or exposed spurr hammer; single/double action trigger mechanism; fixed sights; plastic panel grips; blue or nickel finish.

Manufacturer

- "MERIDIAN FIRE ARMS CO" and "MERIDIAN, CONN. U.S.A." are marked on the top of the barrel.
- the Company was created around 1894 by Sears, Roebuck & Company.
- Meriden marketed handguns under the following trade names:
  - Eastern Arms Company
  - Empire State Arms Company
  - Federal Arms Company
  - Howard Arms Company
- Howard Arms Company and National Arms Company are believed to be associated to Meriden because the unique front sight used on Meriden handguns is also present on the handguns from these companies.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- hinged action.

Notes

Make

- make is marked on the barrels.

Model

- this is a side by side boxlock double rifle with Anson & Deeley lock-up, walnut pistol-grip stock with cheekpiece, cocking indicators, double triggers, and an engraved, colour case-hardened receiver/frame.
- available with a silver grey receiver/frame as the 140-1.1 version.
- a sidelock version is available as the Model 160, and a boxlock version with false sideplates is available as the Model 150.
- overall length with a 600mm barrel (23 5/8") is 1020mm (44 1/8"), average weight is 3.4kg (7.49lbs).

Manufacturer

- manufacturer's trade mark will normally be found marked on the "water table" of the firearm.
- Merkel (also called "Gebruder Merkel", or "Merkel Brothers") is a manufacturer located in Suhl, Germany, a region that has been producing drillings, combination guns, shotguns, and double rifles throughout the manufacturing history of Germany.

Action

- side by side pattern.

Serial Number

- the serial number is found on the top inside surface of the watertable.
- serial number rationalization unknown.
- observed serial number consisted of six digits without prefix or suffix.

Calibre

- calibre is marked on the barrels.

Notes

Model

- This is a side by side shotgun with single selective or double triggers, sliding tang safety, cocking indicators, straight or pistol-grip stock, ejectors, and engraved, colour-case-hardened receiver.

Manufacturer

- Merkel (also called "Gebruder Merkel", for "Merkel Brothers") is a manufacturer located in Suhl, Germany, that has been producing drillings, combination guns, shotguns, and double rifles since 1535.

Action

- side by side.

Remarks

- The Model 147 is a side by side Anson and Deely boxlock with silver gray finish and fine engraving. Straight English grip or pistol grip stock, single selective or double triggers, Greener cross-bolt, cocking indicators and a sliding tang mounted safety. This gun differs from its sister gun the 47E in that it has extractors in place of Holland and Holland ejectors.

Notes

Make

- "MERKEL" is marked on the left side of the barrel.

Model

- the model designation may not be marked on the firearm.
- this is a side lock double rifle based on a 28 gauge "Petite" receiver/frame.
- features include: blued tapered round barrels with muzzle adjustment; blade base mounted front sight and fixed dovetail rear sight; integral optical mount base; rifled bores; extractor or ejectors; a break opening lever and an automatic safety are located on the upper rear tang; engraved silver greyed front hinged side lock receiver/frame; single or double triggers; checkered beavertail style forearm and semi-pistol grip buttstock with or without a cheek piece.
- average weight is 4.54kg (10lbs).
- similar to the model 141 which features a box lock receiver/frame.
- overall length with a 550mm barrel (21 3/4") is 970mm (38 1/4"), average weight is 3kg (6.61lbs).

Manufacturer

- the manufacturer's name "GEBR MERKEL SUHL" over "MADE IN GERMANY" is marked on the left side of the barrel.

Action

- side by side configuration.

Serial Number

- the serial number is marked on the receiver/frame's water table.

Barrel

- barrel length is referenced at 548mm(21.65") and 559mm(22").

Calibre

- the calibre designation is marked on the barrel assembly.

Notes

Model

- this FRT screen is a generic for the Merkel Model 201 shotguns. Other Merkel entries exist which might better describe the firearm being verified.
- the Merkel 201 series are boxlock over under shotguns with straight or pistol grip stock, cross bolt locks and double or single selective trigger
- the action is self opening Blitz style (with the hammers mounted on the trigger plates)
- the various model designations refer to the same basic gun with optional engraving quantity on the receiver and the type of locks (coil spring or Holland and Holland)
- all have some engraving but the 203E has large scroll and the 303E medium scroll on silver receivers
- the underside of the receiver has a stamp of an iron worker and anvil with SUHL under this mark
- the left side of the barrels (at the receiver) are marked GEBR.MERKEL and below MADE IN GDR (if made in East Germany) or Made in Germany.

Manufacturer

- manufacturer is marked on the firearm and may also be known as Gebruder Merkel.

Action

- over/under pattern.

Notes

Make

- maker's designation may be marked on the barrel as "GEBR. MERKEL SUHL".

Model

- model designation may not be marked on the firearm.
- features include: walnut checkered pistol grip or straight stock with cheekpiece and forearm; colour case hardened boxlock lightly engraved; selective single or double triggers manual and automatic safety and sling swivels.
- this model is part of the "2000" series of over/under rifles, shotguns, and combination guns; shotgun models include the 2000E, 2001E and 2002E, while combination gun models include the 2010, 2011, and 2012, and double rifle models include the 2020, 2021, and 2022. These models differ from one another based on the style and amount of engraving (lower-grade models have scroll engraving, while higher-grade models feature game-scene engraving), and on the quality of walnut used in the stock and forearm.

Manufacturer

- Merkel (also called "Gebruder Merkel", for "Merkel Brothers") is a manufacturer located in Suhl, Germany, that has been producing drillings, combination guns, shotguns, and double rifles since 1535.
- in 1993 Merkel Brothers declared bankruptcy and were purchased by Steyr.

