Notes

Make - Springfield Armory name and logo are marked on the slide and receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "MODEL 1911-A1" is marked on the left side of the slide. - Springfield Inc. are usually marked 1911-A1 (with a hyphen); whereas the model produced for the U.S. Government by various manufacturers is usually marked 1911A1 (no hyphen). - this is a basic version of Springfield's "1911-A1". - this firearm usually has checkered wood or dark plastic hand-grip panels, and is available in blued, duotone, nickel plated, phosphated or stainless steel finish. - this firearm is manufactured by Springfield Inc. based on the U.S. Government model 1911A1 pistol, as initially produced by COLT.
Manufacturer	- the manufacturer's designation is marked on the right side of the receiver/frame as "SPRINGFIELD ARMORY / GENESEO IL USA" in two lines. - additionally, the underside of the forward portion of the receiver/frame or the right hand side forward of the trigger may be marked "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL". - firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).
Action	- recoil operated.
Serial Number	- the serial number (usually one or two letters and up to six digits), is located on the right side of the receiver/frame above the trigger guard, immediately below the marking: SPRINGFIELD ARMORY GENESEO IL USA. - serial number rationalization unknown.
Barrel	- barrel lengths will vary widely as this receiver/frame is frequently used for building customized firearms.
Calibre	- calibres will vary as this receiver/frame is frequently used for building customized firearms.
Shots	- detachable box magazine.

Notes

Make

- "SPRINGFIELD ARMORY" is marked on the right side of the slide.

Model

- introduced in 1994.
- model designation is not marked on the firearm.
- this is a competition version of Springfield Inc.'s "1911-A1" produced by their custom shop.
- features include: blued finish; custom fitted match barrel and bushing; match trigger; custom spur hammer; standard grip safety; undercut front and adjustable BO-MAR rear sights; tuned extractor; beveled magazine well; diamond checkered walnut grips.

Manufacturer

- the manufacturer's designation is marked on the right side of the receiver/frame as "SPRINGFIELD ARMORY / GENESEO IL USA" in two lines.
- additionally, the underside of the forward portion of the receiver/frame or the right hand side forward of the trigger may be marked "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL".
- firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).

Action

- recoil operated.

Serial Number

- the serial number (usually one or two letters and six numbers) is located on the right side of the receiver/frame above the trigger.
- serial number rationalization unknown.

Calibre

- other calibres available as per customer request.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine.
Other Markings	- the Springfield Armory crest (crossed cannons within a circle) and "SPRINGFIELD" over "Custom" (in script) is marked on the right side of the slide. - "SPRINGFIELD" over "GENESEO IL. U.S.A." is marked on the right side of the receiver/frame above the trigger.
Remarks	- the manufacturer should not be confused with the original SPRINGFIELD ARMORY (the first U.S. Government Arsenal, started in 1790, officially opened in 1795, terminated production in 1968, and closed in 1975) which was located at Springfield Massachusetts. - these firearms by Springfield Inc. are usually marked 1911-A1 (with a hyphen), whereas the model produced for the U.S. Government by various manufacturers is usually marked 1911A1 (no hyphen).

- these firearms by Springfield Inc. are usually marked 1911-A1 (with a hyphen); whereas the model produced for the U.S. Government by various manufacturers is usually marked 1911A1 (no hyphen).

Manufacturer

- the manufacturer's designation is marked on the right side of the receiver/frame as "SPRINGFIELD ARMORY / GENESEO IL USA" in two lines.
- additionally, the underside of the forward portion of the receiver/frame or the right hand side forward of the trigger may be marked "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL".
- firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).

Action

- recoil operation based on the Browning system.

Serial Number

- the serial number (usually one or two letters and six numerals), is located on the right side of frame above trigger, immediately below the marking: SPRINGFIELD ARMORY GENESEO IL USA.
- serial number rationalization unknown.

Calibre

- calibre designation is usually marked on the left side of the slide.
- calibre designation is marked on the barrel, visible through the ejection port.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Other Markings
- marked with the Springfield Armory crest (crossed cannons within a circle) on the right side of the slide.
- marked on the right side of the frame above the trigger: SPRINGFIELD GENESEO IL. U.S.A.

Notes

Make

- "SPRINGFIELD ARMORY" is marked on the right side of the slide.

Model

- "EMP" with a subscript "4" is marked on both sides of the slide; "Concealed Carry Contour" is denoted by other features of this pistol.
- "EMP" stands for "Enhanced Micro Pistol".
- this is a "Commander" sized version of the "EMP" pistol, fitted with a 102mm (4") barrel, instead of the 76mm (3") "officers" sized barrel of the "EMP", and having a "bobtail" frame and mainspring housing.
- features include: typical 1911 layout; fibre optic front and fixed rear sights; round, rifled stainless steel barrel and slide with rear serrations; fluted ejection port; black alloy or steel receiver/frame; extended beavertail safety; ventilated trigger; skeletonized hammer; ambidextrous manual safety; checkered synthetic grips panels; textured front strap and straight mainspring housing; grip frame rounded off to reduce the rear profile; two-tone finish.
- overall length with 102mm (4") barrel is 191mm (7.5"); average weight with empty magazine an alloy receiver/frame is 865g (30.5 oz) and with a steel receiver/frame is 1.05kg (37 oz).

Manufacturer

- "SPRINGFIELD INC" over "GENESEO IL USA" is marked on the right side of the receiver/frame.
- the underside of the forward portion of the receiver/frame or the right hand side forward of the trigger may be marked "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL".
- firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- marked on the right side of the receiver/frame. - observed serial number consisted of a three letter prefix (EMP) followed by five numbers.
Calibre	- calibre designation is marked on the left side of the slide. - rifling characteristics: 6-grooves, 1 turn in 16 inch, left hand twist.
Shots	- detachable box magazine.

Notes

Make

- this firearm is marked on the right side of the slide: SPRINGFIELD ARMORY

Model

- this firearm is specifically designed and tuned to function with ammunition with flat-tipped projectiles, designed to cut clean, neat holes on paper targets.
- available with 127mm throated barrel, slide-mounted undercut Bomar frontsight and low-mount Bomar rear sight, arched mainspring housing, match-style trigger, spur hammer, grip safety, bevelled mag-well mouth, and Pachmayr grips.
- this firearm is of current manufacture by Springfield Inc. based on the U.S. Government model 1911A1 pistol, as initially produced by COLT.
- these firearms by Springfield Inc. are usually marked 1911-A1 (with a hyphen); whereas the model produced for the U.S. Government by various manufacturers is usually marked 1911A1 (no hyphen).

Manufacturer

- the manufacturer's designation is marked on the right side of the receiver/frame as "SPRINGFIELD ARMORY / GENESEO IL USA" in two lines.
- additionally, the underside of the forward portion of the receiver/frame or the right hand side forward of the trigger may be marked "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL".
- firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- recoil operation based on the Browning system.
Serial Number	- the serial number (usually letters NM and six numerals), is located on the right side of receiver above trigger, immediately below the marking: SPRINGFIELD ARMORY GENESEO IL USA. - serial number rationalization unknown.
Shots	- detachable box magazine.
Other Markings	- marked with the Springfield Armory crest (crossed cannons within a circle) on the right side of the slide. - marked on the right side of the receiver above the trigger: SPRINGFIELD GENESEO IL. U.S.A.

Notes

Make

- marked on the right side of the slide "SPRINGFIELD ARMORY".

Model

- marked on the left side of the slide "GULF VICTORY SERIES".
- this is a Commercial Commemorative version of Springfield Inc.'s "1911-A1", manufactured during 1991 and 1992 .
- the "Gulf Victory Series" firearm has a military-style spur hammer, fixed sights, checkered walnut grips, and gold-plated trigger, hammer, and magazine release.
- it featured "Presentation Grade" bluing, and gold etched sample representations of an outline map of Iraq, military fighting vehicles and vessels on the left side of the slide; aircraft on the top; and on the right side of the slide, a representation of an installation under air attack with the words DESERT STORM.
- this firearm was manufactured during 1991 and 1992 by Springfield Inc., and is based on the U.S. Government model 1911A1 pistol, as initially produced by COLT.
- these firearms by Springfield Inc. are usually marked 1911-A1 (with a hyphen), whereas the model produced for the U.S. Government by various manufacturers is usually marked 1911A1 (no hyphen).

Manufacturer

- the manufacturer's designation is marked on the right side of the receiver/frame as "SPRINGFIELD ARMORY / GENESEO IL USA" in two lines.
- additionally, the underside of the forward portion of the receiver/frame or the right hand side forward of the trigger may be marked "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL".
- firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).

Action

- recoil operation based on the Browning system.

Serial Number

- the serial number (usually one or two letters and six numerals), is located on the right side of frame above trigger, immediately below the marking: SPRINGFIELD ARMORY GENESEO IL USA.
- serial number rationalization unknown.
- observed serial number with " DS " prefix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine.
Other Markings	- marked with the Springfield Armory crest (crossed cannons within a circle) on the right side of the slide. - marked on the right side of the frame above the trigger: SPRINGFIELD GENESEO IL. U.S.A.

Notes

Make

- the "SPRINGFIELD ARMORY" logo and trade name are usually marked on the right side of the slide.
- "SPRINGFIELD ARMORY" over "GENESEO IL USA" is marked on the right side of the receiver/frame.

Model

- "1911-A1 Leatham Legend TGO1" is not marked on the firearm.
- "Rob Leatham" name may be laser engraved into the grip plates, "RL" for Rob Leatham is marked on the right rear side of the slide and is the prefix in the serial number, "LEGEND SERIES" and "TGO" are marked on the left side of the slide.
- this model is the highest quality pistol that Springfield Armory offers in the Leatham Legend series. This series was designed by four time world champion (as of 2003) shooter Rob Leatham. The features of each pistol determine the actual model within the 1911-A1 Leatham Legend series.
- TGO1: features include a forged steel receiver/frame with a Robar Industries NP-3 nickel/teflon finish; forged slide with a Robar Industries Roguard black finish and rear cocking serrations; low mount BoMar adjustable rear sight with a Dawson fibre optic front sight; national match lightweight adjustable trigger; Smith & Alexander hand checkered flat mainspring housing with magazine well; hand checkered, 20lpi frontstrap; Nowlin match grade bushing and throated barrel; titanium firing pin; ambidextrous safety lever; High-Hand beavertail grip safety; Carry-Bevel treatment (all sharp edges removed); two-piece stainless steel, full length guide rod; lowered and flared ejection port; extended ejector; extended magazine release; unique "Legend" markings and serial number; two sets of grips, one of black Macarta double diamond grips and a Leatham Legend signature laser engraved thin Cocobola smooth wood set.
- TGO2: is a standard production model that shares the same basic features but uses a Springfield Armory wide mouth magazine well, a flat ILS (Integral Locking System) mainspring housing, a standard match grade barrel, a loaded chamber indicator and front and rear cocking serrations on the slide.
- TGO3: uses a lightweight, forged aluminum receiver/frame, stainless steel slide with front and rear cocking serrations and a Springfield Armory rear sight.

Manufacturer

- the manufacturer's designation is marked on the right side of the receiver/frame as "SPRINGFIELD ARMORY / GENESEO IL USA" in two lines.
- additionally, the underside of the forward portion of the receiver/frame or the right hand side forward of the trigger may be marked "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL".
- firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number is marked on the right side of the receiver/frame. - observed serial number had a letter prefix of "RL" followed by five sequential numbers.
Calibre	- marked on the left side of the slide.
Shots	- detachable box magazine. - aftermarket magazines are available with increased shot capacity.

FRT Report

Firearm Reference Number (FRN): 121222
Make: Springfield Armory
Model: 1911-A1 Leatham Legend TGO3

Summary

Make:	Springfield Armory
Model:	1911-A1 Leatham Legend TGO3
Manufacturer:	Springfield Armory/Industria de Material Belico do Brasil (IMBEL)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	BRAZIL
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
121222 - 1	45 AUTO	7	127	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the "SPRINGFIELD ARMORY" is marked on the right side of the slide.
- "SPRINGFIELD ARMORY" over "GENESEO IL USA" is marked on the right side of the receiver/frame.

Model

- "1911-A1 Leatham Legend TGO3" is not marked on the firearm.
- "Rob Leatham" name may be laser engraved into the grip plates, "RL" for Rob Leatham is marked on the right rear side of the slide and is the prefix in the serial number, "LEGEND SERIES" and "TGO" are marked on the left side of the slide.
- this series was designed by four time world champion (as of 2003) shooter Rob Leatham. The features of each pistol determine the actual model within the 1911-A1 Leatham Legend series.
- TGO3: features include: forged aluminum receiver/frame with a black Armory Kote finish; stainless steel slide with front and rear cocking serrations; Springfield Armory adjustable rear sight with a Dawson fibre optic front sight; national match lightweight adjustable trigger; a flat ILS (Integral Locking System) mainspring housing; bevelled magazine well; hammer forged match grade throated barrel and bushing; titanium firing pin; ambidextrous safety lever; High-Hand beavertail grip safety; Carry-Bevel treatment (all sharp edges removed); two-piece stainless steel, full length guide rod; lowered and flared ejection port; unique "Legend" markings and serial number; two sets of grips, one black Macarta double diamond grips and a Leatham Legend signature laser engraved thin Cocobola smooth wood set.
- TGO2: is a standard production model that shares the same basic features but uses a forged steel receiver/frame.
- TGO1: is a Springfield Armory Custom Shop version that uses a forged steel receiver/frame and hand fit parts.

Manufacturer

- the manufacturer's designation is marked on the right side of the receiver/frame as "SPRINGFIELD ARMORY / GENESEO IL USA" in two lines.
- additionally, the underside of the forward portion of the receiver/frame or the right hand side forward of the trigger may be marked "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL".
- firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number is marked on the right side of the receiver/frame.
- observed serial number had a letter prefix of "RL" followed by three sequential numbers.

Shots

- detachable box magazine.
- aftermarket magazines are available with increased shot capacity.

Notes

Make

- "SPRINGFIELD ARMORY" is marked on the right side of the slide.

Model

- "MODEL 1911-A1" is marked on the left side of the slide.
- features include: compact or full-size receiver/frame and slide; blue, stainless steel, parkerized, OD green, two tone finish; military style trigger; spur hammer; three-dot combat sights; black plastic grips.
- this firearm is of current manufacture by Springfield Inc. based on the U.S. Government model 1911A1 pistol, as initially produced by COLT.
- these firearms by Springfield Inc. are usually marked 1911-A1 (with a hyphen); whereas the model produced for the U.S. Government by various manufacturers is usually marked 1911A1 (no hyphen).

Manufacturer

- the manufacturer's designation is marked on the right side of the receiver/frame as "SPRINGFIELD ARMORY / GENESEO IL USA" in two lines.
- additionally, the underside of the forward portion of the receiver/frame or the right hand side forward of the trigger may be marked "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL".
- firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number, usually one or two letters and up to six numbers, is located on the right side of the receiver/frame above trigger, immediately below the marking: SPRINGFIELD ARMORY GENESEO IL USA. - serial number rationalization unknown.
Shots	- detachable box magazine.
Other Markings	- marked with the Springfield Armory crest (crossed cannons within a circle) on the right side of the slide.
Remarks	- the manufacturer should not be confused with the original SPRINGFIELD ARMORY (the first U.S. Government Arsenal, started in 1790, officially opened in 1795, terminated production in 1968, and closed in 1975) which was located at Springfield Massachusetts. - these firearms by Springfield Inc. are usually marked 1911-A1 (with a hyphen), whereas the model produced for the U.S. Government by various manufacturers is usually marked 1911A1 (no hyphen).

Notes

Make

- marked on the right side of the slide: SPRINGFIELD ARMORY

Model

- this is a "factory-customized" version of version of Springfield's "1911-A1" V10, which has been "custom-gunsmithed" with features such as a "trigger job", a compensated barrel with exhaust ports (visible through slots in the top of the slide), and other additional custom gunsmithing finishing touches to enhance accuracy.
- it is similar to the Ultra Compact: it features the same foreshortened and reduced grip-height frame, however the V10 sports a ported short slide and matching ported (10 vent) barrel.
- other features include: skeletonized hammer; Novak ramp style fixed sights; lightweight skeletonized trigger; "beaver-tail" grip safety; checkered frontstrap and mainspring housing and checkered walnut grip panels.
- available in either stainless or "bi-tone" finish.
- this firearm is of current manufacture by Springfield Inc. based on the U.S. Government model 1911A1 pistol, as initially produced by COLT.
- these firearms by Springfield Inc. are usually marked 1911-A1 (with a hyphen); whereas the model produced for the U.S. Government by various manufacturers is usually marked 1911A1 (no hyphen).

Manufacturer

- the manufacturer's designation is marked on the right side of the receiver/frame as "SPRINGFIELD ARMORY / GENESEO IL USA" in two lines.
- additionally, the underside of the forward portion of the receiver/frame or the right hand side forward of the trigger may be marked "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL".
- firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).

Action

- recoil operated.

Serial Number

- the serial number, usually one or two letters and six numerals, is located on the right side of the receiver/frame above the trigger.
- serial number rationalization unknown.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine.
Other Markings	- marked with the Springfield Armory crest (crossed cannons within a circle) on the right side of the slide. - marked on the right side of the receiver/frame above the trigger: SPRINGFIELD GENESEO IL. U.S.A.

Notes

Make

- "SPRINGFIELD ARMORY" is marked on the right side of the slide.

Model

- model designation may be marked on the left side of the slide.
- "Springfield" over "Custom" is marked on the right side of the slide.
- this is a target version of Springfield's "1911-A1".
- features include: round rifled barrel; dovetail front sight mounted on the compensator; adjustable rear sight, blued slide with rear serrations; lowered and flared ejection port; magazine release button and slide release located on the left side of the receiver frame; ambidextrous thumb safety; skeletonized hammer; beavertail grip safety; ventilated trigger; checkered rubber mainspring housing; wrap-around rubber grips; two-tone finish.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "SPRINGFIELD ARMORY" over "GENESEO IL USA" or "SPRINGFIELD" over "COLONA IL USA" is marked on the right side of the receiver/frame. - "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL" may be marked on the underside of the forward portion of the receiver/frame, the right side forward of the trigger or under the grip plate. - firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).
Action	- recoil operated.
Serial Number	- the serial number is marked on the receiver/frame. - observed serial number consisted of a two letter prefix (NM) followed by six numbers.
Calibre	- calibre designation is usually marked on the barrel visible through the ejection port and may be marked the left side of the slide.
Shots	- detachable box magazine.
Other Markings	- marked with the Springfield Armory crest (crossed cannons within a circle) on the right side of the slide. - marked on the right side of the frame above the trigger: SPRINGFIELD GENESEO IL. U.S.A.
Remarks	- the manufacturer should not be confused with the original SPRINGFIELD ARMORY (the first U.S. Government Arsenal, started in 1790, officially opened in 1795, terminated production in 1968, and closed in 1975) which was located at Springfield Massachusetts. - these firearms by Springfield Inc. are usually marked 1911-A1 (with a hyphen), whereas the model produced for the U.S. Government by various manufacturers is usually marked 1911A1 (no hyphen).

Notes

Make

- "SPRINGFIELD ARMORY" is marked on the right side of the slide.

Model

- this firearm is a short, reduced size version of Springfield's "1911-A1" that features a receiver/frame which has been shortened and reduced in grip-height, with a short slide and matching barrel.
- features include: three dot high visibility fixed sights and black plastic grip panels or Hogue finger-groove grips.
- available in parkerized, stainless steel, or "bi-tone" finish.
- this firearm is of current manufacture by Springfield Inc. based on the U.S. Government model 1911A1 pistol, as initially produced by COLT.
- these firearms by Springfield Inc. are usually marked 1911-A1 (with a hyphen); whereas the model produced for the U.S. Government by various manufacturers is usually marked 1911A1 (no hyphen).

Manufacturer

- the manufacturer's designation is marked on the right side of the receiver/frame as "SPRINGFIELD ARMORY / GENESEO IL USA" in two lines.
- additionally, the underside of the forward portion of the receiver/frame or the right hand side forward of the trigger may be marked "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL".
- firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).

Action

- recoil operated.

Serial Number

- the serial number, usually one or two letters and six numerals, is located on the right side of the receiver/frame above the trigger, immediately below the marking: SPRINGFIELD ARMORY GENESEO IL USA.
- serial number rationalization unknown.

Calibre

- calibre is marked on the barrel visible through the ejection port.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Other Markings - marked with the Springfield Armory crest (crossed cannons within a circle) on the right side of the slide.

Notes

Make

- this firearm is marked on the right side of the slide: SPRINGFIELD ARMORY

Model

- this firearm is a compact version of Springfield's High Capacity Standard, and features a wide magazine-well receiver/frame to accomodate a high-capacity magazine, "scallops" behind the trigger guard adjacent to the magazine well to allow improved access the trigger; and a foreshortened and reduced height grip-frame.
- the firearm features 3-dot high visibility fixed sights, long trigger, beavertail grip safety, extended thumb safety and slide stop, beveled magazine well, lowered and flared ejection port, and checkered walnut or plastic grip panels.
- it is available in blued, parkerized or stainless steel versions.
- this pistol is almost identical to the High Capacity V10, (except that the V10 has an internally-compensated barrel with the exhaust ports visible through slots in the top of the slide).
- this firearm is of current manufacture by Springfield Inc. based on the U.S. Government model 1911A1 pistol, as initially produced by COLT.
- these firearms by Springfield Inc. are usually marked 1911-A1 (with a hyphen); whereas the model produced for the U.S. Government by various manufacturers is usually marked 1911A1 (no hyphen).

31619 - 2	45 AUTO	6	123	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- this firearm is marked on the right side of the slide: SPRINGFIELD ARMORY

Model

- this Ultra Compact V10 is a compact version of the Springfield Armory "1911-A1".
- features include: a vented short slide and a ported barrel, skeletonized hammer, 3-dot high-visibility fixed sights, beavertail grip safety, extended thumb safety, beveled magazine well, lowered and flared ejection port.
- the "Ultra Compact V10" is available in bi-tone or stainless steel finish.
- this firearm is based on the U S Government Colt model 1911A1 pattern pistol.

Manufacturer

- the manufacturer's designation is marked on the right side of the receiver/frame as "SPRINGFIELD ARMORY / GENESEO IL USA" in two lines.
- additionally, the underside of the forward portion of the receiver/frame or the right hand side forward of the trigger may be marked "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL".
- firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).

Action

- recoil operated.

Serial Number

- the serial number, is located on the right side of the receiver/frame above trigger.
- serial number rationalization unknown.
- sample serial number observed consisted of a single letter prefix followed by six digits without a suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- the calibre designation is normally marked on the barrel, visible through the ejection port.
Shots	- detachable box magazine.
Other Markings	- marked with the Springfield Armory crest (crossed cannons within a circle) on the right side of the slide. - marked on the right side of the frame above the trigger: SPRINGFIELD GENESEO IL USA.
Remarks	- the manufacturer should not be confused with the original SPRINGFIELD ARMORY (the first U.S. Government Arsenal), which was located at Springfield Massachusetts.

31920 - 1	45 AUTO	6	89	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SPRINGFIELD ARMORY" is marked on the right side of the slide.
- The Springfield Armory logo is marked on the right side of the slide.

Model

- "Super" over "Tuned "and "V 10 ULTRA COMPACT" is marked on the left side of the slide.
- this is a "factory-customized" firearm with added features such as a ported slide and a (10 vent) ported barrel.
- the Ultra Compact V10 is a shortened, reduced height version of Springfield's "1911-A1".
- features include: fixed front sight with an adjustable rear sight; round rifled barrel; flat sided slide with right side lowered and flared ejection port and rear grasping serrations; skeletonized hammer and trigger; single action trigger mechanism; beavertail grip safety, extended thumb safety, slide and magazine release located on the left side of the receiver/frame; beveled magazine well, checkered front-strap, mainspring housing and wood grip panels; two-tone or stainless steel finish.
- overall length with a 89mm (3 1/2") barrel is 181mm (7 1/8"), average weight is 932.7g (32.9oz).

Manufacturer

- "SPRINGFIELD" over "GENESEO, IL, USA" is marked on the right side of the receiver/frame.
. "F I Brazil", "F I", "IMBEL BRAZIL", "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL" may be marked on the right side of the receiver/frame forward of the trigger.
- firearms in the 1911A1 series of pistols sold under the Springfield Armory name and manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).

Action

- recoil operated.

Serial Number

- serial number is marked on the right side of the receiver/frame above the trigger.
- serial number of a referenced example consisted of the letter (N) followed by six numbers.

Calibre

- calibre designation is marked on the left side of the slide.
- rifling characteristics: 1 turn in 16 inches, left hand twist.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.

Other Markings

- marked with the Springfield Armory crest (crossed cannons within a circle) on the right side of the slide.
- marked on the right side of the frame above the trigger: SPRINGFIELD GENESEO IL. U.S.A.

Remarks

- the manufacturer should not be confused with the original SPRINGFIELD ARMORY (the first U.S. Government Arsenal, started in 1790, officially opened in 1795, terminated production in 1968, and closed in 1975) which was located at Springfield Massachusetts.
- these firearms by Springfield Inc. are usually marked 1911-A1 (with a hyphen), whereas the model produced for the U.S. Government by various manufacturers is usually marked 1911A1 (no hyphen).

Notes

Make	- The company logo is marked on the firearm. - "Springfield Armory" is marked on the right side of the firearm.
Model	- "ECHELON" is marked on the left side of the firearm. - The Springfield Armory "Echelon" uses a steel fire control unit/trigger group assembly in its design. This assembly is considered to be the receiver/frame and therefore the serialized component. - Features include: front and rear slide serrations; fully ambidextrous magazine and slide lock releases; accessory rail below muzzle end of firearm; available in a variety of colors.
Manufacturer	- The company logo is marked on the firearm. - "HS PRODUKT" is marked on the left side of the firearm.
Action	- Recoil operated.
Serial Number	- The serial number is marked on the right side of the receiver/frame. - The serial number of referenced examples consisted of a two letter prefix followed by six digits.
Calibre	- The calibre designation is marked on the barrel, visible through the ejection port.
Shots	- Detachable box magazine housed in the grip.
Canadian Law Comments	- The Springfield Armory "Echelon" is a modular firearm. The modular design has a steel receiver/frame housed within a synthetic grip/body module. The receiver/frame is interchangeable with the different grip/body modules.

Notes

Make - this firearm is marked on the right side of the barrel mono-block: M6 Scout SPRINGFIELD ARMORY GENESEO, IL. U.S.A.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this firearm is marked on the right side of the barrel mono-block: M6 Scout SPRINGFIELD ARMORY GENESEO, IL. U.S.A.
- this is a recently manufactured improved copy of a survival firearm originally built for the U.S. Air Force as the M6 Survival Rifle.
- it is a break-open over/under, with provision for carrying extra shells and cartridges under the flip-up cheek-piece on the butt-stock; other features include an all-weather trigger, and a folding stock that may be readily detached for storage; the firearm is drilled and tapped to permit scope mounting.
- the nose of the hammer must be set to fire the specific barrel (upper-rifle or lower-shotgun) and the hammer needs to be manually cocked to fire.
- the rifle barrel (upper) with flip-down rear-sight (shotgun/rifle) is available in either 22LR, 22 Magnum, or 22 Hornet; the shotgun barrel only comes in 410 gauge, however, flares in this caliber may be launched from this barrel.
- this firearm is available in stainless steel, or parkerized finish.

Manufacturer

- the firearm is manufactured under license by Ceska Zbrojovka; the manufacturer is also known as "CZ".
- the firm Springfield Armory Inc., was formed in 1974 (also refered to as "Springfield Armories") as a purely a commercial operation and manufactures quality firearms and parts, primarily in M1A rifles in semi-automatic only, the 1911A1 style pistols, and other military style firearms.
- since January 1993 this firm has been called Springfield Armory, Springfield Inc., after the rights to the name "Springfield Armory" was purchased from the U.S. Government.
- the manufacturer should not be confused with the original SPRINGFIELD ARMORY (the first U.S. Government Arsenal, started in 1790, officially opened in 1795, terminated production in 1968, and closed in 1975) which was located at Springfield Massachusetts.

Type

- this firearm is a combination gun with a rifle barrel over the shotgun barrel.

Action

- over/under pattern.

Serial Number

- on the receiver/frame.

Calibre

- marked on the respective barrel.

Shots

- rifle over-barrel, shotgun under-barrel.

Notes

Make

- "SPRINGFIELD ARMORY" is marked on the identification plate on the housing assembly.

Model

- "GUN, 20MM, AUTOMATIC: M61A1" is marked on the identification plate on the housing assembly.
- "M61A1" is a Vulcan, Gatling type automatic canon, developed and manufactured by General Electric for the US Military.
- "M61A1" is a six (6), 20-mm barrels mounted on a geared rotor, driven by an electric motor. Firing only once per revolution.
- "M61A1" is primary use on aircraft and has land and sea variants.
- "M61A1" has a lighter version, known as the M61A2 which is mechanically the same as the M61A1, but with thinner barrels and has some metal replacement parts/components having lighter weight materials to reduce overall mass to 91.6 kg (202 lb).
- features include: six barrels in a circular arrangement with a muzzle clamp bracket and a mid-barrel clamp; housing cover covering the firearm rotor assembly; guide bar and indexing pin for the installation on different aircraft cradle; usually has an ammunition pod or drum which feeds linkless ammunition through a flexible feed chute.
- overall length with a 1524mm (60") barrel is 1.86 m (6 ft 1.4"), average weight is 102kg (255lbs).

Manufacturer

- General Electric developed and manufactured Gatlings, Vulcans and Miniguns for the US Military. These models were used in various helicopters, aircraft and naval vessels.
- "G.E. CO." is usually marked on the identification plate on the housing assembly.

Action

- external electric motor or hydraulic unit powered.

Serial Number

- serial number is marked on the identification plate on the housing assembly.
- serial number of a referenced example consisted of five numbers.

Calibre

- "20MM" is marked on the identification plate on the housing assembly.
- 20x102 ammunition are electrically primed.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- link or linkless feeding system.
- "M61A1" rate of fire is 4000 to 6000 rounds.

Notes

Make

- Maker's name will be marked on the rear right side of the receiver/frame as, "SPRINGFIELD" over "ARMORY" over "Geneseo, IL USA".
- this model series was made by Springfield Armory in the USA starting in 1990.

