Make	- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005. - L.C. Smith trade name/trademark has a long history associated to it. - Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y." - L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888. - John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun. - Hunter Arms Company was purchased by Marlin Firearms in 1945. - Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50. - L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin. - Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971. - Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin. - Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007. - Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.
Model	- manufactured from 1892 to 1912.
Manufacturer	- manufacturer's name is marked on the rib extension.
Action	- side by side barrel configuration.
Serial Number	- on barrel and receiver flats.
Barrel	- in 1906, 26" barrels added.
Remarks	- Breech loading, Nitro steel or Damascus steel double barrel, hammerless, double triggers, checkered two piece English or French walnut half pistol grip stock and forend, unlocking lever mounted on upper tang, sliding safety below unlock lever, with cross bolt lock, auto ejectors, top barrel extension is rectangular in shape. Available in five grades of embellishments, one being the lowest and five being the highest. Dog scene in an oval centered on the side lock covers.

Notes

Make

- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- manufactured from 1892 to 1913.
- this model known as the Automatic Ejector Gun.

Manufacturer

- on left barrel.

Type

- side by side.

Action

- top break.

Serial Number

- on barrel and receiver flats.

Barrel

- in 1906, 26" barrels added.

Remarks

- Breech loading, Whitworth or Demascus Steel, barrels double barrel, hammerless, double triggers. Checkered two piece English,French or Circassian walnut, half pistol grip stock and forend, unlocking lever mounted on upper tang, sliding safety below unlock lever with cross bolt lock, auto ejectors, top barrel extension is rectangular in shape. Available in five grades of embellishments, one being the lowest and five being the highest. Both side plates depicted a hunting dog scene showing two dogs in a oval outdoor scene. Bottom of the frame has the early concave surface. Engraved on rib extension is Hunter Arms Maker Fulton NY. There were four different engraved types on this model which depicted different styles of engraving patterns.

Notes

Make

- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- manufactured from 1895 to 1913.

Manufacturer

- on left barrel.

Type

- side by side.

Action

- top break.

Serial Number

- on barrel and receiver flats.

Barrel

- in 1906, 26" barrels added.

Remarks

- Breech loading, Whitworth Fluid Compressed Steel, double barrels, hammerless, double triggers or single trigger, checkered two piece Circassian walnut half pistol grip stock and forend, unlocking lever mounted on upper tang, sliding safety below unlock lever, with cross bolt lock, auto ejectors, top barrel extension is rectangular in shape. Available in five grades of embellishments, one being the lowest and five being the highest. This is the highest grade of the A models. The side locks depict a Pointer dog on the right plate and a Setter dog on the left plate, done in high relief. Streaks of lightning in gold, added to both sides of the barrel near the breach. Top of the left barrel hand engraved, MADE TO ORDER, BY THE HUNTER ARMS CO, FULTON NY. Only 17 manufactured.

- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- "CROWN GRADE" was manufactured from 1913 to 1945 by the Hunter Arms.
- "CROWN GRADE" was manufactured from 1945 to 1950 by L.C. Smith Gun Company, Incorporated.

Manufacturer

- Hunter Arms Co. Maker, Fulton N.Y.

Serial Number

- on receiver Flats with letter C prefix.

Remarks

- Breech loading, full pistol grip, top lever break open, automatic safety, takedown, side lock double triggers, hammer less, centre fire, Damascus or Nitro steel barrels with a two piece checkered walnut stock and forearm, automatic ejectors and single trigger were available options. The usual engraving was dog scenes on both plates, but may have turkeys on right plate and flying ducks on left plates. A gold crown will be found on the top of the break lever. Without the ventilated rib, a gold metal bar will be found near the rib extension, with extensive scroll engraving on receiver and barrel. On right barrel is engraved L.C. SMITH CROWN GRADE and on left barrel, MADE TO ORDER BY THE HUNTER ARMS CO, INC. MFR., FULTON NY. This model could be had in a featherlight model as well. Exactly the same in appearance except much lighter in weight in twenty gauge.

- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- this is a standard pattern side by side sidelock shotgun.
- features include : select walnut stock with a beavertail forend, color-case-hardened receiver/frame; double triggers; tang mounted safety; blued barrels with a ventilated rib, and double bead sights.
- a "Field" grade of this model was also available, it featured a checkered walnut pistol-grip stock with a splinter forearm.
- Marlin only built these shotguns (Field and Deluxe) from 1968 until 1971, for a total production of 1,959.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- side by side pattern.
Serial Number	- numbered on receiver/frame.

Notes

Make

- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- "L.C. SMITH" and "DE LUXE TRAP" or "DE-LUXE TRAP" is engraved on the top rib.
- "Trap" guns were offered from 1917 to 1945 by the "Hunter Arms Company". It is reported that only three were made in "Deluxe" grade.
- features include: single barrel with a two piece fully checkered walnut stock and forearm; barrel extension was rectangular with square hole for lock; fully engraved on all parts of receiver/frame in fine scroll, also has gold inlayed scenes of quail on both sides of the receiver/frame and gold leaves on upper and lower sides of receiver/frame.
- "DE LUXE TRAP" was also available as a double barrel trap gun in 1941.

Notes

Make

- the make may not be marked on the firearm.
- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.

Model

- manufactured from 1917 to 1943.
-features include: breech loading; stub twist or damascus steel double barrel; exposed hammer type; double triggers; checkered two piece English walnut half pistol grip stock and forend; unlocking lever mounted on upper tang; sliding safety below unlock lever, with cross bolt lock.

Manufacturer

- manufacturer may not be marked on the firearm.
- Hunter Arms Co. Maker, Fulton N.Y.

Type

- side by side.

Action

- top break.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number - on barrel and receiver flats.

Remarks - Breech loading, double barrel, double triggers and exposed double hammers, checkered two piece stock and forend, unlocking lever mounted on upper tang, with cross bolt lock. Top barrel extension is rectangular in shape. May have laminated, Damascus or English Twist barrels. In 1898, Hunter dropped the "Quality" reference and used the term 'Grade". Now available in F grades. The best F grade came with Damascus Steel barrels with English walnut stocks, pistol grip, and neatly checkered. The middle F grade had Best English Stub Twist barrels, English walnut stock, pistol grip, checkered stock. The lower F grade had Royal Steel barrels, English walnut stock, pisol grip, neatly checkered. The "F" grades refer only to the barrel metal as all other specifications are the same. This Eagle grade refers only to the quality and quantity of engraving, with this being better than the Trap Grade.

Notes

Make

- "L.C. SMITH FIELD GRADE" is marked on the top of the right barrel.
- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- "FIELD GRADE" was manufactured from 1913 to 1945 by Hunter Arms Company.
- "FIELD GRADE" was manufactured from 1945 to 1950 by L.C. Smith Gun Company, Incorporated.
- approximately 80 percent of L C Smith shotguns manufactured from 1913 to 1945 were "Field" grade guns.
- "L.C. SMITH FIELD GRADE" is marked on the top of the right barrel.
- "FIELD" is usually marked on the watertable.
- features include: breech loading, top lever break open design; automatic safety; sidelock action; hammerless; checkered walnut semi pistol grip buttstock and forearm, single "Hunter" trigger or double triggers; extractors or automatic ejectors.
- locks and receiver/frames were a mottled color from a case hardening procedure, used at that time.

Manufacturer

- the manufacturer's name may be marked on the top of the left barrel as, "HUNTER ARMS CO. INC. M'F'R'S FULTON. N.Y., U S A", or the underside of the barrels will usually be marked with the Hunter Arms Company nitro proof mark.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- side by side barrel configuration.
Serial Number	- serial number is marked on the watertable of the receiver/frame and repeated on the barrel flats. - observed serial numbers consisted of six numbers without a letter prefix or suffix. - letter markings which denote grades or optional features may be found on the watertable of the receiver/frame and should not be construed to be a prefix or suffix to the serial number itself. - observed markings have included "E" denoting ejectors have been fitted, "FW" denoting featherweight receiver/frame construction, "FWE" denoting featherweight receiver/frame construction fitted with ejectors, "I" denoting Ideal grade, "S" denoting Specialty grade, and "T" denoting trap grade.
Other Markings	- markings which denote optional features may be found on the watertable of the receiver/frame and should not be construed to be a prefix or suffix to the serial number itself. - observed markings have included, "FW" representing a featherweight receiver/frame construction and an "E" denoting that ejectors have been fitted.

Smith and Parker in 2008.
Model	- manufactured from 1917 to 1943.
Type	- side by side.
Action	- top break.
Serial Number	- on barrel and receiver flats.
Remarks	- Breech loading, double barrel, double triggers and exposed double hammers, checkered two piece stock and forend, unlocking lever mounted on upper tang, with cross bolt lock. Top barrel extension is rectangular in shape. May have laminated, Damascus or English Twist barrels. In 1898, Hunter dropped the "Quality" reference and used the term "Grade". Now available in F grades. The best F grade came with Damascus Steel barrels with English walnut stocks, pistol grip, and neatly checkered. The middle F grade had Best English Stub Twist barrels, English walnut stock, pistol grip, checkered stock. The lower F grade had Royal Steel barrels, English walnut stock, pisol grip, neatly checkered. The "F" grades refer only to the barrel metal as all other specifications are the same. This "Ideal" grade refers only to the quality and quantity of engraving, with this being the least amount.

Notes

Make

- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- "- L. C. SMITH IDEAL TRAP -" is usually marked above the chamber area of the barrel or on the rib.
- a total of 5 were manufactured between 1917 and 1945.
- features include: top tang mounted opening lever; hammerless design; single trigger; box lock action; two piece checkered walnut stock and forearm; barrel extension is rectangular with square hole for lock pin; blued finish on metal with varied engraving (each grade is determined by the type and amount of engraving).
- "IDEAL TRAP" was available as a double barrel trap gun in 1941.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the "Hunter Arms" name may be marked in full on the barrels or as "H.A.Co." as part of a trade mark logo.
Remarks	- Breech loading, pistol grip, top lever break open takedown, hammerless, centre fire, single barrel with a two piece checkered walnut stock and forearm. Barrel extension was rectangular with square hole for lock. No engraving.

Notes

Make

- "L.C. Smith" is usually marked on the left side of the barrel assembly.
- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- introduced in 2005. - model designation may not be marked on the firearm. - "LC" in the model designation stand for "LC Smith", while the number "20" stand for the caliber designation "20GA" and "OU" for the barrel configuration "Over & Under". - "L.C. Smith - 20 GA" is marked on the left side of the barrel assembly. - features include: bead front sight; blued over and under barrels; solid rib; interchangeable choke tubes; case hardened front hinged receiver/frame; single trigger; automatic ejectors; top tang mounted opening lever; checkered walnut pistol grip stock; beaver tail fore end; rubber recoil pad. - overall length with 660mm barrel is 1092mm (43"), average weight is 3.06 kg (6 3/4 lbs)
Manufacturer	- "MADE IN ITALY - FAUSTI STEFANO" is marked on the right side of the barrel assembly.
Action	- over/under barrel configuration.
Serial Number	- the serial number is marked on the water table.
Calibre	- the calibre designation is marked on the left side of the barrel assembly

Notes

Make

- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- "- L. C. SMITH MONOGRAM TRAP -" is usually marked above the chamber area of the barrel or on the rib.
- a total of 15 were manufactured between 1917 and 1945.
- features include: top tang mounted opening lever; hammerless design; single trigger; box lock action; two piece checkered walnut stock and forearm; barrel extension is rectangular with square hole for lock pin; blued finish on metal with varied engraving (each grade is determined by the type and amount of engraving).
- "MONOGRAM TRAP" was also available as a double barrel trap gun in 1941.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer - the "Hunter Arms" name may be marked in full on the barrels or as "H.A.Co." as part of a trade mark logo.

Make

- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- manufactured from 1913 to 1941.
- it is reported that only 28 "Premier" grade guns were built.
- as with all of the top quality offerings from L C Smith any number of custom features could be specified at the time a customer placed an order.
- features would normally include: semi or full pistol grip, checkered Circassian stock and forearm; tang mounted opening lever; automatic safety; side locks; automatic extractors; double or single trigger.
- samples noted have been engraved with hunting dogs on the lock plates, the receiver/frame and barrels are engraved in a fine scroll manner. The sides of the barrels may have "Lightning" inlaid in gold.

Manufacturer

- the manufacturer's name was marked on the top of the left barrel on referenced sample.

Action

- side by side barrel configuration.

Serial Number

- marked on the barrel underlug and water table.

Calibre

- although advertised as being available in calibre 410 GA X 3" factory records indicate that none were built.

Other Markings

- top of left barrel was engraved,"MADE TO ORDER BY THE HUNTER ARMS CO. FULTON NY." The top of the right was engraved "SIR JOSEPH WHITWORTH FLUID COMPRESSED STEEL". The rib extension was engraved "L.C. SMITH PREMIER GRADE".

Notes

Make

- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- model is not marked on the firearm.
- manufactured from 1889 to 1945.
- available in many grades, such as A, AA, B, C, D, E, F, FF & H. Grades differed only in the quality of workmanship, wood, style and amount of checkering and engraving and the quality of steel in the barrels.
- early barrels were imported from Belgium or England and will be marked with the appropriate proof markings.
- features include: sidelocks, break action with top lever opening, external double hammers, double triggers, Damascus or standard steel barrels, may be engraved, full or semi pistol grip, and checkered wood stock.

Manufacturer

- manufacturer may be marked on the barrels as:
"The Hunter Arms Co. M'F'R'S. Fulton, N.Y."
- Hunter Arms Company was located in Fulton, N.Y. from 1889 to 1945.

Serial Number

- serial number is usually located on the barrel and the receiver/frame flats.

- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- "SPECIALTY GRADE" was manufactured from 1913 to 1945 by Hunter Arms Co.
- "SPECIALTY GRADE" was manufactured from 1945 to 1950 by the L.C. Smith Gun Co., Inc.
- "L.C. SMITH SPECIALTY GRADE" is marked on the right barrel.
- "S" may be marked on the watertable.

Manufacturer

- "HUNTER ARMS CO. INC. M'F'R'S FULTON, N.Y., U.S.A." is marked on the left barrel.

Serial Number

- serial number is marked on the watertable of the receiver/frame and repeated on the barrel flats and forearm metal work.
- observed serial number consisted of five numbers without a letter prefix or suffix.
- letter markings which denote grades or optional features may be found on the watertable of the receiver/frame and should not be construed to be a prefix or suffix to the serial number itself.
- observed markings have included "E" denoting ejectors have been fitted, "FW" denoting featherweight receiver/frame construction, "FWE" denoting featherweight receiver/frame construction fitted with ejectors, "I" denoting Ideal grade, "S" denoting Specialty grade, and "T" denoting trap grade.

Remarks

- Breech loading, full pistol grip, top lever break open, automatic safety, take down, side lock double triggers hammer less, centre fire, Damascus or Nitro Steel barrels with a two piece checkered walnut stock and forearm, automatic ejectors and single trigger were available options. The usual engraving was two quail on left side and a flying duck on right side, and without the ventilated rib, a gold metal bar will be found near the rib extension, with scroll engraving on receiver and barrel. On right barrel is engraved L.C. SMITH SPECIALTY GRADE and on left barrel, Hunter Arms Co, inc, MFR Fulton NY.

Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y." - L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888. - John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun. - Hunter Arms Company was purchased by Marlin Firearms in 1945. - Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50. - L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin. - Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971. - Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin. - Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007. - Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.
Model	- manufactured from 1917 to 1943.
Type	- side by side.
Action	- top break.
Serial Number	- on barrel and receiver flats.
Remarks	- Breech loading, double barrel, double triggers and exposed double hammers, checkered two piece stock and forend, unlocking lever mounted on upper tang, with cross bolt lock. Top barrel extension is rectangular in shape. May have laminated, Damascus or English Twist barrels. In 1898, Hunter dropped the "Quality" reference and used the term "Grade". Now available in F grades. The best F grade came with Damascus Steel barrels with English walnut stocks, pistol grip, and neatly checkered. The middle F grade had Best English Stub Twist barrels, English walnut stock, pistol grip, checkered stock. The lower F grade had Royal Steel barrels, English walnut stock, pisol grip, neatly checkered. The "F" grades refer only to the barrel metal as all other specifications are the same. This Specialty grade refers only to the quality and quantity of engraving with this being better than the Ideal Grade.

Notes

Make

- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- "SPECIALTY TRAP" was manufactured between 1917 and 1945 by Hunter Arms.
- "SPECIALTY TRAP" was manufactured between 1945 and 1950 by L.C. Smith Gun Company, Incorporated.
- "- L. C. SMITH SPECIALTY TRAP -" is usually marked above the chamber area of the barrel or on the rib.
- a total of 1,860 were manufactured.
- features include: top tang mounted opening lever; hammerless design; single trigger; box lock action; two piece checkered walnut stock and forearm; barrel extension is rectangular with square hole for lock pin; blued finish on metal with varied engraving (each grade is determined by the type and amount of engraving).
- "SPECIALTY TRAP" was also available in a double barrel trap gun in 1920.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer - the "Hunter Arms" name may be marked in full on the barrels or as "H.A.Co." as part of a trade mark logo.

Notes

Make

- L.C. Smith trade name/trademark has been used on firearms produced by "L.C. Smith, Gun Maker" (from about 1880 to 1888), "Hunter Arms" (1888-89 to 1945), the "L.C. Smith Gun Company" (as a subsidiary of Marlin Firearms between 1945 and 1949/50), Marlin Firearms between 1968 and 1971/1972 and re-introduced in 2005.
- L.C. Smith trade name/trademark has a long history associated to it.
- Lyman Cornelius (L.C.) Smith started his gun making career in 1877 when a partnership was formed between himself, his brother Leroy and W.H. Baker to produce Baker's patented three barrel shotgun design under the name W.H Baker & Company. Baker and Leroy Smith left the firm in 1880, L.C. Smith continued to produce the Baker shotgun advertising them as "The Baker Guns, L.C. Smith Maker, Syracuse, N.Y."
- L.C. Smith sold his gun making business to John Hunter Sr. of Fulton, New York, U.S.A. in 1888.
- John Hunter formed the Hunter Arms Company to continue producing the L.C. Smith shotgun.
- Hunter Arms Company was purchased by Marlin Firearms in 1945.
- Marlin Firearms reopened the Hunter Arms Company as the L.C. Smith Gun Company and continued production of L.C. Smith shotguns until 1949-50.
- L.C. Smith Gun Company suffered a catastrophe in January of 1949 when a section of the first floor of the factory collapsed. As the buildings structure was weakened and a portion of the machinery used in the production of firearms was damaged all production was halted. The cost of rebuilding the factory and/or relocating the L.C. Smith operation to Marlin Firearm's New Haven, Connecticut was prohibitive so the decision was made to cease operations in Fulton. Unfinished parts, tooling and fixtures were moved to the New Haven plant for possible future use by Marlin.
- Marlin Firearms again offered the L.C. Smith shotgun as a custom order firearm made by Marlin between 1968 and 1971.
- Marlin Firearms re-introduced shotguns bearing the L.C. Smith name in 2005. These new versions are produced in Italy by Fausti Stefano for Marlin.
- Marlin Firearms and all their associated trade/brand names were purchased by Remington Arms Company, Inc. in December of 2007.
- Remington's brand names include Marlin, H&R 1871, New England Firearms, L.C. Smith and Parker in 2008.

