Make

- "MAUSER" is marked on the left side firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- "MAUSER" was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Model

- Introduced in 2018 as a rebranding of the "German Sport Guns, GSG MP40 Carbine" rifle.
- "MAUSER MP40" is marked on the left side of the receiver/frame.
- "MAUSER MP40" is a modern 22 LR semi-automatic "look-alike" of the German MP40 submachine gun, made with a 415mm/16.3" extended barrel, with a dummy shroud resembling a suppressor.
- "MAUSER MP40" has a version of this firearm with a 253mm/10" barrel.
- Features include: typical MP40 layout and appearance; rifled barrel with fake suppressor shroud; open fixed sights or accessory rail for optics mounting; vertical box magazine; rotary safety at the bottom of the forearm behind the magazine housing made to resemble the take-down nut on a genuine MP40; left-side operating handle; single-action trigger with an internal hammer; under-folding wire-frame stock with folding buttplate; black synthetic and anodized finish.
- Overall length with a 415 mm barrel (16 3/8") is 913 mm with a fully extended butt stock, and 689 mm with the butt stock folded, and the average weight is 3.400 kg (7.5 lbs).

Manufacturer

- "German Sport Guns" and/or the German Sport Guns logo of "GSG" inside two overlapping circles is marked on the firearm.
- "German Sport Guns" was founded in 2002.
- "German Sport Guns" logo is an oval over a circle with "G.S.G" at it centre.
- "G.S.G" and "Made in Germany" are marked on the left side of the receiver/frame.
- "German Sport Guns" is a manufacturer of semi-automatic firearms and airsoft versions of popular weapons.
- "German Sport Guns" was located in Arnsberg, and now Ense-Höingen Germany.

Action

- Blowback operated.

Serial Number

- Serial-numbered on the right side of the receiver/frame, above the magazine housing.
- Serial number of referenced examples consisted of a two letter prefix (BL) and five numbers.

Calibre

- "cal .22 LR" is marked on the right side of the magazine housing.

Shots

- Detachable box magazine.

16132 - 1	20X139 HISPANO-SUIZA	N/A	1840	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the manufacturer may be marked on the cannon; Mauser-werke Waffensysteme is today a subsidiary of Rheinmetall.

Model

- the model is marked on the cannon; "MK 20 Rh 202" stands for "Maschinen Kanone 20 Rheinmetall 202"/"Machine Cannon 20 Rheinmetall 202". After World War Two, Rheinmetall took over the cannon development subsidiary of Mauser, and today produces designs based on that work, in calibres up to 30mm.
- this is a 20mm automatic cannon designed in the 1960s, and produced through the 1970s, with a "soft recoil system" allowing it to be fitted to a variety of mounts that were previously unable to accept the recoil levels produced by 20mm cannon, and allowing this cannon to be seen on a range of vehicle, towed, armoured fighting vehicle, and shipboard mountings. During operation, this cannon fires the next round of a burst before the barrel and bolt return to their full-forward position, cushioning the recoil forces.
- features include: parkerized/phosphated finish; various forms of muzzle brake; tapered barrel; hydraulic buffer tubes and a gas tube; a square receiver; belt-feed mechanism; remote aiming devices; and an electronic solenoid trigger.

Manufacturer

- the manufacturer may be marked on the cannon; Mauser-werke Waffensysteme is today a subsidiary of Rheinmetall.

Action

- combined gas/recoil operation.

Serial Number

- serial numbered on the receiver/frame.

Shots

- belt fed firearm.

Notes

Make

- "MAUSER" is marked on the firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- model designation is not marked on the firearm. - manufactured between 1926 and 1935. - "Mm" in the model designation is for "Mehrlader mittelgewicht". - "Mehrlader" = repeater and "mittelgewicht" = for medium weight. - features include: light weight round barrel; receiver/frame is grooved for scope mount and has an oval shaped ejection port; detachable box magazine located directly in front of the trigger guard with the magazine release located at the front of the trigger guard; slide or rotating safety located on the left rear side of the receiver/frame; one piece walnut stock with checkered semi pistol grip; with or without a groove in the forend; front sling swivel soldered to the barrel and rear sling swivel is screwed to the buttstock; front sight is dovetailed to the barrel or mounted on a ramp and the adjustable rear sight is dovetailed and screwed into the barrel or a tangent sight is soldered on. - the "Mm 410" was replaced by the "Mm 410 B" in 1935.
Manufacturer	- "MAUSER-WERKE A.-G. OBERNDORF A.N." is marked on the left side of the receiver/frame.
Action	- turn bolt.
Serial Number	- serial number is located on left side of the receiver/frame and may be repeated on the barrel. - serial number range may be between 40041 and 50225.
Calibre	- "PATRONE 22 LONG RIFLE" is usually marked on the barrel.
Shots	- detachable box magazine.

Notes

Make

- this is a conversion of an original German WW I or WW II Mauser bolt action rifle into a single shot shotgun; Make is derived from the fact that the action and characteristics of this firearm are known as "Mauser".
- original manufacturer's markings or code letters may still be apparent although many times these markings are removed during the refinishing of these firearms.

Model

- no model name is marked on this firearm; model name is derived from the characteristics of the firearm.
- this type of firearm was remanufactured usually by converting either the 1898 Mauser or the K98 Mauser military rifles into single shot shotguns.
- features include: turn-bolt operated; fixed magazine follower; internal box magazine no longer operational; rifled barrel replaced with a smooth bore shotgun barrel; original stock or replacement sporter stock; usually blued finish.
- original model markings may still be apparent on the left side of the receiver/frame as, but not limited to; "Gew. 98", "Mod. 98".

Action

- turn-bolt design.

Serial Number

- serial numbering rationalization is unknown, however, a numeric number only usually without prefix or suffix may be marked on the receiver ring of the receiver/frame.
- the original serial number as applied by the producing arsenal may not have been removed from the receiver ring, in this instance, an alpha letter suffix may still be apparent.

Calibre

- known example had the calibre marked on the rear of the barrel as, "CAL 12K.".

Notes

Make

- "MAUSER" is not marked on the firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Model

- model is not marked on the firearm.
- military version Mausers were subsequently reworked to a "sporterized" version by FN after 1945 and may have the original markings removed.
- FN commercial rifles were made circa 1950.
- commercial rifles may be marked with the FN logo within a circle and "Made in Belgium" on the receiver/frame.

Manufacturer

- usually marked with the FN name on the receiver/frame.
- may be marked on the left side of the receiver/frame:
"FAB.NAT.D'ARMES de GUERRE HERSTAL - BELGIQUE".

Action

- turn-bolt design.

Serial Number

- original serial number may or may not be present.
- commercial actions may or may not have a serial number.

Notes

Make

- "MAUSER" is not marked on the firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Model

- no model designation appears on the firearm.
- these models are usually reworked military Mauser-type actions which may or may not retain some of their original markings.

Manufacturer

- "Fr. Wilh. Heym" or a variation thereof is marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- internal box-type magazine.
Other Markings	- "Made in Germany" marked on barrel underneath manufacturer's name.

Notes

Make

- "WAFFENFABRIK MAUSER A.-G. OBERDORF A/N" or the "MAUSER" banner trademark or the Waffenfabrik Mauser monogram of "WM" or "WFM" is marked on the firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Model

- Model designation is not marked on the firearm.
- Production started in 1899.
- This model is based on the Mauser 96 or 98 type action and was available as a new product or as a re-worked military rifle.
- Features may include: round, octagonal or part octagonal and round barrel; wing safety on the bolt or slide safety located on the receiver/frame; single or double set trigger; full or semi-pistol grip; half or full synthetic or wood stock; open, peep or optical sights.
- This is a generic entry for a Mauser Sporting Rifle, a more accurate entry may exist to better describe the firearm being examined.

Manufacturer

- manufacturer is marked on the firearm.

Action

- turn-bolt operated.

Serial Number

- serial number is usually located on the left side of the receiver/frame.

Barrel

- barrels are available in various contours and lengths.

Shots

- single column integral box magazine.

Make

- "MAUSER" is not marked on the firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.
- Mauser brothers developed and produced what has become one of the most famous and commonly copied bolt operated action designs in history. The basic design is known worldwide simply as being a "Mauser". As the basic design has been produced in the millions in both military (usually found with a charging clip guide on the top of the receiver/frame and a thumb cut on the left side) and commercial configurations it is also one of the most commonly encountered "sporterized" rifles encountered. Many of the receiver/frames used as the basis for these "Sporter" rifles will have the original manufacturer and model markings removed. As such it is difficult to determine the manufacturer or unique model designation.

Model

- model is not marked on the firearm.
- this is a generic screen, to be used for the purpose of identifying otherwise unidentifiable single shot Mauser Sporter Rifles, when all original markings have been removed and no markings have been added by the person customizing the firearm.

Action

- the firearm is modified permanently to single shot configuration and a magazine can no longer be fitted.

Serial Number

- the original serial number may or may not be present.

FRT Report

Firearm Reference Number (FRN): 68107
Make: Mauser
Model: Sporter

Summary

Make:	Mauser
Model:	Sporter
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

Notes

Make

- "MAUSER" is not marked on the firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.
- Mauser brothers developed and produced what has become one of the most famous and commonly copied bolt operated action designs in history. The basic design is known worldwide simply as being a "Mauser". As the basic design has been produced in the millions in both military (usually found with a charging clip guide on the top of the receiver/frame and a thumb cut on the left side) and commercial configurations it is also one of the most commonly encountered "sporterized" rifles encountered. Many of the receiver/frames used as the basis for these "Sporter" rifles will have the original manufacturer and model markings removed. As such it is difficult to determine the manufacturer or unique model designation.

Model

- this is a generic screen for the purpose of identifying Mauser based "Sporter" rifles when markings may have been removed and no markings are added by the person or firm customizing the firearm.
- as there are a vast number of aftermarket and custom components available for the Mauser design features will vary, many will be converted military rifles that feature a cut-down laminated stock and the original, "stepped' barrel and sights. Others will be completely re-worked actions that have the charger clip guide milled off, a new barrel and stock attached and feature iron or telescopic (or both) sighting systems.

Action

- turn-bolt design.

Serial Number

- the original serial number may or may not be present; as such the serial number could be marked anywhere on the receiver/frame or other major component.

Calibre

- calibre designation may be marked on the barrel.

Canadian Law Comments

- the original, receiver/frame stamped serial number may or may not be present. Many military Mauser rifles had a full or partial serial number marked on the other major components (barrel, bolt etc.), these can not be used as the serial number under Canadian law unless the same number is marked on the receiver/frame.

137412 - 1	177 PELLET	1	425	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "MAUSER" is marked on the firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Model

- model designation is not marked on the firearm.
- features include: synthetic black thumbhole stock with a lower rail; drilled for a scope; hooded front sight and adjustable rear sight.
- overall length is 1051mm (41.33"), weight 7.71lbs.

Action

- break barrel spring piston design.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the right side of the barrel extension.
- example observed has seven numbers without a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - calibre is marked on the right side of the barrel extension.

FRT Report

Firearm Reference Number (FRN): 118283
Make: Mauser
Model: TU-711 Schnellfeuer Reproduction

Summary

Make:	Mauser
Model:	TU-711 Schnellfeuer Reproduction
Manufacturer:	Chinese State Arsenals
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	CHINA
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
118283 - 1	9MM LUGER	10	140	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
118283 - 2	9MM LUGER	20	140	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Mauser" is not marked on the firearm; this is the common name by which these C-96-style pistols are known.

Model

- the model is not marked on the firearm.
- this is a semi-automatic-only Mauser C96-style pistol made in China to resemble the Mauser 712 "Schnellfeuer" ("Rapid-fire") machine pistol, which saw widespread use in China from the 1937 invasion of China by Japan (the "Second Sino-Japanese War") through to the end of the Chinese Civil War in 1950.
- this pistol was refurbished from existing Mauser pistols, with new barrel liners installed to enable 9mm Luger ammunition to be fired, and a completely new lower receiver/frame to eliminate any automatic fire capability.
- features include: standard Mauser 712 layout and operation (minus the ability for selective-fire, and the associated controls for such); blued finish; open adjustable sights calibrated to 1000 yards; tapered barrel; detachable box magazine in a well forward of the trigger-guard; a "yin-yang" symbol on one side of the lower receiver, topped with a line of Chinese ideographs, a loop hammer with manual safety at the rear of the pistol, a "broomhandle"-style grip with grooved wooden grip-plates; and a lanyard loop at the butt.

Manufacturer

- the manufacturer may be marked in Chinese characters.

Action

- recoil-operated.

Serial Number

- serial-numbered on the left side of the upper receiver.

Calibre

- "9MM" is marked on top of the chamber.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Notes

Make

- "MAUSER" is not marked on the firearm.
- "MAUSER" as a make is derived from the last name of Paul and Wilhelm Mauser.
- Wilhelm Mauser was born in 1834 and died in 1882.
- Paul Mauser was born in 1838 and died in 1914.
- Paul Mauser was officially named Peter Paul Mauser.
- Paul Mauser was an inventor and designer with numerous patents on revolvers, pistols, automatic and semi-automatic rifles, and bolt-action rifles..
- Wilhelm and Peter Paul Mauser were established as Gebruder Mauser (Mauser Brothers) in Oberndorf am Neckar, Wurttemburg, Germany in 1872.
- Gerbruder Mauser becomes Gebruder Mauser & Cie in 1874.
- Gebruder Mauser & Cie was renamed Waffenfabrik Mauser AG in 1884.
- Mauser was established under the German proof law as a proof house in 1898.
- Waffenfabrik Mauser AG name was changed to Mauser-Werke AG in 1923.
- Mauser-Werke AG name was changed to Mauser-Werke Oberndorf GmbH in 1975.
- Mauser manufactured pistols, revolvers, rifles, and machine guns almost continuously since 1872.

Model

- this is a generic entry to cover Mauser Short Rifles without country or date markings.
- there are no model specific identifying marks. The markings are often removed or obscured by addition of optical sights.
- features include: wooden pistol grip stock, and an upper handguard that extends from the front of the receiver to about one inch past the forward barrel band; steel buttplate, steel trigger guard and magazine floor plate; round steel barrel with fixed post front sight and elevation adjustable sliding rear sight; sling swivels; a cleaning rod may be found under the barrel.

Manufacturer

- "FAB. NAT. D'ARMES de GUERRE HERSTAL- BELGIQUE" is marked on the left side of the receiver/frame.

Action

- turn bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- fixed box magazine.
Calibre	- calibre may be marked on the barrel, at the muzzle or at the chamber.

Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
20796 - 2	25 AUTO	6	60	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
20796 - 1	6.35MM	6	60	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "WAFFENFABRIK MAUSER A.G. OBERNDORF a.N." is marked on the left side of the slide, with "MAUSER" in a barrel-shaped logo on the grips.

Model

- "W.T.P." stands for "Westen-taschen-pistolen" (Vest Pocket Pistol).
- production for this pistol began in late 1921.
- manufacturing ceased around 1938, when the "WTP 2" was introduced. This new Model is very similar to the "WTP 1" except it has a 51mm barrel.
- WTP 1 is not marked on the firearm. This term has evolved as a method of determining the progression of Model over the years.
- early production of the "WTP" model only had the letter "T" stamped on the left slide. Only around 500 are believed to have been marked this way.

Manufacturer

- "WAFFENFABRIK MAUSER A.G. OBERNDORF a.N." is marked on the left side of the slide, with "MAUSER" in a barrel-shaped logo on the grips.

Action

- blowback operated.

Serial Number

- began at 1 or 100 and continued to approximately 50000.
- the numbers are normally found on the front left of the slide, but may also be found on the right side of the slide.
- the duplication of serial numbers between the two Models can be rationalized by mechanical differences. If the serial number is between 1 and 1000 and the grip is held in place with one screw through the back, it is a "WTP I". If the grip is held in place by a screw through each side of the grip, it is a "WTP II".

Notes

Model

- WTP stands for "Westentaschenpistolen" (Vest Pocket Pistol).
- WTP 2 was introduced around 1938 and production ran to approximately 1947. - WTP 2 model is very similar to the "WTP 1" except with a 51mm barrel.
- WTP 2 is not marked on the firearm. This term has evolved as a method of determining the progression of Model over the years.
- early production of the "WTP" model only had the letter "T" stamped on the left slide. Only around 500 are believed to have been marked this way.

Manufacturer

- German production ceased with the end of the war in 1945.

Serial Number

- may range from approximately 50000 to 75000 and then start again at 1 to approximately 1000.
- the duplication of serial numbers between the two Models can be rationalized by mechanical differences. If the serial number is between 1 and 1000 and the grip is held in place with one screw through the back, it is a "WTP I". If the grip is held in place by a screw through each side of the grip, it is a "WTP II".

Notes

Make

- "MAUSER-VERGUEIRO" is not marked on the firearm.
- "MAUSER" is derived from the last name of Paul and Wilhelm Mauser.
- "VERGUEIRO" is derived from the last name of Jose Alberto Vergueiro.
- "VERGUEIRO" was an officer in the Portuguese Army and the designer of the "Mauser-Vergueiro" model 1904.

Model

- the coat of arms of Brazil an "enwreathed Star" and "F.P.D.F" is marked on top of the receiver ring.
- 1904 model was sold to Brazil between 1910 and 1912.
- the Brazilian federal police purchased approximately 5000 firearms from DWM.
- "F.P.D.F." is the abbreviation for "Forca Policia Distrito Federal" (Military Police of the National Capital).
- this firearm was based on the best features of the Mauser 1898 and the split bridge receiver/frame and simplified bolt of the Mannlicher-Schoenauer rifle.
- features include: round barrel, Mannlicher type bolt action with dual opposed forward locking lugs and a separate non-rotating bolt head, Mauser 98 type bolt mounted wing safety, ejector, bolt stop, trigger mechanism, magazine floor plate that is hinged with a thumb operated magazine release inside the trigger guard, left wall of receiver/frame has a thumb notch for top loading, inverted "V" front sight and "V" notch adjustable rear sight, two piece wood semi pistol grip stock with sling swivel brackets and the cleaning rod is mounted under the barrel.
- the overall length of the firearm with a 739 mm barrel is 1222 millimeters.

Manufacturer

- "DEUTSCHE WAFFEN-UND MUNITIONSFABRIKEN BERLIN" is marked on the left side of the receiver/frame.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the right side of the receiver ring.
- serial number observed consisted of four numbers without a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - calibre designation is not marked on the firearm.

Shots - internal box magazine.

62402 - 3	8MM MAUSER	5	739	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "MAUSER-VERGUEIRO" is not marked on the firearm.
- "MAUSER" is derived from the last name of Paul and Wilhelm Mauser.
- "VERGUEIRO" is derived from the last name of Jose Alberto Vergueiro.
- "VERGUEIRO" was an officer in the Portuguese Army and the designer of the "Mauser-Vergueiro" model 1904.
- King Carlos the 1st (1889 to 1909) crest, a crown and interlocked "CI" or his successor King Manual the 2nd (1909 - 1910) crest, a crown and "M2" is marked on top of the receiver ring.

Model

- manufactured between 1904 and 1909.
- "ESPINGARDA PORTUGUEZA 6.5 MOD. 1904." is marked on the left side of the receiver/frame.
- features include: fixed front sight, adjustable tangent rear sight, split bridge receiver, box magazine, sling swivels, "H" type bayonet lug, blued finish, one piece pistol grip stock and a half length upper handguard.
- issued with a cleaning rod under the barrel.
- "1904" model was converted in the 1930's by the Portuguese military to fire 8MM MAUSER. This modification was known as the 1904/39 model, the 6.5 calibre markings may be "X" out.

Manufacturer

- "DEUTSCHE WAFFEN-UND MUNITIONSFABRIKEN BERLIN" is marked on the left side of the receiver/frame.

Action

- turn-bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the right side of the receiver ring.
Calibre	- the caliber is marked on the left side of the receiver as "6.5".
Shots	- internal box magazine.
Other Markings	- the Portuguese logo is marked on top of the receiver/frame ring (a crown on top of the superimposed letters "C" and "I"). - the left side of the receiver is marked: ESPINGARDA PORTUGUEZA 6.5 MOD. 1904. DEUTSCHE WAFFEN - UND MUNITIONSFABRIKEN BERLIN
Remarks	- the Portuguese army adopted the Mauser-Vergueiro rifle in 1904.

Notes

Make

- "MAUSER-VERGUEIRO" is not marked on the firearm.
- "MAUSER" is derived from the last name of Paul and Wilhelm Mauser.
- "VERGUEIRO" is derived from the last name of Jose Alberto Vergueiro.
- "VERGUEIRO" was an officer in the Portuguese Army and the designer of the "Mauser-Vergueiro" model 1904.
- King Carlos the 1st (1889 to 1909) crest, a crown and interlocked "CI" or his successor King Manual the 2nd (1909 - 1910) crest, a crown and "M2" is marked on top of the receiver ring.

Model

- model designation is not marked on the firearm.
- "ESPINGARDA PORTUGUEZA 6.5 MOD. 1904." or "ESPINGARDA PORTUGUEZA XX MOD. 1904." is marked on the left side of the receiver/frame.
- "1904" model was manufactured between 1904 and 1909.
- Lisbon arsenal commenced conversion of the model 1904 to conform more closely to the specifications of the model 1937-A in 1939.
- 1939 modifications consisted of reboring and rechambering to 8mm Mauser, shortening the barrel and forend, modifying the sights, and add a traverse bolt beneath the chamber to handle increased recoil.
- Portuguese government had originally purchased approximately 100,000 model 1904s from DWM.
- this firearm was base on the best features of the Mauser 1898 and the split bridge receiver/frame and simplified bolt of the Mannlicher-Schoenauer rifle.
- features include: round barrel, Mannlicher type bolt action with dual opposed forward locking lugs and a separate non-rotating bolt head, Mauser 98 type bolt mounted wing safety, ejector, bolt stop, trigger mechanism, magazine floor plate that is hinged with a thumb operated magazine release inside the trigger guard, left wall of receiver/frame has a thumb notch for top loading, square top blade front sight with protective wings and "U" notch adjustable rear sight, two piece wood semi pistol grip stock with sling swivel brackets and the cleaning rod is mounted under the barrel.
- overall length with a 600 mm barrel is 1089 mm.

Manufacturer

- "DEUTSCHE WAFFEN-UND MUNITIONSFABRIKEN BERLIN" is marked on the left side of the receiver/frame.
- this modification was carried out by the Portuguese Military Arsenal in Lisbon.

Action

- turn-bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the right side of the receiver ring.
Calibre	- calibre designation is not marked on the firearm.
Shots	- internal box magazine.

Notes

Make

- the "Maverick" trade mark and/or "Maverick Arms Inc" is marked on the bottom of the receiver/frame and on the barrel.

Model

- model designation appears on bottom of receiver/frame as " 88".
- introduced in 1988.
- this is a pump action repeating shotgun.
- features include: interchangeable plain or ventilated rib round barrel with bead front sight or rifle sights; solid top alloy receiver/frame with right side ejector port and bottom loading port; single or dual slide action bars; hammerless; cross-bolt type safety located at top front of trigger guard and action release located at the back of the trigger guard; tubular magazine with barrel takedown screw cap; wood or black synthetic ribbed forearm and straight buttstock with palm swell pistol grip with recoil pad or black synthetic pistol grip stock; blued finish; optional barrel heat shield.
- a version of the model 88 was offered with a "Bull-Pup" stock as the model 88 Bullpup.
- available in various "Combo" packages.
- Note: barrels are not interchangeable between the six and eight shot models.

Manufacturer

- "Maverick Arms Inc." and "Eagle Pass, TX" and "Made in U.S.A" may be marked on the bottom of the receiver/frame.

Serial Number

- the serial number is located on the left rear side of the receiver/frame.
- typical examples are characterized by two letter alpha prefix with five numbers followed by one alpha character; eg., MVxxxxxB, MVxxxxxC, MVxxxxxD, MVxxxxxL and MVxxxxxM etc.
- note that the numeric portion of the serial number may be repeated.

Barrel

- the barrel length is usually marked on the left rear side of the barrel; eg. "24 IN.".

Calibre

- "Chambered for 2 3/4 & 3 in. Shells" and "12 GA" and barrel length is usually marked on the left rear side of the barrel and "12 GA" is marked on the bottom of the receiver/frame.

Shots

- this shotgun feeds from a tubular magazine located under the barrel.

Canadian Law Comments

- some versions of the Maverick model 88 left the factory equipped with a Prohibited Device commonly known as a "bull-pup" stock. When the "bull-pup" stock ("Prohibited Device" PDR, Part 4, para. 2) is removed the receiver/frame or barrelled action may be correctly classified as "Non-Restricted"

Firearm Reference Number (FRN): 749
Make: Maverick
Model: 88 Bullpup

Summary

Make:	Maverick
Model:	88 Bullpup
Manufacturer:	Mossberg
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Pump Action
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
749 - 10	12 GA X 3"	4	470	Prohibited PDR, Part 4, para. 2	Manufacturer Specifications and Commercial Customization	
749 - 9	12 GA X 3"	6	508	Prohibited PDR, Part 4, para. 2	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the "Maverick" trade name may be marked on the left side of the stock and underside of the receiver/frame.
- the "Maverick" trade mark is used by "Mossberg" and "Maverick Arms Inc.".