Model

- ""ULTRA" MODEL, I.P.S.C. Approved" is marked on the left side of the slide; the P9 in the model designation is the original factory model name for this model series, it does not however appear on the firearm.
- introduced 1990, discontinued 1993.
- the P9 Ultra IPSC with the "Long Slide Ported" (LSP) was officially endorsed by the IPSC World Body.
- the P9 model series is the basic full-sized single-action / double-action semi-auto pistol by Springfield Armory based on the CZ-75 design.
- features include: recoil operated, semi-automatic pistol utilizing a detachable box magazine; long muzzle-end ported slide and matching ported stainless steel barrel; left side frame-mounted extended sear safety and slide release; serrated front and rear grasping grooves; extended beavertail tang on the grip-frame; skeletonized hammer; slide mounted special target sights; rubberized competition or diamond-checkered walnut grip panels.
- this firearm is available in polished blue, bi-tone, parkerized, or stainless steel finish.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- manufacturer's name is marked on the rear right side of the receiver/frame as, "SPRINGFIELD" over "ARMORY" over "Geneseo, IL USA". - firearms in the P9 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Tanfoglio Fratelli (Tanfoglio Brothers), although no markings to this end have been seen marked on production examples.
Action	- recoil operated.
Serial Number	- serial number is marked on the rear left side of the receiver/frame. - known example had a five digit number with a two letter prefix. - letter prefix "AM" has been observed.
Calibre	- 9MM Luger version has the calibre designation marked on the rear of the barrel, visible through the ejection port, as "9X19".
Shots	- detachable box magazine.

Notes

Make

- "SPRINGFIELD" over "ARMORY" was observed marked on the right side of the receiver/frame.
- "SPRINGFIELD Custom" was observed marked on the right side of the slide.

Model

- "P9 WORLD CUP" is marked on the left side of the slide.
- "P9 WORLD CUP" was designed for IPSC competition, hand built in the Custom Shop, and features a selected stainless steel match barrel fitted with a tapered cone dual port compensator; with the frame barrel and slide custom-fitted together for optimum lock-up.
- this is a full-sized single-action / double-action semi-auto pistol by Springfield Armory based on the CZ-75 design.
- features include: custom aluminum trigger; full-length recoil rod system; frame-mounted extended ambidextrous thumb safety; frame-mounted slide release; serrated front and rear gripstaps; extended beavertail tang on the grip-frame; custom-fitted skeletonized hammer; front and rear slide serrations for cocking; slide mounted fixed low-profile Bomar target sights; and match diamond checkered walnut grips; receiver/frame drilled and tapped for the P9 scope bridge mount; and hard chrome finish.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "SPRINGFIELD" over "ARMORY" over "GENESEO IL USA" was observed marked on the right side of the receiver/frame. - "P9" series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Tanfoglio Fratelli (Tanfoglio Brothers), although no markings to this end have been seen marked on production examples.
Action	- recoil operated.
Serial Number	- serial number was observed marked on the side of the receiver/frame. - observed serial number consisted of a two letter "AM" prefix and five numbers.
Calibre	- calibre is marked on the chamber of the barrel.
Shots	- detachable box magazine.
Remarks	- the manufacturer should not be confused with the original SPRINGFIELD ARMORY (the first U.S. Government Arsenal, started in 1790, officially opened in 1795, terminated production in 1968, and closed in 1975) which was located at Springfield Massachusetts.

Notes

Make

- "SPRINGFIELD ARMORY" is marked on the right side of the receiver/frame.

Model

- this firearm may also be known as "1911-A2 S.A.S.S."
- "S.A.S.S." denotes "Springfield Armory Single Shot".
- when purchased as a completed firearm, it is built with the Springfield 1911-A1 frame.
- this unit is available from Springfield Armory as a complete single-shot handgun, with frame, barrel, and breech mechanism or as a conversion kit.
- this firearm features rubberized wrap-around grips; long "Match" trigger; beavertail grip safety; adjustable rear sight; and comes pre-drilled and tapped for scopesight mounting.
- as a conversion kit, it allows the owner of any steel framed 1911 style pistol to convert it into a single-shot.
- the conversion kit comes in two pieces, a barrel unit that can be changed from one length or caliber to another, and a standing-breech portion that mounts onto a 1911-style frame.

Manufacturer

- "SPRINGFIELD ARMORY" is marked on the right side of the receiver/frame.

Action

- this is a break-open "tip-up", breech-loading single-shot pistol.

Serial Number

- on a complete firearm from Springfield Armory, the serial number (usually one or two letters and six numerals), is located on the right side of receiver/frame above the trigger-guard, immediately below the marking: SPRINGFIELD ARMORY GENESEO IL USA.
- serial number rationalization unknown.

Other Markings

- this firearm is clearly marked "Springfield Armory USA" on right side of standing-breech portion, above trigger-guard.

37829 - 1	44 MAG	8	470	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Springfield Armory" imported, distributed and manufactured firearms.
- "Springfield Armory" trade name used by "Springfield Armory , Inc." until 1992, and is now used by "Springfield, Inc."
- facilities located in Geneseo, Illinois, U.S.A.
- Note: this "Springfield Armory" is not to be confused with the United States Government armory that was located in Springfield, Massachusetts.

Model

- "Timber Wolf" is marked on the right rear side of the receiver/frame.
- "Timber Wolf" is a registered trademark of I.M.I. (Israel Military Industries).
- imported from 1990 to 1991.
- this is a takedown pump action rifle/carbine.
- features include: round barrel; solid receiver/frame with right side ejection and bottom loading port; hammerless; tubular magazine; manually operated slide action; one piece trigger assembly; cross bolt safety located on the rear of the trigger guard; blade front sight and open rear sight; integral scope mount located on the top of the receiver/frame; removable checkered straight grip shotgun style butt stock; satin chrome or blued finish.

Manufacturer

- "ISRAEL MILITARY INDUSTRIES" and "ISRAEL" is marked on the right rear side of the receiver/frame.

Action

- manually operated slide/pump action.

Serial Number

- serial number is located on the right front side of the receiver/frame.
- serial number may or may not have a letter prefix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre is marked on the right rear side of the receiver/frame.
Shots	- full length tubular magazine located under the barrel.

FRT Report

Firearm Reference Number (FRN): 128614
Make: Springfield Armory
Model: US Carbine M1

Summary

Make:	Springfield Armory
Model:	US Carbine M1
Manufacturer:	Lewis Machine & Tool (LMT)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
128614 - 1	30 CARBINE	5	457	Prohibited PFR, Part 1, para. 236(z.36)	Manufacturer Specifications and Commercial Customization	
128614 - 2	30 CARBINE	15	457	Prohibited PFR, Part 1, para. 236(z.36)	Manufacturer Specifications and Commercial Customization	
128614 - 3	30 CARBINE	30	457	Prohibited PFR, Part 1, para. 236(z.36)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "S.A" is usually marked on the receiver/frame.

Model

- this is a commercial variant of the standard U.S. military M1 Carbine.
- approximately 100 receiver/frames produced.
- "US CARBINE" with "CAL.30 M1" or variation thereof may be marked on the top of the receiver/frame in front of the ejection opening.
- features may include: parkerized finish on the receiver/frame and round barrel; fixed front sight; flip-up L-shaped or knob adjustable rear sights; push button or swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; fixed wooden pistol grip or metal and wood folding stock with separate upper handguard; left side mounted front sling swivel; inletted oil holder/ sing attachment at the buttstock; front barrel band which may include a bayonet lug; may feature a cone shaped flash hider, a muzzle brake or a grenade launcher attached to the barrel.
- overall length with a 457mm (18") barrel is 903.73mm (35.58") and average weight is 2.49kgs (5.5lbs).

Manufacturer

- manufacturer's name is not marked on the firearm.
- "Lewis Machine & Tool (LMT)" was established in 1980.
- "Lewis Machine & Tool (LMT)" is located in Milan, Illinois U.S.A..

Action

- gas operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is usually found on the top rear of the receiver/frame or on the side of the receiver/frame at the chamber area. - the serial number may be obscured by the rear sight. - serial numbers can some times be used to indicate a manufacturer or distinct model.
Calibre	- "CAL.30 M1" may be marked on the receiver/frame.
Shots	- detachable box magazine.
Remarks	-manufacturer names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fitting, sights and other gadgets may also confuse the issue of specific model identification.

Notes

Make

- "S.A." or "SPRINGFIELD ARMORY" is marked on the top rear of the receiver/frame.
- "SPRINGFIELD ARMORY" is marked on the receiver/frame.

Model

- this is a commercial variant of the standard U.S. military M1 Carbine.
- "US CARBINE" with "CAL.30 M1" or variation thereof may be marked on the top of the receiver/frame in front of the ejection opening.
- features may include: parkerized finish on the receiver/frame and round barrel; fixed front sight; flip-up L-shaped or knob adjustable rear sights; push button or swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; fixed wooden pistol grip or metal and wood folding stock with separate upper handguard; left side mounted front sling swivel; inletted oil holder/ sing attachment at the buttstock; front barrel band which may include a bayonet lug; may feature a cone shaped flash hider, a muzzle brake or a grenade launcher attached to the barrel.
- overall length with a 457mm (18") barrel is 903.73mm (35.58") and average weight is 2.49kgs (5.5lbs).

Manufacturer

- "SPRINGFIELD ARMORY" is usually marked on the top of the receiver/frame. "GENESEO, IL" may be marked on the left side of the receiver/frame under the stock.
- the manufacturer should not be confused with the original SPRINGFIELD ARMORY (the first U.S. Government Arsenal, started in 1790, officially opened in 1795, terminated production in 1968, and closed in 1975) which was located at Springfield Massachusetts.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- gas operated.
Serial Number	- serial number is usually found on the top rear of the receiver/frame or on the side of the receiver/frame at the chamber area. - observed examples have a two letter prefix. - the serial number may be obscured by the rear sight. - serial numbers can some times be used to indicate a manufacturer or distinct model.
Calibre	- "CAL.30 M1" may be marked on the receiver/frame.
Shots	- detachable box magazine.
Remarks	- according to the manufacturer, several hundred of these firearms were manufactured by Springfield Armory Inc., using new receivers made by Springfield and surplus military parts. -manufacturer names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fitting, sights and other gadgets may also confuse the issue of specific model identification.

Notes

Make

- the make designation is marked on the top rear of the receiver/frame as "SPRINGFIELD ARMORY".

Model

- Introduced in 2002.
- Based on the "M1 Garand" design.
- manufactured from 2002 to 2007.
- "U.S. RIFLE" over "M1" over "SPRINGFIELD" over "ARMORY" over the serial number are marked on the top rear of the receiver/frame.
- this firearm is a recent commercial manufacture of the "U.S. Rifle Caliber .30, M1" also known as the "M1 Garand Rifle".
- this firearm is a faithful reproduction of the original where parts are interchangeable with the original military production firearms.
- this is a gas operated, semi-automatic service rifle designed by John Garand, adopted by the U.S. in 1936, and saw service through World War II, Korea and beyond.
- features include: parkerized metal surfaces; walnut stock; post foresight with protective side wings and rear aperture sight adjustable for both windage and elevation; detachable trigger group; bayonet lug forged as part of the gas assembly.

Manufacturer

- "SPRINGFIELD ARMORY" is marked on the top rear of the receiver/frame.
- the manufacturer should not be confused with the original SPRINGFIELD ARMORY (the first U.S. Government Arsenal, started in 1790, officially opened in 1795, terminated production in 1968, and closed in 1975) which was located at Springfield, Massachusetts.

Action

- gas operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the top rear of the receiver/frame. - observed serial number consisted of seven numbers without a letter prefix oe suffix; example "7108895".
Calibre	- calibre designation is marked on the top rear of the receiver/frame. - calibre designation may also be marked on the barrel. - rifling characteristics: 6-grooves, 1 turn in 11 inches, right hand twist.
Shots	- this firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, eight cartridge, enbloc clip. - once inserted into the firearm, this clip cannot be recharged unless first emptied. - Introduced in 2002 with an 8 shot enbloc clip. - The "M1 Garand" was introduced in 1936 with an 8 shot enbloc clip. - This firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, eight cartridge, enbloc clip; once inserted into the firearm, this clip cannot be recharged.

Notes

Make

- "SPRINGFIELD ARMORY" is marked on the top rear of the receiver/frame.

Model

- Introduced in 2002.
- Based on the "M1 Garand" design.
- manufactured from 2002 to 2007.
- "U.S. RIFLE" over "M1" over "SPRINGFIELD" over "ARMORY" over the serial number are marked on the top rear of the receiver/frame.
- this firearm is a recent commercial manufacture of the "U.S. Rifle Caliber .30, M1" also known as the "M1 Garand Rifle".
- this firearm is a faithful reproduction of the original where parts are interchangeable with the original military production firearms.

Action

- gas operated.

Serial Number

- serial number is marked on the top rear of the receiver/frame.

Shots

- Introduced in 2002 with an 8 shot enbloc clip.
- The "M1 Garand" was introduced in 1936 with an 8 shot enbloc clip.
- This firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, eight cartridge, enbloc clip; once inserted into the firearm, this clip cannot be recharged.

Notes

Make

- the make designation is marked on the top rear of the receiver/frame as "SPRINGFIELD ARMORY".

Model

- the model designation is marked as "M1" on the top rear of the receiver/frame.
- the operating rod handle is further engraved with "D-DAY NORMANDY, JUNE 6 1944".
- this is a copy of the gas operated semi-automatic service rifle designed by John Garand, adopted by the U.S. in 1936, and saw service through World War II and Korea.
- features include: parkerized metal surfaces; walnut stock; post foresight with protective side wings and rear aperture sight adjustable for both windage and elevation; detachable trigger group; bayonet lug forged as part of the gas assembly.
- a copy of the text of General Dwight D. Eisenhower's "Order of the Day" released to Allied forces on the eve of the invasion are embossed on the left side of the butt stock of this model with the right side of the butt stock bearing a scene of soldiers advancing towards the shoreline of an invasion beach of Normandy.
- as sold by Springfield Armoury, this commemorative rifle is part of a production run of 1,944 examples.

Manufacturer

- "SPRINGFIELD ARMORY" is marked on the top rear of the receiver/frame.
- the manufacturer should not be confused with the original SPRINGFIELD ARMORY (the first U.S. Government Arsenal, started in 1790, officially opened in 1795, terminated production in 1968, and closed in 1975) which was located at Springfield, Massachusetts.

Action

- gas operated.

Serial Number

- the serial number is marked on the top rear of the receiver/frame.
- the right side of the receiver/frame is also marked with "XXXX of 1944", to indicate the limited issue nature of this rifle's production; this does not constitute the serial number.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- the calibre designation is marked on the top rear of the receiver/frame. - the calibre designation may also be marked on the right side of the barrel. - rifling characteristics: 6-grooves, 1 turn in 11 inches, right hand twist.
Shots	- this firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, eight cartridge, enbloc clip. - once inserted into the firearm, this clip cannot be recharged unless first emptied.

Notes

Make

- marked on the top rear of the receiver: U.S. RIFLE SPRINGFIELD ARMORY

Model

- Introduced in 1984.
- Based on the "M1 Garand" design.
- marked on the top rear of the receiver: U.S. RIFLE M1
- it is refered to in their catalog as the "M1 Tanker".
- this is a recent commercial manufacture of the short barreled U.S. Rifle, 30 M1 (originally built by the government as the prototype T26 only, popularly called the "Tanker" Garand); and for all intents, virtually identical to the original, even to the interchangeability of parts.

Manufacturer

- marked on the top of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- gas operated.
Serial Number	- marked on the top rear of the receiver: U.S. RIFLE SPRINGFIELD ARMORY (serial number)
Shots	- 8 shot enbloc clip. - The "M1 Garand" was introduced in 1936 with an 8 shot enbloc clip. - This firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, eight cartridge, enbloc clip; once inserted into the firearm, this clip cannot be recharged.
Remarks	- this is a commercial version/copy of the original Short barrelled U S Rifle M1 (known as the T-26) that was requested by General Douglas McArthur. It was developed as a short rifle suitable for jungle combat, reconnaisance units, and tank crews; but the war in the Pacific ended with the surrender by Japan, and the project was terminated.

Notes

Make

- "U.S. RIFLE" over "7.62 - mm M1A" over "SPRINGFIELD" over "ARMORY" over the serial number are marked on the top rear of the receiver/frame.

Model

- model designation is not marked on the firearm.
- "U.S. RIFLE" over "7.62 - mm M1A" over "SPRINGFIELD" over "ARMORY" over the serial number are marked on the top rear of the receiver/frame.
- the "M1A" model line was introduced in 1974.
- this rifle is an air cooled, gas operated, rotating bolt, magazine fed, semi-automatic only version of the "U.S. RIFLE Model M14".
- features include: a steel or stainless steel medium weight barrel; a multi slotted flash suppressor with or without a bayonet lug; Match grade gas cylinder, a dark gray phosphate finished "M1A" receiver/frame; a rotating breech-bolt activated by the gas-activated Match grade operating rod with an exposed operating handle on the right side; a tuned two stage trigger group; a detachable box magazine; a square post front sight and a Match grade aperture rear sight with half minute of angle adjustment for both windage and elevation; glass bedded one piece pistol grip stock with top hand guard in walnut or fiberglass or composite; a steel butt-plate with butt-trap.
- the "M1A National Match" differs from the "M1A Super Match" in that the National Match has a medium-weight barrel to comply with the definition of "military" rifle under National Match rules, while the Super Match has a heavy-weight match barrel (usually by Douglas, Hart, or Krieger).

Manufacturer

- "U.S. RIFLE" over "7.62 - mm M1A" over "SPRINGFIELD" over "ARMORY" over the serial number are marked on the top rear of the receiver/frame.

- NOTE: this manufacturer should not be confused with the original SPRINGFIELD ARMORY (the first U.S. Government Arsenal, started in 1790, officially opened in 1795, terminated production in 1968, and closed in 1975) which was located at Springfield Massachusetts.

Action

- gas operated.

Serial Number

- located at top rear of receiver/frame.
- has a six-digit number.

Barrel

- the barrel may have a flash hider installed, this accessory may not be included in barrel measurement. Overall length with flash hider is 635mm.

Calibre

- "U.S. RIFLE" over "7.62 - mm M1A" over "SPRINGFIELD" over "ARMORY" over the serial number are marked on the top rear of the receiver/frame.

Shots

- detachable box magazine.

Other Markings

- Marking on top rear of receiver/frame:
  U.S. RIFLE
(Calibre) M1A
SPRINGFIELD
  ARMORY
(Serial Number)

Remarks

- the main difference between the sub-models are: the "M1A" has a standard weight 559 mm barrel, standard military aperture rear sight with minute of angle adjustment, standard two stage trigger group; the "M1A National Match" has a medium weight 559 mm barrel, national match rear aperture sight with half a minute adjustment, tuned trigger group; the "M1A Super Match" has a heavy weight 559 mm barrel, national match rear aperture sight with half a minute adjustment, tuned trigger group; the "M1A/M21 Tactical Rifle" has a custom match 559 mm barrel, rear lugged receiver/frame, national match rear aperture sight with half a minute adjustment, tuned trigger group, and adjustable cheek piece on the stock, the "M1A-A1 Bush Rifle" has a 457mm A1 barrel, and the "M1A-A1 Scout Rifle" has a 457mm A1 barrel and a barrel mounted optical sight base.

Notes

Make

- "SPRINGFIELD" over "ARMORY" is marked on the top rear of the receiver/frame.

Model

- model designation is not marked on the firearm.
- "U.S. RIFLE" and "M1A" are marked on the top rear of the receiver/frame.
- "US Rifle M1A" model line was introduced in 1974.
- "US Rifle M1A Super Match" rifle is an air cooled, gas operated, rotating bolt, magazine fed, semi-automatic only version of the "U.S. RIFLE Model M14".
- features include: square post front sight and a Match grade half-MOA aperture rear sight; carbon steel or stainless steel heavy weight barrel with a multi slotted flash suppressor with or without a bayonet lug; Match grade gas cylinder; "M1A" rear lugged receiver/frame; rotating breech-bolt activated by the gas-activated Match grade operating rod with an exposed operating handle on the right side; tuned two stage trigger group; detachable box magazine release is located on the rear of the magazine well; one piece, glass bedded pistol grip stock with top hand guard in walnut or fiberglass or composite; steel butt-plate with butt-trap; dark gray phosphate finished.
- "M1A National Match" differs from the "M1A Super Match" in that the National Match has a medium-weight barrel to comply with the definition of "military" rifle under National Match rules, while the Super Match has a heavy-weight match barrel (usually by Douglas, Hart, or Krieger).

Manufacturer

- "SPRINGFIELD" over "ARMORY" is marked on the top rear of the receiver/frame.

Action

- gas operated.

Serial Number

- serial number is marked on the top rear of the receiver/frame.
- observed serial number consisted of six numbers without a letter prefix or suffix.

Barrel

- the barrel may have a flash hider installed, this accessory is not included in barrel measurement. Overall length with flash hider is 635mm.

Calibre

- calibre is marked on the top rear of the receiver/frame.

Shots

- detachable box magazine.

Other Markings

- Marking on top rear of receiver/frame:
  U.S. RIFLE
(Calibre) M1A
SPRINGFIELD
  ARMORY
(Serial Number)

Remarks

- the main difference between the sub-models are: the "M1A" has a standard weight 559 mm barrel, standard military aperture rear sight with minute of angle adjustment, standard two stage trigger group; the "M1A National Match" has a medium weight 559 mm barrel, national match rear aperture sight with half a minute adjustment, tuned trigger group; the "M1A Super Match" has a heavy weight 559 mm barrel, national match rear aperture sight with half a minute adjustment, tuned trigger group; the "M1A/M21 Tactical Rifle" has a custom match 559 mm barrel, rear lugged receiver/frame, national match rear aperture sight with half a minute adjustment, tuned trigger group, and adjustable cheek piece on the stock, the "M1A-A1 Bush Rifle" has a 457mm A1 barrel, and the "M1A-A1 Scout Rifle" has a 457mm A1 barrel and a barrel mounted optical sight base.

Notes

Make

- marked on the top rear of the receive "U.S. RIFLE CAL. 7.62mm - M1A SPRINGFIELD ARMORY".

Model

- model designation is not marked on the firearm.
- "U.S. RIFLE" and "M1A" are marked on the top rear of the receiver/frame.
- the "A1" in the model designation is for the short 457 mm "A1" barrel.
- this model was dropped in 1999.
- this rifle is an air cooled, gas operated, rotating bolt, magazine fed, semi-automatic only version of the "U.S. RIFLE Model M14".
- features include: a steel standard weight barrel; a multi slotted flash suppressor; a gas cylinder mounted under the barrel, a dark gray phosphate finished "M1A" receiver/frame; a rotating breech-bolt activated by the gas-activated standard grade operating rod with an exposed operating handle on the right side; a two stage trigger group; a detachable box magazine; a square post front sight and a MOA aperture rear sight; a one piece pistol grip stock and top hand guard in walnut or fiberglass or composite or a folding fiberglass stock with top hand guard; a steel butt plate or a rubber butt-pad.

Manufacturer

- the manufacturer should not be confused with the original SPRINGFIELD ARMORY (the first U.S. Government Arsenal, started in 1790, officially opened in 1795, terminated production in 1968, and closed in 1975) which was located at Springfield Massachusetts.
- "SPRINGFIELD ARMORY" is marked on the top rear of the receiver/frame.

Action

- gas operated.

Serial Number

- the serial number is marked on the top rear of the receiver/frame.
- the serial number may consist of a six (6) digit number.

Barrel

- the barrel may have a flash hider installed, this accessory is not included in barrel measurement.

Calibre

- the calibre designation is marked on the top rear of the receiver/frame.

Shots

- detachable box magazine.

Other Markings

- Marking on top rear of receiver/frame:
  U.S. RIFLE
(Calibre) M1A
SPRINGFIELD
  ARMORY
(Serial Number)

Remarks

- the main difference between the sub-models are: the "M1A" has a standard weight 559 mm barrel, standard military aperture rear sight with minute of angle adjustment, standard two stage trigger group; the "M1A National Match" has a medium weight 559 mm barrel, national match rear aperture sight with half a minute adjustment, tuned trigger group; the "M1A Super Match" has a heavy weight 559 mm barrel, national match rear aperture sight with half a minute adjustment, tuned trigger group; the "M1A/M21 Tactical Rifle" has a custom match 559 mm barrel, rear lugged receiver/frame, national match rear aperture sight with half a minute adjustment, tuned trigger group, and adjustable cheek piece on the stock, the "M1A-A1 Bush Rifle" has a 457mm A1 barrel, and the "M1A-A1 Scout Rifle" has a 457mm A1 barrel and a barrel mounted optical sight base.

Notes

Make

- marked on the top rear of the receiver/frame.

Model

- "U.S. RIFLE" and "M21" are marked on the top rear of the receiver/frame.
- this model was introduced in 1990.
- this rifle is an air cooled, gas operated, rotating bolt, magazine fed, semi-automatic only version of the "U.S. RIFLE Model M14".
- features include: a steel or stainless steel heavy weight barrel; a multi slotted flash suppressor with or without a bayonet lug; a Match grade gas cylinder, a dark gray phosphate finished "M1A" rear lugged receiver/frame; a rotating breech-bolt activated by the gas-activated Match grade operating rod with an exposed operating handle on the right side; a tuned two stage trigger group; a detachable box magazine; a square post front sight and a Match grade half-MOA aperture rear sight; a one piece pistol grip stock with adjustable cheek piece and top hand guard walnut or fiberglass or composite; a rubber butt-pad and bipod.

Manufacturer

- the manufacturer should not be confused with the original SPRINGFIELD ARMORY (the first U.S. Government Arsenal, started in 1790, officially opened in 1795, terminated production in 1968, and closed in 1975) which was located at Springfield Massachusetts.
- "SPRINGFIELD ARMORY" is marked on the top rear of the receiver/frame.

Action

- gas operated.

Serial Number

- located at rear of receiver/frame tang.
- has a six-digit number.

Barrel

- the barrel may have a flash hider installed, this accessory may not be included in barrel measurement. Overall length with flash hider is 635mm.

Calibre

- marked on the top rear of the receiver.

Shots

- detachable box magazine.

Other Markings

- Marking on top rear of receiver/frame:
  U.S. RIFLE
(Calibre) M1A
SPRINGFIELD
  ARMORY
(Serial Number)

Remarks

- the main difference between the sub-models are: the "M1A" has a standard weight 559 mm barrel, standard military aperture rear sight with minute of angle adjustment, standard two stage trigger group; the "M1A National Match" has a medium weight 559 mm barrel, national match rear aperture sight with half a minute adjustment, tuned trigger group; the "M1A Super Match" has a heavy weight 559 mm barrel, national match rear aperture sight with half a minute adjustment, tuned trigger group; the "M1A/M21 Tactical Rifle" has a custom match 559 mm barrel, rear lugged receiver/frame, national match rear aperture sight with half a minute adjustment, tuned trigger group, and adjustable cheek piece on the stock, the "M1A-A1 Bush Rifle" has a 457mm A1 barrel, and the "M1A-A1 Scout Rifle" has a 457mm A1 barrel and a barrel mounted optical sight base.

Notes

Make

- "Springfield Armory" trademark is marked on the receiver/frame.

Model

- "US RIFLE M25" is marked on the top rear of the receiver/frame.
- "Carlos Hathcock II" and "the outline of a scope reticle with a feather in the cross hairs" with "CARLOS" over top, "HATHCOCK" underneath, "LONG" on the left side and "TRANG" on the right side are marked on the receiver/frame.
- as this model is meant to commemorate Carlos Hathcock, a well known U.S. Marine Corps sniper in the Vietnam war, it may also be known as the "White Feather/Carlos Hathcock M25 Tactical Rifle".
- features include: Krieger carbon heavy profile barrel; McMillan fiberglass stock with spacer recoil pad system and adjustable cheek pad; parkerized finish; adjustable match trigger and a rear lugged receiver/frame.
- this model is usually equipped with an optical sight, and a Harris bi-pod with quick detachable stud.
- options may include: stainless steel barrel and choice of stock colour.

Action

- gas operated.

Serial Number

- serial number is marked on the top rear of the receiver/frame.
- observed serial number consisted of a two letter "WF" prefix and four numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel	- does not include the flash eliminator mounted at the muzzle.
Shots	- detachable box magazine.
Other Markings	- the left front of the receiver/frame is engraved with a feather super-imposed over a scope reticle surrounded by "Carlos, Hathcock, Long, Trang, (Vietnamese for "White Feather"). - the left rear of the receiver/frame carries a reproduction of Carlos Hathcock's signature.

Notes

Make

- marked "SPRINGFIELD ARMORY" on the right side of the slide.
- The United States of America formed its first goverment arsenal at Springfield, MA. in 1795 to produce arms and equipment for martial use. This arsenal operated under the name "Springfield Armory" (named by an Act of Congress in 1872). The Springfield National Armory ceased operation in 1968.
- "Springfield Armory Incorporated" was formed in 1974 by Elmer Ballance of the L H Gun Company. The L H Gun Company (located in Devine Texas, USA) had been manufacturing M14 type rifles, starting in 1971, with their own cast receiver/frame and military surplus parts which were sold as the model M1A. In June of 1974 the L H Gun Company moved to San Antonio, Texas to attempt to reduce costs, where the company failed financially in October 1974.
- During the production of M1A rifles by L H Gun Company the firm was renamed "Springfield Armory" and subsequently incorporated under this name in an effort to have the public identify the L H Gun Company products to the former government arsenal at Springfield, MA. USA.
- The company was reformed as "Sprinfield Armory Incorporated" and moved to Geneseo, Illinois in 1974 - 75 where it resumed operations under new management.

Model

- "XD-357" is marked on the left side of the slide.
- "XD" denotes X-treme Duty and "357" denotes the calibre as 357 SIG.
- this pistol is a version of the HS 2000 manufactured for import from Croatia by Springfield Armory.
- the XD series of pistols is available in three basic configurations; "Sub-Compact" with a 78mm barrel, "Service" model with a 104mm barrel and a "Tactical" model with a 127mm barrel.
- features include: black or olive drab polymer receiver/frame with a Bruniral (black) finished slide and cold hammer forged barrel; ambidextrous magazine release; dovetailed, fixed three-dot sights; cocked indicator at rear of slide; "USA" (Ultra Safety Assurance) action trigger mechanism with a trigger safety; accessory rails on the dust cover, and a grip safety at the rear of the receiver/frame.
- a ported version of this model, known as the XD-357 V-10 was introduced in 2003 that features a ported barrel and slide to reduce felt recoil.
- this pistol is available in calibre 9MM LUGER as the XD-9, in calibre 40 S&W as the XD-40, and in calibre 357 SIG as the XD-357.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "HS Produkt" is usually marked on the firearm.
Action	- recoil operated.
Serial Number	- numbered on the right side of the slide, the barrel hood, and on a metal plate inset into the underside of the dust cover/frame.
Shots	- detachable box magazine.
Other Markings	- the right side of the slide is marked "XD" and "Springfield Armory U.S.A.". - the right side of the receiver/frame has "Springfield Inc.Ge. IL." moulded in at the top of the grip, and "SA-XD" moulded into the bottom of the grip panel. - the left side of the slide is marked with the model designation "XD-357" and "Croatia". - the left side of the receiver/frame has "SA-XD" moulded into the bottom of the grip panel.

