FRT Report

Firearm Reference Number (FRN): 135570
Make: Para USA
Model: PXT Hi-Cap 14 45 Limited 1911 100th Anniversary Commemorative

Summary

Make:	Para USA
Model:	PXT Hi-Cap 14 45 Limited 1911 100th Anniversary Commemorative
Manufacturer:	Para USA
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
135570 - 1	45 AUTO	10	127	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
135570 - 2	45 AUTO	14	127	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "PARA USA" or "PARA USA INC" is usually marked on the right side of the receiver/frame.
- "Para", the Power Extractor (PXT) stylized logo and "Hi-Cap" are marked on the left side of the slide.

Model

- introduced in 2011.
- "PXT Hi-Cap 14 45 Limited 1911 100th Anniversary Commemorative" is not marked on the firearm.
- "Para", the Power Extractor (PXT) stylized logo and "Hi-Cap" are usually marked on the left side of the slide.
- "100th Anniversary" was observed marked on the right side of the slide.
- "1911 100th Anniversary Commemorative" is celibrating John Moses Browning's design of the Government Model 1911 pistol.
- "14" in the model designation denotes the magazine capacity, and the "45" denotes the calibre (45 AUTO).
- Power Extractor (PXT) increases the range of movement and surface area of the extractor.
- features include: stainless steel construction; round ramped Match barrel; flat sided slide with front and rear grip serrations, lowered and flared ejection port, full length guide rod, fibre optic front sight and adjustable rear sight; full size receiver/frame with integral equipment rail and arched mainspring housing; exposed competition hammer; competition trigger; single action trigger mechanism; ambidextrous safety catch; beavertail grip safety; action release and magazine release are located on the left side of the receiver/frame; checkered grip plates; black and stainless steel finish.
- overall length with a 127 mm (5.0") barrel is 216 mm (8.5"), and average weight is 1.13 kg (41 oz).

Manufacturer

- "PARA USA" or "PARA USA INC" is usually marked on the right side of the receiver/frame.

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the right side of the receiver/frame.
Calibre	- calibre is marked on the top of the barrel, visible in the ejection port.
Shots	- detachable box magazine housed in the grip.

61626 - 2	308 WIN	1	762	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- the make "Paramount" is marked on the right side of the receiver/frame.

Model

- this is a bolt operated single shot target rifle based on an action built by Paramount (predcessor of RPA Precision Engineering). Paramount itself only produced actions, so shooters who buy these actions will stock and barrel them to their own specifications
- a Paramount action is a block of stainless steel with a square lower profile and an octagonal upper profile, with a loading/ejection port milled into the right side and a locking lug for the bolt handle at the right rear.
- the "Quadlock" action derives its name from a four lugged bolt head, with an ejector built into one lug and an extractor built into the lug directly opposite; this provides a very strong lock around the circumference of the bolt head.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the right side of the receiver/frame.

Calibre

- caliber designation may be marked on the barrel.

130068 - 1	40 S&W	13	134	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the maker's name is marked on the firearm as "PARDINI".

Model

- "MOD. GT40S" is marked on the front right side of the receiver/frame; the "S" in the model name indicates stainless steel.
- this semi-automatic pistol is made for competition shooting. It is functionally the same as the Pardini "PC" series with a straighter trigger. The difference in names is a result of Italian firearm laws where the "GT" is listed as a sporting pistol and the "PC" is classed as a defensive pistol.
- the Pardini "GT" model series utilizes the CZ-75-style reversed frame rails design, whereby the slide rides on rails inside of the frame.
- features include: recoil operated, semi-automatic, single action trigger; stainless finished receiver/fame and slide; flat sided slide with middle and rear grip serrations; slide is available with or without integral compensator; ambidextrous magazine release button; adjustable open sights; exposed hammer; adjustable single-action trigger mechanism; square front trigger guard; extended rear tang; ambidextrous thumb safety; checkered walnut grip plates.
- available with various styles of scope mounts.

Manufacturer

- the manufacturer's name is usually marked on the firearm as "Pardini".
- Pardini Armi s.r.l. is an Italian firearms manufacturer located in Lido di Camaiore, Italy.

Action

- recoil operated.

Serial Number

- "Cat. " followed by four or five numbers is marked on the right side of the receiver/frame. This number IS NOT the serial number. It is the reference number of the official Italian catalogue of firearms given to different models of firearms.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre designation is marked on the barrel, viewable through the ejection port.
Shots	- detachable box magazine.

Notes

Make

- the maker's name is marked on the firearm as "PARDINI".

Model

- "MOD. GT45 II" is marked on the front right side of the receiver/frame.
- this semi-automatic pistol is made for IPSC-style competition.
- the Pardini PC model series utilizes the CZ-75-style reversed frame rails design, whereby the slide rides on rails inside of the frame.
- features include: recoil operated, semi-automatic, single action trigger, utilizing a detachable box magazine; stainless receiver/fame and slide; flat sided slide with middle and rear grip serrations; slide is available with or without integral compensator; ambidextrous magazine release button; adjustable open sights; exposed hammer; adjustable single-action trigger mechanism; square front trigger guard; extended rear tang; ambidextrous thumb safety; checkered walnut grip plates.
- available with various styles of scope mounts.

Manufacturer

- the manufacturer's name is usually marked on the firearm as "Pardini".
- Pardini Armi s.r.l. is an Italian firearms manufacturer located in Lido di Camaiore, Italy.

Action

- recoil operated.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- serial number of a referenced example consisted of two letter prefix "AT" and five numbers.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

130073 - 1	45 AUTO	13	134	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the maker's name is marked on the firearm as "PARDINI".

Model

- "MOD. GT45S" is marked on the front right side of the receiver/frame; the "S" in the model name indicates stainless steel.
- this semi-automatic pistol is made for competition shooting. It is functionally the same as the Pardini "PC" series with a straighter trigger. The difference in names is a result of Italian firearm laws where the "GT" is listed as a sporting pistol and the "PC" is classed as a defensive pistol.
- the Pardini "GT" model series utilizes the CZ-75-style reversed frame rails design, whereby the slide rides on rails inside of the frame.
- features include: recoil operated, semi-automatic, single action trigger; stainless finished receiver/fame and slide; flat sided slide with middle and rear grip serrations; slide is available with or without integral compensator; ambidextrous magazine release button; adjustable open sights; exposed hammer; adjustable single-action trigger mechanism; square front trigger guard; extended rear tang; ambidextrous thumb safety; checkered walnut grip plates.
- available with various styles of scope mounts.

Manufacturer

- the manufacturer's name is usually marked on the firearm as "Pardini".
- Pardini Armi s.r.l. is an Italian firearms manufacturer located in Lido di Camaiore, Italy.

Action

- recoil operated.

Serial Number

- serial number is marked on the right side of the receiver/frame and may have a letter prefix.
- "Cat. " followed by four or five numbers is marked on the right side of the receiver/frame. This number IS NOT the serial number. It is the reference number of the official Italian catalogue of firearms given to different models of firearms.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre designation is marked on the barrel, viewable through the ejection port.
Shots	- detachable box magazine.

Notes

Make

- make is marked above the trigger on the right side of the receiver/frame.

Model

- model designation is marked above the trigger on the right side of the receiver/frame as: "K2", the K is bigger than the 2. The "s" in the model designation (not marked on the firearm) denotes that this model uses a compressed air power supply.
- features include: walnut adjustable anatomical grip; blued finish; adjustable trigger and rear sight; barrel weight for stability and a compressed air reservoir mounted under the barrel.
- the K2s is available in a lightweight version also known as the "K2s Light" and in a "Junior" version with a shorter barrel and lighter overall weight for younger shooters.
- a similar series of models that use a CO2 power supply is available as the model "K2".

Manufacturer

- the manufacturer's name is normally found marked on the firearm as "Pardini".
- Pardini Armi s.r.l. is located in Lido di Camaiore, Italy.

Action

- at least two variants of this particular model exist:
Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Notes

Make

- make is marked on the slide above the trigger.

Model

- model marked on right side of dustcover (forward part of frame/receiver) as "MOD. P.C.", followed by the calibre (9, 40, 45).
- this is a single-action semi-automatic pistol made specifically for IPSC-style competition.
- features include: blued frame/receiver and slide; extended tang; ambidextrous thumb safety; adjustable single-action trigger mechanism; open adjustable sights; ambidextrous magazine release and a CZ-75-style reversed frame rails design, where the slide rides on rails INSIDE the frame.
- also available in both 5" and 6" versions, in both blued (PC) and stainless (PCS) versions and in duo-tone versions.
- conversions kits are also available to convert this pistol from one calibre to another.

Manufacturer

- the manufacturer's name is normally found marked on the firearm as "Pardini"
- Pardini Armi s.r.l. is located in Lido di Camaiore, Italy.

Action

- single action, recoil operated.

Serial Number

- serial number is marked on the left hand side of the receiver/frame above the trigger.

Shots

- detachable box magazine.

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
130063 - 1	40 S&W	13	127	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the maker's name is marked on the firearm as "PARDINI".

Model

- "MOD. PC40" is marked on the front right side of the receiver/frame.
- this semi-automatic pistol is made for defensive carry. It is functionally the same as the Pardini "GT" series with a more curved trigger. The difference in names is a result of Italian firearm laws where the "GT" is listed as a sporting pistol and the "PC" is classed as a defensive pistol.
- the Pardini "PC" model series utilizes the CZ-75-style reversed frame rails design, whereby the slide rides on rails inside of the frame.
- features include: recoil operated, semi-automatic, single action trigger; stainless finished receiver/fame and slide; flat sided slide with middle and rear grip serrations; slide is available with or without integral compensator; ambidextrous magazine release button; adjustable open sights; exposed hammer; adjustable single-action trigger mechanism; square front trigger guard; extended rear tang; ambidextrous thumb safety; checkered walnut grip plates.
- available with various styles of scope mounts.

Manufacturer

- the manufacturer's name is usually marked on the firearm as "Pardini".
- Pardini Armi s.r.l. is an Italian firearms manufacturer located in Lido di Camaiore, Italy.

Action

- recoil operated.

Serial Number

- serial number is marked on the left side of the receiver/frame and may have a letter prefix.
- "Cat. 8420" is marked on the right side of the receiver/frame. This number IS NOT the serial number. It is the reference number of the official Italian catalogue of firearms given to the "PC40".

Calibre

- calibre designation is marked on the barrel, viewable through the ejection port.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Notes

Make

- the maker's name is marked on the firearm as, "PARDINI".

Model

"MOD. PC9" is marked on the front right side of the receiver/frame.
- this semi-automatic pistol is made for defensive carry. It is functionally the same as the Pardini "GT9" with a more curved trigger. The difference in names is a result of Italian firearm laws where the "GT9" is listed as a sporting pistol and the "PC9" is classed as a defensive pistol.
- the Pardini "PC" model series utilizes the CZ-75-style reversed frame rails design, whereby the slide rides on rails inside of the frame.
- features include: recoil operated, semi-automatic, single action trigger; black finished receiver/fame and slide; flat sided slide with middle and rear grip serrations; slide is available with or without integral compensator; ambidextrous magazine release button; adjustable open sights; exposed hammer; adjustable single-action trigger mechanism; square front trigger guard; extended rear tang; ambidextrous thumb safety; checkered walnut grip plates.
- available with various styles of scope mounts.

Manufacturer

- the manufacturer's name is usually marked on the firearm as "Pardini".
- Pardini Armi s.r.l. is an Italian firearms manufacturer located in Lido di Camaiore, Italy.

Action

- recoil operated.

Serial Number

- serial number is marked on the receiver/frame.
- "Cat. 8419" is marked on the receiver/frame. This is the official Italian Catalogue of Firearms reference number and should not be confused with the serial number. Every "PC9" will have "Cat. 8419" marked on it.

Calibre

- calibre designation is marked on the barrel, viewable through the ejection port.

Shots

- detachable box magazine.

Other Markings

- "CAT. 8419" is marked on the receiver/frame. This mark is the official Italian Firearms Catalogue number that denotes that this semi-automatic pistol is made for defensive carry. It is functionally the same as the Pardini "GT9" with a more curved trigger. The difference in names is a result of Italian firearm laws where the "GT9" is listed as a sporting pistol and the "PC9" is classed as a defensive pistol. The "GT9" has catalogue number 10678.

Notes

Make

- make is marked on the slide above the trigger.

Model

- model marked on right side of dustcover (forward part of frame/receiver) as "MOD. P.C.", followed by the calibre (9, 40, 45) and an "S", denoting frame material.
- this is a single-action semi-automatic pistol made specifically for IPSC-style competition.
- features include: stainless-steel frame/receiver and slide; extended tang; ambidextrous thumb safety; adjustable single-action trigger mechanism; open adjustable sights; ambidextrous magazine release and a CZ-75-style reversed frame rails design, where the slide rides on rails INSIDE the frame.
- also available in both 5" and 6" versions, in both blued (PC) and stainless (PCS) versions, and in duo-tone versions.
- calibre conversion kits are also available.

Manufacturer

- the manufacturer's name is normally found marked on the firearm as "Pardini"
- Pardini Armi s.r.l. is located in Lido di Camaiore, Italy.

Action

- single action, recoil operated.

Serial Number

- serial number is usually marked on the left hand side of the receiver/frame above the trigger.

Shots

- detachable box magazine.

FRT Report

Firearm Reference Number (FRN): 147085
Make: Pardini
Model: PGP 75

Summary

Make:	Pardini
Model:	PGP 75
Manufacturer:	Pardini
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	ITALY
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
147085 - 1	22 LR	1	229	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is marked on the firearm as "Pardini".

Model

- the model may or may not be marked on the firearm; "PGP 75" stands for "Pistola Giampiero Pardini 75", or "Pistol of Giampiero Pardini 1975".
- this is Pardini's first single-shot free pistol, designed and marketed in 1975, and using a bolt-action-style mechanism, adapted to pistol use. In the locked/forward position, the bolt handle stands up vertically from the breech, but not extending up high enough to interfere with the shooter's line of sight. To open the breech, the bolt handle is rotated down and drawn to the rear, ejecting a fired case simultaneously.
- this pistol was later replaced by versions using a toggle-style bolt, operated by lifting a flap on the top of the breech.
- features include: open micrometer-adjustable sights with a larger-diameter barrel band (some versions may have barrel weights installed for stability while shooting); a "set" lever protruding from the stock forward of the grip (to allow the trigger to be as light as possible while shooting); bolt-action single-shot action; orthopaedic grips of varying styles and materials, usually with an adjustable heel-plate; and an adjustable trigger; blued finish.

Manufacturer

- the manufacturer's name is marked on the firearm as, "Pardini".
- Pardini is a manufacturer located in Lido di Camaiore, Italy.

Action

- turn-bolt operated, single shot pistol.

Serial Number

- serial number is marked on the receiver/frame.

Notes

Make

- Pardini is a manufacturer located in Lido di Camaiore, Italy.
- make will be found marked on the left side of the receiver/frame.

Model

- Introduced in 1991.
- "Mod SP Cal 22 LR" marked on right side of firearm.
- May also be known as the "Standard" or the "High Tech" Model.
- Feature include: ambidextrous charging handle; ergonomic grip; ambidextrous safety located on the receiver/frame above the trigger.
- When fitted with "small" grips, this pistol is known as the "Ladies Pistol".
- This is the mechanical trigger version of the SP1 Rapid Fire Pistol.
- A version of this pistol with an integral Weaver rail on the top of the frame, for NRA Pistol competition, is also sold as the "SP USA".

Manufacturer

- Pardini is a manufacturer located in Lido di Camaiore, Italy.
- manufacturer of competition and target firearms.
- manufacturer's name will be found on the left side of the receiver/frame.

Action

- blowback operated.
- the translated (from Italian) documentation calls this system of operation a "feeting mass locking system".

Serial Number

- the serial number will be found marked on the front underside of the receiver/frame.
- serial number rationalization unknown.
- serial number of a referenced example consisted of a letter prefix "B" and four or five numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine. - the translated (from Italian) documentation calls this magazine system "prismatic".
Other Markings	- right side of barrel marked, "Cat. 6936 Made in Italy".

130294 - 1	177 PELLET	1	455	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
130294 - 2	22 PELLET	1	455	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- Pardus will be marked on the barrel and/or receiver/frame.

Model

- model name may be marked on the firearm.
- features; break-barrel cocking, spring piston, single shot; one piece pistol grip hardwood stock; adjustable rear sight; black finish on barrel and receiver/frame.
- factory listed velocity for this firearm in 177 Pellet and 22 Pellet is 175-340 m/s.

Manufacturer

- Pardus will be marked on the barrel and/or receiver/frame.
- Pardus Silah San. Ltd. is a Turkish firearms manufacturer located in Istanbul, Turkey.

Action

- break barrel cocking, spring piston design.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules in both 177 Pellet and 22 Pellet.

Canadian Law Comments

- Discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.
- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada.

- If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

Notes

Make	- "PARDUS" was observed marked on the right side of the receiver/frame. - "PARDUS MADE IN TURKEY" was observed marked on the right side of the barrel near the receiver/frame.
Model	- "BA 12 MF" was observed marked on the right side of the receiver/frame. - "BA" stands for "Bolt Action"; resembles a semi-automatic design however this straight pull bolt action firearm's bolt must be manually cocked after each shot; "MF" stands for "Magazine Fed". - features include: rifle, bead or fiber optic front sight; round tapered smooth bore barrel with fiber optic front sight with or without flash suppressor and/or heat shield, or 8mm ventilated top rib; with or without interchangeable choke; knurled end cap on forend tube located underneath and parallel to the barrel; stationary checkered walnut forend, or synthetic forend with or without accessory rail; hammerless aluminium alloy receiver/frame with magazine well for box magazine between trigger guard and forend, and ejection port on right side; right side cocking handle assembly mounted on bolt on extension that positions handle below ejection port; horizontal slot in left side of receiver/frame for removable bolt handle; may have optic rail; may have adjustable ghost ring or other rear sight; round trigger guard with cross bolt safety behind trigger; single trigger mechanism; pistol grip walnut or synthetic shoulder stock, or synthetic pistol grip with adjustable synthetic rear stock; hard plastic buttplate or rubber recoil pad; finish options include: glossy or matte, black, silver, oiled walnut, and camouflage. - average weight is 3.1kg (6.8lbs).
Manufacturer	- "PARDUS" was observed marked on the right side of the receiver/frame. - "PARDUS MADE IN TURKEY" was observed marked on the right side of the barrel near the receiver/frame.
Action	- this straight pull bolt action firearm resembles but is not a semi-automatic shotgun because its bolt must be manually cocked after each shot.
Serial Number	- serial number consisting of a three digit prefix beginning with a letter, followed by a hyphen, then a seven digit suffix beginning with a letter, was observed marked on the right side of the receiver/frame above the trigger guard.
Shots	- detachable box magazine.

189402 - 3	12 GA X 3"	10	762	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "PARDUS" was observed marked on the right side of the receiver/frame.
- "PARDUS MADE IN TURKEY" was observed marked on the right side of the barrel near the receiver/frame.

Model

- "BRS 17" was observed marked on the right side of the receiver/frame.
- "BRS" stands for "Bolt Release Shotgun".
- This firearm closely resembles but is not a semi-automatic shotgun.
- Features include: round tapered smooth bore barrel with bead or fiber optic front sight, or 8mm ventilated top rib; with or without interchangeable choke; magazine tube with knurled end cap, or with magazine tube extension, located underneath and parallel to the barrel; checkered walnut or synthetic forend; bottom fed aluminium alloy receiver/frame with ejection port on right side; cocking handle located on bolt accessible through ejection port; action automatically locks open after every shot, or when manually cocked; rectangle bolt release button located on the upper rear of the receiver/frame (not be confused with round action reset button located below the ejection port; round flat bottom trigger guard; cross bolt safety behind trigger; single trigger mechanism; checkered semi-pistol grip walnut or synthetic rear stock and forearm; glossy or matte, black, silver, oiled walnut, and camouflage finish.
- Average weight is 3.2kg (7lbs).

Manufacturer

- "PARDUS" was observed marked on the right side of the receiver/frame.
- "PARDUS MADE IN TURKEY" was observed marked on the right side of the barrel near the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- Interrupted self-loading action featuring the bolt automatically locking open after every shot, or when the action is manually cocked. When the bolt release button that is located on the top rear of the receiver/frame is pressed down, the loading cycle is completed, the action is closed, and the firearm is ready to be fired.
Serial Number	- Serial number observed marked on the right side of the receiver/frame above the trigger guard. - Serial number consisting of a three digit prefix beginning with a letter, followed by a hyphen, then a seven digit suffix beginning with a letter.
Shots	- Tubular magazine fed.

Notes

Make

- "PARDUS" was observed marked on the right side of the receiver/frame.

Model

- "PS" was observed marked on the right side of the receiver/frame.
- features include: fiber optic front sight; round tapered smooth bore barrel with or without ventilated top rib and with or without interchangeable choke; bottom fed, side ejection, solid top receiver/frame; action release located at the front of the trigger guard and a cross bolt safety is located at the rear of the trigger guard; single trigger mechanism; satin or glossy blued or chromed or camouflage finish; wood or synthetic buttstock and forearm.
- may be equipped with a pistol grip only.
- average weight is 3 kg (6.6 lbs).

Manufacturer

- "PARDUS MADE IN TURKEY" was observed marked on the right side of the barrel.

Serial Number

- serial number of an observed example is marked on the side of the receiver/frame above the trigger.
- serial number observed consisted of two numbers (13), a dash (-), a letter (K) and five numbers. It is believed that the first two numbers represent the year of manufacture.

Calibre

- calibre designation may be marked on the firearm.

Shots

- tubular magazine fed.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- this firearm is normally Non-Restricted unless affected by the following conditions:

1) by combining a barrel from a licensed firearms manufacture that is less than 406mm (16.0") in length and a receiver/frame fitted with a pistol grip only, this firearm may be deemed a "handgun" and therefore "RESTRICTED" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (a) of the Criminal Code of Canada.
- "handgun" means a firearm that is designed, altered or intended to be aimed and fired by the action of one hand, whether or not it has been redesigned or subsequently altered to be aimed and fired by the action of both hands.

2) "a firearm that is designed or adapted to be fired when reduced to a length of less than 660 mm by folding, telescoping or otherwise" and therefore "Restricted" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (c) of the Criminal Code of Canada.

3) by combining a barrel that has been altered to less than 457mm (18.0") in length by a non-licensed firearms manufacturer (cottage industry, individual or gunsmith) regardless of whether the shotgun has a pistol grip or conventional stock, this firearm is "PROHIBITED" and subject to the definition of a "prohibited firearm" in Part III/Firearms and Other Weapons of Section 84 of the Criminal Code of Canada.
- "prohibited firearm" means a firearm that is adapted from a rifle or shotgun, whether by sawing, cutting or any other alteration, and that, as so adapted,
(i) is less than 660 mm in length, or
(ii) is 660mm or greater in length and has a barrel less than 457 mm in length.

