Notes

Make

- brand name owned by the manufacturer, R J Miller & Associates.

Model

- pre-production prototype guns were built utilizing Browning / Miroku shotguns as a starting point.
- these firearms are a unique concept in that they are equipped with two complete "quick change" receivers complete with trigger mechanisms to permit a competition shooter to continue competing with (essentially) the same firearm after an equipment failure by exchanging receivers.
- Note: this model is capable of accepting the superposed, two barrel sets from other Miller Medalist firearms.

Manufacturer

- Miller R J & Associates / Miroku Firearms Manufacturing reflects the fact that the original manufacturer is Miroku and that R J Miller & Associates has extensively re-manufactured the firearms.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- pre-production prototype guns were built utilizing Browning / Miroku shotguns as a starting point. These prototype firearms will be found marked with both Miroku assigned serial numbers and a Miller Medalist serial number: ie) ten characters in the Browning serial number rationalization and a six digit Miller Medalist serial number which may also contain a suffix letter "S". This letter denotes the spare receiver /frame in the Miller Medalist set. The original Browning / Miroku serial number may be found under the "side-plates" on the re-manufactured receiver/frame.

FRT Report

Firearm Reference Number (FRN): 25969
Make: Minneapolis Firearms
Model: Protector

Summary

Make:	Minneapolis Firearms
Model:	Protector
Manufacturer:	
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
25969 - 2	32 EXTRA SHORT RF	7	44	Antique AFR, Section 1, para. 6	Manufacturer Specifications and Commercial Customization	
25969 - 1	32 PROTECTOR	7	51	Antique AFR, Section 1, para. 6	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is marked on the sideplate: "Minneapolis Firearms Co."
- this company was incorporated circa 1890 to produce "The Protector".
- by 1892, the CHICAGO FIRE ARMS COMPANY had been established to take over marketing of "The Protector" for the American market.

Model

- model designation is marked on the side plate.
- manufactured from 1891 to 1892.
- model may also be known as "Protector" or "Protector Palm Pistol".
- marked "THE PROTECTOR MINN. FIRE ARMS CO" around a central disk on one side of the pistol, and "PATENTED MARCH 6, 1883" on the other (this is the original French patent date of M. Turbiaux, the designer).

Action

- this is an unusual revolver of the "squeezer palm-pistol" type; cartridges are contained in an inner revolving turret that spin to align with the barrel as the squeeze lever is compressed.

FRT Report

Firearm Reference Number (FRN): 114475
Make: Miroku
Model: Flintlock Pistol

Summary

Make:	Miroku
Model:	Flintlock Pistol
Manufacturer:	Miroku Firearms Manufacturing
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	JAPAN
Serial Numbering:	
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
114475 - 1	69 FLINTLOCK	1	229	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- make is usually not marked on the firearm.

Model

- this is a generic entry for those Mioku Flintlock pistols that are not identifiable as to model.
- Model 101 features include: round smooth bore barrel, brass fittings, no sights, loop type trigger guard and a cherry straight grip full stock.
- Model 103 features include: blued octagonal smooth bore barrel, case hardened lockplate, brass fittings, blade front sight, loop type trigger guard and a walnut straight grip full stock.
- Model 105 features include: octagonal changing to round blued barrel with reinforced muzzle, case hardened lock plate, no sights, brass fittings and a walnut straight grip full stock.
- Model 107 features include: birds head grip single piece full stock, octagonal smooth bore barrel, no sights, brass fittings and a loop type trigger guard.
- Model 109 features include: smooth bore octagonal and round barrel with reinforced muzzle, brass fittings, no sights, loop type trigger guard and a birds head grip one piece walnut stock.

Manufacturer

- manufacturer's designation is usually not marked on the firearm.
- firearm may be marked "Made in Japan"

Action

- muzzle loading.

Remarks

- Miroku produced a line of flintlock pistols that had minor differences such as barrel profile, sights, finish and stock style.

Notes

Model

- this is a generic entry for the Miroku Over Under shotgun. Other FRT entries may exist which might better describe the firearm being examined.
- this is the same shotgun that Miroku manufactures for Browning who market it under the Citori name.
- boxlock over/under shotgun, made in several configurations for different sports and may encompass several grades of engraving, solid or ventilated rib, single selective or double triggers, ejectors, various calibres and chamber lengths.
- these shotguns can be ordered with an adjustable cheekpiece in the Trap and Sporting versions, checkered walnut pistol grip stock and forearm.
- manufacturer name and calibre marked on the barrels near the chambers.

Manufacturer

- full name is, Miroku Firearms Manufacturing, located in Kochi-city, Japan.

Action

- over/under design.

Serial Number

- serial number is located on the receiver/frame.

FRT Report

Firearm Reference Number (FRN): 181142
Make: Missile Launcher
Model: 9K111 Fagot

Summary

Make:	Missile Launcher
Model:	9K111 Fagot
Manufacturer:	KBP
Level:	Manufacturer Specifications and Commercial Customization
Type:	Other
Action:	Single-Shot
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
181142 - 1	120MM MISSILE	1	1098	Prohibited PFR, Part 1, para. 95(z.11)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is not marked on the firearm.
- this make is used to describe launchers that fire guided missiles against various targets.
- a missile launcher is distinguished from a rocket launcher by the fact that, where a rocket launcher fires a rocket-propelled projectile on an unguided trajectory, a missile launcher fires a rocket-propelled projectile on a trajectory that can be modified, either by an internal guidance system, or by a control unit that sends commands to the missile by laser, radar, or wire guidance.

Model

- Full model designation is not marked on the launcher; model designation is derived from the Russian GRAU index number ("9K111") and the informal Russian name for this system ("Fagot", or "Bassoon"; in Russian service, this missile system is colloquially known as the "Malyutka", or "Baby").
- This missile has been assigned the NATO code-name of "Spigot".
- This is a current-issue anti-tank guided missile launcher that entered Russian service in 1970; this launcher is manufactured in a number of variations, and versions of this launcher are in current service in more than 30 countries around the world.
- Features include: standard tubular launcher format, which may be painted in a variety of matte colours, depending on the tactical employment; a low-mounted tripod base with periscopic sighting mast; and these missiles are normally shipped with packing and protective materials sealing the missile from moisture and dust.

Manufacturer

- the manufacturer may or may not be marked on the launcher or launch tubes.

Action

- single-shot missile launcher that is reloaded with pre-loaded missile tubes.

Serial Number

- serial-numbered on the launch tube, along with Russian GRAU stock numbers ("9M111") and dates of manufacture.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Summary

Make:	Missile Launcher
Model:	9K310 Igla-1
Manufacturer:	Degtyarev
Level:	Manufacturer Specifications and Commercial Customization
Type:	Other
Action:	Single-Shot
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
19936 - 1	72MM MISSILE	1	1700	Prohibited PFR, Part 1, para. 95(z.111)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is not marked on the firearm.
- this make is used to describe launchers that fire guided missiles against various targets.
- a missile launcher is distinguished from a rocket launcher by the fact that, where a rocket launcher fires a rocket-propelled projectile on an unguided trajectory, a missile launcher fires a rocket-propelled projectile on a trajectory that can be modified, either by an internal guidance system, or by a control unit that sends commands to the missile by laser, radar, or wire guidance.

Model

- The model designation is not marked on the launcher; model designation is derived from the Russian GRAU index number ("9K310") and the colloquial Russian name for this system ("Igla", or "Needle").
- This is a current-issue anti-aircraft man-portable guided missile launcher that entered Russian service in 1981; this launcher is manufactured in a number of variations, and versions of this launcher are in current service in more than 30 countries around the world.
- This launcher is an upgraded version of the earlier 9K32 Strela-2 (SA-7 Grail); a further-improved version of the 9K310 Igla-1 has also been fielded as the "9K338 Igla-S" (the SA-24 Grinch, or "Igla-Super").
- Features include: standard tubular launcher format, which may be painted in a variety of matte colours, depending on the tactical employment; a detachable combination shoulder-stock/pistol-grip with trigger; a battery with integral round cooling globe mounted below the launch tube, forward of the pistol-grip; and these missiles are normally shipped with packing and protective materials sealing the missile from moisture and dust.

Manufacturer

- the manufacturer is not normally marked on the launch tube, but may be marked on the stock/trigger unit.
- Degtyarev's logo consists of "ZiD" in Cyrillic (resembling "3iA").

Action

- single-shot disposable missile launcher.
- examples of these launchers have been known to be reloaded after use, but this requires a new missile and seeker/tracking unit.

Serial Number

- serial-numbered on the launch tube, along with Russian GRAU stock numbers and dates of manufacture.

Make:	Missile Launcher
Model:	9K32 Strela-2
Manufacturer:	KBM Kolomna
Level:	Manufacturer Specifications and Commercial Customization
Type:	Other
Action:	Single-Shot
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
181082 - 1	72MM MISSILE	1	1574	Prohibited PFR, Part 1, para. 95(z.112)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is not marked on the firearm.
- this make is used to describe launchers that fire guided missiles against various targets.
- a missile launcher is distinguished from a rocket launcher by the fact that, where a rocket launcher fires a rocket-propelled projectile on an unguided trajectory, a missile launcher fires a rocket-propelled projectile on a trajectory that can be modified, either by an internal guidance system, or by a control unit that sends commands to the missile by laser, radar, or wire guidance.

Model

- The model designation is not marked on the launcher; model designation is derived from the Russian GRAU index number ("9K32") and the colloquial Russian name for this system ("Strela-2", or "Arrow-2"); the launcher consists of several discrete components, including a 9M32 or 9M32M guided missile (contained in a launch tube with its own GRAU number), a 9P53 trigger/buttstock unit used for aiming and firing, and a short-life battery contained in the buttstock below the launch tube.
- This is a past-issue first-generation anti-aircraft man-portable guided missile launcher that entered Russian service in 1968; this launcher has been manufactured in a number of variations, and versions of this launcher are in current service in more than 60 countries around the world.
- Features include: standard tubular launcher format, which may be painted in a variety of matte colours, depending on the tactical employment; a detachable combination shoulder-stock/pistol-grip with trigger; fixed open ring sights canted off of the left side of the launch tube; and these missiles are normally shipped with packing and protective materials sealing the missile from moisture and dust.

Manufacturer

- the manufacturer is not normally marked on the launch tube, but may be marked on the stock/trigger unit.
- KBM Kolomna's logo consists of a triangle intersecting a toothed gear-wheel, over a banner containing the Cyrillic letters "KBM".
- the "Konstruktorskoe Byuro Mashinoestroeniya - Kolomna" ("Engineering Design Bureau - Kolomna") was founded in 1942, in Kolomna, Russia (105km south-east of Moscow), to design and manufacture smooth-bore artillery and mortars; currently, it specializes in the design and manufacture of guided, anti-tank, and anti-aircraft missile systems.

Action

- single-shot disposable missile launcher.

Serial Number

- serial-numbered on the launch tube, along with Russian GRAU stock numbers ("9M32") and dates of manufacture.

Notes

Make

- the make is not marked on the firearm.
- this make is used to describe launchers that fire guided missiles against various targets.
- a missile launcher is distinguished from a rocket launcher by the fact that, where a rocket launcher fires a rocket-propelled projectile on an unguided trajectory, a missile launcher fires a rocket-propelled projectile on a trajectory that can be modified, either by an internal guidance system, or by a control unit that sends commands to the missile by laser, radar, or wire guidance.

Model

- The model designation is not marked on the launcher; model designation is derived from the Russian GRAU index number ("9K34") and the colloquial Russian name for this system ("Strela-3", or "Arrow-3"); the launcher consists of several discrete components, including a 9M36 guided missile (contained in a launch tube with its own GRAU number), a 9P58 trigger/buttstock unit used for aiming and firing, and a short-life battery contained in the buttstock below the launch tube.
- This is a anti-aircraft man-portable guided missile launcher that entered Russian service in 1974; this launcher has been manufactured in a number of variations, and versions of this launcher are in current service in more than 30 countries around the world.
- Features include: standard tubular launcher format, which may be painted in a variety of matte colours, depending on the tactical employment; a detachable combination shoulder-stock/pistol-grip with trigger; fixed open ring sights canted off of the left side of the launch tube; and these missiles are normally shipped with packing and protective materials sealing the missile from moisture and dust.

Manufacturer

- the manufacturer is not normally marked on the launch tube, but may be marked on the stock/trigger unit.
- KBM Kolomna's logo consists of a triangle intersecting a toothed gear-wheel, over a banner containing the Cyrillic letters "KBM".
- the "Konstruktorskoe Byuro Mashinoestroeniya - Kolomna" ("Engineering Design Bureau - Kolomna") was founded in 1942, in Kolomna, Russia (105km south-east of Moscow), to design and manufacture smooth-bore artillery and mortars; currently, it specializes in the design and manufacture of guided, anti-tank, and anti-aircraft missile systems.

Action

- single-shot disposable missile launcher.

Serial Number

- serial-numbered on the launch tube, along with Russian GRAU stock numbers ("9M36") and dates of manufacture.

181022 - 1	72MM MISSILE	1	1574	Prohibited PFR, Part 1, para. 95(z.114)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is not marked on the firearm.
- this make is used to describe launchers that fire guided missiles against various targets.

Model

- the model is not marked on the launcher; this model is derived from the Russian GRAU index number ("9K38") and the colloquial Russian name for this system ("Igla", or "Needle"); the launcher consists of several discrete components, including a 9M39 guided missile (contained in a launch tube with its own GRAU number), a 9M313 trigger/buttstock unit used for aiming and firing, and a short-life battery with its own cooling unit contained in a soft-ball-sized globe below the launch tube.
- this is a current-issue anti-aircraft man-portable guided missile launcher that entered Russian service in 1981; this launcher is manufactured in a number of variations, and versions of this launcher are in current service in more than 30 countries around the world.
- this launcher has an effective range against airborne targets of more than 5 kilometers, at altitudes up to 3500 metres.
- this launcher is an upgraded version of the earlier "9K310 Igla-1" (SA-16 Gimlet), with an improved seeker warhead to improve tracking against aircraft that deploy chaff or flare countermeasures; a further-improved version of the 9K38 Igla has also been fielded as the "9K338 Igla-S" (the SA-24 Grinch, or "Igla-Super"). All of these launchers fire self-guided missiles that are locked onto a target with the attached aiming unit, fired, and then the onboard seeker warhead guides the missile to the target. On contact with the target, the fuze detonates not only the fragmentary warhead, but also any remaining solid rocket fuel in the missile.
- these launchers are seen in several variations and tactical applications, including export, paratrooper, helicopter, and naval versions; a two-shot lightweight anti-aircraft system is also produced as the "Dzhigit" ("Trick Rider"), so-called because the operator sits on a low mount between the two missiles, and this system may be seen placed on the ground or on the back of a truck, to serve as convoy air defence.
- features include: standard tubular launcher format, which may be painted in a variety of matte colours, depending on the tactical employment; a detachable combination shoulder-stock/pistol-grip with trigger; a battery with integral round cooling globe mounted below the launch tube, forward of the pistol-grip; and these missiles are normally shipped with packing and protective materials sealing the missile from moisture and dust.

Manufacturer

- the manufacturer is not normally marked on the launch tube, but may be marked on the stock/trigger unit.
- Degtyarev's logo consists of "ZiD" in Cyrillic (resembling "3iA").

Action

- single-shot disposable missile launcher.
- examples of these launchers have been known to be reloaded after use, but this requires a new missile and seeker/tracking unit.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number - serial-numbered on the launch tube, along with Russian GRAU stock numbers ("9M39") and dates of manufacture.

Notes

Make

- the make is not marked on the firearm.
- this make is used to describe launchers that fire guided missiles against various targets.
- a missile launcher is distinguished from a rocket launcher by the fact that, where a rocket launcher fires a rocket-propelled projectile on an unguided trajectory, a missile launcher fires a rocket-propelled projectile on a trajectory that can be modified, either by an internal guidance system, or by a control unit that sends commands to the missile by laser, radar, or wire guidance.

Model

- The model designation may or may not be marked on the missile launcher.
- This is a guided missile system originally developed in the late 1960s by Hughes Aircraft, but which has grown into a large family of helicopter, vehicle, and man-portable missile launcher systems, all for use against armoured vehicles and heavily-fortified buildings.
- Features may include: matte painted finish; portable or vehicle-mounted launchers will have an electro-optical launch/guidance unit on a tripod or pintle, with interchangeable missile tubes in a cradle on the right side; and a wire-guided missile that boosts to maximum velocity within 2 seconds of launch, to prevent target avoidance and countermeasures.

Manufacturer

- the manufacturer may or may not be marked on the launcher.

Action

- single-shot missile launcher, with missiles contained in disposable launch tubes.

Serial Number

- the missile or launch tube is serial-numbered, with lot and date codes.

Notes

Make

- the make is not marked on the firearm.
- this make is used to describe launchers that fire guided missiles against various targets.
- a missile launcher is distinguished from a rocket launcher by the fact that, where a rocket launcher fires a rocket-propelled projectile on an unguided trajectory, a missile launcher fires a rocket-propelled projectile on a trajectory that can be modified, either by an internal guidance system, or by a control unit that sends commands to the missile by laser, radar, or wire guidance.

Model

- the model may or may not be marked on the launcher.
- this is a wire-guided missile launcher adopted and used by a number of countries, including Canada, France, Brazil, and Norway.
- this launcher is similar in design and concept to the MILAN anti-tank missile launcher.
- this launcher uses single-shot pre-loaded missile tubes that are attached to a guidance unit on a short tripod firing stand; after firing, the empty missile tube is removed and discarded, allowing a new, loaded missile tube to be attached in its place.
- this missile launcher has a range of approximately 600 metres.
- in use, a gunner aims the missile through a video camera attached to the guidance unit, and, when the missile is fired, the guidance unit steers the missile to the target via a control wire that spools out the rear of the missile.
- features include: matte painted finish; muzzle and rear caps that are removed before firing; and a rectangular guidance unit on a short tripod (these missiles are intended to be launched by a gunner laying on their stomach, to reduce their visible profile).

Manufacturer

- the manufacturer may or may not be marked on the launcher.
- MBDA is an international conglomerate with subsidiaries in numerous countries, any of which may produce a number of components used in this missile system.
- MBDA was formed through a merger of several European defence companies, including Aerospatiale-Matra (France), Alenia-Marconi (Italy), Matra BAe (United Kingdom), and Alenia Difesa (Italy).

Action

- single-shot missile launcher with individual missiles contained in disposable launch tubes.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial-numbered on the control unit and launch tubes, with lot and manufacture dates.
Barrel	- the missile itself measures 891mm long, the launch tube is 926mm long, and the entire unit with launch tube in firing condition is 1126mm long.

Notes

Make

- the make is not marked on the firearm.
- this make is used to describe launchers that fire guided missiles against various targets.
- a missile launcher is distinguished from a rocket launcher by the fact that, where a rocket launcher fires a rocket-propelled projectile on an unguided trajectory, a missile launcher fires a rocket-propelled projectile on a trajectory that can be modified, either by an internal guidance system, or by a control unit that sends commands to the missile by laser, radar, or wire guidance.

Model

- The model designation may or may not be marked on the missile launcher.
- This is a current-issue anti-tank missile originally adopted by the United States in 1996, and sold to numerous NATO and friendly powers.
- These missiles are aimed with a day/night thermal sight that relays targeting information to the missile prior to launch, and the missile's internal guidance takes over after launch.
- Features include: matte painted finish; expanded foam protective buffers on the guidance unit and ends of the disposable launch tubes; infrared/thermal guidance unit with clear lens at the front of the unit; dual spade aiming/firing grips; and a clear missile nose-cap, which allows the missile to track a moving target once launched.

Manufacturer

- the manufacturer may or may not be marked on the launcher.

Action

- reusable aiming/guidance unit with single-shot disposable missile launch tubes.

Serial Number

- serial-numbered on each individual missile tube, with manufacturer date and lot codes.

Notes

Make

- the make is not marked on the firearm.
- this make is used to describe launchers that fire guided missiles against various targets.
- a missile launcher is distinguished from a rocket launcher by the fact that, where a rocket launcher fires a rocket-propelled projectile on an unguided trajectory, a missile launcher fires a rocket-propelled projectile on a trajectory that can be modified, either by an internal guidance system, or by a control unit that sends commands to the missile by laser, radar, or wire guidance.

Model

- The model designation is not marked on the launcher; model designation is derived from the American missile launcher identifier number ("FIM-43") and the colloquial American name for this system ("Redeye").
- This is a past-issue anti-aircraft man-portable guided missile launcher that entered US service in 1968.
- features include: standard tubular launcher format, which may be painted in a variety of matte colours, depending on the tactical employment; a missile with a clear, round lens to allow tracking of a heat source; an optical sight that allows the user to track a target until the missile's internal guidance system locks onto it; a thumb-operated trigger bar built into the forearm that activates the tracking module of the launcher; a pistol-grip with launching trigger; a vertically-mounted battery below the launch tube, forward of the pistol-grip; and these missiles are normally shipped with packing and protective materials sealing the missile from moisture and dust.
- this missile was replaced in US service in 1992, by the FIM-92 Stinger.

Manufacturer

- the manufacturer may or may not be marked on the launcher.

Action

- single-shot disposable missile launcher.

Serial Number

- serial-numbered on the launch tube, with a date of manufacture.

- a missile launcher is distinguished from a rocket launcher by the fact that, where a rocket launcher fires a rocket-propelled projectile on an unguided trajectory, a missile launcher fires a rocket-propelled projectile on a trajectory that can be modified, either by an internal guidance system, or by a control unit that sends commands to the missile by laser, radar, or wire guidance.