Notes

Make

- marked "SPRINGFIELD ARMORY" on the right side of the slide.
- the United States of America formed its first government arsenal at Springfield, MA. in 1795 to produce arms and equipment for martial use. This arsenal operated under the name "Springfield Armory" (named by an Act of Congress in 1872). The Springfield National Armory ceased operation in 1968.
- "Springfield Armory Incorporated" was formed in 1974 by Elmer Ballance of the L H Gun Company. The L H Gun Company (located in Devine Texas, USA) had been manufacturing M14 type rifles, starting in 1971, with their own cast receiver/frame and military surplus parts which were sold as the model M1A. In June of 1974 the L H Gun Company moved to San Antonio, Texas to attempt to reduce costs, where the company failed financially in October 1974.
- during the production of M1A rifles by L H Gun Company the firm was renamed "Springfield Armory" and subsequently incorporated under this name in an effort to have the public identify the L H Gun Company products to the former government arsenal at Springfield, MA. USA.
- the company was reformed as "Springfield Armory Incorporated" and moved to Geneseo, Illinois in 1974/ 75 where it resumed operations under new management.

Model

- introduced in 2004, the model designation is marked on the slide, the "40" that follows the "XD" designation denotes the calibre as 40 S&W, and may also be marked "Sub-Compact" on the slide assembly.
- this model is a more compact version of the model XD-9 with a shortened slide, barrel and receiver/frame.
- the XD series of pistols is available in three basic configurations; "Sub-Compact" with a 78mm barrel, "Service" model with a 104mm barrel and a "Tactical" model with a 127mm barrel.
- features include: black or olive drab polymer receiver/frame with an integral light mounting rail (Springfield Armory also offers the corresponding light as an accessory); Bruniral (black) finished steel slide and cold hammer forged barrel; three mechanical safeties, trigger safety, firing pin safety and grip safety; "USA" (Ultra Safety Assurance) trigger mechanism; loaded chamber indicator; ambidextrous magazine release; captive, dual recoil spring guide assembly; dovetailed three-dot sight system or Heinie Slant Pro straight 8 night sights.

Manufacturer

- "HS Produkt" is usually marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- recoil operated.
Serial Number	- numbered on the right side of the slide, the barrel, and on a metal plate inset into the underside of the receiver/frame. - observed serial numbers have consisted of a "US" prefix followed by six numbers. - serial number rationalization is unknown.
Calibre	- the calibre designation is marked on the chamber area of the barrel and is visible throught the ejection port when the slide is locked forward.
Shots	- detachable box magazine.
Importer	- marked on the right side of the receiver/frame.

Notes

Make

- "SPRINGFIELD ARMORY U.S.A." is marked on the right side of the slide.
- The United States of America formed its first goverment arsenal at Springfield, MA. in 1795 to produce arms and equipment for martial use. This arsenal operated under the name "Springfield Armory" (named by an Act of Congress in 1872). The Springfield National Armory ceased operation in 1968.
- "Springfield Armory Incorporated" was formed in 1974 by Elmer Ballance of the L H Gun Company. The L H Gun Company (located in Devine Texas, USA) had been manufacturing M14 type rifles, starting in 1971, with their own cast receiver/frame and military surplus parts which were sold as the model M1A. In June of 1974 the L H Gun Company moved to San Antonio, Texas to attempt to reduce costs, where the company failed financially in October 1974.
- During the production of M1A rifles by L H Gun Company the firm was renamed "Springfield Armory" and subsequently incorporated under this name in an effort to have the public identify the L H Gun Company products to the former government arsenal at Springfield, MA. USA.
- The company was reformed as "Springfield Armory Incorporated" and moved to Geneseo, Illinois in 1974 - 75 where it resumed operations under new management.

Model

- introduced in 2015.
- "XD- 45 ACP" and "SUB-COMPACT" is marked on the left side of the slide.
- this model is a more compact version of the model XD-45 with a shortened slide, barrel and receiver/frame.
- features include: black polymer receiver/frame with an integral light mounting rail (Springfield Armory also offers the corresponding light as an accessory); Bruniral (black) finished steel slide and cold hammer forged barrel; three mechanical safeties, trigger safety, firing pin safety and grip safety; "USA" (Ultra Safety Assurance) trigger mechanism; loaded chamber indicator; ambidextrous magazine release; captive, dual recoil spring guide assembly; dovetailed, three-dot sight system or flourescent front sight and two dot rear sight.

Manufacturer

- the crossed canon logo of "Springfield Armory" and "HS Produkt Karlovac Croatia" was observed, on a physical example, marked on the top of the slide.
- "MADE IN CROATIA" was observed, on a physical example, marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- recoil-operated.
Serial Number	- serial number is marked on a metal plate inset into the underside of the receiver/frame and repeated on the right side of the slide and the barrel. - serial number of an observed example consisted of a two letter prefix and six numbers.
Calibre	- was observed, on a physical example, marked on the barrel's chamber area visible through the ejection port.
Shots	- detachable box magazine.

Notes

Make

- marked "SPRINGFIELD ARMORY" on the right side of the slide.
- The United States of America formed its first goverment arsenal at Springfield, MA. in 1795 to produce arms and equipment for martial use. This arsenal operated under the name "Springfield Armory" (named by an Act of Congress in 1872). The Springfield National Armory ceased operation in 1968.
- "Springfield Armory Incorporated" was formed in 1974 by Elmer Ballance of the L H Gun Company. The L H Gun Company (located in Devine Texas, USA) had been manufacturing M14 type rifles, starting in 1971, with their own cast receiver/frame and military surplus parts which were sold as the model M1A. In June of 1974 the L H Gun Company moved to San Antonio, Texas to attempt to reduce costs, where the company failed financially in October 1974.
- During the production of M1A rifles by L H Gun Company the firm was renamed "Springfield Armory" and subsequently incorporated under this name in an effort to have the public identify the L H Gun Company products to the former government arsenal at Springfield, MA. USA.
- The company was reformed as "Sprinfield Armory Incorporated" and moved to Geneseo, Illinois in 1974 - 75 where it resumed operations under new management.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- model designation is marked on the left side of the slide as "XD-9", "XD" denotes Extreme Duty, "9" denotes the calibre as 9MM LUGER. - this pistol is a version of the HS 2000 manufactured for import from Croatia by Springfield Armory. - the XD series of pistols is available in three basic configurations; "Sub-Compact" with a 78mm barrel, "Service" model with a 104mm barrel and a "Tactical" model with a 127mm barrel. - features include: black or olive drab polymer receiver/frame with a Bruniral (black) finished slide and cold hammer forged barrel (in 2003 this model was introduced with a Bi-Tone finish that includes a matte silver/grey coloured slide); ambidextrous magazine release; dovetailed, fixed three-dot sights or a choice of Trijicon or Heinie Slant Pro night sights; cocked indicator at rear of slide; "USA" (Ultra Safety Assurance) action trigger mechanism with a trigger safety; accessory rails on the dust cover, and a grip safety at the rear of the receiver/frame. - a ported version of this model, known as the XD-9 V-10 was introduced in 2003 that features a ported barrel and slide to reduce felt recoil. - this pistol is available in calibre 9MM LUGER as the XD-9, in calibre 40 S&W as the XD-40, and in calibre 357 SIG as the XD-357.
Manufacturer	- "HS Produkt" is usually marked on the firearm.
Action	- recoil operated.
Serial Number	- serial number is marked on the right side of the slide, the barrel hood, and on a metal plate inset into the underside of the dust cover/frame.
Calibre	- calibre is marked on the barrel, visible through the ejection port.
Shots	- detachable box magazine.
Importer	- importer's markings on the right side of the receiver/frame.
Other Markings	- the right side of the slide is marked "XD" and "Springfield Armory U.S.A.". - the right side of the receiver/frame has "Springfield Inc.Ge. IL." moulded in at the top of the grip, and "SA-XD" moulded into the bottom of the grip panel. - the left side of the slide is marked with the model designation "XD-9" and "Croatia". - the left side of the receiver/frame has "SA-XD" moulded into the bottom of the grip panel.

Notes

Make

- marked "SPRINGFIELD ARMORY" on the right side of the slide.
- The United States of America formed its first government arsenal at Springfield, MA. in 1795 to produce arms and equipment for martial use. This arsenal operated under the name "Springfield Armory" (named by an Act of Congress in 1872). The Springfield National Armory ceased operation in 1968.
- "Springfield Armory Incorporated" was formed in 1974 by Elmer Ballance of the L H Gun Company. The L H Gun Company (located in Devine Texas, USA) had been manufacturing M14 type rifles, starting in 1971, with their own cast receiver/frame and military surplus parts which were sold as the model M1A. In June of 1974 the L H Gun Company moved to San Antonio, Texas to attempt to reduce costs, where the company failed financially in October 1974.
- During the production of M1A rifles by L H Gun Company the firm was renamed "Springfield Armory" and subsequently incorporated under this name in an effort to have the public identify the L H Gun Company products to the former government arsenal at Springfield, MA. USA.
- The company was reformed as "Springfield Armory Incorporated" and moved to Geneseo, Illinois in 1974 - 75 where it resumed operations under new management.

Model

- this pistol is a version of the HS 2000 manufactured for import from Croatia by Springfield Armory.
- the XD series of pistols is available in three basic configurations; "Sub-Compact" with a 78mm barrel, "Service" model with a 104mm barrel and a "Tactical" model with a 127mm barrel.
- features include: black polymer receiver/frame with an oversized beavertail and a Robar Industries NP3 finished slide and cold hammer forged barrel; ambidextrous magazine release; Dawson fiber optic front and steel rear three-dot sights; cocking indicator at rear of slide; "USA" (Ultra Safety Assurance) action trigger mechanism with a trigger safety; accessory rails on the dust cover and a grip safety at the rear of the receiver/frame.
- a standard version of this model with no extended beavertail, three-dot sights and a Bruniral finish is also available as the model XD-9 Tactical.
- this pistol is available in calibre 9MM LUGER as the XD-9 Tactical-Pro and in calibre 40 S&W as the XD-40 Tactical-Pro.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "HS Produkt" is usually marked on the firearm.
Action	- recoil operated.
Serial Number	- numbered on the right side of the slide, the barrel hood, and on a metal plate inset into the underside of the dust cover/frame.
Calibre	- the calibre designation is marked on the chamber portion of the barrel assembly.
Shots	- detachable box magazine.
Other Markings	- the right side of the slide is marked "XD" and "Springfield Armory U.S.A.". - the right side of the receiver/frame has "Springfield Inc.Ge. IL." moulded in at the top of the grip, and "SA-XD" moulded into the bottom of the grip panel. - the left side of the receiver/frame has "SA-XD" moulded into the bottom of the grip panel.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- "SPRINGFIELD ARMORY USA" is marked on the right side of the slide.
- "SPRINGFIELD ARMORY", "PRODUKT KARLOVAC" and "CROATIA" was observed marked on the top side of the slide.
- "MADE IN CROATIA" and "SPRINGFIELD INC. GENESEO, IL." is marked on the right side of the receiver/frame.
- "XDM" is marked on the either sides of the grips.
- The United States of America formed its first government arsenal at Springfield, MA. in 1795 to produce arms and equipment for martial use. This arsenal operated under the name "Springfield Armory" (named by an Act of Congress in 1872). The Springfield National Armory ceased operation in 1968.
- "Springfield Armory Incorporated" was formed in 1974 by Elmer Ballance of the L H Gun Company. The L H Gun Company (located in Devine Texas, USA) had been manufacturing M14 type rifles, starting in 1971, with their own cast receiver/frame and military surplus parts which were sold as the model M1A. In June of 1974 the L H Gun Company moved to San Antonio, Texas to attempt to reduce costs, where the company failed financially in October 1974.
- During the production of M1A rifles by L H Gun Company the firm was renamed "Springfield Armory" and subsequently incorporated under this name in an effort to have the public identify the L H Gun Company products to the former government arsenal at Springfield, MA. USA.
- The company was reformed as "Sprinfield Armory Incorporated" and moved to Geneseo, Illinois in 1974 - 75 where it resumed operations under new management.

Model

- "XDM-40" and the barrel length in inches may be marked on the left side of the slide.
- "XDM" is marked on the left side of the slide and on both sides of the grip.
- "XD" denotes Extreme Duty, "M" for modernized, "40" denotes the calibre as 40 S&W.
- "XDM-40" is a modernized version of the XD-40 manufactured for import from Croatia by Springfield Armory.
- XDM-40 improvements include six (6) deeper and longer slide serrations, and contoured grip frame angles with deeper serrations.
- features include: hammer forged match grade barrel; stainless steel slide with front and rear grip serrations; slide has a melonite black oxide finish or bead blasted matte stainless steel finish; striker fire cocked indicator on the rear of the slide; loaded chamber indicator on the top of the slide; reset trigger with shorter travel and reset; ambidextrous magazine release; black polymer receiver/frame with square front trigger guard, double slot accessory rail, grip safety and interchangeable backstrap in three different sizes; dovetail steel front and rear sights with three (3) dots or fiber optic front sight and adjustable square notch rear sight or adjustable fiber optic front and rear sight.
- overall length with a 96 mm (3.8") barrel is 178 mm (7.0"), and average weight is 0.794 kg (1.75 lbs).
- overall length with a 114 mm (4.5") barrel is 203 mm (8.0"), and average weight is 0.907 kg (2.0 lbs).

Manufacturer

- "HS Produkt" is usually marked on the firearm.

Action

- recoil operated.

Serial Number

- serial number is marked on a metal plate inset into the front underside of the receiver/frame and repeated on the right side of the slide and the barrel.
- observed serial number had a two letter prefix and six numbers.

Calibre

- calibre designation is usually marked on the left side of the slide.
- calibre designation is marked on the barrel, visible through the ejection port.

Shots

- detachable box magazine.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- "SPRINGFIELD ARMORY USA" is marked on the right side of the slide.
- "SPRINGFIELD ARMORY", "PRODUKT KARLOVAC" and "CROATIA" was observed marked on the top side of the slide.
- "MADE IN CROATIA" and "SPRINGFIELD INC. GENESEO, IL." is marked on the right side of the receiver/frame.
- "XDM" is marked on either sides of the grips.
- the United States of America formed its first government arsenal at Springfield, MA. in 1795 to produce arms and equipment for martial use. This arsenal operated under the name "Springfield Armory" (named by an Act of Congress in 1872). The Springfield National Armory ceased operation in 1968.
- "Springfield Armory Incorporated" was formed in 1974 by Elmer Ballance of the L H Gun Company. The L H Gun Company (located in Devine Texas, USA) had been manufacturing M14 type rifles, starting in 1971, with their own cast receiver/frame and military surplus parts which were sold as the model M1A. In June of 1974, the L H Gun Company moved to San Antonio, Texas to attempt to reduce costs, where the company failed financially in October 1974.
- during the production of M1A rifles by L H Gun Company the firm was renamed "Springfield Armory" and subsequently incorporated under this name in an effort to have the public identify the L H Gun Company products to the former government arsenal at Springfield, MA. USA.
- the company was reformed as "Sprinfield Armory Incorporated" and moved to Geneseo, Illinois in 1974 - 75 where it resumed operations under new management.

Model

- "XDM-9" and the barrel length in inches is marked on the left side of the slide.
- "XDM" is marked on the left side of the slide and on both sides of the grip.
- "XD" denotes Extreme Duty, "M" for modernized, "9" denotes the calibre as 9MM LUGER.
- "XDM-9" is a modernized version of the XD-9 manufactured for import from Croatia by Springfield Armory.
- XDM-9 improvements include six (6) deeper and longer slide serrations, and contoured grip frame angles with deeper serrations.
- features include: hammer forged match grade barrel; stainless steel slide with front and rear grip serrations; slide has a black oxide finish or bead blasted matte stainless steel finish; striker fire cocked indicator on the rear of the slide; loaded chamber indicator on the top of the slide; reset trigger with shorter travel and reset; ambidextrous magazine release; black polymer receiver/frame with square front trigger guard, double slot accessory rail, grip safety and interchangeable backstrap in three different sizes; dovetail steel front and rear sights with three (3) dots or fiber optic front sight and adjustable square notch rear sight or adjustable fiber optic front and rear sight.
- overall length with a 96 mm (3.8") barrel is 178 mm (7.0"), average weight is 0.780 kg (1.72 lbs).
- overall length with a 114 mm (4.5") barrel is 203 mm (8.0"), average weight is 0.907 kg (2.0 lbs).
- available with a threaded barrel, thread protector and raised sights.
- slide may be adapted for use with optic sight.

Manufacturer

- "PRODUKT KARLOVAC" and "CROATIA" was observed marked on the top side of the slide.
- "MADE IN CROATIA" and "SPRINGFIELD INC. GENESEO, IL." is marked on the right side of the receiver/frame.

Action

- recoil operated.

Serial Number

- serial number is marked on a metal plate inset into the front underside of the receiver/frame and repeated on the right side of the slide and the barrel.
- observed serial number had a two letter prefix and six numbers.

Calibre

- calibre designation may be marked on the left side of the slide.
- calibre designation may be marked on the barrel, visible through the ejection port.

Shots

- detachable box magazine.

Notes

Make

- "SPRINGFIELD ARMORY U.S.A." is marked on the right side of the slide.
- the United States of America formed its first government arsenal at Springfield, MA. in 1795 to produce arms and equipment for martial use. This arsenal operated under the name "Springfield Armory" (named by an Act of Congress in 1872). The Springfield National Armory ceased operation in 1968.
- "Springfield Armory Incorporated" was formed in 1974 by Elmer Ballance of the L H Gun Company. The L H Gun Company (located in Devine Texas, USA) had been manufacturing M14 type rifles, starting in 1971, with their own cast receiver/frame and military surplus parts which were sold as the model M1A. In June of 1974 the L H Gun Company moved to San Antonio, Texas to attempt to reduce costs, where the company failed financially in October 1974.
- during the production of M1A rifles by L H Gun Company the firm was renamed "Springfield Armory" and subsequently incorporated under this name in an effort to have the public identify the L H Gun Company products to the former government arsenal at Springfield, MA. USA.
- the company was reformed as "Springfield Armory Incorporated" and moved to Geneseo, Illinois in 1974 - 75 where it resumed operations under new management.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- introduced in 2013.
- "XDS-9" and "3.3" is marked on the left side of the slide.
- "XDS" is marked on the right side of the slide and on the grips.
- this compact striker fired pistol is a slimmer version of the XD family with a single stack magazine.
- features include: fiber optic front sight and a steel dovetail rear sight; round rifled barrel; flat sided steel slide with rear serrations and loaded chamber indicator; synthetic receiver/frame with integral accessory rail forward of the undercut square trigger guard; trigger safety and grip safety; ambidextrous magazine release; black; two-tone; grey; and black with beige finish.
- overall length with a 84mm (3.3") barrel is 160mm; average weight is 0.6kg (22 oz).

Manufacturer

- "Springfield Armory", "HS Produkt Karlovac", and "Croatia" are usually marked on the top of the slide.
- "MADE IN CROATIA" is usually marked on the left side of the receiver/frame.
- "Springfield Armory", "HS Produkt Karlovac", and "Croatia" are usually marked on the top of the slide.
- "MADE IN CROATIA" is usually marked on the left side of the receiver/frame.
- the United States of America formed its first government arsenal at Springfield, MA. in 1795 to produce arms and equipment for martial use. This arsenal operated under the name "Springfield Armory" (named by an Act of Congress in 1872). The Springfield National Armory ceased operation in 1968.

FRT Report

Firearm Reference Number (FRN): 100435
Make: Springfield Arms
Model: Dragoon

Summary

Make:	Springfield Arms
Model:	Dragoon
Manufacturer:	Springfield Arms
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
100435 - 1	40 PERCUSSION	6	152	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the topstraps on all of these revolvers are commonly marked only "SPRINGFIELD ARMS CO."

Model

- model is not marked on the firearm.
- this is one of four basic patterns of the first model of revolver that Springfield Arms produced; they can all be distinguished from later Springfield arms revolvers by the fact that they all have a hammer mounted on the right sideplate. Later-production Springfield Arms revolvers all have a hammer mounted in a central slit on the frame.
- these revolvers all have a "pepperbox"-style grip, with the grip and tangs protruding directly out the rear of the standing breech, and a topstrap joining the standing breech and barrel assembly.
- later production Dragoons will have a underbarrel loader/rammer assembly, and these revolvers are seen with both wooden and cast metal grips.

Manufacturer

- the Springfield Arms Company was a short lived competitor with Colt, based in Springfield, Massachusetts, from 1850 to approximately 1852. They were forced out of business by legal action from Colt, who claimed several instances of patent infringement.

Action

- single action percussion revolver.

Serial Number

- numbered on receiver/frame.

Firearm Reference Number (FRN): 136208
Make: Springfield Arms
Model: Jaquiths Patent 1838

Summary

Make:	Springfield Arms
Model:	Jaquiths Patent 1838
Manufacturer:	Springfield Arms
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
136208 - 1	31 PERCUSSION	6	102	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
136208 - 2	31 PERCUSSION	6	127	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
136208 - 3	31 PERCUSSION	6	152	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SPRINGFIELD ARMS CO." is marked on the firearm.

Model

- manufactured circa 1851.
- "JAQUITH'S PATENT 1838" is marked on the receiver/frame.
- Springfield Armsthis manufactured three basic patterns of the belt model revolvers under the Jaquith's Patent and the Warner's Patent; they have a hammer mounted in a central slit on the frame, with a round barrel.
- these revolvers all have a "pepperbox"-style grip, with the grip and tangs protruding directly out the rear of the standing breech, and a topstrap joining the standing breech and barrel assembly.
- two-piece walnut grips, and a flat-sided iron frame with blued or color case hardened finish.
- these revolvers were manufactured in both single trigger and double trigger versions; in the double trigger versions, the front "trigger" revolves the cylinder while the back trigger acts as a sear to drop the hammer. One variation of these revolvers strongly resembles the double trigger 36 Percussion Navy model, only in 31 Percussion.

Manufacturer

- the Springfield Arms Company was a short lived competitor with Colt, based in Springfield, Massachusetts, from 1850 to approximately 1852. They were forced out of business by legal action from Colt, who claimed several instances of patent infringement.

Serial Number

- numbered on receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks - these revolvers were produced after Colt's legal victory, and were simply an attempt at disposing of stock on hand.

22243 - 1	30 RF	5	79	Antique AFR, Section 1, para. 6	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SPRINGFIELD ARMS CO. MASS." is marked on the topstrap.

Model

- model designation is not marked on the firearm.
- approximately 6,000 made circa 1863.
- production was cut short as a result of a successful law suite launched by Smith & Wesson for infringement on their Rollin-White patent. As part of the settlement to Smith & Wesson, Springfield Arms turned over 1,513 of these and added the markings "Made for Smith & Wesson Pat. 1855" to the cylinder and/or barrel.
- features include: solid top receiver/frame; fixed cylinder; octagonal barrel; brass, sheathed trigger; silver plated finish with iron parts blued; wooden grip panels; square butt.

Manufacturer

- "SPRINGFIELD ARMS CO. MASS." is marked on the topstrap.

Serial Number

- serial number may be marked on the left side of the receiver/frame underneath the grip panel.

Notes

Make

- "SPRINGFIELD ARMS Co." and "Chicopee Falls, Mass " is marked on the firearm.
- "Springfield" was a trade name used on firearms manufactured by the Savage Arms Corporation and the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on rifles and shotguns manufactured by the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on revolvers and shotguns manufactured by the Crescent Firearms Company.
- "Springfield Arms Co." was a manufacturer of percussion revolvers located in Springfield, Massachusetts, U.S.A. between 1851 and 1869.

Model

- this is a generic entry. Other entries exist which may better describe the firearm being identified.
- features may include: exposed hammers or hammerless design, blued metal, walnut stocks, stock checkering, top-break opening, extractors and/or ejectors, double triggers, automatic tang safety, ribbed barrel.
- these are plain utillity type guns.

Manufacturer

- "J. Stevens Arms Company." is marked on the firearm.

Action

- side by side pattern.

Serial Number

- serial number is located on the side of the the receiver/frame.
- samples have been reported without serial numbers or with five digits or with letters "E" and "T" prefix and five digits.
- NOTE: "5100" is not a serial number, this is a Stevens model number.

Other Markings

- "PAT. APR. 20, 1915" or "PAT. APRIL 20, 1915" may be marked on the side og the receiver/frame.

Notes

Make

- "SPRINGFIELD" over "AUTOMATIC SHOTGUN" over "SPRINGFIELD ARMS CO. UTICA N.Y. U.S.A." is marked on the left side of the receiver/frame.
- "Springfield" was a trade name used on firearms manufactured by the Savage Arms Corporation and the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on rifles and shotguns manufactured by the Savage Arms Corporation and J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on revolvers and shotguns manufactured by the Crescent Firearms Company.
- "Springfield Arms Co." was a manufacturer of percussion revolvers located in Springfield, Massachusetts, U.S.A. between 1851 and 1869.

Model

- in 1930 Savage introduced a line of semi-automatic shotguns based on the Browning model "Auto-5" design that was being produced by Fabrique Nationale of Herstal, Belgium. This model used the long recoil method of operation. Savage offered several variations that were based on this design, all shared the same basic features but differed in the style of barrel and/or choke system. Savage further distinguished these models in factory literature by the number of shots each model could hold, catalogues referred to five and three shot capacities in certain models but these numbers included one cartridge in the chamber so actual capacities were four and two respectively.
- "SPRINGFIELD" over AUTOMATIC SHOTGUN" is marked on the left side of the receiver/frame.
- this firearm resembles a Browning Auto 5.
- features include: round smoothbore barrel with a bead front sight; solid top receiver/frame with right side ejection and bottom loading; action release button located on the right side of the receiver/frame; cross bolt safety located on the rear of the trigger guard; walnut forearm and semi-pistol grip buttstock; blued finish.

Manufacturer

- manufacturer's name is not marked on the firearm.

Action

- recoil operated.

Serial Number

- serial number was observed marked on the underside of the receiver/frame.
- observed serial number consisted of four numbers without a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- "PROOF TESTED 12 GAUGE" and "S-P" inside a circle over "FULL" was observed marked on the barrel.
Shots	- tubular magazine mounted under the barrel.
Other Markings	- "S-P" inside a circle over "FULL" was observed marked on the barrel.

Notes

Make

- "SPRINGFIELD ARMS CO." is marked on the firearm.

Model

- manufactured circa 1851.
- "WARNER'S PATENT" over "JAN. 1851" is marked on the receiver/frame.
- Springfield Armsthis manufactured three basic patterns of the belt model revolvers under the Jaquith's Patent and the Warner's Patent; they have a hammer mounted in a central slit on the frame, with a round barrel.
- these revolvers all have a "pepperbox"-style grip, with the grip and tangs protruding directly out the rear of the standing breech, and a topstrap joining the standing breech and barrel assembly.
- two-piece walnut grips, and a flat-sided iron frame with blued or color case hardened finish.
- these revolvers were manufactured in both single trigger and double trigger versions; in the double trigger versions, the front "trigger" revolves the cylinder while the back trigger acts as a sear to drop the hammer. One variation of these revolvers strongly resembles the double trigger 36 Percussion Navy model, only in 31 Percussion.

Manufacturer

- the Springfield Arms Company was a short lived competitor with Colt, based in Springfield, Massachusetts, from 1850 to approximately 1852. They were forced out of business by legal action from Colt, who claimed several instances of patent infringement.

Serial Number

- numbered on receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model: Warners Patent 1851 Pocket

Summary

Make:	Springfield Arms
Model:	Warners Patent 1851 Pocket
Manufacturer:	Springfield Arms
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
100495 - 1	28 PERCUSSION	6	64	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
100495 - 2	28 PERCUSSION	6	70	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the topstraps on these revolvers are commonly marked:
"SPRINGF'D ARMS CO."
or
"WARNERS PATENT / JAN. 1851",
or
"WARNER'S PATENT / JAMES WARNER, SPRINGFIELD, MASS",
or with no markings at all.

Model

- "Warners Patent/Jan. 1851" or "Warners Patent/James Warner" may be marked on firearm.
- this is one of four basic patterns of the "Pocket" revolver that Springfield Arms produced; they have a hammer mounted in a central slit on the frame, with a round barrel.
- these revolvers all have a "pepperbox" style grip, with the grip protruding directly out the rear of the standing breech, and a topstrap joining the standing breech and barrel assembly.
- two-piece walnut grips, and a round or flat-sided iron receiver/frame with blued or color-case-hardened finish.
- these revolvers are seen in ring-trigger, single-trigger, and double-trigger versions; in the double trigger versions, the front "trigger" revolves the cylinder while the back trigger acts as a sear to drop the hammer.

Manufacturer

- the Springfield Arms Company was a short lived competitor with Colt, based in Springfield, Massachusetts, from 1850 to approximately 1852. They were forced out of business by legal action from Colt, who claimed several instances of patent infringement.

Serial Number

- numbered on the receiver/frame.

FRT Report

Firearm Reference Number (FRN): 163406
Make: Sprint
Model: Sprint

Summary

Make:	Sprint
Model:	Sprint
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	ITALY
Serial Numbering:	
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
163406 - 1	22 SHORT	8	51	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Non-Commercial Customization	

Notes

Make

- "SPRINT" over "PAT.PEND." is marked on the left side of the receiver/frame.

Model

- "SPRINT" over "PAT.PEND." is marked on the left side of the receiver/frame.
- this is a 6mm Flobert blank gun converted to fire 22 SHORT ammunition.
- features include: round barrel with half moon front sight; painted alloy construction; fluted cylinder; double action trigger mechanism; top break, hinged receiver/frame with a knurled cylinder axis pin that also serves as the opening release; black or brown synthetic grips.

Canadian Law Comments

- some examples of the Sprint model blank gun have been found to be readily and easily converted to discharge conventional bulleted ammunition in a relatively short time period with relative ease.

Notes

Make

- "SPS" or "S.P.S." is marked on the left side of the slide.
- "SPS" is usually marked on the grip plates.
- "SPS" is a trade name/trademark used by "DC Custom Armeros".

