Notes

Make

- marked on the left side of the slide: SMITH & WESSON
- moulded into the both sides of the handgrips of the receiver/frame: (S&W logo)

Model

- manufactured from 1999 to 2001.
- "SW40VE" is marked on the left side of the slide.
- this is one of the variations of the "Sigma" series of pistols.
- this is the "Enhanced" and refined version of the SW40V ("V" for Value).
- the SW40VE may be distinguished externally (from the SW40V) by the drift adjustable rear sight of the Low Profile three-dot sight system with replaceable blade front sight, integrally moulded-in checkered hand-grip side panel, more rounded slide, enlarged ejection port, and an accessory mounting groove on the moulded foreframe; not readily visible but noticeable, is the smooth, even trigger pull, and integral safety mechanism.
- Features of this firearm model:
- moulded polymer handgrip and magazine, with a stainless steel slide and barrel.
- double action only

Manufacturer

- marked on the left side of the slide: SMITH & WESSON SPRINGFIELD MA. U.S.A.

Action

- recoil operated.

Serial Number

- located in front of the trigger guard on the moulded frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- the calibre designation is normally marked on the barrel, visible through the ejection port.
Shots	- detachable box magazine.

Notes

Make

- the make is normally marked on the left side of the slide as, "SMITH & WESSON" over "SPRINGFIELD, MA U.S.A.", the Smith & Wesson logo will appear moulded into the grips.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- introduced in 1999. - marked on the left side of the slide: SW99 (do not confuse with the almost identical Walther P99 pistol). - moulded into the forward left side of the receiver/frame: "WALTHER" in a banner. - moulded into the right side of the receiver/frame: FRAME MADE IN GERMANY. - NOTE: the principle difference between the SW99 and the Walther P99 is the rounded trigger-guard on the SW99. - common features: single / double action trigger, fixed front and adjustable rear sight, de-cocker on the top right side of the slide ahead of the rear sight, and cocked / un-cocked striker indicator at the rear of the slide, three different sized interchangeable rear-grip inserts used to alter size of hand-grip, ambidextrous finger / thumb operated magazine release, and the chamber-loaded indicating extractor. - Smith & Wesson and Carl Walther GmbH shared in the common design and manufacture of this firearm.
Manufacturer	- the manufacturer is normally marked on the receiver/frame, the left side of the receiver/frame as, "WALTHER" in a banner, and on the right side, "FRAME MADE IN GERMANY. - the design of this firearm is a joint venture between Smith & Wesson and Umarex, the parent company that owns Carl Walther GmbH - Walther is a German manufacturer that has been making firearms since 1886. - Walther is particularly known for their handguns, but they also manufacture match-grade air rifles and air pistols, as well as small-bore target rifles and hunting rifles. - the slide and barrel of the Smith & Wesson Model SW99 are made in the USA while the receiver/frame of this firearm is made in Germany; this information is prominently marked on the firearm's receiver/frame. - the firearm is assembled, and finished in the USA.
Action	- recoil operated.
Serial Number	- the serial number rationalization is the same as all other Smith & Wesson handguns: three letters followed by four digits. - located (moulded into frame) on the rear of the receiver/frame.
Calibre	- the calibre is normally marked on the barrel, visible through the ejection port. Example "40 S&W". - the 45 AUTO version was introduced in 2003.
Shots	- detachable box magazine.
Also Known As/Product Code	- the receiver/frame for this firearm is manufactured in Germany by Walther. - the receiver/frame is prominently marked with the "Walther Banner" Trade Mark and "Made in Germany".
Other Markings	- marked on the right side of the receiver/frame above hand-grip: CAUTION: Capable of firing with magazine removed.

Notes

Make

- the make is marked on the left side of the slide as, "SMITH & WESSON" over "SPRINGFIELD, MA U.S.A.", the Smith & Wesson logo is moulded into the grips.

Model

- this model is a compact version of the model SW99. It features a shortened barrel, slide and receiver/frame.
- the model designation is marked on the slide as "SW99", only the size denotes it as the "Compact".
- features include: polymer receiver/frame; stainless steel slide and barrel; interchangeable backstraps; decocking button is positioned on the top left of the slide; ambidextrous magazine release is located on the bottom of the trigger guard; a red loaded chamber indicator is visible in the extractor cut on the slide when the striker is cocked; a red cocking indicator protrudes from the rear of the slide when the striker is cocked; black overall finish.

Manufacturer

- the manufacturer is marked on the receiver/frame, the left side of the receiver/frame as, "WALTHER" in a banner, and on the right side, "FRAME MADE IN GERMANY.
- the design of this firearm is a joint venture between Smith & Wesson and Umarex, the parent company that owns Carl Walther GmbH.
- Walther is a German manufacturer that has been making firearms since 1886.
- Walther is particularly known for their handguns, but they also manufacture match-grade air rifles and air pistols, as well as small-bore target rifles and hunting rifles.
- the slide and barrel of the Smith & Wesson Model SW99 are made in the USA while the receiver/frame of this firearm is made in Germany; this information is prominently marked on the firearm's receiver/frame.
- the firearm is assembled, and finished in the USA.

Action

- recoil operated.

Serial Number

- the serial number rationalization is the same as all current Smith & Wesson handguns: three letters followed by four digits.
- located (moulded into the receiver/frame) on the rear of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Other Markings - marked on the right side of the receiver/frame above hand-grip: CAUTION: Capable of firing with magazine removed.

FRT Report

Firearm Reference Number (FRN): 123260
Make: Smith & Wesson
Model: SW990

Summary

Make:	Smith & Wesson
Model:	SW990
Manufacturer:	Smith & Wesson/Walther
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
123260 - 1	40 S&W	12	102	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SMITH & WESSON" over "SPRINGFIELD, MA U.S.A." is marked on the left side of the slide.
- Smith & Wesson's logo is moulded into the grips.

Model

- "SW990" is marked on the left side of the slide.
- same as model SW99 without de-cocker on the top right side of the slide ahead of the rear sight.
- features include: double action trigger; fixed front and adjustable rear sight; cocked / un-cocked striker indicator at the rear of the slide; interchangeable rear-grip inserts used to alter size of hand-grip; ambidextrous finger / thumb operated magazine release; and the chamber-loaded indicating extractor.

Manufacturer

- this model is built as a collaboration between Smith & Wesson and Walther. The receiver/frames are produced in Germany and the barrel/slide assemblies are produced and fitted in the United States.
- "WALTHER" in a banner is marked on the left side, and "FRAME MADE IN GERMANY" is marked on the right side of the receiver/frame.

Action

- recoil operated.

Serial Number

- the serial number is located (moulded into frame) on the rear of the receiver/frame and on the left side of the slide.
- example observed with three letters followed by four digits.

Shots

- detachable box magazine

Notes

Make

- "SMITH & WESSON" is marked on the left side of the slide.
- "S&W" logo is moulded into the grips.

Model

- introduced in 1999.
- this is one of the variations of the "Sigma" series of pistols.
- "SW9VE" is marked on the left side of the slide.
- features include: three dot sights sytem; round barrel; blued carbon steel or satin stainless steel flat sided slide with slanted grip serrations; black, green, or grey polymer receiver/frame; double action only (DAO) trigger mechanism.
- overall length is 184 mm (7 1/4"), and the average weight is 680.4 grams (24.7 oz).

Manufacturer

- "SMITH & WESSON" is marked on the left side of the slide.

Action

- recoil operated.

Serial Number

- serial number is marked on the underside of the receiver/frame forward of the trigger guard.
- observed serial number consists of a three letter prefix and four numbers.

Calibre

- calibre is marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

FRT Report

Firearm Reference Number (FRN): 21863
Make: Smith & Wesson
Model: Tip Up 22 No 1 Issue 1

Summary

Make:	Smith & Wesson
Model:	Tip Up 22 No 1 Issue 1
Manufacturer:	Smith & Wesson
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
21863 - 1	22 SHORT	7	81	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- marked on top of the barrel rib: SMITH & WESSON, SPRINGFIELD MAS:

Model

- manufactured from 1857 to 1860. (not marked as "Model No. 1", originally refered to as the "Number One Cartridge".)
- silver-plated brass frame with sideplate (early configuration is small and round, later ones are large and ovate, opening to the hammer cut) on the left side.
- blued steel ribbed octagonal barrel, spurred hammer, cylinder axis pin, spurr trigger (without trigger guard), and plain unfluted cylinder.
- cylinder engraved around mid-circumference: PATENTED APRIL 3, 1885, JULY 5, 1859, & DEC. 19, 1863. (April 3, 1885 date refers to the Rollin White patent for "bored through" cylinder)
- square flared butt, plain rosewood hand-grip panels attached with one screw.
- barrel hinged to the frame at the top above the front of the cylinder; release-latch located on the foreward frame below the front of the cylinder.
- the forward extension of the cylinder axis pin is used to manually press spent cartridge cases out of the cylinder.
- on the initial 213 produced, the cartridge recoil plate revolved with the cylinder (on later units, the recoil plate was part of the frame).

Manufacturer

- the manufacture is normally marked on the top of the barrel rib as, "SMITH & WESSON SPRINGFIELD, MASS".

Action

- tip-up break-frame revolver.

Serial Number

- serial number is stamped in the grip butt.
- range: approximately from 1 to 11671.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- the model number indicates the frame size. There are three models and the variations in the frames are;
- No. 1 First Issue - has a round oval shaped receiver/frame above the trigger spur, a round access plate on the left side of the receiver/frame behind the cylinder and a square flared grip.
- No. 1 Second Issue - has a square shaped receiver/frame above the trigger spur, a irregular shaped access plate on the left side of the receiver/frame behind the cylinder and a square flared grip.
- No. 1 Third issue - has a square shaped receiver/frame above the trigger spur, a irregular shaped access plate on the left side of the receiver/frame behind the cylinder and a birds head grip.

26286 - 1	22 SHORT	7	81	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is marked on the top of the barrel rib as, "SMITH & WESSON SPRINGFIELD, MASS".

Model

- manufactured from 1860 to 1868.
- the model designation is not marked on this firearm.
- the No. 1 Second Issue has a square shaped receiver/frame above the trigger spur, a irregular shaped access plate on the left side of the receiver/frame behind the cylinder and a square flared grip.
- features include: single action, spurred hammer, spurred trigger, non fluted cylinder, fixed round blade front sight with a notch on the rear cylinder notch, octogan barrel, exposed cylinder pin located under the barrel and the grips may be wood or ebony.
- the finish may be a silver finished receiver/frame with a blued barrel and cylinder or a complete nickle or silver plate finish.
- the non fluted cylinder normally was marked, "PATENTED APRIL 3, 1855, JULY 5, 1859." At approximately 20,000 in the serial number range, the following patent date was added, "DEC. 18, 1860".
- approximately 4,402 had a minor defect in the cast or the finish and they were marked, "2D.QUAL'TY". This mark may appear on the right side of the barrel in front of the cylinder.

Manufacturer

- the manufacture is normally marked on the top of the barrel rib as, "SMITH & WESSON SPRINGFIELD, MASS".

Action

- break open tip up receiver/frame.

Serial Number

- serial number is marked on the grip butt.
- serial number range is approximately from 11672 to 126361.

Other Markings

- some may be marked "2ND QUAL'TY"

21864 - 6	22 SHORT	7	106	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- may be marked "Smith & Wesson Springfield Mass. U.S.A".
- Smith & Wesson trademark logo may be stamped on the receiver/frame.

Model

- manufactured from 1868 to 1881.
- may also be known as "Model 1 Third Issue" or "Model No. 1 Third Model".
- features include: a spur trigger, round barrel, fixed cylinder revolver featuring a fluted cylinder, bird's head grip, blued or nickel finish, or nickel finished receiver/frame with blued barrel, no trigger guard, blade front sight and the barrel release latch located at the forward bottom of the receiver/frame.
- the 80mm barrel model normally had "SMITH & WESSON SPRINGFIELD MASS. PAT. APR. 3, 55 JULY 5, 59". At approximately 20,000 in the serial number range, the following patent date was added, "DEC. 18, 1860".
- the 69mm barrel model normally had the "S&W" patent markings on the left side of the barrel with no markings along the top strap of the barrel.
- approximately 7 had a minor defect in the cast or the finish and they were marked, "2D.QUAL'TY". This mark may appear on the right side of the barrel in front of the cylinder.

Manufacturer

- the manufacture is normally marked on the top of the barrel rib as, "SMITH&WESSON SPRINGFIELD MASS. PAT.APR.3,55 JULY5,59 DEC.18,60".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- break open tip up receiver/frame.
Serial Number	- the serial number is marked on the butt of the receiver/frame with the sequential numbers with the serial numbers range of 1 to 131163.
Other Markings	- barrel may be marked with the following patent dates: April 3, 55-July 5, 59-Dec 18, 60
Remarks	- the model number indicates the frame size. There are three models and the variations in the frames are; - No. 1 First Issue - has a round oval shaped receiver/frame above the trigger spur, a round access plate on the left side of the receiver/frame behind the cylinder and a square flared grip. - No. 1 Second Issue - has a square shaped receiver/frame above the trigger spur, a irregular shaped access plate on the left side of the receiver/frame behind the cylinder and a square flared grip. - No. 1 Third issue - has a square shaped receiver/frame above the trigger spur, a irregular shaped access plate on the left side of the receiver/frame behind the cylinder and a birds head grip.

FRT Report

Firearm Reference Number (FRN): 39287
Make: Smith & Wesson
Model: Tip Up 32 No 1 1/2 Issue 1 Old Model

Summary

Make:	Smith & Wesson
Model:	Tip Up 32 No 1 1/2 Issue 1 Old Model
Manufacturer:	Smith & Wesson
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
39287 - 1	32 RF	5	89	Antique AFR, Section 1, para. 6	Manufacturer Specifications and Commercial Customization	
39287 - 2	32 RF	5	102	Antique AFR, Section 1, para. 6	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SMITH & WESSON" is marked on the top of the barrel.

Model

- it is believed that approximately 26,300 of this model were manufactured circa 1865 to 1868.
- features include: square butt profile (the No 1 1/2 Transition model had a bird's head grip); spur trigger, single-action trigger mechanism; tip-up barrel; non-fluted cylinder; round front sight.
- may also be known as "Model 1 1/2 1st Issue".
- from serial number 1 to 15,304 the top of the barrel was marked "SMITH & WESSON. SPRINGFIELD, MASS." over "PAT'D. APR. 3. 1855. & JUL. 5. 1859.". After serial number 15,304 a further patent date of "NOV 21, 1865" was added.
- may also be known as "Model 1 1/2 1st Issue".

Manufacturer

- "SMITH & WESSON" markings are found on the barrel.

Serial Number

- serial number is marked on the bottom of the butt, ranges from 1 to 26300 (approximately).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- there is much confusion when identifying early Smith & Wesson revolvers. Smith & Wesson used a numbering system to identify receiver/frame sizes. The confusion results from the same number being used to identify small rimfire revolvers with a "Tip Up" barrel as well as centre-fire revolvers with hinged barrels that "Tip Down".
- the "No 1" receiver/frame size designation was used for models chambered for calibre 22 Rimfire ammunition only. There were several variations/types of these revolvers.
- the "No 2" receiver/frame size designation was used for models that had six shot cylinders and were chambered for calibre 32 LONG RF ammunition that used a "Tip Up" barrel, as well as for models with a five shot cylinder chambered for calibre 38 Centre-Fire ammunition that had a hinged, "Tip Down" barrel. Although both versions were so equipped, the Centre-Fire variant is commonly referred to as the "38 Single Action" or "38 Single Action No 2".
- the "No 1 1/2" receiver/frame size designation was used for models that had five shot cylinders and were chambered for calibre 32 LONG RF ammunition that used a "Tip Up" barrel, as well as for models chambered for calibre 32 Centre-Fire ammunition that had a hinged, "Tip Down" barrel. Although both versions were so equipped, the Centre-Fire variant is commonly referred to as the "No 1 1/2 Single Action" or "32 Single Action". The "No 1 1/2" was smaller than the "No 2".
- the "No 3" receiver/frame size designation was used for a model (very rare) that had a four shot, calibre 41 RF cylinder and a "Tip Up" barrel, as well as a large "Top Break" design that had a "Tip Down" barrel and was offered in numerous centre-fire calibres.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
39283 - 1	32 RF	5	89	Antique AFR, Section 1, para. 6	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SMITH & WESSON. SPRINGFIELD. MASS." over "PAT'D. APR. 3. 1855 JULY. 5. 1859." marked on top of the barrel.

Model

- model designation is not marked on the firearm.
- "Tip Up" refers to the operating function of the barrel for loading and unloading.
- this "transition" Model was produced with the "Old Model" unfluted cylinder and octagonal barrel as well as the "New Model" birds head grip frame.
- approximately 650 were produced.
- features include: fixed half moon front sight; octagonal ribbed barrel; fixed ejector stud under the barrel; barrel unlocking latch at the bottom rear of the barrel, locking into the bottom front of the receiver/frame; unfluted cylinder; spur hammer; spur trigger; bottom flaring, square butt wood grip panels; blued finish.

Manufacturer

- "SMITH & WESSON. SPRINGFIELD. MASS." marked on top of the barrel.

Serial Number

- Range: approximately from 27200 to 28800.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- there is much confusion when identifying early Smith & Wesson revolvers. Smith & Wesson used a numbering system to identify receiver/frame sizes. The confusion results from the same number being used to identify small rimfire revolvers with a "Tip Up" barrel as well as centre-fire revolvers with hinged barrels that "Tip Down".
- the "No 1" receiver/frame size designation was used for models chambered for calibre 22 Rimfire ammunition only. There were several variations/types of these revolvers.
- the "No 2" receiver/frame size designation was used for models that had six shot cylinders and were chambered for calibre 32 LONG RF ammunition that used a "Tip Up" barrel, as well as for models with a five shot cylinder chambered for calibre 38 Centre-Fire ammunition that had a hinged, "Tip Down" barrel. Although both versions were so equipped, the Centre-Fire variant is commonly referred to as the "38 Single Action" or "38 Single Action No 2".
- the "No 1 1/2" receiver/frame size designation was used for models that had five shot cylinders and were chambered for calibre 32 LONG RF ammunition that used a "Tip Up" barrel, as well as for models chambered for calibre 32 Centre-Fire ammunition that had a hinged, "Tip Down" barrel. Although both versions were so equipped, the Centre-Fire variant is commonly referred to as the "No 1 1/2 Single Action" or "32 Single Action". The "No 1 1/2" was smaller than the "No 2".
- the "No 3" receiver/frame size designation was used for a model (very rare) that had a four shot, calibre 41 RF cylinder and a "Tip Up" barrel, as well as a large "Top Break" design that had a "Tip Down" barrel and was offered in numerous centre-fire calibres.

Notes

Make

- the Smith & Wesson name will be marked on the firearm.

Model

- only 30 of this model were manufactured in 1880.
- key points that identify this model are the serial number (1 - 30) and the front and rear edge of the sideplate are straight lines and not curved.
- features include: fluted cylinder, round barrel profile, hinged top break action with automatic ejection of cartridge cases, black hard rubber grips, blued or nickel finish, round blade front sight that is pinned to the barrel, and separate trigger-guard with a reverse curve on the rear edge.
- later in 1880, modifications (curved sideplate, short flutes on cylinder, serial number 31 to 22172) led to this model becoming known as the "32 Double Action Second Model".

Serial Number

- serial number ranges for all variants:
- 32 Double Action First Model: 1 - 30 (30 manufactured, 1880)
- 32 Double Action Second Model: 31 - 22172 (22,142 manufactured, 1880-1882)
- 32 Double Action Third Model: 22173 - 43405 (22,232 manufactured, 1882-1883)
- 32 Double Action Fourth Model: 43406 - 282999 (239,600 manufactured, 1883-1909)
- 32 Double Action Fifth Model: 283000 - 327641 (44,641 manufactured, 1909-1919)

Model

- "Top Break 32 Safety Hammerless Second Model" is not marked on the firearm.
- manufactured from 1902 to 1909.
- "Top Break 32 Safety Hammerless Second Model" may also be known as "32 Safety Second Model", "New Departure", "Second Model 32 Safety Hammerless New Departure" or "Lemon Squeezer".
- features include: round rifled barrel with solid top rib; pinned blade front sight and notch in the barrel latch for a rear sight; front hinged receiver/frame with fluted cylinder and T-shaped break open latch on the rear of the top strap; left side plate of the receiver/frame is held in place by two screws; hammerless; double action only trigger mechanism; checkered grip safety; square bottom grip strap; checkered grip plates; nickel plated finish.
- NOTE: the Top Break 32 Safety Hammerless was available in three models:
- First Model had a pinned front sight, push down break open release latch and a serial number range from 1 to 91417.
- Second Model had a pinned front sight, lifting T-shaped break open catch with two knurled buttons (one on each side of the topstrap) and a serial number range from 91418 to 170000.
- Third Model had a forged front sight, lifting T-shaped break open catch with two knurled buttons (one on each side of the topstrap) and a serial number range from 170000 to 242981.

Manufacturer

- the S&W logo is usually marked on the right side of the receiver/frame.
- "Smith & Wesson, Springfield Mass USA. " may be marked on the top of the barrel rib.

Action

- top break action.

Serial Number

- serial number ranges from 91,418 to 170,000 (overlaps with the Third Model from 163,082 to 175,772).
- serial number is marked on the bottom of the grip strap of the receiver/frame.

Calibre

- "32 S&W CTG" is usually marked on the left side of the barrel.

Notes

Make - make is marked on top of the barrel rib as "SMITH & WESSON SPRINGFIELD MASS. U.S.A.".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured from 1878 to 1892.
- the model designation is not marked on the firearm. The "No 1 1/2" in the model designation refers to the calibre .32 receiver/frame size. "Single Action" denotes a single action trigger mechanism.
- features include: top-break design, the barrel is hinged to the receiver/frame at the front of the bottom strap and tips down when opened; the barrel is latched to the receiver/frame on the top strap; spur trigger, single action trigger mechanism; automatic extraction; fluted cylinder; round barrel with pinned round blade front sight; blued or nickel finish; grips are checkered hard rubber in black, brown or mottled red.
- three styles of grips were available: plain checkering without the S&W logo (S/N 1 to 15000), checkered with plain block lettering S&W logo (S/N 15,000 to 29,000), and checkered with fancy S&W logo (S/N 29,000 to 97,500).
- early models have an eccentric strain screw for the main spring tension located under the grips (S/N 1 to 6500).
- patent dates on barrel: Jan 17 and 24, 65-July 11, 65; Aug. 24, 69-Feb 20, 1877; reissue July 25, 1871.
- total of 97,574 produced.

Manufacturer

- manufacturer is marked on top of the barrel rib as "SMITH & WESSON SPRINGFIELD MASS. U.S.A.".

Serial Number

- serial number ranges from 1 to 97574.
- serial number is marked on the bottom of the grip frame.

Shots

- fixed cylinder.

Remarks

- there is much confusion when identifying early Smith & Wesson revolvers. Smith & Wesson used a numbering system to identify receiver/frame sizes. The confusion results from the same number being used to identify small rimfire revolvers with a "Tip Up" barrel as well as centre-fire revolvers with hinged barrels that "Tip Down".
- the "No 1" receiver/frame size designation was used for models chambered for calibre 22 Rimfire ammunition only. There were several variations/types of these revolvers.
- the "No 2" receiver/frame size designation was used for models that had six shot cylinders and were chambered for calibre 32 LONG RF ammunition that used a "Tip Up" barrel, as well as for models with a five shot cylinder chambered for calibre 38 Centre-Fire ammunition that had a hinged, "Tip Down" barrel. Although both versions were so equipped, the Centre-Fire variant is commonly referred to as the "38 Single Action" or "38 Single Action No 2".
- the "No 1 1/2" receiver/frame size designation was used for models that had five shot cylinders and were chambered for calibre 32 LONG RF ammunition that used a "Tip Up" barrel, as well as for models chambered for calibre 32 Centre-Fire ammunition that had a hinged, "Tip Down" barrel. Although both versions were so equipped, the Centre-Fire variant is commonly referred to as the "No 1 1/2 Single Action" or "32 Single Action". The "No 1 1/2" was smaller than the "No 2".
- the "No 3" receiver/frame size designation was used for a model (very rare) that had a four shot, calibre 41 RF cylinder and a "Tip Up" barrel, as well as a large "Top Break" design that had a "Tip Down" barrel and was offered in numerous centre-fire calibres.

Notes

Make

- the Smith & Wesson name will be marked on the firearm.

Model

- manufactured in 1887, 5250 units produced.
- may also be known as "38 New Departure", "Safety" or "Lemon Squeezer".
- features include: fluted cylinder, hard rubber grips with checkering or plain pearl grips with gold S&W logo, double action only trigger mechanism, concealed hammer, grip safety in rear of gripstrap, blued or nickel finish, break open design, and round front sight pinned to the barrel.
- a key identification factor is the "Z-bar" latch which must be pushed sideways to open the revolver for loading and unloading and the serial number range.
- changes to the opening latch (push down to open) later in 1887 led to this model becoming known as the 38 Safety Hammerless Second Model.

Manufacturer

- "SMITH & WESSON SPRINGFIRLD, MASS. U.S.A." is marked on the top of the barrel.

Action

- hinged receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the bottom of the butt strap.
- serial number ranges for all variants (some references indicate that there may be some overlap in serial number ranges):
- 38 Safety Hammerless First Model: 1 - 5250 (5,250 manufactured, 1887)
- 38 Safety Hammerless Second Model: 5251 - 42483 (37,350 manufactured, 1887 - 1890)
- 38 Safety Hammerless Third Model: 42484 - 116002 (73,500 manufactured, 1890 - 1898)

Notes

Make

- "Smith & Wesson" is marked on top of the barrel and the "S&W" trademark logo is marked on the grip plates.

Model

- "Model of 1891" or "Model of 91" may be stamped on some barrel ribs.
- manufactured from 1891 to 1911.
- approximately 26,850 manufactured.
- features include: top-break, single action, fluted cylinder, fixed sights grips may be checkered hard rubber or walnut and a blue or nickel finish.
- this model was also sold with a single shot accessory barrel assembly.
- identifying features for each variant include:
- 38 Single Action First Model: spur trigger and long ejector housing.
- 38 Single Action Second Model: spur trigger and short ejector housing.
- 38 Single Action Third Model: trigger guard and short ejector housing.

Manufacturer

- "Smith & Wesson Springfield Mass. U.S.A." is marked on top of the barrel and the "S&W" trademark logo is marked on the grip plates.

Serial Number

- shared serial number range 1 to 28107 with the "1891 First Model Single Shot".
- serial number located at the bottom of the grip.

Other Markings

- the following patent dates may be marked:
on the barrel of the revolver:
"Jan. 17, 1865, Jan. 24, 1865, July 11, 1865, Aug. 24, 1869, Jan. 19, 1875, July 25, 1871"
or;
"Apr. 20, 1875, Dec. 18, 1877, Feb. 20, 1877, May 11, 1880"
and, on the single shot accessory barrel:
"April 20, 1875, Dec. 18, 1877, Feb. 20, 1877 and May 11, 1880"

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make	- "SMITH & WESSON SPRINGFIELD MASS. U.S.A." marked of the sight rib.
Model	- "SMITH & WESSON SPRINGFIELD MASS. U.S.A.", over "PAT'D JAN.17&24. 65, JULY 11. 65 AUG 24. 65, JULY 25, 71 DEC 2. 79, MAY 11 & 25. 1880" or a variation of, is marked top of the barrel. - "Model Number Three" was the Smith & Wesson designation for its top break, large frame, double or single action, metallic cartridge revolvers. - the model designation is not marked on the firearm, the key features used to identify this model are the calibre, 44 S&W Russian and a 1 7/16" cylinder length. - the cylinder length cannot be used exclusively to determine calibre of the firearm as many were manufactured with a cylinder length of 1 9/16". - another factor which may assist with identification would be the serial number, which when greater than 15341 would indicate that the firearm model is the 44 Double Action First Model in 44 S&W RUSSIAN calibre. - a total of 53,590 units were produced between 1881 and 1913. - although catalogued by Smith & Wesson until 1913 it is reported that all receiver/frames used on this model were produced prior to 1899. - features include: top break design; blade front sight pinned in place or target type sights; round barrel with rib; double action trigger mechanism; fluted cylinder with double set of notches; blued or nickel finish; round butt; walnut or black hard rubber grips. - also available as a Frontier model is 44-40 Win calibre, and Wesson Favorite model with markings only on the cylinder.
Manufacturer	- "SMITH & WESSON SPRINGFIELD MASS. U.S.A." marked of the sight rib.
Serial Number	- serial number range is from 1 to 54,668. - as these firearms were numbered sequentially, the earlier serial numbers would be on firearms made prior to 1898. - all receiver/frames used on this model were produced prior to 1899. - serial number is marked on the butt of the grip and may be repeated on the back of the cylinder.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.
Remarks	- this model is sometimes confused with the "44 Double Action Frontier Model". The 44 Double Action Frontier is chambered for the 44-40 WIN cartridge and the 44 Double Action First Model is chambered for the 44 S&W RUSSIAN cartridge. - the model designation is not marked on the firearm, the key features used to identify this model are the calibre, 44 S&W Russian and a 1 7/16" cylinder length. - the cylinder length cannot be used exclusively to determine calibre of the firearm as many were manufactured with a cylinder length of 1 9/16". - another factor which may assist with identification would be the serial number, which when greater than 15341 would indicate that the firearm model is the 44 Double Action First Model in 44 S&W RUSSIAN calibre.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- the Smith & Wesson name will be marked on the top of the barrel. - in about 1900 the barrel markings changed from two lines that included patent dates to a one line address without patent dates.
Model	- "Model Number Three" was Smith & Wesson designation for its top break, large frame, double or single action, metallic cartridge revolvers. - the model designation is not marked on the firearm, the key features used to identify this model are the calibre, 44-40 WINCHESTER (44 WIN), the length of the cylinder which was exclusively 1 9/16". - a total of 15,340 units were produced between 1886 and 1913. - although catalogued by Smith & Wesson until 1913 it is reported that all receiver/frames used on this model were produced prior to 1899. - this model is sometimes confused with the "44 Double Action First Model". The 44 Double Action Frontier is chambered for the 44-40 WIN cartridge and the 44 Double Action First Model is chambered for the 44 S&W RUSSIAN cartridge. - features include: top break design; double action trigger mechanism; fluted cylinder; blued or nickel finish; round butt; walnut or black hard rubber grips with the S&W monogram; service or target type sights.
Manufacturer	- the Smith & Wesson name will be marked on the top of the barrel.
Serial Number	- the serial number is usually marked on the bottom of the butt. - serial number range is from 1 to 15340.
Calibre	- early production was not marked as to calibre, later production were usually marked "44 Winchester Ctg.".
Remarks	- this model is sometimes confused with the "44 Double Action First Model". The 44 Double Action Frontier is chambered for the 44-40 WIN cartridge and the 44 Double Action First Model is chambered for the 44 S&W RUSSIAN cartridge. - the model designation is not marked on the firearm, the key features used to identify this model are the calibre, 44-40 WINCHESTER (44 WIN), the length of the cylinder which was exclusively 1 9/16" and a serial number under 15341.