Model

- The model designation may or may not be marked on the launcher; markings will normally be in Chinese ideographs.
- This is a domestic Chinese copy of the Russian 9K32 "Strela" missile launcher (known to the west/NATO as the "SA-7 Grail"). The Chinese call this launcher the "Hong Nu 5" ("Red Cherry 5"), abbreviated as the "HN-5".
- This launcher entered Chinese service in the mid-1980s, after examples of the Russian "Strela" had been obtained from Egypt.
- Features include: standard tubular launcher format, which may be painted in a variety of matte colours, depending on the tactical employment; a detachable combination shoulder-stock/pistol-grip with trigger; fixed open ring sights canted off of the left side of the launch tube; and these missiles are normally shipped with packing and protective materials sealing the missile from moisture and dust.

Manufacturer

- the manufacturer may or may not be marked on the launcher.

Action

- single-shot disposable missile launcher.

Serial Number

- serial-numbered on the launch tube, with lot numbers and dates of manufacture.

Notes

Make

- the make is not marked on the firearm.
- this make is used to describe launchers that fire guided missiles against various targets.
- a missile launcher is distinguished from a rocket launcher by the fact that, where a rocket launcher fires a rocket-propelled projectile on an unguided trajectory, a missile launcher fires a rocket-propelled projectile on a trajectory that can be modified, either by an internal guidance system, or by a control unit that sends commands to the missile by laser, radar, or wire guidance.

Model

- The model designation may or may not be marked on the launcher; "Ingwe" is Xhosa for "leopard".
- This is a laser-guided anti-tank missile system developed by Denel of South Africa in the early 2000s, as a replacement for their then-issued "MILAN" anti-tank systems.
- Features include: matte painted finish; single or multiple launch platforms; day or night sights; laser designator; and (usually) a tandem warhead to defeat explosive or reactive armour.

Manufacturer

- the manufacturer or logo thereof is marked on the launcher.

Action

- single-shot missile launcher with individual missiles contained in disposable launch tubes.

Serial Number

- serial-numbered on the launch tube with lot and date codes.

181242 - 1	140MM MISSILE	1	1154	Prohibited PFR, Part 1, para. 95(z.122)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is not marked on the firearm.
- this make is used to describe launchers that fire guided missiles against various targets.
- a missile launcher is distinguished from a rocket launcher by the fact that, where a rocket launcher fires a rocket-propelled projectile on an unguided trajectory, a missile launcher fires a rocket-propelled projectile on a trajectory that can be modified, either by an internal guidance system, or by a control unit that sends commands to the missile by laser, radar, or wire guidance.

Model

- The model designation may or may not be marked on the firearm.
- This is an anti-tank wire-guided missile system adopted by the United States in 1975, that combines an infrared/optical aiming system with a tube-launched wire-guided missile; these missiles are the US equivalent of the Warsaw Pact "AT-4 Spigot" (Russian designator "9K111 Fagot"/Bassoon).
- Features include: matte olive drab painted finish, with markings in black and yellow; expanding foam cone-shaped shock absorbers at each end of the launch tube, to protect the missile during storage and transport; a detachable aiming unit (either daytime/optical or night vision/electronic) that provides guidance to the missile in flight; and this launcher is usually fired from a light bipod frame that prevents the gunner from flinching and jerking the missile low into the ground during the firing sequence.
- This missile has been replaced in US service by the FGM-148 Javelin, but stocks remain in storage. Additionally, Iran manufactures an unlicensed copy of the Dragon as the "Saegheh" ("Thunderbolt").

Manufacturer

- the manufacturer may or may not be marked on the launcher.

Action

- single-shot rocket launcher with disposable launch tubes and re-usable sighting unit.

Serial Number

- individual launch tubes are serial-numbered, with a date of manufacture.

Notes

Make

- the make is not marked on the firearm.
- this make is used to describe launchers that fire guided missiles against various targets.
- a missile launcher is distinguished from a rocket launcher by the fact that, where a rocket launcher fires a rocket-propelled projectile on an unguided trajectory, a missile launcher fires a rocket-propelled projectile on a trajectory that can be modified, either by an internal guidance system, or by a control unit that sends commands to the missile by laser, radar, or wire guidance.

Model

- The model designation may or may not be marked on the launcher.
- This is a wire-guided missile launcher adopted and used by a number of countries, including Canada, France, Brazil, and Norway, similar in design and concept to the Eryx anti-tank missile launcher.
- This launcher uses single-shot pre-loaded missile tubes that are attached to a guidance unit on a short tripod firing stand; after firing, the empty missile tube is removed and discarded, allowing a new, loaded missile tube to be attached in its place.
- Features include: matte painted finish; muzzle and rear caps that are removed before firing; and a rectangular guidance unit on a short tripod (these missiles are intended to be launched by a gunner laying on their stomach, to reduce their visible profile).

Manufacturer

- the manufacturer may or may not be marked on the launcher.
- MBDA is an international conglomerate with subsidiaries in numerous countries, any of which may produce a number of components used in this missile system.
- MBDA was formed through a merger of several European defence companies, including Aerospatiale-Matra (France), Alenia-Marconi (Italy), Matra BAe (United Kingdom), and Alenia Difesa (Italy).

Action

- single-shot missile launcher with individual missiles contained in disposable launch tubes.

Serial Number

- serial-numbered on the control unit and launch tubes, with lot and manufacture dates.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - this missile may have warheads of varying diameters, depending on the generation of the missile used, but they all have rear diameters of 125mm (with folded guidance fins).

19382 - 1	127MM MISSILE	1	1397	Prohibited PFR, Part 1, para. 95(z.125)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is not marked on the firearm.
- this make is used to describe launchers that fire guided missiles against various targets.
- a missile launcher is distinguished from a rocket launcher by the fact that, where a rocket launcher fires a rocket-propelled projectile on an unguided trajectory, a missile launcher fires a rocket-propelled projectile on a trajectory that can be modified, either by an internal guidance system, or by a control unit that sends commands to the missile by laser, radar, or wire guidance.

Model

- The model may or may not be marked on the launcher; this is an anti-aircraft missile system that the UK military adopted in the mid-1990s, multiple-missile configurations may be seen in tripod, vehicle, helicopter, and ship-mounted versions. The UK adopted the Starstreak missile system as battalion air defence.
- These missile systems are normally seen in multiple-launch tube configurations on pintle mounts, allowing multiple missiles to be launched in sequence.
- Features may include: matte painted finish; sealed launch tubes to prevent moisture or dust contamination; a visually-operated guidance and tracking unit that may be remote or attached directly to the launcher; and the static versions of this launcher normally have a crew complement including a single gunner and one or more spotters.

Manufacturer

- the manufacturer may or may not be marked on the launcher.

Action

- each missile is contained in a single-shot disposable launch tube that is discarded after firing.

Serial Number

- individual launch tubes are serial-numbered, with a date of manufacture.

Notes

Make

- the make is not marked on the firearm.
- this make is used to describe launchers that fire guided missiles against various targets.
- a missile launcher is distinguished from a rocket launcher by the fact that, where a rocket launcher fires a rocket-propelled projectile on an unguided trajectory, a missile launcher fires a rocket-propelled projectile on a trajectory that can be modified, either by an internal guidance system, or by a control unit that sends commands to the missile by laser, radar, or wire guidance.

Model

- The model designation may or may not be marked on the launcher; where present, it may only be marked in Persian. "Toophan" is Persian for "Typhoon".
- This is a wire- or laser-guided anti-tank missile manufactured by Iran as an unlicensed copy of the US "BGM-71 TOW" missile system.
- Features include: matte painted tripod launcher, electronic guidance system, and replaceable launch tube; wire-guided missile (some with extended nose probe fuzing to defeat reactive armour) in a single-shot disposable launch tube; and these missiles may also be seen on vehicle and helicopter mounts.

Manufacturer

- the manufacturer or logo thereof may or may not be marked on the firearm; Iran is known to have produced "sterile" firearms for export.

Action

- single-shot guided missile fired from a reloadable launcher unit.

Serial Number

- serial-numbered on the launcher tube with the date of manufacture.

Notes

Make

- the make is not marked on the firearm.
- this make is used to describe launchers that fire guided missiles against various targets.
- a missile launcher is distinguished from a rocket launcher by the fact that, where a rocket launcher fires a rocket-propelled projectile on an unguided trajectory, a missile launcher fires a rocket-propelled projectile on a trajectory that can be modified, either by an internal guidance system, or by a control unit that sends commands to the missile by laser, radar, or wire guidance.

Model

- the model is marked on the missile launcher in Japanese ideographs.
- this is a Japanese guided missile, similar in concept to the US BGM-71 TOW, designed for use by the Japanese Self-Defence Forces against tanks and landing craft.
- features include: matte painted finish; an electro-optical launch/guidance unit on a tripod, with interchangeable missile tubes in a cradle on the right side; and a wire-guided missile that boosts to a velocity of ~200 metres per second after launch.
- this missile system requires the operator to keep the aiming system trained on the target until the missile impacts, as guidance corrections are relayed to the missile via trailing wires.

Manufacturer

- the manufacturer is marked on the launcher; all non-numeric markings on this launcher are normally in Japanese kanji characters.

Action

- single-shot missile launcher, with missiles contained in disposable launch tubes.

Serial Number

- the missile or launch tube is serial-numbered, with lot and date codes.

Notes

Make

- "MITCHELL ARMS", "MITCHELL ARMS CORP." or "MITCHELL ARMS, INC." is marked on the firearm.
- "Mitchell Arms" was a manufacturer, importer and distributor from 1980 to 1997.
- "Mitchell Arms" had offices in Anaheim, Compton, Costa Mesa, and Santa Ana, California and Winchester, Virginia, U.S.A., and in Winchester, England.
- "Mitchell Arms" open a new factory and offices in Santa Ana, California in 1995.

Model

- "- ARMI JAGER ITALY - MOD AP80 - CAL 22LR CAT 2344 -" over "IMPORTED BY MITCHELL ARMS ANAHEIM CA USA/AK 22" was marked on an observed specimen.
- visually resembles a Kalashnikov AK47 assault rifle.
- this firearm is a 22 calibre, semi-automatic, blowback operated rifle.
- features include: replica gas tube, walnut stock and forend or folding stock, post front sight, adjustable rear sight and built in cleaning rod.

Manufacturer

- observed specimen firearm illustrated in references record this firearm model as being marked "Imported by Mitchell Arms", and being manufactured by "Armi Jager Italy- Model AP80" and having the Italian Catalog Number recorded as "CAT 2344".

Action

- blowback operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number will be found marked on the right front of the receiver/frame. - observed specimen serial numbers consisted of six digits without prefix or suffix, the serial number has zeros used as place holders to achieve a six digit number.
Shots	- detachable magazine.
Canadian Law Comments	- this firearm model is a 22 calibre, semi-automatic, blowback operated rifle and is a named variant of the AK-47 in the Regulations appended to the Criminal Code of Canada Part III, Prohibited Firearms Regulations, Para 64, sub (z.22).
Other Markings	- following the Model designation the Italian Catalog number designation "CAT 2344", will be found marked on the receiver/frame.

Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
61619 - 1	22 LR	10	140	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MITCHELL ARMS", "MITCHELL ARMS CORP." or "MITCHELL ARMS, INC." is marked on the firearm.
- "Mitchell Arms" was a manufacturer, importer and distributor from 1980 to 1997.
- "Mitchell Arms" had offices in Anaheim, Compton, Costa Mesa, and Santa Ana, California and Winchester, Virginia, U.S.A., and in Winchester, England.
- "Mitchell Arms" open a new factory and offices in Santa Ana, California in 1995.

Model

- introduced in 1996.
- is a copy of the "HIGH STANDARD" "Sharpshooter" model pistol.
- has an adjustable rear sight.
- model has thumb rest grips.
- push-button barrel takedown.
- available in both stainless steel or royal blue.
- the 140mm barrel is a bull barrel.
- In 1996, this firearm was renamed from "Sharpshooter II" to be the "Baron".

Action

- blow-back operated, single-action, magazine fed, self-loading pistol.

Serial Number

- serial number rationalization unknown.

Shots

- detachable box magazine

Other Markings

- left side of firearm may be marked "HIGH STANDARD", and / or with HIGH STANDARD logo.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- In 1994, due to litigation on the part of the owners of the High Standard brand name, Mitchell Arms dropped the use of the name High Standard.
- In 1996, Mitchell Arms and High Standard settled their court dispute, one visible result was that Mitchell was forced to stop using the High Standard model names on their Mitchell Arms copies of these High Standard firearms.
- The terms of the 1996 court settlement compelled Mitchell Arms to rename this firearm; the "Sharpshooter II" became the "Baron".

Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
70571 - 1	44-40 WIN	13	616	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MITCHELL ARMS", "MITCHELL ARMS CORP." or "MITCHELL ARMS, INC." is marked on the firearm.
- "Mitchell Arms" was a manufacturer, importer and distributor from 1980 to 1997.
- "Mitchell Arms" had offices in Anaheim, Compton, Costa Mesa, and Santa Ana, California and Winchester, Virginia, U.S.A., and in Winchester, England.
- "Mitchell Arms" open a new factory and offices in Santa Ana, California in 1995.

Model

- model designation is not marked on the firearm.
- "Henry's Patent Oct. 16, 1860" is marked on the barrel.
- this is a modern reproduction of a Henry model 1860 lever action rifle in modern chamberings.
- Henry model 1860 was originally manufactured from 1860 to 1866 by the New Haven Arms Company of New Haven, Conneticut, United States of America.
- Henry model 1860 was originally chambered for calibre 44 HENRY RF.
- Henry model 1860 became the basis for the Winchester model 1866.
- features include: silver blade front sight and an open adjustable flip-up ladder type rear sight; blued octagonal barrel; magazine tube is mounted under the barrel; flat sided brass or a color case hardened steel receiver/frame; exposed spur hammer; single action trigger mechanism; close loop operating lever; no forearm; walnut straight grip buttstock with a curved brass butt plate.
- overall length with a 616 mm (24 1/4") barrel is 1102 mm (43.3"), and the average weight is 4.08 kg (9 lbs).

Manufacturer

- Uberti logo may appear on the firearm as a "U" inside a rifled, octagonal barrel.

Shots

- tubular magazine mounted under the barrel.

Remarks

- This is a modern reproduction (in modern chamberings) of the original Henry rifle that became the basis for the Winchester lever-action; this rifle has a brass receiver and butt-plate, and the barrels can be ordered either color-case-hardened or "in-the-white", for later bluing or engraving. This rifle can also be ordered from the factory with various grades of engraving. Some early examples of this rifle were produced in an iron-framed variation.

Notes

Make

- "MITCHELL ARMS", "MITCHELL ARMS CORP." or "MITCHELL ARMS, INC." is marked on the firearm.
- "Mitchell Arms" was a manufacturer, importer and distributor from 1980 to 1997.
- "Mitchell Arms" had offices in Anaheim, Compton, Costa Mesa, and Santa Ana, California and Winchester, Virginia, U.S.A., and in Winchester, England.
- "Mitchell Arms" open a new factory and offices in Santa Ana, California in 1995.

Model

- manufacture started in 1996.
- is a copy of the "HIGH STANDARD" "Olympic ISU" model pistol.
- has a bridge rear sight.
- model has thumb rest grips.
- push-button barrel takedown.
- available in both stainless steel or royal blue.
- the barrel has an integral stabilizer and adjustable barrel weights.

Action

- blow-back operated, single-action, magazine fed, self-loading pistol.

Serial Number

- serial number rationalization unknown.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- In 1994, due to litigation on the part of the owners of the High Standard brand name, Mitchell Arms dropped the use of the name High Standard.
- In 1996, Mitchell Arms and High Standard settled their court dispute, one visible result was that Mitchell was forced to stop using the High Standard model names on their Mitchell Arms copies of these High Standard firearms.
- The terms of the 1996 court settlement compelled Mitchell Arms to rename this firearm; the "Olympic ISU" became the "Medalist".

- the 140mm barrel is a bull barrel - the 184mm barrel is fluted.

Action

- blow-back operated, single-action, magazine fed, self-loading pistol.

Serial Number

- serial number rationalization unknown.

Shots

- detachable box magazine

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- In 1994, due to litigation on the part of the owners of the High Standard brand name, Mitchell Arms dropped the use of the name High Standard.
- In 1996, Mitchell Arms and High Standard settled their court dispute, one visible result was that Mitchell was forced to stop using the High Standard model names on their Mitchell Arms copies of these High Standard firearms.
- The terms of the 1996 court settlement compelled Mitchell Arms to rename this firearm; the "Citation II" became the "Monarch".

Notes

Make

- "MITCHELL ARMS", "MITCHELL ARMS CORP." or "MITCHELL ARMS, INC." is marked on the firearm.
- "Mitchell Arms" was a manufacturer, importer and distributor from 1981 to 1997.
- "Mitchell Arms" had offices in Anaheim, Compton, Costa Mesa, and Santa Ana, California and Winchester, Virginia, U.S.A., and in Winchester, England.
- "Mitchell Arms" open a new factory and offices in Santa Ana, California in 1995.

Model

- "SINGLE ACTION ARMY TARGET MODEL" is marked on the left side of the barrel.
- resembles the "Colt 1873 Single Action Army" revolver.
- features include: round barrel with ejector rod assembly; solid top receiver/frame with fixed fluted cylinder and right side loading gate; exposed spur hammer; single action trigger mechanism; hammer block safety mechanism; steel or stainless steel construction; steel or brass backstrap and trigger guard; case hardened receiver/frame and blued barrel, cylinder, backstrap and trigger guard, stainless steel or bright nickle plate finish; ramp front sight and an adjustable rear sight; one piece simulated ivory, stag horn or walnut stock.

Manufacturer

- "A. UBERTI ITALY" or "A. UBERTI & C. GARDONE V.T. ITALY" may be marked on the underside of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the underside of the receiver/frame in front of the trigger guard and may be repeated on the barrel.
- observed serial number consisted of five numbers without a letter prefix or suffix.
- "CAT. 1485" is marked on the barrel, this is not a serial number.
- "1485" is not the serial number, this is the Italian Proof House catalogue number.

Calibre

- calibre may be marked on the barrel.

Other Markings

- Italian proofmarks are marked on the barrel and receiver/frame.
- "CAT.1485" may be marked on the under side of the barrel.

61597 - 2	22 LR	10	140	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MITCHELL ARMS", "MITCHELL ARMS CORP." or "MITCHELL ARMS, INC." is marked on the firearm.
- "Mitchell Arms" was a manufacturer, importer and distributor from 1981 to 1997.
- "Mitchell Arms" had offices in Anaheim, Compton, and Santa Ana, California and Winchester, Virginia, U.S.A., and in Winchester, England.
- "Mitchell Arms" open a new factory and offices in Santa Ana, California in 1995.

Model

- introduced in 1996.
- is a copy of the "HIGH STANDARD" "Victor" model pistol.
- has a bridge rear sight.
- model has thumb rest grips.
- push-button barrel takedown.
- available in both stainless steel or royal blue.
- 140MM barrel is available with a full length Weaver Rib as an option.

Action

- blow-back operated, single-action, magazine fed, self-loading pistol.

Serial Number

- serial number rationalization unknown.

Shots

- detachable box magazine

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- In 1994, due to litigation on the part of the owners of the High Standard brand name, Mitchell Arms dropped the use of the name High Standard.
- In 1996, Mitchell Arms and High Standard settled their court dispute, one visible result was that Mitchell was forced to stop using the High Standard model names on their Mitchell Arms copies of these High Standard firearms.
- The terms of the 1996 court settlement compelled Mitchell Arms to rename this firearm; the "Victor II" became the "Sovereign".

FRT Report

Firearm Reference Number (FRN): 58756
Make: Mitrailleuse
Model: Palm Pistol

Summary

Make:	Mitrailleuse
Model:	Palm Pistol
Manufacturer:	Manufacture Francaise d'Armes de Saint-Etienne
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Other
Country of Manufacturer:	FRANCE
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
58756 - 1	8MM MITRAILLEUSE	5	57	Antique CC 84(1) "antique firearm" para. (b)	Manufacturer Specifications and Commercial Customization	
58756 - 2	8MM MITRAILLEUSE	5	63	Antique CC 84(1) "antique firearm" para. (b)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- marked on the right side of the receiver/frame.

Model

- manufactured from 1892 to 1897, usually called "Palm Pistol" for the mode of deployment.
- "Mitrailleuses" is marked on the top of the barrel.
- this pistol is "palmed" with the barrel facing forward, and squeezed against the telescoping palm-pad assembly. This causes the mechanism to pick up the top cartridge from the magazine, chamber and fire it. Releasing the pressure results in the palm-pad to return back, extract and eject the spent casing, and lift the next cartridge into position for chambering.
- features include; rectangular shaped "box" with a barrel protruding from one corner; rifled barrel; double safety located on the left side of the receiver/frame; half moon type front sight (early models) or round bead type front sight (later models) and a Mauser-type internal fixed magazine loaded by sliding ejection port cover located on top of receiver/frame.
- available in four different grades/variations ranging from No.1 through No.4. The grade/variation may or may not be marked on the top receiver/frame. When marked, it is located just behind the top-ribbed barrel, ahead of the sliding ejection-port cover. Example: No. 1 (or simply: 1). Variation No. 1 through No. 4 differ in appointment detail and embellishment. (For a description of features to identify the variations, see Remarks)
- the left frame side-plate with the safety lever is demountable and is marked: "Sureté" (for Safe), "Feu" (for Fire), and "Déchargement et Démontage" (for Unload and Dis-assemble).
- overall length is 130mm (5 1/8") average weight is 260 grams.