Model

- "L.C. Smith Trap Grade" may be marked on top rear of right barrel.
- "T" or "Trap" may be marked on the watertable.
- introduced 1913, and discontinued 1939.
- top break, top lever opening, side by side barrel configuration, auto-ejecting.
- available with single selective or non-selective trigger or double triggers.
- those models produced with the single trigger utilized the Hunter Arms patented system called the "Hunter One Trigger "; the words Hunter One Trigger are stamped directly in front of the trigger guard on the front trigger guard tang.
- those models equipped with the single selective trigger had the barrel selector button located on the right side of the trigger; the letter L indicated that the left barrel would be fired and the letter R indicated that the right barrel would be fired.
- top tang mounted sliding safety.
- Damascus barrels available until 1917 after which only fluid steel barrels were produced.
- available with full pistol grip, semi-pistol grip or straight English-style butt stock.
- lightly engraved receiver showing a trap shooting scene.

Manufacturer

- "Hunter Arms Co. Inc. M'FR'S Fulton N.Y. U.S.A." will be marked on top rear of left barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on watertable of the receiver/frame and repeated on the barrel flats.
- observed serial number consisted of six numbers without a letter prefix or suffix.
- letter markings which denote optional features may be found on the watertable of the receiver/frame and should not be construed to be a prefix or suffix to the serial number itself.
- observed markings have included "E" denoting ejectors have been fitted, "FW" denotinging featherweight receiver/frame construction, and "T" denoting trap grade.

Other Markings

- action flats will be marked: "Pat'd July-13-86", "Oct-5-86".

Notes

Make

- marked as "SMITH'S PATENT" on the top strap.

Model

- "SMITH'S PATENT" over "APR. 15. 1873" or "APRIL 15. 1873" is usually marked on the top strap.
- may also be known as "Original Model" or "Original".
- introduced in 1873, manufactured until 1885.
- features include: fixed half moon blade front sight and a groove or notch in the top strap for a rear sight; round barrel; solid top iron or brass receiver/frame with removable fluted cylinder, irregular shaped inspection plate on the left side, and loading slot on the right side; two stage cylinder axis pin with one pin inside the outer axis pin; exposed spurred hammer; sheathed spur trigger, single action trigger mechanism; bird's head grip strap; wood grip plates.
- these revolvers can be loaded manually through a slot in the right side of the recoil shield, but must have the cylinder removed to eject empty cases.
- cylinder is removed by pulling the inner pin forward which then allows the outer pin to be removed.

Manufacturer

- marked as "SMITH'S PATENT" on the top strap.

Serial Number

- serial number is marked on the bottom of the grip.
- serial number range for 22 RF calibre was from 443 to 4544.

Calibre

- "No.22", "No.32", "No.38", "No.41", or "No.44" is usually marked on the top strap.
- these numbers are referring to rim-fire calibres.

Shots

- removable cylinder.

Notes

Make

- "OTIS A. SMITH ROCKFALL CONN" may be marked on the top side of the barrel and topstrap or "SMITH'S NEW MODEL" may be marked on the topstrap.
- "OAS" logo may be marked on the grip plates.
- "OAS" are the initials for Otis A. Smith.

Model

- manufactured from circa 1873 to circa 1898.
- "SMITH'S NEW MODEL" may be marked on the topstrap of the receiver/frame.
- Patent dates applicable for this model are January 28 1873, April 15 1873 and December 20 1881 by John T. Smith.
- features include: fixed blade front sight and a V notch in the tip of the hammer nose for a rear sights; round barrel with rib; solid top receiver/frame with removable fluted cylinder, large push button type cylinder axis pin release mounted on the left side, and loading cut-out on the right side; exposed spurred hammer; sheathed spur trigger; single action trigger mechanism; flat bottom grip strap; checkered hard rubber grip plates; nickel plated finish.
- grip plates may be marked "OAS" or "U.S. Arms Co."

Manufacturer

- manufacturer's name is not marked on the firearm.
- grip plate monograms read "OAS" in a stylized format.

Serial Number

- serial number was observed marked on the bottom of the butt strap.
- observed serial number consisted of five numbers without a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- removable cylinder.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "RICK P SMITH" over "LONDON" is marked on the firearm.

Model

- manufactured circa 1847.
- model designation is not marked on the firearm.
- this is an early style bar hammer type of a revolving pepperbox pistol.
- features include: hand rotated barrel cluster with exposed percussion nipples; exposed bar hammer; double action trigger mechanism; no trigger guard; rounded and engraved receiver/frame; walnut, bag-type grips; blued finish.

Manufacturer

- "Richard P. Smith" was located at 12 Mansfield Place, Saint Pancras, London, England circa 1847.

Action

- muzzle-loading, "pepperbox"-style pistol with revolving barrel cluster.

Serial Number

- serial number is marked on the receiver/frame under the grip.
- serial number observed consisted of three numbers without a letter prefix or suffix.

Notes

Make

- "Rick P. Smith" over "London" is marked on the firearm.

Model

- manufactured circa 1847.
- model designation is not marked on the firearm.
- model designation is derived from the method by which this pistol is loaded; loading was accomplished by unscrewing the barrel.
- this is a single shot pistol with a removable barrel and an exposed hammer centrally located on the receiver/frame behind the chamber.
- this handgun is intended to be loaded from the breech end of the barrel and as such was originally supplied with a wrench to unscrew the barrel from the receiver/frame in order that a lead ball and loose powder could be inserted into the chamber end of the barrel and then the barrel screwed back onto the receiver/frame.
- features include: removable, half round, half octagonal barrel, no sights; external, center mounted hammer; bag grip with wood grip panels.

Manufacturer

- "Richard P. Smith" was located at 12 Mansfield Place, Saint Pancras, London, England circa 1847.

Action

- the barrel unscrews in front of the chamber, so it can be loaded with a ball that fits the barrel more tightly than is possible with a muzzle loader.
- the turnoff barrel may be rifled.

Serial Number

- serial number is marked on the receiver/frame in front of the trigger guard.
- serial number of an observed example consisted of three numbers without a prefix or suffix.

Type:	Shotgun
Action:	Multi-Barrel
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
73389 - 1	12 GA X 2 1/2"	2	710	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Saml. & C. Smith, Princes St., London" was marked on the sideplates, with the same marking plus "Leicester Square, London" on the barrel.

Model

- this is a back-action sidelock side by side shotgun opened with an underlever that wraps around the front of the trigger-guard.
- straight-grip walnut stock and splinter forearm, engraved receiver and sideplates, and double triggers.
- marked "Saml. & C. Smith / Princes St. London" on the sideplates, and the same with "Leicester Square, London" on the rib.

Manufacturer

- "Saml. & C. Smith, Princes St., London" was marked on the sideplates, with the same marking plus "Leicester Square, London" on the barrel.
- the firm of Samuel & Charles Smith was located in London from 1824 until 1875; due to the large number of "Smiths" that have manufactured firearms in London over the years, it's difficult to provide a thorough account of this company's history.It's believed that the firm was founded by William Smith (Samuel and Charles' father) in 1812, then carried on by Samuel and Charles. Following Samuel & Charles' retirement, two of their sons (also called Samuel and Charles) continued operations.

Action

- side by side barrel configuration.

Serial Number

- serial-numbered on tang and barrels.

Firearm Reference Number (FRN): 76812
Make: Smythe, John M
Model: Single Barrel

Summary

Make:	Smythe, John M
Model:	Single Barrel
Manufacturer:	Crescent Firearms Company
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
76812 - 1	12 GA	1	813	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make	- "JOHN SMYTHE & CO. CHIGAGO, ILL" or "JOHN M. SMYTHE HARDWARE CO." or "JOHN M. SMYTHE MERCHANDISE CO." or "J.M. SMYTHE CO." may be marked on the firearm. - "JOHN M. SMYTH" and "JOHN M. SMYTHE" firearms were manufactured by Crescent Firearms Company for "John M. Smythe Hardware Company". - "John M. Smythe Hardware Company" was located in Chicago, Illinois, U.S.A. from circa 1880 to 1930.
Manufacturer	- manufacturer's name is not marked on the firearm.
Action	- hinged barrel design.
Other Markings	- the top of the barrel is marked "CHOKE BORED PATENTED DECEMBER 11, 1900".

Notes

Make

- "J F SMYTHE DARLINGTON STOCKTON-ON-TEES MIDDLESBROUGH" may be marked on the hard rib.

Model

- model designation is not marked on the firearm.
- features include: side by side Damascus barrels with solid rib and bead front sight; front hinged receiver/frame with top tang mounted break open lever and safety; double triggers; checkered wood forearm and pistol grip buttstock; engraved receiver/frame.

Manufacturer

- Joseph Forrestall Smythe was in business from circa 1886 to circa 1932.
- Joseph F. Smythe had premises in Darlington, Stockton-on-Tees, and Middlesbrough, England.
- Joseph F. Smythe was located at 13 Blackwellgate, Darlington, County Durham from circa 1886 to circa 1894, 12 Horsemarket, Darlington and 21 Dovecot Street, Stockton-on-Tees circa 1897, 16 Albert Road, Middlesbrough, Yorks circa 1901, 12 Horesmarket, Darlington circa 1905 to 1909.
- Joseph F. Smythe was known as "J F Smythe Limited" from 1913 to circa 1932.

Action

- side by side barrel configuration

Serial Number

- located on the trigger guard.
- observed specimen had four digits.

FRT Report

Firearm Reference Number (FRN): 119351
Make: Sneider
Model: Two Cylinder Revolver

Summary

Make:	Sneider
Model:	Two Cylinder Revolver
Manufacturer:	Sneider, Charles
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
119351 - 1	22 RF	14	70	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- may be found marked "E. SNEIDER PAT. MARCH 1862".

Model

- model not marked on firearm.
- this is an unusual revolver of a type that a number of inventors were experimenting with at the time of the American Civil War; a revolver with multiple cylinders that could be reversed, allowing more capacity.
- features include: two seven-shot cylinders in back-to-back configuration on a separate cylinder pin; octagonal barrel; a brass or iron receiver/frame (examples seen in both); spur trigger; square butt, and walnut grips.
- this revolver has a long firing pin mounted in the topstrap (struck by a hammer in the conventional position) that fires the cartridges contained in the forward position; after firing seven shots, the user would hinge the barrel down to pull the cylinder package out and reverse it.

Manufacturer

- Charles E. Sneider was the inventor/patentee of an unusual form of dual-cylinder single-action revolver.

Shots

- in this revolver, seven shots are contained in each of the cylinders; after firing the first seven shots, the cylinder group is taken out and reversed to fire the second group of seven shots.

FRT Report

Firearm Reference Number (FRN): 15337
Make: Sneider Arms Company
Model: Ring Trigger Rifle

Summary

Make:	Sneider Arms Company
Model:	Ring Trigger Rifle
Manufacturer:	Sneider Arms Company
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Other
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
15337 - 1	22 RF	12	568	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SNEIDER ARMS CO." is marked on top of the rifle.
- the Sneider Arms Company was a post-1890 company composed of inventor Charles E. Sneider and his sons and relatives; Charles E. Sneider had earlier worked for or in partnership with "Poultney & Trimble" and "Clark & Sneider".

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is an unusual design of manually-operated repeating rifle that functions by squeezing a ring trigger at the front of the trigger guard rearwards; this motion moves the breech piece on the right side of the rifle outwards to the right, allowing a cartridge to be fed from the tubular magazine into the breech, then closing behind it again, and firing the rifle when the primary trigger is pulled at the end of the ring trigger travel.
- features include: octagonal blued or browned barrel; open fixed sights; checkered walnut forearm and straight-grip buttstock; tubular magazine with cartridge-counter gradations on the right side of the barrel; rotating take-down lever on the left side of the breech; brass receiver/frame, with an ejection window on the left side.

Manufacturer

- "SNEIDER ARMS CO." is marked on top of the rifle.
- the Sneider Arms Company was a post-1890 company composed of inventor Charles E. Sneider and his sons and relatives; Charles E. Sneider had earlier worked for or in partnership with "Poultney & Trimble" and "Clark & Sneider".

Action

- this is a manually-operated repeating rifle that functions by pulling a ring "trigger" in the trigger guard rearward (transferring a cartridge from the magazine to the breech), and firing the rifle when the trigger finger contacts a primary trigger at the rear of the trigger guard.

Shots

- tubular magazine mounted on the right side of the barrel.

FRT Report

Firearm Reference Number (FRN): 129919
Make: Snider-Enfield
Model: Canadian Cadet Carbine

Summary

Make:	Snider-Enfield
Model:	Canadian Cadet Carbine
Manufacturer:	Birmingham Small Arms (BSA)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
129919 - 1	577 SNIDER	1	491	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Snider-Enfield" is not marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- model name is not marked on the firearm; model designation is derived from the characteristics of the firearm.
- this is a Snider-Enfield rifle that was taken out of English/UK service, then shortened for use by Canadian cadets.
- these carbines were made from a variety of original Snider-Enfields, and can be seen with a wide variety of markings.
- these carbines were intended primarily for drill use.
- differences from the Cavalry and Artillery carbine include: shotgun bead style front sight; wood plug insert fills the original ram/cleaning rod hole at the front of the forend and the absence of a leather rear sight protector and associated hardware.

Manufacturer

- the manufacturer's name and the date of manufacture is marked on the lock plate on the right side of the firearm.
- the name of the organization/manufacturer that converted the firearm to a Cadet Carbine does not appear on the firearm.

Action

- manually operated, side-hinged breech mechanism with external hammer, utilizing the Snider patent conversion.

Serial Number

- examined specimen had a four digit number without prefix or suffix marked on the underside of the rear sight leaf and on the rear of the breech block.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- these carbines were made from a variety of original Snider-Enfields, and can be seen with a wide variety of markings.
- one observed example was a Mark II ** model with a lockplate marking of "B.S.A.Co. 1865".

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type, applied to large-bore pistols that were customarily carried in "howdahs" on the backs of elephants during tiger hunts in India, as a last-ditch measure in case a tiger got too close to an elephant or its riders. Many of these pistols were converted from Snider-Enfield rifles of various models after they were withdrawn from British service.
- features include: blued finish; may have no sights; smooth walnut stock with straight-grip; single barrel band; Snider action with hinged breech-block that hinges to the right and acts as an extractor when pulled to the rear; right-side lockplate with manually-cocked hammer; brass trigger-guard and grip-strap; and may have a brass grip-cap.

Action

- Snider-pattern hinged breech-block single-shot.

Serial Number

- usually serial-numbered on the bottom of the breech-block.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
2440 - 1	577 SNIDER	1	927	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- the model designation does not appear on the rifle.
- these rifles were manufactured (converted) in 1866.

Manufacturer

- the manufacturer's (converter's) name does not appear on the firearm but the original manufacturer's name appears on the lockplate.

Action

- manually operated side-hinged breech mechanism with external hammer.

Serial Number

- appears on the leaf of the rear sight and perhaps on the underside of the breech-block.

Other Markings

- the original manufacturer's name (Enfield, Tower, L.S.A. Co. or Windsor) and original date of manufacture appear on the lock plate.

Remarks

- This rifle is a conversion of existing British 577 Calibre percussion muzzle-loading Enfield rifles to breech loaders using a hinged breech-block system designed by Jacob Snider. The MARK 1 Snider suffered from several shortcomings in the British Army, most significant being accidental blowing open of the breech block. Very few Snider MARK 1 rifles exist as most were upgraded to MARK 1* configuration.

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- the model designation "I*" appears on the firearm.
- these rifles were converted during 1867.

Manufacturer

- the manufacturer's (converter's) name does not appear on tne firearm but the original manufacturer's name appears on the lockplate.

Action

- manually operated, side-hinged breech mechanism with external hammer.

Serial Number

- appears on the leaf of the rear sight and in some cases on the underside of the breechblock.

Other Markings

- The original manufacturer's name (Enfield, Tower, L.S.A.Co. and Windsor) and the original date of manufacture appear on the lock plate.

Remarks

- This rifle is a modification of Snider-Enfield MARK 1 rifles involving altering the chamber recess for the cartridge rim from rounded to squared (the MARK 1* is identical to the MARK 2*).

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" or "B.S.A." may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- "II *" is marked on the top of the receiver/frame directly in front of the breech block.
- Snider-Enfield Mark 2* conversion was approved by the British Government in December 1866 and was incorporated on firearms with observed lockplates dated circa 1860 to 1870.
- features include: block and blade front sight; steel ram rod; three barrel bands; Snider's patented swinging breech block conversion of the Pattern 1853 Enfield rifle musket; side lock action with external hammer located on the right side; brass furniture comprising of the forend cap, trigger guard, side screw escutcheons and butt plate; walnut, full length stock.

Manufacturer

- "B.S.A." and the three stacked rifles logo may be marked on the lock plate.

Action

- manually operated side-hinged breech mechanism which swings from left to right.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is usually marked on the rear of the leaf of the rear sight and perhaps on the underside of the breechblock. - many Snider-Enfield's were not serialized.
Other Markings	- known example was dated 1865 on the lockplate; it was also marked with the Royal cypher of Queen Victoria, i.e. "Crown over V.R." on the rear of the lock plate behind the hammer.

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation appears on the top of the breech assembly as "II*".
- this is a circa 1867 conversion of an existing British .577 percussion calibre muzzle loading Enfield rifle to a cartridge breech loading system using a hinged block assembly designed by Jacob Snider.
- the MARK 1* improvement of the MARK 1 consisted of a partial squaring of the rounded counter sink for the case groove.
- the MARK 2* improvement of the MARK 2 consisted of a squaring of the counter sink for the case groove in order to accommodate the new long base cartridge that featured a squared case rim.
- the MARK 2** improvement of the MARK 2* consisted of modifications to the extractor, the underside of the breech block and a shortening of the nipple assembly.
- the MARK 3 was not a conversion of a muzzle loader but a purpose built breech loader utilizing the Snider system.

Manufacturer

- the manufacturer's (converter's) name does not appear on the firearm but the original manufacturer's name appears on the lockplate.

Action

- manually operated, side-hinged breech mechanism with external hammer.

Serial Number

- usually appears on the leaf of the rear sight and in some cases on the underside of the breechblock (samples have been noted with no numbers).

Other Markings

- the original manufacturer's name (Enfield, Tower, L.S.A. Co. or Windsor) and the date of manufacture appear on lock plate.

- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- the model designation appears on top of the receiver as "II**".
- this firearm has a brass trigger guard, brass nosecap and buttplate.
- differs from the cavalry version by having two barrel bands, a cleaning rod, and a bayonet mounting lug on the barrel at the muzzle.

Manufacturer

- the manufacturer's (converter's) name does not appear on the firearm but the original manufacturer's name appears on the lockplate.

Action

- manually operated side-hinged breech mechanism with external hammer.

Serial Number

- appears on the leaf of the rear sight and perhaps on the underside of the breech-block.

Other Markings

- the original manufacturer's name and date of manufacture appear on the lock plate.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- this is a conversion of existing British percussion .577 calibre muzzle loading Enfield Artillery Carbines to breech loadeing using the hinged breechblock system designed by Jacob Snider.
- this firearm has a brass trigger guard, brass nosecap and buttplate.

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- the model designation appears on top of the receiver/frame as "II**".
- the stock of the original percussion carbine was altered to, or replaced with, half stock configuration with a trap in the buttplate for a jointed cleaning rod.
- differs from the artillery version by having a single barrel band, absence of a cleaning rod, a leather, rear sight protector secured by two screws on the forearm and the absence of a bayonet mounting lug on the barrel at the muzzle.

Manufacturer

- the manufacturer's (converter's) name does not appear on the firearm but the original manufacturer's name appears on the lockplate.