26339 - 3	44 S&W AMERICAN	6	203	Antique AFR, Section 1, para. 7	Manufacturer Specifications and Commercial Customization	

Notes

Model

- "Model Number Three" was Smith & Wesson designation for its top break, large frame, double or single action, metallic cartridge revolvers.
- may also be known as "First Model American" or "American".
- was manufactured from 1870 to 1874.
- the feature which identifies this model from similar models is the straight line bottom of the receiver/frame from the front of the receiver/frame to the rear of the trigger guard. This receiver/frame has a small diameter trigger axis pin. Other variations of the Model No 3 revolver have a larger diameter trigger axis pin. The increased diameter trigger axis pin necessitates a hump or enlargement of the receiver/frame to support the larger diameter pin.

Serial Number

- ranged from approximately 1 to 8000.

Notes

Make

- may be marked on the barrel.
- may be marked in foreign scripts.

Model

- model designation is not marked on the firearm.
- "Model Number Three" was the Smith & Wesson designation for its top break, large frame, double or single action, metallic cartridge revolver.
- "Top Break No 3 Single Action, New Model" may also be known as "Model No 3 New Model" or "44 Single Action".
- "Top Break No 3 Single Action, New Model" was cataloged by Smith & Wesson from 1878 to 1912 however the date of manufacture of the receiver/frames occurred before 1899.
- "Top Break No 3 Single Action, New Model" has the barrel marked with the two-line manufacturer's address and patent dates ending with "REISSUE JULY 25, 1871"
- "Top Break No 3 Single Action, New Model" had the barrel markings change to a single line manufacturer's address without patent dates, between 1900 and 1909.
- features include: round, top ribbed barrel; half-moon, blade front with barrel latch notched rear sight; fluted cylinder; left side trigger mechanism access plate; top break action; single action trigger mechanism; blued or nickel finish.

Manufacturer

- "SMITH & WESSON SPRINGFIELD MASS. U.S.A." is marked on the top of the barrel.

Action

- hinged frame, single action.

Serial Number

- serial numbering began at 1 and went through to 35796.

Calibre

- do not confuse the .38-44 S&W black powder cartridge with the 1930s era .38-44 Heavy Duty.
- caliber designation may be marked on the left side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments - some examples of this model when manufactured prior to 1898, are considered "Antique" in Canada.

Other Markings - As this model was adopted by several governments and various agencies, markings will vary.

Notes

Make

- the Smith & Wesson logo of an "S" over a"W" inside a circle appears on the firearm.
- "Smith & Wesson" marked on barrel.
- Smith and Wesson was founded in 1853, as a partnership between Horace Smith and Daniel B. Wesson
- this company is known primarily for its revolvers, but also makes semi-automatic pistols, and has made both rifles and shotguns (or sub-contracted for their manufacture) in the past.

Model

- "Model Number Three" was Smith & Wesson designation for its top break, large frame, double or single action, metallic cartridge revolvers.
- 320 Revolving Rifle was built on a single action top break revolver receiver/frame with a detachable buttstock.
- this firearm is a very long barreled revolver with a rounded butt with checkered red rubber grips and a fore-stock of the same red moulded hard rubber.
- detachable walnut shoulder stock having a black rubber butt-plate.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- the manufacturer is marked on the right side of the receiver.
- Horace Smith and Daniel B. Wesson formed their first partnership in 1852 to manufacture the "Volcanic" pistol in Norwich Connecticut, until 1854. The same year, manufacture was relocated to New Haven Connecticut, and renamed Volcanic Repeating Arms Company, with assistance from Oliver Winchester; who purchased the majority interest from Smith and Wesson. In 1886, H. Smith and D.B. Wesson opened a new company in Springfield Massachusetts to manufacture small 22 caliber revolvers, and progressively manufactured larger revolvers, in 1861 with production orders for the U.S. Civil War the firm became securely established and weathered the following depression years. In 1867, the firm of S&W undertook to establish sales in Europe, with agencies in England, France, and Germany. During the ensuing years, the firm introduced produced many improvements to revolvers and other firearms, principly handguns, manufacturing sidearms for the competitive, commercial, police and military market, noteably for the domestic Armed Forces; as well as for the British Military, under contract during World War I, and Two. In 1964, the firm was purchased by the Bangor Punta Corporation, which diversifed their product line beyond firearms. In 1984, the Lear Siegler Corporation of Santa Monica acquired Bangor Punta, and divested product lines not associated with Law Enforcement, Military, and Firearms. In 1986, it was purchased by Forstmann Little & Company, which sold the firearms manufacturer to F.H. Tomkins p.l.c. of London England.

Action

- single action revolver.

Serial Number

- serial number rationalization: serial numbers started with number 1 and continued to 977.

Notes

Make

- manufactured at Tula Arsenal in Russia, not manufactured by Smith & Wesson, this firearm is a copy of a Smith & Wesson revolver.

Model

- "Model Number Three" was Smith & Wesson designation for its top break, large frame, double or single action, metallic cartridge revolvers.
- model designation is not marked on the firearm.
- manufacture commenced at Tula in 1880-81.
- date of manufacture is usually marked on the top of the barrel rib.
- this firearm is a close copy of the original Model 3 Russian Third model revolver manufactured for the Russian Government by Smith & Wesson.
- distinguishing features are:
- the small encircled capital T logo on the left side of the frame above the left hand-grip panel (denotes manufacture at the Tula Arsenal in Russia).
- Russian proof/acceptance marks (Imperial Russian Two -Headed Eagle) on left and right sides of the frame above the wood grip panels, the rear of the cylinder, and on top of the barrel rib.
- the Cyrillic inscription on top of the barrel rib, followed by the date of manufacture, and serial number, which matches the serial number on the bottom (butt) of the frame.

Manufacturer

- small encircled capital T logo on the left side of the frame above the left hand-grip panel (denotes manufacture at the Tula Arsenal in Russia).

Serial Number

- the serial number on top of the barrel rib, (preceeded by an Cyrillic inscription) which matches the serial number on the bottom (butt) of the frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - not marked with caliber designation.

Canadian Law Comments - some examples of this model , when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- Russian contact revolvers: "SMITH & WESSON" name and address are marked on the barrel in Cyrillic.
- Russian contract revolvers: Russian double headed eagle is marked on the barrel near the breech end.
- Commercial revolvers: "SMITH & WESSON SPRINGFIELD, MASS. U.S.A. PAT. JULY. 10. 60. JAN. 17. FEB. 17. JULY. 11. 65 & AUG. 24. 69. RUSSIAN MODEL" is marked on the barrel.

Model

- manufactured from 1874 to 1878.
- model designation is not marked on the firearm.
- "Model Number Three" was Smith & Wesson designation for its top break, large frame, double or single action, metallic cartridge revolvers.
- approximately 41,138 were manufactured.
- features include: round blade front sight and a notch in the top strap for a rear sight; round barrel with a solid top rib and fully shrouded ejector housing; front hinged receiver/frame with action release mounted on the top strap, left side access plate, and humpback gripstrap; fluted cylinder with automatic ejection; exposed spur hammer; single action trigger mechanism; rounded trigger guard with a trigger spur/finger rest; smooth walnut grip plates with rounded bottom grip strap with a lanyard sling swivel; blue finish.
- barrel and cylinder tip down from the receiver/frame for loading and unloading.
- cartridges and/or empty cases are automatically ejects when the gun is opened.

Serial Number

- serial number may not be marked on the firearm.
- serial number is usually marked on the barrel or receiver/frame.
- Russian contract serial number range was from 1 to approximately 41,138.

22179 - 3	45 S&W SCHOFIELD	6	178	Antique AFR, Section 1, para. 7	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SMITH & WESSON SPRINGFIELD MASS. U.S.A." is marked on the left side of the barrel.

Model

- "SCHOFIELD'S PAT. APR 22 D 1878" is marked on the right side just below the barrel.
- "SMITH & WESSON SPRINGFIELD MASS. U.S.A. PAT. JAN. 17TH & 24TH 65.JULY 11TH 65. AUG 24TH 69. JULY 25TH 71." was observed on the left side just below the barrel.
- model designation is not marked on the firearm.
- "Model Number Three" was Smith & Wesson designation for its top break, large frame, double or single action, metallic cartridge revolvers.
- manufactured in 1875.
- total of 3035 manufactured.
- Schofield 1875 First Model has an improved version, the Second Model Schofield 1876. The main difference being the second model has an oval barrel catch that has a scooped/dished-out center section which is also the rear sight.
- "US" may be marked on the bottom of the grip for the military issued variant.
- "W.F. & CO. EX." or "W.F. & CO'S. EX." that stands for "Wells Fargo & Company Express" may be marked on the right side of the barrel on a 127mm (5") cut down barrel variant.
- features include: half-moon front and notched rear sights located on the barrel latch; ribbed barrel; top break action; receiver/frame mounted barrel latch release; fluted cylinder with automatic extractor/ejector; spurred hammer; single action trigger mechanism; long smooth curved receiver/frame and backstrap; square butt grip frame; wood grip plates; blued finish with colour case-hardened barrel latch hammer and trigger guard or nickel finish.

Manufacturer

- "SMITH & WESSON SPRINGFIELD MASS. U.S.A." is marked on the left side of the barrel.

Action

- hinged barrel design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number range 1 to 3035.
- serial number is marked on the bottom of the grip.
- serial number for the "Wells Fargo" variant had the original serial number repeated after "W.F. & CO. EX." or "W.F. & CO'S. EX." marking on the right side of the barrel.
- rationalization for the First model is; number one (1) to 3036 and the Second model; number 3037 to approximately 8969.

Calibre

- other barrel lengths may exist, many samples are known to have cut down barrels.
- calibre designation is marked on the left side of the barrel.

Notes

Make

- marked on the left side below the barrel as, "Smith & Wesson Springfield Mass. U.S.A." The following patent dates will also be marked "Pat. Jan. 17th / and 24th 65. July 11th 65. Aug. 24th 69. July 25th 71."

Model

- "Model Number Three" was Smith & Wesson designation for its top break, large frame, double or single action, metallic cartridge revolvers.
- reintroduced in 2000.
- "Mod. 3 Schofield 1875" is marked on the left side of the front sight.
- "Schofield's Pat. Apr. 22d 1873" is marked on the right side of the ejector housing under the barrel.
- features include: single action trigger mechanism, break top opening, automatic ejection, blued or nickel plated receiver/frame, barrel and cylinder, case hardened cylinder latch and trigger guard, fixed notch rear sight, a fixed half-moon blade front sight, and walnut grips.
- the reintroduction model of 2000 has a receiver/frame mounted firing pin. The 1875 Schofield had a firing pin on the hammer.

Manufacturer

- marked on the left side of the front sight " Performance Centre 2000 ".

Action

- hinged barrel design.

Serial Number

- serial number is marked on the bottom of the grip frame.
- observed serial number consisted of a three letter "GWS" prefix four numbers.

21895 - 3	41 VOLCANIC	10	203	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is marked on the firearm, on top of the barrel; observed markings read "SMITH & WESSON NORWICH CT CAST STEEL" next to "PATENT".

Model

- the model designation is not marked on the firearm.
- in most cases these firearms will found marked with a patent date of February 14, 1854.
- these handguns have become known as "Volcanic Models" because they are in large part identical to the handguns and rifles later produced by the Volcanic Repeating Arms Company.
- the Smith & Wesson, Volcanic Magazine Pistols are for all intents and purposes individually manufactured and there are many minor differences from pistol to pistol.
- features include: blued all-steel construction and finish; varnished wooden grip panels; operated by a ring lever forming the trigger-guard; half-round/half-octagonal barrel; under-barrel tubular magazine; fixed open sights; removable sideplates; moderate engraving on the receiver/frame; and these pistols are seen with two styles of grips: the 31 Volcanic/"pocket" versions have rounded, "bag"-shaped butts, while the 41 Volcanic/"large frame" versions have square butts.
- because these pistols required special (fragile) ammunition, they never achieved commercial success.
- approximately 1700 pistols of all types were produced.

Manufacturer

- the manufacturer is marked on the firearm; observed markings read "SMITH & WESSON NORWICH CT CAST STEEL" next to "PATENT".

Action

- manually operated, lever actuated, repeating fiream.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number rationalization unknown.
- observations of known serial numbers suggests that there were several different serial number schemes: large frame models - straight numeric serial numbers, small frame models - straight numeric and numeric with an alpha character prefix from the letter "A" to letter "I".

Calibre

- Volcanic ammunition consists of hollow-based bullets similar to the "Minie ball", with loose powder packed into the base cavity, held there by a cork disc with a fulminate of mercury priming charge on the inner side of the cork. During operation, the priming charge would be struck by the firing pin to fire the cartridge, and the entire bullet would be propelled down the bore (a very early progenitor of "caseless ammunition").
- Volcanic ammunition is listed in various references as being 30, 31 or 32 Calibre, 36 or 38 Calibre and 40 or 41 Calibre. The surviving ammunition packages have printed labels designating the contents as Cartridge No. 1 & Cartridge No. 2 which does not assist in determining the calibre.

Shots

- these firearms utilize a tubular under-barrel magazine.
- there is some question as to the actual magazine capacity of these handguns, references indicate that the small-frame 31 calibre Volcanic pistol would accept between 6 and 8 cartridges, and the large-frame 41 calibre Volcanic would accept between 8 and 10 cartridges and the 16 1/2" carbine accepts 20 cartridges in the magazine. (All dependent on the barrel length and magazine tube length.)

Remarks

- these Volcanic model firearms are lever-operated handguns built between 1853 and 1855 by Horace Smith and Daniel B. Wesson.
- this initial S & W partnership had a short life, being terminated by 1855 when the company's assets and machinery were sold to the "Volcanic Repeating Arms Company".
- these Volcanic handguns were the first "Smith & Wesson" handguns to be built.
- the partnership of Smith & Wesson was revived in 1856 to manufacture self-contained, metallic cartridge handguns based on Rollin White's patent for a bored-through cylinder.

Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
27756 - 4	7.62MM NATO	5	559	Prohibited PFR, Part 1, para. 89(z.05)	Manufacturer Specifications and Commercial Customization	
27756 - 5	7.62MM NATO	20	559	Prohibited PFR, Part 1, para. 89(z.05)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "U.S. Rifle" over "7.62 MM M14" over "Smith Ent." over the serial number is marked on the top rear of the receiver/frame.

Model

- "U.S. Rifle" over "7.62 MM M14" over "Smith Ent." over the serial number is marked on the top rear of the receiver/frame.
- "Made in China" may be marked on the receiver/frame.
- marketed as the model M-14.
- it differs from the standard military M14 in that it is semi-auto only, has larger butt stock than the military version, has a match quality barrel, better trigger, the action is built different in the internal lug area.

Manufacturer

- "U.S. Rifle" over "7.62 MM M14" over "Smith Ent." over the serial number is marked on the top rear of the receiver/frame.
- according to the prime (and only) reference, the receiver/frame started-out as a Polytechnologies model M-14S.
- "Made in China" may be marked on the receiver/frame.
- it has been reported that Smith also manufactured its own M-14 receiver/frame.

Action

- gas operated, magazine fed, self-loading (semi-automatic) rifle.

Barrel

- the primary reference gives the barrel length as 635MM. It is suspected that this is a measurement of the total length of the barrel with the flash eliminator.
- flash hider accessory may not be included in barrel measurement. Overall length with flash hider is 635mm.

Calibre

- "U.S. Rifle" over "7.62 MM M14" over "Smith Ent." over the serial number is marked on the top rear of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine.
Other Markings	- receiver/frame markings read: "U.S. RIFLE 7.62-MM M-14 SMITH ENT."

27710 - 5	7.62MM NATO	20	559	Prohibited PFR, Part 1, para. 89(z.04)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "U.S. Rifle" over "7.62 MM M14 NM" over "Smith Ent." over the serial number is marked on the top rear of the receiver/frame.

Model

- "U.S. Rifle" over "7.62 MM M14 NM" over "Smith Ent." over the serial number is marked on the top rear of the receiver/frame.
- this M14 is marketed as the National Match model.
- it differs from the standard military M14 in that it is semi-auto only, has larger butt stock than the military version, has a match quality barrel and better trigger.
- the action is built different in the internal lug area and the gun weights 13 pounds. It is offered milled or cast as an option.

Manufacturer

- "U.S. Rifle" over "7.62 MM M14 NM" over "Smith Ent." over the serial number is marked on the top rear of the receiver/frame.

Action

- gas operated, magazine fed, self-loading (semi-automatic) rifle.

Serial Number

- serial number rationalization unknown.
- sample serial number observed consisted of six digits.
- serial number is found on the top rear of the receiver/frame.

Barrel

- the primary reference gives the barrel length as 635MM. It is suspected that this is a measurement of the total length of the barrel with the flash eliminator.
- flash hider accessory may not be included in barrel measurement. Overall length with flash hider is 635mm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- "U.S. Rifle" over "7.62 MM M14 NM" over "Smith Ent." over the serial number is marked on the top rear of the receiver/frame.
Shots	- detachable box magazine.

120947 - 2	16 GA X 2 1/2"	1	762	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- on one sample the make was marked on the top of the barrel as:
"MANUFACTURED BY DEXTER SMITH".

Model

- the model designation is not marked on the firearm.
- approximately 2500 were manufactured from 1872 to 1874. Most of these shotguns were manufactured in 12 gauge or 16 gauge.
- features include: rolling block breech loading design; distinctive rounded receiver/frame with flats on the sides; detachable plate on the left side of the receiver/frame.

Manufacturer

- on one sample the manufacturer was marked on the top of the barrel as:
"MANUFACTURED BY DEXTER SMITH OF SPRINGFIELD MASS.".
- Dexter Smith was born in 1833. He manufactured firearms in Springfield, Massachusetts, circa 1867 to 1874. Dexter Smith manufactured rolling block shotguns and rifles using patents belonging to Martin J. and H. M. Chamberlin. These patents were granted from 1867 to 1871. The production of the rolling block shotguns and rifles started in 1872, and ceased in 1874. After production ceased on the rolling block shotguns and rifles, Dexter Smith then turned his efforts to designing revolvers. From 1875 to 1885, Dexter Smith acquired several patents for revolving firearm designs. Dexter Smith was also known to manufacturer breech loading long arms, circa 1872.

Serial Number

- on one sample, a serial number was marked on the lower tang.

Other Markings

- on one sample the top of the barrel was marked, "MANUFACTURED BY DEXTER SMITH OF SPRINGFIELD MASS. PAT. JAN 8 & OCT 1, 67, FEB & MAR 7, 71".

Notes

Make

- "FREDERICK. J. SMITH & CO. LONDON" was observed marked on the barrel.

Model

- manufactured prior to 1875.
- model designation is not marked on the firearm.
- this firearm is also known as a proto revolver or transitional revolver.
- this firearm resembles a pepperbox revolver with a long barrel wedged on to an extension of the barrel cluster axis pin.
- features include: no sights; round to octagonal, rifled barrel with a flat sided barrel lug; engraved receiver/frame with top mounted bar hammer, percussion cap shield and a non-fluted percussion cylinder; traditional trigger and trigger guard; double action trigger mechanism; flat bottom grip with a metal butt cap and checkered wood grip panels; nickel plated finish.

Manufacturer

- Frederick John Smith was located at 54 Clement St Parade, Birmingham, England from 1861 to 1863.
- Frederick John Smith and Company was located at 54 Clement St Parade, Birmingham, England from 1864 to 1873.
- Frederick John Smith and Company was also listed in London, England.
- Frederick John Smith and Company was listed as a manufacturer of guns, rifles, pistols and a contractor for arms & military accoutrements.

Action

- muzzle loader.

Notes

Make

- "SMITH'S PATENT" over "JUNE 23 1857" is usually marked on the left side of the receiver/frame.
- Smith 1857 Percussion Carbine was invented by Gilbert Smith of Buttermilk Falls, New York, U.S.A.
- "ADDRESS" over "POULTNEY & TRIMBLE" over "BALTIMORE, U.S.A." is usually marked on the left side of the receiver/frame.
- Poultney & Trimble / Poultney, Trimble & Company (Thomas Poultney and David B. Trimble) of Baltimore, Maryland, U.S.A. were sales agents for the Smith Percussion Carbine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "SMITH'S PATENT" over "JUNE 23 1857" is usually marked on the left side of the receiver/frame.
- Smith 1857 Percussion Carbine was invented by Gilbert Smith of Buttermilk Falls, New York, U.S.A.
- Smith Single-Shot Breech Loading Percussion Carbine was patented June 23, 1857.
- Smith Single-Shot Breech Loading Percussion Carbine used either a foil cartridge or loose powder, bullet and a gas seal ring, and requires a separate percussion cap be placed on the exposed nipple on the right side of the receiver/frame.
- Gilbert Smith's sales agents were Poultney & Trimble (Thomas Poultney and David B. Trimble) of Baltimore, Maryland, U.S.A.
- Smith Single-Shot Breech Loading Percussion Carbine was used during the Civil War.
- Smith Single-Shot Breech Loading Percussion Carbine was manufactured by the American Machine Works of Springfield, Massachusetts, and the Massachusetts Arms Company and the American Arms Company of Chicopee Falls, Massachusetts, U.S.A.
- approximately 30,000 carbines were manufactured from 1861 to 1865.
- features include: blued round to octagonal rifled steel barrel with one barrel band, fixed front sight and an adjustable rear sight; color case-hardened front hinged receiver/frame with right side percussion hammer and break open lever mounted inside the trigger guard; break open lever must be pressed up to allow the barrel to pivot down for loading; single action trigger mechanism; sling swivel was mounted on the barrel band and buttstock or a saddle bar and ring was mounted on the left side of the receiver/frame; walnut forearm and straight grip buttstock with steel butt plate.
- overall length was approximately 1003 (39.5") , and average weight is 3.4 kgs (7.5 lbs).
- after the US Civil War, numbers of these carbines were converted to use the semi-experimental 50 Crispin cartridge, a rimfire cartridge with the priming compound contained in a belt around the body of the case. These carbines can be recognized by a depression in the breechface (to contain the bottom of the cartridge case) and a firing pin built into the tip-down barrel that strikes the belt of the Crispin cartridge.

Manufacturer

- "AMERICAN ARMS CO." over "CHICOPEE FALLS" is marked on the left side of the receiver/frame.

Action

- hinged barrel design, breech loading, percussion ignition.

Serial Number

- serial number was observed marked on the breech face of the barrel.
- serial number range is reported to be from 1 to 31,000.

Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
195090 - 1	58 FLINTLOCK	1	165	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "ISAAC SMITH" is marked on the receiver/frame.
- "LONDON" is also usually marked on the receiver/frame.
- "ISAAC SMITH" was known for his double barrel flintlock pocket pistol and screw barrel Queen Anne type flintlock pistol.
- "ISAAC SMITH" was in business from 1747 to 1790.

Model

- model designation is not marked on the firearm.
- model designation is derived from the method by which this pistol is loaded; loading was accomplished by unscrewing the barrel.
- "Screw Barrel Flintlock Pistol" is of "Queen Anne" style pistol, having a steel barrel resembling a scaled-down cannon with ribbed muzzle.
- "Screw Barrel Flintlock Pistol" is a single shot pistol, with a removable barrel and an exposed, right side hammer located behind the chamber.
- "Screw Barrel Pistol" is intended to be loaded from the breech end of the barrel and as such was originally supplied with a wrench to unscrew the barrel from the receiver/frame in order that a lead ball and loose powder could be inserted into the chamber end of the barrel and then the barrel screwed back onto the receiver/frame.
- features include: no sights; tapered, round barrel with underlug for wrench; round action; exposed hammer; round shape trigger guard; round receiver/frame; round, curved, wooden grip that may have a decorated grip cap; in the white finish.

Manufacturer

- "ISAAC SMITH" is marked on the receiver/frame.
- "LONDON" is also usually marked on the receiver/frame.
- "ISAAC SMITH" was known for his double barrel flintlock pocket pistol and screw barrel Queen Anne type flintlock pistol.
- "ISAAC SMITH" was in business from 1747 to 1790.

Action

- the barrel unscrews in front of the chamber, so it can be loaded with a ball that fits the barrel more tightly than is possible with a muzzle loader.

Notes

Make

- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- manufactured from 1898 to 1913.
- model designation is marked on left side barrel as "00".
- features include: breech loading; double barrel; hammerless; available with double triggers or Hunter one trigger; half pistol grip; checkered two piece English walnut stock and forend; unlocking lever mounted on upper tang; sliding safety below unlock lever; with cross bolt lock; top barrel extension is rectangular in shape; armour steel barrels only; available in five grades of embellishments; one being the lowest and five being the highest.

Manufacturer

- marked on left barrel as "HUNTER ARMS CO. -MAKER- FULTON N.Y.

Type

- side by side.

Action

- top break.

Serial Number

- on barrel and receiver flats.

Notes

Make

- "L. C. SMITH" will be marked on both lock plates.

Model

- the model name of this shotgun is in fact a "grade" designation which was one of the systems that was used to identify the L.C. Smith line of shotguns; "00E" will be marked on the action flats of the receiver/frame.
- manufactured from 1898 to 1913.
- features include: side lock action only; side by side barrel configuration; top lever opening; hammerless; single or double triggers; checkered two piece English walnut stock and forend; sliding-type safety below unlocking lever; auto ejectors; top barrel extension is rectangular in shape which forms part of the rotary cross bolt locking system; "Armor" steel barrels only, and so marked; blued barrels and colour case-hardened lock plates and receiver/frame.
- this model did not have any engraving.

Manufacturer

- "HUNTER ARMS CO. - MAKER - FULTON, N.Y." will be marked on the barrel of eary production guns; "HUNTER ARMS CO. FULTON, NEW YORK" will be marked on the barrel rib extension of later production guns.

Action

- side by side barrel configuration.

Serial Number

- serial number is marked on the action flats of the receiver/frame, the barrel flats and the forend iron.
- serial numbers were numeric only without prefix or suffix and could range from 500 to 401,785.

Barrel

- in 1906, 26" barrels added.

- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- manufactured from 1898 to 1912.
Breech loading, double barrel, hammerless, double triggers standard, single trigger optional. Checkered two piece English walnut half pistol grip stock and forend, unlocking lever mounted on upper tang, sliding safety below unlock lever, with cross bolt lock, auto ejectors, top barrel extension is rectangular in shape. Twist steel and laminated steel barrel, with special steel barrels optional. Available in five grades of embellishments, one being the lowest and five being the highest.

Manufacturer

- the manufacturer's name is usually marked on the barrels.

Action

- side by side configuration.

Serial Number

- marked on the barrel underlug and on the water table.