Notes

Make

- make is marked on the firearm.

Model

- the model designation (grade) is marked on the firearm, most often with "A1S" (in a diamond) on the water-table.
- manufactured by Remington between 1934 and 1942 (production by Parker began in 1904, and was continued by Remington after 1934); approximately 80 A-1 Specials were manufactured in total.
- this is the nearly the highest grade of a side by side hammerless shotgun that was made under the Parker name, and they are characterized by extensive full-coverage engraving, deluxe walnut stock and forearm, and (often) precious-metal inlays or personalized markings.
- features include: "dished" or recessed hinge-pin heads; boxlock receiver/frame; full-coverage leaf, scroll, and/or game-scene engraving on the receiver/frame; "T"-shaped doll's-head extension; top lever; tang safety; single- or double triggers; and blued or colour-case-hardened finish.

Manufacturer

- the manufacturer is marked on the firearm.

Action

- side by side configuration.

Serial Number

- marked on the watertable (flat of the receiver/frame) and on the flats of any barrel set that were factory hand-fitted to that receiver/frame.
- the change in manufacture from Parker Brothers to Remington occurred within the serial number range of 236,000 and 237,000.
- on Remington made Parker shotguns production years are marked as follows:
C for 1934, D-1935, E-1936, F-1937, G-1938, H-1939, J-1940, K-1941, L-1942, MM-1943, NN-1944, PP-1945, RR-1946, SS-1947, TT-1948.
- production was labeled with month and year code, ie. XE is December 1936; the inclusion of the number ' 3 ' the code suggest a return to the factory for repair.

Barrel

- barrel lengths could be special ordered in any length between 24"/610mm to 34"/864mm.

Notes

Make

- "PARKER" observed marked on the underside of the receiver/frame

Model

- introduced in 2005-2006.
- model may or may not be marked on the firearm.
- "PARKER" is marked on the underside of the receiver/frame in metallic lettering.
- based on a side by side hammerless shotgun originally made by Parker between 1895 and 1934; then by Remington (as the "AAH") until 1942. Side by side exposed-hammer shotguns of the "AA" grade are known as "AA" guns.
- features include: single or twin bead front sight; plain round solid rib twin smoothbore barrels in a side-by-side configuration, engraved at the chambers; various choke options; walnut forend with fleur-de-lis checkering; colour-case-hardened or blued steel receiver/frame, usually engraved; selective automatic ejectors; engraved round trigger guard; double set silver-plated or gold-plated triggers; single selective trigger optional; top tang mounted break open lever and safety switch; fleur-de-lys checkered straight grip or capped pistol grip shoulder stock; blued or blued and case-hardened finish.

Manufacturer

- The name of the manufacturer may be marked on the firearm.
- Trademark owned by Remington Arms Company, Inc. since 1934.
- Made by Connecticut Shotgun Manufacturing (in collaboration with Remington).

Action

- side by side configuration.

Notes

Make

- make is marked on the firearm.

Model

- the model (grade) designation is marked on the firearm, usually with "AAH" on the water table and barrel lug (the suffix "E", meaning "ejector", is not normally found marked on the firearm).
- this is a specific grade of side by side hammerless shotgun, made by Parker between 1895 and 1934; after 1934, Remington continued manufacture of the "AAH" until 1942. Side by side exposed-hammer shotguns of the "AA" grade are properly known as "AA" guns.
- approximately 250 "AAH" shotguns were made by Parker; until the advent of the "A-1 Special", these were the highest grade of gun made by Parker.
- features include: "dished" or recessed hinge-pin heads; single or double triggers; checkered walnut stock and forearm; top lever; "T"-shaped doll's-head extension; ejectors (AAH guns with extractors are known as "AAH"s); colour-case-hardened or blued receiver/frame; blued barrels; and fully-engraved receiver/frame.

Manufacturer

- Remington manufactured Parker shotguns from 1934 to 1947.
- Parker Brothers was purchased by Remington in 1934.
- Remington continued manufacturing at the Parker Brothers, Meriden, Connecticut plant until 1938 when they moved the manufacturing to the Remington facility in Illion, New York.

Action

- side by side configuration.

Serial Number

- marked on the watertable (flat of the receiver/frame) and on the flats of any barrel set that were factory hand-fitted to that receiver/frame.
- the change in manufacture from Parker Brothers to Remington occurred within the serial number range of 236,000 and 237,000.
- on Remington made Parker shotguns production years are marked as follows:
C for 1934, D-1935, E-1936, F-1937, G-1938, H-1939, J-1940, K-1941, L-1942, MM-1943, NN-1944, PP-1945, RR-1946, SS-1947, TT-1948.
- production was labeled with month and year code, ie. XE is December 1936; the inclusion of the number ' 3 ' the code suggest a return to the factory for repair.

Barrel

- barrel lengths could be special ordered in any length between 24"/610mm to 34"/864mm.

Notes

Make

- make is marked on the firearm.

Model

- the model (grade) designation is marked on the firearm, usually with "AH" on the water table and barrel lug (the suffix "E", meaning "ejector", is not normally found marked on the firearm).
- this record ONLY applies to hammerless "A" grades, as exposed-hammer A-grades are known as "A" guns.
- this is a side by side hammerless boxlock shotgun, made by Remington between 1934 and 1942.
- features include: "dished" or recessed hinge-pin heads; side by side boxlock with concealed hammers; moderate-to-full-engraving (according to customer's preferences); checkered walnut stock and forearm; single or double triggers; "T"-shaped doll's-head extension; ejectors (AH-grade guns with extractors are properly known as "AH"s); and blued or colour-case-hardened finish.
- these shotguns were a slightly less ornate version of the AA series of guns, but differed only in the amount and style of finish and engraving.

Manufacturer

- Remington manufactured Parker shotguns from 1934 to 1947.
- Parker Brothers was purchased by Remington in 1934.
- Remington continued manufacturing at the Parker Brothers, Meriden, Connecticut plant until 1938 when they moved the manufacturing to the Remington facility in Illion, New York.

Action

- side by side configuration.

Serial Number

- marked on the watertable (flat of the receiver/frame) and on the flats of any barrel set that were factory hand-fitted to that receiver/frame.
- the change in manufacture from Parker Brothers to Remington occurred within the serial number range of 236,000 and 237,000.
- on Remington made Parker shotguns production years are marked as follows:
C for 1934, D-1935, E-1936, F-1937, G-1938, H-1939, J-1940, K-1941, L-1942, MM-1943, NN-1944, PP-1945, RR-1946, SS-1947, TT-1948.
- production was labeled with month and year code, ie. XE is December 1936; the inclusion of the number ' 3 ' the code suggest a return to the factory for repair.

Barrel

- barrel lengths could be special ordered in any length between 24"/610mm to 34"/864mm.

Notes

Make

- the make is marked on the firearm.

Model

- the model (grade) designation is marked on the firearm, usually with "BH" on the water table and barrel lug (the suffix "E", meaning "ejector", is not normally found marked on the firearm).
- this is a specific grade of side by side boxlock shotgun, made by Remington between 1934 and 1942; after 1934, Remington took over the Parker company and continued production of Parkers until 1942.
- the "B" grade was Parker's second highest grade, and approximately 1,034 "B" grade side by side hammerless shotguns were built; Remington only produced the ejector version ("BHE") of the B grade of the Parker side by side boxlock.
- features include: "dished" or recessed hinge-pin heads; single or double triggers; checkered walnut stock and forearm; top lever; "T"-shaped doll's-head extension; colour-case-hardened or blued receiver/frame; ejectors; blued barrels; moderate- to fully-engraved receiver; and fluid steel barrels.

Manufacturer

- Remington manufactured Parker shotguns from 1934 to 1947.
- Parker Brothers was purchased by Remington in 1934.
- Remington continued manufacturing at the Parker Brothers, Meriden, Connecticut plant until 1938 when they moved the manufacturing to the Remington facility in Illion, New York.
- the manufacturer is marked on the firearm.

Action

- side by side configuration.

Serial Number

- marked on the watertable (flat of the receiver/frame) and on the flats of any barrel set that were factory hand-fitted to that receiver/frame.
- the change in manufacture from Parker Brothers to Remington occurred within the serial number range of 236,000 and 237,000.
- on Remington made Parker shotguns production years are marked as follows:
C for 1934, D-1935, E-1936, F-1937, G-1938, H-1939, J-1940, K-1941, L-1942, MM-1943, NN-1944, PP-1945, RR-1946, SS-1947, TT-1948.
- production was labeled with month and year code, ie. XE is December 1936; the inclusion of the number ' 3 ' the code suggest a return to the factory for repair.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make

- make is marked on the firearm.

Model

- the model (grade) designation is marked on the firearm, usually with "CH" on the water table and barrel lug (the suffix "E", meaning "ejector", is not normally found marked on the firearm).
- this is a specific grade of side by side boxlock shotgun, made by Remington between 1934 and 1942; after 1934, Remington took over the Parker company and continued production of Parkers until 1942.
- the "B" grade was Parker's second highest grade, and approximately 1,034 "B" grade side by side hammerless shotguns were built; Remington only produced the ejector version ("BHE") of the B grade of the Parker side by side boxlock.
- features include: "dished" or recessed hinge-pin heads; single or double triggers; checkered walnut stock and forearm; top lever; "T"-shaped doll's-head extension; colour-case-hardened or blued receiver/frame; ejectors; blued barrels; moderate- to fully-engraved receiver; and fluid steel barrels.

Manufacturer

- Remington manufactured Parker shotguns from 1934 to 1947.
- Parker Brothers was purchased by Remington in 1934.
- Remington continued manufacturing at the Parker Brothers, Meriden, Connecticut plant until 1938 when they moved the manufacturing to the Remington facility in Illion, New York.

Action

- side by side configuration.

Serial Number

- marked on the watertable (flat of the receiver/frame) and on the flats of any barrel set that were factory hand-fitted to that receiver/frame.
- the change in manufacture from Parker Brothers to Remington occurred within the serial number range of 236,000 and 237,000.
- on Remington made Parker shotguns production years are marked as follows:
C for 1934, D-1935, E-1936, F-1937, G-1938, H-1939, J-1940, K-1941, L-1942, MM-1943, NN-1944, PP-1945, RR-1946, SS-1947, TT-1948.
- production was labeled with month and year code, ie. XE is December 1936; the inclusion of the number ' 3 ' the code suggest a return to the factory for repair.

Barrel

- barrel lengths could be special ordered in any length between 24"/610mm to 34"/864mm.

Notes

Make

- make is marked on the firearm.

Model

- the model (grade) designation may not be marked on the firearm; may only be marked as "3" or "D" on the water table (referring to Parker's system of grading).
- this is a specific grade of side by side boxlock shotgun, made by Remington between 1934 and 1942; after 1934, Remington took over the Parker company and continued production of Parkers until 1942.
- the "D" grade was Parker's fourth highest grade, and approximately 16,398 "D" grade side by side hammerless shotguns were built by Parker; "D"-grade guns are seen with either extractors (the "DH") or ejectors (the "DHE").
- features include: "dished" or recessed hinge-pin heads; single or double triggers; checkered walnut stock and forearm; top lever; colour-case-hardened or blued receiver/frame; ejectors; "T"-shaped doll's-head extension; blued barrels; light- to moderately-engraved receiver/frame; Damascus or fluid steel barrels (early production was entirely Damascus and Damascus barrels were available as a special-order option until the 1920s).

Manufacturer

- Remington manufactured Parker shotguns from 1934 to 1947.
- Parker Brothers was purchased by Remington in 1934.
- Remington continued manufacturing at the Parker Brothers, Meriden, Connecticut plant until 1938 when they moved the manufacturing to the Remington facility in Illion, New York.

Action

- side by side configuration.

Serial Number

- marked on the watertable (flat of the receiver/frame) and on the flats of any barrel set that were factory hand-fitted to that receiver/frame.
- the change in manufacture from Parker Brothers to Remington occurred within the serial number range of 236,000 and 237,000.
- on Remington made Parker shotguns production years are marked as follows:
C for 1934, D-1935, E-1936, F-1937, G-1938, H-1939, J-1940, K-1941, L-1942, MM-1943, NN-1944, PP-1945, RR-1946, SS-1947, TT-1948.
- production was labeled with month and year code, ie. XE is December 1936; the inclusion of the number ' 3 ' on the code suggests a return to the factory for repair.

Notes

Make

- make is marked on the firearm.

Model

- the model designation is marked on the water-table as "A".
- this is a specific grade/style of single-barrel boxlock hammerless shotgun, made for trap-shooting, manufactured by Parker Brothers between 1917 and 1934; after 1934, Remington (who purchased Parker), continued production of this shotgun until 1942.
- features include: checkered walnut straight or pistol-grip stock; ventilated rib on barrel; colour-case hardened receiver/frame; "dished" or recessed hinge-pin heads; single trigger; top-lever; no manual safety; and complete-coverage engraving on the receiver/frame.
- these guns were made in 5 grades: the SA-1 Special, the SAA, the SA, the SB, and the SC; the SA-1 Special was the highest grade, with the SC being the lowest.

Manufacturer

- Remington manufactured Parker shotguns from 1934 to 1947.
- Parker Brothers was purchased by Remington in 1934.
- Remington continued manufacturing at the Parker Brothers, Meriden, Connecticut plant until 1938 when they moved the manufacturing to the Remington facility in Illion, New York.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- "tip-down" single-shot.
Serial Number	- marked on the watertable (flat of the receiver/frame) and on the flats of any barrel set that were factory hand-fitted to that receiver/frame. - the change in manufacture from Parker Brothers to Remington occurred within the serial number range of 236,000 and 237,000. - on Remington made Parker shotguns production years are marked as follows: C for 1934, D-1935, E-1936, F-1937, G-1938, H-1939, J-1940, K-1941, L-1942, MM-1943, NN-1944, PP-1945, RR-1946, SS-1947, TT-1948. - production was labeled with month and year code, ie. XE is December 1936; the inclusion of the number ' 3 ' in the code suggests a return to the factory for repair.
Barrel	- barrel lengths could be special ordered in any length between 28"/711mm to 34"/864mm.

67279 - 6	12 GA X 2 3/4"	1	864	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is marked on the firearm.

Model

- the model designation is marked on the water-table as "B".
- this is a specific grade/style of single-barrel boxlock hammerless shotgun, made specifically for trap-shooting, manufactured by Parker Brothers between 1917 and 1934; after 1934, Remington (who purchased Parker), continued production of this shotgun until 1942.
- features include: checkered walnut straight or pistol-grip stock; ventilated rib on barrel; colour-case hardened receiver/frame; "dished" or recessed hinge-pin heads; single trigger; top-lever; no manual safety; and complete-coverage engraving on the receiver/frame.
- these guns were made in 5 grades: the SA-1 Special, the SAA, the SA, the SB, and the SC; the SA-1 Special was the highest grade, with the SC the lowest.

Manufacturer

- the manufacturer is marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- "tip-down" single-shot.
Serial Number	- marked on the watertable (flat of the receiver/frame) and on the flats of any barrel set that were factory hand-fitted to that receiver/frame. - the change in manufacture from Parker Brothers to Remington occurred within the serial number range of 236,000 and 237,000. - on Remington made Parker shotguns production years are marked as follows: C for 1934, D-1935, E-1936, F-1937, G-1938, H-1939, J-1940, K-1941, L-1942, MM-1943, NN-1944, PP-1945, RR-1946, SS-1947, TT-1948. - production was labeled with month and year code, ie. XE is December 1936; the inclusion of the number ' 3 ' in the code suggests a return to the factory for repair.
Barrel	- barrel lengths could be special ordered in any length between 28"/711mm to 34"/864mm.

Firearm Reference Number (FRN): 82234
Make: Parker
Model: Side By Side

Summary

Make:	Parker
Model:	Side By Side
Manufacturer:	Unknown Belgian
Level:	Non-Commercial Customization
Type:	Shotgun
Action:	Multi-Barrel
Country of Manufacturer:	BELGIUM
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
82234 - 1	12 GA X 2 3/4"	2	760	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "Parker" marked on side plate.
- Belgian proof markings on underside of barrel.

Model

- "Parker" marked on side plate.
- this mark is believed to be spurious. The use of the model name Parker is believed to be an attempt by the manufacturer to associate the firearm with original high quality British made Parker shotguns.
- this model is a side by side shotgun with external hammers.

Action

- side by side barrel configuration.

Serial Number

- numbered on water table.

Other Markings

- "laminated steel" - marked on barrel rib ahead of chamber.

Notes

Make

- the make is marked on the firearm as "Parker Bros" and/or "Parker" .
- Parker Brothers (first known as "Parker Company") was a well known manufacturer of side by side shotguns that began production shortly after the American Civil War. The company began production in Meriden, Connecticut. Parker Brothers was bought by Remington in 1934. In 1937 Remington moved production to Ilion, New York where they continued manufacture of the Parker line until 1947.

Model

- the model designation is usually marked on the left action flat and is derived from the letters "VH" stamped above the serial number in conjunction with the physical presence of automatic ejectors. In short, this is a Parker model VH with Ejectors.
- introduced circa 1906 and produced by Parker Brothers until mid-1934 when the firm was purchased by the Remington Arms Company of Illion, N.Y.
- usually marked "Vulcan Steel" along the top-rib.
- boxlock action, hammerless, top lever opening, side by side barrel configuration.
- features include: "dished" or recessed hinge-pin heads; single or double triggers; checkered walnut stock and forearm; colour-case-hardened or blued receiver/frame; blued barrels; automatic ejectors; minimally-engraved receiver/frame (borders only); and fluid steel barrels.
- may also be known as the 'Vulcan" due to the marking of "Vulcan Steel" on the top rib of this model.

Manufacturer

- the manufacturer is marked on the firearm.
- Remington manufactured Parker shotguns from 1934 to circa 1947.

Action

- side by side configuration.

Serial Number

- marked on the watertable (flat of the receiver/frame) and on the flats of any barrel set that were factory hand-fitted to that receiver/frame.
- the change in manufacture from Parker Brothers to Remington occurred within the serial number range of 236,000 and 237,000.
- on Remington made Parker shotguns production years are marked as follows:
C for 1934, D-1935, E-1936, F-1937, G-1938, H-1939, J-1940, K-1941, L-1942, MM-1943, NN-1944, PP-1945, RR-1946, SS-1947, TT-1948.
- production was labeled with month and year code, i.e. XE is December 1936; the inclusion of the number ' 3 ' in the code suggests a return to the factory for repair.

Barrel

- barrel lengths could be special ordered in any length between 24"/610mm to 34"/864mm.

Calibre

- as this model Parker was built over a long period of time it was offered with chamber lengths that were then the standard. In general the early examples were built with shorter chamber lengths, as ammunition evolved and became standardized throughout the industry Parker built shotguns with corresponding chamber lengths.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- the first letter in the model designation refers to the grade often found stamped on the flat of the receiver, H is for hammerless and E is for ejector. The grade refers only to the amount of engraving, quality of wood and intricacy of the checkering and is the first of three letters that make up the model.
- custom options include single or double triggers, stock and rib styles.
- Trojan models were not allowed options and were available only as offered.
- the model designation of Remington made Parkers (from the lowest, VHE to the highest A1 Special) are as follows:

A1 Special - top grade with most perfuse engraving, best checkering and walnut.
AAHE
AHE
BHE
CHE
DHE
GHE
VHE - lowest grade of this series.
Trojan - offered as a fixed model from the sales catalogue without options (double triggers and extractors only).

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "Parker Bros." is marked on the receiver/frame.
Model	- the model designation "A" (grade designation) is marked on the receiver flats; this designation only applies to exposed-hammer "A" grades, as "hammerless" A-grades are known as "AH" guns. - this is a side by side exposed-hammer sidelock shotgun, made by Parker Brothers between 1875 and circa 1920, when their production standardized on the hammerless (AH, BH, CH, etc.) grades. - these shotguns were made in both top-lever and bottom-lever (sometimes called "lifter guns") versions, and customers could order each according to their personal preferences. - features include: "dished" or recessed hinge-pin heads; moderate to full coverage engraving (according to customer's preferences); checkered walnut stock and forearm; single or double triggers; blued or colour-case-hardened finish and Damascus or fluid steel barrels (early production was entirely Damascus, and Damascus barrels were available as a special-order option until the end of production). - these shotguns were a slightly less ornate version of the AA series of guns, but differed only in the amount and style of finish and engraving.
Manufacturer	- the manufacturer is marked on the firearm.
Action	- side by side pattern.
Serial Number	- the serial number was marked on the flat of the receiver/frame, and on the lugs of any barrels that were hand-fitted to that receiver/frame.
Barrel	- as with other custom built firearms, the customer could order any barrel length they wanted. - Parkers have been seen in barrel lengths up to 40"/1016mm, but factory standards were from 26"/660mm to 34"/863mm.
Remarks	- Parker shotguns can be recognized by the fine workmanship, sculptured receivers, and recessed hinge-pins (except in the case of a few "Invincible" models; these didn't have the recessed hinge-pin, allowing more room for even more engraving.). Many of the earlier Parker's came with Damascus barrels. - These guns were available in a number of grades (signified by letters; "A-1 Special" through "V", and "Trojan") All of these grades may also be seen with "E" in the grade, signifying that this gun was produced with automatic ejectors, instead of extractors, or "H", signifying that this gun was produced as a hammerless model.) Parker's could be ordered in any gauge the customer desired; examples have been seen in 8, 10, 12, 14, 16, 20, 24, 28, and .410 gauge. The most common is 12 gauge. The customer could order any barrel length they wanted; Parker's have been seen in barrel lengths up to 40"/1016mm, but factory standards were from 26"/660mm to 32"/812mm.

Notes

Make	- "Parker Bros." is marked on the receiver/frame.
Model	- the model designation (grade) is marked on the firearm, most often with "A1S' (in a diamond) on the water-table. - manufactured between 1904 and 1934 (production by Remington continued until 1942); approximately 80 A-1 Specials were manufactured in total. - this is nearly the highest grade of a side by side hammerless shotgun that Parker made, and they are characterized by extensive full-coverage engraving, deluxe walnut stock and forearm, and (often) precious-metal inlays or personalized markings. - features include: "dished" or recessed hinge-pin heads; boxlock receiver/frame; full-coverage leaf, scroll, and/or game-scene engraving on the receiver/frame; "T"-shaped doll's-head extension; top lever; tang safety; single- or double triggers; and blued or colour-case-hardened finish.
Manufacturer	- the manufacturer is marked on the firearm.
Action	- side by side pattern.
Serial Number	- marked on the flat of the receiver/frame, and on any barrels that were hand-fitted to that receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel

- As with other custom-built firearms, the customer could order any barrel length they wanted; Parkers have been seen in barrel lengths up to 40"/1016mm, but factory standards were from 26"/660mm to 32"/812mm.