Manufacturer

- marked on the right side, near the top of the receiver/frame: MANUFACTURE FRANCAISE D'ARMES DE ST.-ETIENNE.
- literature and cartridge boxes are marked: Manufacture Francaise d'Armes de Saint-Etienne.

Action

- a repeating mechanical operation cartridge-magazine handgun. (Despite the name, this is NOT an automatic-fire machine gun.)

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- usually marked under the barrel, on the right inside the receiver/frame, and inside the receiver/frame-cover on the right.
Calibre	- marked on top of the receiver, between the barrel and the ejection port: 8 mm - cartridge for this firearm is a short 8mm center-fire, case length: .346" - .366"; overall cartridge length: .582" - .594" and smokeless powder. (This cartridge is also used in the "Le Protector" Palm Pistol).
Shots	- internal Mauser-type magazine, loaded by removing the right frame cover-plate (which also exposes the mechanism).
Remarks	- variations No. 1 through No. 4 (each with an enhanced "Extra" sub-model) differs in appointment detail and embellishment. The variations can be distinguished as follows: - model No. 1: blued polished metal, with checkered black ebonite grip-pad. - model No. 2: lightly patterned, bright nickel plated, with checkered black ebonite grip-pad. - model No. 3: finely engraved, nickel plated, with checkered "figured orange/brown wood" grip-pad. - model No. 4: "modele d'exposition" artisticly engraved and silvered", with checkered "figured orange/brown wood" grip-pad. - Note: in 1896 and 1897, an "Extra" level or "Bis" level (1 bis, 2 bis, 3 bis and 4 bis) was added to each of the four existing models, which was a slight "up-grade" in engraving, with the final level having selected engraving and gold inlaid inscription.

Notes

Make

- "MKA" and/or "MK ARMS INC." is marked on the firearm.

Model

- manufactured from 1983 to 1992.
- the "MK760" is a copy of the Smith & Wesson model 76 submachine gun.

Manufacturer

- MK Arms Incorporated was originally founded by Mike Ruplinger and Kenneth Domenick in Fruithurst, Alabama, U.S.A., circa 1983.
- Mike Ruplinger and Kenneth Domenick dissolved their partnership in 1984.
- Mike Ruplinger moved MK Arms to Irvine, California, U.S.A.
- Kenneth Domenick moved to Panama City, Florida, U.S.A. and established Southern Machine, Tool & Die (Southern M.T.D.).
- Southern Machine, Tool & Die (Southern M.T.D.) sold the M76A1 submachine gun under the Global Arms (G.W.I.) trade name.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- blowback operated.
Serial Number	- serial number is marked on the side of the receiver/frame. - serial numbers on the MK760 full automatic version may have a "C", "MK" or "P" prefix. - the letter C and P were used to identify MK760 semi-automatic versions that were converted to fully automatic firearms.
Shots	- detachable box magazine.

Notes

Make

- make marked on rear of receiver/frame.

Model

- model designation is not marked on firearm.
- this is a semi-automatic-only reproduction of the M-14 rifle, available in a number of grades and configurations; M-K Specialties sells both complete rifles and bare receiver/frames and these rifles are built up using surplus military parts.
- features include: walnut or fibreglass pistol-grip stock and handguard (E-2 pistol-grip stocks available); open adjustable sights; stripper-clip guide; sling; and Parkerized finish.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- manufacturer marked on rear of receiver/frame. - M-K Specialties is a small-scale manufacturer based in Grafton, West Virginia that specializes in building semi-automatic versions of the M-14 rifle.
Action	- gas-operated.
Serial Number	- numbered on rear of receiver/frame.
Shots	- detachable box magazine.

Notes

Make

- "MKA ARMS" is marked on the right side of the receiver/frame.

Model

- "MKA 1919" was observed mark on the right side of the lower receiver, just above the pistol grip and "Magnum" just above the magazine well on one observed model.
- "MKA 1919" uses a split, two-piece receiver/frame in a manner similar to an AR-15/M-16 but which attaches in a different manner. The MKA 1919 is not attached by a front hinge pin, rather the MKA 1919 firearm has a one-piece butt and trigger mechanism housing and the two components of the receiver actually slide apart, horizontally. The one-piece butt and trigger mechanism housing are fastened to the "upper receiver" by a through-bolt which when removed, permits the two components of the receiver/frame to be disassembled.
- features include: a free floating round barrel; aluminum alloy upper receiver with a detachable carry handle with an adjustable A2 style rear sight, right side cocking handle and ejector port; annular (ring type) gas piston which is located surrounding a support tube that is mounted below the barrel, the return spring is also located/mounted on the same support tube; synthetic upper and lower handguards; synthetic lower receiver/frame with an integral/fixed buttstock and pistol grip; safety catch with two positions(safe and semi automatic); sling swivels; black or camouflage finish.
- with many interchangeable - aftermarket parts the MKA 1919 may be found in a variety of configurations and barrel lengths.
- This is an AR style shotgun.

Manufacturer

- "HUSAN & EKSEN" is marked on the firearm

Action

- gas operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number is marked on a metal strip/plate attached to the underside of the receiver/frame on the trigger guard and which may be repeated on the front right side of upper receiver.
Barrel	- NOTE: the barrel length of this firearm has variously been reported as 470MM through to and including 500MM in manufacturer's advertising material. - the barrel of an observed sample was 483MM.
Calibre	- "12 GA. / Magnum (3")" was observed marked on the side of the magazine housing.
Shots	- detachable box magazine.

Notes

Make

- "MKA" followed by the model number is marked on the right side of the receiver/frame.

Model

- "MKA 1919PA" is marked on the firearm.
- "PUMP ACTION" may be marked on the right side of the firearm.
- "MKA 1919PA" has the general appearance of the AR-15/M-16 rifles.
- "MKA 1919PA" is a magazine fed, pump action shotgun.
- "MKA 1919PA" uses a split, two-piece receiver/frame in a manner similar to an AR-15/M-16 but which attaches in a different manner. The MKA 1919PA is not attached by a front hinge pin, rather the MKA 1919PA firearm has the trigger mechanism housing and the two components of the receiver actually slide apart, horizontally. The trigger mechanism housing are fastened to the "upper receiver" by a through-bolt which when removed, permits the two components of the receiver/frame to be disassembled.
- features include: interchangeable choke tubes that may include a muzzle brake extension; free floating, ventilated with full length accessory rail handguard; aluminum alloy Picatinny rail flat top upper assembly that may have a detachable carrying handle with adjustable rear sight, folding sights or optical sight; synthetic forend; synthetic receiver/frame with molded one-piece pistol grip and stock or an adaptor to install a collapsible buttstock; trigger mechanism housing with skeletonized magazine housing; ambidextrous selector; right side bolt release lever; extended magazine release at the back of the magazine housing; synthetic pistol grip and collapsible stock; black or colour finish.
- overall length with a 375mm (14.75") barrel is 820mm (32.25") with the stock collapsed.

- This is an AR style shotgun.

Manufacturer

- "HUSAN" is marked on the left side of the receiver/frame.
- "Hussan Arms" or "HUSANARMS" may also be marked on the firearm.
- "HUSAN" is located in Konya, Turkey.
- "Hussan Arms" was established in 1988.

Serial Number

- serial number is marked on the right side of the receiver/frame.
- serial number of referenced examples consisted of two letter (PA) and six numbers.

Calibre

- calibre designation is marked on the barrel.

Shots

- detachable box magazine.

Notes

Make

- "MKE" is marked on the magazine housing of the receiver/frame.
- "MKE" is the acronym for "Makina ve Kimya Endustrisi".
- firearms used to be manufactured under the "General Directorate of Military Factories" circa 1919-1923 and then underwent a name change to "Makina ve Kimya Endustrisi Kurumu" in the 1950's.

Model

- Introduced in 2016.
- "JMK-BORA-12" is marked on the marked on the side of the receiver/frame of the firearm.
- This firearm appears to be an updated version or variant of the "JNG 90 Sniper Rifle."
- Features include: hammer forged round barrel threaded for muzzle accessories; bolt operated receiver/frame with right side ejection port; receiver/frame integral top accessory rail with left and right side short accessory rails on adjustable forend; detachable box magazine; wide base pistol grip with integral trigger guard; adjustable trigger; safety latch on trigger and bolt; front iron sight and adjustable rear sight or scope option; adjustable bipod and buttspike; telescoping shoulder stock with spring recoil buttpad and fully adjustable cheek piece; sling swivels.
- Overall firearm length with 660mm (26") barrel is 1220mm (48") at shortest telescoped length and average weight is 6.5kg (14.3 lbs).

Manufacturer

- "MKEK" may be marked on the firearm.
- "MKEK" stands for "Makina Ve Kimya Endustrisi Kurumu", Turkish: Mechanical and Chemical Industry Instituion" or "Mechanical and Chemical Industry Corporation".
- firearms used to be manufactured under the "General Directorate of Military Factories" circa 1919-1923 and then underwent a name change to "Makina ve Kimya Endustrisi Kurumu" in the 1950's.
- "MKEK" has three factories related to weapon production based on weapon size, plus one small arms ammunition factory.
- "MKEK" produces heavy weapons of the military variety in cannons, surface to air and mortars at Kirikkale, Turkey.
- "MKEK" produces medium caliber weapons at Cankiri, Turkey.
- "MKEK" produces small arms weapons of the civilian variety and project marksmens and sniper rifles at Kirikkale, Turkey.
- "MKEK" produces small arms ammunition at Gazi-Ankara, Turkey and other ammunition at Kirikkale, Turkey.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- turn-bolt operated.
Serial Number	- serial number is marked on the receiver/frame of the firearm. - observed sample consists of a letter prefix, "T" followed by four numbers, followed by a dash, "-", followed by two more numbers. - serial number rationalization is not known. - note: serial number does not include the following marking "TR FUAR 002".
Calibre	- calibre is marked on the firearm. - twist rate for 660mm barrel is 1:12 inches, lands and grooves 4 right.
Shots	- detachable box magazine.

Firearm Reference Number (FRN): 16027
Make: MKE
Model: KAA

Summary

Make:	MKE
Model:	KAA
Manufacturer:	Makina ve Kimya Endustrisi (MKE)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Cannon
Action:	Full Automatic
Country of Manufacturer:	TURKEY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
16027 - 1	20X128 OERLIKON	N/A	1840	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make or logo thereof is marked on the cannon.

Model

- the model may or may not be marked on the cannon; this is a licenced copy of the Oerlikon "KAA" cannon. "KAA" is Oerlikon's designation for a cannon ("K"= Kanone), chambered for a 20mm cartridge ("A"), and the first model of the series ("A").
- this is a gas-operated automatic cannon developed by Oerlikon after World War Two, as a replacement for the Hispano-Suiza "FF" series, which was commonly used as ship-board anti-aircraft armament or fighter cannon during the war. The KAA was originally called the "204Gk" ("204 Gurtkanone"/"204 Belted Cannon") as it was a belt-fed design, rather than the magazine-fed Hispano-Suiza. This cannon also replaces the API blowback system of the Hispano-Suiza with a two-piece bolt having Degtyarev-style side-swinging locking arms.
- this cannon may be single in single, double, or quadruple mountings, in flexible or remotely-aimed versions, and in ship-board, vehicle, towed, or helicopter mounts, depending on the intended tactical use.
- features include: blue/black parkerized/phosphated finish; various styles of flash-hiders/muzzle brakes; tapered barrel; short gas tube extending off the side of the barrel in line with the top-cover and feed-way; and various styles of mounts and aiming systems.
- licenced copies of these cannon are produced by a number of other manufacturers.

Manufacturer

- the manufacturer or logo thereof is marked on the cannon.

Action

- gas-operated.

Serial Number

- serial numbered on the receiver/frame.

Shots

- belt or chute fed firearm.

Notes

Make

- the make may or may not be marked on the cannon.

Model

- the model may or may not be marked on the cannon.
- this is a 25mm automatic cannon designed by GIAT in the early 1980s as primary armament for the VBCI armoured fighting vehicle (the French equivalent of the US LAV); this cannon may be seen in a variety of mounts.
- this cannon operates as an externally-powered firearm that functions through the use of an electrical motor rotating a shaft with a cam groove milled into it; that groove drives a bolt carrier back and forth, simultaneously drawing a linked belt of ammunition into the gun, firing the cannon as the bolt-head locks into battery.
- this cannon is normally mounted on a powered rotating turret with elevation and depression capability, with an effective range of 1.5 km, and is usually seen paired with a general-purpose coaxial machine gun for close-in infantry engagements.
- features include: blue/black parkerized/phosphated finish; various styles of flash-hiders/muzzle brakes; tapered barrel; ventilated barrel shroud; ambidextrous feed chutes; and various styles of mounts and aiming systems.
- licenced copies of these cannon are produced by a number of other manufacturers.

Manufacturer

- the manufacturer may or may not be marked on the cannon.

Action

- electrically powered cannon.

Serial Number

- serial numbered on the receiver/frame.

Shots

- belt fed firearm.

Notes

Make - the make or logo thereof is marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "MPT" may or may not be marked on the firearm; "MPT" is an abbreviation of "Milli Piyade Tufegi", Turkish for "National Infantry Rifle". - introduced in 2014. - this is a generic entry for the selective-fire rifle family designed for adoption by the Turkish military as a replacement for their licence-built H&K G3 and HK33E rifles. This rifle was built for testing in both 5.56mm NATO and 7.62mm NATO, but testing showed a preference for the 7.62mm version, and it is not known if the 5.56mm will continue into full production. - the basic layout of the rifle is based on the H&K 416 rifle, but adapted for Turkish production. - features include: generalized AR/M16 layout and operation; birdcage flash suppressor; bayonet mount; flat-top upper with folding open adjustable sights and an accessory rail for mounting a detachable carry handle or optical sights; forearm accessory rails; an extended lower receiver that curves down to join the front of the magazine well; finger-grooved pistol-grip; collapsible buttstock on the buffer-tube; matte black finish.
Manufacturer	- the manufacturer or logo thereof is marked on the firearm.
Action	- gas operated.
Serial Number	- serial number is marked on the receiver/frame.
Shots	- detachable box magazine.

128637 - 2	9MM LUGER	15	106	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MKEK" is marked on the left side of the slide.
- "MKEK" is the acronym for "Makina ve Kimya Endustrisi Kumuru".

Model

- "YAVUZ 16" may be marked on the right side of the slide.
- introduced circa 2006.
- this is a generic entry for MKEK marked firearms that may not be marked with a model designation. Other entries exist that may better describe the firearm being observed.
- externally this firearm is similar to the Beretta 92FS in the way it is operated; internally it uses a Walther P-38 type of vertically tilting locking mechanism to lock the barrel and slide.
- features may include: slide and the front end of the receiver/frame are flush with the barrel; top of slide is solid with small right side ejection port; a portion of the hand web guard was removed from the rear of the receiver/frame making the receiver/frame flush with slide giving a squared/flat look at the rear; the top rear portion of the slide has a rectangular grove cut into it allowing access to the semi concealed hammer; cold forged steel barrel; low profile combat sights; ambidextrous safety/slide lever; double action trigger; magazine release is located at the base of the trigger guard; finished in black, bright white, white with gold accents, gold plated or black & white; engraved; black plastic or wood grips.

Manufacturer

- "MKEK" is usually marked on the side of the slide.
- "MADE IN TURKIYE" is usually marked on the left side of the receiver/frame.

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is located on the right side of the receiver/frame and repeated on the barrel and the slide.
Calibre	- marked on the left side of the slide as "9mm Parabellum". - rifling characteristics: 6 grooves with a right hand twist.
Shots	- detachable box magazine.

Notes

Make

- "MMC ARMORY" is marked on the left side of the receiver/frame.
- "MMC" stands for "Mennie Machine Company".
- "MMC ARMORY" also uses the acronym "MMCA"
- "MMC ARMORY" is located in Mark, Illinois U.S.A..
- "MMC ARMORY" logo is a trident head made in a triangular shape.

Model

- "MA-15" is marked on the left side of the receiver/frame.
- "MA-15" variants are based on the Colt AR-15/M16 design.
- features include: threaded muzzle for flash hider/muzzle brake; standard or heavy profile contoured barrel; low profile, Picatinny rail or folding front sight bracket/gas block; Picatinny rail, free floating or synthetic handguard; A3 Picatinny rail flat top upper assembly; may have a detachable carrying handle with adjustable rear sight, folding sights or optical sight; collapsible or custom rifle buttstock; synthetic pistol grip; matte black finish.
- available in semi-automatic or full-automatic.

Manufacturer

- "MMC ARMORY" is marked on the left side of the receiver/frame.
- "MMC" stands for "Mennie Machine Company".
- "MMC ARMORY" also uses the acronym "MMCA"
- "MMC ARMORY" is located in Mark, Illinois U.S.A..
- "MMC ARMORY" logo is a trident head made in a triangular shape.
- "MMC ARMORY" is a division of Mennie Machine Company.
- "Mennie Machine Company" primarily makes tools, dies, jigs and parts providing the automotive and military market.
- "Mennie Machine Company" was founded in 1970.
- "MMC ARMORY" was established in 2013.

Action

- gas operated.

Serial Number

- serial number is marked on the left side of the receiver/frame.

Calibre

- "MULTI CALIBER" is marked on the left side of the receiver/frame.
- calibre identification is usually marked on the barrel.
- 5.56MM NATO rifling characteristics: 1 turn in 8 inches, right hand twist.

Shots

- detachable box magazine.
- uses all magazines available for AR15/M16 type rifles.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
93375 - 1	22 LR	10	470	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Model

- model designation is not marked on the receiver/frame.
- advertised as a replacement stainless steel receiver/frame only (not currently (2003) available as a complete rifle), for the Ruger 10/22 Carbine.
- the receiver/frame will accept all the stock parts of the original rifle and is drilled and tapped for a scope mount. Extra features include a hole at the rear of the receiver/frame to allow a cleaning rod to be inserted from the rear, an extra lug at the bottom rear that is drilled and tapped for an extra hold-down screw and a threaded hole for mounting the barrel (although threaded the minimum interior diameter allows for mounting the standard slip-in barrel).
- features of a complete rifle may include: a sliding cross-button type safety, single folding-leaf rear sight, adjustable for elevation, and a gold bead front sight.

Manufacturer

- manufacturer's name and address are marked on the left side of the receiver/frame.
- MOA Corp. is located in Eaton, Ohio.

Action

- blowback operated.

Serial Number

- serial number is marked on the left side of the receiver/frame and consists of a two number date code followed by a dash and four more numbers.
- the range begins with 99-0001.

Shots

- detachable magazine, aftermarket magazines are available that will increase the number of shots.

Remarks

- as there is a large variety of accessories available for this type of firearm, features and appearance may vary.

15838 - 4	30 CARBINE	15	470	Prohibited PFR, Part 1, para. 236(z.2)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MOCO" (an abbreviation of "Millville Ordnance Company") is usually marked in a banner on the top rear of the receiver/frame, and/or on the barrel, beneath the stock or handguard.

Model

- The model is not marked on the firearm; "M1 Carbine" is the colloquial name for this model of rifle.
- This is a post-WW2-manufactured (or conversion of a surplus firearm) gas-operated semi-automatic rifle, of the type commonly known as a "US M1 Carbine".
- Many of these rifles were assembled using surplus parts from demilled WW2 or Korean War M1 Carbines.
- Features include: typical M1 Carbine layout and operation; right-side operating handle on the op-rod; rotating bolt; a rotating safety lever at the front of the trigger-guard.

Manufacturer

- "MOCO" (an abbreviation of "Millville Ordnance Company") is usually marked in a banner on the top rear of the receiver/frame, and/or on the barrel, beneath the stock or handguard.
- The Millville Ordnance Company was in business in Union, New Jersey, during the late 1950s and early 1960s.

Action

- gas-operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- The serial number is marked on the left side of the receiver/frame. - The serial number on a known example consisted of a letter prefix "A" followed by three digits.
Shots	- Detachable box magazine.

Firearm Reference Number (FRN): 128598
Make: MOLOT
Model: Leader

Summary

Make:	MOLOT
Model:	Leader
Manufacturer:	MOLOT
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
128598 - 2	10X32T	7	115	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the Molot logo of a Cyrillic "VP" (resembling "Bn") in a circle is marked on the slide.
- "VP" stands for "Vyatsky Polyany", the city where Molot is located.
- may also be marked in Cyrillic characters as "MONOM".

Model

- "LIDER" ("LEADER") is marked on the firearm in Cyrillic, resembling an "A" without the cross-bar, a backwards "N", and "AEP".
- this is a factory conversion of a surplus Tokarev TT-33 pistol into a traumatic pistol for the civilian market, by converting it to a fixed-barrel direct-blowback design firing the 10x32T traumatic rubber-ball cartridge.
- Molot remanufactured the model "Leader" from existing Tokarev TT 33 pistols and other Russian State Arsenal markings may be found.
- features include: typical TT-33 layout and operation, blued or nickeled and engraved finish; fixed open sights; single-action trigger mechanism; an offset barrel to prevent firing of solid projectiles; synthetic or carved wooden grip plates; a lanyard loop on the left side of the butt; and a detachable box magazine.

Manufacturer

- the "MOLOT" logo is marked on the side of the firearm.
- may also be marked in Cyrillic characters as "MONOM".
- MOLOT performed these conversions on a variety of surplus TT-33s, and the frames may be seen with original Izhevsk or Tula factory markings and dates.