Action

- manually operated side-hinged breech mechanism with external hammer.

Serial Number

- appears on the leaf of the rear sight and perhaps on the underside of the breech block.

Other Markings

- the original manufacturer's name and date of manufacture appear on the lock plate.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- This is a conversion of existing British percussion .577 calibre muzzle loading Enfield Cavalry Carbines to breech loading using the hinged block system designed by Jacob Snider. The stock of the original percussion carbine was altered to, or replaced with, half stock configuration with a trap in the buttplate for a jointed cleaning rod.

129351 - 1	577 SNIDER	1	927	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" or "B.S.A." may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- the model designation is marked on the top of the receiver/frame directly in front of the breech block as, " II ** ".
- the Mark II ** conversion was approved by the British Government in December 1866 although one example has been observed with a lock plate dated 1865.
- features include: steel ram rod; three barrel bands; Snider's patented swinging breech block conversion of the Pattern 1853 Enfield rifle musket; side lock action with external hammer located on the right side; brass furniture comprising of the forend cap, trigger guard, side screw escutcheons and butt plate; walnut, full length stock.

Manufacturer

- "B.S.A." and the three stacked rifles logo may be marked on the lock plate.

Action

- manually operated side-hinged breech mechanism which swings from left to right.

Serial Number

- usually marked on the rear of the leaf of the rear sight and perhaps on the underside of the breechblock; many Snider-Enfield's were not serialized.

Other Markings

- known example was dated 1865 on the lockplate; it was also marked with the Royal cypher of Queen Victoria, i.e. "Crown over V.R." on the rear of the lock plate behind the hammer.

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- the model designation is marked on the top of the receiver/frame as "II**".
- these rifles were manufactured (converted) from 1867 to 1868.

Manufacturer

- the manufacturer's (converter's) name is not marked on the firearm, but the original manufacturer's name is marked on the lockplate.

Action

- side-hinged breech mechanism with external hammer.

Serial Number

- may appear on the leaf of the rear sight and perhaps on the underside of the breech-block.

Other Markings

- the original manufacturer's name (Enfield, Tower, L.S.A. Co. or Windsor) and the date of manufacture are marked on the lock plate.
- rifles originally made by L.S.A. Co. may be marked "L.A. Co.".

Remarks

- this rifle is visually similar to the Snider Enfield MARK 1* and MARK 2* differing in a strengthened extractor, hammer nose recessed and an alteration to the shape of the underside of the breech-block.

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- the model designation appears on top of the receiver as "II**".
- these two band rifles were converted from muzzle loading to breech loading, on firearms made circa 1853 to 1871.
- apart from the shorter length and location of the sling swivels (underside of mid barrel band and underside of buttstock) and having iron furniture as opposed to brass furniture and the presence of a bayonet lug located on the right side of the barrel near the muzzle, this rifle is mechanically identical to the three band Snider-Enfield MARK 2** Rifle.

Manufacturer

- "B.S.A.Co", over the date, is marked on the lockplate.

Action

- manually operated, side-hinged breech mechanism, with external hammer.

Serial Number

- may appear on the leaf of the rear sight and perhaps on the underside of the breechblock.

Other Markings

- The original manufacturer's name (Enfield, Tower, L.S.A. Co.) and the date of manufacture appear on lock plate.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- This is a conversion of existing British percussion .577 calibre muzzle loading Enfield Short Rifles to breech loading using a hinged block system designed by Jacob Snider.
- Apart from shorter length and location of sling swivels (underside of mid barrel band and underside of buttstock) and having iron furniture as opposed to brass, this rifle is mechanically identical to the Snider-Enfield MARK 2** Rifle.

Firearm Reference Number (FRN): 127556
Make: Snider-Enfield
Model: MARK 3 Artillery Carbine

Summary

Make:	Snider-Enfield
Model:	MARK 3 Artillery Carbine
Manufacturer:	Webley, P & Son
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
127556 - 1	577 SNIDER	1	540	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- the model designation is marked on the top of the receiver/frame as "III".
- originally ordered by the Queensland government for issue to police from 1874 to 1877 and features an 800 yard leaf back sight rather than the regulation 600 yard back sight.
- this firearm is not a conversion of a muzzle loader but a completely new manufactured firearm.
- features include: blued steel barrel; spring-loaded, thumb operated, breech-block; flat faced external hammer.
- mechanically identical to the MARK 3 Rifle differing in having a shorter barrel, sling swivels on the middle barrel band and the underside of the buttstock and in having iron furniture as opposed to brass on the long rifle.
- differs from the cavalry version by having two barrel bands, a cleaning rod, and a bayonet mounting lug on the right side of the barrel at the muzzle.

Manufacturer

- "P. WEBLEY & SON LONDON & BIRM" is marked on the lockplate.

Action

- manually operated side-hinged breech mechanism.

Serial Number

- usually marked on the leaf of the rear sight and on the underside of the breech-block assembly.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings	- the year of manufacture appears on the lockplate.
Remarks	- this firearm is a short-barrel carbine. - this firearm is not a conversion of a muzzle loader but a completely new manufactured firearm using a steel barrel and spring-loaded, thumb operated breech-block. - this firearm has a brass trigger guard, brass nosecap and buttplate.

Firearm Reference Number (FRN): 141518
Make: Snider-Enfield
Model: MARK 3 Rifle

Summary

Make:	Snider-Enfield
Model:	MARK 3 Rifle
Manufacturer:	Kerr, James & Company/London Armoury Company (LAC)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
141518 - 1	577 SNIDER	1	914	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Snider's Patent" may be marked on some breech-blocks.
- Snider is in reference to Jacob Snider the designer of an improved sideways swinging hinged breech block conversion.
- Enfield Pattern 1853 rifle-muskets were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- model designation may be marked on the top of the receiver/frame directly in front of the breech block as, "III".
- the Mark III version was typically a purpose built breech loader. Dates of manufacture were typically from 1869 to 1871 however examples have been encountered with lock plates dated as early as 1860 suggesting that surplus MARK I and MARK II locks were used.
- features include: blued finish; steel cleaning rod; Snider's patented swinging breech block assembly originally made as a conversion for the Pattern 1853 Enfield rifle musket; side lock with external hammer located on right side of the action; flat hammer face (versus a cupped hammer face of the MARK I and II); brass furniture comprising of the butt plate, trigger guard, side-nail cups and forend cap.

Manufacturer

- "JAs KERRR & Co" over "54 KING WILLIAM St" over "L. A. C" was observed marked on the lockplate.
- "J. KERR" and "LAC" were observed marked on the barrel.
- "LAC" is the abbreviation for the London Armoury Company.
- "Kerr & Company" was originally formed by James and John Kerr, circa 1853/54.
- James Kerr & Company was an English firearms manufacturer located in London, England; this firm co-existed with the firm known as the "London Armoury Company".
- James Keer & Company was established circa 1866 and ceased operations in 1894.
- James Kerr & Company was located at the following addresses:
36 King Street from 1866 to 1868,
54 King William Street and 27 Leman Street, Goodman's Field from 1868 to 1883,
118 Queen Victoria Street from 1884 to 1887, and
114 Queen Victoria Street from 1888 to 1894.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- manually operated side-hinged breech mechanism which swings from left to right with an external hammer.
Serial Number	- usually marked on the rear of the leaf of the rear sight and perhaps on the underside of the breechblock; many Snider-Enfield's were not serialized.

129438 - 2	577 SNIDER	1	927	Antique AFR, Section 1, para. 3	Non-Commercial Customization	

Notes

Make	- maker's name is not marked on the firearm.
Model	- no model name is marked on this firearm; the model name is derived from the Snider-Enfield type of manually operated, side-hinged breech mechanism with external hammer. The Mark 3 features a spring loaded locking device that is attached to the swinging breech assembly. - features and markings will contradict typical Snider-Enfield conventions as these rifles are usually assembled from parts of different models and/or may be attempts to copy known British configurations by local indigenous craftsmen using any means and materials at their disposal.
Action	- manually operated, side-hinged breech mechanism with external hammer.
Serial Number	- serial numbers are not usually present on such firearms.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898 are considered "Antique" in Canada.
Other Markings	- examples of this type of firearm may have Arabic script markings apparent at various locations.

- identical to the MARK 3 Rifle differing in having a shorter barrel, sling swivels on the middle barrel band and the underside of the buttstock and in having iron furniture as opposed to brass furniture.

Manufacturer

- the manufacturer's name appears on the lockplate.
- do not confuse with the MARK 3 Rifle.

Action

- manually operated side-hinged breech mechanism with external hammer.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number - appears on the leaf of the rear sight.

Other Markings - The date of manufacture appears on the lock plate.

FRT Report

Firearm Reference Number (FRN): 129873
Make: Snider-Enfield
Model: MARK 3 Short Rifle

Summary

Make:	Snider-Enfield
Model:	MARK 3 Short Rifle
Manufacturer:	London Armoury Company (LAC)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
129873 - 1	577 SNIDER	1	775	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- known example was marked "L. A. Co" on the lockplate; these letters indicate manufacture/conversion by the London Armoury Company; in addition the top of the breech block is marked with the the firm's trademark of the capital letter "C" within which are the letters "A" and "L".
- "Snider's Patent" may be marked on some breech-blocks.
- Snider is in reference to Jacob Snider the designer of an improved sideways swinging hinged breech block conversion.
- Enfield Pattern 1853 rifle-muskets were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- "III", the Roman numeral three (3) is marked on the top of the receiver/frame directly in front of the breech block.
- Mark 3 version was typically a purpose built breech loader. Dates of manufacture were typically from 1869 to 1871 however examples have been encountered with lock plates dated as early as 1860 suggesting that surplus MARK 1 and MARK 2 locks were used.
- features include: blued finish; steel cleaning rod ; Snider's patented swinging breech block assembly originally made as a conversion for the Pattern 1853 Enfield rifle musket; side lock action with external hammer located on right side of the action; flat hammer face; brass furniture comprising of the butt plate, trigger guard, side-nail cups and forend cap.

Manufacturer

- "L. A. Co" is marked on the lockplate.
- "L. A. Co" is an abbreviation used by the London Armoury Company.
- "LAC" is also marked on the top of the breech block as a capital letter "C" within which are the letters "L" and "A".
- "LAC" is an abbreviation used by the London Armoury Company.

Action

- manually operated side-hinged breech mechanism which swings from left to right with an external hammer.

Serial Number

- usually marked on the rear of the leaf of the rear sight and perhaps on the underside of the breechblock; many Snider-Enfield's were not serialized.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - known example was dated 1865 on the lockplate; it was also marked with the Royal cypher of Queen Victoria, i.e. "Crown over V.R." on the rear of the lock plate behind the hammer.

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- model is not marked on the firearm and the lock plate is unmarked.
- various Nepalese markings will be encountered.
- manufactured circa 1870 to 1880.
- this firearm is not a conversion of a muzzle loader but a newly manufactured firearm using a steel barrel and a spring-loaded, thumb operated, side hinged breech-block assembly as originally found on the British made MARK 3 Short Rifle model.

Manufacturer

- the manufacturer's designation may not be marked on the firearm.
- various Nepalese markings will be encountered.

Action

- right side hinged breech block assembly.

Other Markings

- various Nepalese markings will be encountered.

3412 - 1	577 SNIDER	1	546	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- This is the Snider military artillery pattern carbine having a full stock and a bayonet mounting lug on the barrel.
Identical to the British government issue Mk III Snider artillery carbine except for the lack of government property markings and date, on the lock plate. Some of these commercial carbines may have fancy grained stocks, checkering at the wrist and forearm and perhaps some decorative engraving on the breech block, hammer and lock plate.

Manufacturer

- manufactured by Birmingham Small Arms Company (BSA Co.), after 1873 name of manufacturer changed to Birmingham Small Arms and Metal Company (B.S.A. & M. Co.).

Action

- manually operated side-hinged breech mechanism with external hammer.

Serial Number

- the serial number is found on underside of breech-block or on the leaf of the rear sight.

Other Markings

- Although manufactured by B.S.A. various retailers names and addresses may appear on the top of the barrel. The B.S.A. company name appears on the lock-plate.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- This rifle was offered for sale to any individual or group who wanted a rifle approximating the British service arm. - Given that these carbines were manufactured on contract, they may exhibit modifications specified by the purchaser (sights, stock length etc.).

66450 - 1	577 SNIDER	1	933	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- this firearm is similar to the standard British War Department issue, Mk III Snider, "Three Band Rifle", except for the lack of British War Department property markings and date, on the lock plate.
- commercial rifles may have better quality wood stocks, checkering at the wrist and forearm of the butt and perhaps some decorative engraving on the breech-block, hammer and lock plate.
- this type of rifle was offered for sale to any individual or group who wanted a rifle approximating the British service arm.

Manufacturer

- the manufacturer's name and London address may be found on the side-lock plate.
- London proof marks are found on the firearm.

Action

- manually operated, single-shot, side-hinged breech mechanism with external hammer.
- the "Third Model" was characterized by the addition of a locking bolt to the breech block.
- the "Third Model" was manufactured in its entirety as a "Snider" action breech-loader and was not a conversion from the percussion system.

Serial Number

- military issue firearm serial numbers are located on the underside of the breech-block or on the leaf of the rear sight: - commercial guns followed this practice to an extent.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- proof marked in accordance with British Proof Law prevailing at the date of manufacture.
- the proof marks are located on the left side of the barrel near the base of the rear sight.
- absence of military marking or government acceptance stamps usually indicate that the firearm is a commercial pattern.
- the presence of War Department property marks may indicate that this commercial rifle was built from military surplus parts.
- the Snider patent mark is proof of commercial manufacture.

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- identical to the British Government military three band Mark III Snider-Enfield breech-loading cartridge rifle, but lacks the manufacture date and government property markings.
- latched, hinged breech-block swings open to the right, cartridge extraction by drawing the breech-block to the rear against mild spring pressure.
- this rifle was sold to any person or group that desired a copy of the British service arm of the day.
- some of these commercial rifles may be equipped with chequered and figured wood furniture, and engraving on the metal parts.

Manufacturer

- "T. TURNER" is marked on the top of the barrel:
- THOMAS TURNER BIRMINGHAM (with a castellated tower in the middle, with the word "TRADE' above, and "MARK" below) is marked on a circular cartouche on the right side of the butt-stock.
- "THOMAS TURNER", "FISHER STREET" and "BIRMINGHAM" are marked on the lock.
- Thomas Turner was located in Birmingham on Fisher Street from 1838 to 1890.

Action

- latched, hinged breech-block, with external hammer.

Serial Number

- may be numbered on the barrel above the chamber, under the breech-block, or underside of the rear leaf-sight.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - not marked with cartridge designation.

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm; the Make is derived from the original military designation and the characteristics of the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates or the name of the manufacturer such as, "P.Webley & Son".
- Snider is in reference to Jacob Snider the designer of an improved sideways swinging/hinged breech block conversion to the Enfield Pattern 1853 rifle-musket.
- the British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations by many British gun making firms for the commercial trade.

Model

- no model name is marked on this firearm; the model designation is derived from the characteristics of the firearm.
- this rifle is identical to the British government issue Mk III Snider three band rifle except for the lack of government property markings and date, on the lock plate.
- the British patent for the Snider side-hinged breech block was issued in 1864.
- this type of rifle would have been made circa mid-late 1860's to the mid 1880's.
- some of these commercial rifles may have fancy grained stocks, checkering at the wrist and forearm and perhaps some decorative engraving on the breech-block, hammer and lock plate.
- features; latched and hinged breech-block swings open to the right for loading; cartridge extraction is by drawing the breech-block to the rear against mild spring tension; exposed right side mounted hammer; iron or steel barrel may be blued or browned; cleaning rod mounted underneath the barrel.
- this rifle was offered for sale to any individual or group who wanted a rifle approximating the British service arm.
- British proofmarks are apparent on this firearm.

Manufacturer

- known example was marked, "P. WEBLEY & SON" over "BIRMINGHAM" on the lock plate in front of the hammer; the rear of the lock plate was marked with the Webley "Winged Bullet" trademark symbol over the letters "W&S".

Action

- manually operated, side-hinged breech mechanism with external hammer.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number
- may be numbered on the barrel above the chamber, under the breech block, or on the underside of the rear leaf-sight.
- known example had a four digit number with a letter suffix marked on the underside of the breech block; letter suffix "K" has been observed.

Calibre
- barrel is proofmarked with the number "25" which indicates a calibre of "577 Snider".

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- this firearm is the full length military short rifle having two barrel bands.

Manufacturer

- manufactured by Birmingham Small Arms Company (B.S.A. Co.), after 1873 name of manufacturer changed to Birmingham Small Arms and Metal Company (B.S.A. & M. Co.).

Action

- manually operated side-hinged breech mechanism with external hammer.

Serial Number

- serial number found on the underside of breech-block or on the leaf of the rear sight.

Other Markings

- Although manufactured by B.S.A. various retailers names and addresses may appear on the top of the barrel.
- The B.S.A. company name appears on the lock-plate.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- This rifle is identical to the British government issue Mk III Snider two band short rifle except for the lack of government property markings and date on the lock plate. Some of these commercial rifles may have fancy grained stocks, checkering at the wrist and forearm and perhaps some decorative engraving on the breech block, hammer and lock plate. This rifle was offered for sale to any individual or group who wanted a rifle approximating the British service arm.

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- model is not marked on the firearm.
- this is a version of the Snider-Enfield rifle with two barrel bands based on the British government issue MARK 3 Snider-Enfield two band, short rifle without government property markings or date on the lock plate.
- unlike the earlier MARK 1 and MARK 2 versions, this is not a conversion of a muzzle loading rifle but a completely new manufactured breech loading rifle using a steel barrel and a spring-loaded, right side opening, breech-block with a curved and checkered thumb release lever.
- some of these commercial rifles may have plain or fancy grained stocks, checkering at the wrist and forearm and decorative engraving on the breech block, hammer and lock plate; blued finish.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "D. & J. FRASER" over "4 LEITH ST. TERRACE, EDINBURGH" is marked on the barrel.
- the "D&J F" monogram of "Daniel & John Fraser" may be moulded into the butt plate.
- "FRASER'S PATENT" above a small shield showing a rampant lion may be marked on the action.
- "Daniel Mackintosh Fraser" established a gunmaking business at 22 Greenside Place, Edinburgh, Scotland in 1873.
- "Daniel Mackintosh Fraser" moved to 18 Leith Walk by 1874.
- in 1878, Daniel Fraser was joined by his brother John Fraser and the business name changed to "D. & J. Fraser".
- "D. & J. Fraser" was located at 4 Leith Street Terrace, Edinburgh, Scotland from 1878 to 1887/1889.
- in 1887/1889, John Fraser left the business and established his own enterprise at 1 Frederick Place, Edinburgh, Scotland from 1890 to 1898.
- in 1887/1889, Daniel Fraser continued trading under his name as "Daniel Fraser & Company" from 4 Leith Street Terrace, Edinburgh, Scotland with the assistance of his two sons Donald and James.
- in 1901, Daniel Fraser died and his sons carried on running the business.
- in 1911, the company name was amended to "Daniel Fraser & Company, Limited".
- in 1917, "Daniel Fraser & Company, Ltd." was liquidated.
- "Daniel Fraser & Company" produced a range of shotguns, and double barrel, bolt action and falling block rifles under the brand names Velox, Fraser's Special, or Special.
- "D. Fraser" had facilities at 48 Dover Street, Piccadilly, London and Cateaton, Manchester, England, and 172 Easter Road, and 174 Montgomery Street, Edinburg, and a range at Duddingston, Edinburgh, Scotland.
- in 1934, "Daniel Fraser & Company" was incorporated into A. Sanders (Maidstone) Ltd.
- in 1983, "Dan'l. Fraser & Co. C.I.B." was purchased by Bernard Horton-Corcoran and manufacturing facilities were set up in Peddieston on the Black Isle, Inverness, Scotland.
- in 2003, the "Danl. Fraser & Co." trade name was owned by Dickson & MacNaughton" located in Edinburg, Scotland.