Model

- model designation is not marked on the firearm.
- 'Model 88" and "-12 GA-" and "Maverick by Mossberg" may be marked on the left side of the stock and underside of the receiver/frame.
- manufactured from 1990 to 1994.
- this "Maverick, Model 88 Bull Pup" shotgun is a non-restricted firearm, however, the "BULL-PUP STOCK" is a "PROHIBITED DEVICE".
- this is a pump action repeating shotgun.
- features include: black synthetic bull-pup stock with recoil pad and pistol grip forearm; cross bolt trigger and pistol grip safeties and a disconnecting trigger; tubular feed magazine under the barrel; plain bolt with two action slide bars and a forged anodized aluminium receiver/frame; the bolt locks to the barrel; quick change barrel, no tools required; heat shield and carrying handle with integral sights.
- all Maverick 88 series barrels are interchangeable.

Manufacturer

- "Maverick by Mossberg" should be marked on the left side of the stock and underside of the receiver/frame (visible with the stock removed).

Serial Number

- the serial number is located on the left rear side of the receiver/frame.
- the serial number normally consists of a prefix of "MV" with five numbers & an alpha character suffix.

Calibre

- chamber, gauge, choke, and barrel length stamped on left rear of barrel heat shield.
- calibre is marked as 12 GA X 2 3/4" & 3".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- this shotgun feeds from a tubular magazine located under the barrel.

Canadian Law Comments

- This firearm, as it left the factory, is fitted with a "bull-pup" stock ("Prohibited Device" PDR, Part 4, para. 2). When the "bull-pup" stock ("Prohibited Device" PDR, Part 4, para. 2) is removed the receiver/frame/barrel assembly may be correctly classified as "Non-Restricted".
- The receiver/frame or complete action of the firearm, when the "bull-pup" stock ("Prohibited Device") is removed may be associated to any Maverick, Model 88, shotgun with the appropriate, calibre, shots and barrel length.

Notes

Make

- the "Maverick" trade mark and/or "Maverick Arms Inc" is marked on the bottom of the receiver/frame and on the barrel.

Model

- model designation is not marked on the firearm.
- "88 12GA" is marked on the bottom of the receiver/frame.
- introduced in 1990.
- this is a pump action repeating shotgun.
- features include: interchangeable plain round barrel with rifle sights; solid top alloy receiver/frame with right side ejector port and bottom loading port; single or dual slide action bars; hammerless; cross-bolt type safety located at top front of trigger guard and action release located at the back of the trigger guard; tubular magazine with barrel takedown screw cap; black synthetic ribbed forearm and straight buttstock with palm swell pistol grip with recoil pad; blued finish.
- available in various "Combo" packages with plain round barrel with bead sight.

Manufacturer

- "Maverick Arms Inc." and "Eagle Pass, TX" and "Made in U.S.A" may be marked on the bottom of the receiver/frame.

Action

- slide action.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number is located on the left rear side of the receiver/frame. - typical examples are characterized by two letter alpha prefix with five numbers followed by one alpha character; eg., MVxxxxxB.
Barrel	- "24 IN. SLUG" is an example of the markings that may be on the left rear side of the barrel.
Calibre	- "Chambered for 2 3/4 & 3 in. Shells" and "12 GA" and barrel length is usually marked on the left rear side of the barrel and "12 GA" is marked on the bottom of the receiver/frame.
Shots	- this shotgun feeds from a tubular magazine located under the barrel. NOTE: This firearm has a three (3) inch chamber. - total ammunition capacity for the 88 models, using 12 GA x 2 3/4" shells, with one (1) round in the chamber, is six (6) for the six shot model or eight (8) for the eight shot model. Capacity is reduced by one (1) when using the 3" shells. - magazine capacity for the six (6) shot model is four (4) - 12 GA x 3" shells. - magazine capacity for the eight (8) shot model is six (6) - 12 GA x 3" shells.
Remarks	- Wood or black synthetic full pistol grip stock and forearm with recoil pad. Cross bolt trigger safety and a disconnecting trigger. Tubular feed magazine under the barrel. Plain bolt, a double slide bar (new in 90, single before that) and a forged anodized aluminum receiver. The bolt locks to the barrel. Easy change barrel without tools. Any Maverick 88 or Mossberg 500 series 12 Ga. barrel could be fitted. 610 mm (24") barrel in cylinder bore, 711 mm (28") in modified, ACCU-MOD., both with plain or ventilated rib.

Notes

Make

- "MAXIM PAT." is marked on the identification plaque.

Model

- "3.7cm Masch.K." is usually marked on the identification plaque.
- this is an example of the "Pom-Pom" 37mm automatic cannon developed by Hiram Maxim in 1885, based on his successful rifle-calibre machine gun, but enlarged so as to chamber a 37mm cartridge (37mm being the smallest calibre that explosive shells were allowed under the St. Petersburg Declaration of 1863). Early versions of this automatic cannon were manufactured by the Maxim-Nordenfelt Company of Sweden (after Nordenfelt had been bought out by Maxim to eliminate a rival), with licenced copies also being made by DWM of Germany. After Britain had been on the receiving end of German-made "pom-poms" in South Africa, during the early part of the Boer War, they ordered their own versions of the "pom-pom" from Maxim's English subsidiary, Vickers-Maxim.
- features include: greatly-enlarged Maxim machine gun layout and operation, with a brass water-jacket surrounding the barrel, a brass belt feed-guide on the right side, and a cocking handle that reciprocates as the gun fires; open adjustable sights (sights could vary, depending on whether the particular gun was intended for carriage use, naval use, or anti-aircraft use); a square/rectangular receiver/frame with an identification plaque riveted to the top; and a brass grip/trigger assembly at the bottom rear of the receiver.
- depending on the particular version, these cannon may also be seen with an unusual style of brace/shoulder-stock with one or more hand-grips, to allow a gunner to adjust their aim while leaning into the gun with their left shoulder, and firing with the right hand.
- these cannon saw widespread use on ships as a response to the threat of fast motor-torpedo boats, with examples being used on ground mounts through the First World War.
-186 kg/410 pounds, with an overall length of 1850mm.

Manufacturer

- "DEUTSCHE WAFFEN UND MUNITIONSFABRIKEN BERLIN" is marked on the identification plaque.
- DWM was the German licensee of the Maxim Nordenfelt Gun & Ammunition Company, licenced to produce machine guns and cannon based on Hiram Maxim's patents.

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial numbered on an identification plaque on the left side of the cannon.
Shots	- belt fed firearm.

- features include: greatly-enlarged Maxim machine gun layout and operation, with a brass water-jacket surrounding the barrel, a brass belt feed-guide on the right side, and a cocking handle that reciprocates as the gun fires; open adjustable sights (sights could vary, depending on whether the particular gun was intended for carriage use, naval use, or anti-aircraft use); a square/rectangular receiver/frame with an identification plaque riveted to the top; and a brass grip/trigger assembly at the bottom rear of the receiver.
- depending on the particular version, these cannon may also be seen with an unusual style of brace/shoulder-stock with one or more hand-grips, to allow a gunner to adjust their aim while leaning into the gun with their left shoulder, and firing with the right hand.
-186 kg/410 pounds, with an overall length of 1850mm.

Manufacturer

- "MAXIM NORDENFELT G&A Co Ld" is marked on an identification plaque on top of the cannon.
- the Maxim Nordenfelt Gun & Ammunition Company, Limited, was a short-lived hostile takeover by Hiram Maxim in 1888 of the "Nordenfelt Guns and Ammunition Company", of Sweden. When Hiram Maxim began selling his recoil-operated machine gun in Europe, his main competitor was seen to be Nordenfelt (the manufacturer of a quick-firing manually-operated multi-barrelled gun, in calibres suitable from infantry to ship-board use), so he purchased the company outright from Nordenfelt. Maxim Nordenfelt licenced the manufacture and use of Maxim-patented machine guns and light cannon to various European powers, including Germany, but the company became defunct after Maxim moved his European operations to his British licensee, Vickers.

Action

- recoil operated.

Notes

Make

- "MAXIM DEFENSE" is marked on both sides of the firearm.
- "MAXIM DEFENSE INDUSTRIES, LLC" is marked on the left side of the receiver/frame.
- The company logo is marked on the receiver/frame.
- The company logo is comprised of the capital letter "M" inside a hexagon shape or hexagon line-drawing.

Model

- Introduced in 2020.
- "MDX" is marked on the left side of the receiver/frame.
- Combines firearms design features of more than one firearm including "COLT AR15/M16".
- The model "MDX" is available in various manufacturer configurations, including, but not limited to: 1) pistol formation with including pistol brace stock, 2) carbine formation with longer barrel and fore-end stock, & 3) rifle formation with varied shoulder stock options and longer barrel options.
- The model "MDX", as marked on the firearm, may also be known as "SDX" denoting integrated sound suppressor and "PDX" denoting `pistol' configuration.
- Features include: machined, aluminum/titanium/stainless-steel receiver/frame with integral, angled magazine well; interchangeable upper receiver; varied colour and stock options.
- Magazine release located on the side of the firearm.
- Takedown catch/lever located on the side of the firearm.

Manufacturer

- "MAXIM DEFENSE INDUSTRIES, LLC" is marked on the left side of the receiver/frame.
- "MAXIM DEFENSE" is marked on both sides of the firearm.
- The company logo is marked on the receiver/frame.
- The company logo is comprised of the capital letter "M" inside a hexagon shape or hexagon line-drawing.
- "MAXIM DEFENSE" was established in 2013.
- "MAXIM DEFENSE INDUSTRIES, LLC" is located in Saint Cloud, Minnesota, USA.
- "Maxim Defense" began with research and development (R&D) into firearm products, such as varied accessories, stock options and lighter configurations of most common items.
- "Maxim Defense Industries" focused their skill into R&D and in manufacturing weapons and firearms for the U.S. and NATO military forces, government agencies and homeland first responders.
- "Maxim Defense Industries", through sponsorship from the U.S. Army's MCoE (Maneuver Center of Excellence) to become part of the Army Expeditionary Warrior Experiment (AEWE), and produced several specific firearms and associated products for military testing and use, in 2020.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- Gas operated.
Serial Number	- The serial number is marked on the left side of the receiver/frame.
Calibre	- The calibre designation is usually marked on the barrel.
Shots	- Detachable box magazine. - Designed to accept "AR Pattern" type magazines. - Designed to accept "STANAG Pattern" type magazines. - Designed to accept "LANCER" type magazines.
Canadian Law Comments	- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm remains a "Prohibited Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), when removed will not change the "Prohibited Firearm" classification.

FRT Report

Firearm Reference Number (FRN): 118306
Make: Maxim Machine Gun
Model: 1895 Argentine

Summary

Make:	Maxim Machine Gun
Model:	1895 Argentine
Manufacturer:	Deutsche Waffen und Munitionsfabriken (DWM)
Level:	Converted Automatics
Type:	Machine Gun
Action:	Converted Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
118306 - 1	7.65X53 MAUSER	N/A	720	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- "MAXIM MACHINE GUN" is not marked on the firearm.
- "MAXIM'S PATENT" is marked on the brass fusee cover.
- "Maxim Machine Gun" is named after it's inventor "Hiram Stevens Maxim".
- Hiram Stevens Maxim was born on February 05, 1840 in Sangerville, Maine, U.S.A.
- Hiram Stevens Maxim founded "The Maxim Gun Company Limited" in London, England, circa 1884.
- "The Maxim Gun Company Limited" merged with "The Nordenfelt Gun & Ammunition Company Limited" to create the "The Maxim-Nordenfelt Guns & Ammunition Company Limited", circa 1888.
- "The Maxim-Nordenfelt Guns & Ammunition Company Limited" and "Vickers, Sons & Company" merged to form "Vickers, Sons & Maxim Limited", circa 1897.
- Hiram Stevens Maxim became a British subject and was knighted by Queen Victory in 1901.
- "Vickers, Sons & Maxim Limited" was succeeded by "Vickers Limited" in 1911.
- Hiram Stevens Maxim died on the 24th of November 1916.

Model

- model designation is not marked on the firearm.
- known as the Model 1895 Argentine, this is the Maxim Nordenfelt pattern 1891 machine gun.
- marked on the brass fusee cover with name of manufacturer (arranged in an oval) and serial number, patent name and date of manufacture (horizontally within the oval), example: DEUTSCHE WAFFEN UND MUNITIONSFABRIKEN . BERLIN . / No. 123 / MAXIM'S PATENT / 1900
- a water cooled medium/heavy machine gun.
- the distinguishing features of all Argentine Model 1895 Maxim machine guns are: the cartridge markings and the cartridge used (7.65mm X 53 Mauser), low serial numbers (1 to 200) and heavy bronze un-fluted cylindrical water jacket.
- other features include: long rectangular steel receiver/frame on trunnions, large brass cartridge feed guide, dual spade grips, thumb trigger, 'old style' charging lever on the right side, folding bar rear sight with V-notch and barley corn front sight.
- this entry represents the second contract of 150 units of Model 1895 Argentine's, manufactured from 1898 to 1901 by Deutsche Waffen und Munitionsfabriken (DWM) with Argentine Army serial numbers 51 to 200.

Manufacturer

- marked on the brass fusee cover:
DEUTSCHE WAFFEN UND MUNITIONSFABRIKEN . BERLIN .

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- no longer capable of full automatic fire.
Serial Number	- the serial number on the receiver/frame is usually marked on the left side, above the fusee cover. - serial number range from 51 to 200. - as manufactured, other parts of the firearm bore matching serial numbers.
Calibre	- marked on the brass plate riveted to the top cover adjacent to the feed-guides, in three lines: CARTUCHO / MAUSER ARGENTINO / 1909
Shots	- belt fed machine gun.
Remarks	- Argentina sent out two contracts for the 1895 Maxim machine guns that were virtually identical, except for the serial number and the manufacturer's markings. The 1895 contract was for 50 units, with serial numbers 1 to 50 and was manufactured by Maxim Nordenfelt Guns & Ammunition Co. Ltd., England. The 1898 contract was for 150 units, with serial numbers 51 to 200 and was manufactured by Deutsche Waffen und Munitionsfabriken (DWM), Berlin from 1898 to 1901.

Notes

Make

- "MAXIM MACHINE GUN" is not marked on the firearm.
- "MAXIM-PAT" is marked on the fusee spring cover.
- "Maxim Machine Gun" is named after it's inventor "Hiram Stevens Maxim".
- Hiram Stevens Maxim was born on February 05, 1840 in Sangerville, Maine, U.S.A.
- Hiram Stevens Maxim founded "The Maxim Gun Company Limited" in London, England, circa 1884.
- "The Maxim Gun Company Limited" merged with "The Nordenfelt Gun & Ammunition Company Limited" to create the "The Maxim-Nordenfelt Guns & Ammunition Company Limited", circa 1888.
- "The Maxim-Nordenfelt Guns & Ammunition Company Limited" and "Vickers, Sons & Company" merged to form "Vickers, Sons & Maxim Limited", circa 1897.
- Hiram Stevens Maxim became a British subject and was knighted by Queen Victory in 1901.
- "Vickers, Sons & Maxim Limited" was succeeded by "Vickers Limited" in 1911.
- Hiram Stevens Maxim died on the 24th of November 1916.

Model

- model designation is not marked on the firearm.
- adopted by the Swiss Army in 1900, approximately 60 units were ordered through Deustche Waffen und Munitionsfabriken and delivered to machine gun troops between 1901 and 1908.
- this model was preceded by the model 1894 Swiss machine gun.
- features include: double spade grips; optical sight mounting provision; iron front sight mounted on the front of the water jacket and tangent rear sight on the top of the hinge top cover; right side mounted cocking handle assembly; right side belt feed; bottom ejection; tripod mounting studs; steel water jacket; condenser hose assembly; adjustable tension fusee spring located on the left side of the receiver/frame.

Manufacturer

- "DEUTSCHE WAFFEN-UND MUNITIONSFABRIKEN MAXIM-PAT" is marked on the fusee spring cover.

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number may be marked on the firearm.
Calibre	- calibre may be marked on the firearm.
Shots	- belt fed.

- "Vickers, Sons & Maxim Limited" was succeeded by "Vickers Limited" in 1911.
- Hiram Stevens Maxim died on the 24th of November 1916.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- not marked as model 1905, or PM1905. - production commenced at Tula in Russia in 1904 and was officially adopted in 1905. - referred to by the Russians as the "Pulemet Maxim 1905" (translates as Machinegun Maxim, Model 1905), usually abbreviated as PM1905. - water cooled, belt fed, medium/heavy machine gun. - the principal distinguishing features of the Russian model 1905 Maxim machinegun are: - the heavy bronze un-fluted cylindrical water jacket, - large cartridge belt feed guides of brass, - fusee cover of brass marked in Cyrillic with the name of the manufacturer, serial number and date of manufacture, and carrying the Imperial Russian Eagle crest. - other features include: long rectangular steel receiver/frame on trunnions, dual spade grips, thumb trigger, right hand charging lever, folding bar rear sight with aperture and barley corn front sight off set to the left. - for Land Service, usually mounted on a universal "Sokolov" mount that has elevating and traversing mechanisms and which consists of a small two wheeled carriage, with a "U" shaped trail and two legs to raise the gun up to form a tri-pod. - mounted on a tripod for Sea Service or static defense. - some have a small dismountable asymmetric gunner's shield of steel mounted ahead of the receiver/frame, behind the barrel jacket. Note 1: Do not confuse with the lighter Russian Model 1910 Maxim machine gun which can be differentiated from the 1905, by the cylindrical smooth or fluted water jacket of fabricated sheet steel and which has a muzzle booster; the 1910 is also often found on a Sokolov mount, some with the asymmetric gunner's shield. Note 2: many of these firearms were up-graded at a later date to then-current standards and may be encountered with parts and features of later models, usually without any markings to indicate up-grading.
Manufacturer	- marked on the fusee cover on the left side in Cyrillic, with the serial number, manufacturer, date of manufacture and caliber (as three-line) in Russian.
Action	- recoil operation.
Serial Number	- serial number on the receiver/frame is usually found on the left side above the fusee cover. Note: as manufactured, the original parts bore matching serial numbers, however, during service maintenance, repair, or re-build, the parts frequently became mis-matched and numbers on other parts of the firearm may not be the same as the serial number on the receiver/frame.
Calibre	- not marked with cartridge designation, bore diameter given as "Three-Line" in Cyrillic on the fusee cover. Note: a large number of Russian Maxim guns PM1905 and PM1910 captured by the Imperial German Forces were converted during World War I to function with the narrower longer rimless 8MM Mauser (7.92mm) German Service cartridge.
Shots	- belt fed. - early Russian Maxims used a cotton cartridge belt and later used the non-disintegrating metal link belt.

Notes

Make

- "MAXIM MACHINE GUN" is not marked on the firearm.
- "Maxim Machine Gun" is named after it's inventor "Hiram Stevens Maxim".
- Hiram Stevens Maxim was born on February 05, 1840 in Sangerville, Maine, U.S.A.
- Hiram Stevens Maxim founded "The Maxim Gun Company Limited" in London, England, circa 1884.
- "The Maxim Gun Company Limited" merged with "The Nordenfelt Gun & Ammunition Company Limited" to create the "The Maxim-Nordenfelt Guns & Ammunition Company Limited", circa 1888.
- "The Maxim-Nordenfelt Guns & Ammunition Company Limited" and "Vickers, Sons & Company" merged to form "Vickers, Sons & Maxim Limited", circa 1897.
- Hiram Stevens Maxim became a British subject and was knighted by Queen Victory in 1901.
- "Vickers, Sons & Maxim Limited" was succeeded by "Vickers Limited" in 1911.
- Hiram Stevens Maxim died on the 24th of November 1916.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- not marked as model 1905, or PM1905. - production commenced at Tula in Russia in 1904 and was officially adopted in 1905. - referred to by the Russians as the "Pulemet Maxim 1905" (translates as Machinegun Maxim, Model 1905), usually abbreviated as PM1905. - water cooled, belt fed, medium/heavy machine gun. - the principal distinguishing features of the Russian model 1905 Maxim machinegun are: - the heavy bronze un-fluted cylindrical water jacket, - large cartridge belt feed guides of brass, - fusee cover of brass marked in Cyrillic with the name of the manufacturer, serial number and date of manufacture, and carrying the Imperial Russian Eagle crest. - other features include: long rectangular steel receiver/frame on trunnions, dual spade grips, thumb trigger, right hand charging lever, folding bar rear sight with aperture and barley corn front sight off set to the left. - for Land Service, usually mounted on a universal "Sokolov" mount that has elevating and traversing mechanisms and which consists of a small two wheeled carriage, with a "U" shaped trail and two legs to raise the gun up to form a tri-pod. - mounted on a tripod for Sea Service or static defense. - some have a small dismountable asymmetric gunner's shield of steel mounted ahead of the receiver/frame, behind the barrel jacket. Note 1: Do not confuse with the lighter Russian Model 1910 Maxim machine gun which can be differentiated from the 1905, by the cylindrical smooth or fluted water jacket of fabricated sheet steel and which has a muzzle booster; the 1910 is also often found on a Sokolov mount, some with the asymmetric gunner's shield. Note 2: many of these firearms were up-graded at a later date to then-current standards and may be encountered with parts and features of later models, usually without any markings to indicate up-grading.
Manufacturer	- marked on the fusee cover on the left side in Cyrillic, with the serial number, manufacturer, date of manufacture and caliber (as three-lines) in Russian.
Action	- no longer capable of full automatic fire.
Serial Number	- serial number on the receiver/frame is usually found on the left side above the fusee cover. Note: as manufactured, the original parts bore matching serial numbers, however, during service maintenance, repair, or re-build, the parts frequently became mis-matched and numbers on other parts of the firearm may not be the same as the serial number on the receiver/frame.
Calibre	- not marked with cartridge designation, bore diameter given as "Three-Line" in Cyrillic on the fusee cover. Note: a large number of Russian Maxim guns PM1905 and PM1910 captured by the Imperial German Forces were converted during World War I to function with the narrower longer rimless 8MM Mauser (7.92mm) German Service cartridge.
Shots	- belt fed. - early Russian Maxims used a cotton cartridge belt and later used the non-disintegrating metal link belt.

Notes

Make

- "MAXIM MACHINE GUN" is not marked on the firearm.
- "Maxim Machine Gun" is named after it's inventor "Hiram Stevens Maxim".
- Hiram Stevens Maxim was born on February 05, 1840 in Sangerville, Maine, U.S.A.
- Hiram Stevens Maxim founded "The Maxim Gun Company Limited" in London, England, circa 1884.
- "The Maxim Gun Company Limited" merged with "The Nordenfelt Gun & Ammunition Company Limited" to create the "The Maxim-Nordenfelt Guns & Ammunition Company Limited", circa 1888.
- "The Maxim-Nordenfelt Guns & Ammunition Company Limited" and "Vickers, Sons & Company" merged to form "Vickers, Sons & Maxim Limited", circa 1897.
- Hiram Stevens Maxim became a British subject and was knighted by Queen Victory in 1901.
- "Vickers, Sons & Maxim Limited" was succeeded by "Vickers Limited" in 1911.
- Hiram Stevens Maxim died on the 24th of November 1916.

Model

- the model designation may not be marked on the firearm.
- features include: typical MG 08 appearance, with steel water jacket; dual spade grips; thumb trigger; muzzle booster; dimensionally smaller lock mechanism than previous models.
- these machineguns saw use in a variety of mountings (tripod, anti-aircraft, wheeled, etc.).

Manufacturer

- the manufacturer or logo thereof is marked on the firearm.

Action

- recoil-operated.

Serial Number

- numbered on the frame/receiver and major component parts.
- national marking practices often applied to these firearms by the purchaser.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - belt-fed firearm.

Remarks
- this model was extensively sold overseas by DWM, with records showing purchases by Belgium, Brazil, Bulgaria, China, Costa Rica, Mexico, Persia, Peru, Romania, Serbia, Switzerland and Turkey.
- both Switzerland and China undertook licenced production of this model after their initial purchases from DWM.

- Hiram Stevens Maxim died on the 24th of November 1916.

Model

- the model designation is not marked on the firearm.
- this is Swiss-produced firearm based on the 1909 Maxim commercial model.
- 10,269 of these firearms were manufactured in Switzerland between 1915 and 1946.
- features include: double spade grips; optical sight mounting provision on the left side of the receiver/frame; iron sights mounted on the front of the water jacket and on the top of the action cover; right side mounted cocking handle assembly; right side belt feed; bottom ejection; tripod mounting studs; steel water jacket; condenser hose assembly; adjustable tension fusee spring; new design recoil booster.

Manufacturer

- "WAFFENFABRIK" over "+" over "BERN" is marked on the left side of the firearm on the fusee spring cover.
- Waffenfabrik Bern / Eidgenossische Waffenfabrik of Bern, Switzerland was a state owned ordnance factory from 1875 to 1995.
- Waffenfabrik Bern / Eidgenossische Waffenfabrik of Bern was originally know as Montier Werkstatte / Eidgenossische Montier Werkstatte of Bern prior to 1876.

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number
- the serial number is marked on the receiver/frame and on the top cover of the firearm.
- serial number rationalization is unknown.

Shots
- belt fed.