Action

- blowback design.

Serial Number

- serial-numbered on the receiver/frame.

Shots

- detachable box magazine.

Canadian Law Comments

- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

143862 - 2	20 GA X 3"	3	700	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make	- the make or logo thereof is marked on the firearm.
Model	- the make is marked on the firearm. - this is a new design of gas-operated, semi-automatic, shotgun made by MOLOT, with an unusual (for a shotgun) form of detachable magazine that resembles a block that inserts between the forearm and trigger guard, and which holds three shells in a Mannlicher/Savage-style rotary drum. - features include: blued/parkerized/phosphated finish; interchangeable choke tubes; a ventilated sighting rib; checkered walnut forearm and pistol-grip stock; a magazine-release "rib" at the front of the trigger-guard; bolt latch in front of the trigger-guard; triangular safety at the rear of the trigger-guard; and sling swivels.
Manufacturer	- the manufacturer or logo thereof is marked on the firearm.
Action	- gas-operated.
Serial Number	- numbered on the receiver/frame.
Shots	- detachable block-style rotary magazine that clips in between the forearm and the trigger guard.

FRT Report

Firearm Reference Number (FRN): 148830
Make: MOLOT
Model: Vepr-15

Summary

Make:	MOLOT
Model:	Vepr-15
Manufacturer:	MOLOT
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
148830 - 1	223 REM	5	470	Prohibited PFR, Part 1, para. 87(z.566)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- the make or logo thereof is marked on the firearm.
Model	- "Vepr-15" is marked on the firearm, in Cyrillic; the Cyrillic representation of "Vepr-15" resembles "BEnPb-15". "Vepr" is a trade-name used by Molot, meaning "Wild Boar". - this is a copy of the AR-15 M4 Carbine, made for use as a hunting and target rifle. - features include: matte black parkerized/phosphated finish; standard AR-15 layout and operation; bird-cage flash suppressor; open adjustable peep sights with a detachable carry handle on a Picatinny rail; and a sliding collapsible stock.
Manufacturer	- the manufacturer or logo thereof is marked on the firearm.
Action	- gas-operated.
Serial Number	- numbered on the receiver/frame.
Shots	- detachable box magazine. - this rifle accepts standard AR-15/M16 magazines, commonly available in capacities of 5, 10, 20, and 30 rounds.

FRT Report

Firearm Reference Number (FRN): 196911
Make: Molot Arms
Model: MA Vintorez 7.62

Summary

Make:	Molot Arms
Model:	MA Vintorez 7.62
Manufacturer:	Molot Arms
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
196911 - 1	7.62X39 RUSSIAN	5	314	Restricted CC 84(1) "restricted firearm" para. (b)	Non-Commercial Customization	
196911 - 5	7.62X39 RUSSIAN	5	314	Prohibited CC 84(1) "prohibited device" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- The company logo is marked on the firearm.
- "MOLOT" logo is a star within a shield having two-crossed rifle at it back.

Model

- Introduced in 2016.
- "MA Vintorez 7.62" is marked on the right side of the receiver/frame. The model name is written in Russian, "MA-????????-7,62".
- "MA Vintorez 7.62" is a look alike of the "VSS Vintorez", a sharpshooter rifle featuring, select fire and a integral suppressor originating from the Soviet Union.
- Based on the "TsNIITochMash AS VAL (1987)" design.
- Features include: straight round barrel with gas system hiding inside a round, partially checkered removable tube/shroud acting as a fake suppressor; front and rear sight attached to the barrel shroud/fake suppressor; removable shroud button located on the front, bottom of the receiver/frame; optic rail attachment on the left side of the receiver/frame; "Dragunov" style, thumbhole, integral pistol grip buttstock; magazine release ahead of the trigger guard; safety lever located on the right side of the receiver/frame acting as a dust cover for the cocking handle.

Manufacturer

- The company logo is marked on the receiver/frame.
- "MOLOT" logo is a star within a shield having two-crossed rifle at it back.

Action

- Gas operated.

Serial Number

- The serial number is marked on the right side of the receiver/frame.
- Serial number of referenced examples consisted of a two letter prefix (AA) and four numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel	- The barrel length does not include any attached device such as flash-hider or muzzle brake.
Calibre	- The calibre designation is marked on the right side of the receiver/frame.
Shots	- Detachable box magazine.
Canadian Law Comments	- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.
Other Markings	- On the right side of the receiver, there is a Russian Export proof mark, show as an "rNc in a diamond , and the number "20", designating the year of export.

Notes

Make

- "MONARCH" was a trade name used by Hopkins & Allen circa 1880.
- "MONARCH" was a trade name used by Osgood Gun Works of Norwich, Connecticut on a two barrel revolver circa 1882.

Model

- "MONARCH" is marked on the top strap.
- this is a spur trigger, single action revolver manufactured circa 1880.
- features include: round barrel with fixed blade front sight; solid top receiver/frame with removable fluted cylinder and loading channel on the right side; cylinder has locking notches at the rear; exposed knurled cylinder access pin with release located on the front of the receiver/frame, under the barrel; exposed spur hammer; sheathed spur trigger; single action trigger mechanism; bird's head grip with wood, rubber or ivory grip plates; blued or nickel, engraved or plain finish.

Manufacturer

- manufacturer's designation is not marked on the firearm.

Serial Number

- serial number of an observed example was stamped on the left side of the grip frame, under the grip plate.
- observed serial numbers consisted of three numbers or four numbers with or without a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- the numbers within the model description and that may be marked on the topstrap refer to the following:
1) No 1 = 22 RF calibre.
2) No 2 = 32 RF calibre.
3) No 3 = 38 RF calibre.
4) No 4 = 41 RF calibre.

Notes

Make

- "MONARCH TOOL CO." was observed marked on the top side of the barrel.
- "SRCo" monogram was observed marked on the butt plate.

Model

- model designation is not marked on the firearm.
- this firearm is a reproduction of a Sharps Model 1878 Borchardt Patent rifle.
- Sharps Model 1878 Borchardt Patent rifle was based upon Hugo Borchardt's patent of 1876.
- Sharps Model 1878 Borchardt Patent rifles were originally built under licence by the Sharps Rifle Company.
- features include: hooded front sight and long range tang mounted rear sight; blued round tapered medium/heavy barrel; color case hardened flat sided receiver/frame; falling-block action with operating lever; oil finished walnut checkered forearm with metal fore-end cap and pistol grip buttstock with metal pistol grip cap.
- this rifle has what appears to be two triggers, but the rear "trigger" is actually a sliding trigger-block safety.

Manufacturer

- "Monarch Tool Company" is located in Stevensville, Montana, U.S.A.
- "Monarch Tool Company" is owned by Argus Barker.
- "Monarch Tool Company" was manufacturing reproductions of Sharps 1878 Borchardt Patent rifles in the 1980s and 1990s.

Action

- lever operated falling (dropping) block design.

Serial Number

- serial number was observed marked on the underside of the receiver/frame.
- observed serial number consisted of a letter "A" prefix and two numbers.

Calibre

- calibre was observed marked on the barrel.

Make: Monks, W H
Model: Hammer Safety Revolver

Summary

Make:	Monks, W H
Model:	Hammer Safety Revolver
Manufacturer:	Tipping & Lawden
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
199031 - 1	450 REV CF	5	79	Antique CC 84(1) "antique firearm" para. (b)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "W. H. MONKS CHESTER" is marked on the topstrap.
- "W. H. MONKS" stands for "William Henry Monks" a gunmaker and retailer that may also be spell "W. H. Monk".
- "W. H. MONKS" was established in 1868 at 65 Foregate street, Chester, Cheshire, England.
- "W. H. MONKS" was located in 1892 at 77 Foregate street, Chester, Cheshire, England.
- "W. H. MONKS" was located in 1902 at 75/77 Foregate street, Chester, Cheshire, England.
- "W. H. MONKS" circa 1900 was describe as "Gun and Cycle maker and Auto Garage".

Model

- The model designation is not marked on the firearm.
- "Hammer Safety Revolver" refer to the small wing shaped screw at the upper left rear of the receiver/frame. This served as both a hammer locking safety and a de-cocking device. With the screw fully tightened the action was locked and the hammer could not be cocked either manually or by pulling the trigger. By loosening the screw, the action functioned normally.
- Based on the Webley RIC design.
- Features include: right side hinged loading gate; center mounted ejector rod stored within the cylinder arbor and could be withdrawn and pivoted into position to eject empty cases.

Manufacturer

- The manufacturer is not marked on the firearm.
- "TIPPING & LAWDEN" registered their partnership in Birmingham in 1837.
- "TIPPING & LAWDEN" also had facilities in London, England at Cheapside from 1837 to 1840, 18 Pancras Lane in 1842, 9 Dyers Buildings, Holborn in 1843, 20 Barlett's Buildings from 1844 to 1851, 26 Barlett's Buildings from 1852 to 1854, and 17 Woodstock Street from 1871 to 1877.
- "TIPPING & LAWDEN" was bought by "P. Webley & Son" in 1877.

Serial Number

- The serial number is marked on the bottom of the barrel.

Calibre

- The calibre designation is marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments - Some examples of this model, when manufactured prior to 1898 may be considered Antique in Canada.

Notes

Make

- "MONTANA RIFLE COMPANY" is marked on the receiver/frame of the firearm over "KALISPELL MONTANA".
- manufacturer name is on either side of the left or right of the receiver/frame based on left-hand or right-hand actions.
- in 1990 "Montana Rifleman" was started by gunsmith Keith Sipe.
- in 1993 "Montana Rifleman Inc." began to specialize in making barrels.
- in 1995 "Montana Rifleman Inc." began assembling custom firearms using Mauser-type actions.
- in 1999 Keith Sipe created the "Model 1999" action combining the best attributes of Mauser-type action and a Winchester model 70 action type.
- in 2011 "Montana Rifle Company" begin producing complete firearms while "Montana Rifleman" still produce barrels.

Model

- introduced in 2011.
- "MODEL 1999" is marked on the side of the receiver/frame.
- "ASR" is an acronym for "American Standard Rifle".
- "ASR" is marked on the barrel chamber area either on the left or right side of the firearm, based on left-hand or right-hand action.
- this is a production run firearm based on the short and long action lengths of the Model 1999.
- features include: blued chrome moly steel or stainless steel action and tapered barrel without sights; Mauser 98 type turn-bolt action; receiver/frame is drilled and tapped for sight mounts; internal box magazine; bolt release located on the left side of the receiver/frame on right-handed actions, and on the right side of the frame on left-handed actions; Winchester model 70 style three position safety; one piece trigger guard/floor plate; one piece walnut pistol grip stock available in either left or right hand configurations; black butt plate spacer and recoil pad.
- overall firearm length with a 508 mm (20") barrel is 1092mm (43").

Manufacturer

- "MONTANA RIFLE COMPANY" is marked on the receiver/frame of the firearm over "KALISPELL MONTANA".
- manufacturer name is on either side of the left or right of the receiver/frame based on left-hand or right-hand actions.
- in 1990 "Montana Rifleman" was started by gunsmith Keith Sipe.
- in 1993 "Montana Rifleman Inc." began to specialize in making barrels.
- in 1995 "Montana Rifleman Inc." began assembling custom firearms using Mauser-type actions.
- in 1999 Keith Sipe created the "Model 1999" action combining the best attributes of Mauser-type action and a Winchester model 70 action type.
- in 2011 "Montana Rifle Company" begin producing complete firearms while "Montana Rifleman" still produce barrels.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the receiver/frame.
- serial number may be found in two places: 1) underside of the action behind the front recoil lug; 2) on the front receiver ring on the same side as the manufacturers id.
- observed sample consisted of six numbers without letter suffix or prefix.
- observed sample consisted of a letter prefix, "C" followed by two numbers, a dash "-" and four more numbers.
- serial number rationalization is not known.

Barrel

- barrel length is dependent on calibre, minimum length is 559mm (22") and maximum length is 660mm (26").

Calibre

- calibre designation is marked on the chamber area of the barrel.

Shots

- internal box magazine.

Notes

Make

- "MONTANA RIFLE COMPANY" is marked on the receiver/frame of the firearm over "KALISPELL MONTANA".
- manufacturer name is on either side of the left or right of the receiver/frame based on left-hand or right-hand actions.
- in 1990 "Montana Rifleman" was started by gunsmith Keith Sipe.
- in 1993 "Montana Rifleman Inc." began to specialize in making barrels.
- in 1995 "Montana Rifleman Inc." began assembling custom firearms using Mauser-type actions.
- in 1999 Keith Sipe created the "Model 1999" action combining the best attributes of Mauser-type action and a Winchester model 70 action type.
- in 2011 "Montana Rifle Company" begin producing complete firearms while "Montana Rifleman" still produce barrels.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- introduced in 2011.
- "MODEL 1999" is marked on the side of the receiver/frame.
- "DGR" is marked on right side of the barrel chamber area on a right-handed action.
- "DGR" is an acronym for "Dangerous Game Rifle".
- this firearm features a double square bridge Mauser action, named "Professional Hunter Action" or "PH Action" specially made for longer cartridges, but the model name is still known as "Model 1999".
- features include: blued chrome moly steel or stainless tapered barrel with or without sights and with or without threaded muzzle; Mauser 98 type turn-bolt action; blued or stainless receiver/frame drilled and tapped for sight mounts; internal box magazine; bolt release located on the left side of the receiver/frame; Winchester model 70 style three position safety; one piece trigger guard/floor plate; one piece black walnut pistol grip stock; black butt plate spacer and recoil pad.
- overall firearm length for 610mm (24") barrel is 1168mm (46").

Manufacturer

- "MONTANA RIFLE COMPANY" is marked on the receiver/frame of the firearm over "KALISPELL MONTANA".
- manufacturer name is on either side of the left or right of the receiver/frame based on left-hand or right-hand actions.
- in 1990 "Montana Rifleman" was started by gunsmith Keith Sipe.
- in 1993 "Montana Rifleman Inc." began to specialize in making barrels.
- in 1995 "Montana Rifleman Inc." began assembling custom firearms using Mauser-type actions.
- in 1999 Keith Sipe created the "Model 1999" action combining the best attributes of Mauser-type action and a Winchester model 70 action type.
- in 2011 "Montana Rifle Company" begin producing complete firearms while "Montana Rifleman" still produce barrels.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the receiver/frame.
- the serial number may be found in two places: 1) underside of the action behind the front recoil lug; 2) on the front receiver ring on the same side as the manufacturers identification.
- observed sample consisted of six numbers without letter suffix or prefix.
- observed sample consisted of three numbers followed by a dash, "-", followed by four numbers.
- observed sample consisted of a letter prefix, "D" followed by two numbers, a dash "-" and four more numbers.
- serial number rationalization is not known.

Barrel

- barrel length is dependent on calibre, minimum length is 559mm (22") and maximum length is 660mm (26").

Calibre

- calibre designation is marked on the chamber area of the barrel.

Shots

- internal box magazine.

Notes

Make

- this firearm is based on the Mossberg Model "B".

Model

- manufactured from 1928 to 1932.
- marked "PREMIER" on top of the barrel.
- produced in two versions; the first variation (1928 - 1930) used a two-piece bolt that had the body held together by a screw and was fitted with a small bolt handle. The second variation (1930 - 1932) used a one-piece bolt having a 30% larger bolt handle.
- features may include: round rifled barrel with blade front and adjustable rear sight; round blued receiver; takedown screw below receiver; round bolt knob; wood stock.
- overall length with a 559mm (22") barrel is 1016mm (40"), average weight is 1.81 kgs (4lbs).
-average

Manufacturer

- this firearm is based on the Mossberg Model "B".

Action

- turn bolt operated.

Serial Number

- the manufacturer did not mark these firearms with a serial number.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - calibre is marked on the left side of the barrel just forward of the receiver/frame.

Remarks - PREMIER has two types of bolts, first was a two piece bolt body held together by a screw. The bolt handle was very thin, ending in a small round knob. The second bolt body is a one piece with a 30% larger bolt handle.
Manufactured by Mossberg and sold as the Model B 22 Cal Bolt Action and sold as the "Trappers' Special" by Taylor Trapping Co .

Notes

Make

- "MOORE & HARRIS" is marked on the top of the barrel.
- "Moore & Harris" was founded in 1829 by William Moore, at 4 Whittall Str. Birmingham and was joined by William Harris in 1938.
- "Moore & Harris" firm was located at 35 Loveday Str. Birmingham, between 1840-1860.
- "William Moore" & "William Harris" received a patent for a percussion revolver in 1852.
- "Moore & Harris" were associated with "Great Western Gun Works", which was located at Constitution Hill, from 1861-1864.
- "Moore & Harris" firm was sold in 1864.

- "Moore & Harris" was a known gun production firm from around 1840-1864, after which the business split. However some guns were produced after 1864 and may have been using the business name of the defunct company, evidenced by an existing sample (double rifle) with post-1887 proofmarks.
- "Moore, William" was appointed as gunmaker to King William IV, in 1936.
- "Moore, William" was listed as "Smkr" (stock or gun stock maker), at 4 Whittall St. Birm., circa 1829-1837.
- "Moore, William" was listed as "Smkr" (stock or gun stock maker), at 35 Loveday St. Birm., circa 1838-1845 under business name of "Moore & Harris".
- "Harris, William" was listed as "G&Rmkr" (gun and rifle maker), at 35 Loveday St. Birm, circa 1838-1845.
- "Harris, William" was listed as business in 38 Gt. Hampton & Loveday St. Birm, in 1853.
- "Harris, William" was listed as having continued in the gunmaking business after partnership split from Moore, William, with cased percussion guns. Known to have been an "A" (action maker) and "D" (dealer). Circa 1867-1875.

Model

- Year of production is unknown for this model of firearm.
- The model designation is not marked on the firearm.
- Features include: round steel side by side barrels; steel receiver/frame with top break open action lever/toggle and dual hammers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- The manufacturer is not marked on the receiver/frame.
- The manufacturer is not marked on the firearm.
- "Moore & Harris" was founded in 1829 by William Moore, at 4 Whittall Str. Birmingham and was joined by William Harris in 1938.
- "Moore & Harris" firm was located at 35 Loveday Str. Birmingham, between 1840-1860.
- "William Moore" & "William Harris" received a patent for a percussion revolver in 1852.

FRT Report

Firearm Reference Number (FRN): 200243
Make: Morisson
Model: PRZ44

Summary

Make:	Morisson
Model:	PRZ44
Manufacturer:	Parantez R&D Defense
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Lever Action
Country of Manufacturer:	TURKEY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
200243 - 2	44 MAG	5	305	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
200243 - 1	44 MAG	8	457	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MORISSON" is marked on the right side of the receiver/frame.

Model

- "PRZ44" is marked on the left side of the barrel.
- "PRZ44" is marked on the underside of the receiver/frame.
- Features include: serrated hammer; cross-bolt safety located on the receiver/frame; receiver may come in a variety of finishes.

Manufacturer

- "PARANTEZ" is marked on the left side of the barrel.
- "PARANTEZ R&D DEFENSE" is marked on the underside of the receiver/frame.

Serial Number

- The serial number is marked on the underside of the receiver/frame.
- The serial number is repeated on other parts and components.
- The serial number of a referenced example consisted of two letters followed by three digits, a dash, two digits, one letter and five digits.

Barrel

- The barrel length does not include any attached device such as flash-hider or muzzle brake.

Calibre

- The calibre designation is marked on the barrel.
- ".44Mag" is marked on the left side of the barrel.

Shots

- Fixed tubular magazine.

FRT Report

Firearm Reference Number (FRN): 20942
Make: Morley
Model: Morley

Summary

Make:	Morley
Model:	Morley
Manufacturer:	Hopkins & Allen
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
20942 - 2	32 LONG RF	5	70	Antique AFR, Section 1, para. 6	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MORLEY" was observed marked on the top strap.
- "MORLEY" was a trade name used by Hopkins & Allen.

Model

- "MORLEY" over "PAT. MARCH 28 1871" was observed marked on the top strap.
- features include: round barrel with half-moon front sight; solid top receiver/frame with removable fluted cylinder and right side loading slot; cylinder pin release located on the front of the receiver/frame; exposed spurred hammer; sheathed spur trigger; single action trigger mechanism; bird's head grip.

Manufacturer

- Hopkins & Allen is not marked on the firearm.
- "PAT. MARCH 28 1871" was observed marked on the top strap.
- certain patent dates may help to indicate which company manufactured a particular firearm.
- "Pat. Mar. 28,71 May 27,79" or "PAT. MCH. 28,71 MAY 27,79" usually indicates manufacture by Hopkins & Allen.
- "Pat. Feb.23,75 Mar.14,76" usually indicates the manufacture by Hood Firearms Company.

Action

- single action spur trigger revolver.

Serial Number

- serial number was observed marked on the left side under the grip panel, and underneath the barrel.
- observed serial number consisted of four numbers without a letter prefix or suffix.

FRT Report

Firearm Reference Number (FRN): 119373
Make: Morris & Brown
Model: Conical Repeater

Summary

Make:	Morris & Brown
Model:	Conical Repeater
Manufacturer:	Unknown American
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Other
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
119373 - 1	44 RF	6	597	Antique AFR, Section 1, para. 2	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MORRIS & BROWN'S" over "PATENT" and "JANUARY 24th 1860" is marked on the right side of the receiver/frame.
- "CONICAL REPEATER" is marked on the left side of the receiver/frame.