Type

- smooth bore over a rifled barrel.
- barrels may be interchangeable with other models to allow for an over/under shotgun or over/under rifle configuration.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action - over & under configuration.

Serial Number - numbered on receiver/frame.

Notes

Make

- maker's designation may be marked on the barrel as "GEBR. MERKEL SUHL".

Model

- model designation may not be marked on the firearm.
- features include: walnut checkered pistol grip with cheekpiece and forearm; nickel finish boxlock with engraved hunting scenes; selective single or double triggers; manual and automatic safety; ejectors and sling swivels.
- this model is part of the "2000" series of over/under rifles, shotguns, and combination guns; shotgun models include the 2000E, 2001E and 2002E, while combination gun models include the 2010, 2011, and 2012, and double rifle models include the 2020, 2021, and 2022. These models differ from one another based on the style and amount of engraving (lower-grade models have scroll engraving, while higher-grade models feature game-scene engraving), and on the quality of walnut used in the stock and forearm.

Manufacturer

- Merkel (also called "Gebruder Merkel", for "Merkel Brothers") is a manufacturer located in Suhl, Germany, that has been producing drillings, combination guns, shotguns, and double rifles since 1535.
- in 1993 Merkel Brothers declared bankruptcy and were purchased by Steyr.

Type

- smooth bore over a rifled barrel.
- barrels may be interchangeable with other models to allow for an over/under shotgun or over/under rifle configuration.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action - over & under barrel configuration.

Serial Number - numbered on receiver/frame.

35810 - 1	12 GA X 2 3/4"	2	680	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Model

- the Merkel 201ES is a boxlock over under shotgun with pistol grip stock, Kersten cross bolt locks and double or single selective trigger
- the receiver is self-opening Blitz style (with the hammers mounted on the trigger plate)
- the engraving is Arabesque scroll on a silver receiver
- the barrels have a ventilated rib with a three piece wood forearm
- the underside of the receiver has a stamp of an iron worker and anvil with SUHL under this mark.
- the 201ES and 201ET differ in barrel lengths available and comb design of buttstock only.

Manufacturer

- Suhl was alternately in Germany, East Germany and again in Germany so may be marked GDR.
- the maker is also known as Gebruder Merkel

Action

- over/under pattern.

Serial Number

- the serial number is located on the upper left edge of the receiver.

127177 - 7	9.3X74R	2	600	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make - maker's designation may be marked on the barrel as "GEBR. MERKEL SUHL".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- model designation may not be marked on the firearm.
- features include: Merkel "Duo" manual cocking system that combines the features of a self cocking and manually cocked gun; selected walnut checkered pistol grip or straight stock with cheekpiece and three pieces forearm; colour case hardened boxlock with ornamental side plates with extensive engraving; single set trigger (double triggers with front set trigger available as an option); sling swivels.
- this model is part of the "2000" series of over/under rifles, shotguns, and combination guns. These models differ from one another based on the style and amount of engraving (lower-grade models (Standard) have scroll engraving, while higher-grade models (Jadg) feature game-scene engraving) and on the quality of walnut used in the stock and forearm.
- overall length with a 600mm barrel is 1010mm (39" 3/4), average weight is 3.6kg (8lbs).

Manufacturer

- Merkel (also called "Gebruder Merkel", for "Merkel Brothers") is a manufacturer located in Suhl, Germany, that has been producing drillings, combination guns, shotguns, and double rifles since 1535.
- in 1993 Merkel Brothers declared bankruptcy and has been purchased by Steyr.

Action

- over & under barrel configuration.

Serial Number

- numbered on the receiver/frame.

Calibre

- barrels may be interchangeable with other models to allow for an over/under shotgun or over/under shotgun/rifle configuration.

Notes

Manufacturer

- Suhl was alternately in Germany, East Germany and again in Germany so may be marked GDR.
- the maker is also known as Gebruder Merkel

Action

- over/under.

Serial Number

- found on the upper left edge of the receiver.

Remarks

- The Merkel Model 202E is a boxlock over under shotgun with straight or pistol grip stock, cross bolt locks and double or single selective trigger. The action is self opening Blitz style (with the hammers mounted on the trigger plates). The engraving is Arabesque and mounted on false sideplates (to increase the engraving area) all on a silver receiver. The barrels have a solid rib with a three piece wood forearm. The underside of the receiver has a stamp of an iron worker and anvil with SUHL under this mark. The left side of the barrels (at the receiver) are marked GEBR.MREKEL and below MADE IN GDR (if made in East Germany) or Made in Germany.

Notes

Make

- "GEBRUDE MERKEL" over "SUHL" or "MADE IN GDR" is usually marked on the left side of the barrel assembly.

Model

- Merkel Model 203E is a boxlock over under shotgun with straight or pistol grip stock, cross bolt locks and double or single selective trigger. The action is self opening Holland and Holland style (with the hand removable sideplates). The engraving is Arabesque with a large scroll motif mounted on sideplates (to increase the engraving area) and a silver coloured receiver. The barrels have a solid rib with a three piece wood forearm. The underside of the receiver has a stamp of an iron worker and anvil with SUHL under this mark.
- 303E differs from the 203E in the size of the scroll engraving (large scroll on the 203E), no Holland and Holland ejectors and no hook locks.

Manufacturer

- "GEBRUDE MERKEL" over "SUHL" is usually marked on the left side of the barrel assembly.

Action

- over and under barrel configuration, hinged barrel design.

Serial Number

- found on the upper left edge of the receiver.

Notes

Make

- maker's designation is marked on the barrels as "GEBR. MERKEL SUHL", or "GERBRUDER MERKEL SUHL".