Calibre

- As Parkers were, for the most part, hand-built guns, they could be ordered in any gauge the customer desired; examples have been seen in 8, 10, 12, 14, 16, 20, 24, 28, and .410 gauge. The most common, if you can consider a Parker "common", is 12 gauge. The shell lengths that these firearms were chambered for aren't specified in the references, but most can be assumed to be 2 3/4" or less (though Parker did experiment with 12 GA x 3" shells during the 1930's, these didn't become a common item until after World War Two.)

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model (grade) designation may not be marked on the firearm; may only be marked as "7" on the water table (referring to Parker's system of grading).
- this is a specific grade of side by side sidelock exposed-hammer shotgun, made by Parker between 1895 and 1920; after 1920, Parker no longer manufactured exposed-hammer shotguns, though they carried their grading system over onto their hammerless shotguns. Side by side hammerless shotguns of the "AA" grade are properly known as "AAH" guns.
- approximately 5 "AA" shotguns were made by Parker; until the advent of the "A-1 Special", these were the highest grade of gun made by Parker.
- features include: "dished" or recessed hinge-pin heads; double triggers; exposed-hammers; checkered walnut stock and forearm; top lever; colour-case-hardened or blued receiver/frame; blued barrels; and fully-engraved sideplates and receiver/frame.

Manufacturer

- the manufacturer is marked on the firearm.

Action

- side by side pattern.

Serial Number

- marked on the flat of the receiver/frame, and on any barrels that were hand fitted to that receiver/frame.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model (grade) designation may not be marked on the firearm; may only be marked as "7" or "AA" on the water table (referring to Parker's system of grading).
- this is a specific grade of side by side hammerless shotgun, made by Parker between 1895 and 1934; after 1934, Remington continued manufacture of the "AAH" until 1942. Side by side exposed-hammer shotguns of the "AA" grade are properly known as "AA" guns.
- approximately 250 "AAH" shotguns were made by Parker; until the advent of the "A-1 Special", these were the highest grade of gun made by Parker.
- features include: "dished" or recessed hinge-pin heads; single or double triggers; checkered walnut stock and forearm; top lever; "T"-shaped doll's-head extension; extractors (AAH guns with ejectors are known as "AAHE"s); colour-case-hardened or blued receiver/frame; blued barrels; and fully-engraved receiver/frame.

Manufacturer

- the manufacturer is marked on the firearm.

Action

- side by side pattern.

Serial Number

- marked on the flat of the receiver/frame, and on any barrels that were hand fitted to that receiver/frame.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model (grade) designation may not be marked on the firearm; may only be marked as "7" or "AA" on the water table (referring to Parker's system of grading).
- this is a specific grade of side by side hammerless shotgun, made by Parker between 1895 and 1934; after 1934, Remington continued manufacture of the "AAH" until 1942. Side by side exposed-hammer shotguns of the "AA" grade are properly known as "AA" guns.
- approximately 250 "AAH" shotguns were made by Parker; until the advent of the "A-1 Special", these were the highest grade of gun made by Parker.
- features include: "dished" or recessed hinge-pin heads; single or double triggers; checkered walnut stock and forearm; top lever; "T"-shaped doll's-head extension; ejectors (AAH guns with extractors are known as "AAH"s); colour-case-hardened or blued receiver/frame; blued barrels; and fully-engraved receiver/frame.

Manufacturer

- the manufacturer is marked on the firearm.
- Parker Brothers was a well known manufacturer of American side by side shotguns that began production shortly after the American Civil War. The company began production in Meriden, Connecticut, but later moved to Ilion, New York, where it ceased production in 1947 (having been bought out by Remington in 1934.)

Action

- side by side pattern.

Serial Number

- marked on the watertable (flat of the receiver/frame) and on the flats of any barrel set that were factory hand-fitted to that receiver/frame.
- the change in manufacture from Parker Brothers to Remington occurred within the serial number range of 236,000 and 237,000.
- on Remington made Parker shotguns production years are marked as follows:
C for 1934, D-1935, E-1936, F-1937, G-1938, H-1939, J-1940, K-1941, L-1942, MM-1943, NN-1944, PP-1945, RR-1946, SS-1947, TT-1948.
- production was labeled with month and year code, ie. XE is December 1936; the inclusion of the number ' 3 ' the code suggest a return to the factory for repair.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the full model designation (grade designation) may not be marked on the firearm; when present, it is marked on the receiver/frame flats as "A" or "6"; this record ONLY applies to hammerless "A" grades, as exposed-hammer A-grades are known as "A" guns.
- this is a side by side hammerless boxlock shotgun, made by Parker Brothers between 1875 and 1934, when Parker was bought out by Remington; Remington continued production of the ejector version of the AH (the "AHE") until 1942.
- these shotguns were originally made in both top-lever and bottom-lever (sometimes called "lifter guns") versions, and customers could order each according to their personal preferences.
- features include: "dished" or recessed hinge-pin heads; side by side boxlock with concealed hammers; moderate-to-full-engraving (according to customer's preferences); checkered walnut stock and forearm; single or double triggers; extractors (AH guns with ejectors are properly known as "AHE"s); "T"-shaped doll's-head extension; blued or colour-case-hardened finish; and Damascus or fluid steel barrels (early production was entirely Damascus, and Damascus barrels were available as a special-order option until the 1920s).
- these shotguns were a slightly less ornate version of the AA series of guns, but differed only in the amount and style of finish and engraving.

Manufacturer

- the manufacturer is marked on the firearm.
- Parker Brothers was a well known manufacturer of American side by side shotguns that began production shortly after the American Civil War.
- the company began production in Meriden, Connecticut, but later moved to Ilion, New York, where it ceased production in 1947 (having been bought out by Remington in 1934.)

Action

- side by side pattern.

Serial Number

- marked on the flat of the receiver/frame, and on any barrels that were hand fitted to that receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- their shotguns can be recognized by the fine workmanship, sculptured receivers, and recessed hinge-pins. (Except in the case of a few "Invincible" models; these didn't have the recessed hinge-pin, allowing more room for even more engraving.) Many of the earlier Parkers came with Damascus barrels, which should not be fired with modern shotshells, because these twist-steel barrels can easily burst under pressure. These guns were available in a number of grades (signified by letters; A-1 Special through V, and "Trojan") All of these grades may also be seen with "E" in the grade, signifying that this gun was produced with automatic ejectors, instead of extractors, or "H", signifying that this gun was produced as a hammerless model.) Parkers could be ordered in any gauge the customer desired; examples have been seen in 8, 10, 12, 14, 16, 20, 24, 28, and .410 gauge. The most common is 12 gauge. The customer could order any barrel length they wanted; Parkers have been seen in barrel lengths up to 40"/1016mm, but factory standards were from 26"/660mm to 32"/812mm.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model (grade) designation may not be marked on the firearm; may only be marked as "5" on the water table (referring to Parker's system of grading).
- this is a specific grade of side by side sidelock exposed-hammer shotgun, made by Parker between 1875 and 1920; after 1920, Parker no longer manufactured exposed-hammer shotguns, though they carried their grading system over onto their hammerless shotguns. Side by side hammerless shotguns of the "B" grade are properly known as "BH" guns.
- the "B" grade was Parker's second highest grade, and approximately 134 B grade side by side sidehammer shotguns were built by Parker.
- these shotguns were made in both top-lever and bottom-lever (sometimes called "lifter guns") versions, and customers could order each according to their personal preferences.
- features include: "dished" or recessed hinge-pin heads; double triggers; exposed-hammers; checkered walnut stock and forearm; top lever; colour-case-hardened or blued receiver/frame; blued barrels; moderate- to fully-engraved sideplates and receiver/frame; and Damascus or fluid steel barrels (early production was entirely Damascus, and Damascus barrels were available as a special-order option until the end of production).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the manufacturer is marked on the firearm. - Parker Brothers was a well known manufacturer of American side by side shotguns that began production shortly after the American Civil War. The company began production in Meriden, Connecticut, but later moved to Ilion, New York, where it ceased production in 1947 (having been bought out by Remington in 1934.)
Action	- side by side pattern.
Serial Number	- marked on the flat of the receiver/frame, and on any barrels that were hand fitted to that receiver/frame. - research indicates that the last serial number produced in 1897 for all Parker Brothers models was number 87552.
Barrel	- as with other custom-built firearms, the customer could order any barrel length they wanted; Parkers have been seen in barrel lengths up to 40"/1016mm, but factory standards were from 26"/660mm to 32"/812mm.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model (grade) designation may not be marked on the firearm; may only be marked as "5" or "B" on the water table (referring to Parker's system of grading).
- this is a specific grade of side by side boxlock shotgun, made by Parker between 1875 and 1934; after 1934, Remington took over the Parker company and continued production of Parkers until 1942. Side by side sidehammer shotguns of the "B" grade are properly known as "B" guns.
- the "B" grade was Parker's second highest grade, and approximately 1,034 "B" grade side by side hammerless shotguns were built by Parker; "B"-grade guns are seen with either extractors (the "BH") or ejectors (the "BHE").
- features include: "dished" or recessed hinge-pin heads; single or double triggers; checkered walnut stock and forearm; top lever; colour-case-hardened or blued receiver/frame; extractors; "T"-shaped doll's-head extension; blued barrels; moderate- to fully-engraved receiver/frame; and Damascus or fluid steel barrels (early production was entirely Damascus, and Damascus barrels were available as a special-order option until the 1920s).

Manufacturer

- the manufacturer is marked on the firearm.
- Parker Brothers was a well known manufacturer of American side by side shotguns that began production shortly after the American Civil War. The company began production in Meriden, Connecticut, but later moved to Ilion, New York, where it ceased production in 1947 (having been bought out by Remington in 1934.)

Action

- side by side pattern.

Serial Number

- serial number was marked on the flat of the receiver/frame, and on any barrels that were hand fitted to that receiver/frame.
- research indicates that the last serial number produced in 1897 for all Parker Brothers models was number 87552.

Canadian Law Comments

- Some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model (grade) designation may not be marked on the firearm; may only be marked as "4" on the water table (referring to Parker's system of grading).
- this is a specific grade of side by side sidelock exposed-hammer shotgun, made by Parker between 1875 and 1920; after 1920, Parker no longer manufactured exposed-hammer shotguns, though they carried their grading system over onto their hammerless shotguns. Side by side hammerless shotguns of the "C" grade are properly known as "CH" guns.
- the "C" grade was Parker's third highest grade, and approximately 75 C grade side by side sidehammer shotguns were built by Parker.
- these shotguns were made in both top-lever and bottom-lever (sometimes called "lifter guns") versions, and customers could order each according to their personal preferences.
- features include: "dished" or recessed hinge-pin heads; double triggers; exposed-hammers; checkered walnut stock and forearm; colour-case-hardened or blued receiver/frame; blued barrels; light- to moderately-engraved sideplates and receiver/frame; and Damascus or fluid steel barrels (early production was entirely Damascus, and Damascus barrels were available as a special-order option until the end of production).

Manufacturer

- Parker Brothers was a well known manufacturer of American side by side shotguns that began production shortly after the American Civil War. The company began production in Meriden, Connecticut, but later moved to Ilion, New York, where it ceased production in 1947 (having been bought out by Remington in 1934.)
- the manufacturer is marked on the firearm.

Action

- side by side pattern.

Serial Number

- marked on the flat of the receiver/frame, and on any barrels that were hand-fitted to that receiver/frame.

Barrel

- as with other custom-built firearms, the customer could order any barrel length they wanted; Parkers have been seen in barrel lengths up to 40"/1016mm, but factory standards were from 26"/660mm to 32"/812mm.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model (grade) designation may not be marked on the firearm; may only be marked as "4" or "C" on the water table (referring to Parker's system of grading).
- this is a specific grade of side by side boxlock shotgun, made by Parker between 1875 and 1934; after 1934, Remington took over the Parker company and continued production of Parkers until 1942. Side by side sidehammer shotguns of the "C" grade are properly known as "C" guns.
- the "C" grade was Parker's third highest grade, and approximately 1,673 "C" grade side by side hammerless shotguns were built by Parker; "C"-grade guns are seen with either extractors (the "CH") or ejectors (the "CHE").
- features include: "dished" or recessed hinge-pin heads; single or double triggers; checkered walnut stock and forearm; top lever; colour-case-hardened or blued receiver/frame; extractors; "T"-shaped doll's-head extension; blued barrels; light- to moderately-engraved receiver/frame; and Damascus or fluid steel barrels (early production was entirely Damascus, and Damascus barrels were available as a special-order option until the 1920s).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the manufacturer is marked on the firearm.
Action	- side by side pattern.
Serial Number	- marked on the flat of the receiver/frame and on any barrels that were hand-fitted to that receiver/frame. - research indicates that the last serial number produced in 1897 for all Parker Borthers models was number 87552.
Barrel	- as with other custom-built firearms, the customer could order any barrel length they wanted; Parkers have been seen in barrel lengths up to 40"/1016mm, but factory standards were from 26"/660mm to 32"/812mm.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

120431 - 78	8 GA X 3 1/4"	2	914	Prohibited PFR, Part 1, para. 95	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model (grade) designation may not be marked on the firearm; may only be marked as "4" or "C" on the water table (referring to Parker's system of grading).
- this is a specific grade of side by side boxlock shotgun, made by Parker between 1875 and 1934; after 1934, Remington took over the Parker company and continued production of Parkers until 1942. Side by side sidehammer shotguns of the "C" grade are properly known as "C" guns.
- the "C" grade was Parker's third highest grade, and approximately 1,673 "C" grade side by side hammerless shotguns were built by Parker; "C"-grade guns are seen with either extractors (the "CH") or ejectors (the "CHE").
- features include: "dished" or recessed hinge-pin heads; single or double triggers; checkered walnut stock and forearm; top lever; colour-case-hardened or blued receiver/frame; ejectors; "T"-shaped doll's-head extension; blued barrels; light- to moderately-engraved receiver/frame; and Damascus or fluid steel barrels (early production was entirely Damascus, and Damascus barrels were available as a special-order option until the 1920s).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the manufacturer is marked on the firearm.
Action	- side by side pattern.
Serial Number	- numbered on the flat of the receiver/frame, and on any barrels that were hand-fitted to that receiver/frame. - research indicates that the last serial number produced in 1897 for all Parker Brothers models was number 87552.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model (grade) designation may not be marked on the firearm; may only be marked as "3" or "D" on the water table (referring to Parker's system of grading).
- this is a specific grade of side by side sidelock exposed-hammer shotgun, made by Parker between 1875 and 1920; after 1920, Parker no longer manufactured exposed-hammer shotguns, though they carried their grading system over onto their hammerless shotguns. Side by side hammerless shotguns of the "D" grade are properly known as "DH" guns.
- the "D" grade was Parker's fourth highest grade, and approximately 2,037 D grade side by side sidehammer shotguns were built by Parker.
- these shotguns were made in both top-lever and bottom-lever (sometimes called "lifter guns") versions, and customers could order each according to their personal preferences.
- features include: "dished" or recessed hinge-pin heads; double triggers; exposed-hammers; checkered walnut stock and forearm; colour-case-hardened or blued receiver/frame; blued barrels; light- to moderately-engraved sideplates and receiver/frame; and Damascus or fluid steel barrels (early production was entirely Damascus, and Damascus barrels were available as a special-order option until the end of production).

Manufacturer

- Parker Brothers was a well-known manufacturer of American side by side shotguns that began production shortly after the American Civil War. The company began production in Meriden, Connecticut, but later moved to Ilion, New York, where it ceased production in 1947 (having been bought out by Remington in 1934.)
- the manufacturer is marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- side by side pattern.
Serial Number	- marked on the flat of the receiver/frame, and on any barrels that were hand-fitted to that receiver/frame. - research indicates that the last serial number produced in 1897 for all Parker Brothers models was number 87552.
Barrel	- as with other custom-built firearms, the customer could order any barrel length they wanted; Parkers have been seen in barrel lengths up to 40"/1016mm, but factory standards were from 26"/660mm to 32"/812mm.
Calibre	- as Parkers were, for the most part, hand-built guns, they could be ordered in any gauge the customer desired; examples have been seen in 8, 10, 12, 14, 16, 20, 24, 28, and .410 gauge.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model (grade) designation may not be marked on the firearm; may only be marked as "3" or "D" on the water table (referring to Parker's system of grading).
- this is a specific grade of side by side boxlock shotgun, made by Parker between 1875 and 1934; after 1934, Remington took over the Parker company and continued production of Parkers until 1942. Side by side sidehammer shotguns of the "D" grade are properly known as "D" guns.
- the "D" grade was Parker's fourth highest grade, and approximately 16,398 "D" grade side by side hammerless shotguns were built by Parker; "D"-grade guns are seen with either extractors (the "DH") or ejectors (the "DHE").
- features include: "dished" or recessed hinge-pin heads; single or double triggers; checkered walnut stock and forearm; top lever; colour-case-hardened or blued receiver/frame; extractors; "T"-shaped doll's-head extension; blued barrels; light- to moderately-engraved receiver/frame and Damascus or fluid steel barrels (early production was entirely Damascus, and Damascus barrels were available as a special-order option until the 1920s).

Manufacturer

- the manufacturer is marked on the firearm.
- Parker Brothers was a well-known manufacturer of American side by side shotguns that began production shortly after the American Civil War. The company began production in Meriden, Connecticut, but later moved to Ilion, New York, where it ceased production in 1947 (having been bought out by Remington in 1934.)

Action

- side by side pattern.

Serial Number

- marked on the flat of the receiver/frame, and on any barrels that were hand-fitted to that receiver/frame.
- research indicates that the last serial number produced in 1897 for all Parker Brothers models was number 87552.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make	- "Parker Bros." is marked on the receiver/frame.
Model	- the model (grade) designation may not be marked on the firearm; may only be marked as "3" or "D" on the water table (referring to Parker's system of grading). - this is a specific grade of side by side boxlock shotgun, made by Parker between 1875 and 1934; after 1934, Remington took over the Parker company and continued production of Parkers until 1942. Side by side sidehammer shotguns of the "D" grade are properly known as "D" guns. - the "D" grade was Parker's fourth highest grade, and approximately 16,398 "D" grade side by side hammerless shotguns were built by Parker; "D"-grade guns are seen with either extractors (the "DH") or ejectors (the "DHE"). - features include: "dished" or recessed hinge-pin heads; single or double triggers; checkered walnut stock and forearm; top lever; colour-case-hardened or blued receiver/frame; ejectors; "T"-shaped doll's-head extension; blued barrels; light- to moderately-engraved receiver/frame and Damascus or fluid steel barrels (early production was entirely Damascus, and Damascus barrels were available as a special-order option until the 1920s).
Manufacturer	- the manufacturer is marked on the firearm.
Action	- side by side pattern.
Serial Number	- numbered on the flat of the receiver/frame, and on any barrels that were hand-fitted to that receiver/frame. - research indicates that the last serial number produced in 1897 for all Parker Brothers models was number 87552.
Canadian Law Comments	- Some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model (grade) designation may not be marked on the firearm; may only be marked as "2" or "E" on the water table (referring to Parker's system of grading).
- this is a specific style of side by side sidelock exposed-hammer shotgun, made by Parker between 1875 and 1907; after 1907, Parker amalgamated their "E", "F", "G", and "H" sidehammer shotguns into a generic "Grade 2" and Parker production of all exposed-hammer shotguns ceased by 1920. All Parker "E" guns are side by side sidehammer 10 gauges, with a pistol-grip stock. Side by side hammerless shotguns of the "E" grade are properly known as "EH" guns.
- these shotguns were made in both top-lever and bottom-lever (sometimes called "lifter guns") versions and customers could order each according to their preferences.
- features include: "dished" or recessed hinge-pin heads; double triggers; exposed-hammers; checkered walnut pistol-grip stock and forearm; colour-case-hardened or blued receiver/frame; blued barrels; lightly-engraved sideplates and receiver/frame and Damascus steel barrels.

Manufacturer

- the manufacturer is marked on the firearm.

Action

- side by side pattern.

Serial Number

- marked on the flat of the receiver/frame and on any barrels that were hand-fitted to that receiver/frame.

Barrel

- As with other custom-built firearms, the customer could order any barrel length they wanted; Parkers have been seen in barrel lengths up to 40"/1016mm, but factory standards were from 26"/660mm to 32"/813mm.

Calibre

- As Parkers were, for the most part, hand-built guns, they could be ordered in any gauge the customer desired; examples have been seen in 8, 10, 12, 14, 16, 20, 24, 28, and .410 gauge. The most common, if you can consider a Parker "common", is 12 gauge. The shell lengths that these firearms were chambered for are not specified in the references, but most can be assumed to be 2 3/4" or less (though Parker did experiment with 12 GA x 3" shells during the 1930's, these did not become a common item until after World War Two).

Make	- "Parker Bros." is marked on the receiver/frame.
Model	- the model (grade) designation may not be marked on the firearm; may only be marked as "2" or "F" on the water table (referring to Parker's system of grading). - this is a specific style of side by side sidelock exposed-hammer shotgun, made by Parker between 1875 and 1907; after 1907, Parker amalgamated their "E", "F", "G", and "H" sidehammer shotguns into a generic "Grade 2", and Parker production of all exposed-hammer shotguns ceased by 1920. All Parker "F" guns are side by side sidehammer 10 gauges, with a straight-grip stock. - these shotguns were made in both top-lever and bottom-lever (sometimes called "lifter guns") versions, and customers could order each according to their personal preferences. - features include: "dished" or recessed hinge-pin heads; double triggers; exposed-hammers; checkered walnut straight-grip stock and forearm; colour-case-hardened or blued receiver/frame; blued barrels; lightly-engraved sideplates and receiver/frame and Damascus steel barrels.
Manufacturer	- the manufacturer is marked on the firearm.
Action	- side by side pattern.
Serial Number	- marked on the flat of the receiver/frame and on any barrels that were hand-fitted to that receiver/frame.
Barrel	- as with other custom-built firearms, the customer could order any barrel length they wanted; Parkers have been seen in barrel lengths up to 40"/1016mm, but factory standards were from 26"/660mm to 32"/813mm.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model (grade) designation may not be marked on the firearm; may only be marked as "2" or "G" on the water table (referring to Parker's system of grading).
- this is a specific style/grade of side by side sidelock exposed-hammer shotgun, made by Parker between 1875 and 1920; after 1907, Parker amalgamated their "E", "F", "G", and "H" grade shotguns into a generic "Grade 2". Side by side hammerless shotguns of the "G" grade are properly known as "GH" guns.
- the "G" grade was one of Parker's mid-grade shotguns, and were the same fit and finish as the "E" grade, only in ALL gauges, not just 10 GA.
- these shotguns were made in both top-lever and bottom-lever (sometimes called "lifter guns") versions, and customers could order each according to their preferences.
- features include: "dished" or recessed hinge-pin heads; double triggers; exposed-hammers; checkered walnut stock and forearm; colour-case-hardened or blued receiver/frame; blued barrels; lightly-engraved sideplates and receiver/frame; Damascus steel barrels.

