Model	- introduced in 2006. - the model 14 "Classic" series is, as of 2006, available in three different configurations. All share the same basic design but each has a unique feature that differentiates it from the other model 14's. - the model "14 American Classic" features a detachable box magazine, a walnut stock with a straight comb and no open sights. The grip cap has an inlaid, brass Indian head medallion. - the model "14 Classic" features a walnut stock with a "Monte Carlo" style cheekpiece, a fixed, internal magazine with a hinged floor plate and no open sights. - the model "14 Euro Classic" features a walnut stock with a "Monte Carlo" style cheekpiece, a detachable box magazine and a barrel mounted adjustable rear sight with a hooded front sight. - the model designation is usually marked as "MODEL 14" on all variants. These model 14's use the Savage "short action", the same rifles are available with a long action as the model "114". - other features include: right-hand bolt, receiver/frame is drilled and tapped for scope mounts; blued finish; equipped with the Savage "Accu-Trigger" adjustable trigger unit; rubber recoil pad and sling swivel studs. - in 2008, Savage introduced a new bolt release located in front of the trigger guard.
Action	- turn-bolt design.
Serial Number	- numbered on the receiver/frame, rationalization unknown.
Calibre	- the calibre designation is marked on the barrel.
Shots	- internal magazine with a hinged floor plate.

Notes

Make

- make is marked on the firearm.

Model

- introduced in 2002 as a short-action variant of the 116BSS, chambered for various "short magnum" cartridges.
- the model 16 series of firearms was offered in several variations as follows.
- 16BSS; features a laminated stock and a stainless steel barrel and right-hand action (bolt handle and ejection port are on the right side) and an integral magazine.
- 16FSS; features a black composite stock, a stainless steel barrel and right-hand action (bolt handle and ejection port are on the right side) and an integral magazine.
- 16FLSS; same as the model 16FSS but features a left-hand action (bolt handle and ejection port are on the left side).
- 16FCSS; features a black composite stock, a stainless steel barrel and right-hand action (bolt handle and ejection port are on the right side) and a detachable box magazine.
- 16FLCSS; same as the model 16FCSS but features a left-hand action (bolt handle and ejection port are on the left side).
- 16LZ; this variant was made for the proprietary Lazzeroni cartridges.
- additional features on all variations include: short length receiver/frame (the equivalent model with the long action length is known as the model 116) drilled and tapped for scope mounts (some variations were offered with a factory installed telescopic sight); free floated barrel; sling swivel studs.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the manufacturer is marked on the firearm.
Serial Number	- numbered on receiver/frame.
Shots	- internal box magazine.

Notes

Make

- the Savage name is marked on the barrel and laser engraved on the bolt.

Model

- introduced in 2005, this model uses the Savage "short" action. Savage offers the same rifle with a "long" action as the model 116DCSAK.
- the model designation is usually marked as SAVAGE MODEL 16, the "F" denotes a synthetic stock in matte black graphite polymer with a checkered pistol grip and forend, the "C" denotes a detachable box magazine, the "S" denotes stainless steel construction and the "AK" denotes an adjustable muzzle brake.
- other features include: matte, natural stainless steel finished action and fluted barrel; receiver/frame is drilled and tapped for scope mounts; sliding thumb safety located at the rear of the receiver/frame; AccuTrigger; usually not equipped with iron sights.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the Savage name is marked on the barrel and laser engraved on the bolt.
Action	- turn-bolt operated.
Serial Number	- rationalization unknown, marked on the receiver/frame.
Calibre	- the calibre designation is usually marked on the barrel.
Shots	- detachable box magazine.

- introduced in 1999.
- the model 16 series of firearms was offered in several variations as follows.
- 16FCSS; features a black composite stock, a stainless steel barrel and right-hand action (bolt handle and ejection port are on the right side) and a detachable box magazine.
- 16FLCSS; same as the model 16FCSS but features a left-hand action (bolt handle and ejection port are on the left side).
- 16BSS; features a laminated stock and a stainless steel barrel and right-hand action (bolt handle and ejection port are on the right side) and an integral magazine.
- 16FSS; features a black composite stock, a stainless steel barrel and right-hand action (bolt handle and ejection port are on the right side) and an integral magazine.
- 16FLSS; same as the model 16FSS but features a left-hand action (bolt handle and ejection port are on the left side).
- 16LZ; this variant was made for the proprietary Lazzeroni cartridges.
- additional features on all variations include: short length receiver/frame (the equivalent model with the long action length is known as the model 116) drilled and tapped for scope mounts (some variations were offered with a factory installed telescopic sight); free floated barrel; sling swivel studs.

Manufacturer

- "SAVAGE ARMS INC., WESTFIELD MASS." is marked on the top of the barrel.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- serial number observed consisted of a letter "G" prefix and six numbers.
- serial number observed consisted of a letter "H" prefix and six numbers.

Calibre

- calibre designation is marked on the barrel.
- 204 RUGER and 22-250 REM rifling characteristics: 1 turn in 12 inches, right hand twist.
- 223 REM rifling characteristics: 1 turn in 9 inches, right hand twist.
- 308 WIN, 300 WSM and 270 WSM rifling characteristics: 1 turn in 10 inches, right hand twist.
- 7MM-08 REM rifling characteristics: 1 turn in 9.5 inches, right hand twist.
- 243 WIN rifling characteristics: 1 turn in 9.25 inches, right hand twist.
- 6.5 CREEDMORE and 260 REM rifling characteristics: 1 turn in 8 inches, right hand twist.

Shots

- detachable box magazine.

34310 - 4	7MM-08 REM	4	559	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- marked on the barrel, toward breech end: SAVAGE ARMS INC., WESTFIELD MASS.

Model

- introduced in 1998.
- the model 16 series of firearms was offered in several variations as follows.
- 16FSS; features a black composite stock, a stainless steel barrel and right-hand action (bolt handle and ejection port are on the right side) and an integral magazine.
- 16FLSS; same as the model 16FSS but features a left-hand action (bolt handle and ejection port are on the left side).
- 16BSS; features a laminated stock and a stainless steel barrel and right-hand action (bolt handle and ejection port are on the right side) and an integral magazine.
- 16FCSS; features a black composite stock, a stainless steel barrel and right-hand action (bolt handle and ejection port are on the right side) and a detachable box magazine.
- 16FLCSS; same as the model 16FCSS but features a left-hand action (bolt handle and ejection port are on the left side).
- 16LZ; this variant was made for the proprietary Lazzeroni cartridges.
- additional features on all variations include: short length receiver/frame (the equivalent model with the long action length is known as the model 116) drilled and tapped for scope mounts (some variations were offered with a factory installed telescopic sight); free floated barrel; sling swivel studs; as of 2004, this model is offered with the Savage "Accu-Trigger" adjustable trigger unit.
- also available as a factory "package", with a scope and rings as the model 16FXP3 (short action) and model 116FXP3 (long action).

Manufacturer

- manufacturer is marked on the firearm.

Action

- manual turn-bolt mechanism.

Serial Number

- one alpha character and six digits, found on the right side of the receiver/frame.

Calibre

- marked on the barrel.

Shots

- integral box magazine.

Notes

Make

"SAVAGE REPEATING ARMS Co., UTICA, N.Y. U.S.A." over "PATENTED FEB. 7. 1893. JULY 25. 1893. CAL. .303" is marked on the barrel.
- "Savage" was incorporated as "Savage Repeating Arms Company" on April 5 1894.
- "Savage" was re-incorporated as "Savage Arms Company" on December 16 1997, before getting into production of firearms.

Model

- Manufactured from 1895 to 1899.
- "1895" manufactured by "Marlin" will be marked "SAVAGE REPEATING ARMS Co., UTICA, N.Y. U.S.A." over "PATENTED FEB. 7. 1893. JULY 25. 1893. CAL. .303." on the barrel.
- "1895" reference sources make mention of 5000 while others say 8000 were produced.
- "1895" defining features are: the bolt with a visual cocking indicator hole located on top, showing a "S" for safe and "C" for when its ready to fire; a cartridge counter on the left side of the receiver/frame which told the user how many rounds are left in the rotating magazine.
- "1895" from the 1900 Savage catalog, could been converted and improved to the model 1899 with a new bolt and related parts.
- Features include: round, half octagonal or octagonal barrel; hammerless, open top receiver/frame; drill and tapped tang for adjustable tang sight; internal rotating magazine with cartridge counter on the left side; crescent steel or hard rubber buttplate.

Manufacturer

- "Marlin" stamp "JM" or "M" in a circle appears on the bottom of the barrel, beneath the forearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- The serial number is marked on the underside of the receiver/frame. - Serial number of referenced examples consisted of four numbers, highest approximately been 8200.
Calibre	- The calibre designation is marked on the barrel. - ".303" calibre marking stands for the "303 Savage". - "1895" made by "Marlin" were only available in "303 Savage".
Shots	- Internal rotating magazine.

Notes

Make

- "Savage" is marked on left side of the barrel in front of the chamber.

Model

- manufactured from 1899 to 1917.
- "MODEL 1899" may be marked on the barrel or "SAVAGE 1899 MODEL" may be marked on the receiver ring.
- total production approximately 250,000.
- barrel may be round, half octagonal or octagonal.
- hammerless.
- one-piece, solid frame.
- this is a generic model. Other model "1899" entries exist which may better describe the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "Manufactured by The Savage Arms Company, Utica N.Y. U.S.A." is marked on top of the barrel.
Serial Number	- range from approximately 10,000 - 300,000. - located under the frame.
Barrel	- a wide variety of special order features were available including special length barrels which were available up to 762mm (30 inches).
Calibre	- calibre designation is marked on the barrel.
Shots	- integral rotary box magazine.
Other Markings	- may be marked on top of the barrel in two lines: "Savage Arms Company, Utica, N.Y. U.S.A." "Pat. Feb. 7. ' 93. July 25. ' 93. Oct. 3. ' 99." or "Manufactured by the Savage Arms Company. Utica. N.Y. U.S.A." "Patented February 7. 1893, July 25. 1893, October 3, 1899." or "Manufactured by the Savage Arms Company. Utica. N.Y. U.S.A." "Pat - Feb. 7. 1893, July 25. 1893, Oct. 3, 1899. May 25, 1909, June1, 1909" or "Manufactured by the Savage Arms Corp. Utica. N.Y. U.S.A." "Pat - Feb. 7. 1893, July 25. 1893, Oct. 3, 1899. May 25, 1909, June1, 1909"

Firearm Reference Number (FRN): 3236
Make: Savage
Model: 1899 Deluxe

Summary

Make:	Savage
Model:	1899 Deluxe
Manufacturer:	Savage
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Lever Action
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
3236 - 1	250 SAVAGE	5	559	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is marked on the barrel as: "SAVAGE".

Model

- introduced in 1914 and discontinued in 1922.
- model designation is marked on the barrel as: "MODEL 1899". The letters in the model designation may not be marked on the firearm, but indicate features that are found on a particular model.
- features include: blued steel receiver/frame with top ejection, takedown design, blued tapered round barrel, casehardened lever, hammerless with "cocked" indicator bar or button on top of the receiver/frame, adjustable rear sight with integral front sight base with white metal bead blade.
- many models were equipped with an adjustable rear sight with knurled knobs on each side. The knurled knobs may be marked, "Pat' Oct 13, 1914".
- trigger has a distinctive fine cross checkering. This fine cross checkering is not found on any other Savage Model 1899 or 99.
- safety located on the right side of the lever.
- extra wide varnished American walnut pistol grip stock with a "Perch-Belly" underside and a steel shotgun style buttplate, straight taper forearm with schnabel tip. The pistol grip and the forearm have fine checkered sides.
- this model came with the new takedown design in which the barrel and forend could be detached from the receiver/frame and stock by a button located on the underside of the forend. The barrel and forend were normally stamped with the serial number and a "H" on the rear.
- a shotgun barrel in 410 GA X 2 1/2 was introduced in 1920 as a special order for a rifle fitted with the new takedown design. With this barrel in place the firearm will operate as a single shot firearm only as the rotary magazine will not accept a shot shell.
- engraved models were available as special orders.

Manufacturer

- manufacturer's designation is marked on top of the barrel as:
"Manufactured by the Savage Arms Company. Utica. N.Y. U.S.A."
or
"Manufactured by the Savage Arms Corp. Utica. N.Y. U.S.A.".

Serial Number

- serial number is marked on the underside of the receiver/frame.
- serial number range is from approximately 146,000 to 237,500.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre designation is marked on the barrel.
Shots	- internal rotary magazine.
Other Markings	- barrel may be marked on the left side as: "SAVAGE HI-PRESSURE STEEL" "MODEL 1899" "Manufactured by the Savage Arms Company. Utica. N.Y. U.S.A." "Pat - Feb. 7. 1893, July 25. 1893, Oct. 3, 1899. May 25, 1909, June 1, 1909" or "Manufactured by the Savage Arms Corp. Utica. N.Y. U.S.A." "Pat - Feb. 7. 1893, July 25. 1893, Oct. 3, 1899. May 25, 1909, June 1, 1909"

Notes

Make

- make is normally marked on the barrel as: "SAVAGE".
- by 1920 the make was relocated and marked on the top of the receiver/frame ring.

Model

- introduced in 1899. In 1926 the Model 1899-A rifle was improved, renamed and replaced with the Model 99A.
- model designation is normally marked on the barrel as: "MODEL 1899". By 1920 the model designation was relocated to the receiver/frame ring and was marked as: "MODEL 99". The letters in the model designation may not be marked on the firearm, but indicate features that are found on a particular model.
- features include: blued steel receiver/frame with top ejection, blued standard weight round barrel, casehardened lever, hammerless with "cocked" indicator bar or button on top of the receiver/frame, adjustable rear sight with a knife edge or white metal bead front.
- safety located on the right side of the lever.
- varnished American walnut straight stock with a "Perch-Belly" underside which was changed to a straight stock in 1920. A pistol grip was available as a special order. The forearm has a curved taper with a schnabel tip. The butt was a curved steel rifle type buttplate. A shotgun style buttplate was available until 1919.
- prior to 1909 the takedown feature design involved the stock being removed from the receiver/frame, barrel and forearm. Starting in 1909 a new takedown design was available as a special order in which the barrel and forend could be detached from the receiver/frame and stock by a button located on the underside of the forend.
- a shotgun barrel in 410 GA X 2 1/2 was introduced in 1920 as a special order for a rifle fitted with the new takedown design. With this barrel in place the firearm will operate as a single shot firearm only as the rotary magazine will not accept a shot shell.
- engraved models were available as special orders. Engraving would include scroll work which may include a deer within a circle.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- manufacturer's designation is marked on the top of the barrel as:
"Savage Arms Company, Utica, N.Y"
or
"Savage Arms Company, Utica, N.Y. U.S.A."
or
"Manufactured by the Savage Arms Company. Utica. N.Y. U.S.A."
or
"Manufactured by the Savage Arms Corp. Utica. N.Y. U.S.A.".

Serial Number

- serial number is marked on the underside of the receiver/frame.
- serial number range is from approximately 10,000 to 300,000.

Calibre

- calibre designation is normally marked on the barrel.

Shots

- internal rotary magazine.
- the internal rotary magazine will not accept a 410 GA x 2 1/2" shell.
- the calibre conversion unit that was available in 410 GA X 2 1/2" was only usable as a "Single-Shot".

Other Markings

- the barrel may be marked on the left hand side as:
"SAVAGE HI-PRESSURE STEEL"
"MODEL 1899"
- by 1920 the above markings were relocated onto the top of the receiver/frame ring as:
"SAVAGE MODEL 99"
- the top of the barrel may be marked with one of the following:
"Savage Arms Company, Utica, N.Y. U.S.A. Pat. Feb. 7, 1893"
or
"Savage Arms Company, Utica, N.Y. U.S.A."
"Pat. Feb. 7. ' 93. July 25. ' 93. Oct. 3. ' 99. Cal. .30"
or
"Manufactured by the Savage Arms Company. Utica. N.Y. U.S.A."

Notes

Make - make is normally marked on the barrel as: "SAVAGE". By 1920 the make designation was relocated and marked on the top of the receiver/frame ring.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- introduced in 1899. In 1922 the Model 1899-A Saddle Gun was improved, renamed and replaced with the Model 99C.
- model designation is normally marked on the barrel as: "MODEL 1899". On late models the model designation was relocated to the receiver/frame ring and was marked as: "MODEL 99".The letters in the model designation may not be marked on the firearm, but indicate features that are found on a particular model.
- features include: blued steel receiver/frame with top ejection, blued standard weight round barrel, casehardened lever, hammerless with "cocked" indicator bar or button on top of the receiver/frame, adjustable rear sight with knife edge front sight.
- safety located on the right side of the lever.
- varnished American walnut straight stock with a "Perch-Belly" underside and a steel shotgun style buttplate. A pistol grip was available as a special order. The forearm has a curved taper with a schnabel tip.
- prior to 1917 the takedown design feature involved the stock being removed from the receiver/frame, barrel and forearm. Starting in 1917 a new takedown design was available as a special order in which the barrel and forend could be detached from the receiver/frame and stock by a button located on the underside of the forend.
- a shotgun barrel in 410 GA X 2 1/2 was introduced in 1920 as a special order for a rifle fitted with the new takedown design. With this barrel in place the firearm will operate as a single shot firearm only as the rotary magazine will not accept a shot shell.
- engraved models were available as special orders. Engraving would include scroll work which may include a deer within a circle.

Manufacturer

- the manufacturer's designation is normally marked on top of the barrel as:
"Savage Arms Company, Utica, N.Y"
or
"Savage Arms Company, Utica, N.Y. U.S.A."
or
"Manufactured by the Savage Arms Company. Utica. N.Y. U.S.A."
or
"Manufactured by the Savage Arms Corp. Utica. N.Y. U.S.A.".

Serial Number

- serial number is marked on the underside of the receiver/frame.
- serial number range is from approximately 10,000 to 220,000.

Calibre

- calibre designation is normally marked on the barrel.

Shots

- internal rotary magazine.
- the internal rotary magazine will not accept a 410 GA x 2 1/2" shell.
- the calibre conversion unit that was available in 410 GA X 2 1/2" was only usable as a "Single-Shot".

Other Markings

- the barrel may be marked on the left hand side as:
"SAVAGE HI-PRESSURE STEEL"
"MODEL 1899"
- on late models the above markings were relocated onto the top of the receiver/frame ring as:
"SAVAGE MODEL 99"
- the top of the barrel may be marked with one of the following:
"Savage Arms Company, Utica, N.Y. U.S.A. Pat. Feb. 7, 1893"
or
"Savage Arms Company, Utica, N.Y. U.S.A."
"Pat. Feb. 7. ' 93. July 25. ' 93. Oct. 3. ' 99. Cal. .30"
or
"Manufactured by the Savage Arms Company. Utica. N.Y. U.S.A."
"Patented February 7. 1893, July 25. 1893, October 3, 1899."
or
"Manufactured by the Savage Arms Company. Utica. N.Y. U.S.A."
"Pat - Feb. 7. 1893, July 25. 1893, Oct. 3, 1899. May 25, 1909, June 1, 1909"
or
"Manufactured by the Savage Arms Corp. Utica. N.Y. U.S.A."
"Pat - Feb. 7. 1893, July 25. 1893, Oct. 3, 1899. May 25, 1909, June 1, 1909"

Notes

Make

- make is marked on the barrel as: "SAVAGE".

Model

- introduced in 1899 and discontinued in 1920.
- model designation is marked on the barrel as: "MODEL 1899". The letters in the model designation may not be marked on the firearm, but indicate features that are found on a particular model.
- features include: blued steel receiver/frame with top ejection, blued standard weight round barrel, casehardened lever, hammerless with "cocked" indicator bar or button on top of the receiver/frame, adjustable rear sight with post type or knife edge front sight.
- saddle ring located on the left side of the receiver/frame.
- safety located on the right side of the lever.
- walnut straight stock with steel shotgun style buttplate, straight tapered forearm with a round or schnabel tip.
- pistol grip and engraving were available as special order.
- early units before serial number 40,000 may have one barrel band.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- manufacturer's designation is marked on top of the barrel as: "Savage Arms Company, Utica, N.Y" or "Savage Arms Company, Utica, N.Y. U.S.A." or "Manufactured by the Savage Arms Company. Utica. N.Y. U.S.A." or "Manufactured by the Savage Arms Corp. Utica. N.Y. U.S.A.".
Serial Number	- serial number is marked on the underside of the receiver/frame. - serial number range is from approximately 19,000 to 200,000.
Calibre	- calibre designation is marked on the barrel.
Shots	- internal rotary magazine.
Other Markings	- barrel may be marked on the left side as: "SAVAGE HI-PRESSURE STEEL" "MODEL 1899" - top of the barrel may be marked with one of the following: "Savage Arms Company, Utica, N.Y. U.S.A. Pat. Feb. 7, 1893" or "Savage Arms Company, Utica, N.Y. U.S.A." "Pat. Feb. 7. ' 93. July 25. ' 93. Oct. 3. ' 99. Cal. .30" or "Manufactured by the Savage Arms Company. Utica. N.Y. U.S.A." "Patented February 7. 1893, July 25. 1893, October 3, 1899." or "Manufactured by the Savage Arms Company. Utica. N.Y. U.S.A." "Pat - Feb. 7. 1893, July 25. 1893, Oct. 3, 1899. May 25, 1909, June 1, 1909" or "Manufactured by the Savage Arms Corp. Utica. N.Y. U.S.A." "Pat - Feb. 7. 1893, July 25. 1893, Oct. 3, 1899. May 25, 1909, June 1, 1909"

Notes

Make

- the Savage name is marked on the top of the barrel.

Model

- manufactured from 1904 to 1915/17.
- this is a compact rifle intended for younger shooters. The complete model designation is not usually marked on the firearm. The top of the barrel is usually marked only "MODEL 1904". The "Junior" in the model designation denotes the intended use as a "boys" rifle.
- features include: plain, uncheckered American walnut one piece stock; action cocks upon closing of the bolt; take down design; the trigger guard was a double loop that not only protected the trigger but formed a semi pistol-grip; bead front sight with a barrel mounted adjustable rear sight; round barrel; blued finish.
- the same design, fitted with a Savage ivory bead front sight and a deluxe, checkered walnut stock was known as the model "1904 Junior Special".

Manufacturer

- the Savage name is marked on the top of the barrel.

Action

- turn-bolt operated

Serial Number

- serial number may be located on the lower tang, inside the ejection port and/or rear left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - calibre designation is marked on the top of the barrel.

Notes

Make

- "SAVAGE" is marked on the receiver/frame.

Model

- "SAVAGE - 1921 - MODEL" is stamped on the underside of the receiver/frame.
- manufactured from 1921 to 1927.
- this is the first Savage repeating shotgun.
- takedown design, available in 12 GA only.
- this was a design that closely resembled the Winchester Model 12. The main differences were the top tang safety, and the takedown lever mounted on the magazine tube. Pistol grip stock with varnish finish. Barrel come with either cylinder, full or modified chokes.
- this model was replaced by the model 1928.