Model

- this is a modular pistol that is very similar in design to the STI International model 2011 pistols.
- uses the 1911 type of locked breech, recoil operation and design.
- it can be ordered as a component receiver/frame only or in a wide variety of calibres and styles.
- features may include: long receiver/frame and slide or standard length, optical or iron sights, different coloured grip assemblies, plain barrel, hybrid or conventional compensators, standard or heavy barrels.

Manufacturer

- DC Custom Armeros was established circa 1997.
- DC Custom Armeros is located in Ripollet, Barcelona, Spain.
- DC Custom Armeros is a high tech manufacturer of 1911 type handguns.
- DC Custom Armeros products are sold under the "SPS" trade name/trademark.

Action

- recoil operated.

Serial Number

- serial number is marked on the right side of the dust shield.
- the manufacturer will serialize to meet the customer's request.
- receiver/frames have been shipped internationally without serial numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine.
Other Markings	- "WORLD CUSTOM" is usually marked on the left side of the slide. - "PLUS" may be marked on the right side of the slide.
Remarks	- this model can be configured to meet the requirements of most of the action pistol disciplines and may be converted by simply changing components.

Notes

Make

- "SPS" or "S.P.S." is marked on the left side of the slide.
- "SPS" is usually marked on the grip plates.
- "SPS" is a trade name/trademark used by "DC Custom Armeros".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- introduced in 2005. - "PELIKANO" is marked on the left side of the slide along with a pelican logo. - "2011 Pelikano" is a modular pistol that is very similar in design to the STI International model 2011 pistols. - designed for competition shooting in the I.P.S.C. standard division. - this firearm has a distinctive heavy "lump" at the forward end of the dust-cover, resembling a pelican's beak when full. This additional weight is intended to dampen recoil and provide faster follow-up shots when competing. - features include: dove tail front sight and an adjustable rear sight; round bull barrel; flat sided slide with right side ejection and rear gripping serration; 2011 modular type steel receiver/frame; skeletonized hammer and trigger; ambidextrous oversized safety; aluminum extended magazine catch; polymer grip with an integral magazine well; hard chrome finish. - overall length is 218 mm (8 5/8").
Manufacturer	- DC Custom Armeros was established circa 1997. - DC Custom Armeros is located in Ripollet, Barcelona, Spain. - DC Custom Armeros is a high tech manufacturer of 1911 type handguns. - DC Custom Armeros products are sold under the "SPS" trade name/trademark.
Action	- recoil operated.
Serial Number	- serial number is marked on the receiver/frame. - serial number rationalization is unknown.
Calibre	- the calibre designation is usually marked on the firearm and/or on the magazine.
Shots	- detachable box magazine located in the grip.

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
16673 - 2	22 RF	7	54	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	
16673 - 1	22 RF	7	64	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SPY" is marked on the top of the barrel; "PAT'D APR. 23 1878" is marked on the left side of the barrel.
- "PAT'D APR. 23 1878" represents the date that patent number 202,627 was assigned to William H. Bliss of Norwich, Connecticut.
- "Spy" was a brand/trade name used by the Norwich Pistol Company/Norwich Falls Pistol Company of Norwich, Connecticut.

Model

- "SPY" is marked on the top of the barrel; "PAT'D APR. 23 1878" is marked on the left side of the barrel.
- "PAT'D APR. 23 1878" represents the date that patent number 202,627 was assigned to William H. Bliss of Norwich, Connecticut.
- this firearm would have been manufactured circa 1873 to 1887.
- this type of handgun is commonly referred to as a "Suicide Special".
- features include: solid receiver/frame; will have the W.H. Bliss patented removable circular side plate with a slot on the left side of the receiver/frame; single action spur trigger; fluted cylinder with locking notches at the rear; cylinder pin release is a blade-type located on the front of the receiver/frame; round barrel; brass half-disc blade front sight; square butt grip frame; case hardened trigger and hammer; nickel plated finish; grips are checkered black hard rubber; may have light engraving on the barrel and/or receiver/frame.

Manufacturer

- manufacturer's name is not marked on the firearm; this firearm was made by the Norwich Pistol Co./Norwich Falls Pistol Co.
- "PAT'D APR. 23 1878" is marked on the barrel.
- "PAT'D APR. 23 1878" represents the date that patent number 202,627 was assigned to William H. Bliss of Norwich, Connecticut.
- W.H. Bliss was the plant superintendent of the Norwich Pistol Co. (circa 1873 to 1881) and its successor the Norwich Falls Pistol Co.(circa 1882 to 1887). He was not affiliated in any way with the company of Bliss & Goodyear of New Haven, Connecticut.

Serial Number

- serial numbers are usually marked on the left side of the grip frame.
- serial numbers are numeric only without prefix or suffix.

Notes

Make

- the make is marked on the barrel.
- Squires Bingham was founded in Manila, the Philippines in 1905, by two English gentlemen, Roy Squires and William Bingham. The operation was essentially a retail store. Circa 1941-46, Don Celso S Tuason purchased the store. By 1952 the Tuason family expanded the business into a firearms manufacturer known as the Squires Bingham Manufacturing Company. In 1980 the manufacturing company was renamed ARMSCOR. Throughout the life of the Squires Bingham Manufacturing Company the principle brand names used by the firm were Squires Bingham, Squibman and SB.
- in 1980 the manufacturing company was renamed "ARMSCOR". Throughout the life of the Squires Bingham Manufacturing Company the principle brand names used by the firm were Squires Bingham, Squibman and SB. After the manufacturing organization ARMSCOR took over as the parent company the brand name of the firearms gradually changed to MAKE "ARMSCOR" and the MANUFACTURER'S name to "ARMS CORPORATION OF THE PHILLIPINES". Today, (2000) the name Squires Bingham is used by the company that distributes "ARMSCOR" products world-wide. The firm ARMSCOR also manufactures ammunition.

Model

- samples have been noted with "100D" marked on receiver/frame and/or "M100D" marked on the barrel.
- features on one sample examined included: blued finish; brown plastic grips; ventilated rib on the top of the barrel; ramp front sight with an adjustable rear sight; double action trigger mechanism.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- samples have been noted with and without an alpha character prefix.
Importer	- the importer's name is usually marked on the barrel.

122254 - 1	22 LR	10	575	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Squires Bingham" is marked on the barrel.
- "SB" intertwined is marked on the left side of the barrel.
- "SB" intertwined was a logo used by "Squires Bingham" and "Arms Corporation of the Philippines (Armscor)".
- Squires-Bingham was founded in Manila, the Philippines in 1905, by two English gentlemen, Roy Squires and William Bingham. The operation was essentially a retail store. Circa 1941-46, Don Celso S Tuason purchased the store. By 1952 the Tuason family expanded the business into a firearms manufacturer known as the Squires Bingham Manufacturing Company. In 1980 the manufacturing company was renamed ARMSCOR. Throughout the life of the Squires Bingham Manufacturing Company the principle brand names used by the firm were Squires Bingham, Squibman and SB.

Model

- the model designation is marked on the barrel. This model is also known as "M14D".
- this model is a "Deluxe' version of the Squires Bingham model 14.
- features include: blued finish; select mahogany Monte Carlo style stock with a raised cheek-piece and hand cut checkering on the wrist and forend; barrel mounted rear sight that is adjustable for windage and elevation and a ramp mounted bead front sight; safety mounted on the right side of the receiver/frame.

Manufacturer

- the manufacturer's name is marked on the right side of the barrel.

Action

- turn-bolt operated.

Serial Number

- the sample examined was numbered on the right side of the receiver/frame, incorporated an alpha character prefix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- the calibre designation will usually be marked on the left side of the barrel.
Shots	- detachable box magazine.
Importer	- the importers name was marked on the left side of the barrel on the sample examined (sample examined was imported by Ruko of Canada).

Notes

Make

- "SQUIRES BINGHAM" is marked on the right side of the barrel.
- "SB" intertwined is marked on the left side of the barrel.
- "SB" intertwined was a logo used by "Squires Bingham" and "Arms Corporation of the Philippines (Armscor)".
- Squires Bingham was founded in Manila, the Philippines in 1905, by two English gentlemen, Roy Squires and William Bingham. The operation was essentially a retail store. Circa 1941-46, Don Celso S Tuason purchased the store. By 1952 the Tuason family expanded the business into a firearms manufacturer known as the Squires Bingham Manufacturing Company. In 1980 the manufacturing company was renamed ARMSCOR. Throughout the life of the Squires Bingham Manufacturing Company the principle brand names used by the firm were Squires Bingham, Squibman and SB.
- In 1980 the manufacturing company was renamed "ARMSCOR". Throughout the life of the Squires Bingham Manufacturing Company the principle brand names used by the firm were Squires Bingham, Squibman and SB. After the manufacturing organization ARMSCOR took over as the parent company the brand name of the firearms gradually changed to MAKE "ARMSCOR" and the MANUFACTURER'S name to "ARMS CORPORATION OF THE PHILLIPINES". Today, (2000) the name Squires Bingham is used by the company that distributes "ARMSCOR" products world-wide. The firm ARMSCOR also manufactures ammunition.

Model

- "SQUIRES BINGHAM MODEL 20P" is marked on the right side of the barrel.
- "P" in the model designation denotes "Plain".
- "M20P" was also sold under the Armscor trade name.
- "M20P" is a semi-automatic, magazine fed sporting rifle.
- features include: round tapered rifled barrel with hooded bead front sight and adjustable rear sight; tubular steel receiver/frame with right side case deflector, ejection port, cocking handle and manual safety lever; receiver/frame is grooved for scope mounting; magazine release is located on the rear of the magazine well; one piece wood pistol grip stock with butt plate; blue finish.

Manufacturer

- "MFTD. BY ARMS CORPORATION" over "OF THE PHILIPPINES" is marked on the right side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- blowback operated.
Serial Number	- serial number is marked on the right side of the receiver/frame. - observed serial number consisted of a letter "A" prefix and six numbers.
Calibre	- calibre is marked on the left side of the barrel.
Shots	- detachable box magazine.
Importer	- the importer's name is usually marked on the barrel.

Notes

Make

- "SQUIRES BINGHAM" is marked on the barrel and/or receiver/frame.
- Squires Bingham was founded in Manila, the Philippines in 1905, by two English gentlemen, Roy Squires and William Bingham. The operation was essentially a retail store. Circa 1941-46, Don Celso S Tuason purchased the store. By 1952 the Tuason family expanded the business into a firearms manufacturer known as the Squires Bingham Manufacturing Company. In 1980 the manufacturing company was renamed ARMSCOR. Throughout the life of the Squires Bingham Manufacturing Company the principle brand names used by the firm were Squires Bingham, Squibman and SB.
- In 1980 the manufacturing company was renamed "ARMSCOR". Throughout the life of the Squires Bingham Manufacturing Company the principle brand names used by the firm were Squires Bingham, Squibman and SB. After the manufacturing organization ARMSCOR took over as the parent company the brand name of the firearms gradually changed to MAKE "ARMSCOR" and the MANUFACTURER'S name to "ARMS CORPORATION OF THE PHILLIPINES". Today, (2000) the name Squires Bingham is used by the company that distributes "ARMSCOR" products world-wide. The firm ARMSCOR also manufactures ammunition.

Model

- "M30" or "MODEL 30" may be marked on the barrel.
- "M30" was available in several configurations for sporting and military/police use.
- features include: round smoothbore barrel with a bead front sight; solid top steel receiver/frame with right side ejection and bottom loading port; single action bar; cross bolt safety is located on the front of the trigger guard; action release is located on the rear left side of the trigger guard; synthetic or wood ribbed forearm and pistol grip buttstock; blue/black metal finish.

Manufacturer

- "MFTD. BY ARMS CORPORATION OF THE PHILIPPINES" may be marked on the right side of the barrel.
- "Made in the Philippines" may be marked on the right side of the receiver/frame.

Serial Number

- serial number is located on the underside of the receiver/frame forward of the loading port.
- observed serial number consisted of a letter "A" prefix and six numbers.

Calibre

- gauge and chamber length are usually marked on the side of the barrel.

Shots

- tubular magazine is mounted under the barrel.

Importer

- the importers name is usually marked on the barrel.
- K-Mart was one of the importers of this model into Canada. The K-Mart name may be marked on the barrel along with the corporate postal code M5B-1L3 (sometimes misinterpreted as a K-Mart model designation).

Notes

Make

- "SRM Arms, Inc. Meridian, ID, USA" is marked on the side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- Introduced in 2008.
- "SRM" model 12 series was introduced in 2008.
- "12" model is a semi-automatic high capacity shotgun uses a split receiver/frame assembly similar to the AR-15/M-16 rifle.
- this is a generic record for the SRM model 12 Semi-Automatic Shotgun.
- features include: round barrel; no fixed sights; three sided integrated picatinny rail/ barrel shroud; flat top upper receive with one piece bolt carrier group; pushpin method of disassembly; lower receiver/frame has ambidextrous controls; magazine tension /release latch and an ambidextrous thumb lever for manually rotating the magazine is located on the barrel as part of the front sight mount; blue/black finish.
- overall length with a 229mm (9.0") barrel is 635mm (25.0") and average weight of 3.3 kgs (7.25 lbs).
- overall length with a 305mm (12.0") barrel is 711mm (28.0") and average weight of 3.4 kgs (7.5 lbs).
- overall length with a 457mm (18.0") barrel is 864mm (34.0") and average weight of 3.6 kgs (8.0 lbs).

Manufacturer

- SRM Arms is located in Meridian, Idaho, U.S.A.
- SRM Arms, Inc. is a subsidiary of SRM Performance Products.
- SRM Performance Products is a division of Snake River Machine, Incorporated.

Action

- recoil operated.

Shots

- Introduced in 2008 with detachable high capacity rotary magazine is available in three magazine capacities:
- eight (8) shots with two (2) rounds per tube.
- twelve (12) shot with three (3) rounds per tube.
- sixteen (16) shots with four (4) rounds per tube.
- Detachable high capacity rotary magazine located under the barrel.
- Manually indexed rotary magazine consist of a one piece magazine body with four tubes which feed the rounds linearly.

Canadian Law Comments

- the cartridge magazine utilized by the SRM Arms, Model 1216 is a detachable, high capacity, rotary magazine located under the barrel.
- this rotary cartridge magazine is manually indexed and consists of a magazine body with four tubes which feed the cartridges in a linear fashion.
- this rotary cartridge magazine has been determined to be the complete assembly of the four magazine tubes and attaching points; therefore the magazine capacity is the sum of the capacity of all four tubes.
- this rotary cartridge magazine for this firearm in all capacities is a "Prohibited Device" unless reduced to five (5) shots or less.

Notes

Make

- "STANDARD MFG. CO. LLC" is marked on the left side of the receiver/frame.
- "STANDARD MFG. CO. LLC" is located in New Britain, Connecticut U.S.A.

Model

- "DP-12" is marked on both sides of the receiver/frame.
- "DP-12" is a "bullpup" design, pump-action shotgun with a unitary receiver/stock, which has two barrels and dual magazine tubes; pumping the shotgun's forearm loads both chambers at the same time, then the single trigger must be squeezed twice in order to fire both barrels.
- features include: interchangeable screw-in choke tubes; dual magazine tubes below the barrels; top and bottom mounted Picatinny rails; a detachable, forend mounted vertical pistol grip; an ejection port on each side of the receiver/frame; action-release lever at the front of the trigger guard; rotating safety lever; dual loading ports at the bottom of the receiver/frame; synthetic, modular buttstock with full pistol grip; rubber buttpad; black oxide/phosphate finish.
- overall length is 749mm/29.5"; unloaded weight is 4.42 kg/9 3/4 lbs

Manufacturer

- "STANDARD MFG. CO. LLC" is marked on the left side of the receiver/frame.
- "STANDARD MFG. CO. LLC" is located in New Britain, Connecticut U.S.A.

Serial Number

- serial number is marked on the rear, left side of the receiver/frame.
- serial number of a referenced example consisted of a two letter prefix and five numbers.

Calibre

- calibre designation is marked on the barrel.

Shots

- dual tubular magazines loaded from the bottom of the receiver.

Notes

Make

- "STANDARD MFG. CO. LLC." is marked on the top-strap of the receiver/frame.

Model

- introduced in 2019.
- "S333" is marked on the top strap of the receiver/frame.
- "THUNDERSTRUCK" is marked on the right side of the receiver/frame.
- this is a twin barrel, hammerless, double-action only revolver that fires two rounds simultaneously with each pressure of the trigger.
- features include: fixed sights; two steel barrels arranged in a side-by-side configuration; serrations located at the top rear of the alloy receiver/frame; swing out cylinder with right side cylinder release button; open trigger guard; two-finger trigger with integral trigger safety; contoured synthetic grip; black finish.
- overall length with 32mm (1 ¼") barrels is 127mm (5"), average weight is 510g (18 oz.).

Manufacturer

- "STANDARD MFG. CO. LLC." over "NEW BRITAIN, CONN U.S.A" is marked on the top-strap of the receiver/frame.

Serial Number

- the serial number is marked on the right side of the receiver/frame.
- observed serial number consisted of a three letter prefix followed by six numbers.

Calibre

- the calibre designation is marked on the left side of the receiver/frame.

Notes

Make

- "STANDARD MANUFACTURING CO. LLC." over "NEW BRITAIN, CT. USA" was observed marked on the bottom of the grip assembly.

Model

- introduced 2017.
- "MODEL S 333" was observed marked on the bottom of the receiver/frame grip.
- this is a multi barrel "pepperbox" style top break double action only handgun that discharges two rounds from its non-rotating barrels with each trigger pull.
- features include: single blade front sight; hexagonal barrel cluster containing six barrels; serrations on the left and on the right side of the barrel assembly; square trigger guard integral with the barrel assembly; alloy receiver/frame with a fixed rear sight integral with a top mounted action release lever; serrations on top left and right side near the rear sight; black, grey, gold or pink finish.
- average weight with a 64mm (2.5") barrel is 0.51kg (18 oz).

Manufacturer

- "STANDARD MANUFACTURING CO. LLC." over "NEW BRITAIN, CT. USA" was observed marked on the bottom of the grip assembly.

Action

- hinged barrel design.
- resembles a "pepperbox" design however the barrels do not rotate.
- discharges two rounds per trigger pull.

Calibre

- the calibre designation was observed, on a referenced example, marked on the left side of the barrel assembly.

Notes

Make

- "JOINT PATENTS" over "STANTON & CO" are marked on the front left side of the receiver/frame.

Model

- "BRITISH" over "BULL DOG" is marked on the top strap of the receiver/frame.
- features include: fixed blade front sight and a groove in the top strap for a rear sight; ovate barrel; solid top receiver/frame with a removable unfluted cylinder; right side mounted swing down loading gate; right side swing-out ejector assembly is mounted on the front of the receiver/frame; exposed rebounding spur hammer; double/single action trigger mechanism; bird's head grip frame with checkered wood grip plates.
- British proof marks are apparent on this firearm.

Manufacturer

- "JOINT PATENTS" over "STANTON & CO" are marked on the front left side of the receiver/frame.
- "JOINT PATENTS" and "STANTON & CO" is associated to John Stanton of Wolverhampton, England.
- John Stanton/John Stanton & Son was in business from 1873 to 1900.
- John Stanton was located in Wolverhampton, West Midlands, England at 13 Clifton Street from 1873 to 1875, 12 & 13 Clifton Street from 1875 to 1876, and 13 & 30 Clifton Street from 1878 to 1880.
- John Stanton's business became "Stanton & Son" in 1887.
- John Stanton & Son was located at 17 Merridale Road from 1887 to 1900.
- John Stanton was awarded several British Patent Numbers: # 367 on February 09, 1867; # 3774 on December 30, 1869 and # 928 on March 08, 1877.

- John Stanton was a gun and pistol maker located in Birmingham, England at Newtown Row from 1834 to 1841 and at 40 Hanley Street from 1842 to 1852.
- John Stanton was a gun, rifle and pistol maker located at 24 Lower Loveday Street, Birmingham, England circa 1868.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- known example had a five digit number with a letter prefix marked on the front left side of the receiver/frame. - letter prefix "B" has been observed.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.
Remarks	- this handgun has the appearance of the Webley model "The British Bull Dog", however, Webley always marked this model with the specific words "THE BRITISH BULL DOG"; in addition, the receiver/frame of this firearm, while generally giving the appearance of a Webley, is not of Webley configuration or characteristics and should not therefore be associated with the Webley firm.

- "JOINT PATENTS" and "STANTON & Co" are marked on the right side of the receiver/frame near the pivot point.
- "JOINT PATENTS" and "STANTON & CO" is associated to John Stanton of Wolverhampton, England.
- Joint Patents refers to the use of the rebounding gunlock system as patented by John Stanton.
- John Stanton patents were; No 367 of 9 Feb., 1867; No 3774 of 30 Dec., 1869; No 1877; No 928 of 8 Mar., 1877 for the design and construction of rebounding gun locks.
- John Stanton/John Stanton & Son was in business from 1873 to 1900.
- John Stanton was located in Wolverhampton, West Midlands, England at 13 Clifton Street from 1873 to 1875, 12 & 13 Clifton Street from 1875 to 1876, and 13 & 30 Clifton Street from 1878 to 1880.
- John Stanton's business became "Stanton & Son" in 1887.
- John Stanton & Son was located at 17 Merridale Road from 1887 to 1900.
- John Stanton was awarded several British Patent Numbers: # 367 on February 09, 1867; # 3774 on December 30, 1869 and # 928 on March 08, 1877.
- John Stanton was a gun and pistol maker located in Birmingham, England at Newtown Row from 1834 to 1841 and at 40 Hanley Street from 1842 to 1852.
- John Stanton was a gun, rifle and pistol maker located at 24 Lower Loveday Street, Birmingham, England circa 1868.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number
- serial number is marked on the receiver/frame above and forward of the trigger guard.
- observed serial number consisted of a letter prefix "C" and five numbers.

Canadian Law Comments
- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "JOINT PATENTS" and "STANTON & CO" are marked on the right side of the receiver/frame near the pivot point.

Model

- model designation is not marked on this firearm.
- model designation is derived from the characteristics of the firearm and its resemblance to the Webley model No 4.
- manufactured between 1875 and 1885.
- this revolver uses "Pryse's Patent" cylinder lock improvement; Patent No. 4421 of 1876.
- "JOINT PATENTS" and "STANTON & Co" are marked on the right side of the receiver/frame near the pivot point; this marking refers to the use of the rebounding gunlock system as patented by John Stanton; many makers used this system and the firearms were so marked.
- features include: full rib barrel; front hinged receiver/frame with Pryse type top break release latch; exposed spur hammer; double/single action trigger mechanism; trigger guard may have finger rest; saw handle-type grip frame with butt cap and lanyard ring; checkered hardwood grips; blued or nickel plated finish.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make

- the "STAR" name and logo are marked on the left side of the slide.
- "STAR" was a trade name of "Bonafacio Echeverria" of Eibar, Spain.

Model

- model designation does not appear on firearm.
- manufactured between 1920 and 1946.
- "1920" model is based on the Colt 1911 design and developed for the Spanish Military in 9mm Bayard
- adopted by the Spanish Director General of the Guardia Civil (Civil Guard), after the Spanish Army acquired an "Astra" design. The Spanish Guardia Civil logo (intertwined letter "G" and "C" with the royal crown pre-1931 or mural crown post-1931) is marked on the side of the slide.
- also available as the Model "A" in 9mm Bayard and as the Model "B" in 9mm Luger.
- "STAR" refurbished this model to fire the .38 Auto (left side of the slide will be stamped "CAL 9M/M 38") or the 9mm Luger (left side of the slide will be stamped "CAL 9M/M P").
- features include: flat sided slide with multiple cocking serrations at the rear; slide holding open lever and push button magazine release located on the left side of the receiver/frame; exposed hammer; single action trigger mechanism; lanyard loop attachment located on the left side of the butt; checkered wood or rubber grip plates.
- this model was available in several sub-variations, which reflected refinements to the design.
- 1920: 1911 type receiver/frame without a grip safety, thumb safety on the side of the slide; fixed sights and s/n range from 1 to 3,850.
- 1921: 1911 type receiver/frame with a grip safety, thumb safety on the side of the receiver/frame, adjustable sights, s/n marked on the right side of the receiver/frame, and s/n range from 3,850 to 13,500.
- 1922: 1911 type receiver/frame without a grip safety, thumb safety on the receiver/frame, adjustable sights and a s/n range from 13,500 to 28,500.
- 1931 and 1940: 1911A1 type receiver/frame with finger relief cuts, checkered palm swell and without grip safety, improved and enlarged thumb safety on the receiver/frame, beavertail hammer, adjustable sights and a s/n range from 28,500 to 69,986.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "Bonifacio Echeverria (Espana) Eibar" may be marked on the left side of the slide. - "Made in Spain" or "Spain" may be marked on the firearm.
Action	- recoil operated.
Serial Number	- serial number is located on the butt behind the magazine well. - serial numbers range from 1 to 3,850.
Calibre	- caibre is marked on the left side of the slide.
Shots	- single column detachable box magazine.

Notes

Make

- the "Star" name is marked on the slide, a "Star" logo is moulded into the top of each grip panel.

Model

- introduced in 1926
- model designation is not marked on the firearm.
- "AUTOMATIC PISTOL" or "PISTOLA AUTOMATIC" may be marked on the left side of the slide.
- "1926" model is an upgrade of the model 1919.
- "1914", "1919", and "1926" model feature a unique takedown feature where a dismounting lever ahead of the trigger guard is depressed which allows a retaining block to be removed and then the barrel and slide assembly may be disassembled.
- "1914", "1919", and "1926" models, the main differences between them are as follows:
- "1914" model has fixed sights, thumb type safety located on the rear right side of the slide; semi spur hammer; hammer pivot pin is screwed in from the right side; fixed lanyard loop on the left side of the frame, large magazine release button, high polish midnight blue finish, and the serial number is marked horizontally on the bottom of the back strap.
- "1919" model has fixed sights, thumb type safety located on the rear right side of the slide; full spur hammer, conventional hammer pivot pin, small magazine release button, swivel lanyard ring, rust blue finish, and the serial number is marked on the bottom of the butt.
- "1926" model has a fixed or adjustable rear sight, sear blocking thumb type safety located on the left side of the receiver/frame; full spur hammer, conventional hammer pivot pin, small magazine release button, with or without a swivel lanyard ring, rust blue finish, and the serial number is marked on the bottom of the butt. - "1926" model was also offered in a "Target" version with a longer barrel and adjustable rear sight.
- features include: sights; single column box magazine; magazine release located on the left side of the receiver/frame; wood or hard rubber grip panels.

Manufacturer

- manufacturer's markings are found on the right side of the slide.

Action

- blowback operated.

Serial Number

- serial number range continued from the model 1919.
- known ranges include;
- 1926: 120280 to 122550
- 1927: 122551 to 124214
- 1928: 124290 to 126058
- 1929: 126084 to 126979
- one "target" variation was built in 1940 (believed to be assembled from left over parts), serial number 205711.

Calibre

- calibre designation is marked on the slide.

Shots

- detachable box magazine housed in the grip.

22272 - 4	9MM BAYARD	8	127	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "STAR" marked on the slide.

Model

- the letter "A" may be marked on the right side of the receiver/frame or on the bottom of the grip frame, behind the magazine.
- manufactured from 1921 to 1968.
- features include: similar in profile to the Colt 1911; fixed rear sight mounted in a circular keyway acted as a firing pin retainer; hammer has a spur and a small hole visible from the side; thumb magazine release; thumb safety mounted on left side of frame; slide lock located on left side above trigger; available with or without grip safety; flat backstrap; single action; grips were wooden or plastic.
- distinguished from the model B by its flat blackstrap and the small hole through the side of the hammer.

Manufacturer

- marked on the slide.

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the bottom of the grip frame, behind the magazine well. - serial number range from 1 to 1,027,606. - serial number range from 1 to 283,749 was manufactured from 1921 to 1945. - serial number range from 283,751 to 1,027,606 was manufactured 1946 to 1968. - NOTE: the model designation for this handgun is usually marked on the right side of the receiver/frame or on the bottom of the grip frame directly over the serial number. When the letter "A" is in front of or over top of the serial number, it is not to be confused as being a letter prefix for the serial number.
Calibre	- calibre may be marked on the receiver/frame.
Shots	- detachable box magzine.
Other Markings	- calibre, manufacturer's name, make, and Star's "star-burst" trademark or a variation thereof usually marked on left side of slide. - "BONIFACO ECHEVERRIA, EIBAR-ESPANA" may be marked on the slide. - a "GC" monogram under a crown indicates the pistol was property of Spain's Guardia Civil. - may also be seen with military property markings.

Firearm Reference Number (FRN): 22299
Make: Star
Model: BM

Summary

Make:	Star
Model:	BM
Manufacturer:	Bonifacio Echeverria
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
22299 - 4	9MM LUGER	8	99	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	
22299 - 1	9MM LUGER	8	102	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	
22299 - 3	9MM LUGER	8	106	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	
22299 - 2	9MM LUGER	8	127	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "STAR" and the Star logo are marked on the left side of the slide.

Model

- "BM" is marked on the bottom buttface of the receiver/frame.
- manufactured from 1972 to 1992.
- total production 217,683.
- this is a single action semi-automatic handgun, similar in appearance to a scaled down Colt M1911A1; without the grip safety.
- available in blued or chromed finish or stainless steel.
- overall length 182mm (7 1/8"), weight 965g.

Manufacturer

- "STAR", "B. ECHEVERRIA", "EIBAR ESPANIA" and "S.A.", or "STAR", "B. ECHEVERRIA", "EIBAR - ESPANIA" and "S.A." or "STAR EIBAR SPAIN" may be marked on the left side of the slide.

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the right side of the receiver/frame above the trigger. - serial number begins at 1,226,501. - total production 217,683. - alpha/numeric sequences have also been observed.
Calibre	- "CALIBER 9MM" or "CAL. 9 M/M P" may be marked on the side of the slide.
Shots	- detachable box magazine.
Importer	- samples in North America will sometimes bear no importer's markings.
Other Markings	- Spanish proofmark on top of the barrel, and under left grip. - may be marked on the left side of the slide with importer's markings, example: INTERARMS ALEXANDRIA, VIRGINIA - marked on the left side of the receiver/frame, forward triggerguard base: SPAIN

22261 - 2	22 LR	7	108	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- the star logo will be marked on the slide, as well as the word "Star".

Model

- manufactured from 1955 to 1968.
- part of the model designation is marked on bottom of butt, with the remainder marked on the slide.
- the designation "Lancer" was for the North American market.
- blued finish with black or brown plastic grip panels or chrome finish with white plastic grips.