Manufacturer

- "Parker Bros." is marked on the receiver/frame.

Action

- side by side barrel configuration, hinged barrel design.

Serial Number

- serial number is marked on the watertable of the receiver/frame, and on any barrels that were hand-fitted to that receiver/frame.
- research indicates that the last serial number produced in 1897 for all Parker Brothers models was number 87552.

Barrel

- as with other custom-built firearms, the customer could order any barrel length they wanted; Parkers have been seen in barrel lengths up to 40"/1016mm, but factory standards were from 26"/660mm to 32"/813mm.

Calibre

- as Parkers were, for the most part, hand-built guns, they could be ordered in any gauge the customer desired; examples have been seen in 8, 10, 12, 14, 16, 20, 24, 28, and .410 gauge. The most common, if you can consider a Parker "common", is 12 gauge. The shell lengths that these firearms were chambered for are not specified in the references, but most can be assumed to be 2 3/4" or less (though Parker did experiment with 12 GA x 3" shells during the 1930's, these did not become a common item until after World War II).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments - some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model (grade) designation may not be marked on the firearm; may only be marked as "2" or "GH" on the water table (referring to Parker's system of grading).
- this is a specific grade of side by side boxlock shotgun, made by Parker between 1875 and 1934; after 1934, Remington took over the Parker company and continued production of Parkers until 1942. Side by side side-hammer shotguns of the "G" grade are properly known as "G" guns.
- features include: "dished" or recessed hinge-pin heads; extractors; single or double triggers; checkered walnut pistol-grip stock and forearm; "T"-shaped doll's-head extension; colour-case-hardened or blued receiver/frame; blued barrels; lightly-engraved receiver/frame; Damascus or fluid steel barrels (early production was entirely Damascus, and Damascus barrels were available as a special-order option until the 1920s).

Manufacturer

- the manufacturer is marked on the firearm.

Action

- side by side pattern.

Serial Number

- marked on the flat of the receiver/frame and on any barrels that were hand-fitted to that receiver/frame.
- research indicates that the last serial number produced in 1897 for all Parker models was number 87552.

Barrel

- As with other custom-built firearms, the customer could order any barrel length they wanted; Parkers have been seen in barrel lengths up to 40"/1016mm, but factory standards were from 26"/660mm to 32"/812mm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- As Parkers were, for the most part, hand-built guns, they could be ordered in any gauge the customer desired; examples have been seen in 8, 10, 12, 14, 16, 20, 24, 28, and .410 gauge. The most common, if you can consider a Parker "common", is 12 gauge. The shell lengths that these firearms were chambered for are not specified in the references, but most can be assumed to be 2 3/4" or less (though Parker did experiment with 12 GA x 3" shells during the 1930's, these did not become a common item until after World War Two)
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model (grade) designation may not be marked on the firearm; may only be marked as "2", "G", or "GH" on the water table (referring to Parker's system of grading).
- this is a specific grade of side by side, boxlock, hammerless shotgun, made by Parker between 1875 and 1934; after 1934, Remington took over the Parker company and continued production of Parkers until 1942. Side by side side-hammer shotguns of the "G" grade are properly known as "G" guns.
- features include: "dished" or recessed hinge-pin heads; ejectors; single or double triggers; checkered walnut pistol-grip stock and forearm; "T"-shaped doll's-head extension; colour-case-hardened or blued receiver/frame; blued barrels; lightly-engraved receiver/frame; and Damascus or fluid steel barrels (early production was entirely Damascus, and Damascus barrels were available as a special-order option until the 1920s).

Manufacturer

- the manufacturer is marked on the firearm.

Action

- side by side pattern.

Serial Number

- numbered on the flat of the receiver/frame and on any barrels that were hand-fitted to that receiver/frame.
- research indicates that the last serial number produced in 1897 for all Parker Brothers models was number 87552.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments - some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model (grade) designation may not be marked on the firearm; may only be marked as "2" or "H" on the water table (referring to Parker's system of grading).
- this is a specific grade of side by side sidelock exposed-hammer shotgun, made by Parker between 1875 and 1907; after 1907, Parker amalgamated their "E", "F", "G", and "H" grade shotguns into a generic "Grade 2".
- the "H" grade was one of Parker's lower-grade shotguns, and Parker production of all exposed-hammer side by sides ceased in 1920.
- these shotguns were made in both top-lever and bottom-lever (sometimes called "lifter guns") versions, and customers could order each according to their personal preferences.
- features include: "dished" or recessed hinge-pin heads; double triggers; exposed-hammers; checkered walnut stock and forearm; colour-case-hardened or blued receiver/frame; blued barrels; lightly-engraved sideplates and receiver/frame and Damascus steel barrels.

Manufacturer

- the manufacturer is marked on the firearm.

Action

- side by side pattern.

Serial Number

- serial number was marked on the flat of the receiver/frame and on any barrels that were hand-fitted to that receiver/frame.
- research indicates that the last serial number produced in 1897 for all Parker models was number 87552.

Barrel

- As with other custom-built firearms, the customer could order any barrel length they wanted; Parkers have been seen in barrel lengths up to 40"/1016mm, but factory standards were from 26"/660mm to 32"/812mm.

Calibre

- As Parkers were, for the most part, hand-built guns, they could be ordered in any gauge the customer desired; examples have been seen in 8, 10, 12, 14, 16, 20, 24, 28, and .410 gauge. The most common, if you can consider a Parker "common", is 12 gauge. The shell lengths that these firearms were chambered for aren't specified in the references, but most can be assumed to be 2 3/4" or less (though Parker did experiment with 12 GA x 3" shells during the 1930's, these didn't become a common item until after World War Two).

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make - "Parker Bros." is marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model (grade) designation may not be marked on the firearm; may only be marked as "1" (one) or "I" on the water table (referring to Parker's system of grading). - this is a specific grade/style of 10 GA side by side sidelock exposed-hammer shotgun with laminated steel barrels (an "improved" form of Damascus) and a pistol-grip stock, made by Parker between 1875 and 1907. - the "I" grade was one of Parker's lower-grade shotguns, with minimal engraving; when offered in a gauge OTHER than 10 GA, this grade/style was known as the "L" grade. - these shotguns were made in both top-lever and bottom-lever (sometimes called "lifter guns") versions, and customers could order each according to their personal preferences. - features include: "dished" or recessed hinge-pin heads; double triggers; exposed-hammers; checkered walnut pistol-grip stock and forearm; colour-case-hardened or blued receiver/frame; blued barrels; lightly-engraved sideplates and receiver/frame; and laminated steel barrels.
Manufacturer	- Parker Brothers was a well-known manufacturer of American side by side shotguns that began production shortly after the American Civil War. The company began production in Meriden, Connecticut, but later moved to Ilion, New York, where it ceased production in 1947 (having been bought out by Remington in 1934.) - the manufacturer is marked on the firearm.
Action	- side by side pattern.
Serial Number	- serial number is marked on the flat of the receiver/frame, and on any barrels that were hand-fitted to that receiver/frame.
Barrel	- As with other custom-built firearms, the customer could order any barrel length they wanted; Parkers have been seen in barrel lengths up to 40"/1016mm, but factory standards were from 26"/660mm to 32"/812mm.
Calibre	- As Parkers were, for the most part, hand-built guns, they could be ordered in any gauge the customer desired; examples have been seen in 8, 10, 12, 14, 16, 20, 24, 28, and .410 gauge. The most common, if you can consider a Parker "common", is 12 gauge. The shell lengths that these firearms were chambered for aren't specified in the references, but most can be assumed to be 2 3/4" or less (though Parker did experiment with 12 GA x 3" shells during the 1930's, these didn't become a common item until after World War Two).

- "Parker Bros." is marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model (grade) designation may not be marked on the firearm; may only be marked as "1" (one) or "K" on the water table (referring to Parker's system of grading). - this is a specific grade/style of 10 GA side by side sidelock exposed-hammer shotgun with laminated steel barrels (an "improved" form of Damascus) and a straight-grip stock, made by Parker between 1875 and 1907. - the "K" grade was one of Parker's lower-grade shotguns, with minimal engraving. - these shotguns were made in both top-lever and bottom-lever (sometimes called "lifter guns") versions, and customers could order each according to their personal preferences. - features include: "dished" or recessed hinge-pin heads; double triggers; exposed-hammers; checkered walnut straight-grip stock and forearm; colour-case-hardened or blued receiver/frame; blued barrels; lightly-engraved sideplates and receiver/frame and laminated steel barrels.
Manufacturer	- the manufacturer is marked on the firearm.
Action	- side by side pattern.
Serial Number	- The serial number is marked on the flat of the receiver/frame, and on any barrels that were hand-fitted to that receiver/frame.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model (grade) designation may not be marked on the firearm; may only be marked as "1" (one) or "L" on the water table (referring to Parker's system of grading).
- this is a specific grade/style of side by side sidelock exposed-hammer shotgun with laminated steel barrels (an "improved" form of Damascus) and a pistol-grip stock, made by Parker between 1875 and 1907.
- the "L" grade was one of Parker's lower-grade shotguns, with minimal engraving; when offered in 10 GA, this grade/style was known as the "I" grade, and when offered with a straight-grip stock it was known as the "M" grade.
- these shotguns were made in both top-lever and bottom-lever (sometimes called "lifter guns") versions, and customers could order each according to their personal preferences.
- features include: "dished" or recessed hinge-pin heads; double triggers; exposed-hammers; checkered walnut pistol-grip stock and forearm; colour-case-hardened or blued receiver/frame; blued barrels; lightly-engraved sideplates and receiver/frame and laminated steel barrels.

Manufacturer

- the manufacturer is marked on the firearm.

Action

- side by side pattern.

Serial Number

- serial number is marked on the flat of the receiver/frame, and on any barrels that were hand-fitted to that receiver/frame.
- research indicates that the last serial number produced in 1897 for all Parker models was number 87552.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel	- As with other custom-built firearms, the customer could order any barrel length they wanted; Parkers have been seen in barrel lengths up to 40"/1016mm, but factory standards were from 26"/660mm to 32"/812mm.
Calibre	- As Parkers were, for the most part, hand-built guns, they could be ordered in any gauge the customer desired; examples have been seen in 8, 10, 12, 14, 16, 20, 24, 28, and .410 gauge. The most common, if you can consider a Parker "common", is 12 gauge. The shell lengths that these firearms were chambered for aren't specified in the references, but most can be assumed to be 2 3/4" or less (though Parker did experiment with 12 GA x 3" shells during the 1930's, these didn't become a common item until after World War Two).
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model (grade) designation may not be marked on the firearm; may only be marked as "1" (one) or "M" on the water table (referring to Parker's system of grading).
- this is a specific grade/style of side by side sidelock exposed-hammer shotgun with laminated steel barrels (an "improved" form of Damascus) and a straight-grip stock, made by Parker between 1875 and 1907.
- the "M" grade was one of Parker's lower-grade shotguns, with minimal engraving; when offered in 10 GA, this grade/style was known as the "I" grade, and when offered with a pistol-grip stock it was known as the "L" grade.
- these shotguns were made in both top-lever and bottom-lever (sometimes called "lifter guns") versions, and customers could order each according to their personal preferences.
- features include: "dished" or recessed hinge-pin heads; double triggers; exposed-hammers; checkered walnut straight-grip stock and forearm; colour-case-hardened or blued receiver/frame; blued barrels; lightly-engraved sideplates and receiver/frame and laminated steel barrels.

Manufacturer

- Parker Brothers was a well-known manufacturer of American side by side shotguns that began production shortly after the American Civil War. The company began production in Meriden, Connecticut, but later moved to Ilion, New York, where it ceased production in 1947 (having been bought out by Remington in 1934.)
- the manufacturer is marked on the firearm.

Action

- side by side pattern.

Serial Number

- serial number was marked on the flat of the receiver/frame, and on any barrels that were hand fitted to that receiver/frame.
- research indicates that the last serial number produced in 1897 for all Parker models was number 87552.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel	- As with other custom-built firearms, the customer could order any barrel length they wanted; Parkers have been seen in barrel lengths up to 40"/1016mm, but factory standards were from 26"/660mm to 32"/812mm.

Notes

Make

- "PARKER BROS." was observed marked on both sides of the receiver/frame.
- "PARKER BROTHERS. MAKERS. MERIDEN. CONN TROJON STEEL" was observed marked on the rib between the barrels.
- "PARKER BROS.," over "REG. U.S. PAT. OFF." and "PAT'D. JAN. 18. AUG. 1887" over "PAT'D OCT. 25. 1910." over "PATD AUG. 15. 1905" and "OV" over the "serial number" was observed marked on the watertable of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "OV" inside a six sided box was observed marked on the watertable of the receiver/frame. - "OV" was observed marked on the barrel flats. - "TROJAN STEEL" was observed marked on the rib between the barrels. - "OV Trojan" is a standard-pattern side by side boxlock shotgun, built by Parker between 1912 and 1934. - "OV Trojan" was Parker's least-expensive side by side hammerless double barrel shotgun, meant to give Parker an "entry-level" shotgun to compete with other manufacturers' offerings. - "OV Trojan" carried the Parker name, but dispensed with much of the hand-fitting and cosmetic embellishment that was expected on the higher-grade Parkers. - features include: round side by side smoothbore barrels with a bead front sight; no "T"-shaped doll's-head extension (unlike most other hammerless Parkers); colour-case-hardened non-engraved front hinged receiver/frame with a top tang mounted break open lever and safety; "dished" or recessed hinge-pin heads; boxlock action; hammerless; extractors; double triggers (a very few OV Trojans were made with optional single trigger); checkered walnut forearm and pistol grip buttstock.
Manufacturer	- "PARKER BROS." was observed marked on both sides of the receiver/frame. - "PARKER BROTHERS. MAKERS. MERIDEN. CONN TROJON STEEL" was observed marked on the rib between the barrels. - "PARKER BROS.," over "REG. U.S. PAT. OFF." and "PAT'D. JAN. 18. AUG. 1887" over "PAT'D OCT. 25. 1910." over "PATD AUG. 15. 1905" and "OV" over the "serial number" was observed marked on the watertable of the receiver/frame.
Action	- side by side barrel configuration, hinged barrel design.
Serial Number	- serial number was observed marked on the watertable of the receiver/frame, and repeated on the barrel assembly, forearm metal work, and trigger guard tang. - observed serial numbers consisted of six numbers without a letter prefix or suffix.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model (grade) designation may not be marked on the firearm; may only be marked as "1" (one) or "P" on the water table (referring to Parker's system of grading).
- this is a specific grade of side by side sidelock exposed-hammer shotgun with a pistol-grip stock, made by Parker between 1882 and 1889; the hammerless version of this shotgun was known as the "PH".
- the "P" grade was one of Parker's lower-grade shotguns.
- these shotguns were made in both top-lever and bottom-lever (sometimes called "lifter guns") versions, and customers could order each according to their personal preferences.
- features include: "dished" or recessed hinge-pin heads; double triggers; exposed-hammers; checkered walnut pistol-grip stock and forearm; colour-case-hardened or blued receiver/frame; blued barrels; minimally-engraved sideplates and receiver/frame (borders and screw-heads only); and Damascus steel barrels.

Manufacturer

- Parker Brothers was a well known manufacturer of American side by side shotguns that began production shortly after the American Civil War. The company began production in Meriden, Connecticut, but later moved to Ilion, New York, where it ceased production in 1947 (having been bought out by Remington in 1934.)
- the manufacturer is marked on the firearm.

Action

- side by side pattern.

Serial Number

- serial number is marked on the flat of the receiver/frame and on any barrels that were hand fitted to that receiver/frame.
- research indicates that the last serial number produced in 1897 for all Parker Brothers models was number 87552.

Barrel

- as with other custom-built firearms, the customer could order any barrel length they wanted; Parkers have been seen in barrel lengths up to 40"/1016mm, but factory standards were from 26"/660mm to 32"/812mm.

Calibre

- Parkers were, for the most part, hand-built guns, and as such they could be ordered in any gauge the customer desired; examples have been seen in 8, 10, 12, 14, 16, 20, 24, 28, and .410 gauge. The most common, if you can consider a Parker "common", is 12 gauge.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model (grade) designation may not be marked on the firearm; may be marked as "1" (one), "P", or "PH" on the water table (referring to Parker's system of grading).
- this is a specific grade of side by side boxlock hammerless shotgun, made by Parker between 1889 and 1927; the exposed side-hammer version of this shotgun is known as the "P".
- the "P" grade was one of Parker's lower-grade shotguns.
- features include: "dished" or recessed hinge-pin heads; single- or double triggers; checkered walnut stock and forearm; colour-case-hardened or blued receiver/frame; blued barrels; minimally-engraved receiver/frame(borders and screw-heads); Damascus or fluid steel barrels (early production was entirely Damascus and Damascus was a factory option until the 1920s).

Manufacturer

- the manufacturer is marked on the firearm.

Action

- side by side pattern.

Serial Number

- marked on the flat of the receiver/frame and on any barrels that were hand fitted to that receiver/frame.
- research indicates that the last serial number produced in 1897 for all Parker models was number 87552.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel	- as with other custom-built firearms, the customer could order any barrel length; Parkers have been seen in barrel lengths up to 40"/1016mm, but factory standards were from 26"/660mm to 32"/812mm.
Calibre	- As Parkers were, for the most part, hand-built guns, they could be ordered in any gauge the customer desired; examples have been seen in 8, 10, 12, 14, 16, 20, 24, 28, and .410 gauge. The most common, if you can consider a Parker "common", is 12 gauge. The shell lengths that these firearms were chambered for are notspecified in the references, but most can be assumed to be 2 3/4" or less (though Parker did experiment with 12 GA x 3" shells during the 1930's, these did not become a common item until after World War Two).
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model designation may not be marked on the firearm; may only be marked "9" (Parker's number grade) on the water table.
- this is a side by side boxlock hammerless shotgun made by Parker Brothers from 1926 until 1933, as an example of their idea of the finest shotgun possible; only very limited numbers of these shotguns were made, with some sources suggesting that as few as 3 were actually produced.
- features include: hammerless side by side boxlock; complete coverage scroll engraving on a colour-case-hardened receiver/frame; side clips; single- or double triggers; ejectors; blued barrels; deluxe checkered walnut stock and forearm; and gold-inlaid game animals, serial numbers, and/or owner's initials.

Manufacturer

- the manufacturer is marked on the firearm.

Action

- side by side pattern.

Serial Number

- marked on the flat of the receiver/frame and on any barrels that were hand-fitted to that receiver/frame.
- referenced sample consisted of 6 numbers.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model (grade) designation may not be marked on the firearm; may only be marked as "1" (one) or "Q" on the water table (referring to Parker's system of grading).
- this is a specific grade of side by side sidelock exposed-hammer shotgun with a straight-grip stock, made by Parker between 1882 and 1889; the hammerless version of this shotgun was known as the "PH".
- the "Q" grade was one of Parker's lower-grade shotguns.
- these shotguns were made in both top-lever and bottom-lever (sometimes called "lifter guns") versions, and customers could order each according to their personal preferences.
- features include: "dished" or recessed hinge-pin heads; double triggers; exposed-hammers; checkered walnut straight-grip stock and forearm; colour-case-hardened or blued receiver/frame; blued barrels; minimally-engraved sideplates and receiver/frame (borders and screw-heads only) and Damascus steel barrels.

Manufacturer

- the manufacturer is marked on the firearm.

Action

- side by side pattern.

Serial Number

- numbered on the flat of the receiver/frame, and on any barrels that were hand fitted to that receiver/frame.
- research indicates that the last serial number produced in 1897 for all Parker models was number 87552.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model designation is marked on the water-table as "B".
- this is a specific grade/style of single-barrel boxlock hammerless shotgun, made specifically for trap-shooting, manufactured by Parker Brothers between 1917 and 1934; after 1934, Remington (who purchased Parker), continued production of this shotgun until 1942.
- features include: checkered walnut straight or pistol-grip stock; ventilated rib on barrel; colour-case hardened receiver/frame; "dished" or recessed hinge-pin heads; single trigger; top-lever; no manual safety; and complete-coverage engraving on the receiver/frame.
- these firearms were made in 5 grades: the SA-1 Special, the SAA, the SA, the SB, and the SC; the SA-1 Special was the highest grade, with the SC the lowest.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- manufacturer's designation is marked on the barrel.
Action	- "tip-down" single-shot.
Serial Number	- was marked on the flat of the receiver/frame and on any barrels that were hand-fitted to that receiver/frame.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model designation is marked on the water-table as "C".
- this is a specific grade/style of single-barrel boxlock hammerless shotgun, made specifically for trap-shooting, manufactured by Parker Brothers between 1917 and 1934; after 1934, Remington (who purchased Parker), continued production of this shotgun until 1942.
- features include: checkered walnut straight or pistol-grip stock; ventilated rib on barrel; colour-case hardened receiver/frame; "dished" or recessed hinge-pin heads; single trigger; top-lever; no manual safety; moderate engraving on the receiver/frame.
- these firearms were made in 5 grades: the SA-1 Special, the SAA, the SA, the SB, and the SC; the SA-1 Special was the highest grade, with the SC the lowest.

Manufacturer

- Parker Brothers was a well-known manufacturer of American side by side shotguns that began production shortly after the American Civil War. The company began production in Meriden, Connecticut, but later moved to Ilion, New York, where it ceased production in 1947 (having been bought out by Remington in 1934.)
- the manufacturer is marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- "tip-down" single-shot.
Serial Number	- serial number was marked on the flat of the receiver/frame and on any barrels that were hand fitted to that receiver/frame.
Barrel	- as with other custom-built firearms, the customer could order any barrel length they wanted; Parkers have been seen in barrel lengths up to 40"/1016mm, but factory standards were from 26"/660mm to 32"/812mm.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- this is a generic record for those Parker shotguns that cannot be accurately identified as to model/grade/quality designation.
- Parker shotguns were made in several grades of fit and finish, with those grades corresponding to a series of letter and/or number designators marked on the water table or barrel flats:
PP Superfine/Invincible: Grade 9
A-1 Special: Grade 8
AA: Grade 7
A: Grade 6
B: Grade 5
C: Grade 4
D: Grade 3
E through H: Grade 2
I through Q: Grade 1
R through VH: Grade 0
- in most cases, the letter grade (ie. "AA", "D", etc.) and/or the number grade ("7", "3", etc.) will be marked on the water table above or below the serial number. Additionally, Parker used a series of suffix letters to denote whether or not a particular firearm was hammerless (an "H" suffix), or was fitted with automatic ejectors (an "E" suffix). Therefore, a side by side hammerless double with ejectors, and "7" marked on the water table can be said to be a "AAHE".
- Parkers have been made in both top-lever and bottom-lever (also called "lifter guns") versions, and in side-hammer and hammerless variations; in some cases, Parker used specific grade letters only for specific gauges, or for specific stock styles.
- features include: checkered walnut stock and forearm; colour-case-hardened receiver/frame; blued Damascus or fluid steel barrels; "dished" or recessed hinge-pin heads; and most hammerless Parkers have a "T"-shaped doll's-head barrel extension to latch into the top of the receiver/frame.