Manufacturer

- "MANUFACTURE BY SAVAGE ARMS CORP" and "UTICA, N.Y. U.S.A." may be marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is usually found on the underside of the receiver/frame ahead of the loading port. - serialization unknown but specimen observed with five numerical digits.
Barrel	- the 508mm barrel length is found on the "Riot" configuration variation and is also called the model 1921C.
Calibre	- marked on the left side of the barrel.

2213 - 1	300 SAVAGE	5	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the Savage name is marked on the receiver/frame and barrel.

Model

- the model designation is usually marked on the receiver/frame.
- introduced in 1920, this was the first centre-fire, bolt action rifle produced by Savage. Discontinued in 1928/9.
- features include: lightweight, tapered barrel; walnut stock with checkered pistol grip and forearm and a varnish finish; corrugated steel shotgun butt plate; adjustable flat top rear sight with elevation adjustment and an integral front sight base with a white metal front sight.

Serial Number

- sample examined used sequential numbers on the receiver/frame.

Calibre

- the calibre designation on rifles chambered in 250 SAVAGE is marked on the barrel as 250 - 3000.
- the model 20 was first offered in 300 SAVAGE in 1921.

Notes

Make

- the make is marked on the receiver/frame as, "SAVAGE".

Model

- manufactured from 1939 to 1947. Reintroduced in 1953 discontinued in 1964.
the model designation may be marked on the left side of the receiver/frame as, "MODEL 220D".
- the Savage model 220 (shotgun) and model 219 (rifle) were sold with one barrel each, combinations of calibres and barrel lengths were offered that allowed the use of accessory barrels that further enhanced the capabilities of the firearm.
- this family of firearms became known as the "Utility" gun.
- features may include; blued receiver/frame and barrel; top tang mounted safety; no external hammer; automatic ejector; a fixed bead for a front sight; American walnut forend and pistol grip stock with a hard rubber buttplate.

Manufacturer

- the manufacturer may be marked on the receiver/frame as:
"SAVAGE ARMS CORPORATION"
"WESTFIELD MASS. U.S.A.".
- this shotgun was first offered by Savage Arms Corporation of Utica, NY. In 1960 the shotgun was then manufactured by Savage Arms Corporation in their Westfield plant.

Calibre

- marked on the left side.

Notes

Make

- "SAVAGE ARMS CORPORATION CHICOPEE FALLS, MASS. U.S.A." is marked on left side of receiver.

Model

- manufactured from 1950 to 1965.
- "MODEL 24" is marked on right side of receiver.
- select walnut pistol grip stock with a corrugated butt plate on some models.
- forend has special fastening to prevent it from shooting loose. Open rear sight with elevation adjustment and a ramp front sight. Has a cast metal trigger guard. Single trigger and a slide button on the right side of the frame to select barrel.
- two way top opening lever for either right of left handed shooters.
- this is a generic model. Other model "24" entries exist which might better describe the firearm.

Manufacturer

- "SAVAGE ARMS CORPORATION CHICOPEE FALLS, MASS. U.S.A." is marked on left side of receiver.

Action

- over & under.

Serial Number

- the Model 24 may be marked on the barrel or receiver, "Pat. 2259397" or a variation thereof; this is a "Patent" number and NOT A SERIAL NUMBER.

Notes

Make

- make is marked on the left side of the receiver.

Model

- model is marked on the left side of the receiver.
- Savage 242 family was manufactured from 1977 to 1981.
- over and under configuaration, hinged frame.
- barrel selector mounted on the hammer.
- break open lever located on top tang.
- an interesting feature of this model, is the side mounted extractor, in lieu of in between barrels, like usual over & under pattern shotguns.
- the differences in the Series C, and Series D remain in minor internal mechanical changes, on firing pins, and frame.

Manufacturer

- manufacturer is marked on the left side of the receiver.

Action

- over & under pattern.
- the top and bottom barrel are separated by a block located at the muzzle end.

Serial Number

- located on the right side of frame.

Remarks

- Selected walnut stock, pistol grip with white line cap and butt plate. Top lever opening, barrel selector on the hammer and a bead front sight. Has full choke barrels.

Notes

Make

- "SAVAGE" is marked on the firearm.
- "SAVAGE" and the Savage Indian Head Logo is usually laser engraved on the bolt.
- "SAVAGE ARMS INC., WESTFIELD MASS. 01085 U.S.A." is usually marked on the barrel.

Model

- introduced in 2008.
- "Savage Model 25" or "Savage M-25" is marked on the barrel.
- "Savage model 25" is built on a short action receiver/frame.
- "Savage Model 25 Walking Varminter" was introduced in 2011 as a synthetic stocked version with a 559 mm (22").
- features include: plain round or fluted barrel; round tubular receiver/frame equipped with scope mounts; three lug bolt with 60 degree throw; dual pillar bedding; AccuTrigger system; one piece thumbhole or full pistol grip laminated wood stock or synthetic stock; sling swivel studs; matt blue finish.
- overall length with a 610 mm (24") barrel is 1111 mm (43.75") and the average weight is 3.74 kgs (8.25 lbs).

Manufacturer

- "SAVAGE" is marked on the firearm.
- "SAVAGE" and the Savage Indian Head Logo is usually laser engraved on the bolt.
- "SAVAGE ARMS INC., WESTFIELD MASS. 01085 U.S.A." is usually marked on the barrel.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- serial number of a referenced example consisted of a one letter prefix (G) and six numbers.

Calibre

- calibre identification is marked on the barrel.
- 204 RUGER rifling characteristics: 1 turn in 12 inches, right hand twist.
- 22 HORNET and 222REM rifling characteristics: 1 turn in 14 inches, right hand twist.
- 223 REM and 5.7x28 FN rifling characteristics: 1 turn in 9 inches, right hand twist.

Shots

- detachable box magazine.

Notes

Make	- make is marked on the firearm as "SAVAGE".
Model	- manufactured from 1959 to 1975. - other Model 30 entries exist which might better describe the firearm being verified. Model 30 is marked on the barrel of all versions.
Manufacturer	- manufacturer's designation is marked on the firearm as "SAVAGE".
Serial Number	- firearms may or may not be numbered before 1968.
Calibre	- calibre designation is marked on the barrel.
Shots	- tubular magazine fed.
Remarks	- The original Model 30 has selected walnut full pistol grip stock with fluted comb. Corrugated butt plate. Deluxe grooved extension slide handle and a tube type magazine mounted under the barrel. Hammerless action with a solid breech side ejection port. Highly polished receiver and damascened bolt with a game scene on each side of the receiver. Gold plated trigger and cross bolt safety located just behind the trigger. Shotgun bead front sight. Other 30 entries exist which might better describe the firearm being verified. Other Model 30's may have different stocks styles, forends, various finishes on metal parts and various barrel configurations.

Notes

Make

- "Savage Arms Corporation" is marked on the top of the barrel of the firearm.

Model

- Introduced in 1931.
- Manufactured from 1931 to 1945.
- May also be known as "Model 3".
- "MODEL 3BC" is marked on the top of the barrel of the firearm, common location for model markings during the time period this model was produced.
- This firearm model appears to be one of the numerous transition models produced by Savage without a fixed naming convention.
- Features include: round barrel with fixed front and rear sights; blued receiver/frame with right side cocking handle; single piece wood stock with or without "finger" grooved forend; metal shoulder plate.

Manufacturer

- "Savage Arms Corporation" is marked on the top of the barrel of the firearm.
- "SAVAGE" followed by "UTICA N.Y. - MADE IN U.S.A." is marked on the barrel under "SAVAGE ARMS CORPORATION".
- "Utica N.Y." dates this firearm as prior to 1946.

Action

- Turn bolt operated.

Serial Number

- The serial number is not marked on the firearm.

Canadian Law Comments

- at least two variants of this particular model may exist:
Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

FRT Report

Firearm Reference Number (FRN): 33149
Make: Savage
Model: 560F

Summary

Make:	Savage
Model:	560F
Manufacturer:	Industrias El Gamo
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
33149 - 1	177 PELLET	1	457	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- Savage imported these rifles from Gamo in Spain.
- "Savage" may or may not be marked on firearm.

Model

- introduced 1998.
- features include: a black polymer stock with metallic finish and checkered pistol grip; comes with a rubber recoil pad; manual safety located directly ahead of a two stage trigger; hooded front sight on ramp; adjustable rear sight with elevator and four choices of notch shape; blued steel receiver grooved for scope mounts.
- when sold by Gamo, this rifle was known as the "Delta 10" or the "Spectra".

Manufacturer

- manufacturer not marked on airgun.
- marked "Made In Spain".

Action

- barrel cocks gas spring and feeds pellet into breech.
- discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the left side of the barrel.
- observed serial number consisted of number "04", a dash (-), "1C", a dash (-), six numbers, a dash (-), and "98".
- Spanish government instituted a new system for firearm's serial numbering in 1995. This system incorporated the gunmaker/manufacturer code, weapon code, serial number sequence, and year of manufacturer.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter (1C) are the code for an air carbine/rifle, the next six numbers are the serial number sequence, and the last two numbers (98) are the year of manufacture.

FRT Report

Firearm Reference Number (FRN): 2167
Make: Savage
Model: 6

Summary

Make:	Savage
Model:	6
Manufacturer:	Savage
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
2167 - 1	22 LR	15	508	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
2167 - 4	22 LR	15	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SAVAGE" and/or "SAVAGE ARMS CORPORATION" is marked on the barrel.

Model

- "MODEL 6" is marked on the barrel.
- the model 6 series was manufactured from 1938 to 1968.
- features include: round tapered alloy steel barrel with bead front sight and adjustable sporting type rear sight; solid top receiver/frame with right side ejection; receiver/frame is ventilated on the left side to allow gas and powder residue to escape; receiver/frame was drilled and tapped from 1938 to 1955 or grooved from 1955 to 1968 for scope mounting; takedown; tubular magazine; thumb safety on the right rear side of the receiver/frame from 1938 to 1963 or a tang mounted slide safety from 1963/64 to 1968; metal trigger guard; walnut one piece stock with checkered pistol grip, fluted comb and semi-beavertail fore-end and hard rubber butt plate from 1938 to 1946, walnut one piece stock with plain pistol grip, fluted comb and semi-beavertail fore-end and hard rubber butt plate from 1938 to 1946 and walnut one piece Monte Carlo stock with plain pistol grip, raised comb and semi-beavertail fore-end and hard rubber butt plate from 1947 to 1968.
- NOTE: Pressing the cross bolt to the left locks the action, which allows the rifle to operate like a single shot or bolt action repeater.
- the model 6 was originally introduced with a 610 mm barrel in 1938, the barrel length was shortened to 508 mm circa 1963/64.
- overall length with a 610 mm barrel is 1118 mm, approximate weight of 2.7 kgs.
- overall length with a 508 mm barrel is 1016 mm, approximate weight of 2.6 kgs.

Manufacturer

- manufacturer's name and address are marked on the barrel.

Action

- blowback operation.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the following patent numbers may be marked on the side of the barrel: "2,094,577", "2,224,758", "2,223,093", "RE.22,585" and "2,271,576". - NOTE: "2,094,577", "2,224,758", "2,223,093", "RE.22,585" and "2,271,576" are not serial numbers when marked on the Savage model 6 series.
Calibre	- "22 SHORT, LONG OR LONG RIFLE" is usually marked on the barrel.
Shots	- tubular magazine mounted under the barrel.

FRT Report

Firearm Reference Number (FRN): 33137
Make: Savage
Model: 600F

Summary

Make:	Savage
Model:	600F
Manufacturer:	Industrias El Gamo
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
33137 - 1	177 PELLET	25	457	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- Savage imported these rifles from Gamo in Spain.
- "Savage" may or may not be marked on firearm.

Model

- introduced 1998.
- features include: black polymer stock with lacquer finish and checkered pistol grip; comes with a rubber recoil pad; manual safety located directly ahead of a two stage trigger; tube magazine located on top of the receiver; hooded front sight on ramp; adjustable rear sight with elevator and four choices of notch shape; blued steel, with barrel block grooved for scope mounts.
- the 600FXP is a "package" sold with an air rifle scope, while the 600F is the same rifle sold without a scope.

Manufacturer

- manufacturer not marked on airgun
- marked "Made In Spain".

Action

- discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the left side of the barrel.
- observed serial number consisted of number "04", a dash (-), "1C", a dash (-), six numbers, a dash (-), and "98".
- Spanish government instituted a new system for firearm's serial numbering in 1995. This system incorporated the gunmaker/manufacturer code, weapon code, serial number sequence, and year of manufacturer.
- serial number break down: the first two numbers (04) are the code for Gamo, the next number and letter (1C) are the code for an air carbine/rifle, the next six numbers are the serial number sequence, and the last two numbers (98) are the year of manufacture.

Shots

- tubular magazine above compression chamber
- pellets are loaded into the breech automatically when the barrel is cocked.

- the Savage name is marked on the barrel.

Model

- model designation is marked on top of the barrel.
- manufactured from 1964 to 1969. The same basic model was available in calibre 22 MAG as the model 63M. In 1970 a key lock feature was added and these models became the model 63K and 63KM.
- features include: Walnut finished Mannlicher style hardwood stock with sling swivels; hooded front sight and open, elevation adjustable rear sight; blued finish; automatic safety locks trigger when bolt is operated; grooved receiver/frame for mounting a scope.

Manufacturer

- the Savage name is marked on the barrel.

Action

- bolt operated.

Serial Number

- sample examined was not serialized.
- examples produced after 1968 should have a serial number.

Calibre

- marked on the barrel.

Notes

Make

- "SAVAGE" and/or "SAVAGE ARMS CORPORATION" is marked on the barrel.

Model

- "MODEL 6D" over "DELUXE" is marked on the barrel.
- the model 6 series was manufactured from 1938 to 1968.
- features include: round tapered steel barrel with bead front sight and adjustable sporting type rear sight; solid top receiver/frame with right side ejection; receiver/frame is ventilated on the left side to allow gas and powder residue to escape; receiver/frame was drilled and tapped from 1938 to 1955 or grooved from 1955 to 1968 for scope mounting; takedown; tubular magazine; thumb safety on the right rear side of the receiver/frame from 1938 to 1963 or a tang mounted slide safety from 1963/64 to 1968; metal trigger guard; walnut one piece stock with checkered pistol grip, fluted comb and semi-beavertail fore-end and hard rubber butt plate from 1938 to 1946, walnut one piece stock with plain pistol grip, fluted comb and semi-beavertail fore-end and hard rubber butt plate from 1938 to 1946 and walnut one piece Monte Carlo stock with plain pistol grip, raised comb and semi-beavertail fore-end and hard rubber butt plate from 1947 to 1968.
- NOTE: Pressing the cross bolt to the left locks the action, which allows the rifle to operate like a single shot or bolt action repeater.
- the model 6 was originally introduced with a 610 mm barrel in 1938, the barrel length was shortened to 508 mm circa 1963/64.
- overall length with a 610 mm barrel is 1118 mm, approximate weight of 2.7 kgs.
- overall length with a 508 mm barrel is 1016 mm, approximate weight of 2.6 kgs.

Manufacturer

- manufacturer's name and address are marked on the barrel.

Action

- blowback operated.

Serial Number

- the following patent numbers may be marked on the side of the barrel: "2,094,577", "2,224,758", "2,223,093", "RE.22,585" and "2,271,576".
- NOTE: "2,094,577", "2,224,758", "2,223,093", "RE.22,585" and "2,271,576" are not serial numbers when marked on the Savage model 6 series.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- "22 SHORT, LONG OR LONG RIFLE" is marked on the barrel. - "ONLY LONG RIFLE AS AUTOMATIC" is marked on the left side of the barrel.
Shots	- tubular magazine mounted under the barrel.
Other Markings	- "2094577 PATENTS 2224758 2223093 RE.2585 2271576 " is marked on the right side of the barrel.

- NOTE: Pressing the cross bolt to the left locks the action, which allows the rifle to operate like a single shot or bolt action repeater.
- the model 6 was originally introduced with a 610 mm barrel in 1938, the barrel length was shortened to 508 mm circa 1963/64.
- overall length with a 610 mm barrel is 1118 mm, approximate weight of 2.7 kgs.
- overall length with a 508 mm barrel is 1016 mm, approximate weight of 2.6 kgs.

Manufacturer

- manufacturer's name and address are marked on the barrel.

Action

- blowback operation.

Serial Number

- the following patent numbers may be marked on the side of the barrel: "2,094,577", "2,224,758", "2,223,093", "RE.22,585" and "2,271,576".
- NOTE: "2,094,577", "2,224,758", "2,223,093", "RE.22,585" and "2,271,576" are not serial numbers when marked on the Savage model 6 series.

Calibre

- calibre is marked on the side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - tubular magazine mounted under the barrel.

Notes

Make - the Savage name was marked on the right side of the barrel on the sample examined.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- in 1930 Savage introduced a line of semi-automatic shotguns based on the Browning model "Auto-5" design that was being produced by Fabrique Nationale of Herstal, Belgium. This model used the long recoil method of operation. Savage offered several variations that were based on this design, all shared the same basic features but differed in the style of barrel and/or choke system. Savage further distinguished these models in factory literature by the number of shots each model could hold, catalogues referred to five and three shot capacities in certain models but these numbers included one cartridge in the chamber so actual capacities were four and two respectively. Although each variation was given a specific model designation in most factory literature, samples have been noted simply marked "Savage Automatic".
- the model 720 was produced between 1930 and 1949, it was a five shot version available in 12 GA or 16 GA.
- features include: American walnut buttstock and forend; plain round barrel with a bead front sight; push-button safety on rear of trigger guard; top of receiver/frame is channelled and matted in line of sight to reduce glare; friction ring adjustment for light or heavy loads.
- other variations include:
- model 720C, produced between 1946 and 1949; same as model 720 but with a 508mm barrel that featured a Cutts Compensator. The 720C was supplied with a "spreader" and "full" choke tube with a "modified" choke tube available as an option.
- model 720P, produced between 1946 and 1949; same as model 720 but with a 635mm barrel that featured a Poly Choke.
- model 720R introduced in 1940; this is the "Riot" version of the model 720, equipped with a 508mm barrel.
- further models can be found in the "Remarks" field.

Manufacturer

- the Savage name was marked on the right side of the barrel on the sample examined.

Action

- recoil operated.

Serial Number

- serial number is marked on the underside of the receiver/frame.

Calibre

- the gauge is marked on the barrel.

Shots

- tubular magazine mounted under the barrel.

Remarks

- further model breakdown is as follows,
- model 721, produced between 1930 and 1949: same specifications as the model 720 but equipped with a raised solid rib on the barrel.
- model 722, produced between 1930 and 1949: same specifications as the model 720 but equipped with a raised ventilated rib on the barrel.
- model 723, produced between 1930 and 1949: it would appear that at some point the 16 GA version of the model 720 was re-designated as the model 723.
- model 724, produced between 1930 and 1949: it would appear that at some point the 16 GA version of the model 721 was re-designated as the model 724.
- model 725, produced between 1930 and 1949: it would appear that at some point the 16 GA version of the model 722 was re-designated as the model 725.
- model 726, produced between 1931 and 1949: this is the "Upland Sporter" version of the model 720. It shares all of the features of the model 720 but the magazine capacity is reduced to two shells.
- model 727, produced between 1931 and 1949: this is the "Upland Sporter" version of the model 721. It shares all of the features of the model 721 but the magazine capacity is reduced to two shells.
- model 728, produced between 1931 and 1949: this is the "Upland Sporter" version of the model 723. It shares all of the features of the model 723 but the magazine capacity is reduced to two shells.
- model 740C, produced circa 1946 to 1949; this gun is described in Savage literature as a "Skeet" version of the model 720 with a 508mm barrel equipped with a Cutts Compensator. The walnut buttstock has a grip cap and the forend is a larger "beavertail" type.
- model 740P, produced circa 1946 to 1949; this gun is described in Savage literature as a "Skeet" version of the model 720 with a 635mm barrel equipped with a Poly Choke. The walnut buttstock has a grip cap and the forend is a larger "beavertail" type.

Notes

Make - "Savage" markings will be found on the receiver/frame or barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- in 1930 Savage introduced a line of semi-automatic shotguns based on the Browning model "Auto-5" design that was being produced by Fabrique Nationale of Herstal, Belgium. This model used the long recoil method of operation. Savage offered several variations that were based on this design, all shared the same basic features but differed in the style of barrel and/or choke system. Savage further distinguished these models in factory literature by the number of shots each model could hold, catalogues referred to five and three shot capacities in certain models but these numbers included one cartridge in the chamber so actual capacities were four and two respectively. Although each variation was given a specific model designation in most factory literature, samples have been noted simply marked "Savage Automatic".
- the model 720 was produced between 1930 and 1949, it was a five shot version available in 12 GA or 16 GA.
- the model 720P, produced between 1946 and 1949 was the same as model 720 but with a 635mm barrel that featured a Poly Choke.
- features include: American walnut buttstock and forend; plain round barrel with a bead front sight; push-button safety on rear of trigger guard; top of receiver/frame is channelled and matted in line of sight to reduce glare; friction ring adjustment for light or heavy loads.
- other variations include:
- model 720C, produced between 1946 and 1949; same as model 720 but with a 508mm barrel that featured a Cutts Compensator. The 720C was supplied with a "spreader" and "full" choke tube with a "modified" choke tube available as an option.
- model 720R introduced in 1940; this is the "Riot" version of the model 720, equipped with a 508mm barrel.
- further models can be found in the "Remarks" field.

Manufacturer

- "Savage" markings will be found on the receiver/frame or barrel.

Action

- recoil operated.

Serial Number

- typically consists of five or six digits marked on the underside of the receiver/frame.

Barrel

- standard barrel lengths on the model 720P were 635mm (25") or 660mm (26"), all other Savage "standard" barrel lengths (711mm (28"), 762mm (30")and 813mm (32")) were offered as special order items.

Calibre

- the gauge is marked on the barrel and underside of the receiver/frame.

Shots

- tubular magazine mounted under the barrel.

Remarks

- further model breakdown is as follows,
- model 721, produced between 1930 and 1949: same specifications as the model 720 but equipped with a raised solid rib on the barrel.
- model 722, produced between 1930 and 1949: same specifications as the model 720 but equipped with a raised ventilated rib on the barrel.
- model 723, produced between 1930 and 1949: it would appear that at some point the 16 GA version of the model 720 was re-designated as the model 723.
- model 724, produced between 1930 and 1949: it would appear that at some point the 16 GA version of the model 721 was re-designated as the model 724.
- model 725, produced between 1930 and 1949: it would appear that at some point the 16 GA version of the model 722 was re-designated as the model 725.
- model 726, produced between 1931 and 1949: this is the "Upland Sporter" version of the model 720. It shares all of the features of the model 720 but the magazine capacity is reduced to two shells.
- model 727, produced between 1931 and 1949: this is the "Upland Sporter" version of the model 721. It shares all of the features of the model 721 but the magazine capacity is reduced to two shells.
- model 728, produced between 1931 and 1949: this is the "Upland Sporter" version of the model 723. It shares all of the features of the model 723 but the magazine capacity is reduced to two shells.
- model 740C, produced circa 1946 to 1949; this gun is described in Savage literature as a "Skeet" version of the model 720 with a 508mm barrel equipped with a Cutts Compensator. The walnut buttstock has a grip cap and the forend is a larger "beavertail" type.
- model 740P, produced circa 1946 to 1949; this gun is described in Savage literature as a "Skeet" version of the model 720 with a 635mm barrel equipped with a Poly Choke. The walnut buttstock has a grip cap and the forend is a larger "beavertail" type.