Action

- manually operated, right side-hinged, breech mechanism with external hammer.

Serial Number

- serial number may be found on the underside of breech-block or on the leaf of the rear sight.

Other Markings

- "R.McVittie, Toronto, Ontario" was observed marked on the top of the barrel of one example.

Notes

Make

- "Snider-Enfield" is not usually marked on the firearm.
- "Snider's Patent" may be marked on some breech-blocks.
- "ENFIELD" may be marked on some lock plates.
- Snider is in reference to Jacob Snider the designer of an improved sideways tipping/hinged breech block conversion.
- Enfield Pattern 1853 rifle-musket were converted into a Snider-Enfield by installing Snider's patent breech block system.
- British government converted a wide range of service weapons including the Lancaster Pattern 1855 engineer carbine and the Pattern 1858 naval short rifle.
- Snider-Enfields were also newly manufactured in various configurations.

Model

- no model name is marked on this firearm; the model name is derived from the fact that it is a copy of the Military Short Rifle made for the commercial, civilian or "trade" market.
- the British patent for the Snider side-hinged breech block was issued in 1864.
- this type of rifle would have been made circa late 1860's to the mid 1880's.
- this rifle is basically a copy of the British government issue Mk III Snider-Enfield two band short rifle except for the lack of government property markings and date on the lock plate. Some of these commercial rifles may have fancy grained stocks, checkering at the wrist and forearm and perhaps some decorative engraving on the breech block, hammer and lock plate. This rifle was offered for sale to any individual or group who wanted a rifle approximating the British service arm.
- Belgian proof marks are apparent on this firearm; it may also be marked, "Made in Belgium" or "Belgium".

Manufacturer

- manufactured in Belgium, no maker's name or logo, however barrel, receiver and breech block have Belgian proof marks.

Action

- manually operated side-hinged breech mechanism with external hammer.

Serial Number

- serial number may be marked on the side of the chamber of the barrel.

Notes

Make	- "F. Sodia", "Fr. Sodia", "Franc Sodia", "Franz Sodia" or "Sodia" is marked on the firearm.
Model	- the model designation is not marked on the firearm. - this is a generic entry for those drilling firearms made by Frank Sodia, Ferlach. - this is a custom made classic "drilling" pattern sidelock three-barreled combination gun, with two side by side shotgun barrels over a single rifle barrel; - features include: walnut pistol grip stock with cheekpiece; tang safety with rear sight button (rifle barrel cocked with tang safety); barrel selector plug on left side of tang; double triggers with front trigger for rifle; game scene and arabesque engraving on receiver/frame.
Manufacturer	- "F. Sodia", "Fr. Sodia", "Franc Sodia", "Franz Sodia" or "Sodia" is marked on the firearm. - "In Ferlach" or "Ferlach Austria" may be marked on the firearm. - "F. Sodia" was a manufacturer located in Ferlach, Karnten, Austria between 1871 and 1992. - "F. Sodia" manufactured single barrel and multi-barrel rifles and shotguns, combination guns, and bolt action rifles using Mannlicher-Schonauer and Mauser actions. - "F. Sodia" also sold other manufacturer's equipment such as Bayard, Brownings, Steyr, and Walther semi automatic handguns, revolvers and pistols, Browning semi automatic shotguns, Bayard, Mannlicher, and Mauser rifles, Daisy air guns, and hunting accessories.
Action	- hinged barrel design. - barrel assembly consists of three barrels: one rifled barrel and two smoothbore barrels or two rifled barrels and one smoothbore barrel.
Serial Number	- serial number usually marked inside the action well, on the barrel lug, or on one of the tangs. - observed serial number consisted of four numbers without a letter prefix or suffix. - observed serial number consisted of five numbers without a letter prefix or suffix.
Barrel	- barrel length not specified, but 23.5"/596mm is used in Franz Sodia's other drillings.
Calibre	- the top barrels will be chambered for 12 GA X 2 3/4", 16 GA X 2 3/4", or 20 GA X 2 3/4". - the bottom barrel will be in 5.6X52R (22 SAVAGE HI-POWER), 6.5X57R, or 7X65R.

Notes

Make

- "F. Sodia", "Fr. Sodia", "Franc Sodia", "Franz Sodia" or "Sodia" is marked on the firearm.

Model

- this is a generic entry for those Sodia Over & Under shotguns that are not identifiable as to model.
- may be marked "FRANZ - FERLACH - SODIA" on the barrel assembly and receiver/frame.
- features may include;
- double trigger;
- top tang opening;
- double Greener cross-bolts;
- full vent rib;
- fixed chokes;
- two piece wood forend;
- pistol grip buttstock with European style cheekpiece;
- top tang safety;
- blued barrels, coin finished receiver with engraving.

Manufacturer

- "F. Sodia", "Fr. Sodia", "Franc Sodia", "Franz Sodia" or "Sodia" is marked on the firearm.
- "In Ferlach" or "Ferlach Austria" may be marked on the firearm.
- "F. Sodia" was a manufacturer located in Ferlach, Karnten, Austria between 1871 and 1992.
- "F. Sodia" manufactured single barrel and multi-barrel rifles and shotguns, combination guns, and bolt action rifles using Mannlicher-Schonauer and Mauser actions.
- "F. Sodia" also sold other manufacturer's equipment such as Bayard, Brownings, Steyr, and Walther semi automatic handguns, revolvers and pistols, Browning semi automatic shotguns, Bayard, Mannlicher, and Mauser rifles, Daisy air guns, and hunting accessories.

Action

- over and under barrel configuration.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- marked on the lower tang of the receiver/frame.
Calibre	- marked on the barrel flats as "12/70".

FRT Report

Firearm Reference Number (FRN): 106555
Make: Solothurn
Model: 31M

Summary

Make:	Solothurn
Model:	31M
Manufacturer:	Waffenfabrik Solothurn AG
Level:	Converted Automatics
Type:	Machine Gun
Action:	Converted Automatic
Country of Manufacturer:	SWITZERLAND
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
106555 - 2	8MM MAUSER	5	628	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
106555 - 1	8MM MAUSER	25	628	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- Solothurn machine gun was developed by Louis Stange, engineer at the German Rheinmetall company. Rheinmetall was part-owner of Solothurn.

Model

- the model is marked on the firearm.
- this is a light machine gun designed in Germany by Rheinmetall, but which was built in Switzerland by the Rheinmetall-owned Solothurn company to evade the Treaty of Versailles restrictions on domestic German manufacture of machine guns.
- this machine gun uses a rotating collar method of locking the breech (designed by Louis Stange) which was later used in the famous MG34 machine gun, arranged inside a lightweight tubular receiver.
- this machine gun is the version of the MG30, adopted by Hungary in 1931, and modified to add a forward rotating carry handle and to allow for a quick barrel change (barrel changes in this machine gun are accomplished by removing the buttstock and removing the operating spring, bolt, and barrel through the rear of the receiver). The MG30 was adopted by several countries in a variety of chamberings, including Switzerland (7.5x55mm), Germany (8mm Mauser), Austria (8x56R) and Hungary (8x56R, many of which were later converted to 8mm Mauser).
- features include: blued finish; cone flash hider/recoil booster; raised adjustable open sights; a ventilated barrel shroud; a folding bipod; a rotating carry handle forward of the receiver; a detachable box magazine that inserts horizontally from the left; a dual trigger arrangement where the top part of the trigger fires single shots, and the bottom part of the trigger fires in full automatic; a tubular receiver; a rotating safety collar in front of the butt; and a wooden in-line buttstock. This machine gun could also be seen in the sustained-fire role, on a tripod mount.
- a dedicated 8mm Mauser version was also adopted in 1943, as the 43M, with the same characteristics, but feeding from the straighter box magazine of the German MG13 machine gun.

Manufacturer

- most of the parts for this firearm were manufactured by the Steyr Arms factory in Austria and assembled by Waffenfabrik Solothurn AG in Switzerland.

Action

- no longer capable of full automatic fire.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the top of the receiver/frame. - sample imaged has a "D" prefix.
Shots	- detachable box magazine.

Notes

Make

- these rifles are marketed under the "Shorty" name in North America, in Europe they are marketed under the "Sommer & Ockenfuss" name.

Model

- this is a "bull-pup" design rifle that is operated by manually pumping the pistol grip forward and rearward.
- features include: blued finish, wood "stock" and pistol grip, engraved side plates (different scenes available), grip safety (releasing the grip safety locks the trigger mechanism), and a provision for mounting an optical sight,
- the same basic rifle is offered in Europe as either the "Griffrepetierer Jagd" (as described above) or the "Griffrepetierer Sportgewehr" which features synthetic furniture and stainless steel construction.
- for the North American market the same basic rifle is offered as the "Shorty" rifle in the "Wilderness" (black finish, stainless steel barrel), "American Hunter" (select walnut with coined side plates), "American Hunter Synthetic" (synthetic furniture) or the "Marksmans" (synthetic furniture with fluted barrel and muzzle brake) versions.

Manufacturer

- the firm of Sommer & Ockenfuss is located in Baiersbronn, Germany.

Serial Number

- the serial number appears on the left side of the receiver/frame.

Calibre

- other calibres are available on request.

Shots

- detachable box magazine.

Notes

Make

- these rifles are marketed under the "Shorty" name in North America, in Europe they are marketed under the "Sommer & Ockenfuss" name.

Model

- this is a "bull-pup" design rifle that is operated by manually pumping the pistol grip forward and rearward.
- features include: synthetic "stock" and pistol grip, stainless steel barrel, grip safety (releasing the grip safety locks the trigger mechanism), and a provision for mounting an optical sight,
- the same basic rifle is offered in Europe as either the "Griffrepetierer Sportgewehr" (as described above) or the "Griffrepetierer Jagd" which features wood furniture and a blued finish.
- for the North American market the same basic rifle is offered as the "Shorty" rifle in the "Wilderness" (black finish, stainless steel barrel), "American Hunter" (select walnut with coined side plates), "American Hunter Synthetic" (synthetic furniture) or the "Marksmans" (synthetic furniture with fluted barrel and muzzle brake) versions.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the firm of Sommer & Ockenfuss is located in Baiersbronn, Germany.
Serial Number	- the serial number appears on the left side of the receiver/frame.
Calibre	- other calibres are available on special order.
Shots	- detachable box magazine.

Notes

Make

- "P. SOPER" over "LONDON C.W." or "PHILO SOPER. LONDON. C.W." is marked on the barrel.

Model

- manufactured prior to 1869.
- model designation is not marked on the firearm.
- this is a muzzle loading, percussion ignition, hunting/target rifle.
- features observed: bead front sight and an adjustable rear sight; octagonal barrel with a round section at the muzzle for a bullet starter; ramrod mounted under the barrel; right side lock plate with a percussion hammer; one piece half length stock with straight grip, cheek piece, and a crescent shaped buttplate; brass trigger, trigger guard, patch box, and buttplate.

Manufacturer

- "P. SOPER" over "LONDON C.W." or "PHILO SOPER. LONDON. C.W." is marked on the barrel.
- "C.W." are the initials for Canada West (Upper Canada).
- "C.W." was used prior to Confederation in 1867.
- Philo Soper was a gunmaker located in London, Middlesex, Ontario, Canada from 1850 to 1868.
- Philo Soper was known to have used Remington barrels in his percussion rifles.

Action

- muzzle loader.

Make: Southall
Model: Screw Barrel Pistol

Summary

Make:	Southall
Model:	Screw Barrel Pistol
Manufacturer:	Southall
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
120807 - 1	38 PERCUSSION	1	38	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	
120807 - 2	48 FLINTLOCK	1	65	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "SOUTHALL" was observed marked on the left side of the receiver/frame.

Model

- manufactured prior to 1846.
- model designation is not marked on the firearm.
- model designation is derived from the method by which this pistol is loaded; loading was accomplished by unscrewing the barrel.
- this is a single shot pistol with a removable barrel and an exposed hammer centrally located on the receiver/frame behind the chamber.
- this handgun is intended to be loaded from the breech end of the barrel and as such was originally supplied with a wrench to unscrew the barrel from the receiver/frame in order that a lead ball and loose powder could be inserted into the chamber end of the barrel and then the barrel screwed back onto the receiver/frame.
- features may include: nickel finish; engraving; centrally located hammer or cock; wooden grip.
- British proofmarks are usually apparent on the receiver/frame and/or the barrel of this firearm.

Manufacturer

- "SOUTHALL" and "LONDON" are usually marked on the receiver/frame.
- Southall name was associated with numerous gunmakers located in England from circa 1792 to 1865.

Action

- the barrel unscrews in front of the chamber, so it can be loaded with a ball that fits the barrel more tightly than is possible with a muzzle loader.
- the turnoff barrel may be rifled.

Other Markings

- "LONDON" is marked on the right side of the receiver/frame.

Notes

Make

- "SPA" is marked on the left side of the receiver/frame.
- "SPA" means Snow Peak Airguns.

Model

- "MODEL CR600W" is marked on the left side of the receiver/frame.
- "CR600W" is originally equipped from the factory with an integral silencer system.
- features include: ramped front sight; grooved receiver/frame for optic mounting; a suppressor mounted on the barrel; manual safety; adjustable trigger; wood stock with cheek rest area and rubber recoil pad; matte black finish.
- overall length 950 mm (37.4"), and the average weight is 2.1 kgs (4.63 lbs).
- also regular barrel with ramped front sight is available.

Manufacturer

- "SPA" is marked on the left side of the receiver/frame.
- "SPA" means Snow Peak Airguns.
- Snow Peak Airguns is located in China.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- CO2 powered airgun. - at least two variants of this particular model exist: Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.
Serial Number	- serial number is marked on the left side of the receiver/frame. - serial number of a referenced example consisted of sixteen numbers and a letter suffix "F".
Shots	- detachable rotary magazine.
Canadian Law Comments	- this firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. - if the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

Firearm Reference Number (FRN): 146444
Make: Spang & Wallace
Model: Single Barrel Percussion

Summary

Make:	Spang & Wallace
Model:	Single Barrel Percussion
Manufacturer:	Spang & Wallace
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
146444 - 1	1" PERCUSSION	1	1257	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SPANG & WALLACE" is marked on the barrel and/or lockplate.

Model

- manufactured prior to 1857.
- model is not marked on the firearm.
- this is a large percussion single-shot shotgun of the type known as a "punt gun", used for market hunting.
- features include: blued or browned finish; round barrel with under-barrel ramrod; long, thin walnut stock with straight-grip stock; lockplate marked "SPANG & WALLACE"; and possibly precious metal inlays.

Manufacturer

- Spang & Wallace was located in Philadelphia, Pennsylvania, U.S.A. from 1830 to 1856.
- Spang & Wallace was the partnership between Samuel T. Spang and Wallace.
- Spang & Wallace manufactured flintlock and percussion firearms.

Action

- muzzle-loading.

Canadian Law Comments

- Some examples of this model, when manufactured prior to 1898 may be considered Antique in Canada.

FRT Report

Firearm Reference Number (FRN): 124832
Make: Spanish Machine Gun
Model: FAO

Summary

Make:	Spanish Machine Gun
Model:	FAO
Manufacturer:	Fabrica de Armas, Oviedo
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
124832 - 1	8MM MAUSER	20	600	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- adopted into Spanish service as a result of the Spanish civil war. Spain had obtained large quantities of foreign small arms, including the Czechoslovakian model ZB26 machine gun which they subsequently produced in Spain as the model FAO (presumably because this model was produced by Fabrica de Armas, Oviedo).

Model

- on the sample examined the model designation was marked on the top of the receiver/frame. This model is a Spanish built copy of the Czechoslovakian model ZB26 light machine gun. Further developments led to this model being modified to use a belt feed mechanism and chambered in calibre 7.62MM NATO, as such it was re-designated as the FAO model 59.
- features include: blued finish; wood buttstock and pistol grip; quick change barrel feature, barrel is ribbed for cooling and has a carry handle; charging handle mounted on the right side; as this model feeds from a top mounted magazine the sights are offset to the left side of the receiver/frame and barrel; folding bi-pod.

Manufacturer

- the manufacturer's name was marked on the top of the receiver/frame on the example examined.

Action

- gas operated, cyclic rate of approximately 550 r.p.m.

Serial Number

- the sample examined used sequential numbers marked on the top of the receive/frame.
- the sample examined was also marked with the year of production below the serial number (example: 1956) which should not be confused with the serial number.

Shots

- top mounted, detachable box magazine.

FRT Report

Firearm Reference Number (FRN): 119083
Make: Spanish Machine Gun
Model: MG42/59

Summary

Make:	Spanish Machine Gun
Model:	MG42/59
Manufacturer:	Santa Barbara
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
119083 - 1	7.62MM NATO	N/A	531	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make will not be found marked on the firearm.

Model

- rear left side of the receiver/frame is usually marked with the serial number, date of manufacture and the manufacturer's trademark.
- this firearm is the post WW II version of the original MG 42 designed and produced specifically for the 7.62MM NATO cartridge.
- this firearm accepts both the US M-13 disintegrating link and the German DM1 disintegrating link belts.
- this is a fully automatic, air-cooled, belt fed medium or general purpose machine gun utilizing a short recoil type of action which is gas-assisted by means of a recoil booster located within the flash hider; the bolt is of the roller locking type.
- features include:
- full automatic fire only, cyclic rate at 900 rds/min.
- barrel is chrome plated.
- metal stamping type of construction,
- bolt weight - 950 g
- quick-change barrel system,
- easily removeable bi-pod.
- NOTE: this firearm will accept differing masses of bolt and different buffers from other models of the MG1. When the 550 g bolt is installed this machine gun will fire at a cyclic rate of 1000 to 1100 shots per minute.

Manufacturer

- "E N SANTA BARBARA" and "SPAIN", "SBT", "STA. BARBARA - SPAIN", and "STA.BARBARA IND-SPAIN" are some of the markings observed on firearms manufactured by Empresa Nacional Santa Barbara De Industrias Militares, S.A. .
- "Santa Barbara" trademark logo is a "gear wheel with the letters S and B within the gear wheel separated by a vertical sword".
- Empresa Nacional Santa Barbara De Industrias Militares, S.A. was found after the Spanish Civil War of 1939.
- Empresa Nacional Santa Barbara De Industrias Militares, S.A. headquarters was located in Madrid, Spain.
- Empresa Nacional Santa Barbara De Industrias Militares, S.A. manufactured firearms in facilities located in Coruna (A Coruna or La Coruna), and Oviedo, Spain.
- Empresa Nacional Santa Barbara De Industrias Militares, S.A. was aquired by General Dynamics in 2001.
- Empresa Nacional Santa Barbara De Industrias Militares, S.A. was renamed Santa Barbara Sistemas S.A.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Type	- air-cooled medium machine gun.
Action	- short recoil operated, with a gas assist by means of a muzzle booster.
Serial Number	- serial number usually located on the rear left side of the receiver/frame.
Barrel	- barrel length without the barrel extension is 531 mm. - barrel length with the barrel extension is 565 mm.
Calibre	- calibre designation is marked on the rear left side of the receiver/frame as: 7.62.
Shots	- this firearm accepts both the US M-13 disintegrating link and the German DM1 disintegrating link belts. - belt fed machinegun, will not accept the 50 cartridge belt carrier or the 75 round saddle magazine without extensive modification.
Canadian Law Comments	- the magazine known as a "saddle-drum" type (doppeltrommel or satteltrommel"), which is not a reproduction and was originally designed or manufactured for use in the automatic firearms known as the MG13, MG15, MG17, MG34, T6-200 or T6-220, or any variant or modified version of it: is exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted". - For further clarification or explanation see; the "Firearms Regulations" as published in Canada Gazette Part II, Vol 132, No 20 (30/9/98), Part IV, "PROHIBITED DEVICES", Paragraph (3) (a) of the "Former Cartridge Magazine Control Regulations".
Remarks	- in Yugoslavian service, manufactured at ZASTAVA, the MG42 was named "SARAC" or "M53". - the Italians manufactured this machine gun model (calibre 7.62 x 51 mm NATO) under the designation "MG42/59". - in 1957, the West Germans Government recommenced manufacture of this firearm in various calibres as the "MG1", "MG1A1", and later, the "MG3" & MG3e.