Model

- marked on the left side of side of the frame/receiver as "CONICAL REPEATER".
- this is a highly unusual firearm dating from the Civil War era, when inventors were willing to try any number of outlandish ideas to secure a portion of the arms market.
- this rifle seems to be a "revolving" rifle like so many of its competitors, but actually has six stationary chambers that are fired by a rotating hammer nose; those chambers are contained in a cylinder that is itself contained in the rearward portion of a large "funnel" that narrows down until it becomes a rifled bore.
- features include: straight-grip maple stock; bronze receiver/frame; a ring shaped action lever that serves to cock and rotate an internal hammer; a single trigger without any form of trigger guard and a long-cone-shaped breech and barrel that tips down to allow access to the cylinder for loading/reloading.

Manufacturer

- manufacturer not marked on firearm, though these rifles are believed to have been made in New York City.

Action

- this firearm has six stationary chambers that are fired sequentially by a rotating firing pin, similar to the Sharp's derringer.

FRT Report

Firearm Reference Number (FRN): 147946
Make: Morse
Model: Carbine

Summary

Make:	Morse
Model:	Carbine
Manufacturer:	Greenville Armory
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	CONFEDERATE STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
147946 - 1	50 MORSE	1	508	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is not usually marked on the firearm; "MORSE" may appear on very late-production examples.
- George W. Morse was a Louisiana inventor and gunsmith who patented a "toggle"-style of breech-loading mechanism in 1858 that was adopted and used by both the Union and Confederate sides during the US Civil War.

Model

- the model is not marked on the firearm; this is an unusual breech-loading rifle based on George W. Morse's 1858 patent for a toggle-breech breech-loading mechanism, as produced by the Confederate side during the US Civil War (a similar rifle using this patent was used by the Union side as the 1816/1858 Morse Conversion rifle). The Confederate versions of this rifle were built in three types, each varying slightly in the internal method of locking the operating lever in its "closed" position; the earliest version used a movable striker bar that prevented the lever from lifting when the hammer struck it, while the later two versions used a spring-loaded sliding tab on the lever to do the same.
- these rifles used an early form of metallic cartridge with a recessed head, sealed with resin, and primed with a standard percussion cap, that wasn't used in any other firearm.
- features include: blued round barrel; cast and machined bronze receiver with a lever along the top of the receiver, that, when lifted, draws the head of the rearwards through the use of toggle arms; open fixed sights; an under-barrel ramrod; two-piece walnut stock with forearm and straight-grip butt; a vertical hammer spur on the single-action hammer; and a small "loop" cast into the bottom of the wrist of the receiver.

Manufacturer

- the manufacturer is not marked on the firearm; these firearms were manufactured in Greenville, South Carolina at a State Arsenal run by the Confederate government of South Carolina.

Action

- hinged-breech breech-loading percussion single-shot.

Serial Number

- numbered on the bottom of the receiver, in front of the trigger-guard.

Notes

Make

- "H.W.MORTIMER & SON" was observed marked on the left side of the firearm.
- "GUNMAKERS TO HIS MAJESTY" was observed marked on the right side of the firearm.

Model

- model is not marked on the firearm, rather it is the features which describe the firearm, that being a four barrel pistol in a "fan" or "Duck's Foot" barrel profile.
- made circa 1806 to 1812.
- each barrel is cut at the muzzle to receive a a turnoff key where loading is accomplished by unscrewing each barrel.
- a central cock discharges all of the barrels simultaneously.
- features include: no sights; forged, brass breech that is integral with the boxlock; full width rectangular pan drilled with four touch holes; engraved boxlock; centrally mounted cock and sliding safety (engages only on the full cock position); one piece, hardwood grip; browned finish.
- overall length is 229mm/9" and average weight is .680 kg/1 1/2lbs.

Manufacturer

- "H.W.MORTIMER & SON 89 FLEET St." was observed marked on the left side of the firearm.
- "GUNMAKERS TO HIS MAJESTY" was observed marked on the right side of the firearm.

Action

- screw barrel design, flintlock ignition.

Other Markings

- the barrels are usually numbered one to four or five to eight implying that they were usually made as a pair.

Notes

Make

- "H.W.MORTIMER" over "LONDON GUN" and "MAKER TO HIS MAJESTY" was observed marked on the barrel/receiver/frame.

Model

- model designation is not marked on the firearm.
- model designation is derived from the method by which this pistol is loaded; loading was accomplished by unscrewing the barrel.
- "Screw Barrel Pistol" is a single shot pistol, intended to be loaded from the breech end of the barrel and as such was originally supplied with a wrench to unscrew the barrel from the receiver/frame in order that a lead ball and loose powder could be inserted into the chamber end of the barrel and then the barrel screwed back onto the receiver/frame.
- features may include: tapered, round barrel with underlug for wrench; boxlock or round action; exposed hammer; folding trigger; barrel usually has scroll engraving; round, curved, checkered wooden grip.

Manufacturer

- "H.W.MORTIMER" over "LONDON GUN" and "MAKER TO HIS MAJESTY" was observed marked on the barrel/receiver/frame.

Action

- the barrel unscrews in front of the chamber, so it can be loaded with a ball that fits the barrel more tightly than is possible with a muzzle loader.

141005 - 1	45 PERCUSSION	5	178	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "T. E. MORTIMER, EDINBURGH" is marked on the barrel.
- Thomas Elsworth Mortimer (b. 1807 - d. 1860) was the son of Thomas Jackson Mortimer.
- Thomas Elsworth Mortimer / T. E. Mortimer was located at 34 St. James's Street, London, England from 1834 to 1840.
- Thomas Elsworth Mortimer / T. E. Mortimer established a business in Edinburgh, Scotland in 1834.
- Thomas Elsworth Mortimer / T. E. Mortimer was located at 78 Prince Street, 97 George Street and 86 George Street, Edinburgh, Scotland from 1834 to 1862.
- Thomas Elsworth Mortimer / T. E. Mortimer became Mortimer & Son in 1862.

Model

- model name is not marked on the firearm.
- this is an open top receiver/frame, percussion revolver with a long flat spur hammer.
- manufactured circa 1853 to 1899.
- the 1853 Longspur Model came in three sizes: Holster size, normally five shots and a 178mm (7") barrel, Belt size, normally five shots and a 121 - 127mm (4.75 - 5") barrel, and Pocket size, six shots and a 89 -102mm (3.5 - 4") barrel.
- there may be a safety lever on the left side of the receiver/frame that when pressed forward the hammer is held safely in either the cocked or uncocked position.
- the First model can be distinguished by the absence of a rammer and a partially enclosed hammer.
- the Second model incorporates an Adams-type rammer secured to the receiver/frame by a spring clip.
- the Third model can be determined by the compound rammer (patented by James Kerr in 1955, No. 1722) that is mounted to the barrel web and lays flat along the left side of the barrel, instead of being hinged is screwed onto the end of the cylinder axis rod and then secured by a horizontal screw entering from the front of the lug into the receiver/frame.

Manufacturer

- "JAMES WEBLEY PATENTEE", or "JAMES WEBLEY ST. MARY'S SQUARE, BIRMINGHAM", or "WEBLEY'S PATENT" may be marked on the firearm.

Action

- percussion ignition.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the side of the receiver/frame.
- known examples had three numbers without prefix or suffix.

FRT Report

Firearm Reference Number (FRN): 1685
Make: Mosin-Nagant
Model: 1891

Summary

Make:	Mosin-Nagant
Model:	1891
Manufacturer:	Manufacture d'Armes de Chatellerault (MAC)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	FRANCE
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
1685 - 1	7.62X54R RUSSIAN	5	802	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make does not appear on the firearm.
- the Mosin-Nagant rifle system was the result of combining features of firearms submitted for testing to the Russian "Special Commission for the Testing of Magazine Rifles" by designers Sergei Mosin (1849 - 1902, sometimes referred to as Moisin) of Russia and Leon Nagant (1833 - 1900) of Belgium.
- the first Mosin-Nagant rifle was officially adopted for use by the Russian military in 1891 as the "Russian 3-in line rifle Model 1891".
- Mosin's name was not included in the model designation until after he had passed away when it was renamed the "Mosin-system 7.62mm Magazine Rifle, Model of 1891".
- the name "Mosin-Nagant" is the name most commonly used in recognition of both designers.
- Mosin was responsible for the overall design of the rifle while Nagant designed the magazine follower, bolt and charger clip.
- the Mosin-Nagant series of rifles included several variations and were used by and produced in several nations.

Model

- manufactured between 1892 and 1895, the model designation does not appear on the firearm.
- features include: manually operated, bolt action rifle; one piece hardwood stock, with wood top handguards, blade front-sight and ramp-leaf rear sight.
- total production by this manufacturer was 503,540 examples.

Manufacturer

- the manufacturer's name appears on the chamber of the barrel in Cyrillic letters.
- these French manufactured Mosin-Nagant Model 1891 rifles were ordered by the Russian government as an interim measure until Russian arms factories could tool up and begin production.
- "Manufacture Nationale d'Armes de Chatellerault (MAC)" was established in Chatellerault, France in 1819.
- "Manufacture Nationale d'Armes de Chatellerault (MAC)" manufactured small arms for the French government including machine-guns, rifles and pistols between 1822 and 1968.

Serial Number

- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the manufacturer chose to apply a serial number to the rear of the barrel on the enlarged portion above the chamber. The barrel of this firearm is not difficult to remove and replace.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the barrel of this firearm is an uncontrolled spare part which is not difficult to remove and replace

Other Markings

- the arsenal of production, year of production and in some cases the country of origin and/or the property mark of the country of origin may also appear on the top rear of the barrel above the chamber.

Remarks

- this firearm was the first small bore military rifle to be adopted by Russia. The original pattern had sling swivels mounted on the front barrel band and on the magazine, on later production rifles these swivels were eliminated and replaced by slots in the forearm and buttstock. In 1908 a new loading of the 7.62X54R RUSSIAN cartridge was introduced which necessitated a major change in the sights of existing rifles (the "flat leaf" rear sight replaced by the "arched leaf"). These French manufactured Mosin-Nagant Model 1891 rifles were ordered by the Russian government as an interim measure as Russian arms factories could not meet the demand for arms.

1687 - 1	7.62X54R RUSSIAN	5	802	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make does not appear on the firearm.
- the Mosin-Nagant rifle system was the result of combining features of firearms submitted for testing to the Russian "Special Commission for the Testing of Magazine Rifles" by designers Sergei Mosin (1849 - 1902, sometimes referred to as Moisin) of Russia and Leon Nagant (1833 - 1900) of Belgium.
- the first Mosin-Nagant rifle was officially adopted for use by the Russian military in 1891 as the "Russian 3-in line rifle Model 1891".
- Mosin's name was not included in the model designation until after he had passed away when it was renamed the "Mosin-system 7.62mm Magazine Rifle, Model of 1891".
- the name "Mosin-Nagant" is the name most commonly used in recognition of both designers.
- Mosin was responsible for the overall design of the rifle while Nagant designed the magazine follower, bolt and charger clip.
- the Mosin-Nagant series of rifles included several variations and were used by and produced in several nations.

Model

- the model designation does not appear on the firearm. These rifles were manufactured from 1915 to 1917.
- features include: manually operated, bolt action rifle; one piece hardwood stock, with wood top handguards, blade front-sight and ramp-leaf rear sight.
- total production by this manufacturer was 769,520 examples.

Manufacturer

- the manufacturer's name appears in English on the top of the chamber of the barrel.
- these United States of America manufactured Mosin-Nagant Model 1891 rifles were ordered by the Russian government as an interim measure until Russian arms factories could tool up and begin production.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the manufacturer chose to apply a serial number to the rear of the barrel on the enlarged portion above the chamber. The barrel of this firearm is not difficult to remove and replace.

Canadian Law Comments

- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the barrel of this firearm is an uncontrolled spare part which is not difficult to remove and replace.

Other Markings

- the arsenal of production, year of production and in some cases the country of origin and/or the property mark of the country of origin may also appear on the top rear of the barrel above the chamber.

Remarks

- these Westinghouse manufactured rifles were ordered by the Czarist government in 1915 to supplement chronic rifle shortages in the Russian Army during World War One, they are identical to post 1908 Russian manufactured Model 1891 Mosin-Nagant rifles.
- this firearm was the first small bore military rifle to be adopted by Russia. The original pattern had sling swivels mounted on the front barrel band and on the magazine, on later production rifles these swivels were eliminated and replaced by slots in the forearm and buttstock. In 1908 a new loading of the 7.62X54R RUSSIAN cartridge was introduced which necessitated a major change in the sights of existing rifles (the "flat leaf" rear sight replaced by the "arched leaf").

- rifles manufactured after 1908 incorporated the new sights.
- features include: manually operated, bolt action rifle; one piece hardwood stock, with wood top handguards, blade front-sight and ramp-leaf rear sight.

Manufacturer

- the manufacturer's name appears on the chamber of the barrel in Cyrillic letters. There are three known variations in markings. Pre-1913 markings translate to "Imperial Tula Arsenal". Markings used between 1913 and 1917/18 translate to "Imperial Tula Arsenal of Peter the Great". After 1918 markings denote "Premier Arsenal, in Tula". The pre-1928 Tula Arsenal mark is a hammer, this may be found on most parts including the receiver/frame.
- the post-1928 Tula Arsenal mark is an arrow in a five pointed star.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make

- make is not marked on the firearm.

Model

- model designation is not marked on the firearm.
- "8x57mm PV B.BLINDEE" is marked on the left side of the barrel.
- this firearm is a Mosin-Nagant model 1891 rifle converted to 8MM MAUSER calibre.
- features include: conversions utilize the original barrel with a setback chamber and a notch cut in the top of the receiver/frame to compensate for the longer 8MM MAUSER calibre cartridge; rear sights were regraduated and the front sight was replaced; the bolt head was reworked for the smaller rimless cartridge head and the bolt head was shortened from the front; the charger bridge is modified and the extractor and ejector modified to function with a rimless cartridge; the magazine body was reshaped to suit the new cartridge.

Action

- manually operated bolt action.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the manufacturing firm which performed the conversion to 8MM MAUSER calibre (purported to be Soley-Grimard et Cie) remarked the receiver/frame forward left side with a serial number. - the serial number rationalization is not known, however serial numbers have been reported that consisted of five or seven digits.
Calibre	- "8x57mm" is marked on the left side of the barrel.
Shots	- integral charger-loaded box magazine.
Canadian Law Comments	- the original manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms. - the manufacturing firm which performed the conversion to 8MM Mauser calibre (purported to be Soley-Grimard et Cie) remarked the receiver/frame with a serial number.
Other Markings	- Belgium Liege proof marks are found on the barrel and receiver/frame. - "8x57mm PV B.BLINDEE" is marked on the left side of the barrel.

FRT Report

Firearm Reference Number (FRN): 1691
Make: Mosin-Nagant
Model: 1891 Dragoon

Summary

Make:	Mosin-Nagant
Model:	1891 Dragoon
Manufacturer:	Russian State Arsenal, Izhevsk
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
1691 - 1	7.62X54R RUSSIAN	5	732	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the Make does not appear on the firearm.
- the Mosin-Nagant rifle system was the result of combining features of firearms submitted for testing to the Russian "Special Commission for the Testing of Magazine Rifles" by designers Sergei Mosin (1849 - 1902, sometimes referred to as Moisin) of Russia and Leon Nagant (1833 - 1900) of Belgium.
- the first Mosin-Nagant rifle was officially adopted for use by the Russian military in 1891 as the "Russian 3-in line rifle Model 1891".
- Mosin's name was not included in the model designation until after he had passed away when it was renamed the "Mosin-system 7.62mm Magazine Rifle, Model of 1891".
- the name "Mosin-Nagant" is the name most commonly used in recognition of both designers.
- Mosin was responsible for the overall design of the rifle while Nagant designed the magazine follower, bolt and charger clip.
- the Mosin-Nagant series of rifles included several variations and were used by and produced in several nations.

Model

- the model designation does not appear on the firearm.
- these rifles were manufactured from 1892 to 1930.
- this firearm model is identical to standard Model 1891Rifle except approximately 64mm shorter in overall length.
- this rifle was intended for use by mounted troops.
- features include: manually operated, bolt action rifle; one piece hardwood stock, with wood top handguards, blade front-sight and ramp-leaf rear sight.
- in 1908, a new loading of the 7.62X54R RUSSIAN cartridge was introduced which necessitated major change in the sights of existing rifles (the "flat leaf" rear sight replaced by the "arched leaf").
- rifles manufactured after 1908 incorporated the new sights.
- unmodified pre-1908 Dragoon Models are extremely rare.

Manufacturer

- "Izhevsk Arsenal" may be marked on the top of the chamber of the barrel in Cyrillic letters.
- the Izhevsk Arsenal mark is a "bow and arrow", pre 1928, this may be found on most parts including the receiver/frame.
- the Izhevsk Arsenal mark is an "arrow inside a triangle", post 1928, this may be found on most parts including the receiver/frame, or the "hammer and sickle" inside a laurel wreath.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the manufacturer chose to apply a serial number to the rear of the barrel on the enlarged portion above the chamber.
- the barrel of this firearm is not difficult to remove and replace.

Canadian Law Comments

- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the barrel of this firearm is an uncontrolled spare part which is not difficult to remove and replace.

Other Markings

- the arsenal of production, year of production and in some cases the country of origin and/or the property mark of the country of origin may also appear on the top rear of the barrel above the chamber.
- the Izhevsk Arsenal mark is a "bow and arrow" and this may be found on most parts including the receiver.

Model: 1891 Finnish

Summary

Make:	Mosin-Nagant
Model:	1891 Finnish
Manufacturer:	
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	FINLAND
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
1722 - 1	7.62X54R RUSSIAN	5	802	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make does not appear on the firearm.
- the Mosin-Nagant rifle system was the result of combining features of firearms submitted for testing to the Russian "Special Commission for the Testing of Magazine Rifles" by designers Sergei Mosin (1849 - 1902, sometimes referred to as Moisin) of Russia and Leon Nagant (1833 - 1900) of Belgium.
- the first Mosin-Nagant rifle was officially adopted for use by the Russian military in 1891 as the "Russian 3-in line rifle Model 1891".
- Mosin's name was not included in the model designation until after he had passed away when it was renamed the "Mosin-system 7.62mm Magazine Rifle, Model of 1891".
- the name "Mosin-Nagant" is the name most commonly used in recognition of both designers.
- Mosin was responsible for the overall design of the rifle while Nagant designed the magazine follower, bolt and charger clip.
- the Mosin-Nagant series of rifles included several variations and were used by and produced in several nations.

Model

- the model designation does not appear on the firearm. These rifles were manufactured from 1924 to 1944.
- identical to Russian model 1891 except for several modifications which include regraduating the rear sight (on right side of base) and replacing the stock with one made in two pieces and joined ahead of the finger grooves on the forearm.
- these rifles may be seen built on original Finnish receiver/frames (manufactured at SAKO, Oy Tikkakoski, or Riihimaki), or on original Russian receiver/frames that were inherited from Russia after Finnish independence in 1918, or captured during the Civil War or sporadic Russo-Finnish fighting up through World War Two.

Serial Number

- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the manufacturer chose to apply a serial number to the rear of the barrel on the enlarged portion above the chamber.
- the barrel of this firearm is not difficult to remove and replace.

Canadian Law Comments

- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the barrel of this firearm is an uncontrolled spare part which is not difficult to remove and replace

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- a capital letter "S" surmounted by three fir branches in a shield on the chamber of the barrel and appears on the rear of the barrel on the top of the chamber.
- the Finnish property stamp "SA" in a rectangle also appears on the rear of the barrel on the top of the chamber.

- the name "Mosin-Nagant" is the name most commonly used in recognition of both designers.
- Mosin was responsible for the overall design of the rifle while Nagant designed the magazine follower, bolt and charger clip.
- the Mosin-Nagant series of rifles included several variations and were used by and produced in several nations.

Model

- the model designation does not appear on the firearm.
- these rifles were manufactured from 1923 to 1928.
- these firearms are Russian Mosin-Nagant, Model 1891 Rifles refurbished for use by the Finnish Civil Guard.
- new barrels were ordered from German and Swiss companies and their names often appear on the right side of the chamber. Some of the new barrels were of a heavier weight than normal and these may be identified by a pronounced step about 40mm behind the front sight.
- all M-91/24 rifles have two piece stocks joined ahead of the finger grooves on the forearm.
- these rifles may be seen built on original Finnish receiver/frames (manufactured at SAKO, Oy Tikkakoski, or Riihimaki), or on original Russian receiver/frames that were inherited from Russia after Finnish independence in 1918, or captured during the Civil War or sporadic Russo-Finnish fighting up through World War Two.

Notes

Make

- the make does not appear on the firearm.
- the Mosin-Nagant rifle system was the result of combining features of firearms submitted for testing to the Russian "Special Commission for the Testing of Magazine Rifles" by designers Sergei Mosin (1849 - 1902, sometimes referred to as Moisin) of Russia and Leon Nagant (1833 - 1900) of Belgium.
- the first Mosin-Nagant rifle was officially adopted for use by the Russian military in 1891 as the "Russian 3-in line rifle Model 1891".
- Mosin's name was not included in the model designation until after he had passed away when it was renamed the "Mosin-system 7.62mm Magazine Rifle, Model of 1891".
- the name "Mosin-Nagant" is the name most commonly used in recognition of both designers.
- Mosin was responsible for the overall design of the rifle while Nagant designed the magazine follower, bolt and charger clip.
- the Mosin-Nagant series of rifles included several variations and were used by and produced in several nations.