Notes

Make

- "Savage" markings will be found on the receiver/frame or barrel.

Model

- in 1930 Savage introduced a line of semi-automatic shotguns based on the Browning model "Auto-5" design that was being produced by Fabrique Nationale of Herstal, Belgium. This model used the long recoil method of operation. Savage offered several variations that were based on this design, all shared the same basic features but differed in the style of barrel and/or choke system. Savage further distinguished these models in factory literature by the number of shots each model could hold, catalogues referred to five and three shot capacities in certain models but these numbers included one cartridge in the chamber so actual capacities were four and two respectively. Although each variation was given a specific model designation in most factory literature, samples have been noted simply marked "Savage Automatic".
- the model 720 was produced between 1930 and 1949, it was a five shot version available in 12 GA or 16 GA.
- the model 720R, introduced in 1940 was the "Riot" version of the model 720, equipped with a 508mm barrel.
- features include: American walnut buttstock and forend; plain round barrel with a bead front sight; push-button safety on rear of trigger guard; top of receiver/frame is channelled and matted in line of sight to reduce glare; friction ring adjustment for light or heavy loads.
- other variations include:
- model 720C, produced between 1946 and 1949; same as model 720 but with a 508mm barrel that featured a Cutts Compensator. The 720C was supplied with a "spreader" and "full" choke tube with a "modified" choke tube available as an option.
- model 720P, produced between 1946 and 1949; same as model 720 but with a 635mm barrel that featured a Poly Choke.
- further models can be found in the "Remarks" field.

Manufacturer

- "Savage" markings will be found on the receiver/frame or barrel.

Action

- recoil operated.

Serial Number

- typically consists of five or six digits marked on the underside of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- the gauge is marked on the barrel and underside of the receiver/frame.

Shots

- tubular magazine mounted under the barrel.

Remarks

- further model breakdown is as follows,
- model 721, produced between 1930 and 1949: same specifications as the model 720 but equipped with a raised solid rib on the barrel.
- model 722, produced between 1930 and 1949: same specifications as the model 720 but equipped with a raised ventilated rib on the barrel.
- model 723, produced between 1930 and 1949: it would appear that at some point the 16 GA version of the model 720 was re-designated as the model 723.
- model 724, produced between 1930 and 1949: it would appear that at some point the 16 GA version of the model 721 was re-designated as the model 724.
- model 725, produced between 1930 and 1949: it would appear that at some point the 16 GA version of the model 722 was re-designated as the model 725.
- model 726, produced between 1931 and 1949: this is the "Upland Sporter" version of the model 720. It shares all of the features of the model 720 but the magazine capacity is reduced to two shells.
- model 727, produced between 1931 and 1949: this is the "Upland Sporter" version of the model 721. It shares all of the features of the model 721 but the magazine capacity is reduced to two shells.
- model 728, produced between 1931 and 1949: this is the "Upland Sporter" version of the model 723. It shares all of the features of the model 723 but the magazine capacity is reduced to two shells.
- model 740C, produced circa 1946 to 1949; this gun is described in Savage literature as a "Skeet" version of the model 720 with a 508mm barrel equipped with a Cutts Compensator. The walnut buttstock has a grip cap and the forend is a larger "beavertail" type.
- model 740P, produced circa 1946 to 1949; this gun is described in Savage literature as a "Skeet" version of the model 720 with a 635mm barrel equipped with a Poly Choke. The walnut buttstock has a grip cap and the forend is a larger "beavertail" type.

Notes

Make

- "Savage" markings are found on the receiver/frame or barrel.

Model

- in 1930 Savage introduced a line of semi-automatic shotguns based on the Browning model "Auto-5" design that was being produced by Fabrique Nationale of Herstal, Belgium. This model used the long recoil method of operation. Savage offered several variations that were based on this design, all shared the same basic features but differed in the style of barrel and/or choke system. Savage further distinguished these models in factory literature by the number of shots each model could hold, catalogues referred to five and three shot capacities in certain models but these numbers included one cartridge in the chamber so actual capacities were four and two respectively. Although each variation was given a specific model designation (beginning with the model 720) in most factory literature, samples have been noted simply marked "Savage Automatic".
- the model 724 was produced between 1930 and 1949. It would appear that at some point the 16 GA version of the model 721 was re-designated as the model 724.
- features include: American walnut buttstock and forend; round barrel with a raised, solid rib and bead front sight; push-button safety on rear of trigger guard; top of receiver/frame is channelled and matted in line of sight to reduce glare; friction ring adjustment for light or heavy loads.
- other variations include:
- model 720, produced between 1930 and 1949; same as the model 724 but with a plain barrel.
- model 720C, produced between 1946 and 1949; same as model 720 but with a 508mm barrel that featured a Cutts Compensator. The 720C was supplied with a "spreader" and "full" choke tube with a "modified" choke tube available as an option.
- model 720P, produced between 1946 and 1949; same as model 720 but with a 635mm barrel that featured a Poly Choke.
- model 720R introduced in 1940; this is the "Riot" version of the model 720, equipped with a 508mm barrel.
- further models can be found in the "Remarks" field.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "Savage" markings are found on the receiver/frame or barrel.
Action	- recoil operated.
Serial Number	- typically consists of five or six digits marked on the underside of the receiver/frame.
Calibre	- the gauge is marked on the barrel.
Shots	- tubular magazine mounted under the barrel.
Remarks	- further model breakdown is as follows, - model 721, produced between 1930 and 1949: same specifications as the model 720 but equipped with a raised solid rib on the barrel. - model 722, produced between 1930 and 1949: same specifications as the model 720 but equipped with a raised ventilated rib on the barrel. - model 723, produced between 1930 and 1949, it would appear that at some point the 16 GA version of the model 720 was re-designated as the model 723. - model 725, produced between 1930 and 1949: it would appear that at some point the 16 GA version of the model 722 was re-designated as the model 725. - model 726, produced between 1931 and 1949: this is the "Upland Sporter" version of the model 720. It shares all of the features of the model 720 but the magazine capacity is reduced to two shells. - model 727, produced between 1931 and 1949: this is the "Upland Sporter" version of the model 721. It shares all of the features of the model 721 but the magazine capacity is reduced to two shells. - model 728, produced between 1931 and 1949: this is the "Upland Sporter" version of the model 723. It shares all of the features of the model 723 but the magazine capacity is reduced to two shells. - model 740C, produced circa 1946 to 1949; this gun is described in Savage literature as a "Skeet" version of the model 720 with a 508mm barrel equipped with a Cutts Compensator. The walnut buttstock has a grip cap and the forend is a larger "beavertail" type. - model 740P, produced circa 1946 to 1949; this gun is described in Savage literature as a "Skeet" version of the model 720 with a 635mm barrel equipped with a Poly Choke. The walnut buttstock has a grip cap and the forend is a larger "beavertail" type.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "Savage" markings are found on the receiver/frame or barrel.
Model	- in 1930 Savage introduced a line of semi-automatic shotguns based on the Browning model "Auto-5" design that was being produced by Fabrique Nationale of Herstal, Belgium. This model used the long recoil method of operation. Savage offered several variations that were based on this design, all shared the same basic features but differed in the style of barrel and/or choke system. Savage further distinguished these models in factory literature by the number of shots each model could hold, catalogues referred to five and three shot capacities in certain models but these numbers included one cartridge in the chamber so actual capacities were four and two respectively. Although each variation was given a specific model designation (beginning with the model 720) in most factory literature, samples have been noted simply marked "Savage Automatic". - the model 726P, produced between 1931 and 1949 was the "Upland Sporter" version of the model 720P. It shares all of the features of the model 720P but the magazine capacity is reduced to two shells. - features include: American walnut buttstock and forend; plain round barrel with a Poly Choke and bead front sight; push-button safety on rear of trigger guard; top of receiver/frame is channelled and matted in line of sight to reduce glare; friction ring adjustment for light or heavy loads. - other variations include: - model 720, produced between 1930 and 1949; same as the model 726 but magazine capacity is four shells. - model 720C, produced between 1946 and 1949; same as model 720 but with a 508mm barrel that featured a Cutts Compensator. The 720C was supplied with a "spreader" and "full" choke tube with a "modified" choke tube available as an option. - model 720P, produced between 1946 and 1949; same as model 720 but with a 635mm barrel that featured a Poly Choke. - model 720R introduced in 1940; this is the "Riot" version of the model 720, equipped with a 508mm barrel.
Manufacturer	- "Savage" markings are found on the receiver/frame or barrel.
Action	- recoil operated.
Serial Number	- typically consists of five or six digits marked on the underside of the receiver/frame.
Barrel	- standard barrel lengths on the model 726P were 635mm (25") or 660mm (26"), all other Savage "standard" barrel lengths (711mm (28"), 762mm (30")and 813mm (32")) were offered as special order items.
Calibre	- the gauge is marked on the barrel.
Shots	- tubular magazine mounted under the barrel.
Remarks	- further model breakdown is as follows, - model 721, produced between 1930 and 1949: same specifications as the model 720 but equipped with a raised solid rib on the barrel. - model 722, produced between 1930 and 1949: same specifications as the model 720 but equipped with a raised ventilated rib on the barrel. - model 723, produced between 1930 and 1949, it would appear that at some point the 16 GA version of the model 720 was re-designated as the model 723. - model 724, produced between 1930 and 1949: it would appear that at some point the 16 GA version of the model 721 was re-designated as the model 724. - model 725, produced between 1930 and 1949: It would appear that at some point the 16 GA version of the model 722 was re-designated as the model 725. - Model 726, produced between 1931 and 1949: this is the "Upland Sporter" version of the model 720. It shares all of the features of the model 720 but the magazine capacity is reduced to two shells. - model 727, produced between 1931 and 1949: this is the "Upland Sporter" version of the model 721. It shares all of the features of the model 721 but the magazine capacity is reduced to two shells. - model 728, produced between 1931 and 1949: this is the "Upland Sporter" version of the model 723. It shares all of the features of the model 723 but the magazine capacity is reduced to two shells. - model 740C, produced circa 1946 to 1949; this gun is described in Savage literature as a "Skeet" version of the model 720 with a 508mm barrel equipped with a Cutts Compensator. The walnut buttstock has a grip cap and the forend is a larger "beavertail" type. - model 740P, produced circa 1946 to 1949; this gun is described in Savage literature as a "Skeet" version of the model 720 with a 635mm barrel equipped with a Poly Choke. The walnut buttstock has a grip cap and the forend is a larger "beavertail" type.

Model

- in 1930 Savage introduced a line of semi-automatic shotguns based on the Browning model "Auto-5" design that was being produced by Fabrique Nationale of Herstal, Belgium. This model used the long recoil method of operation. Savage offered several variations that were based on this design, all shared the same basic features but differed in the style of barrel and/or choke system. Savage further distinguished these models in factory literature by the number of shots each model could hold, catalogues referred to five and three shot capacities in certain models but these numbers included one cartridge in the chamber so actual capacities were four and two respectively. Although each variation was given a specific model designation (beginning with the model 720) in most factory literature, samples have been noted simply marked "Savage Automatic".
- the model 727, produced between 1931 and 1949 is the "Upland Sporter" version of the model 721. It shares all of the features of the model 721 but the magazine capacity is reduced to two shells.
- features include: American walnut buttstock and forend; round barrel with a raised, solid rib and bead front sight; push-button safety on rear of trigger guard; top of receiver/frame is channelled and matted in line of sight to reduce glare; friction ring adjustment for light or heavy loads.
- other variations include:
- model 720, produced between 1930 and 1949; same as the model 726 but magazine capacity is four shells.
- model 720C, produced between 1946 and 1949; same as model 720 but with a 508mm barrel that featured a Cutts Compensator. The 720C was supplied with a "spreader" and "full" choke tube with a "modified" choke tube available as an option.
- model 720P, produced between 1946 and 1949; same as model 720 but with a 635mm barrel that featured a Poly Choke.
- model 720R introduced in 1940; this is the "Riot" version of the model 720, equipped with a 508mm barrel.

Manufacturer

- "Savage" markings are found on the receiver/frame or barrel.

Action

- recoil operated.

Serial Number

- typically consists of five or six digits marked on the underside of the receiver/frame.

Calibre

- the gauge is marked on the barrel.

Shots

- tubular magazine mounted under the barrel.

Remarks

- further model breakdown is as follows,
- model 721, produced between 1930 and 1949: same specifications as the model 720 but equipped with a raised solid rib on the barrel.
- model 722, produced between 1930 and 1949: same specifications as the model 720 but equipped with a raised ventilated rib on the barrel.
- model 723, produced between 1930 and 1949, it would appear that at some point the 16 GA version of the model 720 was re-designated as the model 723.
- model 724, produced between 1930 and 1949: it would appear that at some point the 16 GA version of the model 721 was re-designated as the model 724.
- model 725, produced between 1930 and 1949: It would appear that at some point the 16 GA version of the model 722 was re-designated as the model 725.
- Model 726, produced between 1931 and 1949: this is the "Upland Sporter" version of the model 720. It shares all of the features of the model 720 but the magazine capacity is reduced to two shells.
- model 728, produced between 1931 and 1949: this is the "Upland Sporter" version of the model 723. It shares all of the features of the model 723 but the magazine capacity is reduced to two shells.
- model 740C, produced circa 1946 to 1949; this gun is described in Savage literature as a "Skeet" version of the model 720 with a 508mm barrel equipped with a Cutts Compensator. The walnut buttstock has a grip cap and the forend is a larger "beavertail" type.
- model 740P, produced circa 1946 to 1949; this gun is described in Savage literature as a "Skeet" version of the model 720 with a 635mm barrel equipped with a Poly Choke. The walnut buttstock has a grip cap and the forend is a larger "beavertail" type.

Notes

Make

- "Savage" markings are found on the receiver/frame or barrel.

Model

- in 1930 Savage introduced a line of semi-automatic shotguns based on the Browning model "Auto-5" design that was being produced by Fabrique Nationale of Herstal, Belgium. This model used the long recoil method of operation. Savage offered several variations that were based on this design, all shared the same basic features but differed in the style of barrel and/or choke system. Savage further distinguished these models in factory literature by the number of shots each model could hold, catalogues referred to five and three shot capacities in certain models but these numbers included one cartridge in the chamber so actual capacities were four and two respectively. Although each variation was given a specific model designation (beginning with the model 720) in most factory literature, samples have been noted simply marked "Savage Automatic".
- the model 740C, produced circa 1946 to 1949 is described in Savage literature as a "Skeet" version of the model 720 with a 508mm barrel equipped with a Cutts Compensator. The walnut buttstock has a grip cap and the forend is a larger "beavertail" type.
- features include: American walnut buttstock and forend; round barrel with a bead front sight; push-button safety on rear of trigger guard; top of receiver/frame is channelled and matted in line of sight to reduce glare; friction ring adjustment for light or heavy loads.
- other variations include:
- model 720, produced between 1930 and 1949; same as the model 726 but magazine capacity is four shells.
- model 720C, produced between 1946 and 1949; same as model 720 but with a 508mm barrel that featured a Cutts Compensator. The 720C was supplied with a "spreader" and "full" choke tube with a "modified" choke tube available as an option.
- model 720P, produced between 1946 and 1949; same as model 720 but with a 635mm barrel that featured a Poly Choke.
- model 720R introduced in 1940; this is the "Riot" version of the model 720, equipped with a 508mm barrel.

Manufacturer

- "Savage" markings are found on the receiver/frame or barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- recoil operated.
Serial Number	- typically consists of five or six digits marked on the underside of the receiver/frame.
Calibre	- the gauge is marked on the barrel.
Shots	- tubular magazine mounted under the barrel.
Remarks	- further model breakdown is as follows, - model 721, produced between 1930 and 1949: same specifications as the model 720 but equipped with a raised solid rib on the barrel. - model 722, produced between 1930 and 1949: same specifications as the model 720 but equipped with a raised ventilated rib on the barrel. - model 723, produced between 1930 and 1949, it would appear that at some point the 16 GA version of the model 720 was re-designated as the model 723. - model 724, produced between 1930 and 1949: it would appear that at some point the 16 GA version of the model 721 was re-designated as the model 724. - model 725, produced between 1930 and 1949: It would appear that at some point the 16 GA version of the model 722 was re-designated as the model 725. - model 726, produced between 1931 and 1949: this is the "Upland Sporter" version of the model 720. It shares all of the features of the model 720 but the magazine capacity is reduced to two shells. - model 727, produced between 1931 and 1949: this is the "Upland Sporter" version of the model 721. It shares all of the features of the model 721 but the magazine capacity is reduced to two shells. - model 728, produced between 1931 and 1949: this is the "Upland Sporter" version of the model 723. It shares all of the features of the model 723 but the magazine capacity is reduced to two shells. - model 740P, produced circa 1946 to 1949; this gun is described in Savage literature as a "Skeet" version of the model 720 with a 635mm barrel equipped with a Poly Choke. The walnut buttstock has a grip cap and the forend is a larger "beavertail" type.

Notes

Make

- "Savage" markings are found on the receiver/frame or barrel.

Model

- in 1930 Savage introduced a line of semi-automatic shotguns based on the Browning model "Auto-5" design that was being produced by Fabrique Nationale of Herstal, Belgium. This model used the long recoil method of operation. Savage offered several variations that were based on this design, all shared the same basic features but differed in the style of barrel and/or choke system. Savage further distinguished these models in factory literature by the number of shots each model could hold, catalogues referred to five and three shot capacities in certain models but these numbers included one cartridge in the chamber so actual capacities were four and two respectively. Although each variation was given a specific model designation (beginning with the model 720) in most factory literature, samples have been noted simply marked "Savage Automatic".
- the model 740P, produced circa 1946 to 1949 is described in Savage literature as a "Skeet" version of the model 720 with a 635mm barrel equipped with a Poly Choke. The walnut buttstock has a grip cap and the forend is a larger "beavertail" type.
- features include: American walnut buttstock and forend; round barrel with a Poly Choke and bead front sight; push-button safety on rear of trigger guard; top of receiver/frame is channelled and matted in line of sight to reduce glare; friction ring adjustment for light or heavy loads.
- other variations include:
- model 720, produced between 1930 and 1949; same as the model 726 but magazine capacity is four shells.
- model 720C, produced between 1946 and 1949; same as model 720 but with a 508mm barrel that featured a Cutts Compensator. The 720C was supplied with a "spreader" and "full" choke tube with a "modified" choke tube available as an option.
- model 720P, produced between 1946 and 1949; same as model 720 but with a 635mm barrel that featured a Poly Choke.
- model 720R introduced in 1940; this is the "Riot" version of the model 720, equipped with a 508mm barrel.

Notes

Make

- the make is marked on the left side of the barrel as, "SAVAGE".

Model

- introduced in 2001.
- "MODEL 93" is marked on the left side of the barrel.
- features include; blued receiver/frame and round barrel; left-handed bolt; a fixed front sight with a adjustable notched rear sight; the safety is located on the right side of the receiver/frame; a hardwood walnut pistol grip stock.
- Savage incorporated their AccuTrigger into the "93" model line in 2006.
- overall length with a 533mm (21") barrel is 1003mm (39.5") average weight is 2.60kg (5.75lbs).

Manufacturer

- the manufacturer is marked on the left side of the barrel as:
"MFG. IN CANADA BY SAVAGE ARMS (CANADA) INC."
"IMPORTED BY SAVAGE ARMS INC. WESTFIELD MA. 01085 U.S.A.".

Action

- turn-bolt design.

Serial Number

- the serial number is marked on the left side of the receiver/frame.
- "01085" is marked on the barrel and is not a serial number.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- the calibre designation is marked on the left side of the barrel as: ".22 W.M.R. ONLY". - rifling characteristics: 1 turn in 406mm (16").
Shots	- detachable box magazine.
Other Markings	- a manufacturer's warning may be marked on the right side of the barrel as: "BEFORE USING READ OWNERS MANUAL AVAILBLE FROM SAVAGE ARMS INC. WESTFIELD MA. 01085 U.S.A.". or "READ OWNERS MANUAL BEFORE USE AVAILBLE FROM SAVAGE ARMS INC. LAKEFIELD ONT. CANADA".

Notes

Make

- the make is marked on the left side of the barrel as, "SAVAGE".

Model

- introduced in 2001.
- "MODEL 93" is marked on the left side of the barrel.
- the Savage model "93LSS" is one exception to the "L" designation in the model name. Normally a "L" in the model name refers to a left-handed receiver/frame. In this model it refers to a laminated stock and "SS" is for stainless steel.
- right handed bolt.
- features include: free floating round stainless steel barrel; stainless steel turn bolt action; detachable box magazine; safety is mounted on the right side of the stainless steel receiver/frame; bead post front sight and adjustable notch rear sight; one piece pistol grip laminated stock.
- Savage incorporated their AccuTrigger into the "93" model line in 2006.

Manufacturer

- the manufacturer is marked on the left side of the barrel as:
"MFG. IN CANADA BY SAVAGE ARMS (CANADA) INC."
"IMPORTED BY SAVAGE ARMS INC. WESTFIELD MA. 01085 U.S.A.".

Serial Number

- the serial number is marked on the left side of the receiver/frame.
- "01085" is marked on the barrel and is not a serial number.

Calibre

- the calibre designation is marked on the left side of the barrel as:
".22 W.M.R. ONLY".

Shots

- detachable single column box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- a manufactures warning may be marked on the right side of the barrel as:
"BEFORE USING READ OWNERS MANUAL AVAILBLE FROM SAVAGE ARMS INC. WESTFIELD MA. 01085 U.S.A.".
or
"READ OWNERS MANUAL BEFORE USE AVAILBLE FROM SAVAGE ARMS INC. LAKEFIELD ONT. CANADA".

Notes

Make

- "SAVAGE MODEL 93R17 CAL. 17 H.M.R. ONLY" over "MFG. BY SAVAGE ARMS (CANADA) INC. LAKEFIELD, ONT. CANADA" over "IMPORTED BY SAVAGE ARMS INC. WESTFIELD, MA. U.S.A. 01085" may be marked on the left side of the barrel.
- "WARNING:" and "BEFORE USING READ OWNERS" over "MANUAL AVAILABLE FROM" over "SAVAGE ARMS INC. WESTFIELD, MA. 01085 U.S.A." may be marked on the right side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "SAVAGE MODEL 93R17 CAL. 17 H.M.R. ONLY" may be marked on the left side of the barrel.
- "93R17" was introduced in 2003.
- "R" in the model designation denotes rimfire, and "17" denotes the calibre.
- Savage incorporated their AccuTrigger into the "93R17" model line in 2006.
- "93R17" may come as a package including scope and a variety of camouflage finish.
- features include: no iron sights; carbon steel or stainless steel round heavy profile barrel; carbon steel or stainless steel tubular receiver/frame is drilled and tapped for scope mounts; safety lever is located on the right side of the receiver/frame; magazine release is located behind the magazine well; one piece wood, laminated or synthetic pistol grip or thumbhole stock with sling swivel studs; blued or satin stainless steel finish.
- "93R17" is available with a factory installed scope as the 93R17XP.