Model

- model designation may not be marked on the firearm.
- features include: walnut checkered pistol grip stock and forearm, Holland & Holland locking system, automatic safety, double triggers, open sights, sling swivels, and engraved sidelock.
- overall length with a 600mm barrel (23 5/8") is 1020mm (44 1/8"), average weight is 3.3kg (7.27lbs).

Manufacturer

- Merkel (also called "Gebruder Merkel", for "Merkel Brothers") is a manufacturer located in Suhl, Germany, that has been producing drillings, combination guns, shotguns, and double rifles since 1535.
- in 1993 Merkel Brothers declared bankruptcy, and has been purchased by Steyr.

Type

- one rifled barrel and one smooth bore.

Action

- side by side configuration.

Serial Number

- may be marked on the upper left edge of the receiver/frame.

Notes

Make

- "Merkel" and/or the Merkel logo is marked on the firearm.

Model

- the model is not marked on the firearm; this "drilling"-style combination gun can be identified by the presence of a button-ended lever on the top of the wrist that swings to the left to select the rifle barrel; AND a separate extractor for the rifle cartridge; an identical drilling chambered for rimless cartridges with a single extractor that removes the rifle and shotgun cartridges simultaneously is known as the "32 Drilling".
- this is a three-barrelled combination gun of the type known to the Germans as a "drilling", from the German "drei"/three", usually in a side by side shotgun over a rifled barrel configuration.
- features include: blued barrels (may have detachable scope mounts); checkered walnut forearm and pistol-grip stock; engraved box lock receiver; top-lever; barrel selector and sliding safety on the top of the wrist; double set triggers; metal or carved horn trigger-guard; rubber buttpad.

Manufacturer

- "Merkel" and/or the Merkel logo is marked on the firearm.

Action

- three barrel combination gun, with two side by side smoothbore barrels over a rifle barrel.

Serial Number

- serial number is marked on the receiver/frame.

Notes

Make

- the make is marked on the firearm.

Model

- model designation may not be marked on the firearm.
- this is a deluxe, sidelock, over & under combination gun with double triggers.
- features include: Kersten cross-bolt locking system; tang safety; cocking indicators; three piece forearm; pistol grip stock with cheek-piece and carved scroll work; ejector; deeply-engraved receiver/frame.
- also available as an over/under shotgun as the 303E, and as an over/under double rifle as the 323E.
- overall length with a 600mm barrel is 1030mm (40"1/2), average weight is 3.5kg (7.75lbs)

Manufacturer

- Merkel (also called "Gebruder Merkel", for "Merkel Brothers") is a manufacturer located in Suhl, Germany, that has been producing drillings, combination guns, shotguns, and double rifles since 1535.
- "GERBRUDER MERKEL SUHL" is marked on the left side of the barrels.

Action

- over & under configuration; shotgun over rifle.

Serial Number

- numbered on the receiver/frame.

Calibre

- Merkel over & under "300" series can be combined in any configuration; both the 12 and 20 gauge receiver/frame accept interchangeable rifle/shotgun or double rifle barrel assemblies.

Notes

Make

- "Merkel" and/or the Merkel logo is marked on the firearm.

Model

- the model is not marked on the firearm; this "drilling"-style combination gun can be identified by the presence of a button-ended lever on the top of the wrist that swings to the left to select the rifle barrel; and a one-piece extractor for the rifle and shotgun cartridges; an identical drilling chambered for rimmed cartridges with a split extractor that removes the rifle and shotgun cartridges separately is known as the "30 Drilling"
- this is a three-barrelled combination gun of the type known to the Germans as a "drilling", from the German "drei"/three", usually in a side by side shotgun over a rifled barrel configuration.
- features include: blued barrels (usually with detachable scope mounts); checkered walnut forearm and pistol-grip stock; engraved box lock receiver; top-lever; barrel selector and sliding safety on the top of the wrist; double set triggers; metal or carved horn trigger-guard; rubber buttpad.

Manufacturer

- "Merkel" and/or the Merkel logo is marked on the firearm.

Action

- "drilling"-pattern combination gun, with two side by side smoothbore barrels over a rifle barrel.

Serial Number

- serial number is marked on the receiver/frame.

Notes

Make

- "MERKEL" is marked on the barrels and the receiver/frame.

Model

- "Mod. 60E" is marked on the underside of the receiver/frame.
- this is a more elaborate version of the Merkel 40E and 50E side by side shotgun.
- features include: side by side barrels with bead front sight; front hinged receiver/frame with top tang mounted break open lever; hammerless; box or side lock action; cocking indicators; automatic safety; ejectors; Greener style cross-bolt; double triggers with single selective trigger available as an option; Arabesque style engraving on the grey receiver/frame; blued finish on barrels; checkered wood forearm and semi-pistol grip stock.
- overall length with a 711mm barrel (28") is 1130mm (44 1/2"), average weight is 2.8kg (6.17lbs).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the manufacturer is marked on the firearm.
Action	- side by side barrel configuration.
Serial Number	- serial number is usually marked on the receiver/frame.

Notes

Make

- "MERKEL" is marked on the receiver/frame under the barrels in front of the trigger guard.
- "GEBR. MERKEL SUHL" or "Merkel Jagd- und Sportwaffen GmbH" may be marked on the side of the barrels.

Model

- model designation may not be marked on the firearm.
- this is the side lock version of the Merkel box lock model "45E".
- features include: blued side by side round barrels with bead front sight; side lock action steel receiver/frame with nickel engraved finish; double triggers; top tang open lever; top tang safety switch; checkered straight wood stock without pistol grip and wood checkered shoulder pad and matching forend.
- overall length with a 711mm barrel (28") is 1130mm (44 1/2"); average weight is 3.1kg (6.83lbs).