Notes

Make

- "MAXIM MACHINE GUN" is not marked on the firearm.
- "Maxim Machine Gun" is named after it's inventor "Hiram Stevens Maxim".
- Hiram Stevens Maxim was born on February 05, 1840 in Sangerville, Maine, U.S.A.
- Hiram Stevens Maxim founded "The Maxim Gun Company Limited" in London, England, circa 1884.
- "The Maxim Gun Company Limited" merged with "The Nordenfelt Gun & Ammunition Company Limited" to create the "The Maxim-Nordenfelt Guns & Ammunition Company Limited", circa 1888.
- "The Maxim-Nordenfelt Guns & Ammunition Company Limited" and "Vickers, Sons & Company" merged to form "Vickers, Sons & Maxim Limited", circa 1897.
- Hiram Stevens Maxim became a British subject and was knighted by Queen Victory in 1901.
- "Vickers, Sons & Maxim Limited" was succeeded by "Vickers Limited" in 1911.
- Hiram Stevens Maxim died on the 24th of November 1916.

Model

- "L.M.G.08/15" over "Gwf" over "SPANDAU" over the year of manufacturer are marked on the top cover.
- L.M.G. ("Luft Maschinen Gewehr") is an aircraft version of the MG08/15.
- manufactured from 1916 to 1918 with over 23,000 produced.
- features include: perforated barrel jacket; lightened receiver/frame; curved ejector tube for disposing of fired cartridge cases; synchroniser gear assembly.

Manufacturer

- "SPANDAU" and the year of manufacture are marked on the top cover.

Action

- recoil operated with gas assist.

Serial Number

- 1 to 5 digits with or without a letter suffix.
- letter suffix included letters "a" to "e".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - belt fed firearm.

- Hiram Stevens Maxim became a British subject and was knighted by Queen Victory in 1901.
- "Vickers, Sons & Maxim Limited" was succeeded by "Vickers Limited" in 1911.
- Hiram Stevens Maxim died on the 24th of November 1916.

Model

- model designation is marked on the brass fusee cover with name of manufacturer (arranged in an oval) and serial number, patent name and date of manufacture (horizontally within the oval), example: "MAXIM NORDENFELT GUNS AND AMMUNITION Co. LT . / MAXIM'S PATENT / 1892"
- water cooled medium/heavy machine gun approved for British service in 1889 and introduced with a "parapet carriage" in 1891.
- features include: long rectangular steel receiver/frame on trunnions; large brass cartridge feed-guide; dual spade grips; thumb trigger; 'old-style' charging lever on the right side; folding bar rear sight with V-notch and barley corn front sight.

Manufacturer

- marked on the brass fusee cover:
"MAXIM NORDENFELT GUNS AND AMMUNITION Co. LD".

Action

- recoil operated.

Serial Number

- the serial number on the receiver/frame is usually marked on the left side, above the fusee cover.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- marked on the brass plate riveted to the top cover adjacent to the feed-guides.
Shots	- 150 or 250 round belt fed machine gun.

- "Vickers, Sons & Maxim Limited" was succeeded by "Vickers Limited" in 1911.
- Hiram Stevens Maxim died on the 24th of November 1916.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- may not be marked on the firearm with model designation; or as "Mark I".
- usually marked on the fusee cover with the name of the manufacturer and date of manufacture, example: MAXIM NORDENFELT GUNS & AMMUNITION Co. LD. / 1895
- new manufactured (not converted) watercooled, British Military Service medium/heavy machinegun, known as "Gun, Maxim, .303 Inch, Mark I" adopted in July 1893.
- the distinguishing features of this firearm are: no muzzle booster, smaller and lighter receiver/frame and mechanism (than the MARK 1and 2 Converted in 303 BRITISH), the cartridge for which it is chambered (303 BRITISH), the Maxim Nordenfelt markings on the fusee cover on left side of the receiver/frame dated from 1893 to 1897 and the heavy bronze un-fluted cylindrical water jacket. (Bare Weight: 27.22 Kg/60 lb., overall length 107.65cm/42.38 inches)
- other features include: long rectangular steel receiver/frame on trunnions, brass cartridge feed guide, dual spade grips, thumb trigger, charging lever on the right side frame, folding bar rear-sight with a V-notch and a Barley-Corn front sight.
- Do not confuse with:
- the identical firearm marked "Vickers, Sons & Maxim" dated 1898 to 1904.
- the identical firearm manufactured by "RSAF, Enfield", dated 1897 to 1917.
- the similar but larger "Maxim MARK 1 303 Converted" with muzzle booster, adopted in 1897. (Bare Weight: 29.04Kg/64 lb., overall length 114.3cm/45.0 inches)
- the similar but larger "Maxim MARK 2 303 Converted" with muzzle booster, adopted in 1901. (Bare Weight: 18.15Kg/40 lb., overall length 118.1cm/46.5 inches)
- a similar firearm named "Vickers Machine Gun (Various MARKS) 303 BRITISH".
- the captured German Maxim Machine Gun in 8MM MAUSER, converted to use the 303 BRITISH ammunition, known by the British as the "Gun, Maxim, 'G' .303 Inch".

Manufacturer

- marked as manufactured by "Maxim Nordenfelt Guns & Ammunition Co. Ltd." until 1897, when the name of the firm changed to "Vickers, Sons & Maxim".

Action

- recoil operated.

Serial Number

- usually number on the receiver/frame above the fusee cover.
Note: as manufactured, the original parts bore matching serial numbers; however, during repair or re-build, the parts may become mis-matched, and numbers on other parts of the firearm may not be the same as on the receiver/frame.

Shots

- fed by a 250 cartridge canvas machine gun belt.

Notes

Make

- "MAXIM MACHINE GUN" is not marked on the firearm.
- "Maxim Machine Gun" is named after it's inventor "Hiram Stevens Maxim".
- Hiram Stevens Maxim was born on February 05, 1840 in Sangerville, Maine, U.S.A.
- Hiram Stevens Maxim founded "The Maxim Gun Company Limited" in London, England, circa 1884.
- "The Maxim Gun Company Limited" merged with "The Nordenfelt Gun & Ammunition Company Limited" to create the "The Maxim-Nordenfelt Guns & Ammunition Company Limited", circa 1888.
- "The Maxim-Nordenfelt Guns & Ammunition Company Limited" and "Vickers, Sons & Company" merged to form "Vickers, Sons & Maxim Limited", circa 1897.
- Hiram Stevens Maxim became a British subject and was knighted by Queen Victory in 1901.
- "Vickers, Sons & Maxim Limited" was succeeded by "Vickers Limited" in 1911.
- Hiram Stevens Maxim died on the 24th of November 1916.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- not usually marked on the fusee cover with model designation; but marked on the fusee cover as "I" for Mark I.
- usually marked on the fusee cover with the name of the manufacturer and date of manufacture, example: VICKERS, SONS & MAXIM / 1898 / LIMITED
- new manufactured (not converted) water cooled, British Military Service medium/heavy machinegun, known as "Gun, Maxim, .303 Inch, Mark I" adopted in July 1893.
- the distinguishing features of this firearm are: no muzzle booster, smaller and lighter receiver/frame and mechanism (than the MARK 1and 2 Converted in 303 BRITISH), the cartridge for which it is chambered (303 BRITISH), "Vickers, Sons & Maxim" markings on the fusee cover on left side of the receiver/frame dated from 1898 and the heavy bronze un-fluted cylindrical water jacket. (Bare Weight: 27.22 Kg/60 lb., overall length 107.65cm/42.38 inches)
- other features include: long rectangular steel receiver/frame on trunnions, brass cartridge feed guide, dual spade grips, thumb trigger, charging lever on the right side frame, folding bar rear sight with a V-notch and a Barley-Corn front sight.
- Do not confuse with:
- the identical firearm marked "Maxim Nordenfelt Guns & Ammunition Co. Ltd." dated 1893 to 1897.
- the identical firearm manufactured by "RSAF, Enfield", dated from 1896.
- the similar but larger "Maxim MARK 1 303 Converted" with muzzle booster, adopted in 1897. (Bare Weight: 29.04Kg/64 lb., overall length 114.3cm/45.0 inches)
- the similar but larger "Maxim MARK 2 303 Converted" with muzzle booster, adopted in 1901. (Bare Weight: 18.15Kg/40 lb., overall length 118.1cm/46.5 inches)
- a similar firearm named "Vickers Machine Gun (Various MARKS) 303 BRITISH".
- the captured German Maxim Machine Gun in 8MM MAUSER, converted to use the 303 BRITISH ammunition, known by the British as the "Gun, Maxim, 'G' .303 Inch".

Manufacturer

- usually marked on the fusee cover with name of manufacturer and date of manufacture in three lines, example: VICKERS, SONS & MAXIM / 1898 / LIMITED
- the firm's name changed to "Vickers, Sons & Maxim" in 1897, but continued with "Maxim Nordenfelt" markings that year.
- markings changed to "Vickers, Sons & Maxim" in 1898.

Action

- recoil operated.

Serial Number

- usually number on the receiver/frame, the fusee cover, cartridge feed guides, top of the water jacket, etc.

Note: as manufactured, the original parts bore matching serial numbers; however, during repair or re-build, the parts may become mis-matched, and numbers on other parts of the firearm may not be the same as on the receiver/frame.

Shots

- fed by a 250 cartridge canvas machine gun belt.

- Hiram Stevens Maxim became a British subject and was knighted by Queen Victory in 1901.
- "Vickers, Sons & Maxim Limited" was succeeded by "Vickers Limited" in 1911.
- Hiram Stevens Maxim died on the 24th of November 1916.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- may not be marked with model designation; or as "Mark I".
- a watercooled medium/heavy machinegun adopted in 1897 by the British Military Service as "Gun, Maxim, .303 Inch Converted, Mark I".
- markings on the brass fusee cover retain the name of the manufacturer (arranged in an oval), patent name and date of manufacture (1889 to 1892), example: MAXIM NORDENFELT GUNS AND AMMUNITION Co. LT. / MAXIM'S PATENT / 1895
- usually marked on a brass plate on the top cover as: CARTRIDGE / MAGAZINE RIFLE / CORDITE
- other features include: heavy bronze un-fluted cylindrical water jacket, long rectangular steel receiver/frame on trunnions, modified brass cartridge feed guide, dual spade grips, thumb trigger, charging lever on the right side frame, folding bar rear sight with a V-notch off set to the left and a Barley-Corn front sight, likewise off set to the left.
- modifications required to convert this firearm to use 303 BRITISH included: changing to the non-standard light barrel, with adapters, addition of a muzzle booster, new light weight breech mechanism, modified cartridge feed guides and rear sight for 303 BRITISH. (Bare Weight: 30.04Kg/64lb., overall length 114.3cm/45.0 inches)

Note: the muzzle booster attachment is essential to reliably cycle the action of this firearm; it is usually marked, example: MAXIM 303 MK I / AND 303 COND MK II / ATTACHT BALL FIRING / MK II / 1915

- Do not confuse with:
- the similar but smaller, new manufactured "Maxim, MARK 1 303" introduced in 1889, manufactured by Vickers, Sons & Maxim Ltd., or by RSAF Enfield since 1896. (Weight: 27.22Kg/60 lb., overall length 107.65cm/42.38 inches)
- the almost identical "Maxim, MARK 2 303 Converted", adopted in 1901. (Weight: 18.15Kg/40 lb., overall length 118.1cm/46.5 inches)
- the captured German Maxim Machine Gun originally in 8MM MAUSER, converted to use the 303 BRITISH ammunition, known by the British as the "Gun, Maxim, 'G' .303 Inch".

Manufacturer

- the original firearm was manufactured by Maxim Nordenfelt Guns & Ammunition Company Limited, most were converted (but unmarked) by Royal Small Arms Factory, Enfield.

Action

- no longer capable of full automatic fire.

Serial Number

- usually number on the receiver/frame above the fusee cover.

Note: as manufactured, the original parts bore matching serial numbers; however, during repair or re-build, the parts may become mis-matched, and numbers on other parts of the firearm may not be the same as on the receiver/frame.

Calibre

- usually marked on a brass plate on the top cover as:
CARTRIDGE / MAGAZINE RIFLE / CORDITE

Shots

- belt fed, using 250 round canvas machine gun belt.

Remarks

- the original firearm before conversion was the Maxim Gun .45 Inch Mark I. chambered for the British Army in .450 Martini Henry cartridge, and for the British Navy in .45 British Machine Gun Cartridge (sometimes referred to as the Gardner/Gatling cartridge).
- all of the original firearms known as the "Maxim Gun, .45 Inch, Mark I" in military service by the Army and the Navy (except those in Colonial Service), were converted to use the British .303 cartridge by 1915.

- Hiram Stevens Maxim founded "The Maxim Gun Company Limited" in London, England, circa 1884.
- "The Maxim Gun Company Limited" merged with "The Nordenfelt Gun & Ammunition Company Limited" to create the "The Maxim-Nordenfelt Guns & Ammunition Company Limited", circa 1888.
- "The Maxim-Nordenfelt Guns & Ammunition Company Limited" and "Vickers, Sons & Company" merged to form "Vickers, Sons & Maxim Limited", circa 1897.
- Hiram Stevens Maxim became a British subject and was knighted by Queen Victory in 1901.
- "Vickers, Sons & Maxim Limited" was succeeded by "Vickers Limited" in 1911.
- Hiram Stevens Maxim died on the 24th of November 1916.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- model designation on the firearm usually marked: MARK II
- a watercooled medium/heavy machinegun adopted in 1901 by the British Military Service as "Gun, Maxim, .303 Inch Converted, Mark II
- modifications required to convert this firearm to use 303 BRITISH included: changing to the then currently produced service heavy barrel, with adapters, addition of a muzzle booster, new lighter breech mechanism, modified cartridge feed guides and new rear sight for 303 BRITISH. (Bare Weight: 18.15Kg/40lb., overall length 118.1cm/46.5 inches)
- usually marked on a brass plate on the top-cover as: CARTRIDGE / MAGAZINE RIFLE / CORDITE
- markings on the brass fusee cover retains the name of the manufacturer (arranged in an oval), patent name and date of manufacture (1889 to 1892), example: MAXIM NORDENFELT GUNS AND AMMUNITION Co. LT. / MAXIM'S PATENT / 1895
- other features include: the heavy bronze un-fluted cylindrical water jacket, long rectangular steel receiver/frame on trunnions, large brass cartridge feed guide, dual spade grips, thumb trigger, charging lever on the right side frame, folding bar rear sight with a V-notch off set to the left and a Barley-Corn front sight, likewise off set to the left.
- Do not confuse with:
- the similar but smaller, new manufactured British "Maxim MARK 1 303" introduced in 1889, manufactured by Vickers, Sons & Maxim Ltd., or by RSAF Enfield commencing in 1896. (Bare Weight: 27.22Kg/60 lb., overall length 107.65cm/42.38 inches)
- the initial conversion of this gun to use the 303 BRITISH cartridge with the light weight barrel, adopted in 1897 as the "Maxim MARK 1 303 Converted". (Bare Weight: 29.04Kg/64 lb., overall length 114.3cm/45.0 inches)
- the captured German Maxim Machine Gun originally in 8MM MAUSER converted to use the 303 BRITISH ammunition, known by the British as the "Gun, Maxim, 'G' .303 Inch".

Manufacturer

- the original firearm was manufactured by Maxim Nordenfelt Guns & Ammunition Company Limited, most were converted (but unmarked) by Royal Small Arms Factory, Enfield.

Action

- muzzle-boosted, recoil operation.

Serial Number

- usually number on the receiver/frame above the fusee cover.
Note: as manufactured, the original parts bore matching serial numbers; however, during repair or re-build, the parts may become mis-matched, and numbers on other parts of the firearm may not be the same as on the receiver/frame.

Calibre

- usually marked on a brass plate on the top cover adjacent to the cartridge feed guides, as: CARTRIDGE / MAGAZINE RIFLE / CORDITE

Shots

- belt fed, using 250 round canvas machine gun belt.

Remarks

- the original firearm was the Maxim Gun .45 Inch Mark I, chambered for the British Army in .450 Martini Henry cartridge, and for the British Navy in .45 British Machine Gun Cartridge (sometimes referred to as the Gardner/Gatling cartridge): this firearm may also have been up-dated from the "Maxim Gun, .303 Converted, Mark I".
- all of the original firearms known as the "Maxim Gun, .45 Inch, Mark I" in military service by the Army and the Navy (except those in Colonial Service), were converted to use the British .303 cartridge by 1915.

Notes

Make

- "MAXIM MACHINE GUN" is not marked on the firearm.
- "Maxim Machine Gun" is named after it's inventor "Hiram Stevens Maxim".
- Hiram Stevens Maxim was born on February 05, 1840 in Sangerville, Maine, U.S.A.
- Hiram Stevens Maxim founded "The Maxim Gun Company Limited" in London, England, circa 1884.
- "The Maxim Gun Company Limited" merged with "The Nordenfelt Gun & Ammunition Company Limited" to create the "The Maxim-Nordenfelt Guns & Ammunition Company Limited", circa 1888.
- "The Maxim-Nordenfelt Guns & Ammunition Company Limited" and "Vickers, Sons & Company" merged to form "Vickers, Sons & Maxim Limited", circa 1897.
- Hiram Stevens Maxim became a British subject and was knighted by Queen Victory in 1901.
- "Vickers, Sons & Maxim Limited" was succeeded by "Vickers Limited" in 1911.
- Hiram Stevens Maxim died on the 24th of November 1916.

Model

- this model was introduced in 1915.
- this is a modification of the MG08 Model.
- model designation is marked on the top cover, marking reads: "M.G.08/15".
- the MG08/15 is basically a lightened MG08 fitted with a shoulder stock, pistol grip, sling and a bipod.

Manufacturer

- the manufacturers markings will be marked as : "D.W.& M.F." over "BERLIN".
- Deutsche Waffen und Munitionsfabriken (DWM) was one of several firms that produced this model.

Action

- no longer capable of full automatic fire.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- located on left side of receiver/frame.
- sequentially numbered by each manufacturer, no larger number than five digits has been reported.
- some production in the traditional German sequences of 1 to 9999 and 1a to 9999a has been seen with alpha script letters of "c" and "d" being reported from some manufacturers.
- serial number may be duplicated on other parts of the firearm.

Shots

- this is a belt fed firearm.

- Hiram Stevens Maxim was born on February 05, 1840 in Sangerville, Maine, U.S.A.
- Hiram Stevens Maxim founded "The Maxim Gun Company Limited" in London, England, circa 1884.
- "The Maxim Gun Company Limited" merged with "The Nordenfelt Gun & Ammunition Company Limited" to create the "The Maxim-Nordenfelt Guns & Ammunition Company Limited", circa 1888.
- "The Maxim-Nordenfelt Guns & Ammunition Company Limited" and "Vickers, Sons & Company" merged to form "Vickers, Sons & Maxim Limited", circa 1897.
- Hiram Stevens Maxim became a British subject and was knighted by Queen Victory in 1901.
- "Vickers, Sons & Maxim Limited" was succeeded by "Vickers Limited" in 1911.
- Hiram Stevens Maxim died on the 24th of November 1916.

Model

- manufactured from 1916 to 1918.
- model designation is marked on the top cover as "M.G.08/15."
- the MG08/15 is basically a lightened MG08 with the water jacket removed and fitted with a shoulder stock, pistol grip, sling and a bipod.

Manufacturer

- "Rh.M.&M.F." over "SOMMERDA" is marked on the top cover.

Action

- gas assisted recoil opperated.

Serial Number

- marked on the left side of the receiver/frame.
- the complete serial number or portions of it may be found on the top cover and other components.

Shots

- belt fed firearm.

Notes

Make

- "MAXIM MACHINE GUN" is not marked on the firearm.
- "Maxim Machine Gun" is named after its inventor "Hiram Stevens Maxim".
- Hiram Stevens Maxim was born on February 05, 1840 in Sangerville, Maine, U.S.A.
- Hiram Stevens Maxim founded "The Maxim Gun Company Limited" in London, England, circa 1884.
- "The Maxim Gun Company Limited" merged with "The Nordenfelt Gun & Ammunition Company Limited" to create the "The Maxim-Nordenfelt Guns & Ammunition Company Limited", circa 1888.
- "The Maxim-Nordenfelt Guns & Ammunition Company Limited" and "Vickers, Sons & Company" merged to form "Vickers, Sons & Maxim Limited", circa 1897.
- Hiram Stevens Maxim became a British subject and was knighted by Queen Victory in 1901.
- "Vickers, Sons & Maxim Limited" was succeeded by "Vickers Limited" in 1911.
- Hiram Stevens Maxim died on the 24th of November 1916.

Model

- model designation appears on the top cover as: M.G.08/15
- manufactured from 1916 to 1918.
- the Maxim designed MG 08 machine gun was redesigned, modified, and lightened, to increase its portability: this variant was adopted in 1915, and designated as the M.G.08/15.
- medium machine gun, water cooled.
- features a stepped receiver/frame, lightened barrel, reduced water capacity barrel jacket, fitted with a sling, barrel jacket mounted bi-pod, wood shoulder stock and a trigger group with a pistol grip under the receiver/frame.
- the canvas cartridge belt feeds from the right side to the left: the firearm is often encountered with an attached drum housing a 100 round belt.
- may or may not be equipped with a muzzle booster/flash suppressor.

Manufacturer

- manufacturer's name is marked on the top-cover as "S.& H." and may be marked in full on the fusee spring-cover on the left side of the receiver/frame.

Action

- full automatic only.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the receiver/frame serial number is usually located on the left side of the receiver/frame hump, above the fusee spring-cover. - these machineguns were sequentially serial numbered by each manufacturer, at the beginning of each year of production (1916, 1917, and 1918), usually starting at 1 or 0001 and going to 9999, then proceeding to 1a or 0001a up to 9999a, then 1b to 9999b, then 1c to 9999c, and so on. - Note 1: some have been reported with five digits. - Note 2: as manufactured, the original parts bore matching serial numbers, however, during service maintenance or repair the parts frequently became mis-matched and numbers on other parts of the firearm may not be the same as the serial number on the receiver/frame.
Shots	- belt fed machine gun.
Other Markings	- the top cover is usually marked in five lines, starting with the serial number and ending with the date of manufacture; example: 1234a / M.G.08/15 / S.&H. / BERLIN / 1917
Remarks	- because the principal manufacturer of this firearm was Spandau, and most MG08/15s carried that name, the troops frequently referred to these machineguns as "Spandaus".

- "The Maxim Gun Company Limited" merged with "The Nordenfelt Gun & Ammunition Company Limited" to create the "The Maxim-Nordenfelt Guns & Ammunition Company Limited", circa 1888.
- "The Maxim-Nordenfelt Guns & Ammunition Company Limited" and "Vickers, Sons & Company" merged to form "Vickers, Sons & Maxim Limited", circa 1897.
- Hiram Stevens Maxim became a British subject and was knighted by Queen Victory in 1901.
- "Vickers, Sons & Maxim Limited" was succeeded by "Vickers Limited" in 1911.
- Hiram Stevens Maxim died on the 24th of November 1916.

Model

- introduced in 1918.
- model designation is normally marked on the top cover, marking may read "M.G.08/18.".
- the MG08/18 is an MG08/15 with an air cooled barrel within a smaller diameter barrel jacket which is perforated/ventilated, also equipped with a shoulder stock, pistol grip, sling and a bipod.

Manufacturer

- marked on the top cover, markings read "ERFURT".
- it is believed that less than one thousand MG08/18's were manufactured by Erfurt.

Action

- recoil operated with gas assist.

Serial Number

- located on left side of receiver/frame.
- sequentially numbered.
- serial number may be duplicated on other parts of the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - this is a belt fed firearm.

Firearm Reference Number (FRN): 80071
Make: Mayer, R A
Model: Crossbow

Summary

Make:	Mayer, R A
Model:	Crossbow
Manufacturer:	Aguirre y Aranzabal (AYA)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Multi-Barrel
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
80071 - 1	12 GA X 2 3/4"	2	480	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	
80071 - 2	16 GA X 2 3/4"	2	711	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "CROSSBOW " and "R. A. MAYER & CO." was observed marked on the right barrel.
- "Made in Spain" was observed marked on the left barrel.

Model

- "CROSSBOW " and "R. A. MAYER & CO." was observed marked on the right barrel.
- features include: round side by side barrels; front hinged receiver/frame with top tang mounted break open action release lever; hammerless; wood forearm and semi-pistol grip buttstock; blued barrels; silver, engraved receiver/frame.

Manufacturer

- the "AYA" logo is marked on the water table of an observed example.

Action

- side by side barrel configuration, hinged barrel design.

Serial Number

- serial number is marked on the water table of the receiver/frame.
- observed serial numbers consisted of five numbers without a letter prefix or suffix.
- "No" in front of the serial number is not a letter prefix.
- in 1995, the Spanish government instituted a new system for firearm's serial numbering. This system incorporated the code number of the gunmaker/manufacturer, weapon code, serial number sequence, and year of manufacturer.
- an example of a serial number is as follows: "16 - 03 - #0# - 95".
- serial number break down, the first two numbers (16) are the code numbers for the manufacture, the next two numbers (03) are the code numbers for shotgun, the next Numbers are the serial number sequence and the last two numbers (95) are the year of manufacture.