Notes

Make

- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- the model designation may be marked on the frame, hidden by the sideplates.
- this is a specific grade of side-by-side shotgun manufactured by the Hunter Arms Co. of Fulton, New York, between 1890 and 1913; their L C Smith shotguns were manufactured in grades from "00" (the lowest grade) up through "A3", and each of these variations were available in ejector or extractor variations (an "E" suffix on the model designation denotes "ejectors", on all but the highest grades; the highest grades were fitted with ejectors as a matter of course).
- features include: checkered walnut half-pistol-grip stock and splinter forearm; blued finish; Damascus, false Damascus, or fluid steel barrels; tang safety and top lever; colour-case-hardened locks and receiver/frame with light scroll engraving; double triggers (single trigger an available option); and automatic ejectors.
- after 1907, a certain number of these shotguns were manufactured as "Featherweight" guns, with a shortened and thinned receiver/frame, and an underbarrel lug (visible through the floorplate) measuring approx. 9.5mm x 17.5mm.
- 10,221 "1"-grade shotguns were made by the Hunter Arms Co., of which 1,640 were made with ejectors (the "1E" model), and 8,581 were made with extractors (the "1" model).

Manufacturer

- the manufacturer is marked on the firearm.

Action

- side by side pattern.

Serial Number

- numbered on the water-table and barrel lug.

- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- manufactured from 1890 to 1912.

Manufacturer

- on left barrel.

Action

- side by side, top break.

Serial Number

- on barrel and receiver flats.

Barrel

- in 1906, 26" barrels added.

Remarks

- Breech loading, crown steel, double barrel, hammerless, double triggers, checkered two piece English walnut half pistol grip stock and forend, unlocking lever mounted on upper tang, sliding safety below unlock lever, with cross bolt lock, auto ejectors, top barrel extension is rectangular in shape. Available in five grades of embellishments, one being the lowest and five being the highest. A duck and quail scene in a circle is located on the lock side plates.

Notes

Make

- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- the model designation may be marked on the frame, hidden by the sideplates.
- this is a specific grade of side-by-side shotgun manufactured by the Hunter Arms Co. of Fulton, New York, between 1892 and 1913; their L C Smith shotguns were manufactured in grades from "00" (the lowest grade) up through "A3", and each of these variations could be had in ejector or extractor variations (an "E" suffix on the model designation denotes "ejectors", on all but the highest grades; the highest grades were fitted with ejectors as a matter of course).
- features include: checkered walnut half-pistol-grip stock and splinter forearm; blued finish; Damascus, false Damascus, or fluid steel barrels; tang safety and top lever; colour-case-hardened locks and receiver/frame with moderate scroll engraving and game birds in ovals on the sideplates; double triggers (single trigger available as an option); and extractors.
- after 1907, a certain number of these shotguns were manufactured as "Featherweight" guns, with a shortened and thinned receiver/frame, and an underbarrel lug (visible through the floorplate) measuring approx. 9.5mm x 17.5mm.
- 3,790 "3"-grade shotguns were made by the Hunter Arms Co., of which 2,093 were made with ejectors (the "3E" model), and 1,697 were made with extractors (the "3" model).

Manufacturer

- the manufacturer is marked on the firearm.

Action

- side by side pattern.

Serial Number

- numbered on the water-table and barrel lug.

Calibre

- chamber lengths for the 8-gauge guns are not specified; all 8-gauges were built prior to 1898.

Notes

Make

- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- manufactured from 1890 to 1912.

Manufacturer

- on left barrel.

Type

- side by side.

Action

- top break.

Serial Number

- on barrel and receiver flats.

Barrel

- in 1906, 26" barrels added.

Remarks

- Breech loading, Nitro steel and Damascus steel double barrel, hammerless, double triggers or single trigger. Checkered two piece English walnut half pistol grip stock and forend, unlocking lever mounted on upper tang, sliding safety below unlock lever, with cross bolt lock, auto ejectors, top barrel extension is rectangular in shape. Available in five grades of embellishments, one being the lowest and five being the highest.

Notes

Make

- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- these shotguns were made in different qualities ranging from "A" to "F"(not marked on gun),"A" being the less ornate, "F" being the top grade equipped with a select walnut stock and fore-end, damascus or laminated steel barrels, full pistol grip, and elegantly engraved. - also known as the "type 2", the key to identify the type 1 from the type 2 is the opening lever location, in the type 1 the lever is located at the front of the trigger guard, and the type 2 the lever is located inside the trigger guard. - features include: external hammers, sidelock action.
Manufacturer	- the manufacturers markings are found on the barrel rib.
Action	- side by side configuration.
Barrel	- an L C Smith catalog from circa 1880 is noted as offering "five dollars extra charge for any length exeeding 30 inches".
Other Markings	- the top of the barrel rib is marked "L.C. Smith Makers of the Baker Gun". - the locks may be marked "Baker's patent".

Model

- "CROWN GRADE" was manufactured from 1913 to 1945 by the Hunter Arms.
- "CROWN GRADE" was manufactured from 1945 to 1950 by L.C. Smith Gun Company, Incorporated.

Manufacturer

- Hunter Arms Co. Maker, Fulton N.Y.

Serial Number

- on receiver Flats with letter C prefix.

Remarks

- Breech loading, full pistol grip, top lever break open, automatic safety, takedown, side lock double triggers, hammer less, centre fire, Damascus or Nitro steel barrels with a two piece checkered walnut stock and forearm, automatic ejectors and single trigger were available options. The usual engraving was dog scenes on both plates, but may have turkeys on right plate and flying ducks on left plates. A gold crown will be found on the top of the break lever. Without the ventilated rib, a gold metal bar will be found near the rib extension, with extensive scroll engraving on receiver and barrel. On right barrel is engraved L.C. SMITH CROWN GRADE and on left barrel, MADE TO ORDER BY THE HUNTER ARMS CO, INC. MFR., FULTON NY. This model could be had in a featherlight model as well. Exactly the same in appearance except much lighter in weight in twenty gauge.

Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- "L.C. SMITH" and "DE LUXE TRAP" or "DE-LUXE TRAP" is engraved on the top rib.
- "Trap" guns were offered from 1917 to 1945 by the "Hunter Arms Company". It is reported that only three were made in "Deluxe" grade.
- features include: single barrel with a two piece fully checkered walnut stock and forearm; barrel extension was rectangular with square hole for lock; fully engraved on all parts of receiver/frame in fine scroll, also has gold inlayed scenes of quail on both sides of the receiver/frame and gold leaves on upper and lower sides of receiver/frame.
- "DE LUXE TRAP" was also available as a double barrel trap gun in 1941.

Notes

Make

- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- "EAGLE GRADE" was manufactured from 1913 to 1932.

Manufacturer

- Hunter Arms Co. Maker, Fulton N.Y.

Serial Number

- on receiver Flats with letter E prefix.

Remarks

- Breech loading, full pistol grip, top lever break open, automatic safety, take down, side lock double triggers, hammer less, centre fire, Damascus or Nitro steel barrels with a two piece checkered walnut stock and forearm, automatic ejectors and single trigger were available options. The usual engraving was a pheasant in level flight on left side and a flying duck in level flight on right side, and without the ventilated rib, a gold metal bar will be found near the rib extension, with scroll engraving on receiver and barrel. On right barrel is engraved L.C. SMITH EAGLE GRADE and on left barrel, Hunter Arms Co, Inc, MFR Fulton NY.

Model

- manufactured from 1917 to 1943.
-features include: breech loading; stub twist or damascus steel double barrel; exposed hammer type; double triggers; checkered two piece English walnut half pistol grip stock and forend; unlocking lever mounted on upper tang; sliding safety below unlock lever, with cross bolt lock.

Manufacturer

- manufacturer may not be marked on the firearm.
- Hunter Arms Co. Maker, Fulton N.Y.

Type

- side by side.

Action

- top break.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number - on barrel and receiver flats.

Remarks - Breech loading, double barrel, double triggers and exposed double hammers, checkered two piece stock and forend, unlocking lever mounted on upper tang, with cross bolt lock. Top barrel extension is rectangular in shape. May have laminated, Damascus or English Twist barrels. In 1898, Hunter dropped the "Quality" reference and used the term 'Grade". Now available in F grades. The best F grade came with Damascus Steel barrels with English walnut stocks, pistol grip, and neatly checkered. The middle F grade had Best English Stub Twist barrels, English walnut stock, pistol grip, checkered stock. The lower F grade had Royal Steel barrels, English walnut stock, pisol grip, neatly checkered. The "F" grades refer only to the barrel metal as all other specifications are the same. This Eagle grade refers only to the quality and quantity of engraving, with this being better than the Trap Grade.

Notes

Make

- "L.C. SMITH FIELD GRADE" is marked on the top of the right barrel.
- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- "FIELD GRADE" was manufactured from 1913 to 1945 by Hunter Arms Company.
- "FIELD GRADE" was manufactured from 1945 to 1950 by L.C. Smith Gun Company, Incorporated.
- approximately 80 percent of L C Smith shotguns manufactured from 1913 to 1945 were "Field" grade guns.
- "L.C. SMITH FIELD GRADE" is marked on the top of the right barrel.
- "FIELD" is usually marked on the watertable.
- features include: breech loading, top lever break open design; automatic safety; sidelock action; hammerless; checkered walnut semi pistol grip buttstock and forearm, single "Hunter" trigger or double triggers; extractors or automatic ejectors.
- locks and receiver/frames were a mottled color from a case hardening procedure, used at that time.

Manufacturer

- the manufacturer's name may be marked on the top of the left barrel as, "HUNTER ARMS CO. INC. M'F'R'S FULTON. N.Y., U S A", or the underside of the barrels will usually be marked with the Hunter Arms Company nitro proof mark.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- side by side barrel configuration.
Serial Number	- serial number is marked on the watertable of the receiver/frame and repeated on the barrel flats. - observed serial numbers consisted of six numbers without a letter prefix or suffix. - letter markings which denote grades or optional features may be found on the watertable of the receiver/frame and should not be construed to be a prefix or suffix to the serial number itself. - observed markings have included "E" denoting ejectors have been fitted, "FW" denoting featherweight receiver/frame construction, "FWE" denoting featherweight receiver/frame construction fitted with ejectors, "I" denoting Ideal grade, "S" denoting Specialty grade, and "T" denoting trap grade.
Other Markings	- markings which denote optional features may be found on the watertable of the receiver/frame and should not be construed to be a prefix or suffix to the serial number itself. - observed markings have included, "FW" representing a featherweight receiver/frame construction and an "E" denoting that ejectors have been fitted.

Smith and Parker in 2008.
Model	- manufactured from 1917 to 1943.
Type	- side by side.
Action	- top break.
Serial Number	- on barrel and receiver flats.
Remarks	- Breech loading, double barrel, double triggers and exposed double hammers, checkered two piece stock and forend, unlocking lever mounted on upper tang, with cross bolt lock. Top barrel extension is rectangular in shape. May have laminated, Damascus or English Twist barrels. In 1898, Hunter dropped the "Quality" reference and used the term "Grade". Now available in F grades. The best F grade came with Damascus Steel barrels with English walnut stocks, pistol grip, and neatly checkered. The middle F grade had Best English Stub Twist barrels, English walnut stock, pistol grip, checkered stock. The lower F grade had Royal Steel barrels, English walnut stock, pisol grip, neatly checkered. The "F" grades refer only to the barrel metal as all other specifications are the same. This "Ideal" grade refers only to the quality and quantity of engraving, with this being the least amount.

Notes

Make

- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- "- L. C. SMITH IDEAL TRAP -" is usually marked above the chamber area of the barrel or on the rib.
- a total of 5 were manufactured between 1917 and 1945.
- features include: top tang mounted opening lever; hammerless design; single trigger; box lock action; two piece checkered walnut stock and forearm; barrel extension is rectangular with square hole for lock pin; blued finish on metal with varied engraving (each grade is determined by the type and amount of engraving).
- "IDEAL TRAP" was available as a double barrel trap gun in 1941.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the "Hunter Arms" name may be marked in full on the barrels or as "H.A.Co." as part of a trade mark logo.
Remarks	- Breech loading, pistol grip, top lever break open takedown, hammerless, centre fire, single barrel with a two piece checkered walnut stock and forearm. Barrel extension was rectangular with square hole for lock. No engraving.

Notes

Make

- "L.C. Smith" is marked on the left barrel.
- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880; L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.

As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- introduced in 2005. - model designation may not be marked on the firearm. - "LC" in the model designation stand for "LC Smith", while the number "20" stand for the caliber designation "20GA" and "OU" for the barrel configuration "Over & Under". - "L.C. Smith - 20 GA" is marked on the left side of the barrel assembly. - features include: bead front sight; blued over and under barrels; solid rib; interchangeable choke tubes; case hardened front hinged receiver/frame; single trigger; automatic ejectors; top tang mounted opening lever; checkered walnut pistol grip stock; beaver tail fore end; rubber recoil pad. - overall length with 660mm barrel is 1092mm (43"), average weight is 3.06 kg (6 3/4 lbs)
Manufacturer	- "MADE IN ITALY - FAUSTI STEFANO" is marked on the right side of the barrel assembly.
Action	- over/under barrel configuration.
Serial Number	- the serial number is marked on the water table.
Calibre	- the calibre designation is marked on the left side of the barrel assembly

Notes

Make

- "L.C. Smith" is usually marked on the left side of the barrel assembly.
- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.

Notes

Make

- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- "OLYMPIC TRAP" was manufactured between 1917 and 1945 by Hunter Arms.
- "OLYMPIC TRAP" was manufactured between 1945 and 1950 by L.C. Smith Gun Company, Incorporated.
- "- L. C. SMITH OLYMPIC TRAP -" is usually marked on the chamber area of the barrel or on the rib.
- a total of 468 were manufactured.
- feature include: top tang mounted opening lever; hammerless design; single trigger; box lock action; two piece checkered walnut stock and forearm; barrel extension is rectangular with square hole for lock pin; blued finish on metal with varied engraving (each grade is determined by the type and amount of engraving).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the "Hunter Arms" name may be marked in full on the barrels or as "H.A.Co." as part of a trade mark logo.
Action	- hinged barrel design.

Make

- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- manufactured from 1913 to 1941.
- it is reported that only 28 "Premier" grade guns were built.
- as with all of the top quality offerings from L C Smith any number of custom features could be specified at the time a customer placed an order.
- features would normally include: semi or full pistol grip, checkered Circassian stock and forearm; tang mounted opening lever; automatic safety; side locks; automatic extractors; double or single trigger.
- samples noted have been engraved with hunting dogs on the lock plates, the receiver/frame and barrels are engraved in a fine scroll manner. The sides of the barrels may have "Lightning" inlaid in gold.

Manufacturer

- the manufacturer's name was marked on the top of the left barrel on referenced sample.

Action

- side by side barrel configuration.

Serial Number

- marked on the barrel underlug and water table.

Calibre

- although advertised as being available in calibre 410 GA X 3" factory records indicate that none were built.

Other Markings

- top of left barrel was engraved,"MADE TO ORDER BY THE HUNTER ARMS CO. FULTON NY." The top of the right was engraved "SIR JOSEPH WHITWORTH FLUID COMPRESSED STEEL". The rib extension was engraved "L.C. SMITH PREMIER GRADE".

Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- model is not marked on the firearm.
- manufactured from 1889 to 1945.
- available in many grades, such as A, AA, B, C, D, E, F, FF & H. Grades differed only in the quality of workmanship, wood, style and amount of checkering and engraving and the quality of steel in the barrels.
- early barrels were imported from Belgium or England and will be marked with the appropriate proof markings.
- features include: sidelocks, break action with top lever opening, external double hammers, double triggers, Damascus or standard steel barrels, may be engraved, full or semi pistol grip, and checkered wood stock.

Manufacturer

- manufacturer may be marked on the barrels as:
"The Hunter Arms Co. M'F'R'S. Fulton, N.Y."
- Hunter Arms Company was located in Fulton, N.Y. from 1889 to 1945.

Serial Number

- serial number is usually located on the barrel and the receiver/frame flats.

- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- "SPECIALTY GRADE" was manufactured from 1913 to 1945 by Hunter Arms Co.
- "SPECIALTY GRADE" was manufactured from 1945 to 1950 by the L.C. Smith Gun Co., Inc.
- "L.C. SMITH SPECIALTY GRADE" is marked on the right barrel.
- "S" may be marked on the watertable.

Manufacturer

- "HUNTER ARMS CO. INC. M'F'R'S FULTON, N.Y., U.S.A." is marked on the left barrel.

Serial Number

- serial number is marked on the watertable of the receiver/frame and repeated on the barrel flats and forearm metal work.
- observed serial number consisted of five numbers without a letter prefix or suffix.
- letter markings which denote grades or optional features may be found on the watertable of the receiver/frame and should not be construed to be a prefix or suffix to the serial number itself.
- observed markings have included "E" denoting ejectors have been fitted, "FW" denoting featherweight receiver/frame construction, "FWE" denoting featherweight receiver/frame construction fitted with ejectors, "I" denoting Ideal grade, "S" denoting Specialty grade, and "T" denoting trap grade.

Remarks

- Breech loading, full pistol grip, top lever break open, automatic safety, take down, side lock double triggers hammer less, centre fire, Damascus or Nitro Steel barrels with a two piece checkered walnut stock and forearm, automatic ejectors and single trigger were available options. The usual engraving was two quail on left side and a flying duck on right side, and without the ventilated rib, a gold metal bar will be found near the rib extension, with scroll engraving on receiver and barrel. On right barrel is engraved L.C. SMITH SPECIALTY GRADE and on left barrel, Hunter Arms Co, inc, MFR Fulton NY.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- manufactured from 1917 to 1943.

Type

- side by side.

Action

- top break.

Serial Number

- on barrel and receiver flats.

Remarks

- Breech loading, double barrel, double triggers and exposed double hammers, checkered two piece stock and forend, unlocking lever mounted on upper tang, with cross bolt lock. Top barrel extension is rectangular in shape. May have laminated, Damascus or English Twist barrels. In 1898, Hunter dropped the "Quality" reference and used the term "Grade". Now available in F grades. The best F grade came with Damascus Steel barrels with English walnut stocks, pistol grip, and neatly checkered. The middle F grade had Best English Stub Twist barrels, English walnut stock, pistol grip, checkered stock. The lower F grade had Royal Steel barrels, English walnut stock, pisol grip, neatly checkered. The "F" grades refer only to the barrel metal as all other specifications are the same. This Specialty grade refers only to the quality and quantity of engraving with this being better than the Ideal Grade.

Notes

Make

- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- "SPECIALTY TRAP" was manufactured between 1917 and 1945 by Hunter Arms.
- "SPECIALTY TRAP" was manufactured between 1945 and 1950 by L.C. Smith Gun Company, Incorporated.
- "- L. C. SMITH SPECIALTY TRAP -" is usually marked above the chamber area of the barrel or on the rib.
- a total of 1,860 were manufactured.
- features include: top tang mounted opening lever; hammerless design; single trigger; box lock action; two piece checkered walnut stock and forearm; barrel extension is rectangular with square hole for lock pin; blued finish on metal with varied engraving (each grade is determined by the type and amount of engraving).
- "SPECIALTY TRAP" was also available in a double barrel trap gun in 1920.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer - the "Hunter Arms" name may be marked in full on the barrels or as "H.A.Co." as part of a trade mark logo.

- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- "L.C. Smith Trap Grade" may be marked on top rear of right barrel.
- "T" or "Trap" may be marked on the watertable.
- introduced 1913, and discontinued 1939.
- top break, top lever opening, side by side barrel configuration, auto-ejecting.
- available with single selective or non-selective trigger or double triggers.
- those models produced with the single trigger utilized the Hunter Arms patented system called the "Hunter One Trigger "; the words Hunter One Trigger are stamped directly in front of the trigger guard on the front trigger guard tang.
- those models equipped with the single selective trigger had the barrel selector button located on the right side of the trigger; the letter L indicated that the left barrel would be fired and the letter R indicated that the right barrel would be fired.
- top tang mounted sliding safety.
- Damascus barrels available until 1917 after which only fluid steel barrels were produced.
- available with full pistol grip, semi-pistol grip or straight English-style butt stock.
- lightly engraved receiver showing a trap shooting scene.

Manufacturer

- "Hunter Arms Co. Inc. M'FR'S Fulton N.Y. U.S.A." will be marked on top rear of left barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on watertable of the receiver/frame and repeated on the barrel flats.
- observed serial number consisted of six numbers without a letter prefix or suffix.
- letter markings which denote optional features may be found on the watertable of the receiver/frame and should not be construed to be a prefix or suffix to the serial number itself.
- observed markings have included "E" denoting ejectors have been fitted, "FW" denotinging featherweight receiver/frame construction, and "T" denoting trap grade.

Other Markings

- action flats will be marked: "Pat'd July-13-86", "Oct-5-86".

Make	- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005. - L.C. Smith trade name/trademark has a long history associated to it. - Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y." - L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888. - John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun. - Hunter Arms Company was purchased by Marlin Firearms in 1945. - Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50. - L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin. - Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971. - Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin. - Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007. - Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.
Model	- manufactured from 1917 to 1943.
Type	- side by side.
Action	- top break.
Serial Number	- on barrel and receiver flats.
Remarks	- Breech loading, double barrel, double triggers and exposed double hammers, checkered two piece stock and forend, unlocking lever mounted on upper tang, with cross bolt lock. Top barrel extension is rectangular in shape. May have laminated, Damascus or English Twist barrels. In 1898, Hunter dropped the "Quality" reference and used the term "Grade". Now available in F grades. The best F grade came with Damascus Steel barrels with English walnut stocks, pistol grip, and neatly checkered. The middle F grade had Best English Stub Twist barrels, English walnut stock, pistol grip, checkered stock. The lower F grade had Royal Steel barrels, English walnut stock, pisol grip, neatly checkered. The "F" grades refer only to the barrel metal as all other specifications are the same. This Trap grade refers only to the quality and quantity of engraving, with this being better than the Specialty Grade.

Notes

Make

- marked as "SMITH'S PATENT" on the top strap.

Model

- "SMITH'S PATENT" over "APR. 15. 1873" or "APRIL 15. 1873" is usually marked on the top strap.
- may also be known as "Original Model" or "Original".
- introduced in 1873, manufactured until 1885.
- features include: fixed half moon blade front sight and a groove or notch in the top strap for a rear sight; round barrel; solid top iron or brass receiver/frame with removable fluted cylinder, irregular shaped inspection plate on the left side, and loading slot on the right side; two stage cylinder axis pin with one pin inside the outer axis pin; exposed spurred hammer; sheathed spur trigger, single action trigger mechanism; bird's head grip strap; wood grip plates.
- these revolvers can be loaded manually through a slot in the right side of the recoil shield, but must have the cylinder removed to eject empty cases.
- cylinder is removed by pulling the inner pin forward which then allows the outer pin to be removed.

Manufacturer

- marked as "SMITH'S PATENT" on the top strap.

Serial Number

- serial number is marked on the bottom of the grip.
- serial number range for 22 RF calibre was from 443 to 4544.

Calibre

- "No.22", "No.32", "No.38", "No.41", or "No.44" is usually marked on the top strap.
- these numbers are referring to rim-fire calibres.

Shots

- removable cylinder.

Make:	Smith, Otis A
Model:	1883 Shell Ejector
Manufacturer:	Smith, Otis A
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
119223 - 1	32 S&W	5	83	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "OTIS A. SMITH MANUFACTURER, ROCKFALL, CONN. U.S.A." is usually marked on the barrel.
- Otis A. Smith monogram comprised of the intertwined initials "OAS" within a circle is usually found at the top of each grip plate.

Model

- "SMITH'S PATENT MODEL 1883 SHELL EJECTOR" over "OTIS A. SMITH MANUFACTURER, ROCKFALL, CONN. U.S.A." is usually marked on the barrel.
- "PATENT DECEMBER 1881" over "32-100 CALIBER" is usually marked on the top strap.
- "PATENT DECEMBER 1881" is in referred to Patent No. 251,306 issued December 20, 1881 to Otis A. Smith and John T. Smith.
- features include: fixed sights; round barrel with rib; front hinged receiver/frame with T-shaped break open release located on the rear of the top strap, fluted cylinder, and floating firing pin; exposed spurred hammer; sheathed spur trigger; single action trigger mechanism; saw handle grip strap; nickel plated finish.
- push-type shell ejecting rod located on the underside of the barrel; this rod must be manually actuated to eject the spent casings from the cylinder chambers.

Manufacturer

- "OTIS A. SMITH MANUFACTURER, ROCKFALL, CONN. U.S.A." is usually marked on the barrel.
- Otis A. Smith monogram comprised of the intertwined initials "OAS" within a circle is usually found at the top of each grip plate.

Action

- single action.

Serial Number

- known example had a four digit number without prefix or suffix marked on the bottom of the buttstrap.

Calibre

- "32-100 CALIBER" is usually marked on the top strap.

26100 - 2	32 SHORT RF	5	78	Antique AFR, Section 1, para. 6	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "OTIS A. SMITH ROCKFALL CONN" may be marked on the top side of the barrel and topstrap or "SMITH'S NEW MODEL" may be marked on the topstrap.
- "OAS" logo may be marked on the grip plates.
- "OAS" are the initials for Otis A. Smith.

Model

- manufactured from circa 1873 to circa 1898.
- "SMITH'S NEW MODEL" may be marked on the topstrap of the receiver/frame.
- Patent dates applicable for this model are January 28 1873, April 15 1873 and December 20 1881 by John T. Smith.
- features include: fixed blade front sight and a V notch in the tip of the hammer nose for a rear sights; round barrel with rib; solid top receiver/frame with removable fluted cylinder, large push button type cylinder axis pin release mounted on the left side, and loading cut-out on the right side; exposed spurred hammer; sheathed spur trigger; single action trigger mechanism; flat bottom grip strap; checkered hard rubber grip plates; nickel plated finish.
- grip plates may be marked "OAS" or "U.S. Arms Co."

Manufacturer

- manufacturer's name is not marked on the firearm.
- grip plate monograms read "OAS" in a stylized format.

Serial Number

- serial number was observed marked on the bottom of the butt strap.
- observed serial number consisted of five numbers without a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- removable cylinder.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "RICK P SMITH" over "LONDON" is marked on the firearm.

Model

- manufactured circa 1847.
- model designation is not marked on the firearm.
- this is an early style bar hammer type of a revolving pepperbox pistol.
- features include: hand rotated barrel cluster with exposed percussion nipples; exposed bar hammer; double action trigger mechanism; no trigger guard; rounded and engraved receiver/frame; walnut, bag-type grips; blued finish.

Manufacturer

- "Richard P. Smith" was located at 12 Mansfield Place, Saint Pancras, London, England circa 1847.

Action

- muzzle-loading, "pepperbox"-style pistol with revolving barrel cluster.

Serial Number

- serial number is marked on the receiver/frame under the grip.
- serial number observed consisted of three numbers without a letter prefix or suffix.

Notes

Make

- "Rick P. Smith" over "London" is marked on the firearm.

Model

- manufactured circa 1847.
- model designation is not marked on the firearm.
- model designation is derived from the method by which this pistol is loaded; loading was accomplished by unscrewing the barrel.
- this is a single shot pistol with a removable barrel and an exposed hammer centrally located on the receiver/frame behind the chamber.
- this handgun is intended to be loaded from the breech end of the barrel and as such was originally supplied with a wrench to unscrew the barrel from the receiver/frame in order that a lead ball and loose powder could be inserted into the chamber end of the barrel and then the barrel screwed back onto the receiver/frame.
- features include: removable, half round, half octagonal barrel, no sights; external, center mounted hammer; bag grip with wood grip panels.

Manufacturer

- "Richard P. Smith" was located at 12 Mansfield Place, Saint Pancras, London, England circa 1847.

Action

- the barrel unscrews in front of the chamber, so it can be loaded with a ball that fits the barrel more tightly than is possible with a muzzle loader.
- the turnoff barrel may be rifled.

Serial Number

- serial number is marked on the receiver/frame in front of the trigger guard.
- serial number of an observed example consisted of three numbers without a prefix or suffix.

Type:	Shotgun
Action:	Multi-Barrel
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
73389 - 1	12 GA X 2 1/2"	2	710	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Saml. & C. Smith, Princes St., London" was marked on the sideplates, with the same marking plus "Leicester Square, London" on the barrel.

Model

- this is a back-action sidelock side by side shotgun opened with an underlever that wraps around the front of the trigger-guard.
- straight-grip walnut stock and splinter forearm, engraved receiver and sideplates, and double triggers.
- marked "Saml. & C. Smith / Princes St. London" on the sideplates, and the same with "Leicester Square, London" on the rib.

Manufacturer

- "Saml. & C. Smith, Princes St., London" was marked on the sideplates, with the same marking plus "Leicester Square, London" on the barrel.
- the firm of Samuel & Charles Smith was located in London from 1824 until 1875; due to the large number of "Smiths" that have manufactured firearms in London over the years, it's difficult to provide a thorough account of this company's history.It's believed that the firm was founded by William Smith (Samuel and Charles' father) in 1812, then carried on by Samuel and Charles. Following Samuel & Charles' retirement, two of their sons (also called Samuel and Charles) continued operations.

Action

- side by side barrel configuration.

Serial Number

- serial-numbered on tang and barrels.

- Joseph Forrestall Smythe was in business from circa 1886 to circa 1932.
- Joseph F. Smythe had premises in Darlington, Stockton-on-Tees, and Middlesbrough, England.
- Joseph F. Smythe was located at 13 Blackwellgate, Darlington, County Durham from circa 1886 to circa 1894, 12 Horsemarket, Darlington and 21 Dovecot Street, Stockton-on-Tees circa 1897, 16 Albert Road, Middlesbrough, Yorks circa 1901, 12 Horesmarket, Darlington circa 1905 to 1909.
- Joseph F. Smythe was known as "J F Smythe Limited" from 1913 to circa 1932.