Manufacturer

- "MERKEL" is marked on the receiver/frame under the barrels in front of the trigger guard.
- "GEBR. MERKEL SUHL" over "MADE IN GERMANY" may be marked on the side of the barrels.
- "GEBRUDER MERKEL SUHL" may be marked on the barrels.
- Merkel (also called "Gebruder Merkel", for "Merkel Brothers") is a manufacturer located in Suhl, Germany, that has been producing drillings, combination guns, shotguns, and double rifles since 1535.
- in 1993 Merkel Brothers declared bankruptcy, and has been purchased by Steyr.

Action

- side by side barrel configuration.

Serial Number

- may be marked on the upper left edge of the receiver/frame.

Notes

Make

- make is marked on the firearm.

Model

- model designation may not be marked on the firearm.
- features include: hinged receiver/frame with tang mounted break open lever; boxlocks; selected walnut pistol grip stock and forearm; double triggers; tang mounted safety; extractors; Greener cross-bolt lock-up.
- available in either color case-hardened or coin finished receiver/frame variations, with light scroll or game scene engraving (Jadg).
- also available with ornamental side plates as the model 96KS.
- overall length with 550mm barrel is 980mm (38"5/8); average weight is 3.1kg (6.9lbs).

Manufacturer

- manufacturer's name is marked on the firearm.
- Merkel (also called "Gebruder Merkel", for "Merkel Brothers") is a manufacturer located in Suhl, Germany, that produces drillings, combination guns, shotguns, and rifles.

Action

- available as Drilling (2 smoothbores side by side, 1 rifle under), combination Rifle/Shotgun Drilling (1 rifle and 1 smoothbore side by side, 1 rifle under) or double Rifle Drilling (2 rifles side by side and 1 smoothbore under).

Serial Number

- serial number is located on the receiver/frame and repeated on the barrel lug.

Calibre

- calibre designation is marked on the barrels.

Notes

Make

- maker's designation is marked on the firearm.

Model

- model designation may not be marked on the firearm.
- features include: top break; boxlock; single or double set triggers; automatic ejector; tang safety; white receiver/frame lightly engraved; barrel has integral telescopic sight mounting bases; checkered European walnut buttstock and separate forearm with schnabel.
- on special order more elaborate engraving is available in six escalating grades (Premium, Jagd, Jena, Weimar, Erfurt, Suhl).
- available in 2006 in a full stock version that features a two piece Mannlicher style forend, shorter barrel and a short sight radius.
- overall length with a 600mm barrel is 911mm (35.83") average weight is 2.5kg (5.5lbs).

Manufacturer

- Merkel (also called "Gebruder Merkel", for "Merkel Brothers") is a manufacturer located in Suhl, Germany, that has been producing drillings, combination guns, shotguns, single shot and double rifles since 1535.

Action

- hinged barrel design.

Serial Number

- numbered on the receiver/frame.

Other Markings

- observed example was marked "Made in Germany" on the left side of the barrel at the breech.

Notes

Make

- the make is marked on the firearm.

Model

- "SL II" may not be marked on the firearm.
- this is an over/under boxlock combination gun in Merkel's "Superleicht" ("superlight") series, made as light as possible for ease of carrying while hunting.
- features include: walnut "hog's back" pistol-grip stock and one-piece forearm; fixed open leaf sights with quick-detachable scope mounts; double trigger; tang safety/selector; and a free-floating lower/rifle barrel with a muzzle ring.
- these combination guns are available in a wide variety of grades, and higher grades can feature extended false sideplates for additional engraving room.
- also available with a 12 GA x 3" upper/shotgun barrel as the "SL III".
- overal length with a 600mm barrel is 1000mm (39" 3/8), average weight is 2.9kg (6.4lbs)

Manufacturer

- the manufacturer is marked on the firearm.
- Merkel (also clled "Gebruder Merkel", for "Merkel Brothers) is a manufacturer located in Suhl, Germany. The company was established in 1535 and since the 1890's has specialized in producing high quality multi barrel sporting firearms (drillings, shotguns, rifles).

Action

- over/under pattern; shotgun over rifle.

Serial Number

- serial number is marked on the receiver/frame.

Notes

Make

- "Merkel" is marked on the side of the firearm.

Model

- "SR1" is marked on the left side of the receiver/frame.
- introduced in 2007.
- features include: free floating round barrel with adjustable front sight and Battue rib with contrast lines; solid top upper receiver assembly with multi-lug rotating bolt head, right side ejection and drilled and tapped for a scope mount; lower receiver/frame has a front hinged magazine housing, cross bolt safety located on the rear of the trigger guard, magazine release located on the front of the trigger guard, and a disassembly release located on the left front side of the receiver/frame; checkered walnut forearm and pistol grip buttstock with recoil pad; blue finish or two color finish with a blued upper and silvered lower with oak leaf engraving.
- overall length is from 1060mm to 1070mm, approximate weight of 3.2 kg.

Manufacturer

- "Merkel Jagd-und", "Sportwaffen GmbH" and "Suhl / Germany" are marked on the side of the firearm.

Action

- gas operated.

Serial Number

- serial number is usually marked on the left side of the receiver/frame and may be repeated on the top of the upper assembly and on the barrel.
- observed serial number consisted of a "SR" prefix followed five numbers.

Calibre

- calibre is marked on the barrel.

Shots

- interchangeable box magazine.

Notes

Make

- "MEROLLA FRERES" over "SYSTEME BREVETES" is marked on the top of the receiver/frame.

Model

- model designation is not marked on the firearm.
- "SYSTEME BREVETES" is marked on the top of the receiver/frame under the maker's name. It is not considered the model of the firearm.
- this is a design that is commonly known as a "Lefaucheux".
- features include: fixed post front and groove rear sight; octagonal barrel; screw together solid top receiver/frame with scroll engraving; round fluted or non-fluted cylinder with or without scroll engraving; spur hammer; "plunger" style case ejector; right side fold down loading gate; ring or standard trigger and trigger guard; checkered wood grip plates; lanyard ring at the base of the butt; blued or nickeled finish.