Notes

Make

- appears on the left side of the receiver/frame as "EDWARD MAYNARD PATENTEE"
- designed by Edward Maynard in the 1850's.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this is a entry encompassing all Maynard Sporting Rifles manufactured by Massachusetts Arms from 1873 to 1890.
- basic model designation (1873 or 1882) appears on the side of the receiver/frame, sub model designation not marked.
- under lever tipping barrel breech loading rifle.
- exposed center hammer.
- American walnut buttstock and may or may not have a forearm.
- may have simple sporting rifle or elaborate target sights.
- noticeable gap between breech of barrel and front of the face of the receiver to accommodate Maynard center fire proprietary cartridges which have an extremely thick rim, exceptions being rifles chambered for 22 RF LONG and 45-70 GOVT.
- offered also in smoothbore configuration utilizing Maynard center fire proprietary shotshells.
- auxiliary barrel in other calibres were available from the manufacturer.

Manufacturer

- appears on the right side of the receiver/frame as:
"MANUFACTURED BY MASS ARMS CO. CHICOPEE FALLS"

118807 - 1	12 GA X 2 3/4"	3	711	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "MB" and "Baschieri & Pellagri" is marked on the bottom of the receiver/frame forward of the loading port. - MB is believed to be the acronym for Manfredi & Baschieri and Baschieri & Pellagri (B&P) is an ammunition manufacturer located in Bolonia, Italy since 1885.
Model	- "MB" is marked on the firearm. - features include: a very unique, modular designed firearm that incorporates a black or dual finished alloy lower receiver/frame; bead front sight; blued barrel with a vented rib; checkered European walnut buttstock and forearm and a cross bolt safety located behind the trigger.
Manufacturer	- "VERNEY-CARRON" and "SAINT-ETIENNE" are marked on the firearm.
Action	- gas operated.
Serial Number	- serial number is marked on the bottom of the receiver/frame forward of the loading port. - observed serial number had a "A" prefix followed by five numbers.
Calibre	- the calibre designation is marked on the barrel.
Shots	- tubular magazine mounted under the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- the lower assembly that contains the trigger group and is marked with the serial number is the receiver/frame.

Other Markings

- the barrels may have a different maker's designation. Samples were presented that were marked "VERNEY-CARRON", a barrel maker in France.
- "Baschieri & Pellagri", an Italian ammunition manufacturer and importer may be marked on the upper assembly.

Notes

Make

- "McBros" and "Phoenix, AZ, USA" is usually marked on the side of the receiver/frame.
- "McBros" and "McMillan Bros" were trade names/trademarks used by the "McMillan Brothers".
- "McBros Rifle" and "McMillan Brothers Rifle Company" were owned by Rock McMillan and Kelly McMillan.

Model

- introduced in 1993.
- model is intended for use by precision shooters.
- "MCR" is built on a Remington model 700 receiver/frame mated to a pillar bedded McMillan Fiberglass Stocks Inc stock with an adjustable butt spacer system.
- features include: "match grade" stainless steel barrel, matte black polymer finish, and a tuned Remington "style" trigger.
- options include; stocks with adjustable cheek piece, accessory rail, muzzle brake, bi-pod, fluted barrel and upgraded trigger.
- this particular version is also known as the "MCR" model which denotes "McBros Company Remington" receiver/frame, not to be confused with the "MCRT" which uses a McMillan produced Remington "type' receiver/frame.

Manufacturer

- MCR Tactical is built on a Remington receiver/frame all of the original Remington markings remain intact.

Serial Number

- serial number is stamped on receiver/frame, this model uses the Remington serial number rationalization.

Calibre

- calibre is marked on the barrel, other calibres are available on customer request.

Notes

Make

- "McBros" and "Phoenix, AZ, USA" is usually marked on the side of the receiver/frame.
- "McBros" and "McMillan Bros" were trade names/trademarks used by the "McMillan Brothers".
- "McBros Rifle" and "McMillan Brothers Rifle Company" were owned by Rock McMillan and Kelly McMillan.

Model

- introduced in 1993.
- "McBros, Phoenix AZ Model MCRT" is marked on the right side of the receiver/frame.
- features include: "match grade" stainless steel barrel, matte black polymer finish and a tuned Remington-style trigger.
- options include: stocks with adjustable cheek piece; accessory rail; muzzle brake; left or right hand action; bi-pod; fluted barrel and upgraded trigger.
- this is a single shot version of MCRT action series.
- this is a generic entry for those models with "Model MCRT" marked on the receiver/frame, this receiver/frame is used as the basis for several McBros rifles, all of which are simply marked as model "MCRT". Other entries exist that may better identify the firearm being examined.
- all variants are built on a McBros produced Remington model 700 "type" (styled after the model 700, but not identical to it) receiver/frame mated to a pillar bedded McMillan Fiberglass Stocks Inc stock with an adjustable butt spacer system.
- available in long or short action lengths and in left or right hand versions.
- features normally include: "match grade" stainless steel barrel, matte black polymer finish, and a tuned Remington "style" trigger.
- options include; stocks with adjustable cheek piece, accessory rail, muzzle brake, bi-pod, fluted barrel and upgraded trigger.
- variants include the "Hunter" series of rifles, which includes the "American", "Yukon" and "Outdoorsman", and the "Tactical" model..
- McBros also produces rifles built on a Remington model 700 receiver/frame known as the "MCR" model which denotes "McBros Company Remington" receiver/frame, not to be confused with the "MCRT" which uses a McBros produced Remington "type" receiver/frame.

Serial Number

- serial number is marked on the front of the receiver/frame.
- example observed with three digits followed by one letter, one digit and one letter (000X0X).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre is marked on the barrel, other calibres are available on customer request.
Other Markings	- also may be marked on the barrel: "LAZZORONI TITAN 8.59".

Notes

Make

- "McBros" and "Phoenix, AZ, USA" is usually marked on the side of the receiver/frame.
- "McBros" and "McMillan Bros" were trade names/trademarks used by the "McMillan Brothers".
- "McBros Rifle" and "McMillan Brothers Rifle Company" were owned by Rock McMillan and Kelly McMillan.

Model

- introduced in 1993.
- "McBros, Phoenix AZ Model MCRT" is marked on the side of the receiver/frame.
- this is a generic entry for those models with "Model MCRT" marked on the receiver/frame, this receiver/frame is used as the basis for several McBros rifles, all of which are simply marked as model "MCRT". Other entries exist that may better identify the firearm being examined.
- all variants are built on a McBros produced Remington model 700 "type" (styled after the model 700, but not identical to it) receiver/frame mated to a pillar bedded McMillan Fiberglass Stocks Inc stock with an adjustable butt spacer system.
- available in long or short action lengths and in left or right hand versions.
- features normally include: "match grade" stainless steel barrel, matte black polymer finish, and a tuned Remington "style" trigger.
- options include; stocks with adjustable cheek piece, accessory rail, muzzle brake, bi-pod, fluted barrel and upgraded trigger.
- variants include the "Hunter" series of rifles, which includes the "American", "Yukon" and "Outdoorsman", and the "Tactical" model.
- McBros also produces rifles built on a Remington model 700 receiver/frame known as the "MCR" model which denotes "McBros Company Remington" receiver/frame, not to be confused with the "MCRT" which uses a McBros produced Remington "type" receiver/frame.

Serial Number

- serial number is stamped on the receiver/frame, normally incorporates an alpha character prefix.
- custom serial numbers are available on request.

Calibre

- calibre is marked on the barrel.

Notes

Make

- "McBros" and "Phoenix, AZ, USA" is usually marked on the side of the receiver/frame.
- "McBros" and "McMillan Bros" were trade names/trademarks used by the "McMillan Brothers".
- "McBros Rifle" and "McMillan Brothers Rifle Company" were owned by Rock McMillan and Kelly McMillan.

Model

- introduced in 1993.
- "McBros, Phoenix AZ Model MCRT" is marked on the side of the receiver/frame.
- "MCRT American Hunter" is built on a McBros produced Remington model 700 "type" (styled after the model 700, but not identical to it) receiver/frame mated to a pillar bedded McMillan Fiberglass Stocks Inc stock.
- available in long or short action lengths and in left or right hand versions.
- features normally include: no iron sights, Sako style extractor, "match grade" stainless steel barrel, matte black polymer finish, and a tuned Remington "style" trigger and safety.
- other variants of the "Hunter" series of rifles, include the "Yukon" (distinguished by the large No 6 barrel contour and iron sights) and "Outdoorsman" (a complete package including an optical sight).
- McBros also produces rifles built on a Remington model 700 receiver/frame known as the "MCR" model which denotes "McBros Company Remington" receiver/frame, not to be confused with the "MCRT" which uses a McBros produced Remington "type" receiver/frame.

Serial Number

- serial number is stamped on receiver/frame, normally incorporates an alpha prefix.
- custom serial numbers are available on request.

Calibre

- calibre is marked on the barrel.

Notes

Make

- "McBros" and "Phoenix, AZ, USA" is usually marked on the side of the receiver/frame.
- "McBros" and "McMillan Bros" were trade names/trademarks used by the "McMillan Brothers".
- "McBros Rifle" and "McMillan Brothers Rifle Company" were owned by Rock McMillan and Kelly McMillan.

Model

- introduced in 1993.
- "McBros, Phoenix AZ Model MCRT" is marked on the side of the receiver/frame.
- "MCRT Tactical" is intended for use by precision shooters.
- "MCRT Tactical" is built on a McBros produced Remington model 700 "type" (styled after the model 700, but not identical) receiver/frame mated to a pillar bedded McMillan Fiberglass Stocks Inc stock with an adjustable butt spacer system.
- features include: "match grade" stainless steel barrel, matte black polymer finish, and a tuned Remington "style" trigger.
- options include; stocks with adjustable cheek piece, accessory rail, muzzle brake, bi-pod, fluted barrel and upgraded trigger.
- this particular version, when built on a Remington model 700 receiver/frame is known as the "Tactical" or "MCR" model which denotes "McBros Company Remington" receiver/frame, not to be confused with the "MCRT" which uses a McBros produced Remington "type" receiver/frame.

Action

- turn bolt design.

Serial Number

- serial number is stamped on receiver/frame, this model uses the Remington serial number rationalization.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre is marked on the barrel, other calibres are available on customer request.
Shots	- detachable box magazine.
Other Markings	- the "MCRT" receiver/frame is used as the basis for several McBros rifles, all variants are simply marked as model "MCRT".

Notes

Make

- "McBros" and "Phoenix, AZ, USA" is usually marked on the side of the receiver/frame.
- "McBros" and "McMillan Bros" were trade names/trademarks used by the "McMillan Brothers".
- "McBros Rifle" and "McMillan Brothers Rifle Company" were owned by Rock McMillan and Kelly McMillan.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- introduced in 1993.
- "McBros, Phoenix AZ Model MCRT" is marked on the side of the receiver/frame.
- "MCRT Yukon Hunter" is built on a McBros produced Remington model 700 "type" (styled after the model 700, but not identical to it) receiver/frame mated to a pillar bedded McMillan Fiberglass Stocks Inc. stock.
- available in long or short action lengths and in left or right hand versions.
- features normally include: iron sights, Sako style extractor, "match grade" No 6 contour stainless steel barrel, matte black polymer finish, and a tuned Remington "style" trigger and safety.
- other variants of the "Hunter" series of rifles, include the "American" (distinguished by the smaller barrel contour and lack of iron sights) and "Outdoorsman" (a complete package including an optical sight).
- McBros also produces rifles built on a Remington model 700 receiver/frame known as the "MCR" model which denotes "McBros Company Remington" receiver/frame, not to be confused with the "MCRT" which uses a McBros produced Remington "type" receiver/frame.

Action

- turn-bolt design.

Serial Number

- serial number is stamped on receiver/frame, normally incorporates an alpha prefix.
- custom serial numbers are available on request.

Calibre

- calibre is marked on the barrel.

Firearm Reference Number (FRN): 5030
Make: McComas, Alexander
Model: Single Barrel

Summary

Make:	McComas, Alexander
Model:	Single Barrel
Manufacturer:	
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
5030 - 1	4 GA X 4"	1	1143	Antique AFR, Section 1, para. 5	Non-Commercial Customization	

Notes

Make	- "ALEXANDER McCOMAS" is usually marked on the firearm. - Alexander McComas was a gunsmith, manufacturer and importer based at 51 South Calvert Street, Baltimore, Maryland, between 1821 and 1889.
Model	- the model is not marked on the firearm; this is a descriptor of the firearm type. - this is one of several versions of a single-barrel hinge-action shotgun manufactured by or for Alexander McComas prior to 1889. - features usually include: blued or browned finish; round barrel with octagonal breech; checkered walnut forearm and pistol-grip stock;manually-cocked hammer on a sideplate; top, side, or bottom lever opening.
Action	- "tip-down" single-shot.
Serial Number	- serial-numbered on the receiver/frame.

FRT Report

Firearm Reference Number (FRN): 146727
Make: McCormick, Robert
Model: 1797 Pennsylvania Contract Musket

Summary

Make:	McCormick, Robert
Model:	1797 Pennsylvania Contract Musket
Manufacturer:	McCormick, Robert
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
146727 - 1	69 FLINTLOCK	1	1111	Antique CC 84(1) "antique firearm"	Manufacturer Specifications and Commercial Customization	
146727 - 2	69 PERCUSSION	1	1111	Antique CC 84(1) "antique firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the manufacturer is marked on the lockplate as "MCCORMICK".

Model

- the model is not marked on the firearm
- this is an example of the 1797 Pennsylvania Contract Flintlock Musket (a copy of the French Charleville 1763 Flintlock Musket), adopted by the State of Pennsylvania in 1797 and supplied by Robert McCormick, of Globe Mills, Pennsylvania,, under a contract issued by the state government to arm the state militia.
- known McCormick 1797 muskets are marked "MCCORMICK" on the lock plate, along with a Pennsylvania property mark of "CP" (Commonwealth of Pennsylvania); Henry also produced identical muskets for the US government, with a property mark of "US", and for the State of Virginia, with barrels marked with county and/or regimental numbers.
- these muskets may or may not have lock plate dates indicating manufacture in the years immediately post-dating 1797 (1797 through circa 1808).
- features include: browned finish; fixed open sights; iron mountings and three barrel bands; an under barrel ram-rod; flintlock mechanism with cock and frizzen on the right-side lock plate; sling swivels at second barrel band and front of trigger-guard; and maple straight-grip stock with an iron butt plate.
- these firearms may also be seen converted to percussion ignition.

Manufacturer

- the manufacturer is marked on the lock plate as "MCCORMICK".
- Robert McCormick was an industrialist based in Globe Mills, Pennsylvania from the mid-1700s to early 1800s, who produced 1798-pattern muskets under contract to the United States, the State of Virginia and the State of Pennsylvania.

Action

- muzzle loaded flintlock single-shot.

Barrel

- barrel lengths may vary slightly.

FRT Report

Firearm Reference Number (FRN): 24606
Make: McLoughlin, Charles & Sons
Model: Webley WG

Summary

Make:	McLoughlin, Charles & Sons
Model:	Webley WG
Manufacturer:	Webley
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
24606 - 1	455 REV	6	152	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
24606 - 2	455 REV	6	152	Antique AFR, Section 1, para. 7	Manufacturer Specifications and Commercial Customization	

Notes

Make

- Charles McLoughlin & Sons, Cheltenham" retailed this "Webley W.G. Model 1889".
- Charles McLoughlin was a gun maker located at 89 High Street, Cheltenham, Gloucestershire, England from 1858 to circa 1894.
- Charles McLoughlin also had facilities at Moddle Street, Stroud, England circa 1878.
- Charles McLoughlin & Sons was a gun maker located at 89 High Street, Cheltenham, Gloucestershire, England from circa 1889 to circa 1901.

Model

- ""W.G." MODEL 1889" is marked on the left side of the firearm.
- "WG" model series is a design-improved version of the former Webley Improved Government revolver of circa 1881-1885. The letters WG are often associated with the name Webley-Green, however, research has indicated that WG is understood to be the acronym for "Webley Government".
- manufactured from1886 until circa 1902.
- double action, top breaking with simultaneous ejection.
- typical characteristics;
- large rounded barrel-to-frame hinge at front of receiver/frame designed for greater rigidity and strength.
- large thumb-actuated barrel release lever on left side of receiver/frame; this latch may also be referred to as the Webley "stirrup" or "bridle" latch.
- may have bird's head type grip or square butt configuration, with or without lanyard ring on bottom butt strap.
- trigger guard is forged integrally with the receiver/frame.
- grip frame is noticeably humped behind the hammer.
- left side of receiver/frame has a removable "access" plate held in place by two slot-head screws.
- may have distinctively shaped "church steeple" type cylinder fluting with later models having the more traditional round shaped fluting; research has indicated that the use of the "church steeple" type of fluting ceased circa 1893.
- research indicates that the practice of putting the date of manufacture on the firearm ceased circa 1893.
- available in blued or nickel plated finish.
- sub-calibre conversion units were available for this firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer
- "WEBLEY'S" or "WEBLEY" over "PATENTS" is usually marked on the side of the receiver/frame.
- "P. Webley & Son / Webley & Scott" trademark logo of a "Winged Bullet" over "W&S" is usually marked on the side of the receiver/frame.

Canadian Law Comments
- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "G. McMILLAN & CO." or "McMILLAN GUN WORKS" may be marked on the barrel or on the side of the receiver/frame.
- Wes Harris used the following trade names/trademarks between 1987 and 2000:
"G. McMillian & Co." circa 1987; "McMillan Gun Works" circa 1990; "Harris-McMillan Gunworks" circa 1992; and "Harris Gunworks" circa 1995.

Model

- manufactured between 1988 and 1995.

Serial Number

- serial number is marked on the receiver/frame.

Remarks

- This is a bolt action sporting rifle built on a Mauser (pre-64 Winchester type) or Remington action to customer's specifications. Black stainless steel action and barrel, synthetic material stock (green, beige, brown or black), wood stock an option, scope rings, left or right action, recoil pad. These rifles are built to customer's specifications and as such may be found with whatever barrel length, caliber the customer desires. Magazine capacity for non magnum cartridges is 4 rounds, for magnum cartridges, 3 rounds.
This particular rifle was introduced in 1987. This company has undergone several name changes since its establishment in 1985: G. McMillan , G. McMillan & Co. Inc., Harris-McMillan and finally Harris Gunworks in 1995.

Notes

Make

- McMillan Firearms' "M" logo is usually marked on the right side of the receiver/frame.
- McMillan Firearms' "M" logo and "McMILLAN" over "PHOENIX, ARIZONA USA" is usually marked on the left side of the receiver/frame.

Model

- introduced in 2007 by McMillan Firearms Manufacturing, LLC of Phoenix, Arizona.
- TAC-50 was originally manufactured by McMillan Brothers.
- TAC-50 was originally sold as the Boomer Tactical (50 BMG Tactical) by McBros and McMillan Brothers from 1993 to 2007.
- TAC-50 is a manually operated, turn-bolt design, repeating rifle with a McMillan fiberglass stock with a detachable butt stock.
- features include: free floating, heavy round fluted barrel with a threaded muzzle for a muzzle break; 50 BMG receiver/frame is drilled and tapped for scope mounts; exterior surface of the bolt has spiral flutes; adjustable trigger; two piece McMillan TAC-50 pistol grip stock with a detachable butt stock and bipod stud; matte black, O.D. green, tan, dark earth, gray finish or camouflage colour schemes finish.
- TAC-50 is normally fitted with a bi-pod.
- overall length is 1448 mm (57.0"), and average weight is 11.8 kgs (26 lbs).
- Rifling Characteristics: 6 grooves, right hand pitch, 1 turn in 15 inches. (381mm)

Manufacturer

- McMillan Firearms' "M" logo is usually marked on the right side of the receiver/frame.
- McMillan Firearms' "M" logo and "McMILLAN" over "PHOENIX, ARIZONA USA" is usually marked on the left side of the receiver/frame.

Action

- turn-bolt design.

Serial Number

- serial number is usually marked on the left side of the receiver/frame.
- observed serial number consisted of a three letter "BMG" prefix, three numbers, and a letter suffix.

Barrel

- special order customized barrels are available in any length, with or without flutes, tapered or straight.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre is marked on the barrel.
Shots	- detachable box magazine.
Remarks	- the muzzle brake has a model number stamped on the top surface: "McMillan Bros MODEL 98A". It is not clear whether this is the model name / number of the muzzle brake or an AKA for the firearm. - the McMillan fiberglass stock is adjustable for length-of-pull, has a pistol grip and is specifically designed for use with a bi-pod.

Notes

Make

- "G. McMILLAN & CO." or "McMILLAN GUN WORKS" may be marked on the barrel or on the side of the receiver/frame.
- Wes Harris used the following trade names/trademarks between 1987 and 2000:
"G. McMillian & Co." circa 1987; "McMillan Gun Works" circa 1990; "Harris-McMillan Gunworks" circa 1992; and "Harris Gunworks" circa 1995.

Model

- introduced in 1988.
- this is a bolt action sporting rifle built on a (pre-64) Winchester model 70 type action to customer's specifications.
- features include: chrome-moly or stainless steel action and barrel; synthetic material stock; metallic open sights or scope rings (or both), black finish.
- these rifles are built to customer's specifications and as such may be found with whatever barrel length, caliber the customer desires.

Serial Number

- the serial number is stamped on the receiver/frame.

Shots

- magazine capacity for non magnum cartridges is four rounds, for magnum cartridges, three rounds.

Notes

Make	- "MCMILLAN & CO. PHOENIX AZ" is usually marked on the right side of the slide.
Model	- "WOLVERINE" is marked on the right side of the receiver/frame. - imported between 1992 and 1995. - Wolverine Competition Match has a 6 inch/152MM non-compensated barrel. - Wolverine Combat has a 5 1/2 inch/140MM compensated barrel. - features include: Colt 1911-A1 style receiver/frame; interchangeable barrels; wood or synthetic grips; various finishes; adjustable rear sight; extended slide stop; skelotonized trigger.
Manufacturer	- "CASPIAN ARMS LTD. HARDWICK VT USA" is marked on the right side of the slide. - Caspian Arms Limited has been in business since 1983. - Caspian Arms Limited moved to Wolcott, Virginia circa 2004. - Caspian Arms Limited is a manufacturer of carbon steel, stainless steel, titanium or alunimum alloy 1911-A1 receivers. - Caspian Arms Limited is a manufacturer of carbon steel, stainless steel or titanium slides for 1911-A1 receivers. - Caspian Arms Limited sells just slides, or just receivers, or a combination, as requested by the customer. In many cases, the customer may choose to complete the receiver with components from other industry manufacturers. - McMillan pistols were assembled using Caspian Arms receivers/frames and Peters-Stahl barrels and slides. - Peters-Stahl is a manufacturer based in Paderborn, Germany, that specializes in producing several types of 1911-style semi-automatic pistols; their factory logo consists of "PETERS" over "STAHL", with the loop of the "P" in "Peters" extending out over both words. This logo is marked on the left side of the slide and on the right side of the barrel and is visible through the ejection port.
Action	- recoil operated.
Serial Number	- the serial number is marked on the right side of the receiver/frame. - unknown serial number rationalization. - observed serial number consisted of five sequential numbers without a letter prefix or suffix.
Calibre	- calibre designation is marked on the barrel and is visible through the ejection port.
Shots	- detachable box magazine.

Notes

Make

- "McMillan Bros" and "Phoenix, AZ, USA" is usually marked on the side of the receiver/frame.
- "McBros" and "McMillan Bros" were trade names/trademarks used by the "McMillan Brothers".
- "McBros Rifle" and "McMillan Brothers Rifle Company" were owned by Rock McMillan and Kelly McMillan.

Model

- "TUBB 2000" is marked on the right side of the receiver/frame.
- introduced 2000.
- TUBB is an acronym for "Tubb Universal Bi-camming Bolt-action".
- turn bolt operated, detachable box magazine.
- this is a precision-built target rifle designed with "switch barrel" technology to accommodate ease of barrel/calibre changing.
- has many fully adjustable components, i.e., trigger, buttstock, tubular forend.
- full pistol grip, patented adjustable elastomer recoil reducer.
- action is designed with a solid top and angled loading port on right side of receiver/frame for ease of loading single rounds.
- the "Bi-camming" bolt design allows for a very smooth and easy operation of the bolt handle; this design is touted as being fully operational with a 'single finger'.
- available in various colours and tactical black.
- will be produced to suit any customer barrel/calibre specifications.
- fully adjustable iron sights or full-length picatinny rail for optical mounts.
- available with single-round loading device to meet NRA High Power Rifle Rules.
- "TUBB 2000" is also for David Tubb, eleven times American national high power shooting champion and rifle co-designer of the rifle introduced in 2000.
- precision built target rifle with a "switch barrel" design to accommodate ease of barrel/calibre changes.
- "TUBB 2000t" or "Tactical" feature an all black finish.
- features include: unthreaded muzzle; attached bracket for tunnel front sight and a level used as a "cant indicator"; free floating stainless steel match grade barrel; tubular handguard with elongated ventilation slots; round stainless steel receiver/frame; elevated Picatinny rail mount for target rear sight or scope; grip and magazine housing assembly has the look alike of a AR-15; synthetic or wood pistol grip; integral trigger guard; available with single-round loading device to meet NRA High Power Rifle Rules; right hand bolt handle and ejection port; two parallel sliding tubular pieces stock design held by a bracket having the top tube with a adjustable cheek rest and lower one with the recoil pad; barrel/ receiver/frame stainless steel finish and other parts can be black, bright blue and orange or other anodized color finish.

Action

- turn-bolt design.

Serial Number

- serial number was observed marked on the left side of the receiver/frame and some samples the serial number was observed marked on the right side of the receiver/frame.
- serial number of referenced examples consisted of four numbers.