Action

- side by side barrel configuration

Serial Number

- located on the trigger guard.
- observed specimen had four digits.

FRT Report

Firearm Reference Number (FRN): 119351
Make: Sneider
Model: Two Cylinder Revolver

Summary

Make:	Sneider
Model:	Two Cylinder Revolver
Manufacturer:	Sneider, Charles
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
119351 - 1	22 RF	14	70	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- may be found marked "E. SNEIDER PAT. MARCH 1862".

Model

- model not marked on firearm.
- this is an unusual revolver of a type that a number of inventors were experimenting with at the time of the American Civil War; a revolver with multiple cylinders that could be reversed, allowing more capacity.
- features include: two seven-shot cylinders in back-to-back configuration on a separate cylinder pin; octagonal barrel; a brass or iron receiver/frame (examples seen in both); spur trigger; square butt, and walnut grips.
- this revolver has a long firing pin mounted in the topstrap (struck by a hammer in the conventional position) that fires the cartridges contained in the forward position; after firing seven shots, the user would hinge the barrel down to pull the cylinder package out and reverse it.

Manufacturer

- Charles E. Sneider was the inventor/patentee of an unusual form of dual-cylinder single-action revolver.

Shots

- in this revolver, seven shots are contained in each of the cylinders; after firing the first seven shots, the cylinder group is taken out and reversed to fire the second group of seven shots.

Firearm Reference Number (FRN): 15337
Make: Sneider Arms Company
Model: Ring Trigger Rifle

Summary

Make:	Sneider Arms Company
Model:	Ring Trigger Rifle
Manufacturer:	Sneider Arms Company
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Other
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
15337 - 1	22 RF	12	568	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SNEIDER ARMS CO." is marked on top of the rifle.
- the Sneider Arms Company was a post-1890 company composed of inventor Charles E. Sneider and his sons and relatives; Charles E. Sneider had earlier worked for or in partnership with "Poultney & Trimble" and "Clark & Sneider".

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is an unusual design of manually-operated repeating rifle that functions by squeezing a ring trigger at the front of the trigger guard rearwards; this motion moves the breech piece on the right side of the rifle outwards to the right, allowing a cartridge to be fed from the tubular magazine into the breech, then closing behind it again, and firing the rifle when the primary trigger is pulled at the end of the ring trigger travel.
- features include: octagonal blued or browned barrel; open fixed sights; checkered walnut forearm and straight-grip buttstock; tubular magazine with cartridge-counter gradations on the right side of the barrel; rotating take-down lever on the left side of the breech; brass receiver/frame, with an ejection window on the left side.

Manufacturer

- "SNEIDER ARMS CO." is marked on top of the rifle.
- the Sneider Arms Company was a post-1890 company composed of inventor Charles E. Sneider and his sons and relatives; Charles E. Sneider had earlier worked for or in partnership with "Poultney & Trimble" and "Clark & Sneider".

Action

- this is a manually-operated repeating rifle that functions by pulling a ring "trigger" in the trigger guard rearward (transferring a cartridge from the magazine to the breech), and firing the rifle when the trigger finger contacts a primary trigger at the rear of the trigger guard.

Shots

- tubular magazine mounted on the right side of the barrel.

129919 - 1	577 SNIDER	1	491	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Snider-Enfield" is not marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- model name is not marked on the firearm; model designation is derived from the characteristics of the firearm.
- this is a Snider-Enfield rifle that was taken out of English/UK service, then shortened for use by Canadian cadets.
- these carbines were made from a variety of original Snider-Enfields, and can be seen with a wide variety of markings.
- these carbines were intended primarily for drill use.
- differences from the Cavalry and Artillery carbine include: shotgun bead style front sight; wood plug insert fills the original ram/cleaning rod hole at the front of the forend and the absence of a leather rear sight protector and associated hardware.

Manufacturer

- the manufacturer's name and the date of manufacture is marked on the lock plate on the right side of the firearm.
- the name of the organization/manufacturer that converted the firearm to a Cadet Carbine does not appear on the firearm.

Action

- manually operated, side-hinged breech mechanism with external hammer, utilizing the Snider patent conversion.

Serial Number

- examined specimen had a four digit number without prefix or suffix marked on the underside of the rear sight leaf and on the rear of the breech block.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- these carbines were made from a variety of original Snider-Enfields, and can be seen with a wide variety of markings.
- one observed example was a Mark II ** model with a lockplate marking of "B.S.A.Co. 1865".

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type, applied to large-bore pistols that were customarily carried in "howdahs" on the backs of elephants during tiger hunts in India, as a last-ditch measure in case a tiger got too close to an elephant or its riders. Many of these pistols were converted from Snider-Enfield rifles of various models after they were withdrawn from British service.
- features include: blued finish; may have no sights; smooth walnut stock with straight-grip; single barrel band; Snider action with hinged breech-block that hinges to the right and acts as an extractor when pulled to the rear; right-side lockplate with manually-cocked hammer; brass trigger-guard and grip-strap; and may have a brass grip-cap.

Action

- Snider-pattern hinged breech-block single-shot.

Serial Number

- usually serial-numbered on the bottom of the breech-block.

Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
2440 - 1	577 SNIDER	1	927	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- the model designation does not appear on the rifle.
- these rifles were manufactured (converted) in 1866.

Manufacturer

- the manufacturer's (converter's) name does not appear on the firearm but the original manufacturer's name appears on the lockplate.

Action

- manually operated side-hinged breech mechanism with external hammer.

Serial Number

- appears on the leaf of the rear sight and perhaps on the underside of the breech-block.

Other Markings

- the original manufacturer's name (Enfield, Tower, L.S.A. Co. or Windsor) and original date of manufacture appear on the lock plate.

Remarks

- This rifle is a conversion of existing British 577 Calibre percussion muzzle-loading Enfield rifles to breech loaders using a hinged breech-block system designed by Jacob Snider. The MARK 1 Snider suffered from several shortcomings in the British Army, most significant being accidental blowing open of the breech block. Very few Snider MARK 1 rifles exist as most were upgraded to MARK 1* configuration.

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" or "B.S.A." may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- "II *" is marked on the top of the receiver/frame directly in front of the breech block.
- Snider-Enfield Mark 2* conversion was approved by the British Government in December 1866 and was incorporated on firearms with observed lockplates dated circa 1860 to 1870.
- features include: block and blade front sight; steel ram rod; three barrel bands; Snider's patented swinging breech block conversion of the Pattern 1853 Enfield rifle musket; side lock action with external hammer located on the right side; brass furniture comprising of the forend cap, trigger guard, side screw escutcheons and butt plate; walnut, full length stock.

Manufacturer

- "B.S.A." and the three stacked rifles logo may be marked on the lock plate.

Action

- manually operated side-hinged breech mechanism which swings from left to right.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is usually marked on the rear of the leaf of the rear sight and perhaps on the underside of the breechblock. - many Snider-Enfield's were not serialized.
Other Markings	- known example was dated 1865 on the lockplate; it was also marked with the Royal cypher of Queen Victoria, i.e. "Crown over V.R." on the rear of the lock plate behind the hammer.

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- the model designation appears on the top of the breech assembly as "II*". - this is a circa 1867 conversion of an existing British .577 percussion calibre muzzle loading Enfield rifle to a cartridge breech loading system using a hinged block assembly designed by Jacob Snider. - the MARK 1* improvement of the MARK 1 consisted of a partial squaring of the rounded counter sink for the case groove. - the MARK 2* improvement of the MARK 2 consisted of a squaring of the counter sink for the case groove in order to accommodate the new long base cartridge that featured a squared case rim. - the MARK 2** improvement of the MARK 2* consisted of modifications to the extractor, the underside of the breech block and a shortening of the nipple assembly. - the MARK 3 was not a conversion of a muzzle loader but a purpose built breech loader utilizing the Snider system.
Manufacturer	- the manufacturer's (converter's) name does not appear on the firearm but the original manufacturer's name appears on the lockplate.
Action	- manually operated, side-hinged breech mechanism with external hammer.
Serial Number	- usually appears on the leaf of the rear sight and in some cases on the underside of the breechblock (samples have been noted with no numbers).
Other Markings	- the original manufacturer's name (Enfield, Tower, L.S.A. Co. or Windsor) and the date of manufacture appear on lock plate.

- the model designation appears on top of the receiver/frame as "II**".
- the stock of the original percussion carbine was altered to, or replaced with, half stock configuration with a trap in the buttplate for a jointed cleaning rod.
- differs from the artillery version by having a single barrel band, absence of a cleaning rod, a leather, rear sight protector secured by two screws on the forearm and the absence of a bayonet mounting lug on the barrel at the muzzle.

Manufacturer

- the manufacturer's (converter's) name does not appear on the firearm but the original manufacturer's name appears on the lockplate.

Action

- manually operated side-hinged breech mechanism with external hammer.

Serial Number

- appears on the leaf of the rear sight and perhaps on the underside of the breech block.

Other Markings

- the original manufacturer's name and date of manufacture appear on the lock plate.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- This is a conversion of existing British percussion .577 calibre muzzle loading Enfield Cavalry Carbines to breech loading using the hinged block system designed by Jacob Snider. The stock of the original percussion carbine was altered to, or replaced with, half stock configuration with a trap in the buttplate for a jointed cleaning rod.

FRT Report

Firearm Reference Number (FRN): 28750
Make: Snider-Enfield
Model: MARK 2** Engineer Rifle

Summary

Make:	Snider-Enfield
Model:	MARK 2** Engineer Rifle
Manufacturer:	Royal Small Arms Factory, Enfield (RSAF(E))
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
28750 - 1	577 SNIDER	1	775	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- the model designation appears on top of the receiver as "II**".
- visually they resemble the Snider-Enfield MARK 2** Naval Rifle, including brass furniture.
- this rifle has Lancaster's Patent rifling and as such has no discernable lands or grooves (appears to be smooth bored).

Manufacturer

- the manufacturer's (converter's) name does not appear on the firearm but the original manufacturer's name appears on the lockplate.

Action

- manually operated side-hinged breech mechanism with external hammer.

Serial Number

- appears on the leaf of the rear sight and perhaps on the underside of the breechblock.

Other Markings

- the original manufacturer's name (B.S.A. or L.S.A. Co.) and the date of manufacture appear on tne lock plate. "Lancaster's Patent" appears on the top of the barrel near the breech.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- this is a conversion of existing British percussion .577 calibre muzzle loading Lancaster Engineer Rifles to breechloading using the hinged breechblock system designed by Jacob Snider.
- visually they resemble the Snider-Enfield MARK 2** Naval Rifle, including brass furniture.
- this rifle has Lancaster's Patent rifling and as such has no discernable lands or grooves (appears to be smooth bored).

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- the model designation appears on top of the receiver as "II**".
- apart from having a brass trigger guard, brass nosecap and buttplate, this rifle is virtually identical to the Snider-Enfield MARK 2 ** Short Rifle which has those parts made of iron.

Manufacturer

- the manufacturer's (converter's) name does not appear on the firearm but the original manufacturer's name appears on the lockplate.

Action

- manually operated side-hinged breech mechanism with external hammer.

Serial Number

- appears on the leaf of the rear sight and perhaps on the underside of the breechblock.

Other Markings

- the original manufacturer's name (Enfield, Tower, L.S.A. Co.) and the date of manufacture appear on the lock plate.

Remarks

- this firearm is a conversion of British percussion .577 calibre muzzle loading Enfield Naval Rifles to breech loading using the hinged breechblock system designed by Jacob Snider.

129351 - 1	577 SNIDER	1	927	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" or "B.S.A." may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- the model designation is marked on the top of the receiver/frame directly in front of the breech block as, " II ** ".
- the Mark II ** conversion was approved by the British Government in December 1866 although one example has been observed with a lock plate dated 1865.
- features include: steel ram rod; three barrel bands; Snider's patented swinging breech block conversion of the Pattern 1853 Enfield rifle musket; side lock action with external hammer located on the right side; brass furniture comprising of the forend cap, trigger guard, side screw escutcheons and butt plate; walnut, full length stock.

Manufacturer

- "B.S.A." and the three stacked rifles logo may be marked on the lock plate.

Action

- manually operated side-hinged breech mechanism which swings from left to right.

Serial Number

- usually marked on the rear of the leaf of the rear sight and perhaps on the underside of the breechblock; many Snider-Enfield's were not serialized.

Other Markings

- known example was dated 1865 on the lockplate; it was also marked with the Royal cypher of Queen Victoria, i.e. "Crown over V.R." on the rear of the lock plate behind the hammer.

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- the model designation appears on top of the receiver as "II**".
- these two band rifles were converted from muzzle loading to breech loading, on firearms made circa 1853 to 1871.
- apart from the shorter length and location of the sling swivels (underside of mid barrel band and underside of buttstock) and having iron furniture as opposed to brass furniture and the presence of a bayonet lug located on the right side of the barrel near the muzzle, this rifle is mechanically identical to the three band Snider-Enfield MARK 2** Rifle.

Manufacturer

- "B.S.A.Co", over the date, is marked on the lockplate.

Action

- manually operated, side-hinged breech mechanism, with external hammer.

Serial Number

- may appear on the leaf of the rear sight and perhaps on the underside of the breechblock.

Other Markings

- The original manufacturer's name (Enfield, Tower, L.S.A. Co.) and the date of manufacture appear on lock plate.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- This is a conversion of existing British percussion .577 calibre muzzle loading Enfield Short Rifles to breech loading using a hinged block system designed by Jacob Snider.
- Apart from shorter length and location of sling swivels (underside of mid barrel band and underside of buttstock) and having iron furniture as opposed to brass, this rifle is mechanically identical to the Snider-Enfield MARK 2** Rifle.

FRT Report

Firearm Reference Number (FRN): 2450
Make: Snider-Enfield
Model: MARK 3 Cavalry Carbine

Summary

Make:	Snider-Enfield
Model:	MARK 3 Cavalry Carbine
Manufacturer:	Birmingham Small Arms (BSA)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
2450 - 1	577 SNIDER	1	489	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- the model designation appears on top of the receiver as "III".
- this firearm is a short-barrel carbine.
- this firearm is not a conversion of a muzzle loader but a completely new manufactured firearm using a steel barrel and a spring-loaded, thumb operated breech-block.
- the stock is of half stock configuration with a trap in the buttplate for a jointed cleaning rod.
- manufactured from 1869 to 1878.
- differs from the artillery version by having a single barrel band, absence of a cleaning rod, a leather, rear sight protector secured by two screws on the forearm and the absence of a bayonet mounting lug on the barrel at the muzzle.

Manufacturer

- the manufacturer's name appears on the lockplate.

Action

- manually operated side-hinged breech mechanism with external hammer.

Serial Number

- appears on the leaf of the rear sight and perhaps on the underside of the breechblock.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings	- the manufacturer's name and date of manufacture appear on the lock plate.
Remarks	- this firearm is a short-barrel carbine. - this firearm is not a conversion of a muzzle loader but a completely new manufactured firearm using a steel barrel and a spring-loaded, thumb operated breech-block. - the stock is of half stock configuration with a trap in the buttplate for a jointed cleaning rod.

FRT Report

Firearm Reference Number (FRN): 141518
Make: Snider-Enfield
Model: MARK 3 Rifle

Summary

Make:	Snider-Enfield
Model:	MARK 3 Rifle
Manufacturer:	Kerr, James & Company/London Armoury Company (LAC)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
141518 - 1	577 SNIDER	1	914	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Snider's Patent" may be marked on some breech-blocks.
- Snider is in reference to Jacob Snider the designer of an improved sideways swinging hinged breech block conversion.
- Enfield Pattern 1853 rifle-muskets were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- model designation may be marked on the top of the receiver/frame directly in front of the breech block as, "III".
- the Mark III version was typically a purpose built breech loader. Dates of manufacture were typically from 1869 to 1871 however examples have been encountered with lock plates dated as early as 1860 suggesting that surplus MARK I and MARK II locks were used.
- features include: blued finish; steel cleaning rod; Snider's patented swinging breech block assembly originally made as a conversion for the Pattern 1853 Enfield rifle musket; side lock with external hammer located on right side of the action; flat hammer face (versus a cupped hammer face of the MARK I and II); brass furniture comprising of the butt plate, trigger guard, side-nail cups and forend cap.

Manufacturer

- "JAs KERRR & Co" over "54 KING WILLIAM St" over "L. A. C" was observed marked on the lockplate.
- "J. KERR" and "LAC" were observed marked on the barrel.
- "LAC" is the abbreviation for the London Armoury Company.
- "Kerr & Company" was originally formed by James and John Kerr, circa 1853/54.
- James Kerr & Company was an English firearms manufacturer located in London, England; this firm co-existed with the firm known as the "London Armoury Company".
- James Keer & Company was established circa 1866 and ceased operations in 1894.
- James Kerr & Company was located at the following addresses:
36 King Street from 1866 to 1868,
54 King William Street and 27 Leman Street, Goodman's Field from 1868 to 1883,
118 Queen Victoria Street from 1884 to 1887, and
114 Queen Victoria Street from 1888 to 1894.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- manually operated side-hinged breech mechanism which swings from left to right with an external hammer.
Serial Number	- usually marked on the rear of the leaf of the rear sight and perhaps on the underside of the breechblock; many Snider-Enfield's were not serialized.

129438 - 2	577 SNIDER	1	927	Antique AFR, Section 1, para. 3	Non-Commercial Customization	

Notes

Make	- maker's name is not marked on the firearm.
Model	- no model name is marked on this firearm; the model name is derived from the Snider-Enfield type of manually operated, side-hinged breech mechanism with external hammer. The Mark 3 features a spring loaded locking device that is attached to the swinging breech assembly. - features and markings will contradict typical Snider-Enfield conventions as these rifles are usually assembled from parts of different models and/or may be attempts to copy known British configurations by local indigenous craftsmen using any means and materials at their disposal.
Action	- manually operated, side-hinged breech mechanism with external hammer.
Serial Number	- serial numbers are not usually present on such firearms.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898 are considered "Antique" in Canada.
Other Markings	- examples of this type of firearm may have Arabic script markings apparent at various locations.

Notes

Make

- known example was marked "L. A. Co" on the lockplate; these letters indicate manufacture/conversion by the London Armoury Company; in addition the top of the breech block is marked with the the firm's trademark of the capital letter "C" within which are the letters "A" and "L".
- "Snider's Patent" may be marked on some breech-blocks.
- Snider is in reference to Jacob Snider the designer of an improved sideways swinging hinged breech block conversion.
- Enfield Pattern 1853 rifle-muskets were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- "III", the Roman numeral three (3) is marked on the top of the receiver/frame directly in front of the breech block.
- Mark 3 version was typically a purpose built breech loader. Dates of manufacture were typically from 1869 to 1871 however examples have been encountered with lock plates dated as early as 1860 suggesting that surplus MARK 1 and MARK 2 locks were used.
- features include: blued finish; steel cleaning rod ; Snider's patented swinging breech block assembly originally made as a conversion for the Pattern 1853 Enfield rifle musket; side lock action with external hammer located on right side of the action; flat hammer face; brass furniture comprising of the butt plate, trigger guard, side-nail cups and forend cap.

Manufacturer

- "L. A. Co" is marked on the lockplate.
- "L. A. Co" is an abbreviation used by the London Armoury Company.
- "LAC" is also marked on the top of the breech block as a capital letter "C" within which are the letters "L" and "A".
- "LAC" is an abbreviation used by the London Armoury Company.

Action

- manually operated side-hinged breech mechanism which swings from left to right with an external hammer.

Serial Number

- usually marked on the rear of the leaf of the rear sight and perhaps on the underside of the breechblock; many Snider-Enfield's were not serialized.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - known example was dated 1865 on the lockplate; it was also marked with the Royal cypher of Queen Victoria, i.e. "Crown over V.R." on the rear of the lock plate behind the hammer.

FRT Report

Firearm Reference Number (FRN): 129522
Make: Snider-Enfield
Model: MARK 3 Short Rifle

Summary

Make:	Snider-Enfield
Model:	MARK 3 Short Rifle
Manufacturer:	Nepalese State Arsenal
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	NEPAL
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
129522 - 1	577 SNIDER	1	775	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- model is not marked on the firearm and the lock plate is unmarked.
- various Nepalese markings will be encountered.
- manufactured circa 1870 to 1880.
- this firearm is not a conversion of a muzzle loader but a newly manufactured firearm using a steel barrel and a spring-loaded, thumb operated, side hinged breech-block assembly as originally found on the British made MARK 3 Short Rifle model.

Manufacturer

- the manufacturer's designation may not be marked on the firearm.
- various Nepalese markings will be encountered.

Action

- right side hinged breech block assembly.

Other Markings

- various Nepalese markings will be encountered.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make: Snider-Enfield
Model: MARK 3 Short Rifle

Summary

Make:	Snider-Enfield
Model:	MARK 3 Short Rifle
Manufacturer:	Royal Small Arms Factory, Enfield (RSAF(E))
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
2454 - 1	577 SNIDER	1	775	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- the model designation appears on top of the receiver as "III".
- these rifles were manufactured from 1869 to 1871.

Manufacturer

- the manufacturer's name appears on the lockplate.
- do not confuse with the MARK 3 Rifle.

Action

- manually operated side-hinged breech mechanism with external hammer.

Serial Number

- appears on the leaf of the rear sight.

Other Markings

- The date of manufacture appears on the lock plate.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- Unlike the earlier MARK 1 and MARK 2 versions, this is not a conversion of a muzzle loading rifle but a completely new manufactured rifle using a steel barrel and a spring-loaded, thumb operated breech-block.
- This firearm is mechanically identical to the MARK 3 Rifle differing in having a shorter barrel, sling swivels on the middle barrel band and the underside of the buttstock and in having iron furniture as opposed to brass on the long rifle.

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- This is the Snider military artillery pattern carbine having a full stock and a bayonet mounting lug on the barrel.
Identical to the British government issue Mk III Snider artillery carbine except for the lack of government property markings and date, on the lock plate. Some of these commercial carbines may have fancy grained stocks, checkering at the wrist and forearm and perhaps some decorative engraving on the breech block, hammer and lock plate.

Manufacturer

- manufactured by Birmingham Small Arms Company (BSA Co.), after 1873 name of manufacturer changed to Birmingham Small Arms and Metal Company (B.S.A. & M. Co.).

Action

- manually operated side-hinged breech mechanism with external hammer.

Serial Number

- the serial number is found on underside of breech-block or on the leaf of the rear sight.

Other Markings

- Although manufactured by B.S.A. various retailers names and addresses may appear on the top of the barrel. The B.S.A. company name appears on the lock-plate.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- This rifle was offered for sale to any individual or group who wanted a rifle approximating the British service arm. - Given that these carbines were manufactured on contract, they may exhibit modifications specified by the purchaser (sights, stock length etc.).

66450 - 1	577 SNIDER	1	933	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- this firearm is similar to the standard British War Department issue, Mk III Snider, "Three Band Rifle", except for the lack of British War Department property markings and date, on the lock plate.
- commercial rifles may have better quality wood stocks, checkering at the wrist and forearm of the butt and perhaps some decorative engraving on the breech-block, hammer and lock plate.
- this type of rifle was offered for sale to any individual or group who wanted a rifle approximating the British service arm.

Manufacturer

- the manufacturer's name and London address may be found on the side-lock plate.
- London proof marks are found on the firearm.

Action

- manually operated, single-shot, side-hinged breech mechanism with external hammer.
- the "Third Model" was characterized by the addition of a locking bolt to the breech block.
- the "Third Model" was manufactured in its entirety as a "Snider" action breech-loader and was not a conversion from the percussion system.

Serial Number

- military issue firearm serial numbers are located on the underside of the breech-block or on the leaf of the rear sight: - commercial guns followed this practice to an extent.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- proof marked in accordance with British Proof Law prevailing at the date of manufacture.
- the proof marks are located on the left side of the barrel near the base of the rear sight.
- absence of military marking or government acceptance stamps usually indicate that the firearm is a commercial pattern.
- the presence of War Department property marks may indicate that this commercial rifle was built from military surplus parts.
- the Snider patent mark is proof of commercial manufacture.

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- identical to the British Government military three band Mark III Snider-Enfield breech-loading cartridge rifle, but lacks the manufacture date and government property markings.
- latched, hinged breech-block swings open to the right, cartridge extraction by drawing the breech-block to the rear against mild spring pressure.
- this rifle was sold to any person or group that desired a copy of the British service arm of the day.
- some of these commercial rifles may be equipped with chequered and figured wood furniture, and engraving on the metal parts.

Manufacturer

- "T. TURNER" is marked on the top of the barrel:
- THOMAS TURNER BIRMINGHAM (with a castellated tower in the middle, with the word "TRADE' above, and "MARK" below) is marked on a circular cartouche on the right side of the butt-stock.
- "THOMAS TURNER", "FISHER STREET" and "BIRMINGHAM" are marked on the lock.
- Thomas Turner was located in Birmingham on Fisher Street from 1838 to 1890.

Action

- latched, hinged breech-block, with external hammer.

Serial Number

- may be numbered on the barrel above the chamber, under the breech-block, or underside of the rear leaf-sight.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - not marked with cartridge designation.

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm; the Make is derived from the original military designation and the characteristics of the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates or the name of the manufacturer such as, "P.Webley & Son".
- Snider is in reference to Jacob Snider the designer of an improved sideways swinging/hinged breech block conversion to the Enfield Pattern 1853 rifle-musket.
- the British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations by many British gun making firms for the commercial trade.

Model

- no model name is marked on this firearm; the model designation is derived from the characteristics of the firearm.
- this rifle is identical to the British government issue Mk III Snider three band rifle except for the lack of government property markings and date, on the lock plate.
- the British patent for the Snider side-hinged breech block was issued in 1864.
- this type of rifle would have been made circa mid-late 1860's to the mid 1880's.
- some of these commercial rifles may have fancy grained stocks, checkering at the wrist and forearm and perhaps some decorative engraving on the breech-block, hammer and lock plate.
- features; latched and hinged breech-block swings open to the right for loading; cartridge extraction is by drawing the breech-block to the rear against mild spring tension; exposed right side mounted hammer; iron or steel barrel may be blued or browned; cleaning rod mounted underneath the barrel.
- this rifle was offered for sale to any individual or group who wanted a rifle approximating the British service arm.
- British proofmarks are apparent on this firearm.

Manufacturer

- known example was marked, "P. WEBLEY & SON" over "BIRMINGHAM" on the lock plate in front of the hammer; the rear of the lock plate was marked with the Webley "Winged Bullet" trademark symbol over the letters "W&S".

Action

- manually operated, side-hinged breech mechanism with external hammer.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- may be numbered on the barrel above the chamber, under the breech block, or on the underside of the rear leaf-sight.
- known example had a four digit number with a letter suffix marked on the underside of the breech block; letter suffix "K" has been observed.

Calibre

- barrel is proofmarked with the number "25" which indicates a calibre of "577 Snider".

173382 - 1	577 SNIDER	1	775	Antique AFR, Section 1, para. 3	Non-Commercial Customization	

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- model is not marked on the firearm.
- this is a version of the Snider-Enfield rifle with two barrel bands based on the British government issue MARK 3 Snider-Enfield two band, short rifle without government property markings or date on the lock plate.
- unlike the earlier MARK 1 and MARK 2 versions, this is not a conversion of a muzzle loading rifle but a completely new manufactured breech loading rifle using a steel barrel and a spring-loaded, right side opening, breech-block with a curved and checkered thumb release lever.
- some of these commercial rifles may have plain or fancy grained stocks, checkering at the wrist and forearm and decorative engraving on the breech block, hammer and lock plate; blued finish.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "D. & J. FRASER" over "4 LEITH ST. TERRACE, EDINBURGH" is marked on the barrel.
- the "D&J F" monogram of "Daniel & John Fraser" may be moulded into the butt plate.
- "FRASER'S PATENT" above a small shield showing a rampant lion may be marked on the action.
- "Daniel Mackintosh Fraser" established a gunmaking business at 22 Greenside Place, Edinburgh, Scotland in 1873.
- "Daniel Mackintosh Fraser" moved to 18 Leith Walk by 1874.
- in 1878, Daniel Fraser was joined by his brother John Fraser and the business name changed to "D. & J. Fraser".
- "D. & J. Fraser" was located at 4 Leith Street Terrace, Edinburgh, Scotland from 1878 to 1887/1889.
- in 1887/1889, John Fraser left the business and established his own enterprise at 1 Frederick Place, Edinburgh, Scotland from 1890 to 1898.
- in 1887/1889, Daniel Fraser continued trading under his name as "Daniel Fraser & Company" from 4 Leith Street Terrace, Edinburgh, Scotland with the assistance of his two sons Donald and James.
- in 1901, Daniel Fraser died and his sons carried on running the business.
- in 1911, the company name was amended to "Daniel Fraser & Company, Limited".
- in 1917, "Daniel Fraser & Company, Ltd." was liquidated.
- "Daniel Fraser & Company" produced a range of shotguns, and double barrel, bolt action and falling block rifles under the brand names Velox, Fraser's Special, or Special.
- "D. Fraser" had facilities at 48 Dover Street, Piccadilly, London and Cateaton, Manchester, England, and 172 Easter Road, and 174 Montgomery Street, Edinburg, and a range at Duddingston, Edinburgh, Scotland.
- in 1934, "Daniel Fraser & Company" was incorporated into A. Sanders (Maidstone) Ltd.
- in 1983, "Dan'l. Fraser & Co. C.I.B." was purchased by Bernard Horton-Corcoran and manufacturing facilities were set up in Peddieston on the Black Isle, Inverness, Scotland.
- in 2003, the "Danl. Fraser & Co." trade name was owned by Dickson & MacNaughton" located in Edinburg, Scotland.