Model

- the model designation does not appear on the firearm.
- these rifles were manufactured during the 1960's, at the Gramsh arsenal, a factory that was given to Albania by the Chinese.
- these rifles resemble the standard Soviet Russian Model 1891/30 Rifle, but are more closely related to the Chinese Type 53, as the factory was being run by Chinese engineers and advisors.
- these rifles are marked with a four-digit date of manufacture, a Chinese-style "dot within a circle" proof mark, and a serial number on top of the round Type 53-style receiver/frame.
- the sights are calibrated in metres, from 1 (100) to 20 (2000), and the straight-grip stock has a "hog's back"-style comb.
- features include: blued finish; open adjustable sights with ring-hooded front; underbarrel ramrod; full-length hardwood straight-grip stock and upper handguard with two barrel bands and a nosecap; rear sight on a sleeve over the rear of the barrel; hog's-back comb; and a metal butt plate.

Manufacturer

- the manufacturer is not marked on the firearm.
- the Gramsh Mechanical Factory was established near the town of Gramsh in 1962, after being shipped entirely from China.

Serial Number

- serial-numbered on the top of the receiver, with a date; observed examples noted with four digits, without a prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - fixed box magazine.

Model

- the model designation does not appear on the firearm.
- these rifles were manufactured during the 1950's, at the Cugir arsenal in Romania.
- these rifles resemble the standard Soviet Russian Model 1891/30 Rifle, but bear Romanian national markings of "RPR" ("Republica Populara Romina", or "Romanian People's Republic") and the Cugir arsenal mark of a tailless arrow in a triangle.
- these rifles are marked with a four-digit date of manufacture, and a serial number with a two-character alphabetical prefix.
- the sights are calibrated in metres, from 1 (100) to 20 (2000), and the straight-grip stock has a "hog's back"-style comb.
- features include: blued finish; open adjustable sights with non-hooded front; underbarrel ramrod; full-length hardwood straight-grip stock and upper handguard with two barrel bands and a nosecap; hog's-back comb; and a metal butt plate.

Manufacturer

- the Romanian crest of "RPR" within curved laurels is marked on top of the receiver, with the Cugir arsenal mark of a tailless arrow within a triangle.

Serial Number

- serial-numbered on the top of the receiver/frame.
- examples noted with a two letter prefix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - permanently fixed box magazine that is loaded from a stripper clip.

Notes

Make

- the make does not appear on the firearm.
- the Mosin-Nagant rifle system was the result of combining features of firearms submitted for testing to the Russian "Special Commission for the Testing of Magazine Rifles" by designers Sergei Mosin (1849 - 1902, sometimes referred to as Moisin) of Russia and Leon Nagant (1833 - 1900) of Belgium.
- the first Mosin-Nagant rifle was officially adopted for use by the Russian military in 1891 as the "Russian 3-in line rifle Model 1891".
- Mosin's name was not included in the model designation until after he had passed away when it was renamed the "Mosin-system 7.62mm Magazine Rifle, Model of 1891".
- the name "Mosin-Nagant" is the name most commonly used in recognition of both designers.
- Mosin was responsible for the overall design of the rifle while Nagant designed the magazine follower, bolt and charger clip.
- the Mosin-Nagant series of rifles included several variations and were used by and produced in several nations.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation does not appear on the firearm.
- manufactured from 1931 to 1953.
- this is a modernized version of the Model 1891 Dragoon Rifle.
- it has a hooded post front sight and tangent rear sight.
- receiver/frame is round in section as opposed to octagonal as found on the Dragoon Rifle, (some specimens dated in the 1930's may have the octagonal receivers).
- some of these rifles were modified by adding optical sights and turning down the bolt handle. These models were intended to be used for precision shooting and are sometimes refered to as "Sniper Rifles".

Manufacturer

- "Izhevsk Arsenal" may be marked on the top of the chamber of the barrel in Cyrillic letters.
- the Izhevsk Arsenal mark is a "bow and arrow", pre 1928, this may be found on most parts including the receiver/frame.
- the Izhevsk Arsenal mark is an "arrow inside a triangle", post 1928, this may be found on most parts including the receiver/frame, or the "hammer and sickle" inside a laurel wreath.

Serial Number

- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the manufacturer chose to apply a serial number to the rear of the barrel on the enlarged portion above the chamber.
- the barrel of this firearm is not difficult to remove and replace.

Canadian Law Comments

- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the barrel of this firearm is an uncontrolled spare part which is not difficult to remove and replace.

Other Markings

- year of manufacture may appear on chamber of barrel.
- one sample observed featured the importer's markings "M91/30 RUSSIA 7.62X54R" over "C.A.I. GEORGIA, VT" marked on the left side of the receiver/frame.

Notes

Make

- the make does not appear on the firearm.
- the Mosin-Nagant rifle system was the result of combining features of firearms submitted for testing to the Russian "Special Commission for the Testing of Magazine Rifles" by designers Sergei Mosin (1849 - 1902, sometimes referred to as Moisin) of Russia and Leon Nagant (1833 - 1900) of Belgium.
- the first Mosin-Nagant rifle was officially adopted for use by the Russian military in 1891 as the "Russian 3-in line rifle Model 1891".
- Mosin's name was not included in the model designation until after he had passed away when it was renamed the "Mosin-system 7.62mm Magazine Rifle, Model of 1891".
- the name "Mosin-Nagant" is the name most commonly used in recognition of both designers.
- Mosin was responsible for the overall design of the rifle while Nagant designed the magazine follower, bolt and charger clip.
- the Mosin-Nagant series of rifles included several variations and were used by and produced in several nations.

Model

- the model designation does not appear on the firearm.
- this is a re-worked 1891 originally made at Sestroretsk arsenal.
- this is a modernized version of the Model 1891 Dragoon Rifle.
- it has a hooded post front sight and tangent rear sight.
- receiver/frame is round in section as opposed to octagonal as found on the Dragoon Rifle, (some specimens dated in the 1930's may have the octagonal receivers).
- some of these rifles were modified by adding optical sights and turning down the bolt handle. These models were intended to be used for precision shooting and are sometimes refered to as "Sniper Rifles".

Manufacturer

- the maker's symbol, an arrow, appears on most parts including the receiver/frame.

Serial Number

- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the manufacturer chose to apply a serial number to the rear of the barrel on the enlarged portion above the chamber.
- the barrel of this firearm is not difficult to remove and replace.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments
- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the barrel of this firearm is an uncontrolled spare part which is not difficult to remove and replace.

Notes

Make

- the make does not appear on the firearm.
- the Mosin-Nagant rifle system was the result of combining features of firearms submitted for testing to the Russian "Special Commission for the Testing of Magazine Rifles" by designers Sergei Mosin (1849 - 1902, sometimes referred to as Moisin) of Russia and Leon Nagant (1833 - 1900) of Belgium.
- the first Mosin-Nagant rifle was officially adopted for use by the Russian military in 1891 as the "Russian 3-in line rifle Model 1891".
- Mosin's name was not included in the model designation until after he had passed away when it was renamed the "Mosin-system 7.62mm Magazine Rifle, Model of 1891".
- the name "Mosin-Nagant" is the name most commonly used in recognition of both designers.
- Mosin was responsible for the overall design of the rifle while Nagant designed the magazine follower, bolt and charger clip.
- the Mosin-Nagant series of rifles included several variations and were used by and produced in several nations.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model designation does not appear on the firearm. - manufactured from 1931 to 1953. - this is a modernized version of the Model 1891 Dragoon Rifle. - it has a hooded post front sight and tangent rear sight. - receiver/frame is round in section as opposed to octagonal as found on the Dragoon Rifle, (some specimens dated in the 1930's may have the octagonal receivers). - some of these rifles were modified by adding optical sights and turning down the bolt handle. These models were intended to be used for precision shooting and are sometimes refered to as "Sniper Rifles".
Manufacturer	- the manufacturer's symbol, an arrow inside a star, appears on most parts including the receiver/frame.
Serial Number	- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms. - the manufacturer chose to apply a serial number to the rear of the barrel on the enlarged portion above the chamber. - the barrel of this firearm is not difficult to remove and replace.
Canadian Law Comments	- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms. - the barrel of this firearm is an uncontrolled spare part which is not difficult to remove and replace.
Other Markings	- will have the year of manufacture over the chamber of the barrel.

Make

- the make does not appear on the firearm.
- the Mosin-Nagant rifle system was the result of combining features of firearms submitted for testing to the Russian "Special Commission for the Testing of Magazine Rifles" by designers Sergei Mosin (1849 - 1902, sometimes referred to as Moisin) of Russia and Leon Nagant (1833 - 1900) of Belgium.
- the first Mosin-Nagant rifle was officially adopted for use by the Russian military in 1891 as the "Russian 3-in line rifle Model 1891".
- Mosin's name was not included in the model designation until after he had passed away when it was renamed the "Mosin-system 7.62mm Magazine Rifle, Model of 1891".
- the name "Mosin-Nagant" is the name most commonly used in recognition of both designers.
- Mosin was responsible for the overall design of the rifle while Nagant designed the magazine follower, bolt and charger clip.
- the Mosin-Nagant series of rifles included several variations and were used by and produced in several nations.

Model

- the model designation does not appear on the firearm.
- these rifles were manufactured from 1943 to 1945.

Manufacturer

- the Finnish arsenal mark for this manufacturer is a letter 'T' in a triangle and will be found on the rear of the barrel above the chamber.

Serial Number

- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the manufacturer chose to apply a serial number to the rear of the barrel on the enlarged portion above the chamber.
- the barrel of this firearm is not difficult to remove and replace.

Canadian Law Comments

- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the barrel of this firearm is an uncontrolled spare part which is not difficult to remove and replace.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings	- the Finnish arsenal mark for this manufacturer is a letter 'T' in a triangle and will be found on the rear of the barrel above the chamber. - the Finnish army property stamp "SA" in a rectangle and the year of manufacture also appears on the rear of the barrel above the chamber.
Remarks	- this rifle is a complete re-build of captured Soviet Model 1891/30 rifles which involved replacing and fitting a new barrel and stock. - these rebuilt rifles have a close resemblance to the original Model 1891/30 rifles.

Notes

Make

- the make does not appear on the firearm.
- the Mosin-Nagant rifle system was the result of combining features of firearms submitted for testing to the Russian "Special Commission for the Testing of Magazine Rifles" by designers Sergei Mosin (1849 - 1902, sometimes referred to as Moisin) of Russia and Leon Nagant (1833 - 1900) of Belgium.
- the first Mosin-Nagant rifle was officially adopted for use by the Russian military in 1891 as the "Russian 3-in line rifle Model 1891".
- Mosin's name was not included in the model designation until after he had passed away when it was renamed the "Mosin-system 7.62mm Magazine Rifle, Model of 1891".
- the name "Mosin-Nagant" is the name most commonly used in recognition of both designers.
- Mosin was responsible for the overall design of the rifle while Nagant designed the magazine follower, bolt and charger clip.
- the Mosin-Nagant series of rifles included several variations and were used by and produced in several nations.

Model

- the model designation is marked on the top of the receiver ring.
- this model has no bayonet.
- after World War II the Bulgarians were persuaded by the Soviets to add to the ex-Russian M1891/30 to their M1891s inventory .
- the project was done at the Bulgarian arsenals in Tarnovo and Kasanlak in the late 1950's, and as a result it became known as the Model "1891/59". The major modification was the shortening of original barrels coming from the M1891 and the M1891/30 rifles.

Manufacturer

- may be found with the Izhevsk (Russian State Arsenal) proofmark.

- the name "Mosin-Nagant" is the name most commonly used in recognition of both designers.
- Mosin was responsible for the overall design of the rifle while Nagant designed the magazine follower, bolt and charger clip.
- the Mosin-Nagant series of rifles included several variations and were used by and produced in several nations.

Model

- the model designation is not marked on the firearm.
- manufactured from 1907 to 1918.
- this carbine was designed for use by mounted troops.
- this firearm is mechanically identical to the Model 1891 Rifle, with a considerably shorter barrel which is stocked almost to the muzzle and cannot be fitted with a bayonet.
- modifications to the sights and stock took place in 1910.
- this model is widely believed to be the Model 1910 Carbine; however, the carbine was not officially assigned this model name.

Manufacturer

- "Izhevsk Arsenal" may be marked on the top of the chamber of the barrel in Cyrillic letters.
- the Izhevsk Arsenal mark is a "bow and arrow", pre 1928, this may be found on most parts including the receiver/frame.
- the Izhevsk Arsenal mark is an "arrow inside a triangle", post 1928, this may be found on most parts including the receiver/frame, or the "hammer and sickle" inside a laurel wreath.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the manufacturer chose to apply a serial number to the rear of the barrel on the enlarged portion above the chamber.
- the barrel of this firearm is not difficult to remove and replace.

Canadian Law Comments

- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the barrel of this firearm is an uncontrolled spare part which is not difficult to remove and replace.

FRT Report

Firearm Reference Number (FRN): 1704
Make: Mosin-Nagant
Model: 1907 Carbine

Summary

Make:	Mosin-Nagant
Model:	1907 Carbine
Manufacturer:	Russian State Arsenal, Tula
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
1704 - 1	7.62X54R RUSSIAN	5	508	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make does not appear on the firearm.
- the Mosin-Nagant rifle system was the result of combining features of firearms submitted for testing to the Russian "Special Commission for the Testing of Magazine Rifles" by designers Sergei Mosin (1849 - 1902, sometimes referred to as Moisin) of Russia and Leon Nagant (1833 - 1900) of Belgium.
- the first Mosin-Nagant rifle was officially adopted for use by the Russian military in 1891 as the "Russian 3-in line rifle Model 1891".
- Mosin's name was not included in the model designation until after he had passed away when it was renamed the "Mosin-system 7.62mm Magazine Rifle, Model of 1891".
- the name "Mosin-Nagant" is the name most commonly used in recognition of both designers.
- Mosin was responsible for the overall design of the rifle while Nagant designed the magazine follower, bolt and charger clip.
- the Mosin-Nagant series of rifles included several variations and were used by and produced in several nations.

Model

- the model designation is not marked on the firearm.
- manufactured from 1907 to 1918.
- this carbine was designed for use by mounted troops.
- this firearm is mechanically identical to the Model 1891 Rifle, with a considerably shorter barrel which is stocked almost to the muzzle and cannot be fitted with a bayonet.
- modifications to the sights and stock took place in 1910.
- this model is widely believed to be the Model 1910 Carbine; however, the carbine was not officially assigned this model name.

Manufacturer

- manufacturer's name is marked on the top of the chamber of the barrel in Cyrillic letters.
- the pre-1928 Tula Arsenal mark is a "hammer" in a circle, this may be found on most parts including the receiver/frame.

Serial Number

- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the manufacturer chose to apply a serial number to the rear of the barrel on the enlarged portion above the chamber.
- the barrel of this firearm is not difficult to remove and replace.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments
- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the barrel of this firearm is an uncontrolled spare part which is not difficult to remove and replace.

Notes

Make

- the make does not appear on the firearm.
- the Mosin-Nagant rifle system was the result of combining features of firearms submitted for testing to the Russian "Special Commission for the Testing of Magazine Rifles" by designers Sergei Mosin (1849 - 1902, sometimes referred to as Moisin) of Russia and Leon Nagant (1833 - 1900) of Belgium.
- the first Mosin-Nagant rifle was officially adopted for use by the Russian military in 1891 as the "Russian 3-in line rifle Model 1891".
- Mosin's name was not included in the model designation until after he had passed away when it was renamed the "Mosin-system 7.62mm Magazine Rifle, Model of 1891".
- the name "Mosin-Nagant" is the name most commonly used in recognition of both designers.
- Mosin was responsible for the overall design of the rifle while Nagant designed the magazine follower, bolt and charger clip.
- the Mosin-Nagant series of rifles included several variations and were used by and produced in several nations.

Model

- the model designation was not factory applied on the firearm, samples imported by Century Arms may have a model designation stamped on the barrel as "M27".
- the model designation does not appear on the firearm.
- these rifles were manufactured from 1927 to 1934.
- these firearms are essentially shortened M1891/24 Rifles.
- this model was the first to have the hinged nose-cap.
- features include: two piece stocks joined ahead of the finger grooves on the forearm; hinged nose-cap upon which the bayonet mounted.
- 60,000 examples were manufactured by this manufacturer between 1927 and 1934.

Manufacturer

- the Finnish arsenal mark, a letter "T" within a triangle, appears on the top rear of the barrel above the chamber.

Serial Number

- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the manufacturer chose to apply a serial number to the rear of the barrel on the enlarged portion above the chamber.
- the barrel of this firearm is not difficult to remove and replace.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- appears on the barrel.
Canadian Law Comments	- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms. - the barrel of this firearm is an uncontrolled spare part which is not difficult to remove and replace.
Other Markings	- the Finnish arsenal mark for this manufacturer is a letter 'T' in a triangle and will be found on the rear of the barrel above the chamber. - the Finnish army property stamp "SA" in a rectangle and the year of manufacture also appears on the rear of the barrel above the chamber. - the year of manufacture also appears on the top of the chamber end of the barrel.
Remarks	- this firearm is the first of the Finnish designed "short rifles". Actions are Russian 3 Line Model 1891 but barrels, stocks, bands and nosecaps are totally Finnish. - the arsenal of production, year of production and in some cases the country of origin and/or the property mark of the country of origin may also appear on the rear of the barrel.

Notes

Make

- the make does not appear on the firearm.
- the Mosin-Nagant rifle system was the result of combining features of firearms submitted for testing to the Russian "Special Commission for the Testing of Magazine Rifles" by designers Sergei Mosin (1849 - 1902, sometimes referred to as Moisin) of Russia and Leon Nagant (1833 - 1900) of Belgium.
- the first Mosin-Nagant rifle was officially adopted for use by the Russian military in 1891 as the "Russian 3-in line rifle Model 1891".
- Mosin's name was not included in the model designation until after he had passed away when it was renamed the "Mosin-system 7.62mm Magazine Rifle, Model of 1891".
- the name "Mosin-Nagant" is the name most commonly used in recognition of both designers.
- Mosin was responsible for the overall design of the rifle while Nagant designed the magazine follower, bolt and charger clip.
- the Mosin-Nagant series of rifles included several variations and were used by and produced in several nations.

Model

- the model designation does not appear on the firearm.
- these rifles were manufactured from 1933 to 1940.
- this rifle was designed specifically for the Finnish Civil Guard and closely resembles the Finnish Army Model 1927 differing in minor details.
- in 1930 a new rear sight plus modifications to the front sight and trigger mechanism were approved for the Model 1928 Civil Guard Rifle; these alterations were incorporated and the new rifle went into production in 1933 as the Model 1928/30.
- total production of Model 1928/30 Rifles was approximately 36,000.

Manufacturer

- the Finnish manufacturer's arsenal mark is the letter "S" in a geared wheel which will be found on the top rear of the barrel above the chamber.

Serial Number

- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the manufacturer chose to apply a serial number to the rear of the barrel on the enlarged portion above the chamber.
- the barrel of this firearm is not difficult to remove and replace.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments	- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms. - the barrel of this firearm is an uncontrolled spare part which is not difficult to remove and replace.
Other Markings	- the Finnish manufacturer's arsenal mark is the letter "S" in a geared wheel which will be found on the top rear of the barrel above the chamber. - the Finnish army property stamp is 'SA' in a rectangle which appears along with the year of manufacture will also be found on the top rear of the barrel above the chamber.
Remarks	- this rifle was designed specifically for the Finnish Civil Guard and closely resembles the Finnish Army Model 1927 differing in minor details. - in 1930 a new rear sight plus modifications to the front sight and trigger mechanism were approved for the Model 1928 Civil Guard Rifle; these alterations were incorporated and the new rifle went into production in 1933 as the Model 1928/30. - a small number of 1928/30 rifles were produced for commercial civilian sales between 1934 and 1941.

Notes

Make

- the make does not appear on the firearm.
- the Mosin-Nagant rifle system was the result of combining features of firearms submitted for testing to the Russian "Special Commission for the Testing of Magazine Rifles" by designers Sergei Mosin (1849 - 1902, sometimes referred to as Moisin) of Russia and Leon Nagant (1833 - 1900) of Belgium.
- the first Mosin-Nagant rifle was officially adopted for use by the Russian military in 1891 as the "Russian 3-in line rifle Model 1891".
- Mosin's name was not included in the model designation until after he had passed away when it was renamed the "Mosin-system 7.62mm Magazine Rifle, Model of 1891".
- the name "Mosin-Nagant" is the name most commonly used in recognition of both designers.
- Mosin was responsible for the overall design of the rifle while Nagant designed the magazine follower, bolt and charger clip.
- the Mosin-Nagant series of rifles included several variations and were used by and produced in several nations.

Model

- model designation does not appear on the firearm.
- these carbines were manufactured from 1938 to 1944.
- has a hooded front sight, tangent rear sight, and does not take a bayonet.

Manufacturer

- "Izhevsk Arsenal" may be marked on the top of the chamber of the barrel in Cyrillic letters.
- the Izhevsk Arsenal mark is a "bow and arrow", pre 1928, this may be found on most parts including the receiver/frame.
- the Izhevsk Arsenal mark is an "arrow inside a triangle", post 1928, this may be found on most parts including the receiver/frame, or the "hammer and sickle" inside a laurel wreath.

Serial Number

- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the manufacturer chose to apply a serial number to the rear of the barrel on the enlarged portion above the chamber.
- the barrel of this firearm is not difficult to remove and replace.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments	- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms. - the barrel of this firearm is an uncontrolled spare part which is not difficult to remove and replace.
Other Markings	- this firearm will have either a five pointed star or "hammer and sickle" in a wreath and the year of manufacture over the chamber of the barrel.
Remarks	- this firearm was introduced in 1938 for use by cavalry, artillery and a line of communication troops.