Manufacturer

- manufacturer's name may not appear on the firearm.
- slide may simply be marked "Made in Spain"

Serial Number

- sequential numbers.
- will normally be marked on the bottom of the butt, some "Star" pistols have been noted with the serial number marked on the side of the receiver/frame.

Shots

- detachable box magazine.
- "Star" literature states that magazine extensions are available for this model, but does not list alternate capacities.

FRT Report

Firearm Reference Number (FRN): 16389
Make: Star
Model: I Copy

Summary

Make:	Star
Model:	I Copy
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	
Serial Numbering:	
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
16389 - 1	32 AUTO	9	112	Prohibited CC 84(1) "prohibited firearm" para. (a)(ii)	Non-Commercial Customization	
16389 - 2	7.65MM	9	112	Prohibited CC 84(1) "prohibited firearm" para. (a)(ii)	Non-Commercial Customization	

Notes

Make

- a facsimile of the "Star" trademark, along with markings resembling "B. ECHEVARRIA" over "EIBAR - ESPANA" is normally stamped on the slide.
- unlicensed or home-made copies of these pistols commonly have these markings misspelt, applied haphazardly (via hand stamps, instead of the roll-markings of an authentic pistol), uses a five-pointed star in the logo instead of the proper six-pointed star, and will usually have hand-made grips without the proper "STAR" trademark.

Model

- the model is not marked on the firearm; this is an unlicensed "cottage industry" copy of the I-frame 32 AUTO pistol, commonly made in Asia, Northern India, Afghanistan or Pakistan, based on Star pistols which were exported to those areas after World War Two.
- features may include: spurious logos and markings; blued finish; (usually) a square-profile barrel; open drift-adjustable sights; a rotating Ruby-style safety/takedown lever above the trigger (rather than the tang-mounted 1911-style safety of a true Star "I"); a single-action trigger mechanism; no slide hold-open; hand-checkered synthetic grips without the "Star" trademark; cross-bolt magazine release at the butt; an arched backstrap with knurling.

Action

- blowback operated.

Calibre

- "765 M/M 32" is marked on the left side of the slide of an observed example.

Shots

- detachable box magazine housed in the grip.

Notes

Make

- the "STAR" name and logo are marked on the left side of the slide.
- "STAR" was a trade name of "Bonafacio Echeverria" of Eibar, Spain.

Model

- model designation does not appear on firearm.
- manufactured between 1920 and 1946.
- this design is based on the Colt 1911 design and was developed for the Spanish Military in 9MM BAYARD
- this model was adopted by the Spanish Director General of the Guardia Civil (Civil Guard), after the Spanish Army adopted a design by "Astra",
- this model was available commercially as the Model "A" in 9MM BAYARD and as the Model "B" in 9MM LUGER.
- this model was also refurbished by "STAR" to fire the .38 AUTO (normally the side of the slide will be stamped "CAL 9M/M 38") or the 9MM LUGER (normally the side of the slide will be stamped "CAL 9M/M P").
- features include: flat sided slide with multiple cocking serrations at the rear; 1911 or a 1911A1 type receiver/frame; slide holding open lever and push button magazine release located on the left side of the receiver/frame; exposed hammer; single action trigger mechanism; lanyard loop attachment located on the left side of the butt.
- the Modelo Militar was available in several sub-variations, which reflected refinements to the design of the model 1920.
- the Modelo 1920: 1911 type receiver/frame without a grip safety, thumb safety was located on the slide; fixed sights and a serial number range from 1 to 3,850.
- the Modelo 1921: 1911 type receiver/frame with a grip safety, thumb safety located on the left side of the receiver/frame, adjustable sights and a serial number range from 3,850 to 13,500.
- the Modelo 1922: 1911 type receiver/frame without a grip safety, thumb safety located on the side of the receiver/frame, adjustable sights and a serial number range from 13,500 to 28,500.
- the Modelo 1931 and 1940: 1911A1 Type receiver/frame with finger relief cuts and checkered palm swell without grip safety, improved and enlarged thumb safety located on the side of the receiver/frame, beavertail hammer, adjustable sights and a serial number range from 28,500 to 69,986.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- manufacturer's name is marked on the side of the slide.
Action	- recoil operated.
Serial Number	- serial number is marked on the right side of the receiver/frame or on the butt behind the magazine well. - serial number range from 1 to 69,986.
Shots	- detachable box magazine.

FRT Report

Firearm Reference Number (FRN): 22276
Make: Star
Model: MMS

Summary

Make:	Star
Model:	MMS
Manufacturer:	Bonifacio Echeverria
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
22276 - 1	7.63MM MAUSER	9	127	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "STAR" is marked on the left side of the slide.

Model

- manufactured between 1931 and 1983.
- "MMS" is marked on the bottom of the butt.
- "MM" in the model indicates the firearm was manufactured in 7.63MM MAUSER.
- "S" in the model indicated the firearm was manufactured with a magazine safety.
- "M" series consisted of the following models: "M" in 9mm Largo (Bergmann-Bayard), 9mm Luger (Para) and 45 Auto (ACP), "MB" and "MBS" in 9mm Luger, "MM" and "MMS" in 7.63mm Mauser and "MD" was a selective-fire version.
- "MMS" model is similar in appearance to the "Colt 1911" less the grip safety.
- features include: fixed sights; round barrel; flat sided slide with right side ejection and vertical rear gripping serrations; 1911 type receiver/frame with the backstrap being cut-out for installation of a removable shoulder stock; exposed spur hammer; single action trigger mechanism; action release lever, manual thumb safety, and magazine release button are mounted on the left side of the receiver/frame; checkered grip plates; blued finish.

Manufacturer

- "B. Echeverria" and "Eibar - Espana" may be marked on the left side of the slide.

Action

- recoil operated.

Serial Number

- serial number is marked on the right side of the receiver/frame.

Calibre

- calibre designation is marked on the left side of the slide.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - single column detachable box magazine.

Notes

Make

- "6.35 ATOMATIC PISTOL" over ""STAR" N-2", "6.35 AUTOMATIC PISTOL" over ""STAR" N-2", the star symbol and "6.35 AUTOMATIC PISTOL" over ""STAR" N-2", or "AUTOMATIC PISTOL "STAR" PATENT", and the star symbol over "FOR THE 7.65 CARTRIDGE "STAR" N-2" is marked on the left side of the slide.
- "STAR" is usually marked on the grip plates.
- "STAR" was the trade mark of Bonifacio Echeverria.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "STAR" N-2 or "STAR" No 2 is marked on the left side of the slide. - introduced in late 1908. - manufactured from 1908 to 1913. - features include: recoil spring encloses the barrel; removable or integral breech block; top or right side ejection port; straight slide serrations; hammerless; left side, tang mounted safety; grip screw is located in the rear side of the grip plates; magazine release is located on the bottom of the grip strap; groove in the top of the slide for a sight. - available in three variants: 1st variant was in 6.35MM and had a removable breech block, and top ejection; 2nd variant was in 6.35MM and had an integral breech block, top ejection, top mounted extractor and takedown located in the middle of the receiver/frame; and the 3rd variant was available in 7.65mm or 9MM BROWNING SHORT and had right side extractor and ejector port, and a lanyard loop on the left bottom side of the grip strap. - NOTE: in approximately 1911, another business in Eibar began marketing a 6.35MM blowback pistol with the "'STAR N-2" markings. This pistol was of a typical Eibar design with curved slide serrations, safety lever located on the left side in the middle of the receiver/frame, grip screw in the middle of the grip plate, and lanyard ring on the left bottom side of the grip strap.
Action	- blowback operated.
Serial Number	- serial number is marked horizontally on the backstrap or on the right side of the receiver/frame.
Calibre	- calibre designation is marked on the left side of the slide.
Shots	- single column, detachable box magazine.

Notes

Make

- marked on the left side of the receiver/frame.
- "Star" has been used as a trade name by Bonifacio Echeverria of Eibar, Spain since circa 1911.

Model

- the model designation may appear on the receiver/frame as "Modelo R.U. 35".
- this model and two other similar models were developed during the Spanish Civil War. The model Si35 had a variable cyclic rate, the model RU35 fired at 300 rounds per minute and the model TN35 fired at 700 rounds per minute.
- features include: half length wood stock, fixed blade front sight with tangent rear sight graduated from 50 to 1000 meters, single trigger, and a ventilated barrel jacket.
- this version retains two switches on the left side but fires in semi automatic only or in the retarded or slow full automatic mode (300rpm).
- the model Si 35 has two switches on the left side, a three position switch above the trigger and a two position switch in front of it. The positioning of these switches determines if the weapon is on safe, in single shot mode (semi automatic), or determines the rate of fire.
- the RU35 version retains the two switches on the left side, but both are two position swiches and selects fires in a semi automatic mode or in the retarded or slow full automatic mode (300rpm).

Manufacturer

- the manufacturers name does not normally appear on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- retarded blowback operated. - has a cyclic rate of 300 rounds per minute.
Serial Number	- marked on the right or left side of the frame/receiver.
Shots	- detachable box magazine.

Notes

Make

- marked on the left side of the receiver/frame.
- "Star" has been used as a trade name by Bonifacio Echeverria of Eibar, Spain since circa 1911.

Model

- model is normaly marked "MODELO Si 1935" but early firearms or proto types may be marked "MODELO 1934"
- this model and two other similar models were developed during the Spanish Civil War. The model Si35 had a variable cyclic rate, the model RU35 fired at 300 rounds per minute and the model TN35 fired at 700 rounds per minute.
- features include: half length wood stock, fixed blade front sight with tangent rear sight graduated from 50 to 1000 meters, single trigger, ventilated barrel jacket, and two switches on the left side, a three position switch above the trigger and a two position switch in front of it. The positioning of these switches determines if the weapon is on safe, in single shot mode, or determines the rate of fire.

Manufacturer

- the manufacturers name does not normally appear on the firearm.

Action

- no longer capable of full automatic fire.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- may be marked on the left side of the receiver/frame.
Shots	- detachable box magazine.
Other Markings	- marked on the left side of the receiver/frame, "Star - Sub-Fusil Ametralladora Modelo Si 1935 Cal 9MM".

Notes

Make

- marked on the left side of the receiver/frame.
- "Star" has been used as a trade name by Bonifacio Echeverria of Eibar, Spain since circa 1911.

Model

- the model designation may appear on the receiver/frame as "Modelo T.N. 35".
- this model and two other similar models were developed during the Spanish Civil War. The model Si35 had a variable cyclic rate, the model RU35 fired at 300 rounds per minute and the model TN35 fired at 700 rounds per minute.
- features include: half length wood stock, fixed blade front sight with tangent rear sight graduated from 50 to 1000 meters, single trigger, and a ventilated barrel jacket.
- this version retains two switches on the left side but fires in semi automatic only or in the normal full automatic mode (700rpm).
- the model Si 35 has two switches on the left side, a three position switch above the trigger and a two position switch in front of it. The positioning of these switches determines if the weapon is on safe, in single shot mode, or determines the rate of fire.

Manufacturer

- the manufacturers name does not normally appear on the firearm.

Action

- retarded blowback operated.
- has a cyclic rate of 700 rounds per minute.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- marked on the right side of the receiver/frame.
Shots	- detachable box magazine.

Model: TN35

Summary

Make:	Star
Model:	TN35
Manufacturer:	Bonifacio Echeverria
Level:	Converted Automatics
Type:	Submachine Gun
Action:	Converted Automatic
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
76774 - 1	9MM BAYARD	5	270	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
76774 - 4	9MM BAYARD	10	270	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
76774 - 2	9MM BAYARD	30	270	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
76774 - 3	9MM BAYARD	40	270	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- marked on the left side of the receiver/frame.
- "Star" has been used as a trade name by Bonifacio Echeverria of Eibar, Spain since circa 1911.

Model

- the model designation may appear on the receiver/frame as "Modelo T.N. 35".
- this model and two other similar models were developed during the Spanish Civil War. The model Si35 had a variable cyclic rate, the model RU35 fired at 300 rounds per minute and the model TN35 fired at 700 rounds per minute.
- features include: half length wood stock, fixed blade front sight with tangent rear sight graduated from 50 to 1000 meters, single trigger, and a ventilated barrel jacket.
- this version retains two switches on the left side but fires in semi automatic only or in the normal full automatic mode (700rpm).
- the model Si 35 has two switches on the left side, a three position switch above the trigger and a two position switch in front of it. The positioning of these switches determines if the weapon is on safe, in single shot mode, or determines the rate of fire.

Manufacturer

- the manufacturers name does not normally appear on the firearm.

Action

- no longer capable of full automatic fire.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- marked on the right side of the receiver/frame.
Shots	- detachable box magazine.

Notes

Make	- "STAR" is normally marked on the left side of the receiver/frame. - "Star" has been used as a tradename by Bonifacio Echeverria since circa 1911.
Model	- this model copied the basic design of the German manufactured MP40. - engineers at "Star" modified the design by adding a forward bolt safety, lowering the cyclic rate slightly to between 400 and 500rpm, changing the cocking handle from the left to the right side, and adding a trigger operated "select fire" system. - features include: a fixed half length wood or underfolding metal buttstock, pistol grip with wood grip plates, the barrel features a quick change system whereby turning the built in compensator the barrel may be removed, fixed blade front sight with an open notch "U" shaped or flip up rear sight.
Manufacturer	- the manufacturers name does not normally appear on the firearm. - Bonifacio Echeverria is located in Eibar, Spain.
Action	- no longer capable of full automatic fire.
Serial Number	- serial number is marked on the left side of the magazine housing. - sample imaged has a "Z" prefix.
Calibre	- this model was also produced in 9MM LUGER, 38 SUPER AUTO and 45 AUTO for export sales.
Shots	- detachable box magazine.
Remarks	- the model Z 45 has been purchased by Chile, Cuba, Saudi Arabia, and Portugal and may have markings to reflect which country a particular specimen was purchased by.

FRT Report

Firearm Reference Number (FRN): 83051
Make: Starr
Model: 1864 Pepperbox Model 1

Summary

Make:	Starr
Model:	1864 Pepperbox Model 1
Manufacturer:	Merrill Patent Fire Arms Manufacturing
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Multi-Barrel
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
83051 - 1	32 RF	4	70	Antique AFR, Section 1, para. 6	Manufacturer Specifications and Commercial Customization	
83051 - 2	32 RF	4	83	Antique AFR, Section 1, para. 6	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "STARR'S PAT'S MAY 10. 1864" is usually marked on the receiver/frame.
- manufactured under patents held by Eban T Starr of Yonkers, New York.

Model

- model designation not marked on firearm.
- "STARR'S PAT'S MAY 10. 1864" is usually marked on the receiver/frame.
- this is a four barrel derringer type pistol, break open for loading.
- manufactured circa 1864-1869.
- total of about 2,000 of the foiur barrel derringer type were manufactured, of which 1,500 were fourth, and fifth models.
- external hammer mounted on the right side of the receiver/frame.
- button type trigger.
- blued barrels.
- brass /receiver/frame, with silver plated finish.
- there were six basic variations of this model, and they can be identified by two major features;
  a) those with external springs and short fat grips.
  b) those with internal springs, and longer thin grips.(models 1 to 4 all have the short fat grip configuration).
- the difference within the model variations are as follows;
- first model; fluted breech, long narrow barrel release spring, and short vertically mounted firing pin retaining spring mounted on right side of receiver/frame.
- second model; flat standing breech, all other features similar to first model.
- third model; rounded breech, only vertical firing pin retaining spring visible, long narrow barrel spring no longer visible.
- fourth model; rounded breech, but no springs visible on right side of receiver/frame.
- fifth model; rounded breech, but noticeably longer and thinner grips
- sixth model; as above but with shorter frame, long thin grips, and usually with a 64mm barrel length.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- manufacturer's name does not appear on the firearm. - Merrill Patent Fire Arms Manufacturing Company was located in Baltimore, Maryland, U.S.A. from 1860 to 1867.
Action	- four barrels, two uppers over two lowers.
Serial Number	- serial number area combination of alpha and numeric digits (possibly manufacturing batch numbers).
Other Markings	- marked on left side of receiver/frame in one line, or on the grips in a circular design as follows; "STARR'S PAT'S MAY 1864".

FRT Report

Firearm Reference Number (FRN): 176742
Make: Stealth Arms
Model: 1911 Commander Tactical Type

Summary

Make:	Stealth Arms
Model:	1911 Commander Tactical Type
Manufacturer:	Stealth Arms
Level:	Manufacturer Specifications and Commercial Customization
Type:	Receiver Blank
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

No Data

Notes

Make

- Stealth Arms is not marked on the receiver blank.
- Stealth Arms is located in St. Marys, Ohio.

Model

- this record is for receiver/frame blanks sold under a percentage of completion (i.e.: 80%).
- 1911 Commander Tactical Type is not marked on the receiver/frame blank.
- the Stealth Arms receiver/frame blank is CNC machined from 7075 heat treated aluminum and may come in a number of different finishes.
- this 1911 Commander Tactical Type receiver blank is made for the shorter length 4.25" barrel and shorter length slide. The 1911 Commander Tactical Type receiver blank is consistent with the standard appearance of the Colt 1911 Commander receiver/frame. The Tactical receiver/frame comes equipped with an integrated accessory (tactical) rail under the dust cover for attaching accessories such as a tactical flashlight or laser sight with Picatinny attachment ability.
- A Government model 1911 slide will not correctly fit on a Commander model 1911 receiver/frame, and a Commander model 1911 slide will not function on a Government model 1911 receiver/frame.

Manufacturer

- Stealth Arms is not marked on the receiver blank.
- Stealth Arms is located in St. Marys, Ohio.

Type

- receiver/frame blanks are sold under a percentage of completion (i.e.: 80%).
- receiver/frame blanks that are partially completed require some tooling and minimal skill to be completed.

Canadian Law Comments

- this receiver/frame blank is a nearly complete receiver that falls within the adaptability clause of the Criminal Code Section 2 definition of "firearm".

Firearm Reference Number (FRN): 143459
Make: Stechkin
Model: APB

Summary

Make:	Stechkin
Model:	APB
Manufacturer:	Russian State Arsenal, Vyatskie Polyany
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Full Automatic
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
143459 - 1	9MM MAKAROV	10	140	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	
143459 - 2	9MM MAKAROV	20	140	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Stechkin" is not marked on the firearm.
- "Stechkin" is derived from the last name of the Russian designer Igor Y. Stechkin.

Model

- the model is not marked on the firearm.
- "APB" stands for "Avtomaticheskie Pistolet Besshumnoy"/"Automatic Pistol, Silenced".
- this is a factory silenced version of the M1951 Stechkin APS, designed by A.S. Neugodov at the end of the 1960s; many APSs were converted to APB configuration by opening the inside of the slides to allow for a slip-over mounting tube for the suppressor to be installed inside the slide, and that mounting tube vents into the suppressor in use. Also, where the APS pistol was issued with a detachable wooden or plastic C-96 Mauser/Browning Hi-Power-style stock/holster, the APB was issued with a detachable wire-frame stock having a spring-loaded hanger to store the suppressor when it is not in place on the pistol. The pistol, stock, and suppressor were all carried in a large leather holster when not in use.
- features include: a lengthened over-barrel tube with various types of muzzle fitments to allow mounting of the detachable suppressor; open adjustable sights; slide-mounted safety-selector; knurled round hammer; synthetic grip plates; blued finish.

Manufacturer

- the manufacturer is marked on the slide as a five-pointed star within a shield, all in single lines.

Action

- blowback, selective-fire.

Serial Number

- numbered on the receiver/frame and on the slide.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Model

- the model designation does not appear on the firearm, it is a translation from Russian and denotes "Automatic Pistol Stechkin".
- the Stechkin was issued to officers and NCO's in the Russian military. This pistol was capable of full automatic fire as well as semi automatic fire. It vaguely resembles a Makarov pistol but is larger.
- features include: a detachable wood or wire buttstock, a three position slide mounted safety/fire selector lever marked "np" for safe, "oa" for semi automatic and "abt" for full automatic fire, magazine catch is located on the bottom of the butt, blade front sight with rear rotating drum adjustable for 25, 50, 100 or 150 meters, blued finish and black plastic grips.
- a extended barrel version was available with a detachable sound suppressor.
- this model was withdrawn from service in the mid 1970's when the "AKSU", which is a shortened version of the Kalishnikov "AK 47" became available.

Manufacturer

- this model was produced between 1951 and 1975 at the various state arsenals.
- the factory code or identifying mark, a triangle with a vertical arrow inside the triangle will usually be marked on the left side of the slide.

Action

- no longer capable of full automatic fire.

Serial Number

- the serial number may appear on the left side of the receiver/frame and/or left side of the slide.
- serial number rationalization unknown.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Other Markings - as the Stechkin "APS" was exported to various countries some samples may differ in markings.

Notes

Make

- make is not marked on the firearm except in the form of initials ("GM") in the preface to the serial number.
- "GM" may be marked on the rear left side of the receiver/frame.

Model

- "GM15" was introduced circa 1978.
- "GM 15" may be marked on the rear left side of the receiver/frame.
- "GM" denotes the Manufacturer and "15" is the model.
- features include: round barrel is removable by means of a barrel nut located around the muzzle end of the barrel just in front of the sling swivel; tubular steel upper receiver/frame with upper right side ejection port; cocking handle is mounted on the upper left side of the receiver/frame; bolt assembly has no safety position available for locking the cocking handle to the rear; extractor claw mounted on the bolt face; bolt body envelops/surrounds the barrel assembly, uses a fixed firing pin and has a bolt face which fully supports the cartridge rim; bolt body presents a rounded surface to view when the bolt is forward; safety selector lever is mounted inside the trigger guard just above the trigger; crudely made four settings rear sight; moulded black plastic lower forearm and pistol grip; left side folding stock that when folded acts as a forearm pistol grip; blued or black parkerized finish on all metal surfaces.
- magazine housing is part of the grip; located at the rear of the trigger guard the two piece grip panels are held in place by a curved metal clip and a screw; the heel of the grip has a thumb size cut out for the magazine release.
- overall length with 282 mm barrel and butt stock folded is 440mm and 670 with the stock extended.

Manufacturer

- manufacturer's name is not marked on the firearm except in the form of initials ("GM") in the preface to the serial number.
- "GM" may be marked on the rear left side of the receiver/frame.
- G.M. Steele was located in Salisbury, Rhodesia, circa 1978.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- blowback operated. - "GM15" uses advanced primer ignition.
Serial Number	- serial number may be marked on the rear left side of the receiver/frame and repeated on the barrel.
Shots	- detachable box magazine. - this firearm uses CZ25 magazines.
Other Markings	- "P inside a triangle" may be marked on the front left side of the receiver/frame and the muzzle end of the barrel.
Remarks	- one reference states this firearm was manufactured in semi-automatic as the GM 16 SS and in full-automatic as the GM 15. - there are no production figures available. - this firearm is a close copy of a CZ25 sub-machine gun that differs only in minor cosmetic changes.

Notes

Make

- "STEN" is not marked on the firearm.
- the STEN name consists of the first letter of the names of the two designers (Reginald Vernon SHEPHERD and Harold John TURPIN) followed by the two first letters of ENGLAND, the country of origin.

Model

- manufactured circa 1942.
- "AD" inside a crown, "SER. NO. ###", "1942", and "ARMAF Mk I" are marked on the top of the magazine housing.
- "AD" is the initials for Air Department.
- this firearm was manufactured for the New Zealand Air Force.
- the New Zealand MARK 1 is a STEN MARK 2.
- the STEN MARK 2 is distinguished by its all-metal welded construction; and by a short barrel that can be replaced by pulling out a locking ratchet and unscrewing the barrel nut (attached to the ventilated barrel shroud); the magazine housing can be rotated about the receiver axis to reduce the width of the firearm when carried.
- features include: metal "T"-stock or a metal "loop"-stock; fixed sights; and a fire selector button that pushes sideways through the trigger mechanism housing.
- total quantity manufactured was 1,000 units.

Manufacturer

- "Precision Engineering Company, Limited" name is not marked on the firearm.

Action

- blowback operated, utilizing Advanced Primer Ignition.

Serial Number

- serial number is marked on the top of the magazine housing, eg. "SER. NO. 4#4".
- "NZ 2910" marked on the side of the trigger mechanism housing is "NZ" for New Zealand" and "2910" for the Sten-Enfield drawing number for the part.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine.

FRT Report

Firearm Reference Number (FRN): 124507
Make: Sten
Model: MARK 1*

Summary

Make:	Sten
Model:	MARK 1*
Manufacturer:	Singer Manufacturing Company (SMC)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Submachine Gun
Action:	Full Automatic
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
124507 - 1	9MM LUGER	5	197	Prohibited CC 84(1) "prohibited firearm" para. (c)	Non-Commercial Customization	
124507 - 2	9MM LUGER	32	197	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "STEN" may be marked on top of the magazine housing.
- the STEN name consists of the first letter of the names of the two designers (Reginald Vernon SHEPHERD and Harold John TURPIN) followed by the two first letters of ENGLAND, the country of origin.

Model

- the model designation is marked on top of the magazine housing as, "Mk I*".
- manufactured from 1941 to 1942.
- manufacture of the STEN MARK I and MARK I* was carried out exclusively by "Singer Manufacturing Company".
- features include: air-cooled; full length tubular barrel jacket without a mounted flash hider; no vertical pistol grip forward of the magazine housing; all wooden components found on the Mk I STEN are removed.
- total quantity STEN Mk I* firearms manufactured by this manufacturer is purported to be 100,114 examples.
- the absence of the flash hider assembly differentiates this firearm from the STEN MARK I by the same manufacturer.

Manufacturer

- the manufacturer's designation may be marked on the firearm.
- manufacture of STEN MARK I and MARK I* was carried out exclusively by The Singer Manufacturing Company, and examples may be found marked with manufacturer code "N67".
- Singer Manufacturing Company also used a logo of "S.M.C." to denote their production.

Action

- blowback operated, utilizing Advanced Primer Ignition.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number may be marked on bottom of the magazine housing. - serial numbers of Singer produced STEN MARK 1* usually have a letter "S" or "N" prefix followed by up to six numbers. - the manufacturer's logo "S.M.C." is usually found stamped above the serial number.
Calibre	- the calibre designation is not marked on the firearm.
Shots	- detachable box magazine.
Canadian Law Comments	- in the case of this firearm, it has been determined that the component commonly designated as the magazine housing, upon which all or part of the following information may be found marked: the Manufacturer's identification (either in full or in code); Model identification; Proof information and the Serial Number; is the Receiver/Frame for the purposes stated within The Firearms Act and the Criminal Code of Canada.

Notes

Make

- "STEN" may be marked on top of the magazine housing.
- the STEN name consists of the first letter of the names of the two designers (Reginald Vernon SHEPHERD and Harold John TURPIN) followed by the two first letters of ENGLAND, the country of origin.

Model

- manufactured from 1941 to 1945.
- "STEN MK II" is usually marked on the top of the magazine housing.
- the STEN MK II is distinguished by its all-metal welded construction; and by a short barrel that can be replaced by pulling out a locking ratchet and unscrewing the barrel nut (attached to the ventilated barrel shroud); the magazine housing can be rotated about the receiver axis to reduce the width of the firearm when carried.
- features include: metal "T"-stock or a metal "loop"-stock; fixed sights; and a fire selector button that pushes sideways through the trigger mechanism housing.
- total quantity manufactured by this manufacturer is purported to be 404,383 examples.

Manufacturer

- manufactures name may be marked on the firearm.
- STEN MARK 2 were manufactured and/or assembled from components in England by Birmingham Small Arms (BSA), Royal Ordnance Factory Fazakerley (ROF(F)), and Royal Ordnance Factory Theale (ROF(T)).
- STEN MARK 2 were assembled from components in England by Royal Small Arms Factory, Enfield (RSAF(E)).

Action

- no longer capable of full automatic fire.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number will be found marked on the magazine housing.
- STEN MARK 2 serial number letter/letters.
- "A" letter suffix has been noted on some serial numbers, the letter "A" denotes that non-interchangeable components have been fitted.
- "B" or "BO" - Birmingham Small Arms (BSA) assembled/manufactured STEN MARK 2 submachine guns will be found with a serial numbers having a "B" or a "BO" prefix and up to six numbers.
- "E", "R" or "S" - Royal Small Arms Factory, Enfield (RSAF(E)) assembled/manufactured STEN MARK 2 submachine guns will be found with serial numbers having a letter "E", R" or "S" prefix and up to six numbers.
- "F" and "FA" to "FZ" - Royal Ordnance Factory Fazakerley (ROF(F)) assembled/manufactured STEN MARK 2 submachine guns will be found with a serial number having a "F" prefix and up to five numbers or a two letter prefix "FA" to "FZ" and up to five numbers or up two five numbers with a letter "F" suffix.
- serial number range is from F-1 to F-99999, FA-1 to FA-99999 and so on to FZ-99999.
- "T" or "TF" - Royal Ordnance Factory Theale (ROF(T)) assembled/manufactured STEN MARK 2 submachine guns will be found with a serial number having a letter "T" prefix and up to five numbers or a "TF" prefix and up to five numbers.
- serial number range is from T-1 to T-50000 plus and "TF-1 to TF-6000.
- "1L" up to "13L" - Small Arms Limited, Long Branch manufactured STEN MARK 2 submachine guns will be found with a serial number having a single number, a letter "L" and up to five numbers or two numbers, a letter "L" and up to five numbers.
- serial number range is from 1L0001 to 1L9999 and so on to 13L5###.

Shots

- detachable box magazine.

Canadian Law Comments

- in the case of this firearm, it has been determined that the component commonly designated as the magazine housing, upon which all or part of the following information may be found marked: the Manufacturer's identification (either in full or in code); Model identification; Proof information and the Serial Number; is the Receiver/Frame for the purposes stated within The Firearms Act and the Criminal Code of Canada.

Remarks

- main production carried out by Royal Small Arms Factory, Fazakerly, Theale and Birmingham Small Arms.
- "Stens" were assembled by Singer Manufacturing Company and Lines Brothers.
- many sub-contractors were also involved, such as Briggs Motor; Dashwood Engineering; Elkington & Co Ltd., etc.

FRT Report

Firearm Reference Number (FRN): 73895
Make: Sten
Model: MARK 2

Summary

Make:	Sten
Model:	MARK 2
Manufacturer:	Elkington & Company (E&Co)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Submachine Gun
Action:	Full Automatic
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
73895 - 1	9MM LUGER	5	197	Prohibited CC 84(1) "prohibited firearm" para. (c)	Non-Commercial Customization	
73895 - 2	9MM LUGER	32	197	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "STEN" may be marked on top of the magazine housing.
- the STEN name consists of the first letter of the names of the two designers (Reginald Vernon SHEPHERD and Harold John TURPIN) followed by the two first letters of ENGLAND, the country of origin.