Action

- manually operated, right side-hinged, breech mechanism with external hammer.

Serial Number

- serial number may be found on the underside of breech-block or on the leaf of the rear sight.

Other Markings

- "R.McVittie, Toronto, Ontario" was observed marked on the top of the barrel of one example.

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- no model name is marked on this firearm; the model name is derived from the fact that it is a copy of the Military Short Rifle made for the commercial, civilian or "trade" market.
- the British patent for the Snider side-hinged breech block was issued in 1864.
- this type of rifle would have been made circa late 1860's to the mid 1880's.
- this rifle is basically a copy of the British government issue Mk III Snider-Enfield two band short rifle except for the lack of government property markings and date on the lock plate. Some of these commercial rifles may have fancy grained stocks, checkering at the wrist and forearm and perhaps some decorative engraving on the breech block, hammer and lock plate. This rifle was offered for sale to any individual or group who wanted a rifle approximating the British service arm.
- Belgian proof marks are apparent on this firearm; it may also be marked, "Made in Belgium" or "Belgium".

Manufacturer

- manufactured in Belgium, no maker's name or logo, however barrel, receiver and breech block have Belgian proof marks.

Action

- manually operated side-hinged breech mechanism with external hammer.

Serial Number

- serial number may be marked on the side of the chamber of the barrel.

Model:	600A
Manufacturer:	Sodia, F
Level:	Manufacturer Specifications and Commercial Customization
Type:	Combination Gun
Action:	Multi-Barrel
Country of Manufacturer:	AUSTRIA
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
40449 - 2	30-06 SPRG/12 GA X 2 3/4"	2	651	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
40449 - 1	7X57R MAUSER/12 GA X 2 3/4"	2	597	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "F. Sodia", "Fr. Sodia", "Franc Sodia", "Franz Sodia" or "Sodia" is marked on the firearm.

Model

- this is a semi-custom boxlock over/under combination gun.
- features include: Kersten cross-bolt lock-up, double triggers (front is a "set" trigger for the rifle), tang safety, walnut pistol grip stock with cheekpiece, and lightly engraved, color case hardened receiver/frame.

Manufacturer

- "F. Sodia", "Fr. Sodia", "Franc Sodia", "Franz Sodia" or "Sodia" is marked on the firearm.
- "In Ferlach" or "Ferlach Austria" may be marked on the firearm.
- "F. Sodia" was a manufacturer located in Ferlach, Karnten, Austria between 1871 and 1992.
- "F. Sodia" manufactured single barrel and multi-barrel rifles and shotguns, combination guns, and bolt action rifles using Mannlicher-Schonauer and Mauser actions.
- "F. Sodia" also sold other manufacturer's equipment such as Bayard, Brownings, Steyr, and Walther semi automatic handguns, revolvers and pistols, Browning semi automatic shotguns, Bayard, Mannlicher, and Mauser rifles, Daisy air guns, and hunting accessories.

Action

- Over/Under pattern, shotgun over rifle.

106535 - 3	8X56R	25	600	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- Solothurn machine gun was developed by Louis Stange, engineer at the German Rheinmetall company. Rheinmetall was part-owner of Solothurn.

Model

- the model is marked on the firearm.
- this is a light machine gun designed in Germany by Rheinmetall, but which was built in Switzerland by the Rheinmetall-owned Solothurn company to evade the Treaty of Versailles restrictions on domestic German manufacture of machine guns.
- this machine gun uses a rotating collar method of locking the breech (designed by Louis Stange) which was later used in the famous MG34 machine gun, arranged inside a lightweight tubular receiver.
- this machine gun is the version of the MG30, adopted by Hungary in 1931, and modified to add a forward rotating carry handle and to allow for a quick barrel change (barrel changes in this machine gun are accomplished by removing the buttstock and removing the operating spring, bolt, and barrel through the rear of the receiver). The MG30 was adopted by several countries in a variety of chamberings, including Switzerland (7.5x55mm), Germany (8mm Mauser), Austria (8x56R) and Hungary (8x56R, many of which were later converted to 8mm Mauser).
- features include: blued finish; cone flash hider/recoil booster; raised adjustable open sights; a ventilated barrel shroud; a folding bipod; a rotating carry handle forward of the receiver; a detachable box magazine that inserts horizontally from the left; a dual trigger arrangement where the top part of the trigger fires single shots, and the bottom part of the trigger fires in full automatic; a tubular receiver; a rotating safety collar in front of the butt; and a wooden in-line buttstock. This machine gun could also be seen in the sustained-fire role, on a tripod mount.
- a dedicated 8mm Mauser version was also adopted in 1943, as the 43M, with the same characteristics, but feeding from the straighter box magazine of the German MG13 machine gun.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- most of the parts for this firearm were manufactured by the Steyr Arms factory in Austria and assembled by Waffenfabrik Solothurn AG in Switzerland.
Action	- recoil operated, selective fire.
Serial Number	- serial number is marked on the top of the receiver/frame. - sample imaged has a "D" prefix.
Shots	- detachable box magazine.

- the model is marked on the firearm.
- this is a light machine gun designed in Germany by Rheinmetall, but which was built in Switzerland by the Rheinmetall-owned Solothurn company to evade the Treaty of Versailles restrictions on domestic German manufacture of machine guns.
- this machine gun uses a rotating collar method of locking the breech (designed by Louis Stange) which was later used in the famous MG34 machine gun, arranged inside a lightweight tubular receiver.
- this machine gun is the version of the MG30, adopted by Hungary in 1931, and modified to add a forward rotating carry handle and to allow for a quick barrel change (barrel changes in this machine gun are accomplished by removing the buttstock and removing the operating spring, bolt, and barrel through the rear of the receiver). The MG30 was adopted by several countries in a variety of chamberings, including Switzerland (7.5x55mm), Germany (8mm Mauser), Austria (8x56R) and Hungary (8x56R, many of which were later converted to 8mm Mauser).
- features include: blued finish; cone flash hider/recoil booster; raised adjustable open sights; a ventilated barrel shroud; a folding bipod; a rotating carry handle forward of the receiver; a detachable box magazine that inserts horizontally from the left; a dual trigger arrangement where the top part of the trigger fires single shots, and the bottom part of the trigger fires in full automatic; a tubular receiver; a rotating safety collar in front of the butt; and a wooden in-line buttstock. This machine gun could also be seen in the sustained-fire role, on a tripod mount.
- a dedicated 8mm Mauser version was also adopted in 1943, as the 43M, with the same characteristics, but feeding from the straighter box magazine of the German MG13 machine gun.

Manufacturer

- most of the parts for this firearm were manufactured by the Steyr Arms factory in Austria and assembled by Waffenfabrik Solothurn AG in Switzerland.

Action

- no longer capable of full automatic fire.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number
- serial number is marked on the top of the receiver/frame.
- sample imaged has a "D" prefix.

Shots
- detachable box magazine.

Notes

Make

- these rifles are marketed under the "Shorty" name in North America, in Europe they are marketed under the "Sommer & Ockenfuss" name.

Model

- this is a "bull-pup" design rifle that is operated by manually pumping the pistol grip forward and rearward.
- features include: blued finish, wood "stock" and pistol grip, engraved side plates (different scenes available), grip safety (releasing the grip safety locks the trigger mechanism), and a provision for mounting an optical sight,
- the same basic rifle is offered in Europe as either the "Griffrepetierer Jagd" (as described above) or the "Griffrepetierer Sportgewehr" which features synthetic furniture and stainless steel construction.
- for the North American market the same basic rifle is offered as the "Shorty" rifle in the "Wilderness" (black finish, stainless steel barrel), "American Hunter" (select walnut with coined side plates), "American Hunter Synthetic" (synthetic furniture) or the "Marksmans" (synthetic furniture with fluted barrel and muzzle brake) versions.

Manufacturer

- the firm of Sommer & Ockenfuss is located in Baiersbronn, Germany.

Serial Number

- the serial number appears on the left side of the receiver/frame.

Calibre

- other calibres are available on request.

Shots

- detachable box magazine.

Notes

Make

- "P. SOPER" over "LONDON C.W." or "PHILO SOPER. LONDON. C.W." is marked on the barrel.

Model

- manufactured prior to 1869.
- model designation is not marked on the firearm.
- this is a muzzle loading, percussion ignition, hunting/target rifle.
- features observed: bead front sight and an adjustable rear sight; octagonal barrel with a round section at the muzzle for a bullet starter; ramrod mounted under the barrel; right side lock plate with a percussion hammer; one piece half length stock with straight grip, cheek piece, and a crescent shaped buttplate; brass trigger, trigger guard, patch box, and buttplate.

Manufacturer

- "P. SOPER" over "LONDON C.W." or "PHILO SOPER. LONDON. C.W." is marked on the barrel.
- "C.W." are the initials for Canada West (Upper Canada).
- "C.W." was used prior to Confederation in 1867.
- Philo Soper was a gunmaker located in London, Middlesex, Ontario, Canada from 1850 to 1868.
- Philo Soper was known to have used Remington barrels in his percussion rifles.

Action

- muzzle loader.

Firearm Reference Number (FRN): 120807
Make: Southall
Model: Screw Barrel Pistol

Summary

Make:	Southall
Model:	Screw Barrel Pistol
Manufacturer:	Southall
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
120807 - 1	38 PERCUSSION	1	38	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	
120807 - 2	48 FLINTLOCK	1	65	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "SOUTHALL" was observed marked on the left side of the receiver/frame.

Model

- manufactured prior to 1846.
- model designation is not marked on the firearm.
- model designation is derived from the method by which this pistol is loaded; loading was accomplished by unscrewing the barrel.
- this is a single shot pistol with a removable barrel and an exposed hammer centrally located on the receiver/frame behind the chamber.
- this handgun is intended to be loaded from the breech end of the barrel and as such was originally supplied with a wrench to unscrew the barrel from the receiver/frame in order that a lead ball and loose powder could be inserted into the chamber end of the barrel and then the barrel screwed back onto the receiver/frame.
- features may include: nickel finish; engraving; centrally located hammer or cock; wooden grip.
- British proofmarks are usually apparent on the receiver/frame and/or the barrel of this firearm.

Manufacturer

- "SOUTHALL" and "LONDON" are usually marked on the receiver/frame.
- Southall name was associated with numerous gunmakers located in England from circa 1792 to 1865.

Action

- the barrel unscrews in front of the chamber, so it can be loaded with a ball that fits the barrel more tightly than is possible with a muzzle loader.
- the turnoff barrel may be rifled.

Other Markings

- "LONDON" is marked on the right side of the receiver/frame.

Firearm Reference Number (FRN): 200647
Make: Soviet Arms
Model: SA-V

Summary

Make:	Soviet Arms
Model:	SA-V
Manufacturer:	Palmetto State Armory
Level:	Non-Commercial Customization
Type:	Rifle
Action:	Full Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
200647 - 1	9MM LUGER	30	267	Prohibited CC 84(1) "prohibited firearm" para. (c)	Non-Commercial Customization	

Notes

Make

- The company logo is marked on the firearm.
- The "Soviet Arms" logo consists of a palm tree and a pair of crossed cannons inside a triangle.
- Trade name used by Palmetto State Armory.
- "SOVIET ARMS" is marked on the left side of the receiver/frame.
- "Soviet Arms" is a subsidiary of Palmetto State Armory that produces AK-pattern firearms and ammunition.

Model

- Based on the "AK-47" design.
- "SA-V" is marked on the underside of the receiver/frame.
- This is a "SA-V" with a full automatic trigger group and selector switch installed.
- The "Soviet Arms SA-V" is a circa 2023 rebrand of the "Palmetto State Armory AK-V", a semi-automatic rifle based on the Russian submachine gun "PP-19-01 Vityaz".
- The "Soviet Arms SA-V" is available as a complete firearm, without a buttstock, or as a barreled action without a buttstock, grip, handguard and magazine from the manufacturer.
- Features include: winged front sight; hinged dust cover with top accessory rail; stamped receiver/frame; right side reciprocating charging handle; magazine release paddle in front of the trigger guard.
- Features may include: Various muzzle brakes; synthetic or alloy forend and upper handguard with or without accessory rail; fixed, telescoping, or side folding buttstock.

Manufacturer

- "Soviet Arms" is a subsidiary of Palmetto State Armory that produces AK-pattern firearms and ammunition.

Action

- Blowback operated.

Serial Number

- The serial number is marked on the underside of the receiver/frame.
- The serial number consists of a letter followed by six digits.
- The last four digits of the serial number is repeated on other parts and components.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel	- The barrel length does not include any attached device such as flash-hider or muzzle brake.
Calibre	- The calibre designation is marked on the underside of the receiver/frame.
Shots	- Detachable box magazine. - Designed to accept "CZ Scorpion EVO 3" type magazines.
Other Markings	- "S", "A", and "F" selector markings are marked on the right side of the receiver/frame.

Notes

Make	- "SNOWPEAK" is marked on the left side of the receiver/frame.
Model	- "MODEL:AP1000B" is marked on the left side of the receiver/frame. - Features include: imitation carbon fiber barrel contour/shroud; side cocking lever located on the right side of the receiver/frame; safety selector switch located on the left side of the receiver/frame. - Overall length with a 500 mm (19.7 inches) barrel is 725 mm (28.5 inches) with the stock collapsed.
Manufacturer	- "SNOWPEAK" is marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- Pre charged pneumatic. - Referenced maximum velocity in 177 PELLET is 1000 fps (305 m/s). - Referenced maximum velocity in 22 PELLET is 950 fps (290 m/s). - Referenced maximum velocity in 25 PELLET is 850 fps (259 m/s).
Serial Number	- The serial number is marked on the left side of the receiver/frame. - The serial number of referenced example consists of sixteen digits.
Barrel	- The barrel length does not include any attached device such as flash-hider or muzzle brake.
Calibre	- The calibre designation is marked on the left side of the receiver/frame.
Shots	- Detachable rotary disc magazine.
Canadian Law Comments	- Discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules. - This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

Firearm Reference Number (FRN): 200290
Make: SPA
Model: B1-4P

Summary

Make:	SPA
Model:	B1-4P
Manufacturer:	Snow Peak Air (SPA)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	CHINA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
200290 - 1	177 PELLET	1	420	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
200290 - 2	22 PELLET	1	420	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "SNOWPEAK" is marked on top of the receiver/frame.
Model	- "B1-4P" is marked on top of the receiver/frame. - Features include: barrel break at the end of the fore end grip; cocking aide at the muzzle end. - Overall length with a 420 mm (16.5 inches) barrel is 990 mm (39 inches).
Manufacturer	- "SNOWPEAK" is marked on top of the receiver/frame.
Action	- Break open action.
Serial Number	- The serial number is marked on the left side of the receiver/frame. - The serial number of a referenced example consisted of sixteen digits followed by followed by one letter.
Calibre	- The calibre designation is marked on the top of the receiver/frame. - "4.5MM" or "5.5MM" may be marked on top of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- At least two variants of this particular model exist:
Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

191105 - 4	22 PELLET	7	450	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SPA" is marked on the left side of the receiver/frame.
- "SPA" means Snow Peak Airguns.

Model

- "MODEL CR600W" is marked on the left side of the receiver/frame.
- "CR600W" is originally equipped from the factory with an integral silencer system.
- features include: ramped front sight; grooved receiver/frame for optic mounting; a suppressor mounted on the barrel; manual safety; adjustable trigger; wood stock with cheek rest area and rubber recoil pad; matte black finish.
- overall length 950 mm (37.4"), and the average weight is 2.1 kgs (4.63 lbs).
- also regular barrel with ramped front sight is available.

Manufacturer

- "SPA" is marked on the left side of the receiver/frame.
- "SPA" means Snow Peak Airguns.
- Snow Peak Airguns is located in China.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- CO2 powered airgun. - at least two variants of this particular model exist: Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.
Serial Number	- serial number is marked on the left side of the receiver/frame. - serial number of a referenced example consisted of sixteen numbers and a letter suffix "F".
Shots	- detachable rotary magazine.
Canadian Law Comments	- this firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. - if the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

Firearm Reference Number (FRN): 146444
Make: Spang & Wallace
Model: Single Barrel Percussion

Summary

Make:	Spang & Wallace
Model:	Single Barrel Percussion
Manufacturer:	Spang & Wallace
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
146444 - 1	1" PERCUSSION	1	1257	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SPANG & WALLACE" is marked on the barrel and/or lockplate.

Model

- manufactured prior to 1857.
- model is not marked on the firearm.
- this is a large percussion single-shot shotgun of the type known as a "punt gun", used for market hunting.
- features include: blued or browned finish; round barrel with under-barrel ramrod; long, thin walnut stock with straight-grip stock; lockplate marked "SPANG & WALLACE"; and possibly precious metal inlays.

Manufacturer

- Spang & Wallace was located in Philadelphia, Pennsylvania, U.S.A. from 1830 to 1856.
- Spang & Wallace was the partnership between Samuel T. Spang and Wallace.
- Spang & Wallace manufactured flintlock and percussion firearms.

Action

- muzzle-loading.

Canadian Law Comments

- Some examples of this model, when manufactured prior to 1898 may be considered Antique in Canada.

FRT Report

Firearm Reference Number (FRN): 124832
Make: Spanish Machine Gun
Model: FAO

Summary

Make:	Spanish Machine Gun
Model:	FAO
Manufacturer:	Fabrica de Armas, Oviedo
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
124832 - 1	8MM MAUSER	20	600	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- adopted into Spanish service as a result of the Spanish civil war. Spain had obtained large quantities of foreign small arms, including the Czechoslovakian model ZB26 machine gun which they subsequently produced in Spain as the model FAO (presumably because this model was produced by Fabrica de Armas, Oviedo).

Model

- on the sample examined the model designation was marked on the top of the receiver/frame. This model is a Spanish built copy of the Czechoslovakian model ZB26 light machine gun. Further developments led to this model being modified to use a belt feed mechanism and chambered in calibre 7.62MM NATO, as such it was re-designated as the FAO model 59.
- features include: blued finish; wood buttstock and pistol grip; quick change barrel feature, barrel is ribbed for cooling and has a carry handle; charging handle mounted on the right side; as this model feeds from a top mounted magazine the sights are offset to the left side of the receiver/frame and barrel; folding bi-pod.

Manufacturer

- the manufacturer's name was marked on the top of the receiver/frame on the example examined.

Action

- gas operated, cyclic rate of approximately 550 r.p.m.

Serial Number

- the sample examined used sequential numbers marked on the top of the receive/frame.
- the sample examined was also marked with the year of production below the serial number (example: 1956) which should not be confused with the serial number.

Shots

- top mounted, detachable box magazine.

FRT Report

Firearm Reference Number (FRN): 119082
Make: Spanish Machine Gun
Model: MG42/59

Summary

Make:	Spanish Machine Gun
Model:	MG42/59
Manufacturer:	Santa Barbara
Level:	Converted Automatics
Type:	Machine Gun
Action:	Converted Automatic
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
119082 - 1	7.62MM NATO	N/A	531	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- make will not be found marked on the firearm.

Model

- rear left side of the receiver/frame is usually marked with the serial number, date of manufacture and the manufacturer's trademark.
- this firearm is the post WW II version of the original MG 42 designed and produced specifically for the 7.62MM Nato cartridge.
- this firearm accepts both the US M-13 disintegrating link and the German DM1 disintegrating link belts.
- this is a fully automatic, air-cooled, belt fed medium or general purpose machine gun utilizing a short recoil type of action which is gas-assisted by means of a recoil booster located within the flash hider; the bolt is of the roller locking type.
- features include:
- full automatic fire only, cyclic rate at 900 rds/min.
- barrel is chrome plated.
- metal stamping type of construction,
- bolt weight - 950 g
- quick-change barrel system,
- easily removeable bi-pod.
- NOTE: this firearm will accept differing masses of bolt and different buffers from other models of the MG1. When the 550 g bolt is installed this machine gun will fire at a cyclic rate of 1000 to 1100 shots per minute.

Manufacturer

- "E N SANTA BARBARA" and "SPAIN", "SBT", "STA. BARBARA - SPAIN", and "STA.BARBARA IND-SPAIN" are some of the markings observed on firearms manufactured by Empresa Nacional Santa Barbara De Industrias Militares, S.A. .
- "Santa Barbara" trademark logo is a "gear wheel with the letters S and B within the gear wheel separated by a vertical sword".
- Empresa Nacional Santa Barbara De Industrias Militares, S.A. was found after the Spanish Civil War of 1939.
- Empresa Nacional Santa Barbara De Industrias Militares, S.A. headquarters was located in Madrid, Spain.
- Empresa Nacional Santa Barbara De Industrias Militares, S.A. manufactured firearms in facilities located in Coruna (A Coruna or La Coruna), and Oviedo, Spain.
- Empresa Nacional Santa Barbara De Industrias Militares, S.A. was aquired by General Dynamics in 2001.
- Empresa Nacional Santa Barbara De Industrias Militares, S.A. was renamed Santa Barbara Sistemas S.A.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Type	- air-cooled medium machine gun.
Action	- no longer capable of full automatic fire.
Serial Number	- serial number usually located on the rear left side of the receiver/frame.
Barrel	- barrel length without the barrel extension is 531 mm. - barrel length with the barrel extension is 565 mm.
Calibre	- calibre designation is marked on the rear left side of the receiver/frame as: 7.62.
Shots	- this firearm accepts both the US M-13 disintegrating link and the German DM1 disintegrating link belts. - belt fed machinegun, will not accept the 50 cartridge belt carrier or the 75 round saddle magazine without extensive modification.
Canadian Law Comments	- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted". - For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".
Remarks	- in Yugoslavian service, manufactured at ZASTAVA, the MG42 was named "SARAC" or "M53". - the Italians manufactured this machine gun model (calibre 7.62 x 51 mm NATO) under the designation "MG42/59". - in 1957, the West Germans Government recommenced manufacture of this firearm in various calibres as the "MG1", "MG1A1", and later, the "MG3" & MG3e.

Firearm Reference Number (FRN): 119083
Make: Spanish Machine Gun
Model: MG42/59

Summary

Make:	Spanish Machine Gun
Model:	MG42/59
Manufacturer:	Santa Barbara
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
119083 - 1	7.62MM NATO	N/A	531	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make will not be found marked on the firearm.

Model

- rear left side of the receiver/frame is usually marked with the serial number, date of manufacture and the manufacturer's trademark.
- this firearm is the post WW II version of the original MG 42 designed and produced specifically for the 7.62MM NATO cartridge.
- this firearm accepts both the US M-13 disintegrating link and the German DM1 disintegrating link belts.
- this is a fully automatic, air-cooled, belt fed medium or general purpose machine gun utilizing a short recoil type of action which is gas-assisted by means of a recoil booster located within the flash hider; the bolt is of the roller locking type.
- features include:
- full automatic fire only, cyclic rate at 900 rds/min.
- barrel is chrome plated.
- metal stamping type of construction,
- bolt weight - 950 g
- quick-change barrel system,
- easily removeable bi-pod.
- NOTE: this firearm will accept differing masses of bolt and different buffers from other models of the MG1. When the 550 g bolt is installed this machine gun will fire at a cyclic rate of 1000 to 1100 shots per minute.

Manufacturer

- "E N SANTA BARBARA" and "SPAIN", "SBT", "STA. BARBARA - SPAIN", and "STA.BARBARA IND-SPAIN" are some of the markings observed on firearms manufactured by Empresa Nacional Santa Barbara De Industrias Militares, S.A. .
- "Santa Barbara" trademark logo is a "gear wheel with the letters S and B within the gear wheel separated by a vertical sword".
- Empresa Nacional Santa Barbara De Industrias Militares, S.A. was found after the Spanish Civil War of 1939.
- Empresa Nacional Santa Barbara De Industrias Militares, S.A. headquarters was located in Madrid, Spain.
- Empresa Nacional Santa Barbara De Industrias Militares, S.A. manufactured firearms in facilities located in Coruna (A Coruna or La Coruna), and Oviedo, Spain.
- Empresa Nacional Santa Barbara De Industrias Militares, S.A. was aquired by General Dynamics in 2001.
- Empresa Nacional Santa Barbara De Industrias Militares, S.A. was renamed Santa Barbara Sistemas S.A.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Type	- air-cooled medium machine gun.
Action	- short recoil operated, with a gas assist by means of a muzzle booster.
Serial Number	- serial number usually located on the rear left side of the receiver/frame.
Barrel	- barrel length without the barrel extension is 531 mm. - barrel length with the barrel extension is 565 mm.
Calibre	- calibre designation is marked on the rear left side of the receiver/frame as: 7.62.
Shots	- this firearm accepts both the US M-13 disintegrating link and the German DM1 disintegrating link belts. - belt fed machinegun, will not accept the 50 cartridge belt carrier or the 75 round saddle magazine without extensive modification.
Canadian Law Comments	- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted". - For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".
Remarks	- in Yugoslavian service, manufactured at ZASTAVA, the MG42 was named "SARAC" or "M53". - the Italians manufactured this machine gun model (calibre 7.62 x 51 mm NATO) under the designation "MG42/59". - in 1957, the West Germans Government recommenced manufacture of this firearm in various calibres as the "MG1", "MG1A1", and later, the "MG3" & MG3e.

185182 - 1	TASER AIR CARTRIDGE	1	53	Prohibited PFR, Part 1, para. 1	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SPARK" is marked on the side of the firearm.
- "Spark" is a trade name used by Condor Non-Lethal Technologies.

Model

- "SPARK" is marked on the side of the firearm.
- resembles a semi-automatic handgun.
- uses a "Shaped Pulse" technology, where a first electric arc penetrates the cloth and the skin barrier followed by a second arc which flows across the first arc and delivers a severe electric current incapacitating the subject by overriding his/her central nervous system.
- features include: fixed sights; polymer receiver/frame with accessory rail; ambidextrous safety; light on the buttom; LED screen with WiFi connexion; battery located in the grip; orange/black finish.
- overall length 194mm (7 5/8"), weight 475gr (16.75 oz).

Manufacturer

- "CONDOR" is molded in the grip.
- Condor Non-Lethal Technology was created in 1985 in Rio de Janeiro, Brazil.

Action

- uses a "Shaped Pulse" technology, where a first electric arc penetrates the cloth and the skin barrier followed by a second arc which flows across the first arc and delivers a severe electric current incapacitating the subject by overriding his/her central nervous system.

Serial Number

- serial number is marked on the top of the firearm and on the microchip.
- serial number of a referenced example consisted of two letter prefix "SS" and seven numbers.

Barrel

- barrel length is determined by measuring the overall length of the cartridge.

Notes

Make

- usually marked on the firearm as "Spartan Gunworks by Remington".
- Spartan Gunworks was formed by Remington to offer consumers an economically priced line of break action shotguns. An agreement was reached with the owners of the Baikal line of firearms being produced in Russia to import and market single shot, over/under and side by side models under the Spartan Gunworks trade name.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- introduced in 2004.
- "SPR100" may be marked on the firearm.
- when the SRR100 was first introduced features included: blued finish on metal; plain hardwood pistol grip buttstock and forend; hammerless; cross-bolt safety; selectable ejector or extractor; plain barrel with a bead sight; fixed choke (Modified on 12 and 20 GA and Improved Modified on 410 GA); plastic butt plate; cocking indicator; opening lever is found at the rear of the trigger guard.
- additional features for 2005 include: a ventilated rib; nickel-plated receiver/frame; walnut forearm and pistol grip stock fitted with a recoil pad.
- also available in a "Youth" configuration with a shorter length of pull and a rubber recoil pad in calibre 410 GA X 3" and also available is the "Youth" configuration including a ventilated rib referred to as the model SPR100 Max.
- - in 2005 Remington introduced the model "SPR100 Sporting", this model variation features a ported barrel with a ventilated rib, interchangeable choke tubes and twin bead sights, a Monte Carlo style buttstock and a unique "clay target" engraving motif.

Manufacturer

- made in Russian under the Baikal trade name. Baikal is a trade name used by Izhevsky Mekhanichesky Zavod (Izhmech) of Russia that produces sporting firearms for domestic use and foreign export sales.

Action

- hinged, break open design.

Serial Number

- serial number rationalization unknown, marked on the receiver/frame and underside of the barrel.