Manufacturer

- "MFG. BY SAVAGE ARMS (CANADA) INC. LAKEFIELD, ONT. CANADA" over "IMPORTED BY SAVAGE ARMS INC. WESTFIELD, MA. U.S.A. 01085" may be marked on the left side of the barrel.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- serial number rationalization is unknown.
- serial number may consist of six or seven numbers without a letter prefix or suffix.
- serial number may consist of a letter "G" prefix and six numbers.
- number "01085" marked on the barrel is not a serial number, this is a United States of America Post Office Department Postal Zip Code.

Calibre

- "CAL. 17 H.M.R. ONLY" may be marked on the left side of the barrel.

Shots

- detachable box magazine.

Other Markings

- a manufactures warning may be marked on the right side of the barrel as:
"BEFORE USING READ OWNERS MANUAL AVAILBLE FROM SAVAGE ARMS INC. WESTFIELD MA. 01085 U.S.A.".
or
"READ OWNERS MANUAL BEFORE USE AVAILBLE FROM SAVAGE ARMS INC. LAKEFIELD ONT. CANADA".

FRT Report

Firearm Reference Number (FRN): 125089
Make: Savage
Model: 93R17BV

Summary

Make:	Savage
Model:	93R17BV
Manufacturer:	Savage
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
125089 - 1	17 HMR	5	533	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SAVAGE MODEL 93R17 CAL. 17 H.M.R. ONLY" over "MFG. BY SAVAGE ARMS (CANADA) INC. LAKEFIELD, ONT. CANADA" over "IMPORTED BY SAVAGE ARMS INC. WESTFIELD, MA. U.S.A. 01085" may be marked on the left side of the barrel.
- "WARNING:" and "BEFORE USING READ OWNERS" over "MANUAL AVAILABLE FROM" over "SAVAGE ARMS INC. WESTFIELD, MA. 01085 U.S.A." may be marked on the right side of the barrel.

Model

- model designation is not marked on the firearm.
- "SAVAGE MODEL 93R17 CAL. 17 H.M.R. ONLY" may be marked on the left side of the barrel.
- "93R17BV" was introduced in 2006.
- the letter "R" denotes a Rimfire, "17" denotes the calibre, the letter "B" denotes a Laminated Stock, and the letter "V" denotes a Heavy Profile Barrel.
- features include: no iron sights; carbon steel round heavy profile barrel; carbon steel steel tubular receiver/frame is drilled and tapped for scope mounts; safety is located on the right side of the receiver/frame; magazine release is located behind the magazine well; one piece laminated pistol grip stock with sling swivel studs; blued finish.
- Savage introduced their AccuTrigger into the "93R17" model line in 2006.

Manufacturer

- "MFG. BY SAVAGE ARMS (CANADA) INC. LAKEFIELD, ONT. CANADA" over "IMPORTED BY SAVAGE ARMS INC. WESTFIELD, MA. U.S.A. 01085" may be marked on the left side of the barrel.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- serial number rationalization is unknown.
- serial number may consist of six or seven numbers without a letter prefix or suffix.
- serial number may consist of a letter "G" prefix and six numbers.
- number "01085" marked on the barrel is not a serial number, this is a United States of America Post Office Department Postal Zip Code.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- "CAL. 17 H.M.R. ONLY" may be marked on the left side of the barrel.
Shots	- detachable box magazine.

Notes

Make

- "SAVAGE MODEL 93R17 CAL. 17 H.M.R. ONLY" over "MFG. BY SAVAGE ARMS (CANADA) INC. LAKEFIELD, ONT. CANADA" over "IMPORTED BY SAVAGE ARMS INC. WESTFIELD, MA. U.S.A. 01085" may be marked on the left side of the barrel.
- "WARNING:" and "BEFORE USING READ OWNERS" over "MANUAL AVAILABLE FROM" over "SAVAGE ARMS INC. WESTFIELD, MA. 01085 U.S.A." may be marked on the right side of the barrel.

Model

- "93R17FNSTB" is not marked on the firearm.
- "MODEL 93R17" is marked on the barrel.
- the letter "R" in the model designation denotes rimfire, "17" denotes the calibre, "F" denotes the use of a synthetic stock, "NS" denotes no sights and "TB" denotes a threaded barrel (at the muzzle).
- features include: no iron sights; round, tapered rifled barrel with threaded muzzle; tubular receiver/frame is drilled and tapped for a scope mount; safety is located on the right side of the receiver/frame; magazine release is located on the rear of the magazine well; one piece synthetic pistol grip stock with sling swivel studs; blued finish.
- overall length with a 533 mm (21") barrel is 1003 mm (39.5"), and average weight is 2.5 kgs (5.5 lbs).
- Savage's AccuTrigger was incorporated into the "93R17" model line in 2006.

Manufacturer

- "MFG. BY SAVAGE ARMS (CANADA) INC. LAKEFIELD, ONT. CANADA" over "IMPORTED BY SAVAGE ARMS INC. WESTFIELD, MA. U.S.A. 01085" may be marked on the left side of the barrel.

Action

- turn-bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- serial number rationalization is unknown.
- serial number may consist of six or seven numbers without a letter prefix or suffix.
- serial number may consist of a letter "G" prefix and six numbers.
- number "01085" marked on the barrel is not a serial number, this is a United States of America Post Office Department Postal Zip Code.

Calibre

- "17 H.M.R. ONLY" is marked on the barrel.

Shots

- detachable box magazine.

Other Markings

- a manufacturers warning is marked on the right side of the barrel as:
"BEFORE USING READ OWNERS MANUAL AVAILBLE FROM SAVAGE ARMS INC. WESTFIELD MA. 01085 U.S.A.".
or
"READ OWNERS MANUAL BEFORE USE AVAILBLE FROM SAVAGE ARMS INC. LAKEFIELD ONT. CANADA".

FRT Report

Firearm Reference Number (FRN): 134298
Make: Savage
Model: 93R17GVTB

Summary

Make:	Savage
Model:	93R17GVTB
Manufacturer:	Savage
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
134298 - 1	17 HMR	5	533	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SAVAGE MODEL 93R17 CAL. 17 H.M.R. ONLY" over "MFG. BY SAVAGE ARMS (CANADA) INC. LAKEFIELD, ONT. CANADA" over "IMPORTED BY SAVAGE ARMS INC. WESTFIELD, MA. U.S.A. 01085" may be marked on the left side of the barrel.
- "WARNING:" and "BEFORE USING READ OWNERS" over "MANUAL AVAILABLE FROM" over "SAVAGE ARMS INC. WESTFIELD, MA. 01085 U.S.A." may be marked on the right side of the barrel.

Model

- introduced in 2010.
- "93R17GVTB" is not marked on the firearm.
- "SAVAGE MODEL 93R17" is marked on the barrel.
- "R" in the model designation denotes rimfire, "17" denotes the calibre, "G" denotes a hardwood stock, "V" denotes a heavy profile barrel, and "TB" denotes a barrel with a threaded muzzle.
- features include: no open sights; round heavy profile carbon steel barrel with a threaded muzzle; carbon steel tubular receiver/frame is drilled and tapped for scope mounts; manual safety is located on the right side of the receiver/frame; AccuTrigger; magazine release is located on the rear of the magazine well; one piece hardwood pistol grip stock with sling swivels studs; blued finish.
- Savage's AccuTrigger was incorporated into the "93R17" model line in 2006.
- overall length with a 533 mm (21.0") barrel is 959 mm (37.75"), and average weight is 2.27 kgs (5.0 lbs).

Manufacturer

- "MFG. BY SAVAGE ARMS (CANADA) INC. LAKEFIELD, ONT. CANADA" over "IMPORTED BY SAVAGE ARMS INC. WESTFIELD, MA. U.S.A. 01085" may be marked on the left side of the barrel.

Action

- turn-bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- serial number rationalization is unknown.
- serial number may consist of six or seven numbers without a letter prefix or suffix.
- serial number may consist of a letter "G" prefix and six numbers.
- number "01085" marked on the barrel is not a serial number, this is a United States of America Post Office Department Postal Zip Code.

Calibre

- calibre is marked on the barrel.
- rifling characteristics: 1 turn in 9 inches (229 mm).

Shots

- detachable box magazine.

118150 - 2	375 WIN	5	559	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is normally marked on the barrel as, "SAVAGE".

Model

- this model was introduced in 1977 and discontinued in 1980.
- the model manufactured in 375 WIN was manufactured 1980 only.
- both version feature an internal rotary magazine.
- model designation is marked on the top of the barrel as:
"MODEL 99 SERIES A".
- after World War One, Savage improved the "Model 1899" series and renamed it the "Model 99".
- features include: blued steel receiver/frame with top ejection, blued straight tappered round barrel, casehardened lever, hammerless with a "cocked" indicator button on top of the receiver/frame, safety is located on the upper tang, a folding adjustable rear sight and a removable gold bead front sight on a raised sight ramp. The receiver/frame is drilled and tapped for a scope mount.
- select walnut straight stock with a heavy cushioned shotgun style buttplate and a plain round tipped forearm with deep finger grooves along the sides. The stock and forearm may have sling swivels.

Manufacturer

- the manufacture is normally marked on the barrel as:
"SAVAGE" with "WESTFIELD, MASS. U.S.A.".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number is marked on the left side of the receiver/frame. - the serial numbers have one alpha character prefix followed by six sequential numbers.
Calibre	- the calibre designation is normally marked on the barrel as: "CAL. 358" or "CAL. 375".
Shots	- internal rotary magazine.
Other Markings	- may have a patent marked on the barrel next to the manufacturers name as: "PATENT 3281979". This number is not a serial number.

Notes

Make

- make is marked on the top of the receiver/frame ring as: "SAVAGE".

Model

- the Savage Model 99A was introduced in 1926 and discontinued in 1936. It was reintroduced in 1971as the "99A Series A" and again discontinued in 1981. Both versions feature an internal rotary magazine.
- after World War One, Savage improved the "Model 1899" series and renamed it the "Model 99". The letters in the model designation may not be marked on early versions of the firearm, but indicate features that are found on a particular model.
- model designation may be marked on the top, side or on the barrel as "MODEL 99".
- was also known as the 99A Early Model or 99A Old Model or 99A Featherweight.
- the "99A Series A" was also known as the 99A Late Model or 99A Saddle Gun.
- features include: blued steel receiver/frame with top ejection, blued tapered round barrel, casehardened lever, hammerless design with "cocked" indicator button on the top of the receiver/frame, safety tab located on the right side of the lever, adjustable rear sight with white metal bead front sight which may be on a raised ramp, straight stock with curved steel buttplate and a tapered forearm with a schnabel tip.
- checkered pistol grip stock was available as an option.

Manufacturer

- manufacturer's designation is marked on the barrel as:
"MANUFACTURED BY SAVAGE ARMS CORP. UTICA. N.Y. U.S.A.",
or
"MANUFACTURED BY SAVAGE ARMS CORPORATION"
or
"SAVAGE ARMS CORPORATION",
or
"SAVAGE ARMS".

Serial Number

- serial number is marked on the underside of the receiver/frame.
- serial number range for firearms manufactured between 1920 and 1936 was approximately 290,000 to 370,000.

Calibre

- calibre designation is normally marked on the barrel.

Shots

- internal rotary magazine.

Other Markings

- marked on the receiver ring or the barrel: "SAVAGE" and "MODEL 99".
- may be marked on the barrel:
"Manufactured by Savage Arms Corp, Utica, N.Y. U.S.A."
"July 25, 1893, Oct. 3, 1899, Sept. 10, 1907, May 25, 1909, June 1, 1909" ---SAVAGE
or

Notes

Make - make is marked on the top of the receiver/frame ring as: "SAVAGE".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured from 1920 to 1934.
- model designation is marked on the top of the receiver/frame ring as:
"MODEL 99".
- after World War One, Savage improved the "Model 1899" series and renamed it the "Model 99". The letters in the model designation may not be marked on the firearm, but indicate features that are found on a particular model.
- the Model 99B is similar to the Model 99A, featuring the take down design in which the barrel and forend can be detached from the receiver/frame and stock by a button located on the underside of the forend.
- features include: blued steel receiver/frame with top ejection, blued round barrel or round tapered barrel, casehardened lever, hammerless with a loaded cocked indicator button on top of the receiver/frame, adjustable rear sight, white metal bead front sight until 1926 when the front sight was placed on a raised sight ramp. - varnished American walnut straight stock and forearm with a crescent butt plate or shotgun style buttplate.
- safety located on the right side of the lever.
- this model featured an accessory 660mm shotgun barrel in 410 X 2 1/2 gauge. With this barrel in place the firearm will operate as a single shot firearm only as the rotary magazine will not accept a shotgun shell.

Manufacturer

- manufacturer's designation is marked on the barrel as:
"MANUFACTURED BY SAVAGE ARMS CORP. UTICA. N.Y. U.S.A.",
or
"MANUFACTURED BY SAVAGE ARMS CORP.",
or
"SAVAGE ARMS CORP.".

Serial Number

- serial number is marked on the receiver/frame.
- serial number range is from approximately 200,000 to 344,000.

Calibre

- calibre designation is marked on the barrel.

Shots

- internal rotary magazine.

Other Markings

- marked on the receiver ring: "SAVAGE" and "MODEL 99"
- may be marked on the barrel as:
"Manufactured by Savage Arms Corp, Utica, N.Y. U.S.A."
"July 25, 1893, Oct. 3, 1899, Sept. 10, 1907, May 25, 1909, June 1, 1909"
or
"Manufactured by Savage Arms Corp Utica, N.Y. U.S.A."
"Mar. 28. 1916 Dec. 26 1916 June. 17. 1919"
or

FRT Report

Firearm Reference Number (FRN): 183804
Make: Savage
Model: 99C

Summary

Make:	Savage
Model:	99C
Manufacturer:	Gabilondo y Cia
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Lever Action
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
183804 - 1	308 WIN	4	559	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "SAVAGE MODEL 99C" over "WESTFIELD, MA. U.S.A. MADE IN SPAIN" is marked on the left side of the barrel.

Model

- "MODEL 99C" is marked on the left side of the barrel.
- this is a Savage 99C manufactured by Gabilondo y Cia (the owner of the "Llama" trade-name") in Spain under contract, during the late 1980s and early 1990s, with a total production of a few thousand.
- uses a detachable box magazine.
- features may include: round, rifled barrel with ramp front sight and adjustable rear sight; steel receiver/frame with top ejection and dovetailed for scope rings; bent closed loop lever with safety tab on the right side; hammerless with a loaded cocked indicator button on top of the receiver/frame; wood stock and forearm; rubber butt pad; blued finish.

Manufacturer

- the manufacturer is not marked on the firearm, but "MADE IN SPAIN" is marked on the barrel.

Serial Number

- serial number may be marked on the lower left side of the receiver/frame.
- serial number of an observed example is an "L" prefix followed by six numbers.
- the "L" prefix may or may not denote Spanish production model 99 firearms.

Calibre

- "308 WIN" is marked on the left side of the barrel.

Shots

- detachable box magazine.

Notes

Make - make is marked on the top of the receiver/frame ring as: "SAVAGE".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "MODEL 99" is marked on top of the receiver/frame ring. - manufactured from 1922 to approximately 1927. - this lever action repeating rifle uses an internal rotary magazine. - do not confuse with the new model "99C Clip Magazine" which uses a detachable box magazine, that was introduced in 1965. - after World War I, Savage improved the "Model 1899" series and renamed it the "Model 99". The letters in the model designation may not be marked on the firearm, but indicate features that are found on a particular model. - the Model 99C has a straight grip shotgun style butt plate and a round untapered barrel. The butt plate is straight in appearance unlike other Model 99's where the butt plate has an identifiable curve to it. - features include: blued steel receiver/frame with top ejection; blued round barrel; case-hardened lever; hammerless with a loaded cocked indicator button on top of the receiver/frame; adjustable rear sight with a white metal bead front sight - until 1926 when the front sight was placed on a raised sight ramp; varnished American walnut straight stock and forearm; safety tab is located on the right side of the lever.
Manufacturer	- manufacturer's designation is marked on the barrel as: "MANUFACTURED BY SAVAGE ARMS CORP. UTICA. N.Y. U.S.A.".
Serial Number	- serial number is marked on the receiver/frame. - serial number range is from approximately 238,000 to 290,000.
Calibre	- calibre designation is marked on the barrel.
Shots	- internal rotary magazine.
Other Markings	- may be marked on the barrel as: "Manufactured by Savage Arms Corp, Utica, N.Y. U.S.A." "July 25, 1893, Oct. 3, 1899, Sept. 10, 1907, May 25, 1909, June 1, 1909" or "Manufactured by Savage Arms Corp Utica, N.Y. U.S.A." "Mar. 28. 1916 Dec. 26 1916 June. 17. 1919" or "Manufactured by Savage Arms Corp, Utica, N.Y. U.S.A." "July 25, 1893, Oct. 3, 1899, Sept. 10, 1907, May 25, 1909, June 1, 1909" ---SAVAGE

Notes

Make

- marked on the left side of the receiver ring "SAVAGE MODEL 99C".

Model

- the Model 99C Clip Magazine was introduced in 1965, featuring a detachable magazine.
- do not confuse with the Model "99C" that features an internal rotary magazine and was manufactured from 1922 to 1927.
- model designation may be marked on the left side of the receiver/frame or on the barrel as: "MODEL 99C".
- features include: blued steel receiver/frame with top ejection, blued round barrel or round tapered barrel, casehardened lever, gold plated trigger, hammerless with gold plated "cocked" indicator button on top of the receiver/frame, adjustable rear sight, safety located on the top tang, magazine release button located on the right side of the receiver/frame and the receiver/frame has been drilled and tapped for a scope mount.
- front sight is a gold bead placed on a raised sight ramp which may be removed.
- varnished American walnut stock and forearm with checkered pistol grip with cap, buttplate may be steel, aluminum or hard rubber and the forearm may be checkered or have deep finger grooves along the sides.
- in 1969 the model "99C Clip Magazine" was improved and replaced with the model "99C Series A".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- marked on top of the mid-barrel "SAVAGE ARMS - WESTFIELD, MASS. U.S.A.".
Serial Number	- marked on the mid-underside of the receiver, behind the magazine well. Starting at 1,080, 000. - later units located on left side of frame on lower edge: (new "A" series).
Calibre	- marked on the left side of the receiver ring.
Shots	- detachable box magazine.
Other Markings	- marked on right side of the receiver ring: PATENT 3,281,979 - marked on the right side of the barrel, chamber end: HI-PRESSURE STEEL - PROOF TESTED

Notes

Make

- the make is normally marked on the barrel as, "SAVAGE".

Model

- introduced in 1969 when the model "99C Clip Magazine" was improved and became the model "99C Series A".
- the model "99C Series A" features a detachable magazine.
- model designation is normally marked on the barrel as: "MODEL 99C SERIES A".
- features include: blued steel receiver/frame with top ejection, blued round tapered barrel, casehardened lever, blued trigger, hammerless with gold plated "cocked" indicator button on top of the receiver/frame, safety located on the top tang, magazine release button located on the right side of the receiver/frame and the receiver/frame has been drilled and tapped for a scope mount.
- adjustable rear sight; front sight may be a gold bead with a hood and placed on a raised sight ramp. Both sights may be removable.
- varnished American walnut stock and forearm with checkered pistol grip with cap, buttplate may be steel, aluminum or hard rubber and the forearm may be checkered or have deep finger grooves along the sides.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the manufacturer is normally marked on the barrel as: "SAVAGE" with "WESTFIELD. MASS. U.S.A.".
Serial Number	- the serial number is marked on the left side of the receiver/frame. - the serial numbers have one alpha character prefix followed by six sequential numbers, eg. "E122755".
Calibre	- the calibre designation is normally marked on the barrel.
Shots	- detachable box magazine.
Other Markings	- may have a patent marked on the barrel next to the manufacturers name as: "PATENT 3281979".

Notes

Make

- make is marked on the top of the receiver/frame ring as: "SAVAGE".

Model

- manufactured from 1922 to approximately 1927.
- model designation is marked on the top of the receiver/frame ring as:
"MODEL 99".
- after World War One, Savage improved the "Model 1899" series and renamed it the "Model 99". The letters in the model designation may not be marked on the firearm, but indicate features that are found on a particular model.
- the Model 99D is similar to the Model 99C, featuring the take down design in which the barrel and forend can be detached from the receiver/frame and stock by a button located on the underside of the forend. The model 99D has a shotgun style buttplate and a round untapered barrel.
- features include: blued steel receiver/frame with top ejection, blued round barrel, casehardened lever, hammerless with a loaded cocked indicator button on top of the receiver/frame, adjustable rear sight with a white metal bead front sight until 1926 when the front sight was placed on a raised sight ramp.
- varnished American walnut straight stock and forearm with a shotgun style buttplate.
- safety tab is located on the right side of the lever.
- this model featured an accessory 660mm shotgun barrel in 410 X 2 1/2 gauge. The firearm will operate as a single shot firearm only as the rotary magazine will not accept a shotgun shell.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- manufacturer's designation is marked on the barrel as: "MANUFACTURED BY SAVAGE ARMS CORP. UTICA. N.Y. U.S.A.".
Serial Number	- serial number is marked on the receiver/frame. - serial number range is from approximately 238,000 to 290,000.
Calibre	- calibre designation is marked on the barrel.
Other Markings	- may be marked on the barrel as: "Manufactured by Savage Arms Corp, Utica, N.Y. U.S.A." "July 25, 1893, Oct. 3, 1899, Sept. 10, 1907, May 25, 1909, June 1, 1909" or "Manufactured by Savage Arms Corp Utica, N.Y. U.S.A." Notes

Make	- make is marked on the top of the receiver/frame ring as: "SAVAGE".
Model	- manufactured from 1960 to 1969 with an internal rotary magazine. - model designation is marked on the top of the receiver/frame ring as: "MODEL 99". - after World War One, Savage improved the "Model 1899" series and renamed it the "Model 99". The letters in the model designation may not be marked on the firearm, but indicate features that are found on a particular model. - features include: blued steel receiver/frame with top ejection, blued lightweight round barrel, casehardened lever, hammerless with a gold plated "cocked" indicator button on top of the receiver/frame, gold plated trigger, safety is located on the upper tang, folding adjustable rear sight and gold bead front sight on a raised sight ramp. The receiver/frame is drilled and tapped for a scope mount. - select walnut capped pistol grip stock with a flat aluminum serrated shotgun style buttplate and straight tapered forearm with round tip and checkering on the side. The stock and forearm may have sling swivels. - in 1969 the model "99DL" was improved and became the model "99DL Series A".
Manufacturer	- manufacturer's designation is marked on the barrel in two lines as: "SAVAGE ARMS" / "WESTFIELD, MASS. U.S.A.".
Serial Number	- serial number is marked on the receiver/frame. - serial number range starts at approximately 1,000,000. - on late models the serial number is located on lower left side of the receiver/frame, in the new 'A' series.
Calibre	- calibre designation is normally marked on the barrel.
Shots	- internal rotary magazine.