Manufacturer

- "MEROLLA FRERES" over "SYSTEME BREVETES" is marked on the top of the receiver/frame.
- Merolla, Giovanni listed as gunmaker in Naples, Italy, circa 1850-1875.
- Merolla, Giovanni and Merolla, Francesco were known manufacturers of firearms in Naples, Italy and Liege, Belgium.
- Merolla brothers Giovanni and Francesco obtained patent 38720 on 1876/01/26 after having made some improvements to the revolver for which their father Salvatore obtained patent 21162 on 1867/03/14.
- Merolla: Salvatore, Giovanni and Francesco were known to have several patents under their names in Belgium for Lefaucheux type rifles and revolvers most of which were manufactured in Liege, circa 1860-1870.

Action

- pin-fire revolving cylinder.

Serial Number

- serial number may be marked on the firearm and may be repeated on various parts.
- serial number of a referenced example consisted of two numbers.

Calibre

- calibre designation is not marked on the firearm.

Make: Merrill, James H
Model: 1842/1858 US Musket Merrill Breechloading Conversion

Summary

Make:	Merrill, James H
Model:	1842/1858 US Musket Merrill Breechloading Conversion
Manufacturer:	Merrill, James H
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
147526 - 1	54 PERCUSSION	1	1067	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "JAS H. MERRILL BALTO", over "PAT. JULY, 1858" is marked on top of the action lever; these conversions were performed on existing 1842 US Muskets, and the existing manufacturer's markings on the lockplates were not altered or removed.

Model

- the model is not marked on the firearm; this is an 1842 US Percussion Musket, converted to a breech loader by James H. Merrill, of Baltimore, Maryland. These conversions were performed following Merrill's 1858 patent for such a conversion, and the patent date of July, 1858 is marked on top of the lifting action lever.
- this conversion involved removing the breech-plug and replacing it with a threaded breech section with a hinged lever, that, when lifted, draws a piston rearwards to allow a combustible paper cartridge to be inserted into the rear of the chamber; the lever is then pushed down into place again, a percussion cap is placed on the nipple, and the rifle is ready to be fired.
- features include: side hammer, percussion muzzle loading rifle; straight-grip walnut stock; round browned barrel; brass buttplate, patchbox, trigger guard; two barrel bands; sling swivels mounted under the barrel band and on the underside of the buttstock.

Manufacturer

- "JAS H. MERRILL BALTO", over "PAT. JULY, 1858" is marked on top of the action lever; these conversions were performed on existing 1842 US Muskets, and the existing manufacturer's markings on the lockplates were not altered or removed.

Action

- breech-loaded percussion single-shot.

Serial Number

- numbered on top of the action lever.

- "Merrill, Latrose & Thomas" of Baltimore, Maryland, U.S.A. was partnership formed by James H. Merrill, Ferdinand C. Latrobe and Phillip E. Thomas from 1856 to 1859.
- Merrill, Latrose & Thomas model 1855 Percussion Carbine was manufactured by Samuel Remington.

Model

- U.S. Ordnance Department purchased 170 Merrill, Latrobe & Thomas percussion carbines in July of 1855 for evaluation and trails.
- 1855 Percussion Carbine was manufactured in 1855.
- James H. Merrill was granted U.S. Patent Number 14,077 on January 08, 1856.
- this is a side hammer, breech loading firearm requiring a separate percussion cap to be placed on a nipple located on the receiver which is struck by the hammer.
- breech system involves a forward lifting lever to expose the chamber for loading.
- one piece walnut buttstock with brass patchbox, triggerguard, buttplate and single barrel band.

Manufacturer

- "S. REMINGTON / ILION, N.Y." appears on the lockplate.
- Samuel Remington was the son of Eliphalet Remington.

Serial Number

- 1 to 200, appears on the underside of the breech lever.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "Merwin, Hulbert & Co." is marked on the top of the barrel. - Merwin, Hulbert & Company came into being circa 1868. - Joseph Merwin, a New England arms marketer, joined with two brothers William A. and M.H. Hulbert to form the company known as Merwin, Hulbert & Company. Through this partnership partial interest was gained in three other companies: - the Phoenix Rifle & Ammunition Company, the American Metallic Cartridge Company and the Hopkins and Allen Company. Shortly after this new company was formed an investment of $100,000 was made in the Evans Rifle Company. - the new firm quickly became a success. Merwin, Hulbert & Company became the largest firearm dealer in the USA, handling shooting accessories, reloading equipment and firearms made by Colt, Winchester, Remington, Marlin Ballard & L.C. Smith, Parker and Ithaca. - In 1874, "Merwin, Hulbert & Company" became sole agents for "Hopkins & Allen" and by 1878, "Merwin, Hulbert & Company" controlled "Hopkins & Allen", re-organizing the company into a new entity called "Hopkins & Allen Manufacturing Company". - circa 1876 Merwin, Hulbert & Co was in production of proprietary models of handguns at Norwich, Connecticut. - Joseph Merwin died in 1879. - the company suffered from a series of financial disasters, circa 1878: - the Russian Government refused to pay for three shiploads of revolvers which they had ordered, the failure of the Evans Rifle Company and a theft of company funds by a business associate. - Joseph Merwin died in 1879. - "Merwin & Hulbert" went into receivership in 1881. - the company was quickly reorganized under the same company name and continued the production of revolvers until a disastrous fire in 1891 destroyed the factory. - in late 1891 a new company was formed, "Hulbert Brothers & Company" in partnership with Hopkins & Allen to carry on with the revolver manufacturing business. - by 1896 this firm, too went into receivership. - in 1898 the company went through another re-organization emerging as "Hopkins & Allen Arms Company". - In 1902, "Hopkins & Allen" purchased the "Forehand Arms Company". - In 1917 the "Hopkins & Allen Arms Company" was sold to "Marlin-Rockwell
Model	- "Junior" and "Pat. June 3, 1890" is marked on the top of the barrel. - manufactured before 1897. - this is a takedown, falling block rifle. - features include: octagonal barrel, lever operated falling block action, straight buttstock. - starting in 1897, the Junior was sold under the Hopkins & Allen name.
Manufacturer	- "Made by Hopkins & Allen Manfg. Co. Norwich, Conn., U.S.A." is marked on the top of the barrel.
Action	- lever operated falling block.
Serial Number	- located on the receiver/frame. - observed specimen had four digits.
Calibre	- calibre is marked on the top of the barrel.
Other Markings	- "Made by Hopkins & Allen Manfg. Co. Norwich, Conn., U.S.A. The Merwin, Hulbert & Co. Junior Pat. June 3, 1890 .22 R.F." is marked on the top of the barrel.