FRT Report

Firearm Reference Number (FRN): 123391
Make: Spartan Gunworks
Model: SPR210 Cowboy

Summary

Make:	Spartan Gunworks
Model:	SPR210 Cowboy
Manufacturer:	Izhevsky Mekhanichesky Zavod (Izhmech)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Multi-Barrel
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
123391 - 1	12 GA X 2 3/4"	2	508	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
123391 - 2	20 GA X 3"	2	508	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Spartan Gunworks by Remington" will be marked on the firearm.
- Spartan Gunworks was formed by Remington to offer consumers an economically priced line of break action shotguns. An agreement was reached with the owners of the Baikal line of firearms being produced in Russia to import and market single shot, over/under and side by side models under the Spartan Gunworks trade name.

Model

- introduced in 2005.
- "SPR210" or "COWBOY" may be marked on the right side of the receiver/frame.
- features include: blued side by side barrels with a solid centre rib, interchangeable SC-4 chokes and a front bead sight; blued or nickel plated, front hinged box lock receiver/frame; hammerless; a break opening lever and a thumb safety are mounted on the upper rear tang; gold plated single selective trigger mechanism; automatic selective ejectors; checkered walnut forearm and pistol grip stock fitted with a rubber recoil pad.
- overall length for a 12 GA X 2 3/4" with a 508MM (20") barrel is 908MM (35 3/4"), average weight is 2.84kg (6.25lbs).
- this model variation was designed and intended for the "cowboy action shooting" competitions.
- similar to the model SPR210 which is available with longer barrels and internal hammers.
- similar to the model SPR220 which is also available with longer barrels and double triggers.
- similar to the model SPR220 Cowboy which is available with double triggers and side locks with external hammers.

Manufacturer

- made in Russia under the Baikal trade name. Baikal is a trade name used by Izhevsky Mekhanichesky Zavod (Izhmech) of Russia that produces sporting firearms for domestic use and foreign export sales.

Action

- side by side configuration.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number - the serial number is marked on the receiver/frame, rationalization unknown.

Notes

Make

- usually marked on the firearm as "Spartan Gunworks by Remington".
- Spartan Gunworks was formed by Remington to offer consumers an economically priced line of break action shotguns. An agreement was reached with the owners of the Baikal line of firearms being produced in Russia to import and market single shot, over/under and side by side models under the Spartan Gunworks trade name.

Model

- "SPR-94" is marked on right side of the receiver/frame.
- introduced in 2005 and based on the SPR100 design.
- features include: over and under combination shotgun over rim fire barrel; blued finish; folding rear sight; post front sight; single trigger; barrel selector on tang; cross bolt safety; opening lever is found at the rear of the trigger guard; scope rail; plain pistol grip stock and forend.
- also available in a centrefire rifle barrel over a shotgun barrel as the "SPR94 Centrefire".

Manufacturer

- made in Russian under the Baikal trade name. Baikal is a trade name used by Izhevsky Mekhanichesky Zavod (Izhmech) of Russia that produces sporting firearms for domestic use and foreign export sales.

Action

- over and under configuration.

Serial Number

- marked on the receiver/frame.

Notes

Make

- "Special Ops Tactical" is marked on left side of the receiver/frame.
- "Special Ops Tactical" is located in Apopka, Florida U.S.A. .

Model

- "SO15" is marked on left side of the receiver/frame.
- "SO15" variants are based on the Colt AR-15/M16 design.
- "SO15" is also sold as a receiver/frame.
- "SO15" selector has pictograph of rounds or words showing safe/fire and full automatic position that is not representative of the receiver/frame function.
- features include: threaded muzzle for flash hider/muzzle brake; standard or grooved, M4 carbine contoured barrel; standard, low profile or Picatinny rail front sight bracket/gas block; Picatinny rail, free floating or standard synthetic handguard; A2 fixed carrying handle or A3 Picatinny rail flat top upper assembly; may have a detachable carrying handle with adjustable rear sight; standard rifle or collapsible buttstock; synthetic pistol grip; matte black finish or color finish.

Manufacturer

- "Special Ops Tactical" is marked on left side of the receiver/frame.
- "Special Ops Tactical" is located in Apopka, Florida U.S.A. .

Action

- gas operated.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- serial number of a referenced example consisted of a two letter prefix (SO) and five numbers.

Calibre

- "CAL. MULTI" is marked on the left side of the receiver/frame.
- calibre identification is usually marked on the barrel.

Shots

- detachable box magazine.
- uses all magazines available for AR15/M16 type rifles.

Notes

Make

- "Specter Arms" is not marked on the firearm.

Model

- introduced in 2011.
- "S2A2 Stinger" is not marked on the firearm.
- "S2 Stinger" is a custom 10/22 type modular receiver/frame mounted inside an aluminum chassis.
- "S2 Stinger" is available in two configurations:
- S2A1 Stinger has the cocking handle mounted on the right side.
- S2A2 Stinger has the cocking handle mounted on the left side of the forearm.
- features include: no iron sights; full length aluminum Picatinny rail for mounting sights; round free floating rifled barrel with a threaded muzzle for a flash hider, muzzle brake or sound suppressor and a removable barrel shroud; solid top aluminum receiver/frame with right side ejection; 10/22 type action; 10/22 type bolt and trigger group; cross bolt safety on the front of the trigger guard; magazine release lever located behind the magazine well; black round ribbed synthetic mid-length handguard; checkered synthetic AR-15 type pistol grip; HK type removable wire or synthetic buttstock or an AR15 type adjustable buttstock.
- overall length with a 310 mm barrel and the adjustable AR-15 type stock in the closed position is 770 mm.
- overall length with a 310 mm barrel and the fixed synthetic stock is 750 mm.
- overall length with a 310 mm barrel and the fixed metal stock is 795 mm.
- average weight is 3.0 kgs.

Manufacturer

- Specter Arms is located in Edmonton, Alberta, Canada.
- Specter Arms is owned by Chris Megyesi.

Action

- blowback operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number - serial number is marked on the right side of the inner receiver/frame.

Shots - detachable box magazine.

Notes

Make

- "C.M. SPENCER", "HARTFORD, CT." and PATd MAR. 6. 1860" or "SPENCER REPEATING", "RIFLE. Co. BOSTON, MASS." and "PAT'D. MARCH 6, 1860" may be marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- this was one of the first truly practical repeating long arms designed to use metallic cartridges, and has an important place in history as being one of the most widely used and effective firearms during the US Civil War. - magazine fed (through a tube in the center of the buttstock), with an unmistakably shaped lever and receiver/frame (the lever forms a large trigger-guard, and pivots around a pin in the bottom of a very large "hump" at the bottom of the receiver/frame), blade type extractor on left side of chamber, and a hammer mounted on a side plate on the right side. - straight grip walnut stock with slightly curved buttplate, and either a short forearm with one barrel band (carbine), or a full length forearm with two or three barrel bands (Army/Navy/Sporting rifle, or post war altered example). - the Model 1860 was made in both full size rifle variations (for both the Army and Navy; Navy variants have an under barrel lug for mounting a sword bayonet) and in carbine variations, for cavalry and infantry use; - all were marked "Spencer Repeating Rifle Co. Boston Mass. Pat'd March 6,1860" on the top of the receiver/frame. (Later variants will add barrel markings, such as "NM"-"New Model" or "M 1865", just forward of the receiver/frame). - carbine variants will most often have a sliding ring upon a bar mounted on the left side, for use as a sling attachment point. - these rifles were all originally chambered for the 56-56 Spencer rimfire cartridge (.52" bore), but many were later converted by Springfield Armory to 56-52 or 56-50 Spencer rimfire cartridge (.50" bore), by sleeving the barrel for the smaller diameter bullet. - additionally, many of these rifles and carbines were modified with a "Stabler magazine cut off", a small rotating block in front of the trigger that, when applied, would prevent the user from opening the action of the rifle far enough to admit a new cartridge from the magazine.
Manufacturer	- Spencer Repeating Rifle Company was founded in Boston, Massachusetts by Christopher M. Spencer in 1861, to manufacture repeating rifles for the Union forces during the Civil War. - Spencer Repeating Rifle Company manufactured carbines and full length rifles (both military issue and sporting variations) up until 1869.
Serial Number	- numbered on receiver/frame.
Shots	- tubular magazine in butt.

Notes

Make

- "SPENCER REPEATING RIFLE", "PAT'D MARCH 6. 1860", "MANUF'D AT PROV. R.I.", and "BY BURNSIDE RIFLE CO." or "SPENCER REPEATING", "RIFLE. Co. BOSTON, MASS.", "PAT'D. MARCH 6, 1860", "MANUFACTURED AT PROV., R.I." and "BY BURNSIDE RIFLE CO." may be marked on the receiver/frame.

Model

- "MODEL 1865" is marked on the top of the chamber end of the barrel.
- subcontract model made for the Spencer Repeating Rifle Company, approximately 34,000 made of which 30,502 were purchased by the U.S government.
- this model, as made by the Burnside Rifle company is recognizable by its three groove rifling, compared to six groove rifling for the Spencer produced version.
- approximately 19,000 of these are fitted with the stabler cut off (a small swivel device forward of the trigger that allows use as a single shot).

Manufacturer

-- "MANUFACTURED AT PROV., R.I." and "BY BURNSIDE RIFLE CO." may be marked on the receiver/frame.
- manufactured circa 1865.
- also produced by "Spencer Repeating Rifle Company".

Serial Number

- range: 1 to 34,000.
- located top of receiver, and on left side of barrel.

Model

- manufactured circa 1865-1866.
- this was the second generation of one of the first truly practical repeating long-arms designed to use metallic cartridges, and has an important place in history as being one of the most widely used and effective firearms during the US Civil War.
- magazine-fed (through a tube in the center of the buttstock), with an unmistakeably shaped lever and receiver (the lever forms a large trigger-guard, and pivots around a pin in the bottom of a very large "hump" at the bottom of the receiver), blade-type extractor on left side of chamber, and a hammer mounted on a side-plate on the right side
- straight-grip walnut stock with slightly curved buttplate, used either a short forearm with one barrel band (carbine), or a full-length forearm with two or three barrel bands (Army/Navy/Sporting rifle, or post-war altered example)
- the Model 1865 was made in both rifle and carbine variations; all were marked "Spencer Repeating Rifle Co. Boston Mass. Pat'd March 6,1860" on the top of the receiver along with "M 1865" stamped on top of the barrel, just forward of the receiver.
- carbines will most often have a sliding ring upon a bar mounted on the left side, for use as a sling attachment point.
- unlike earlier Spencers with a .52" bore, these carbines were manufactured with the intention of firing .50" calibre projectiles to begin with; therefore, they are all chambered in 56-52 SPENCER RFor 56-50 SPENCER RF.
- additionally, many of these rifles and carbines were modified with a "Stabler magazine cut-off", a small rotating block in front of the trigger that, when applied, would prevent the user from opening the action of the rifle far enough to admit a new cartridge from the magazine.

Manufacturer

- Spencer Repeating Rifle Company was founded in Boston, Massachusetts by Christopher M. Spencer in 1861, to manufacture repeating rifles for the Union forces during the Civil War.
- Spencer Repeating Rifle Company manufactured carbines and full length rifles (both military issue and sporting variations) up until 1869.
- "Burnside Rifle Company" also produced this model.

Serial Number

- numbered on receiver.

Model:	1865 Springfield Armory Rifle Musket Conversion
Manufacturer:	Burnside Rifle Company
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Lever Action
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
131807 - 1	56-50 SPENCER RF	7	826	Antique AFR, Section 1, para. 2	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SPENCER REPEATING RIFLE" over "PAT'D. MARCH 6, 1860" will be marked on the top of the receiver/frame.
- due to the fact that this model series was a conversion of the Spencer carbine manufactured under license by the Burnside Rifle Company, the top of the receiver/frame will be marked as above with the following underneath, "MANUFACTURED AT PROV., R.I." over "BY BURNSIDE RIFLE CO."
- original markings may be very faint due to the refinishing process.

Model

- "MODEL" over "1865" is marked on the front top of the receiver/frame.
- this conversion of the Spencer carbine to rifle musket configuration was undertaken by the Springfield Armory Government Arsenal circa 1871 to1874.
- a total of 1109 carbines were converted.
- the conversion process consisted of the following; replacing the carbine barrel with a new, blued, 3 groove, 32-1/2" / 826mm barrel; addition of a 26"/ 660mm iron cleaning rod; buttstocks were refinished or replaced; new forends were supplied with two barrel bands; metal gun parts were repaired and refinished or replaced; each piece was fitted with a Springfield angular bayonet with socket attachment; addition of the Stabler Patent magazine cutoff if not already present; each rifle retained the original carbine sling ring and bar attachment on the left side of the receiver/frame.
- the left side of the buttstock of these rifle muskets will usually bear "ESA" inspector markings in an oval cartouche.
- standard features; under-lever operated, repeating firearm utilizing a tubular magazine fed through the buttstock; side lock, back action with exposed hammer on right side of the receiver/frame; sling ring and bar attachment on left side of the receiver/frame.

Manufacturer

- the manufacturer's name is marked on the top of the receiver/frame as, "MANUFACTURED AT PROV., R.I." over "BY BURNSIDE RIFLE CO.".
- the reworking/conversion of the original Spencer carbines produced by Burnside was carried out by the Government Arsenal of Springfield Armory; the Springfield Armory name does not appear on these firearms.

Action

- under-lever operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number will be marked on the top of the receiver/frame. - the serial numbers for the original Burnside Rifle Company carbines were retained for this conversion model; the serial number range for the Burnside produced carbines was from 1 to 34,500 without prefix or suffix.
Barrel	- the conversion process for this model series installed a new 32-1/2" / 826mm barrel.
Shots	- tubular magazine fed through the buttstock.

Notes

Make

- "SPENCER RPTG. SHOT GUN PAT. APL. 1882." is marked on the barrel.
- Spencer Repeating Shotgun manufactured by Spencer Arms Company and distributed by the SpenceSpencer Sporting Arms Company was acquired by Francis Bannerman in 1890.
- Francis Bannerman manufactured the Spencer Repeating Shotgun model 1890, model 1894, model 1896, and model 1900.

Model

- "MODEL 1890" is marked on the left side of the receiver/frame.
- manufactured between 1890 and 1893.
- originally manufatured by the Spencer Arms Co. when they went bankrupt they sold the rights to Bannerman. It is believed that bannerman contracted out the actual manufacture of this shotgun.

Manufacturer

- "F. BANNERMAN MNFR. NEW YORK. USA." or "F. BANNERMAN MANUFACTURER. NEW YORK. USA." may be marked on the left side of the receiver/frame.
- Bannerman was in business from 1851 to 1918.
- Bannerman was located in Brooklyn & New York City, New York, U.S.A.

Serial Number

- the serial number is marked on the bottom of the barrel near the receiver/frame and on the right side of the action arm.
- serial number range from 3,000 to approximately 12,000.

Other Markings

- top of barrel marked "RPTG SHOTGUN PAT. APL. 1882"
- left side of action marked "F. BANNERMAN MNFR. NEW YORK. USA. MODEL 1890"

Notes

Make

- "Spencer Safety Hammerless" is marked on the barrel.
- "Spencer" is a trade name manufactured by Otis A. Smith.

Model

- this is an unusual iron-framed double-action-only revolver made under patents issued to John T. Smith of Rockfall, Connecticut.
- "Spencer Safety Hammerless" and "MODEL 1892" are marked on the barrel.
- one-piece frame and barrel made entirely of iron, with a fluted steel cylinder, nickel-plated finish, loading groove on the right side of the frame, and a cylinder stop/catch mounted in the top-strap that can be depressed to free the cylinder for loading and unloading.
- these revolvers were built for various distributors by Otis A. Smith, of Rockfall, Connecticut, but most often bear no manufacturers' marks.
- a small-framed 22-calibre version of this revolver, known as the model 1894, was also built using the same patents.

Manufacturer

- manufacturer's name is not marked on the revolver.

Serial Number

- numbered on bottom of grip.

Notes

Make

- "SPENCER REPEATING", "RIFLE. Co. BOSTON, MASS." and "PAT'D. MARCH 6, 1860" may be marked on the receiver/frame.

Model

- "N W" is usually marked on the barrel just behind the rear sight.
- in cases where M1865 or M1867 barrels were used, a letter "N" was aded to change the designation to "NM1865" or "NM1867"
- this is a post-Civil War production version of the original Spencer rifle
- magazine-fed (through a tube in the center of the buttstock), with an unmistakeably-shaped lever and receiver (the lever forms a large trigger-guard, and pivots around a pin in the bottom of a very large "hump" at the bottom of the receiver), blade-type extractor on left side of chamber, and a hammer mounted on a side-plate on the right side
- straight-grip walnut stock with slightly-curved buttplate, and either a short forearm with one barrel band (carbine), or a full-length forearm with two or three barrel bands (Army/Navy/Sporting rifle)
- this rifle was made in both full-size rifle variations (for both the Army and Navy; Navy variants have an under-barrel lug for mounting a sword bayonet) and in carbine variations, for cavalry and infantry use; all were marked "Spencer Repeating Rifle Co. Boston Mass. Pat'd March 6,1860" on the top of the receiver, and "NM 1865" or "NM 1867" on the top of the barrel, just forward of the receiver.)
- carbine variants will most often have a sliding ring upon a bar mounted on the left side, for use as a sling attachment point.
- additionally, many of these rifles and carbines were modified with Spencer's "Patent Magazine Cut-off", a pivoting cartridge guide at the top of the breechblock, which, when applied, would prevent the user from opening the action of the rifle far enough to admit a new cartridge from the magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- Spencer Repeating Rifle Company was founded in Boston, Massachusetts by Christopher M. Spencer in 1861, to manufacture repeating rifles for the Union forces during the Civil War. - Spencer Repeating Rifle Company manufactured carbines and full length rifles (both military issue and sporting variations) up until 1869.

Notes

Make

- "H. Spencer & Co." or "Spencer & Co." may be marked on the receiver/frame.
- "H. Spencer & Co" or "Spencer & Co." is not to be confused with the American gunmaker, Christopher Spencer.
- "H. Spencer & Co." or "Spencer & Co." tradename was used on firearms manufactured or imported by Crescent Firearms Company and distributed by Hibbard, Bartlett & Spencer Co/Hibbard, Spencer, Bartlett Company (HIB SPE BAR), Illinois.
- "Crescent Firearms Company" was a manufacturer and an importer/distributor of firearms from Europe.
- "Spencer & Co." with a patent date of May 12, 1891 on a hammerless double barrel shotgun was manufactured by Torkalson Arms Company of Worcester and Warren, Massachusetts, U.S.A.
- manufacturer's name is not usually marked on the firearm.
- "H. Spencer & Co." or "Spencer & Co." firearms may have Belgian proof marks.
- "The Interchangeable" or "Interchangeable" was a model designation on shotguns manufactured in Belgium by "A. Francotte & Co.", "Neumann Freres", "Dumoulin & Co." and "Simonis, Janssen & Dumoulin".

Model

- "Interchangeable" or "The Interchangeable" is marked on the firearm.
- features include: round side by side barrel with a bead front sight; front hinged receiver/frame with a top tang mounted break open action release lever; sidelock action; exposed side hammers; double triggers; checkered wood forearm and a semi-pistol grip buttstock.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- side by side barrel configuration.
Serial Number	- one sample examined had sequential numbers marked on the water table, the serial number was repeated on the underside of the barrel assembly.

53036 - 3	12 GA X 2 5/8"	5	812	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SPENCER ARMS CO." and/or "SPENCER ARMS CO. WINDSOR. CT. U.S.A. PAT. APR. 1882." may be marked on the barrel.

Model

- "PAT. APR. 1882." may be marked on the barrel or receiver/frame.
- this was a very unusual-appearing pump-action shotgun designed by Christopher Spencer, the designer of the Spencer rifle
- these shotguns were produced in various grades of finish, engraving, wood quality, etc., but all were made with Damascus or laminated barrels
- these shotguns have an extractor mounted on the action bar, what appear to be two triggers within the trigger-guard (the front "trigger" is actually an action-release), and a breech-block that also performs as a shell-lifter, to transfer shells from the magazine tube up to the chamber for firing.
- as the action is worked, the breech-block/shell-lifter pivots up and down through the receiver.
- these shotguns were made in three distinct models (the 1884, the 1886, and the 1887), with only minor differences separating the three; some of the 1887 shotguns were produced in take-down variations
- after Spencer Sporting Arms ceased production, Francis Bannerman & Sons of New York City began manufacturing this same basic design in four distinct models; the 1890, the 1894, the 1896, and the 1900. All of these shotguns will be clearly marked on the receiver as having been made by Bannerman.

Manufacturer

- "Spencer Arms Co.Windsor, CT. U.S.A." is usually marked on the barrel.
- Spencer Sporting Arms Company was a manufacturer founded by Christopher Spencer, a prolific arms designer, to produce repeating shotguns from 1883 to 1889; in 1890, the company went bankrupt and the rights to produce Spencer's Repeating Shotguns were signed over to Francis Bannerman & Sons, of New York City.

Serial Number

- the serial number is marked on the bottom of the barrel near the receiver/frame and on the right side of the action arm.

Barrel

- barrels could be special-ordered in lengths as short as 20"/508mm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- tube magazine.
Other Markings	- top of barrel marked "RPTG SHOTGUN PAT. APL. 1882" - left side of action marked "F. BANNERMAN MNFR. NEW YORK. USA. MODEL 1890"

22210 - 2	6.35MM	6	57	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "The SPESCO Corp." over "Atlanta, Ga." is marked on the left side of the slide.
- the Spesco's logo of an eagle's head and the word "SPESCO" are marked on the grip medallions.
- "Made in U.S.A." is marked on the side of the firearm.
- Spesco was an importer/distributor based in Atlanta, Georgia during the 1970s.

Model

- "PHOENIX P-51 Cal. 25 Auto" is marked on the left side of the slide, along with a small logo of a phoenix rising from the flames.
- this is a standard pattern 25 AUTO pocket pistol, made along the lines of the Reck P8; these pistols were manufactured after 1968, when import of these pistols from other countries was prohibited.
- features include: alloy receiver/frame and slide; fixed sights; striker fired; safety on the left side of the receiver/frame; heel clip magazine release and a take-down button at the left rear of the receiver/frame.

Action

- blowback operated.

Serial Number

- numbered on the right side of the slide, with a partial serial number on the left side of the receiver/frame (pistol must be disassembled to view the number on the receiver/frame).

Calibre

- calibre is marked on the left side of the slide.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- although the manufacturer is not marked on the firearm the left side of the barrel shroud is marked "MADE IN U.S.A."
- the underside of the grip panels on the sample examined were marked "the Spesco Corporation, Atlanta, Georgia, Product of Brazil".

118228 - 9	38 SPL	6	76	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- SPESCO's eagle head logo and name may be marked on the right side of the receiver/frame and in a medallion on the grip plates.
- "The Spesco Corp" and "Atlanta-Georgia" may be marked on the side of the receiver/frame.
- Spesco was an importer/distributor based in Atlanta, Georgia during the 1970s.

Model

- early versions of this Model are not marked "Standard". More recent firearms produced usually are marked with cartridge calibre, importer, make, and model number or name.
- early production Models are distinctive with laterally grooved cylinder flutes.
- features include: double action, blued or nickel finished receiver/frame and barrel, spurred hammer, fluted cylinder with grooves along the flutes, fixed sights, exposed supported ejector rod under the barrel, and the grip panels may vary.

Manufacturer

- "FORJAS TAURUS S.A." over "P.ALEGRE R.G.S. BRASIL" is normally marked on the left side of the barrel
- "MADE IN BRAZIL" is normally marked on the right side of the receiver/frame.

Serial Number

- sequential numbers and usually located on the right side of the receiver/frame.

Calibre

- the calibre designation is normally marked on the right side of the barrel. Example "38 SPL" or "CAL. 38", and the right side of the receiver/frame above the grip may be marked "38 Special.".

119763 - 5	9MM SPIRLET	6	145	Antique AFR, Section 1, para. 7	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "A. SPIRLET & CIE." or "A. SPIRLET - ARMES - LIEGE" may be marked on the barrel.
- Albert Spirlet firearms were manufactured by Albert Spirlet and his son Charles Spirlet.

Model

- manufactured from circa 1870 to circa 1894 by Albert Spirlet and Charles Spirlet.
- on July 27th, 1870 a patent (# 2107 or # 2107/70) was registered for a tip-up revolver with a push knob extractor by J.Peddington in the name of Albert Spirlet.
- model designation is not marked on the firearm.
- features include: octagonal barrel; may have raised rib; fixed sight; barrel and cylinder assembly pivot upward; may feature some engraving; spur hammer; double action trigger mechanism; checkered grip panels; lanyard ring.
- the barrel and cylinder release is located in front of the trigger guard, once the barrel assembly has been flipped upwards, pressing on the axis pine knob, which is located below the barrel, will extract the brass cases from the chambers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- Spirlet of Liege, Belgium.
- 1) Bertrand Spirlet was located in Liege, Belgium from 1807 to 1808.
- 2) Eduard Spirlet, the father of Albert Spirlet and grandfather of Charles Spirlet was located in Liege, Belgium from 1850 to 1876.
- 3) Albert Spirlet, the son of Eduard Spirlet and father of Charles Spirlet was located at 5 and 31 Quai de la Boverie, Liege, Belgium from 1860 to 1876.
- 4) Charles Spirlet, the son of Albert Spirlet was located at 29 rue Lamarck and 25 rue des Brasseurs, Liege, Belgium from 1887 to 1912.
- 5) Albert Spirlet (AS), the son of Charles Spirlet was located at 74 and 81 quai de la Boverie, and 7 place des Franchise, Liege, Belgium from 1911 to 1950. Albert Spirlet used the following trademarks: letters "AS" inside a diamond without a crown, letters "AS" inside a diamond under a crown, letter "S" inside a diamond without a crown, letter "S" inside a diamond under a crown, and the letters "AS" under a crown,
- 6) Martin Spirlet (S.M) was located in Liege, Belgium from 1912 to 1939.

Serial Number

- serial number may be marked on the receiver/frame.

Calibre

- calibre designation may be marked on the firearm.
- the "12MM SPIRLET" is also refered to as the calibre 11.5MM.

Other Markings

- A Belgian proofmark of "ELG*" within an oval is a good indication that a firearm was made prior to July, 1893. In July of 1893 a crown was added to the top of the oval which encircles "ELG*". This proofmark is frequently found on the rear face of the cylinder.

Notes

Make

- "SPITFIRE MFG CO." over "PHOENOX, ARIZONA" is marked on the right side of the magazine housing of the lower frame.

Model

- no model name is marked on this firearm.
- introduced circa 1968.
- resembles the Thompson submachine gun, but has a steel tubular upper receiver/frame and a lower frame with full pistol grip and magazine housing made of cast aluminum alloy.
- features; blow back operated, semi automatic, fires from the open bolt position, utilizing a detachable box magazine; round tapered barrel; tubular steel upper receiver/frame; vertical foregrip or horizontal hardwood type forend as used in the Thompson SMG; removable hardwood butt stock; protected post front sight and aperture rear sight; blued upper receiver/frame and barrel, lower frame is usually painted black.
- this firearm is cocked by placing two fingers on top of the exposed bolt and moving the bolt to the rear; this system is very similar to the way the US M3A1 SMG is cocked.

Manufacturer

- "SPITFIRE MFG CO." over "PHOENOX, ARIZONA" is marked on the right side of the magazine housing of the lower frame.
- Spitfire Manufacturing Company was located in Phoenix, Arizona, U.S.A.

Action

- blowback operated, fires from the open bolt position.

Serial Number

- observed example had four numbers without prefix or suffix marked on the front right side of the lower receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine. - this firearm uses the standard box magazine from the US Submachine Gun, M3 or M3A1 model series.
Other Markings	- right side of lower receiver/frame magazine housing is marked "SEMI-AUTO".

Notes

Make

- "H. SPITZER" is usually marked on the barrel.

Model

- the model is not marked on the firearm; this is a description of the firearm type.
- this is a flintlock hunting rifle manufactured by Henry Spitzer prior to 1840.
- features include: browned or blued finish; open fixed sights; octagonal barrel; under barrel ramrod thimbles; full-length straight-grip maple or walnut stock (some with brass or German silver finishings); external manually cocked cock on the lockplate; finial trigger guard/grip strap; crescent butt with patchbox.

Manufacturer

- "H. SPITZER" is usually marked on the barrel.
- Henry Spitzer was a Newmarket, Virginia gunmaker between 1767 and 1840; his sons, William and Charles also entered the gunmaking trade.

Action

- muzzle-loaded flintlock single-shot.

Other Markings

- "Newmarket made" in script may be marked on the barrel.

Notes

Make

- the company logo consisting of two S's and a D within a double circle with crosshairs is marked on the side of the receiver/frame of an observed example.

Model

- "BD 3008" is marked on an observed example on the side front of the tubular body.
- "BD" in the model designation refers to Berndt Dittrich, the CEO of the company that manufactures this firearm.
- this firearm model is based on the World War II German model MP3008 which was itself based on the design of the British Sten Submachine Gun.
- German production models were usually built with a permanently installed vertical magazine housing designed to use the magazine of the MP38/40.
- the magazine housing which is considered the receiver/frame of this firearm is permanently fixed in a vertical position to the tubular housing in which the bolt reciprocates.
- this firearm incorporates many features of the Sten Submachine Gun; features which include; sheet metal and prefabricated tubular components; steel tube or stamped steel skeleton buttstock; the barrel of this firearm, unlike the STEN, is attached permanently by welding. Many parts and components from the STEN Submachine Gun are interchangeable with the MP3008 & the BD3008. The bolt from a STEN, with minor modifications, can be interchanged and fits and functions.