Manufacturer

- the manufacturer's designation is marked on the firearm.

Action

- side by side pattern.

Serial Number

- The serial number is marked on the water table of the receiver/frame and on the barrel lug of any barrel that was fitted to that receiver/frame.

Notes

Make	- "Parker Bros." is marked on the receiver/frame.
Model	- the model (grade) designation may not be marked on the firearm; may only be marked as "0" (zero) or "T" on the water table (referring to Parker's system of grading). - this is a specific grade of side by side sidelock exposed-hammer shotgun with a pistol-grip stock, made by Parker between 1882 and 1903; this same shotgun when offered with a straight-grip stock, was known as the "U". - the "T" grade was one of Parker's lower-grade shotguns. - these shotguns were made in both top-lever and bottom-lever (sometimes called "lifter guns") versions, and customers could order each according to their personal preferences. - features include: "dished" or recessed hinge-pin heads; double triggers; exposed-hammers; checkered walnut pistol-grip stock and forearm; colour-case-hardened or blued receiver/frame; blued barrels; Damascus steel barrels.
Manufacturer	- the manufacturer is marked on the firearm.
Action	- side by side pattern.
Serial Number	- marked on the flat of the receiver/frame and on any barrels that were hand fitted to that receiver/frame. - research indicates that the last serial number produced in 1897 for all Parker models was number 87552.
Barrel	- as with other custom-built firearms, the customer could order any barrel length they wanted; Parkers have been seen in barrel lengths up to 40"/1016mm, but factory standards were from 26"/660mm to 32"/812mm.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model (grade) designation may not be marked on the firearm; may only be marked as "0" (zero) or "U" on the water table (referring to Parker's system of grading).
- this is a specific grade of side by side sidelock exposed-hammer shotgun with a straight-grip stock, made by Parker between 1882 and 1903; this same shotgun when offered with a pistol-grip stock, was known as the "T".
- the "U" grade was one of Parker's lower-grade shotguns.
- these shotguns were made in both top-lever and bottom-lever (sometimes called "lifter guns") versions, and customers could order each according to their personal preferences.
- features include: "dished" or recessed hinge-pin heads; double triggers; exposed-hammers; checkered walnut pistol-grip stock and forearm; colour-case-hardened or blued receiver/frame; blued barrels; Damascus steel barrels.

Action

- side by side pattern.

Serial Number

- marked on the flat of the receiver/frame and on any barrels that were hand fitted to that receiver/frame.
- research indicates that the last serial number produced in 1897 for all Parker models was number 87552.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make
- "PARKER BROS." was observed marked on both sides of the receiver/frame.
- "PARKER BROS. MAKERS. MERIDEN, CT. U.S.A. VULCA. STEEL" was observed marked on the rib between the barrels.

Model
- "V" was observed marked on the watertable of the receiver/frame.
- features include: round side by side smoothbore barrels with a concave rib and bead front sight; front hinged receiver/frame with a top tang mounted break open action release lever and safety; boxlock action; hammerless; double triggers; checkered wood forearm and a semi-pistol grip buttstock.

Manufacturer
- "PARKER BROS." was observed marked on both sides of the receiver/frame.
- "PARKER BROS. MAKERS. MERIDEN, CT. U.S.A. VULCA. STEEL" was observed marked on the rib between the barrels.

Action
- side by side barrel configuration, hinged barrel design.

Serial Number
- serial number was observed marked on the watertable of the receiver/frame and repeated on the barrel assembly; forearm and trigger guard tang.
- serial number observed consisted of six numbers without a letter prefix or suffix.

Notes

Make - "Parker Bros." is marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this was the "Bread & Butter" offering in the Parker shotgun line, with only mildly engraved receivers; these firearms are also occasionally called "Vulcan" Parkers, after the newer steel barrels used in them.
- the model (grade) designation may not be marked on the firearm; usually marked "Vulcan Steel" along the top-rib, and may be marked as "0" (zero), "V", or "VH" on the water table (referring to Parker's system of grading).
- this is a specific grade of side by side, boxlock, hammerless shotgun, made by Parker between 1899 and 1934; after 1934, Remington took over Parker Brothers and continued production of some Parker shotguns until 1942.
- features include: boxlock action; solid or ventilated rib between the barrels; "dished" or recessed hinge-pin heads; checkered walnut stock and forearm; single selective trigger or double triggers; extractors (when fitted with automatic ejectors this model is known as the model VHE); top tang mounted, sliding-type safety; colour-case-hardened or blued receiver/frame; "Vulcan Steel" barrels (Damascus was used on some of the very early examples) blued finish; line engraving on the borders of the receiver/frame; various stock configurations.
- may also be known as the "Vulcan" due to the marking of "Vulcan Steel" on the top rib of this model.

Manufacturer

- "Parker Bros." is marked on the receiver/frame.
- "Parker Brothers" or "Parker Bros." may be marked on the barrel rib.

Action

- side by side pattern.

Serial Number

- serial number was marked on the flat of the receiver/frame, and on any barrels that were hand fitted to that receiver/frame.

Calibre

- as this model Parker was built over a long period of time it was offered with chamber lengths that were then the standard. In general the early examples were built with shorter chamber lengths, as ammunition evolved and became standardized throughout the industry Parker built shotguns with corresponding chamber lengths.

Notes

Make

- "Parker Bros." is marked on the receiver/frame.

Model

- the model (grade) designation may not be marked on the firearm; usually marked "Vulcan Steel" along the top-rib, and may be marked as "0" (zero), "V", or "VH" on the water table (referring to Parker's system of grading).
- this is a specific grade of side by side boxlock hammerless shotgun, made by Parker between 1899 and 1934; after 1934, Remington took over Parker Brothers and continued production of some Parker shotguns until 1942.
- the "V" grade was one of Parker's lower-grade shotguns.
- features include: "dished" or recessed hinge-pin heads; automatic ejectors (when fitted with extractors only this model is known as the "VH"): double triggers; checkered walnut stock and forearm; colour-case-hardened or blued receiver/frame; blued barrels; ejectors; minimally-engraved receiver/frame (borders only); and Damascus or fluid steel barrels (Damascus was used on some of the very early examples).

Manufacturer

- "Parker Bros." is marked on the receiver/frame.

Action

- side by side configuration.

Serial Number

- serial number is marked on the left action flat of the receiver/frame and will consist of six numbers without prefix or suffix.

Other Markings

- known example also marked on the right action flat of the receiver/frame with: "Pat. Jan.18, Aug 16, 1887" over "Oct. 25, 1910" over "Aug. 15, 1905".

Notes

Make

- make is marked on the barrel.
- Parker Reproductions is a division of Reagent Chemical & Research Incorporated of Webb City, MO.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- manufactured from 1988-1989. - model designation is marked on the underside of the receiver/frame. - this is a high quality modern reproduction of the Parker Brothers "A-1 Special" shotgun. - features include: factory applied or custom engraving, gold initial plate on straight checkered presentation grade French walnut stock, or rosewood and gold pistol grip cap on checkered pistol grip stock, single or double trigger, automatic safety, selective ejectors, skeleton steel butt plate. - may have a beavertail forend.
Manufacturer	- manufacturer's name does not appear on the firearm. - "Made in Japan" may be marked on the barrel rib. - Parker Reproductions contracted with Winchester to build these firearms. - In 1981 Winchester Repeating Arms sold its firearms division to U S Repeating Arms Company who continues to build Winchester firearms under license. Winchester firearms of this era were produced in Japan at the Olin-Kodensha facility as well as in the United States.
Action	- boxlock, side by side configuration.
Serial Number	- serial number is marked on the receiver/frame, it may also be repeated on other components of the firearm.
Calibre	- the 16 GA X 2 3/4" barrels are fitted on a 20 Gauge receiver/frame.
Importer	- In 1984 Reagent Chemical & Research Inc (Parker Reproduction Division), located in Middlesex, NJ, contracted Winchester to manufacture these firearms.
Other Markings	- these firearms will normally be marked "Parker Reproductions by WINCHESTER" and "Made in Japan".

119316 - 1	308 WIN	5	700	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Alfred J. Parker Ltd.", "AJ Parker", or "AJP" in a stylized logo may be marked on the receiver/frame and/or barrel.

Model

- the model designation is not marked on the firearm.
- this rifle is manufactured using Enfield Pattern 1914 or Model of 1917 receiver/frames fitted to a target style stock and with a target grade barrel.
- other features include adjustable target sights and sling swivel mounts.
- in the conversion process the rear sight "ears" so prominent on the P14/17 series of rifles may be removed to facilitate the side receiver/frame mounting of target sights.

Manufacturer

- "Alfred J. Parker Ltd.", "AJ Parker", or "AJP" in a stylized logo may be marked on the receiver/frame and/or barrel.
- Alfred J. Parker was located in Birmingham, England from 1925 to 2000.
- Alred J. Parker was located at 38a Cecil Street from 1925 to 1926, 74 Slaney Street from 1927 to 1929, 2 Regent Street from 1930 to 1940, The Old Schools, Bath Street from 1941 to 1962, and 348 Moseley Road from 1964 to 2000.
- Alfred J. Parker was renamed Alfred J. Parker Limited in 1963.
- Alfred J. Parker specialized in sporting gun conversions, target rifle manufacture and conversion, and the manufacture of target shooting accessories.

Action

- manual turnbolt, mauser system.

Serial Number

- the serial number is located on the receiver/frame in the chamber area.

Barrel

- the barrels fitted to these rifles were available to customer specification from several manufacturers and may therefore be found in several different lengths and contours.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- the calibre designation is normally marked on the barrel.
Shots	- internal box magazine.

Manufacturer

- "W. PARKER" is marked on the firearm.
- "W. PARKER" stands for "William Parker" gunmaker from 1793 to 1841.
- "William Parker" was the successor to "Field & Parker" of 233 High Holborn, London, England circa 1793.
- "William Parker" business was succeeded by "Parker, Field & Sons".
- "Parker, Field & Sons" and "Parker, Field & Company" was a firearms manufactured located in London, England from circa 1841 to 1886.
- "Parker, Field & Sons" and "Parker, Field & Company" was founded by William Parker.
- "Parker, Field & Sons" was succeeded by "Parker, Field & Company".
- "William Parker", "Parker & Company", "Parker, Field & Sons" and "Parker, Field & Company" supplied firearms to the Hudson Bay Company between 1836 and 1884.

Action

- muzzle-loaded flintlock.

Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
180662 - 1	36 PERCUSSION	1	28	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "W. PARKER" is marked on the receiver/frame.
- "W. PARKER" was located in the district of Holborn, London England.
- "W. PARKER" was a gunmaker from 1793 to 1841.

Model

- model designation is not marked on the firearm.
- model designation is derived from the method by which this pistol is loaded; loading was accomplished by unscrewing the barrel.
- this is a single shot pistol with a removable barrel and an exposed hammer, either centrally located on the receiver/frame behind the chamber, or located on a sideplate.
- this handgun is intended to be loaded from the breech end of the barrel and as such, may be either originally supplied with a wrench, or have a permanently-mounted folding handle on the barrel, to unscrew the barrel from the receiver/frame in order that a lead ball and loose powder could be inserted into the chamber end of the barrel and then the barrel screwed back onto the receiver/frame.
- features may include: round screw on barrel with a small underlug for a wrench or a folding handle; boxlock or sidelock action; external hammer; folding trigger; sliding-type safety device on the top of the rear tang which engages a notch in the rear of the cock; curved, round, checkered with rounded bottom grip which usually has metal cap; engraved metal parts; metal in the white finish.

Manufacturer

- "W. PARKER" is marked on the firearm.
- "W. PARKER" stands for "William Parker" gunmaker from 1793 to 1841.
- "William Parker" was the successor to "Field & Parker" of 233 High Holborn, London, England circa 1793.
- "William Parker" business was succeeded by "Parker, Field & Sons".
- "Parker, Field & Sons" and "Parker, Field & Company" was a firearms manufactured located in London, England from circa 1841 to 1886.
- "Parker, Field & Sons" and "Parker, Field & Company" was founded by William Parker.
- "Parker, Field & Sons" was succeeded by "Parker, Field & Company".
- "William Parker", "Parker & Company", "Parker, Field & Sons" and "Parker, Field & Company" supplied firearms to the Hudson Bay Company between 1836 and 1884.

Action

- the barrel unscrews in front of the chamber, so it can be loaded with a ball that fits the barrel more tightly than is possible with a muzzle loader.
- the turnoff barrel may be rifled.

195582 - 1	38 FLINTLOCK	2	76	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "W. PARKER" is marked on the receiver/frame.
- "W. PARKER" was located in the district of Holborn, London England.
- "W. PARKER" was a gunmaker from 1793 to 1841.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is an unusual form of repeating flintlock pistol, using a "tap" (a rotating cross-bolt with holes bored through it) to allow the sparks from the flint going into the pan to fire either one barrel or another, or both barrels at once depending on the position of the "tap".
- features usually include: two round, blued, screw barrels stacked in an over/under configuration; cock, frizzen, and pan in a box-lock action; engraved, nickel finished receiver/frame; may include a sliding safety to block the motion of the cock; folding trigger; barrel selector tap on left side; bag-handle wooden grip.

Manufacturer

- "W. PARKER" is marked on the firearm.
- "W. PARKER" stands for "William Parker" gunmaker from 1793 to 1841.
- "William Parker" was the successor to "Field & Parker" of 233 High Holborn, London, England circa 1793.
- "William Parker" business was succeeded by "Parker, Field & Sons".
- "Parker, Field & Sons" and "Parker, Field & Company" was a firearms manufactured located in London, England from circa 1841 to 1886.
- "Parker, Field & Sons" and "Parker, Field & Company" was founded by William Parker.
- "Parker, Field & Sons" was succeeded by "Parker, Field & Company".
- "William Parker", "Parker & Company", "Parker, Field & Sons" and "Parker, Field & Company" supplied firearms to the Hudson Bay Company between 1836 and 1884.

Action

- over & under barrel configuration with the choice of which barrel fires determined by the position of a tap or lever on the left side of the pistol.

Serial Number

- may or may not be serial-numbered.
- these firearms may be numbered as part of a set (eg. "1" of 2, "2" of 2, etc.), or the barrels may be numbered sequentially. These numbers are not to be confused with serial numbers.

Make

- "PARKER-HALE LTD. BIRMINGHAM. ENGLAND" is usually marked on the top of the barrel.
- "Parker-Hale" name was used by "A. G. Parker & Company, Limited" pre 1936.
- "Parker-Hale" name was used by "Parker-Hale Limited" starting in 1936.

Model

- model designation does not usually appear on the firearm.
- introduced in 1973 and in 1989 the C3A1 replaced the C3 rifle as the standard Canadian sniper rifle.
- the C3 is built using a model M82 rifle with a 1200TX target barrel. The C3 incorporates a number of changes/requirements from the standard M82.
- available with a heavy barrel, stock has a full beavertail forend and pistol grip that is suitable for right or left handed shooters, fully adjustable trigger and a Parker Hale PH5E adjustable rear sight which attaches to the scope base instead of directly to the receiver, Parker Hale tubular front sight with interchangeable elements.

Manufacturer

- "PARKER-HALE LTD. BIRMINGHAM. ENGLAND" is usually marked on the top of the barrel.

Serial Number

- serial number should have a letter prefix.

Notes

Make

- "Parker-Hale" or the "P-H" logo may be marked on the top of the barrel.
- "Parker-Hale" name was used by "A. G. Parker & Company, Limited" pre 1936.
- "Parker-Hale" name was used by "Parker-Hale Limited" starting in 1936.

Model

- model designation does not usually appear on the firearm, if marked the serial number will be on the top of the barrel.
- in 1989 the C3A1 replaced the C3 rifle as the standard Canadian sniper rifle.
- the C3A1 is built using a model M87 target rifle. The C3A1 incorporates a number of changes/requirements from the standard M87.
- changes include:
- modified bolt handle with the addition of an aluminium extension knob.
- detachable Parker-Hale bipod that attaches to the handstop assembly.
- stock configuration on the first version was the same wood stock used on the C3 with 12.7mm spacers to allow length adjustment. The second stock configuration is a synthetic stock manufactured by McMillan.
- the C3A1 is equipped with a Unertl fixed 10 power telescope sight that requires a specially reinforced mount which was designed for the M 87 receiver/frame.

Manufacturer

- Parker-Hale or the Parker-Hale logo "P-H" may be marked on the top of the barrel.

Serial Number

- serial number is usually marked on the left side of the receiver/frame.
- may or may not have a letter prefix.

Shots

- detachable single column box magazine.

Notes

Make

- "PARKER-HALE" is marked on the barrel and/or receiver/frame.
- "Parker-Hale" name was used by "A. G. Parker & Company, Limited" pre 1936.
- "Parker-Hale" name was used by "Parker-Hale Limited" starting in 1936.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- no model name marked on this firearm.
- this is a Parker-Hale rework of the Short Magazine Lee-Enfield (SMLE) rifle into a reasonably priced sporting/hunting rifle.
- rifles are stripped, reblued and fitted with a new Monte Carlo style stock, ramp mounted blade front sight with hood also supplied, receiver/frame is drilled and tapped to accommodate an adjustable Parker-Hale side mount base; adjustable sporting rear sight.
- barrels could be original military issue length, cut down from original or replaced entirely.
- original military markings have usually been removed as a result of the refinishing by Parker-Hale.
- Do not confuse this model with the Parker-Hale, Lee-Enfield Custom No. 4 rifle. This "Custom No. 1" rifle has the rear sight on the barrel. The "Custom No. 4" rifle has the rear sight at the top rear of the receiver/frame.

Manufacturer

- Parker-Hale re-worked existing Lee-Enfield rifles produced by the various manufacturers that supplied the British military. As most of the original markings were removed it is difficult to determine the original manufacturer.
- "PARKER-HALE" and/or a triangular logo with "Bisley Works" over "A.G.P." is marked on the firearm.
- this logo was used by both "A. G. Parker & Company Ltd." and "Parker-Hale Ltd.".

Serial Number

- numbered on frame/receiver.

Calibre

- the calibre is usually marked on the barrel as "303" followed by British Proof marks.

Shots

- detachable box magazine.
- Parker-Hale usually supplied this model with a five shot magazine, as original ten shot magazines are readily available many will be encountered with the higher capacity magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- this is a conversion from a Lee-Enfield pattern rifle to a civilian-style hunting rifle. - do not confuse this model with the Parker-Hale Lee-Enfield Custom No. 1 rifle. - this "Custom No. 4" rifle usually has the rear (aperture) sight at the top rear of the receiver (some samples have been noted with a milled receiver and a barrel mounted open rear sight). - the "Custom No. 1" rifle usually has the rear sight on the barrel. - features for this model may include any of the following: hand checkered walnut stock; internally webbed rubber recoil pad; flag type safety; drilled and tapped to accommodate an adjustable Parker-Hale side mount base (optional); adjustable sporting back sight, bead foresight with tubular protector.
Manufacturer	- "PARKER-HALE LTD. BIRMINGHAM. ENGLAND." is marked on top of the barrel.
Action	- manual turn bolt mechanism.
Serial Number	- serial number is marked on the left side of the receiver/frame near the butt stock.
Calibre	- original caliber markings may remain on the left side of the barrel.
Shots	- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make	- "PARKER-HALE" is marked on the barrel and/or receiver/frame. - "Parker-Hale" name was used by "A. G. Parker & Company, Limited" pre 1936. - "Parker-Hale" name was used by "Parker-Hale Limited" starting in 1936.
Model	- no model name marked on this firearm. - this is a Parker-Hale rework of the the Short Magazine Lee-Enfield (SMLE) rifle into a reasonably priced sporting/hunting rifle. - rifles are stripped, reblued and fitted with refinished wooden stocks, original military front and rear sights may be retained, ramp mounted blade front sight with hood also supplied, rear sight also available on rear of receiver. - barrels could be original military issue length, cut down from original or replaced entirely. - original military markings have usually been removed as a result of the refinishing by Parker-Hale.
Manufacturer	- Parker-Hale re-worked existing Lee-Enfield rifles produced by the various manufacturers that supplied the British military. As most of the original markings were removed it is difficult to determine the original manufacturer. - "PARKER-HALE" and/or a triangular logo with "Bisley Works" over "A.G.P." is marked on the firearm. - this logo was used by both "A. G. Parker & Company Ltd." and "Parker-Hale Ltd.".
Action	- turn bolt operated.
Serial Number	- serial number rationalization unknown. - firearm may retain the original military serial number. - observed serial number had a letter prefix "R" followed by five numbers.
Shots	- detachable box magazine.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "PARKER-HALE" is marked on the barrel and/or receiver/frame. - "Parker-Hale" name was used by "A. G. Parker & Company, Limited" pre 1936. - "Parker-Hale" name was used by "Parker-Hale Limited" starting in 1936.
Model	- This is a generic model. Other "1000" "1100" "1200" entries exist which might better describe the firearm. - This firearm is a bolt-action rifle built on a Mauser action, with a Monte Carlo stock, black butt-plate or recoil pad, grip cap, and white line spacers, open sights or no sights. - Do not confuse with Parker-Hale models built on Lee-Enfield receiver/frames: which are identified by the metal band of the butt socket and a two piece stock.
Manufacturer	- "PARKER-HALE" and/or a triangular logo with "Bisley Works" over "A.G.P." is marked on the firearm. - this logo was used by both "A. G. Parker & Company Ltd." and "Parker-Hale Ltd.".
Action	- manually operated, bolt action repeating rifle.
Shots	- integral magazine or detachable box magazine.
Remarks	- Rifles in the 1200 model series will usually have a model disignation marked on the barrel.

Notes

Make

- "Parker-Hale Ltd. Birmingham, England" is marked on the barrel.
- "Parker-Hale" name was used by "A. G. Parker & Company, Limited" pre 1936.
- "Parker-Hale" name was used by "Parker-Hale Limited" starting in 1936.

Model

- "Safari" is marked on the receiver/frame or barrel.
- features include: Mauser type action; internal magazine with a hinged floor plate or removeable box magazine; single trigger or double set triggers; usually has the Mauser wing-type safety at the rear of the bolt; Monte Carlo stock with pistol grip, may have; checkering, ventilated rubber recoil pad, schnabel forend, white-line spacers on pistol grip cap and buttplate; receiver/frame is drilled and tapped for scope mounts.