Model

- manufactured from 1941 to 1945.
- marked on the top of the magazine housing: STEN MK II
- the STEN MK II is distinguished by its all-metal welded construction; and by a short barrel that can be replaced by pulling out a locking ratchet and unscrewing the barrel nut (attached to the ventilated barrel shroud); the magazine housing can be rotated about the receiver axis to reduce the width of the firearm when carried.
- features include: metal "T"-stock or a metal "loop"-stock; fixed sights; and a fire selector button that pushes sideways through the trigger mechanism housing.

Manufacturer

- "E&Co" or "M/78" is marked on the magazine housing.
- "E&Co" is the abbreviation for Elkington & Company.
- "M/78" is a factory code for Elkington & Company.
- "E&Co" or "M/78" when found marked on the magazine housing indicates that Elkington & Company manufactured that component.
- STEN MARK 2 were manufactured and/or assembled from components in England by Birmingham Small Arms (BSA), Royal Ordnance Factory Fazakerley (ROF(F)), and Royal Ordnance Factory Theale (ROF(T)).
- STEN MARK 2 were assembled from components in England by Royal Small Arms Factory, Enfield (RSAF(E)).

Action

- blowback operated, utilizing Avanced Primer Ignition.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is usually marked on the underside of the magazine housing.
- observed serial number consisted of a letter "B" prefix and six numbers.
- STEN MARK 2 serial number letter/letters.
- "A" letter suffix has been noted on some serial numbers, the letter "A" denotes that non-interchangeable components have been fitted.
- "B" or "BO" - Birmingham Small Arms (BSA) assembled/manufactured STEN MARK 2 submachine guns will be found with a serial numbers having a "B" or a "BO" prefix and up to six numbers.
- "E", "R" or "S" - Royal Small Arms Factory, Enfield (RSAF(E)) assembled/manufactured STEN MARK 2 submachine guns will be found with serial numbers having a letter "E", R" or "S" prefix and up to six numbers.
- "F" and "FA" to "FZ" - Royal Ordnance Factory Fazakerley (ROF(F)) assembled/manufactured STEN MARK 2 submachine guns will be found with a serial number having a "F" prefix and up to five numbers or a two letter prefix "FA" to "FZ" and up to five numbers or up two five numbers with a letter "F" suffix.
- serial number range is from F-1 to F-99999, FA-1 to FA-99999 and so on to FZ-99999.
- "T" or "TF" - Royal Ordnance Factory Theale (ROF(T)) assembled/manufactured STEN MARK 2 submachine guns will be found with a serial number having a letter "T" prefix and up to five numbers or a "TF" prefix and up to five numbers.
- serial number range is from T-1 to T-50000 plus and "TF-1 to TF-6000.
- "1L" up to "13L" - Small Arms Limited, Long Branch manufactured STEN MARK 2 submachine guns will be found with a serial number having a single number, a letter "L" and up to five numbers or two numbers, a letter "L" and up to five numbers.
- serial number range is from 1L0001 to 1L9999 and so on to 13L5###.

Shots

- detachable box magazine.

Canadian Law Comments

- in the case of this firearm, it has been determined that the component commonly designated as the magazine housing, upon which all or part of the following information may be found marked: the Manufacturer's identification (either in full or in code); Model identification; Proof information and the Serial Number; is the Receiver/Frame for the purposes stated within The Firearms Act and the Criminal Code of Canada.

- features include: metal "T"-stock or a metal "loop"-stock; fixed sights; and a fire selector button that pushes sideways through the trigger mechanism housing.

Manufacturer

- "H. F. & CO. LTD" or "M/87" may be marked on the underside of the magazine housing.
- "M/87" code indicate the manufacturer as "H. Frost & Company, Limited".
- "H. Frost & Company, Limited" was located in Walsall, Middlesex, England.
- STEN MARK 2 were manufactured and/or assembled from components in England by Birmingham Small Arms (BSA), Royal Ordnance Factory Fazakerley (ROF(F)), and Royal Ordnance Factory Theale (ROF(T)).
- STEN MARK 2 were assembled from components in England by Royal Small Arms Factory, Enfield (RSAF(E)).

Action

- blowback operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the underside of the magazine housing.
- observed serial number consisted of five numbers without a letter prefix or suffix on one example.
- observed serial number had a letter "Q" prefix and five numbers on one example.
- STEN MARK 2 serial number letter/letters.
- "A" letter suffix has been noted on some serial numbers, the letter "A" denotes that non-interchangeable components have been fitted.
- "B" or "BO" - Birmingham Small Arms (BSA) assembled/manufactured STEN MARK 2 submachine guns will be found with a serial numbers having a "B" or a "BO" prefix and up to six numbers.
- "E", "R" or "S" - Royal Small Arms Factory, Enfield (RSAF(E)) assembled/manufactured STEN MARK 2 submachine guns will be found with serial numbers having a letter "E", R" or "S" prefix and up to six numbers.
- "F" and "FA" to "FZ" - Royal Ordnance Factory Fazakerley (ROF(F)) assembled/manufactured STEN MARK 2 submachine guns will be found with a serial number having a "F" prefix and up to five numbers or a two letter prefix "FA" to "FZ" and up to five numbers or up two five numbers with a letter "F" suffix.
- serial number range is from F-1 to F-99999, FA-1 to FA-99999 and so on to FZ-99999.
- "T" or "TF" - Royal Ordnance Factory Theale (ROF(T)) assembled/manufactured STEN MARK 2 submachine guns will be found with a serial number having a letter "T" prefix and up to five numbers or a "TF" prefix and up to five numbers.
- serial number range is from T-1 to T-50000 plus and "TF-1 to TF-6000.
- "1L" up to "13L" - Small Arms Limited, Long Branch manufactured STEN MARK 2 submachine guns will be found with a serial number having a single number, a letter "L" and up to five numbers or two numbers, a letter "L" and up to five numbers.
- serial number range is from 1L0001 to 1L9999 and so on to 13L5###.

Shots

- left side mounted, detachable box magazine.

Canadian Law Comments

- in the case of this firearm, it has been determined that the component commonly designated as the magazine housing, upon which all or part of the following information may be found marked: the Manufacturer's identification (either in full or in code); Model identification; Proof information and the Serial Number; is the Receiver/Frame for the purposes stated within The Firearms Act and the Criminal Code of Canada.

Notes

Make

- make is not marked on the firearm.
- the STEN name consists of the first letter of the names of the two designers (Reginald Vernon SHEPHERD and Harold John TURPIN) followed by the two first letters of ENGLAND, the country of origin.

Model

- the model is not marked on the firearm; this is a direct copy of the British Sten Mark 2 submachine gun, manufactured by Israeli domestic workshops prior to or after the independence of Israel in 1948.
- these submachine guns are usually of slightly rougher finish, given their underground manufacture, but operate identically to the British parent model.
- features usually include: unfinished, painted, or blued finish; detachable barrel held in with a screw-in ventilated barrel shroud; fixed open peep sights welded in place; a horizontal magazine housing with magazine latch; bolt handle running in a grove along the upper right side of the receiver/frame tube; offset safety notch for the bolt handle; cross-bolt fire selector; and a tubular buttstock with flat butt.

Manufacturer

- the manufacturer may be marked on the magazine housing as "T.M.T." in English or "Tav Mem Tav" in Hebrew, often with a following Roman numeral ("II", "III", "IV", etc.) to denote the particular workshop the submachine gun was produced in. They will also usually bear Haganah or Israeli army proofs and/or property markings, often in a six-pointed star.

Action

- no longer capable of full automatic fire.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the magazine housing.
Shots	- detachable box magazine. - the 32 round magazine made by the Israeli's has the six point star marked on it.
Canadian Law Comments	- in the case of this firearm, it has been determined that the component commonly designated as the magazine housing, upon which all or part of the following information may be found marked: the Manufacturer's identification (either in full or in code); Model identification; Proof information and the Serial Number; is the Receiver/Frame for the purposes stated within The Firearms Act and the Criminal Code of Canada.
Other Markings	- Hebrew markings may be located on the magazine housing.

- "E", "R" or "S" - Royal Small Arms Factory, Enfield (RSAF(E)) assembled/manufactured STEN MARK 2 submachine guns will be found with serial numbers having a letter "E", R" or "S" prefix and up to six numbers.
- "F" and "FA" to "FZ" - Royal Ordnance Factory Fazakerley (ROF(F)) assembled/manufactured STEN MARK 2 submachine guns will be found with a serial number having a "F" prefix and up to five numbers or a two letter prefix "FA" to "FZ" and up to five numbers or up two five numbers with a letter "F" suffix.
- serial number range is from F-1 to F-99999, FA-1 to FA-99999 and so on to FZ-99999.
- "T" or "TF" - Royal Ordnance Factory Theale (ROF(T)) assembled/manufactured STEN MARK 2 submachine guns will be found with a serial number having a letter "T" prefix and up to five numbers or a "TF" prefix and up to five numbers.
- serial number range is from T-1 to T-50000 plus and "TF-1 to TF-6000.
- "1L" up to "13L" - Small Arms Limited, Long Branch manufactured STEN MARK 2 submachine guns will be found with a serial number having a single number, a letter "L" and up to five numbers or two numbers, a letter "L" and up to five numbers.
- serial number range is from 1L0001 to 1L9999 and so on to 13L5###.

Shots

- detachable box magazine.

Canadian Law Comments

- in the case of this firearm, it has been determined that the component commonly designated as the magazine housing, upon which all or part of the following information may be found marked: the Manufacturer's identification (either in full or in code); Model identification; Proof information and the Serial Number; is the Receiver/Frame for the purposes stated within The Firearms Act and the Criminal Code of Canada.

Remarks

- main production carried out by Royal Small Arms Factory, Fazakerly, Theale, and Birmingham Small Arms.
- "Stens" were assembled by Singer Manufacturing Company and Lines Brothers.
- many sub-contractors were also involved, such as Briggs Motor; Dashwood Engineering; Elkington & Co Ltd., etc.

FRT Report

Firearm Reference Number (FRN): 197113
Make: Sten
Model: MARK 2

Summary

Make:	Sten
Model:	MARK 2
Manufacturer:	Legge, J
Level:	Converted Automatics
Type:	Submachine Gun
Action:	Converted Automatic
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
197113 - 1	9MM LUGER	5	197	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- "STEN MK II" is marked on top of the magazine housing.
- The STEN name consists of the first letter of the names of the two designers (Reginald Vernon SHEPHERD and Harold John TURPIN) followed by the two first letters of ENGLAND, the country of origin.

Model

- Manufactured from 1941 to 1945.
- "STEN MK II" is marked on the top of the magazine housing.
- The STEN MK II is distinguished by its all-metal welded construction; and by a short barrel that can be replaced by pulling out a locking ratchet and unscrewing the barrel nut (attached to the ventilated barrel shroud); the magazine housing can be rotated about the receiver axis to reduce the width of the firearm when carried.
- Features include: metal "T"-stock or a metal "loop"-stock; fixed sights; and a fire selector button that pushes sideways through the trigger mechanism housing.
- Total quantity manufactured by this manufacturer is purported to be 404,383 examples.

Manufacturer

- "JL & Co. Ltd." is marked on the underside of the magazine housing.
- "JL & Co. Ltd." was the abbreviation for J. Legge & Company Limited, located in Willenhall, England.
- STEN MARK 2 were manufactured and/or assembled from components in England by Birmingham Small Arms (BSA), Royal Ordnance Factory Fazakerley (ROF(F)), and Royal Ordnance Factory Theale (ROF(T)).
- STEN MARK 2 were assembled from components in England by Royal Small Arms Factory, Enfield (RSAF(E)).

Action

- Blowback operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- The serial number is marked on the underside of the magazine housing.
- observed serial number consisted of a two letter "FK" prefix and five numbers.
- STEN MARK 2 serial number letter/letters.
- "A" letter suffix has been noted on some serial numbers, the letter "A" denotes that non-interchangeable components have been fitted.
- "B" or "BO" - Birmingham Small Arms (BSA) assembled/manufactured STEN MARK 2 submachine guns will be found with a serial numbers having a "B" or a "BO" prefix and up to six numbers.
- "E", "R" or "S" - Royal Small Arms Factory, Enfield (RSAF(E)) assembled/manufactured STEN MARK 2 submachine guns will be found with serial numbers having a letter "E", R" or "S" prefix and up to six numbers.
- "F" and "FA" to "FZ" - Royal Ordnance Factory Fazakerley (ROF(F)) assembled/manufactured STEN MARK 2 submachine guns will be found with a serial number having a "F" prefix and up to five numbers or a two letter prefix "FA" to "FZ" and up to five numbers or up two five numbers with a letter "F" suffix.
- The serial number range is from F-1 to F-99999, FA-1 to FA-99999 and so on to FZ-99999.
- "T" or "TF" - Royal Ordnance Factory Theale (ROF(T)) assembled/manufactured STEN MARK 2 submachine guns will be found with a serial number having a letter "T" prefix and up to five numbers or a "TF" prefix and up to five numbers.
- The serial number range is from T-1 to T-50000 plus and "TF-1 to TF-6000.
- "1L" up to "13L" - Small Arms Limited, Long Branch manufactured STEN MARK 2 submachine guns will be found with a serial number having a single number, a letter "L" and up to five numbers or two numbers, a letter "L" and up to five numbers.
- The serial number range is from 1L0001 to 1L9999 and so on to 13L5###.

Shots

- Detachable box magazine.

Canadian Law Comments

- In the case of this firearm, it has been determined that the component commonly designated as the magazine housing, upon which all or part of the following information may be found marked: the Manufacturer's identification (either in full or in code); Model identification; Proof information and the Serial Number; is the Receiver/Frame for the purposes stated within The Firearms Act and the Criminal Code of Canada.

- features include: metal "T"-stock or a metal "loop"-stock; fixed sights; and a fire selector button that pushes sideways through the trigger mechanism housing.
- total quantity manufactured by this manufacturer is purported to be 1,950,000 examples.

Manufacturer

- manufactures name may be marked on the firearm.
- STEN MARK 2 were manufactured and/or assembled from components in England by Birmingham Small Arms (BSA), Royal Ordnance Factory Fazakerley (ROF(F)), and Royal Ordnance Factory Theale (ROF(T)).
- STEN MARK 2 were assembled from components in England by Royal Small Arms Factory, Enfield (RSAF(E)).

Action

- no longer capable of full automatic fire.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number may be marked on top or on the bottom of the magazine housing.
- Sten Mark 2 submachine guns made at Royal Ordnance Factory, Fazakerley are normally manufactured with an "F" in the serial number in one of the following formats.
- F1 to F99999.
- FA1 to FZ99999.
- 1F to 350000F.
- on Sten submachine guns which were missing a serial number or the serial number was illegible, a replacement serial number was applied and may be in one of the following formats.
- from number1 to 8869.
- the serial number may have a "ZZ" prefix.
- SA55A1 to SA55A400.
- some Sten Submachine Guns may have a "A" suffix. These models were made by various manufactures. A Sten Submachine Gun with a "A" suffix indicated a model in which some of the internal parts were not interchangeable with other models.

Shots

- detachable box magazine.

Canadian Law Comments

- in the case of this firearm, it has been determined that the component commonly designated as the magazine housing, upon which all or part of the following information may be found marked: the Manufacturer's identification (either in full or in code); Model identification; Proof information and the Serial Number; is the Receiver/Frame for the purposes stated within The Firearms Act and the Criminal Code of Canada.

128933 - 3	9MM LUGER	32	197	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "STEN" may be marked on top of the magazine housing.
- the STEN name consists of the first letter of the names of the two designers (Reginald Vernon SHEPHERD and Harold John TURPIN) followed by the two first letters of ENGLAND, the country of origin.

Model

- manufactured from 1941 to 1945.
- "STEN MK II" is usually marked on the top of the magazine housing.
- the STEN MK II is distinguished by its all-metal welded construction; and by a short barrel that can be replaced by pulling out a locking ratchet and unscrewing the barrel nut (attached to the ventilated barrel shroud); the magazine housing can be rotated about the receiver axis to reduce the width of the firearm when carried.
- features include: metal "T"-stock or a metal "loop"-stock; fixed sights; and a fire selector button that pushes sideways through the trigger mechanism housing.
- total quantity manufactured by this manufacturer is purported to be 1,950,000 examples.

Manufacturer

- Royal Small Arms Factory, Enfield (RSAF(E)) is not marked on the firearm.
- STEN MARK 2 were assembled from components manufactured by various sub-contractors in England and the final assembly was done by Royal Small Arms Factory, Enfield (RSAF(E)).
- STEN MARK 2 were manufactured and/or assembled from components in England by Birmingham Small Arms (BSA), Royal Ordnance Factory Fazakerley (ROF(F)), and Royal Ordnance Factory Theale (ROF(T)).
- NOTE: various sub-contractors identifiers may be marked on the components.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- blowback operated, utilizing Advanced Primer Ignition.
Serial Number	- serial number may be marked on the magazine housing. - Sten Mark 2 submachine guns assembled at Royal Ordnance Factory, Enfield are usually marked with a serial number with the following letter prefix "E", "R" or "S". - some Sten Mark 2 Submachine Guns may have a letter "A" suffix. The letter "A" suffix indicated that non-interchangeable components have been fitted.
Shots	- detachable box magazine.
Canadian Law Comments	- in the case of this firearm, it has been determined that the component commonly designated as the magazine housing, upon which all or part of the following information may be found marked: the Manufacturer's identification (either in full or in code); Model identification; Proof information and the Serial Number; is the Receiver/Frame for the purposes stated within The Firearms Act and the Criminal Code of Canada.
Remarks	- main production carried out by Royal Small Arms Factory, Fazakerly, Theale, and Birmingham Small Arms . - "Stens" were assembled by Singer Manufacturing Company and Lines Brothers. - many sub-contractors were also involved, such as Briggs Motor; Dashwood Engineering; Elkington & Co Ltd., etc.

Notes

Make

- the STEN name consists of the first letter of the names of the two designers (Reginald Vernon SHEPHERD and Harold John TURPIN) followed by the two first letters of ENGLAND, the country of origin.

Model

- manufactured from 1941 to 1945.
- "STEN MK II" is marked on the top of the magazine housing.
- the STEN MARK 2 is distinguished by its all-metal welded construction; and by a short barrel that can be replaced by pulling out a locking ratchet and unscrewing the barrel nut (attached to the ventilated barrel shroud); the magazine housing can be rotated about the receiver axis to reduce the width of the firearm when carried.
- features include: metal "T"-stock or a metal "loop"-stock; fixed sights; and a fire selector button that pushes sideways through the trigger mechanism housing.
- total quantity manufactured by this manufacturer is purported to be 133,947 examples.

Manufacturer

- "LONG BRANCH" or "LB" is marked on the top of the magazine housing.

Action

- blowback operated, utilizing Advanced Primer Ignition.

Serial Number

- serial number is marked on the bottom of the magazine housing.
- serial number range: 0L0001 to 0L9999, 1L0001 to 1L9999, 2L0001 to 2L9999, 3L0001 to 3L9999, 4L0001 to 4L9999, 5L0001 to 5L9999, 6L0001 to 6L9999, 7L0001 to 7L9999, 8L0001 to 8L9999, 9L0001 to 9L9999, 10L0001 to 10L9999, 11L0001 to 11L9999, 12L0001 to 12L9999, and 13L0001 to appoximately 13L500.
- observed serial number consisted of one number, letter "L" and four numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments - in the case of this firearm, it has been determined that the component commonly designated as the magazine housing, upon which all or part of the following information may be found marked: the Manufacturer's identification (either in full or in code); Model identification; Proof information and the Serial Number; is the Receiver/Frame for the purposes stated within The Firearms Act and the Criminal Code of Canada.

Other Markings - marked on top of the magazine housing below the model and manufacturer's inscription: date of manufacture (example: 1943).

Remarks - an all metal firearm designed for ease of rapid production, using a maximum of stamped metal and screw machine components and a minimum of expensive machined parts.

Notes

Make

- "STEN" may be marked on top of the magazine housing.
- the STEN name consists of the first letter of the names of the two designers (Reginald Vernon SHEPHERD and Harold John TURPIN) followed by the two first letters of ENGLAND, the country of origin.

Model

- manufactured from 1941 to 1945.
- "STEN MK II" is marked on the top of the magazine housing.
- "STEN MARK 2" is distinguished by its all-metal welded construction; and by a short barrel that can be replaced by pulling out a locking ratchet and unscrewing the barrel nut (attached to the ventilated barrel shroud); the magazine housing can be rotated about the receiver axis to reduce the width of the firearm when carried.
- features include: metal "T"-stock or a metal "loop"-stock; fixed sights; and a fire selector button that pushes sideways through the trigger mechanism housing.

Manufacturer

- "J.W. Spear & Sons Limited" was located at Green Street in Enfield, Middlesex, England.
- "S&S" or "S106" may be marked on the underside of the magazine housing.
- "S&S" and "S106" indicate the manufacturer Spear & Sons.
- STEN MARK 2 were manufactured and/or assembled from components in England by Birmingham Small Arms (BSA), Royal Ordnance Factory Fazakerley (ROF(F)), and Royal Ordnance Factory Theale (ROF(T)).
- STEN MARK 2 were assembled from components in England by Royal Small Arms Factory, Enfield (RSAF(E)).

Action

- no longer capable of automatic fire.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the underside of the magazine housing.
- observed serial number consisted of a letter "R" prefix, six numbers and a letter "A" suffix.
- STEN MARK 2 serial number letter/letters.
- "A" letter suffix has been noted on some serial numbers, the letter "A" denotes that non-interchangeable components have been fitted.
- "B" or "BO" - Birmingham Small Arms (BSA) assembled/manufactured STEN MARK 2 submachine guns will be found with a serial numbers having a "B" or a "BO" prefix and up to six numbers.
- "E", "R" or "S" - Royal Small Arms Factory, Enfield (RSAF(E)) assembled/manufactured STEN MARK 2 submachine guns will be found with serial numbers having a letter "E", R" or "S" prefix and up to six numbers.
- "F" and "FA" to "FZ" - Royal Ordnance Factory Fazakerley (ROF(F)) assembled/manufactured STEN MARK 2 submachine guns will be found with a serial number having a "F" prefix and up to five numbers or a two letter prefix "FA" to "FZ" and up to five numbers or up two five numbers with a letter "F" suffix.
- serial number range is from F-1 to F-99999, FA-1 to FA-99999 and so on to FZ-99999.
- "T" or "TF" - Royal Ordnance Factory Theale (ROF(T)) assembled/manufactured STEN MARK 2 submachine guns will be found with a serial number having a letter "T" prefix and up to five numbers or a "TF" prefix and up to five numbers.
- serial number range is from T-1 to T-50000 plus and "TF-1 to TF-6000.
- "1L" up to "13L" - Small Arms Limited, Long Branch manufactured STEN MARK 2 submachine guns will be found with a serial number having a single number, a letter "L" and up to five numbers or two numbers, a letter "L" and up to five numbers.
- serial number range is from 1L0001 to 1L9999 and so on to 13L5###.

Shots

- left side mounted, detachable box magazine.

Canadian Law Comments

- in the case of this firearm, it has been determined that the component commonly designated as the magazine housing, upon which all or part of the following information may be found marked: the Manufacturer's identification (either in full or in code); Model identification; Proof information and the Serial Number; is the Receiver/Frame for the purposes stated within The Firearms Act and the Criminal Code of Canada.

- STEN MARK 2 were assembled from components in England by Royal Small Arms Factory, Enfield (RSAF(E)).

Action

- blowback operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the underside of the magazine housing.
- observed serial number consisted of a letter "R" prefix, six numbers and a letter "A" suffix.
- STEN MARK 2 serial number letter/letters.
- "A" letter suffix has been noted on some serial numbers, the letter "A" denotes that non-interchangeable components have been fitted.
- "B" or "BO" - Birmingham Small Arms (BSA) assembled/manufactured STEN MARK 2 submachine guns will be found with a serial numbers having a "B" or a "BO" prefix and up to six numbers.
- "E", "R" or "S" - Royal Small Arms Factory, Enfield (RSAF(E)) assembled/manufactured STEN MARK 2 submachine guns will be found with serial numbers having a letter "E", R" or "S" prefix and up to six numbers.
- "F" and "FA" to "FZ" - Royal Ordnance Factory Fazakerley (ROF(F)) assembled/manufactured STEN MARK 2 submachine guns will be found with a serial number having a "F" prefix and up to five numbers or a two letter prefix "FA" to "FZ" and up to five numbers or up two five numbers with a letter "F" suffix.
- serial number range is from F-1 to F-99999, FA-1 to FA-99999 and so on to FZ-99999.
- "T" or "TF" - Royal Ordnance Factory Theale (ROF(T)) assembled/manufactured STEN MARK 2 submachine guns will be found with a serial number having a letter "T" prefix and up to five numbers or a "TF" prefix and up to five numbers.
- serial number range is from T-1 to T-50000 plus and "TF-1 to TF-6000.
- "1L" up to "13L" - Small Arms Limited, Long Branch manufactured STEN MARK 2 submachine guns will be found with a serial number having a single number, a letter "L" and up to five numbers or two numbers, a letter "L" and up to five numbers.
- serial number range is from 1L0001 to 1L9999 and so on to 13L5###.

Shots

- left side mounted, detachable box magazine.

Canadian Law Comments

- in the case of this firearm, it has been determined that the component commonly designated as the magazine housing, upon which all or part of the following information may be found marked: the Manufacturer's identification (either in full or in code); Model identification; Proof information and the Serial Number; is the Receiver/Frame for the purposes stated within The Firearms Act and the Criminal Code of Canada.

156926 - 1	9MM LUGER	5	197	Prohibited CC 84(1) "prohibited firearm" para. (c)	Non-Commercial Customization	
156926 - 2	9MM LUGER	32	197	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "STEN" is marked on top of the magazine housing.
- "SECO" is marked on the underside of the magazine housing of an observed example.
- the STEN name consists of the first letter of the names of the two designers (Reginald Vernon SHEPHERD and Harold John TURPIN) followed by the two first letters of ENGLAND, the country of origin.

Model

- manufactured circa 1941 to 1945.
- marked on the top of the magazine housing: STEN. MK II
- 800 produced by a small number of employees of about 18 small and intermediate companies for the clandestine Norwegian Sten program.
- these Norwegian Sten's are easily identified by the following features: no front sight; straight cut barrel at the muzzle with a lack of crowning; a transverse, ground down, central seam welded across the magazine housing and the word "SECO" marked on the underside of the magazine housing.
- the STEN MK II is distinguished by its all-metal welded construction; and by a short barrel that can be replaced by pulling out a locking ratchet and unscrewing the barrel nut (attached to the ventilated barrel shroud); the magazine housing can be rotated about the receiver axis to reduce the width of the firearm when carried.
- features include: metal "T"-stock or a metal "loop"-stock; fixed sights; and a fire selector button that pushes sideways through the trigger mechanism housing.

Action

- blowback operated, utilizing Avanced Primer Ignition.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- originally not serial numbered, but some were numbered after the war by the Norwegian military. - serial number is usually marked on the underside of the magazine housing. - observed serial number consisted of a letter "B" prefix and six numbers. - STEN MARK 2 serial number letter/letters. - "A" letter suffix has been noted on some serial numbers, the letter "A" denotes that non-interchangeable components have been fitted. - "B" or "BO" - Birmingham Small Arms (BSA) assembled/manufactured STEN MARK 2 submachine guns will be found with a serial numbers having a "B" or a "BO" prefix and up to six numbers. - "E", "R" or "S" - Royal Small Arms Factory, Enfield (RSAF(E)) assembled/manufactured STEN MARK 2 submachine guns will be found with serial numbers having a letter "E", R" or "S" prefix and up to six numbers. - "F" and "FA" to "FZ" - Royal Ordnance Factory Fazakerley (ROF(F)) assembled/manufactured STEN MARK 2 submachine guns will be found with a serial number having a "F" prefix and up to five numbers or a two letter prefix "FA" to "FZ" and up to five numbers or up two five numbers with a letter "F" suffix. - serial number range is from F-1 to F-99999, FA-1 to FA-99999 and so on to FZ-99999. - "T" or "TF" - Royal Ordnance Factory Theale (ROF(T)) assembled/manufactured STEN MARK 2 submachine guns will be found with a serial number having a letter "T" prefix and up to five numbers or a "TF" prefix and up to five numbers. - serial number range is from T-1 to T-50000 plus and "TF-1 to TF-6000. - "1L" up to "13L" - Small Arms Limited, Long Branch manufactured STEN MARK 2 submachine guns will be found with a serial number having a single number, a letter "L" and up to five numbers or two numbers, a letter "L" and up to five numbers. - serial number range is from 1L0001 to 1L9999 and so on to 13L5###.
Shots	- detachable box magazine.
Canadian Law Comments	- in the case of this firearm, it has been determined that the component commonly designated as the magazine housing, upon which all or part of the following information may be found marked: the Manufacturer's identification (either in full or in code); Model identification; Proof information and the Serial Number; is the Receiver/Frame for the purposes stated within The Firearms Act and the Criminal Code of Canada.

Notes

Make

- "STEN" may be marked on top of the magazine housing.
- The STEN name consists of the first letter of the names of the two designers (Reginald Vernon SHEPHERD and Harold John TURPIN) followed by the two first letters of ENGLAND, the country of origin.

Model

- This record is a generic record to be used only when unable to distinguish a manufacturer.
- "STEN MK II" is usually marked on the top of the magazine housing.
- The STEN MK II is distinguished by its all-metal welded construction; and by a short barrel that can be replaced by pulling out a locking ratchet and unscrewing the barrel nut (attached to the ventilated barrel shroud); the magazine housing can be rotated about the receiver axis to reduce the width of the firearm when carried.
- Features may include: straight, rifled barrel with no muzzle threading or muzzle attachment, ventilated barrel shroud, fixed sights, left-facing magazine housing that is able to be pivoted downward for storage, right-side charging handle, cross-bolt fire selector, metal "T"-stock or a metal "loop"-stock, blued, phosphate or painted finish.

Action

- Blowback operated.

Serial Number

- The serial number is normally found on the magazine housing.

Shots

- Detachable box magazine.

Canadian Law Comments

- In the case of this firearm, it has been determined that the component commonly designated as the magazine housing, upon which all or part of the following information may be found marked: the Manufacturer's identification (either in full or in code); Model identification; Proof information and the Serial Number; is the Receiver/Frame for the purposes stated within The Firearms Act and the Criminal Code of Canada.