Notes

Make

- make is marked on the barrel as: "SAVAGE".

Model

- introduced in 1969 when the model "99DL" was improved and became the model "99DL Series A".
- the model "99DL Series A" features an internal rotary magazine.
- model designation is normally marked on the barrel as:"MODEL 99DL SERIES A".
- features include: blued steel receiver/frame with top ejection, blued lightweight round barrel, casehardened lever, hammerless with a gold plated "cocked" indicator button on top of the receiver/frame, gold plated trigger, safety is located on the upper tang, folding adjustable rear sight and gold bead front sight on a raised sight ramp. The receiver/frame is drilled and tapped for a scope mount.
- select walnut high comb monte carlo stock with a capped pistol grip and a flat aluminum serrated shotgun style buttplate and straight tapered forearm with round tip and checkering on the side. The stock and forearm may have sling swivels.

Manufacturer

- manufacturer's designation is marked on the barrel in two lines as:
"SAVAGE ARMS" / "WESTFIELD, MASS. U.S.A.".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number is marked on the left side of the receiver/frame. - the serial numbers have one alpha character prefix followed by six sequential numbers.
Calibre	- the calibre designation is normally marked on the barrel.
Shots	- internal rotary magazine.
Other Markings	- may have a patent marked on the barrel next to the manufacturers name as: "PATENT 3281979".

Notes

Make

- make is marked on the receiver/frame ring as: "SAVAGE".

Model

- the Savage Model 99E was first introduced in 1922 and discontinued in 1934, it was reintroduced in 1960. Both versions feature an internal rotary magazine.
- after World War One, Savage improved the "Model 1899" series and renamed it the "Model 99". The letters in the model designation may not be marked on early versions of the firearm, but indicate features that are found on a particular model.
- in the early version the model is marked on top of the receiver/frame ring as: "MODEL 99". The later version is marked on the side of the receiver/frame ring as: "MODEL 99E".
- early version also known as the 99 E Light Weight or 99E Old Model.
- later version of 1960 also known as the 99 E "Economy Carbine".
- in 1969 the model "99E" was improved and replaced with the model "99E Series A".
- from 1967 to 1974 a scoped version was available and known as the "99ES".
- features of the early version include: blued steel receiver/frame with top ejection, blued tapered lightweight round barrel, casehardened lever, hammerless design with "cocked" indicator button on the top of the receiver/frame, adjustable rear sight with white metal bead front sight which may be on a raised ramp, straight stock with serrated steel buttplate and the forearm has a schnabel tip.
- features of the later version include: blued steel receiver/frame with top ejection, blued straight tapered medium weight round barrel, casehardened lever, hammerless design with "cocked" indicator button on the top of the receiver/frame, receiver/frame is drilled and tapped for a scope mount, adjustable rear sight with white metal bead front sight which may be on a raised ramp, both sights may be removable, shotgun style uncapped pistol grip stock with serrated steel buttplate, forearm may be tapered with schnabel or round tip with or without checkering, or the forearm may be smooth with finger groves along the sides.
- on both versions the safety tab is located on the right side of the lever.

Manufacturer

- manufacturer's designation is marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the receiver/frame.
- on the early version the serial number range is approximately 238,000 to 344,000 without prefix or suffix.
- later units located on left side of receiver/frame on lower edge. One alpha character, "A", followed by six sequential numbers.

Calibre

- calibre designation is normally marked on the barrel.

Shots

- internal rotary magazine.

Other Markings

- on the early versions the barrel may be marked as:
"Manufactured by Savage Arms Corp, Utica, N.Y. U.S.A."
"July 25, 1893, Oct. 3, 1899, Sept. 10, 1907, May 25, 1909, June 1, 1909"
or
"Manufactured by Savage Arms Corp Utica, N.Y. U.S.A."
"Mar. 28. 1916 Dec. 26 1916 June. 17. 1919"
or
"Manufactured by Savage Arms Corp, Utica, N.Y. U.S.A."
"July 25, 1893, Oct. 3, 1899, Sept. 10, 1907, May 25, 1909, June 1, 1909" ---SAVAGE
or
"Manufactured by Savage Arms Corporation"
"Utica. N.Y. U.S.A Pat'd. May 25,1909, June 1, 1909" ---- SAVAGE
or
SAVAGE "Savage Arms Corporation"
"Utica. N.Y. Made in U.S.A."
or
"Savage Arms Corporation"
"Utica. N.Y. ---- Made in U.S.A."
- on the later versions the barrel is normally marked as:
"------- Savage Arms ---------"
"Westfield, Mass. U.S.A."
- the left side of the barrel is normally marked:
"HI PRESSURE STEEL - PROOFTESTED"

Notes

Make

- make is marked on the top of the receiver/frame ring as: "SAVAGE".

Model

- manufactured from 1920 to 1940.
- model designation is marked on the left of the receiver/frame ring as:
"MODEL 99". A model marking of "F" is usually found on the front of the receiver/frame.
- do not confuse with the model "99F Featherweight" of 1955 to 1973 which was manufactured without the take down feature.
- after World War One, Savage improved the "Model 1899" series and renamed it the "Model 99". The letters in the model designation may not be marked on the firearm, but indicate features that are found on a particular model.
- the Model 99F is similar to the Model 99E of 1922 to 1934, featuring the take down design in which the barrel and forend can be detached from the receiver/frame and stock by a button located on the underside of the forend.
- features include: blued steel receiver/frame with top ejection, blued tapered lightweight round barrel, casehardened lever, hammerless with "cocked" indicator button on top of the receiver/frame, adjustable rear sight, white metal bead front sight until 1926 when the front sight was placed on a raised sight ramp.
- varnished American walnut straight stock with a flat serrated shotgun style buttplate and forearm with a schnabel tip.
- safety located on the right side of the lever.
- this model featured an accessory 559 or 610mm shotgun barrel in 410 X 2 1/2 gauge. With this barrel in place the firearm will operate as a single shot firearm only as the rotary magazine will not accept a shotgun shell.

Manufacturer

- manufacturer's designation is marked on the barrel as:
"MANUFACTURED BY SAVAGE ARMS CORP. UTICA. N.Y. U.S.A.",
or
"MANUFACTURED BY SAVAGE ARMS CORP.",
or
"MANUFACTURED BY SAVAGE ARMS CORPORATION",
or
"SAVAGE ARMS CORPORATION".

Serial Number

- serial number may be marked on the receiver/frame.
- serial number range is from approximately 200,000 to 398,000.

Calibre

- calibre designation is normally marked on the barrel.

Shots

- internal rotary magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- may be marked on the barrel:
"Manufactured by Savage Arms Corp, Utica, N.Y. U.S.A."
"July 25, 1893, Oct. 3, 1899, Sept. 10, 1907, May 25, 1909, June 1, 1909"
or
"Manufactured by Savage Arms Corp Utica, N.Y. U.S.A."
"Mar. 28. 1916 Dec. 26 1916 June. 17. 1919"
or
"Manufactured by Savage Arms Corp, Utica, N.Y. U.S.A."
"July 25, 1893, Oct. 3, 1899, Sept. 10, 1907, May 25, 1909, June 1, 1909" ---SAVAGE

Notes

Make

- "SAVAGE" is marked on the receiver ring.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "MODEL 99F" is marked on the receiver ring.
- manufactured from 1955 to 1969.
- do not confuse with the model "99F" of 1920 to 1940 which was manufactured with the take down feature.
- after World War I, Savage improved the "Model 1899" series and renamed it the "Model 99".
- features include: blued steel receiver/frame with top ejection, blued lightweight round barrel, case-hardened lever, hammerless with "cocked" indicator button on top of the receiver/frame, gold plated or blued trigger, adjustable rear sight which may fold down and a gold bead front sight on a raised ramp.
- select walnut checkered capped pistol grip stock with flat corrugated steel or aluminum shotgun style butt plate and a slim tapered round tipped forearm with checkering on the sides and underside.
- safety was located on the right side of the lever until 1960 at which time the safety was relocated to the top tang.
- receiver/frame predrilled and tapped for scope mount, rear tang predrilled and tapped for micrometer rear sight.
- in 1969 the model "99F Featherweight" was improved and replaced with the model "99F Series A".

Manufacturer

- "SAVAGE ARMS CORPORATION" and "CHICOPEE FALLS, MASS. U.S.A.", or "SAVAGE ARMS" and "WESTFIELD, MASS. U.S.A.".

Serial Number

- serial number range starts at 750,000.
- serial number is marked on the underside of the receiver/frame.
- on later units the serial number is located on left side of the receiver/frame on the lower edge.
- an observed example consisted of an alpha character "A", followed by six numbers.

Calibre

- calibre designation is marked on the barrel.

Shots

- internal rotary box magazine.

Notes

Make

- make is marked on the barrel as: "SAVAGE".

Model

- introduced in 1969 and discontinued in 1973.
- in 1969 the model "99F Featherweight" was improved and became the model "99F Series A".
- the model "99F Series A" features an internal rotary magazine.
- model designation is normally marked on the barrel as:
"MODEL 99F SERIES A".
- this model may also be know as the "99F Featherweight".
- features include: blued steel receiver/frame with top ejection, blued lightweight round barrel, casehardened lever, hammerless with "cocked" indicator button on top of the receiver/frame, blued trigger, safety is located on the upper tang, adjustable rear sight which may fold down and a gold bead front sight on a raised ramp.
- select walnut checkered capped pistol grip stock with flat corrugated steel or aluminum shotgun style buttplate and a slim tapered round tipped forearm with checkering on the sides.
- receiver/frame predrilled and tapped for scope mount, rear tang predrilled and tapped for micrometer rear sight.

Manufacturer

- manufacturer's designation is marked on the barrel as:
"SAVAGE" / " WESTFIELD, MASS. U.S.A.".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number is marked on the left side of the receiver/frame. - the serial numbers have one alpha character prefix followed by six sequential numbers.
Calibre	- the calibre designation is normally marked on the barrel.
Shots	- internal rotary magazine.
Other Markings	- may have a patent marked on the barrel next to the manufacturers name as: "PATENT 3281979".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make	- make is marked on the top of the receiver/frame ring as: "SAVAGE".
Model	- manufactured from 1920 to 1941. - model designation is marked on the top of the receiver/frame ring as: "MODEL 99". A model marking of "G" is usually found on the front of the receiver/frame. - after World War One, Savage improved the "Model 1899" series and renamed it the "Model 99". The letters in the model designation may not be marked on the firearm, but indicate features that are found on a particular model. - the Model 99G is similar to the Model 99F of 1922 to 1940, featuring a pistol grip stock which is checkered and a take down design in which the barrel and forend can be detached from the receiver/frame and stock by a button located on the underside of the forend. - features include: blued steel receiver/frame with top ejection, blued tapered medium weight round barrel, casehardened lever, hammerless with a "cocked" indicator button on top of the receiver/frame, adjustable rear sight, white metal bead front sight until 1928 when the front sight was placed on a raised sight ramp. - varnished American walnut pistol grip stock with a flat serrated shotgun style buttplate and a forearm with a schnabel tip. The sides of the forearm and the pistol grip will be checkered. - safety is located on the right side of the lever. - this model featured an accessory 559 or 610mm shotgun barrel in 410 X 2 1/2 gauge. With this barrel in place the firearm will operate as a single shot firearm only as the rotary magazine will not accept a shotgun shell.
Manufacturer	- manufacturer's designation is marked on the barrel as: "MANUFACTURED BY SAVAGE ARMS CORP. UTICA. N.Y. U.S.A.", or "MANUFACTURED BY SAVAGE ARMS CORP.", or "MANUFACTURED BY SAVAGE ARMS CORPORATION", or "SAVAGE ARMS CORPORATION".
Serial Number	- serial number is marked on the receiver/frame. - serial number range is from approximately 238,000 to 407,000.
Calibre	- calibre designation is normally marked on the barrel.
Shots	- internal rotary magazine.
Other Markings	- may be marked on the barrel: "Manufactured by Savage Arms Corp, Utica, N.Y. U.S.A." "July 25, 1893, Oct. 3, 1899, Sept. 10, 1907, May 25, 1909, June 1, 1909" or "Manufactured by Savage Arms Corp Utica, N.Y. U.S.A." "Mar. 28. 1916 Dec. 26 1916 June. 17. 1919" or "Manufactured by Savage Arms Corp, Utica, N.Y. U.S.A." "July 25, 1893, Oct. 3, 1899, Sept. 10, 1907, May 25, 1909, June 1, 1909" ---SAVAGE or "Manufactured by Savage Arms Corporation" "Utica. N.Y. U.S.A Pat'd. May 25,1909, June 1, 1909" ---- SAVAGE or SAVAGE "Savage Arms Corporation" "Utica. N.Y. Made in U.S.A." or "Savage Arms Corporation" "Utica. N.Y. ---- Made in U.S.A."

Notes

Make - make is marked on the barrel as: "SAVAGE ARMS CORP.".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured from 1926 to 1940.
- model designation is normally not marked on this firearm as the receiver/frame and the ring are engraved. A model marking of "K" is usually found on the front of the receiver/frame.
- after World War One, Savage improved the "Model 1899" series and renamed it the "Model 99". The letters in the model designation may not be marked on the firearm, but indicate features that are found on a particular model.
- this model was the last of the Savage Model 99 take down design in which the barrel and forend could be detached from the receiver/frame and stock by a button located on the underside of the forend.
- features include: engraved blued steel receiver/frame with top ejection, engraved blued tapered lightweight round barrel, casehardened lever, hammerless with "cocked" indicator button on top of the receiver/frame, Lyman rear sight located at the rear of the receiver/frame, folding middle sight, and white bead or gold bead front sight.
- varnished American walnut pistol grip stock with flat corrugated steel shotgun style buttplate and forearm with a schnabel tip. The sides of the forearm and the pistol grip will be checkered.
- safety located on the right side of the lever.
- this model featured an accessory 559 or 610mm shotgun barrel in 410 X 2 1/2 gauge. With this barrel in place the firearm will operate as a single shot firearm only as the rotary magazine will not accept a shotgun shell.

Manufacturer

- manufacturer's designation is marked on the barrel as:
"MANUFACTURED BY SAVAGE ARMS CORP. UTICA. N.Y. U.S.A.",
or
"MANUFACTURED BY SAVAGE ARMS CORP.",
or
"MANUFACTURED BY SAVAGE ARMS CORPORATION",
or
"SAVAGE ARMS CORPORATION".

Serial Number

- serial number is marked on the receiver/frame.
- serial number range is from approximately 285,000 to 498,000.

Calibre

- calibre designation may be marked on the barrel.

Shots

- internal rotary magazine.

Other Markings

- may be marked on the barrel:
"Manufactured by Savage Arms Corp, Utica, N.Y. U.S.A."
"July 25, 1893, Oct. 3, 1899, Sept. 10, 1907, May 25, 1909, June 1, 1909" ---SAVAGE

Notes

Make - make is marked on the receiver/frame ring as: "SAVAGE", or on the barrel as: "SAVAGE ARMS".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- model designation is normally marked on the receiver/frame ring or on the barrel as "Model 99-M".
- this model designation was used from 1955 to 1973 on models with an internal rotary magazine.
- this is not a traditional model number, the "M" is a designation for "Monte Carlo" stock and was used on the Savage Model: 99F, 99PE, 99DE, 99DL and 99DL Series A.
- features include: blued or engraved unblued receiver/frame with top ejection, blued lightweight round barrel, lever may or may not be casehardened, hammerless with a gold plated "cocked" indicator button on top of the receiver/frame, gold plated trigger, safety located on the upper tang or on the right side of the lever, folding adjustable rear sight and gold bead front sight on a raised sight ramp.
- receiver/frame is drilled and tapped for a scope mount.
- select walnut Monte Carlo stock with checkered and capped pistol grip, flat corrugated steel or aluminum shotgun style buttplate.
- forearm may be a slim taper with round tip and checkering on the sides and on some models checkering on the underside.

Manufacturer

- manufacturer's designation is marked on the barrel as:
"SAVAGE ARMS CORPORATION"
"CHICOPEE FALLS, MASS. U.S.A.",
or
"SAVAGE ARMS"
"WESTFIELD, MASS. U.S.A.".

Serial Number

- serial number is marked on the receiver/frame.
- serial number range starts at 750,000.
- on late models the serial number is located on lower left side of the receiver/frame, in the new 'A' series.

Calibre

- calibre designation is marked on the barrel.

Shots

- internal rotary magazine.

Model

- manufactured from 1965 to 1970 with an internal rotary magazine.
- model designation is normally not marked on this firearm. This model is identifiable by the level of the engraving on the receiver/frame.
- after World War One, Savage improved the "Model 1899" series and renamed it the "Model 99". The letters in the model designation may not be marked on the firearm, but indicate features that are found on a particular model.
- unblued receiver/frame has a protective finish and is engraved with scroll work on the sides, top, underside, upper and lower tang and lever.
- right side of the receiver/frame features a picture of a Mountain Lion and the left a picture of a Elk.
- features include: top ejection, blued lightweight round barrel, lever is not casehardened, hammerless with gold plated "cocked" indicator button on top of the receiver/frame, gold plated trigger, gold plated safety located on the upper tang, folding adjustable rear sight and gold bead front sight on a raised sight ramp.
- receiver/frame is drilled and tapped for a scope mount.
- select rich grain walnut Monte Carlo stock with a checkered and capped pistol grip, aluminum shotgun style buttplate, straight taper forend with round tip and checkering on the sides.
- stock and forearm may have sling swivels.

Manufacturer

- manufacturer's designation is marked on the barrel in two lines as:
"SAVAGE ARMS" / "WESTFIELD, MASS. U.S.A.".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the underside of the receiver/frame. - serial number range starts at approximately 1,140,000.
Calibre	- calibre designation is normally marked on the barrel.
Shots	- internal rotary magazine.

Notes

Make - make is marked on the receiver/frame ring as: "SAVAGE".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured from 1932 to 1960.
- model designation is marked on the top of the receiver/frame ring as:
"MODEL 99".
- after World War One, Savage improved the "Model 1899" series and renamed it the "Model 99". The letters in the model designation may not be marked on the firearm, but indicate features that are found on a particular model.
- this model was not manufactured between 1942 to 1946 due to World War Two.
- models manufactured before 1942 are known as the "99R Early Model" and models manufactured after 1946 are known as the "99R Late Model".
- features include: blued steel receiver/frame with top ejection, blued tapered medium weight round barrel, casehardened lever, hammerless with "cocked" indicator button on top of the receiver/frame, adjustable rear sight, with gold bead front sight.
- select walnut checkered capped pistol grip stock with flat corrugated steel shotgun style buttplate, semi-beavertail forearm with round tip and checkering on the sides and bottom or on the side only.
- safety located on the right side of the lever.
- stock is larger and heavier then on other Savage Model 99s.
- starting in 1950 the receiver/frame was predrilled and tapped for a scope.

Manufacturer

- manufacturer's designation is marked on the barrel as:
"SAVAGE ARMS CORPORATION"
"UTICA, N.Y.-----MADE IN U.S.A.",
or
"SAVAGE ARMS CORPORATION"
"CHICOPEE FALLS, MASS. U.S.A.".

Serial Number

- serial number is marked on the receiver/frame.
- serial number range is from approximately 340,000 to 1,060,000.

Calibre

- calibre designation is marked on the barrel.

Shots

- internal rotary magazine.

Notes

Make

- "Savage" is marked on the firearm.

Model

- "A17" or variation thereof is marked on the barrel.
- this is a delayed-blowback 17 HMR rifle introduced in 2015, with a unique bolt locking system that momentarily delays the opening of the breech, in order to prevent case blowouts; as the bolt starts to the rear, it must cam a locking-block in the top of the bolt downwards, and that additional delay allows the mechanism to operate properly.
- features include: blued steel barrel; anodized receiver/frame; oversize cocking knob; adjustable trigger; scope rail system; cross-bolt safety at the front of the trigger guard; black synthetic full pistol grip stock with sling swivel studs and a recoil pad.
- overall length is 1054mm/41.5" and the average weight is 2.54kgs/5.6lbs.

Manufacturer

- "Savage" is marked on the firearm.

Action

- delayed blowback.

Serial Number

- serial-numbered on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- rifling characteristics: one turn in 9 inches.
Shots	- detachable rotary magazine.

Notes

Make

- the Savage name was marked on the left side of the receiver/frame on the sample examined.

Model

- in 1930 Savage introduced a line of semi-automatic shotguns based on the Browning model "Auto-5" design that was being produced by Fabrique Nationale of Herstal, Belgium. This model used the long recoil method of operation. Savage offered several variations that were based on this design, all shared the same basic features but differed in the style of barrel and/or choke system. Savage further distinguished these models in factory literature by the number of shots each model could hold, catalogues referred to five and three shot capacities in certain models but these numbers included one cartridge in the chamber so actual capacities were four and two respectively. Although each variation was given a specific model designation in most factory literature, samples have been noted simply marked "Savage Automatic".
- features include: American walnut buttstock and forend; plain round barrel with a bead front sight; push-button safety on rear of trigger guard; top of receiver/frame is channeled and matted in line of sight to reduce glare; friction ring adjustment for light or heavy loads.
- other variations include:
- model 720, produced between 1930 and 1949: five shots, 12 GA or 16 GA; American walnut buttstock and forend; plain round barrel with a bead front sight.
- model 720C, produced between 1946 and 1949; same as model 720 but with a 508mm barrel that featured a Cutts Compensator. The 720C was supplied with a "spreader" and "full" choke tube with a "modified" choke tube available as an option.
- model 720P, produced between 1946 and 1949; same as model 720 but with a 635mm barrel that featured a Poly Choke.
- model 720R introduced in 1940; this is the "Riot" version of the model 720, equipped with a 508mm barrel.
- further models can be found in the "Remarks" field.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the Savage name was marked on the left side of the receiver/frame on the sample examined.
Action	- recoil operated.
Serial Number	- sample examined was numbered on the underside of the receiver/frame.
Calibre	- the gauge is marked on the barrel.
Shots	- tubular magazine mounted under the barrel.
Remarks	- further model breakdown is as follows, - model 721, produced between 1930 and 1949: same specifications as the model 720 but equipped with a raised solid rib on the barrel. - model 722, produced between 1930 and 1949: same specifications as the model 720 but equipped with a raised ventilated rib on the barrel. - model 723, produced between 1930 and 1949: it would appear that at some point the 16 GA version of the model 720 was re-designated as the model 723. - model 724, produced between 1930 and 1949: it would appear that at some point the 16 GA version of the model 721 was re-designated as the model 724. - model 725, produced between 1930 and 1949: it would appear that at some point the 16 GA version of the model 722 was re-designated as the model 725. - model 726, produced between 1931 and 1949: this is the "Upland Sporter" version of the model 720. It shares all of the features of the model 720 but the magazine capacity is reduced to two shells. - model 727, produced between 1931 and 1949: this is the "Upland Sporter" version of the model 721. It shares all of the features of the model 721 but the magazine capacity is reduced to two shells. - model 728, produced between 1931 and 1949: this is the "Upland Sporter" version of the model 723. It shares all of the features of the model 723 but the magazine capacity is reduced to two shells. - model 740C, produced circa 1946 to 1949; this gun is described in Savage literature as a "Skeet" version of the model 720 with a 508mm barrel equipped with a Cutts Compensator. The walnut buttstock has a grip cap and the forend is a larger "beavertail" type. - model 740P, produced circa 1946 to 1949; this gun is described in Savage literature as a "Skeet" version of the model 720 with a 508mm barrel equipped with a Poly Choke. The walnut buttstock has a grip cap and the forend is a larger "beavertail" type.