Manufacturer

- "Parker-Hale Ltd. Birmingham, England" or a variation thereof will be marked on the top of the barrel.

Action

- turn bolt operated.

Serial Number

- known examples have had three, five and six digit numbers, some with a letter prefix.
- serial number is usually marked on the left side of the receiver ring.
- known example in a magnum calibre had the letters MAG ahead of the serial number.

Calibre

- calibre designation is usually marked on the top of the barrel.

Shots

- internal or external box magazine.

Notes

Make

- "PARKER .HALE LTD. BIRMINGHAM ENGLAND" is marked on the barrel.
- "Parker-Hale" name was used by "A. G. Parker & Company, Limited" pre 1936.
- "Parker-Hale" name was used by "Parker-Hale Limited" starting in 1936.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model designation is marked on the left side of the receiver/frame as "Safari DE LUXE". - this is a sporting rifle converted from a Mauser M98 rifle by Parker-Hale of the United Kingdom; do not confuse this rifle with the later model "1100 Safari De Luxe". Where the Safari De Luxe has a wing-type safety mounted on the bolt shroud and a fixed floor-plate, the 1100 Safari De Luxe has a pivoting safety on the right side of the receiver/frame and a hinged floor-plate. - features include: checkered walnut pistol grip stock with schnabel forearm tip and ventilated buttpad; single adjustable or double set triggers; blued finish; open adjustable sights (hooded front and folding leaf rear); receiver/frame drilled and tapped for scope mounts; "wing"-style Mauser safety on bolt and sling swivels.
Manufacturer	- the manufacturer is marked on the barrel as "Parker-Hale Ltd.".
Serial Number	- numbered on the left side of the receiver/frame; may include an alpha prefix and/or suffix characters.
Shots	- internal box magazine.

Notes

Make	- "PARKER HALE LTD. BIRMINGHAM ENGLAND" is marked on the barrel. - "Parker-Hale" name was used by "A. G. Parker & Company, Limited" pre 1936. - "Parker-Hale" name was used by "Parker-Hale Limited" starting in 1936.
Model	- marked on the left side of the receiver/frame: Safari SUPER - built on a (commercial or military surplus) M98 Mauser action drilled and tapped for scope, hinged floorplate, ramped blade foresight and fold-down open notch rearsight. - features include: one piece walnut stock with Monte Carlo cheekpiece; checkered fore-end and pistol-grip; dark rosewood grip-cap and fore-end tip with white spacer; vented rubber recoil butt-pad with white line spacer and sling swivels.
Manufacturer	- marked on top of barrel: "PARKER - HALE LTD. BIRMINGHAM, ENGLAND".
Serial Number	- marked on the left side of the receiver ring in numerals.
Calibre	- calibre is marked on the top of the barrel.
Shots	- integral non-detachable box magazine.
Remarks	- often Parker-Hale used military Mauser Gew98/K98 and Lee-Enfield No. 1 and No. 4 actions (usually "sanitized" to remove original markings); new commercial M98 actions were purchased from an outside source.

142702 - 1	45 PERCUSSION	1	107	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- known example was marked "PARKES LONDON" on the top of the barrel.
- research has indicated that this firearm was probably made by one of the following Birmingham gunmaking firms;
- 1) Benjamin Parkes (1829-1852); 67 Weaman Street and 22 Weaman Steet in 1848 only, or,
- 2) Isaiah Parkes (1853-1890); late Benjamin Parkes, 22 Weaman Street.

Model

- no model name is marked on this firearm; the model designation is derived from the characteristics of the firearm.
- manufactured circa 1830 to circa 1860.
- this type of belt pistol was produced in large numbers by various Birmingham gunmakers for retail in the city of London and surrounding areas; it was proof marked in Birmingham and would usually bear the last name only of the maker followed by the word "LONDON".
- features include: sidelock action; muzzle loading, percussion ignition; exposed hammer; octagonal barrel with a steel rib underneath extending the full length of the barrel, this rib provides for the attachment of a front hinged steel swivel-type ramrod; full trigger guard; round grip frame with hardwood grips, there is no forestock on this model; browned or blued finish; may have engraving on the sideplates.

Action

- muzzle loader.

Serial Number

- known example did not have a serial number.

Notes

Make

- "Wm. PARKHURST" was observed marked on the left side lock.
- "PARKHURST" trade name/trademark was used on firearms manufactured by:
- "William Parkhurst" of Amherst, New Hampshire, U.S.A. between 1840 and 1860.
- "J.P. Clabrough & Brothers" of Birmingham, England between 1870 and 1893.
- "Simonis, Janseen & Dumoulin" of Liege, Belgium between 1884 and 1905.
- "William Parkhurst" of Bristol, England between 1919 to 1922.

Model

- model designation is not marked on the firearm.
- this is a generic entry for Parkhurst side by side shotguns, not identifiable as to model.
- features include: hammer or hammerless; single or double triggers; hinged receiver/frame with top, side, or push button opening lever; damascus or steel barrels; boxlock, sidelock, or back-action sidelock configuration.

Serial Number

- located on the inside of the receiver/frame.

Canadian Law Comments

- Some examples of this model, when manufactured prior to 1898 may be considered Antique in Canada.

Other Markings

- "MACHINE MADE" was observed marked on the right side lock.

Firearm Reference Number (FRN): 21094
Make: Parole
Model: Parole

Summary

Make:	Parole
Model:	Parole
Manufacturer:	Norwich Pistol Company/Norwich Falls Pistol Company
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
21094 - 1	22 RF	7	57	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "PAROLE" is marked on the top of the barrel; the left side of the barrel is marked "PAT'D APR. 23 1878".
- research has indicated that some versions of this model are marked "PAROLE" on the top strap.
- "PAT'D APR. 23 1878" represents the date that patent number 202,627 was assigned to William H. Bliss of Norwich, Connecticut.
- "Parole" was a brand/trade name used by the Norwich Pistol Company/Norwich Falls Pistol Company of Norwich, Connecticut.

Model

- "PAROLE" is marked on the top of the barrel; the left side of the barrel is marked, "PAT'D APR. 23 1878".
- research has indicated that some versions of this model are marked "PAROLE" on the top strap.
- "PAT'D APR. 23 1878" represents the date that patent number 202,627 was assigned to William H. Bliss of Norwich, Connecticut.
- this handgun would have been made circa 1873 to 1887.
- this firearm was commonly referred to as a "Suicide Special".
- features include: solid receiver/frame; may have the W.H. Bliss patented circular side plate with a slot on the left side of the receiver/frame, however, some versions of this model will have the circular removable side plate without the slot on the left side of the receiver/frame; single action spur trigger; octagonal barrel; plain cylinder with locking notches to the rear; cylinder pin release is a button-type located on the left front of the receiver/frame, some versions may have a blade-type release located at the front of the receiver/frame; brass half-disc blade front sight; bird-head grip frame; case hardened trigger and hammer; nickel plated finish; grips may be walnut or checkered black hard rubber; may have light engraving on the barrel and/or receiver/frame.

Manufacturer

- manufacturer's name is not marked on this firearm; firearm was made by Norwich Pistol Company/Norwich Falls Pistol Company of Norwich, Connecticut.
- "PAT'D APR. 23 1878" represents the date that patent number 202,627 was assigned to William H. Bliss of Norwich, Connecticut.
- W.H. Bliss was the plant superintendent of the Norwich Pistol Co. (circa 1873 to 1881) and its successor the Norwich Falls Pistol Co.(circa 1882 to 1887). He was not affiliated in any way with the company of Bliss & Goodyear of New Haven, Connecticut.

Notes

Make

- "PASPER" over "S.R.L." over "FCA. ARMAS" was marked on an observed example on the left side of the firearm in front of the cylinder.

Model

- "Bagual" may or may not be marked on the firearm, but may be seen on either grip logos or stamped into the frame, with the "Bagual" logo of a jumping stallion.
- this is one of two different models of cheap double-action die-cast revolver made by Pasper, either the six-shot "Bagual 6" or an eight-shot "Bagual 8" (the "Bagual 6" has a permanent cylinder axis pin with a screw-out rod to act as an ejector, while the "Bagual 8" has a cylinder on a crane that tips out of the receiver/frame).
- features include: die-cast alloy receiver/frame with plain, nickeled, or painted/enameled finish; fixed open sights; fluted cylinder with grooved flutes; single-action/double-action trigger mechanism; exposed hammer with spur; and synthetic grips, with either a square-butt or clipped "bird's-head" profile.

Manufacturer

- "Pasper" or "Bagual" (a trade-name used by Pasper, meaning "stallion" or "wild horse") is usually marked on the firearm.
- Fabrica de Armas Pasper was an Argentine manufacturer based in Buenos Aires, beginning in the late 1960s; they primarily produced cheap, die-cast alloy-framed double-action revolvers.

Action

- double-action revolver.

Serial Number

- serial number of an observed example was marked on the right side of the receiver/frame in front of the cylinder and consisted of five numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- "CAL.22 CORTO" was observed marked on the left side of the firearm.
Other Markings	- other markings on observed example include "M.C.", "INDUSTRIA ARGENTINA" and "S.R.L. FCA ARMAS".

- "PATCHETT", "MACHINE CARBINE", and "MK II" or "PATCHETT", "9M/M M/C" is marked on the top side of the magazine housing.
- the "Patchett Machine Carbine" was manufactured from 1945 to 1955.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "STERLING" is not marked on the firearm.
- Sterling Telephone & Electric Company of Dagenham, Essex, England was established in 1909.
- Sterling Telephone & Electric Company was known as Sterling Works (Dagenham) Limited in 1932.
- Sterling Telephone & Electric Company became Sterling Electric Holding Limited in 1933.
- Sterling Electric Holding Limited was the parent company of Sterling Armaments and Sterling Engineering.

- STERLING ARMAMENTS was located in Northampton, England circa 1940 to circa 1943.
- Sterling Armaments was one of the secondary companies assigned to produce the Lanchester submachine gun.
- Sterling Armaments was a satellite factory to the original "Sterling Engineering" of Dagenham.
- Sterling Armaments' wartime production code was "M619".

- STERLING ENGINEERING was located on Dagenham, Essex, England.
- Sterling Engineering Company Limited's parent company was Sterling Electric Holding Limited from 1939 to 1972.
- Sterling Engineering was the original company assigned to produce the Lanchester submachine gun.
- Sterling Engineering's wartime production code was "S109".
- Sterling Engineering became Sterling Armament Company Limited.

- STERLING ARMAMENT COMPANY LIMITED was purchased by James Edminston in 1972.
- Sterling Armament and Armalite signed a manufacturing agreement in 1974.
- Sterling Armament was sold by James Edminston in 1983/1984.
- Sterling Armament was purchased by British Aerospace in 1989.
- Sterling Armament ceased operations in the early 1990's.

Action

- blowback operated.

Serial Number

- consecutively numbered.
- serial number is located on the top side of the magazine housing.

Shots

- detachable box magazine.

Notes

Make

- "PATH FINDER" is marked on the top strap.
- "Pathfinder" as a tradename, has been attributed to the firms of Otis A. Smith, Norwich Falls Pistol Company and Hopkins & Allen with production indicated as early to mid-1870's to mid-late 1880's.
- Hopkins & Allen was located in Norwich, Massachusetts, U.S.A. from 1868 to 1917.
- Norwich Falls Pistol Company was located in Norwich, Connecticut, U.S.A. from 1882 to 1887.
- the firm of Otis A. Smith ceased to exist circa 1898.

Model

- "PATH FINDER" is marked on the top strap of the receiver/frame.
- features include: round barrel with half moon front sight; solid top receiver/frame with removable cylinder, groove in the right side to facilitate loading and notch in the lip of the top strap for a rear sight; exposed spurred hammer; sheathed spur trigger;
bird's head grip; plain or engraved; blued or nickel finish.
- this type of handgun was produced early-mid 1870's to the late 1880's.

Serial Number

- serial number is usually found on the left side of the receiver/frame under the grip plate.
- observed serial number consisted of four numbers without a letter prefix or suffix.

Calibre

- "P 32 CAL" is marked on the left side of the receiver/frame below the front of the cylinder.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- removable cylinder.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

FRT Report

Firearm Reference Number (FRN): 142867
Make: Pattison
Model: Screw Barrel Pistol

Summary

Make:	Pattison
Model:	Screw Barrel Pistol
Manufacturer:	Pattison
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	IRELAND
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
142867 - 2	50 PERCUSSION	1	51	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "PATTISON" in an oval was observed marked on the left side of the firearm.

Model

- manufactured prior to 1865.
- model designation is not marked on the firearm.
- model designation is derived from the method by which this pistol is loaded; loading was accomplished by unscrewing the barrel.
- this is a single shot pistol with a removable barrel and an exposed hammer centrally located on the receiver/frame behind the chamber.
- this handgun is intended to be loaded from the breech end of the barrel and as such was originally supplied with a wrench to unscrew the barrel from the receiver/frame in order that a lead ball and loose powder could be inserted into the chamber end of the barrel and then the barrel screwed back onto the receiver/frame.
- features include: no front sight; round screw on barrel with an underlug; central hammer; folding trigger; no safety; wood grips; nickel plated finish with light engraving.

Manufacturer

- Pattison name was associated with several gunmakers in Dublin, Ireland between 1800 and 1864.
- John Pattison was located at 17 Crampton Court from 1810 to 1827 and at 157 Chapel Street from 1825 to 1827.
- Mark Pattison was located at 17 Crampton Court circa 1836.
- Mark & John Pattison were in business from 1835 to 1850.
- Robert Pattison was in business circa 1850.
- Thomas Pattison & Company was located at 1 Clarence Street, North Strand from 1800 to 1806.

Action

- the barrel unscrews in front of the chamber, so it can be loaded with a ball that fits the barrel more tightly than is possible with a muzzle loader.
- the turnoff barrel may be rifled.

Notes

Make

- maker's designation is not marked on the firearm.

Model

- model designation may not be marked on the firearm.
- this is a tilting-barrel single-shot target handgun, made under several names at various times
- features include: sharply raked wooden grip; stepped barrel; knurled cylindrical cocking-piece at the rear of the standing breech; fixed sights.
- this pistol may be known as the Model "P", Model "70", "Standard", "Drulov", or a number of others, depending on when it was produced. "Make" may likewise differ, ranging from "Pavlicek" (the original designer/manufacturer), "PAV" (a later designation used by Czech State Arsenals), "CZ" (who produced this pistol as the "P"), or even "Drulov", who produced this pistol prior to manufacturing their own design of single-shot pistol.
- this record is ONLY for those pistols produced after 1963 (pistols will have a two-number date stamp next to the proof); pistols produced earlier than 1948 are known as "Pavlicek Model P"s, while pistols produced after 1963 are known as "Pav 70"s, or "Drulov PAV"s, depending on how they are marked.

Manufacturer

- manufacturer's logo may consist of a "D and "S" and a bird within an oval and may be marked on the right side of the standing breech.

Action

- tilting-barrel single shot.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the standing breech and may be partially blocked by the left grip panel and is repeated on the underside of the barrel. - observed example consisted of five numbers.
Calibre	- "22 LONG RIFLE" is marked on the top of the barrel.

126163 - 2	9MM LUGER	32	406	Prohibited PFR, Part 1, para. 58	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "P. A. W. S. INC." is marked on top of the magazine housing.
- "P. A. W. S." stands for "Police Automatic Weapons Service".

Model

- Based on the "Sterling MARK 6 Carbine" design, introduced in 1986.
- Discontinued in 2004.
- "ZX6" is marked on top of the magazine housing.
- The "ZX6 Carbine" is a closed bolt, semi-automatic version of the full automatic "ZX5 Submachine Gun" chambered in 9mm Luger, featuring a simplified trigger group compared to the "Sterling MARK 6 Carbine". A similar version chambered in 45 ACP is known as the "ZX8 Carbine".
- Features include: Sheet metal front sight guard; tubular receiver/frame with ventilation holes; left side magazine housing; magazine release button on top of magazine housing; left side rotary safety selector; stamped sheet metal trigger guard; right side ejection port with casing deflector; right side reciprocating charging handle; sling loops on ventilated forend and receiver rear cap; synthetic pistol grip; underfolding buttstock.

Manufacturer

- "P. A. W. S. INC." is marked on top of the magazine housing.
- "P. A. W. S." stands for "Police Automatic Weapons Service".

Action

- Blowback operated.

Serial Number

- The serial number is marked on top of magazine housing.
- The serial number of referenced example consists of a prefix "SN6", followed by a dash and four digits.

Shots

- Detachable box magazine.
- Designed to accept "STEN" type magazines.
- The "ZX6A1" model is designed to accept "UZI" type magazines.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- The PAWS Sterling Submachine Gun/Carbine/Pistol family of firearms consists of the following:
- ZX5: Full automatic, open bolt submachine gun in 9mm Luger, similar to the Stirling L2A3.
- ZX6: Semi-automatic, closed bolt version of ZX5 with a 406mm-419mm (16"-16.5") barrel, similar to the Stirling MARK 6 Carbine.
- ZX7: Full automatic, open bolt submachine gun in 45 ACP, similar to the Stirling L2A3.
- ZX8: Semi-automatic, closed bolt version of ZX7 with a 406mm-419mm (16"-16.5") barrel, similar to the Stirling MARK 6 Carbine.
- ZX9: Short barrel, stockless "pistol" version of ZX6, similar to the Stirling MARK 7 Pistol.
- ZX10: Short barrel, stockless "pistol" version of ZX8, similar to the Stirling MARK 7 Pistol.

FRT Report

Firearm Reference Number (FRN): 129630
Make: Paxarms
Model: MK 24

Summary

Make:	Paxarms
Model:	MK 24
Manufacturer:	Paxarms/Anschutz
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
129630 - 1	22 LR	5	172	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "PAXARMS" is marked on the side of the barrel assembly

Model

- "PAXARMS" and "MK 24" is marked on the side of the barrel assembly.
- this is a dart projection rifle based on the Anschutz Model 1441/42 bolt action rifle.
- features include: hooded front sight, elevation adjustable rear sight; velocity adjustment dial mounted on the left side of the barrel assembly; safety lever located on the left rear of the receiver/frame; scope mounting grooves located on the receiver/frame; magazine release is mounted in front of the trigger guard; blue finish on all metal parts; wooden pistol grip stock, usually checkered; plastic butt plate.
- the dart projection chamber is removable allowing various sized darts to be launched. The attachment point is immediately in front of the velocity adjustment dial.

Manufacturer

- "PAXARMS" is marked on the side of the barrel assembly
- "J.G. Anschutz GmbH. Ulm/D. WEST GERMANY" is marked on the left side of the receiver/frame.
- Paxarms remanufactured the Anschutz rifle into a dart projector for animal control.

Action

- turn-bolt design.

Serial Number

- serialization unknown, but seven numbers observed.
- serial number is usually located on left side of the receiver/frame. The serial number observed appears to be the original Anschutz issued number.

Calibre

- single shot manually chambered Hypodermic Dart, which is propelled by 22 LR Blanks, which are fed from a detachable box magazine.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- dart chamber is loaded but turning the end of the interior barrel sleeve counter clockwise and pulling forwards. This exposes a chamber into which the projectile is placed. Pushing the chamber closed and turning the barrel clockwise, locks and seals the chamber for firing.

Notes

Make

- "PEABODY'S PATENT" is marked on the receiver/frame.

Model

- the model is not marked on the firearm.
- "PEABODY'S PATENT JULY 22, 1862" is marked on the receiver/frame.
- manufactured from 1865 to 1878.
- total quantity manufactured 112,000.
- single shot with a downward swinging breechblock, which is pivoted at the rear and operated by an under finger lever trigger guard.
- one-piece colour case hardened steel receiver.
- exposed side hammer.
- automatic extractor, non-ejecting.
- round and part octagonal barrel.
- full or half length stock.
- blue finish.
- in 1866, Canada purchased 3000 Peabody rifles as an emergency measure to combat the Fenian raiders, as there were insufficient stocks of the issue Snider rifles available; these rifles were chambered for 50-60 peabody, with a barrel length of 915mm.

Manufacturer

- "MAN'F'D BY" over "PROVIDENCE TOOL CO." over "PROV. R.I. U.S.A." is marked on the side of the receiver/frame.
- in 1851, "Providence Tool Company" was founded in Providence, Rhode Island to manufacture tools.
- in 1862, "Providence Tool Company" was contacted to manufacturer 82,000 "Springfield 1861 rifle-muskets".
- in 1866, "Providence Tool Company" was contacted to manufacturer "Peabody" carbines and rifles.
- in 1869, "Providence Tool Company" was contracted by "Benjamin Roberts" to convert "Springfield 1861 rifle-muskets" & "Springfield 1863 rifle-muskets" to breech loading rifles by using the "Roberts' Patent of June 11, 1867".
- in 1873, "Providence Tool Company" was contacted to manufacturer 650,000 "Peabody & Martini" carbines and rifles for the Turkish government.
- in 1917, "Providence Tool Company" ceased operations.

Action

- tilting-block single-shot.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- stamped on the left side of the receiver in five lines:
"PEABODY'S PAT."
"JULY 22, 1862"
"MAN'F'D BY"
"PROVIDENCE TOOL CO."
"PROVIDENCE, R.I."

Notes

Make

- "PEABODY & MARTINI PATENTS" is marked on the left side of the receiver/frame.
- "Peabody & Martini" were manufactured by "Providence Tool Company" for Japan, Turkey and the American domestic market.
- "Peabody & Martini" were also manufactured by Osterreichische Waffenfabrik Gellschaft, Steyr (OEWG) for Romania.

Model

- the model designation is not marked on the firearm.
- manufactured between 1873 and 1882.
- total production for all variations of the Peabody & Martini was over 650,000 units.
- this is single shot, hammerless underlever operated dropping breechblock, military carbine.
- this firearm is identical to the British Martini-Henry Rifle except for markings, calibre and safety lever in front of the trigger guard.
- "Peabody & Martini" carbines and rifles were manufactured by Providence Tool Company for the Japanese Navy, Turkish government and for the American domestic market.
- "Peabody & Martini" carbines and rifles were manufactured by Osterreichische Waffenfabrik Gellschaft, Steyr (OEWG) for the Romanian military.
- "Peabody & Martini" carbines and rifles were manufactured by for the Romanian military.