119100 - 2	7.62MM TOKAREV	35	267	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- the STEN name consists of the first letter of the names of the two designers (Reginald Vernon SHEPHERD and Harold John TURPIN) followed by the two first letters of ENGLAND, the country of origin.

Model

- this is a Chinese conversion of MARK 2 Sten Guns from the original 9MM LUGER calibre to 7.62 TOKAREV calibre.
- modified in the 1950s.
- conversion entailed either modifying the original straight magazine housing or replacing it with a newly manufactured curved magazine housing to accept the curved magazine of the Chinese Type 54 submachine gun, replacing the barrel and either replacing the breech bolt or modifying the original breech bolt to feed from the double column of the Type 54.
- most Chinese conversions were carried out to Canadian STEN MK II manufactured by LONG BRANCH during World War II.

Manufacturer

- manufacture/conversion conducted at local workshops.
- may have original manufacturer's markings.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number is marked on the top of the magazine housing.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- "7.62" may be marked on the top of the magazine housing.
Shots	- left side mounted, detachable box magazine.
Other Markings	- the magazine housing is marked with Chinese characters that reportedly translate to "Sten Hand Carry Machine Gun Manufactured in Canada".

181762 - 2	9MM LUGER	32	197	Prohibited PFR, Part 1, para. 177(i)	Non-Commercial Customization	

Notes

Make

- "STEN MK II LONGBRANCH 1943" is marked on the firearm. The firearm bears markings similar to a genuine Longbranch Sten MKII manufactured in 1943.

Model

- this is a homemade version of a semi-automatic Sten MARK 2 that is marked "STEN MK II", "LONGBRANCH", "1943".
- based on a Sten Mark 2 tubular receiver made from a commercially available drawing, using military surplus or salvaged parts, and a newly constructed receiver/frame magazine housing.
- features include: fixed open sights; tubular construction; magazine housing that extends to the left of the receiver tube, an AR-15 type reciprocating firing pin; stamped steel trigger guard; a "wire loop frame" style stock; finished "in the white".

Type

- this is semi-automatic version of an original Sten MARK 2 submachine gun.

Action

- closed-bolt, striker fired, blowback operated.

Serial Number

- observed serial number is located on the underside of the magazine housing.
- the serial number of this firearm duplicates the style and rationalization utilized by genuine Longbranch, produced Sten Gun serial numbers and may indeed duplicate a genuine Canadian, Longbranch Sten Gun serial number of a second World War production full automatic firearm.
- observed serial number consisted of a number followed by a letter followed by four numbers. Example XLXXXX.

Shots

- detachable box magazine.

Notes

Make

- The make is not marked on the receiver/frame.
- "STEN" name consists of the first letter of the names of the two designers (Reginald Vernon SHEPHERD and Harold John TURPIN) followed by the two first letters of "ENGLAND", the country of origin.

Model

- The model designation may be marked on the firearm.
- "MARK 2 Type" is distinguished by its all-metal tubular construction; a short barrel that can be replaced by pulling out a locking ratchet and unscrewing the barrel nut (attached to the ventilated barrel shroud); the magazine housing can be rotated about the receiver axis to reduce the width of the firearm and covering the ejection port.
- Features include: typical Sten Mk II submachine gun layout and operation; horizontal magazine housing; right side bolt handle with safety notch at the rear of the raceway; stamped and folded trigger housing; cross-bolt, push button type selector; metal "T" stock or metal "loop" stock.

Action

- Blowback operated.
- Select fire.

Serial Number

- The serial number may be marked on the firearm.

Shots

22673 - 1	9MM LUGER	32	90	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "STEN" is marked on the top of the magazine housing.
- "STEN" name consists of the first letter of the names of the two designers (Reginald Vernon SHEPHERD and Harold John TURPIN) followed by the two first letters of ENGLAND, the country of origin.

Model

- manufactured in 1944 and 1945.
- in use until circa 1972.
- "STEN MK II S" is marked on the top of the magazine housing.
- "S" in the model designation refers to "Silenced/Special Purpose".
- "STEN MARK 2S" is a "silenced" version of the STEN MARK 2.
- "STEN MARK 2S" is distinguished by its all-metal welded construction; a barrel mounted silencer on a short barrel that can be replaced by pulling out a locking ratchet and unscrewing the barrel nut (attached to the ventilated barrel shroud); and the magazine housing can be rotated about the receiver axis to reduce the width of the firearm when carried.
- features include: fixed sights; fire selector button that pushes sideways through the trigger mechanism housing; metal "T"-stock or a metal "loop"-stock or a steel loop pistol grip stock.

Manufacturer

- "E&Co", "M78" or "M/78" is marked on the magazine housing.
- "E&Co" is the abbreviation for Elkington & Company.
- "M78" or "M/78" is a factory code for Elkington & Company.
- "E&Co" or "M/78" when found marked on the magazine housing indicates that Elkington & Company manufactured that component.
- Royal Ordnance Factory Theale (ROF (T)) assembled this example and marked it with the factory marking (RTL) on the magazine housing.
- STEN MARK 2 were manufactured and/or assembled from components in England by Birmingham Small Arms (BSA), Royal Ordnance Factory Fazakerley (ROF(F)), and Royal Ordnance Factory Theale (ROF(T)).
- STEN MARK 2 were assembled from components in England by Royal Small Arms Factory, Enfield (RSAF(E)).

Action

- blowback operated, utilizing Advanced Primer Ignition.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the magazine housing.
Shots	- detachable box magazine.
Canadian Law Comments	- in the case of this firearm, it has been determined that the component commonly designated as the magazine housing, upon which all or part of the following information may be found marked: the Manufacturer's identification (either in full or in code); Model identification; Proof information and the Serial Number; is the Receiver/Frame for the purposes stated within The Firearms Act and the Criminal Code of Canada.

143590 - 3	9MM LUGER	32	197	Prohibited CC 84(1) "prohibited firearm" para. (c)	Non-Commercial Customization	

Notes

Make

- "STEN" was observed marked on top of the magazine housing.
- the STEN name consists of the first letter of the names of the two designers (Reginald Vernon SHEPHERD and Harold John TURPIN) followed by the two first letters of ENGLAND, the country of origin.

Model

- "STEN MK II SA" was observed marked on the top of the magazine housing.
- "STEN MARK 2" is distinguished by its all-metal welded construction; and by a short barrel that can be replaced by pulling out a locking ratchet and unscrewing the barrel nut (attached to the ventilated barrel shroud); the magazine housing can be rotated about the receiver axis to reduce the width of the firearm when carried.
- features include: metal "T"-stock or a metal "loop"-stock; fixed sights; and a fire selector button that pushes sideways through the trigger mechanism housing.

Action

- blowback operated, utilizing Advanced Primer Ignition.

Serial Number

- serial number was observed marked on the underside of the magazine housing.
- serial number observed consisted of a two letter "FE" prefix and five numbers.
- Sten Mark 2 submachine guns made at Royal Ordnance Factory, Fazakerley are marked with an "F" in the serial number in one of the following formats.
- F1 to F99999.
- FA1 to FZ99999.
- 1F to 350000F.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.

Canadian Law Comments

- this Sten Mark 2SA firearm, although manufactured to be a semi-automatic firearm, was found to be easily converted to fire full-automatic in a relatively short period of time with relative ease.
- STEN Gun Receivers
- the tube in which the breech bolt reciprocates and the magazine housing constitute the receiver/frame for all purposes of the Criminal Code, Section 2 definition of "firearm".
- for the administrative purposes of The Firearms Act, when the two component receiver/frame is further disassembled, the receiver/frame component known as the magazine housing where the manufacturer information and serial number are found, is used to establish the description for the purpose of firearms registration.
- the classification of this firearm as a semi automatic firearm is based on the presumption that neither of the original two (2) receiver components were reused. This is what was understood to be the meaning of the claim by the manufacturer that the firearm is a "newly manufactured semi-automatic firearm".
- the Criminal Code PART III, Section 84 para (c) definition - prohibited firearm means, "an automatic firearm, whether or not it has been altered to discharge only one projectile with one pressure of the trigger".

Level:	Manufacturer Specifications and Commercial Customization
Type:	Submachine Gun
Action:	Full Automatic
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
73896 - 1	9MM LUGER	5	197	Prohibited CC 84(1) "prohibited firearm" para. (c)	Non-Commercial Customization	
73896 - 2	9MM LUGER	32	197	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "STEN" may be marked on top of the magazine housing.
- the STEN name consists of the first letter of the names of the two designers (Reginald Vernon SHEPHERD and Harold John TURPIN) followed by the two first letters of ENGLAND, the country of origin.

Model

- the model designation will be found marked on the top of the magazine housing as "STEN MC Mk III".
- this model was produced in large numbers (approximately 900,000) during World War II.
- features: the MARK 3 STEN differs from other model Sten Guns in that the barrel is not removable and is enclosed by a barrel jacket; with the exception of the barrel, breech bolt, return spring, and some trigger mechanism components this model STEN Gun is entirely manufactured from sheet metal stampings.
- weight - 7 lb.
- length 30 in.
- rifling characteristics - 1 turn in 10 in., 6 grooves, right hand twist.
- Lines Brothers Ltd produced 876,886 examples of the STEN MARK 3 between January 1942 and September 1943.

Manufacturer

- factory name, logo or code letters will be found marked on the bottom of the magazine housing.
- the factory code used by Lines Brothers Ltd was S68 and occasionally their logo "LB" will be confused as a code.

Action

- blowback operated, utilizing Advanced Primer Ignition.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number will be marked on the bottom of the magazine housing. - the serial numbers of all Lines Brothers Ltd manufactured STEN MARK 3 firearms consisted of five numbers, commencing with 00001 and continuing in series to 99999 roll-stamped on the bottom of the magazine housing. Subsequent serial number series added a prefix letter "A" (A00001 and continued to A99999) and so on, until the prefix letter "H" was utilized. - it is believed that serial numbers in the H89500 range are the production "high" for this fiream.
Shots	- detachable box magazine.
Canadian Law Comments	- in the case of this firearm, it has been determined that the component commonly designated as the magazine housing, upon which all or part of the following information may be found marked: the Manufacturer's identification (either in full or in code); Model identification; Proof information and the Serial Number; is the Receiver/Frame for the purposes stated within The Firearms Act and the Criminal Code of Canada.

71557 - 1	9MM LUGER	32	95	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- the make may be marked on the firearm.
- the STEN name consists of the first letter of the names of the two designers (Reginald Vernon SHEPHERD and Harold John TURPIN) followed by the two first letters of ENGLAND, the country of origin.

Model

- this model was developed as a prototype only, as such the original model markings may still be marked on the firearm. Sample examined appears to have been modified from an existing "MARK 2" as the designation "MK II" appears on top of the magazine housing.
- this compact firearm was developed for use by Parachute troops.
- features include: folding butt; flash hider attached to the barrel; and a pistol grip at the rear of the receiver.
- a similar model, known as the "MARK 4 B" was also developed, this variant has the trigger and pistol grip more centralized on the receiver.

Action

- no longer capable of full automatic fire.

Serial Number

- the serial number may be marked on the top or the underside of the magazine housing.

Shots

- detachable box magazine.

Canadian Law Comments

- in the case of this firearm, it has been determined that the component commonly designated as the magazine housing, upon which all or part of the following information may be found marked: the Manufacturer's identification (either in full or in code); Model identification; Proof information and the Serial Number; is the Receiver/Frame for the purposes stated within The Firearms Act and the Criminal Code of Canada.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- as the production of "Sten" components was carried out by several subcontractors with the majority of assembling done at one of the Royal Ordnance Factories not all samples will be marked with a manufacturer. In some cases different manufacturers markings will be found on different components. This makes a positive identification of the actual manufacturer difficult in some cases. This model apparently reached prototype stage only and it is not confirmed who the actual manufacturer(s) of this variant was/were.

71669 - 2	9MM LUGER	32	197	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- the make may be marked on the firearm.
- the STEN name consists of the first letter of the names of the two designers (Reginald Vernon SHEPHERD and Harold John TURPIN) followed by the two first letters of ENGLAND, the country of origin.

Model

- introduced in 1944.
- the model designation may be found marked marked on the magazine housing in various ways: "STEN MK 5" or "STEN MK V" or as STEN Mk II with the Roman numeral II overstamped with a Roman numeral V.
- features include: front sight with Lee-Enfield No.4 Mark 1 type front sight protector; lugged barrel for the No.7 Mark 1 or the No.4 Mark 2 bayonet; blued finish; the magazine housing can be rotated about the receiver axis to reduce the width of the firearm when carried; selector button for full or semi automatic fire and wooden butt stock and pistol grip.
- a wooden pistol grip forearm was found on the early Mark 5 version.
- rifling characteristics - 1 turn in 10 inches, 6 grooves, right hand twist.
- weight - 7 lb, 8 oz.
- length - 30 in.
- rate of fire - 540 rpm approximate.

Manufacturer

- "E&Co" or "M/78" is marked on the magazine housing.
- "E&Co" is the abbreviation for Elkington & Company.
- "M/78" is a factory code for Elkington & Company.
- "E&Co" or "M/78" when found marked on the magazine housing indicates that Elkington & Company manufactured that component.
- the Royal Ordnance Factory Theale (ROF Theale) assembled this example and marked it with the factory marking (RTL) on the bottom of the magazine housing.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- no longer capable of full automatic fire.
Serial Number	- the serial number will be found marked on the magazine housing. - all STEN Mark V serial numbers by this manufacturer consist of a consecutive numbers and have a letter prefix of a letter V superimposed on the letter S which denotes STEN Mark V.
Shots	- detachable box magazine.
Canadian Law Comments	- in the case of this firearm, it has been determined that the component commonly designated as the magazine housing, upon which all or part of the following information may be found marked: the Manufacturer's identification (either in full or in code); Model identification; Proof information and the Serial Number; is the Receiver/Frame for the purposes stated within The Firearms Act and the Criminal Code of Canada.

141601 - 3	9MM LUGER	32	197	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make may be marked on the firearm.
- the STEN name consists of the first letter of the names of the two designers (Reginald Vernon SHEPHERD and Harold John TURPIN) followed by the two first letters of ENGLAND, the country of origin.

Model

- introduced in 1944.
- the model designation may be found marked marked on the magazine housing in various ways: "STEN MK 5" or "STEN MK V" or as STEN Mk II with the Roman numeral II overstamped with a Roman numeral V.
- features include: front sight with Lee-Enfield No.4 Mark 1 type front sight protector; lugged barrel for the No.7 Mark 1 or the No.4 Mark 2 bayonet; blued finish; the magazine housing can be rotated about the receiver axis to reduce the width of the firearm when carried; selector button for full or semi automatic fire and wooden butt stock and pistol grip.
- a wooden pistol grip forearm was found on the early Mark 5 version.
- rifling characteristics - 1 turn in 10 inches, 6 grooves, right hand twist.
- weight - 7 lb, 8 oz.
- length - 30 in.
- rate of fire - 540 rpm approximate.
- total production by ROF Theale (Feb 1944 to May 1945) was 126,719 examples.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "H. F. & CO. LTD" or "M/87" may be marked on the underside of the magazine housing. - "M/87" code indicate the manufacturer as "H. Frost & Company, Limited". - "H. Frost & Company, Limited" was located in Walsall, Middlesex, England.
Action	- blowback operated, utilizing Advanced Primer Ignition.
Serial Number	- the serial number will be found on the top of the magazine housing. - serial number rationalization as follows: all MARK 5 STEN Guns manufactured or assembled at ROF Theale have a serial number prefix of the intertwined letters "SV" and up to six digits.
Shots	- side mounted detachable box magazine.
Canadian Law Comments	- in the case of this firearm, it has been determined that the component commonly designated as the magazine housing, upon which all or part of the following information may be found marked: the Manufacturer's identification (either in full or in code); Model identification; Proof information and the Serial Number; is the Receiver/Frame for the purposes stated within The Firearms Act and the Criminal Code of Canada.
Other Markings	- all STEN Mark V serial numbers by this manufacturer consist of a consecutive numbers and have a letter prefix of a letter V superimposed on the letter S which denotes STEN Mark V.
Remarks	- some component parts may be marked with sub-contractor numbers or factory codes. - conversion kits to modify MARK 2 to MARK 5 are available.

26423 - 3	32 AUTO	7	76	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
26423 - 2	7.65MM	7	76	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Stenda-Werke G.m.b.H. Waffenbau, Suhl" or "Waffenfabrik Stenda" may be marked on the side of the slide.
- "ST.W" inside an oval, may be marked on the grip plates.
- "ST.W" is the initials for "Stenda Werke".

Model

- model is marked on the slide of the firearm.
- manufactured between 1920 and 1926.
- the Stenda is a slightly modified version of the original Beholla design that was manufactured by Becker & Hollander.
- the lacks of a disassembly hole in the slide and the addition of a disassembly lever on the left side of the firearm is the main difference between the Stenda and the original Beholla design.
- the Beholla model was manufactured by Becker & Hollander from 1915 to 1918, Waffenfabrik August Menz from 1916 to 1918, and Stenda Werke from 1919 to 1920.
- the "Beholla" design was sold under the tradenames of "Leonhardt" by H.M. Gering & Company, "Menta" by Waffenfabrik August Mentz, and "Stenda" by Stenda Werke.

Manufacturer

- "Stenda Werke" was located in Suhl, Germany between 1919 and the late 1920s.
- "Stenda Werke" manufactured "Beholla" and "Stenda" pistols, and hunting and best quality guns.

Action

- blowback operated.

Serial Number

- serial number is located on the left side of the receiver/frame just above the trigger guard or on the underside of the receiver/frame at the forward edge of the trigger guard.
- observed serial number consisted of five sequential numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Notes

Make

- "T. STENSBY & Co." was observed marked on both sides of the receiver/frame.
- "T. STENSBY & Co. MANCHESTER" was observed marked on the rib between the barrels.
- "T. STENSBY & Co." and "12 WITHY GROVE, MANCHESTER" was observed marked on the barrel assembly.

Model

- this is a generic entry for T. Stensby side by side shotguns, with no model markings.
- hammer, or hammerless with a combination of single or double triggers.
- top, side, or push button opening lever.
- damascus, or steel barrels.
- boxlock, or sidelock configuration.

Manufacturer

- Stensby name has been associated with the gun trade in Manchester, England fron 1837 to circa 2008.
- Robert Stensby was located at 11 Hanging Ditch, Manchester from 1837 to 1852.
- Mrs. Martha Stensby & Son was located at 11 Hanging Ditch, Manchester from 1854 to 1878.
- Thomas Stensby was located at 11 Hanging Ditch from 1883 to 1897, 20 Hanging Ditch in 1901, and at 6 Withy Grove, Manchester in 1905.
- Thomas Stensby & Company was located at 6 Withy Grove in 1909 and at 12 Withy Grove, Manchester from 1913 to 1955.
- T. Stensby & Company Limited (Gun and Rifle Makers) was located at 33 Shudehill from 1980 to 1982 and at 1 Shudehill, Manchester, England in 2008.

Action

- side by side configuration.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number may be located on the top tang, the water table and/or the underside of the barrels at the chamber area.
- serialization unknown.
- observed serial number consisted of a letter "C" prefix and three numbers.
- observed serial number consisted of four numbers without a letter prefix or suffix.

Other Markings

- on top of right barrel; " T. STENSBY & CO."
- on top of left barrel; " 12 WITHY GROVE MANCHESTER"

31217 - 2	9MM NATO	34	200	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- "STERLING" is not marked on the firearm.
- "STERLING" designation is derived from the manufacturer's name "Sterling Engineering Company Limited" of Dagenham, England.
- "Patchett Machine Carbine" was redesignated the "Sterling Submachine Gun" with the introduction of the "MARK 3" model in 1955.

Model

- introduced in 1961.
- "CARBINE" over "MACHINE 9MM IA" is normally marked on top of the magazine housing.
- "IA" may also be known as "Indian MARK 4", "SAF 9MM Carbine" or "Carbine 9MM IA1".
- "IA" has a crackled, black paint finish and rounded change lever.

Manufacturer

- year of manufacture may be marked on the magazine housing.

Action

- no longer capable of full automatic fire.

Serial Number

- double letter prefix and four digits.
- located on magazine housing.

Calibre

- calibre is normally marked on top of the magazine housing.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.

Other Markings

- Example of marking on firearm is a follows:
- Carbine
- Machine 9MM.1A.
- Reg No JJ XXXX
- S.A.F. 1971

Notes

Make

- "STERLING" is usually marked on the magazine housing.
- "STERLING" designation is derived from the manufacturer's name "Sterling Engineering Company Limited" of Dagenham, England.
- "Patchett Machine Carbine" was redesignated the "Sterling Submachine Gun" with the introduction of the "MARK 3" model in 1955.

Model

- manufactured circa 1957.
- may also be known as "L2A4 Canadian" or "Gun Submachine 9MM L2A4".
- Marking on firearm is as follows: L2A3 changed to L2A4 by barring out the "3" in L2A3 and inserting a"4".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "STERLING" is marked on the firearm.
- Sterling Telephone & Electric Company of Dagenham, Essex, England was established in 1909.
- Sterling Telephone & Electric Company was known as Sterling Works (Dagenham) Limited in 1932.
- Sterling Telephone & Electric Company became Sterling Electric Holding Limited in 1933.
- Sterling Electric Holding Limited was the parent company of Sterling Armaments and Sterling Engineering.

- STERLING ARMAMENTS was located in Northampton, England circa 1940 to circa 1943.
- Sterling Armaments was one of the secondary companies assigned to produce the Lanchester submachine gun.
- Sterling Armaments was a satellite factory to the original "Sterling Engineering" of Dagenham.
- Sterling Armaments' wartime production code was "M619".

- STERLING ENGINEERING was located on Dagenham, Essex, England.
- Sterling Engineering Company Limited's parent company was Sterling Electric Holding Limited from 1939 to 1972.
- Sterling Engineering was the original company assigned to produce the Lanchester submachine gun.
- Sterling Engineering's wartime production code was "S109".
- Sterling Engineering became Sterling Armament Company Limited.

- STERLING ARMAMENT COMPANY LIMITED was purchased by James Edminston in 1972.
- Sterling Armament and Armalite signed a manufacturing agreement in 1974.
- Sterling Armament was sold by James Edminston in 1983/1984.
- Sterling Armament was purchased by British Aerospace in 1989.
- Sterling Armament ceased operations in the early 1990's.

Serial Number

- located on magazine housing.

- STERLING ARMAMENTS was located in Northampton, England circa 1940 to circa 1943.
- Sterling Armaments was one of the secondary companies assigned to produce the Lanchester submachine gun.
- Sterling Armaments was a satellite factory to the original "Sterling Engineering" of Dagenham.
- Sterling Armaments' wartime production code was "M619".

- STERLING ENGINEERING was located on Dagenham, Essex, England.
- Sterling Engineering Company Limited's parent company was Sterling Electric Holding Limited from 1939 to 1972.
- Sterling Engineering was the original company assigned to produce the Lanchester submachine gun.
- Sterling Engineering's wartime production code was "S109".
- Sterling Engineering became Sterling Armament Company Limited.

- STERLING ARMAMENT COMPANY LIMITED was purchased by James Edminston in 1972.
- Sterling Armament and Armalite signed a manufacturing agreement in 1974.
- Sterling Armament was sold by James Edminston in 1983/1984.
- Sterling Armament was purchased by British Aerospace in 1989.
- Sterling Armament ceased operations in the early 1990's.

Action

- no longer capable of full automatic fire.

Serial Number

- located on top of magazine housing.
- consecutively numbered.
- serial numbers on Commercial MK III Sterlings run from "KR 2731" to "KR 4301".

Calibre

- "9M/M" should be marked on top of the magazine housing.

Shots

- detachable box magazine.

Notes

Make - "STERLING" is usually marked on the top of the magazine housing.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- introduced in 1956 as a result of the demand for police and personal defense weapons in parts of the Commonwealth where civilians were not permitted to posess fully automatic weapons.
- may also be known as "Single Shot Sterling Police Carbine", "Police Carbine" or "MARK 4PC".
- the Police Carbine MARK 4 is nothing more than a Sterling, submachine gun MARK 4 that was purpose built as a semi-automatic only, commercial version.
- the modifications performed to the trigger mechanism and trigger mechanism housing were considered adequate to comply with English laws at the time (circa 1956 to 1975).
- parts from the mainstream submachine gun MARK 4 production line were used. These parts were re-marked but on some examples the original markings may still be visible. The magazine housing was marked "POLICE CARBINE" but "SMG" may still be visible. The calibre markings and original model designation markings "9MM MK 4" are also marked on the magazine housing. The submachine gun MARK 4 trigger mechanism housing was originally marked "A" (automatic), "R" (repetition) and "S" (safe). When these parts were used to produce the Police Carbine MARK 4 they were over stamped with "FIRE" and "SAFE" (though the A, R and S are still visible) and "SINGLE-SHOT" was added to the side of the housing.
- features include: black crackle finish; folding buttstock; tubular receiver/frame with ventilated barrel shroud and a vertical pistol grip.

Manufacturer

- "STERLING" is marked on the firearm.
- Sterling Telephone & Electric Company of Dagenham, Essex, England was established in 1909.
- Sterling Telephone & Electric Company was known as Sterling Works (Dagenham) Limited in 1932.
- Sterling Telephone & Electric Company became Sterling Electric Holding Limited in 1933.
- Sterling Electric Holding Limited was the parent company of Sterling Armaments and Sterling Engineering.

- Sterling Armaments was a satellite factory to the original "Sterling Engineering" of Dagenham.
- Sterling Armaments' wartime production code was "M619".

- STERLING ENGINEERING was located on Dagenham, Essex, England.
- Sterling Engineering Company Limited's parent company was Sterling Electric Holding Limited from 1939 to 1972.
- Sterling Engineering was the original company assigned to produce the Lanchester submachine gun.
- Sterling Engineering's wartime production code was "S109".
- Sterling Engineering became Sterling Armament Company Limited.

- STERLING ARMAMENT COMPANY LIMITED was purchased by James Edminston in 1972.
- Sterling Armament and Armalite signed a manufacturing agreement in 1974.
- Sterling Armament was sold by James Edminston in 1983/1984.
- Sterling Armament was purchased by British Aerospace in 1989.
- Sterling Armament ceased operations in the early 1990's.

Action

- blowback operated.

Serial Number

- the serial number incorporates a "P" prefix followed by four digits. The "P" denotes the status of the firearm as a "single-shot" Police Carbine.
- located on the top of the magazine housing.

Shots

- left side mounted, detachable box magazine.

Notes

Make

- "STERLING" is marked on the top of the magazine housing.

Model

- "POLICE CARBINE" over "9M/M MK4" is marked on the top of the magazine housing.
- "MARK 4 Police Carbine" from its original semi-automatic action were modified to shoot full automatic.
- "MARK 4 Police Carbine" was introduced in 1956 as a result of the demand for police and personal defense weapons in parts of the Commonwealth where civilians were not permitted to possess fully automatic weapons.
- "MARK 4 Police Carbine" may also be known as "Single Shot Sterling Police Carbine", "Police Carbine" or "MARK 4PC".
- "MARK 4 Police Carbine" is nothing more than a Sterling, submachine gun MARK 4 that was purpose built as a semi-automatic only, commercial version.
- "MARK 4 Police Carbine" had modifications performed to the trigger mechanism and trigger mechanism housing were considered adequate to comply with English laws at the time (circa 1956 to 1975).
- "MARK 4 Police Carbine" had parts from the mainstream submachine gun MARK 4 production line used.
- "MARK 4 Police Carbine" parts were re-marked but on some examples the original markings may still be visible. The magazine housing was marked "POLICE CARBINE" but "SMG" may still be visible.
- "MARK 4 Police Carbine" calibre markings and original model designation markings "9M/M MK4" are also marked on the magazine housing. The submachine gun MARK 4 trigger mechanism housing was originally marked "A" (automatic), "R" (repetition) and "S" (safe). When these parts were used to produce the "MARK 4 Police Carbine" they were over stamped with "FIRE" and "SAFE" (though the A, R and S are still visible) and "SINGLE-SHOT" was added to the left side of the trigger housing, visible when removed.
- features include: dovetailed, adjustable front blade between protective ears as a "L" shaped, graduated 100 and 200 yards flip rear sight; muzzle cap with a circular protrusion and left side of the casing bayonet attachment; tubular casing the barrel area with ventilated holes around its circumference; left side magazine housing; magazine release button on top of the magazine well; right side ejection port; angled synthetic pistol grip; safety selector lever on the left side behind the trigger; folding, steel buttstock that lock open by the use of the rear action cap and locking close under the tubular casing muzzle cap; black crackle finish.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "STERLING" is marked on the top of the magazine housing.
- "Sterling Telephone & Electric Company" of Dagenham, Essex, England was established in 1909.
- "Sterling Telephone & Electric Company" was known as Sterling Works (Dagenham) Limited in 1932.
- "Sterling Telephone & Electric Company" became Sterling Electric Holding Limited in 1933.
- "Sterling Electric Holding Limited" was the parent company of "Sterling Armaments" and "Sterling Engineering".
- "STERLING ARMAMENTS" was located in Northampton, England circa 1940 to circa 1943.
- "STERLING ARMAMENTS" was one of the secondary companies assigned to produce the Lanchester submachine gun.
- "STERLING ARMAMENTS" was a satellite factory to the original "Sterling Engineering" of Dagenham.
- "STERLING ARMAMENTS" wartime production code was "M619".
- "STERLING ENGINEERING" was located on Dagenham, Essex, England.
- "STERLING ENGINEERING" Company Limited's parent company was Sterling Electric Holding Limited from 1939 to 1972.
- "STERLING ENGINEERING" was the original company assigned to produce the Lanchester submachine gun.
- "STERLING ENGINEERING" wartime production code was "S109".
- "STERLING ENGINEERING" became Sterling Armament Company Limited.
- "STERLING ARMAMENT COMPANY LIMITED" was purchased by James Edminston in 1972.
- "STERLING ARMAMENT COMPANY LIMITED" and Armalite signed a manufacturing agreement in 1974.
- "STERLING ARMAMENT COMPANY LIMITED" was sold by James Edminston in 1983/1984.
- "STERLING ARMAMENT COMPANY LIMITED" was purchased by British Aerospace in 1989.
- "STERLING ARMAMENT COMPANY LIMITED" ceased operations in the early 1990's.

Action

- blowback operated.

Serial Number

- serial number rationalization was applied to the Police Carbine MARK 4 that incorporates a "P" prefix so that an individual firearm could be readily identified as having left the factory capable of semi-automatic fire only, not in this case.
- serial number is located on the top of the magazine housing.

