Notes

Make

- "E. SAVAGE. MIDDLETOWN.CT." and "H.S. NORTH. PATENTED. JUNE 17th, 1856" is marked on the barrel or receiver/frame.
- "H.S. NORTH, PATENTED APRIL 6, 1858" may be marked on the rammer housing.

Model

- this is an unusual early American black-powder percussion revolver with an oddly-shaped trigger, trigger-guard, and cylinder-advancement mechanism somewhat resembling a figure "8" (hence the name); in this design, the cylinder is advanced to the next stop by pulling the bottom ring of the trigger-guard with the middle finger.
- four general models of this revolver (approximately 500 total production) were produced between 1856 and 1859, differing primarily in the shape and material of the frame
- early production examples of this handgun were all brass-framed, but were later changed to iron.

Manufacturer

- formed by a partnership between Simeon North and Josiah Savage the company was originally known as "The North & Savage Company", the firm changed its name to "Savage & North" in 1831.
- in 1859, the company was renamed the "Savage Revolving Arms Company", and produced both revolvers and muskets.
- "SAVAGE R.F.A. CO." and "H.S. NORTH PATENTED JUNE 17,1856/JAN. 18,1859, MAY 15, 1860" are marked on firearms produced by the "Savage Revolving Fire Arms Company".

Serial Number

- numbered on the receiver/frame or barrel, in more than one range.

Notes

Make

- "SCATTERGUN TECHNOLOGIES INC" over "NASHVILLE, TENNESSEE - TR870" or "SCATTERGUN TECHNOLOGIES" over "BERRYVILLE. AR TR-870" is usually marked on the right side of the receiver/frame.
- "Remington's" name, model designation and serial number are usually marked on the left side of the receiver/frame.
- "Remington's" name and address are usually marked on the barrel.

Model

- "TR870" or "TR-870" is usually marked on the right side of the receiver/frame.
- this is a re-worked Remington model "870 Magnum".
- available in a full size or compact model, features include: adjustable TRAK-LOCK® ghost ring rear sight; five (full size) or six (compact) shot tubular magazine; standard length or short synthetic buttstock and forearm; jumbo head safety; high visibility magazine follower; black or green parkerized or Armor-Tuff® finish.
- Scattergun Technologies will also retro-fit a customer supplied Remington 870 shotgun to the same specifications.

Manufacturer

- Scattergun Technologies Incorporated (SGT) was located in Nashville, Tennessee, U.S.A. from 1991 to 1999.
- Scattergun Technologies has been located in Berryville, Arizona, U.S.A. since 1999.
- Scattergun Technologies was acquired by Wilson Combat in late 1999.
- Scattergun Technologies specialize in re-manufacturing and customizing Remington pump action and semi-automatic shotguns for hunting, self-defense, and law-enforcement applications.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the Remington applied serial number is marked on the left side of the receiver/frame.
Shots	- tubular magazine mounted under barrel. - several aftermarket screw on magazine extensions are available that would change the capacity of this model.
Canadian Law Comments	- this firearm is normally Non-Restricted unless affected by the following conditions: 1) by combining a barrel from a licensed firearms manufacture that is less than 406mm (16.0") in length and a receiver/frame fitted with a pistol grip only, this firearm may be deemed a "handgun" and therefore "RESTRICTED" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (a) of the Criminal Code of Canada. - "handgun" means a firearm that is designed, altered or intended to be aimed and fired by the action of one hand, whether or not it has been redesigned or subsequently altered to be aimed and fired by the action of both hands. 2) "a firearm that is designed or adapted to be fired when reduced to a length of less than 660 mm by folding, telescoping or otherwise" and therefore "Restricted" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (c) of the Criminal Code of Canada. 3) by combining a barrel that has been altered to less than 457mm (18.0") in length by a non-licensed firearms manufacturer (cottage industry, individual or gunsmith) regardless of whether the shotgun has a pistol grip or conventional stock, this firearm is "PROHIBITED" and subject to the definition of a "prohibited firearm" in Part III/Firearms and Other Weapons of Section 84 of the Criminal Code of Canada. - "prohibited firearm" means a firearm that is adapted from a rifle or shotgun, whether by sawing, cutting or any other alteration, and that, as so adapted, (i) is less than 660 mm in length, or (ii) is 660mm or greater in length and has a barrel less than 457 mm in length.
Remarks	- the Border Patrol model can be ordered as a complete firearm or can be built on a customer supplied gun, markings on the receiver/frame may vary depending on what original Remington model was supplied for conversion.

- several aftermarket screw-on magazine extensions are available that would change the capacity of this model.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- this firearm is normally Non-Restricted unless affected by the following conditions:

1) by combining a barrel from a licensed firearms manufacture that is less than 406mm (16.0") in length and a receiver/frame fitted with a pistol grip only, this firearm may be deemed a "handgun" and therefore "RESTRICTED" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (a) of the Criminal Code of Canada.
- "handgun" means a firearm that is designed, altered or intended to be aimed and fired by the action of one hand, whether or not it has been redesigned or subsequently altered to be aimed and fired by the action of both hands.

2) "a firearm that is designed or adapted to be fired when reduced to a length of less than 660 mm by folding, telescoping or otherwise" and therefore "Restricted" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (c) of the Criminal Code of Canada.

3) by combining a barrel that has been altered to less than 457mm (18.0") in length by a non-licensed firearms manufacturer (cottage industry, individual or gunsmith) regardless of whether the shotgun has a pistol grip or conventional stock, this firearm is "PROHIBITED" and subject to the definition of a "prohibited firearm" in Part III/Firearms and Other Weapons of Section 84 of the Criminal Code of Canada.
- "prohibited firearm" means a firearm that is adapted from a rifle or shotgun, whether by sawing, cutting or any other alteration, and that, as so adapted,
(i) is less than 660 mm in length, or
(ii) is 660mm or greater in length and has a barrel less than 457 mm in length.

Remarks

- the Professional model can be ordered as a complete firearm or can be built on a customer supplied gun, markings on the receiver/frame may vary depending on what original Remington model was supplied for conversion.

21754 - 2	22 LR	10	165	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- marked as "Schall & Co" on the right side of the receiver/frame.
Model	- the model designation is not marked on the pistol. - this is a manually operated pistol with a detachable magazine. Originally produced as the Fiala Arms repeating pistol model. - features include: blued finish, wood grips with vertical grooves; fixed sights; slide release is mounted on the left side of the receiver/frame; heel mounted magazine release.
Manufacturer	- Schall & Company was located in New Haven, Connecticut. Some sources report that Schall & Company originally supplied parts and/or manufactured the "Fiala Arms" pistol. When Fiala Arms ceased operations Schall & Company offered the same design under their own name.
Action	- this model is a manually operated, repeating firearm. While it resembles a traditional semi-automatic pistol the slide must be manually unlocked before the action can be cycled.
Serial Number	- the sample examined was numbered on the front strap.
Shots	- detachable box magazine housed in the grip.

Notes

Make

- "SCHERMULY" and " MADE IN ENGLAND" was observed marked on the left side of the receiver/frame.

Model

- model designation is not marked on the firearm.
- this firearm is capable of firing all natures of 37MM or 38MM Rimmed ammunition.
- features include: round alloy smoothbore or rifled barrel with adjustable fore-grip, bead front sight and break open lever located over the chamber; front hinged alloy receiver/frame; double action only trigger mechanism; removable wood buttstock assembly with flip-up post rear sight.
- overall length is from 820mm to 828mm, and average weight is from 2.7 kgs to 3.18 kgs.

Manufacturer

- Pains-Wessex Limited was established circa 1965.
- Pains-Wessex was formed from James Pain & Sons (fireworks company) and the Wessex Aircraft Engineering Company (WAECO).
- Pains-Wessex purchased Shermuly in 1973.
- Schermuly factory is closed and production is transferred to Salisbury in 1981.
- Pains-Wessex Limited is acquired by Chemring Group PLC in 1986.
- Shermuly (Pains-Wessex) Limited was listed in High Post, Salisbury, Wiltshire, England circa 1988/1989.
- Pains-Wessex (Shermuly) Limited was listed in High Post, Salisbury, Wiltshire, England circa 1994/1995.

Action

- hinged barrel design.

Serial Number

- serial number was observed marked on the left side of the receiver/frame.
- observed serial number consisted of a two letter "RG" prefix and five numbers.

Calibre

- "1 1/2" inside a diamond shape was observed marked on the left side of the barrel.
- this firearm is capable of firing all natures of 37MM or 38MM Rimmed ammunition.

15539 - 1	1"	1	365	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (c)	Non-Commercial Customization	

Notes

Make

- "SCHERMULY", "SPRA", or a Schermuly decal/logo may be on the launcher.
- observed example featured "SPRA" marked on the left side of the receiver/frame.

Model

- "SPRA" or "Schermuly" is usually marked on the receiver/frame or on a decal on the barrel.
- observed example featured "SPRA" marked on the left side of the receiver/frame.
- "SPRA" is an acronym for "Schermuly Pistol Rocket Apparatus".
- this is a unique line throwing/life saving firearm invented by William Schermuly in the 1890s, and used by military and commercial shipping until World War II; this firearm uses a 1" blank ignition cartridge to ignite a line carrying rocket projectile that has been inserted into the muzzle. On firing, the rocket drags a line to a ship, lifeboat, or person in the water, allowing it or them to be hauled ashore or to a rescuing ship. The rocket has an extended wire bridle to which the line is attached, preventing the rocket blast from burning through or melting the rope it carries.
- Schermuly manufactured these launchers from the receivers/frames of Webley MK III flare pistols, adding a larger diameter barrel to accept the rocket projectiles. The projectiles for these launchers were offered in a range of types, including flare, smoke, floating, and line carrying, depending on the circumstances in which they were needed.
- features include: brass or bronze construction (to prevent corrosion from salt air); a larger diameter barrel to accept the rocket projectile; a top mounted angled spade grip, to aid in support and aiming; thumb operated top latch; manually cocked hammer; single action trigger mechanism; and a bag shaped grip with wooden grip panels.

Manufacturer

- "SCHERMULY", "SPRA", or a Schermuly decal/logo may be on the launcher.
- observed example featured "SPRA" marked on the left side of the receiver/frame.

Action

- hinge action single shot, with rocket line carrying projectile loaded from the muzzle.

Serial Number

- serial numbered on the right side of the receiver/frame.

Notes

Make

- "ALFRED SCHILLING" is marked on the left side of the firearm.

Model

- the model designation is not marked on the firearm.
- features include: octagonal tapered blued barrel; falling block action; curved action lever; colour case hardened receiver/frame; various engraving; double triggers; sling swivels; checkered pistol grip walnut stock; cheek piece.
- average weight is 3.18 kg (7 lbs).

Manufacturer

- "ALFRED SCHILLING" is marked on the left side of the firearm.
- this company was founded in 1898 by Alfred Schilling. He specialized in making revolver cylinders, with changing product demands and the end of World War II, in 1945 Alfred's son Veit took over the company and began manufacturing cigarette lighters and small oil mills to keep the company going. They manufactured parts for the ZEISS optical factory and business was slow until the re-unification of Germany provided an opportunity for Alfred's grandson, Joerg Schilling, to re-establish the company 100 years later in 1998. Joerg is the current owner of Fa. Alfred Schilling, the company has always been located in Zella-Mehlis, Germany. Schilling Spezialbeschichtungen GmbH was founded in May 2000.

Action

- lever operated, falling/dropping block design.
- solid metal breechblock slides vertically in grooves cut into the receiver/frame.

Serial Number

- the serial number is marked on the receiver/frame.
- the serial number rationalization is unknown.

Calibre

- the calibre designation is usually marked on the barrel.

Notes

Make

- appears on the barrel either as "V.C. Schilling" or "V.C.S.".

Model

- sporting rifle built on the 1888 Commission Rifle action.
- features: a ramp front and multi folding leaf rear sight and sporter style stock with pistol grip.
- this rifle was available in varying degrees of elaborateness such as engraving in the action, checkering on the stock and perhaps octagonal or fluted barrel.
- rifles of this type were exported to North America in considerable numbers during the decade before 1914 and during the 1920's.

Manufacturer

- appears on the barrel as either "V.C. Schilling" or "V.C.S.".

Serial Number

- appears on the side of the receiver.

FRT Report

Firearm Reference Number (FRN): 33980
Make: Schlegelmilch, Louis
Model: Schlegelmilch Repeater

Summary

Make:	Schlegelmilch, Louis
Model:	Schlegelmilch Repeater
Manufacturer:	Spandau Arsenal
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Other
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
33980 - 1	7.5MM SCHLEGELMILCH	5	89	Antique AFR, Section 1, para. 7	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make may not be marked on the firearm; Louis Schlegelmilch was the director of the German Spandau Arsenal, and submitted this pistol to the German 1891 trials to determine a replacement for the German 11mm, M1871 Reichsrevolver, though they were unsuccessful, and were built only in limited numbers.

Model

- the model is not marked on the firearm.
- this is an unusual mechanical repeating pistol, operated entirely by the function of the hammer and trigger, designed by Louis Schlegelmilch in 1891 as a possible replacement for the M1871 Reichsrevolver; these pistols were built in two basic patterns, but both share the same basic appearance and operation.
- the unique identifying feature of these pistols is a breech-block that moves right and left inside the receiver/frame, as the trigger is squeezed or the hammer is cocked, allowing additional cartridges to rise from the internal magazine, and for fired cases to be ejected.
- features include: blued finish; fixed open sights; round barrel; triangular-bottomed magazine well visible on the right side of the receiver/frame; five-round internal box magazine; double-action trigger mechanism; a trigger guard with or without an additional spur for the middle finger; external hammer that may be cocked for single-action fire; checkered wooden grip plates; heel lanyard loop.

Manufacturer

- the manufacturer may not be marked on the firearm.
- at the time these pistols were built, Louis Schlegelmich was the director of the Spandau Arsenal.

Action

- mechanically-operated repeater.

Serial Number

- serial-numbered on the receiver/frame.

Remarks

Unusual appearing weapon. Mono- block barrels. Top sliding cross bolt and under bolt lock up. Double triggers, front trigger fires upper barrel only. Rear trigger fires lower then upper. Matt rib.

Notes

Make

- "SCHMEISSER" is marked on the left side of the slide.

Model

- "1911 HUGO" is marked on the left side of the slide.
- features include: round polished stainless steel rifled match barrel; knurled recoil spring plug located under the barrel; single blade front sight; front serrations on the left and right side of the slide near the muzzle; integral accessory rail on the 1911-type receiver/frame, in front of the round trigger guard; skeletonized match-type trigger; magazine release on left side of receiver/frame, between the trigger and grip; lowered ejection port; rear serrations on left and right side of the slide, above the grip; usually fitted with an adjustable rear sight; commander-style hammer; extended beavertail grip safety; ambidextrous safety on left and right side between grip and hammer; flat checkered 1911-style mainspring housing; checkered front strap; usually fitted with carbon fibre grip panels.
- finish options include: black; sandstorm; lightning grey; thunder bronze.

Manufacturer

- "SCHMEISSER" is marked on the left side of the slide.
- "GERMANY" is marked on the left side of the slide.
- "MADE IN GERMANY" may be marked on the right side of the receiver/frame.
- "SCHMEISSER" logo is represented by the letter "S" integrated into the centre of a muzzle end of a rifled barrel.
- "SCHMEISSER GmbH" is located in Krefeld, Germany.
- "SCHMEISSER GmbH" is manufacturer of selective fire and semi-automatic firearms.
- "SCHMEISSER GmbH" is not to be confused with Hugo Schmeisser, manager of the Haenel factory during World War II that had his name attached to some submachine gun types.

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- The serial is marked on the right side of the receiver/frame, above the accessory rail,. - Observed serial number consisting of a two-letter prefix followed by two numbers, a dash, and four numbers.
Calibre	- The calibre designation is marked on the right side of the slide below the ejection port.
Shots	- detachable box magazine.

70148 - 2	9MM LUGER	32	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- This firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm.
- The MP36 Model is an Erma Werke development, located at Erfurt.

Model

- marked on the underside of the wood forend: E.M.P. 36
- very few MP36s are known to exist, and are believed to be the predecessor (or prototypes) of the MP38, and MP40.
- unlike the MP38 and MP40, this Submachine Gun is Selective Fire, and is manufactured of machined steel body and parts, a non-locking under-folding stock with serrated butt-stock, canted magazine housing, and a wood forend (lower body cover), and pistol-grip panels.

Manufacturer

- marked on the underside of the wood forend: ERMA ERFURT

Action

- no longer capable of full automatic fire.

Shots

- detachable box magazine.

Make

- this firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm.
- the MP36 Model is an Erma Werke development, located at Erfurt.

Model

- marked on the underside of the wood forend: E.M.P. 36
- very few MP36s are known to exist, and are believed to be the predecessor (or prototypes) of the MP38, and MP40.
- unlike the MP38 and MP40, this Submachine Gun is Selective Fire, and is manufactured of machined steel body and parts, a non-locking under-folding stock with serrated butt-stock, canted magazine housing, and a wood forend (lower body cover), and pistol-grip panels.

Manufacturer

- marked on the underside of the wood forend: ERMA ERFURT

Action

- blow-back operated, capable of semi-automatic and full-automatic fire.

Shots

- detachable box magazine.

FRT Report

Firearm Reference Number (FRN): 28323
Make: Schmeisser
Model: MP38

Summary

Make:	Schmeisser
Model:	MP38
Manufacturer:	Erfurter Maschinenfabrik (ERMA) (27)
Level:	Converted Automatics
Type:	Submachine Gun
Action:	Converted Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
28323 - 1	9MM LUGER	5	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
28323 - 2	9MM LUGER	32	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make	- this firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm. - the MP38 Model is a Vollmer/Erma Werke development.
Model	- the MP38 has a folding stock, stamped steel body and a plastic lower body cover. - the MP38 was a Volmer / Erma Werke development.
Manufacturer	- Erma used code 27 until some time in 1941, when the code changed to ayf.
Type	- the type is refered to in German literature as "MACHINE PISTOLE".
Action	- no longer capable of full automatic fire.
Serial Number	- marked on the top rear of the receiver/frame: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.
Shots	- detachable box magazine.
Other Markings	- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- The submachine gun known as the MP38 is rarely encountered as most MP38 were modified to make it safe to carry the submachine gun with the bolt in the forward position. MP38/40 is the official German designation for this modified MP38. The MP38/40 was redesigned / modified to incorporate a two piece lock-down style bolt handle which in conjunction with an upwards cut-out in the forward end of the cocking handle slot, was intended to securely lock the the bolt in the forward position.
- Before modification, when the bolt was in the forward position and unlocked, the bolt could be "bounced" within the firearm due to the inertia possessed by the heavy mass of the bolt if the firearm was dropped or when jumping from a vehicle to the ground when a loaded magazine was present in the firearm. When this happened , the unpleasant result would be; the bolt on its return to the forward position would feed a cartridge from the magazine into the chamber. As the firearm functions in the "advanced primer ignition - blow-back" mode; when the bolt closes on a cartridge the cartridge discharges.
- The MP38 was a Volmer / Erma Werke development.

- This firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm. The MP38 Model is a Vollmer/Erma Werke development.
- Schmeisser did develop the design of the MP41 Model, which is an adaption of the MP40 Model with a wooden stock and a different trigger mechanism.
- Hugo Schmeisser was manager of the Haenel factory during World War II.

Model

- The MP38 has a folding stock, stamped steel body and a plastic lower body cover.
- The MP38 was a Volmer / Erma Werke development.

Manufacturer

- the manufacturer appears on the firearm as "122".
- German military practice during World War II was to mark the manufacturer's name as an alpha or numeric code to conceal the actual name and location of the manufacturer.
- This manufacturer code number (122) has been attributed to Hugo Schmeisser in several references; this is doubtful, as Hugo Schmeisser (the man) was the plant foreman at C G Haenel and there does not appear to have been a business attributed to him.
- The C G Haenel code later changed to "fxo".

Type

- the type is refered to in German literature as "MACHINE PISTOLE".

Action

- no longer capable of full automatic fire.

Serial Number

- marked on the top rear of the receiver/frame: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.
- there are instances of serial numbers with five digits having no prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.

Other Markings

- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Remarks

- The submachine gun known as the MP38 is rarely encountered as most MP38 were modified to make it safe to carry the submachine gun with the bolt in the forward position. FRT Report

Firearm Reference Number (FRN): 36810
Make: Schmeisser
Model: MP38/40

Summary

Make:	Schmeisser
Model:	MP38/40
Manufacturer:	Erfurter Maschinenfabrik (ERMA) (27)
Level:	Converted Automatics
Type:	Submachine Gun
Action:	Converted Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
36810 - 1	9MM LUGER	5	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
36810 - 2	9MM LUGER	32	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make	- this firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm. - the MP38 Model is a Vollmer/Erma Werke development.
Model	- the MP38/40 is a modified MP38. The modification was to replace the cocking-handle of the MP38 with the cocking handle of the MP40/I and cut a slot in the receiver for the MP40/I cocking handle to engage, thus providing a safety feature to lock the breech-bolt in the forward position.
Manufacturer	- Erma used code 27 until some time in 1941, when the code changed to ayf.
Type	- the type is refered to in German literature as a "MACHINE PISTOLE".
Action	- no longer capable of full automatic fire.
Serial Number	- marked on the top rear of the receiver: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.
Shots	- detachable box magazine.
Other Markings	- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

-- The submachine gun known as the MP38/40 is an MP38 that has been modified to make it safe to carry with the bolt in the forward position. MP38/40 is the official German designation for this modified MP38. The MP38/40 was redesigned / modified to incorporate a two piece lock-down style bolt handle which in conjunction with an upwards cut-out in the forward end of the cocking handle slot, was intended to securely lock the the bolt in the forward position.
- Before modification, when the bolt was in the forward position and unlocked, the bolt could be "bounced" within the firearm due to the inertia possessed by the heavy mass of the bolt if the firearm was dropped or when jumping from a vehicle to the ground when a loaded magazine was present in the firearm. When this happened, the unpleasant result would be; the bolt on its return to the forward position would feed a cartridge from the magazine into the chamber. As the firearm functions in the "advanced primer ignition - blow-back" mode; when the bolt closes on a cartridge the cartridge discharges.
- This is the same retrofit modification as was incorporated on the MP40 to make the model officially the MP40/I.

72849 - 2	9MM LUGER	32	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- This firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm. The MP38 Model is a Vollmer/Erma Werke development.
- Schmeisser did develop the design of the MP41 Model, which is an adaption of the MP40 Model with a wooden stock and a different trigger mechanism.
- Hugo Schmeisser was manager of the Haenel factory during World War II.

Model

- The MP38/40 is a modified MP38. The modification was to replace the cocking-handle of the MP38 with the cocking handle of the MP40/I and cut a slot in the receiver for the MP40/I cocking handle to engage, thus providing a safety feature to lock the breech-bolt in the forward position.
- The MP38/40 has a folding stock, stamped steel body and a plastic lower body cover.
- The MP38/40 was a Volmer / Erma Werke development.