Manufacturer

- "MAN'F'D BY" over "PROVIDENCE TOOL CO." over "PROV. R.I. U.S.A." is marked on the side of the receiver/frame.
- in 1851, "Providence Tool Company" was founded in Providence, Rhode Island to manufacture tools.
- in 1862, "Providence Tool Company" was contacted to manufacturer 82,000 "Springfield 1861 rifle-muskets".
- in 1866, "Providence Tool Company" was contacted to manufacturer "Peabody" carbines and rifles.
- in 1869, "Providence Tool Company" was contracted by "Benjamin Roberts" to convert "Springfield 1861 rifle-muskets" & "Springfield 1863 rifle-muskets" to breech loading rifles by using the "Roberts' Patent of June 11, 1867".
- in 1873, "Providence Tool Company" was contacted to manufacturer 650,000 "Peabody & Martini" carbines and rifles for the Turkish government.
- in 1917, "Providence Tool Company" ceased operations.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- rear hinged, lever operated tipping block design.
- Peabody & Martini action is locked in the firing position by the tip of the operating lever holding the breech block face up and in line with the chamber.

146679 - 2	22 RF	1	83	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "A.J. PEAVEY PAT" over "SEP. 65" or "A.J. PEAVEY" over "PAT. SEP. 5. 65 & MAR. 28. 66" may be marked on the left side of the hammer.

Model

- manufactured prior to 1898.
- model designation is not marked on the firearm.
- this is one of several styles of folding "jack-knife pistol" invented and manufactured by Peavey, in both muzzle-loading single-shot 22 Percussion and 22 Rimfire versions, and in at least three distinct sub-variations.
- Peavey's early examples were in 22 Percussion, and were not generally marked, but had a standing nipple at the rear of the pistol (opposite the end that the blade and hammer pivots from), and were loaded from the muzzle end with powder and a 22 calibre ball.
- later cartridge-firing examples may or may not be marked with patent dates of Sept. 5, 1865 and Mar. 27, 1866, with a tip-up breech/barrel unit, and were made with two styles of hammers; either a "hooked" type with an attached blade-type firing pin that struck the rim of a chambered cartridge directly, or a flat type that impacts a rotating striker that is built into the breech end of the barrel.
- features include: machined brass frame/body, with inset wooden, ivory, or mother-of-pearl scales; one or more knife blades that pivot out from the muzzle end of the knife; a hammer that also pivots from the knife-blade hinge; and a bottom trigger that drops when the hammer is manually cocked by pulling it up from the body of the knife.
- the production versions of this knife were also designed to be used as "alarm guns", by sticking the knife into a wooden door or window frame, then running a string from a hole in the trigger to a door knob or window latch, firing the pistol when the string was pulled.

Manufacturer

- Andrew Jackson Peavey was born in 1832 and died in 1897.
- Andrew Jackson Peavey was located in South Montville, U.S.A. in 1856 and Lawrence, Massachusetts, U.S.A. in 1897.
- Andrew Jackson Peavey was an inventor who designed several versions of a knife-pistol (which he made) and was the later co-designer of the "Little All Right" palm pistol.
- Andrew Jackson Peavey is most famous for his invention of the "Peavey Hook", a spike with a pivoting arm that allows loggers to roll and twist cut trees.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- muzzle loader or breech loader.
Serial Number	- may or may not be numbered, depending on the period of manufacture.
Barrel	- barrel lengths may be seen up to 89mm/3.5", depending on the type.

64323 - 2	276 PEDERSEN	5	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- named after the firearms designer John Pederson.

Model

- developed in late 1923 / early 1924, this model was intended for the trials being held to choose the new service rifle to be adopted by the United States Military.
- this design used a toggle action that proved less than satisfactory and the Pederson system was abandonned.
- this model was also produced and promoted in the United Kingdom but not adopted.

Manufacturer

- the manufacturers name is marked on the left side of the sample examined.
- Vickers Armstrong was licensed to produce this model by John Pederson who held patents for design features used on this model.

Serial Number

- sample observed was marked with sequential numbers on the right side of the receiver.

121680 - 2	276 PEDERSEN	10	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make may not be marked on the firearm.

Model

- the model designation may not be marked on the firearm.
- designed by John Pedersen (the same designer who designed the "Pedersen Device" of World War I) as a possible US Army service rifle, to replace the Springfield 1903; although this design was never adopted, it was tested for possible adoption by at least 3 countries (the US, the UK and Japan), and pointed the way for the Springfield 03's eventual replacement, the M1 Garand.
- features include: walnut pistol grip stock and forearm; adjustable open sights; fixed box magazine (fed with stripper clips) that hangs conspicuously below the stock and a Luger style toggle mechanism that breaks upwards to extract and eject empty casings.
- though this design certainly worked, it operated in such a way (delayed blowback) that it required specially lubricated ammunition to minimize the chances of head and case rim separations; therefore the design was never adopted.

Manufacturer

- the manufacturer is marked on the firearm.

Action

- delayed blowback operation.

Serial Number

- numbered on the receiver/frame.

Shots

- internal box magazine.

- "Brutus Denali" is a single shot, in-line percussion, muzzle loading rifle.
- "Brutus Denali" is an under-lever, break open, front hinged design that uses a number 209 primer for ignition.
- features include: fixed front and adjustable rear fiber optic sights; satin blued, stepped round barrel; rifled bore; drilled and tapped for mounting an optical sight; rotating and removable ejector; hammerless; cocking indicator and a manual safety are located on the upper rear tang; single trigger; a synthetic ramrod is located on the underside of the barrel; hardwood buttstock and forend are available with camouflage, carbon fiber or wood finish.
- overall length for a 711mm (28") barrel is 1130mm (44.5"), average weight is 3.88kg (8.59lbs).

Action

- muzzle loader.

Serial Number

- on one sample examined the serial number was marked on the barrel only. The serial number was also partially obscured by the barrel band.

Calibre

- the calibre designation is marked on the barrel.

Importer

- may or may not be marked with an importer's name.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - the barrel will bear Italian proof marks.

Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	ITALY
Serial Numbering:	
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
122437 - 1	69 FLINTLOCK	1	210	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- Davide Pedersoli's trademark "dp" within an oval, "Davide Pedersoli & C.", "Pedersoli", "Pedersoli - Italy", or a variation thereof is marked on the firearm.

Model

- model designation is not marked on the firearm and denotes the 13th year of the French Republic.
- lockplate is marked "Mre. imp. De St.etienne".
- differs from the "AN IX" model by having a shorter stock and a narrower barrel band held in place by a screw instead of a retaining spring.
- other features include: tapered round barrel; brass butt cap, barrel band, trigger guard and flash pan; walnut stock.

Action

- muzzle loader.

Notes

Make	- Davide Pedersoli's trademark "dp" within an oval, "Davide Pedersoli & C.", "Pedersoli", "Pedersoli - Italy", or a variation thereof is marked on the firearm.
Model	- Pedersoli has offered the same basic "Frontier" rifles as both a percussion and flintlock model. Both variations share the same features but for the ignition system. Further, both versions are offered in rifle or carbine configuration as well as standard or deluxe grades. - features may include: one-piece hardwood (standard) or maple (deluxe) stock with the forearm extending to the end of the muzzle, deluxe version also features a brass patch-box and nose cap; octagonal barrel with browned finish; double set triggers; brass trigger guard, buttplate, and ramrod ferrules; colour case-hardened lock-plate and hammer.
Action	- muzzle loader.
Serial Number	- serial number is usually marked on the rear of the barrel/receiver/frame.
Calibre	- rifling characteristics in calibre's 32 FLINTLOCK and 36 FLINTLOCK (as of 2005); 1 turn in 48 inches, 7 grooves. - rifling characteristics in calibre 45 FLINTLOCK (as of 2005); 1 turn in 48 inches, 8 grooves. - rifling characteristics in calibre 50 FLINTLOCK (as of 2005); 1 turn in 34 inches, 6 grooves. - rifling characteristics in calibre 54 FLINTLOCK (as of 2005); 1 turn in 34 inches, 7 grooves.
Importer	- several companies import a full or partial line of Pedersoli models.
Other Markings	- the firearm will usually bear Italian proof marks.

Notes

Make	- Davide Pedersoli's trademark "dp" within an oval, "Davide Pedersoli & C.", "Pedersoli", "Pedersoli - Italy", or a variation thereof is marked on the firearm.
Model	- this is a modern reproduction of the first pistol built for the American government at the national armory in Harpers Ferry, Virginia. This model was known as the "1805" after the date of the initial order, the production of the firearm may have actually commenced in 1806. - the model designation may be marked on the lock plate as "Harpers Ferry" followed by a date. As the original pistols were dated 1806, 1807 and 1808 these are sometimes referred to by the year date. - features include: brass noseband, triggerplate, thimbles, triggerguard and buttplate, colour case-hardened lockplate, ramrod mounted under the barrel and walnut stock. - this model will also be found in a "Deluxe" or "Commemorative" version that features a nickel finished barrel, silver plated fittings, and "US Army Commemorative" marked on the barrel.
Action	- muzzle loading, flint-lock ignition pistol.
Serial Number	- the sample examined was marked with sequential numbers on the left side of the barrel.
Calibre	- the calibre is marked on the left side of the firearm.
Other Markings	- the lock plate will bear the letters"US" under a "martial eagle" stamping.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- Davide Pedersoli's trademark "dp" within an oval, "Davide Pedersoli & C.", "PEDERSOLI", "MADE IN ITALY", "ITALY" or a variation thereof is usually marked on the barrel.
Model	- model designation is not marked on the firearm. - this is a reproduction of a muzzle-loading, side hammer, percussion ignition sporting rifle as was popular in the American Midwest in the 1850's. The Hawken name refers to the Hawken brothers, gunsmiths from St. Louis who produced this style of rifle for the western gun trade and whose name subsequently became synonymous with the design. - Pedersoli has produced a variety of Hawken type rifles with slightly different features. - features include: blade front sight and adjustable rear sight; rifled, octagonal barrel; brass tipped ramrod; one-piece walnut or maple half-stock; brass or nickel finished forend cap; double set triggers; case-hardened ramrod thimbles, lockplate and hammer; brass or case-hardened trigger guard and butt plate; browned finish. - overall length with a 819mm barrel is 1270mm (50"), average weight is 4kg (8.81 lbs). - overall length with a 737mm barrel is 1156mm (45 1/2"), average weight is 3.9kg (8 6 lbs). - this firearm may be available either assembled or in kit form.
Manufacturer	- Davide Pedersoli's trademark "dp" within an oval, "Davide Pedersoli & C.", "PEDERSOLI", "MADE IN ITALY", "ITALY" or a variation thereof is usually marked on the barrel.
Action	- muzzle-loading.
Serial Number	- serial number may be marked on the barrel.
Calibre	- calibre is usually marked on the barrel. - rifling characteristics: 7-grooves, 1 turn in 65.25 inches.
Other Markings	- this model will bear Italian proof marks.

Notes

Make

- Davide Pedersoli's trademark "dp" within an oval and "PEDERSOLI" or a variation thereof is marked on the left side of the barrel.

Model

- model designation does not appear on the firearm.
- this is a modern reproduction of a "Plains Hawken" style rifle, manufactured for hunters and target shooters interested in traditional firearms; these rifles are produced in both percussion and flintlock ignition versions.
- features include: blade front and adjustable rear sight; rifled, octagonal barrel; brass tipped ramrod and ramrod thimbles, brass forend cap and trigger guard with finger rest; double set triggers; case-hardened lock plate and hammer/cock; one-piece walnut half-stock with cheek piece; brass patch box and butt plate; blued finish.
- available in a left-handed version.
- overall length with a 725mm barrel is 1125mm (44.25"), average weight is 3.9kg (8.6 lbs).

Manufacturer

- Davide Pedersoli's trademark "dp" within an oval, "ITALY" and "PEDERSOLI" or a variation thereof is marked on the left side of the barrel.

Action

- muzzle-loading.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the barrel. - observed serial number consisted of a two letter prefix followed by six numbers.
Calibre	- calibre designation is marked on the barrel. - rifling characteristics : 8-grooves, 1 turn in 48 inches.

Notes

Make

- "DAVIDE PEDERSOLI" and the Davide Pedersoli "dp" logo are marked on the left side of the barrel.

Model

- introduced in 2017.
- "PEDERSOLI HOWDAH" is marked on the top-rib.
- this is a modern reproduction of a side by side "howdah" pistol, originally carried in a multi-passenger palanquin on the back of an elephant, used while tiger-hunting; these pistols were meant for use as a last chance of defence against an attacking tiger that got too close to the elephant or its passengers.
- this is a reproduction of the Ithaca Auto & Burglar shotgun pistol.
- features include: open fixed sights with brass bead front; blued and colour case-hardened finish; checkered walnut forearm and pistol-grip with a tang prawl; colour-case-hardened receiver/frame; top-lever; tang safety; double triggers.
- overall length with a 256mm barrel is 422mm (16 5/8"), average weight is 1.8kg (3.97 lbs).
- also available with single selective trigger and coin-finished receiver/frame with scrollwork engraving.

Manufacturer

- "DAVIDE PEDERSOLI" and the Davide Pedersoli "dp" logo are marked on the left side of the barrel.

Action

- side by side configuration.

Serial Number

- serial number is marked on the left side of the barrel.
- observed serial number consisted of two letter prefix followed by five digits.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- cal. 45/410 was marked on the left side of the barrel.
- rifling characteristics: 6-grooves, 1 turn in 35 7/16 inch.

131392 - 2	50 PERCUSSION	1	762	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- Davide Pedersoli's trademark "dp" within an oval, "PEDERSOLI - ITALY" or a variation thereof is marked on the left side of the barrel.

Model

- model designation is not marked on the firearm.
- this is a modern reproduction of a muzzle-loading, side hammer, percussion ignition sporting rifle as was popular in the American Midwest in the 1850's. The Hawken name refers to the Hawken brothers, gunsmiths from St. Louis who produced this style of rifle for the western gun trade and whose name subsequently became synonymous with the design.
- features include: blade front and adjustable rear sights; rifled, octagonal barrel; ramrod; case hardened lock, hammer, forend cap and ramrod thimbles; double set triggers; walnut or maple half-stock; browned finish
- overall length with a 762mm barrel is 1190mm (46 7/8"), average weight is 4.2kg (9.26 lbs).

Manufacturer

- Davide Pedersoli's trademark "dp" within an oval, "PEDERSOLI - ITALY" or a variation thereof is marked on the left side of the barrel.

Action

- muzzle-loading.

Serial Number

- serial number is marked on the barrel.
- observed serial number consisted of a two letter prefix followed by six numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- calibre designation is marked on the left side of the barrel.
- rifling characteristics in 45 PERCUSSION: 6-grooves, 1 turn in 47 inches.
- rifling characteristics in 50 PERCUSSION: 6-grooves, 1 turn in 24 inches.

Notes

Make

- "DP" logo, "PEDERSOLI" and "MADE IN ITALY" are marked on the barrel.

Model

- model designation is not marked on firearm.
- "CAT. 10589" was observed marked on the barrel.
- this is based on the Remington Baby Carbine.
- features include: straight-grip walnut stock and forearm; colour case-hardened receiver/frame; blued round barrel, hammer, trigger, breech-block and adjustable rear sight.

Manufacturer

- "DP" logo, "PEDERSOLI" and "MADE IN ITALY" are marked on the barrel.

Action

- "rolling-block" single-shot.

Serial Number

- serial number is marked on the upper tang of the receiver/frame and may be repeated on the barrel.
- observed serial number consisted of a letter "R" prefix followed by six numbers.
- "CAT. 10588", "CAT. 10589" or "CAT. 10590" may be marked on the barrel.
- "10588", "10589" or "10590" are not the serial number, these are Italian Proof House catalogue numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre designation is usually marked on the barrel.
Importer	- may or may not be marked with an importers name.
Other Markings	- this model will usually bear Italian proof marks on the receiver/frame and barrel as well as a catalogue number assigned by the Italian National Proof House. The assigned catalogue number when found in calibre 45 COLT with a 508mm barrel is usually marked as "Cat.10589".

Notes

Make

- the make is marked on the firearm.

Model

- model not marked on firearm.
- this is a modern reproduction of a Remington "rolling block" target rifle, available in several chamberings and grades.
- the "S" in the model number designation refers to the Standard grade, and the "L" refers to the Deluxe grade.
- features include: walnut pistol-grip stock and forearm (higher grades with deluxe walnut and German silver forearm tip); blued octagonal heavy barrel; colour-case-hardened or coin-finished and engraved receiver/frame and open adjustable sights with globe front (some versions with long-rang tang peep sights).
- overall length is 1170mm (46"), average weight is 4.5kg (9.92lbs).

Manufacturer

- manufacturer's designation is marked on the firearm as: "Pedersoli", "Davide Pedersoli & C.", "dp" trademark within an oval, or a variation thereof.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action - rolling block action.

Serial Number - the serial numbered is marked on the receiver/frame.

Notes

Make

- Davide Pedersoli's trademark "dp" within an oval, "Davide Pedersoli & C.", "Pedersoli", "Pedersoli - Italy", or a variation thereof is usually marked on the firearm.

Model

- model is not marked on firearm.
- this is a modern reproduction of a Remington rolling block target rifle, available in a number of different grades, chamberings and finishes.
- features include: blued heavy octagonal barrel with open adjustable sights; colour case-hardened or coin-finished receiver/frame; colour case-hardened or brass trigger guard, and butt plate; walnut forearm and straight-grip buttstock.
- "S" in the model number designation refers to the Standard grade, and the "L" refers to the Deluxe grade.
- overall average length depending on configuration is 1088 mm (42 13/16"), and the average weight depending on barrel length is 2.9k gs (6.39 lbs).

Manufacturer

- Davide Pedersoli's trademark "dp" within an oval, "Davide Pedersoli & C.", "Pedersoli", "Pedersoli - Italy", or a variation thereof is usually marked on the firearm.

Action

- rolling block action.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number
- located on the top tang and may also be found on the top left side barrel flat forward of the receiver/frame.
- observed example consisted of five digits with an "R" prefix.

Calibre
- calibre is usually marked on the barrel.

Firearm Reference Number (FRN): 119783
Make: Pedersoli
Model: Remington-Rider Parlour Pistol Reproduction

Summary

Make:	Pedersoli
Model:	Remington-Rider Parlour Pistol Reproduction
Manufacturer:	Pedersoli, Davide & Cia
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	ITALY
Serial Numbering:	See Note
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
119783 - 1	17 PERCUSSION	1	52	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make designation is marked on the firearm, normally with the Pedersoli logo ("dp" within an oval).

Model

- model is not marked on firearm.
- this is a modern reproduction of the Remington-Rider single-shot parlour pistol, built by Remington between 1860 and 1863.
- features include: all-metallic construction, colour-case-hardened or "in-the-white" finish, fixed sights, spur trigger, manually-cocked hammer, and a removable breech-piece to accept a No. 11 percussion cap.
- to use this pistol, a shooter would cock the pistol, remove the breech-piece, drop a .17-calibre round ball into the chamber, cap the breech-piece with a loose No. 11 cap, then re-insert the breech-piece to seat the round ball in the rifling. When the trigger is pulled, the propulsive power of the percussion cap drives the round ball down the barrel towards the target.
- available with wooden display case.

Manufacturer

- manufacturer's designation is marked on the firearm as: "Pedersoli", "Davide Pedersoli & C.", "dp" trademark within an oval, or a variation thereof.

Action

- no propellant used, percussion cap actuated only.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- numbered on the right side of the receiver/frame.

Notes

Make

- Davide Pedersoli's trademark "dp" within an oval, "Davide Pedersoli & C.", "Pedersoli", "Pedersoli - Italy", or a variation thereof is marked on the firearm.

Model

- model designation is not marked on the firearm.
- "1862" was observed marked at the rear of the lock plate behind the hammer.
- "C.S. RICHMOND, VA" was observed marked in front of the hammer on the lock plate.
- "C.S." refers to Confederate States.
- the original "Richmond model 1862" was based on the Harper's Ferry produced 1855 US Percussion Rifle and was manufactured at Richmond Armory in Virginia with machinery and dies captured by Confederate State forces at Harpers Ferry circa 1861.
- "Richmond, C S 1862 Rifle-Musket Reproduction" is also available is a "Defarbed" version with all true manufacture proof marks and markings removed from view, these markings may be located on the underside of the barrel/receiver/frame to preserve its authentic appearance.
- features include: blade front sight and an adjustable multi leaf rear sight; round, rifled barrel with three barrel bands; ramrod is mounted under the barrel; humpback lockplate with percussion hammer is mounted on the right side; full length wood straight grip stock with nosecap and buttplate; sling swivels.
- overall length with a 1016 mm (40") barrel is 1422 mm (56"), and the average weight is 4.6 kg (10.1 lbs).

Manufacturer

- Davide Pedersoli's trademark "dp" within an oval, "Davide Pedersoli & C.", "Pedersoli", "Pedersoli - Italy", or a variation thereof is marked on the firearm.

Action

- muzzle loader.

Serial Number

- serial number is marked on the left side of the receiver/frame/barrel assembly.

Notes

Make

- Davide Pedersoli's trademark "dp" within an oval and "PEDERSOLI - ITALY" or a variation thereof is marked on the left side of the barrel.

Model

- introduced in 2005
- model designation is not marked on the barrel.
- this is a modern reproduction of a muzzle-loading, side hammer, percussion ignition sporting rifle as was popular in the American Midwest in the 1850's. The Hawken name refers to the Hawken brothers, gunsmiths from St. Louis who produced this style of rifle for the western gun trade and whose name subsequently became synonymous with the design.
- features include: blade front and adjustable rear sights; rifled, octagonal barrel; ramrod; case-hardened ramrod thimbles, forend cap; lockplate and hammer, trigger guard and butt plate; double set triggers; one piece walnut or maple half-stock; browned finish.
- overall length with a 820mm barrel is 1240mm (48 13/16"), average weight is 4.4 kg (9.69 lbs).
- overall length with a 880mm barrel is 1300mm (51 13/16"), average weight is 4.5 kg (9.91 lbs).

Manufacturer

- Davide Pedersoli's trademark "dp" within an oval and "PEDERSOLI - ITALY" or a variation thereof is marked on the left side of the barrel.

Action

- muzzle-loading.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the left side of the barrel. - observed serial number consisted of a two letter prefix and six numbers.
Calibre	- "BLACK POWDER ONLY" and "CAL. 54" is marked on the left side of the barrel. - rifling characteristics: 7-grooves, 1 turn in 65 inches.
Other Markings	- this model will bear Italian proof marks.

Notes

Make

- make is marked on the firearm with the Pedersoli logo ("dp" within an oval).

Model

- model not marked on firearm.
- this is a modern reproduction of several variants of the Sharps 1859 falling-block percussion rifle.
- features include: straight-grip walnut stock and forearm; colour case-hardened receiver/frame, lock plate, hammer, patch box, and barrel bands (number of barrel bands will vary, depending on which variant is seen); blued round barrel; and open adjustable sights.
- these rifles are built in both carbine and rifle lengths, and one version (with double set triggers) is a reproduction of the rifle which Col. Hiram Berdan used to equip two regiments of soldiers during the US Civil War; these soldiers became so well known for their marksmanship that the term "sharpshooter" ("Sharp's shooter") was coined.