Notes

Make

- "MERWIN, HULBERT & CO. N.Y." is marked on the right side of the receiver/frame.
- Merwin, Hulbert & Company came into being in 1868.
- Joseph Merwin, a New England arms marketer, joined with two brothers William A. and M.H. Hulbert to form the company known as Merwin, Hulbert & Company
- in 1874, "Merwin, Hulbert & Company" became sole agents for "Hopkins & Allen" and by 1878, "Merwin, Hulbert & Company" controlled "Hopkins & Allen", re-organizing the company into a new entity called "Hopkins & Allen Manufacturing Company".
- circa 1876 Merwin, Hulbert & Co was in production of proprietary models of handguns at Norwich, Connecticut.
- Joseph Merwin died in 1879.
- the company suffered from a series of financial disasters, circa 1878: the Russian Government refused to pay for three shiploads of revolvers which they had ordered, the failure of the Evans Rifle Company and a theft of company funds by a business associate.
- Joseph Merwin died in 1879.
- "Merwin & Hulbert" went into receivership in 1881.
- the company was quickly reorganized under the same company name and continued the production of revolvers until a disasterous fire in 1891 destroyed the factory.
- in late 1891 a new company was formed, "Hulbert Brothers & Company" in partnership with Hopkins & Allen to carry on with the revolver manufacturing business.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "MERWIN, HULBERT & CO., N.Y." over "POCKET ARMY" is marked on the right side of the receiver/frame.
- "CALIBRE" and either "WINCHESTER 1873" (44-40 WIN), "44 M&H" (44 MERWIN, HULBERT AND CO), or "44 RUSSIAN" (44 S&W RUSSIAN) is marked on the left side of the frame.
- "Pat. Jan. 24, Apr. 21, Dec. 15, 74, Aug. 3, '75, Apr. 17, 77, Pats. Mar. 6, 77" or "Pat. Apr. 17, 77, Jun. 15, 80, Mar. 14, 82, Jan. 9, 83" may be marked on the barrel.
- manufactured circa 1880s.
- this is a slightly smaller version of the Merwin, Hulbert & Company model Frontier Army single-action revolver, with a unique cartridge extraction system.
- this record is for a single-action "Pocket Army" revolvers; if the revolver in question has a double-action trigger mechanism, it is a "Pocket Army Double Action".
- these revolvers have a split frame that pivots around the cylinder pin; when the release is pressed and the barrel/top strap is twisted to the right and pulled forward, the cartridge cases are retained on the breech-face by a disc that engages the cartridge rims.
- these revolvers are seen both with (most common) and without (early production) an integral top strap, with or without a folding hammer spur, and with "scoop" or conventional cylinder flutes; these revolvers also came with an extended bird's-head-style butt with an integral lanyard ring.
- the "Pocket Army" revolver normally came with an 84mm barrel although an option 178mm barrel was available.
- the Merwin Hulbert & Company "Frontier Army" model was available with a 89mm, 140mm and 178 mm barrel.

Manufacturer

- "HOPKINS & ALLEN M'F'G CO. NORWICH, CONN. U.S.A." is marked on the left side of the barrel.

Serial Number

- the serial number is marked on the right side of the butt strap.

Calibre

- calibre markings consist of "CALIBRE" and either "WINCHESTER 1873" (44-40 WIN), "44 M&H" (44 MERWIN, HULBERT AND CO), or "44 RUSSIAN" (44 S&W RUSSIAN) is marked on the left side of the receiver/frame.