Manufacturer

- the manufacturer appears on the firearm as "122".
- German military practice during World War II was to mark the manufacturer's name as an alpha or numeric code to conceal the actual name and location of the manufacturer.
- This manufacturer code number (122) has been attributed to Hugo Schmeisser in several references; this is doubtful, as Hugo Schmeisser (the man) was the plant foreman at C G Haenel and there does not appear to have been a business attributed to him.
- The C G Haenel code later changed to "fxo".

Type

- the type is refered to in German literature as "MACHINE PISTOLE".

Action

- blowback operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- marked on the top rear of the receiver/frame: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.
- there are instances of serial numbers with five digits having no prefix or suffix.

Shots

- detachable box magazine.

Other Markings

- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Remarks

- The submachine gun known as the MP38/40 is an MP38 that has been modified to make it safe to carry with the bolt in the forward position. MP38/40 is the official German designation for this modified MP38. The MP38/40 was redesigned / modified to incorporate a two piece lock-down style bolt handle which in conjunction with an upwards cut-out in the forward end of the cocking handle slot, was intended to securely lock the the bolt in the forward position.
- Before modification, when the bolt was in the forward position and unlocked, the bolt could be "bounced" within the firearm due to the inertia possessed by the heavy mass of the bolt if the firearm was dropped or when jumping from a vehicle to the ground when a loaded magazine was present in the firearm. When this happened , the unpleasant result would be; the bolt on its return to the forward position would feed a cartridge from the magazine into the chamber. As the firearm functions in the "advanced primer ignition - blow-back" mode; when the bolt closes on a cartridge the cartridge discharges.
- This is the same retrofit modification as was incorporated on the MP40 to make the model officially the MP40/I.

Serial Number

- marked on the top rear of the receiver/frame: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.
- there are instances of serial numbers with five digits having no prefix or suffix.

Shots

- detachable box magazine.

Other Markings

- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Remarks

- The submachine gun known as the MP38/40 is an MP38 that has been modified to make it safe to carry with the bolt in the forward position. MP38/40 is the official German designation for this modified MP38. The MP38/40 was redesigned / modified to incorporate a two piece lock-down style bolt handle which in conjunction with an upwards cut-out in the forward end of the cocking handle slot, was intended to securely lock the the bolt in the forward position.
- Before modification, when the bolt was in the forward position and unlocked, the bolt could be "bounced" within the firearm due to the inertia possessed by the heavy mass of the bolt if the firearm was dropped or when jumping from a vehicle to the ground when a loaded magazine was present in the firearm. When this happened , the unpleasant result would be; the bolt on its return to the forward position would feed a cartridge from the magazine into the chamber. As the firearm functions in the "advanced primer ignition - blow-back" mode; when the bolt closes on a cartridge the cartridge discharges.
- This is the same retrofit modification as was incorporated on the MP40 to make the model officially the MP40/I.

Notes

Make

- this firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm. The MP38 Model is a Vollmer/Erma Werke development.
- Schmeisser did develop the design of the MP41 Model, which is an adaption of the MP40 Model with a wooden stock and a different trigger mechanism.
- Hugo Schmeisser was manager of the Haenel factory during World War II.

Model

- The MP40, with a folding stock, stamped steel body, with plastic lower body cover, is a development from the MP38, which was a Volmer/Erma Werke development. It was redesigned to reduce the use of costly tooling (of the MP38) and is about 260 grams lighter. An intermediate modification of the one piece bolt handle of the MP38, to a two piece lock-down style with the aim to prevent accidental discharge was incorporated as the MP38/40.
- Hugo Schmeisser, manager of the Haenel factory in WW II, developed the design of the MP41 Model, which is an adaptation of the MP40 Model with a wooden stock and a different trgger mechanism.

Manufacturer

- Erma used code 27 until some time in 1941, when the code changed to ayf.

Type

- the type is refered to in German literature as "MACHINE PISTOLE".

Action

- blowback operated.

Serial Number

- marked on the top rear of the receiver: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.

Other Markings

- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Remarks

- The MP40 has a folding stock, stamped steel body and a plastic lower body cover. The MP40 is a further development of the MP38, which was a Volmer/Erma Werke development. It was redesigned to reduce the use of costly tooling (of the MP38) and is about 260 grams lighter.
- An intermediate modification of the one piece bolt handle of the MP40, to a two piece lock-down style with the aim to prevent accidental discharge was incorporated as the MP40/I.

FRT Report

Firearm Reference Number (FRN): 26218
Make: Schmeisser
Model: MP40

Summary

Make:	Schmeisser
Model:	MP40
Manufacturer:	Haenel (fxo)
Level:	Converted Automatics
Type:	Submachine Gun
Action:	Converted Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
26218 - 1	9MM LUGER	5	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
26218 - 2	9MM LUGER	32	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- this firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm. The MP38 Model is a Vollmer/Erma Werke development.
- Schmeisser did develop the design of the MP41 Model, which is an adaption of the MP40 Model with a wooden stock and a different trigger mechanism.
- Hugo Schmeisser was manager of the Haenel factory during World War II.

Model

- marked on the top rear of the firearm: MP40
- the MP40, with a folding stock, stamped steel body, with plastic lower body cover, is a development from the MP38, which was a Volmer/Erma Werke development. It was redesigned to reduce the use of costly tooling (of the MP38) and is about 260 grams lighter. An intermediate modification of the one piece bolt handle of the MP40, to a two piece lock-down style with the aim to prevent accidental discharge was incorporated as the MP40/I.
- Hugo Schmeisser, manager of the Haenel factory in WW II, developed the design of the MP41 Model, which is an adaptation of the MP40 Model with a wooden stock and a different trgger mechanism.

Type

- the type is refered to in German literature as "MACHINE PISTOLE".

Action

- no longer capable of full automatic fire.

Serial Number

- marked on the top rear of the receiver/frame: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.
- known lower case script letters used by Haenel (manufacturer code fxo) as serial number suffixes - a, b, c, d, e, f, g, h, k, m, n, q, s, u, v, w, x, y, ai, aj

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Remarks

- the MP40 has a folding stock, stamped steel body and a plastic lower body cover. The MP40 is a further development of the MP38, which was a Volmer/Erma Werke development. It was redesigned to reduce the use of costly tooling (of the MP38) and is about 260 grams lighter.
- an intermediate modification of the one piece bolt handle of the MP40, to a two piece lock-down style with the aim to prevent accidental discharge was incorporated as the MP40/I.

The MP38 Model is a Vollmer/Erma Werke development. - Schmeisser did develop the design of the MP41 Model, which is an adaption of the MP40 Model with a wooden stock and a different trigger mechanism. - Hugo Schmeisser was manager of the Haenel factory during World War II.
Model	- marked on the top rear of the firearm: MP40
Manufacturer	- Merz-Werke used code 18 until some time in 1941, when the code changed to cos.
Type	- the type is refered to in German literature as "MACHINE PISTOLE".
Action	- no longer capable of full automatic fire.
Serial Number	- marked on the top rear of the receiver: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.
Shots	- detachable box magzine.
Other Markings	- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- the MP40, with a folding stock, stamped steel body, with plastic lower body cover, is a development from the MP38, which was a Volmer/Erma Werke development. It was redesigned to reduce the use of costly tooling (of the MP38) and is about 260 grams lighter.
- an intermediate modification of the one piece bolt handle of the MP38, to a two piece lock-down style with the aim to prevent accidental discharge was incorporated as the MP38/40.

FRT Report

Firearm Reference Number (FRN): 71170
Make: Schmeisser
Model: MP40

Summary

Make:	Schmeisser
Model:	MP40
Manufacturer:	Merz-Werke (cos)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Submachine Gun
Action:	Full Automatic
Country of Manufacturer:	AUSTRIA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
71170 - 1	9MM LUGER	5	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	
71170 - 2	9MM LUGER	32	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- not marked "Schmeisser". - this firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm.
Model	- marked on the top rear of the firearm: MP40
Manufacturer	- Merz-Werke used code 18 until some time in 1941, when the code changed to cos.
Type	- the type is refered to in German literature as "MACHINE PISTOLE".
Action	- blowback operated.
Serial Number	- marked on the top rear of the receiver: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.
Shots	- detachable box magazine.
Other Markings	- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

36766 - 1	9MM LUGER	5	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	
36766 - 2	9MM LUGER	32	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- not marked "Schmeisser". - this firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm.
Model	- marked on the top rear of the firearm: MP40
Manufacturer	- Steyr-Daimler-Puch used code 660 until some time in 1941, when the code changed to bnz.
Type	- the type is refered to in German literature as "MACHINE PISTOLE".
Action	- blowback operated.
Serial Number	- marked on the top rear of the receiver: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.
Shots	- detachable box magazine.
Other Markings	- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- the MP40, with a folding stock, stamped steel body, with plastic lower body cover, is a development from the MP38, which was a Volmer/Erma Werke development. It was redesigned to reduce the use of costly tooling (of the MP38) and is about 260 grams lighter.
- Hugo Schmeisser, manager of the Haenel factory in WW II, developed the design of the MP41 Model, which is an adaptation of the MP40 Model with a wooden stock and a different trigger mechanism.

Level:	Converted Automatics
Type:	Submachine Gun
Action:	Converted Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
26219 - 1	9MM LUGER	5	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
26219 - 2	9MM LUGER	32	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm. The MP38 Model is a Vollmer/Erma Werke development.
- Schmeisser did develop the design of the MP41 Model, which is an adaption of the MP40 Model with a wooden stock and a different trigger mechanism.
- Hugo Schmeisser was manager of the Haenel factory during World War II.

Model

- the MP40/I submachine gun is a development / modification to the MP40. It was redesigned / modified to incorporate a two piece lock-down style bolt handle which in conjunction with an upwards cut-out in the forward end of the cocking handle slot was intended to prevent accidental discharges when the bolt was in the forward position. This is the same retrofit modification as was incorporated on the MP38 to make the model officially the MP38/40.

Manufacturer

- Erma used code 27 until some time in 1941, when the code changed to ayf.

Type

- the type is refered to in German literature as a "MACHINE PISTOLE".

Action

- no longer capable of full automatic fire.

Serial Number

- marked on the top rear of the receiver: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Remarks

- The submachine gun known as the MP40/I is an MP40 that has been modified to make it safe to carry with the bolt in the forward position. MP40/I is the official German designation for this modified MP40. The MP40/I was redesigned / modified to incorporate a two piece lock-down style bolt handle which in conjunction with an upwards cut-out in the forward end of the cocking handle slot, was intended to securely lock the the bolt in the forward position.
- Before modification, when the bolt was in the forward position and unlocked, the bolt could be "bounced" within the firearm due to the inertia possessed by the heavy mass of the bolt if the firearm was dropped or when jumping from a vehicle to the ground when a loaded magazine was present in the firearm. When this happened , the unpleasant result would be; the bolt on its return to the forward position would feed a cartridge from the magazine into the chamber. As the firearm functions in the "advanced primer ignition - blow-back" mode; when the bolt closes on a cartridge the cartridge discharges. This is the same retrofit modification as was incorporated on the MP38 to make the model officially the MP38/40.
- Some MP40's were modified by armourers in the field and may not have been restamped / remarked as MP40/I's.

FRT Report

Firearm Reference Number (FRN): 26217
Make: Schmeisser
Model: MP40/I

Summary

Make:	Schmeisser
Model:	MP40/I
Manufacturer:	Haenel (fxo)
Level:	Converted Automatics
Type:	Submachine Gun
Action:	Converted Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
26217 - 1	9MM LUGER	5	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
26217 - 2	9MM LUGER	32	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make	- this firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm. The MP38 Model is a Vollmer/Erma Werke development. - Schmeisser did develop the design of the MP41 Model, which is an adaption of the MP40 Model with a wooden stock and a different trigger mechanism. - Hugo Schmeisser was manager of the Haenel factory during World War II.
Model	- the MP40/I submachine gun is a development / modification to the MP40. It was redesigned / modified to incorporate a two piece lock-down style bolt handle which in conjunction with an upwards cut-out in the forward end of the cocking handle slot was intended to prevent accidental discharges when the bolt was in the forward position. This is the same retrofit modification as was incorporated on the MP38 to make the model officially the MP38/40.
Type	- the type is refered to in German literature as a "MACHINE PISTOLE".
Action	- no longer capable of full automatic fire.
Serial Number	- marked on the top rear of the receiver/frame: S/N sequence normally starts to 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.
Shots	- detachable box magazine.
Other Markings	- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- The submachine gun known as the MP40/I is an MP40 that has been modified to make it safe to carry with the bolt in the forward position. MP40/I is the official German designation for this modified MP40. The MP40/I was redesigned / modified to incorporate a two piece lock-down style bolt handle which in conjunction with an upwards cut-out in the forward end of the cocking handle slot, was intended to securely lock the the bolt in the forward position.
- Before modification, when the bolt was in the forward position and unlocked, the bolt could be "bounced" within the firearm due to the inertia possessed by the heavy mass of the bolt if the firearm was dropped or when jumping from a vehicle to the ground when a loaded magazine was present in the firearm. When this happened , the unpleasant result would be; the bolt on its return to the forward position would feed a cartridge from the magazine into the chamber. As the firearm functions in the "advanced primer ignition - blow-back" mode; when the bolt closes on a cartridge the cartridge discharges. This is the same retrofit modification as was incorporated on the MP38 to make the model officially the MP38/40.
- Some MP40's were modified by armourers in the field to MP40/I's and may not have been restamped / remarked as MP40/I's.

FRT Report

Firearm Reference Number (FRN): 36806
Make: Schmeisser
Model: MP40/I

Summary

Make:	Schmeisser
Model:	MP40/I
Manufacturer:	Steyr-Daimler-Puch (660)
Level:	Converted Automatics
Type:	Submachine Gun
Action:	Converted Automatic
Country of Manufacturer:	AUSTRIA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
36806 - 1	9MM LUGER	5	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
36806 - 2	9MM LUGER	32	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- this firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm. The MP38 Model is a Vollmer/Erma Werke development.
- Schmeisser did develop the design of the MP41 Model, which is an adaption of the MP40 Model with a wooden stock and a different trigger mechanism.
- Hugo Schmeisser was manager of the Haenel factory during World War II.

Model

- The MP40/I submachine gun is a development / modification to the MP40. It was redesigned / modified to incorporate a two piece lock-down style bolt handle which in conjunction with an upwards cut-out in the forward end of the cocking handle slot was intended to prevent accidental discharges when the bolt was in the forward position. This is the same retrofit modification as was incorporated on the MP38 to make the model officially the MP38/40.

Manufacturer

- Steyr-Daimler-Puch used code 660 until some time in 1941, when the code changed to bnz.

Type

- the type is refered to in German literature as a a "MACHINE PISTOLE".

Action

- no longer capable of full automatic fire.

Serial Number

- marked on the top rear of the receiver: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Remarks

- The submachine gun known as the MP40/I is an MP40 that has been modified to make it safe to carry with the bolt in the forward position. MP40/I is the official German designation for this modified MP40. The MP40/I was redesigned / modified to incorporate a two piece lock-down style bolt handle which in conjunction with an upwards cut-out in the forward end of the cocking handle slot, was intended to securely lock the the bolt in the forward position.
- Before modification, when the bolt was in the forward position and unlocked, the bolt could be "bounced" within the firearm due to the inertia possessed by the heavy mass of the bolt if the firearm was dropped or when jumping from a vehicle to the ground when a loaded magazine was present in the firearm. When this happened , the unpleasant result would be; the bolt on its return to the forward position would feed a cartridge from the magazine into the chamber. As the firearm functions in the "advanced primer ignition - blow-back" mode; when the bolt closes on a cartridge the cartridge discharges. This is the same retrofit modification as was incorporated on the MP38 to make the model officially the MP38/40.
- Some MP40's were modified by armourers in the field to MP40/I's and may not have been restamped / remarked as MP40/I's.

FRT Report

Firearm Reference Number (FRN): 36828
Make: Schmeisser
Model: MP40/II

Summary

Make:	Schmeisser
Model:	MP40/II
Manufacturer:	Erfurter Maschinenfabrik (ERMA) (ayf)
Level:	Converted Automatics
Type:	Submachine Gun
Action:	Converted Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
36828 - 1	9MM LUGER	5	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
36828 - 2	9MM LUGER	32	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
36828 - 3	9MM LUGER	64	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- This firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm. The MP38 Model is a Vollmer/Erma Werke development.
- Schmeisser did develop the design of the MP41 Model, which is an adaption of the MP40 Model with a wooden stock and a different trigger mechanism.
- Hugo Schmeisser was manager of the Haenel factory during World War II.

Model

- The MP40/II is a version of the MP40 Model with a redesigned magazine housing that accepts two magazines and effectively doubles the magazine capacity of the firearm.
- This adaptation merely permits magazine changes to occur much more quickly than with the single magazine feed feature.

Manufacturer

- Erma used code 27 until some time in 1941, when the code changed to ayf.

Type

- the type is refered to in German literature as a a "MACHINE PISTOLE".

Action

- no longer capable of full automatic fire.

Serial Number

- marked on the top rear of the receiver: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazines in an unusual dual feed mechanism.
Other Markings	- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.
Remarks	- The MP40/II is a version of the MP40 Model with a redesigned magazine housing that accepts two magazines and effectively doubles the magazine capacity of the firearm. - This adaptation merely permits magazine changes to occur much more quickly than with the single magazine feed feature.

- Schmeisser did develop the design of the MP41 Model, which is an adaption of the MP40 Model with a wooden stock and a different trigger mechanism.
- Hugo Schmeisser was manager of the Haenel factory during World War II.

Model

- the MP41 was the final evolution of the traditional submachine gun in Germany. It was developed by C.G. Haenel (fxo). The firearm is a basic MP40 with the firing mechanism of the MP28/II, a wooden stock and has no barrel "resting bar". The firearm is marked MP41, Patent Schmeisser, C.G. Haenel, Suhl on the top of the receiver.
- the MP41 was not "accepted" by the German Armed Forces. German police, para military Police organizations and the Waffen SS used the MP41 in limited quantities.

Type

- the type is refered to in German literature as a "MACHINE PISTOLE".

Action

- blowback operated.

Serial Number

- the MP41 was not adopted by the German Heer (Armed Forces) and therefor not subject to the normal serial numbering practices enforced by the German Armed Forces Weapons Office (deutschen Heereswaffenamt Wa Z 2).
- the serial number rationalization is unknown.
- observed specimen serial numbers consisted of five digits without prefix or suffix.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- The firearm is marked MP41, Patent Schmeisser, C.G. Haenel, Suhl on the top of the receiver.
- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Remarks

- the MP41 was the final evolution of the traditional submachine gun in Germany. It was developed by C.G. Haenel (fxo). The firearm is a basic MP40 with the firing mechanism of the MP28/II, a wooden stock and has no barrel "resting bar". The firearm is marked MP41, Patent Schmeisser, C.G. Haenel, Suhl on the top of the receiver.
- the MP41 was not "accepted" for use by the German Armed Forces. German police, para military police organizations and the Waffen SS used the MP41 in limited quantities.

Notes

Make

- "Schmeisser's "S" logo, over "SCHMEISSER" over "MADE IN GERMANY" is marked on the left side of the magazine housing of the receiver/frame.
- "SCHMEISSER" logo is represented by the letter "S" integrated into the centre of a muzzle end of a rifled barrel.

Model

- "MR-BA19" may be marked on the firearm.
- "MR" denotes "manual release".
- "BA" denotes "bolt action".
- This firearm is of the design commonly known as the AR15/M16.

Manufacturer

- Schmeisser's "S" logo, over "SCHMEISSER" over "MADE IN GERMANY" is marked on the left side of the magazine housing of the receiver/frame.
- "SCHMEISSER" logo is represented by the letter "S" integrated into the centre of a muzzle end of a rifled barrel.
- "SCHMEISSER GmbH" is located in Krefeld, Germany.
- "SCHMEISSER GmbH" is manufacturer of selective fire and semi-automatic firearms of the AR15, M-16, and M4 family.
- "SCHMEISSER GmbH" is not to be confused with Hugo Schmeisser, manager of the Haenel factory during World War II that had his name attached to some submachine gun types.

Action

- semi-automatic extraction/ejection with a manually operated loading.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the left side of the magazine housing of the receiver/frame.
Calibre	- calibre identification is marked on the barrel.
Shots	- detachable box magazine. - uses all magazines available for AR15/M16 type rifles.

Notes

Make

- The company logo is marked on the receiver/frame.
- The company logo consists of a stylized letter "S" inside a circle resembling a rifled barrel.
- "SCHMEISSER" is marked on the left side of the receiver/frame.
- "Schmeisser GmbH" is not to be confused with Hugo Schmeisser, manager of the Haenel factory during World War II that had his name attached to some submachine gun types.

Model

- Introduced in 2025.
- "PSR 9" is marked on the left side of the lower receiver/frame.
- Features include: Proprietary handguard with top accessory rail; textured pump handle; split receiver/frame design; accessory rail above upper receiver; proprietary rotating bolt and carrier; ambidextrous bolt catch/release and safety selector; magazine release on the right side of the lower receiver; AR-15 pattern pistol grip and telescopic buffer tube stock.
- Overall length with a 318 mm (12.5 inches) barrel is 747 mm (29.4 inches) with the stock collapsed, average weight is 2.86 kg (6.3 lbs).

Manufacturer

- The company logo is marked on the receiver/frame.
- The logo consists of a stylized letter "S" inside a circle resembling a rifled barrel.
- "SCHMEISSER" is marked on the left side of the receiver/frame.
- "Schmeisser GmbH" is not to be confused with Hugo Schmeisser, manager of the Haenel factory during World War II that had his name attached to some submachine gun types.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- The serial number is marked on the left side of the receiver/frame. - The serial number is repeated on other parts and components. - The serial number of referenced example consists of a letter prefix followed by five digits.
Barrel	- The barrel length does not include any attached device such as flash-hider or muzzle brake.
Calibre	- The calibre designation is marked on the barrel.
Shots	- Detachable box magazine. - Designed to accept "Glock" type magazines.
Canadian Law Comments	- This firearm design incorporates a split receiver/frame: the lower receiver is the master component considered to be the receiver/frame for all purposes of the Criminal Code and the Firearms Act.

Notes

Make

- "SCHMEISSER" is marked on the right side of the receiver/frame.
- "SCHMEISSER" logo is represented by the letter "S" integrated into the centre of a muzzle end of a rifled barrel.
- "SCHMEISSER GmbH" is located in Krefeld, Germany.
- "SCHMEISSER GmbH" is manufacturer of selective fire and semi-automatic firearms.
- "SCHMEISSER GmbH" is not to be confused with Hugo Schmeisser, manager of the Haenel factory during World War II that had his name attached to some submachine gun types.