Notes

Make

- "SPARK" is marked on the side of the firearm.
- "Spark" is a trade name used by Condor Non-Lethal Technologies.

Model

- "SPARK" is marked on the side of the firearm.
- resembles a semi-automatic handgun.
- uses a "Shaped Pulse" technology, where a first electric arc penetrates the cloth and the skin barrier followed by a second arc which flows across the first arc and delivers a severe electric current incapacitating the subject by overriding his/her central nervous system.
- features include: fixed sights; polymer receiver/frame with accessory rail; ambidextrous safety; light on the buttom; LED screen with WiFi connexion; battery located in the grip; orange/black finish.
- overall length 194mm (7 5/8"), weight 475gr (16.75 oz).

Manufacturer

- "CONDOR" is molded in the grip.
- Condor Non-Lethal Technology was created in 1985 in Rio de Janeiro, Brazil.

Action

- uses a "Shaped Pulse" technology, where a first electric arc penetrates the cloth and the skin barrier followed by a second arc which flows across the first arc and delivers a severe electric current incapacitating the subject by overriding his/her central nervous system.

Serial Number

- serial number is marked on the top of the firearm and on the microchip.
- serial number of a referenced example consisted of two letter prefix "SS" and seven numbers.

Barrel

- barrel length is determined by measuring the overall length of the cartridge.

Notes

Make

- usually marked on the firearm as "Spartan Gunworks by Remington".
- Spartan Gunworks was formed by Remington to offer consumers an economically priced line of break action shotguns. An agreement was reached with the owners of the Baikal line of firearms being produced in Russia to import and market single shot, over/under and side by side models under the Spartan Gunworks trade name.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- introduced in 2004.
- "SPR100" may be marked on the firearm.
- when the SRR100 was first introduced features included: blued finish on metal; plain hardwood pistol grip buttstock and forend; hammerless; cross-bolt safety; selectable ejector or extractor; plain barrel with a bead sight; fixed choke (Modified on 12 and 20 GA and Improved Modified on 410 GA); plastic butt plate; cocking indicator; opening lever is found at the rear of the trigger guard.
- additional features for 2005 include: a ventilated rib; nickel-plated receiver/frame; walnut forearm and pistol grip stock fitted with a recoil pad.
- also available in a "Youth" configuration with a shorter length of pull and a rubber recoil pad in calibre 410 GA X 3" and also available is the "Youth" configuration including a ventilated rib referred to as the model SPR100 Max.
- - in 2005 Remington introduced the model "SPR100 Sporting", this model variation features a ported barrel with a ventilated rib, interchangeable choke tubes and twin bead sights, a Monte Carlo style buttstock and a unique "clay target" engraving motif.

Manufacturer

- made in Russian under the Baikal trade name. Baikal is a trade name used by Izhevsky Mekhanichesky Zavod (Izhmech) of Russia that produces sporting firearms for domestic use and foreign export sales.

Action

- hinged, break open design.

Serial Number

- serial number rationalization unknown, marked on the receiver/frame and underside of the barrel.

Notes

Make

- usually marked on the firearm as "Spartan Gunworks by Remington".
- Spartan Gunworks was formed by Remington to offer consumers an economically priced line of break action shotguns. An agreement was reached with the owners of the Baikal line of firearms being produced in Russia to import and market single shot, over/under and side by side models under the Spartan Gunworks trade name.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- introduced in 2004.
- features include: blued finish on metal; checkered walnut buttstock and forend; single selective trigger; automatic selective ejectors; ventilated rib on top barrel with a bead sight; interchangeable choke tubes on 12, 16 and 20 GA examples, fixed chokes on 28 and 410 GA examples; rubber recoil pad; automatic tang mounted safety; opening lever is mounted on the top tang.
- also available with dual triggers and extractors as the model SPR320.
- introduced for 2005; all steel nickel plated receiver/frame.
- in 2005 Remington introduced a "Sporting" version of this model with ported barrels and a clay target engraving motif.

Manufacturer

- made in Russia under the Baikal trade name. Baikal is a trade name used by Izhevsky Mekhanichesky Zavod (Izhmech) of Russia that produces sporting firearms for domestic use and foreign export sales.

Action

- front hinged receiver/frame, break open design, over/under barrel pattern.

Serial Number

- serial number rationalization unknown, marked on the receiver/frame and underside of the mono-block.

Notes

Make

- marked on the right side of the receiver.

Model

- "SITES Mod SPECTRE" may be marked on the right side of the receiver/frame.
- introduced in 1983.
- blow back action, but fires from a closed bolt.
- uses an independent hammer mechanism.
- double action trigger mechanism.
- similar in appearance to the Spectre M4 sub-machine gun, but with no stock or fore-grip.

Manufacturer

- marked on the right side of the receiver.

Calibre

- marked on the right side of the receiver.

Shots

- detachable two or four colum box magazine.

Notes

Make

- "C.M. SPENCER", "HARTFORD, CT." and PATd MAR. 6. 1860" or "SPENCER REPEATING", "RIFLE. Co. BOSTON, MASS." and "PAT'D. MARCH 6, 1860" may be marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- this was one of the first truly practical repeating long arms designed to use metallic cartridges, and has an important place in history as being one of the most widely used and effective firearms during the US Civil War. - magazine fed (through a tube in the center of the buttstock), with an unmistakably shaped lever and receiver/frame (the lever forms a large trigger-guard, and pivots around a pin in the bottom of a very large "hump" at the bottom of the receiver/frame), blade type extractor on left side of chamber, and a hammer mounted on a side plate on the right side. - straight grip walnut stock with slightly curved buttplate, and either a short forearm with one barrel band (carbine), or a full length forearm with two or three barrel bands (Army/Navy/Sporting rifle, or post war altered example). - the Model 1860 was made in both full size rifle variations (for both the Army and Navy; Navy variants have an under barrel lug for mounting a sword bayonet) and in carbine variations, for cavalry and infantry use; - all were marked "Spencer Repeating Rifle Co. Boston Mass. Pat'd March 6,1860" on the top of the receiver/frame. (Later variants will add barrel markings, such as "NM"-"New Model" or "M 1865", just forward of the receiver/frame). - carbine variants will most often have a sliding ring upon a bar mounted on the left side, for use as a sling attachment point. - these rifles were all originally chambered for the 56-56 Spencer rimfire cartridge (.52" bore), but many were later converted by Springfield Armory to 56-52 or 56-50 Spencer rimfire cartridge (.50" bore), by sleeving the barrel for the smaller diameter bullet. - additionally, many of these rifles and carbines were modified with a "Stabler magazine cut off", a small rotating block in front of the trigger that, when applied, would prevent the user from opening the action of the rifle far enough to admit a new cartridge from the magazine.
Manufacturer	- Spencer Repeating Rifle Company was founded in Boston, Massachusetts by Christopher M. Spencer in 1861, to manufacture repeating rifles for the Union forces during the Civil War. - Spencer Repeating Rifle Company manufactured carbines and full length rifles (both military issue and sporting variations) up until 1869.
Serial Number	- numbered on receiver/frame.
Shots	- tubular magazine in butt.

Notes

Make

- "SPENCER REPEATING RIFLE", "PAT'D MARCH 6. 1860", "MANUF'D AT PROV. R.I.", and "BY BURNSIDE RIFLE CO." or "SPENCER REPEATING", "RIFLE. Co. BOSTON, MASS.", "PAT'D. MARCH 6, 1860", "MANUFACTURED AT PROV., R.I." and "BY BURNSIDE RIFLE CO." may be marked on the receiver/frame.

Model

- "MODEL 1865" is marked on the top of the chamber end of the barrel.
- subcontract model made for the Spencer Repeating Rifle Company, approximately 34,000 made of which 30,502 were purchased by the U.S government.
- this model, as made by the Burnside Rifle company is recognizable by its three groove rifling, compared to six groove rifling for the Spencer produced version.
- approximately 19,000 of these are fitted with the stabler cut off (a small swivel device forward of the trigger that allows use as a single shot).

Manufacturer

-- "MANUFACTURED AT PROV., R.I." and "BY BURNSIDE RIFLE CO." may be marked on the receiver/frame.
- manufactured circa 1865.
- also produced by "Spencer Repeating Rifle Company".

Serial Number

- range: 1 to 34,000.
- located top of receiver, and on left side of barrel.

Notes

Make

- "SPENCER REPEATING", "RIFLE. Co. BOSTON, MASS." and "PAT'D. MARCH 6, 1860" may be marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured circa 1865-1866.
- this was the second generation of one of the first truly practical repeating long-arms designed to use metallic cartridges, and has an important place in history as being one of the most widely used and effective firearms during the US Civil War.
- magazine-fed (through a tube in the center of the buttstock), with an unmistakeably shaped lever and receiver (the lever forms a large trigger-guard, and pivots around a pin in the bottom of a very large "hump" at the bottom of the receiver), blade-type extractor on left side of chamber, and a hammer mounted on a side-plate on the right side
- straight-grip walnut stock with slightly curved buttplate, used either a short forearm with one barrel band (carbine), or a full-length forearm with two or three barrel bands (Army/Navy/Sporting rifle, or post-war altered example)
- the Model 1865 was made in both rifle and carbine variations; all were marked "Spencer Repeating Rifle Co. Boston Mass. Pat'd March 6,1860" on the top of the receiver along with "M 1865" stamped on top of the barrel, just forward of the receiver.
- carbines will most often have a sliding ring upon a bar mounted on the left side, for use as a sling attachment point.
- unlike earlier Spencers with a .52" bore, these carbines were manufactured with the intention of firing .50" calibre projectiles to begin with; therefore, they are all chambered in 56-52 SPENCER RFor 56-50 SPENCER RF.
- additionally, many of these rifles and carbines were modified with a "Stabler magazine cut-off", a small rotating block in front of the trigger that, when applied, would prevent the user from opening the action of the rifle far enough to admit a new cartridge from the magazine.

Manufacturer

- Spencer Repeating Rifle Company was founded in Boston, Massachusetts by Christopher M. Spencer in 1861, to manufacture repeating rifles for the Union forces during the Civil War.
- Spencer Repeating Rifle Company manufactured carbines and full length rifles (both military issue and sporting variations) up until 1869.
- "Burnside Rifle Company" also produced this model.

Serial Number

- numbered on receiver.

131807 - 1	56-50 SPENCER RF	7	826	Antique AFR, Section 1, para. 2	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SPENCER REPEATING RIFLE" over "PAT'D. MARCH 6, 1860" will be marked on the top of the receiver/frame.
- due to the fact that this model series was a conversion of the Spencer carbine manufactured under license by the Burnside Rifle Company, the top of the receiver/frame will be marked as above with the following underneath, "MANUFACTURED AT PROV., R.I." over "BY BURNSIDE RIFLE CO."
- original markings may be very faint due to the refinishing process.

Model

- "MODEL" over "1865" is marked on the front top of the receiver/frame.
- this conversion of the Spencer carbine to rifle musket configuration was undertaken by the Springfield Armory Government Arsenal circa 1871 to1874.
- a total of 1109 carbines were converted.
- the conversion process consisted of the following; replacing the carbine barrel with a new, blued, 3 groove, 32-1/2" / 826mm barrel; addition of a 26"/ 660mm iron cleaning rod; buttstocks were refinished or replaced; new forends were supplied with two barrel bands; metal gun parts were repaired and refinished or replaced; each piece was fitted with a Springfield angular bayonet with socket attachment; addition of the Stabler Patent magazine cutoff if not already present; each rifle retained the original carbine sling ring and bar attachment on the left side of the receiver/frame.
- the left side of the buttstock of these rifle muskets will usually bear "ESA" inspector markings in an oval cartouche.
- standard features; under-lever operated, repeating firearm utilizing a tubular magazine fed through the buttstock; side lock, back action with exposed hammer on right side of the receiver/frame; sling ring and bar attachment on left side of the receiver/frame.

Manufacturer

- the manufacturer's name is marked on the top of the receiver/frame as, "MANUFACTURED AT PROV., R.I." over "BY BURNSIDE RIFLE CO.".
- the reworking/conversion of the original Spencer carbines produced by Burnside was carried out by the Government Arsenal of Springfield Armory; the Springfield Armory name does not appear on these firearms.

Action

- under-lever operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number will be marked on the top of the receiver/frame. - the serial numbers for the original Burnside Rifle Company carbines were retained for this conversion model; the serial number range for the Burnside produced carbines was from 1 to 34,500 without prefix or suffix.
Barrel	- the conversion process for this model series installed a new 32-1/2" / 826mm barrel.
Shots	- tubular magazine fed through the buttstock.

Notes

Make

- "SPENCER RPTG. SHOT GUN PAT. APL. 1882." is marked on the barrel.
- Spencer Repeating Shotgun manufactured by Spencer Arms Company and distributed by the SpenceSpencer Sporting Arms Company was acquired by Francis Bannerman in 1890.
- Francis Bannerman manufactured the Spencer Repeating Shotgun model 1890, model 1894, model 1896, and model 1900.

Model

- "MODEL 1890" is marked on the left side of the receiver/frame.
- manufactured between 1890 and 1893.
- originally manufatured by the Spencer Arms Co. when they went bankrupt they sold the rights to Bannerman. It is believed that bannerman contracted out the actual manufacture of this shotgun.

Manufacturer

- "F. BANNERMAN MNFR. NEW YORK. USA." or "F. BANNERMAN MANUFACTURER. NEW YORK. USA." may be marked on the left side of the receiver/frame.
- Bannerman was in business from 1851 to 1918.
- Bannerman was located in Brooklyn & New York City, New York, U.S.A.

Serial Number

- the serial number is marked on the bottom of the barrel near the receiver/frame and on the right side of the action arm.
- serial number range from 3,000 to approximately 12,000.

Other Markings

- top of barrel marked "RPTG SHOTGUN PAT. APL. 1882"
- left side of action marked "F. BANNERMAN MNFR. NEW YORK. USA. MODEL 1890"

Notes

Make

- "Spencer Safety Hammerless" is marked on the barrel.
- "Spencer" is a trade name manufactured by Otis A. Smith.

Model

- this is an unusual iron-framed double-action-only revolver made under patents issued to John T. Smith of Rockfall, Connecticut.
- "Spencer Safety Hammerless" and "MODEL 1892" are marked on the barrel.
- one-piece frame and barrel made entirely of iron, with a fluted steel cylinder, nickel-plated finish, loading groove on the right side of the frame, and a cylinder stop/catch mounted in the top-strap that can be depressed to free the cylinder for loading and unloading.
- these revolvers were built for various distributors by Otis A. Smith, of Rockfall, Connecticut, but most often bear no manufacturers' marks.
- a small-framed 22-calibre version of this revolver, known as the model 1894, was also built using the same patents.

Manufacturer

- manufacturer's name is not marked on the revolver.

Serial Number

- numbered on bottom of grip.

Firearm Reference Number (FRN): 119214
Make: Spencer
Model: 1894 Safety Hammerless

Summary

Make:	Spencer
Model:	1894 Safety Hammerless
Manufacturer:	Smith, Otis A
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
119214 - 1	22 LR	7	64	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Spencer Safety Hammerless" is marked on the barrel.

Model

- this is an unusual nickel plated, iron-framed double-action-only revolver made under patents issued to John T. Smith of Rockfall, Connecticut.
- "SPENCER SAFETY HAMMERLESS" and "PAT. OCT. 29. 89. CAL 22, MODEL 1894" are marked on the barrel.
- one-piece frame and barrel made entirely of iron, with a fluted steel cylinder, nickel-plated finish, loading groove on the right side of the frame, and a cylinder stop/catch mounted in the top-strap that can be depressed to free the cylinder for loading and unloading.
- these revolvers were built for various distributors by Otis A. Smith, of Rockfall, Connecticut, but most often bear no manufacturers' marks.
- a larger-framed version of this revolver, known as the model 1892, was also built using the same patents, only with a brass frame and barrel.

Manufacturer

- manufacturer's name is not marked on revolver.

Serial Number

- serial number is usually marked on the bottom of the grip strap.

Notes

Make

- "SPENCER RPTG. SHOT GUN PAT. APL. 1882." is marked on the barrel.
- Spencer Repeating Shotgun manufactured by Spencer Arms Company and distributed by the Spencer Sporting Arms Company was acquired by Francis Bannerman in 1890.
- Francis Bannerman manufactured the Spencer Repeating Shotgun model 1890, model 1894, model 1896, and model 1900.

Model

- "MODEL 1896" is marked on the left side of the receiver/frame.
- manufactured between 1886 and 1899.
- this was a very unusual appearing pump action shotgun designed by Christopher Spencer, the designer of the Spencer rifle.
- these shotguns were produced in various grades of finish, engraving, wood quality, etc., but all were made with Damascus or laminated barrels.
- these shotguns have an extractor mounted on the action bar, what appear to be two triggers within the trigger guard (the front "trigger" is actually an action release), and a breech block that also performs as a shell lifter, to transfer shells from the magazine tube up to the chamber for firing.
- as the action is worked, the breech block/shell lifter pivots up and down through the receiver.

Manufacturer

- "F. BANNERMAN MNFR. NEW YORK. USA." or "F. BANNERMAN MANUFACTURER. NEW YORK. USA." may be marked on the left side of the receiver/frame.
- Bannerman was in business from 1851 to 1918.
- Bannerman was located in Brooklyn & New York City, New York, U.S.A.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number is marked on the bottom of barrel near receiver, and on the right side of the action arm. - serial number range between 12,000 and 18,000.
Shots	- tubular under-barrel magazine.

Make

- "SPENCER RPTG. SHOT GUN PAT. APL. 1882." is marked on the barrel.
- Spencer Repeating Shotgun manufactured by Spencer Arms Company and distributed by the SpenceSpencer Sporting Arms Company was acquired by Francis Bannerman in 1890.
- Francis Bannerman manufactured the Spencer Repeating Shotgun model 1890, model 1894, model 1896, and model 1900.

Model

- "MODEL 1900" is marked on the left side of the receiver/frame.
- manufactured between 1900 to1902.
- this was a very unusual appearing pump action shotgun designed by Christopher Spencer, the designer of the Spencer rifle.
- these shotguns were produced in various grades of finish, engraving, wood quality, etc.
- feature include: twist damascus barrel; bead front sight; case hardened receiver/frame; American walnut pistol grip stock and forend.
- extractor mounted on the action bar, what appear to be two triggers within the trigger guard (the front "trigger" is actually an action release), and a breech block that also performs as a shell lifter, to transfer shells from the magazine tube up to the chamber for firing.
- as the action is worked, the breech block/shell lifter pivots up and down through the receiver.