Calibre

- calibre identification is marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.
- may have a single-round loading device to meet NRA High Power Rifle Rules
- uses all magazines available for the 308 WIN/7.62MM calibre variant of the AR15/M16 type rifles from DPMS (LR-308) and Knights Manufacturing (SR25).

Firearm Reference Number (FRN): 61640
Make: MCS
Model: Palma

Summary

Make:	MCS
Model:	Palma
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
61640 - 2	308 WIN	1	737	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	
61640 - 1	7.62MM NATO	1	762	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- the make name, "MCS Inc", appears on the left side of the receiver/frame.
- MCS stand for Master Class Sports of Brookfield CT, USA.

Model

- the model designation, "PALMA" is marked on the barrel.
- firearms assembled in this configuration are intended for use in "Palma" type rifle matches which involve the use of iron sights at ranges of 800, 900, and 1000 yards from the prone, unsupported position.
- features include: flat bottomed, rectangular shaped receiver/frame which uses a Remington Model 700-type bolt design; capable of mounting a target trigger mechanism; fitted with rear aperture sights; stainless steel light Palma profile barrel; aperture fore sight assembly; one piece, synthetic stocks; pillar bedding; sling rail and hand stop; adjustable butt stock and butt plate; adjustable cheek piece.

Action

- turn-bolt design.

Serial Number

- appears on the left side of the receiver/frame.
- observed specimen had a two letter prefix followed by three numbers.
- serial numbers may be a custom number as specified by the purchaser (example observed at 1999 DCRA matches had a 6 digit serial number representing the owner's daughter's date of birth).

Barrel

- all custom barrel lengths are available and may be observed fitted.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - the calibre designation appears on the left side of the chamber area of the barrel and may be marked as "7.62MM PALMA".

FRT Report

Firearm Reference Number (FRN): 117986
Make: ME Sportwaffen
Model: 1860 Lindsay

Summary

Make:	ME Sportwaffen
Model:	1860 Lindsay
Manufacturer:	Cuno Melcher
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	GERMANY
Serial Numbering:	
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
117986 - 1	44 PERCUSSION	1	210	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- ME-LINDSAY MOD. 1860 CAL. 44 SP" is marked on the left side of the barrel.

Model

- "LINDSAY MOD. 1860" is marked on the left side of the barrel.
- "UNITED STATES" over "the outline of a wagon" over "1860" inside a circle may be marked on both sides of the receiver/frame.
- manufactured in 1977.
- features include: fixed blade front sight and a fixed notch rear sight; round barrel; flat sided receiver/frame; exposed spur hammer; single action trigger mechanism, brass trigger guard and grip strap; wooden grip panels; blued barrel and receiver/frame.
- "1860 Lindsay" model was also available with a barrel insert in 4.5mm or 177 Pellet, 198mm in length. The barrel is inserted and screwed into the 44 Cal. barrel. A 177 Pellet is pushed down the barrel and a percussion cap is placed on the nipple. When the hammer falls on the percussion cap, the pellet is forced down of the barrel.
- "1860 Lindsay" model is manufactured in the style of the John Parker Lindsay single barrel percussion handguns of 1860. The original Lindsay handgun design features a single barrel, one trigger and two hammers. The single barrel is loaded with two black powder loads placed one in front of the other. The right hammer falls on a percussion cap to discharge the forward load and the left hammer falls on a second percussion cap to discharge the rear load.

Manufacturer

- Cuno Melcher is a manufacturer based in Solingen, Germany.
- Cuno Melcher was established in 1911.

Calibre

- ME-LINDSAY MOD. 1860 CAL. 44 SP" is marked on the left side of the barrel.

105655 - 1	177 PELLET	7	76	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is marked on the left side of the barrel as: "ME".

Model

- "9 mod. Para - 4.5D" is marked on the left side of the slide.
- this pistol is based on the same receiver/frame as Melcher's "9 Para" gas or blank pistol.
- this is an air pistol built to resemble a Walther PP/PPK-style pistol, that uses Brocock-style pre-charged air cartridges.
- features include: checkered wood or black plastic grips, blued or nickel finished receiver/frame, safety, ring hammer, front blade sight and V-notch rear sight.

Manufacturer

- Cuno Melcher is a manufacturer based in Solingen, Germany, that specializes in producing gas, blank, and air guns, as well as rimfire handguns.

Action

- compressed air operated; cartridge filled with air by hand pump.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- numbered on the right side of the receiver/frame.

Calibre

- uses Brocock-style pre-charged air cartridges.
- the Brocock firm has an innovative "cartridge" which may be charged with compressed air. A pellet is inserted into the front portion of the cartridge and the assembly is loaded as if it were a conventional cartridge into the chamber. When the firing pin strikes the rear of the cartridge, air pressure is released, propelling the lead waisted pellet out of the cartridge and accelerating it through the barrel.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - markings on the left side of the slide are: "ME 9 mod. Para-4,5D".

125616 - 2	32 MILLER SHORT	1	762	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- make may be marked on the left side of the receiver/frame as "S.D. Meachham T & H Co. Inc.".

Model

- model designation may be marked on the left side of the receiver/frame as "Hoch".
- this model of rifle was originally developed by Richard Hoch during the mid 1980's using a newly designed falling block action. During late 1989, S.D. Meacham purchased the rights to manufacture this action from Richard Hoch. After the introduction of a number of minor improvements, manufacture of this firearm continued in kit form (action only) or as a complete un-assembled rifle at the S.D. Meacham company until 1996.
- features may include: under lever opening; blued or colour case-hardened receiver/frame; single trigger; and wing safety lever behind trigger.
- as this is a custom rifle features such as: sight configurations; barrel contours and lengths; finishes of walnut furniture; and forend and buttstock configurations may vary greatly between individual examples.

Manufacturer

- S.D. Meachham Tool & Hardware Co. Inc. is a current custom gunmaker located in Peck, Idaho who specializing in high quality reproductions of Winchester High Wall and Low Wall rifles.
- this company also makes replacement parts for the original 1885 High Wall and Low Wall Rifles.

Action

- lever operated.

Serial Number

- serial number may be marked on the left side of the receiver/frame.
- observed example consisted of a series of four numbers preceeded by a letter prefix.

FRT Report

Firearm Reference Number (FRN): 117464
Make: Meffert, I
Model: Grothe Target Rifle

Summary

Make:	Meffert, I
Model:	Grothe Target Rifle
Manufacturer:	Meffert, I
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
117464 - 1	22 LR	1	700	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "IMMAN MEFFERT" is marked on the top of the barrel.
Model	- this is an unusual single-shot target rifle built in pre-World War Two Germany, on a patent issued to "Grothe". - blued finish, wooden pistol grip stock with Bavarian style cheekpiece, sling swivels, adjustable peep sights with aperture plate and insert front and a sliding breech-block that is opened by pressing a small button at the rear of the block; this releases the block, which can then be pulled rearward to expose the chamber for loading/extraction. - examined sample marked "IMMAN MEFFERT SUHL" on the top of the barrel, with "System Grothe" in script on the left side of the breech-block and numerous pre-war proofs on the barrel, receiver/frame and breech block.
Manufacturer	- "IMMAN MEFFERT SUHL" is marked on the top of the barrel.
Action	- unusual sliding block single-shot rifle.
Serial Number	- serial number is marked on the receiver/frame.

Firearm Reference Number (FRN): 137856
Make: Meffert, I
Model: Martini Schuetzen Rifle

Summary

Make:	Meffert, I
Model:	Martini Schuetzen Rifle
Manufacturer:	Meffert, I
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
137856 - 1	8.15X46R	1	715	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "I. MEFFERT", "J. MEFFERT" or "IMMAN. MEFFERT, SUHL" may be marked on the firearm.

Model

- model designation is not marked on the firearm.
- this is a modified Martini action used by gunmakers to build "Off-Hand" or "Schuetzen" or "Schuetzenfest" target rifles which were used in target matches.
- features include: breech block hinged at the rear of the receiver/frame that swings downward at the front to open; usually these actions were made so that the essential parts of the receiver/frame, including the trigger plate could be disassembled quickly; elaborately shaped trigger guard which serves a triple purpose, that of the trigger guard, operating lever and type of grip to support the hand in firing; straight stock with "schuetzen" style hooked buttplate and high comb cheek rest; octagonal or round barrel; and double set triggers.

Manufacturer

- "I. MEFFERT", "J. MEFFERT" or "IMMAN. MEFFERT, SUHL" may be marked on the firearm.

Action

- rear hinged, lever operated tipping block design.
- Martini action is locked in the firing position by the tip of the operating lever holding the breech block face up and in line with the chamber.

Serial Number

- serial number may or may not be marked on the receiver/frame.
- observed serial number consisted of five numbers without a letter prefix or suffix.

Notes

Make

- "MEGA" over the outline of the symbol of the atom (three well-defined electron orbits around a nucleus) was observed marked on the left side of the magazine housing of the receiver/frame.
- "MEGA MACINE SHOP INC." over "TUMWATER WA USA" was observed marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "MEGA" over the outline of the symbol of the atom was observed marked on the left side of the magazine housing of the receiver/frame. - "MODEL GATOR" is marked on the left side of the receiver/frame. - "MEGA Gator" is of the design commonly known as the AR-15/M-16 rifle. - "MEGA Gator" is sold as a receiver/frame. - "MEGA Gator" receiver/frame is machined from 7075 forged aluminum. - features include: threaded muzzle for flash hider/muzzle brake; standard or grooved, M4 carbine contoured barrel; standard, low profile or Picatinny rail front sight bracket/gas block; may be gas piston operated; Picatinny rail or standard handguard that may be free floating or synthetic carbine length handguard; A2 fixed carrying handle or A3 Picatinny rail flat top upper assembly; may have a detachable carrying handle with adjustable rear sight; collapsible, standard or custom rifle buttstock; synthetic pistol grip; matte black finish.
Manufacturer	- "MEGA" over the outline of the symbol of the atom was observed marked on the left side of the magazine housing of the receiver/frame. - "MEGA MACINE SHOP INC." over "TUMWATER WA USA" was observed marked on the left side of the receiver/frame. - Mega Machine Shop Incorporated is located at 5323 Joppa Street SW in Tumwater, Washington, U.S.A. - Mega Machine Shop facilities were acquired in 1984. - Mega Machine Shop was formally known as Parrott Machine Shop. - Mega Machine Shop Incorporated began manufacturing AR15 type parts and receivers/frames with the MEGA trade name starting in 2002. - Mega Machine Shop Incorporated is primarily an aerospace specialty machine shop that has produced AR15 type receivers/frames for Dalphon, Inc., Olympic Arms, Alexander Arms, GSE and Castle Armory. - Mega Machine Shop Incorporated and Mega Arms LLC were located at 5323 Joppa Street SW, Tumwater, Washington, U.S.A. in 2011. - Mega Machine Shop Incorporated was owned by Lane C. Browne and Larry Lasmanis in 2011. - Mega Arms LLC was owned by Mike A. Miller in 2011.
Action	- gas operated.
Serial Number	- serial number was observed marked on the left side of the magazine housing of the receiver/frame. - observed serial number had a three letter "KTG" prefix and three numbers. - observed serial number had a three letter "MGA" prefix and four numbers. - observed serial number had a three letter "MST" prefix and four numbers. - observed serial number had a three letter "MUR" prefix and four numbers.
Calibre	- "CAL .458 SOCOM" and "CAL. MULTI" was observed marked on the left side of the magazine housing of the receiver/frame.
Shots	- detachable box magazine. - uses all magazines available for AR15/M16 type rifles. - the 458 SOCOM cartridge is designed to use the original 5.56x45 NATO version of the magazine and the ability of the magazine to perform as originally designed has not been compromised.

Notes

Make

- make is marked on the left side of the slide and on the grip plates.
- trade name used by Robar et Cie, Liege, Belgium.

Model

- model is not marked on the firearm.
- may also be known as "Model 1909" or "Old Model".
- may be marked in two lines on the left side of the slide: "Melior" and "Brevete S.G.D.G. Patent 24875.08" or in three line: "Melior", "Brevete Cal. **", and "Liege Belgium".
- manufactured from 1910 to 1920.
- the design was changed in 1920 but it was still called a "Melior". As a result, the terminology of "Old Model" and "New Model" was developed, but there is no reference to these names on the pistols.
- no grip safety.
- additional retraction grips are located on the front side surfaces of the slide.

Manufacturer

- manufacturer is not marked on the firearm.
- this company has gone through several name changes. It may also be known as "Manufacture Liegeoise D'Armes A Feu Robar Et Cie" or "Societe Anonyme Robar Et Cie".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number located on the right side of the firearm. - serial number range: 6.35mm is No. 1 to 38,978 and for 7.65mm is No. 1 to 27,350.
Calibre	- calibre designation is marked on the left side of the receiver/frame.
Shots	- detachable box magazine.
Remarks	- NOTE: this record encompasses two different sizes of frames: the 6.35mm size, and the 7.65mm size model firearms. Parts from one size firearm are different, and are not interchangeable with parts from the other size firearm. DO NOT CONFUSE WITH THE FIREARMS MARKED 'JIEFFECO'. - ROBAR also manufactured and marketed these two firearm models under their own tradename, 'JIEFFECO'. - except for markings, the 'Melior' and 'Jieffeco' firearms of the same size/model are virtually identical, even to interchangeability of parts.

Action:	Single-Shot
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
20850 - 1	58 PERCUSSION	1	335	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MENDI" and/or the Mendi's logo is marked on the barrel.
- Mendi's logo consists of a small case letter "m" inside a circle (the letter "m" central line resembles a rifle).

Model

- model designation is not marked on the firearm.
- this is a modern reproduction of a Blunderbuss firearm made circa 1600 to 1800.
- "Blunderbuss" is a smooth-bored firearm with a large, belled muzzle, to allow fast reloading.
- features include: muzzle-loading firearm with a flared muzzle; semi-octagonal barrel; ram rod; walnut one piece stock with patch box.
- overall length 760mm (30"), weight 2kg.

Manufacturer

- "MENDI" and/or the Mendi's logo is marked on the barrel.
- Mendi's logo consists of a small case letter "m" inside a circle (the letter "m" central line resembles a rifle).
- "Mendi" manufactured reproductions of muzzle loading, black powder firearms.
- "Mendi" was located in Spain.

Action

- muzzle loading.

Serial Number

- serial number was observed marked on the barrel.
- example observed with three digits without letter prefix or suffix.
- serial number rationalization is unknown.
- Spanish government instituted a new system for firearm serial numbering in 1995.
- Spanish system incorporated the code number of the gunmaker/manufacturer, weapon code, serial number sequence, and year of manufacturer.
- serial number break down, the first two numbers (61) are the code numbers for the manufacture, the next two numbers (13) are the code numbers for muzzle loader, the next numbers are the serial number sequence, and the last two numbers (97) are the year of manufacture.

Firearm Reference Number (FRN): 16437
Make: Mendi
Model: Overcoat Pistol

Summary

Make:	Mendi
Model:	Overcoat Pistol
Manufacturer:	Mendi
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
16437 - 1	12MM PERCUSSION	1	90	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "MENDI" in an oval is marked on the firearm.
Model	- model designation is not marked on the firearm, "Overcoat Pistol" consists more in a description of a style, than a model name. - this is a reproduction of a small percussion pistol of the type originally meant to be carried in an overcoat pocket, similar to a derringer, but without the "bird's-head" grip and bulbous outline of the classic Philadelphia derringer. - features include: blued finish; hardwood checkered one piece stock; octagonal barrel with brass bead font sight; ramrod mounted directly underneath the barrel; and a manually cocked hammer on a back-action lockplate.
Manufacturer	- "MENDI" in an oval is marked on the firearm.
Action	- muzzle-loaded percussion single-shot.
Serial Number	- serial-numbered on the breech-plug.

Notes

Make

- "MENDI" and/or the Mendi's logo is marked on the barrel.
- Mendi's logo consists of a small case letter "m" inside a circle (the letter "m" central line resembles a rifle).

Model

- model designation does not appear on firearm.
- this is a reproduction of the famous "Deringer" pistol originally produced in the early 1800's.
- features include: bird's head grip; octagonal blued barrel; standard trigger; engraved sideplate; external hammer; escutcheon and fixed front sight.
- available in kit form.

Manufacturer

- "MENDI" and/or the Mendi's logo is marked on the barrel.
- Mendi's logo consists of a small case letter "m" inside a circle (the letter "m" central line resembles a rifle).
- "Mendi" manufactured reproductions of muzzle loading, black powder firearms.
- "Mendi" was located in Spain.

Action

- muzzle loading.
- muzzle loading, percussion ignition.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number usually marked on the barrel. - example reported with five digits.
Calibre	- calibre may be marked on the barrel. - calibre designation for the 45 Percussion is marked on the rear of the barrel as "12M/M" within an elongated oval.
Other Markings	- may be marked "MADE IN SPAIN" on the barrel. - Spanish proof marks usually on the barrel.

Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
143958 - 1	45 WHEEL-LOCK	1	425	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "MENDI" over "Made in SPAIN" is marked on the receiver/frame/barrel.

Model

- model designation is not marked on the firearm.
- this is a modern reproduction of a Wheel-Lock pistol.
- Wheel-Lock firearms were originally manufactured in Europe during the 16th and 17th century.
- the system uses a iron pyrites pressed against a revolving toothed wheel to provide the sparks for igniting the powder in the priming pan, which in turn ignites the main powder charge in the barrel. The toothed wheel is made to rotate, when the trigger was pulled, by a spring that was wound by a key in a similar fashion to a mechanical clock.
- features include: steel barrel and side plate; brass muzzle cap, trigger guard and escutcheon; no sight; single trigger; walnut semi-pistol grip stock; and ramrod.
- overall length with a 425mm (16 3/4") barrel is 640mm (25 1/4"), average weight 2.05kg (4.52lb).

Manufacturer

- "MENDI" and/or the Mendi's logo is marked on the barrel.
- Mendi's logo consists of a small case letter "m" inside a circle (the letter "m" central line resembles a rifle).
- "Mendi" manufactured reproductions of muzzle loading, black powder firearms.
- "Mendi" was located in Spain.

Action

- muzzle loading, spring driven, rotating gear action.

Serial Number

- serial number is marked on the receiver/frame/barrel assembly.
- observed specimen had a two letter prefix (MS) and five numbers.

Calibre

- calibre is marked on the barrel.

FRT Report

Firearm Reference Number (FRN): 121682
Make: Mendoza
Model: 33

Summary

Make:	Mendoza
Model:	33
Manufacturer:	Mendoza
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	MEXICO
Serial Numbering:	
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
121682 - 1	7MM MAUSER	5	635	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make may not be marked on the firearm.

Model

- the model designation may not be marked on the firearm.
- this is a wholly indigenous Mexican medium machine gun designed by Rafael Mendoza, combining elements of both the Lewis and Hotchkiss designs.
- features include: very "bare", rudimentary appearance with no wooden or synthetic furniture; slim, tapered barrel with long cone flash hider and radial cooling fins; carrying/quick barrel change handle on the right side of the barrel; box magazine fed from the top of the receiver/frame; safety/selector at the left front of the lower receiver/frame; fold down bipod legs at the front of the receiver/frame; hollow tubular receiver/frame buttstock and this machine gun may be seen on a folding tripod for semi-permanent emplacements.
- was superceded in 1945 by the Mendoza 45, which was itself replaced by the Mendoza RM-2.

Manufacturer

- "MENDOZA" and/or the "MENDOZA" logo is usually marked on the firearm.

Action

- gas operated.

Shots

- detachable box magazine.

121683 - 1	30-06 SPRG	5	622	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- the make or logo thereof may not be marked on the firearm.
Model	- the model designation may not be marked on the firearm. - this is a further refinement of the basic Mendoza 33 design, utilizing a full length wooden stock and a more "finished" appearance. - features include: wooden stock with separate vertical pistol grip; fold-down bipod; radially finned barrel up to the gas block; top mounted box magazine; safety/selector on the left side of the receiver/frame above the trigger guard and a cylindrical muzzle brake to moderate the recoil of the .30-06 Springfield cartridge. - after a short period in service, this machine gun was replaced by another Mendoza design, the RM-2; the RM-2 can be distinguished from the 45 by the stock and method of field-stripping. Where the 45 has a solid full-length stock, the RM-2 has a two-piece stock (very reminiscent of the Browning BAR-D) and is field-stripped by pulling a pin to allow the lower receiver/frame to hinge down below the upper receiver/frame.
Manufacturer	- "MENDOZA" and/or the "MENDOZA" logo is usually marked on the firearm.
Action	- gas operated.
Shots	- detachable box magazine.

Notes

Make

- the make is not marked on the firearm.

Model

- the model designation may not be marked on the firearm.
- this is a standard-pattern "open-bolt" submachine gun that combines features of several other well-known designs; this submachine gun was adopted and issued to the Mexican armed forces for a short time during the 1970's, but has since been phased out in favour of the MP-5 series.
- features include: tubular receiver/frame; "Uzi"-style layout (with magazine inserted through pistol-grip); grip safety and manual safety; wooden or synthetic grip panels and forearm; open adjustable sights; fixed or folding tubular stock; and an overall appearance reminiscent of the Czechoslovakian CZ 25, only with a "loop" stock.

Manufacturer

- the manufacturer may not be marked on the firearm.
- "MENDOZA" name was first used on products offered by Rafael Mendoza in 1911.
- "MENDOZA" has produced machine guns, artillery cannons, hand grenades, rifles and a number of signaling devices and sporting goods.

Action

- blowback operated.

Serial Number

- numbered on the receiver/frame.

Shots

- detachable box magazine.

Notes

Make

- "MENDOZA" or the Mendoza globe logo is marked on the firearm.

Model

- the model is marked on the firearm.
- this is a modified version of the Mendoza HM-3 submachine gun, manufactured with an emphasis on ease of manufacture (through the use of steel tubing and synthetics in production), and produced in "standard" ("larga") and "mini" ("bulldog") sizes.
- features include: matte black oxide/phosphate or crinkle paint finish; synthetic furniture (may be seen with or without a vertical foregrip); open adjustable sights; overhanging bolt; magazine that inserts through the pistol-grip; sling swivels; and side-folding tubular frame or solid synthetic stock.
- Mendoza also produces an identical series of submachine guns chambered for the 380 AUTO cartridge, with the large version known as the "Cobra 380" and the mini version known as the "Bulldog 380".

Manufacturer

- "MENDOZA" or the Mendoza globe logo is marked on the firearm.

Action

- blowback.

Serial Number

- numbered on the receiver/frame.

Shots

- detachable box magazine, available in 20- and 32-round capacities.

Notes

Make

- the make is not marked on the firearm.

Model

- the model may not be marked on the firearm.
- this is an unusual submachine gun / "machine pistol" designed by Rafael Mendoza (owner of the Mendoza firearms manufacturing concern) during the late 1950s; at one point, these submachine guns were issued to the Mexican military.
- features include: heavy slide to retard cyclic rate; magazine well through pistol-grip; open fixed sights; folded tubular buttstock; wooden and/or synthetic grip panels and forearm; and manufactured in two variants; a selective-fire version with a 254mm barrel, and a full-automatic-only version with a 406mm barrel.

Manufacturer

- the manufacturer may not be marked on the firearm.
- "MENDOZA" name was first used on products offered by Rafael Mendoza in 1911.
- "MENDOZA" has produced machine guns, artillery cannons, hand grenades, rifles and a number of signaling devices and sporting goods.

Action

- blowback operation.

Shots

- detachable box magazine.

FRT Report

Firearm Reference Number (FRN): 147530
Make: Meriden
Model: 1861/1865 US Musket Miller Breechloading Conversion

Summary

Make:	Meriden
Model:	1861/1865 US Musket Miller Breechloading Conversion
Manufacturer:	Meriden Manufacturing Company
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
147530 - 1	58 RF	1	991	Antique AFR, Section 1, para. 2	Non-Commercial Customization	

Notes

Make

- "MERIDEN MAN'FG. CO." is marked on top of the breech-block; these conversions were performed on 1861 US Muskets, and the original manufacturer's markings on the lockplates were not removed.

Model

- the model is not marked on the firearm; this is an 1861 US Percussion Rifle-Musket, converted to a breech loader by the Meriden Manufacturing Company, of Meriden, Connecticut. These conversions were performed following William H. and George W. Miler's 1865 patent for such a conversion, and the patent date of May 23, 1865 is marked on top of the lifting breech-block.
- this conversion involved removing the breech-plug and replacing it with a threaded breech section with a hinged top-lever (similar to the Springfield "Trapdoor"), that, when lifted, also operates an extractor. These firearms were converted to fire a copper-cased 58-calibre rimfire cartridge.
- features include: side hammer; straight-grip walnut stock; round browned barrel, trigger guard; three barrel bands; sling swivels mounted under the barrel band and on the front of the trigger-guard

Manufacturer

- "MERIDEN MAN'FG. CO." is marked on top of the breech-block; these conversions were performed on 1861 US Muskets, and the original manufacturer's markings on the lockplates were not removed.

Action

- hinged-breech single-shot.

Serial Number

- numbered on the bottom of the breechblock.

Notes

Make

- Meriden's monogram logo of "MFACo" interlaced inside a circle is marked on the grip plates.