Manufacturer

- manufacturer's designation is marked on the firearm as: "Pedersoli", "Davide Pedersoli & C.", "dp" trademark within an oval, or a variation thereof.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- lever operated falling (dropping) block design. - percussion breechloader.
Serial Number	- numbered on receiver/frame.
Calibre	- these rifles are breech-loading percussion single-shot rifles, and may be used with loose powder and ball, pre-wrapped paper or linen "cartridges", or pre-loaded brass "cartridges" with a flash-hole in the base.

FRT Report

Firearm Reference Number (FRN): 124157
Make: Pedersoli
Model: Sharps 1862 Confederate Carbine

Summary

Make:	Pedersoli
Model:	Sharps 1862 Confederate Carbine
Manufacturer:	Pedersoli, Davide & Cia
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	ITALY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
124157 - 1	54 PERCUSSION	1	559	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the Pedersoli name and/or trademark logo will be marked on the receiver/frame and/or barrel.

Model

- introduced in 2005.
- this is a modern reproduction of the "Confederate States model Sharps 1862 Carbine Type".
- Confederate States model Sharps 1862 Carbine Type was a copy of the "Sharps 1859 New Model" percussion breech-loader.
- "S.C. Robinson Arms Manufactory" of Virginia, originally manufactured this firearm for the Confederate States Army (C.S), between 1862 and 1864.
- features include: blued, round profile barrel; case-hardened receiver/frame; manually operated falling block action; exposed hammer; single barrel band; "V" notch rear sight and blade front sight.

Action

- lever operated falling (dropping) block design.
- percussion breechloader.

Serial Number

- serial number is marked on the receiver/frame, rationalization unknown.

Calibre

- this is a breechloading firearm that uses a percussion cap for ignition.
- rifling characteristics; 1 turn in 48 inches, 6 grooves.

Other Markings

- the receiver/frame and/or barrel will normally bear Italian proof marks and an Italian National Proof House designated catalogue number.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make

- make is marked on the firearm, usually with the Pedersoli logo ("dp" within an oval).

Model

- model is not marked on the firearm.
- this is a modern reproduction of the Sharps model "1863 New Model" falling-block percussion rifle.
- features include: straight-grip walnut stock and forearm; colour-case-hardened receiver/frame, lock plate, hammer, and barrel bands (when present); blued round (Cavalry Carbine) or octagonal (Sporting Rifle) barrel; open adjustable sights.

Manufacturer

- manufacturer's designation is marked on the firearm as: "Pedersoli", "Davide Pedersoli & C.", "dp" trademark within an oval, or a variation thereof.

Action

- lever operated falling (dropping) block design.
- percussion breechloader.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the receiver/frame. - observed serial number consisted of a prefix of "SH" followed by four numbers.
Calibre	- these rifles are breech-loading percussion single-shot rifles, and may be used with loose powder and ball, pre-wrapped paper or linen "cartridges", or pre-loaded brass "cartridges" with a flash-hole in the base.
Other Markings	- Italian proof marks may be marked on the barrel and the receiver/frame.

Notes

Make	- the Pedersoli name and/or logo will be marked on the firearm.
Model	- introduced in 2005, this model is based on a reproduction of the Sharps model 1874 rifle (although it is not an exact replica of an existing original model). - features include: tunnel front sight and an adjustable rear sight; the top tang is drilled and tapped for mounting a Creedmoor sight; external hammer; double set triggers; blued barrel, coin finished receiver/frame, hammer, lever and forend tip; walnut buttstock with a high comb and a checkered pistol grip, walnut forearm.
Manufacturer	- the Pedersoli name and/or logo will be marked on the firearm.
Action	- lever operated falling (dropping) block design.
Serial Number	- the serial number is marked on the receiver/frame, rationalization unknown.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- the calibre designation will usually be marked on the barrel.
- rifling characteristics in calibre's 45-70 GOVT and 45-90 SHARPS STRAIGHT; 1 turn in 18 inches, 6 grooves.

Other Markings

- this model will bear Italian proof marks as well as an Italian National Proof House designated catalogue number.

Notes

Make

- "DP" logo, "PEDERSOLI" and "MADE IN ITALY" are marked on the barrel.

Model

- model designation is not marked on the firearm.
- this is a commemorative version of the 1874 Sharps long-range target rifle as used in the film "Quigley Down Under" and is available with a wide range of accessories and modifications.
- features include: straight grip walnut stock with patchbox; colour case-hardened receiver/frame; blued octagonal barrel; brass forearm tip and any one of several types of adjustable target sights (ladder, peep, tang, or Creedmore, with German silver or Globe front sight).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "DP" logo, "PEDERSOLI" and "MADE IN ITALY" are marked on the barrel.
Action	- lever operated falling (dropping) block design.
Serial Number	- serial number was observed marked on the upper tang of the receiver/frame and repeated on the barrel. - observed serial number consited of a "SH" prefix followed by five numbers. - "CAT. 10649", "CAT. 10650", "CAT. 10651" or "CAT. 10652" may be marked on the barrel. - "10649", "10650", "10651" or "10652" are not the serial number, these are Italian Proof House catalogue numbers.
Calibre	- the calibre was marked on the underside of the barrel on the sample examined.
Importer	- may or may not be marked with an importer's name.
Other Markings	- the receiver/frame and barrel will usually bear Italian proof marks and a catalogue number assigned by the Italian National Proof House. When found in calibre 45-120 SHARPS STRAIGHT with a 864mm barrel the catalogue number assigned is 10652.

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
123911 - 1	69 FLINTLOCK	1	1137	Antique AFR, Section 1, para. 1	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the Pedersoli name and/or the company logo "dp" may be marked on the firearm.

Model

- introduced in 2005.
- this is a reproduction of the Springfield Arsenal produced model 1795 US Musket including the reproduction of the original markings. "SPRINGFIELD" is marked at the rear of the lock-plate behind the hammer and the American eagle logo over "US" is marked on the lock-plate ahead of the hammer.
- features include: flintlock ignition; blade front sight mounted on the front barrel band; polished steel finish; round tapered barrel; lock-plate located on the right side of the firearm; three barrel bands; a steel ramrod and a bayonet lug are located on the underside of the barrel/receiver/frame; plain, one-piece straight grip stock.
- overall length with a 1137mm (44 3/4") barrel is 1529mm, average weight is 4.6kg (10.13lbs).

Manufacturer

- the Pedersoli name and/or the company logo "dp" may be marked on the firearm.

Action

- flintlock ignition, muzzle loader.

Calibre

- "CAL.69" may be marked on the barrel/receiver/frame.

Importer

- several companies import the Pedersoli line into North America.

Notes

Make

- Davide Pedersoli's trademark "dp" within an oval and "PEDERSOLI" is marked on the left side of the barrel.

Model

- introduced in 2016.
- "WHITWORTH RIFLE Co MANCHESTER" is marked on the right side of the receiver/frame.
- "WHITWORTH PATENT" is marked on top of the barrel between the percussion nipple and the rear sight.
- "Sir Joseph Whitworths Patent Rifling" is marked on the left side of the barrel.
- this is based on the original Whitworth rifle that England supplied to the Confederacy during the American Civil War.
- features include: hooded adjustable post and bead front and ladder style rear sights; round barrel with hexagonal bore; case-hardened lock; straight walnut stock with checkered wrist and forend; three barrel bands; brass trigger guard, butt plate and nose cap; sling swivels; browned finish.
- overall length with a 914mm barrel is 1295mm (51"), average weight is 4.3kg (9.46 lbs).

Manufacturer

- Davide Pedersoli's trademark "dp" within an oval, "PEDERSOLI" and "ITALY" is marked on the left side of the barrel.

Action

- muzzle-loading.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- observed serial number consists of a two letter prefix followed by five numbers

Calibre

- "cal. 451" is marked on the left side of the barrel.
- rifling characteristics: 6-grooves, 1 turn in 20 inches.

Other Markings

- A Whitworth crest showing the image of a "wheat sheaf" atop a crown over the letter "W" is marked left of the side of the lock.

127737 - 1	45-70 GOVT	1	813	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- Davide Pedersoli's trademark "dp" within an oval, "Davide Pedersoli & C.", "Pedersoli", "Pedersoli - Italy", or a variation thereof is usually marked on the firearm.

Model

- model designation is not marked on the firearm.
- this is a modern reproduction of a Winchester model 1885 single-shot rifle.
- Winchester model 1885 used Browning patents and was also known as the "High Wall".
- features include: blade or tunnel front sight and open adjustable rear sight; upper rear tang is drilled and tapped for a tang aperature sight; matte blued octagonal rifled barrel; colour case-hardened receiver/frame; exposed spur hammer; colour case-hardened operating lever; single action trigger mechanism; checkered walnut schnabel tipped forearm and straight or pistol grip buttstock.
- overall length with a 762 mm (30") barrel is 1180 mm (46 ½"), and average weight is 5.0 kgs (11.02 lbs).
- overall length with a 813 mm (32") barrel is 1230 mm (48 7/16"), and average weight is 4.7 kgs (10.35 lbs).

Manufacturer

- Davide Pedersoli's trademark "dp" within an oval, "Davide Pedersoli & C.", "Pedersoli", "Pedersoli - Italy", or a variation thereof is usually marked on the firearm.

Action

- lever operated dropping/falling block design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- observed serial number was marked on the tang of the receiver/frame. - observed serial numbers had a two letter "HW" prefix and five numbers. - observed serial number was marked on the barrel, forward of the forearm. - observed serial number consisted of a letter "S" prefix and five numbers. - "CAT. 10891" was observed marked on the underside of the receiver/frame and repeated on the barrel. - "CAT. 10891" and "CAT. 17842" are Italian Proof House Catalog Number and not serial numbers.
Calibre	- calibre identification is marked on the barrel. - rifling characteristics in caliber 38-55 WIN: 1 turn in 12 inches (305mm), right hand twist. - rifling characteristics in caliber 45-70 GOVT: 1 turn in 18 inches (457mm), right hand twist.
Other Markings	- " D. Pedersoli Target High Wall" and " D. Pedersoli Target-Hi-Wall" was observed marked on the barrel.
Remarks	- "CAT. 10891" do not mistake this Italian Proof House Catalog Number which is roll-stamped on the bottom front of the receiver/frame for a serial number. The serial number on several examples of this firearm was found marked on the bottom flat of the hexagonal barrel, forward of the forearm.

Notes

Make

- "Pedretti" and "FP" are marked on the receiver/frame.

Model

- this is a single barrel, folding shotgun that has been exported and marketed in North America under other trade names such as Armsport and Ruko.
- the FP105 is available in three configurations;
- the "Standard" FP105 features an engraved black receiver/frame with a blued steel barrel, a top tang mounted opening lever and a beechwood buttstock and forend.
- the FP105L features a chromed and engraved receiver/frame with a blued steel barrel, a top tang mounted opening lever and a beechwood buttstock and forend.
- the FP105XL features a chromed and engraved receiver/frame with a blued steel barrel, a top tang mounted opening lever and a walnut buttstock and forend.

Manufacturer

- Francesco Pedretti (FP) was founded in 1957.
- Francesco Pedretti was located in Gardone, Val Trompe, Italy in the 1990s.

Serial Number

- the serial number will usually be marked on the water table.
- serial number rationalization is unknown.

Notes

Make

- "Pedretti" and "FP" are marked on the receiver/frame.

Model

- "FP105" and "Hushpower" are not usually marked on the firearm.
- this is a Pedretti model FP105 modified with a Hushpower sound moderator.
- Hushpower sound moderators are manufactured by The Saddlery & Gunroom of Westerham, Kent, England.
- Hushpower sound moderator is available in a kit form.
- features include: round smooth bore barrel; 50mm by 780mm long tubing mounted over the barrel; front hinged receiver/frame with top tang mounted break open lever; hammerless; cross bolt safety located behind the trigger; no forearm; checkered wood semi-pistol grip buttstock; engraved receiver/frame; blue finish.

Manufacturer

- Francesco Pedretti (FP) was founded in 1957.
- Francesco Pedretti was located in Gardone, Val Trompe, Italy in the 1990s.

Action

- break open action.

Serial Number

- serial number is usually marked on the water table.

Canadian Law Comments

- as it left the factory, this firearm is equipped with an integral sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada.
- when the sound suppressor/silencer (prohibited device) is removed the firearm is correctly identified as a "Non Restricted Firearm".

Notes

Make

- "PENETRATOR" and "PAT'D APR. 23 1878" are marked on the barrel.
- "PAT'D APR. 23 1878" represents the date that patent number 202,627 was assigned to William H. Bliss of Norwich, Connecticut.
- "PENETRATOR" was a brand/trade name used by the Norwich Pistol Co/Norwich Falls Pistol Co.

Model

- "PENETRATOR" and "PAT'D APR. 23 1878" are marked on the barrel.
- "PAT'D APR. 23 1878" represents the date that patent number 202,627 was assigned to William H. Bliss of Norwich, Connecticut.
- this firearm would have been manufactured circa 1875 to 1887.
- this type of handgun is commonly referred to as a "suicide special".
- features: solid receiver/frame; will have the W.H. Bliss patented circular side plate with a slot on the left side of the receiver/frame; single action spur trigger; fluted cylinder with locking notches at the front; cylinder pin release is a lever-type located on the front of the receiver/frame; round barrel; brass half-disc blade front sight; bird-head grip frame; case hardened trigger and hammer; nickel plated finish; grips may be walnut or checkered black hard rubber; may have light engraving on the barrel and/or receiver/frame.

Manufacturer

- manufacturer's name is not marked on this firearm; firearm was made by Norwich Pistol Company/Norwich Falls Pistol Company of Norwich, Connecticut.
- some versions of this model will be marked "PAT'D APR. 23 1878" on the left side or top of the barrel.
- "PAT'D APR. 23 1878" represents the date that patent number 202,627 was assigned to William H. Bliss of Norwich, Connecticut.
- W.H. Bliss was the plant superintendent of the Norwich Pistol Co. (circa 1873 to 1881) and its successor the Norwich Falls Pistol Co.(circa 1882 to 1887). He was not affiliated in any way with the company of Bliss & Goodyear of New Haven, Connecticut.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is usually marked on the left side of the receiver/frame underneath the grip plate. - serial numbers are numeric only without prefix or suffix.
Barrel	- rifled with 5 grooves.

Model: L6

Summary

Make:	Penn Arms
Model:	L6
Manufacturer:	Penn Arms
Level:	Manufacturer Specifications and Commercial Customization
Type:	Grenade Launcher
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
128868 - 1	37MM RIMMED	6	229	Prohibited PFR, Part 1, para. 95(z.145)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "PENN ARMS" is usually marked on the launcher.

Model

- "L6" or "L6-37" is usually marked on the front of the receiver/frame.
- "6" refers to the cylinder length of (6.2") and the "37" refers to the calibre.
- this is an anti-riot, non-lethal weapon designed to shoot various gas and baton projectiles and utilizes a spring actuated, rotary magazine where each round is automatically indexed at top dead centre.
- features include: lightweight polymer and aluminum alloy construction; iron front sight; round, smooth bore barrel; front hinged receiver/frame; cross bolt safety; front and rear pistol grips and a fixed or folding buttstock with recoil pad; sling swivels; matte black finish.
- overall length with a fixed stock is 800mm (31.5").
- overall length with a folding stock extended is 800mm (31.5") and with the stock in the stowed position is 520mm (20.5").
- also available in a shorter cylinder version as the "L8".

Manufacturer

- Penn Arms Incorporated was founded in 1989.
- Penn Arms Incorporated is located in Punxsutawney, Pennsylvania, U.S.A.
- Penn Arms Incorporated was acquired by Combined Systems Incorporated (CSI) in 2008.
- Combined Systems Incorporated (CSI) was established in 1981.
- Combined Systems Incorporated (CSI) headquarters are located in Great Neck, New York, U.S.A.
- Combined Systems Incorporated (CSI) manufacturing facilities are located in Jamestown. Pennsylvania, U.S.A.

Action

- hinged barrel design, revolver type spring motor driven cylinder/drum magazine with a mechanically operated cylinder stop pins.

Serial Number

- serial number of an observed example was marked on the receiver/frame below the trigger guard and was repeated on the front of the cylinder housing.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - cylinder/drum magazine.

Notes

Make

- "PENN ARMS" is usually marked on the receiver/frame and butt plate.

Model

- "P540" is usually marked on the front of the receiver/frame.
- this is a revolving 40mm grenade-launcher capable of firing a wide range of marking, anti-riot, explosive, or anti-personnel rounds, and utilizes a pump-action rotary magazine where each round is automatically indexed at top dead centre, when the forearm is pumped.
- features include: lightweight polymer and aluminum alloy construction; rail for mounting open or optical sights; rifled barrel; cross bolt safety; front and rear pistol grips and a fixed or telescoping buttstock with recoil pad; sling swivels; matte black finish.
- overall length with a fixed stock is 813mm (32").
- overall length with a telescoping stock extended is 813mm (32") and with the stock in the collapsed position is 533mm (21").

Manufacturer

- Penn Arms Incorporated was founded in 1989.
- Penn Arms Incorporated is located in Punxsutawney, Pennsylvania, U.S.A.
- Penn Arms Incorporated was acquired by Combined Systems Incorporated (CSI) in 2008.
- Combined Systems Incorporated (CSI) was established in 1981.
- Combined Systems Incorporated (CSI) headquarters are located in Great Neck, New York, U.S.A.
- Combined Systems Incorporated (CSI) manufacturing facilities are located in Jamestown. Pennsylvania, U.S.A.

Action

- this firearm operates as a "pump-action revolver", where pumping the forward grip revolves the cylinder, then squeezing the double-action trigger fires the chamber lined up with the barrel.

Serial Number

- serial-numbered on the receiver/frame.

Notes

Make

- "PENN ARMS" is usually marked on the launcher.

Model

- "PL8" may marked on the launcher.
- "PL8" is a stand alone grenade launcher with a fixed or retractable buttstock.
- "PL8" features a front hinged receiver/frame with a manually operated pump action which rotates a cylinder/drum magazine.
- features include: round, smooth bore steel barrel; front hinged aluminium alloy receiver/frame with a cylinder/drum magazine; action release is located on the left side of the receiver/frame; cocking lever is located on the right side of the receiver/frame; safety lever is located on the left side of the receiver/frame; double action only (DAO) trigger mechanism; synthetic pistol grip forearm, pistol grip, and straight grip buttstock or retractable buttstock; various rail and sight options; blued/black finish.
- overall length with a fixed stock is 864 mm (34").
- overall length with a folding stock extended is 864 mm (34") and with the stock in the retracted position is 584 mm (23").

Manufacturer

- Penn Arms Incorporated was founded in 1989.
- Penn Arms Incorporated is located in Punxsutawney, Pennsylvania, U.S.A.
- Penn Arms Incorporated was acquired by Combined Systems Incorporated (CSI) in 2008.
- Combined Systems Incorporated (CSI) was established in 1981.
- Combined Systems Incorporated (CSI) headquarters are located in Great Neck, New York, U.S.A.
- Combined Systems Incorporated (CSI) manufacturing facilities are located in Jamestown. Pennsylvania, U.S.A.

Action

- hinged barrel design, manual pump action system which rotates a cylinder/drum magazine.

Serial Number

- serial-numbered on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- cylinder length is advertised to accept up to 40X127MM. - rifling characteristics: 6 grooves with one turn in 1200mm (47").
Shots	- cylinder/drum magazine.

128838 - 1	37MM REBATED RIM	1	305	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "PENN ARMS" is usually marked on the receiver/frame and butt plate.

Model

- "SL1" may be marked on the barrel.
- this is a single shot, anti-riot, non-lethal weapon designed to shoot various gas and baton projectiles.
- features include: rifled barrel; front iron sight; cross bolt and hammer lock safety; constructed of lightweight polymer and aluminum alloy materials; optional Picatinny or Weaver rails; matte black finish; sling swivels; front and rear pistol grips and a fixed or folding buttstock with adjustable cheek piece and recoil pad.
- overall length is 711mm (28") with a fixed stock.
- also available in a six shot version as the "SL65".

Manufacturer

- Penn Arms Incorporated was founded in 1989.
- Penn Arms Incorporated is located in Punxsutawney, Pennsylvania, U.S.A.
- Penn Arms Incorporated was acquired by Combined Systems Incorporated (CSI) in 2008.
- Combined Systems Incorporated (CSI) was established in 1981.
- Combined Systems Incorporated (CSI) headquarters are located in Great Neck, New York, U.S.A.
- Combined Systems Incorporated (CSI) manufacturing facilities are located in Jamestown. Pennsylvania, U.S.A.

Type

- anti-riot, less-lethal weapon: designed to shoot various gas and baton projectiles.

Action

- hinged barrel design.
- does not discharge a projectile at a muzzle velocity exceeding 152.4 mps and/or muzzle a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is usually marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments - Natural Resources Canada has a vested interest in the natures of ammunition employed by these weapons, which fall under the ambit of the Explosives Act.

Notes

Make

- "PENN ARMS" over "PUNXSUTAWNEY, PA" was observed on the top of the cylindre assembly.

Model

- "SL6-37" is marked on the trigger group and/or cylinder.
- this is an anti-riot, non-lethal weapon designed to shoot various gas and baton projectiles and utilizes a spring actuated, rotary magazine where each round is automatically indexed at top dead centre.
- features include: rifled barrel; front iron sight; cross bolt safety; constructed of lightweight polymer and aluminum alloy materials; optional Picatinny or Weaver rails; matte black finish; sling swivels; front and rear pistol grips and a fixed or folding buttstock with recoil pad.
- overall length is 838mm (33") with a fixed stock.
- also available in a single shot version as the "SL1".

Manufacturer

- Penn Arms Incorporated was founded in 1989.
- Penn Arms Incorporated is located in Punxsutawney, Pennsylvania, U.S.A.
- Penn Arms Incorporated was aquired by Combined Systems Incorporated (CSI) in 2008.
- Combined Systems Incorporated (CSI) was established in 1981.
- Combined Systems Incorporated (CSI) headquarters are located in Great Neck, New York, U.S.A.
- Combined Systems Incorporated (CSI) manufacturing facilities are located in Jamestown. Pennsylvania, U.S.A.

Action

- hinged barrel design, revolver type spring motor driven cylinder/drum magazine with a mechanically operated cylinder stop pins.
- does not discharge a projectile at a muzzle velocity exceeding 152.4 mps and/or muzzle a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number may be marked on the receiver/frame and/or on the cylinder assembly.
- serial number observed consisted of a letter "M" prefix and four numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - cylinder/drum magazine.

Canadian Law Comments - Natural Resources Canada has a vested interest in the natures of ammunition employed by these weapons, which fall under the ambit of the Explosives Act.