Calibre

- calibre designation is marked on the top of the magazine housing.

Shots

- detachable box magazine.

Notes

Make

- "STERLING" is usually marked on the magazine housing.
- "STERLING" designation is derived from the manufacturer's name "Sterling Engineering Company Limited" of Dagenham, England.
- "Patchett Machine Carbine" was redesignated the "Sterling Submachine Gun" with the introduction of the "MARK 3" model in 1955.

Model

- manufactured from 1966 to 1988.
- may also be known as "Sterling-Patchett Silenced Gun Mark 5", "Sterling-Patchett 9MM Sub Machine Gun Mark 5", or "SMG 9MM Mark 5".
- This firearm was recognized by Sterling Armament as MARK 5. The military classification of this firearm was L34A1. It may be possible to find either or both markings on any particular firearm. These models are easily identified by the large integral silencer surrounding the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "STERLING" is marked on the firearm.
- Sterling Telephone & Electric Company of Dagenham, Essex, England was established in 1909.
- Sterling Telephone & Electric Company was known as Sterling Works (Dagenham) Limited in 1932.
- Sterling Telephone & Electric Company became Sterling Electric Holding Limited in 1933.
- Sterling Electric Holding Limited was the parent company of Sterling Armaments and Sterling Engineering.

- STERLING ARMAMENTS was located in Northampton, England circa 1940 to circa 1943.
- Sterling Armaments was one of the secondary companies assigned to produce the Lanchester submachine gun.
- Sterling Armaments was a satellite factory to the original "Sterling Engineering" of Dagenham.
- Sterling Armaments' wartime production code was "M619".

- STERLING ENGINEERING was located on Dagenham, Essex, England.
- Sterling Engineering Company Limited's parent company was Sterling Electric Holding Limited from 1939 to 1972.
- Sterling Engineering was the original company assigned to produce the Lanchester submachine gun.
- Sterling Engineering's wartime production code was "S109".
- Sterling Engineering became Sterling Armament Company Limited.

- STERLING ARMAMENT COMPANY LIMITED was purchased by James Edminston in 1972.
- Sterling Armament and Armalite signed a manufacturing agreement in 1974.
- Sterling Armament was sold by James Edminston in 1983/1984.
- Sterling Armament was purchased by British Aerospace in 1989.
- Sterling Armament ceased operations in the early 1990's.

Serial Number

- normally has a four digit serial number and may or may not have a prefix letter "S". Some Model are marked "US 66 A" plus three digits.
- located on top of magazine housing.

Barrel

- barrel measurements are difficult to obtain as the silencer protrudes approximately 200MM past the end of the barrel.

Notes

Make

- make is marked on the left side of the receiver/frame.

Model

- manufactured from 1972 to 1988.
- may also be known as "Sterling Carbine 9MM MARK 6", "MARK 6" or "Sterling Semi-Automatic 9MM Carbine".
- was manufactured at the Sterling Company factory, using modified, normal production parts (capable of automatic fire), to be a firearm capable of "semi-automatic fire only". The modifications performed to the trigger mechanism and trigger mechanism housing were considered adequate to comply with English laws of the time (circa 1972 to 1988).
- this firearm was the first of the Sterling firearms to fire from a closed bolt.

Manufacturer

- "STERLING" is marked on the firearm.
- Sterling Telephone & Electric Company of Dagenham, Essex, England was established in 1909.
- Sterling Telephone & Electric Company was known as Sterling Works (Dagenham) Limited in 1932.
- Sterling Telephone & Electric Company became Sterling Electric Holding Limited in 1933.
- Sterling Electric Holding Limited was the parent company of Sterling Armaments and Sterling Engineering.

- STERLING ARMAMENTS was located in Northampton, England circa 1940 to circa 1943.
- Sterling Armaments was one of the secondary companies assigned to produce the Lanchester submachine gun.
- Sterling Armaments was a satellite factory to the original "Sterling Engineering" of Dagenham.
- Sterling Armaments' wartime production code was "M619".

- STERLING ENGINEERING was located on Dagenham, Essex, England.
- Sterling Engineering Company Limited's parent company was Sterling Electric Holding Limited from 1939 to 1972.
- Sterling Engineering was the original company assigned to produce the Lanchester submachine gun.
- Sterling Engineering's wartime production code was "S109".
- Sterling Engineering became Sterling Armament Company Limited.

- STERLING ARMAMENT COMPANY LIMITED was purchased by James Edminston in 1972.
- Sterling Armament and Armalite signed a manufacturing agreement in 1974.
- Sterling Armament was sold by James Edminston in 1983/1984.
- Sterling Armament was purchased by British Aerospace in 1989.
- Sterling Armament ceased operations in the early 1990's.

Type

- semi-automatic fire only.

Serial Number

- prefix "SA" and a four digit number. The prefix "SA" denotes the status of the firearm as a semi-automatic carbine.
- located on top of magazine housing.

Calibre

- calibre designation is marked on the left side of the magazine housing.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- "STERLING DAGENHAM UK
  LANCHESTER USA DALLAS TEXAS" may be marked on the left side of the receiver/frame near the trigger.
- "STERLING PATENT NOS.
  559469 566875
  579660 686628
  UK CORRESPONDING PATENTS" may be marked on the underside of the magazine housing.

Remarks

- Prohibited-Grandfathered by OIC No. 12.

Notes

Make

- "STERLING" is usually marked on the magazine housing.
- "STERLING" designation is derived from the manufacturer's name "Sterling Engineering Company Limited" of Dagenham, England.
- "Patchett Machine Carbine" was redesignated the "Sterling Submachine Gun" with the introduction of the "MARK 3" model in 1955.

Model

- manufactured from 1983 to 1988.
- "STERLING PISTOL 9 M/M MK7" is marked on the top of the magazine housing.
- may also be known as "MARK 7A", "MARK 7A4 Para Pistol" or "MARK 7A8 Para Pistol".
- the "A" suffix attached to the model designation denotes a full automatic submachine gun that fires from an "open bolt" (when cocked the bolt remains in the open or rearward position), the "4" and "8" designation means a 4" (102mm) or 7.8" (198mm) barrel.
- a commercial version of this model (also known as the MARK 7C, MARK 7C4 or MARK 7C8) that fires in semi-autmatic mode only, and fires from a "closed bolt" (when cocked the bolt is in the closed or forward position) was also available.
- features include: tubular receiver/frame; vertical hand grip or strap attached to the ventilated barrel shroud; black wrinkle finish.

Manufacturer

- "STERLING (in a rectangle) DAGENHAM UK" may be marked on the left side of the trigger mechanism housing.

- Sterling Telephone & Electric Company of Dagenham, Essex, England was established in 1909.
- Sterling Telephone & Electric Company was known as Sterling Works (Dagenham) Limited in 1932.
- Sterling Telephone & Electric Company became Sterling Electric Holding Limited in 1933.
- Sterling Electric Holding Limited was the parent company of Sterling Armaments and Sterling Engineering.

- STERLING ARMAMENTS was located in Northampton, England circa 1940 to circa 1943.
- Sterling Armaments was one of the secondary companies assigned to produce the Lanchester submachine gun.
- Sterling Armaments was a satellite factory to the original "Sterling Engineering" of Dagenham.
- Sterling Armaments' wartime production code was "M619".

- STERLING ENGINEERING was located on Dagenham, Essex, England.
- Sterling Engineering Company Limited's parent company was Sterling Electric Holding Limited from 1939 to 1972.
- Sterling Engineering was the original company assigned to produce the Lanchester submachine gun.
- Sterling Engineering's wartime production code was "S109".
- Sterling Engineering became Sterling Armament Company Limited.

- STERLING ARMAMENT COMPANY LIMITED was purchased by James Edminston in 1972.
- Sterling Armament and Armalite signed a manufacturing agreement in 1974.
- Sterling Armament was sold by James Edminston in 1983/1984.
- Sterling Armament was purchased by British Aerospace in 1989.
- Sterling Armament ceased operations in the early 1990's.

Action

- no longer capable of full automatic fire.

Serial Number

- four digit serial number, may have a two letter prefix.
- located on the top of the magazine housing.

Calibre

- "9m/m" is marked on the top of the magazine housing.
- sample examined was marked "9M.M. .752" over "13 TONS" on the right side of the barrel at the muzzle.

Shots

- side mounted, detachable box magazine.

- Sterling Electric Holding Limited was the parent company of Sterling Armaments and Sterling Engineering.

- STERLING ARMAMENTS was located in Northampton, England circa 1940 to circa 1943.
- Sterling Armaments was one of the secondary companies assigned to produce the Lanchester submachine gun.
- Sterling Armaments was a satellite factory to the original "Sterling Engineering" of Dagenham.
- Sterling Armaments' wartime production code was "M619".

- STERLING ENGINEERING was located on Dagenham, Essex, England.
- Sterling Engineering Company Limited's parent company was Sterling Electric Holding Limited from 1939 to 1972.
- Sterling Engineering was the original company assigned to produce the Lanchester submachine gun.
- Sterling Engineering's wartime production code was "S109".
- Sterling Engineering became Sterling Armament Company Limited.

- STERLING ARMAMENT COMPANY LIMITED was purchased by James Edminston in 1972.
- Sterling Armament and Armalite signed a manufacturing agreement in 1974.
- Sterling Armament was sold by James Edminston in 1983/1984.
- Sterling Armament was purchased by British Aerospace in 1989.
- Sterling Armament ceased operations in the early 1990's.

Serial Number

- prefix "SA" and a four digit number. The prefix "SA" denotes the status of the firearm as a semi-automatic firearm.
- located on the top of the magazine housing.

Shots

- side mounted, detachable box magazine.

Notes

Make

- "STERLING" is usually marked on the magazine housing.
- "STERLING" designation is derived from the manufacturer's name "Sterling Engineering Company Limited" of Dagenham, England.
- "Patchett Machine Carbine" was redesignated the "Sterling Submachine Gun" with the introduction of the "MARK 3" model in 1955.

Model

- manufactured from 1983 to 1988.
- "STERLING PISTOL 9 M/M MK7" is marked on the top of the magazine housing.
- may also be known as "MARK 7A", "MARK 7A4 Para Pistol" or "MARK 7A8 Para Pistol".
- the "A" suffix attached to the model designation denotes a full automatic submachine gun that fires from an "open bolt" (when cocked the bolt remains in the open or rearward position), the "4" and "8" designation means a 4" (102mm) or 7.8" (198mm) barrel.
- a commercial version of this model (also known as the MARK 7C, MARK 7C4 or MARK 7C8) that fires in semi-automatic mode only, and fires from a "closed bolt" (when cocked the bolt is in the closed or forward position) was also available.
- features include: tubular receiver/frame; vertical hand grip or strap attached to the ventilated barrel shroud; black wrinkle finish.

Manufacturer

- "STERLING (in a rectangle) DAGENHAM UK" may be marked on the left side of the trigger mechanism housing.

- Sterling Telephone & Electric Company of Dagenham, Essex, England was established in 1909.
- Sterling Telephone & Electric Company was known as Sterling Works (Dagenham) Limited in 1932.
- Sterling Telephone & Electric Company became Sterling Electric Holding Limited in 1933.
- Sterling Electric Holding Limited was the parent company of Sterling Armaments and Sterling Engineering.

- STERLING ARMAMENTS was located in Northampton, England circa 1940 to circa 1943.
- Sterling Armaments was one of the secondary companies assigned to produce the Lanchester submachine gun.
- Sterling Armaments was a satellite factory to the original "Sterling Engineering" of Dagenham.
- Sterling Armaments' wartime production code was "M619".

- STERLING ENGINEERING was located on Dagenham, Essex, England.
- Sterling Engineering Company Limited's parent company was Sterling Electric Holding Limited from 1939 to 1972.
- Sterling Engineering was the original company assigned to produce the Lanchester submachine gun.
- Sterling Engineering's wartime production code was "S109".
- Sterling Engineering became Sterling Armament Company Limited.

- STERLING ARMAMENT COMPANY LIMITED was purchased by James Edminston in 1972.
- Sterling Armament and Armalite signed a manufacturing agreement in 1974.
- Sterling Armament was sold by James Edminston in 1983/1984.
- Sterling Armament was purchased by British Aerospace in 1989.
- Sterling Armament ceased operations in the early 1990's.

Action

- blowback operated.

Serial Number

- four digit serial number, may have a two letter prefix.
- located on the top of the magazine housing.

Calibre

- "9m/m" is marked on the top of the magazine housing.
- sample examined was marked "9M.M. .752" over "13 TONS" on the right side of the barrel at the muzzle.

Shots

- side mounted, detachable box magazine.

Notes

Make

- "STERLING", "SEMI-AUTOMATIC", 9mm CARBINE Mk8" is marked on the magazine housing.

Model

- manufactured from 1983 to 1988.
- may also be known as the "CBS MARK 8", "Sterling MARK 8", "Carbine MARK 8", "MARK 8", or "Mk 8".
- was manufactured at the Sterling Company factory, using modified, normal production parts, to be a firearm capable of "semi-automatic fire only". The modifications performed to the trigger mechanism and trigger mechanism housing were considered adequate to comply with English laws of the time (circa 1983 to 1988).
- total production is estimated at 70 examples.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "STERLING" is marked on the firearm.
- Sterling Telephone & Electric Company of Dagenham, Essex, England was established in 1909.
- Sterling Telephone & Electric Company was known as Sterling Works (Dagenham) Limited in 1932.
- Sterling Telephone & Electric Company became Sterling Electric Holding Limited in 1933.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured in 1984.
- may also be known as "Sterling Carbine 9MM MARK 9", "MARK 9" or "Sterling Semi-Automatic 9MM Carbine".
- was manufactured at the Sterling Company factory, using modified, normal production parts (capable of automatic fire), to be a firearm capable of "semi-automatic fire only". The modifications performed to the trigger mechanism and trigger mechanism housing were considered adequate to comply with English laws of the time (circa 1984).
- the "Sterling Carbine MARK 9" was a special order item designed to look like a silenced version of the SMG MARK 5 or L34A1. This was accomplished by adding an empty silencer casing to the 406mm barrel, thus giving the firearm the appearance of being silenced.
- this firearm fires from a closed bolt.
- stamped on right hand side of the receiver under the ejection opening:
  STERLING UK
  O.G.& T. CANADA
- it is suspected that O.G & T. stands for Ontario Gun & Tackle, Kenogami, Ontario.

Manufacturer

- "STERLING" is marked on the firearm.
- Sterling Telephone & Electric Company of Dagenham, Essex, England was established in 1909.
- Sterling Telephone & Electric Company was known as Sterling Works (Dagenham) Limited in 1932.
- Sterling Telephone & Electric Company became Sterling Electric Holding Limited in 1933.
- Sterling Electric Holding Limited was the parent company of Sterling Armaments and Sterling Engineering.

- STERLING ARMAMENTS was located in Northampton, England circa 1940 to circa 1943.
- Sterling Armaments was one of the secondary companies assigned to produce the Lanchester submachine gun.
- Sterling Armaments was a satellite factory to the original "Sterling Engineering" of Dagenham.
- Sterling Armaments' wartime production code was "M619".

- STERLING ENGINEERING was located on Dagenham, Essex, England.
- Sterling Engineering Company Limited's parent company was Sterling Electric Holding Limited from 1939 to 1972.
- Sterling Engineering was the original company assigned to produce the Lanchester submachine gun.
- Sterling Engineering's wartime production code was "S109".
- Sterling Engineering became Sterling Armament Company Limited.

- STERLING ARMAMENT COMPANY LIMITED was purchased by James Edminston in 1972.
- Sterling Armament and Armalite signed a manufacturing agreement in 1974.
- Sterling Armament was sold by James Edminston in 1983/1984.
- Sterling Armament was purchased by British Aerospace in 1989.
- Sterling Armament ceased operations in the early 1990's.

Serial Number

- located on top of magazine housing.
- serial number for these models is as follows:
  LA followed by four digits.

Notes

Make

- "STERLING" is marked on the top strap of the receiver/frame.
- "STERLING" revolvers were manufactured by Hopkins & Allen and E.L. & J. Dickinson.

Model

- "STERLING" is marked on the top strap of the receiver/frame.
- this is a typical example of a turn of the century American pocket revolver, chambered for low-powered rimfire cartridges and nickeled with a single-action spur trigger.
- these revolvers have a cylinder-pin retained by a front-mounted latch, and a loading groove milled into the right side of the receiver/frame.
- production of this firearm is considered to be circa 1880's.

Serial Number

- these revolvers are usually numbered on the grip frame, underneath the grip panels; examples may also bear numbers (not necessarily serial numbers) on the exposed bottom portion of the grip frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments - some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- The company logo is marked on the receiver/frame.
- The "Sterling Arms International" logo is comprised of the letters "S" & "A" intertwined with a 3-pointed crown.
- "STERLING ARMS INTERNATIONAL" is marked on the right side of the receiver/frame.
- "LONDON, UK" is marked on the right side of the receiver/frame.
- "Sterling Arms International" has operations in both the United Kingdom and Canada.

Model

- "R18 MK3" is marked on the right side of the lower receiver/frame.
- This is an updated version of the "Sterling Arms International R18 MK2".
- Based on the "AR-180B" design.
- Features include: chrome-lined barrel; free-floating handguard; left-side charging handle; ambidextrous bolt release and safety selector, right side magazine release.
- Overall length with a 472 mm (18.6 inches) barrel is 960 mm (37.8 inches) with the stock collapsed, average weight is 3.1 kg (6.8 lbs).

Manufacturer

- The company logo is marked on the receiver/frame.
- The "Sterling Arms International" logo is comprised of the letters "S" & "A" intertwined with a 3-pointed crown.
- "STERLING ARMS INTERNATIONAL" is marked on the right side of the receiver/frame.
- "LONDON, UK" is marked on the right side of the receiver/frame.
- "Sterling Arms International" has operations in both the United Kingdom and Canada.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- Gas operated.
Serial Number	- The serial number is marked on the right side of the receiver/frame. - Serial number consists of the four digit year of manufacture followed by "CA" and five digits. - The serial number may be repeated on the barrel.
Barrel	- The barrel length does not include any attached device such as flash-hider or muzzle brake.
Calibre	- The calibre designation is marked on the barrel. - "CALIBRE: MULTI" is marked on the left side of the receiver/frame.
Shots	- Detachable box magazine. - Designed to accept "AR15" type magazines.
Canadian Law Comments	- This firearm design incorporates a split receiver/frame: the lower receiver is the master component considered to be the receiver/frame for all purposes of the Criminal Code and the Firearms Act.

Make

- "H.J. Sterling" is marked on the barrel.
- "H J Sterling" was a trade name used by F. Dumoulin & Company, Belgium.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is a single-shot "rolling block"-style rifle, manufactured under the "H.J. Sterling" brand name by Dumoulin.
- features may include: blued finish; open fixed sights; octagonal barrel; fixed or "takedown" barrel (retained by a rotating thumbpiece on the receiver/frame); checkered walnut forearm and semi-pistol-grip stock; single-action trigger mechanism; and a two-piece "rolling block" breech mechanism, where cocking the hammer allows the breech to be opened and an empty cartridge case to be ejected.

Manufacturer

- F. Dumoulin & Co. and/or Dumoulin & Co. and/or the trademark logo is usually marked on the firearm.
- F. Dumoulin & Company trademark logo was the letters "FDC", or "FDC" bisected horizontally by an arrow, "FDC" within a rectangle, or a symbol of a bear walking on all four limbs.

Action

- rolling-block single-shot.

Serial Number

- serial number is marked on the receiver/frame and may be repeated on the barrel.
- observed serial number consists of four numbers.

Calibre

- calibre designation may be marked on the barrel.

Canadian Law Comments

- some firearms manufactured prior to 1898 are deemed to be "ANTIQUE" and as such are not subject to registration under Canadian law. For further clarification refer to the "Antique Firearms Regulations".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - Belgian proof marks will be on different components of the firearm.

Notes

Make

- "STEVENS" is marked on the firearm.
- "STEVENS" trade name/trademark has been used by "J. Stevens & Company", "J. Stevens Arms & Tool Company", "J. Stevens Arms Company" and "Savage".

Model

- manufactured between 1931 and 1948.
- advertised as the "Buckhorn".
- this is a bolt action repeating rifle with a tubular magazine.
- features include: chrome plated bolt with low lift turned down handle and recessed bolt-face, self cocking bolt with red cocking indicator, independent thumb operated safety, tubular receiver with ejection cut separate from the bolt cut locking recess, chromed trigger, fixed tubular under barrel magazine, round tapered barrel with two rear sights (peep and fold down open), hooded ramp front sight with three interchangeable inserts (square top post, bead, special peep), plain pistol grip walnut stock with black painted forend tip and hard rubber butt plate and take-down screw on the underside of the mid-forend.
- do not confuse with the similar Stevens Model 66 rifle manufactured by Stevens and later by Savage, or the Stevens Model 066 manufactured by Stevens, all of which were advertised as "Buckhorn", along with a number of other 22 caliber rifles.
- NOTE: The Stevens Model 66 bolt locks against the rear face of the ejection port opening of the receiver: whereas the Stevens Model 066 locks up in a separate bolt slot behind the ejection port. The Stevens Model 066 was an improved and upgraded redesign of the Stevens Model 66.

Manufacturer

- "SAVAGE ARMS CORPORATION" and "CHICOPEE FALLS, MASS. U.S.A." is marked on the top of the barrel ahead of the rear sight.

Action

- turn bolt operated.

Calibre

- chambered for the 22 LONG RIFLE cartridge.

Shots

- the fixed tubular under barrel magazine holds fifteen 22 LONG RIFLE, seventeen 22 LONG, or twenty-one 22 SHORT cartridges.

Notes

Make

- "STEVENS" is marked on the right side of the receiver/frame.
- "STEVENS" trade name/trademark has been used by "J. Stevens & Company", "J. Stevens Arms & Tool Company", "J. Stevens Arms Company" and "Savage".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "101" is not marked on the firearm. - manufactured between 1912 and 1920. - this is a version of the Model 12 Marksman chambered for shot cartridges. - features include: lever operated tip-up action with a blued receiver/frame; straight stock with a rubber/hard plastic butt plate; optional sling swivels; reinforced breech; large slotted take down thumbscrew located just forward of the operating lever. - a 22 cal barrel and forestock was optional; barrels on these firearms were changed merely by loosening the large thumbscrew and pulling the barrel forward out of the breech ring, then reversing the process with another barrel.
Manufacturer	- "J. STEVENS ARMS & TOOL CO." is marked on left side of receiver/frame.
Action	- lever operated tip-up style.
Serial Number	- serial number located on bottom of receiver/frame.

Notes

Make

- "J. Stevens & Co. Chicopee Fall. Mass. Pat. Sept. 6. 1864" may be marked on the barrel.
- "STEVENS" is marked on the firearm.
- "STEVENS" trade name/trademark has been used by "J. Stevens & Company", "J. Stevens Arms & Tool Company", "J. Stevens Arms Company" and "Savage".

Model

- manufactured between 1910 to 1950.
- may or may not be marked with model designation, features determine the model.

Distinguishing Features: plain slotted hinge-pin screw head on the right side of the receiver/frame; (non-ejecting) primary shell extractor, plain uncheckered varnished pistol-gripped walnut stock and forearm with metal joint.

- other features: case hardened frame, visible spurred hammer, tang breech opening lever, molded checkered black hard-rubber buttplate, compressed forged steel barrel with a hollow tapered, bored for nitro powder and has a full choke.
- may be marked over the chamber: ELECTRO STEEL * CHOKED BORED.
- "J. Stevens & Co. Chicopee Fall. Mass. Pat. Sept. 6. 1864" marked on top of the barrel.

NOTE: Do not confuse with:

- earlier models with the takedown lever with other similar features such as the model 100, and 110.
- models with the same slotted hinge screw feature as follows: model 107 has an automatic ejector and plain wood; model 115 has an automatic ejector, checkered wood and capped pistol-grip; and model 125 has the same features as the model 115 except it is only available in 16, 20, and 28 gauge with a short buttstock for ladies and youths).

Action

- hinge frame, tip-down barrel, break action.

Serial Number

- early firearms may not be numbered.

Calibre

- usually not marked with caliber or cartridge designation.

Notes

Make

- "STEVENS" is marked on the firearm.
- "STEVENS" trade name/trademark has been used by "J. Stevens & Company", "J. Stevens Arms & Tool Company", "J. Stevens Arms Company" and "Savage".

Model

- also known as the "No. 107 Automatic Ejector".
- manufactured between 1907 and 1950.
- may or may not be marked with model designation, features determine the model.
- features include: plain slotted hinge-pin screw head on the right side of the receiver/frame; automatic ejector, plain uncheckered varnished pistol-gripped walnut stock and forearm with metal joint.
- other features: case hardened frame, visible spurred hammer, tang breech opening lever, molded checkered black hard-rubber butt plate.
- compressed forged steel barrel is hollow tapered, bored for nitro powder and is full choked.
- may be marked over the chamber: ELECTRO STEEL * CHOKED BORED
- "J. Stevens & Co. Chicopee Fall. Mass. Pat. Sept. 6. 1864" marked on top of the barrel.

NOTE: Do not confuse with:
- earlier models with the takedown lever with other similar features such as the model 100, and 110.
- models with the same slotted hinge screw feature as follows: model 105 has a (non-ejecting) primary shell extractor, and plain wood; model 115 has an automatic ejector, checkered wood and capped pistol-grip; and model 125 has the same features as the model 115 except it is only available in 16, 20, and 28 gauge with a short buttstock for ladies and youths).

Manufacturer

- "J. Stevens Arms Company" may be marked on the firearm.
- "J. Stevens Arms Company" was a Division of the Savage Arms Corporation of Chicopee Falls, Massachusetts, U.S.A.

Action

- hinge frame, tip-down barrel, break action.

Serial Number

- early firearms may not be numbered.

Notes

Make

- "STEVENS" is marked on the firearm.
- "STEVENS" trade name/trademark has been used by "J. Stevens & Company", "J. Stevens Arms & Tool Company", "J. Stevens Arms Company" and "Savage".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "Model 110E Series K" is located on the left rear side of the barrel. - series letter suffix denotes modifications within the series. - the Stevens model 110E series was manufactured between 1978 and 1985. - features include: Non-slip anodized aluminum butt plate/recoil pad. Capped pistol grip and fluted comb. Action cocks on opening and has double front locking lugs with gas vent holes that match twin gas port in receiver. Indicator on right side forward of the bolt shows if action is cocked. Slide thumb safety located directly behind the bolt and a built in box magazine with blind internal floor-plate. Gold bead front sight on removable ramp, semi buck-horn rear sight with elevator. Receiver drilled and taped for scope mounts. One piece walnut finish "Monte Carlo" stock with pistol grip.
Manufacturer	- manufacturer's name and/or address are marked on the barrel.
Action	- turn-bolt design.
Serial Number	- the serial number is located on upper left side of frame. - the serial number may consist of an alpha prefix followed by six digits.
Calibre	- the 308 WIN was introduced in 1968 and discontinued in 1971. - the 243 WIN was discontinued in 1975.
Shots	- internal box magazine.

Notes

Make

- "STEVENS" is marked on the left side of the barrel.
- "STEVENS" trade name/trademark has been used by "J. Stevens & Company", "J. Stevens Arms & Tool Company", "J. Stevens Arms Company" and "Savage".

Model

- "MODEL 124" is marked on the left side of the barrel.
- manufactured between 1947 and 1952.
- this firearm resembles a semi-automatic shotgun but is a non-traditional bolt action that is operated by pulling the bolt "handle" out and to the rear, this unlocks the action, extracting the cartridge and ejecting it. Pushing the bolt forward and in feeds the next round and locks the action; the firing pin remains locked until the bolt "handle" is pushed fully in.
- features include: round barrel with bead front sight and improved, modified or full choke; solid top receiver/frame with right side ejection; tubular magazine; push button safety on the front of the trigger guard; checkered brown Tenite plastic forearm and pistol grip butt stock; blued finish.

Manufacturer

- "SAVAGE ARMS CORPORATION" over "CHICOPEE FALLS, MASS. U.S.A." is marked on the left side of the barrel.

Action

- straight pull bolt action.
- action is opened by pulling cross bolt handle out and to the rear, this action ejects fired shell.
- action is closed by pushing cross bolt forward and in, the closing stroke moves a loaded shell from the magazine into the chamber.

Calibre

- gauge and chamber length are marked on the right side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - has loading port on the underside of the receiver/frame with a tubular magazine which is not externally visible.

Remarks

- Cross bolt action that is operated by pulling the cross bolt out and to the rear, unlocks the action, extracting the cartridge and ejecting it. Pushing the bolt forward and in, feeds the next round and locks the action. The firing pin remains locked until the cross bolt is pushed fully in. Has a push button safety at the forward end of the trigger guard. Has a blued solid frame, side ejection and a tubular magazine. Pistol grip stock and forearm of tenite and is fully checkered. The pistol grip is capped and has a hard rubber butt plate. Comes in full or modified chokes. "STEVENS Savage Arms Corporation Chicopee Falls, Mass, U.S.A. External appearance same as the 124, 124C & 1244, may have some internal modifications.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
4182 - 1	12 GA X 2 3/4"	2	711	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "STEVENS" is marked on the left side of the barrel.
- "STEVENS" trade name/trademark has been used by "J. Stevens & Company", "J. Stevens Arms & Tool Company", "J. Stevens Arms Company" and "Savage".

Model

- "Model 124C" is marked on the left side of the barrel.
- manufactured between 1947 and 1952.
- this firearm resembles a semi-automatic shotgun but is a non-traditional bolt action that is operated by pulling the bolt "handle" out and to the rear, this unlocks the action, extracting the cartridge and ejecting it. Pushing the bolt forward feeds the next round and locks the action; the firing pin remains locked until the bolt "handle" is pushed fully in.
- features include: round barrel with bead front sight and improved, modified or full choke; solid top receiver/frame with right side ejection; tubular magazine; push button safety on the front of the trigger guard; checkered brown Tenite plastic forearm and pistol grip butt stock; blued finish.

Manufacturer

- "SAVAGE ARMS CORPORATION" over "CHICOPEE FALLS, MASS, U.S.A." is marked on the left side of the barrel.

Action

- straight pull bolt action.
- action is opened by pulling cross bolt handle out and to the rear, this action ejects fired shell casing.
- action is closed by pushing cross bolt forward and in, the closing stroke moves a loaded shell from the magazine into the chamber.

Calibre

- gauge and chamber length are marked on the right side of the barrel.

Shots

- tubular magazine mounted under the barrel.