Notes

Make	- "Merwin, Hulbert & Company" is marked on the barrel. - Merwin, Hulbert & Company came into being circa 1868. - Joseph Merwin, a New England arms marketer, joined with two brothers William A. and M.H. Hulbert to form the company known as Merwin, Hulbert & Company. Through this partnership partial interest was gained in three other companies: - the Phoenix Rifle & Ammunition Company, the American Metallic Cartridge Company and the Hopkins and Allen Company. Shortly after this new company was formed an investment of $100,000 was made in the Evans Rifle Company. - the new firm quickly became a success. Merwin, Hulbert & Company became the largest firearm dealer in the USA, handling shooting accessories, reloading equipment and firearms made by Colt, Winchester, Remington, Marlin Ballard & L.C. Smith, Parker and Ithaca. - in 1874, "Merwin, Hulbert & Company" became sole agents for "Hopkins & Allen" and by 1878, "Merwin, Hulbert & Company" controlled "Hopkins & Allen", re-organizing the company into a new entity called "Hopkins & Allen Manufacturing Company". - circa 1876 Merwin, Hulbert & Co was in production of proprietary models of handguns at Norwich, Connecticut. - Joseph Merwin died in 1879. - the company suffered from a series of financial disasters, circa 1878: - the Russian Government refused to pay for three shiploads of revolvers which they had ordered, the failure of the Evans Rifle Company and a theft of company funds by a business associate. - Joseph Merwin died in 1879. - "Merwin & Hulbert" went into receivership in 1881. - the company was quickly reorganized under the same company name and continued the production of revolvers until a disastrous fire in 1891 destroyed the factory. - in late 1891 a new company was formed, "Hulbert Brothers & Company" in partnership with Hopkins & Allen to carry on with the revolver manufacturing business. - by 1896 this firm, too went into receivership. - in 1898 the company went through another re-organization emerging as "Hopkins & Allen Arms Company". - In 1902, "Hopkins & Allen" purchased the "Forehand Arms Company". - In 1917 the "Hopkins & Allen Arms Company" was sold to "Marlin-Rockwell".
Model	- manufactured circa1880s. - may have a bird's head butt or a square butt, saw-handle type. - normally hard rubber grips. - round ribbed barrel. - fluted cylinder. - automatic shell ejecting. - rounded trigger guard. - may have a folding hammer.
Action	- double action.
Serial Number	- serial number is usually marked on the grip strap of the receiver/frame. - samples observed have featured either the serial number marked on the left side of the grip strap, under the grip plate and consisted of four digits without a letter prefix or suffix or marked on the bottom of the grip and consisted of five digits without a letter prefix or suffix. - either of these numbers may appear on the same example, one being a production number and/or serial number that may also be repeated on the major components ie. cylinder face, barrel etc.
Calibre	- "32 CAL." was observed marked on the side of the receiver/frame above the trigger. - NOTE: if the cylinder is 24mm (approx. 1") in length the calibre is correctly identified as 32 S&W. If the cylinder is longer than 32mm (approx. 1 ¼") in length the calibre is correctly identified as 32 H&R.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.
Other Markings	- barrel markings: "MERWIN HULBERT & CO." with patent dates "1877, 1880, 1882, 1883." - one sample observed featured "MERWIN HULBERT & CO. NEW YORK U.S.A." over "PAT. APR. 17. 77 JUNE 15. 80 MAR. 14. 82 JAN. 9. 83" marked on top of the barrel.

- manufactured during the 1880's by Hopkins & Allen for Merwin Hulbert & Co.
- "Pocket Revolver Spur Trigger" is not marked on this firearm.
- "Pocket Revolver" is derived from the Merwin Hulbert & Co. literature designation in which this model series was referred to as, "Pocket" or "Pocket Size".
- "Pocket Revolver" is one of several varieties of single action revolver, built without a trigger guard, but with a flat topped barrel rib.
- these revolvers have a split frame that pivots around the cylinder pin; when the release is pressed and the barrel/topstrap is twisted to the right and pulled forward, the cartridge cases are retained on the breech-face by a disc that engages the cartridge rims.
- will have either "scoop" or "standard"-style cylinder flutes, nickel finish, hard rubber grips and a spur trigger without a trigger guard; these revolvers were built in both square butt and bird's head butt versions, and the bird's head style grips will generally have an integral lanyard ring at the bottom of the butt.

Manufacturer

- "HOPKINS & ALLEN MFG. CO. NORWICH, CONN. U.S.A." is usually marked on the barrel.

Serial Number

- NOTE: research has indicated that some Merwin Hulbert & Co. handguns did not have a serial number.
- serial number may be marked on the bottom of the grip strap of the receiver/frame or on the left side of the grip strap of the receiver/frame, under the grip plate.
- serial number may be repeated on the barrel, cylinder and left side plate.
- serial number observed consisted of three numbers without a letter prefix or suffix.
- serial number observed consisted of four numbers without a letter prefix or suffix.

Notes

Make

- "MERWIN HULBERT & CO. NY" is marked on the barrel.
- Merwin, Hulbert & Company came into being in 1868.
- Joseph Merwin, a New England arms marketer, joined with two brothers William A. and M.H. Hulbert to form the company known as Merwin, Hulbert & Company
- in 1874, "Merwin, Hulbert & Company" became sole agents for "Hopkins & Allen" and by 1878, "Merwin, Hulbert & Company" controlled "Hopkins & Allen", re-organizing the company into a new entity called "Hopkins & Allen Manufacturing Company".
- circa 1876 Merwin, Hulbert & Co was in production of their own proprietary models of handguns at Norwich, Connecticut.
- Joseph Merwin died in 1879.
- the company suffered from a series of financial disasters, circa 1878: the Russian Government refused to pay for three shiploads of revolvers which they had ordered, the failure of the Evans Rifle Company and a theft of company funds by a business associate.
- Joseph Merwin died in 1879.
- "Merwin & Hulbert" went into receivership in 1881.
- the company was quickly reorganized under the same company name and continued the production of revolvers until a disasterous fire in 1891 destroyed the factory.
- in late 1891 a new company was formed, "Hulbert Brothers & Company" in partnership with Hopkins & Allen to carry on with the revolver manufacturing business.

Model

- "SMITH & WESSON MODEL" may be marked on the barrel.
- manufactured circa 1880.
- this revolver is similar to the Smith & Wesson No 1 Third Issue model.
- features include: round barrel, fluted fixed cylinder, bird's head grip, blued or nickel finish, spur trigger, blade front sight, and a barrel release latch located at the forward bottom of the receiver/frame.
- may have rubber, wood, or ivory grips.
- break open with a tip up barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer - manufacturer's name is not marked on the firearm.

Serial Number - serial number is marked on the left side of the grip on the receiver/frame. Grips may need to be removed to reveal the serial number.