Model

- manufactured during the early 1900s.
- "SECRET SERVICE SPECIAL" is usually marked on the left side of the barrel.
- features include: fixed sights; round rifled barrel with solid top rib; front hinged receiver/frame with a fluted cylinder and with the break open release mounted on the top strap; automatic ejection; hammerless or exposed hammer; double/single action or double action only trigger mechanism; checkered grip plates; blued or nickel finish.
- "Secret Service Special" revolvers produced by Meriden are distinguished by a frame mounted firing pin and a front sight that had the front and rear ends turned up in a scroll pattern.
- "Secret Service Special" was a trade brand/name on revolvers sold by Fred Biffar Company of Chicago, Illionois, U.S.A.
- "Secret Service Special" revolvers were manufactured in North America by Harrington & Richardson Arms Company, Hopkins & Allen Firearms Company, Iver Johnson's Arms & Cycle Works, and Meriden Arms Company.
- "SSS" monogram inside a circle is usually moulded into the grip plates.
- "SSS" is the abbreviation for "Secret Service Special".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number
- serial number is marked on the butt of the grip.
- observed serial number consisted of six numbers without a letter prefix or suffix.

Other Markings
- was observed marked on the barrel: "FOR .32 SMITH & WESSON C.T.G.E.".

Notes

Make

- "MERIDEN FIREARMS CO." is marked on the top rib of the barrel.

Model

- manufactured between 1894 and 1915.
- model designation is not marked on the firearm.
- "top-break" denotes a hinge frame mechanism which opens for loading and unloading or removal of spent cartridge cases, cartridges are partly raised by the extractor "star" as it opens; and when fully opened, the star drops to the normal position, flush with the rear of the cylinder.
- feature include: round ribbed barrel; front hinged receiver/frame with top strap mounted locking mechanism; internal hammer; double action trigger mechanism; fixed sights; plastic panel grips; nickel finish.

Manufacturer

- "MERIDEN FIREARMS CO." and "MERIDEN,CONN. U.S.A." is marked on the top rib of the barrel.
- a main distinguishing feature found on all Meriden manufactured handguns is a front sight blade with a decorative swirl on both ends.
- a logo of a geometeric pattern resembling a button or wheel may be found on the top of the grip plates.

Action

- top break.

Serial Number

- serial number may be found stamped on the bottom of the grip frame.
- rationalization and range are unknown.

Shots

- revolving cylinder.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- revolvers like this were manufactured by Meriden with other trade and model names. The front sight blade with a decorative swirl on both ends is the best clue to the manufacturer.

Notes

Make

- "MERIDIAN FIRE ARMS CO" is marked on the top of the barrel.

Model

- manufactured between 1894 and 1915.
- model designation is not marked on the firearm.
- "top-break" denotes a hinge frame mechanism which opens for loading and unloading or removal of spent cartridge cases.
- "self-extracting" denotes the cartridges are partly raised by the extractor "star" as it opens; and when fully opened, the star drops to the normal position, flush with the rear of the cylinder.
- feature include: round ribbed barrel; front hinged receiver/frame with top strap mounted locking mechanism; internal or exposed spurr hammer; single/double action trigger mechanism; fixed sights; plastic panel grips; blue or nickel finish.

Manufacturer

- "MERIDIAN FIRE ARMS CO" and "MERIDIAN, CONN. U.S.A." are marked on the top of the barrel.
- the Company was created around 1894 by Sears, Roebuck & Company.
- Meriden marketed handguns under the following trade names:
  - Eastern Arms Company
  - Empire State Arms Company
  - Federal Arms Company
  - Howard Arms Company
- Howard Arms Company and National Arms Company are believed to be associated to Meriden because the unique front sight used on Meriden handguns is also present on the handguns from these companies.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- hinged action.
Serial Number	- should be found on the bottom of the butt strap and on the bottom left side of the grip strap.

Notes

Make

- make is marked on the barrels.

Model

- this is a side by side boxlock double rifle with Anson & Deeley lock-up, walnut pistol-grip stock with cheekpiece, cocking indicators, double triggers, and an engraved, colour case-hardened receiver/frame.
- available with a silver grey receiver/frame as the 140-1.1 version.
- a sidelock version is available as the Model 160, and a boxlock version with false sideplates is available as the Model 150.
- overall length with a 600mm barrel (23 5/8") is 1020mm (44 1/8"), average weight is 3.4kg (7.49lbs).

Manufacturer

- manufacturer's trade mark will normally be found marked on the "water table" of the firearm.
- Merkel (also called "Gebruder Merkel", or "Merkel Brothers") is a manufacturer located in Suhl, Germany, a region that has been producing drillings, combination guns, shotguns, and double rifles throughout the manufacturing history of Germany.

Action

- side by side pattern.

Serial Number

- the serial number is found on the top inside surface of the watertable.
- serial number rationalization unknown.
- observed serial number consisted of six digits without prefix or suffix.

Calibre

- calibre is marked on the barrels.

Notes

Model

- this FRT screen is a generic for the Merkel Model 201 shotguns. Other Merkel entries exist which might better describe the firearm being verified.
- the Merkel 201 series are boxlock over under shotguns with straight or pistol grip stock, cross bolt locks and double or single selective trigger
- the action is self opening Blitz style (with the hammers mounted on the trigger plates)
- the various model designations refer to the same basic gun with optional engraving quantity on the receiver and the type of locks (coil spring or Holland and Holland)
- all have some engraving but the 203E has large scroll and the 303E medium scroll on silver receivers
- the underside of the receiver has a stamp of an iron worker and anvil with SUHL under this mark
- the left side of the barrels (at the receiver) are marked GEBR.MERKEL and below MADE IN GDR (if made in East Germany) or Made in Germany.

Manufacturer

- manufacturer is marked on the firearm and may also be known as Gebruder Merkel.

Action

- over/under pattern.

Notes

Make

- maker's designation may be marked on the barrel as "GEBR. MERKEL SUHL".

Model

- model designation may not be marked on the firearm.
- features include: walnut checkered pistol grip or straight stock with cheekpiece and forearm; colour case hardened boxlock lightly engraved; selective single or double triggers manual and automatic safety and sling swivels.
- this model is part of the "2000" series of over/under rifles, shotguns, and combination guns; shotgun models include the 2000E, 2001E and 2002E, while combination gun models include the 2010, 2011, and 2012, and double rifle models include the 2020, 2021, and 2022. These models differ from one another based on the style and amount of engraving (lower-grade models have scroll engraving, while higher-grade models feature game-scene engraving), and on the quality of walnut used in the stock and forearm.

Manufacturer

- Merkel (also called "Gebruder Merkel", for "Merkel Brothers") is a manufacturer located in Suhl, Germany, that has been producing drillings, combination guns, shotguns, and double rifles since 1535.
- in 1993 Merkel Brothers declared bankruptcy and were purchased by Steyr.

Type

- smooth bore over a rifled barrel.
- barrels may be interchangeable with other models to allow for an over/under shotgun or over/under rifle configuration.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- over & under configuration.
Serial Number	- numbered on receiver/frame.

Model

- model designation may not be marked on the firearm.
- features include: Merkel "Duo" manual cocking system that combines the features of a self cocking and manually cocked gun; selected walnut checkered pistol grip or straight stock with cheekpiece and forearm; colour case hardened boxlock with game scene engraving (Jadg); single set trigger (double triggers with front set trigger available as an option); sling swivels.
- this model is part of the "2000" series of over/under rifles, shotguns, and combination guns. These models differ from one another based on the style and amount of engraving (lower-grade models (Standard) have scroll engraving, while higher-grade models (Jadg) feature game-scene engraving) and on the quality of walnut used in the stock and forearm.
- overall length with a 600mm barrel is 1010mm (39" 3/4), average weight is 3.4kg (7.5lbs).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- Merkel (also called "Gebruder Merkel", for "Merkel Brothers") is a manufacturer located in Suhl, Germany, that has been producing drillings, combination guns, shotguns, and double rifles since 1535. - in 1993 Merkel Brothers declared bankruptcy and were purchased by Steyr.
Type	- smooth bore over a rifled barrel. - barrels may be interchangeable with other models to allow for an over/under shotgun or over/under rifle configuration.
Action	- over & under configuration.
Serial Number	- numbered on receiver/frame.

35748 - 3	20 GA X 3"	2	680	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Manufacturer

- Suhl was alternately in Germany, East Germany and again in Germany so may be marked GDR.
- the maker is also known as Gebruder Merkel

Action

- over/under.

Serial Number

- found on the upper left edge of the receiver.

Remarks

- The Merkel Model 202E is a boxlock over under shotgun with straight or pistol grip stock, cross bolt locks and double or single selective trigger. The action is self opening Blitz style (with the hammers mounted on the trigger plates). The engraving is Arabesque and mounted on false sideplates (to increase the engraving area) all on a silver receiver. The barrels have a solid rib with a three piece wood forearm. The underside of the receiver has a stamp of an iron worker and anvil with SUHL under this mark. The left side of the barrels (at the receiver) are marked GEBR.MREKEL and below MADE IN GDR (if made in East Germany) or Made in Germany.

Notes

Make

- "GEBRUDE MERKEL" over "SUHL" or "MADE IN GDR" is usually marked on the left side of the barrel assembly.

Model

- Merkel Model 203E is a boxlock over under shotgun with straight or pistol grip stock, cross bolt locks and double or single selective trigger. The action is self opening Holland and Holland style (with the hand removable sideplates). The engraving is Arabesque with a large scroll motif mounted on sideplates (to increase the engraving area) and a silver coloured receiver. The barrels have a solid rib with a three piece wood forearm. The underside of the receiver has a stamp of an iron worker and anvil with SUHL under this mark.
- 303E differs from the 203E in the size of the scroll engraving (large scroll on the 203E), no Holland and Holland ejectors and no hook locks.

Manufacturer

- "GEBRUDE MERKEL" over "SUHL" is usually marked on the left side of the barrel assembly.

Action

- over and under barrel configuration, hinged barrel design.

Serial Number

- found on the upper left edge of the receiver.

39420 - 8	8X57RJS MAUSER/16 GA X 2 3/4"	2	660	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make - maker's designation is marked on the left side of the barrels as "GEBRUDER MERKEL SUHL".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- model designation may not be marked on the firearm.
- this is a boxlock over & under combination gun with double triggers.
- features include: Kersten cross-bolt locking system, tang safety, cocking indicators, three piece forearm, pistol grip stock with cheek-piece, extractors, and a lightly engraved receiver/frame.
- the 210E is similar but available with ejectors.

Manufacturer

- Merkel (also called "Gebruder Merkel", for "Merkel Brothers") is a manufacturer located in Suhl, Germany, that has been producing drillings, combination guns, shotguns, and double rifles since 1535.

Action

- over and under barrel configuration, hinged barrel design.

Notes

Make

- "Merkel" and/or the Merkel logo is marked on the firearm.

Model

- the model is not marked on the firearm; this "drilling"-style combination gun can be identified by the presence of a button-ended lever on the top of the wrist that swings to the left to select the rifle barrel; AND a separate extractor for the rifle cartridge; an identical drilling chambered for rimless cartridges with a single extractor that removes the rifle and shotgun cartridges simultaneously is known as the "32 Drilling".
- this is a three-barrelled combination gun of the type known to the Germans as a "drilling", from the German "drei"/three", usually in a side by side shotgun over a rifled barrel configuration.
- features include: blued barrels (may have detachable scope mounts); checkered walnut forearm and pistol-grip stock; engraved box lock receiver; top-lever; barrel selector and sliding safety on the top of the wrist; double set triggers; metal or carved horn trigger-guard; rubber buttpad.

Manufacturer

- "Merkel" and/or the Merkel logo is marked on the firearm.

Action

- three barrel combination gun, with two side by side smoothbore barrels over a rifle barrel.

Serial Number

- serial number is marked on the receiver/frame.

Notes

Make

- the make is marked on the firearm.

Model

- model designation may not be marked on the firearm.
- this is an over/under shotgun of the type known in German as a "bockdoppelflinte".
- features include: solid sighting rib; deluxe grade, checkered, walnut, pistol-grip stock and cheekpiece; Kersten cross-bolt lock-up; hand detachable side locks; single or double triggers; ejectors; available in several grades of finish.
- also available as an over/under combination gun as the 313E, and as an over/under double rifle as the 323E.
- overall length with a 711mm barrel (28") is 1111mm (43 3/4"), average weight is 3.2kg (7.5lbs).

Manufacturer

- the maker is also known as Gebruder Merkel
- the manufacturer is marked on the firearm.

Action

- over/under configuration.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number - marked on the upper left edge of the receiver/frame.

Notes

Make

- the make is marked on the firearm.

Model

- model designation may not be marked on the firearm.
- this is a deluxe, sidelock, over & under combination gun with double triggers.
- features include: Kersten cross-bolt locking system; tang safety; cocking indicators; three piece forearm; pistol grip stock with cheek-piece and carved scroll work; ejector; deeply-engraved receiver/frame.
- also available as an over/under shotgun as the 303E, and as an over/under double rifle as the 323E.
- overall length with a 600mm barrel is 1030mm (40"1/2), average weight is 3.5kg (7.75lbs)

Manufacturer

- Merkel (also called "Gebruder Merkel", for "Merkel Brothers") is a manufacturer located in Suhl, Germany, that has been producing drillings, combination guns, shotguns, and double rifles since 1535.
- "GERBRUDER MERKEL SUHL" is marked on the left side of the barrels.

Action

- over & under configuration; shotgun over rifle.

Serial Number

- numbered on the receiver/frame.

Calibre

- Merkel over & under "300" series can be combined in any configuration; both the 12 and 20 gauge receiver/frame accept interchangeable rifle/shotgun or double rifle barrel assemblies.

Notes

Make

- "Merkel" and/or the Merkel logo is marked on the firearm.

Model

- the model is not marked on the firearm; this "drilling"-style combination gun can be identified by the presence of a button-ended lever on the top of the wrist that swings to the left to select the rifle barrel; and a one-piece extractor for the rifle and shotgun cartridges; an identical drilling chambered for rimmed cartridges with a split extractor that removes the rifle and shotgun cartridges separately is known as the "30 Drilling"
- this is a three-barrelled combination gun of the type known to the Germans as a "drilling", from the German "drei"/three", usually in a side by side shotgun over a rifled barrel configuration.
- features include: blued barrels (usually with detachable scope mounts); checkered walnut forearm and pistol-grip stock; engraved box lock receiver; top-lever; barrel selector and sliding safety on the top of the wrist; double set triggers; metal or carved horn trigger-guard; rubber buttpad.

Manufacturer

- "Merkel" and/or the Merkel logo is marked on the firearm.

Action

- "drilling"-pattern combination gun, with two side by side smoothbore barrels over a rifle barrel.

Serial Number

- serial number is marked on the receiver/frame.

Notes

Make

- maker's designation is marked on the barrel as "GEBRUDER MERKEL SUHL" or "GEBR. MERKEL SUHL".

Model

- model designation is not marked on the firearm.
- model was discontinued in 1994.
- features include: "Drilling" configuration with two side by side shotgun barrels mounted over a centrefire rifled barrel; hinged receiver/frame with top mounted break open lever; double triggers; automatic tang mounted safety; blade front sight and fixed rear sight; pistol grip walnut stock, case-hardened receiver/frame; engraved.

Manufacturer

- "Gebr. Merkel Suhl" or "Gerbruder Merkel Suhl" may be marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action - hinged barrel design.

Calibre - calibre is marked on the barrels.

Notes

Make

- make is marked on the firearm.

Model

- model designation may not be marked on the firearm.
- features include: hinged receiver/frame with tang mounted break open lever; boxlocks; selected walnut pistol grip stock and forearm; double triggers; tang mounted safety; extractors; Greener cross-bolt lock-up.
- available in either color case-hardened or coin finished receiver/frame variations, with light scroll or game scene engraving (Jadg).
- also available with ornamental side plates as the model 96KS.
- overall length with 550mm barrel is 980mm (38"5/8); average weight is 3.1kg (6.9lbs).

Manufacturer

- manufacturer's name is marked on the firearm.
- Merkel (also called "Gebruder Merkel", for "Merkel Brothers") is a manufacturer located in Suhl, Germany, that produces drillings, combination guns, shotguns, and rifles.

Action

- available as Drilling (2 smoothbores side by side, 1 rifle under), combination Rifle/Shotgun Drilling (1 rifle and 1 smoothbore side by side, 1 rifle under) or double Rifle Drilling (2 rifles side by side and 1 smoothbore under).

Serial Number

- serial number is located on the receiver/frame and repeated on the barrel lug.

Calibre

- calibre designation is marked on the barrels.

Notes

Make

- make is marked on the firearm.

Model

- model designation may not be marked on the firearm.
- features include: hinged receiver/frame with tang mounted break open lever; boxlocks with ornamentals side plates; selected walnut pistol grip stock and forearm; double triggers; tang mounted safety; extractors; Greener cross-bolt lock-up.
- available in either color case-hardened or coin finished receiver/frame variations, with light scroll or game scene engraving (Jadg).
- overall length with 550mm barrel is 980mm (38"5/8), average weight is 3.1kg (6.9lbs).

Manufacturer

- manufacturer's name is marked on the firearm.
- Merkel (also called "Gebruder Merkel", for "Merkel Brothers") is a manufacturer located in Suhl, Germany, that produces drillings, combination guns, shotguns, and rifles.

Action

- available as Drilling (2 smoothbores side by side, 1 rifle under), combination Rifle/Shotgun Drilling (1 rifle and 1 smoothbore side by side, 1 rifle under) or double Rifle Drilling (2 rifles side by side and 1 smoothbore under).

Serial Number

- serial number is located on the receiver/frame and repeated on the barrel lug.

Calibre

- calibre designation is marked on the barrels.

Notes

Make

- maker's designation is marked on the firearm.

Model

- model designation may not be marked on the firearm.
- features include: top break; boxlock; single or double set triggers; automatic ejector; tang safety; white receiver/frame lightly engraved; barrel has integral telescopic sight mounting bases; checkered European walnut buttstock and separate forearm with schnabel.
- on special order more elaborate engraving is available in six escalating grades (Premium, Jagd, Jena, Weimar, Erfurt, Suhl).
- available in 2006 in a full stock version that features a two piece Mannlicher style forend, shorter barrel and a short sight radius.
- overall length with a 600mm barrel is 911mm (35.83") average weight is 2.5kg (5.5lbs).

Manufacturer

- Merkel (also called "Gebruder Merkel", for "Merkel Brothers") is a manufacturer located in Suhl, Germany, that has been producing drillings, combination guns, shotguns, single shot and double rifles since 1535.

Action

- hinged barrel design.

Serial Number

- numbered on the receiver/frame.

Other Markings

- observed example was marked "Made in Germany" on the left side of the barrel at the breech.

Notes

Make

- the make is marked on the firearm.

Model

- "SL II" may not be marked on the firearm.
- this is an over/under boxlock combination gun in Merkel's "Superleicht" ("superlight") series, made as light as possible for ease of carrying while hunting.
- features include: walnut "hog's back" pistol-grip stock and one-piece forearm; fixed open leaf sights with quick-detachable scope mounts; double trigger; tang safety/selector; and a free-floating lower/rifle barrel with a muzzle ring.
- these combination guns are available in a wide variety of grades, and higher grades can feature extended false sideplates for additional engraving room.
- also available with a 12 GA x 3" upper/shotgun barrel as the "SL III".
- overal length with a 600mm barrel is 1000mm (39" 3/8), average weight is 2.9kg (6.4lbs)

Manufacturer

- the manufacturer is marked on the firearm.
- Merkel (also clled "Gebruder Merkel", for "Merkel Brothers) is a manufacturer located in Suhl, Germany. The company was established in 1535 and since the 1890's has specialized in producing high quality multi barrel sporting firearms (drillings, shotguns, rifles).

Action

- over/under pattern; shotgun over rifle.

Serial Number

- serial number is marked on the receiver/frame.

Notes

Make

- the make is marked on the firearm.

Model

- "SL III" may be marked on the firearm.
- this is an over/under boxlock combination gun in Merkel's "Superleicht" ("superlight") series, made as light as possible for ease of carrying while hunting.
- features include: walnut "hog's back" pistol-grip stock and one-piece forearm; fixed open leaf sights with quick-detachable scope mounts; double trigger; tang safety/selector; and a free-floating lower/rifle barrel with a muzzle ring.
- these combination guns are available in a wide variety of grades, and higher grades can feature extended false sideplates for additional engraving room.
- also available with a 20 GA x 3" upper/shotgun barrel as the "SL II".
- average weight with a 600mm barrel is 1020mm (40" 1/4), average weight is 3.2kg (7.1lbs)

Manufacturer

- the manufacturer is marked on the firearm.
- Merkel (also clled "Gebruder Merkel", for "Merkel Brothers) is a manufacturer located in Suhl, Germany. The company was established in 1535 and since the 1890's has specialized in producing high quality multi barrel sporting firearms (drillings, shotguns, rifles).

Action

- over/under pattern; shotgun over rifle.

Serial Number

- serial number is marked on the receiver/frame.

Notes

Make

- "Merkel" is marked on the side of the firearm.

Model

- "SR1" is marked on the left side of the receiver/frame.
- introduced in 2007.
- features include: free floating round barrel with adjustable front sight and Battue rib with contrast lines; solid top upper receiver assembly with multi-lug rotating bolt head, right side ejection and drilled and tapped for a scope mount; lower receiver/frame has a front hinged magazine housing, cross bolt safety located on the rear of the trigger guard, magazine release located on the front of the trigger guard, and a disassembly release located on the left front side of the receiver/frame; checkered walnut forearm and pistol grip buttstock with recoil pad; blue finish or two color finish with a blued upper and silvered lower with oak leaf engraving.
- overall length is from 1060mm to 1070mm, approximate weight of 3.2 kg.

Manufacturer

- "Merkel Jagd-und", "Sportwaffen GmbH" and "Suhl / Germany" are marked on the side of the firearm.

Action

- gas operated.

Serial Number

- serial number is usually marked on the left side of the receiver/frame and may be repeated on the top of the upper assembly and on the barrel.
- observed serial number consisted of a "SR" prefix followed five numbers.

Calibre

- calibre is marked on the barrel.

Shots

- interchangeable box magazine.

Notes

Make

- "MEROLLA FRERES" over "SYSTEME BREVETES" is marked on the top of the receiver/frame.

Model

- model designation is not marked on the firearm.
- "SYSTEME BREVETES" is marked on the top of the receiver/frame under the maker's name. It is not considered the model of the firearm.
- this is a design that is commonly known as a "Lefaucheux".
- features include: fixed post front and groove rear sight; octagonal barrel; screw together solid top receiver/frame with scroll engraving; round fluted or non-fluted cylinder with or without scroll engraving; spur hammer; "plunger" style case ejector; right side fold down loading gate; ring or standard trigger and trigger guard; checkered wood grip plates; lanyard ring at the base of the butt; blued or nickeled finish.

Manufacturer

- "MEROLLA FRERES" over "SYSTEME BREVETES" is marked on the top of the receiver/frame.
- Merolla, Giovanni listed as gunmaker in Naples, Italy, circa 1850-1875.
- Merolla, Giovanni and Merolla, Francesco were known manufacturers of firearms in Naples, Italy and Liege, Belgium.
- Merolla brothers Giovanni and Francesco obtained patent 38720 on 1876/01/26 after having made some improvements to the revolver for which their father Salvatore obtained patent 21162 on 1867/03/14.
- Merolla: Salvatore, Giovanni and Francesco were known to have several patents under their names in Belgium for Lefaucheux type rifles and revolvers most of which were manufactured in Liege, circa 1860-1870.

Action

- pin-fire revolving cylinder.

Serial Number

- serial number may be marked on the firearm and may be repeated on various parts.
- serial number of a referenced example consisted of two numbers.

Calibre

- calibre designation is not marked on the firearm.

Firearm Reference Number (FRN): 147526
Make: Merrill, James H
Model: 1842/1858 US Musket Merrill Breechloading Conversion

Summary

Make:	Merrill, James H
Model:	1842/1858 US Musket Merrill Breechloading Conversion
Manufacturer:	Merrill, James H
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
147526 - 1	54 PERCUSSION	1	1067	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "JAS H. MERRILL BALTO", over "PAT. JULY, 1858" is marked on top of the action lever; these conversions were performed on existing 1842 US Muskets, and the existing manufacturer's markings on the lockplates were not altered or removed.

Model

- the model is not marked on the firearm; this is an 1842 US Percussion Musket, converted to a breech loader by James H. Merrill, of Baltimore, Maryland. These conversions were performed following Merrill's 1858 patent for such a conversion, and the patent date of July, 1858 is marked on top of the lifting action lever.
- this conversion involved removing the breech-plug and replacing it with a threaded breech section with a hinged lever, that, when lifted, draws a piston rearwards to allow a combustible paper cartridge to be inserted into the rear of the chamber; the lever is then pushed down into place again, a percussion cap is placed on the nipple, and the rifle is ready to be fired.
- features include: side hammer, percussion muzzle loading rifle; straight-grip walnut stock; round browned barrel; brass buttplate, patchbox, trigger guard; two barrel bands; sling swivels mounted under the barrel band and on the underside of the buttstock.

Manufacturer

- "JAS H. MERRILL BALTO", over "PAT. JULY, 1858" is marked on top of the action lever; these conversions were performed on existing 1842 US Muskets, and the existing manufacturer's markings on the lockplates were not altered or removed.

Action

- breech-loaded percussion single-shot.

Serial Number

- numbered on top of the action lever.