Manufacturer

- "F. BANNERMAN MNFR. NEW YORK. USA." or "F. BANNERMAN MANUFACTURER. NEW YORK. USA." may be marked on the left side of the receiver/frame.
- Bannerman was in business from 1851 to 1918.
- Bannerman was located in Brooklyn & New York City, New York, U.S.A.

Serial Number

- serial number is marked on the bottom of barrel near receiver, and on the right side of the action arm.
- serial number range between 18,000 and 21,000.

Shots

- tubular magazine mounted under the barrel.

Notes

Make

- "SPENCER REPEATING", "RIFLE. Co. BOSTON, MASS." and "PAT'D. MARCH 6, 1860" may be marked on the receiver/frame.

Model

- "N W" is usually marked on the barrel just behind the rear sight.
- in cases where M1865 or M1867 barrels were used, a letter "N" was aded to change the designation to "NM1865" or "NM1867"
- this is a post-Civil War production version of the original Spencer rifle
- magazine-fed (through a tube in the center of the buttstock), with an unmistakeably-shaped lever and receiver (the lever forms a large trigger-guard, and pivots around a pin in the bottom of a very large "hump" at the bottom of the receiver), blade-type extractor on left side of chamber, and a hammer mounted on a side-plate on the right side
- straight-grip walnut stock with slightly-curved buttplate, and either a short forearm with one barrel band (carbine), or a full-length forearm with two or three barrel bands (Army/Navy/Sporting rifle)
- this rifle was made in both full-size rifle variations (for both the Army and Navy; Navy variants have an under-barrel lug for mounting a sword bayonet) and in carbine variations, for cavalry and infantry use; all were marked "Spencer Repeating Rifle Co. Boston Mass. Pat'd March 6,1860" on the top of the receiver, and "NM 1865" or "NM 1867" on the top of the barrel, just forward of the receiver.)
- carbine variants will most often have a sliding ring upon a bar mounted on the left side, for use as a sling attachment point.
- additionally, many of these rifles and carbines were modified with Spencer's "Patent Magazine Cut-off", a pivoting cartridge guide at the top of the breechblock, which, when applied, would prevent the user from opening the action of the rifle far enough to admit a new cartridge from the magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- Spencer Repeating Rifle Company was founded in Boston, Massachusetts by Christopher M. Spencer in 1861, to manufacture repeating rifles for the Union forces during the Civil War.
- Spencer Repeating Rifle Company manufactured carbines and full length rifles (both military issue and sporting variations) up until 1869.

Serial Number

- range: 103,000 to 109,000

128077 - 1	32 S&W	5	76	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SPENCER SAFETY HAMMERLESS" and "PAT. JAN. 24, 1880, OCT 28, 1889" are marked on top of barrel rib.
- "Columbia Armory", "Columbian", "Parker" and "Spencer" were trade names used on revolvers sold by Maltby, Henley & Company and manufactured by Otis A. Smith.
- Maltby, Henley & Company was a sales agent/distributor located in New York City, New York, U.S.A. from 1888 to 1893.
- Maltby, Henley & Company's logo is a stylish M and H overlayed in an oval and may be found moulded into the grip plates.

Model

- "SPENCER SAFETY HAMMERLESS" and "PAT. JAN. 24, 1880, OCT 28, 1889" are marked on the barrel rib.
- this is an unusual nickel plated brass-framed double-action-only revolver made under patents issued to John T. Smith of Rockfall, Connecticut.
- one-piece receiver/frame and barrel made entirely of brass, with a fluted steel cylinder, nickel-plated finish, loading groove on the right side of the receiver/frame, and a cylinder stop/catch mounted in the top-strap that can be depressed to free the cylinder for loading and unloading.
- these revolvers were built for various distributors by Otis A. Smith, of Rockfall, Connecticut, but most often bear no manufacturers' marks.
- a smaller-framed 22-calibre version of this revolver, known as the model 1894, was also built using the same patents, only with an iron receiver/frame and barrel.

Manufacturer

- the manufacturer is not marked on the revolver.

Serial Number

- serial number is usually marked on the bottom of the grip frame.

Notes

Make

- "SPENCER ARMS CO." and/or "SPENCER ARMS CO. WINDSOR. CT. U.S.A. PAT. APR. 1882." may be marked on the barrel.

Model

- "PAT. APR. 1882." may be marked on the barrel or receiver/frame.
- this was a very unusual-appearing pump-action shotgun designed by Christopher Spencer, the designer of the Spencer rifle
- these shotguns were produced in various grades of finish, engraving, wood quality, etc., but all were made with Damascus or laminated barrels
- these shotguns have an extractor mounted on the action bar, what appear to be two triggers within the trigger-guard (the front "trigger" is actually an action-release), and a breech-block that also performs as a shell-lifter, to transfer shells from the magazine tube up to the chamber for firing.
- as the action is worked, the breech-block/shell-lifter pivots up and down through the receiver.
- these shotguns were made in three distinct models (the 1884, the 1886, and the 1887), with only minor differences separating the three; some of the 1887 shotguns were produced in take-down variations
- after Spencer Sporting Arms ceased production, Francis Bannerman & Sons of New York City began manufacturing this same basic design in four distinct models; the 1890, the 1894, the 1896, and the 1900. All of these shotguns will be clearly marked on the receiver as having been made by Bannerman.

Manufacturer

- "Spencer Arms Co.Windsor, CT. U.S.A." is usually marked on the barrel.
- Spencer Sporting Arms Company was a manufacturer founded by Christopher Spencer, a prolific arms designer, to produce repeating shotguns from 1883 to 1889; in 1890, the company went bankrupt and the rights to produce Spencer's Repeating Shotguns were signed over to Francis Bannerman & Sons, of New York City.

Serial Number

- the serial number is marked on the bottom of the barrel near the receiver/frame and on the right side of the action arm.

Barrel

- barrels could be special-ordered in lengths as short as 20"/508mm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- tube magazine.
Other Markings	- top of barrel marked "RPTG SHOTGUN PAT. APL. 1882" - left side of action marked "F. BANNERMAN MNFR. NEW YORK. USA. MODEL 1890"

Notes

Make

- "SPHINX" is marked on the left side of the receiver/frame.
- "MADE IN" over "SWITZEERLAND" is also marked on the left side of the receiver/frame.
- "SPHINX" logo is usually on the right side of the receiver/frame.
- "SPHINX" logo is a Greek mythology sphinx, represented as a monster with a head of a woman, the body of a lioness, the wings of an eagle, and a serpent-headed tail seating, within a hexagon.
- "SPHINX" is a manufacturer based in Matten, Switzerland, that produces several versions of a slightly re-designed, custom fitted CZ-75 pistol.

Model

- "3009" is marked on the left side of the receiver/frame above the grip panel as part of the serial number.
- "3009" is a Swiss-made version of the CZ-75 pistol.
- "3009" is part of the Sphinx 3000 series of pistols.
- "3009" has a heavier receiver/frame than the Sphinx model 3000.
- features include: fixed front and adjustable rear sight; flat sided steel slide with front and rear grip serrations; right side flared ejection port; external extractor; heavy receiver/frame with internal slide rails and extended beavertail; full length dust cover with accessory rail; square trigger guard; straight or curved trigger; front strap is vertically serrated with light finger grooves; exposed hammer; ambidextrous safety lever; left side slide release; extended, push button magazine release; synthetic or checkered wood grip plates with camouflage finish; black slide and a stainless steel receiver/frame.

Manufacturer

- "SPHINX" is marked on the left side of the receiver/frame.
- "MADE IN" over "SWITZEERLAND" is also marked on the left side of the receiver/frame.
- "SPHINX" logo is usually on the right side of the receiver/frame.
- "SPHINX" logo is a Greek mythology sphinx, represented as a monster with a head of a woman, the body of a lioness, the wings of an eagle, and a serpent-headed tail seating, within a hexagon.
- "SPHINX" is a manufacturer based in Matten, Switzerland, that produces several versions of a slightly re-designed, custom fitted CZ-75 pistol.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- recoil-operated.
Serial Number	- serial number is marked on the left side of the receiver/frame. - serial number of referenced examples consisted of a two letter (SB) and two number prefix, a dash, "3009", a dash and three numbers.
Calibre	- calibre designation is marked on the barrel, visible through the ejection port.
Shots	- detachable box magazine.

119763 - 5	9MM SPIRLET	6	145	Antique AFR, Section 1, para. 7	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "A. SPIRLET & CIE." or "A. SPIRLET - ARMES - LIEGE" may be marked on the barrel.
- Albert Spirlet firearms were manufactured by Albert Spirlet and his son Charles Spirlet.

Model

- manufactured from circa 1870 to circa 1894 by Albert Spirlet and Charles Spirlet.
- on July 27th, 1870 a patent (# 2107 or # 2107/70) was registered for a tip-up revolver with a push knob extractor by J.Peddington in the name of Albert Spirlet.
- model designation is not marked on the firearm.
- features include: octagonal barrel; may have raised rib; fixed sight; barrel and cylinder assembly pivot upward; may feature some engraving; spur hammer; double action trigger mechanism; checkered grip panels; lanyard ring.
- the barrel and cylinder release is located in front of the trigger guard, once the barrel assembly has been flipped upwards, pressing on the axis pine knob, which is located below the barrel, will extract the brass cases from the chambers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- Spirlet of Liege, Belgium.
- 1) Bertrand Spirlet was located in Liege, Belgium from 1807 to 1808.
- 2) Eduard Spirlet, the father of Albert Spirlet and grandfather of Charles Spirlet was located in Liege, Belgium from 1850 to 1876.
- 3) Albert Spirlet, the son of Eduard Spirlet and father of Charles Spirlet was located at 5 and 31 Quai de la Boverie, Liege, Belgium from 1860 to 1876.
- 4) Charles Spirlet, the son of Albert Spirlet was located at 29 rue Lamarck and 25 rue des Brasseurs, Liege, Belgium from 1887 to 1912.
- 5) Albert Spirlet (AS), the son of Charles Spirlet was located at 74 and 81 quai de la Boverie, and 7 place des Franchise, Liege, Belgium from 1911 to 1950. Albert Spirlet used the following trademarks: letters "AS" inside a diamond without a crown, letters "AS" inside a diamond under a crown, letter "S" inside a diamond without a crown, letter "S" inside a diamond under a crown, and the letters "AS" under a crown,
- 6) Martin Spirlet (S.M) was located in Liege, Belgium from 1912 to 1939.

Serial Number

- serial number may be marked on the receiver/frame.

Calibre

- calibre designation may be marked on the firearm.
- the "12MM SPIRLET" is also refered to as the calibre 11.5MM.

Other Markings

- A Belgian proofmark of "ELG*" within an oval is a good indication that a firearm was made prior to July, 1893. In July of 1893 a crown was added to the top of the oval which encircles "ELG*". This proofmark is frequently found on the rear face of the cylinder.

Notes

Make

- "SPITFIRE MFG CO." over "PHOENOX, ARIZONA" is marked on the right side of the magazine housing of the lower frame.

Model

- no model name is marked on this firearm.
- introduced circa 1968.
- resembles the Thompson submachine gun, but has a steel tubular upper receiver/frame and a lower frame with full pistol grip and magazine housing made of cast aluminum alloy.
- features; blow back operated, semi automatic, fires from the open bolt position, utilizing a detachable box magazine; round tapered barrel; tubular steel upper receiver/frame; vertical foregrip or horizontal hardwood type forend as used in the Thompson SMG; removable hardwood butt stock; protected post front sight and aperture rear sight; blued upper receiver/frame and barrel, lower frame is usually painted black.
- this firearm is cocked by placing two fingers on top of the exposed bolt and moving the bolt to the rear; this system is very similar to the way the US M3A1 SMG is cocked.

Manufacturer

- "SPITFIRE MFG CO." over "PHOENOX, ARIZONA" is marked on the right side of the magazine housing of the lower frame.
- Spitfire Manufacturing Company was located in Phoenix, Arizona, U.S.A.

Action

- blowback operated, fires from the open bolt position.

Serial Number

- observed example had four numbers without prefix or suffix marked on the front right side of the lower receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine. - this firearm uses the standard box magazine from the US Submachine Gun, M3 or M3A1 model series.
Other Markings	- right side of lower receiver/frame magazine housing is marked "SEMI-AUTO".

Notes

Make

- "SPITFIRE MFG CO" and "PHOENOX, ARIZONA" may be marked on the side of the magazine housing.

Model

- manufactured in the late 1960's.
- resembles the Thompson submachine gun, but has a tubular receiver/frame.
- features include: round tapered barrel; tubular receiver/frame; box magazine; vertical foregrip; pistol grip and removable butt stock; protected post front sight and aperture rear sight.

Manufacturer

- Spitfire Manufacturing Company was located in Phoenix, Arizona, U.S.A.

Action

- blowback operated.

Shots

- detachable box magazine.

Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
161287 - 1	54 FLINTLOCK	1	1067	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "H. SPITZER" is usually marked on the barrel.

Model

- the model is not marked on the firearm; this is a description of the firearm type.
- this is a flintlock hunting rifle manufactured by Henry Spitzer prior to 1840.
- features include: browned or blued finish; open fixed sights; octagonal barrel; under barrel ramrod thimbles; full-length straight-grip maple or walnut stock (some with brass or German silver finishings); external manually cocked cock on the lockplate; finial trigger guard/grip strap; crescent butt with patchbox.

Manufacturer

- "H. SPITZER" is usually marked on the barrel.
- Henry Spitzer was a Newmarket, Virginia gunmaker between 1767 and 1840; his sons, William and Charles also entered the gunmaking trade.

Action

- muzzle-loaded flintlock single-shot.

Other Markings

- "Newmarket made" in script may be marked on the barrel.

Notes

Make

- the company logo consisting of two S's and a D within a double circle with crosshairs is marked on the side of the receiver/frame of an observed example.

Model

- "BD 3008" is marked on an observed example on the side front of the tubular body.
- "BD" in the model designation refers to Berndt Dittrich, the CEO of the company that manufactures this firearm.
- this firearm model is based on the World War II German model MP3008 which was itself based on the design of the British Sten Submachine Gun.
- German production models were usually built with a permanently installed vertical magazine housing designed to use the magazine of the MP38/40.
- the magazine housing which is considered the receiver/frame of this firearm is permanently fixed in a vertical position to the tubular housing in which the bolt reciprocates.
- this firearm incorporates many features of the Sten Submachine Gun; features which include; sheet metal and prefabricated tubular components; steel tube or stamped steel skeleton buttstock; the barrel of this firearm, unlike the STEN, is attached permanently by welding. Many parts and components from the STEN Submachine Gun are interchangeable with the MP3008 & the BD3008. The bolt from a STEN, with minor modifications, can be interchanged and fits and functions.

Manufacturer

- the company logo consisting of two S's and a D within a double circle with crosshairs is marked on the side of the receiver/frame of an observed example.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- blowback operated, advanced primer ignition.
Serial Number	- the serial number is marked on the right side of the magazine housing. - two different serial number rationalizations have been observed: 1. a three letter prefix (CAN), followed by a space, followed by two numbers; and, 2. a four number serial number without prefix or suffix.
Calibre	- "9mm Luger" was observed marked on the right side of the barrel.
Shots	- detachable box magazine.
Canadian Law Comments	- the Sport Systeme Dittrich firearm, Model BD3008, is a factory manufactured firearm in a semi-automatic configuration which is readily converted to fire full automatic in a relatively short time period with relative ease.
Other Markings	- this firearm, which is a recreation of the German MP-3008, has facsimile Waffenamt and proof markings. In accordance with German law the swastika has not been reproduced on these markings, rather an "X" has been substituted. - the right side of the magaxine housing of an observed example was marked "TJK" over "H" and "WAa383".
Remarks	- the Sport Systeme Dittrich firearm, Model BD3008, is a factory manufactured firearm in a semi-automatic configuration. - this firearm is a recreation of a rare and unusual full-automatic firearm, the MP3008, manufactured in the last months of the Second World War and which is a copy of the British STEN Submachine Gun.

Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
126518 - 3	9MM LUGER	2	248	Prohibited PFR, Part 1, para. 172(f)	Manufacturer Specifications and Commercial Customization	
126518 - 2	9MM LUGER	5	248	Prohibited PFR, Part 1, para. 172(f)	Non-Commercial Customization	
126518 - 4	9MM LUGER	10	248	Prohibited PFR, Part 1, para. 172(f)	Manufacturer Specifications and Commercial Customization	
126518 - 1	9MM LUGER	32	248	Prohibited PFR, Part 1, para. 172(f)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the company logo consisting of two S's and a D within a double circle with crosshairs is marked on the side of the receiver/frame of an observed example.

Model

- "BD 38" over "ayf" over "41" is marked on the top of the receiver/frame.
- "BD" in the model designation refers to Berndt Dittrich, the CEO of the company that manufactures this firearm.
- the tubular housing in which the bolt reciprocates features a enlarged sear cut-out on the underside to accommodate the unique disconnector/trigger bar which distinguishes this BD38 design from the original German MP38.
- the lugs that lock the tubular housing in which the bolt reciprocates to the receiver/frame are larger on the BD38 than the original German MP38.
- the original firearm, of which this model is a recreation, is commonly known as the "Schmeisser" or MP-38/40.
- this firearm design is based on the original MP38 model which was a Vollmer/Erma Werke development, adopted in 1938 and universally produced by firearm manufacturers in the German sphere of influence during WW II.
- a reproduction stamping of the original World War II manufacturer's code "ayf" (Erma, Erfurt) is marked on the top of the receiver/frame.
- this firearm model incorporates the MP38/40 safety modification that consists of a two piece lock-down style bolt handle which, in conjunction with an upwards cut-out in the forward end of the cocking handle slot, was intended to securely lock the bolt in the forward position.
- utilizes bakelite grip panels and body housing.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the company logo consisting of two S's and a D within a double circle with crosshairs is marked on the side of the receiver/frame of an observed example.
Action	- blowback operated. - although this firearm is factory manufactured in a semi-automatic configuration it is capable of full automatic fire.
Serial Number	- three serial number rationalizations have been seen: 1. a serial number series of two numbers followed by a space, followed by a three letter suffix (CAN); 2. a serial number series of four numbers followed by a space, followed by a two letter suffix (US); and, 3. a serial number series of four numbers without prefix or suffix. - the last two digits of the serial number are normally repeated on all major components.
Calibre	- "9mm Luger" was observed marked on the side of the barrel
Shots	- detachable box magazine.
Canadian Law Comments	- the Sport Systeme Dittrich firearm, Model BD38, is a factory manufactured firearm in a semi-automatic configuration, which has a near exact copy of the receiver of a full automatic firearm. The two receivers are so similar that the original German Model MP38 and MP38/40 Submachine Gun trigger mechanisms will fit and function in the BD38 to support full automatic fire. - additionally, the Sport Systeme Dittrich firearm, Model BD38 is readily converted to fire full automatic in a relatively short time period with relative ease.
Other Markings	- this firearm, which is a recreation of the German MP-38, has facsimile Waffenamt and proof markings. In accordance with German law, the swastika has not been reproduced on these markings, rather an "X" has been substituted. - the top, rear of the receiver/frame of an observed example is marked: "BD 38" over "ayf" over "41". - "WAa280" is observed marked on the left side of the firearm.