Model

- "SLP-9" is marked on the left side of the slide.
- "SLP-9" uses a polymer receiver/frame.
- features include: fixed dovetailed front and rear sights; stainless steel slide and barrel; flat sided slide with right side ejection, rear grip serrations; polymer receiver/frame with an integral equipment rail, squared trigger guard, finger grooves on the front strap, rough texture surface finish and interchangeable back strap; single trigger with a double action trigger mechanism; slide lock/release is located on the left side of the receiver/frame; ambidextrous magazine release; lanyard connection point at the rear of the grip; black or coloured finish.
- overall length with a 113 mm (4.4") barrel is 187 mm (7.32"), average weight is 750 grams (26.45 oz.).

Manufacturer

- "TARA" is marked on the firearm.
- "TARA" logo is molded on the left side of the grip.
- "TARA" is located in Mojkovac, Montenegro.
- "Crna Gora" is marked on the right side of the receiver/frame
- "Crna Gora" is a former country bordering on the Adriatic Sea, now part of the Union of Serbia and Montenegro.
- "TARA" stands for "TARA Precision Works" of the "TARA group"
- "TARA" was privatized from the Montenegro government in 2007.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- recoil operated.
Serial Number	- serial number is marked on a metal strip on the underside of the receiver/frame, in front of the trigger guard and may be repeated on the slide and barrel.
Calibre	- calibre designation is marked on the right side of the slide. - calibre designation is marked on the barrel, visible through the ejection port. - 9MM LUGER rifling characteristics: 1 turn in 250mm, right hand twist.
Shots	- detachable box magazine.

Notes

Make

- "E. SCHMIDT & A. HABERMANN" may be marked on the firearm.

Model

- model designation is not marked on the firearm.
- this martini type action is operated by pulling down on the rear of the trigger-guard, which drops the front face of the breech-block
- features include: blued round or octagonal barrel; breech block hinged at the rear of the receiver/frame that swings downward at the front to open; double set triggers; engraved receiver/frame; deluxe pistol grip or straight stock with "schuetzen" style hooked buttplate and high comb cheek rest.

Manufacturer

- "E. SCHMIDT & A. HABERMANN, SUHL" may be marked on the firearm.
- E. Schmidt and A. Habermann manufactured firearms in Suhl, Germany circa 1870 to 1940.

Action

- rear hinged, lever operated tipping block design.
- Martini action is locked in the firing position by the tip of the operating lever holding the breech block face up and in line with the chamber.

Serial Number

- located on the receiver/frame.
- observed serial number consisted of three numbers without a letter prefix or suffix

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- "Schmidt-Rubin" is not marked on the firearm.
- "Schmidt-Rubin" is named after Swiss "Colonel Rudolf Schmidt" the director of Bern Arsenal and designer of the straight pull bolt mechanism and "Major Eduard Rubin" director of the Thun munitions factory and the designer of the "7.5mm SWISS" cartridge.

Model

- model designation is not marked on the firearm.
- this model was officially adopted on 26th June 1889.
- manufactured from 1891 to 1897.
- total production of approximately 212 000 units.
- features include: round barrel with three groove right hand rifling; tubular bolt system designed to unlock and open with the straight pull of the operating lever; action is locked by revolving two lugs on the rear of the bolt sleeve into seats in the receiver, ahead of the trigger; large cocking ring, which doubles as a safety catch; operating lever has two cone shaped pieces of hard plastic which form a vertical finger hold; ejection port is located on top of the action; quadrant sight graduated to 2000m; box magazine with cartridge cut off; noticeable gap of approximately 86mm (3 3/8") between the trigger guard and the magazine; one piece straight stock with upper handguard, nose cap, bayonet lug, stacking rod assembly and two barrel assembly bands.

NOTE: Main differences in the Schmidt-Rubin models are:
1889 - the bolt's locking lugs are located at the rear of the bolt sleeve and there is a large space between the trigger guard and the twelve round box magazine.
1889/96, 1889/00, 1896/11, 1900/11, 1905, 1905/11 and 1911 - the bolt's locking lugs are located at the front of the bolt sleeve and there is a large space between the trigger guard and the six round box magazine.
1931, 1931/42, 1931/43, and 1955 - the bolt's locking lugs are located at the front of the bolt and there is no space between the trigger guard and the six round box magazine.

- "sporter" versions with a shortened forend stock and/or barrel may be encountered.

Action

- straight-pull bolt design.

Serial Number

- range from 1 to 212 000.
- serial number is marked on the receiver/frame and barrel.

Shots

- detachable box magazine with a cut off system.

Remarks

- NOTE: Main differences in the Schmidt-Rubin models are:
1889 - the bolt's locking lugs are located at the rear of the bolt sleeve and there is a large space between the trigger guard and the twelve round box magazine.
1889/96, 1889/00, 1896/11, 1900/11, 1905, 1905/11 and 1911 - the bolt's locking lugs are located at the front of the bolt sleeve and there is a large space between the trigger guard and the six round box magazine.
1931 - the bolt's locking lugs are located at the front of the bolt and there is no space between the trigger guard and the six round box magazine.

Notes

Make

- "Schmidt-Rubin" is not marked on the firearm.
- the "Schmidt-Rubin" name is derived from Swiss "Colonel Rudolf Schmidt", the director of Bern Arsenal and designer of this straight pull bolt mechanism and "Major Eduard Rubin" director of the Thun munition factory and the designer of the "7.5MM SWISS" cartridge.

Model

- model designation is not marked on the firearm.
- this model was officially adopted on 26th June 1889.
- manufactured from 1891 to 1897.
- total production of approximately 212,000 units.
- features include: round barrel with three groove, right hand rifling; tubular bolt system designed to unlock and open with the straight pull of the operating lever; action is locked by revolving two lugs on the rear of the bolt sleeve into seats in the receiver/frame ahead of the trigger; large cocking ring, which doubles as a safety catch; operating lever has two cone shaped pieces of hard plastic which form a vertical finger hold; ejection port is located on the top of the action; quadrant sight graduated to 2000m; box magazine with cartridge cut off; noticeable gap of approximately 86mm (3 3/8") between the trigger guard and the magazine; one-piece straight stock with upper handguard, nose cap, bayonet lug, stacking rod assembly and two barrel assembling bands.

NOTE: Main differences in the Schmidt-Rubin models are:
1889 - the bolt's locking lugs are located at the rear of the bolt sleeve and there is a large space between the trigger guard and the twelve round box magazine.
1889/96, 1889/00, 1896/11, 1900/11, 1905, 1905/11 and 1911 - the bolt's locking lugs are located at the front of the bolt sleeve and there is a large space between the trigger guard and the six round box magazine.
1931, 1931/42, 1931/43, and 1955 - the bolt's locking lugs are located at the front of the bolt and there is no space between the trigger guard and the six round box magazine.

Manufacturer

- manufacturer is not marked on the firearm.
- a small "cross" on the receiver ring indicates the Waffenfabrik Bern maker and also encountered may be a backwards "BP" which is a Bern proof (Bererprobe).
- Waffenfabrik Bern / Eidgenossische Waffenfabrik of Bern, Switzerland was a state owned ordnance factory from 1875 to 1995.
- Waffenfabrik Bern / Eidgenossische Waffenfabrik of Bern was originally know as Montier Werkstatte / Eidgenossische Montier Werkstatte of Bern prior to 1876.

Action

- straight-pull bolt design.

Serial Number

- range from 1 to 212,000.
- numerical, on action, barrel.

Shots

- detachable box magazine.

Notes

Make

- "Schmidt-Rubin" is not marked on the firearm.
- "Schmidt-Rubin" is named after Swiss "Colonel Rudolf Schmidt" the director of Bern Arsenal and designer of the this straight pull bolt mechanism and "Major Eduard Rubin" director of the Thun munitions factory and the designer of the "7.5mm SWISS" cartridge.

Model

- model designation is not marked on the firearm.
- this is a hybrid that was derived from the model 1889/96 and 1897.
- manufactured between 1900 and 1904.
- this model was also known as the Model 1900.
- features include: round barrel with three groove right hand rifling; tubular bolt system designed to unlock and open with the straight pull of the operating lever; action is locked by revolving two lugs on the front of the bolt sleeve into seats in the receiver, behind the magazine well; large cocking ring, which doubles as a safety catch; operating lever has two cone shaped pieces of hard plastic which forms a vertical finger hold; ejection port is located on top of the action; quadrant sight graduated; box magazine with cartridge cut off; noticeable gap of approximately 76mm (3") between the trigger guard and the magazine; one piece straight stock with upper handguard, nose cap, bayonet lug, stacking rod assembly and one barrel assembly band.
- when this firearm was upgraded to fire the "7.5X55 SWISS" ammunition the model became known as the "1900/11".

NOTE: Main differences in the Schmidt-Rubin models are:
1889 - the bolt's locking lugs are located at the rear of the bolt sleeve and there is a large space between the trigger guard and the twelve round box magazine.
1889/96, 1889/00, 1896/11, 1900/11, 1905, 1905/11 and 1911 - the bolt's locking lugs are located at the front of the bolt sleeve and there is a large space between the trigger guard and the six round box magazine.
1931, 1931/42, 1931/43, and 1955 - the bolt's locking lugs are located at the front of the bolt and there is no space between the trigger guard and the six round box magazine.

Manufacturer

- Waffenfabrik Bern / Eidgenossische Waffenfabrik of Bern, Switzerland was a state owned ordnance factory from 1875 to 1995.
- Waffenfabrik Bern / Eidgenossische Waffenfabrik of Bern was originally known as Montier Werkstatte / Eidgenossische Montier Werkstatte of Bern prior to 1876.

Action

- straight-pull bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is located on the left side of the receiver/frame and repeated on the barrel.
- serial number range from 1 to 18 750.

Shots

- detachable single column box magazine.

Remarks

- NOTE: Main differences in the Schmidt-Rubin models are:
1889 - the bolt's locking lugs are located at the rear of the bolt sleeve and there is a large space between the trigger guard and the twelve round box magazine.
1889/96, 1889/00, 1896/11, 1900/11, 1905, 1905/11 and 1911 - the bolt's locking lugs are located at the front of the bolt sleeve and there is a large space between the trigger guard and the six round box magazine.
1931 - the bolt's locking lugs are located at the front of the bolt and there is no space between the trigger guard and the six round box magazine.

- "Schmidt-Rubin" is not marked on the firearm.
- "Schmidt-Rubin" is named after Swiss "Colonel Rudolf Schmidt", the director of Bern Arsenal and designer of the this straight pull bolt mechanism, and "Major Eduard Rubin" director of the Thun munition factory and the designer of the "7.5X55 SWISS" cartridge.

Model

- model designation is not marked on the firearm.
- this is a model "1896/96" that has been modified to the approximate same standards as the model "1911", this modification was carried out so the rifle could fire the Swiss 7.5/M1911 ammunition from a barrel with four groove rifling, using a six shot magazine.
- recognized by the added pistol grip in the form of an inlaid wood dowel.
- modifications were carried out from 1913 to 1920.
- features include: round barrel with four groove right hand rifling; tubular bolt system designed to unlock and open with the straight pull of the operating lever; action is locked by revolving two lugs on the front of the bolt sleeve into seats in the receiver, behind the magazine well; large cocking ring, which doubles as a safety catch; operating lever has two cone shaped pieces of hard plastic which forms a vertical finger hold; ejection port is located on top of the action; tangent leaf sight graduated to 2000m; box magazine; noticeable gap of approximately 76mm (3") between the trigger guard and the magazine; one piece pistol grip stock with upper handguard, nose cap, bayonet lug and stacking rod assembly.

NOTE: Main differences in the Schmidt-Rubin models are:
1889 - the bolt's locking lugs are located at the rear of the bolt sleeve and there is a large space between the trigger guard and the twelve round box magazine.
1889/96, 1889/00, 1896/11, 1900/11, 1905, 1905/11 and 1911 - the bolt's locking lugs are located at the front of the bolt sleeve and there is a large space between the trigger guard and the six round box magazine.
1931, 1931/42, 1931/43, and 1955 - the bolt's locking lugs are located at the front of the bolt and there is no space between the trigger guard and the six round box magazine.

Manufacturer

Notes

Make

- "Schmidt-Rubin" is not marked on the firearm.
- "Schmidt-Rubin" is named after Swiss "Colonel Rudolf Schmidt" the director of Bern Arsenal and designer of the this straight pull bolt mechanism and "Major Eduard Rubin" director of the Thun munitions factory and the designer of the "7.5mm SWISS" cartridge.

Model

- model designation is not marked on the firearm.
- manufactured from 1898 to 1927.
- model was adopted on 27th July 1898.
- model was derived from the Mannlicher Calvary carbine and the Schmidt straight pull bolt rifle system.
- features include: round barrel with three groove right hand rifling; tubular bolt system designed to unlock and open with the straight pull of the operating lever; action is locked by revolving two lugs on the front of the bolt sleeve into seats in the receiver, behind the magazine well; large cocking ring, which doubles as a safety catch; operating lever has two cone shaped pieces of hard plastic which form a vertical finger hold; ejection port is located on top of the action; single shot, no box magazine; quadrant sight graduated to 1200m; one piece straight stock with upper handguard, nose cap, bayonet lug and stacking rod assembly.

NOTE: Main differences in the Schmidt-Rubin models are:
1889 - the bolt's locking lugs are located at the rear of the bolt sleeve and there is a large space between the trigger guard and the twelve round box magazine.
1889/96, 1889/00, 1896/11, 1900/11, 1905, 1905/11 and 1911 - the bolt's locking lugs are located at the front of the bolt sleeve and there is a large space between the trigger guard and the six round box magazine.
1931, 1931/42, 1931/43, and 1955 - the bolt's locking lugs are located at the front of the bolt and there is no space between the trigger guard and the six round box magazine.

Manufacturer

- Waffenfabrik Bern / Eidgenossische Waffenfabrik of Bern, Switzerland was a state owned ordnance factory from 1875 to 1995.
- Waffenfabrik Bern / Eidgenossische Waffenfabrik of Bern was originally known as Montier Werkstatte / Eidgenossische Montier Werkstatte of Bern prior to 1876.

Action

- straight-pull bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number - serial number range from 1 to 7900.

Remarks - NOTE: Main differences in the Schmidt-Rubin models are:
1889 - the bolt's locking lugs are located at the rear of the bolt sleeve and there is a large space between the trigger guard and the twelve round box magazine.
1889/96, 1889/00, 1896/11, 1900/11, 1905, 1905/11 and 1911 - the bolt's locking lugs are located at the front of the bolt sleeve and there is a large space between the trigger guard and the six round box magazine.
1931 - the bolt's locking lugs are located at the front of the bolt and there is no space between the trigger guard and the six round box magazine.

- "Schmidt-Rubin" is not marked on the firearm.
- "Schmidt-Rubin" is named after Swiss "Colonel Rudolf Schmidt", the director of Bern Arsenal and designer of the this straight pull bolt mechanism, and "Major Eduard Rubin" director of the Thun munitions factory and the designer of the "7.5X55 SWISS" cartridge.

Model

- model designation is not marked on the firearm.
- modifications carried out from 1913 to 1920.
- this is a model "1889/00" also known as the "1900" that has been modified to the approximate same standards as the model "1911", so it could fire the Swiss M1911 ammunition from a four groove rifled barrel, using a six shot magazine.
- features include: round barrel with three groove right hand rifling; tubular bolt system designed to unlock and open with the straight pull of the operating lever; action is locked by revolving two lugs on the front of the bolt sleeve into seats in the receiver, behind the magazine well; large cocking ring, which doubles as a safety catch; operating lever has two cone shaped pieces of hard plastic which forms a vertical finger hold; ejection port is located on top of the action; box magazine; noticeable gap of approximately 76mm (3") between the trigger guard and the magazine; quadrant sight graduated to 1200m; one piece straight stock with upper handguard, nose cap, bayonet lug and stacking rod assembly.

NOTE: Main differences in the Schmidt-Rubin models are:
1889 - the bolt's locking lugs are located at the rear of the bolt sleeve and there is a large space between the trigger guard and the twelve round box magazine.
1889/96, 1889/00, 1896/11, 1900/11, 1905, 1905/11 and 1911 - the bolt's locking lugs are located at the front of the bolt sleeve and there is a large space between the trigger guard and the six round box magazine.
1931, 1931/42, 1931/43, and 1955 - the bolt's locking lugs are located at the front of the bolt and there is no space between the trigger guard and the six round box magazine.

Manufacturer

- Waffenfabrik Bern / Eidgenossische Waffenfabrik of Bern, Switzerland was a state owned ordnance factory from 1875 to 1995.
- Waffenfabrik Bern / Eidgenossische Waffenfabrik of Bern was originally known as Montier Werkstatte / Eidgenossische Montier Werkstatte of Bern prior to 1876.

Action

- straight-pull bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is located on the left side of the receiver/frame and repeated on the barrel.
- serial number range from 1 to 18,750.

Shots

- detachable box magazine.

Remarks

- NOTE: Main differences in the Schmidt-Rubin models are:
1889 - the bolt's locking lugs are located at the rear of the bolt sleeve and there is a large space between the trigger guard and the twelve round box magazine.
1889/96, 1889/00, 1896/11, 1900/11, 1905, 1905/11 and 1911 - the bolt's locking lugs are located at the front of the bolt sleeve and there is a large space between the trigger guard and the six round box magazine.
1931 - the bolt's locking lugs are located at the front of the bolt and there is no space between the trigger guard and the six round box magazine.

Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	SWITZERLAND
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
2404 - 1	7.5X53 SWISS	6	550	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Schmidt-Rubin" is not marked on the firearm.
- "Schmidt-Rubin" is named after Swiss "Colonel Rudolf Schmidt" the director of Bern Arsenal and designer of the this straight pull bolt mechanism and "Major Eduard Rubin" director of the Thun munitions factory and the designer of the "7.5mm SWISS" cartridge.

Model

- model designation is not marked on the firearm.
- manufactured from 1906 to 1911.
- total production of approximately 7500 units.
- features include: round barrel with three groove right hand rifling; tubular bolt system designed to unlock and open with the straight pull of the operating lever; action is locked by revolving two lugs on the front of the bolt sleeve into seats in the receiver, behind the magazine well; large cocking ring, which doubles as a safety catch; operating lever has two cone shaped pieces of hard plastic which forms a vertical finger hold; ejection port is located on top of the action; quadrant sight graduated to 1500m; box magazine with cartridge cut off; noticeable gap of approximately 76mm (3") between the trigger guard and the magazine; one piece semi-pistol grip stock with upper handguard and nose cap.
- in 1913, this model was converted/modified to become the model 1905/11.

NOTE: Main differences in the Schmidt-Rubin models are:
1889 - the bolt's locking lugs are located at the rear of the bolt sleeve and there is a large space between the trigger guard and the twelve round box magazine.
1889/96, 1889/00, 1896/11, 1900/11, 1905, 1905/11 and 1911 - the bolt's locking lugs are located at the front of the bolt sleeve and there is a large space between the trigger guard and the six round box magazine.
1931, 1931/42, 1931/43, and 1955 - the bolt's locking lugs are located at the front of the bolt and there is no space between the trigger guard and the six round box magazine.

Manufacturer

- Waffenfabrik Bern / Eidgenossische Waffenfabrik of Bern, Switzerland was a state owned ordnance factory from 1875 to 1995.
- Waffenfabrik Bern / Eidgenossische Waffenfabrik of Bern was originally known as Montier Werkstatte / Eidgenossische Montier Werkstatte of Bern prior to 1876.

Action

- straight-pull bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is located on the receiver/frame and repeated on the barrel.
- serial number range from 1 to 7900.

Shots

- detachable single column box magazine.

Remarks

- NOTE: Main differences in the Schmidt-Rubin models are:
1889 - the bolt's locking lugs are located at the rear of the bolt sleeve and there is a large space between the trigger guard and the twelve round box magazine.
1889/96, 1889/00, 1896/11, 1900/11, 1905, 1905/11 and 1911 - the bolt's locking lugs are located at the front of the bolt sleeve and there is a large space between the trigger guard and the six round box magazine.
1931 - the bolt's locking lugs are located at the front of the bolt and there is no space between the trigger guard and the six round box magazine.

- total production of approximately 582,230 units.
- this firearm was also known as the "1931 Carbine", "1931 Short Rifle", "K31", "Karabiner 31", or "M1931 Carbine".
- features include: round barrel with four groove right hand rifling; tubular bolt system designed to unlock and open with the straight pull of the operating lever; action is locked by rotating two lugs on the front of the bolt into the receiver behind the chamber; large cocking ring, which doubles as a safety catch; operating lever has two cone shaped pieces of hard plastic which forms a vertical finger hold; ejection port is located on top of the action; tangent leaf sight graduated to 1500m; detachable box magazine mounted directly in front of the trigger guard; one piece semi-pistol grip stock with upper handguard, nose cap, bayonet lug, stacking rod assembly and two barrel bands.

NOTE: Main differences in the Schmidt-Rubin models are:
1889 - the bolt's locking lugs are located at the rear of the bolt sleeve and there is a large space between the trigger guard and the twelve round box magazine.
1889/96, 1889/00, 1896/11, 1900/11, 1905, 1905/11 and 1911 - the bolt's locking lugs are located at the front of the bolt sleeve and there is a large space between the trigger guard and the six round box magazine.
1931, 1931/42, 1931/43, and 1955 - the bolt's locking lugs are located at the front of the bolt and there is no space between the trigger guard and the six round box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- Waffenfabrik Bern / Eidgenossische Waffenfabrik of Bern, Switzerland was a state owned ordnance factory from 1875 to 1995. - Waffenfabrik Bern / Eidgenossische Waffenfabrik of Bern was originally know as Montier Werkstatte / Eidgenossische Montier Werkstatte of Bern prior to 1876.
Action	- straight-pull bolt design.
Serial Number	- serial number is located on the left side of the receiver/frame and repeated on the bolt and magazine. - serial number range from 1 to 582,230.
Shots	- detachable single column box magazine.
Also Known As/Product Code	- Karabiner M1931, Infantry Rifle M1931
Remarks	- NOTE: Main differences in the Schmidt-Rubin models are: 1889 - the bolt's locking lugs are located at the rear of the bolt sleeve and there is a large space between the trigger guard and the twelve round box magazine. 1889/96, 1889/00, 1896/11, 1900/11, 1905, 1905/11 and 1911 - the bolt's locking lugs are located at the front of the bolt sleeve and there is a large space between the trigger guard and the six round box magazine. 1931 - the bolt's locking lugs are located at the front of the bolt and there is no space between the trigger guard and the six round box magazine.

Notes

Make

- "Schmidt-Rubin" is not marked on the firearm.
- "Schmidt-Rubin" is named after Swiss "Colonel Rudolf Schmidt" the director of Bern Arsenal and designer of the this straight pull bolt mechanism and "Major Eduard Rubin" director of the Thun munitions factory and the designer of the "7.5mm SWISS" cartridge.