Notes

Make

- "SAVAGE ARMS INC." is marked on the left side of the barrel.

Model

- "SAVAGE AXIS" is usually marked on the left side of the barrel.
- introduced in 2010.
- features include: round tapered carbon steel or stainless steel barrel without iron sights; carbon steel or stainless steel receiver/frame is drilled and tapped for scope mounts; rear tang mounted safety; one piece black or camouflage synthetic pistol grip stock with recoil pad and sling swivel studs; matte black or stainless steel finish.
- available in a long or short action.
- available with a 3-9x40 Scope mounted.
- available in youth version.
- overall length with a 508mm (20") barrel is 1016mm (40") and with a 559mm (22.0") barrel is 1114mm (43.875") and average weight is 2.95 kg (6.5 lbs).
- "EDGE" series was redesignated the Savage model "AXIS" in 2010.
- the Savage "AXIS" has been made in both rimfire and centrefire versions, each with a different dedicated receiver, but they are each marked "AXIS" with a calibre designation; the rimfire "AXIS" was made in limited quantities, and is now replaced by the Mark II, using the same action/receiver and features.
- overall length of the centrefire version with a 508mm (20") barrel is 1016mm (40") and with a 559mm (22.0") barrel is 1114mm (43.875") and average weight is 2.95 kg (6.5 lbs).
- overall length of the rimfire version with a 533mm (21") barrel is 1003mm (39 1/2") and average weight is 3.4 kg (7.5 lbs).
- Overall length with a 457 mm (18 inches) barrel is 978 mm (38.5 inches), average weight is 2.6 kg (5.8 lbs).

Manufacturer

- "SAVAGE ARMS INC." is marked on the left side of the barrel.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the left rear side of the receiver/frame.
- serial number observed consisted of a letter prefix and six numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- calibre is usually marked on the left side of the barrel.
- rifling characteristics in calibre 22-250 REM: 1 turn in 12 inches, right hand twist.
- rifling characteristics in calibre 223 REM: 1 turn in 9 inches, right hand twist.
- rifling characteristics in calibre 243 WIN: 1 turn in 9.25 inches, right hand twist.
- rifling characteristics in calibre 25-06 REM: 1 turn in 10 inches, right hand twist.
- rifling characteristics in calibre 270 WIN: 1 turn in 10 inches, right hand twist.
- rifling characteristics in calibre 30-06 SPRG: 1 turn in 10 inches, right hand twist.
- rifling characteristics in calibre 308 WIN: 1 turn in 10 inches, right hand twist.
- rifling characteristics in calibre 7MM-08 REM: 1 turn in 11.5 inches, right hand twist.

Shots

- detachable box magazine.

FRT Report

Firearm Reference Number (FRN): 117718
Make: Savage
Model: Fox FA1

Summary

Make:	Savage
Model:	Fox FA1
Manufacturer:	KTG
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Semi-Automatic
Country of Manufacturer:	JAPAN
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
117718 - 1	12 GA X 2 3/4"	3	711	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
117718 - 2	12 GA X 2 3/4"	3	762	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make	- make may be marked on the firearm.
Model	- model is marked on the firearm. - this is a standard pattern gas operated semi automatic shotgun. - features include: - walnut pistol grip stock and forearm, white line spacers at buttpad and pistol grip, rosewood pistol grip cap, cross bolt safety at rear of trigger guard, blued ventilated rib barrel and an action release button on the right side of the receiver/frame below a chromed or polished bolt.
Manufacturer	- manufacturer's designation may not be marked on the firearm. - although Savage retailed these shotguns, they were actually produced by KTG in Japan.
Action	- gas operated semi automatic.
Serial Number	- serial number is marked on the receiver/frame.
Shots	- tubular magazine in forearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- overall, these shotguns resemble a "plain" Weatherby Centurion, but with an exposed magazine cap; they were built on the same production line as the Centurion, but after Weatherby had stopped selling the Centurion.

FRT Report

Firearm Reference Number (FRN): 113217
Make: Savage
Model: MARK 1

Summary

Make:	Savage
Model:	MARK 1
Manufacturer:	Savage
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	CANADA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
113217 - 2	22 LR	1	483	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
113217 - 1	22 LR	1	526	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is marked on the left side of the barrel as, "SAVAGE".

Model

- this is a generic model. Other "MARK 1" model entries exist which might better describe the firearm.
- introduced in 1996.
- "MARK I" is marked on the left side of the barrel.
- features include; blued receiver/frame and round barrel; a fixed front sight with an adjustable notch for a rear sight; the safety is located on the right side of the receiver/frame; a walnut stock with a pistol grip and checkering on the forearm and pistol grip.

Manufacturer

- the manufacturer is marked on the left side of the barrel as:
"MFG. IN CANADA BY SAVAGE ARMS (CANADA) INC."
"IMPORTED BY SAVAGE ARMS INC. WESTFIELD MA. 01085 U.S.A.".

Action

- turn bolt operated.

Serial Number

- the serial number is marked on the left side of the receiver/frame.

Calibre

- the calibre designation is marked on the left side of the barrel as:
".22 S. L. & L.R.". or "S.B. SHOT CARTRIDGE ONLY".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- "01085" is marked on the barrel and is not a serial number.

Remarks

- indicate features on firearm at the time of production:
- the letter "G" indicates a hardwood stock.
- the letter "L" indicates a left-handed receiver/frame.
- the letters "SB" indicate a smooth bore barrel.

123083 - 2	22 LR	1	533	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is marked on the barrel.

Model

- introduced in 2005.
- "MARK I" is marked on the left side of the barrel.
- features include: blued receiver/frame and round barrel; target sights, rear aperture mounted on the receiver/frame with a tunnel type front sight; the safety is located on the right side of the receiver/frame; synthetic stock.
- as of 2006 this model is available with the adjustable "AccuTrigger".
- overall length with a 533mm (21") barrel is 1003mm (39.5") average weight is 2.38kg (5.25lbs).
- the letters in the model designation are Savage descriptors; the "F" denotes a synthetic stock, the "V" denotes a heavy barrel, the "T" denotes peep sights.

Manufacturer

- manufacturer's markings are found on the barrel.

Action

- turn-bolt design.

Serial Number

- the serial number is marked on the left side of the receiver/frame.

Calibre

- the calibre designation is marked on the left side of the barrel.
- rifling characteristics: 1 turn in 406mm (16").

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- a manufacturer's warning may be marked on the right side of the barrel as:
"BEFORE USING READ OWNERS MANUAL AVAILABLE FROM SAVAGE ARMS INC. WESTFIELD MA. 01085 U.S.A.".
or
"READ OWNERS MANUAL BEFORE USE AVAILABLE FROM SAVAGE ARMS INC. LAKEFIELD ONT. CANADA".

Notes

Make

- "- SAVAGE MARK II CAL..22 L.R. ONLY-" over "MFG. BY SAVAGE ARMS (CANADA) INC. LAKEFIELD ONT. CANADA" over "IMPORTED BY SAVAGE ARMS INC. WESTFIELD. MA. U.S.A. 01085" is usually marked on the left side of the barrel.

Model

- this is a generic model. Other "MARK 2" model entries exist which may better describe the firearm.
- "MARK II" is marked on the firearm.
- model was introduced in 1996.
- this model is available in several configurations, it will be found with a laminated wood, hardwood or synthetic stock, it may have a tapered or heavy barrel profile and is available with a blued finish or in stainless steel.

Manufacturer

- "- SAVAGE MARK II CAL..22 L.R. ONLY-" over "MFG. BY SAVAGE ARMS (CANADA) INC. LAKEFIELD ONT. CANADA" over "IMPORTED BY SAVAGE ARMS INC. WESTFIELD. MA. U.S.A. 01085" is usually marked on the left side of the barrel.

Action

- turn bolt action.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- serial numbers on firearms made in Canada are numeric and those made in the United States of America have a letter prefix .
- NOTE: "01085" is marked on the barrel and is not a serial number.

Calibre

- the calibre designation is marked on the left side of the barrel as, ".22 L.R. ONLY".

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- a manufacturers warning may be marked on the right side of the barrel as:
"BEFORE USING READ OWNERS MANUAL AVAILABLE FROM SAVAGE ARMS INC. WESTFIELD MA. 01085 U.S.A.".
or
"READ OWNERS MANUAL BEFORE USE AVAILABLE FROM SAVAGE ARMS INC. LAKEFIELD ONT. CANADA".

FRT Report

Firearm Reference Number (FRN): 144790
Make: Savage
Model: MARK 2BVSS Spiral Special Edition

Summary

Make:	Savage
Model:	MARK 2BVSS Spiral Special Edition
Manufacturer:	Savage
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
144790 - 1	22 LR	5	533	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
144790 - 2	22 LR	10	533	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Savage" is marked on the barrel.

Model

- introduced in 2013.
- "MARK II" is marked on the firearm.
- "MARK 2BVSS Spiral Special Edition" is not marked on the firearm.
- "B" in the model designation denotes a laminated stock.
- "V" in the model designation denotes a heavy profile "varmint" weight barrel.
- "SS" in the model designation denotes stainless steel construction.
- "Spiral Special Edition" in the model designation denotes the spiral fluted barrel.
- features include: stainless steel construction; no iron sights; round spiral fluted barrel; MARK 2 receiver/frame is drilled and tapped for scope mounts; manual safety is located on the right side of the receiver/frame; detachable box magaine release is mounted on the rear of the magazine well; AccuTrigger; one piece grey, laminated pistol grip stock with sling swivel studs; matte finish.

Manufacturer

- "SAVAGE" is marked on the left side of the barrel.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the receiver/frame
- serial number observed consisted of seven numbers without a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

FRT Report

Firearm Reference Number (FRN): 134221
Make: Savage
Model: MARK 2GTB

Summary

Make:	Savage
Model:	MARK 2GTB
Manufacturer:	Savage
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
134221 - 1	22 LR	10	533	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "- SAVAGE MARK II CAL..22 L.R. ONLY-" over "MFG. BY SAVAGE ARMS (CANADA) INC. LAKEFIELD ONT. CANADA" over "IMPORTED BY SAVAGE ARMS INC. WESTFIELD. MA. U.S.A. 01085" is usually marked on the left side of the barrel.

Model

- "MARK 2GTB" is not marked on the firearm.
- "MARK II" is usually marked on the barrel.
- "G" in the model designation denotes a wood stock, and "TB" denotes a threaded barrel.
- introduced in 2010.
- this is a traditional MARK 2 bolt action rifle that features a wood stock and a round barrel with a threaded muzzle.
- overall length is 1003mm/39.5".

Manufacturer

- "- SAVAGE MARK II CAL..22 L.R. ONLY-" over "MFG. BY SAVAGE ARMS (CANADA) INC. LAKEFIELD ONT. CANADA" over "IMPORTED BY SAVAGE ARMS INC. WESTFIELD. MA. U.S.A. 01085" is usually marked on the left side of the barrel.

Action

- turn-bolt design.

Serial Number

- the serial number is marked on the receiver/frame, rationalization unknown.

Calibre

- rifling characteristics: one turn in 16 inches.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make

- "- SAVAGE MARK II CAL..22 L.R. ONLY-" over "MFG. BY SAVAGE ARMS (CANADA) INC. LAKEFIELD ONT. CANADA" over "IMPORTED BY SAVAGE ARMS INC. WESTFIELD. MA. U.S.A. 01085" is usually marked on the left side of the barrel.

Model

- introduced in 1996.
- "MARK 2GYL" is not marked on the firearm.
- "MARK II Y" is marked on the left side of the barrel.
- the letter "G" denotes a Hardwood Stock, the letter "Y" denotes a Youth version and the "L" denotes a left hand configuration.
- features include: blued receiver/frame and round barrel; bolt handle is on the left side; fixed front sight with an adjustable rear sight; the safety is located on the right side of the receiver/frame.
- overall length with a 533mm (21") barrel is 959mm (37.75") average weight is 2.27kg (5lbs).

Manufacturer

- "- SAVAGE MARK II CAL..22 L.R. ONLY-" over "MFG. BY SAVAGE ARMS (CANADA) INC. LAKEFIELD ONT. CANADA" over "IMPORTED BY SAVAGE ARMS INC. WESTFIELD. MA. U.S.A. 01085" is usually marked on the left side of the barrel.

Action

- turn-bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number is marked on the left side of the receiver/frame.
- "01085" is marked on the barrel, this is not a serial number.

Calibre

- the calibre designation is marked on the left side of the barrel as, ".22 L.R. ONLY".
- rifling characteristics: 1 turn in 406mm (16").

Shots

- detachable box magazine.

Other Markings

- a manufacturers warning may be marked on the right side of the barrel as:
"BEFORE USING READ OWNERS MANUAL AVAILABLE FROM SAVAGE ARMS INC. WESTFIELD MA. 01085 U.S.A.".
or
"READ OWNERS MANUAL BEFORE USE AVAILABLE FROM SAVAGE ARMS INC. LAKEFIELD ONT. CANADA".

Remarks

- the letters in the Savage Arms catalogue/model designation indicate features on a specific firearm at the time of production:
- the letter "G" denotes a hardwood stock.
- the letter "F" denotes a synthetic stock.
- the letter "C" denotes a camouflage stock.
- the letter "Y" denotes a youth rifle.
- the letters "SS" denotes stainless steel receiver/frame and barrel.
- the letter "V" denotes a heavy target barrel profile.
- the letter "L" denotes a left-handed receiver/frame or in some cases a laminated stock.
- the letters "XP" denotes a package firearm, which includes a scope.
- the letters "TD" denotes a take-down firearm.
- the letters "TH" denotes a threaded barrel for attachments.

FRT Report

Firearm Reference Number (FRN): 200202
Make: Savage
Model: RXR22

Summary

Make:	Savage
Model:	RXR22
Manufacturer:	Adler
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	TURKEY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
200202 - 1	22 LR	10	419	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Savage" is marked on the left side of the barrel.

Model

- "RXR22" is marked on the right side of the receiver/frame.
- "RXR22" is marked on the left side of the barrel.
- The "RXR22" is compatible with "Ruger 10/22" pattern barrels, magazines, and trigger groups.
- Features include: Synthetic receiver/frame with top accessory rail; bolt lock lever and magazine release lever located on the underside of the receiver in front of the trigger guard; right side charging handle; captive takedown screw on the underside of the stock, in front of the magazine well; interchangeable grip inserts; thread protector on the muzzle; cross bolt safety on trigger guard; stock comes in various colour finishes.
- Features may include: Last round bolt hold open mechanism.

Manufacturer

- "ADLER ARMS" is marked on the left side of the receiver/frame.

Action

- Blowback operated.

Serial Number

- The serial number is marked on the left side of the receiver/frame.
- The serial number is repeated on other parts and components.
- The serial number of referenced example consisted of two letters, three digits, a dash, two digits, two letters followed by five digits.

Barrel

- The barrel length does not include any attached device such as flash-hider or muzzle brake.

Calibre

- The calibre designation is marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- Detachable box magazine. - Designed to accept "Ruger 10/22" type magazines.
Importer	- "Imported by Savage Arms Inc" is marked on the left side of the firearm.
Canadian Law Comments	- Ruger "BX-25" magazine is interchangeable between the Ruger model 10/22 and SR22 rifles and Ruger 22 Charger handgun configurations and is considered a "handgun" magazine. Because handguns are limited to a ten shot magazine capacity in accordance with the Criminal Code Part III, S. 84, Regulations Part 4 Para 3. (1) (b) "The Former Cartridge Magazine Control Regulations", this limits the magazine capacity for the rifle configuration to ten (10) shots, despite the firearm being designed to use rimfire ammunition.

Notes

Make
- normally marked on the barrel assembly and/or the receiver/frame.

Model
- this is a generic entry for Savage single shot rifles where the model designation is not present, has been removed, or is otherwise indeterminable; other records may exist which may better describe the firearm being identified.
- the features of this model may vary greatly.
- features may include: wood or synthetic stock; blued or stainless metal surfaces; fixed or adjustable iron sights; provision for scope mounting; tang or side-mounted safety.

Manufacturer
- normally marked on the barrel assembly and/or the receiver/frame.

Action
- may be of a variety of mechanisms including, but not exclusive to, falling block, hinged actions, and turn bolt mechanisms.

Serial Number
- normally marked, if present, on the barrel assembly and/or the receiver/frame.

Calibre
- normally marked on the left side of the barrel forward of the receiver/frrame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make - "Savage" is marked on the side of the bolt.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- in 2008, Savage introduced the Precision Action for sale to individuals and gunsmiths.
- Precision Action is available in the following models: Sporter, Target and Varmint.
- Precision Sporter Action is available in a short or long action.
- Precision Sporter Action includes a carbon steel receiver/frame, right hand bolt assembly with right side ejection, AccTrigger group assembly, barrel locknut, recoil lug, trigger guard and magazine box assembly with hinged floor plate.
- Precision Target Action is a single shot action available with a right hand bolt assembly with left or right side ejection.
- Precision Target Action includes a stainless steel receiver/frame, bolt assembly, Target AccTrigger group assembly, barrel locknut, recoil lug, and trigger guard
- Precision Varmint Action is available in a short action.
- Precision Varmint Action includes a stainless steel receiver/frame, right hand bolt assembly with right side ejection, AccTrigger group assembly, barrel locknut, recoil lug, trigger guard and detachable box magazine box assembly.

Manufacturer

- "Savage" is marked on the side of the bolt.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- observed serial numbers consisted of a letter "G" prefix and six numbers.

Notes

Make

- marked on barrel and receiver/frame.

Model

- the Savage "Utility Gun" concept was intended to allow individuals to use one receiver with either a shotgun or rifle barrel. The "Utility Gun" has several different sub model designations depending on what barrel or combination of barrels it was sold with.
- this model was originally produced with a top mounted opening lever, when it was revived in 1960 the opening lever was moved to the side.
- features include; top tang mounted safety, automatic ejector, American walnut forend and stock, pistol grip stock with fluted comb and hard rubber buttplate, and no external hammer.
- Model 219; Rifle only in calibre 30-30 WIn or 25-20 WIN.
- Model 220; Shotgun only in 12 GA X 2 3/4", 16 GA X 2 3/4", 20 GA X 2 3/4" or 410 GA X 3".
- Model 221; sold with a rifle barrel in calibre 30-30 WIN and a 762 mm shotgun barrel in 12 GA X 2 3/4".
- Model 222; sold with a rifle barrel in calibre 30-30 WIN and a 711 mm shotgun barrel in 16 GA X 2 3/4".
- Model 223; sold with a rifle barrel in calibre 30-30 WIN and a 711 mm shotgun barrel in 20 GA X 2 3/4".
- Model 224; sold with a rifle barrel in calibre 25-20 WIN and a 762 mm shotgun barrel in 12 GA X 2 3/4".
- Model 225; sold with a rifle barrel in calibre 25-20 WIN and a 711 mm shotgun barrel in 16 GA X 2 3/4".
- Model 226; sold with a rifle barrel in calibre 25-20 WIN and a 711 mm shotgun barrel in 20 GA X 2 3/4".
- Model 227; sold with a rifle barrel in calibre 22 HORNET and a 762 mm shotgun barrel in 12 GA X 2 3/4".
- Model 228; sold with a rifle barrel in calibre 22 HORNET and a 711 mm shotgun barrel in 16 GA X 2 3/4".
- Model 229; sold with a rifle barrel in calibre 22 HORNET and a 711 mm shotgun barrel in 20 GA X 2 3/4".
- Model 230; sold with a rifle barrel in calibre 32-20 WIN and a 762 mm shotgun barrel in 12 GA X 2 3/4".
- Model 231; sold with a rifle barrel in calibre 32-20 WIN and a 711 mm shotgun barrel in 16 GA X 2 3/4".

Manufacturer

- marked on barrel and receiver/frame.

Remarks

- this is a generic entry for the Savage family known as "Utility Guns" that were marketed with a rifle and a shotgun barrel. Other entries exist that may better identify the firearm being identified.

Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
99695 - 1	36 PERCUSSION	6	181	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "E. SAVAGE. MIDDLETOWN.CT." and "H.S. NORTH. PATENTED. JUNE 17th, 1856" is marked on the barrel or receiver/frame.
- "H.S. NORTH, PATENTED APRIL 6, 1858" may be marked on the rammer housing.

Model

- this is an unusual early American black-powder percussion revolver with an oddly-shaped trigger, trigger-guard, and cylinder-advancement mechanism somewhat resembling a figure "8" (hence the name); in this design, the cylinder is advanced to the next stop by pulling the bottom ring of the trigger-guard with the middle finger.
- four general models of this revolver (approximately 500 total production) were produced between 1856 and 1859, differing primarily in the shape and material of the frame
- early production examples of this handgun were all brass-framed, but were later changed to iron.

Manufacturer

- formed by a partnership between Simeon North and Josiah Savage the company was originally known as "The North & Savage Company", the firm changed its name to "Savage & North" in 1831.
- in 1859, the company was renamed the "Savage Revolving Arms Company", and produced both revolvers and muskets.
- "SAVAGE R.F.A. CO." and "H.S. NORTH PATENTED JUNE 17,1856/JAN. 18,1859, MAY 15, 1860" are marked on firearms produced by the "Savage Revolving Fire Arms Company".

Serial Number

- numbered on the receiver/frame or barrel, in more than one range.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "SAXTON" is marked on the lockplates.
Model	- this is a generic entry for those Saxton side by side shotguns that have no model designation. - features may include: muzzle loading percussion or breech loading cartridge, side by side barrels and side hammers or hammerless. - barrels may be marked "Belgium", "Belgian Damascus", "Fine Damascus Barrels" and/or "Laminated Steel".
Action	- side by side pattern.
Serial Number	- serial number may be marked on the receiver and/or barrel flats. - observed sample had a four digit number without prefix or suffix.
Calibre	- known examples have had the nominal guage designation marked on barrel flats; the marking was a typical British proofmark with the number 12 over the letter "c" within a four sided diamond-shaped enclosure.
Other Markings	- one known known example was marked "Machine Made" on right lockplate and "Laminated Steel" on top of rib between the barrels.

Notes

Make

- "SCATTERGUN TECHNOLOGIES INC" over "NASHVILLE, TENNESSEE - TR870" or "SCATTERGUN TECHNOLOGIES" over "BERRYVILLE. AR TR-870" is usually marked on the right side of the receiver/frame.
- "Remington's" name, model designation and serial number are usually marked on the left side of the receiver/frame.
- "Remington's" name and address are usually marked on the barrel.