Manufacturer

- the company logo consisting of two S's and a D within a double circle with crosshairs is marked on the side of the receiver/frame of an observed example.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- blowback operated, advanced primer ignition.
Serial Number	- the serial number is marked on the right side of the magazine housing. - two different serial number rationalizations have been observed: 1. a three letter prefix (CAN), followed by a space, followed by two numbers; and, 2. a four number serial number without prefix or suffix.
Calibre	- "9mm Luger" was observed marked on the right side of the barrel.
Shots	- detachable box magazine.
Canadian Law Comments	- the Sport Systeme Dittrich firearm, Model BD3008, is a factory manufactured firearm in a semi-automatic configuration which is readily converted to fire full automatic in a relatively short time period with relative ease.
Other Markings	- this firearm, which is a recreation of the German MP-3008, has facsimile Waffenamt and proof markings. In accordance with German law the swastika has not been reproduced on these markings, rather an "X" has been substituted. - the right side of the magaxine housing of an observed example was marked "TJK" over "H" and "WAa383".
Remarks	- the Sport Systeme Dittrich firearm, Model BD3008, is a factory manufactured firearm in a semi-automatic configuration. - this firearm is a recreation of a rare and unusual full-automatic firearm, the MP3008, manufactured in the last months of the Second World War and which is a copy of the British STEN Submachine Gun.

126518 - 1	9MM LUGER	32	248	Prohibited PFR, Part 1, para. 172(f)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the company logo consisting of two S's and a D within a double circle with crosshairs is marked on the side of the receiver/frame of an observed example.

Model

- "BD 38" over "ayf" over "41" is marked on the top of the receiver/frame.
- "BD" in the model designation refers to Berndt Dittrich, the CEO of the company that manufactures this firearm.
- the tubular housing in which the bolt reciprocates features a enlarged sear cut-out on the underside to accommodate the unique disconnector/trigger bar which distinguishes this BD38 design from the original German MP38.
- the lugs that lock the tubular housing in which the bolt reciprocates to the receiver/frame are larger on the BD38 than the original German MP38.
- the original firearm, of which this model is a recreation, is commonly known as the "Schmeisser" or MP-38/40.
- this firearm design is based on the original MP38 model which was a Vollmer/Erma Werke development, adopted in 1938 and universally produced by firearm manufacturers in the German sphere of influence during WW II.
- a reproduction stamping of the original World War II manufacturer's code "ayf" (Erma, Erfurt) is marked on the top of the receiver/frame.
- this firearm model incorporates the MP38/40 safety modification that consists of a two piece lock-down style bolt handle which, in conjunction with an upwards cut-out in the forward end of the cocking handle slot, was intended to securely lock the bolt in the forward position.
- utilizes bakelite grip panels and body housing.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the company logo consisting of two S's and a D within a double circle with crosshairs is marked on the side of the receiver/frame of an observed example.
Action	- blowback operated. - although this firearm is factory manufactured in a semi-automatic configuration it is capable of full automatic fire.
Serial Number	- three serial number rationalizations have been seen: 1. a serial number series of two numbers followed by a space, followed by a three letter suffix (CAN); 2. a serial number series of four numbers followed by a space, followed by a two letter suffix (US); and, 3. a serial number series of four numbers without prefix or suffix. - the last two digits of the serial number are normally repeated on all major components.
Calibre	- "9mm Luger" was observed marked on the side of the barrel
Shots	- detachable box magazine.
Canadian Law Comments	- the Sport Systeme Dittrich firearm, Model BD38, is a factory manufactured firearm in a semi-automatic configuration, which has a near exact copy of the receiver of a full automatic firearm. The two receivers are so similar that the original German Model MP38 and MP38/40 Submachine Gun trigger mechanisms will fit and function in the BD38 to support full automatic fire. - additionally, the Sport Systeme Dittrich firearm, Model BD38 is readily converted to fire full automatic in a relatively short time period with relative ease.
Other Markings	- this firearm, which is a recreation of the German MP-38, has facsimile Waffenamt and proof markings. In accordance with German law, the swastika has not been reproduced on these markings, rather an "X" has been substituted. - the top, rear of the receiver/frame of an observed example is marked: "BD 38" over "ayf" over "41". - "WAa280" is observed marked on the left side of the firearm.

Notes

Make

- the company logo consisting of two S's and a D within a double circle with crosshairs was marked on the right side of the receiver/frame forward of the ejection port on an observed example.

Model

- the "BD42" was marked on an observed example on right side of the receiver/frame forward of the ejection port.
- a facsimile of the original "FG42" model markings over the Krieghoff manufacturer code (fzs) has been reproduced on the top of the receiver/frame.
- "BD" in the model designation refers to Berndt Dittrich, the CEO of the company that manufactures this firearm model.
- this firearm is a recreation of the World War II, German model FG42 type 'E', also known as the "Fallschirmjagergewehr 42".
- this firearm model has the visual appearance of the original FG42 but will not accept full-automatic parts or components.
- for ease of manufacture this model features a stamped steel receiver/frame.
- features include: muzzle brake/flash hider; square fluted spike bayonet; folding blade front sight and adjustable folding rear peep sight; wooden forend; folding bipod; black finished receiver/frame; charger loading guide; black painted aluminum handgrip and buttstock; scope mount grooves on the top of the receiver/frame; magazine well located on the left side of the receiver/frame; safety located on the left side of the grip housing; distinctive slanted grip angle.
- overall length with a 500mm (19.69") barrel is 945mm (37.2") average weight with sling and magazine is 4.5kgs (9.92lbs).

Manufacturer

- the company logo consisting of two S's and a D within a double circle with crosshairs was marked on the right side of the receiver/frame forward of the ejection port on an observed example.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Type	- this is a factory manufactured firearm in a semi-automatic configuration, that is a recreation of a full-automatic firearm but in its self not capable of full-automatic fire.
Action	- gas operated.
Serial Number	- the serial number was found on the top of the receiver/frame. - observed example consisted of 4 digits, without prefix or suffix. - matching numbers are located on the bolt and barrel and the last 2 digits of the serial number are marked on the buttstock, bipod and folding front sight assembly.
Barrel	- rifling data - calibre = 7.92mm; four grooves, uniform right hand twist, one turn in 240mm.
Calibre	- "8x57 JS" may be observed marked on the bottom of the barrel under the bipod and bayonet. - rifling characteristics in calibre 8mm Mauser (8x57JS): 1 turn in 240mm (9.45"), 4 grooves with a right hand twist.
Shots	- detachable box magazine. - observed current production 10 and 20 round magazines have the 'Sport Systeme Dittrich' logo "ssd" on the front of the magazine retaining lug.
Other Markings	- this firearm, which is a recreation of the German FG42 , has facsimile Waffenamt and proof markings. In accordance with German law the swastika has not been reproduced on these markings, rather an "X" has been substituted. - the Krieghoff manufacturer code (fzs) has been reproduced on the top of the receiver/frame.
Remarks	- this firearm is a factory manufactured firearm in a semi-automatic configuration, that is a recreation of a full-automatic firearm. This firearm has been designed so as not to be capable of accepting full automatic parts nor to be converted to be capable of full-automatic fire without substantial modification.

Notes

Make

- the company logo consisting of two S's and a D within a double circle with crosshairs was marked on the bottom front of the receiver/frame of an observed example.

Model

- the model designation, "BD 42 (H)" was marked on an observed example on left side of the receiver/frame above the trigger mechanism.
- "BD" in the model designation refers to Berndt Dittrich, the CEO of the company that manufactures this firearm model.
- this firearm is a recreation of the World War II, German model MKB 42 (Haenel), also known as the "Maschinenkarabiner" or "Mkb". A facsimile of the C. G. Haenel manufacturer code (fxo) has been reproduced on the borrom of the receiver/frame.
- this firearm model has the visual appearance of the original MKB 42 (H) but will not accept full-automatic parts or components.
- this firearm model differs from the original in that it does not feature the cut in the underside of the receiver/frame that permits the full-automatic trip to be installed; the fire selector has no cut-out for the full-automatic trip and there is no provision for the installation of the automatic trip in the trigger mechanism assembley; the bolt carrier will not interchange with a full-automatic bolt carrier and there is no cut-out for the full-automatic trip.
- for ease of manufacture this model features a stamped steel receiver/frame.

Manufacturer

- the company logo consisting of two S's and a D within a double circle with crosshairs was marked on the bottom front of the receiver/frame of an observed example.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- gas operated.
Serial Number	- serial number of an observed example consisted of two numbers followed by a space, followed by a three letter suffix (CAN). - the serial number was found on the left side of the magazine housing.
Calibre	- "7.92 X 33K" may be observed marked on the side of the barrel.
Shots	- detachable box magazine.
Other Markings	- this firearm, which is a recreation of the German Mkb-42 (H), has facsimile Waffenamt and proof markings. In accordance with German law the swastika has not been reproduced on these markings, rather an "X" has been substituted. - the C. G. Notes

Make

- "Sport Target Pistol" use the abbreviation "STP".
- "STP" is marked on the right side of the slide and receiver/frame.
- "STP" is a firearms brand established by the German "Büchsenmacherei Prommersberger", a company specialized in making competition handguns.

Model

- "Black Major" is marked on the left side of the slide.
- "Black Major" is of the "STI International" hi-capacity, 2011 type design.
- "Black Major" is a modular design of the 2011 series made of a barrel and slide assembly, a synthetic trigger guard and grip assembly and a steel or alloy receiver/frame. This differs from the traditional 1911A1 design whereby the grip/trigger guard are not integral to the receiver/frame.
- Features include: polygon rifling; cocking serrations on the front going all the way down on the receiver/frame dust cover having lightening holes at each of them on the top of the slide; rear cocking serrations of the slide or cocking pads; lowered and flared ejection port; receiver/frame with full length dust cover; beavertail grip safety with a raised pad; ambidextrous safety catch lever; skeletonized hammer; checkered mainspring housing; extended, beveled magazine well.
- "Black Major" is available with a 127mm (5") or 152mm (6") barrel.

Manufacturer

- "Sport Target Pistol" use the abbreviation "STP".
- "STP" is marked on the right side of the slide and receiver/frame.
- "STP" is a firearms brand established by the German "Büchsenmacherei Prommersberger", a company specialized in making competition handguns.
- "Büchsenmacherei Prommersberger" was founded in 1988 in Aichach, Germany by Karl Prommersberger.
- "Büchsenmacherei Prommersberger" in 1990 he opened a shop in Kühbach, Germany. In 1998, the company established a business partnership with "STI" and was representing this American brand in Europe.
- "Büchsenmacherei Prommersberger" ended the "STI" cooperation in 2015.
- "Büchsenmacherei Prommersberger" in 2016 registered the "Sport Target Pistol" (STP) brand.

Action

- Recoil operated.

Serial Number

- The serial number is marked on the right side of the receiver/frame.
- The serial number of a referenced example consisted of a two letter prefix and four numbers.

Calibre

- The calibre designation is marked on the barrel, visible through the ejection port.

Shots

- Detachable box magazine.

Make

- "SPORTCO" is marked on the barrel.
- "SPORTCO" was a trade name/trademark manufactured by Sporting Arms Limited and Omark Industries/Omark Australia Limited.

Model

- "Martini Clubmaster" is not marked on the firearm.
- "SPORTCO", "SPORTING ARMS LTD." over "SOUTH AUSTRALIA", "CLUBMASTER" and ".22 LR" are marked on the barrel.
- "Martini Clubmaster" is intended for use in small bore target competitions.
- features include: Martini action, fully adjustable trigger, the receiver/frame has a hole drilled in the rear to allow a cleaning rod to be inserted to minimize the chance of damaging the muzzle crown, heavy profile barrel with a one inch diameter at the breech tapering to 7/8 of an inch at the muzzle, full pistol grip butt stock with raised comb, forend is equipped with an adjustable hand stop and two sling eyes, Parker-Hale tunnel front sight with interchangeable elements, rear sight will usually be a Parker-Hale PH17 with a PH52 large disc, six hole eyepiece.
- as issued the approximate weight is 10 1/2 pounds.
- Sportco also offered a low cost Martini type rifle with barrel mounted rear sight, lightweight barrel, and straight gripped stock known simply as the "Martini Sporter".

Manufacturer

- "SPORTCO" and "SPORTING ARMS LTD." or "SPORTING ARMS LIMITED" are usually marked on the barrel.
- Sporting Arms Limited (Sportco) was founded by Jack Warne in 1947.
- Sporting Arms Limited (Sportco) was located in Adelaide, South Australia.
- Sporting Arms Limited (Sportco) manufactured rifles and shotguns.
- Sporting Arms Limited (Sportco) was purchased by Omark Industries in 1966.
- Sportco (Sporting Arms Limited) ceased operations in the early 1980s.
- Jack Warne moved to the United States of America and founded Kimber of Oregon in the 1980s.

Action

- rear hinged, lever operated tipping block design.
- Martini action is locked in the firing position by the tip of the operating lever holding the breech block face up and in line with the chamber.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Importer - Sportco literature notes that the Canadian sales agency was H. S. Wilson & Son, located on York Street in Toronto, Ontario.

Notes

Make

- "SPORTCO" is marked on the barrel.
- "SPORTCO" was a trade name/trademark manufactured by Sporting Arms Limited and Omark Industries/Omark Australia Limited.

Model

- usually marked on top of the barrel: SPORTCO - MARTINI -
- features include: small Martini action, tapered barrel, straight grip butt stock, semi-beavertail forend, sling swivels, bead front sight, and a barrel mounted open sporting rear sight with elevator (may also be encountered with a Sportco model 59 aperture rear sight).
- some may be marked with logo of a 'kangaroo' on the top front of the action.
- Do not confuse with the Target style Martini rifle with Parker-Hale sights, heavy profile barrel, and a full pistol grip stock known as the "Martini Clubmaster".

Manufacturer

- "SPORTCO" and "SPORTING ARMS LTD." or "SPORTING ARMS LIMITED" are usually marked on the barrel.
- Sporting Arms Limited (Sportco) was founded by Jack Warne in 1947.
- Sporting Arms Limited (Sportco) was located in Adelaide, South Australia.
- Sporting Arms Limited (Sportco) manufactured rifles and shotguns.
- Sporting Arms Limited (Sportco) was purchased by Omark Industries in 1966.
- Sportco (Sporting Arms Limited) ceased operations in the early 1980s.
- Jack Warne moved to the United States of America and founded Kimber of Oregon in the 1980s.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- rear hinged, lever operated tipping block design. - Martini action is locked in the firing position by the tip of the operating lever holding the breech block face up and in line with the chamber.
Serial Number	- example in 22 Hornet was observed with the serial number on the left side of the barrel next to the rear sight, example: 1234.
Calibre	- usually marked on top of the barrel, example: SPORTCO - MARTINI - HORNET

36648 - 1	410 GA X 3"	1	460	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is marked on top of the barrel.

Model

- this is a small single-shot shotgun with an abbreviated synthetic buttstock that can contain four shotshells under a sliding plate.
- stainless-steel receiver/frame and barrel. Earlier versions used stainless steel for the hammer, trigger, and action-release button as well.
- the Snake Charmer II has a rotating hammer-block safety on the right side of the receiver/frame.
- action tips down to load/unload
- action unlocks with a button at the front of the trigger-guard.
- "SNAKE CHARMER II" is marked on the firearm.

Manufacturer

- Sporting Arms Manufacturing is a manufacturer based in Littlefield, Texas. It produces the "Snake Charmer II", a slightly re-designed version of the original Snake Charmer .410 shotgun.

Serial Number

- serial number is located on the bottom of the receiver/frame.

Notes

Make

- "JOH. SPRINGER'S ERBEN IN VIEN" was observed marked on the barrels.

Model

- model designation is not marked on the firearm.
- features include: damascus barrels; blade front sight and adjustable rear sight; side hammers; engraved back action locks; double triggers; under lever opener; straight checkered pistol grip stock and forearm.

Manufacturer

- "Johann Springer" was born in Hungary in 1819.
- "Johann Springer's Erban" claims the company was established in 1857.
- "Johann Springer" moved to Vienna, Austria in 1857 and joined "Matthias Nowotny" to form the business of "Johann Springer, vorm. Matthias Nowotny".
- "Johann Springer" died in 1875.
- the business was known as "Johann Springer & Herren" in 1888.
- "Johann Springer & Herren" was renamed "Johann Springer's Erben" circa 1922.
- "Johann Springer's Erban" ceased operation circa 1939.

Action

- side by side pattern with under lever opening.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the water table.
- example observed with four digits without letter prefix or suffix.
- production dates can be determined by serial number.
- serial number: 5000 circa 1870
  6000 circa 1877
  7000 circa 1883
  8000 circa 1892
  9000 circa 1899
  10,000 circa 1912
  10,300 circa 1928
  10,500 circa 1936
  10,600 circa 1948
  10,662 circa 1957

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Other Markings

- also marked "K.U.K.KAMMER GWEHR LIEFERANTEN" or "KAMEMR-LIEFE-RANTEN" which translates to "Official Suppliers of the Royal and Imperial Chambers".

4413 - 5	25 STEVENS LONG RF	1	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SPRINGFIELD" is marked on the firearm.
- "Springfield" was a trade name used on firearms manufactured by the Savage Arms Corporation and the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on rifles and shotguns manufactured by the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on revolvers and shotguns manufactured by the Crescent Firearms Company.
- "Springfield Arms Co." was a manufacturer of percussion revolvers located in Springfield, Massachusetts, U.S.A. between 1851 and 1869.

Model

- originally produced as a Stevens model from 1935 to 1939, introduced as a Springfield model in 1939, as with most commercial firearms produced by Savage during World War II production ceased circa 1942 so that production capability could be focused on military weapons.
- features include: turn-bolt operated action; take-down design (one large screw on the underside of the stock); chromium plated bolt and trigger; one-piece walnut finished, full pistol grip stock with a hard rubber butt plate; hooded ramp front sight with interchangeable inserts and an aperture rear sight mounted on the receiver/frame; tapered round barrel.
- available with a gold bead front sight and a barrel mounted sporting rear sight with elevation and windage adjustments as the Springfield model 83.

Manufacturer

- the Savage name is not usually marked on the firearm. Sample markings read "J. Stevens Arms Company" over "Chicopee Falls, Mass. U.S.A.". Although marked with the Stevens name this model was produced when Stevens was owned and operated by Savage.

Serial Number

- samples seen have not been serialized.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - calibre designation is marked on the barrel.

Make:	Springfield
Model:	1842 US Musket
Manufacturer:	Springfield Armory
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
117304 - 1	69 PERCUSSION	1	1067	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is normally marked vertically at the rear of the lock plate as, "SPRING" over "FIELD" over a date stamp.

Model

- introduced in 1843 and discontinued in 1855.
- the model designation is not marked on the firearm.
- this model was the last smooth bore, calibre 69 PERCUSSION musket made for the U.S. govermnent. This model was also the first regulation musket made at two armouries, the Harpers Ferry Armory and Springfield Armory, in which the parts were fully interchangable. The total production was 275,000 units. Approximately 103,000 units at the Harpers Ferry Armory and 172,000 units at the Springfield Armory.
- features include: side hammer, round barrel, a flat lock plate with beveled edges, three iron barrel bands, a full length stock with a bayonet lug, and may have a steel ram rod located under the barrel.
- the lock plate may have the following markings. An eagle in front of the hammer with "US" marked below, and the manufacturers name at the rear of the lock plate, marked vertically with a date stamp.
- the barrel may have the following markings. On the left side near the breech, a "V" and "P" with an eagles head, a date stamp matching the lockplate and proof marks. Some models may also have inspectors intials,"PB" or "P", in front of the proof marks.
- the barrel will normally be found to be a smooth bore. From 1856 to 1859, 14,182 units had the barrels rifled. This work was done at the Harpers Ferry Armory and Springfield Armouy. Less then 10,000 units were fitted with long range sights.

Manufacturer

- the manufacturer is normally marked vertically at the rear of the lock plate as, "SPRING" over "FIELD" over a date stamp.

Notes

Make

- "SPRING" over "FIELD" over a date stamp is marked vertically at the rear of the lock plate.

Model

- the model designation is not marked on the firearm.
- 3200 produced circa 1847.
- this model was a short rifled version of the 1842 musket made at two armouries, the Harpers Ferry Armory and Springfield Armory, in which the parts were fully interchangeable.
- features include: side hammer; round barrel; a flat lock plate with beveled edges; two iron barrel bands with the front band incorporating a front sight, sling swivel and ram rod port; flip adjustable rear sight; steel ram rod located under the barrel; finished "in the white".
- the lock plate has the usual Springfield markings and the date stamp but may lack the US and eagle motif markings.
- overall length is 1156mm/45 1/2".

Manufacturer

- "SPRING" over "FIELD" over a date stamp is marked vertically at the rear of the lock plate.

Action

- percussion ignition.

91915 - 2	58 PERCUSSION	1	1016	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Model

- manufactured between 1857 and 1861 with a production believed to be 47,115 firearms.
- features include: a Maynard tape primer magazine on the lock, the cover of which is stamped with the American eagle, a pawl type priming mechanism, a "C" shaped hammer with a sharpened lower lip, date of manufacture is marked behind the hammer, rear sights may be graduated to 800 yards and a 2 leaf sight arrangement is found on guns produced after 1858.
- barrel is round, rifled with 3 grooves and is usually marked near the breech end with "V/P" over eagle head proof marks and 3 barrel bands of iron. These bands may sometimes be found stamped with a "U" on the right side.

Manufacturer

- appears on the front of the lockplate as "US / SPRINGFIELD " in conjunction with an American eagle motif in front of the hammer on priming cover.

Action

- muzzle loading, percussion ignition.

Remarks

- the same basic rifle was produced by "Harpers Ferry" with small numbers also made by Eli Whitney Jr. for the Union, and the "Richmond Armory" for Confederate forces on machinery captured at Harpers Ferry.

66605 - 2	58 PERCUSSION	1	838	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Springfield" is not usually marked on the firearm, except those manufactured at the government arsenal known as "Springfield Armory".
- "Springfield" as the make is derived from the name of the original designer and manufacture of the 1861 U.S. Rifle-Musket
- Springfield Armory manufactured 265,129 percussion rifle-muskets between 1861 and 1862.
- the Springfield model 1861 US Rifle-Musket was also manufactured under contracts by many other firms.

Model

- this was one of the primary firearms used during the American Civil War (often used by BOTH sides; although manufactured by or for the Union forces, these rifles were often captured and turned against their former users)
- an extremely long barrel in original-condition specimens (40"/1016mm), three barrel bands, manually-cocked hammer on right sideplate, open sights adjustable for elevation, sling swivels mounted at front of trigger-guard and second barrel band, and date of manufacture, US martial eagle, and "US", along with manufacturer's name on the sideplate. Approximately 24 different manufacturers are known for these rifles, and each had their own sideplate marking.

Manufacturer

- marked on the lock plate.
- Amoakeag manufactured this model from 1861 to 1865.
- actual markings: AMOSKEAG Mfg. Co/MANCHESTER, N.H.
- contractor for Springfield Armory.

Action

- black powder, percussion, muzzle loading single-shot rifle.

Notes

Make

- "Springfield" is not usually marked on the firearm, except those manufactured at the government arsenal known as "Springfield Armory".
- "Springfield" as the make is derived from the name of the original designer and manufacture of the 1861 U.S. Rifle-Musket
- Springfield Armory manufactured 265,129 percussion rifle-muskets between 1861 and 1862.
- the Springfield model 1861 US Rifle-Musket was also manufactured under contracts by many other firms.

Model

- the 1861 Rifle-Musket has a straight grip walnut stock with curved buttplate, three barrel bands, sling swivels at the front of the trigger guard and the second band, three groove rifling, and a tulip shaped ram-rod end.
- these rifles were also manufactured for individual state contracts; those rifles made for the Federal/Union government were marked with "U.S." on the buttplate and had a martial eagle over "U.S." on the lockplate. These rifles may also be stamped "1862", "1863" or "1864" at the rear of the lockplate.
- may be marked "S.N.& W.T.C. FOR MASSACHUSETTS" on the lockplate.
- following the American Civil War, many of these firearms were sold to surplus arms dealers who smooth bored the barrels to 20 GA, cut the forearms to half length and sold them to farmers and settlers at very low prices.

Manufacturer

- Colt produced thousands of these rifle muskets from 1861-1864.
- Colt's production was as a result of a contract with the state of Massachusetts.
- "US" over "COLT'S PT F.A. MFG CO" over "HARTFORD CT" is marked on the lockplate.

Action

- muzzle-loading, percussion ignition.

Make

- "Springfield" is not usually marked on the firearm, except those manufactured at the government arsenal known as "Springfield Armory".
- "Springfield" as the make is derived from the name of the original designer and manufacture of the 1861 U.S. Rifle-Musket
- Springfield Armory manufactured 265,129 percussion rifle-muskets between 1861 and 1862.
- the Springfield model 1861 US Rifle-Musket was also manufactured under contracts by many other firms.

Model

- this is a new-pattern percussion rifle manufactured in Suhl, Germany for the federal/Union government under a federal contract in 1861, when both sides in the Civil War were desperate for arms; C.H. Funk of Suhl was only one of many contractors that produced these rifles.
- the 1861 has a straight grip walnut stock with curved buttplate, three barrel bands, sling swivels at the front of the trigger guard and the second band, three groove rifling, and a tulip shaped ram-rod end.
- these rifles were marked with "U.S." or "US" at the front of the lockplate, with a date of "1861" at the rear of the lockplate; all other makers of these rifles had additional manufacturer and/or city markings.

Manufacturer

- these rifled muskets were produced by C.H. Funk, a Suhl, Germany gunmaker in 1861; the bottoms of some of the barrels may be marked "Suhl" or "CH Funk" over "Suhl".

Action

- muzzle loading, percussion, single-shot.

Model

- "S.N.& W.T.C." over "FOR" over "MASSACHUSETTS" is marked on the lockplate.
- the 1861 has a straight grip walnut stock with curved buttplate, three barrel bands, sling swivels at the front of the trigger guard and the second band, three groove rifling, and a tulip shaped ram-rod end.
- these rifles were also manufactured for individual state contracts; those rifles made for the Federal/Union government were marked with "U.S." on the buttplate and had a martial eagle over "U.S." on the lockplate. These rifles may also be stamped "1863" or "1864" at the rear of the lockplate.
- following the American Civil War, many of these firearms were sold to surplus arms dealers who smooth bored the barrels to 20 GA, cut the forearms to half length and sold them to farmers and settlers at very low prices.

Manufacturer

- "S.N.& W.T.C." over "FOR" over "MASSACHUSETTS" is marked on the lockplate.
- Samuel Norris and William T. Clement of Springfield, Massachusetts, produced several thousand of these rifle muskets in 1863 and 1864 as a result of a contract with the state of Massachusetts.

Action

- muzzle-loading, percussion ignition.

Notes

Make

- "Springfield" is not usually marked on the firearm, except those manufactured at the government arsenal known as "Springfield Armory".
- "Springfield" as the make is derived from the name of the original designer and manufacture of the 1861 U.S. Rifle-Musket
- Springfield Armory manufactured 265,129 percussion rifle-muskets between 1861 and 1862.
- the Springfield model 1861 US Rifle-Musket was also manufactured under contracts by many other firms.

Model

- the 1861 Rifle-Musket has a straight-grip walnut stock with curved buttplate, three barrel bands, sling swivels at the front of the trigger guard and the second band, three groove rifling, and a tulip shaped ram rod end.
- these rifles are marked with a U.S. martial eagle in the centre of the lockplate, "U.S." over "Norwich" at the front of the lockplate, and the date of manufacture (typically "1861" through "1864") at the rear of the lockplate.
- Norwich Arms also made "Artillery" variations of this rifle, with a shorter barrel and only two barrel bands.

Manufacturer

- "U.S." and "NORWICH" is marked at the front of the lockplate.
- the Norwich Arms Company of Norwich, Connecticut built approximately 25,000 of these firearms for the federal government between 1863 and 1865.
- Norwich Arms was only one of many contractors that produced these rifles.

Action

- single shot, muzzle loading, percussion rifle.

Make

- "Springfield" is not usually marked on the firearm, except those manufactured at the government arsenal known as "Springfield Armory".
- "Springfield" as the make is derived from the name of the original designer and manufacture of the 1861 U.S. Rifle-Musket
- Springfield Armory manufactured 265,129 percussion rifle-muskets between 1861 and 1862.
- the Springfield model 1861 US Rifle-Musket was also manufactured under contracts by many other firms.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation is not marked on the firearm.
- manufactured between 1862 and 1865.
- total production of 70,000 rifle-muskets
- this was one of the primary firearms used during the American Civil War (often used by both sides; although manufactured by or for the Union forces, these rifles were often captured and turned against their former users)
- an extremely long barrel in original-condition specimens (40"/1016mm), three barrel bands, manually-cocked hammer on right sideplate, open sights adjustable for elevation, sling swivels mounted at front of trigger-guard and second barrel band, date of manufacture, US martial eagle, and "US", along with manufacturer's name on the sideplate. Approximately 24 different manufacturers are known for these rifles, and each had their own sideplate marking.
- following the American Civil War, many of these firearms were sold to surplus arms dealers who smooth bored the barrels to 20 GA, cut the forearms to half length and sold them to farmers and settlers at very low prices.