Model

- model designation is not marked on the firearm.
- produced from 1944 to 1945.
- total production of approximately 2,240 units.
- this is a model 1931 with a 1.8 power telescope permanently built into the left side of the firearm. The head of the scope resembles a periscope and when in use is lifted up and when not in use is folded down against the side of the firearm.
- features include: round barrel with four groove right hand rifling; tubular bolt system designed to unlock and open with the straight pull of the operating lever; action is locked by rotating two lugs on the front of the bolt sleeve into the receiver behind the chamber; large cocking ring, which doubles as a safety catch; operating lever has two cone shaped pieces of hard plastic which forms a vertical finger hold; ejection port is located on top of the action; tangent leaf sight graduated to 1000m; detachable box magazine mounted directly in front of the trigger guard; one piece semi-pistol grip stock with upper handguard, nose cap, bayonet lug and stacking rod assembly.

NOTE: Main differences in the Schmidt-Rubin models are:
1889 - the bolt's locking lugs are located at the rear of the bolt sleeve and there is a large space between the trigger guard and the twelve round box magazine.
1889/96, 1889/00, 1896/11, 1900/11, 1905, 1905/11 and 1911 - the bolt's locking lugs are located at the front of the bolt sleeve and there is a large space between the trigger guard and the six round box magazine.
1931, 1931/42, 1931/43, and 1955 - the bolt's locking lugs are located at the front of the bolt and there is no space between the trigger guard and the six round box magazine.

Action

- straight-pull bolt design.

Shots

- detachable single column box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- NOTE: Main differences in the Schmidt-Rubin models are:
1889 - the bolt's locking lugs are located at the rear of the bolt sleeve and there is a large space between the trigger guard and the twelve round box magazine.
1889/96, 1889/00, 1896/11, 1900/11, 1905, 1905/11 and 1911 - the bolt's locking lugs are located at the front of the bolt sleeve and there is a large space between the trigger guard and the six round box magazine.
1931 - the bolt's locking lugs are located at the front of the bolt and there is no space between the trigger guard and the six round box magazine.

Notes

Make

- "Schmidt-Rubin" is not marked on the firearm.
- "Schmidt-Rubin" is named after Swiss "Colonel Rudolf Schmidt" the director of Bern Arsenal and designer of the this straight pull bolt mechanism and "Major Eduard Rubin" director of the Thun munitions factory and the designer of the "7.5mm SWISS" cartridge.

Model

- model designation is not marked on the firearm.
- produced from 1945 to 1946.
- recognizable by a telescope sight of 2.8 power as the M42 scope was deemed to be underpowered.
- this is model 1931 with a 2.8 power telescope permanently built into the left side of the firearm. The head of the scope resembles a periscope and when in use is lifted up and when not in use is folded down against the side of the firearm.
- features include: round barrel with four groove right hand rifling; tubular bolt system designed to unlock and open with the straight pull of the operating lever; action is locked by rotating two lugs on the front of the bolt sleeve into the receiver behind the chamber; large cocking ring, which doubles as a safety catch; operating lever has two cone shaped pieces of hard plastic which forms a vertical finger hold; ejection port is located on top of the action; tangent leaf sight graduated to 700m; detachable box magazine mounted directly in front of the trigger guard; one piece semi-pistol grip stock with upper handguard, nose cap, bayonet lug and stacking rod assembly.

NOTE: Main differences in the Schmidt-Rubin models are:
1889 - the bolt's locking lugs are located at the rear of the bolt sleeve and there is a large space between the trigger guard and the twelve round box magazine.
1889/96, 1889/00, 1896/11, 1900/11, 1905, 1905/11 and 1911 - the bolt's locking lugs are located at the front of the bolt sleeve and there is a large space between the trigger guard and the six round box magazine.
1931, 1931/42, 1931/43, and 1955 - the bolt's locking lugs are located at the front of the bolt and there is no space between the trigger guard and the six round box magazine.

Action

- straight-pull bolt design.

Shots

- detachable single column box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- last and most compact re-design of the Schmidt-Rubin family. The 1931 carbine was the last model of this family. This model family was first introduced in 1889 and ended with the model of 1931.
- NOTE: Main differences in the Schmidt-Rubin models are:
1889 - the bolt's locking lugs are located at the rear of the bolt sleeve and there is a large space between the trigger guard and the twelve round box magazine.
1889/96, 1889/00, 1896/11, 1900/11, 1905, 1905/11 and 1911 - the bolt's locking lugs are located at the front of the bolt sleeve and there is a large space between the trigger guard and the six round box magazine.
1931 - the bolt's locking lugs are located at the front of the bolt and there is no space between the trigger guard and the six round box magazine.

89635 - 1	12 GA X 2 3/4"	2	711	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "SCHOFIELD, BIRMINGHAM" is marked on the top rib.

Model

- this is a generic entry for those Schofield side by side shotguns that are not identifiable as to model.
- features may include:
- external or internal hammers.
- double, or single trigger, with or without barrel selector.
- sidelock or boxlock.
- top, side, or push button opening lever.
- extractors or ejectors
- damascus, or steel barrels.
- boxlock, or sidelock configuration
- finishes, and engraving may vary widely.
- hardwood stock, pistol grip, semi pistol grip, or straight English style.
- sample reported featured external hammers.

Manufacturer

- William Schofield was a British gunsmith in Birmingham from 1873 to 1882.

Action

- side by side barrel configuration.

Serial Number

- sample reported featured a six digit serial number, located on the underside of the barrel.

Firearm Reference Number (FRN): 143047
Make: Scholberg & Gadet
Model: 1876

Summary

Make:	Scholberg & Gadet
Model:	1876
Manufacturer:	Scholberg & Gadet (S&G)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	BELGIUM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
143047 - 1	12MM	6	148	Antique AFR, Section 1, para. 7	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "S&G" was observed marked on the left side of the receiver/frame.
- "S&G" was the abbreviation for Scholberg & Gadet

Model

- manufactured prior to 1886.
- model is not marked on the firearm.
- this firearm resembles the French Serice and Swiss Service revolver which used the 1876 Warnant System
- Scholberg & Gadet model 1876 has the left side swing-out access cover release located behind the hammer.
- features include: fixed sights; octagonal barrel; solid top receiver/frame with a removable fluted cylinder and right side swing-down loading gate; left side mounted, forward swinging action cover that includes the top of the left grip panel; extractor rod is mounted on the right underside of the barrel; exposed spur hammer; double/single action trigger mechanism; removable rounded trigger guard; checkered wood grips with a metal butt cap with a lanyard ring; nickel plated finish.

Manufacturer

- "S&G" was observed marked on the left side of the receiver/frame.
- Scholberg & Gadet were a firearms manufacturer located in Liege, Belgium from 1861 to 1885.

Serial Number

- serial number was observed marked on the left side of the receiver/frame.
- serial number of an observed example consisted of three numbers without a letter prefix or suffix.

80931 - 1	450 X 3 1/4"	1	711	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
80931 - 3	450 X 3 1/4"	1	711	Antique AFR, Section 1, para. 3	Non-Commercial Customization	

Notes

Make

- "SCHOLEFIELD" is usually marked on the right side of the receiver/frame.
- "SCHOLEFIELD" was a trade name used by Scholefield & Company and Scholefield, Goodman & Sons of Birmingham and London, England.

Model

- "Field's Patent" or "Field's Patent Breech" over "No.1927" over "1877" is marked on the left side of the receiver/frame.
- William Field's Patent No. 1927 of May 1877 is for a single shot action with either a Martini type rear hinged, lever operated tipping block design, or a Farquharson type lever operated vertical dropping/falling block design.
- Field's Patent No 1927 is characterized by a right side mounted operating lever on the receiver/frame which was moved forward to lower the breech block, cock the hammer and actuate the extractor at the end of the opening stroke; pulling back on the lever closed the action; most of these actions had an external hammer and an inertia striker in the breech block, although hammerless versions were also made.
- utilizes a single shot falling block action.
- opening lever is located on the right side of the receiver/frame.
- external hammer, with half-cock notch.
- checkered hardwood stock, available in either pistol grip, or straight configuration.
- depending on the maker who finished the rifles, some variants may be encountered with a trigger safety, or an indent-locked lever on the right side of the receiver/frame, the function of which is to lock the side lever with the breech when in the closed position.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "SCHOLEFIELD" was a trade name used by Scholefield & Company and Scholefield, Goodman & Sons of Birmingham and London, England.

- "FIELD RIFLE COMPANY" was located in Birmingham, England at 2 King Alfred Place, Broad Street from 1885 to 1896, 2 Cambridge Street from 1987 to 1898, and 58 Cambridge Street from 1904 to circa 1913.
- "FIELD RIFLE & MOTOR COMPANY" was located at 58 Cambridge Street from 1914 to 1915.
- "FIELD RIFLE & GUN COMPANY" was located at 58 Cambridge Street from 1916 to 1917.
- "FIELD RIFLE COMPANY" was located at 58 Cambridge Street from 1918 to 1920.

- William Field was the manager of the Field Rifle Company of Birmingham, England from 1885 to 1898.
- William Field was the inventor of an action, patented on May 17 1877, as No. 1927. It is believed that Field Rifle Company supplied this patented action to other makers, as they do not appear to have made complete rifles. The manufacturers who utilized his action include many of the best know firms of that era, such as:

A. Bertin & Charles Jourich of Paris, France
Thomas Bland & Sons of Birmingham, England
C.G. Bonehill, Limited of Birmingham, England
J. Brodell & Son of Castle Place, Belfast, Ireland
George Gibbs of Bristol, England
W.W. Greener of Birmingham, England
Holland & Holland of London, England
Kynoch & Company, Limited of Birmingham, England
Charles Lancaster & Company of 151 New Bond Street, London, England
I. Hollis & Sons of London, England
Lang & Hussey, Limited of London, England
G.E. Lewis & Sons of 23 & 23 Lower Loveday Street, Birmingham, England
James MacNaughton & Sons of Edinburgh, Scotland
William Moore & Gray of 43 Old Bond Street, London, England
James Purdey & Sons, Limited of London, England
W. Rawbone of Cape Town, South Africa
John Rigby & Company of 72 St. James Street, London, England
R.B. Rodda & Company of London, England & Calcutta, India
Scholefield & Company
Scholefield, Goodman & Sons of Birmingham and London
W.&C. Scott & Son of Birmingham & London, England
William Soper of Reading, England
Thomas Turner of 19 Brook St., Bond Street, London, England
Thomas W. Watson of 4 Pall Mall, London, England
James Wilkinson & Son of London, England
Thomas Woodward of Birmingham & London, England

Action

- lever operated dropping/falling block design.

Serial Number

- serial number usually stamped on the underside of the receiver/frame just ahead of the trigger guard, and repeated on all major metal parts. An observed example had a letter prefix and four numbers.
- do not confuse No. 1927, with the serial number, this is the number of the patent granted to Field on May 17, 1877.
- the serial number rationalization is unknown, but it is believed that Field's total production was somewhere between 2500 and 2600, however the firms who finished the rifle sometimes used their own serial number sequence.

Calibre

- calibre designation usually stamped on the right side of the barrel.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "Scholefield" may be marked on the side of the receiver/frame.
- "Scholefield. London & Birmingham" may be marked on the barrel.
- "SCHOLEFIELD" was a trade name used by Scholefield & Company and Scholefield, Goodman & Sons of Birmingham and London, England.
- research indicates that these firms were firearms retailers/distributors only.

Model

- no model name is marked on this firearm.
- this is a generic entry for a Henry's Patent falling block sporter rifles sold by Scholefield that have no model designation marked on them.
- Henry's Patent refers to the under-lever operated, hammerless, falling block action patented by Alexander Henry in 1870.
- this type of rifle would have been made circa 1870 to the early 1900's.
- Scholefield exported some of these rifles to Newfoundland, which were popular for seal hunting.
- lever actuated falling block action.
- features may include: under/side lever actuated; exposed hammer or hammerless; British proofmarks are apparent on the barrel and/or receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- Alexander Henry was a Scottish firearms manufacturer established circa 1853. - Alexander Henry was located in Edinburgh, Scotland. - Alexander Henry also had a shop in London, England. - Alexander Henry was taken over first by Alex. Martin of Glasgow and then by John Dickson & Son Ltd. in 1947. - Alexander Henry trade name is still in use through the firm of Dickson & MacNaughton of Edinburgh, Scotland, circa 2003. - Alexander Henry's Scottish addresses for the firm; - 12 South Steet, Andrew Street, 1853, - 8 South Street, Andrew Street, 1858, - 12 South Street, Andrew Street, 1862, - 12 & 14 South Street, Andrew Street, 1871, - 12 South Street, Andrew Street, 1875, - 18 Frederick Street, 1895, - 22 Frederick Street, 1911 to circa 1947. - London addresses for the firm were; - "The Henry Military Rifle Co., 39a King William Street, London E.C., circa 1868 to 1872, - 118 Pall Mall, London S.W., circa 1877, - 31 Cockspur Street, London S.W., circa 1886, - 23 Pall Mall, London S.E., circa 1894, - 13a Charles Street, Haymarket, London, circa 1899.
Action	- under lever operated, falling/dropping block design. - solid metal breechblock slides vertically in grooves cut into the receiver/frame.
Serial Number	- serial number usually found on the receiver/frame; may have a letter prefix.
Calibre	- known example had the calibre designation "proofed" on the rear right side of the barrel, e.g., "450 EX 120 - 320".
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "Scholefield, London & Birmingham" may be marked on the sight rib.
- "SCHOLEFIELD" was a trade name used by Scholefield & Company and Scholefield, Goodman & Sons of Birmingham and London, England.

Model

- model designation is not marked on firearm.
- this is an entry for side by side shotguns whose model designation is not known.
- features may include: extractors or ejectors; wood two piece stock, of various grades, with or without engraving and/or checkering; the forearm, which may be of standard, splinter or beavertail profile, is usually detached by the operation of a lever or push-button located on the forearm; buttstock may have a metal or synthetic buttplate or recoil pad; the buttstock may have a pistol grip or a straight (English style) grip; the buttstock may also feature an inlaid escutcheon; may have one or two triggers inside a trigger guard; the barrels will likely have some type of sighting rib and one or two bead sights; the barrels may be made of damascus or monobloc/fluid steel; the barrels will frequently have some level of choke, which may be marked on the barrels; the barrels are usually hinged and pivot in relation to the frame/receiver; hammers may be exposed or internal; an action opening lever is usually found on the upper tang, although opening levers may be encountered on either side of or beneath the frame/receiver; a manual safety may or may not be present; the receiver/frame and/or barrel may be unembellished or may feature light to extensive engraving, with or without inlays of precious metals; the locking work might be one of a wide variety or systems, boxlock and sidelock being two of the more common types; sling swivels may be fitted to the buttstock and the forearm or barrels; the metal surfaces may have a blued finish.

Action

- side by side barrel configuration.

Serial Number

- numeric serial number marked on the watertable of observed specimen.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - British proofmarks should be found on the underside of the barrels and on the receiver/frame.

64943 - 2	9.3X72R/16 GA X 2 1/2"	3	600	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "Robert Schuler, Koln" is marked on the rib.

Model

- this is a standard-pattern drilling, with two side by side shotgun barrels over a single rifle barrel.
- features include: shotgun barrel selector plug on left wrist, safety / rifle selector on tang (raises rear sight when operated), double triggers, and a finely-checkered wood stock and forearm, with a bag-shaped grip.
- may also have provision for mounting a scope

Manufacturer

- Suhl firearms are made in Suhl, Germany. These firearms can be identified by the existence of proprietary Suhl Gun Guild proofs.

Action

- hinged barrel design.
- barrel assembly consists of three barrels: one rifled barrel and two smoothbore barrels or two rifled barrels and one smoothbore barrel.

Serial Number

- numbered on flat of receiver and on barrel lug.

Notes

Make

- "Andreas Schuler - Hochwang" or "as.h" is marked on the firearm.
- Andreas Schuler is a custom gunsmith based in Hochwang, Bavaria, since 1999, who specializes in building target and sniper rifles.

Model

- "WALKURE" (the German for "Valkyrie") is marked on the receiver/frame.
- this is a custom-made, bolt-action sniper/long-range target rifle manufactured in numerous barrel lengths and action lengths, depending on the cartridge the rifle is chambered for.
- features include: various coated/painted/cerakoted finishes, in the customer's choice of colours; "bird-cage"-style flash suppressor; round heavy barrel; synthetic vertical pistol-grip stock with "pebbled" gripping surfaces and an adjustable cheekpiece; accessory rail for mounting optics; detachable box magazine with a paddle release at the front of the trigger guard; helically fluted bolt.

Manufacturer

- "Andreas Schuler - Hochwang" or "as.h" is marked on the firearm.
- Andreas Schuler is a custom gunsmith based in Hochwang, Bavaria, since 1999, who specializes in building target and sniper rifles.

Serial Number

- serial-numbered on the receiver/frame.

Shots

- detachable box magazine.

Notes

Make

- "ASS" in a circle was observed marked on the grip panels.
- "ASS" is the acronym for August Schuler of Suhl.

Model

- model designation may be marked on the bottom of the grip.
- this is a self-loading tear gas and dog training blank firing pistol made pre-WWII.
- this pistol has no chamber, no extractor and smooth bore barrel with an open top slide.
- manufactured from 1930 to circa 1940.
- features include: top loading; fixed firing pin at the rear of the slide; fixed magazine in the grip; plastic grips.

Manufacturer

- "A.S.S. GERMANY" and "D.R.P." may be marked on the water table.
- "A.S.S." is the abbreviation for August Schuler of Suhl.
- "D.R.P." is the abbreviation for Deutsches Reichs-Patente.
- "August Schuler" was located in Suhl, Thuringen, Germany from 1900 to 1940.

Action

- gas operated.

Serial Number

- serial number is marked at the bottom of the grip.
- observed serial number consisted of two numbers without a letter prefix or suffix.

Shots

- fixed magazine in the grip, spring-loaded magazine follower.

Notes

Make

- make is marked on the barrel and/or receiver/frame.

Model

- model designation may be marked on the receiver/frame as "M-54".
- produced from approximately 1954 to 1973.
- specifically designed for 300 Metre Free Rifle competitions.
- turn bolt operated single shot action, characterized by a four-lug, rear locking bolt with the root of the bolt handle serving as an additional locking lug,
- features may include:
- heavy barrel,
- set triggers,
- micrometre rear sight,
- thumb-hole stock,
- adjustable buttplate, palm rest.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- manufacturer's name is marked on the barrel and/or receiver/frame.
Action	- turn bolt operated.
Other Markings	- model designation, proofs, manufacturer's name and calibre designation are all marked on the firearm.
Remarks	- this rifle was designed for target shooting. It is recognizable by its heavy wood stock and elaborate sights.

- this is a deluxe version of the model 65.
- hunting rifle with a somewhat unusual locking system; instead of having the locking lugs at the front of the bolt, this design has four small lugs arranged around the bolt just forward of the bolt handle;
- adjustable trigger, hinged floor-plate, matte receiver top drilled and tapped for scope mounts, pistol grip walnut stock with Monte Carlo comb and cheekpiece, sling swivels, and recoil pad.
- introduced in 1965.

Manufacturer

- the manufacturer's name and address are marked on the receiver/frame.
- "Schultz & Larsen" was located in Otterup, Denmark.

Serial Number

- may be located on left side of receiver/frame.

Calibre

- usually marked on left rear side of barrel.

Shots

- internal box magazine.

Notes

Make

- "Schutz & Larsen" is usually marked on the barrel.

Model

- model designation is not marked on the firearm.
- Schultz & Larson re-manufactured sporter and target type rifles using original military Mauser actions from World War I and II, including the GEW 98, 98K and G29/40 actions.
- Schultz & Larson re-barreled the actions and finished the rifles with sporting or heavy target barrels, Monte Carlo stocks and sporting or target sights.
- original model and manufacturer's markings may still be marked on the firearm.
- features may include: turn bolt action, Monte Carlo stock with pistol grip and cheekpiece, safety behind the bolt, internal magazine, drilled and tapped for scope mount, hooded front sight, target rear sight and recoil pad.

Manufacturer

- manufacturer located in Otterup, Denmark.
- "SCHULTZ & LARSON OTTERUP" is usually marked on the barrel.

Action

- turn-bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number usually marked on the receiver ring. - examples observed with three or five digits without a letter prefix or suffix.
Calibre	- calibre designation marked on the left side of the barrel.
Shots	- internal magazine.

Firearm Reference Number (FRN): 197322
Make: Schulze, H.G.
Model: Side By Side

Summary

Make:	Schulze, H.G.
Model:	Side By Side
Manufacturer:	Schulze, H.G.
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Multi-Barrel
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
197322 - 1	12 GA	2	740	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "H.G. Schultze" is marked on the barrel rib between the side by side barrels of this firearm.

Model

- The model designation is not marked on the receiver/frame.
- The barrels of this firearm may contain markings unrelated to the receiver/frame of this firearm and are not to be mistaken for the model, nor maker of the firearm. See notes on "Other Markings" for this firearm.
- Features include: steel or nickel engraved receiver/frame with dual hammers; side by side round, blued barrels; wood shoulder stock.

Manufacturer

- "H.G. Schultze" is marked on the barrel rib between the side by side barrels of this firearm.
- "Bremen" is marked on the barrel rib between the two side by side barrels of the firearm, following the name of the maker, H.G. Schulze.
- Bremen is the name of a city/state within Northern Germany.

Action

- Hinged barrel design.
- Side by side barrel configuration.

Serial Number

- The serial number rationalization is unknown.
- Observed serial number consisted of a letter prefix, followed by one (1) number, followed by a letter, followed by three (3) numbers.

Other Markings

- Additional markings may be found on the barrels, marked as follows: in a circle around a centre flower/exploding star pattern, is "COCKERILL", followed by "STAHL", on top of circle form, over "RAUCHLOG", followed by "GEPRÜFT", in the lower circle pattern.
- "Cockerill" was a known Belgium factory, founded in 1834.
- It may have been known as "Cockerill Société" or "Société Cockerill", which specialized in the production of firearm barrels by mechanical welding methods.
- "Geprûft" is a German word that translates into "Checked" or "Proof Checked".
- "Stahl" is a German word that translated into "Steel".

Type:	Machine Gun
Action:	Converted Automatic
Country of Manufacturer:	AUSTRIA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
118374 - 1	8X50R AUSTRIAN MANNLICHER	N/A	526	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- make and model designations are usually marked on the right side of the receiver/frame as: "M.G.(SCHWARZLOSE" over "M.7/12)".
- Andreas Wilhelm Schwarzlose was a German firearms designer.