Notes

Make

- "MERRILL, LATROBE & THOMAS / BALTIMORE, MD. / PATENT APPLIED FOR" appears on top of the breechblock.
- "Merrill, Latrose & Thomas" of Baltimore, Maryland, U.S.A. was partnership formed by James H. Merrill, Ferdinand C. Latrobe and Phillip E. Thomas from 1856 to 1859.
- Merrill, Latrose & Thomas model 1855 Percussion Carbine was manufactured by Samuel Remington.

Model

- U.S. Ordnance Department purchased 170 Merrill, Latrobe & Thomas percussion carbines in July of 1855 for evaluation and trails.
- 1855 Percussion Carbine was manufactured in 1855.
- James H. Merrill was granted U.S. Patent Number 14,077 on January 08, 1856.
- this is a side hammer, breech loading firearm requiring a separate percussion cap to be placed on a nipple located on the receiver which is struck by the hammer.
- breech system involves a forward lifting lever to expose the chamber for loading.
- one piece walnut buttstock with brass patchbox, triggerguard, buttplate and single barrel band.

Manufacturer

- "S. REMINGTON / ILION, N.Y." appears on the lockplate.
- Samuel Remington was the son of Eliphalet Remington.

Serial Number

- 1 to 200, appears on the underside of the breech lever.

Notes

Make

- "MERWIN & BRAY FIREARMS CO., N.Y." is marked on the barrel.
- Merwin & Bray was established by Joseph Merwin and Edward P. Bray in 1853.
- Merwin & Bray's headquarters were located at 245 Broadway in New York City.
- Merwin & Bray's derringer-type pistols were manufactured by Merrimack Arms Co. In Worcester, Massachusetts.
- Merwin & Bray ceased their partnership in 1864.
- Merwin and Simpkins formed a partnership called "Merwin & Simpkins" in 1864.
- Merwin & Simpkins was re-organized and became "Merwin, Taylor & Simpkins.
- Merwin, Taylor & Simpkins ceased operations in 1868.
- Joseph Merwin, a New England arms marketer, joined with two brothers William A. and M.H. Hulbert to form the company known as "Merwin, Hulbert & Company" in 1868.

Model

- model name is not marked on this firearm.
- features include: brass or iron frame; single action; spur trigger; square butt; octagonal barrel with sight rib; loading slot in front of cylinder on right side of frame/receiver for front loading of the cup primed cartridges; ejector housing and ejector with round knob handle is affixed to the right side of the receiver/frame behind the cylinder.
- cylinder is usually marked, "PAT. JULY 12, 1859" and "JULY 21, 1863".
- approximately 20,000 were manufactured circa mid-1860's.
- This pistol is basically a scaled down version of the large frame Plant's Mfg.Co. Front Loading Army Revolver.

Manufacturer

- barrel will be marked, "EAGLE ARMS CO., NEW YORK".
- Eagle Arms Co. of New York, N.Y. was established 20 November 1865 and ceased operations circa 1870.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action - single action.

Serial Number - known example had a four digit number without prefix or suffix marked on the receiver/frame.

Notes

Make

- "Merwin & Bray" may be marked on the top of the barrel.
- "M&B" may be marked on the side of the receiver/frame.
- Merwin & Bray was established by Joseph Merwin and Edward P. Bray in 1853.
- Merwin & Bray's headquarters were located at 245 Broadway in New York City.
- Merwin & Bray's derringer-type pistols were manufactured by Merrimack Arms Co. In Worcester, Massachusetts.
- Merwin & Bray ceased their partnership in 1864.
- Merwin and Simpkins formed a partnership called "Merwin & Simpkins" in 1864.
- Merwin & Simpkins was re-organized and became "Merwin, Taylor & Simpkins.
- Merwin, Taylor & Simpkins ceased operations in 1868.
- Joseph Merwin, a New England arms marketer, joined with two brothers William A. and M.H. Hulbert to form the company known as "Merwin, Hulbert & Company" in 1868.

Model

- made circa 1865.
- the model designation does not appear on the firearm.
- steel or brass receiver/frame with flat sides and a squared front.
- octagonal ribbed barrel, spur trigger, rosewood or walnut grips.

Manufacturer

- Plant's was a manufacturer based in New Haven, Connecticut between approximately 1860 and 1866.

Serial Number

- serial number range approximated from 700 to 8000 and is marked on the bottom of the grip frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - some examples were altered to accept rimfire cartridges.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "Merwin, Hulbert & Co." is marked on the top of the barrel. - Merwin, Hulbert & Company came into being circa 1868. - Joseph Merwin, a New England arms marketer, joined with two brothers William A. and M.H. Hulbert to form the company known as Merwin, Hulbert & Company. Through this partnership partial interest was gained in three other companies: - the Phoenix Rifle & Ammunition Company, the American Metallic Cartridge Company and the Hopkins and Allen Company. Shortly after this new company was formed an investment of $100,000 was made in the Evans Rifle Company. - the new firm quickly became a success. Merwin, Hulbert & Company became the largest firearm dealer in the USA, handling shooting accessories, reloading equipment and firearms made by Colt, Winchester, Remington, Marlin Ballard & L.C. Smith, Parker and Ithaca. - In 1874, "Merwin, Hulbert & Company" became sole agents for "Hopkins & Allen" and by 1878, "Merwin, Hulbert & Company" controlled "Hopkins & Allen", re-organizing the company into a new entity called "Hopkins & Allen Manufacturing Company". - circa 1876 Merwin, Hulbert & Co was in production of proprietary models of handguns at Norwich, Connecticut. - Joseph Merwin died in 1879. - the company suffered from a series of financial disasters, circa 1878: - the Russian Government refused to pay for three shiploads of revolvers which they had ordered, the failure of the Evans Rifle Company and a theft of company funds by a business associate. - Joseph Merwin died in 1879. - "Merwin & Hulbert" went into receivership in 1881. - the company was quickly reorganized under the same company name and continued the production of revolvers until a disastrous fire in 1891 destroyed the factory. - in late 1891 a new company was formed, "Hulbert Brothers & Company" in partnership with Hopkins & Allen to carry on with the revolver manufacturing business. - by 1896 this firm, too went into receivership. - in 1898 the company went through another re-organization emerging as "Hopkins & Allen Arms Company". - In 1902, "Hopkins & Allen" purchased the "Forehand Arms Company". - In 1917 the "Hopkins & Allen Arms Company" was sold to "Marlin-Rockwell
Model	- "Junior" and "Pat. June 3, 1890" is marked on the top of the barrel. - manufactured before 1897. - this is a takedown, falling block rifle. - features include: octagonal barrel, lever operated falling block action, straight buttstock. - starting in 1897, the Junior was sold under the Hopkins & Allen name.
Manufacturer	- "Made by Hopkins & Allen Manfg. Co. Norwich, Conn., U.S.A." is marked on the top of the barrel.
Action	- lever operated falling block.
Serial Number	- located on the receiver/frame. - observed specimen had four digits.
Calibre	- calibre is marked on the top of the barrel.
Other Markings	- "Made by Hopkins & Allen Manfg. Co. Norwich, Conn., U.S.A. The Merwin, Hulbert & Co. Junior Pat. June 3, 1890 .22 R.F." is marked on the top of the barrel.

Notes

Make

- "MERWIN, HULBERT & CO. N.Y." is marked on the right side of the receiver/frame.
- Merwin, Hulbert & Company came into being in 1868.
- Joseph Merwin, a New England arms marketer, joined with two brothers William A. and M.H. Hulbert to form the company known as Merwin, Hulbert & Company
- in 1874, "Merwin, Hulbert & Company" became sole agents for "Hopkins & Allen" and by 1878, "Merwin, Hulbert & Company" controlled "Hopkins & Allen", re-organizing the company into a new entity called "Hopkins & Allen Manufacturing Company".
- circa 1876 Merwin, Hulbert & Co was in production of proprietary models of handguns at Norwich, Connecticut.
- Joseph Merwin died in 1879.
- the company suffered from a series of financial disasters, circa 1878: the Russian Government refused to pay for three shiploads of revolvers which they had ordered, the failure of the Evans Rifle Company and a theft of company funds by a business associate.
- Joseph Merwin died in 1879.
- "Merwin & Hulbert" went into receivership in 1881.
- the company was quickly reorganized under the same company name and continued the production of revolvers until a disasterous fire in 1891 destroyed the factory.
- in late 1891 a new company was formed, "Hulbert Brothers & Company" in partnership with Hopkins & Allen to carry on with the revolver manufacturing business.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "MERWIN, HULBERT & CO., N.Y." over "POCKET ARMY" is marked on the right side of the receiver/frame. - "CALIBRE" and either "WINCHESTER 1873" (44-40 WIN), "44 M&H" (44 MERWIN, HULBERT AND CO), or "44 RUSSIAN" (44 S&W RUSSIAN) is marked on the left side of the frame. - "Pat. Jan. 24, Apr. 21, Dec. 15, 74, Aug. 3, '75, Apr. 17, 77, Pats. Mar. 6, 77" or "Pat. Apr. 17, 77, Jun. 15, 80, Mar. 14, 82, Jan. 9, 83" may be marked on the barrel. - manufactured circa 1880s. - this is a slightly smaller version of the Merwin, Hulbert & Company model Frontier Army single-action revolver, with a unique cartridge extraction system. - this record is for a single-action "Pocket Army" revolvers; if the revolver in question has a double-action trigger mechanism, it is a "Pocket Army Double Action". - these revolvers have a split frame that pivots around the cylinder pin; when the release is pressed and the barrel/top strap is twisted to the right and pulled forward, the cartridge cases are retained on the breech-face by a disc that engages the cartridge rims. - these revolvers are seen both with (most common) and without (early production) an integral top strap, with or without a folding hammer spur, and with "scoop" or conventional cylinder flutes; these revolvers also came with an extended bird's-head-style butt with an integral lanyard ring. - the "Pocket Army" revolver normally came with an 84mm barrel although an option 178mm barrel was available. - the Merwin Hulbert & Company "Frontier Army" model was available with a 89mm, 140mm and 178 mm barrel.
Manufacturer	- "HOPKINS & ALLEN M'F'G CO. NORWICH, CONN. U.S.A." is marked on the left side of the barrel.
Serial Number	- the serial number is marked on the right side of the butt strap.
Calibre	- calibre markings consist of "CALIBRE" and either "WINCHESTER 1873" (44-40 WIN), "44 M&H" (44 MERWIN, HULBERT AND CO), or "44 RUSSIAN" (44 S&W RUSSIAN) is marked on the left side of the receiver/frame.

Model

- "MERWIN, HULBERT & CO., N.Y." over "POCKET ARMY" is marked on the right side of the receiver/frame.
- "Pat. Jan. 24, Apr. 21, Dec. 15, 74, Aug. 3, '75, Apr. 17, 77, Pats. Mar. 6, 77" or "Pat. Apr. 17, 77, Jun. 15, 80, Mar. 14, 82, Jan. 9, 83" may be marked on the barrel.
- manufactured circa 1880's.
- this is a slightly smaller version of the Merwin, Hulbert & Company model Frontier Army double action revolver, with a unique cartridge extraction system.
- the "Double Action" in the model designation denotes the trigger mechanism, the same basic design was available with a single action trigger mechanism as the "Pocket Army" model.
- these revolvers have a split receiver/frame that pivots around the cylinder pin; when the release is pressed and the barrel/top strap is twisted to the right and pulled forward, the cartridge cases are retained on the breech-face by a disc that engages the cartridge rims.
- these revolvers are seen both with (most common) and without (early production) an integral top strap, with or without a folding hammer spur, and with "scoop" or conventional cylinder flutes; these revolvers also came with an extended bird's-head-style butt with an integral lanyard ring.
- the "Pocket Army Double Action" revolver normally came with an 84mm barrel although an optional 178mm barrel was available.
- the Merwin Hulbert & Company "Frontier Army" model was available with a 89mm, 140mm and 178 mm barrel.

Manufacturer

- "HOPKINS & ALLEN M'F'G CO. NORWICH, CONN. U.S.A." is marked on the left side of the barrel.

Serial Number

- the serial number is usually marked on the right side of the butt strap.

Calibre

- "CALIBRE" and either "WINCHESTER 1873" (44-40 WIN), "44 M&H" (44 MERWIN, HULBERT AND CO), or "44 RUSSIAN" (44 S&W RUSSIAN) is marked on the left side of the receiver/frame.

Notes

Make	- "Merwin, Hulbert & Company" is marked on the barrel. - Merwin, Hulbert & Company came into being circa 1868. - Joseph Merwin, a New England arms marketer, joined with two brothers William A. and M.H. Hulbert to form the company known as Merwin, Hulbert & Company. Through this partnership partial interest was gained in three other companies: - the Phoenix Rifle & Ammunition Company, the American Metallic Cartridge Company and the Hopkins and Allen Company. Shortly after this new company was formed an investment of $100,000 was made in the Evans Rifle Company. - the new firm quickly became a success. Merwin, Hulbert & Company became the largest firearm dealer in the USA, handling shooting accessories, reloading equipment and firearms made by Colt, Winchester, Remington, Marlin Ballard & L.C. Smith, Parker and Ithaca. - in 1874, "Merwin, Hulbert & Company" became sole agents for "Hopkins & Allen" and by 1878, "Merwin, Hulbert & Company" controlled "Hopkins & Allen", re-organizing the company into a new entity called "Hopkins & Allen Manufacturing Company". - circa 1876 Merwin, Hulbert & Co was in production of proprietary models of handguns at Norwich, Connecticut. - Joseph Merwin died in 1879. - the company suffered from a series of financial disasters, circa 1878: - the Russian Government refused to pay for three shiploads of revolvers which they had ordered, the failure of the Evans Rifle Company and a theft of company funds by a business associate. - Joseph Merwin died in 1879. - "Merwin & Hulbert" went into receivership in 1881. - the company was quickly reorganized under the same company name and continued the production of revolvers until a disastrous fire in 1891 destroyed the factory. - in late 1891 a new company was formed, "Hulbert Brothers & Company" in partnership with Hopkins & Allen to carry on with the revolver manufacturing business. - by 1896 this firm, too went into receivership. - in 1898 the company went through another re-organization emerging as "Hopkins & Allen Arms Company". - In 1902, "Hopkins & Allen" purchased the "Forehand Arms Company". - In 1917 the "Hopkins & Allen Arms Company" was sold to "Marlin-Rockwell".
Model	- manufactured circa1880s. - may have a bird's head butt or a square butt, saw-handle type. - normally hard rubber grips. - round ribbed barrel. - fluted cylinder. - automatic shell ejecting. - rounded trigger guard. - may have a folding hammer.
Action	- double action.
Serial Number	- serial number is usually marked on the grip strap of the receiver/frame. - samples observed have featured either the serial number marked on the left side of the grip strap, under the grip plate and consisted of four digits without a letter prefix or suffix or marked on the bottom of the grip and consisted of five digits without a letter prefix or suffix. - either of these numbers may appear on the same example, one being a production number and/or serial number that may also be repeated on the major components ie. cylinder face, barrel etc.
Calibre	- "32 CAL." was observed marked on the side of the receiver/frame above the trigger. - NOTE: if the cylinder is 24mm (approx. 1") in length the calibre is correctly identified as 32 S&W. If the cylinder is longer than 32mm (approx. 1 ¼") in length the calibre is correctly identified as 32 H&R.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.
Other Markings	- barrel markings: "MERWIN HULBERT & CO." with patent dates "1877, 1880, 1882, 1883." - one sample observed featured "MERWIN HULBERT & CO. NEW YORK U.S.A." over "PAT. APR. 17. 77 JUNE 15. 80 MAR. 14. 82 JAN. 9. 83" marked on top of the barrel.

Notes

Make

- "MERWIN HUBERT & CO" or "MERWIN HUBERT & CO." is usually marked on the barrel or receiver/frame.
- Merwin, Hulbert & Company came into being circa 1868.
- Joseph Merwin, a New England arms marketer, joined with two brothers William A. and M.H. Hulbert to form the company known as Merwin, Hulbert & Company. Through this partnership partial interest was gained in three other companies: - the Phoenix Rifle & Ammunition Company, the American Metallic Cartridge Company and the Hopkins and Allen Company. Shortly after this new company was formed an investment of $100,000 was made in the Evans Rifle Company.
- the new firm quickly became a success. Merwin, Hulbert & Company became the largest firearm dealer in the USA, handling shooting accessories, reloading equipment and firearms made by Colt, Winchester, Remington, Marlin Ballard & L.C. Smith, Parker and Ithaca.
- In 1874, "Merwin, Hulbert & Company" became sole agents for "Hopkins & Allen" and by 1878, "Merwin, Hulbert & Company" controlled "Hopkins & Allen", re-organizing the company into a new entity called "Hopkins & Allen Manufacturing Company".
- circa 1876 Merwin, Hulbert & Co was in production of proprietary models of handguns at Norwich, Connecticut.
- Joseph Merwin died in 1879.
- the company suffered from a series of financial disasters, circa 1878: - the Russian Government refused to pay for three shiploads of revolvers which they had ordered, the failure of the Evans Rifle Company and a theft of company funds by a business associate.
- Joseph Merwin died in 1879.
- "Merwin & Hulbert" went into receivership in 1881.
- the company was quickly reorganized under the same company name and continued the production of revolvers until a disastrous fire in 1891 destroyed the factory.
- in late 1891 a new company was formed, "Hulbert Brothers & Company" in partnership with Hopkins & Allen to carry on with the revolver manufacturing business.
- by 1896 this firm, too went into receivership.
- in 1898 the company went through another re-organization emerging as "Hopkins & Allen Arms Company".
- In 1902, "Hopkins & Allen" purchased the "Forehand Arms Company".
- In 1917 the "Hopkins & Allen Arms Company" was sold to "Marlin-Rockwell

Model

- manufactured during the 1880's by Hopkins & Allen for Merwin Hulbert & Co.
- "Pocket Revolver Spur Trigger" is not marked on this firearm.
- "Pocket Revolver" is derived from the Merwin Hulbert & Co. literature designation in which this model series was referred to as, "Pocket" or "Pocket Size".
- "Pocket Revolver" is one of several varieties of single action revolver, built without a trigger guard, but with a flat topped barrel rib.
- these revolvers have a split frame that pivots around the cylinder pin; when the release is pressed and the barrel/topstrap is twisted to the right and pulled forward, the cartridge cases are retained on the breech-face by a disc that engages the cartridge rims.
- will have either "scoop" or "standard"-style cylinder flutes, nickel finish, hard rubber grips and a spur trigger without a trigger guard; these revolvers were built in both square butt and bird's head butt versions, and the bird's head style grips will generally have an integral lanyard ring at the bottom of the butt.

Manufacturer

- "HOPKINS & ALLEN MFG. CO. NORWICH, CONN. U.S.A." is usually marked on the barrel.

Serial Number

- NOTE: research has indicated that some Merwin Hulbert & Co. handguns did not have a serial number.
- serial number may be marked on the bottom of the grip strap of the receiver/frame or on the left side of the grip strap of the receiver/frame, under the grip plate.
- serial number may be repeated on the barrel, cylinder and left side plate.
- serial number observed consisted of three numbers without a letter prefix or suffix.
- serial number observed consisted of four numbers without a letter prefix or suffix.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- "MERWIN, HULBERT & CO. N.Y. U.S.A." is marked on the topstrap.
- Merwin, Hulbert & Company came into being in 1868.
- Joseph Merwin, a New England arms marketer, joined with two brothers William A. and M.H. Hulbert to form the company known as Merwin, Hulbert & Company
- in 1874, "Merwin, Hulbert & Company" became sole agents for "Hopkins & Allen" and by 1878, "Merwin, Hulbert & Company" controlled "Hopkins & Allen", re-organizing the company into a new entity called "Hopkins & Allen Manufacturing Company".
- circa 1876 Merwin, Hulbert & Co was in production of their own proprietary models of handguns at Norwich, Connecticut.
- Joseph Merwin died in 1879.
- the company suffered from a series of financial disasters, circa 1878: the Russian Government refused to pay for three shiploads of revolvers which they had ordered, the failure of the Evans Rifle Company and a theft of company funds by a business associate.
- Joseph Merwin died in 1879.
- "Merwin & Hulbert" went into receivership in 1881.
- the company was quickly reorganized under the same company name and continued the production of revolvers until a disastrous fire in 1891 destroyed the factory.
- in late 1891 a new company was formed, "Hulbert Brothers & Company" in partnership with Hopkins & Allen to carry on with the revolver manufacturing business.

Model

- "XL No. 4" is marked on topstrap.
- "Hopkins & Allen" patent dates of "Mar. 28, 1871" and "Apr. 27, 1875" are marked on the topstrap.
- manufactured between 1878 and 1885.
- features include: round or octagonal barrel; solid receiver/frame with fixed fluted cylinder with the forward locking notches; cylinder-pin release is a push-in type blade on the left side of the receiver/frame; flat or round sided receiver/frame with a removable sideplate on the left; exposed spur hammer; sheathed trigger; brass half-disc blade front sight and a notch in the raised lip of the topstrap for a rear sight; standard bird's head grip with plain walnut grip panels; plain or engraved nickel finish with the hammer and trigger either blued or case-hardened.

Manufacturer

- "Hopkins & Allen" is not marked on the firearm.

Action

- single action.

Serial Number

- serial number is located under the left grip plate.

Notes

Make

- "MERWIN, HULBERT & CO. N.Y. U.S.A" is marked on the top strap over the patent date.
- Merwin, Hulbert & Company came into being circa 1868.
- Joseph Merwin, a New England arms marketer, joined with two brothers William A. and M.H. Hulbert to form the company known as Merwin, Hulbert & Company
- in 1874, "Merwin, Hulbert & Company" became sole agents for "Hopkins & Allen" and by 1878, "Merwin, Hulbert & Company" controlled "Hopkins & Allen", re-organizing the company into a new entity called "Hopkins & Allen Manufacturing Company".
- circa 1876 Merwin, Hulbert & Co was in production of proprietary models of handguns at Norwich, Connecticut.
- the company suffered from a series of financial disasters, circa 1878: the Russian Government refused to pay for three shiploads of revolvers which they had ordered, the failure of the Evans Rifle Company and a theft of company funds by a business associate.
- Joseph Merwin died in 1879.
- "Merwin & Hulbert" went into receivership in 1881.
- the company was quickly reorganized under the same company name and continued the production of revolvers until a disastrous fire in 1891 destroyed the factory.
- in late 1891 a new company was formed, "Hulbert Brothers & Company" in partnership with Hopkins & Allen to carry on with the revolver manufacturing business.

Model

- "XL. No 5" was observed marked on the top strap over the calibre.
- "PAT. MARCH 28. 1871" was observed on the top strap.
- manufactured from 1879 to circa 1898.
- features include: brass half-disc front sight and a raised, notched lip in the top strap for a rear sight; octagonal barrel; solid top receiver/frame with a channel on the right side behind the cylinder for loading/removing cartridges; removable fluted cylinder with safety notches; cylinder-pin release is a push-in type blade on the left side of the receiver/frame; exposed spur hammer; sheathed trigger; single action trigger mechanism; birdshead-type grip; nickel finish.

Manufacturer

- "Hopkins & Allen" is not marked on the firearm.

Serial Number

- serial number may be marked on the top of the barrel or under the grip plate, and may be repeated on other parts or components.
- observed serial number consisted of three digits with no letter prefix or suffix.

Calibre

- calibre is usually marked on the receiver/frame.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- Meteor is a Belgian proof mark used circa 1870-1890.
- Meteor was observed, on a reference example, marked on the top rib, may also be stamped on either side locks.
- "Meteor" was a name trade-marked by Louis Muller in 1889.

Model

- model designation not marked on firearm.
- this is a generic entry for Meteor side by side shotguns, with no model markings.
- features may include:
- hammer, or hammerless with a combination of single or double triggers.
- top, side, or push button opening lever.
- damascus, or steel barrels.
- boxlock, or sidelock configuration.
- some specimens may be stamped on either sides of the locks as:
"BELGIUM LAMINATED STEEL".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the manufacturer's name is not marked on the firearm. - Louis Mueller (sometimes spelled Muller or Müller) was a firearms manufacturer in Liege, Belgium circa 1893 - 1900. Some sources report that Mueller built firearms were being imported as late as 1914. - the following trade-names are known to have been registered by Louis Mueller between 1889 and 1894; - Climax, registered on 30-11-1889. - Star, registered on 30-11-1889. - Crescent, registered on 30-11-1889. - Rival, registered on 30-11-1889. - Standard, registered on 16-12-1889. - Meteor, registered on 16-12-1889. - Acme, registered on 16-12-1889. - Club, registered on 16-12-1889. - I.N.L., registered on 05-02-1890. - The little Enfield, registered on 11-03-1893. - Acme Arms Co, registered on 23-04-1894. - Crescent Arms Co, registered on 23-04-1894.
Action	- side by side barrel configuration, hinged barrel design.
Serial Number	- serial numbered on the water table.
Calibre	- was observed marked on the barrel flat.
Other Markings	- possible additional markings usually on sides plates in one line as follows: "BELGIUM LAMINATED STEEL METEOR"

Notes

Make

- "METRO ARMS CORP" is marked on the right side of the receiver/frame.
- "METRO" over "M" over "ARMS" in a logo form is marked on the side of the grip panels.
- "METRO ARMS CORP" logo, the letter "M" inside a double lined circle ending at one o'clock with a smaller circle was observed marked on the rear sides of the slide.
- "METRO ARMS CORP" uses the acronym "MAC".
- "METRO ARMS CORP" is located in Paranaque City, Metro Manila, Philippines.