Notes

Make

- the make does not appear on the firearm.
- the Mosin-Nagant rifle system was the result of combining features of firearms submitted for testing to the Russian "Special Commission for the Testing of Magazine Rifles" by designers Sergei Mosin (1849 - 1902, sometimes referred to as Moisin) of Russia and Leon Nagant (1833 - 1900) of Belgium.
- the first Mosin-Nagant rifle was officially adopted for use by the Russian military in 1891 as the "Russian 3-in line rifle Model 1891".
- Mosin's name was not included in the model designation until after he had passed away when it was renamed the "Mosin-system 7.62mm Magazine Rifle, Model of 1891".
- the name "Mosin-Nagant" is the name most commonly used in recognition of both designers.
- Mosin was responsible for the overall design of the rifle while Nagant designed the magazine follower, bolt and charger clip.
- the Mosin-Nagant series of rifles included several variations and were used by and produced in several nations.

Model

- the model designation does not appear on this firearm (some of the firearms imported by Century Arms have the model marked as M39 on the muzzle end of the barrel).
- this model series was officially approved for production by the Finnish Government in 1939.
- features include: manually operated bolt action rifle; internal magazine; usually has a pistol grip stock although early production examples were known to have had a straight stock configuration, forearm has grasping grooves on either side located in front of the magazine housing.
- this rifle was produced utilizing captured or otherwise acquired M1891 Mosin-Nagant rifles, usually of Russian origin; these actions are octagonal in shape, however, limited quantities of the later round-type configuration of the M1891/30 action were also salvaged and utilized.
- this firearm will be found marked with the Finnish "SA" property stamp on the barrel and/or receiver/frame; this property stamp consists of the letters SA within a rectangle; SA means "Suomen Armeija" in Finnish which translates to "Finnish Army" in English.
- this firearm will usually be marked with the letter "D" on the barrel at the chamber end; this letter indicates that the rifle has been chambered to accept the Finnish D-166 cartridge as adopted by the Finns in 1936.
- total production was 49,990 examples.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the Finnish arsenal mark, a letter "T" within a triangle, appears on the top rear of the barrel above the chamber. - strong possibility exists that Oy Tikkakoski may have manufactured only the barrel of these firearms.
Serial Number	- the Finnish arsenal-assigned serial number is marked on top of the barrel at the chamber end and usually consists of five digits without prefix or suffix; NOTE: this number cannot be used as a serial number for the firearm as it is not marked on the receiver/frame. - the correct serial number for this firearm is usually marked on the left side of the receiver ring as was applied by the original manufacturer of the action; observed numbers are numeric only without prefix or suffix.
Shots	- internal magazine, hinged floor plate, five shot capacity.
Canadian Law Comments	- the original manufacturer of this firearm did not mark the serial number on the receiver/frame. - the barrel of this firearm is an uncontrolled spare part which is not difficult to remove and replace.
Other Markings	- this firearm will be found marked with the Finnish "SA" property stamp on the rear of the barrel on the top of the chamber and/or receiver/frame; this property stamp consists of the letters SA within a rectangle; SA means "Suomen Armeija" in Finnish which translates to "Finnish Army" in English. - this firearm will usually be marked with the letter "D" on the barrel at the chamber end; this letter indicates that the rifle has been chambered to accept the Finnish D-166 cartridge as adopted by the Finns in 1936. - rifles manufactured for the Finnish Civil Guard have the marking "SKY" on the chamber of the barrel.
Remarks	- this rifle was a modified version of the Finnish Civil Guard Rifle Model 1928/30 and was intended to replace all earlier variations of the Mosin Nagant in the Finnish Army.

Manufacturer

- the arsenal mark ,"VKT" in a sexagon, appears on the top rear of the barrel above the chamber.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the Finnish arsenal-assigned serial number is marked on top of the barrel at the chamber end and usually consists of five digits without prefix or suffix; NOTE: this number cannot be used as a serial number for the firearm as it is not marked on the receiver/frame. - the correct serial number for this firearm is usually marked on the left side of the receiver ring as was applied by the original manufacturer of the action; observed numbers are numeric only without prefix or suffix.
Importer	- some examples have the importers name stamped on the muzzle end of the barrel. - other importers may exist.
Canadian Law Comments	- the original manufacturer of this firearm did not mark the serial number on the receiver/frame. - the barrel of this firearm is an uncontrolled spare part which is not difficult to remove and replace.
Other Markings	- this firearm will be found marked with the Finnish "SA" property stamp on the rear of the barrel on the top of the chamber and/or receiver/frame; this property stamp consists of the letters SA within a rectangle; SA means "Suomen Armeija" in Finnish which translates to "Finnish Army" in English. - this firearm will usually be marked with the letter "D" on the barrel at the chamber end; this letter indicates that the rifle has been chambered to accept the Finnish D-166 cartridge as adopted by the Finns in 1936. - rifles manufactured for the Finnish Civil Guard have the marking "SKY" on the chamber of the barrel.
Remarks	- this rifle was a modified version of the Finnish Civil Guard Rifle Model 1928/30 and was intended to replace all earlier variations of the Mosin Nagant in the Finnish Army.

1708 - 2	7.62X54R RUSSIAN	5	517	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make does not appear on the firearm.
- the Mosin-Nagant rifle system was the result of combining features of firearms submitted for testing to the Russian "Special Commission for the Testing of Magazine Rifles" by designers Sergei Mosin (1849 - 1902, sometimes referred to as Moisin) of Russia and Leon Nagant (1833 - 1900) of Belgium.
- the first Mosin-Nagant rifle was officially adopted for use by the Russian military in 1891 as the "Russian 3-in line rifle Model 1891".
- Mosin's name was not included in the model designation until after he had passed away when it was renamed the "Mosin-system 7.62mm Magazine Rifle, Model of 1891".
- the name "Mosin-Nagant" is the name most commonly used in recognition of both designers.
- Mosin was responsible for the overall design of the rifle while Nagant designed the magazine follower, bolt and charger clip.
- the Mosin-Nagant series of rifles included several variations and were used by and produced in several nations.

Model

- "1944 Carbine" does not appear on the firearm.
- "1944 Carbine" was manufactured from 1948 to 1955.

Manufacturer

- the manufacturer's code "10" appears on most parts including the barrel and receiver/frame.

Serial Number

- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the manufacturer chose to apply a serial number to the rear of the barrel on the enlarged portion above the chamber.
- the barrel of this firearm is not difficult to remove and replace.

Canadian Law Comments

- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the barrel of this firearm is an uncontrolled spare part which is not difficult to remove and replace.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - In addition to the arsenal mark and serial number, the year of manufacture appears on the chamber of the barrel.

Remarks - identical to the standard Russian Model 1944 Carbine except for markings.

Notes

Make

- the make does not appear on the firearm.
- the Mosin-Nagant rifle system was the result of combining features of firearms submitted for testing to the Russian "Special Commission for the Testing of Magazine Rifles" by designers Sergei Mosin (1849 - 1902, sometimes referred to as Moisin) of Russia and Leon Nagant (1833 - 1900) of Belgium.
- the first Mosin-Nagant rifle was officially adopted for use by the Russian military in 1891 as the "Russian 3-in line rifle Model 1891".
- Mosin's name was not included in the model designation until after he had passed away when it was renamed the "Mosin-system 7.62mm Magazine Rifle, Model of 1891".
- the name "Mosin-Nagant" is the name most commonly used in recognition of both designers.
- Mosin was responsible for the overall design of the rifle while Nagant designed the magazine follower, bolt and charger clip.
- the Mosin-Nagant series of rifles included several variations and were used by and produced in several nations.

Model

- the model designation does not appear on the firearm.
- these carbines were manufactured from 1944 to 1950.
- features include: hooded post front sight, tangent rear sight; permanently attached bayonet which folds back along the right side of the forearm when not in use.

Manufacturer

- the manufacturer's symbol will normally appear on the firearm as a hammer and sickle in a wreath (Russian State Arsenal, Izhevsk, parts are sometimes marked with an arrow in a triangle), an arrow (Russian Stae Arsenal, Sestroretsk) or as an arrow in a star (Russian State Arsenal, Tula).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number
- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the manufacturer chose to apply a serial number to the rear of the barrel on the enlarged portion above the chamber.
- the barrel of this firearm is not difficult to remove and replace.

Canadian Law Comments
- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the barrel of this firearm is an uncontrolled spare part which is not difficult to remove and replace.

Remarks
- this carbine was introduced in 1944 as a replacement for the Model 1938 Carbine and model 1891/30 rifle.

Notes

Make

- the make does not appear on the firearm.
- the Mosin-Nagant rifle system was the result of combining features of firearms submitted for testing to the Russian "Special Commission for the Testing of Magazine Rifles" by designers Sergei Mosin (1849 - 1902, sometimes referred to as Moisin) of Russia and Leon Nagant (1833 - 1900) of Belgium.
- the first Mosin-Nagant rifle was officially adopted for use by the Russian military in 1891 as the "Russian 3-in line rifle Model 1891".
- Mosin's name was not included in the model designation until after he had passed away when it was renamed the "Mosin-system 7.62mm Magazine Rifle, Model of 1891".
- the name "Mosin-Nagant" is the name most commonly used in recognition of both designers.
- Mosin was responsible for the overall design of the rifle while Nagant designed the magazine follower, bolt and charger clip.
- the Mosin-Nagant series of rifles included several variations and were used by and produced in several nations.

Model

- the model designation does not appear on the firearm.
- these carbines were manufactured from 1944 to 1950.
- features include: hooded post front sight, tangent rear sight; permanently attached bayonet which folds back along the right side of the forearm when not in use

Serial Number

- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the manufacturer chose to apply a serial number to the rear of the barrel on the enlarged portion above the chamber.
- the barrel of this firearm is not difficult to remove and replace.

Canadian Law Comments

- the manufacturer did not mark the serial number on the receiver/frame of the Mosin-Nagant family of firearms.
- the barrel of this firearm is an uncontrolled spare part which is not difficult to remove and replace.

Notes

Make

- "Mosin-Nagant" is not marked on the firearm.
- the Mosin-Nagant rifle system was the result of combining features of firearms submitted for testing to the Russian "Special Commission for the Testing of Magazine Rifles" by designers Sergei Mosin (1849 - 1902, sometimes referred to as Moisin) of Russia and Leon Nagant (1833 - 1900) of Belgium.
- the first Mosin-Nagant rifle was officially adopted for use by the Russian military in 1891 as the "Russian 3-in line rifle Model 1891".
- Mosin's name was not included in the model designation until after he had passed away when it was renamed the "Mosin-system 7.62mm Magazine Rifle, Model of 1891".
- the name "Mosin-Nagant" is the name most commonly used in recognition of both designers.
- Mosin was responsible for the overall design of the rifle while Nagant designed the magazine follower, bolt and charger clip.
- the Mosin-Nagant series of rifles included several variations and were used by and produced in several nations.

Model

- the model designation is not marked on the fiream.
- this model was officially adopted into service as "Odstrelovaci Puska vz.54" which translates to "Sniper Rifle model 54".
- derived by re-manufacturing the Mosin-Nagant, model 1891/30 rifle and attaching a permanently fixed telescope and mount, using a turned down bolt handle, a half length pistol grip stock, and a one piece upper handguard with a single barrel band.
- the original sights are retained.

Manufacturer

- the manufacturer's designator is marked on the rifle as "she".

Action

- turn bolt operated.

Serial Number

- the serial number is normally marked on the left rear of the receiver/frame.
- the serial number may have a letter prefix.

Notes

Make

- the make is marked on the firearm.
- "MOSSBERG" is marked on the left side of the receiver/frame.

Model

- produced between 1986 and 1987.
- model is marked on the left side of the receiver/frame as "1550".
- features include: checkered hardwood stock with walnut finish; non slip butt plate; thumb type safety on right side which locks trigger but allows the bolt to be opened for unloading; bolt is machine finished with twin locking lugs; tapered round barrel, blued; blued receiver machined from solid block of steel, drilled and tapped for scope mounts; flush mounted removable sling swivels; optional hooded ramp front sight with gold bead and fully adjustable rear sight; both sights are removable.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the manufacturers name does not usually appear on the firearm, simply marked "Made in Japan". - some observed examples are marked "MADE BY HOW IN JAPAN" on the right side of the barrel at the receiver/frame.
Action	- turn bolt operated.
Serial Number	- may be located on the left rear of the receiver/frame. - usually incorporates an alpha character with six numbers.
Calibre	- calibre is marked on the left side of the barrel in front of the receiver/frame.
Shots	- detachable box magazine.

Manufacturer

- manufacturer's name is marked on the barrel.

Calibre

- Calibre marked on left side of barrel just forward of the receiver.

Shots

- tubular magazine mounted under the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- Checkered Monte Carlo stock with cheek piece.
- Molded pistol grip cap and butt plate cap with logo.
- Large forend mount with barrel band and sling swivels.
- Aluminum alloy receiver with an anodized finish, removable side plates and cross-bolt safety.
- Steel alloy bolt.
- The receiver is grooved for tip off sights.
- Has bead front sight and a dovetailed S-141 U-notched rear sight which is adjustable for both windage and elevation.
- Tube type magazine mounted under the barrel.

Model

- manufactured from 1938 to 1942.
- this firearm is based on the Mossberg model "42" with smoothbore barrel, capable of accepting 203mm (8") patterning, or 102mm (4") rifled barrel extensions.
- firearm may be marked "O.F. MOSSBERG & SONS NEW HAVEN, CONN, U.S.A. No. 42T" on the top of the barrel.
- features may include: round, tapered smoothbore barrel with bead front sight and adjustable rear open sight; tubular receiver/frame; self-cocking chrome-plated bolt and trigger; bent bolt lever with round bolt knob; safety lever behind bolt at rear of receiver/frame; moulded plastic trigger guard with finger grooves; walnut finished pistol grip stock; plastic butt plate.

Manufacturer

- firearm may be marked "O.F. MOSSBERG & SONS INC." over "NEW HAVEN. CONN., U.S.A." on the top of the barrel.

Action

- turn bolt operated.

Serial Number

- this firearm model was not given a serial number by the manufacturer.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre
- Cal marked on left side of barrel just forward of the receiver.
- calibre may be marked as "22 S-L-LR" on the top of the barrel just forward of the receiver/frame.

Shots
- detachable box magazine.

FRT Report

Firearm Reference Number (FRN): 74829
Make: Mossberg
Model: 42TR

Summary

Make:	Mossberg
Model:	42TR
Manufacturer:	Mossberg
Level:	Manufacturer Specifications and Commercial Customization
Type:	Other
Action:	Bolt Action
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
74829 - 4	22 LR	7	487	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
74829 - 2	22 LR	7	508	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Model

- features include: moulded trigger guard and butt plate, thumb operated safety lever, clip magazine with an adapter screw which when in place allows the firing of 22 SHORT ammunition, rifle style open rear sight with screw adjustments for windage and elevation, shotgun style elevated front bead sight with removable sight hood, stock forend necks down toward the muzzle, take down screw has a retaining bail to facilitate removal by hand.
- post war guns have a slotted take down screw, magazine floor plate, shorter unnecked forend and frequently a blued bolt knob.
- O.F. MOSSBERG & SONS-MODEL 42TR-TARGO NEW HAVEN, CONN. U.S.A. -22 Cal s.S.L.&L.R is marked on top of the barrel. NEW HAVEN may read NORTH HAVEN. or "TARGO 42 TR SMOOTHBORE".

Manufacturer

- marked on the firearm.

Type

- while this model resembles a traditional rifle externally, it is equipped with a smoothbore barrel and is intended for use with calibre 22 LR "Shot" ammunition. A rifled adapter that is screwed on to the barrel enhances accuracy when firing standard 22 LR "Ball" ammunition.

Action

- turn-bolt operated.

Barrel

- dual-purpose smoothbore that is threaded externally at the muzzle for attachment of a rifled adapter.

Calibre

- normally marked on left side of barrel just forward of the receiver/frame.

Notes

Make

- "Mossberg" is marked on the barrel.

Model

- this is a standard or "generic" model. Other "472" model entries exist which might better describe the firearm.
- the model 472 was originally produced by Mossberg to fill an order by Montgomery Ward's who were marketing firearms under the Western Field brand name. Terms of the contract included Mossberg filling the Wards order before offering the same gun under the Mossberg name. The model 472 first appears in Mossberg literature in 1974 (Montgomery Ward's first offered it in 1972). Several variations of the 472 were offered with a suffix added to the model designation to identify each individual version. The first letter denoted the stock style, "P" indicated a "pistol grip stock", "S" indicated a "straight grip stock"; the second letter denoted the type with "R" being "rifle" (610mm barrel), "C" being a "carbine" (508mm barrel) and "B" being a "brush gun" (457mm barrel); the third letter identified the calibre with "B" denoting "35 REM" and "A" denoting calibre 30-30 WIN. At least one version used a fourth letter in the suffix; this model was the 472SBAS or 472 American Indian Commemorative.
- the model 472 in "carbine" configuration had a higher magazine capacity (6 cartridges) than the "rifle" or "brush gun" versions (5 cartridges).
- features on all variants included: blued finish; trigger is pinned to the operating lever; side ejecting, top of receiver/frame is drilled and tapped for scope mounts; offset hammer spur; later production units were equipped with sling swivels; adjustable "buckhorn" rear sight with a gold bead ramp front sight.

Manufacturer

- the manufacturer's name and address are marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number - sequential numbers, marked on the receiver/frame.

Shots - tubular magazine mounted under the barrel.

Terms of the contract included Mossberg filling the Wards order before offering the same gun under the Mossberg name. The model 472 first appears in Mossberg literature in 1974 (Montgomery Ward's first offered it in 1972). Several variations of the 472 were offered with a suffix added to the model designation to identify each individual version. The first letter denoted the stock style, "P" indicated a "pistol grip stock", "S" indicated a "straight grip stock"; the second letter denoted the type with "R" being "rifle" (610mm barrel), "C" being a "carbine" (508mm barrel) and "B" being a "brush gun" (457mm barrel); the third letter identified the calibre with "B" denoting "35 REM" and "A" denoting calibre 30-30 WIN. At least one version used a fourth letter in the suffix; this model was the 472SBAS or 472 American Indian Commemorative.
- the model 472 in "carbine" configuration had a higher magazine capacity (6 cartridges) than the "rifle" or "brush gun" versions (5 cartridges).
- features included: blued finish; straight grip buttstock; trigger is pinned to the operating lever; side ejecting, top of receiver/frame is drilled and tapped for scope mounts; offset hammer spur; later production units were equipped with sling swivels; adjustable "buckhorn' rear sight with a gold bead ramp front sight.
- the model 472SCA was also sold by Western Auto under the "Revelation" brand name as the model 207.

Manufacturer

- the manufacturer's name and address are marked on the barrel.

Serial Number

- sequential numbers, marked on the receiver/frame.

Shots

- tubular magazine mounted under the barrel.

Notes

Make

- "Mossberg" is marked on the barrel.

Model

- "479RR" is stamped on the receiver/frame.
- manufactured in 1983 only.
- "RR" in the model designation is for Roy Rogers.
- this is a 479SCA that was sold as the model 479RR, a special commemorate to Roy Rogers.
- Roy Rogers's signature, "Trigger's" and "RR" brand is etched into the right side of the receiver/frame.
- the American Eagle over the stars and strips crest with the banner "THE RIGHT TO KEEP AND BEAR ARMS" is etched into the left side of the receiver/frame.
- several variations of the 479 were offered with a suffix added to the model designation to identify each individual version. The first letter denoted the stock style, "P" indicated a "pistol grip stock", "S" indicated a "straight grip stock"; the second letter denoted the type with "C" being a "carbine" (508mm barrel); the third letter identified the calibre with "A" denoting calibre 30-30 WIN. and "B" denoting "35 REM".
- features include: round tapered barrel; ramp mounted gold bead front sight and adjustable Buckhorn rear sight; solid top receiver/frame; receiver/frame is drilled and tapped for top-mounting sights and serrated to prevent glare; right side ejection; offset hammer spur; gold plated trigger is pinned to the lever and disconnects completely when lever is operated; hammer block safety; walnut forearm with gold plated barrel band and straight grip stock with composition butt plate.

Manufacturer

- the manufacturer's name and address are marked on the barrel.

Serial Number

- serial number consisted of a two letter prefix of "RR" followed by a sequential number, eg. "RR-XXXX".
- 5000 were planned but a estimated only 500-1000 ever left the factory.

Shots

- tubular magazine mounted under the barrel.

Notes

Make

- the "MOSSBERG" trade name is marked on the underside of the receiver/frame and on the barrel.

Model

- introduced in 1961.
- model is marked on the underside of the receiver/frame in front of the loading port.
- Mossberg model 500 was available in several series based on the gauge.
- "500A" series was in 12 Gauge.
- "500B" series was in 16 Gauge.
- "500C" series was in 20 Gauge.
- "500E" series was in 410 Gauge.
- features include: round smoothbore barrel; tubular magazine mounted under the barrel; forged anodized aluminum receiver/frame; damascened bolt; thumb operated tang safety; checkered walnut or synthetic pump forearm and pistol grip buttstock with rubber butt pad.

Manufacturer

- "MOSSBERG" over "Made in U.S.A." over "North Haven, Conn." may be marked on the underside of the receiver/frame.
- "MOSSBERG" over "Made in U.S.A." may be marked on the barrel.