Model

- model designation is marked on the right side of the receiver/frame as: "M.7/12".
- production of this firearm ceased circa 1918.
- this firearm in the form of the Model 1905 was adopted by Austria-Hungary in 1905 as their military's standard machine gun; it remained in service as the Model 1907 and finally as the Model 1907/1912 until circa 1918 after which date it was relegated to "limited-standard" status.
- delayed blowback action, full automatic fire only, water cooled, tripod mounted, belt-fed, heavy machine gun with a cyclic rate of fire of approximately 400 rounds per minute.
- utilizes a fabric belt containing 250 cartridges.
- right hand feed.
- the model 07/12 differs from its two predecessors, the models 1905 and 1907, in that it does not require the use of a mechanical oil pump to lubricate the chamber between extraction and loading.

Manufacturer

- "WAFFENFABRIK STEYR" or a variation thereof and the date of manufacture are usually marked on the left side of the receiver/frame.

Action

- no longer capable of full automatic fire.

Serial Number

- known example had the serial number without prefix or suffix marked on the top rear of the receiver/frame.
- five digit numbers have been observed.

Shots

- utilizes a fabric belt containing 250 cartridges.

FRT Report

Firearm Reference Number (FRN): 26227
Make: Schwarzlose
Model: 07/12 16R

Summary

Make:	Schwarzlose
Model:	07/12 16R
Manufacturer:	Oesterreichische Waffenfabriks Gesellschaft, Steyr
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	AUSTRIA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
26227 - 2	8X50R AUSTRIAN MANNLICHER	N/A	526	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- the maker's designation is marked on the right side of the receiver/frame near the rear as "M.G. SCHWARZLOSE". - Andreas Wilhelm Schwarzlose was a German firearms designer.
Model	- no longer in production. - the model designation is marked on the left side of the receiver/frame as "M.7/12(16/R)" - features include: plain barrel, air cooled, cocking handle located on the left side of the receiver/frame, a small mechanical oil pump lubricated the chamber for each round chambered, one large spring served as a buffer, drove the heavy bolt, and firing pin. - the M07 12 R16 is an M07 12 16 without a water cooling jacket and was employed as an aircraft mounted machine gun.
Manufacturer	- the manufacturer's designation is marked on the left side of the receiver/frame near the rear as "WAFFENFABRIK STEYR".
Action	- delayed blowback operated.
Serial Number	- the serial number is usually marked on the top of the receiver/frame near the rear, may also appear on several other components.
Shots	- this is a belt fed firearm.
Other Markings	- a date of manufacture or issue (eg 1917) may be maked below the manufacturer's designation.

FRT Report

Firearm Reference Number (FRN): 26226
Make: Schwarzlose
Model: 1908

Summary

Make:	Schwarzlose
Model:	1908
Manufacturer:	Schwarzlose, A W
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
26226 - 2	7.65MM	7	105	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the "SCHWARZLOSE" trademark logo is marked on the right side of the firearm.
- "A.W. Schwarzlose G.m.b.H. Berlin" is marked on the left side of the slide.

Model

- not marked as to model or date, known as "Pocket Model 1908" (production began in 1908, later units marked with 1908 patent dates), marketed initially in late 1909 (at times called "Pocket Model 1909"), production terminated in 1911 (assembly until about 1913).
- type I: front grip-strap safety, internal extractor, rear butt-mounted magazine release, gripping-areas on barrel serrated for cocking, plain or checkered grips, German proof marks on top of barrel, no patent dates.
- type II: front grip-strap safety, external extractor, left frame-mounted button magazine release behind trigger-guard, gripping-areas on barrel checkered (cross-hatched) for cocking, 1908 patent dates on left side; "WARNER ARMS CO." usually marked on the right side, black moulded rubber grips (early grips bear intertwined "WAC"), serial numbers usually on the frame backstrap.
- type III: no grip safety, external extractor, rear frame-mounted magazine release (smaller than type I), gripping-areas on barrel checkered (cross-hatched) for cocking, 1908 patent dates on left side; "WARNER ARMS CO." usually marked on the right side, black moulded rubber grips, serial numbers usually on the frame backstrap.

Manufacturer

- "A.W. Schwarzlose G.m.b.H. Berlin" is marked on the left side of the slide.
- manufactured from 1908 to 1911 by Andreas Wilhelm Schwarzlose GMBH in Berlin.
- in 1912 Schwarzlose sold all remaining stock of the 1908 pistols to Warner Arms Corporation of Brooklyn, NY; it is uncertain whether Warner Arms Corporation manufactured the 1908 or simply assembled complete pistols from German-made parts.
- the model 1908 was widely distributed and may be found with the names of British or South American Importers in addition to Warner Arms Corp of the USA.

Action

- "blow-forward" barrel assembly operating mechanism.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- early firearms reported to be marked with internal serial numbers only, or no serial numbers. - serial numbering of types believed to be independent. (note: type I reported with s/n 18 to 6489; type II reported with s/n 1148 to 1338; type III reported with s/n 245 to 1693) - type I: external serial numbers on the right side of the frame, or on the right side of the grip safety. - type II & II: the serial number locations on the frame backstrap of type II, are slightly different from type III.
Shots	- detachable box magazine.
Other Markings	- some are also marked with patent dates on the left side of the frame (in block caps): PAT'D APR. 13 AND AUG 14 1908

Notes

Make

- "SCORE" is marked on the receiver/frame.
- "SCORE" is a tradename used on firearms imported and distributed by Prairie Shot Limited of Carberry, Manitoba, Canada.

Model

- introduced in 2010.
- model designation is not marked on the firearm.
- features include: round barrel with fibre optic front sight; solid top receiver/frame with right side ejection and bottom loading ports; cross bolt safety mount on the rear of the trigger guard; action release located on the left front side of the trigger guard; black synthetic grooved forearm and a standard fixed checkered pistol grip buttstock with butt pad or a checkered pistol grip only; sling swivels; matte black finish.
- overall length with a 356 mm (14.0") barrel and pistol grip only is 616 mm (24 1/4").
- overall length with a 356 mm (14.0") barrel and a standard fixed pistol grip buttstock is 876 mm (34 1/2").

Manufacturer

- manufacturer's name is not marked on the firearm.
- "MADE IN TURKEY" is usually marked on the side of the barrel.

Serial Number

- serial number is marked on the right side of the receiver/frame.
- observed serial number consisted of four or six numbers without a letter prefix or suffix.

Shots

- tubular magazine mounted under the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- this firearm is normally Non-Restricted unless affected by the following conditions:

1) by combining a barrel from a licensed firearms manufacture that is less than 406mm (16.0") in length and a receiver/frame fitted with a pistol grip only, this firearm may be deemed a "handgun" and therefore "RESTRICTED" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (a) of the Criminal Code of Canada.
- "handgun" means a firearm that is designed, altered or intended to be aimed and fired by the action of one hand, whether or not it has been redesigned or subsequently altered to be aimed and fired by the action of both hands.

2) "a firearm that is designed or adapted to be fired when reduced to a length of less than 660 mm by folding, telescoping or otherwise" and therefore "Restricted" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (c) of the Criminal Code of Canada.

3) by combining a barrel that has been altered to less than 457mm (18.0") in length by a non-licensed firearms manufacturer (cottage industry, individual or gunsmith) regardless of whether the shotgun has a pistol grip or conventional stock, this firearm is "PROHIBITED" and subject to the definition of a "prohibited firearm" in Part III/Firearms and Other Weapons of Section 84 of the Criminal Code of Canada.
- "prohibited firearm" means a firearm that is adapted from a rifle or shotgun, whether by sawing, cutting or any other alteration, and that, as so adapted,
(i) is less than 660 mm in length, or
(ii) is 660mm or greater in length and has a barrel less than 457 mm in length.

Notes

Make

- known example was marked on the left side of the receiver/frame as, "W.& C.Scott & Son Prize Sporting Rifle No. 2 1880 Makers London" in an arc style.

Model

- model designation is marked on the left side of the receiver/frame as, "Prize Sporting Rifle No. 2".
- observed example of this rifle was marked with the date of 1880 on the left side of the receiver/frame; production of this type of firearm would have ranged from circa 1877 to the early 1890's.
- known example was also marked on the left side of the receiver/frame as, "FIELD'S PATENT" over "No. 1927" over "1877" over "Pat. U.S.A. Feb. 5, 1878".
- William Field's Patent No. 1927 of May 1877 is for a single shot action with either a Martini-type lever operated, rear hinged, front tipping breech block design, or a Farquharson-type lever operated vertical dropping/falling block design.
- Field's Patent No 1927 is characterized by a right side mounted operating lever on the receiver/frame which was moved forward to lower the breech block, cock the action and actuate the extractor at the end of the opening stroke; pulling back on the lever closed the action.
- features include: this is a single shot rifle utilizing a side lever operated, rear hinged, front tipping, Martini-type action; side lever is on the right side of the receiver/frame; hammerless; checkered hardwood full pistol grip stock.
- Field's Patent No 1927 firearms were also produced with exposed hammers.

Manufacturer

- known example was marked on the left side of the receiver/frame as, "W.&C.Scott & Son Prize Sporting Rifle No. 2 1880 Makers London" in an arc style.

Action

- side lever operated, rear hinged, front tipping breech block, Martini-type action

Serial Number

- known example had a three digit number without prefix or suffix marked on the underside of the barrel.

Notes

Make

- "W&C SCOTT & SON LONDON" or a variation thereof is marked on the top of the barrel.
- the front left side of the receiver/frame will also be marked with the W&C Scott "flying pennant" trademark symbol consisting of an upright oval within which is a castle tower from which a flag/pennant is flying.

Model

- "THE" over "SCOTT" is marked on the top strap of the receiver/frame.
- this model line, which closely resembles the typical "British Bull Dog" type of revolver, was introduced in the late 1870's; there is no indication that production of this firearm lasted beyond 1897 when W&C Scott & Son merged with the firm of P.Webley & Son.
- features include: solid receiver/frame, double action trigger, exposed hammer; usually unfluted cylinder with rear locking recesses; ovate barrel with blade front sight; ejector rod housed in the cylinder axis pin and swings to the right for unloading the cylinder chambers; loading gate may swing out to the right or backwards; nickel or blued finish.
- British proof marks are apparent on the barrel, cylinder and or receiver/frame.
- the word "STEEL" may be marked on the cylinder.

Manufacturer

- "W&C SCOTT & SON LONDON" or a variation thereof is marked on the top of the barrel.
- the front left side of the receiver/frame will also be marked with the W&C Scott "flying pennant" trademark symbol consisting of an upright oval within which is a castle tower from which a flag/pennant is flying.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "W & C Scott" or "W & C Scott & Son" may be marked on the firearm. - "W. & C. Scott & Son" was also a tradename used by "Webley & Scott, Limited" from 1897 to 1939.
Model	- model designation is not marked on the firearm. - this is a generic entry to encompass those side by side shotguns produced by "W. & C. Scott & Son" that do not display the model designation. - manufactured between 1865 and 1897. - features include: side by side barrel configuration; Damascus or fluid steel barrels; hinged receiver/frame with break open lever mounted on the top, side, bottom of the frame/receiver or on the trigger guard; side or box locks; exposed hammers or hammerless; single or double triggers; with or without tang mounted safety; extractors or ejectors; plain or pistol grip buttstock; various grades of finish. - hammer shotguns were manufactured from 1865 to 1897. - hammerless shotguns were manufactured from 1874 to 1897. - this breech loaded model of shotgun was available as a centre-fire, pin-fire or interchangeable pin-fire/centre-fire. - some of these hammerless shotguns may also be marked "Patent Crystal Indicator" on each lock plate. This was a Scott & Son patented feature, whereby a 'crystal' or round clear glass was installed in the side of each lock plate so the shooter could determine if the action was cocked.
Manufacturer	- manufacturer's name is marked on the firearm and may also display the trademark of a castle tower with a flag on top, inside an oval.
Serial Number	- serial number is located on the water table. - serial number range from 1 to approximately 58,000 or 59,000. - serial numbers above 59,000 were manufactured by Webley & Scott. - serial number range for shotguns manufactured by Webley & Scott is from 59,000 to approximately 728,000.
Barrel	- barrel length were available from 699 mm to 914 mm.
Calibre	- chamber length were normally 2 1/2" or 2 3/4".
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "W. & C. Scott" or "W. & C. Scott & Son" or "W. & C. Scott & Sons" is marked on the firearm.

Model

- model designation is not marked on the firearm.
- manufactured from 1860 to 1890.
- this is a multi-barrel; muzzle loaded; percussion shotgun.
- these percussion shotguns were manufactured in game and wildfoul versions.
- wildfowl guns were in calibres from 4 gauge to 12 gauge and game guns were in calibres 12 and 14 gauge.
- features include: side by side barrel configuration; back or bar action side locks; external side mounted hammers; double triggers; straight buttstock; various grades of finish.

Manufacturer

- manufacturer's name is marked on the firearm and may also be marked with the trademark of a castle tower with a flag on top, inside an oval.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- side by side barrel configuration.
Serial Number	- most of the percussion shotguns were not assigned serial numbers. - serial number range for all W. & C. Scott & Son's manufactured double guns was from 1 to approximately 58,000 or 59,000.
Canadian Law Comments	- Some examples of this model, when manufactured prior to 1898 may be considered Antique in Canada.

Notes

Make

- "SCOTTI" is marked on the top of the receiver/frame.
- designed by Alfredo Scotti of Brescia, Italy.

Model

- the model may or may not be marked on the firearm.
- this is an enlarged version of the Scotti 12.7mm machine gun, chambered for the 20mm Solothurn cartridge for use as an anti-aircraft cannon; this cannon could be seen in belt-fed or drum-fed versions, but was most often seen in a strip-fed version on a pintle mount with ring sights.
- features include: blued finish; cone-shaped flash-hider; and under-barrel gas/piston tube; a slotted barrel shroud forward of the receiver proper; either a free-swinging or hand wheel-operated traversing/elevating mechanism; and various forms of sights.

Manufacturer

- "ISOTA" over "FRASCHINI" is marked on the top of the receiver/frame.
- Isota Fraschini manufactured automobiles and aircraft engines and was eventually taken over by Oerlikon of Switzerland.

Action

- gas operated.

Serial Number

- serial numbered on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - this cannon could be seen in strip-fed (12 rounds), drum-fed (60 rounds) or belt-fed versions.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
25799 - 1	32 S&W	5	80	Prohibited CC 84(1) "prohibited firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "J.N.SCOTTS SAFETY HAMMERLESS" over "PAT.JAN. 24, 1888.OCT 29 1889" is marked on the top of the barrel of a referenced example.

Model

- model is not marked on the firearm.
- "Pat. Jan. 24, 1888 Oct. 29, 1889" is marked on the topstrap.
- this is an unusual nickel plated, brass-framed double-action-only revolver made under patents issued to John T. Smith of Rockfall, Connecticut.
- one-piece receiver/frame and barrel made entirely of brass, with a fluted steel cylinder, nickel-plated finish, loading groove on the right side of the receiver/frame, and a cylinder stop/catch mounted in the top-strap that can be depressed to free the cylinder for loading and unloading.
- these revolvers were built for various distributors by Otis A. Smith, of Rockfall, Connecticut, but most often bear no manufacturers' marks.
- a smaller-framed 22-calibre version of this revolver, known as the model 1892, was also built using the same patents, only with an iron receiver/frame and barrel.

Manufacturer

- manufacturer is not marked on the firearm.

Serial Number

- serial number is marked on the bottom of the grip.

Notes

Make

- "SEAM" is usually moulded into a medallion inset into the grip plates.
- "SEAM" is the abbreviation for "Fabrica de Armas de Sociedad Espanol de Armas y Municiones" of Eibar, Spain.

Model

- "Automatic Pistol Cal 6.35" over "SILESIA" is marked on the left side of the slide.
- this is a typical Spainish/Eibar-type copy of the Browning 1906 semi-automatic pistol.
- blowback operated, detachable box magazine.
- features include: heel type magazine release; sighting groove on the top of the slide; straight grasping grooves on the rear of the slide; lever type safety located on the left side of the receiver/frame in front of the grips; checkered plastic grip pannels.

Manufacturer

- Fabrica de Armas de Sociedad Espanol de Armas y Municiones (SEAM) was in business from 1924 to 1939.

Action

- blowback operated.

Serial Number

- serial number is located on the receiver/frame.
- example reported had a three digit number without prefix or suffix.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- may be marked on the left of the slide: "AUTOMATIC PISTOL" followed by the calibre.
- usually Spanish proof marks on the receiver/frame and/or on the slide.

Notes

Make

- "SEARS" and/or "SEARS, ROEBUCK & CO." or "SEARS, ROEBUCK & COMPANY", or "SEARS ROEBUCK AND CO." or "SEARS, ROEBUCK AND CO." are usually marked on the barrel or receive/frame.

- "SEARS" trade name/trademark has been used by "Sears Canada Incorporated", "Sears, Roebuck and Company" and "Simpson-Sears Limited".

- Sears, Roebuck and Company was founded in 1893 in Chicago, Illinois, U.S.A.
- Sears, Roebuck and Company has contracted with various manufacturers to produce firearms for sale under various trade names such as:
- "A.J. Aubrey" was used from 1893 to 1918 and were manufactured by Meriden Arms Company.
- "Ranger" was used from 1925 to 1945.
- "J.C. Higgins" was used from 1946 to 1962.
- "Sears" and "Ted Williams" was used after 1962.

- "Sears" products have been manufactured by the following companies: Aguirre y Aranzabal (AYA), Companhia Brasileira de Cartuchos (CBC), Crosman Air Guns, Fabrique Nationale Herstal (FN), Harrington & Richardson, High Standard, Hunter Arms, Husqvarna, Ithaca, Laurona, Manufacture d'Armes des Pyrenees, Marlin, Meriden Arms, Miroku, Mossberg, Remington, Sako, Savage, Stevens, Universal, Voere, Winchester, and Zoli.

- Simpson-Sears Limited was a partnership between Robert Simpson Company of Toronto, Ontario, Canada and Sears, Roebuck & Company of Chicago, Illinois, U.S.A..
- Simpson-Sears Limited was established in September of 1952.
- Simpson-Sears Limited first store opened in Stratford, Ontario, Canada in 1953.
- Simpson-Sears Limited became Sears Canada Incorporated in 1984.

Model

- "Sears" and "Mod: 1" and "Sears, Roebuck and Co." and "Mod. No. 273.27010" and "Made in U.S.A." may be marked on the barrel.
- this is a "Winchester Model 121" sold under the Sears tradename and model designation.
- features include: round barrel; fixed sights; one piece pistol grip stock.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- manufacturer is not marked on the firearm.
Action	- turn bolt action.
Serial Number	- may not be numbered. - Note: the number "27327010" is a "Sears Roebuck & Company catalog number.
Calibre	- calibre designation is marked on the barrel. eg. "22 S, L or L.R."

Make

- "SEARS" and/or "SEARS, ROEBUCK & CO." or "SEARS, ROEBUCK & COMPANY", or "SEARS ROEBUCK AND CO." or "SEARS, ROEBUCK AND CO." are usually marked on the barrel or receive/frame.

- "SEARS" trade name/trademark has been used by "Sears Canada Incorporated", "Sears, Roebuck and Company" and "Simpson-Sears Limited".

- Sears, Roebuck and Company was founded in 1893 in Chicago, Illinois, U.S.A.
- Sears, Roebuck and Company has contracted with various manufacturers to produce firearms for sale under various trade names such as:
- "A.J. Aubrey" was used from 1893 to 1918 and were manufactured by Meriden Arms Company.
- "Ranger" was used from 1925 to 1945.
- "J.C. Higgins" was used from 1946 to 1962.
- "Sears" and "Ted Williams" was used after 1962.

- "Sears" products have been manufactured by the following companies: Aguirre y Aranzabal (AYA), Companhia Brasileira de Cartuchos (CBC), Crosman Air Guns, Fabrique Nationale Herstal (FN), Harrington & Richardson, High Standard, Hunter Arms, Husqvarna, Ithaca, Laurona, Manufacture d'Armes des Pyrenees, Marlin, Meriden Arms, Miroku, Mossberg, Remington, Sako, Savage, Stevens, Universal, Voere, Winchester, and Zoli.

- Simpson-Sears Limited was a partnership between Robert Simpson Company of Toronto, Ontario, Canada and Sears, Roebuck & Company of Chicago, Illinois, U.S.A..
- Simpson-Sears Limited was established in September of 1952.
- Simpson-Sears Limited first store opened in Stratford, Ontario, Canada in 1953.
- Simpson-Sears Limited became Sears Canada Incorporated in 1984.

Model

- manufactured from 1929 to 1981.

Serial Number

- firearms may or may not be numbered before 1968.

Remarks

- Case hardened frame, automatic ejector and a visible spurred hammer. Tang mounted breech opening lever. A varnished, pistol grip, walnut stock (later models have checkering) with rubber butt plate and forearm with metal joint. Has a full choke barrel. Same as the Stevens 94 with some possible internal and/or external modifications. Made for Sears.

Firearm Reference Number (FRN): 2367
Make: Sears
Model: 103.720

Summary

Make:	Sears
Model:	103.720
Manufacturer:	Marlin Firearms
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
2367 - 1	410 GA X 3"	1	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SEARS" and/or "SEARS, ROEBUCK & CO." or "SEARS, ROEBUCK & COMPANY", or "SEARS ROEBUCK AND CO." or "SEARS, ROEBUCK AND CO." are usually marked on the barrel or receive/frame.

- "SEARS" trade name/trademark has been used by "Sears Canada Incorporated", "Sears, Roebuck and Company" and "Simpson-Sears Limited".

- Sears, Roebuck and Company was founded in 1893 in Chicago, Illinois, U.S.A.
- Sears, Roebuck and Company has contracted with various manufacturers to produce firearms for sale under various trade names such as:
- "A.J. Aubrey" was used from 1893 to 1918 and were manufactured by Meriden Arms Company.
- "Ranger" was used from 1925 to 1945.
- "J.C. Higgins" was used from 1946 to 1962.
- "Sears" and "Ted Williams" was used after 1962.

- "Sears" products have been manufactured by the following companies: Aguirre y Aranzabal (AYA), Companhia Brasileira de Cartuchos (CBC), Crosman Air Guns, Fabrique Nationale Herstal (FN), Harrington & Richardson, High Standard, Hunter Arms, Husqvarna, Ithaca, Laurona, Manufacture d'Armes des Pyrenees, Marlin, Meriden Arms, Miroku, Mossberg, Remington, Sako, Savage, Stevens, Universal, Voere, Winchester, and Zoli.

- Simpson-Sears Limited was a partnership between Robert Simpson Company of Toronto, Ontario, Canada and Sears, Roebuck & Company of Chicago, Illinois, U.S.A..
- Simpson-Sears Limited was established in September of 1952.
- Simpson-Sears Limited first store opened in Stratford, Ontario, Canada in 1953.
- Simpson-Sears Limited became Sears Canada Incorporated in 1984.