Notes

Make

- the company logo consisting of two S's and a D within a double circle with crosshairs was marked on the right side of the receiver/frame forward of the ejection port on an observed example.

Model

- the "BD42" was marked on an observed example on right side of the receiver/frame forward of the ejection port.
- a facsimile of the original "FG42" model markings over the Krieghoff manufacturer code (fzs) has been reproduced on the top of the receiver/frame.
- "BD" in the model designation refers to Berndt Dittrich, the CEO of the company that manufactures this firearm model.
- this firearm is a recreation of the World War II, German model FG42 type 'E', also known as the "Fallschirmjagergewehr 42".
- this firearm model has the visual appearance of the original FG42 but will not accept full-automatic parts or components.
- for ease of manufacture this model features a stamped steel receiver/frame.
- features include: muzzle brake/flash hider; square fluted spike bayonet; folding blade front sight and adjustable folding rear peep sight; wooden forend; folding bipod; black finished receiver/frame; charger loading guide; black painted aluminum handgrip and buttstock; scope mount grooves on the top of the receiver/frame; magazine well located on the left side of the receiver/frame; safety located on the left side of the grip housing; distinctive slanted grip angle.
- overall length with a 500mm (19.69") barrel is 945mm (37.2") average weight with sling and magazine is 4.5kgs (9.92lbs).

Manufacturer

- the company logo consisting of two S's and a D within a double circle with crosshairs was marked on the right side of the receiver/frame forward of the ejection port on an observed example.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Type	- this is a factory manufactured firearm in a semi-automatic configuration, that is a recreation of a full-automatic firearm but in its self not capable of full-automatic fire.
Action	- gas operated.
Serial Number	- the serial number was found on the top of the receiver/frame. - observed example consisted of 4 digits, without prefix or suffix. - matching numbers are located on the bolt and barrel and the last 2 digits of the serial number are marked on the buttstock, bipod and folding front sight assembly.
Barrel	- rifling data - calibre = 7.92mm; four grooves, uniform right hand twist, one turn in 240mm.
Calibre	- "8x57 JS" may be observed marked on the bottom of the barrel under the bipod and bayonet. - rifling characteristics in calibre 8mm Mauser (8x57JS): 1 turn in 240mm (9.45"), 4 grooves with a right hand twist.
Shots	- detachable box magazine. - observed current production 10 and 20 round magazines have the 'Sport Systeme Dittrich' logo "ssd" on the front of the magazine retaining lug.
Other Markings	- this firearm, which is a recreation of the German FG42 , has facsimile Waffenamt and proof markings. In accordance with German law the swastika has not been reproduced on these markings, rather an "X" has been substituted. - the Krieghoff manufacturer code (fzs) has been reproduced on the top of the receiver/frame.
Remarks	- this firearm is a factory manufactured firearm in a semi-automatic configuration, that is a recreation of a full-automatic firearm. This firearm has been designed so as not to be capable of accepting full automatic parts nor to be converted to be capable of full-automatic fire without substantial modification.

Notes

Make

- "Sport Target Pistol" use the abbreviation "STP".
- "STP" is marked on the right side of the slide and receiver/frame.
- "STP" is a firearms brand established by the German "Büchsenmacherei Prommersberger", a company specialized in making competition handguns.

Model

- "Black Major" is marked on the left side of the slide.
- "Black Major" is of the "STI International" hi-capacity, 2011 type design.
- "Black Major" is a modular design of the 2011 series made of a barrel and slide assembly, a synthetic trigger guard and grip assembly and a steel or alloy receiver/frame. This differs from the traditional 1911A1 design whereby the grip/trigger guard are not integral to the receiver/frame.
- Features include: polygon rifling; cocking serrations on the front going all the way down on the receiver/frame dust cover having lightening holes at each of them on the top of the slide; rear cocking serrations of the slide or cocking pads; lowered and flared ejection port; receiver/frame with full length dust cover; beavertail grip safety with a raised pad; ambidextrous safety catch lever; skeletonized hammer; checkered mainspring housing; extended, beveled magazine well.
- "Black Major" is available with a 127mm (5") or 152mm (6") barrel.

Manufacturer

- "Sport Target Pistol" use the abbreviation "STP".
- "STP" is marked on the right side of the slide and receiver/frame.
- "STP" is a firearms brand established by the German "Büchsenmacherei Prommersberger", a company specialized in making competition handguns.
- "Büchsenmacherei Prommersberger" was founded in 1988 in Aichach, Germany by Karl Prommersberger.
- "Büchsenmacherei Prommersberger" in 1990 he opened a shop in Kühbach, Germany. In 1998, the company established a business partnership with "STI" and was representing this American brand in Europe.
- "Büchsenmacherei Prommersberger" ended the "STI" cooperation in 2015.
- "Büchsenmacherei Prommersberger" in 2016 registered the "Sport Target Pistol" (STP) brand.

Action

- Recoil operated.

Serial Number

- The serial number is marked on the right side of the receiver/frame.
- The serial number of a referenced example consisted of a two letter prefix and four numbers.

Calibre

- The calibre designation is marked on the barrel, visible through the ejection port.

Shots

- Detachable box magazine.

Firearm Reference Number (FRN): 102735
Make: Sportco
Model: Martini Clubmaster

Summary

Make:	Sportco
Model:	Martini Clubmaster
Manufacturer:	Sporting Arms Limited
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	AUSTRALIA
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
102735 - 1	22 LR	1	711	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SPORTCO" is marked on the barrel.
- "SPORTCO" was a trade name/trademark manufactured by Sporting Arms Limited and Omark Industries/Omark Australia Limited.

Model

- "Martini Clubmaster" is not marked on the firearm.
- "SPORTCO", "SPORTING ARMS LTD." over "SOUTH AUSTRALIA", "CLUBMASTER" and ".22 LR" are marked on the barrel.
- "Martini Clubmaster" is intended for use in small bore target competitions.
- features include: Martini action, fully adjustable trigger, the receiver/frame has a hole drilled in the rear to allow a cleaning rod to be inserted to minimize the chance of damaging the muzzle crown, heavy profile barrel with a one inch diameter at the breech tapering to 7/8 of an inch at the muzzle, full pistol grip butt stock with raised comb, forend is equipped with an adjustable hand stop and two sling eyes, Parker-Hale tunnel front sight with interchangeable elements, rear sight will usually be a Parker-Hale PH17 with a PH52 large disc, six hole eyepiece.
- as issued the approximate weight is 10 1/2 pounds.
- Sportco also offered a low cost Martini type rifle with barrel mounted rear sight, lightweight barrel, and straight gripped stock known simply as the "Martini Sporter".

Manufacturer

- "SPORTCO" and "SPORTING ARMS LTD." or "SPORTING ARMS LIMITED" are usually marked on the barrel.
- Sporting Arms Limited (Sportco) was founded by Jack Warne in 1947.
- Sporting Arms Limited (Sportco) was located in Adelaide, South Australia.
- Sporting Arms Limited (Sportco) manufactured rifles and shotguns.
- Sporting Arms Limited (Sportco) was purchased by Omark Industries in 1966.
- Sportco (Sporting Arms Limited) ceased operations in the early 1980s.
- Jack Warne moved to the United States of America and founded Kimber of Oregon in the 1980s.

Action

- rear hinged, lever operated tipping block design.
- Martini action is locked in the firing position by the tip of the operating lever holding the breech block face up and in line with the chamber.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Importer - Sportco literature notes that the Canadian sales agency was H. S. Wilson & Son, located on York Street in Toronto, Ontario.

Model

- this is a small single-shot shotgun with an abbreviated synthetic buttstock that can contain four shotshells under a sliding plate.
- stainless-steel receiver/frame and barrel. Earlier versions used stainless steel for the hammer, trigger, and action-release button as well.
- the Snake Charmer II has a rotating hammer-block safety on the right side of the receiver/frame.
- action tips down to load/unload
- action unlocks with a button at the front of the trigger-guard.
- "SNAKE CHARMER II" is marked on the firearm.

Manufacturer

- Sporting Arms Manufacturing is a manufacturer based in Littlefield, Texas. It produces the "Snake Charmer II", a slightly re-designed version of the original Snake Charmer .410 shotgun.

Serial Number

- serial number is located on the bottom of the receiver/frame.

Notes

Make

- "SPRINGFIELD" is marked on the firearm.
- "Springfield" was a trade name used on firearms manufactured by the Savage Arms Corporation and the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on rifles and shotguns manufactured by the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on revolvers and shotguns manufactured by the Crescent Firearms Company.
- "Springfield Arms Co." was a manufacturer of percussion revolvers located in Springfield, Massachusetts, U.S.A. between 1851 and 1869.

Model

- originally produced as a Stevens model from 1935 to 1939, introduced as a Springfield model in 1939, as with most commercial firearms produced by Savage during World War II production ceased circa 1942 so that production capability could be focused on military weapons.
- features include: turn-bolt operated action; take-down design (one large screw on the underside of the stock); chromium plated bolt and trigger; one-piece walnut finished, full pistol grip stock with a hard rubber butt plate; hooded ramp front sight with interchangeable inserts and an aperture rear sight mounted on the receiver/frame; tapered round barrel.
- available with a gold bead front sight and a barrel mounted sporting rear sight with elevation and windage adjustments as the Springfield model 83.

Manufacturer

- the Savage name is not usually marked on the firearm. Sample markings read "J. Stevens Arms Company" over "Chicopee Falls, Mass. U.S.A.". Although marked with the Stevens name this model was produced when Stevens was owned and operated by Savage.

Serial Number

- samples seen have not been serialized.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - calibre designation is marked on the barrel.

Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
117304 - 1	69 PERCUSSION	1	1067	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is normally marked vertically at the rear of the lock plate as, "SPRING" over "FIELD" over a date stamp.

Model

- introduced in 1843 and discontinued in 1855.
- the model designation is not marked on the firearm.
- this model was the last smooth bore, calibre 69 PERCUSSION musket made for the U.S. govermnent. This model was also the first regulation musket made at two armouries, the Harpers Ferry Armory and Springfield Armory, in which the parts were fully interchangable. The total production was 275,000 units. Approximately 103,000 units at the Harpers Ferry Armory and 172,000 units at the Springfield Armory.
- features include: side hammer, round barrel, a flat lock plate with beveled edges, three iron barrel bands, a full length stock with a bayonet lug, and may have a steel ram rod located under the barrel.
- the lock plate may have the following markings. An eagle in front of the hammer with "US" marked below, and the manufacturers name at the rear of the lock plate, marked vertically with a date stamp.
- the barrel may have the following markings. On the left side near the breech, a "V" and "P" with an eagles head, a date stamp matching the lockplate and proof marks. Some models may also have inspectors intials,"PB" or "P", in front of the proof marks.
- the barrel will normally be found to be a smooth bore. From 1856 to 1859, 14,182 units had the barrels rifled. This work was done at the Harpers Ferry Armory and Springfield Armouy. Less then 10,000 units were fitted with long range sights.

Manufacturer

- the manufacturer is normally marked vertically at the rear of the lock plate as, "SPRING" over "FIELD" over a date stamp.

Model

- the model designation is not marked on the firearm.
- 3200 produced circa 1847.
- this model was a short rifled version of the 1842 musket made at two armouries, the Harpers Ferry Armory and Springfield Armory, in which the parts were fully interchangeable.
- features include: side hammer; round barrel; a flat lock plate with beveled edges; two iron barrel bands with the front band incorporating a front sight, sling swivel and ram rod port; flip adjustable rear sight; steel ram rod located under the barrel; finished "in the white".
- the lock plate has the usual Springfield markings and the date stamp but may lack the US and eagle motif markings.
- overall length is 1156mm/45 1/2".

Manufacturer

- "SPRING" over "FIELD" over a date stamp is marked vertically at the rear of the lock plate.

Action

- percussion ignition.

Notes

Make

- "U.S." over "SPRINGFIELD" is marked on the lock plate.

Model

- manufactured from 1855 to 1857.
- "1855" or "1856" or "1857" is marked on the lock plate behind the hammer.
- "U.S." over "SPRINGFIELD" is marked on the lock plate.
- approximately 4,021 units were manufactured by Springfield Armory.
- this firearm was also known as the "1855 US Percussion Pistol-Carbine".
- this model had a detachable buttstock.
- features include: blade front sight and a two leaf rear sight; round, rifled barrel with a single barrel band with a sling swivel; swivel type steel ramrod is mounted under the barrel; right side lock plate with an exposed percussion hammer; single action trigger mechanism; rounded trigger guard; one piece wood stock with a metal forearm cap, bag type pistol grip, metal buttcap and sling swivel and a detachable buttstock with sling swivel and curved butt plate.

Manufacturer

- "U.S." over "SPRINGFIELD" is marked on the lock plate.

Action

- muzzle loader.

Other Markings

- "US" and the eagle logo are usually marked on the lock plate with the date of 1863 to 1869.

91915 - 2	58 PERCUSSION	1	1016	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Model

- manufactured between 1857 and 1861 with a production believed to be 47,115 firearms.
- features include: a Maynard tape primer magazine on the lock, the cover of which is stamped with the American eagle, a pawl type priming mechanism, a "C" shaped hammer with a sharpened lower lip, date of manufacture is marked behind the hammer, rear sights may be graduated to 800 yards and a 2 leaf sight arrangement is found on guns produced after 1858.
- barrel is round, rifled with 3 grooves and is usually marked near the breech end with "V/P" over eagle head proof marks and 3 barrel bands of iron. These bands may sometimes be found stamped with a "U" on the right side.

Manufacturer

- appears on the front of the lockplate as "US / SPRINGFIELD " in conjunction with an American eagle motif in front of the hammer on priming cover.

Action

- muzzle loading, percussion ignition.

Remarks

- the same basic rifle was produced by "Harpers Ferry" with small numbers also made by Eli Whitney Jr. for the Union, and the "Richmond Armory" for Confederate forces on machinery captured at Harpers Ferry.

66605 - 2	58 PERCUSSION	1	838	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Springfield" is not usually marked on the firearm, except those manufactured at the government arsenal known as "Springfield Armory".
- "Springfield" as the make is derived from the name of the original designer and manufacture of the 1861 U.S. Rifle-Musket
- Springfield Armory manufactured 265,129 percussion rifle-muskets between 1861 and 1862.
- the Springfield model 1861 US Rifle-Musket was also manufactured under contracts by many other firms.

Model

- this was one of the primary firearms used during the American Civil War (often used by BOTH sides; although manufactured by or for the Union forces, these rifles were often captured and turned against their former users)
- an extremely long barrel in original-condition specimens (40"/1016mm), three barrel bands, manually-cocked hammer on right sideplate, open sights adjustable for elevation, sling swivels mounted at front of trigger-guard and second barrel band, and date of manufacture, US martial eagle, and "US", along with manufacturer's name on the sideplate. Approximately 24 different manufacturers are known for these rifles, and each had their own sideplate marking.

Manufacturer

- marked on the lock plate.
- Amoakeag manufactured this model from 1861 to 1865.
- actual markings: AMOSKEAG Mfg. Co/MANCHESTER, N.H.
- contractor for Springfield Armory.

Action

- black powder, percussion, muzzle loading single-shot rifle.

Notes

Make

- "Springfield" is not usually marked on the firearm, except those manufactured at the government arsenal known as "Springfield Armory".
- "Springfield" as the make is derived from the name of the original designer and manufacture of the 1861 U.S. Rifle-Musket
- Springfield Armory manufactured 265,129 percussion rifle-muskets between 1861 and 1862.
- the Springfield model 1861 US Rifle-Musket was also manufactured under contracts by many other firms.

Model

- the 1861 Rifle-Musket has a straight grip walnut stock with curved buttplate, three barrel bands, sling swivels at the front of the trigger guard and the second band, three groove rifling, and a tulip shaped ram-rod end.
- these rifles were also manufactured for individual state contracts; those rifles made for the Federal/Union government were marked with "U.S." on the buttplate and had a martial eagle over "U.S." on the lockplate. These rifles may also be stamped "1862", "1863" or "1864" at the rear of the lockplate.
- may be marked "S.N.& W.T.C. FOR MASSACHUSETTS" on the lockplate.
- following the American Civil War, many of these firearms were sold to surplus arms dealers who smooth bored the barrels to 20 GA, cut the forearms to half length and sold them to farmers and settlers at very low prices.

Manufacturer

- Colt produced thousands of these rifle muskets from 1861-1864.
- Colt's production was as a result of a contract with the state of Massachusetts.
- "US" over "COLT'S PT F.A. MFG CO" over "HARTFORD CT" is marked on the lockplate.

Action

- muzzle-loading, percussion ignition.

- Springfield Armory manufactured 265,129 percussion rifle-muskets between 1861 and 1862.
- the Springfield model 1861 US Rifle-Musket was also manufactured under contracts by many other firms.

Model

- this is a new-pattern percussion rifle manufactured in Suhl, Germany for the federal/Union government under a federal contract in 1861, when both sides in the Civil War were desperate for arms; C.H. Funk of Suhl was only one of many contractors that produced these rifles.
- the 1861 has a straight grip walnut stock with curved buttplate, three barrel bands, sling swivels at the front of the trigger guard and the second band, three groove rifling, and a tulip shaped ram-rod end.
- these rifles were marked with "U.S." or "US" at the front of the lockplate, with a date of "1861" at the rear of the lockplate; all other makers of these rifles had additional manufacturer and/or city markings.

Manufacturer

- these rifled muskets were produced by C.H. Funk, a Suhl, Germany gunmaker in 1861; the bottoms of some of the barrels may be marked "Suhl" or "CH Funk" over "Suhl".

Action

- muzzle loading, percussion, single-shot.

- the Springfield model 1861 US Rifle-Musket was also manufactured under contracts by many other firms.

Model

- the 1861 has a straight grip walnut stock with curved buttplate, three barrel bands, sling swivels at the front of the trigger guard and the second band, three groove rifling, and a tulip shaped ram rod end.
- these rifles were also manufactured for individual state contracts; those rifles made for the federal/Union government were marked with "U.S." on the buttplate and had a martial eagle over "U.S." on the lockplate. These rifles will also be stamped "1865" at the rear of the lockplate.

Manufacturer

- "E.G. LAMSON & CO." over "WINDSOR VT." is marked on the lockplate.
- "E.G. Lamson & Company" was formed from the company of "Lamson, Goodnow & Yale" with the departure of Goodnow and Yale in 1864.
- "Lamson, Goodnow & Yale" of Windsor, Vermont and Shelburn Falls, Massachusetts was owned by E.G. Lamson, A.F. Goodnow and B.B. Yale.
- "E.G. Lamson & Company" manufactured Ball and Palmer carbines and Springfield 1861 US Rifle-Muskets between 1864 and 1865.

Action

- muzzle loading, percussion, single shot rifle.

Notes

Make

- "Springfield" is not usually marked on the firearm, except those manufactured at the government arsenal known as "Springfield Armory".
- "Springfield" as a make is derived from the name of the original Government Armory founded at Springfield Mass. circa 1794.
- Springfield Armory manufactured 265,129 percussion rifle-muskets between 1861 and 1862.
- the Springfield model 1861 US Rifle-Musket was also manufactured under contracts by many other firms.

Model

- the 1861 has a straight grip walnut stock with curved buttplate, three barrel bands, sling swivels at the front of the trigger guard and the second band, three groove rifling, and a tulip shaped ram rod end.
- these rifles were also manufactured for individual state contracts; those rifles made for the federal/Union government were marked with "U.S." on the buttplate and had a martial eagle over "U.S." on the lockplate. These rifles will also be stamped "1862", "1863" or "1864" at the rear of the lockplate.