Model

- "TR870" or "TR-870" is usually marked on the right side of the receiver/frame.
- this is a re-worked Remington model "870 Magnum".
- the original Remington model designation markings remain on the firearm.
- features include: adjustable TRAK-LOCK® ghost ring rear sight; four or six shot sidesaddle shell carrier for extra shells; tubular magazine; high visibility shell follower; jumbo head safety; black or green parkerized or Armor-Tuff® finish and a standard length or short synthetic buttstock and forearm with an 11,000 candlepower flashlight built in.
- Scattergun Technologies will also retro-fit a customer supplied Remington 870 shotgun to the same specifications.

Manufacturer

- Scattergun Technologies Incorporated (SGT) was located in Nashville, Tennessee, U.S.A. from 1991 to 1999.
- Scattergun Technologies has been located in Berryville, Arizona, U.S.A. since 1999.
- Scattergun Technologies was acquired by Wilson Combat in late 1999.
- Scattergun Technologies specialize in re-manufacturing and customizing Remington pump action and semi-automatic shotguns for hunting, self-defense, and law-enforcement applications.

Serial Number

- the original Remington applied serial number is marked on the receiver/frame.
- when fitted with the four or six shot sidesaddle shell carrier the serial number may be obscured.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- tubular magazine mounted under barrel. - several aftermarket screw-on magazine extensions are available that would change the capacity of this model.
Remarks	- the Standard model can be ordered as a complete firearm or can be built on a customer supplied gun, markings on the receiver/frame may vary depending on what original Remington model was supplied for conversion.

Notes

Make

- "SCATTERGUN TECHNOLOGIES INC" over "NASHVILLE, TENNESSEE - TR870" or "SCATTERGUN TECHNOLOGIES" over "BERRYVILLE. AR TR-870" is usually marked on the right side of the receiver/frame.
- "Remington's" name, model designation and serial number are usually marked on the left side of the receiver/frame.
- "Remington's" name and address are usually marked on the barrel.

Model

- "TR870" or "TR-870" is usually marked on the right side of the receiver/frame.
- this is a re-worked Remington model "870 Magnum".
- available in a full size or compact model, features include: adjustable TRAK-LOCK® ghost ring rear sight; five (full size) or six (compact) shot tubular magazine; standard length or short synthetic buttstock and forearm; jumbo head safety; high visibility magazine follower; black or green parkerized or Armor-Tuff® finish.
- Scattergun Technologies will also retro-fit a customer supplied Remington 870 shotgun to the same specifications.

Manufacturer

- Scattergun Technologies Incorporated (SGT) was located in Nashville, Tennessee, U.S.A. from 1991 to 1999.
- Scattergun Technologies has been located in Berryville, Arizona, U.S.A. since 1999.
- Scattergun Technologies was acquired by Wilson Combat in late 1999.
- Scattergun Technologies specialize in re-manufacturing and customizing Remington pump action and semi-automatic shotguns for hunting, self-defense, and law-enforcement applications.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the Remington applied serial number is marked on the left side of the receiver/frame.
Shots	- tubular magazine mounted under barrel. - several aftermarket screw on magazine extensions are available that would change the capacity of this model.
Canadian Law Comments	- this firearm is normally Non-Restricted unless affected by the following conditions: 1) by combining a barrel from a licensed firearms manufacture that is less than 406mm (16.0") in length and a receiver/frame fitted with a pistol grip only, this firearm may be deemed a "handgun" and therefore "RESTRICTED" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (a) of the Criminal Code of Canada. - "handgun" means a firearm that is designed, altered or intended to be aimed and fired by the action of one hand, whether or not it has been redesigned or subsequently altered to be aimed and fired by the action of both hands. 2) "a firearm that is designed or adapted to be fired when reduced to a length of less than 660 mm by folding, telescoping or otherwise" and therefore "Restricted" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (c) of the Criminal Code of Canada. 3) by combining a barrel that has been altered to less than 457mm (18.0") in length by a non-licensed firearms manufacturer (cottage industry, individual or gunsmith) regardless of whether the shotgun has a pistol grip or conventional stock, this firearm is "PROHIBITED" and subject to the definition of a "prohibited firearm" in Part III/Firearms and Other Weapons of Section 84 of the Criminal Code of Canada. - "prohibited firearm" means a firearm that is adapted from a rifle or shotgun, whether by sawing, cutting or any other alteration, and that, as so adapted, (i) is less than 660 mm in length, or (ii) is 660mm or greater in length and has a barrel less than 457 mm in length.
Remarks	- the Border Patrol model can be ordered as a complete firearm or can be built on a customer supplied gun, markings on the receiver/frame may vary depending on what original Remington model was supplied for conversion.

FRT Report

Firearm Reference Number (FRN): 21754
Make: Schall & Company
Model: Repeating Pistol

Summary

Make:	Schall & Company
Model:	Repeating Pistol
Manufacturer:	Schall & Company
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Other
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
21754 - 1	22 LR	10	127	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
21754 - 2	22 LR	10	165	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- marked as "Schall & Co" on the right side of the receiver/frame.
Model	- the model designation is not marked on the pistol. - this is a manually operated pistol with a detachable magazine. Originally produced as the Fiala Arms repeating pistol model. - features include: blued finish, wood grips with vertical grooves; fixed sights; slide release is mounted on the left side of the receiver/frame; heel mounted magazine release.
Manufacturer	- Schall & Company was located in New Haven, Connecticut. Some sources report that Schall & Company originally supplied parts and/or manufactured the "Fiala Arms" pistol. When Fiala Arms ceased operations Schall & Company offered the same design under their own name.
Action	- this model is a manually operated, repeating firearm. While it resembles a traditional semi-automatic pistol the slide must be manually unlocked before the action can be cycled.
Serial Number	- the sample examined was numbered on the front strap.
Shots	- detachable box magazine housed in the grip.

Notes

Make

- "SCHERMULY" and " MADE IN ENGLAND" was observed marked on the left side of the receiver/frame.

Model

- model designation is not marked on the firearm.
- this firearm is capable of firing all natures of 37MM or 38MM Rimmed ammunition.
- features include: round alloy smoothbore or rifled barrel with adjustable fore-grip, bead front sight and break open lever located over the chamber; front hinged alloy receiver/frame; double action only trigger mechanism; removable wood buttstock assembly with flip-up post rear sight.
- overall length is from 820mm to 828mm, and average weight is from 2.7 kgs to 3.18 kgs.

Manufacturer

- Pains-Wessex Limited was established circa 1965.
- Pains-Wessex was formed from James Pain & Sons (fireworks company) and the Wessex Aircraft Engineering Company (WAECO).
- Pains-Wessex purchased Shermuly in 1973.
- Schermuly factory is closed and production is transferred to Salisbury in 1981.
- Pains-Wessex Limited is acquired by Chemring Group PLC in 1986.
- Shermuly (Pains-Wessex) Limited was listed in High Post, Salisbury, Wiltshire, England circa 1988/1989.
- Pains-Wessex (Shermuly) Limited was listed in High Post, Salisbury, Wiltshire, England circa 1994/1995.

Action

- hinged barrel design.

Serial Number

- serial number was observed marked on the left side of the receiver/frame.
- observed serial number consisted of a two letter "RG" prefix and five numbers.

Calibre

- "1 1/2" inside a diamond shape was observed marked on the left side of the barrel.
- this firearm is capable of firing all natures of 37MM or 38MM Rimmed ammunition.

Type:	Other
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
15539 - 1	1"	1	365	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (c)	Non-Commercial Customization	

Notes

Make

- "SCHERMULY", "SPRA", or a Schermuly decal/logo may be on the launcher.
- observed example featured "SPRA" marked on the left side of the receiver/frame.

Model

- "SPRA" or "Schermuly" is usually marked on the receiver/frame or on a decal on the barrel.
- observed example featured "SPRA" marked on the left side of the receiver/frame.
- "SPRA" is an acronym for "Schermuly Pistol Rocket Apparatus".
- this is a unique line throwing/life saving firearm invented by William Schermuly in the 1890s, and used by military and commercial shipping until World War II; this firearm uses a 1" blank ignition cartridge to ignite a line carrying rocket projectile that has been inserted into the muzzle. On firing, the rocket drags a line to a ship, lifeboat, or person in the water, allowing it or them to be hauled ashore or to a rescuing ship. The rocket has an extended wire bridle to which the line is attached, preventing the rocket blast from burning through or melting the rope it carries.
- Schermuly manufactured these launchers from the receivers/frames of Webley MK III flare pistols, adding a larger diameter barrel to accept the rocket projectiles. The projectiles for these launchers were offered in a range of types, including flare, smoke, floating, and line carrying, depending on the circumstances in which they were needed.
- features include: brass or bronze construction (to prevent corrosion from salt air); a larger diameter barrel to accept the rocket projectile; a top mounted angled spade grip, to aid in support and aiming; thumb operated top latch; manually cocked hammer; single action trigger mechanism; and a bag shaped grip with wooden grip panels.

Manufacturer

- "SCHERMULY", "SPRA", or a Schermuly decal/logo may be on the launcher.
- observed example featured "SPRA" marked on the left side of the receiver/frame.

Action

- hinge action single shot, with rocket line carrying projectile loaded from the muzzle.

Serial Number

- serial numbered on the right side of the receiver/frame.

Notes

Make

- "ALFRED SCHILLING" is marked on the left side of the firearm.

Model

- the model designation is not marked on the firearm.
- features include: octagonal tapered blued barrel; falling block action; curved action lever; colour case hardened receiver/frame; various engraving; double triggers; sling swivels; checkered pistol grip walnut stock; cheek piece.
- average weight is 3.18 kg (7 lbs).

Manufacturer

- "ALFRED SCHILLING" is marked on the left side of the firearm.
- this company was founded in 1898 by Alfred Schilling. He specialized in making revolver cylinders, with changing product demands and the end of World War II, in 1945 Alfred's son Veit took over the company and began manufacturing cigarette lighters and small oil mills to keep the company going. They manufactured parts for the ZEISS optical factory and business was slow until the re-unification of Germany provided an opportunity for Alfred's grandson, Joerg Schilling, to re-establish the company 100 years later in 1998. Joerg is the current owner of Fa. Alfred Schilling, the company has always been located in Zella-Mehlis, Germany. Schilling Spezialbeschichtungen GmbH was founded in May 2000.

Action

- lever operated, falling/dropping block design.
- solid metal breechblock slides vertically in grooves cut into the receiver/frame.

Serial Number

- the serial number is marked on the receiver/frame.
- the serial number rationalization is unknown.

Calibre

- the calibre designation is usually marked on the barrel.

Notes

Make

- marked on the barrel as V.C. Schilling or V.C.S.

Model

- model designation is not marked on the firearm.
- this is a sporting rifle built on a Mauser 1898 action.
- features: a ramp front and multi folding leaf rear sight and sporter style stock with pistol grip.
- available with other features such as engraving on the action, checkering on the stock and octagonal or fluted barrels.
- rifles of this type were manufactured during the 1920's and were exported to North America in considerable numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "V.C. Schilling" or "V.C.S." is usually marked on the barrel.
Action	- turn-bolt operated.
Serial Number	- marked on the side of the receiver/frame. - serial number rationalization is unknown.

Notes

Make

- appears on the barrel either as "V.C. Schilling" or "V.C.S.".

Model

- sporting rifle built on the 1888 Commission Rifle action.
- features: a ramp front and multi folding leaf rear sight and sporter style stock with pistol grip.
- this rifle was available in varying degrees of elaborateness such as engraving in the action, checkering on the stock and perhaps octagonal or fluted barrel.
- rifles of this type were exported to North America in considerable numbers during the decade before 1914 and during the 1920's.

Manufacturer

- appears on the barrel as either "V.C. Schilling" or "V.C.S.".

Serial Number

- appears on the side of the receiver.

FRT Report

Firearm Reference Number (FRN): 33980
Make: Schlegelmilch, Louis
Model: Schlegelmilch Repeater

Summary

Make:	Schlegelmilch, Louis
Model:	Schlegelmilch Repeater
Manufacturer:	Spandau Arsenal
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Other
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
33980 - 1	7.5MM SCHLEGELMILCH	5	89	Antique AFR, Section 1, para. 7	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make may not be marked on the firearm; Louis Schlegelmilch was the director of the German Spandau Arsenal, and submitted this pistol to the German 1891 trials to determine a replacement for the German 11mm, M1871 Reichsrevolver, though they were unsuccessful, and were built only in limited numbers.

Model

- the model is not marked on the firearm.
- this is an unusual mechanical repeating pistol, operated entirely by the function of the hammer and trigger, designed by Louis Schlegelmilch in 1891 as a possible replacement for the M1871 Reichsrevolver; these pistols were built in two basic patterns, but both share the same basic appearance and operation.
- the unique identifying feature of these pistols is a breech-block that moves right and left inside the receiver/frame, as the trigger is squeezed or the hammer is cocked, allowing additional cartridges to rise from the internal magazine, and for fired cases to be ejected.
- features include: blued finish; fixed open sights; round barrel; triangular-bottomed magazine well visible on the right side of the receiver/frame; five-round internal box magazine; double-action trigger mechanism; a trigger guard with or without an additional spur for the middle finger; external hammer that may be cocked for single-action fire; checkered wooden grip plates; heel lanyard loop.

Manufacturer

- the manufacturer may not be marked on the firearm.
- at the time these pistols were built, Louis Schlegelmich was the director of the Spandau Arsenal.

Action

- mechanically-operated repeater.

Serial Number

- serial-numbered on the receiver/frame.

Remarks

Unusual appearing weapon. Mono- block barrels. Top sliding cross bolt and under bolt lock up. Double triggers, front trigger fires upper barrel only. Rear trigger fires lower then upper. Matt rib.

Notes

Make

- This firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm.
- The MP36 Model is an Erma Werke development, located at Erfurt.

Model

- marked on the underside of the wood forend: E.M.P. 36
- very few MP36s are known to exist, and are believed to be the predecessor (or prototypes) of the MP38, and MP40.
- unlike the MP38 and MP40, this Submachine Gun is Selective Fire, and is manufactured of machined steel body and parts, a non-locking under-folding stock with serrated butt-stock, canted magazine housing, and a wood forend (lower body cover), and pistol-grip panels.

Manufacturer

- marked on the underside of the wood forend: ERMA ERFURT

Action

- no longer capable of full automatic fire.

Shots

- detachable box magazine.

FRT Report

Firearm Reference Number (FRN): 28323
Make: Schmeisser
Model: MP38

Summary

Make:	Schmeisser
Model:	MP38
Manufacturer:	Erfurter Maschinenfabrik (ERMA) (27)
Level:	Converted Automatics
Type:	Submachine Gun
Action:	Converted Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
28323 - 1	9MM LUGER	5	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
28323 - 2	9MM LUGER	32	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make	- this firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm. - the MP38 Model is a Vollmer/Erma Werke development.
Model	- the MP38 has a folding stock, stamped steel body and a plastic lower body cover. - the MP38 was a Volmer / Erma Werke development.
Manufacturer	- Erma used code 27 until some time in 1941, when the code changed to ayf.
Type	- the type is refered to in German literature as "MACHINE PISTOLE".
Action	- no longer capable of full automatic fire.
Serial Number	- marked on the top rear of the receiver/frame: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.
Shots	- detachable box magazine.
Other Markings	- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- The submachine gun known as the MP38 is rarely encountered as most MP38 were modified to make it safe to carry the submachine gun with the bolt in the forward position. MP38/40 is the official German designation for this modified MP38. The MP38/40 was redesigned / modified to incorporate a two piece lock-down style bolt handle which in conjunction with an upwards cut-out in the forward end of the cocking handle slot, was intended to securely lock the the bolt in the forward position.
- Before modification, when the bolt was in the forward position and unlocked, the bolt could be "bounced" within the firearm due to the inertia possessed by the heavy mass of the bolt if the firearm was dropped or when jumping from a vehicle to the ground when a loaded magazine was present in the firearm. When this happened , the unpleasant result would be; the bolt on its return to the forward position would feed a cartridge from the magazine into the chamber. As the firearm functions in the "advanced primer ignition - blow-back" mode; when the bolt closes on a cartridge the cartridge discharges.
- The MP38 was a Volmer / Erma Werke development.

Notes

Make

- This firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm. The MP38 Model is a Vollmer/Erma Werke development.
- Schmeisser did develop the design of the MP41 Model, which is an adaption of the MP40 Model with a wooden stock and a different trigger mechanism.
- Hugo Schmeisser was manager of the Haenel factory during World War II.

Model

- The MP38 has a folding stock, stamped steel body and a plastic lower body cover.
- The MP38 was a Volmer / Erma Werke development.

Manufacturer

- the manufacturer appears on the firearm as "122".
- German military practice during World War II was to mark the manufacturer's name as an alpha or numeric code to conceal the actual name and location of the manufacturer.
- This manufacturer code number (122) has been attributed to Hugo Schmeisser in several references; this is doubtful, as Hugo Schmeisser (the man) was the plant foreman at C G Haenel and there does not appear to have been a business attributed to him.
- The C G Haenel code later changed to "fxo".

Type

- the type is refered to in German literature as "MACHINE PISTOLE".

Action

- no longer capable of full automatic fire.

Serial Number

- marked on the top rear of the receiver/frame: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.
- there are instances of serial numbers with five digits having no prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.

Other Markings

- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Remarks

- The submachine gun known as the MP38 is rarely encountered as most MP38 were modified to make it safe to carry the submachine gun with the bolt in the forward position. Action

- blowback operated.

Serial Number

- marked on the top rear of the receiver/frame: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.
- there are instances of serial numbers with five digits having no prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.

Other Markings

- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Remarks

- The submachine gun known as the MP38 is rarely encountered as most MP38 were modified to make it safe to carry the submachine gun with the bolt in the forward position. MP38/40 is the official German designation for this modified MP38. The MP38/40 was redesigned / modified to incorporate a two piece lock-down style bolt handle which in conjunction with an upwards cut-out in the forward end of the cocking handle slot, was intended to securely lock the the bolt in the forward position.
- Before modification, when the bolt was in the forward position and unlocked, the bolt could be "bounced" within the firearm due to the inertia possessed by the heavy mass of the bolt if the firearm was dropped or when jumping from a vehicle to the ground when a loaded magazine was present in the firearm. When this happened, the unpleasant result would be; the bolt on its return to the forward position would feed a cartridge from the magazine into the chamber. As the firearm functions in the "advanced primer ignition - blow-back" mode; when the bolt closes on a cartridge the cartridge discharges.
- The MP38 was a Volmer / Erma Werke development.

72850 - 2	9MM LUGER	32	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- This firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm. The MP38 Model is a Vollmer/Erma Werke development.
- Schmeisser did develop the design of the MP41 Model, which is an adaption of the MP40 Model with a wooden stock and a different trigger mechanism.
- Hugo Schmeisser was manager of the Haenel factory during World War II.

Model

- The MP38/40 is a modified MP38. The modification was to replace the cocking-handle of the MP38 with the cocking handle of the MP40/I and cut a slot in the receiver for the MP40/I cocking handle to engage, thus providing a safety feature to lock the breech-bolt in the forward position.
- The MP38/40 has a folding stock, stamped steel body and a plastic lower body cover.
- The MP38/40 was a Volmer / Erma Werke development.

Manufacturer

- the manufacturer appears on the firearm as "122".
- German military practice during World War II was to mark the manufacturer's name as an alpha or numeric code to conceal the actual name and location of the manufacturer.
- This manufacturer code number (122) has been attributed to Hugo Schmeisser in several references; this is doubtful, as Hugo Schmeisser (the man) was the plant foreman at C G Haenel and there does not appear to have been a business attributed to him.
- The C G Haenel code later changed to "fxo".

Type

- the type is refered to in German literature as "MACHINE PISTOLE".

Action

- no longer capable of full automatic fire.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- marked on the top rear of the receiver/frame: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.
- there are instances of serial numbers with five digits having no prefix or suffix.

Shots

- detachable box magazine.

Other Markings

- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Remarks

- The submachine gun known as the MP38/40 is an MP38 that has been modified to make it safe to carry with the bolt in the forward position. MP38/40 is the official German designation for this modified MP38. The MP38/40 was redesigned / modified to incorporate a two piece lock-down style bolt handle which in conjunction with an upwards cut-out in the forward end of the cocking handle slot, was intended to securely lock the the bolt in the forward position.
- Before modification, when the bolt was in the forward position and unlocked, the bolt could be "bounced" within the firearm due to the inertia possessed by the heavy mass of the bolt if the firearm was dropped or when jumping from a vehicle to the ground when a loaded magazine was present in the firearm. When this happened , the unpleasant result would be; the bolt on its return to the forward position would feed a cartridge from the magazine into the chamber. As the firearm functions in the "advanced primer ignition - blow-back" mode; when the bolt closes on a cartridge the cartridge discharges.
- This is the same retrofit modification as was incorporated on the MP40 to make the model officially the MP40/I.

72849 - 2	9MM LUGER	32	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- This firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm. The MP38 Model is a Vollmer/Erma Werke development.
- Schmeisser did develop the design of the MP41 Model, which is an adaption of the MP40 Model with a wooden stock and a different trigger mechanism.
- Hugo Schmeisser was manager of the Haenel factory during World War II.

Model

- The MP38/40 is a modified MP38. The modification was to replace the cocking-handle of the MP38 with the cocking handle of the MP40/I and cut a slot in the receiver for the MP40/I cocking handle to engage, thus providing a safety feature to lock the breech-bolt in the forward position.
- The MP38/40 has a folding stock, stamped steel body and a plastic lower body cover.
- The MP38/40 was a Volmer / Erma Werke development.

Manufacturer

- the manufacturer appears on the firearm as "122".
- German military practice during World War II was to mark the manufacturer's name as an alpha or numeric code to conceal the actual name and location of the manufacturer.
- This manufacturer code number (122) has been attributed to Hugo Schmeisser in several references; this is doubtful, as Hugo Schmeisser (the man) was the plant foreman at C G Haenel and there does not appear to have been a business attributed to him.
- The C G Haenel code later changed to "fxo".

Type

- the type is refered to in German literature as "MACHINE PISTOLE".

Action

- blowback operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- marked on the top rear of the receiver/frame: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.
- there are instances of serial numbers with five digits having no prefix or suffix.

Shots

- detachable box magazine.

Other Markings

- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Remarks

- The submachine gun known as the MP38/40 is an MP38 that has been modified to make it safe to carry with the bolt in the forward position. MP38/40 is the official German designation for this modified MP38. The MP38/40 was redesigned / modified to incorporate a two piece lock-down style bolt handle which in conjunction with an upwards cut-out in the forward end of the cocking handle slot, was intended to securely lock the the bolt in the forward position.
- Before modification, when the bolt was in the forward position and unlocked, the bolt could be "bounced" within the firearm due to the inertia possessed by the heavy mass of the bolt if the firearm was dropped or when jumping from a vehicle to the ground when a loaded magazine was present in the firearm. When this happened , the unpleasant result would be; the bolt on its return to the forward position would feed a cartridge from the magazine into the chamber. As the firearm functions in the "advanced primer ignition - blow-back" mode; when the bolt closes on a cartridge the cartridge discharges.
- This is the same retrofit modification as was incorporated on the MP40 to make the model officially the MP40/I.