Model

- manufactured from 1959 to 1965 with model designation marked on barrel.

Manufacturer

- contract built by Marlin for Sears, Roebuck & Company for retail "in store" sales and catalogue sales.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- bolt operated.
Barrel	- round, light full choke, plain.
Remarks	- Centre fire, sporting, pistol grip, takedown, bolt operated, self cocking, single shot, one piece birch stock and forearm, thumb safety, at right rear side of receiver. This is a contract firearm manufactured for Sears & Roebuck and is the Marlin Model 59.

Notes

Make

- "SEARS" and/or "SEARS, ROEBUCK & CO." or "SEARS, ROEBUCK & COMPANY", or "SEARS ROEBUCK AND CO." or "SEARS, ROEBUCK AND CO." are usually marked on the barrel or receive/frame.

- "SEARS" trade name/trademark has been used by "Sears Canada Incorporated", "Sears, Roebuck and Company" and "Simpson-Sears Limited".

- Sears, Roebuck and Company was founded in 1893 in Chicago, Illinois, U.S.A.
- Sears, Roebuck and Company has contracted with various manufacturers to produce firearms for sale under various trade names such as:
- "A.J. Aubrey" was used from 1893 to 1918 and were manufactured by Meriden Arms Company.
- "Ranger" was used from 1925 to 1945.
- "J.C. Higgins" was used from 1946 to 1962.
- "Sears" and "Ted Williams" was used after 1962.

- "Sears" products have been manufactured by the following companies: Aguirre y Aranzabal (AYA), Companhia Brasileira de Cartuchos (CBC), Crosman Air Guns, Fabrique Nationale Herstal (FN), Harrington & Richardson, High Standard, Hunter Arms, Husqvarna, Ithaca, Laurona, Manufacture d'Armes des Pyrenees, Marlin, Meriden Arms, Miroku, Mossberg, Remington, Sako, Savage, Stevens, Universal, Voere, Winchester, and Zoli.

- Simpson-Sears Limited was a partnership between Robert Simpson Company of Toronto, Ontario, Canada and Sears, Roebuck & Company of Chicago, Illinois, U.S.A..
- Simpson-Sears Limited was established in September of 1952.
- Simpson-Sears Limited first store opened in Stratford, Ontario, Canada in 1953.
- Simpson-Sears Limited became Sears Canada Incorporated in 1984.

Model

- "MODEL 200" is marked on the left side of the barrel.
- "M-200" is marked on the left side of the receiver/frame.
- this is a Winchester Model 1200 pump action shotgun sold under the Sears name.
- contract number located on left side of barrel.
- features include:
- blue alloy receiver/frame, slide action, hammerless, take down.
- front locking rotary bolt, cross bolt safety and slide release lever on left rear of trigger group.
- tubular magazine, hardwood stock and forearm, recoil pad.
- as these shotguns were manufactured in various job lots, overall appearance may vary somewhat as the manufacturer Winchester made design refinements to the parent Model 1200.

Manufacturer

- manufacturer's designation not marked on the firearm.
- contract built by Winchester for retail sale by Sears.

Serial Number

- serial numbers on observed examples were marked on the left side of the receiver/frame and/or on the underside of the receiver/frame.
- may have a letter prefix.
- Sears contract number may be marked on the barrel, this is not the serial number.

Calibre

- calibre is marked on the barrel.

Shots

- factory installed magazine plug limits capacity to two cartridges

Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
121279 - 1	12 GA X 3"	4	711	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "SEARS" and/or "SEARS, ROEBUCK & CO." or "SEARS, ROEBUCK & COMPANY", or "SEARS ROEBUCK AND CO." or "SEARS, ROEBUCK AND CO." are usually marked on the barrel or receive/frame.

- "SEARS" trade name/trademark has been used by "Sears Canada Incorporated", "Sears, Roebuck and Company" and "Simpson-Sears Limited".

- Sears, Roebuck and Company was founded in 1893 in Chicago, Illinois, U.S.A.
- Sears, Roebuck and Company has contracted with various manufacturers to produce firearms for sale under various trade names such as:
- "A.J. Aubrey" was used from 1893 to 1918 and were manufactured by Meriden Arms Company.
- "Ranger" was used from 1925 to 1945.
- "J.C. Higgins" was used from 1946 to 1962.
- "Sears" and "Ted Williams" was used after 1962.

- "Sears" products have been manufactured by the following companies: Aguirre y Aranzabal (AYA), Companhia Brasileira de Cartuchos (CBC), Crosman Air Guns, Fabrique Nationale Herstal (FN), Harrington & Richardson, High Standard, Hunter Arms, Husqvarna, Ithaca, Laurona, Manufacture d'Armes des Pyrenees, Marlin, Meriden Arms, Miroku, Mossberg, Remington, Sako, Savage, Stevens, Universal, Voere, Winchester, and Zoli.

- Simpson-Sears Limited was a partnership between Robert Simpson Company of Toronto, Ontario, Canada and Sears, Roebuck & Company of Chicago, Illinois, U.S.A..
- Simpson-Sears Limited was established in September of 1952.
- Simpson-Sears Limited first store opened in Stratford, Ontario, Canada in 1953.
- Simpson-Sears Limited became Sears Canada Incorporated in 1984.

Model

- "SLUG MODEL 446.511761" is marked on the underside of the receiver/frame in front of the loading port.
- features include: hardwood pistol grip stock with forend; rubber butt pad; thumb operated safety; double slide bar; tubular feed magazine mounted under the barrel.

Manufacturer

- this shotgun was manufactured for Sears Roebuck by Mossberg and marketed as the Sears Slug Model 446.511761.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- manually operated, pump action, repeating shotgun.
Serial Number	- the serial number is marked on the left side of the receiver/frame. - observed serial number sequences have consisted of six numbers with an "H" prefix and no suffix. - serial number rationalization is unknown.
Barrel	- barrel length is indicated in inches on the barrel ie. "28 INCH MODIFIED CHOKE".
Calibre	- CHAMBERED FOR 2 3/4 AND 3 IN. SHELLS - 12 GA. - 28 INCH MODIFIED CHOKE - MADE IN U.S.A." is marked on the barrel.
Shots	- tubular magazine mounted under the barrel.
Other Markings	- "MADE IN U.S.A." is marked on the underside of the receiver/frame in front of the loading port.

- Sears, Roebuck and Company was founded in 1893 in Chicago, Illinois, U.S.A.
- Sears, Roebuck and Company has contracted with various manufacturers to produce firearms for sale under various trade names such as:
- "A.J. Aubrey" was used from 1893 to 1918 and were manufactured by Meriden Arms Company.
- "Ranger" was used from 1925 to 1945.
- "J.C. Higgins" was used from 1946 to 1962.
- "Sears" and "Ted Williams" was used after 1962.

- "Sears" products have been manufactured by the following companies: Aguirre y Aranzabal (AYA), Companhia Brasileira de Cartuchos (CBC), Crosman Air Guns, Fabrique Nationale Herstal (FN), Harrington & Richardson, High Standard, Hunter Arms, Husqvarna, Ithaca, Laurona, Manufacture d'Armes des Pyrenees, Marlin, Meriden Arms, Miroku, Mossberg, Remington, Sako, Savage, Stevens, Universal, Voere, Winchester, and Zoli.

- Simpson-Sears Limited was a partnership between Robert Simpson Company of Toronto, Ontario, Canada and Sears, Roebuck & Company of Chicago, Illinois, U.S.A..
- Simpson-Sears Limited was established in September of 1952.
- Simpson-Sears Limited first store opened in Stratford, Ontario, Canada in 1953.
- Simpson-Sears Limited became Sears Canada Incorporated in 1984.

Model

- known example marked "MODEL 80" on the rear of the barrel.
- this firearm appears to be very similar to the Lakefield Model 64B semi-automatic rifle.
- right side ejection, bolt hold open device.
- one piece hardwood Monte Carlo type stock with pistol grip and plastic buttplate.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- blowback operated.
Serial Number	- known example had a six digit number with double letter prefix marked on the left side of the receiver/frame; the prefix "TT" has been observed.
Calibre	- known example had the calibre designation marked on the rear of the barrel, eg., "Cal .22 LR Only".
Shots	- detachable box magazine.

Notes

Make

- the make is not marked on the firearm.
- "S" in a circle is marked on the grip panels.

Model

- "BABY HAMMERLESS" may be marked on the top strap of the receiver/frame.
- this model is based on the Henry Kolb & Company's Baby Hammerless model.
- manufactured by Sedgley circa 1916 to 1938.
- features include: ovate barrel with half-moon front and no rear sight; solid receiver/frame; semi-fluted cylinder; internal hammer; folding, double action trigger mechanism; external loading gate or removable cylinder axis pin for loading; square butt; rubber grips; nickel or blued finish.

Manufacturer

- Sedgley was a manufacturer located in Philadelphia, Pennsylvania, USA from 1916 to 1938.

Serial Number

- serial number is located on the left side of the grip frame under the grip.

Remarks

- the "Baby Hammerless" and the "New Baby" models were the smallest American double action revolver originally produced under the patents of Charles Foehl and Charles Weeks. This firearm was manufactured by the "Columbian Firearms Manufacturing Company" between 1896 and 1897, by "Henry M. Kolb" between 1897 and 1916 and by "Reginald F. Sedgley" between 1916 and 1938. All three manufacturers were located in Philadelphia, Pennsylvania.

Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
24909 - 1	22 SHORT	6	35	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is marked on the grips, company logo was the letter "S".

Model

- model marked on the top strap of the receiver/frame.
- may be marked in three lines: "Pat Apr 05, 10", "Baby Hammerless", and "Model 1916".
- this is a solid frame revolver with fixed cylinder and no ejector, concealed hammer, double action trigger mechanism, folding trigger, and black grip plates.

Manufacturer

- "R.F. Sedgley & Company" was a manufacturer located in Philadelphia, Pennsylvania, USA from 1930 to 1938.
- "R.F. Sedgley" was a partner in the "Henry Kolb & Company" from 1912 to 1930, he succeeded Henry Kolb in the manufacture of miniature revolvers of the European "Puppy" type.

Serial Number

- the serial number is located under the grip plate on the right side of the back strap.

Other Markings

- observed markings in three lines: "PAT.4.5.10-2.13.17" over "BABY HAMMERLESS" over "MODEL 1916"

Remarks

- the "Baby Hammerless" and the "New Baby" models were the smallest American double action revolver, originally produced under the patents of Charles Foehl and Charles Weeks. These firearms were manufactured by the:
- "Columbian Firearms Manufacturing Company" between 1896 and 1897,
- "Henry Kolb & Company" which consisted of the partners "Henry M. Kolb & Charles Foehl" between 1897 and 1912, and "Henry M. Kolb & Reginald F. Sedgley" between 1912 and 1930, and
- "R. F. Sedgley & Company" from 1930 to 1938.

All of these manufacturers were located in Philadelphia, Pennsylvania.

Notes

Make	- "R.F. Sedgley Inc. Phila, PA USA" may be marked on top of the barrel.
Model	- "Mannlicher Style Sporter" is not marked on the firearm. - the " Mannlicher Style Sporter" rifles were built, pre-World War II, on reclaimed military "low numbered" 1903 Springfield receiver/frames, which were annealed, the markings removed, and reheat-treated; barrels were typically by Winchester. - the checkered pistol-gripped full-length (extends to the muzzle) Mannlicher style stock was of plain or fancy imported walnut with steel nose-capped forend, with or without raised cheek-piece, checkered steel buttplate, rubber pistolgrip cap, and a blued barrel-band that passed through the forend an served as a sling-swivel stud. - a "Springfield Sporter" also exists that features a traditional style sporting stock. - matted ramp hooded blade with gold or ivory bead front-sight, receiver mounted Lyman No. 48 micrometer adjustable aperture rear-sight. - the polished receiver was matted on top of the front ring, and bright blued along with the barrel.
Manufacturer	- "R.F. Sedgley Inc. Phila, PA USA" may be marked on top of the barrel.
Action	- remanufactured 1903 Springfield receiver/frames to short right-handed actions (reduced length one inch/26MM)) for short cartridges. - also remanufactured 1903 Springfield receiver/frames for left handed use.
Serial Number	- the firearm may, or may not have serial numbers. - the serial number may be marked on the front receiver ring.
Calibre	- marked on the breech-end of the barrel, example: CAL 30'06" - made in many other calibers upon request.
Shots	- integral non-detachable box magazine.
Remarks	- "low numbered" 1903 Springfield receiver/frames are: the first 800,000 by Springfield Armory, and 285,507 Rock Island Arsenals.

Notes

Make

- "SEEKINS PRECISION" is marked on the right side of the receiver/frame.
- "SEEKINS PRECISION" is located in Lewiston, Idaho, U.S.A.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "HAVAK" is marked on the left side of the receiver/frame.
- "ELEMENT" in smaller fount is also marked on the left side of the receiver/frame.
- "HAVAK ELEMENT" is a custom rifle, built to be an ultra-light-weight hunting rifle.
- "HAVAK ELEMENT" receiver/frame is made of aluminium alloy with a steel insert in the front ring.
- features include: no sights; threaded for muzzle attachment; rifled barrel with spiral flutes; one piece optical rail; integrated level bubble at the rear of the optical base; receiver/frame of aluminium alloy with a steel insert in the front ring; aluminium alloy bolt body with spiral flutes and steel bolt head; bolt release lever is located on the rear, left side of the receiver/frame; magazine catch is located inside the trigger guard; carbon fiber, detachable box magazine; one piece synthetic, carbon composite stock with pistol grip;
- average weight is 2.49kg (5.5 lbs), with a 533 mm (21") barrel.

- "HAVAK" is marked on the left side of the receiver with a stylized font using antlers as a V.
- "ELEMENT" in smaller, stylized font is marked on the left side of the receiver/frame.

- "HAVAK ELEMENT" is a custom rifle, built to be an ultra-light-weight hunting rifle.

- Features include: accessory on top of receiver; integrated level bubble at the rear of the optical base; receiver/frame of aluminium alloy with a steel insert in the front ring; aluminium alloy bolt body with spiral flutes and steel bolt head; bolt release lever is located on the rear, left side of the receiver/frame; magazine catch is located inside the trigger guard.
- Average weight is 2.49kg (5.5 lbs), with a 533 mm (21") barrel.

Manufacturer

- "SEEKINS PRECISION" is marked on the right side of the receiver/frame.
- "SEEKINS PRECISION" is located in Lewiston, Idaho, U.S.A.
- "SEEKINS PRECISION" was founded in 2003 by Glen and Katie Seekins.
- "SEEKINS PRECISION" also manufactures AR15, precision rifles and accessories.

Action

- Turn bolt operated.

Serial Number

- The serial number is marked on the right side of the firearm.
- serial number of a referenced example consisted of five numbers.

Calibre

- The calibre designation is marked on the barrel.
- 6.5MM PRC rifling characteristics: 1 turn in 8 inches, right hand twist.
- Rifling characteristics in calibre 6MM CREEDMOOR: 5 grooves, 1 turn in 8 inches, right hand twist.
- Rifling characteristics in calibre 6.5MM CREEDMOOR: 5 grooves, 1 turn in 8 inches, right hand twist.
- Rifling characteristics in calibre 308WIN: 5 grooves, 1 turn in 11.25 inches, right hand twist.
- Rifling characteristics in calibre 28 NOSLER: 5 grooves, 1 turn in 8.6 inches, right hand twist.
- Rifling characteristics in calibre 300 WIN MAG: 5 grooves, 1 turn in 10 inches, right hand twist.
- Rifling characteristics in calibre 300 PRC: 5 grooves, 1 turn in 10 inches, right hand twist.

Shots

- Detachable box magazine.
- Short Action rifles use magazines designed for the AR10, except for actions chambered in 6.5 PRC, which uses a proprietary 3 shot, detachable magazine.
- Long Action rifles use a proprietary, 3 shot, detachable magazine.

Notes

Make

- "Seekins Precision" is marked in script on the left side of the receiver/frame.

Model

- "MOD-SP223" is marked on the right side of the receiver/frame.
- this is a pistol version of Seekins Precisions' "SP223" rifle, made with a 203mm barrel and a wrap-around "arm brace" on the buffer tube, allowing one-handed fire.
- "MOD-SP223" variations are based on the Colt AR-15/M16 design.
- "MOD-SP223" has a stylized receiver/frame having an elongated and curved front magazine housing horizontally grooved and machined recessed sides with the bottom back of the magazine housing having a upper curve connecting with a integral and oversize trigger guard making a wave line.
- features include: threaded muzzle for flash hider/muzzle brake; standard, low profile, Picatinny rail with flat-top gas block; Picatinny rail or standard ventilated handguard; may have a detachable carrying handle with adjustable rear sight, folding sights or optical sight; wrap-around arm brace on buffer tube; synthetic pistol grip.

Manufacturer

- "Seekins Precision" is marked in script on the left side of the receiver/frame.
- "Seekins Precision" is located in Lewiston Idaho U.S.A..
- "Seekins Precision" was founded in 2003 by Glen and Katie Seekins.
- "Seekins Precision" also manufactures AR15 and precision rifle accessories.

Notes

Make

- "SENECA ASPEN" is marked on the left side of the receiver/frame.
- "Seneca" is a trade mark used by Air Venturi since 2016.

Model

- "SENECA ASPEN" is marked on the left side of the receiver/frame.
- "ASPEN" is marked on both side of the stock.
- "Aspen" is a pre-charged pneumatic (PCP) design with built in pump.
- features include: no sights; round, rifled, and fully shrouded barrel; grooved receiver/frame for scope; right side of the receiver/frame cocking lever; manual safety button on the right side of the receiver/frame; firearm pressure adjusting knob on the left side of the receiver/frame; air tank reservoir under the barrel; one piece synthetic stock with a pump lever handle; and black finish.
- overall length with a 457mm (18") barrel is 1100mm (43.3") average weight is 3.63kg (8lbs).

Action

- pre-charged pneumatic (PCP) design with built in pump.
- discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Shots

- removable rotary magazine.
- single pellet tray also available.

Canadian Law Comments

- this firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada.
- if the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

- discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Other Markings

- "MADE IN CHINA" is marked on the left side of the receiver/frame.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
197924 - 1	50 PELLET	2	531	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
197924 - 2	50 SHOT	2	531	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SENECA" is marked on the right side of the receiver/frame.
- Trade name used by "Air Venturi" & "Sam Yang Precision Ind. Co.".

Model

- "DOUBLE SHOT" over "SHOTGUN" is marked on the side of the receiver/frame.
- The letter "O" in "Double Shot" are replaced by reticle images and look like standard sights.
- This is a versatile model which accepts multiple calibre variations based on hunter or competition needs. This firearm accepts the .50 Cal Pellet, the .50 Cal Shot (plastic container holding either #6 or #8 shot pellets), and the .50 Cal "Air Bolt" (arrow).
- Features include: double shot selector toggle to switch barrel choice from left or right; aluminum steel receiver/frame with right side cocking handle; safety toggle at the rear of the trigger guard; smooth, straight wood shoulder stock with smooth matching forend.
- Overall length with a 531 mm (20.9 inches) barrel is 1104.9 mm (43.5 inches), average weight is 3.88 kg (8.55 lbs).

Manufacturer

- "Made in Kores, SYC" is marked on the right side of the receiver/frame.
- Sam Yang Precision Inc. Co. is located in Korea.

Type

- This firearm offers the option to fire a .50 cal slug, .50 cal Air Bolt (arrow) or shot shells filled with lead shot sized #6 or #8.

Action

- Pre charged pneumatic.

Serial Number

- The serial number is marked on the right side of the receiver/frame.
- Observed serial number consisted of the following configuration: seven (7) numbers without letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- The calibre designation is usually marked on the barrel.
Canadian Law Comments	- Discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Notes

Make

- "SENSIED" is marked on the right side of the receiver/frame.
- "SENSIED" stands for "Sensied Consulting".
- "SENSIED" is a distributor located in Switzerland.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "S&F" in a logo form and "mod, K1" is marked on the right side of the receiver/frame. - "K1" is usually in a short barreled, pump action with folding stock configuration. - "K1" is built on a Fabarm Ergal 55 receiver/frame. - features include: blued, tapered, round, smooth bore barrel with accessory rail; elevated front sight bracket with protective ears; grooved, full length forend with two action bars and accessory rail; aluminum alloy receiver/frame; accessory railed receiver/frame; right side ejection port; action unlocking lever on the left side ahead of the trigger guard; ambidextrous, triangular shaped cross bolt safety located at the rear of the trigger guard; black synthetic furniture; pistol grip; side folding stock with interchangeable recoil pad; black or coloured finish. - overall length with a 280mm (11") barrel is 535mm (21") with the stock collapsed.
Manufacturer	- "FABARM may not be marked. - "MADE IN ITALY" is usually marked on the left side of the receiver/frame.
Serial Number	- serial number is marked on the right side of the receiver/frame. - serial number of a referenced example consisted of two letters and six numbers.
Calibre	- calibre designation is marked on the barrel.
Shots	- tubular magazine mounted under the barrel.
Canadian Law Comments	- this firearm is normally Non-Restricted unless affected by the following conditions: 1) by combining a barrel from a licensed firearms manufacture that is less than 406mm (16.0") in length and a receiver/frame fitted with a pistol grip only, this firearm may be deemed a "handgun" and therefore "RESTRICTED" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (a) of the Criminal Code of Canada. - "handgun" means a firearm that is designed, altered or intended to be aimed and fired by the action of one hand, whether or not it has been redesigned or subsequently altered to be aimed and fired by the action of both hands. 2) "a firearm that is designed or adapted to be fired when reduced to a length of less than 660 mm by folding, telescoping or otherwise" and therefore "Restricted" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (c) of the Criminal Code of Canada.

- observed serial number consisted of two letter prefix "SM" followed by six numbers.

Calibre

- calibre designation is usually marked on the barrel.

Shots

- detachable box magazine.

Canadian Law Comments

- this firearm is normally Non-Restricted unless affected by the following conditions:

1) by combining a barrel from a licensed firearms manufacture that is less than 406mm (16.0") in length and a receiver/frame fitted with a pistol grip only, this firearm may be deemed a "handgun" and therefore "RESTRICTED" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (a) of the Criminal Code of Canada.
- "handgun" means a firearm that is designed, altered or intended to be aimed and fired by the action of one hand, whether or not it has been redesigned or subsequently altered to be aimed and fired by the action of both hands.

2) "a firearm that is designed or adapted to be fired when reduced to a length of less than 660 mm by folding, telescoping or otherwise" and therefore "Restricted" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (c) of the Criminal Code of Canada.