Notes

Make

- "MERWIN, HULBERT & CO. N.Y. U.S.A" is marked on the top strap over the patent date.
- Merwin, Hulbert & Company came into being circa 1868.
- Joseph Merwin, a New England arms marketer, joined with two brothers William A. and M.H. Hulbert to form the company known as Merwin, Hulbert & Company
- in 1874, "Merwin, Hulbert & Company" became sole agents for "Hopkins & Allen" and by 1878, "Merwin, Hulbert & Company" controlled "Hopkins & Allen", re-organizing the company into a new entity called "Hopkins & Allen Manufacturing Company".
- circa 1876 Merwin, Hulbert & Co was in production of proprietary models of handguns at Norwich, Connecticut.
- the company suffered from a series of financial disasters, circa 1878: the Russian Government refused to pay for three shiploads of revolvers which they had ordered, the failure of the Evans Rifle Company and a theft of company funds by a business associate.
- Joseph Merwin died in 1879.
- "Merwin & Hulbert" went into receivership in 1881.
- the company was quickly reorganized under the same company name and continued the production of revolvers until a disastrous fire in 1891 destroyed the factory.
- in late 1891 a new company was formed, "Hulbert Brothers & Company" in partnership with Hopkins & Allen to carry on with the revolver manufacturing business.

Model

- "XL. No 5" was observed marked on the top strap over the calibre.
- "PAT. MARCH 28. 1871" was observed on the top strap.
- manufactured from 1879 to circa 1898.
- features include: brass half-disc front sight and a raised, notched lip in the top strap for a rear sight; octagonal barrel; solid top receiver/frame with a channel on the right side behind the cylinder for loading/removing cartridges; removable fluted cylinder with safety notches; cylinder-pin release is a push-in type blade on the left side of the receiver/frame; exposed spur hammer; sheathed trigger; single action trigger mechanism; birdshead-type grip; nickel finish.

Manufacturer

- "Hopkins & Allen" is not marked on the firearm.

Serial Number

- serial number may be marked on the top of the barrel or under the grip plate, and may be repeated on other parts or components.
- observed serial number consisted of three digits with no letter prefix or suffix.

Calibre

- calibre is usually marked on the receiver/frame.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Manufacturer

- The company logo is marked on the receiver/frame.
- The company logo is comprised of the graphically designed capital letter "M", one over another connected in an `infinity' type loop, bracketed by three bars in a stylized `wing' type expanded from each side of the "M".
- "MESSERSCHMITT" is marked on both sides of the receiver/frame.

Action

- Gas operated.

Serial Number

- The serial number is marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel	- The barrel length does not include any attached device such as flash-hider or muzzle brake.
Shots	- Detachable box magazine. - Designed to accept "Glock" type magazines.
Canadian Law Comments	- This firearm design incorporates a split receiver/frame: the lower receiver is the master component considered to be the receiver/frame for all purposes of the Criminal Code and the Firearms Act.
Other Markings	- German proof marks may be marked on the firearm.

86175 - 2	16 GA X 2 1/2"	2	762	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- Meteor is a Belgian proof mark used circa 1870-1890.
- Meteor was observed, on a reference example, marked on the top rib, may also be stamped on either side locks.
- "Meteor" was a name trade-marked by Louis Muller in 1889.

Model

- model designation not marked on firearm.
- this is a generic entry for Meteor side by side shotguns, with no model markings.
- features may include:
- hammer, or hammerless with a combination of single or double triggers.
- top, side, or push button opening lever.
- damascus, or steel barrels.
- boxlock, or sidelock configuration.
- some specimens may be stamped on either sides of the locks as:
"BELGIUM LAMINATED STEEL".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the manufacturer's name is not marked on the firearm. - Louis Mueller (sometimes spelled Muller or Müller) was a firearms manufacturer in Liege, Belgium circa 1893 - 1900. Some sources report that Mueller built firearms were being imported as late as 1914. - the following trade-names are known to have been registered by Louis Mueller between 1889 and 1894; - Climax, registered on 30-11-1889. - Star, registered on 30-11-1889. - Crescent, registered on 30-11-1889. - Rival, registered on 30-11-1889. - Standard, registered on 16-12-1889. - Meteor, registered on 16-12-1889. - Acme, registered on 16-12-1889. - Club, registered on 16-12-1889. - I.N.L., registered on 05-02-1890. - The little Enfield, registered on 11-03-1893. - Acme Arms Co, registered on 23-04-1894. - Crescent Arms Co, registered on 23-04-1894.
Action	- side by side barrel configuration, hinged barrel design.
Serial Number	- serial numbered on the water table.
Calibre	- was observed marked on the barrel flat.
Other Markings	- possible additional markings usually on sides plates in one line as follows: "BELGIUM LAMINATED STEEL METEOR"

Notes

Make

- "METROARMS" was observed marked on the right side of the slide.
- "MAC" is marked on the side of the slide.
- "MAC" is the acronym for "Metro Arms Corporation".

Model

- "MAC 2011" was observed marked on the side of the slide.
- "2011 MAC" modular design is comprised of a barrel and slide assembly from Metro Arms and a synthetic trigger guard and grip assembly and a steel or alloy receiver/frame from STI. This differs from the traditional 1911A1 design whereby the grip/trigger guard are not integral to the receiver/frame.
- STI also refers to this receiver/frame as the "MODULAR 2011", "MODULAR COMPETITION SYSTEM" or "2011 FRAME KIT".
- "2011 FRAME KIT" consists of the receiver/frame, grip, magazine release, main spring housing and trigger.
- overall length for a 127mm (5 ") barrel is 216mm (8 .5"), average weight is (40.5oz).
- with the interchangeability of STI and aftermarket parts, it may be found in any configuration with any number of barrel lengths.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.