Serial Number

- serial number is marked on the left rear side of the receiver/frame.
- observed serial number consisted of a letter prefix and six numbers.

Barrel

- chamber, gauge, and barrel length stamped on left rear of barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - tubular magazine is mounted under the barrel.

Remarks - Walnut pistol grip stock with checkered pump grip and rubber butt pad. Thumb operated tang safety and a disconnecting trigger. Tubular feed magazine under the barrel. Damascened bolt, a single slide bar and a forged anodized aluminum receiver. The bolt locks to the barrel. Easy change barrel without tools.

998 - 1	12 GA X 3"	5	711	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Model	- 1985-1987 Mossberg, Made in USA, NORTH HAVEN, CONN., 500 Regal, 12GA. is stamped on front underside of receiver.
Serial Number	- Alpha character with 6 numbers, located left rear of receiver
Barrel	- Chamber, gauge, choke, and barrel length stamped on left rear of barrel.
Remarks	- Regal wood is darker with the tighter grain of select walnut and the forends are longer. Highly polished metal parts, cut checkered walnut and smoother action due to polished internal parts. Thumb operated tang safety and a disconnecting trigger. Tubular feed magazine under the barrel, a double slide bars are longer to accommodate the extended wood, a plain bolt and a forged anodized aluminum receiver. The bolt locks to the barrel. Easy change barrel without tools. Ventilated rib is 1/8" wider than the standard and has a brass bead mid sight and a Bradley-type white front sight. Gold plated trigger and a small crown medallion and the word Regal etched on the right side of the receiver.

Notes

Make

- "MOSSBERG" is marked on the underside of the receiver/frame and on the barrel.

Model

- "500A" is marked on the front underside of the receiver/frame.
- manufactured from 1963 to 1970 and was reintroduced in 1980.
- "500A" denotes a 12GA Model 500.
- features include: hardwood pistol grip stock with checkered forend and rubber butt pad, or synthetic pistol grip and forend; thumb operated tang safety and a disconnecting trigger; tubular feed magazine mounted under the barrel; single slide bar (until 1970, at which time a double slide bar and a plain bolt was introduced) and forged anodized aluminum receiver/frame; barrels are easily interchangeable within the model 500 series of shotguns.
- also available in OMF Marsh Camouflage pattern.

Manufacturer

- "MOSSBERG" over "Made in U.S.A." over "North Haven, Conn." may be marked on the underside of the receiver/frame.
- "MOSSBERG" over "Made in U.S.A." may be marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is usually marked on the left rear side of the receiver/frame.
- observed serial number had a letter "K" prefix followed by six numbers.
- observed serial number had a letter "L" prefix followed by six numbers.
- observed serial number had a letter "P" prefix followed by six numbers.
- observed serial number had a letter "R" prefix followed by six numbers.
- observed serial number had a letter "T" prefix followed by six numbers.
- NOTE: firearms manufactured prior to 1968 may not have a serial number.

Barrel

- barrel length is stamped on the left side of the barrel.

Calibre

- chamber length, gauge, barrel length and choke are stamped on the left side of the barrel.

Shots

- tubular magazine mounted under the barrel.
- underbarrel tube magazine contains 4 or 6 cartridges of three inch length depending on the magazine tube configuration. (capacity with one in the chamber is reported by the manufacturer as 5 and seven shot respectively)
- using 2 3/4" cartridges the magazine will hold 5 or 7 shells (advertised with a total of 6 and 8 shot including one in the chamber).

Canadian Law Comments

- this firearm is normally Non-Restricted unless affected by the following conditions:

1) by combining a barrel from a licensed firearms manufacture that is less than 406mm (16.0") in length and a receiver/frame fitted with a pistol grip only, this firearm may be deemed a "handgun" and therefore "RESTRICTED" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (a) of the Criminal Code of Canada.
- "handgun" means a firearm that is designed, altered or intended to be aimed and fired by the action of one hand, whether or not it has been redesigned or subsequently altered to be aimed and fired by the action of both hands.

2) "a firearm that is designed or adapted to be fired when reduced to a length of less than 660 mm by folding, telescoping or otherwise" and therefore "Restricted" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (c) of the Criminal Code of Canada.

3) by combining a barrel that has been altered to less than 457mm (18.0") in length by a non-licensed firearms manufacturer (cottage industry, individual or gunsmith) regardless of whether the shotgun has a pistol grip or conventional stock, this firearm is "PROHIBITED" and subject to the definition of a "prohibited firearm" in Part III/Firearms and Other Weapons of Section 84 of the Criminal Code of Canada.
- "prohibited firearm" means a firearm that is adapted from a rifle or shotgun, whether by sawing, cutting or any other alteration, and that, as so adapted,
(i) is less than 660 mm in length, or
(ii) is 660mm or greater in length and has a barrel less than 457 mm in length.

Firearm Reference Number (FRN): 1031
Make: Mossberg
Model: 500A Bullpup

Summary

Make:	Mossberg
Model:	500A Bullpup
Manufacturer:	Mossberg
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Pump Action
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
1031 - 4	12 GA X 3"	4	470	Prohibited PDR, Part 4, para. 2	Manufacturer Specifications and Commercial Customization	
1031 - 5	12 GA X 3"	4	508	Prohibited PDR, Part 4, para. 2	Manufacturer Specifications and Commercial Customization	
1031 - 2	12 GA X 3"	7	508	Prohibited PDR, Part 4, para. 2	Non-Commercial Customization	

Notes

Make

- "Mossberg" is marked on the left side of the buttstock, it is also marked on the underside of the receiver/frame (only visible with the buttstock removed).

Model

- manufactured from 1986 to 1990.
- "500A BULLPUP" is built on existing Mossberg model 500A shotguns, the major change is the addition of a bull-pup style stock assembly.
- "500A Bullpup" designation is not marked on the firearm.
- "500A" is marked on the underside of the receiver/frame.
- features include: black synthetic bull-pup stock with a recoil pad and pistol grip forearm; pistol grip safety and a disconnecting trigger; tubular magazine mounted under the barrel; dual, action slide bars; plain bolt and a forged anodized aluminium receiver/frame; bolt locks to the barrel; easy change barrel without tools; barrel heat shield and carrying handle with rear notch and blade front sight ; cylinder bore choke.

Manufacturer

- "Mossberg" is marked on the left side of the stock and on the underside of the receiver/frame.

Serial Number

- serial number is marked on the left rear side of the receiver/frame.
- serial number rationalization is unknown.
- observed serial number consisted of a letter "J" prefix and six numbers.

Calibre

- chamber length, gauge, choke, and barrel length are usually stamped on the barrel shroud.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - tubular magazine mounted under the barrel.

Canadian Law Comments
- This firearm, as it left the factory, is fitted with a "bull-pup" stock ("Prohibited Device" PDR, Part 4, para. 2). When the "bull-pup" stock ("Prohibited Device" PDR, Part 4, para. 2) is removed the receiver/frame/barrel assembly may be correctly classified as "Non-Restricted".
- The receiver/frame or complete action of the firearm, when the "bull-pup" stock ("Prohibited Device") is removed may be associated to any Mossberg, Model 500 shotgun with the appropriate, calibre, shots and barrel length.

Model

- "500AB 12 GA" is marked on the underside of the receiver/frame.
- the first letter following the numerals, "A" in the model designation indicates a frame for 12 gauge.
- forged aluminum alloy receiver/frame with white metal trigger housing and triggerguard, thumb operated safety on top rear of receiver, trigger disconnector, double pump action bars, fixed under-barrel tube magazine
- readily dismountable steel barrel with barrel extension (breech-bolt locks into slot in the extension)
- plain walnut-stained hardwood pistol-gripped stock with white line spacer and rubber recoil pad, and vertically grooved hardwood pump forend.
- Do not confuse with the virtually identical Lakefield/Mossberg 500AB, which was a similar firearm manufactured in Canada by assembling parts of Mossberg manufacture.

Manufacturer

- marked on the underside of the receiver/frame in three lines: Mossberg / MADE IN U.S.A. / NORTH HAVEN CONN.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- manually operated, pump action shotgun.
Serial Number	- serial number is marked on the left rear side of the receiver/frame. - serial number rationalization unknown. - observed serial number consisted of a letter "G" prefix and six number. - NOTE: zeros are used as place holders to produce a six digit serial number.
Calibre	- gauge, cartridge length, barrel length, and choke marked on the left side of the barrel in two lines, example: - CHAMBERED FOR 2 3/4 AND 3 IN. SHELLS - / 12 GA. - 30 INCH FULL CHOKE - MADE IN U.S.A.
Shots	- tubular magazine, located under the barrel. - with respect to the manufacturers specificied magazine capacity of four cartridges of 12 GA X 3"; it may be possible to load a fifth 12 GA X 3" cartridge into the magazine with some brands of ammunition on some firearms due to cartridge length tolerances.

FRT Report

Firearm Reference Number (FRN): 1020
Make: Mossberg
Model: 500ATP6C

Summary

Make:	Mossberg
Model:	500ATP6C
Manufacturer:	Mossberg
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Pump Action
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
1020 - 1	12 GA X 3"	4	470	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

"Mossberg, Made in USA, NORTH HAVEN, CONN." stamped on underside of receiver forward of loading gate.

Model

- 500 series "Cruiser" line introduced in 1981; guns not marked "cruiser".
- "500ATP6C" stamped on underside of receiver forward of loading gate. "A" designates 12 GA, "T" is tactical, "P" is for a police model, "6" is the maximum capacity of 2.75" shells (including one round chambered); "C" denotes a model usually fitted with a black synthetic pistol grip rear stock.
- features include: sight options include metal bead front on ramp with folding leaf rear sight; blued or matte black barrel and receiver; tubular feed magazine under barrel; black synthetic stock; plain cylinder bore barrel; dual slide rails; right side ejection port and loading gate at bottom of hammerless aluminium alloy receiver; trigger guard may be polymer; ambidextrous safety on tang at top rear of receiver; generally fitted with a black synthetic pistol grip rear stock (without buttstock).

Manufacturer

"Mossberg, Made in USA, NORTH HAVEN, CONN." stamped on underside of receiver forward of loading gate.

Serial Number

- serial number is usually marked on the on the left rear side of the receiver/frame.
- observed serial number consisted of a letter prefix and six numbers.

Barrel

- Chamber, gauge, choke and barrel length stamped on left rear of barrel.

Shots

- tubular magazine is mounted under the barrel.
- the "6" in the model designation is for six shot total capacity.
- this capacity was based on 12 GA x 2 3/4" shotgun shells, with one round in the chamber and five in the magazine tube.
- magazine capacity is one less when using 12 GA x 3" shot guns shells.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- Pistol grip stock with black wood pump grip. Thumb operated tang safety and a disconnecting trigger. Tubular feed magazine under the barrel. Double slide bar and a plain bolt and a forged anodized aluminum receiver. The bolt locks to the barrel. Easy change barrel without tools. Quick disconnect front sling swivel and bead front sight. Blue finish. Has a cylinder bore or new in 1995 ACCU-CHOKE.

- 500 series "Persuader" line introduced in 1976; guns not marked "persuader"; electro-less nickel finish introduced in 1981.
- "500ATP8S" stamped on underside of receiver forward of loading gate. "A" designates 12 GA, "T" is tactical, "P" is for a police model, "8" is the maximum capacity of 2.75" shells (including one round chambered); "S" indicates shotgun was fitted with a heat shield.
- features include: sight options include metal bead front on ramp with folding leaf rear sight; blued, parkerized, and/or matte black barrel and receiver; tubular feed magazine under and approximately same length as barrel; oiled walnut or black synthetic stock; plain cylinder bore barrel with heat shield; dual slide rails; right side ejection port and loading gate at bottom of hammerless aluminium alloy receiver; trigger guard may be polymer; ambidextrous safety on tang at top rear of receiver; generally fitted with conventional butt stock and rubber recoil pad.

Manufacturer

- "Mossberg, Made in USA, NORTH HAVEN, CONN." stamped on underside of receiver forward of loading gate.

Serial Number

- alpha character with 6 numbers observed; serial number is marked on the on the left rear side of the receiver/frame.

Barrel

- Chamber, gauge, choke and barrel length stamped on left rear of barrel.

Calibre

- usually marked on the left side of the barrel, near the rear, example: "CHAMBERED FOR 2 3/4 AND 3 IN. SHELLS" or "12 GA. - CYLINDER BORE - MADE IN U.S.A."

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- tubular magazine is mounted under the barrel.
- the "8" in the model designation is for eight shot total capacity.
- this capacity was based on 12 GA x 2 3/4" shotgun shells, with one round in the chamber and seven in the magazine tube.
- magazine capacity is one less when using 12 GA x 3" shot guns shells.

Notes

Make

- make will be marked on the barrel and/or receiver/frame.

Model

- model designation is usually marked on the barrel as, "Model 505"; it may also be marked on the underside of the receiver/frame in front of the loading port.
- pump action shotgun designed for the "youth" market utilizing a shortened under-barrel tubular magazine and a fixed length-of-pull at 12".
- features may include: vent rib barrel; wooden stock and forearm; brass mid-bead and white front bead sights; blued finish.
- overall length is 953mm (37 1/2").
- Model note: the barrels for the Model 505 series are NOT interchangeable with any other Mossberg pump action shotguns.

Manufacturer

- "Mossberg" will be marked on the barrel and/or receiver/frame.

Serial Number

- serial number is usually located on the left side of the receiver/frame.
- known examples have had six digit numbers with a single letter prefix.
- letter prefix "R" has been observed.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- the "MOSSBERG" trade name is marked on the left side of the barrel.
- "MOSSBERG" over "MADE IN U.S.A." over "NORTH HAVEN, CONN" is marked on the underside of the receiver/frame forward of the loading gate.

Model

- introduced in 1987.
- "590" and "12 GA" are marked on the underside of the receiver/frame forward of the loading gate.
- "MOSSBERG" over "MODEL 590" are marked on the barrel.
- features include: easily removable heavy walled cylinder bore barrel with or without a three quarters length barrel shroud and bayonet lug; solid top forged anodized aluminum receiver/frame with right side ejection and double slide bar and a plain bolt that locks into the barrel; easy cleaning straight through tubular feed magazine under the barrel; thumb operated tang safety and a disconnecting trigger; wood or black synthetic grooved forearm and pistol grip stock with or without speed feed and recoil pad; bead front sight or peep rear and broad bright blade front sight (Ghost Ring Sight); sling swivels; blue or parkerized finish.
- also available in a dedicated left-handed mirror-image version, beginning in 2015.

Manufacturer

- the "MOSSBERG" trade name is marked on the left side of the barrel.
- "MOSSBERG" over "MADE IN U.S.A." over "NORTH HAVEN, CONN" is marked on the underside of the receiver/frame forward of the loading gate.

Serial Number

- serial number is marked at the left rear of the receiver/frame.
- observed serial number had a letter prefix and six sequential numbers, eg. "L775740".

Calibre

- the barrels are marked with a standard manufacturer's warning on the right side, and the make, model, chamber length, gauge and barrel length; for example: "MOSSBERG CHAMBERED FOR 2 3/4 AND 3 IN. SHELLS" over "- 12 GA. - 20 IN. CYLINDER BORE -" over "- MODEL 590 -".

Shots

- tubular magazine located under the barrel.
- the total capacity of the firearm with a 470 mm (18 1/2") barrel and using:
- 2 3/4" shells is six (6) shots this includes one (1) in the chamber and five (5) in the magazine.
- 3" shells is five (5) shots this includes one (1) in the chamber and four (4) in the magazine.
- the total capacity of the firearm with a 508 mm (20") barrel and using:
- 2 3/4" shells is nine (9) shots this includes one (1) in the chamber and eight (8) in the magazine.
- 3" shells is eight (8) shots this includes one (1) in the chamber and seven (7) in the magazine.

Canadian Law Comments

- this firearm is normally Non-Restricted unless affected by the following conditions:

1) by combining a barrel from a licensed firearms manufacture that is less than 406mm (16.0") in length and a receiver/frame fitted with a pistol grip only, this firearm may be deemed a "handgun" and therefore "RESTRICTED" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (a) of the Criminal Code of Canada.
- "handgun" means a firearm that is designed, altered or intended to be aimed and fired by the action of one hand, whether or not it has been redesigned or subsequently altered to be aimed and fired by the action of both hands.

2) "a firearm that is designed or adapted to be fired when reduced to a length of less than 660 mm by folding, telescoping or otherwise" and therefore "Restricted" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (c) of the Criminal Code of Canada.

3) by combining a barrel that has been altered to less than 457mm (18.0") in length by a non-licensed firearms manufacturer (cottage industry, individual or gunsmith) regardless of whether the shotgun has a pistol grip or conventional stock, this firearm is "PROHIBITED" and subject to the definition of a "prohibited firearm" in Part III/Firearms and Other Weapons of Section 84 of the Criminal Code of Canada.
- "prohibited firearm" means a firearm that is adapted from a rifle or shotgun, whether by sawing, cutting or any other alteration, and that, as so adapted,
(i) is less than 660 mm in length, or
(ii) is 660mm or greater in length and has a barrel less than 457 mm in length.

Type:	Shotgun
Action:	Pump Action
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
1032 - 1	12 GA X 3"	7	508	Prohibited PDR, Part 4, para. 2	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Mossberg" is marked on the left side of the receiver/frame.

Model

- introduced in 1989-1990.
- "Mossberg, Made in USA, NORTH HAVEN, CONN., 590 Bullpup, 12GA" stamped on front underside of the receiver/frame.
- this Mossberg 590 is a non-restricted firearm, however, the "BULL-PUP STOCK" is a "PROHIBITED DEVICE".
- features include: Du-Pont Zytel-33 high impact plastic bull-pup stock, pistol grip and pump grip; pistol grip safety; a disconnecting trigger; tubular feed magazine under the barrel; double slide bar; a plain bolt; forged anodized aluminum receiver; barrel heat shield and carrying handle with rear notch and blade front sight.
- bolt locks to the barrel.
- barrels are easily interchangeable without tools.

Manufacturer

- "Mossberg" is marked on the left side of the receiver/frame.

Action

- manually operated, pump action, repeating shotgun.

Barrel

- chamber, gauge, choke and barrel length is stamped on left rear of barrel.

Shots

- tubular magazine located under the barrel.
- the total capacity of the firearm with a 508 mm (20") barrel and using:
- 2 3/4" shells is nine (9) shots this includes one (1) in the chamber and eight (8) in the magazine.
- 3" shells is eight (8) shots this includes one (1) in the chamber and seven (7) in the magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- This firearm, as it left the factory, is fitted with a "bull-pup" stock ("Prohibited Device" PDR, Part 4, para. 2). When the "bull-pup" stock ("Prohibited Device" PDR, Part 4, para. 2) is removed the receiver/frame/barrel assembly may be correctly classified as "Non-Restricted".
- The receiver/frame or complete action of the firearm, when the "bull-pup" stock ("Prohibited Device") is removed may be associated to any Mossberg, Model 590 shotgun with the appropriate, calibre, shots and barrel length.

Notes

Make - "Mossberg, Made in USA, NORTH HAVEN, CONN., 590 , 12GA". is stamped on front underside of receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this firearm is a compact, short-barreled shotgun designated as a "Compact Model" and marketed as a "Law Enforcement" model shotgun.
- manufactured from 1987 - present.
- features include:
- synthetic butt stock or pistol grip stock with a synthetic pump fore-grip.
- thumb operated tang safety and a disconnector attached to trigger mechanism.
- tubular magazine under the barrel.
- double action bars for pump mechanism, plain bolt and a forged anodized aluminum receiver/frame. The bolt locks to the barrel.
- quick change barrel- no tools required.
- quick disconnect front sling swivel and bead front sight.
- also available with blued or parkerized finish.
- cylinder bore with no choke.
- overall length is 877mm, with the 356 mm length barrel.

Manufacturer

- "Mossberg, Made in USA, NORTH HAVEN, CONN., 590 , 12GA". is stamped on front underside of receiver/frame.

Action

- manually operated, pump action repeating shotgun.

Serial Number

- the serial number is marked on the receiver/frame and has been observed to consist of a letter prefix followed by six digits, and is occasionally found with a letter suffix.

Barrel

- chamber, gauge, choke and barrel length specifications are stamped on the left rear of the barrel.
- the 14" / 356mm barrel fitted to this model is not interchangeable with other 590 models; only those with the short magazine tube, operating bars and forend may be fitted with this barrel length.

Calibre

- the calibre designation is marked on the barrel assembly.

Canadian Law Comments

- this firearm is normally Non-Restricted unless affected by the following conditions:

1) by combining a barrel from a licensed firearms manufacture that is less than 406mm (16.0") in length and a receiver/frame fitted with a pistol grip only, this firearm may be deemed a "handgun" and therefore "RESTRICTED" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (a) of the Criminal Code of Canada.

Notes

Model	- this is a variant of the standard Mossberg 590 pump-action shotgun, fitted with a long-pull "double-action-only" style trigger mechanism, intended to help prevent accidental discharges and replicating the pull of traditional double action service pistols. - this shotgun has a synthetic pistol-grip stock and forearm, may be fitted with a nylon loop to prevent the forward hand from slipping. - these shotguns can be seen with both a standard bead front sight, or a "ghost-ring" style peep rear with blade front.
Manufacturer	- marked on the barrel and/or receiver/frame.
Serial Number	- on receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- tubular magazine located under the barrel.
- the total capacity of the firearm with a 470 mm (18 1/2") barrel and using:
- 2 3/4" shells is six (6) shots this includes one (1) in the chamber and five (5) in the magazine.