3) by combining a barrel that has been altered to less than 457mm (18.0") in length by a non-licensed firearms manufacturer (cottage industry, individual or gunsmith) regardless of whether the shotgun has a pistol grip or conventional stock, this firearm is "PROHIBITED" and subject to the definition of a "prohibited firearm" in Part III/Firearms and Other Weapons of Section 84 of the Criminal Code of Canada.
- "prohibited firearm" means a firearm that is adapted from a rifle or shotgun, whether by sawing, cutting or any other alteration, and that, as so adapted,
(i) is less than 660 mm in length, or
(ii) is 660mm or greater in length and has a barrel less than 457 mm in length.

- "STORM T1" is a magazine tube feed, tactical series pump action shotgun.
- "STORM T1" was introduced in 2016.
- features include: short round tapered barrel with fixed blade front sight; shield with elongated holes covering the top of the barrel; scope rail mounted on top of the receiver/frame; right side ejection port; action unlocking lever on the left side ahead of the trigger guard; cross bolt safety located at the rear of the trigger guard; ribbed full length forend with a accessory rail; black synthetic furniture; collapsible or fixed stock with pistol grip; black finish.
- overall length with a 229mm (9") barrel is 680mm (26.75") with the stock collapsed.

Manufacturer

- M&U Silah was established in 1994.
- M&U Silah is located in Beysehir, Konya, Turkey.
- M&U Silah manufactures shotguns, airguns, and blank pistols.

Serial Number

- serial number is marked on the right side of the receiver/frame.
- observed serial number consisted of a two letter prefix "ST" followed by six numbers.

Calibre

- calibre designation is usually marked on the barrel.

Shots

- tubular magazine, located under the barrel.

Canadian Law Comments

- this firearm is normally Non-Restricted unless affected by the following conditions:

1) by combining a barrel from a licensed firearms manufacture that is less than 406mm (16.0") in length and a receiver/frame fitted with a pistol grip only, this firearm may be deemed a "handgun" and therefore "RESTRICTED" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (a) of the Criminal Code of Canada.
- "handgun" means a firearm that is designed, altered or intended to be aimed and fired by the action of one hand, whether or not it has been redesigned or subsequently altered to be aimed and fired by the action of both hands.

2) "a firearm that is designed or adapted to be fired when reduced to a length of less than 660 mm by folding, telescoping or otherwise" and therefore "Restricted" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (c) of the Criminal Code of Canada.

3) by combining a barrel that has been altered to less than 457mm (18.0") in length by a non-licensed firearms manufacturer (cottage industry, individual or gunsmith) regardless of whether the shotgun has a pistol grip or conventional stock, this firearm is "PROHIBITED" and subject to the definition of a "prohibited firearm" in Part III/Firearms and Other Weapons of Section 84 of the Criminal Code of Canada.
- "prohibited firearm" means a firearm that is adapted from a rifle or shotgun, whether by sawing, cutting or any other alteration, and that, as so adapted,
(i) is less than 660 mm in length, or
(ii) is 660mm or greater in length and has a barrel less than 457 mm in length.

Notes

Make

- "F.lli SERENA" is marked on a plate on the left side of the receiver/frame.

Model

- model designation is not marked on the firearm.
- "MOD. DEPOSITATO" is marked on a plate on the left side of the receiver/frame which when translated means "Registered Trademark".
- this is a single-shot sliding breech shotgun pistol with a screw-on/off detachable shoulder stock; fixed sights, die cast aluminium grip frame and a sliding breech mechanism that cocks the hammer as it is opened.
- this series of shotgun pistols have a cross-bolt breech locking mechanism that has to be pressed in from the left to open the action; as the breech reaches its furthest rearward travel, an automatic ejector pops up to eject the empty shell.

Manufacturer

- "F.lli SERENA" is marked on a plate on the left side of the receiver/frame.

Other Markings

- marked on the left side of the receiver/frame:
F.LLI SERENA
BRESCIA - ITALY
BREVETTATO - MOD. DEPOSITATO

Notes

Make

- "S.G.W." is marked on the left side of the receiver/frame.
- "S.G.W." is the abbreviation for "Schuetzen Gun Works".
- Schuetzen Gun Works was Olympic Arms' in-house "custom shop" during the 1980s; in 1990, Olympic Arms changed their receiver markings to the current "standing lion" marking, with no reference to SGW.

Model

- "MOD. CAR-AR" is marked on the left side of the magazine housing of the receiver/frame.
- "CAR15 AR" is of the design commonly known as the AR-15/M-16 rifle.
- "CAR15 AR" has a two piece receiver/frame.
- features may include: adjustable front sights; fixed carrying handle with adjustable rear sight; round barrel with flash hider/muzzle brake; AR15 style lower receiver/frame with an integral magazine well housing; synthetic forearm, pistol grip and a telescoping buttstock, black finish.
- this record is ONLY for "CAR15 AR"/"CAR-AR" rifles made at Olympic Arms' in-house custom division, known as "Schuetzen Gun Works"/"SGW", which bear "SGW" markings. Rifles made since circa 1990 will have Olympic Arms' Gothic "standing lion" crest on the magazine well.

Manufacturer

- "OLYMPIC ARMS" over "OLY WA USA" is marked on the left side of the receiver/frame.

Action

- gas operated.

Serial Number

- serial number is marked on the left side of the magazine housing of the receiver/frame.
- observed serial number consisted of a letter "Z" prefix and four numbers.

Calibre

- "CAL. 223 5.56" is marked on the left side of the magazine housing of the receiver/frame.

Shots

- detachable box magazine.

FRT Report

Firearm Reference Number (FRN): 199376
Make: Shadow Systems
Model: CR920P

Summary

Make:	Shadow Systems
Model:	CR920P
Manufacturer:	Shadow Systems LLC
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
199376 - 1	9MM LUGER	10	95	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	
199376 - 2	9MM LUGER	13	95	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- The make is marked on the right side of the receiver/frame.
- The company logo is marked on the firearm.
- The Shadow Systems Logo consists of a squared oval with a "+" reticle like overlay.

Model

- "CR920P" is marked on the left side of the firearm.
- Features include: removable compensator; slide serrations located at the front and rear of the slide; lightening cuts on both sides of the slide; trigger with integral safety mechanism; reversible magazine release located on the grip; slide lock is located on the left side of receiver/frame.

Manufacturer

- The manufacturer is marked on the right side of the receiver/frame.
- The company logo is marked on the firearm.
- The Shadow Systems Logo consists of a squared oval with a "+" reticle like overlay.

Action

- Recoil operated.

Serial Number

- The serial number is marked on the underside of the receiver/frame.

Barrel

- The barrel length does not include any attached device such as flash-hider or muzzle brake.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - Detachable box magazine housed in the grip.

Notes

Make

- The company logo is marked on the left side of the receiver/frame, the left side of the slide, and the right side of the barrel, visible through the ejection port.
- "MADE IN USA SHADOW SYSTEMS PLANO, TX" is marked on the right side of the receiver/frame.

Model

- The model designation is not marked on the receiver/frame.
- "MR920L" is marked on the left side of the slide.
- The MR920L uses the same compact receiver/frame as the MR920, but has a longer slide.
- Features may include: black or bronze barrel and thread protector; large gripping serrations on both sides and the top of the slide; lightening cut in slide, ahead of ejection port; accessory rail ahead of trigger guard; undercut and stepped trigger guard; magazine release on the left side of the frame, at the intersection of the trigger guard and the front strap; removeable extended magazine well; interchangeable backstraps; extended beavertail grip;

Manufacturer

- "MADE IN USA SHADOW SYSTEMS PLANO, TX" is marked on the right side of the receiver/frame.
- The company logo is marked on the left side of the receiver/frame, the left side of the slide, and the right side of the barrel, visible through the ejection port.

Action

- Blowback operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- The serial number is marked on the receiver/frame, ahead of the trigger guard. - Serial number of a referenced example consisted of three letters followed by six digits.
Calibre	- The calibre designation is marked on the barrel, visible through the ejection port.
Shots	- Detachable box magazine housed in the grip. - This firearm utilizes Glock style magazines.

Notes

Make

- "SHARMAN" is marked on the left side of the receiver/frame.

Model

- The model designation is not marked on the firearm.
- This is a single shot, screwbarrel pistol that is intended to be loaded from the breech end of the barrel and as such was originally supplied with a wrench to unscrew the barrel from the receiver/frame so that a lead ball and loose powder could be inserted into the chamber end of the barrel and then the barrel screwed back onto the receiver/frame.
- Features include: screw-on barrel with underlug for wrench; box lock action with top-mounted frizzen and cock; safety located behind the hammer; folding trigger; walnut bag grip.

Manufacturer

- "SHARMAN" is marked on the left side of the receiver/frame.
- "PETERBRO" is marked on the right side of the receiver/frame.
- "John Sharman" was located in Peterborough, Northants in Great Britain circa 1783--98.

Serial Number

- The serial number is not marked on the firearm.

Calibre

- The calibre designation is not marked on the firearm.

Other Markings

- Birmingham proof marks are marked on the receiver/frame.

FRT Report

Firearm Reference Number (FRN): 63242
Make: Sharps
Model: 1849

Summary

Make:	Sharps
Model:	1849
Manufacturer:	Nippes, A S
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
63242 - 1	36 PERCUSSION	1	762	Antique CC 84(1) "antique firearm"	Non-Commercial Customization	
63242 - 2	44 PERCUSSION	1	762	Antique CC 84(1) "antique firearm"	Non-Commercial Customization	

Notes

Make

- the make is not marked on the firearm; this is first model of breechloading percussion single shot rifle designed by Christian Sharps.

Model

- about 100 made circa 1850.
- marked "A.S. Nippes Mill Creek PA"
- this was the first rifle that Christian Sharps ever designed, though he had the actual rifles built for him by A.S. Nippes, of Mill Creek, Pennsylvania.
- sporting rifles for commercial sale were made in 36 PERCUSSION and 44 PERCUSSION, with unspecified barrel lengths (likely around 30"/762mm)
- colour-case-hardened receiver/frame, hammer, and sideplate, with brass buttplate, nosecap, and patchbox, blued barrel, and walnut stock and forearm; the buttstock on this model has a straight grip, but with an unusual "curve" in the wrist to bring the stock to the horizontal.
- this model has two main features that set it apart from later Sharps designs; an operating lever that is separate from the trigger guard, and an integral automatic priming mechanism attached to the right side of the receiver/frame. This automatic capper has a pivoting brass plate that can be swung up to load the mechanism with percussion caps, and it advances a cap to the firing position each time the rifle is cocked.

Manufacturer

- A.S. Nippes was a manufacturer based in Mill Creek, Pennsylvania, that specialized in manufacturing sporting long arms during the early-to-mid 1800s. They are best known for manufacturing two of Christian Sharps' (the inventor of the Sharps rifle) earliest designs.

Action

- lever operated falling (dropping) block design.
- percussion breechloader.

Serial Number

- numbered on receiver, from #1 up. Likely less than 100 examples produced.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel - other barrel lengths likely.

Notes

Make

- "Sharps Patent 1848" is marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "Sharps Patent 1848" is marked on the receiver/frame, "Maynard Patent 1845" is marked on the tape-priming cover, and "Manufactured by A.S. Nippes, Mill Creek, PA" on the barrel or side lock. - manufactured between 1850 and 1856. - this was the second rifle that Christian Sharps designed (a modification of the first, intended to be used with Maynard tape priming), though he had the actual rifles built for him by A.S. Nippes, of Mill Creek, Pennsylvania. - features include: octagonal or round/octagonal barrel; colour case-hardened receiver/frame; exposed side mounted hammer; curved, back-action lockplate; iron buttplate; primer patchbox; brass nosecap; blued barrel; walnut forearm and straight grip stock. - Note: this model has two main features that set it apart from later Sharps designs; an operating lever that is separate from the trigger guard, and an integral Maynard priming mechanism attached to the right side of the receiver. This held something similar to a roll of cap-gun caps, which was automatically advanced each time the hammer was cocked for the next shot. When the hammer struck one of these caps or "tape primers", the flash of the cap went through a modified nipple to fire the main charge.
Manufacturer	- "Manufactured by A.S. Nippes, Mill Creek, PA" is marked on the barrel or side lock. - "A.S. Nippes" was a manufacturer based in Mill Creek, Pennsylvania, that specialized in manufacturing sporting long arms during the early-to-mid 1800s and were best known for manufacturing two of Christian Sharps' (the inventor of the Sharps rifle) earliest designs.
Action	- lever operated falling (dropping) block design. - percussion breechloader.
Serial Number	- serial number is located on the receiver/frame. - serial number range from 1 to 200.

Notes

Make	- "C.SHARPS" may be marked on the tang of the receiver/frame.
Model	- model designation is not marked on the firearm. - manufactured between 1852 and 1855. - total production 1,857 units. - "C.SHARPS" "PATENT" "1848" may be marked on the receiver tang; "EDWARD MAYARD" "PATENTEE" "1845" may be marked on the primer door, and "ROBBINS" "&" "LAWRENCE" may be marked on the barrel. - features include: blued round or octagoanl barrel; exposed hammer; colour case hardened receiver/frame, hammer, and sideplate; brass buttplate and barrel band; straight walnut stock and forearm. - this was the third rifle that Christian Sharps designed, and the first to use a combination action lever/trigger guard. These rifles strongly resemble a Spencer Repeating Carbine, but without the pronounced "hump" at the bottom of the receiver/frame. - these rifles were made in both military and sporting versions. - this model has an integral Maynard priming mechanism attached to the right side of the receiver/frame. This held something similar to a roll of cap-gun caps, which was automatically advanced each time the hammer was cocked for the next shot. When the hammer struck one of these caps or "tape primers", the flash of the cap went through a modified nipple to fire the main charge.
Manufacturer	- manufacturer is marked on the firearm. - "Robbins & Lawrence" was located in Windsor, Vermont from 1850 to 1856. - the company was originally known as "Robbins, Kendall & Lawrence" from 1844 to 1849.
Action	- lever operated falling (dropping) block design. - percussion breechloader.
Serial Number	- serial numbered is located on the tang of receiverframe. - serial number range is from 1 to 1857.

Notes

Make

- "C.SHARPS" is marked on the tang of the receiver/frame.

Model

- model designation is not marked on the firearm.
- manufactured between 1852 and 1855.
- total production of 1,857 units.
- "C.SHARPS" "PATENT" "1848" is marked on the receiver tang; "EDWARD MAYARD" "PATENTEE" "1845" is marked on the primer door, and "SHARPS' RIFLE", "MANUFG. CO.", and "HARTFORD, CONN." is marked on the barrel.
- features include: blued octagonal or round barrel; exposed hammer; colour case-hardened receiver/frame, hammer, and sideplate; brass butt plate and barrel band; straight walnut stock and forearm.
- this was the third rifle that Christian Sharps designed, and the first to use a combination action lever/trigger-guard. These rifles strongly resemble a Spencer Repeating Carbine, but without the pronounced "hump" at the bottom of the receiver/frame.
- these rifles were made in both military and sporting versions.
- this model has an integral Maynard priming mechanism attached to the right side of the receiver/frame. This held something similar to a roll of cap-gun caps, which was automatically advanced each time the hammer was cocked for the next shot. When the hammer struck one of these caps or "tape primers", the flash of the cap went through a modified nipple to ignite the main charge.

Manufacturer

- "SHARPS' RIFLE", "MANUFG. CO.", and "HARTFORD, CONN." is marked on the barrel.

Action

- lever operated falling (dropping) block design.
- percussion breechloader.

Serial Number

- serial numbered is located on the tang of receiver/frame.
- serial number range is from 1 to 2,050.

Barrel

- barrel lengths were available from 457mm to 864mm, the most common lengths were 533mm and 686mm.

Calibre

- caliber may also be known as 32 bore = 52 PERCUSSION, 60 bore = 44 PERCUSSION, and 90 bore = 36 PERCUSSION.

Notes

Make

- "C. SHARPS PATENT 1848" is marked on the tang of the receiver/frame, and "C. SHARPS PATENT 1852" or "SHARPS' PATENT 1852" is marked on the lockplate.

Model

- "C. SHARPS PATENT 1852" or "SHARPS' PATENT 1852" is marked on the lockplate.
- manufactured between 1853 and 1855.
- this is the first production model of Christian Sharp's "slant-breech" percussion single-shot rifles, with a falling-block mechanism that has a marked rear-ward slant.
- versions of this rifle were made for both military and commercial sales, and the military versions will normally bear "US" property marks and inspector's stamps; additionally, some of these rifles saw British service, and may be seen with British proofs and property marks.
- sporting rifles for commercial sale were made in 36, 44, and 52 PERCUSSION.
-most of the US-issue carbines will have a sliding sling ring on a bar mounted on the left side of the piece, running from the breech to the barrel band.
- features include: case-hardened receiver/frame, hammer, and sideplate; with brass buttplate, barrel band, and patchbox; blued, round or octagonal barrel; walnut straight-grip stock and forearm.
- this model can also be identified by the presence of a bar-like retaining spring on the right side of the carbine, in the forearm and pointing back towards the receiver. This spring keeps the operating lever in place, but later versions of the Sharps rifles used internal springs to do the same thing.

Manufacturer

- "ROBBIN & LAWRENCE" is marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- lever operated falling (dropping) block design. - percussion breechloader.
Serial Number	- serial numbered is marked on the tang of the receiver/frame. - serial numbered range between 2,041 and 7,500.
Barrel	- barrel lengths were available from 457mm to 991mm, the most common lengths were 457mm, 533mm, 686mm, 711mm, 762mm, and 813mm.
Calibre	- caliber may also be known as 32 bore = 52 PERCUSSION, 60 bore = 44 PERCUSSION, and 90 bore = 36 PERCUSSION.

Notes

Make

- "Sharps" or "Sharp's" is marked on the barrel, on the tang or left side of the receiver/frame and on the lockplate.

Model

- "Sharps Rifle Manufg. Co. Hartford, Conn" is marked on the barrel, "C.Sharps Patent 1848" or "Sharps Patent 1848" is marked on the tang or left side of the receiver/frame and "Sharp's Patent 1852" or "Sharps Patent 1852" is marked on the lockplate.
- manufactured from 1854 to 1856.
- this is the second production model of Christian Sharp's "slant-breech" percussion single-shot rifles, with a falling block mechanism that has a marked rear ward slant; this is also the first model of the Sharps rifle actually produced by the Sharps Rifle Manufacturing Company.
- versions of this rifle were made for both military and commercial sales and the military versions will normally bear "US" property marks and inspector's stamps
- most of the US issue carbines will have a sliding sling ring on a bar mounted on the left side, while sporting variations and military rifles will not; military rifles were fitted with a bayonet retaining lug on the bottom of the barrel.
- features include: colour case hardened receiver/frame, hammer and sideplate, with brass or iron buttplate, barrel band, and patchbox, blued octagonal or round or half round & half octagonal barrel, walnut straight grip stock and forearm.
- the primary difference between the model 1853 and the model 1852 is the lever retaining spring, at the right front of the receiver/frame. Where the 1852 uses a bar like spring anchored into the forearm and extending back towards the receiver/frame, the model 1853 uses a spring-loaded stud in the receiver/frame itself. This prevents an arm on the hinge pin from spinning forward to the disassembly position.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- manufacturer's name is not marked on the firearm. - "Sharps Rifle Manufg. Co. Hartford, Conn." is marked on the firearm. - "Robbins & Lawrence" of Windsor, Vermont produced the model "1853" for "Sharps" from 1854 to 1856. - "Sharps Rifle Company" produced the model "1853" from 1856 to 1857.
Action	- lever operated falling (dropping) block design. - percussion breechloader.
Serial Number	- serial numbered is located on the tang of the receiver/frame. - serial numbered range is from 8,000 to 27,500.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- this was the final production model of Christian Sharp's "slant-breech" percussion single-shot rifles. - made in both rifle and carbine versions. - featured a falling-block mechanism that has a marked rear-ward slant, these rifles were also fitted with the Maynard tape-priming system. - versions of this rifle were made for both military and commercial sales, the military versions will normally bear "US" property marks and inspector's stamps. - marked "Sharps Rifle Manufg. Co. Hartford, Conn" on the barrel, "Sharps Patent 1848" on the tang, and "Edward Maynard Patentee 1845" on the priming-feed cover -most of the carbines will have a sliding sling ring on a bar mounted on the left side, while sporting variations and military rifles won't, military rifles were fitted with a bayonet-retaining lug on the bottom of the barrel. - some of the early-production carbines were sold to the British government, and these may bear British proofs, property marks, and regimental numbers. - color case hardened receiver, hammer, and sideplate, with brass or iron buttplate, barrel band, and patchbox, blued barrel, walnut straight-grip stock and forearm. - the model 1855 uses a spring-loaded stud in the receiver to prevent an arm on the operating lever from spinning forward to the disassembly position.
Manufacturer	- marked on the firearm, these firearms were produced circa 1855 to 1857.
Action	- lever operated falling (dropping) block design. - percussion breechloader.
Serial Number	- numbered on the tang of the receiver, range is between approximately 17000 and 29000.

Notes

Make

- marked on left side of receiver.

Model

- model description does not apear on firearm, what is marked is the patent date (C Sharps Patent 1859) marked on the side of the receiver encircling the hammer screw or on the barrel.
- forward sliding barrels for loading and ejecting.
- brass frame, usually silver-plated.
- single action with a rotating firing pin.
- Approximately 100,000 were manufactured between 1859 and 1874.
- known as the 1859 Model 2 when found in calibre 30 RF.
- known as the 1859 Model 3 when found in calibre 32 SHORT RF.
- known as the 1859 Model 4 when found in calibre 32 LONG RF.

Manufacturer

- Sharps & Hankins was formed in 1862 by a merger of the C. Sharps & Company group with William C. Hankins.
- This arrangement lasted until 1867 when this company was dissolved and the firm once again became C. Sharps & Company.
- It appears that only Model 3s were produced by Sharps & Hankins.

Action

- four barrel, (two sets of superposed barrels) four shot handgun fired by a rotating firing-pin.

Serial Number

- located on the bottom of the butt between the grips and may be repeated on the underside of the barrels.
- serial numbers range from 1 to approximately 60,000.

Notes

Make

- "C. SHARPS PATENT" over "JAN.25, 1859" is marked on the right side of the receiver/frame.

Model

- manufactured from 1859 to 1874.
- approximately 15,000 were manufactured in 4 variations.
- model designation does not appear on firearm, what is marked is the patent date ("C Sharps Patent JAN 25 1859") on the right side of the receiver/frame encircling the hammer screw.
- features include: forward sliding barrels for loading and ejecting; iron receiver/frame with bird's head pistol grip; spur trigger; release button on the left side; single action with a rotating firing pin; wood, pearl or ivory grip panels.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "C. SHARPS PATENT" over "JAN.25, 1859" is marked on the right side of the receiver/frame.
- Sharps & Hankins was formed in 1862 by a merger of the C. Sharps & Company group with William C. Hankins.
- This arrangement lasted until 1867 when this company was dissolved and the firm once again became C. Sharps & Company.
- It appears that only Model 3s were marked Sharps & Hankins.
- "C. SHARPS PATENT" over "JAN.25, 1859" is marked on the right side of the receiver/frame.