Notes

Make

- this firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm. The MP38 Model is a Vollmer/Erma Werke development.
- Schmeisser did develop the design of the MP41 Model, which is an adaption of the MP40 Model with a wooden stock and a different trigger mechanism.
- Hugo Schmeisser was manager of the Haenel factory during World War II.

Model

- The MP40, with a folding stock, stamped steel body, with plastic lower body cover, is a development from the MP38, which was a Volmer/Erma Werke development. It was redesigned to reduce the use of costly tooling (of the MP38) and is about 260 grams lighter. An intermediate modification of the one piece bolt handle of the MP38, to a two piece lock-down style with the aim to prevent accidental discharge was incorporated as the MP38/40.
- Hugo Schmeisser, manager of the Haenel factory in WW II, developed the design of the MP41 Model, which is an adaptation of the MP40 Model with a wooden stock and a different trgger mechanism.

Manufacturer

- Erma used code 27 until some time in 1941, when the code changed to ayf.

Type

- the type is refered to in German literature as "MACHINE PISTOLE".

Action

- blowback operated.

Serial Number

- marked on the top rear of the receiver: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Other Markings - this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Remarks
- The MP40 has a folding stock, stamped steel body and a plastic lower body cover. The MP40 is a further development of the MP38, which was a Volmer/Erma Werke development. It was redesigned to reduce the use of costly tooling (of the MP38) and is about 260 grams lighter.
- An intermediate modification of the one piece bolt handle of the MP40, to a two piece lock-down style with the aim to prevent accidental discharge was incorporated as the MP40/I.

FRT Report

Firearm Reference Number (FRN): 26222
Make: Schmeisser
Model: MP40

Summary

Make:	Schmeisser
Model:	MP40
Manufacturer:	Haenel (fxo)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Submachine Gun
Action:	Full Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
26222 - 1	9MM LUGER	5	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	
26222 - 2	9MM LUGER	32	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- this firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm. The MP38 Model is a Vollmer/Erma Werke development.
- Schmeisser did develop the design of the MP41 Model, which is an adaption of the MP40 Model with a wooden stock and a different trigger mechanism.
- Hugo Schmeisser was manager of the Haenel factory during World War II.

Model

- the MP40, with a folding stock, stamped steel body, with plastic lower body cover, is a development from the MP38, which was a Volmer/Erma Werke development. It was redesigned to reduce the use of costly tooling (of the MP38) and is about 260 grams lighter. An intermediate modification of the one piece bolt handle of the MP38, to a two piece lock-down style with the aim to prevent accidental discharge was incorporated as the MP38/40.
- Hugo Schmeisser, manager of the Haenel factory in WW II, developed the design of the MP41 Model, which is an adaptation of the MP40 Model with a wooden stock and a different trgger mechanism.

Type

- the type is refered to in German literature as "MACHINE PISTOLE".

Action

- blowback operated.

Serial Number

- marked on the top rear of the receiver/frame: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.
- known lower case script letters used by Haenel (manufacturer code fxo) as serial number suffixes - a, b, c, d, e, f, g, h, k, m, n, q, s, u, v, w, x, y, ai, aj

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Remarks

- The MP40 has a folding stock, stamped steel body and a plastic lower body cover. The MP40 is a further development of the MP38, which was a Volmer/Erma Werke development. It was redesigned to reduce the use of costly tooling (of the MP38) and is about 260 grams lighter.
- An intermediate modification of the one piece bolt handle of the MP40, to a two piece lock-down style with the aim to prevent accidental discharge was incorporated as the MP40/I.

FRT Report

Firearm Reference Number (FRN): 71169
Make: Schmeisser
Model: MP40

Summary

Make:	Schmeisser
Model:	MP40
Manufacturer:	Merz-Werke (cos)
Level:	Converted Automatics
Type:	Submachine Gun
Action:	Converted Automatic
Country of Manufacturer:	AUSTRIA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
71169 - 1	9MM LUGER	5	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
71169 - 2	9MM LUGER	32	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make	- This firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm. The MP38 Model is a Vollmer/Erma Werke development. - Schmeisser did develop the design of the MP41 Model, which is an adaption of the MP40 Model with a wooden stock and a different trigger mechanism. - Hugo Schmeisser was manager of the Haenel factory during World War II.
Model	- marked on the top rear of the firearm: MP40
Manufacturer	- Merz-Werke used code 18 until some time in 1941, when the code changed to cos.
Type	- the type is refered to in German literature as "MACHINE PISTOLE".
Action	- no longer capable of full automatic fire.
Serial Number	- marked on the top rear of the receiver: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.
Shots	- detachable box magzine.
Other Markings	- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- the MP40, with a folding stock, stamped steel body, with plastic lower body cover, is a development from the MP38, which was a Volmer/Erma Werke development. It was redesigned to reduce the use of costly tooling (of the MP38) and is about 260 grams lighter.
- an intermediate modification of the one piece bolt handle of the MP38, to a two piece lock-down style with the aim to prevent accidental discharge was incorporated as the MP38/40.

FRT Report

Firearm Reference Number (FRN): 36766
Make: Schmeisser
Model: MP40

Summary

Make:	Schmeisser
Model:	MP40
Manufacturer:	Steyr-Daimler-Puch (660)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Submachine Gun
Action:	Full Automatic
Country of Manufacturer:	AUSTRIA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
36766 - 1	9MM LUGER	5	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	
36766 - 2	9MM LUGER	32	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- not marked "Schmeisser". - this firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm.
Model	- marked on the top rear of the firearm: MP40
Manufacturer	- Steyr-Daimler-Puch used code 660 until some time in 1941, when the code changed to bnz.
Type	- the type is refered to in German literature as "MACHINE PISTOLE".
Action	- blowback operated.
Serial Number	- marked on the top rear of the receiver: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.
Shots	- detachable box magazine.
Other Markings	- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- the MP40, with a folding stock, stamped steel body, with plastic lower body cover, is a development from the MP38, which was a Volmer/Erma Werke development. It was redesigned to reduce the use of costly tooling (of the MP38) and is about 260 grams lighter.
- Hugo Schmeisser, manager of the Haenel factory in WW II, developed the design of the MP41 Model, which is an adaptation of the MP40 Model with a wooden stock and a different trigger mechanism.

FRT Report

Firearm Reference Number (FRN): 26219
Make: Schmeisser
Model: MP40/I

Summary

Make:	Schmeisser
Model:	MP40/I
Manufacturer:	Erfurter Maschinenfabrik (ERMA) (ayf)
Level:	Converted Automatics
Type:	Submachine Gun
Action:	Converted Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
26219 - 1	9MM LUGER	5	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
26219 - 2	9MM LUGER	32	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm. The MP38 Model is a Vollmer/Erma Werke development.
- Schmeisser did develop the design of the MP41 Model, which is an adaption of the MP40 Model with a wooden stock and a different trigger mechanism.
- Hugo Schmeisser was manager of the Haenel factory during World War II.

Model

- the MP40/I submachine gun is a development / modification to the MP40. It was redesigned / modified to incorporate a two piece lock-down style bolt handle which in conjunction with an upwards cut-out in the forward end of the cocking handle slot was intended to prevent accidental discharges when the bolt was in the forward position. This is the same retrofit modification as was incorporated on the MP38 to make the model officially the MP38/40.

Manufacturer

- Erma used code 27 until some time in 1941, when the code changed to ayf.

Type

- the type is refered to in German literature as a "MACHINE PISTOLE".

Action

- no longer capable of full automatic fire.

Serial Number

- marked on the top rear of the receiver: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Remarks

- The submachine gun known as the MP40/I is an MP40 that has been modified to make it safe to carry with the bolt in the forward position. MP40/I is the official German designation for this modified MP40. The MP40/I was redesigned / modified to incorporate a two piece lock-down style bolt handle which in conjunction with an upwards cut-out in the forward end of the cocking handle slot, was intended to securely lock the the bolt in the forward position.
- Before modification, when the bolt was in the forward position and unlocked, the bolt could be "bounced" within the firearm due to the inertia possessed by the heavy mass of the bolt if the firearm was dropped or when jumping from a vehicle to the ground when a loaded magazine was present in the firearm. When this happened , the unpleasant result would be; the bolt on its return to the forward position would feed a cartridge from the magazine into the chamber. As the firearm functions in the "advanced primer ignition - blow-back" mode; when the bolt closes on a cartridge the cartridge discharges. This is the same retrofit modification as was incorporated on the MP38 to make the model officially the MP38/40.
- Some MP40's were modified by armourers in the field and may not have been restamped / remarked as MP40/I's.

Other Markings

- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- The submachine gun known as the MP40/I is an MP40 that has been modified to make it safe to carry with the bolt in the forward position. MP40/I is the official German designation for this modified MP40. The MP40/I was redesigned / modified to incorporate a two piece lock-down style bolt handle which in conjunction with an upwards cut-out in the forward end of the cocking handle slot, was intended to securely lock the the bolt in the forward position.
- Before modification, when the bolt was in the forward position and unlocked, the bolt could be "bounced" within the firearm due to the inertia possessed by the heavy mass of the bolt if the firearm was dropped or when jumping from a vehicle to the ground when a loaded magazine was present in the firearm. When this happened , the unpleasant result would be; the bolt on its return to the forward position would feed a cartridge from the magazine into the chamber. As the firearm functions in the "advanced primer ignition - blow-back" mode; when the bolt closes on a cartridge the cartridge discharges. This is the same retrofit modification as was incorporated on the MP38 to make the model officially the MP38/40.
- Some MP40's were modified by armourers in the field to MP40/I's and may not have been restamped / remarked as MP40/I's.

FRT Report

Firearm Reference Number (FRN): 26217
Make: Schmeisser
Model: MP40/I

Summary

Make:	Schmeisser
Model:	MP40/I
Manufacturer:	Haenel (fxo)
Level:	Converted Automatics
Type:	Submachine Gun
Action:	Converted Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
26217 - 1	9MM LUGER	5	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
26217 - 2	9MM LUGER	32	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make	- this firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm. The MP38 Model is a Vollmer/Erma Werke development. - Schmeisser did develop the design of the MP41 Model, which is an adaption of the MP40 Model with a wooden stock and a different trigger mechanism. - Hugo Schmeisser was manager of the Haenel factory during World War II.
Model	- the MP40/I submachine gun is a development / modification to the MP40. It was redesigned / modified to incorporate a two piece lock-down style bolt handle which in conjunction with an upwards cut-out in the forward end of the cocking handle slot was intended to prevent accidental discharges when the bolt was in the forward position. This is the same retrofit modification as was incorporated on the MP38 to make the model officially the MP38/40.
Type	- the type is refered to in German literature as a "MACHINE PISTOLE".
Action	- no longer capable of full automatic fire.
Serial Number	- marked on the top rear of the receiver/frame: S/N sequence normally starts to 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.
Shots	- detachable box magazine.
Other Markings	- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

When this happened , the unpleasant result would be; the bolt on its return to the forward position would feed a cartridge from the magazine into the chamber. As the firearm functions in the "advanced primer ignition - blow-back" mode; when the bolt closes on a cartridge the cartridge discharges. This is the same retrofit modification as was incorporated on the MP38 to make the model officially the MP38/40.
- Some MP40's were modified by armourers in the field to MP40/I's and may not have been restamped / remarked as MP40/I's.

FRT Report

Firearm Reference Number (FRN): 36808
Make: Schmeisser
Model: MP40/I

Summary

Make:	Schmeisser
Model:	MP40/I
Manufacturer:	Steyr-Daimler-Puch (660)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Submachine Gun
Action:	Full Automatic
Country of Manufacturer:	AUSTRIA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
36808 - 1	9MM LUGER	5	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- this firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm. The MP38 Model is a Vollmer/Erma Werke development. - Schmeisser did develop the design of the MP41 Model, which is an adaption of the MP40 Model with a wooden stock and a different trigger mechanism. - Hugo Schmeisser was manager of the Haenel factory during World War II.
Model	- The MP40/I submachine gun is a development / modification to the MP40. It was redesigned / modified to incorporate a two piece lock-down style bolt handle which in conjunction with an upwards cut-out in the forward end of the cocking handle slot was intended to prevent accidental discharges when the bolt was in the forward position. This is the same retrofit modification as was incorporated on the MP38 to make the model officially the MP38/40.
Manufacturer	- Steyr-Daimler-Puch used code 660 until some time in 1941, when the code changed to bnz.
Type	- the type is refered to in German literature as a a "MACHINE PISTOLE".
Action	- blowback operated.
Serial Number	- marked on the top rear of the receiver: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.
Shots	- detachable box magazine.
Other Markings	- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- The submachine gun known as the MP40/I is an MP40 that has been modified to make it safe to carry with the bolt in the forward position. MP40/I is the official German designation for this modified MP40. The MP40/I was redesigned / modified to incorporate a two piece lock-down style bolt handle which in conjunction with an upwards cut-out in the forward end of the cocking handle slot, was intended to securely lock the the bolt in the forward position.
- Before modification, when the bolt was in the forward position and unlocked, the bolt could be "bounced" within the firearm due to the inertia possessed by the heavy mass of the bolt if the firearm was dropped or when jumping from a vehicle to the ground when a loaded magazine was present in the firearm. When this happened , the unpleasant result would be; the bolt on its return to the forward position would feed a cartridge from the magazine into the chamber. As the firearm functions in the "advanced primer ignition - blow-back" mode; when the bolt closes on a cartridge the cartridge discharges. This is the same retrofit modification as was incorporated on the MP38 to make the model officially the MP38/40.
- Some MP40's were modified by armourers in the field to MP40/I's and may not have been restamped / remarked as MP40/I's.

The MP40/I was redesigned / modified to incorporate a two piece lock-down style bolt handle which in conjunction with an upwards cut-out in the forward end of the cocking handle slot, was intended to securely lock the the bolt in the forward position.
- Before modification, when the bolt was in the forward position and unlocked, the bolt could be "bounced" within the firearm due to the inertia possessed by the heavy mass of the bolt if the firearm was dropped or when jumping from a vehicle to the ground when a loaded magazine was present in the firearm. When this happened , the unpleasant result would be; the bolt on its return to the forward position would feed a cartridge from the magazine into the chamber. As the firearm functions in the "advanced primer ignition - blow-back" mode; when the bolt closes on a cartridge the cartridge discharges. This is the same retrofit modification as was incorporated on the MP38 to make the model officially the MP38/40.
- Some MP40's were modified by armourers in the field to MP40/I's and may not have been restamped / remarked as MP40/I's.

FRT Report

Firearm Reference Number (FRN): 36828
Make: Schmeisser
Model: MP40/II

Summary

Make:	Schmeisser
Model:	MP40/II
Manufacturer:	Erfurter Maschinenfabrik (ERMA) (ayf)
Level:	Converted Automatics
Type:	Submachine Gun
Action:	Converted Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
36828 - 1	9MM LUGER	5	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
36828 - 2	9MM LUGER	32	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
36828 - 3	9MM LUGER	64	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- This firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm. The MP38 Model is a Vollmer/Erma Werke development.
- Schmeisser did develop the design of the MP41 Model, which is an adaption of the MP40 Model with a wooden stock and a different trigger mechanism.
- Hugo Schmeisser was manager of the Haenel factory during World War II.

Model

- The MP40/II is a version of the MP40 Model with a redesigned magazine housing that accepts two magazines and effectively doubles the magazine capacity of the firearm.
- This adaptation merely permits magazine changes to occur much more quickly than with the single magazine feed feature.

Manufacturer

- Erma used code 27 until some time in 1941, when the code changed to ayf.

Type

- the type is refered to in German literature as a a "MACHINE PISTOLE".

Action

- no longer capable of full automatic fire.

Serial Number

- marked on the top rear of the receiver: S/N sequence starts at 1 and progresses to 9999, then goes to 1a progressing to 9999a, and thence to 1b to 9999b, etc.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazines in an unusual dual feed mechanism.
Other Markings	- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.
Remarks	- The MP40/II is a version of the MP40 Model with a redesigned magazine housing that accepts two magazines and effectively doubles the magazine capacity of the firearm. - This adaptation merely permits magazine changes to occur much more quickly than with the single magazine feed feature.

Make

- commonly called the Schmeisser. Hugo Schmeisser developed the design of the MP41, which is an adaption of the MP40 Model with a wooden stock and a different trigger mechanism.
- Hugo Schmeisser was manager of the Haenel factory during World War II.

Model

- the MP41 was the final evolution of the traditional submachine gun in Germany. It was developed by C.G. Haenel (fxo). The firearm is a basic MP40 with the firing mechanism of the MP28/II, a wooden stock and has no barrel "resting bar". The firearm is marked MP41, Patent Schmeisser, C.G. Haenel, Suhl on the top of the receiver.
- the MP41 was not "accepted" by the German Armed Forces. German police, para military Police organizations and the Waffen SS used the MP41 in limited quantities.

Type

- the type is refered to in German literature as a a "MACHINE PISTOLE".

Action

- no longer capable of full automatic fire.

Serial Number

- the MP41 was not adopted by the German Heer (Armed Forces) and therefor not subject to the normal serial numbering practices enforced by the German Armed Forces Weapons Office (deutschen Heereswaffenamt Wa Z 2).
- the serial number rationalization is unknown.
- observed specimen serial numbers consisted of five digits without prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.

Other Markings

- The firearm is marked MP41, Patent Schmeisser, C.G. Haenel, Suhl on the top of the receiver.

FRT Report

Firearm Reference Number (FRN): 26224
Make: Schmeisser
Model: MP41

Summary

Make:	Schmeisser
Model:	MP41
Manufacturer:	Haenel (fxo)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Submachine Gun
Action:	Full Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
26224 - 1	9MM LUGER	5	251	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- This firearm is commonly called the "Schmeisser" although Hugo Schmeisser had little to do with the firearm. The MP38 Model is a Vollmer/Erma Werke development.
- Schmeisser did develop the design of the MP41 Model, which is an adaption of the MP40 Model with a wooden stock and a different trigger mechanism.
- Hugo Schmeisser was manager of the Haenel factory during World War II.

Model

- the MP41 was the final evolution of the traditional submachine gun in Germany. It was developed by C.G. Haenel (fxo). The firearm is a basic MP40 with the firing mechanism of the MP28/II, a wooden stock and has no barrel "resting bar". The firearm is marked MP41, Patent Schmeisser, C.G. Haenel, Suhl on the top of the receiver.
- the MP41 was not "accepted" by the German Armed Forces. German police, para military Police organizations and the Waffen SS used the MP41 in limited quantities.

Type

- the type is refered to in German literature as a a "MACHINE PISTOLE".

Action

- blowback operation.

Serial Number

- the MP41 was not adopted by the German Heer (Armed Forces) and therefor not subject to the normal serial numbering practices enforced by the German Armed Forces Weapons Office (deutschen Heereswaffenamt Wa Z 2).
- the serial number rationalization is unknown.
- observed specimen serial numbers consisted of five digits without prefix or suffix.

Shots

- detachable box magazine.

Other Markings

- the firearm is marked MP41, Patent Schmeisser, C.G. Haenel, Suhl on the top of the receiver.
- this firearm normally has serial numbers or partial S/Ns on all major component, as well as small markings on other parts which identifies the manufacturer of that part.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- the MP41 was the final evolution of the traditional submachine gun in Germany. It was developed by C.G. Haenel (fxo). The firearm is a basic MP40 with the firing mechanism of the MP28/II, a wooden stock and has no barrel "resting bar". The firearm is marked MP41, Patent Schmeisser, C.G. Haenel, Suhl on the top of the receiver.
- the MP41 was not "accepted" for use by the German Armed Forces. German police, para military police organizations and the Waffen SS used the MP41 in limited quantities.

Notes

Make

- "Schmeisser's "S" logo, over "SCHMEISSER" over "MADE IN GERMANY" is marked on the left side of the magazine housing of the receiver/frame.
- "SCHMEISSER" logo is represented by the letter "S" integrated into the centre of a muzzle end of a rifled barrel.

Model

- "MR-BA19" may be marked on the firearm.
- "MR" denotes "manual release".
- "BA" denotes "bolt action".
- This firearm is of the design commonly known as the AR15/M16.

Manufacturer

- Schmeisser's "S" logo, over "SCHMEISSER" over "MADE IN GERMANY" is marked on the left side of the magazine housing of the receiver/frame.
- "SCHMEISSER" logo is represented by the letter "S" integrated into the centre of a muzzle end of a rifled barrel.
- "SCHMEISSER GmbH" is located in Krefeld, Germany.
- "SCHMEISSER GmbH" is manufacturer of selective fire and semi-automatic firearms of the AR15, M-16, and M4 family.
- "SCHMEISSER GmbH" is not to be confused with Hugo Schmeisser, manager of the Haenel factory during World War II that had his name attached to some submachine gun types.

Action

- semi-automatic extraction/ejection with a manually operated loading.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the left side of the magazine housing of the receiver/frame.
Calibre	- calibre identification is marked on the barrel.
Shots	- detachable box magazine. - uses all magazines available for AR15/M16 type rifles.

Model: PSR9

Summary

Make:	Schmeisser
Model:	PSR9
Manufacturer:	Schmeisser GmbH
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Pump Action
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
200233 - 3	9MM LUGER	10	318	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
200233 - 2	9MM LUGER	10	368	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
200233 - 1	9MM LUGER	10	406	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- The company logo is marked on the receiver/frame.
- The company logo consists of a stylized letter "S" inside a circle resembling a rifled barrel.
- "SCHMEISSER" is marked on the left side of the receiver/frame.
- "Schmeisser GmbH" is not to be confused with Hugo Schmeisser, manager of the Haenel factory during World War II that had his name attached to some submachine gun types.

Model

- Introduced in 2025.
- "PSR 9" is marked on the left side of the lower receiver/frame.
- Features include: Proprietary handguard with top accessory rail; textured pump handle; split receiver/frame design; accessory rail above upper receiver; proprietary rotating bolt and carrier; ambidextrous bolt catch/release and safety selector; magazine release on the right side of the lower receiver; AR-15 pattern pistol grip and telescopic buffer tube stock.
- Overall length with a 318 mm (12.5 inches) barrel is 747 mm (29.4 inches) with the stock collapsed, average weight is 2.86 kg (6.3 lbs).

Manufacturer

- The company logo is marked on the receiver/frame.
- The logo consists of a stylized letter "S" inside a circle resembling a rifled barrel.
- "SCHMEISSER" is marked on the left side of the receiver/frame.
- "Schmeisser GmbH" is not to be confused with Hugo Schmeisser, manager of the Haenel factory during World War II that had his name attached to some submachine gun types.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- The serial number is marked on the left side of the receiver/frame. - The serial number is repeated on other parts and components. - The serial number of referenced example consists of a letter prefix followed by five digits.
Barrel	- The barrel length does not include any attached device such as flash-hider or muzzle brake.
Calibre	- The calibre designation is marked on the barrel.
Shots	- Detachable box magazine. - Designed to accept "Glock" type magazines.
Canadian Law Comments	- This firearm design incorporates a split receiver/frame: the lower receiver is the master component considered to be the receiver/frame for all purposes of the Criminal Code and the Firearms Act.