Model

- "AMERICAN CLASSIC" is marked on the left side of the slide.
- "AMERICAN CLASSIC" is a variant of the Colt 1911-A1 pistol.
- "AMERICAN CLASSIC" is the full size Government model pistol.
- Features include: smooth, rounded slide top; flat sided slide with lowered and flared ejection port; rear grasping serrations on the slide; spurred hammer; beavertail grip safety; ventilated trigger with adjustment screw; smooth front grip area; slide release lever, manual thumb safety lever, and magazine release button are mounted on the left side of the receiver/frame; checkered wood grip plates; steel construction.

Manufacturer

- "METRO ARMS CORP" logo, the letter "M" inside a double lined circle ending at one o'clock with a smaller circle was observed marked on the rear sides of the slide.
- "METRO ARMS CORP" uses the acronym "MAC".
- "METRO ARMS CORP" (MAC) was established by Hector Rodriguez in the 1990s.
- "METRO ARMS CORP" is located in Paranaque City, Metro Manila, Philippines.

Action

- Recoil operated.

Serial Number

- The serial number is marked on the right side of the receiver/frame.
- Serial number of a referenced example consisted of a one letter two numbers, a dash and five numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- The calibre designation is marked on the barrel, visible through the ejection port.
Shots	- Detachable box magazine housed in the grip.

Notes

Make

- "METROARMS" was observed marked on the right side of the slide.
- "MAC" is marked on the side of the slide.
- "MAC" is the acronym for "Metro Arms Corporation".

Model

- "MAC 2011" was observed marked on the side of the slide.
- "2011 MAC" modular design is comprised of a barrel and slide assembly from Metro Arms and a synthetic trigger guard and grip assembly and a steel or alloy receiver/frame from STI. This differs from the traditional 1911A1 design whereby the grip/trigger guard are not integral to the receiver/frame.
- STI also refers to this receiver/frame as the "MODULAR 2011", "MODULAR COMPETITION SYSTEM" or "2011 FRAME KIT".
- "2011 FRAME KIT" consists of the receiver/frame, grip, magazine release, main spring housing and trigger.
- overall length for a 127mm (5 ") barrel is 216mm (8 .5"), average weight is (40.5oz).
- with the interchangeability of STI and aftermarket parts, it may be found in any configuration with any number of barrel lengths.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "METROARMS" was observed marked on the right side of the slide. - "MAC" is marked on the side of the slide. - Metro Arms' logo, the letter "M" inside a double lined circle ending at one o'clock within a smaller circle was observed marked on the rear side of the slide. - "STI" inside a circle may be marked on the grip plates. - "STI INTERNATIONAL" may be marked on the right side of the receiver/frame. - Metro Arms Corporation (MAC) was established by Hector Rodriguez in the 1990's. - Metro Arms Corporation is located in Paranaque City, Metro Manila, Philippines.
Action	- recoil operated.
Serial Number	- serial number is marked on the left side of the receiver/frame.
Calibre	- calibre designation is usually marked on the barrel, visible through the ejection port.
Shots	- detachable box magazine. - STI Hi-Cap magazines are the factory supplied magazines that come with this firearm. - with the interchangeability of aftermarket and STI 1911 type magazines, it may be found in any configuration with any number of shots.

Firearm Reference Number (FRN): 80251
Make: Metropolitan Arms
Model: Colt 1851 Navy Copy

Summary

Make:	Metropolitan Arms
Model:	Colt 1851 Navy Copy
Manufacturer:	Metropolitan Arms
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
80251 - 1	36 PERCUSSION	6	191	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- generally marked "METROPOLITAN ARMS CO. NEW YORK" on the barrel, though some of the Colt 1851 Navy and 1862 Police copies they made are unmarked.

Model

- no model name is marked on this firearm; the model name is derived from the characteristics of the firearm.
- this is a contemporary copy of the Colt 1851 Navy single action percussion revolver, made for Union troops from 1864 to 1866; Metropolitan is believed to have made 6063 of these revolvers.
- these revolvers are near identical copies of original Colts, except that they either bear no markings (other than serial numbers; early production), bear distributor's markings (marked "MADE FOR H.E. DIMICK St LOUIS" or simply "H.E. DIMICK St LOUIS"), or are marked "METROPOLITAN ARMS CO. NEW YORK" (the majority of production).
- features include: walnut grips, roll-engraved cylinder scene of the Battle of New Orleans on examples after serial number 1800, and blued finish with color case hardened receiver/frame, loading lever, and hammer.
- Metropolitan also produced near exact copies of the Colt 1861 Navy, which differ from this revolver mainly in that the 1861 has a round barrel with "sculpted" barrel lug, while the 1851 has an octagonal barrel with flat-sided barrel lug.

Manufacturer

- the Metropolitan Arms Company was a manufacturer based in New York City from 1864 to 1920; they originally manufactured copies of Colt revolvers for the Union war effort during the Civil War (having to replace much of Colt's missing production after the Colt factory suffered a fire in 1864).
- their revolvers are generally marked "METROPOLITAN ARMS CO. NEW YORK" on the barrel, sometimes with the addition of distributor's marks.

Serial Number

- numbered on receiver/frame.
- these revolvers are serial numbered in two ranges; first production was from "1" to "63", while later production was from"1164" to approximately "7100".

Notes

Make

- marked "METROPOLITAN ARMS CO. NEW YORK" on the barrel.

Model

- this is a contemporary copy of the Colt 1861 Navy single-action percussion revolver, made for Union troops from 1864 to 1866; Metropolitan is believed to have made less than 50 of these revolvers.
- these revolvers are near identical copies of original Colts, except that they are marked "METROPOLITAN ARMS CO. NEW YORK" on the barrel.
- features include: walnut grips, roll-engraved cylinder scene of the Battle of New Orleans, and blued finish with color case hardened receiver/frame, loading lever, and hammer.
- one of the major distinguishing features between this revolver and an original Colt 1861 Navy is that these revolvers have a simplified loading lever/rammer assembly that pivots around a screw through the barrel lug; original Colt 1861 Navys have a "rack and pinion" type loading lever.
- Metropolitan also produced near exact copies of the Colt 1851 Navy, which differ from this revolver mainly in that the 1861 has a round barrel with "sculpted" barrel lug, while the 1851 has an octagonal barrel with flat-sided barrel lug.

Manufacturer

- the Metropolitan Arms Company was a manufacturer based in New York City from 1864 to 1920; they originally manufactured copies of Colt revolvers for the Union war effort during the Civil War (having to replace much of Colt's missing production after the Colt factory suffered a fire in 1864).
- their revolvers are generally marked "METROPOLITAN ARMS CO. NEW YORK" on the barrel, sometimes with the addition of distributor's marks.

Serial Number

- numbered on receiver/frame.
- these revolvers are serial-numbered in the same range as Metropolitan's Colt 1851 Navy copies, and are seen from "2300" to "2350".

Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
81773 - 1	36 PERCUSSION	5	114	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
81773 - 2	36 PERCUSSION	5	140	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
81773 - 3	36 PERCUSSION	5	165	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- generally marked "METROPOLITAN ARMS CO. NEW YORK" on the barrel, though some of the Colt 1851 Navy and 1862 Police copies they made are unmarked.

Model

- this is a contemporary copy of the Colt 1862 Police single-action percussion revolver, made from 1864 to 1866; Metropolitan is believed to have made 2750 of these revolvers.
- these revolvers are near identical copies of original Colts, except that they either bear no markings (other than serial numbers; early production), or are marked "METROPOLITAN ARMS CO. NEW YORK" (the majority of production).
- features include: walnut grips, fluted cylinder, round barrel with "sculpted" barrel lug, and blued finish with color case hardened receiver/frame, loading lever, and hammer.
- one of the major distinguishing features between this revolver and an original Colt 1862 Police is that these revolvers have a simplified loading lever/rammer assembly that pivots around a screw through the barrel lug; original Colt 1862 Police revolvers have a "rack and pinion" type loading lever.

Manufacturer

- the Metropolitan Arms Company was a manufacturer based in New York City from 1864 to 1920; they originally manufactured copies of Colt revolvers for the Union war effort during the Civil War (having to replace much of Colt's missing production after the Colt factory suffered a fire in 1864).
- their revolvers are generally marked "METROPOLITAN ARMS CO. NEW YORK" on the barrel, sometimes with the addition of distributor's marks.

Serial Number

- numbered on receiver/frame.
- these revolvers are serial-numbered in two distinct serial-number ranges, depending on whether or not they bear "METROPOLITAN ARMS CO." markings; unmarked examples are numbered from "1100" to "1800" and from "1950" to "2400", while marked examples are numbered from "1800" to "1950" and "2400" to "3850".

17267 - 2	12 GA X 3"	2	754	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "METROPOLITAN ARMS Co." is marked on the lockplates.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is a standard-pattern side by side sidelock shotgun, manufactured for export to the United States under the "Metropolitan Arms Co." name around 1900.
- these shotguns would have been manufactured by a number of sub-contractors, most of whom used a logo or letter code to indicate that they had produced a particular firearm.
- features normally include: blued finish; fluid steel or Damascus barrels; bead sight; matted rib; checkered walnut forearm and straight or pistol-grip stock; extractor; doll's-head extension with dual underbite lock-up; external, manually-cocked hammers on lockplates; double triggers; extractor; tang top-lever opener; steel or plastic buttplate.

Action

- side by side configuration.

Serial Number

- serial numbered on the receiver/frame.

FRT Report

Firearm Reference Number (FRN): 172842
Make: Meyer & Quiller
Model: Scottish Highlander Regimental Flintlock Pistol

Summary

Make:	Meyer & Quiller
Model:	Scottish Highlander Regimental Flintlock Pistol
Manufacturer:	Meyer & Quiller
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
172842 - 1	52 FLINTLOCK	1	140	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "MEYER & QUILLER" is marked on the lockplate.
- "MEYER & QUILLER" was located in Edinburgh, Scotland.
- "MEYER & QUILLER" operated from 1770 to 1800.

Model

- model designation is derived from the characteristics of the firearm.
- this is an all steel construction, including the stock, flintlock pistol.
- features include: round, stepped barrel slightly flared at the muzzle that may also be octagon; flat sided metal stock with curved grip; under the barrel ram rod; button-shaped triggers without trigger guard; ram's horn butt with a threaded, centre knob for the touch hole pick; belt hook attachment on the left side; unfinished metal surface with engraving.
- a very similar pistol, the "Black Watch Pistol" is known under several similar names, and must not be confused with the "Murdoch" pistol; where the "Murdoch" pistol has a "ram's-head" butt, with curlicue extensions that help to protect a ball-headed vent-pick threaded into the butt, the "Black Watch Pistol" is made with an all-brass butt and stock, with a double-lobed "kidney-shaped" butt that allows the pistol to be used as a club after the shot is fired.

Manufacturer

- "MEYER & QUILLER" is marked on the lockplate.
- "MEYER & QUILLER" was located in Edinburgh, Scotland.
- "MEYER & QUILLER" operated from 1770 to 1800.

Action

- muzzle loading.

Notes

Make

- "MG ARMS" is marked on the firearm over "SPRING, TX".
- "MGA" may be marked on receiver/frame or firearm parts.
- "MG Arms Incorporated" was established in 1980, founded by Carol & Karry O'Day and operated under the name "Match Grade Arms & Ammunition" (MGA).
- Match Grade Arms (MG Arms) is located in Spring, Texas, U.S.A.
- Match Grade Arms & Ammunition company name was changed to "MG Arms Incorporated" in 2004.
- MG Arms Inc. continues to produce the same firearms that once was produced under the Match Grade Arms name.
- MG Arms Inc. is a custom manufacturer of revolvers and rifles.
- MG Arms Inc. has used Ruger revolver receiver/frames by Sturm Ruger, Remington 700 rifle actions, Weatherby Vanguard rifle actions by Howa Machinery, Winchester 70 rifle actions by U.S. Repeating Arms, and Nesika Hunter rifle actions by Nesika Bay Precision.
- MG Arms Inc. now uses CNC machines to produce the receiver/frames for their firearms.

Model

- introduced 2015.
- model may be marked on the receiver/frame.
- this is a CNC machined semi-automatic, long-range tactical receiver/frame.
- features include: blued match grade with skip line fluting and threaded muzzle for accessories; stainless steel lower receiver/frame; detachable box magazine; multi-sided accessory forend handrail with keymods; custom long-range trigger; tactical pistol grip; fully adjustable cheekpiece and skeletonized butt stock with recoil pad; sling swivels.

Notes

Make

- "MG ARMS" may be marked on the firearm over "SPRING, TX".
- "MGA" may be marked on receiver/frame or firearm parts.
- "MG Arms Incorporated" was established in 1980, founded by Carol & Karry O'Day and operated under the name "Match Grade Arms & Ammunition" (MGA).
- Match Grade Arms (MG Arms) is located in Spring, Texas, U.S.A.
- Match Grade Arms & Ammunition company name was changed to "MG Arms Incorporated" in 2004.
- MG Arms Inc. continues to produce the same firearms that once was produced under the Match Grade Arms name.
- MG Arms Inc. is a custom manufacturer of revolvers and rifles.
- MG Arms Inc. has used Ruger revolver receiver/frames by Sturm Ruger, Remington 700 rifle actions, Weatherby Vanguard rifle actions by Howa Machinery, Winchester 70 rifle actions by U.S. Repeating Arms, and Nesika Hunter rifle actions by Nesika Bay Precision.
- MG Arms Inc. now uses CNC machines to produce the receiver/frames for their firearms.

Model

- introduced in 2009.
- model may be marked on the receiver/frame.
- "K-Yote" is CNC machined as an "AR Style" lower receiver/frame assembly and CNC matched upper assembly.
- this firearm is of the design commonly known as the AR-15/M-16 rifle.
- features include: free floating, round fluted or decagon (10 sided) match grade barrel; CNC machined lower AR-style receiver/frame with integral trigger guard and a matched upper assembly system with top accessory rail; safety toggle on the left side of the receiver/frame; ventilated forend, hand guard with accessory rails on four sides; custom target trigger; polymer pistol grip; fully adjustable, ambidextrous butt stock for shoulder length and comb height.
- optional features: stock colours range from "Zombie Camo" to regular tactical black.

Manufacturer

- "MG ARMS" may be marked on the firearm over "SPRING, TX".
- "MGA" may be marked on receiver/frame or firearm parts.

Notes

Make

- "MGI, INC" over "BANGOR, ME" over "USA" was observed marked on the left side of a lower receiver/frame.
- "MFG FOR" over "MGI, INC" over "BANGOR, ME" over "USA" was observed marked on the right side of a lower receiver/frame.
- "MGI, INC "over "BANGOR, ME" over "USA" over "AR MAG WELL" was observed marked on the side of an interchangeable mag well.
- "MGI INC "over "BANGOR ME USA" and "AK47 MAG WELL" was observed marked on the side of an interchangeable mag well.

Model

- "MODEL MARCK-15" is marked on the left side of the receiver/frame.
- this firearm is of the design commonly known as the AR-15/M-16 rifle.
- the MGI modular weapon system platform allows the rifle to morph into a number of different calibres by changing the Magazine well, barrel and in some cases the bolt or any complete upper barrel assembly.
- features include: Quick change barrel QCB-C; tubular reinforced polymer handguard with four M1913 Picatinny rails (may be long or short, depending on barrel length), upper receiver may have a integral carrying handle with adjustable rear sight or a flat top upper receiver with M1913 Picatinny rail, case deflector located rearward of the ejection port, folding ejection port cover, bolt forward assist located on the right side; lower receiver/frame has an exchangeable magazine well; available with front sight assembly mounted on the barrel just forward of the handguard; fixed or telescopic buttstock; available in left or right hand versions.
- "Marck -15" receiver/frame has the same footprint as the AR15/M16 and is designed to accommodate a vast array of AR15/M16 and aftermarket parts.
- available as a stripped lower receiver/frame.

Manufacturer

- "MG Industries (MGI)" was founded by Mack W. Gwinn.
- "MGI, Inc./MG Industries, Incorporated" is located in Bangor, Maine, U.S.A.

Action

- blowback or gas operated.

Serial Number

- serial number was observed marked on the left side of the receiver/frame just above the trigger
- observed serial number consisted of a two letter prefix and five numbers or five numbers without a letter prefix or suffix

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- "CAL MULTI" was observed marked on the left sides of the receiver/frame.
- other calibre markings are found on the removable magazine well.
- AR15 Mag Well Cal 556 MM.
- AK 47 Mag Well Cal 7.62x39.
- 9 MM SMG Mag Well.

Shots

- detachable box magazine.
- magazines are compatible with the Glock series of pistols in 45 ACP, 40S&W and 9MM.
- magazines are compatible with the Grease gun series of submachine gun in 45 ACP.
- magazines are compatible with the AK 47 series of rifles in 7.62x39.
- magazines are compatible with the AR 15/M16 series of rifles in 5.56. 50 Beowulf, 499 LWR and 458 SOCOM.
- magazines are compatible with the M14 series of rifles in 7.62x51(308Win).
- Belt fed variant use MGI modified links.
- the 50 Beowulf magazine is adapted from the original 5.56x45 NATO version of the magazine but the ability of the magazine to perform as originally designed has not been compromised by the adaptation.
- the 458 SOCOM cartridge is designed to use the original 5.56x45 NATO version of the magazine and the ability of the magazine to perform as originally designed has not been compromised.

Notes

Make

- the make or logo thereof is marked on the firearm.

Model

- the model designation is marked on the firearm.
- this is a updated version of the Atchisson "Assault 12" full-automatic shotgun, made with a one-piece moulded buttstock, pistol grip, and forearm.
- features include: M16/AR-15-style "straight-line" layout, to minimize recoil and muzzle climb; open adjustable sights raised above the bore axis; a hook-shaped cocking handle on top of the receiver/frame (accessible with either hand); M16/AR-15-style trigger and fire-control placement; "open-bolt"/advanced primer ignition operation; and a large rail that extends down from the rear of the magazine well, for support of the eight-round box or 32-round drum magazine. The bottom end of this rail is anchored to the bottom of the pistol-grip, giving the appearance of a trigger-guard for the entire hand.

Manufacturer

- the manufacturer or logo thereof is marked on the firearm.
- Mid America Recreation Inc. is a company based in Moline, Illinois that specializes in building modern reproductions of the Stevens falling-block rifle and an updated version of the Atchisson "Assault 12" full-automatic shotgun.

Action

- recoil-operated.

Serial Number

- numbered on the receiver/frame.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "Midland" or "Midland Gun Co." or "Midland Gun Co. Ltd" or "Midland Gun Co. Ltd. Made in England" or "Midland Gun Company" or "Midland Gun Company England" or "Midland Gun Company, Birmingham" is marked on the firearm. - "Midland" is a tradename that has been used by Midland Gun Company, Parker-Hale Limited and Gibbs Rifle Company. - Gibbs was a manufacturer based in Great Britain, who specialized in manufacturing magazine and double rifles for use on dangerous game; eventually, the name "Gibbs Rifle Company" was bought by Parker-Hale, who then sold it to Navy Arms.
Model	- model name does not appear on firearm. - this is a generic entry for "Sporter Rifles" made by Midland, usually on Mauser, Enfield or Springfield-type bolt actions. - is not unusual for the receivers of these rifles to have been re-polished and re-blued thereby removing all former markings of any kind from the action.
Manufacturer	- "Midland Gun Co", "Midland Gun Company, Birmingham" or a variation thereof is usually marked on the barrel and/or receiver/frame. - Midland Gun Company was established circa 1840 in Birmingham, England. - Midland Gun Company manufactured and distributed firearms and shooting accessories. - Midland Gun Company was sold to Parker-Hale Limited, circa 1956. - Midland Gun Company became a trade name used by Parker-Hale after 1956.
Serial Number	- may or may not be serial numbered.
Calibre	- calibre is marked on the barrel.

Notes

Model

- model designation may not be marked on the firearm.
- "MGL", also known as the "Y2" was introduced in 1983.
- "MGL MARK 1" was introduced in 1996.
- "MSGL" was introduced in 1997.
- "MGL MARK 1S" was introduced in 2002.
- "MGL MARK 1L" was introduced in 2003.
- "MRGL" was introduced in 2008.
- 24,000 plus units were produced from 1983 to 2005.
- "MGL MARK 1" is a shoulder fired, multiple grenade launcher (MGL) that uses the revolver feed principle to attain a high rate of fire.
- features include: gain twist rifled barrel; spring actuated revolving cylinder; the receiver/frame swivels to allow access to the cylinder; gas operated cylinder index system; flat, matte khaki finish; pistol grip; folding buttstock.
- overall length with the butt extended in 778mm and 566mm with the butt folded.
- also available in a stainless steel version as the MARK 1S and a longer cylinder version to accept a different cartridge as the MARK 1L.

Manufacturer

- "Milkor (Pty) Limited" was established by Andries C. Piek in 1981.
- "Milkor (Pty) Limited" is located in Pretoria, South Africa.
- "Milkor (Pty) Limited" was originally marketed by "Milkor Marketing (Pty) Limited".

- "Milkor Marketing (Pty) Limited"/"Ripple Effect (Pty) Limited" was established in 1995.
- "Milkor Marketing (Pty) Limited" was located in Hatfield, South Africa.
- "Milkor Marketing (Pty) Limited" became "Ripple Effect (Pty) Limited".
- "Ripple Effect (Pty) Limited" is located in Hatfield, South Africa.
- "Ripple Effect Weapon Systems (Pty) Limited" now manufacturers 40mm Multiple Grenade Launchers.

Action

- gas operated index system with a spring actuated revolving cylinder.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number of a representative sample was found on the upper portion of the barrel sleeve just forward of the cylinder and consisted of a letter prefix (Y), a number "2", a dash (-), followed by four numbers.
Calibre	- chambers and fires 40mm X 46mm grenades.
Shots	- cylinder feed.
Canadian Law Comments	- This model meets the definition of firearm in the Criminal Code of Canada S.2. This model may be regulated by other Federal Acts such as the Export and Import Permits Act (EIPA) and the Defence Production Act.

Notes

Make

- "Miller Arms" is marked on the firearm.
- "Miller Arms" was a trade name owned by Dakota Arms until June of 2009.
- "Miller Arms" is a trade name owned by Remington since June of 2009.

Model

- introduced in 2004.
- the model designation may not marked on the firearm.
- features include: round blued barrel; half round half octagon barrel standard for 2006; vented quarter rib scope base; plain matte receiver/frame; curved Farquharson lever; jeweled block; swivel studs; checkered English style stock; semi-beavertail or schnabel fore end; cheek piece; black recoil pad or checkered steel buttplate; case colored receiver/frame with gold Miller banner and jewelled block new for 2006.
- a 660mm stainless octagonal barrel is optional for this model.
- overall length for a 610 mm barrel is 1041mm (41"), average weight is 3.18 kg (7 lbs).

Action

- lever operated, falling/dropping block design.
- solid metal breechblock slides vertically in grooves cut into the receiver/frame.

Serial Number

- the serial number is marked on the receiver/frame.
- the serial number rationalization is unknown.

Calibre

- the calibre designation is usually marked on the barrel.

Notes

Make

- "Miller Arms" is marked on the firearm.
- "Miller Arms" was a trade name owned by Dakota Arms until June of 2009.
- "Miller Arms" is a trade name owned by Remington since June of 2009.

Model

- introduced in 2004.
- the model designation is not marked on the firearm.
- features include: round blued barrel; vented quarter rib scope base; under lever actuated, dropping block design; front globe and rear tang sight; jewelled block; swivel studs; checkered, straight or semi-pistol grip stock with a semi-beavertail or schnabel fore end and raised cheek piece; black recoil pad or checkered steel buttplate.
- a 660mm stainless octagonal barrel is optional for this model.
- overall length with 610 mm barrel is 1041mm (41"), average weight is 3.41 kg (7.5 lbs).

Action

- lever operated, falling/dropping block design.
- solid metal breechblock slides vertically in grooves cut into the receiver/frame.

Serial Number

- the serial number is marked on the receiver/frame.
- the serial number rationalization is unknown.

Calibre

- the calibre designation is usually marked on the barrel.

Notes

Make

- brand name owned by the manufacturer, R J Miller & Associates.

Model

- pre-production prototype guns were built utilizing Browning / Miroku shotguns as a starting point.
- these firearms are a unique concept in that they are equipped with two complete "quick change" receivers complete with trigger mechanisms to permit a competition shooter to continue competing with (essentially) the same firearm after an equipment failure by exchanging receivers.
- Note: this model is capable of accepting the single barrel Trap barrel from another Miller Medalist firearm.

Manufacturer

- Miller R J & Associates / Miroku Firearms Manufacturing reflects the fact that the original manufacturer is Miroku and that R J Miller & Associates has extensively re-manufactured the firearms.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- pre-production prototype guns were built utilizing Browning / Miroku shotguns as a starting point. These prototype firearms will be found marked with both Miroku assigned serial numbers and a Miller Medalist serial number: ie) ten characters in the Browning serial number rationalization and a six digit Miller Medalist serial number which may also contain a suffix letter "S". This letter denotes the spare receiver /frame in the Miller Medalist set. The original Browning / Miroku serial number may be found under the "side-plates" on the re-manufactured receiver/frame.