Action

- four barrel, (two sets of superposed barrels) four shot handgun fired by a rotating firing pin.

Serial Number

- serial number is marked on the left side of the receiver/frame under the grips.
- serial numbers range from 1 to approximately 15,000.

Remarks

- known as the 1859 Model 1 when found in calibre 22 SHORT.
- known as the 1859 Model 2 when found in calibre 30 RF.
- known as the 1859 Model 3 when found in calibre 32 SHORT RF.

Notes

Make

- "C. Sharps' Pat" may be marked on both sides of the receiver/frame.
- "Sharps Rifle" may be marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "New Model 1859" is marked on the top of the barrel. - this was one of the first three models of "straight-breech" rifles that the Sharps Rifle Company produced, and were so successful that many were later converted to metallic-cartridge chamberings (previous versions were all "slant-breech" percussion models, meant for use with paper cartridges). - the Models 1859, 1863, and 1865 are all identical except for their barrel markings; the Model 1859 reads "New Model 1859" and "Sharps Rifle Manufg. Co. Hartford, Conn." on the barrel, with "C. Sharps' Pat./Sept. 12th 1848" and "C. Sharps' Pat./Oct. 5th 1852" and "R.S. Lawrence Pat./April 12th 1859" on the side of the receiver/frame. Various other patent dates may also be seen elsewhere on the firearm. - these firearms were manufactured in both rifle and carbine versions, and most of the carbine versions will have a sliding sling ring on a bar mounted on the left wrist. Certain very rare examples may also be seen with a coffee grinding mill built into the buttstock, and some were originally fitted with a patchbox (some patchboxes removed when these rifles were later converted to metallic cartridge). - features include: color case hardened receiver, hammer, and sideplate; with brass or iron stock fittings; blued barrel; walnut straight-grip stock and forearm (forearm with either one or three barrel bands); some examples may be found with double set triggers; some military rifles will have bayonet lugs (other military versions used socket bayonets). - this rifle is also noteworthy for having spawned the term "sharpshooter", as two regiments of Hiram Berdan's famed marksmen were armed with these rifles during the Civil War.
Manufacturer	- "Sharps Rifle" and "Manufg Co" and "Hartford Conn" may be marked on the barrel.
Action	- lever operated falling (dropping) block design. - percussion breechloader, many of these firearms were later converted to fire metallic cartridge.
Serial Number	- serial number range is from 30,000 to 75,000 with the possibility of overlap with the New Model 1863 model (numbered from 75,000 to 140,000)
Calibre	- some of these rifles were re-lined to accept 50-70 Govt (centerfire) ammunition (.50" bore), while the original bore diameter was .52"; additionally, many of these rifles were privately converted to large-bore sporting rifles after the Civil War.

Notes

Make

- "C.Sharps Pat./Sept 12th 1848" is marked on the right side of the receiver/frame.
- "R.S.Lawrence Pat./April 12th 1859" and "C.Sharps' Pat./Oct. 5th 1852" is marked on the left side of the receiver/frame.

Model

- the model name is not marked on the firearm.
- this rifle is a Springfield Armory alteration to the Sharps straight breech percussion models.
- also know as the Model 1870 Springfield Altered Sharps Rifle and Carbine.
- Springfield Armory also modified the Sharps 1874 Military Rifle, this was not only a conversion from percussion to centre fire but also included newly manufactured parts with subsequent assembly by Springfield Armory.
- modified circa 1870.
- approximately 1000 pieces were altered.
- features include: a Walnut stock with full length forend with two barrel bands (instead of the three bands used on the Sharps Military Rifle); case hardened breechblock, lock, lever, trigger plate and lever catch; barrel, barrel bands, buttplate and ramrod were left in the white; iron ramrod located under the barrel.
- buttplate will be marked with the letters "US".

Manufacturer

- "Springfield" and/or "Springfield Armory" and/or "U.S. Springfield" and/or "U.S. Springfield Armory" is not marked on the firearm.

Action

- lever operated falling (dropping) block design.

Serial Number

- serial number is usually marked on the upper tang of the breech.

Notes

Make

- "Sharps" is a trade/brand name.
- "C. Sharps Arms Co. Inc." is marked on the firearm.
- "Old Reliable" is a registered trademark of C. Sharps Arms Co., Inc.

Model

- model designation is not marked on the firearm.
- "Sharps Model 1875" was reintroduced by the "C. Sharps Arms Company Incorporated" in 1986.
- "Old Reliable" may be marked on the barrel.
- "Old Reliable" is a registered trademark of C. Sharps Arms Co., Inc.
- features: full octagon or tapered round or octagon barrel; exposed side hammer; straight or pistol grip butt stock; globe or blade front sight and vernier or buckhorn rear sight.

Manufacturer

- "C. Sharps Arms Co. Inc." and "Big Timber Mt, USA" are marked on the firearm.
- C. Sharps Arms Company Incorporated of Big Timber, Montana, U.S.A. has been manufacturing rifles since 1986.

Action

- lever operated falling (dropping) block design.

Serial Number

- examples have been observed with a five digit serial number without prefix or suffix.
- examples have been observed with "75" prefix, a ddash "-" and four digit serial number.

Calibre

- calibre is marked on the barrel: eg. "Cal. 45 2 7/8"

Notes

Make

-"Sharp's Rifle Co." and "Pat. Apr. 6,1869" and/or "C.Sharps Pat." and "Sept. 12th 1848" may be marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- model designation is not marked on the firearm. - manufactured from 1877 to 1880. - this is a late production Sharps rifle made specifically for target shooting, either "Schuetzen" style (off-hand, with a hooked buttplate and off-hand palm-rest), or from the "Creedmoor" position (where the shooter lays on his/her back and steadies the rifle against the knee or thigh) - these rifles were made with a specially lightened receiver/frame and thinner wedge than most Sharps; this allowed extra weight to be put into a longer and heavier barrel, yet still fit the rules for a Creedmoor rifle. They also have a back-action lock, where the hammer sits further back on the sideplate than on all other Sharps. - as these were target rifles, most of them left the factory with long-range sights (mounted on the tang or the comb of the buttstock), and most of them would have had finely checkered pistol-grip stocks and forearms - features include: colour case-hardened receiver/frame, hammer, and sideplate (seen with or without additional engraving, precious metals, etc.); blued round or octagonal barrel; some examples with double set triggers.
Manufacturer	- "Old Reliable Sharp's Rifle Co. Bridgeport, Conn." or "Sharps Rifle Co. Bridgeport, Conn. Old Reliable" is marked on the barrel.
Action	- lever operated falling (dropping) block design.
Serial Number	- numbered on receiver; rifles may have a "C" prefix, indicating that they were manufactured after serial #100000. Additionally, Sharps re-numbered previously-existing actions for sale to specific distributors; one of these, J.P. Lower of Denver, Colorado, had an entire run of rifles re-numbered with the prefix "D".
Barrel	- the barrel lengths were originally between 28"/711mm and 34"/863mm.
Calibre	- these rifles were originally chambered in various .40 and .45-caliber chambering of varying case lengths.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make	- "SHARPS RIFLE CO. BRIDGEPORT CONN." over "U.S.A." is marked on the left side of the receiver/frame.
Model	- model designation is not marked on the firearm. - "BORCHARDT PATENT" over "SHARPS RIFLE CO. BRIDGEPORT, CONN." over "U.S.A." is marked on the on left side of receiver/frame. - "OLD RELIABLE" and "SHARPS RIFLE CO. BRIDGEPORT CONN" are marked on top of the barrel. - manufactured from 1877 and 1881. - this is a falling-block, single-shot rifle made in sporting, commercial hunting, and military versions (approximately 8700 total production) - based on Hugo Borchardt's patent of 1876, these rifles were built under licence by the Sharps Rifle Company. - these rifles can be seen with either straight-grip (all military versions, and most less-expensive hunting versions) or pistol-grip stocks, and all but the military versions had schnabel forearm tips. - depending on the grade, these rifles were manufactured with both plain colour case-hardened and fully-engraved (some with precious-metal inlays) receiver/frames, and various sight and barrel configurations (fixed or adjustable sights, long-range tang sights, round or octagon barrel) and other options. - these rifles have what appears to be two triggers, but the rear "trigger" is actually a sliding trigger-block safety (some of these rifles, however, were actually fitted with a set-trigger mechanism).
Manufacturer	- "SHARPS RIFLE CO. BRIDGEPORT CONN." over "U.S.A." is marked on the left side of receiver/frame. - "OLD RELIABLE" and "SHARPS RIFLE CO. BRIDGEPORT CONN" are marked on top of the barrel.
Action	- lever operated falling (dropping) block design.
Serial Number	- numbered on bottom of the barrel and the receiver/frame.
Barrel	- these rifles were manufactured with barrels ranging in length from 21"/533mm to 36"/914mm, and could be ordered in non-standard custom lengths.
Calibre	- these rifles were chambered in a wide variety of cartridges, including; 40-65 WIN, 40-90 SHARPS STRAIGHT and NECKED, 45-70 GOVT, 45-100 SHARPS STRAIGHT, 40-70 SHARPS STRAIGHT and NECKED, 44-77 SHARPS, 40-50 SHARPS STRAIGHT and NECKED, 40-45 SHARPS STRAIGHT.

Notes

Make

- "Sharps" is a trade/brand name.
- "C. Sharps Arms Co. Inc." is marked on the firearm.
- "Old Reliable" is a registered trademark of C. Sharps Arms Co., Inc.

Model

- introduced in 2000.
- model designation is marked on the firearm as part of the serial number. The first two digits, "85", indicates the Model 1885.
- this model resembles the Winchester model 1885.
- "Old Reliable" may be marked on the barrel.
- "Old Reliable" is a registered trademark of C. Sharps Arms Co., Inc.
- features include: case hardened or stainless steel receiver/frame and butt plate, tapered full octagon barrel, exposed hammer, the front sight may be a globe sight or a fixed sight, the rear sight may be an adjustable sight located on the barrel or a vernier adjustable sight located on the butt stock, straight or pistol grip walnut stock and forend.
- this rifle can be custom ordered so one firearm may vary from the next. When the rifle has been customized it may be called the " Custom Model 1885 ".

Manufacturer

- "C. Sharps Arms Co. Inc." and "Big Timber Mt, USA" are marked on the firearm.
- C. Sharps Arms Company Incorporated of Big Timber, Montana, U.S.A. has been manufacturing rifles since 1986.

Action

- lever operated falling (dropping) block design.

Serial Number

- the first two digits in the serial number indicate the model designation, followed by the serial number. Example 8500000.

Calibre

- marked on the barrel.

Notes

Make

- "Sharps Arms Company" over "Hartford, Connecticut, U.S.A." is marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- manufactured from 1970 to 1977. - "Colt-Sharps" is not marked on the firearm, but this is the colloquial name for this Borchardt-pattern single-shot rifle. - this is one of a limited number of single-shot falling-block rifles manufactured by the Sharps Arms Company of Hartford, Connecticut (formerly of Salt Lake City, Utah), after it was bought by Colt, though "Colt" does not appear on the rifle. These rifles were manufactured between 1970 and 1977, in standard and deluxe grades. - features include: blued finish; round barrel; drilled and tapped for scope mounts; a Borchardt-style hammerless falling block action, opened via a trigger-guard lever with short rear tang; hand checkered two piece walnut pistol-grip stock with Monte Carlo cheek piece and rubber butt plate. Automatic or manual rocking safety at the rear of the breech-block (user selectable).
Manufacturer	- "Sharps Arms Company" over "Hartford, Connecticut, U.S.A." is marked on the left side of the receiver/frame. - the Sharps Arms Company (no relation to the original Christian Sharps) was founded in Salt Lake City, Utah, but bought out by Colt and moved to Hartford, Connecticut in 1970.
Action	- lever operated, hammerless falling block.
Serial Number	- serial-numbered on the receiver/frame, with a "CS" prefix.

Notes

Make

- "Sharps Rifle Co. Bridgeport, Conn." is marked on the rib between the barrels.
- "Sharps Rifle Co." is marked on the sideplates.

Model

- "Sharps Rifle Co., Bridgeport, Conn." and "Old Reliable" is marked on the center rib of the barrel assembly.
- manufactured from 1878 to 1880.
- features include: side by side barrel configuration; exposed hammers; double triggers; side lever opening mechanism, Damascus barrels and plain walnut pistol grip stock.

Manufacturer

- although these shotguns are marked as being made by the Sharps Rifle Company in Connecticut, they were actually imported from England; may bear British proofs.

Action

- side by side pattern.

72791 - 2	38 PERCUSSION	1	711	Antique CC 84(1) "antique firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Model

- model designation is not marked on the firearm.
- manufactured circa 1856 with up to 500 units produced.
- this is a falling-block, single-shot percussion rifle that was based on Sharps' patent for the 1848 rifle, but was built on a much smaller receiver/frame, and used a pistol-grip-style stock.
- features include: miniature 1848 action with trigger-guard/lever operating the action; round barrel; fixed sights; patchbox on stock, and blued or colour case-hardened finish.
- a similar firearm, the "Falling Block Pistol" was made using this receiver/frame, but without a buttstock.

Manufacturer

- marked either "Sharps Patent/Arms Mfed Fairmount/Phila. Pa." or "C.Sharps & Co. Phila, Pa.".

Action

- lever operated falling (dropping) block design.
- percussion breechloader.

Serial Number

- numbered on the receiver/frame.

Notes

Make

- "C. SHARPS & CO., PHILA. PA." is marked on the barrel.

Model

- manufactured circa 1857/1858.
- approximately 2,000 units were manufactured.
- this is a small-caliber percussion revolver with a tip-up barrel.
- strongly resembles some of the early Smith & Wesson "tip-up" revolvers.
- features include: fixed sights; tip-up octagonal barrel with top rib; solid top receiver/frame with round non-fluted cylinder; exposed spurred hammer; sheathed spur trigger; single action trigger mechanism; flat bottom grip strap; walnut grip panels; blued finish.
- this firearm was also sold by "WM BRYCE & CO.".

Manufacturer

- "C. SHARPS & CO., PHILA. PA." is marked on the barrel.

Serial Number

- serial numbered from "1" up.

Notes

Make

- "SHARPS PATENT" may appear on the receiver/frame.

Model

- model designation is not marked on the firearm.
- usually marked either with "TIPPING & LAWDEN, SHARPS PATENT" or "TIPPING & LAWDEN PATENT" on the left side of the receiver/frame encircling the hammer screw.
- forward sliding barrels for loading and ejecting are unlocked by a button on receiver/frame bottom.
- brass receiver/frame, usually silver-plated.
- single action with a rotating firing pin.
- approximately 2000 were manufactured between 1860 and 1879.

Manufacturer

- manufacturer's name may be marked on the firearm.
- Thomas Tipping-Lawden was located at Legge Street, Birmingham, England in 1821.
- Thomas Tipping-Lawden moved to 40 Constitution Hill, Birmingham in 1828.
- Caleb & Thomas Tipping-Lawden formed a partnership known as "Tipping & Lawden" in 1837.
- Tipping & Lawden traded from 40 and 41 Constitution Hill and 18 Buckingham Street in Birmingham.
- Tipping & Lawden also had facilities in London, England at Cheapside from 1837 to 1840, 18 Pancras Lane in 1842, 9 Dyers Buildings, Holborn in 1843, 20 Barlett's Buildings from 1844 to 1851, 26 Barlett's Buildings from 1852 to 1854, and 17 Woodstock Street from 1871 to 1877.
- Tipping & Lawden was sold to P.Webley & Son in 1877.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- four barrel, (two sets of superposed barrels) four shot handgun fired by a rotating firing-pin.
Serial Number	- usually a numeric serial number will be found on the grip frame underneath the grips.
Barrel	- barrel lengths are known to vary up to 19mm from the standard length of 64mm.
Other Markings	- retailers names (e.g. Rigby, Bryce, Boss, Manton, etc.) may also be marked on some firearms.

FRT Report

Firearm Reference Number (FRN): 59439
Make: Sharps & Hankins
Model: 1859 Model 3

Summary

Make:	Sharps & Hankins
Model:	1859 Model 3
Manufacturer:	Sharps & Hankins
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Multi-Barrel
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
59439 - 2	32 LONG RF	4	89	Antique AFR, Section 1, para. 6	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make may be marked on top of the barrel as:
"ADDRESS SHARPS & HANKINS, PHILADELPHIA, PENN".

Model

- approximately 18,000 were manufactured between 1862 and 1867.
- the model designation does not appear on firearm, what is marked is the patent date "SHARPS PATENT/JAN. 25, 1859", on the right side of the receiver/frame.
- the model 3 was the first sharps derringer to have an extractor mounted between the barrels. As the barrels are slid forward, the extractor will remove the cartridges from the chamber.
- features include: single action spurred trigger; iron receiver/frame; spurred hammer; rotating firing pin; grip panels may vary from checkered rubber, wooden or ivory.
- there were 4 versions of the Sharps "1859 Model 3". Version 3 or 3A, 3B, 3C, and 3D.
- on version 3 or 3A there was a round access panel on the left side of the receiver/frame, above the spurred trigger.
- on version 3B, the round access panel was removed.
- on version 3C, the barrel release lever was moved slightly forward on the receiver/frame and some internal modifications.
- on version 3D, a frame screw located at the front sides of the receiver/frame has been removed.

Manufacturer

- Sharps & Hankins was formed in 1862 by a merger of the C. Sharps & Company group with William C. Hankins.
- this arrangement lasted until 1867 when this company was dissolved and the firm once again became C. Sharps & Company.
- it appears that only Model 3s were produced by Sharps & Hankins.

Action

- four barrel, (two sets of superposed barrels) four shot handgun fired by a rotating firing-pin.

Serial Number

- located on the bottom of the butt between the grips.
- serial numbers range from approximately 65 to 87,000.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- known as the 1859 Model 1 when found in calibre 22 SHORT.
- known as the 1859 Model 2 when found in calibre 30 RF.
- known as the 1859 Model 4 when found in calibre 32 LONG RF.

62183 - 1	52 SHARPS & HANKINS RIFLE RF	1	832	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Model

- this is an unusual single-shot rifle made between 1861 and 1862, for sale to the United States Navy (primarily for use by Marines).
- this rifle has a sliding barrel that moves back and forth in slots in the receiver as the lever/trigger-guard is operated. The barrel recesses back into the standing breech approximately 3mm when in the firing position.
- marked "Sharps & Hankins/Philada" on the right side of the receiver/frame, and "Sharps Patent/1859" on left side of receiver/frame.
- features a walnut straight-grip stock and full-length forearm, sling swivels, and a bayonet lug on most examples.
- these rifles originally had a barrel covered with leather.
- Sharps & Hankins also made 1862 Carbines that used this same basic method of operation, but these are significantly shorter and have no forearm.

Manufacturer

- Sharps & Hankins was a partnership set up in 1862 between Christian Sharps (inventor of the Sharps rifles), and William Hankins, to produce and sell a variety of rifles and small handguns. In 1866, this partnership dissolved, and Christian Sharps went back to producing rifles until his death in 1874.

Action

- lever operated forward sliding barrel design.

Serial Number

- on receiver/frame; numbered 1 through approximately 700.

62142 - 1	52 SHARPS & HANKINS CARBINE RF	1	610	Antique AFR, Section 1, para. 2	Manufacturer Specifications and Commercial Customization	

Notes

Model

- this is an unusual single-shot carbine made between 1862 and 1865, primarily for sale to the United States Army and Navy.
- this rifle has a sliding barrel that moves back and forth in slots in the receiver as the lever/trigger-guard is operated. The barrel recesses back into the standing breech approximately 3mm when in the firing position. This rifle was made in two separate variations, the first with a blade-type firing-pin on the hammer nose, and the second with a frame-mounted firing pin mounted in the standing breech.
- marked "Sharps & Hankins/Philada" on the right side of the receiver/frame, and "Sharps Patent/1859" on the left side of the receiver/frame.
- features a walnut straight-grip stock (with or without sling swivels), metal forearm is part of the frame, some examples had saddle rings, and those variants originally made for the Navy originally had a barrel covered with leather. These rifles can be identified by a muzzle ring and two screws at the rear of the barrel, with which the leather was anchored.
- a small number of these rifles were made with even shorter barrels, for use by Cavalry; these examples have been tin-plated.
- Sharps & Hankins also made 1861 Navy rifles that used this same basic method of operation, but these are considerably longer and have a full wood forearm.

Manufacturer

- Sharps & Hankins was a partnership set up in 1862 between Christian Sharps (inventor of the Sharps rifles), and William Hankins, to produce and sell a variety of rifles and small handguns. In 1866, this partnership dissolved and Christian Sharps went back to producing rifles until his death in 1874.

Action

- lever operated forward sliding barrel design.

Serial Number

- serial number is marked on the receiver/frame; numbered 1 through approximately 8000.

Make: Shattuck
Model: 1879 Hyde's Patent Swing-Out Cylinder

Summary

Make:	Shattuck
Model:	1879 Hyde's Patent Swing-Out Cylinder
Manufacturer:	Shattuck
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
26243 - 2	22 LONG	7	57	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	
26243 - 1	32 RF	5	66	Antique AFR, Section 1, para. 6	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "C. S. SHATTUCK" and "HATFIELD, MASS." are marked on the left side of the barrel.

Model

- manufactured during the 1880s.
- model designation is not marked on the firearm.
- "Pat. Nov. 4, 1879" is marked on the left side of the firearm.
- Andre Hyde applied for a patent for a side swinging cylinder and was granted Patent Number 221,171 on November 4th of 1879 and Patent Number 273,282 on March 06th of 1883.
- "1879 Hyde's Patent Swing Out Cylinder" is a single action pocket revolver.
- features include: half moon or blade front sight and groove in the top strap for the rear sight; octagonal rifled barrel; solid top receiver/frame with right side swing-out fluted cylinder; exposed spur hammer; sheathed spur trigger; single action trigger mechanism; bird's head or square butt grip strap; gutta-percha, rubber or wood grip plates; nickel finish.
- cylinder crane pivots on a screw located on the right front side of the receiver/frame, this allows the cylinder to swing out to the right side for loading and unloading.
- gutta-percha grip plates may have the raised portraits of two American Presidents. Abraham Lincoln on the right grip plate and James A. Garfield on the left grip plate.

Manufacturer

- "C. S. SHATTUCK" and "HATFIELD, MASS." are marked on the left side of the barrel.

Serial Number

- serial number is marked on the left side of the butt strap, under the grip plate and is repeated on the cylinder tang.
- serial number rationalization unknown.
- total quantity produced was less than two thousand.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - references indicate this firearm may also have been made in 38 RF and 41 RF.

Shots - cylinder swings out to the right on a parallel axis to the barrel, on a lever mounted under the barrel. It does not swing down as a conventional cylinder does.