Manufacturer

- "PROVIDENCE" and/or "PROVIDENCE TOOL CO." over "PROVIDENCE R.I." is marked on the side of the lock plate.
- in 1851, "Providence Tool Company" was founded in Providence, Rhode Island to manufacture tools.
- in 1862, "Providence Tool Company" was contacted to manufacturer 82,000 "Springfield 1861 rifle-muskets".
- in 1866, "Providence Tool Company" was contacted to manufacturer "Peabody" carbines and rifles.
- in 1869, "Providence Tool Company" was contracted by "Benjamin Roberts" to convert "Springfield 1861 rifle-muskets" & "Springfield 1863 rifle-muskets" to breech loading rifles by using the "Roberts' Patent of June 11, 1867".
- in 1873, "Providence Tool Company" was contacted to manufacturer 650,000 "Peabody & Martini" carbines and rifles for the Turkish government.
- in 1917, "Providence Tool Company" ceased operations.

Action

- black powder, percussion, muzzle loading single-shot rifle.

Firearm Reference Number (FRN): 147522
Make: Springfield
Model: 1861 US Rifle-Musket

Summary

Make:	Springfield
Model:	1861 US Rifle-Musket
Manufacturer:	Trenton Arms
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
147522 - 1	58 PERCUSSION	1	1016	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Springfield" is not usually marked on the firearm, except those manufactured at the government arsenal known as "Springfield Armory".
- "Springfield" as the make is derived from the name of the original designer and manufacture of the 1861 U.S. Rifle-Musket
- Springfield Armory manufactured 265,129 percussion rifle-muskets between 1861 and 1862.
- Springfield model 1861 US Rifle-Musket was also manufactured under contracts by many other firms.

Model

- manufactured from 1863 to 1864.
- this is a new-pattern percussion rifle manufactured in Trenton, New Jersey, for the federal/Union government under a federal contract in the 1860s, when both sides in the Civil War were desperate for arms; the Trenton Arms Co. was only one of many contractors that produced these rifles.
- features include: straight grip walnut stock with curved buttplate; three barrel bands; sling swivels at the front of the trigger guard and the second band; three groove rifling; and a tulip shaped ram-rod end.
- these rifles were marked with "U.S." over "TRENTON" in front of the hammer, with dates from 1863 to 1864 at the rear of the lockplate; all other makers of these rifles had additional manufacturer and/or city markings.

Manufacturer

- "U.S." over "TRENTON" is marked on the lockplate.
- "Trenton Arms Company" was owned by J.T. Hodge and A.M. Burton.
- "Trenton Arms Company" was located at the "Trenton Locomotive & Machine Company" facility in Trenton, New Jersey, U.S.A. from 1863 to 1865.

Action

- muzzle-loaded percussion single-shot.

2472 - 1	50-70 GOVT	1	826	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make	- the make appears on the lockplate.
Model	- the model designation does not appear on the firearm. - approximately 52,000 Springfield Model 1868 Rifles were manufactured between 1869 & 1870. - this firearm is a breech loading rifle using the Allin, hinged, forward pivoting breechblock system. This rifle is a newly manufactured firearm, not a conversion of an earlier manufactured muzzle loader (although existing locks and some other parts were used). - features include: newly manufactured receiver/frame, shorter barrel (Shorter than the 1016MM (40 inch) barrels of the muzzle-loaders from which the first & second Allin Conversions were made.), many surplus or salvaged parts and components such as lock plates & butt plates of earlier Springfield Rifle-Musket models were utilized in the manufacture of the Model 1868 Rifles, original chambering of 50-70 GOVT calibre and will have two barrel bands.
Manufacturer	- arsenal name appears on lockplate as do dates 1863 or 1864.
Action	- side hammer, hinged, forward pivoting breechblock system, single shot firearm.
Serial Number	- appears on the receiver/frame. - from 1 to 52,000.
Other Markings	- the breech block may be dated 1868, 1869 or 1870
Remarks	- the breech mechanism that became known as the Springfield Trapdoor breech mechanism was originated by Eskine S Allin who was a master Armorer at the Springfield Armory approximately 1865. This mechanism was originally designed for the purpose of converting muzzle-loading rifle-muskets to breech-loading firearms.

Notes

Make

- "U.S." over "SPRINGFIELD" is marked on the lock plate.

Model

- manufactured in 1869.
- "DEC" over "1869" is marked on the receiver ring.
- "U.S." over "SPRINGFIELD" is marked on the lock plate.
- approximately 50 units were manufactured for field trials.
- 1869 US Breech Loading Pistol failed the field trials and did not go into production.
- Springfield Armory utilized the receiver/frame and breech block assembly from the model 1868 rifle and the standard model 1863 musket lock to produce this handgun.
- features include: blade front sight and a "V" notched in the breech block assembly for a rear sight; round barrel; external, side mounted hammer; two piece wood stock with a single barrel band and a brass pistol grip cap.
- overall length is 464 mm (18.25").

Manufacturer

- "U.S." over "SPRINGFIELD" is marked on the lock plate.

Action

- top hinged breech block design.

Other Markings

- "US" and the eagle logo are usually marked on the lock plate with the date of 1863 to 1869.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
4255 - 1	22 LR	15	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SPRINGFIELD" is marked on the firearm.
- "Springfield" was a trade name used on firearms manufactured by the "Savage Arms Corporation" and the "J. Stevens Arms Company".
- "Springfield Arms Co." was a trade name used on rifles and shotguns manufactured by the "J. Stevens Arms Company".
- "Springfield Arms Co." was a trade name used on revolvers and shotguns manufactured by the" Crescent Firearms Company".
- "Springfield Arms Co." was a manufacturer of percussion revolvers located in Springfield, Massachusetts, U.S.A. between 1851 and 1869.

Model

- manufactured from 1938 to approximately 1965.
- make information will be found marked on the top mid-barrel.
- features include: a plain round taper-barreled, equipped with a birch, one piece pistol grip stock with rubber butt plate (early models may have black tip forend), sporting front sight (early models may have gold bead front sight) and an open rear sight with step elevator, sliding top-tang thumb safety, operates as a semi-automatic only with 22 LR ammunition, pressing the cross bolt to the left locks the action and adapts it to a manual straight-pull action or single shot, receiver is grooved for scope mounting.
- same as Stevens 87 with minor detail modifications.

Manufacturer

- "SAVAGE ARMS WESTFIELD, MASS. U.S.A." or a variation thereof will be found marked on the firearm.

Action

- blow-back operated.

Shots

- fixed underbarrel tubular magazine.

Remarks

- Operates as a semi-automatic with 22 LR only. Pressing the cross bolt to the left locks the action, adapts the rifle for use as a bolt action or single shot. Has a tube type magazine mounted under the barrel and a thumb safety at the rear of the receiver. Walnut finished one piece pistol grip stock with rubber butt plate (early models may have black tip forend). Sporting front sight (early models may have gold bead front sight) and an open rear sight with step elevator. Receiver grooved for scope mounting. Has a round tapered barrel. same as Stevens 87 with possible internal and/or external modifications.

Notes

Make

- "SPRINGFIELD" is marked on the firearm.
- "Springfield" was a trade name used on firearms manufactured by the Savage Arms Corporation and the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on rifles and shotguns manufactured by the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on revolvers and shotguns manufactured by the Crescent Firearms Company.
- "Springfield Arms Co." was a manufacturer of percussion revolvers located in Springfield, Massachusetts, U.S.A. between 1851 and 1869.

Model

- the model designation was marked on the barrel of the sample examined.
- features on the sample examined included: blued finish; walnut finished hardwood stock with a hard rubber butt plate; sliding safety mounted on the right side of the action; grooved receiver/frame for mounting a scope; blade front sight with a barrel mounted, elevation adjustable rear sight; stamped steel trigger guard.

Manufacturer

- the manufacturer's name is marked on the barrel.

Action

- blowback operated.

Serial Number

- the sample examined was numbered on the left side of the receiver/frame. The sample serial number incorporated an alpha character prefix followed by sequential numbers.

Calibre

- the calibre was marked on the barrel as "CAL 22 LONG RIFLE" on the sample examined.

Shots

- tubular magazine mounted under the barrel.

Notes

Make

- the make appears on the lockplate.

Model

- the model designation appears on the top front of the breechblock as "1870".
- approximately 341 Springfield Model 1870 Carbines were manufactured between 1870 and 1872.
- this firearm is a breech loading rifle with the barrel shortened to 559MM, using the Allin, hinged, forward pivoting breechblock system. This firearm is not a conversion of an earlier manufactured muzzle loader although some muzzle loading parts (locks for example) are incorporated.
- features include: newly manufactured receiver/frame which was somewhat shorter than the Model 1868 receiver/frame, essentially the Model 1870 Carbine is a slightly modified Model 1868 Rifle, original chambering of 50-70 GOVT calibre.

Manufacturer

- arsenal name appears on lockplate as do dates 1863 to 1865.

Action

- side hammer, hinged, forward pivoting breechblock system, single shot firearm.

Remarks

- the breech mechanism that became known as the Springfield Trapdoor breech mechanism was originated by Eskine S Allin who was a master Armorer at the Springfield Armory approximately 1865. This mechanism was originally designed for the purpose of converting muzzle-loading rifle-muskets to breech-loading firearms.

124966 - 1	50-70 GOVT	1	559	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make may be marked on the firearm.

Model

- manufactured from 1871 to 1872.
- approximately 316 units manufactured.
- model designation "WARD BURTON CARBINE" over "BARREL" over "M" over "1871" was observed marked on top of the barrel and "WARD BURTON PATENT" over "DEC. 20, 1859, FEB. 21, 1871" was observed marked on top of the bolt body.
- this was the first bolt operated rifle manufactured by Springfield Armory.
- approved for field trials in 1870, following the trials (1871) it was concluded that since the design incorporated a "cock on closing" feature, the lack of a cocking indicator or side hammer led the firearm to be rejected.
- features include: round barrel; one barrel band; folding adjustable rear sight and fixed front sight; the bolt consists of a cock on closing striker mechanism, a bolt sleeve with rear mounted interrupted thread locking lugs, a separate bolt head including the extractor and ejector; manual thumb safety located on the right side of the receiver/frame; single trigger; no cleaning rod; sling bar located on the left side of the plain, one piece, straight stock.
- rifle designed for a socket style bayonet.
- similar to the rifle version that features a 826mm (32.5") barrel and two barrel bands.

Action

- turn-bolt design.

2477 - 1	45-70 GOVT	1	559	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make appears on the lockplate.

Model

- the model designation appears on the breechblock as "1873".
- approximately 75,000 Springfield Model 1873 Rifles and Carbines were manufactured between 1873 and 1876.
- Springfield Model 1873 Carbine production is estimated at 20,028.
- the Springfield Model 1873 Carbine is a slightly modified version of the Model 1870 Carbine, chambered for the "newly developed" calibre 45-70 GOVT calibre cartridge.
- this firearm is a breech loading rifle using the Allin, hinged, forward pivoting breechblock system. This firearm is not a conversion of an earlier manufactured muzzle loading firearm.
- features include: newly manufactured receiver/frame, the stock had no provision for a butt trap and has a single barrel band.

Manufacturer

- arsenal name appears on the lockplate.

Action

- side hammer, hinged, forward pivoting breechblock system, single shot firearm.

Serial Number

- the serial number appears on the receiver/frame.
- serial number rationalization as follows: consecutively numbered from 1 to 75,000.
- all variations and sub-models of the 1873 Carbine have serial numbers which fall within the indicated number range.

Other Markings

- the left side of the stock may have a "cartouche" stamping of "ESA" these initials are the initials of Master Armorer Erskine S Allin.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- this firearm is a breech loading, side hammer carbine using the Allin, hinged, forward pivoting breechblock system. It differs from the Model 1873 Rifle by having a considerably shorter barrel, half stock forearm, one barrel band and carbine sling bar and ring on left side of stock.

126918 - 1	410 GA X 2 1/2"	1	660	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "U.S." and "Springfield" are marked on the lockplate.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".
- "Musket" is a term that originally applied to a smooth bore long gun, later the term was applied to the infantryman's shoulder controlled long gun. The musket had a long fore-end and may have been equipped with a bayonet and a front and rear sight.

Model

- "U.S. MODEL 1873" in three lines is marked on the breechblock.
- "U.S. SPRINGFIELD 1873" in three lines may be marked on the lock plate.
- this was a side hammer, breech loading rifle converted to a shotgun using the Allin, hinged, forward pivoting breechblock system.
- features include: casehardned breech block; blued round barrel; hi brass bead front sight;forend fasten to barrel by screw on underside, no barrel band; sling swivell on trigger guard.

Action

- side hammer, hinged, forward pivoting breechblock system, single shot firearm.

Serial Number

- serial number appears on the receiver/frame.
- observed specimen had six numbers.

FRT Report

Firearm Reference Number (FRN): 2480
Make: Springfield
Model: 1873/77 Cadet Rifle

Summary

Make:	Springfield
Model:	1873/77 Cadet Rifle
Manufacturer:	Springfield Armory
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
2480 - 1	45-70 GOVT	1	749	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make	- the make appears on the lockplate.
Model	- the designation Model 1877 is one of convenience to cover a series of modifications between the 1873 and 1877 on Springfield Rifles and Carbines. No markings on the firearm indicate Model 1877 but the breechblock bears the misleading "Model 1873". The serial number and barrel length determines this model.
Manufacturer	- arsenal name appears on the lockplate.
Serial Number	- serial number appears on receiver. All versions and models of the 1877 have serial numbers which fall into the number range indicated. If serial number is larger than 100,000 see models 1879-1880.
Other Markings	- breech block bears model designation 1873 (see Model Notes).
Remarks	- the Springfield Model 1877 Cadet Rifle is a slightly modified version of the original Model 1873 Cadet Rifle differing in relatively minor details such as the breechblock arch.

Notes

Make

- the make appears on the lockplate.

Model

- the model designation appears on the breechblock as "1873".
- Springfield Model 1877 Carbine production is estimated at 19,881.
- the Springfield Model 1877 Carbine is a slightly modified version of the Model 1873 Carbine, produced between 1877 and 1881.
- this firearm is a side hammer, breech loading rifle using the Allin, hinged, forward pivoting breechblock system. This firearm is not a conversion of an earlier manufactured muzzle loading firearm.
- features include: strengthened butt stock (the Model 1873 Carbine had a distressing habit of breaking at the wrist of the butt stock), the stock had a hinged butt trap and the firearm has a single barrel band.

Manufacturer

- arsenal name appears on the lockplate.

Action

- side hammer, hinged, forward pivoting breechblock system, single shot firearm.

Serial Number

- the serial number appears on receiver.
- all versions and models of the Springfield 1877 Carbine have serial numbers which fall into the serial number range of 75,000 to 183,0000.

Other Markings

- breech block bears model designation 1873 (see Model Notes).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- the designation Model 1877 is one of convenience to cover a series of modifications between the 1873 and 1879 on Springfield Rifles and Carbines. No markings on the firearm indicate Model 1877 but the breechblock bears the misleading "Model 1873". The serial number and barrel length that determines this model.
- the Springfield Model 1877 Carbine is a slightly modified version of the original Model 1873 Carbine differing in relatively minor details such as breechblock and length of comb of the buttstock.

Notes

Make

- the make is marked on the lockplate.

Model

- the Springfield Model 1879 Cadet Rifle is a slightly modified version of the Model 1877 Rifle differing primarily by having a wider and thicker receiver. These modifications were introduced between 1877 and 1879 on Springfield Rifles and Carbines.
- model is not marked on the firearm.
- approximately 5,000 made.
- features include: two-piece trigger guard; single stacking swivel, Buckhorn rear sight and blue finish with colour casehardened breechblock and tang.
- a 1879 Carbine version with a shorter barrel and 1879 Rifle version with a longer barrel was also made.

Manufacturer

- arsenal name is marked on the lockplate.

Serial Number

- the serial number is marked on the receiver/frame. All versions and models of the 1879 have serial numbers which fall into the range from 100,000 to 154,000 and 158,000 to 280,000.
- if the serial number is between 154,000 and 158,000, refer to Model 1880.

Other Markings

- the breech block bears the markings U.S./MODEL/1873.

Notes

Make

- "SPRINGFIELD" is marked on the top of the barrel.
- "Springfield" was a trade name used on firearms manufactured by the Savage Arms Company and the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on rifles and shotguns manufactured by the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on revolvers and shotguns manufactured by the Crescent Firearms Company.
- "Springfield Arms Co." was a manufacturer of percussion revolvers located in Springfield, Massachusetts, U.S.A. between 1851 and 1869.

Model

- features include: one piece semi-pistol grip walnut stock; top tang safety; blued barrel; leaf-type adjustable rear sights; grooved receiver/frame.

Manufacturer

- "Savage Arms Corporation" or a variation thereof is marked on the firearm.

Action

- blow-back operated.
- operates as a semi-automatic with 22 LR or high speed cartridges only.
- moving the cross bolt to the left locks the action and adapts the rifle for use as a bolt action or single shot.

Shots

- fixed underbarrel tube magazine.

Remarks

- operates as a semi-automatic with 22 LR only. Pressing the cross bolt to the left locks the action, adapts the rifle for use as a bolt action or single shot. Has a tube type magazine mounted under the barrel and a thumb safety at the rear of the receiver/frame. Walnut finished one piece pistol grip stock with rubber butt plate (early models may have black tip forend). Sporting front sight (early models may have gold bead front sight) and an open rear sight with step elevator. Receiver/frame grooved for scope mounting. Has a round tapered barrel. Similar to the Springfield model 187 with minor internal and/or external modifications.

FRT Report

Firearm Reference Number (FRN): 4458
Make: Springfield
Model: 187N

Summary

Make:	Springfield
Model:	187N
Manufacturer:	Savage
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
4458 - 1	22 LR	15	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SPRINGFIELD" is marked on the top of the barrel.
- "Springfield" was a trade name used on firearms manufactured by the Savage Arms Company and the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on rifles and shotguns manufactured by the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on revolvers and shotguns manufactured by the Crescent Firearms Company.
- "Springfield Arms Co." was a manufacturer of percussion revolvers located in Springfield, Massachusetts, U.S.A. between 1851 and 1869.

Model

- "MODEL 187N" is marked on the top of the barrel.

Manufacturer

- "SAVAGE ARMS WESTFIELD, MASS. U.S.A." or a variation thereof will be found marked on the firearm.

Action

- blowback operated.

Calibre

- "22 H.S. SHORT, LONG OR L. R. AS AUTO." is marked on the top of the barrel.

Shots

- fixed underbarrel tube magazine.

Remarks

- Operates as a semi-automatic with 22 LR only. Pressing the cross bolt to the left locks the action, adapts the rifle for use as a bolt action or single shot. Has a tube type magazine mounted under the barrel and a thumb safety at the rear of the receiver. Walnut finished one-piece pistol grip stock with rubber butt plate (early models may have black tip forend). Sporting front sight (early models may have gold bead front sight) and an open rear sight with step elevator. Receiver/frame is grooved for scope mounting. Has a round tapered barrel.

Notes

Make

- the make appears on the lockplate.

Model

- "1881" appears on the breechblock.
- "U.S.", "SPRINGFIELD" and "1873" are be marked on the lock plate.
- approximately 1,376 Springfield Model 1881 Shotguns were manufactured between 1880 and 1883.
- the Springfield Model 1881 Shotgun is a slightly modified version of the Springfield Trapdoor Rifle or Carbine, chambered for the 20 GA shotgun cartridge.
- this firearm is a side hammer, breech loading shotgun using the Allin, hinged, forward pivoting breechblock system.
- this firearm is manufactured utilizing parts from condemned Rifles and Carbines or earlier manufactured muzzle loading firearms.
- there is a considerable variation between individual firarms.

Manufacturer

- arsenal name appears on the lockplate.

Action

- side hammer, hinged, forward pivoting breechblock system, single shot firearm.

Serial Number

- the serial number appears on the receiver/frame.
- serial number rationalization as follows: consecutively numbered from 1 to 1,376.

Remarks

- this firearm is an arsenal produced shotgun based on the Springfirld Model 1879 Rifle. It incorporates virtually all of the improvements and modifications found on the Springfield Model 1879 except that it is a half stocked shotgun with bead front sight and no provision for sling swivels.

Notes

Make

- "US - SPRINGFIELD - 1884" is marked on the top of the left side of the receiver/frame.
- these rifles were manufactured at the Springfield Armory in 1884 for testing against Hotchkiss and Lee rifles, as possible replacements for the Springfield 1873 "Trap-Door".

Model

- "US - SPRINGFIELD - 1884" is marked on the top of the left side of the receiver/frame; "Chaffee-Reese Magazine Rifle" is not marked on the firearm.
- this is a rifle adopted for limited testing by the US Army in 1882, but which were not manufactured until 1884 by Springfield Armory, because a private contractor could not be found to manufacture them (unliike the Hotchkiss and Lee rifles which it was intended to be tested against).
- this rifle was designed by Reuben Chaffee in 1879 and advanced largely by General James Reese, leading to the design being known as the "Chafee-Reese".
- this rifle was offered as a replacement for the then-issue 1873 "Trap-Door" rifle, with 753 being made by Springfield Armory. Testing was unsuccessful, and these rifles were sold as surplus.
- features include: blued finish; adjustable open sights; long straight-grip walnut stock with two barrel bands; a magazine cut-off on the right side of the receiver/frame; a Gras-style bolt handle; sling swivels; a cocking-piece at the rear of the bolt; and a 5-round magazine tube in the butt, loaded through a trap-door.

Manufacturer

- "US - SPRINGFIELD - 1884" is marked on the top of the left side of the receiver/frame.
- these rifles were manufactured at the Springfield Armory in 1884 for testing against Hotchkiss and Lee rifles, as possible replacements for the Springfield 1873 "Trap-Door".

Action

- turn bolt design.

Shots

- tubular magazine in butt.

Serial Number	- appears on the receiver behind the breechblock.
Remarks	- Note that it is the serial number and barrel length that determine THIS model. This is basically a Springfield Model 1879 Rifle incorporating features of the Model 1884 Experimental Rifle. It has a combination ram rod/bayonet, Buffington pattern rear sight, compartment in buttstock for takedown tool and cleaning jag and one piece trigger guard (as opposed to earlier models in which the trigger guard bow is a separate piece).

Notes

Make

- "SPRINGFIELD" is marked on the firearm.
- "Springfield" was a trade name used on firearms manufactured by the Savage Arms Corporation and the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on rifles and shotguns manufactured by the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on revolvers and shotguns manufactured by the Crescent Firearms Company.
- "Springfield Arms Co." was a manufacturer of percussion revolvers located in Springfield, Massachusetts, U.S.A. between 1851 and 1869.

Model

- originally produced as a Stevens model from 1935 to 1939, introduced as a Springfield model in 1939, as with most commercial firearms produced by Savage during World War II production ceased circa 1942 so that production capability could be focused on military weapons.
- the model designation is marked on the barrel.
- features include: turn-bolt operated action; take-down design (one large screw on the underside of the stock); chromium plated bolt and trigger; one-piece walnut finished, full pistol grip stock with a hard rubber butt plate; gold bead front sight and a sporting rear with elevation and windage adjustment; tapered round barrel.
- available with a hooded ramp front sight with interchangeable inserts and an aperture rear sight mounted on the receiver/frame as the Springfield model 083.

Manufacturer

- "J. Stevens Arms Company" is marked on the firearm.

Serial Number

- samples seen have not been serialized.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - calibre designation is marked on the barrel.

Other Markings - samples have been noted with "Wards Western Field" markings, these examples were marketed through Montgomery Wards department stores.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "SPRINGFIELD MODEL 840" is marked on the left rear side of the receiver/frame or barrel. - features a streamlined walnut stock, fluted comb, full pistol grip and a corrugated butt plate. - the bolt features a locking lug with gas vent holes that match twin gas ports in receiver/frame. - sliding thumb safety located at the right rear of the receiver/frame, which locks the bolt when in the closed position. - gold bead front sight on a ramp and a rear sight with a sliding elevator. - receiver/frame drilled and tapped for side mounted scope. - this model ressembles the model 840, and Savage 340 in all respects, except for minor internal/external changes. -NOTE: when sold with a telescopic sight, this model is known as the 840T. - in 222 REM calibre the 840T-1. - in 30-30 WIN calibre the 840T-2
Manufacturer	- "Savage Arms Corporation" or a variation thereof marked on rear of barrel.
Action	- manually operated, bolt action repeating rifle.
Serial Number	- 6 digits, found on right side of frame. - early models may have no serial number.
Calibre	- "PROOF TESTED CAL XXXXX" marked on the left rear side of barrel.
Shots	- detachable box magazine.
Remarks	- Streamlined walnut stock, fluted comb, full pistol grip (white line pistol grip cap in later models) and a corrugated butt plate. Pistol grip and forend are checkered. Action cocks on opening and locking lug with gas vent holes that match twin gas ports in receiver. Slide thumb safety located at the right rear of the receiver and has a detachable box magazine. Has a gold bead front sight on a ramp (hooded removable front sight in later models) and a folding rear sight with screw or sliding elevator. Receiver drilled and tapped for a scope. Same as the Stevens 322 with possible internal and/or external modifications.

Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
4518 - 1	22 LR	5	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SPRINGFIELD" is marked on the firearm.
- "Springfield" was a trade name used on firearms manufactured by the Savage Arms Corporation and the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on rifles and shotguns manufactured by the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on revolvers and shotguns manufactured by the Crescent Firearms Company.
- "Springfield Arms Co." was a manufacturer of percussion revolvers located in Springfield, Massachusetts, U.S.A. between 1851 and 1869.

Model

- circa 1940

Remarks

- Semi-automatic, take-down with chrome molydenum alloy steel in high shock parts and thumb operated slide safety at the right rear of the receiver. Pressing the bolt to the left locks the action for use as a single shot or repeater. Has a removable box magazine and a vented ejection port on the left side of the receiver. Stock is a one piece military style walnut finished, full pistol grip stock with a fluted comb, large take down screw and rubber butt plate. Gold bead front sight and sporting rear sight with windage and elevation adjustments. Drilled and tapped for Weaver telescope. Has a tapered round barrel. Same as the Springfield 85 with some possible internal and/or external modifications.

- "SPRINGFIELD" is marked on the firearm.
- "Springfield" was a trade name used on firearms manufactured by the Savage Arms Corporation and the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on rifles and shotguns manufactured by the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on revolvers and shotguns manufactured by the Crescent Firearms Company.
- "Springfield Arms Co." was a manufacturer of percussion revolvers located in Springfield, Massachusetts, U.S.A. between 1851 and 1869.

Model

- "Mod 87A" marked on barrel or receiver.
- tubular magazine, mounted under the barrel.
- safety located right side of receiver.
- straight bolt handle is located on the right side of the action.
- will function either as a manually operated bolt action repeating firearm or as a blow-back, semi-automatic repeating firearm depending on how the bolt handle is "set"; when the bolt handle is pulled out to the right as far as it will go, the action will perform in a semi-automatic mode - note: bolt handle reciprocates with the bolt; when bolt handle is pressed to the left as far as it will go, the firearm will function as a straight-pull bolt-action repeater.
- one piece hardwood stock.

Calibre

- left side of barrel marked "CAL 22 LONG RIFLE SMOKELESS GREASED ONLY".

Shots

- under-barrel tubular magazine.
- firearm will function with 22 Short, 22 Long and 22 LR cartridges.

Notes

Make

- "Springfield" is marked on the firearm.
- "Springfield" is a tradename used on firearms imported by Traditions from Spain and sold by Bass Pro Shops of Springfield, Missouri, U.S.A.

Model

- "Springfield" and "Hawken" and "Made in Spain" are marked on the barrel/receiver/frame.
- introduced in 1996.
- this is a single shot muzzle loaded black powder percussion rifle.
- features include: octagonal barrel with dovetailed front and rear sight; case hardened side plate with side mounted external hammer; one piece hard wood stock with brass trigger guard with finger grip, butt plate and forend tip; wood ram rod.
- this firearm leaves the factory in the form of a kit and it is possible to find different finishes on the octagonal barrel and on the hardwood stock.

Manufacturer

- "Ardesa Spain" or the "Ardesa" company logo is not marked on the barrel.
- Ardesa was established in the 1980s.
- Ardesa is a manufacturer located in Vizcaya, Spain.
- Ardesa specializes in producing black powder / muzzle-loading firearms.

Serial Number

- serial number is marked on the receiver/frame/barrel.
- Spanish firearms manufactured pre-1995, the serial number consisted of numbers with or without a letter prefix or suffix.
- Spanish firearms manufactured post-1994, the serial number consists of a two number gunmaker's/manufacture's code, a dash (-), a two number weapon's code, a dash (-), six numbers, a dash (-) and a two number year of production code. example: 14-13-087250-02.