Manufacturer

- "L.G. & Y.", "L.G-& Y." or "L.G.-& Y." over "WINDSOR-VT." is marked on the lockplate.
- "Lamson, Goodnow & Yale" of Windsor, Vermont and Shelburn Falls, Massachusetts was owned by E.G. Lamson, A.F. Goodnow and B.B. Yale.
- "Lamson, Goodnow & Yale" manufactured approximately 50,000 rifle-muskets between 1862 and 1864.
- "Lamson, Goodnow & Yale" company name changed to "E.G. Lamson & Company" with the departure of Goodnow and Yale in 1865.

Action

- muzzle loading, percussion, single shot rifle.

Make

- "Springfield" is not usually marked on the firearm, except those manufactured at the government arsenal known as "Springfield Armory".
- "Springfield" as the make is derived from the name of the original designer and manufacture of the 1861 U.S. Rifle-Musket
- Springfield Armory manufactured 265,129 percussion rifle-muskets between 1861 and 1862.
- the Springfield model 1861 US Rifle-Musket was also manufactured under contracts by many other firms.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- the model designation is not marked on the firearm.
- manufactured between 1862 and 1865.
- total production of 70,000 rifle-muskets
- this was one of the primary firearms used during the American Civil War (often used by both sides; although manufactured by or for the Union forces, these rifles were often captured and turned against their former users)
- an extremely long barrel in original-condition specimens (40"/1016mm), three barrel bands, manually-cocked hammer on right sideplate, open sights adjustable for elevation, sling swivels mounted at front of trigger-guard and second barrel band, date of manufacture, US martial eagle, and "US", along with manufacturer's name on the sideplate. Approximately 24 different manufacturers are known for these rifles, and each had their own sideplate marking.
- following the American Civil War, many of these firearms were sold to surplus arms dealers who smooth bored the barrels to 20 GA, cut the forearms to half length and sold them to farmers and settlers at very low prices.

Manufacturer

- "PROVIDENCE" and/or "PROVIDENCE TOOL CO." over "PROVIDENCE R.I." is marked on the side of the lock plate.
- in 1851, "Providence Tool Company" was founded in Providence, Rhode Island to manufacture tools.
- in 1862, "Providence Tool Company" was contacted to manufacturer 82,000 "Springfield 1861 rifle-muskets".
- in 1866, "Providence Tool Company" was contacted to manufacturer "Peabody" carbines and rifles.
- in 1869, "Providence Tool Company" was contracted by "Benjamin Roberts" to convert "Springfield 1861 rifle-muskets" & "Springfield 1863 rifle-muskets" to breech loading rifles by using the "Roberts' Patent of June 11, 1867".
- in 1873, "Providence Tool Company" was contacted to manufacturer 650,000 "Peabody & Martini" carbines and rifles for the Turkish government.
- in 1917, "Providence Tool Company" ceased operations.

Action

- black powder, percussion, muzzle loading single-shot rifle.

- the 1861 has a straight grip walnut stock with curved buttplate, three barrel bands, sling swivels at the front of the trigger guard and the second band, three groove rifling, and a tulip shaped ram-rod end.
- these rifles were also manufactured for individual state contracts; those rifles made for the federal/Union government were marked with "U.S." on the buttplate and had a martial eagle over "U.S." on the lockplate. These rifles will also be stamped "1863" or "1864" at the rear of the lockplate.
- marked "Remington's" over "Ilion, N.Y." at the front of the lockplate.

Manufacturer

- E. Remington & Sons of Ilion, New York, produced approximately 40,000 of these percussion rifle muskets between 1864 and 1866, under a federal contract of 1863
- marked "Remington's" over "Ilion, N.Y." under the nipple on the lockplate.
- Remington was only one of many contractors that produced these rifles.

Action

- muzzle loading, percussion, single-shot firearm.

Notes

Make

- "U.S." and "Springfield" are marked on the side plate.
- "Springfield" as the make is derived from the name of the original designer and manufacture of the 1861 U.S. Rifle-Musket
- Springfield Armory manufactured 265,129 percussion rifle-muskets between 1861 and 1862.
- the Springfield model 1861 US Rifle-Musket was also manufactured under contracts by many other firms.

Model

- this was one of the primary firearms used during the American Civil War (often used by both sides; although manufactured by or for the Union forces, these rifles were often captured and turned against their former users)
- an extremely long barrel in original-condition specimens (40"/1016mm), three barrel bands, manually-cocked hammer on right sideplate, open sights adjustable for elevation, sling swivels mounted at front of trigger-guard and second barrel band, and date of manufacture, US martial eagle, and "US", along with manufacturer's name on the sideplate. Approximately 24 different manufacturers are known for these rifles, and each had their own sideplate marking.

Manufacturer

- made by the original Springfield Armory in 1861 and 1862; marked "US Springfield" and date (1861 or 1862) on lockplate, along with a US martial eagle.

Action

- black powder percussion single-shot

- Springfield Armory manufactured 265,129 percussion rifle-muskets between 1861 and 1862.
- Springfield model 1861 US Rifle-Musket was also manufactured under contracts by many other firms.

Model

- manufactured from 1863 to 1864.
- this is a new-pattern percussion rifle manufactured in Trenton, New Jersey, for the federal/Union government under a federal contract in the 1860s, when both sides in the Civil War were desperate for arms; the Trenton Arms Co. was only one of many contractors that produced these rifles.
- features include: straight grip walnut stock with curved buttplate; three barrel bands; sling swivels at the front of the trigger guard and the second band; three groove rifling; and a tulip shaped ram-rod end.
- these rifles were marked with "U.S." over "TRENTON" in front of the hammer, with dates from 1863 to 1864 at the rear of the lockplate; all other makers of these rifles had additional manufacturer and/or city markings.

Manufacturer

- "U.S." over "TRENTON" is marked on the lockplate.
- "Trenton Arms Company" was owned by J.T. Hodge and A.M. Burton.
- "Trenton Arms Company" was located at the "Trenton Locomotive & Machine Company" facility in Trenton, New Jersey, U.S.A. from 1863 to 1865.

Action

- muzzle-loaded percussion single-shot.

Notes

Make

- "Springfield" is not marked on the firearm.
- an eagle motif over US is marked on the lockplate.

Model

- "1865" is marked at the rear of the lockplate.
- this is a model 1861 muzzle loading rifles converted to a breech loader.
- this model uses the Allin conversion system which has a forward swinging hinged breechblock (trap door) and dated 1865.
- features include: straight grip walnut stock with curved buttplate, three barrel bands, sling swivels at the front of the trigger guard and the second band, three groove rifling, and a tulip shaped ram-rod end.

Manufacturer

- "REMINGTON'S" over ILION NY." was observed marked on the lockplate beneath nipple bolster.

Action

- muzzle loading rifle converted to breech loading using the Allin system, which has a forward swinging hinged breechblock (trap door).

Remarks

- This is a conversion of existing 58 calibre muzzle loading rifles to breech loading using the Allin system which has a forward swinging hinged breechblock. This is the first of the "trapdoor" series of rifles used by the United States Army from 1866 until replaced by the Krag Jorgensen in the 1890's.

Notes

Make	- the make appears on the lockplate.
Model	- the model designation does not appear on the firearm. - approximately 52,000 Springfield Model 1868 Rifles were manufactured between 1869 & 1870. - this firearm is a breech loading rifle using the Allin, hinged, forward pivoting breechblock system. This rifle is a newly manufactured firearm, not a conversion of an earlier manufactured muzzle loader (although existing locks and some other parts were used). - features include: newly manufactured receiver/frame, shorter barrel (Shorter than the 1016MM (40 inch) barrels of the muzzle-loaders from which the first & second Allin Conversions were made.), many surplus or salvaged parts and components such as lock plates & butt plates of earlier Springfield Rifle-Musket models were utilized in the manufacture of the Model 1868 Rifles, original chambering of 50-70 GOVT calibre and will have two barrel bands.
Manufacturer	- arsenal name appears on lockplate as do dates 1863 or 1864.
Action	- side hammer, hinged, forward pivoting breechblock system, single shot firearm.
Serial Number	- appears on the receiver/frame. - from 1 to 52,000.
Other Markings	- the breech block may be dated 1868, 1869 or 1870
Remarks	- the breech mechanism that became known as the Springfield Trapdoor breech mechanism was originated by Eskine S Allin who was a master Armorer at the Springfield Armory approximately 1865. This mechanism was originally designed for the purpose of converting muzzle-loading rifle-muskets to breech-loading firearms.

Notes

Make

- "U.S." over "SPRINGFIELD" is marked on the lock plate.

Model

- manufactured in 1869.
- "DEC" over "1869" is marked on the receiver ring.
- "U.S." over "SPRINGFIELD" is marked on the lock plate.
- approximately 50 units were manufactured for field trials.
- 1869 US Breech Loading Pistol failed the field trials and did not go into production.
- Springfield Armory utilized the receiver/frame and breech block assembly from the model 1868 rifle and the standard model 1863 musket lock to produce this handgun.
- features include: blade front sight and a "V" notched in the breech block assembly for a rear sight; round barrel; external, side mounted hammer; two piece wood stock with a single barrel band and a brass pistol grip cap.
- overall length is 464 mm (18.25").

Manufacturer

- "U.S." over "SPRINGFIELD" is marked on the lock plate.

Action

- top hinged breech block design.

Other Markings

- "US" and the eagle logo are usually marked on the lock plate with the date of 1863 to 1869.

4255 - 1	22 LR	15	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SPRINGFIELD" is marked on the firearm.
- "Springfield" was a trade name used on firearms manufactured by the "Savage Arms Corporation" and the "J. Stevens Arms Company".
- "Springfield Arms Co." was a trade name used on rifles and shotguns manufactured by the "J. Stevens Arms Company".
- "Springfield Arms Co." was a trade name used on revolvers and shotguns manufactured by the" Crescent Firearms Company".
- "Springfield Arms Co." was a manufacturer of percussion revolvers located in Springfield, Massachusetts, U.S.A. between 1851 and 1869.

Model

- manufactured from 1938 to approximately 1965.
- make information will be found marked on the top mid-barrel.
- features include: a plain round taper-barreled, equipped with a birch, one piece pistol grip stock with rubber butt plate (early models may have black tip forend), sporting front sight (early models may have gold bead front sight) and an open rear sight with step elevator, sliding top-tang thumb safety, operates as a semi-automatic only with 22 LR ammunition, pressing the cross bolt to the left locks the action and adapts it to a manual straight-pull action or single shot, receiver is grooved for scope mounting.
- same as Stevens 87 with minor detail modifications.

Manufacturer

- "SAVAGE ARMS WESTFIELD, MASS. U.S.A." or a variation thereof will be found marked on the firearm.

Action

- blow-back operated.

Shots

- fixed underbarrel tubular magazine.

Remarks

- Operates as a semi-automatic with 22 LR only. Pressing the cross bolt to the left locks the action, adapts the rifle for use as a bolt action or single shot. Has a tube type magazine mounted under the barrel and a thumb safety at the rear of the receiver. Walnut finished one piece pistol grip stock with rubber butt plate (early models may have black tip forend). Sporting front sight (early models may have gold bead front sight) and an open rear sight with step elevator. Receiver grooved for scope mounting. Has a round tapered barrel. same as Stevens 87 with possible internal and/or external modifications.

FRT Report

Firearm Reference Number (FRN): 124966
Make: Springfield
Model: 1871 Ward Burton Patent Carbine

Summary

Make:	Springfield
Model:	1871 Ward Burton Patent Carbine
Manufacturer:	Springfield Armory
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
124966 - 1	50-70 GOVT	1	559	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make may be marked on the firearm.

Model

- manufactured from 1871 to 1872.
- approximately 316 units manufactured.
- model designation "WARD BURTON CARBINE" over "BARREL" over "M" over "1871" was observed marked on top of the barrel and "WARD BURTON PATENT" over "DEC. 20, 1859, FEB. 21, 1871" was observed marked on top of the bolt body.
- this was the first bolt operated rifle manufactured by Springfield Armory.
- approved for field trials in 1870, following the trials (1871) it was concluded that since the design incorporated a "cock on closing" feature, the lack of a cocking indicator or side hammer led the firearm to be rejected.
- features include: round barrel; one barrel band; folding adjustable rear sight and fixed front sight; the bolt consists of a cock on closing striker mechanism, a bolt sleeve with rear mounted interrupted thread locking lugs, a separate bolt head including the extractor and ejector; manual thumb safety located on the right side of the receiver/frame; single trigger; no cleaning rod; sling bar located on the left side of the plain, one piece, straight stock.
- rifle designed for a socket style bayonet.
- similar to the rifle version that features a 826mm (32.5") barrel and two barrel bands.

Action

- turn-bolt design.

2477 - 1	45-70 GOVT	1	559	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make appears on the lockplate.

Model

- the model designation appears on the breechblock as "1873".
- approximately 75,000 Springfield Model 1873 Rifles and Carbines were manufactured between 1873 and 1876.
- Springfield Model 1873 Carbine production is estimated at 20,028.
- the Springfield Model 1873 Carbine is a slightly modified version of the Model 1870 Carbine, chambered for the "newly developed" calibre 45-70 GOVT calibre cartridge.
- this firearm is a breech loading rifle using the Allin, hinged, forward pivoting breechblock system. This firearm is not a conversion of an earlier manufactured muzzle loading firearm.
- features include: newly manufactured receiver/frame, the stock had no provision for a butt trap and has a single barrel band.

Manufacturer

- arsenal name appears on the lockplate.

Action

- side hammer, hinged, forward pivoting breechblock system, single shot firearm.

Serial Number

- the serial number appears on the receiver/frame.
- serial number rationalization as follows: consecutively numbered from 1 to 75,000.
- all variations and sub-models of the 1873 Carbine have serial numbers which fall within the indicated number range.

Other Markings

- the left side of the stock may have a "cartouche" stamping of "ESA" these initials are the initials of Master Armorer Erskine S Allin.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- this firearm is a breech loading, side hammer carbine using the Allin, hinged, forward pivoting breechblock system. It differs from the Model 1873 Rifle by having a considerably shorter barrel, half stock forearm, one barrel band and carbine sling bar and ring on left side of stock.

Notes

Make

- "U.S." and "Springfield" are marked on the lockplate.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".
- "Musket" is a term that originally applied to a smooth bore long gun, later the term was applied to the infantryman's shoulder controlled long gun. The musket had a long fore-end and may have been equipped with a bayonet and a front and rear sight.

Model

- "U.S. MODEL 1873" in three lines is marked on the breechblock.
- "U.S. SPRINGFIELD 1873" in three lines may be marked on the lock plate.
- this was a side hammer, breech loading rifle converted to a shotgun using the Allin, hinged, forward pivoting breechblock system.
- features include: casehardned breech block; blued round barrel; hi brass bead front sight;forend fasten to barrel by screw on underside, no barrel band; sling swivell on trigger guard.

Action

- side hammer, hinged, forward pivoting breechblock system, single shot firearm.

Serial Number

- serial number appears on the receiver/frame.
- observed specimen had six numbers.

2480 - 1	45-70 GOVT	1	749	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make	- the make appears on the lockplate.
Model	- the designation Model 1877 is one of convenience to cover a series of modifications between the 1873 and 1877 on Springfield Rifles and Carbines. No markings on the firearm indicate Model 1877 but the breechblock bears the misleading "Model 1873". The serial number and barrel length determines this model.
Manufacturer	- arsenal name appears on the lockplate.
Serial Number	- serial number appears on receiver. All versions and models of the 1877 have serial numbers which fall into the number range indicated. If serial number is larger than 100,000 see models 1879-1880.
Other Markings	- breech block bears model designation 1873 (see Model Notes).
Remarks	- the Springfield Model 1877 Cadet Rifle is a slightly modified version of the original Model 1873 Cadet Rifle differing in relatively minor details such as the breechblock arch.

Notes

Make

- the make appears on the lockplate.

Model

- the model designation appears on the breechblock as "1873".
- Springfield Model 1877 Carbine production is estimated at 19,881.
- the Springfield Model 1877 Carbine is a slightly modified version of the Model 1873 Carbine, produced between 1877 and 1881.
- this firearm is a side hammer, breech loading rifle using the Allin, hinged, forward pivoting breechblock system. This firearm is not a conversion of an earlier manufactured muzzle loading firearm.
- features include: strengthened butt stock (the Model 1873 Carbine had a distressing habit of breaking at the wrist of the butt stock), the stock had a hinged butt trap and the firearm has a single barrel band.

Manufacturer

- arsenal name appears on the lockplate.

Action

- side hammer, hinged, forward pivoting breechblock system, single shot firearm.

Serial Number

- the serial number appears on receiver.
- all versions and models of the Springfield 1877 Carbine have serial numbers which fall into the serial number range of 75,000 to 183,0000.

Other Markings

- breech block bears model designation 1873 (see Model Notes).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- the designation Model 1877 is one of convenience to cover a series of modifications between the 1873 and 1879 on Springfield Rifles and Carbines. No markings on the firearm indicate Model 1877 but the breechblock bears the misleading "Model 1873". The serial number and barrel length that determines this model.
- the Springfield Model 1877 Carbine is a slightly modified version of the original Model 1873 Carbine differing in relatively minor details such as breechblock and length of comb of the buttstock.

Notes

Make

- the make is marked on the lockplate.

Model

- the Springfield Model 1879 Cadet Rifle is a slightly modified version of the Model 1877 Rifle differing primarily by having a wider and thicker receiver. These modifications were introduced between 1877 and 1879 on Springfield Rifles and Carbines.
- model is not marked on the firearm.
- approximately 5,000 made.
- features include: two-piece trigger guard; single stacking swivel, Buckhorn rear sight and blue finish with colour casehardened breechblock and tang.
- a 1879 Carbine version with a shorter barrel and 1879 Rifle version with a longer barrel was also made.

Manufacturer

- arsenal name is marked on the lockplate.

Serial Number

- the serial number is marked on the receiver/frame. All versions and models of the 1879 have serial numbers which fall into the range from 100,000 to 154,000 and 158,000 to 280,000.
- if the serial number is between 154,000 and 158,000, refer to Model 1880.

Other Markings

- the breech block bears the markings U.S./MODEL/1873.

2485 - 1	45-70 GOVT	1	829	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is marked on the lockplate.

Model

- the Springfield Model 1879 Rifle is a slightly modified version of the Model 1877 Rifle differing primarily by having a wider and thicker receiver. These modifications were introduced between 1877 and 1879 on Springfield Rifles and Carbines.
- model is not marked on the firearm.
- approximately 140,000 made.
- features include: two-piece trigger guard; sling swivels and stacking swivels, Buckhorn rear sight and blue finish with colour casehardened breechblock and tang.
- a 1879 Carbine version and 1879 Cadet version was also made, both having a shorter barrel.

Manufacturer

- arsenal name is marked on the lockplate.

Serial Number

- the serial number is marked on the receiver/frame. All versions and models of the 1879 have serial numbers which fall into the range from 100,000 to 154,000 and 158,000 to 280,000.
- if the serial number is between 154,000 and 158,000, refer to Model 1880.

Other Markings

- the breech block bears the markings U.S./MODEL/1873.

Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
2486 - 1	45-70 GOVT	1	826	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make	- the make appears on the lockplate.
Model	- the model designation does not appear on the firearm, however the breechblock bears the inscription "Model 1873". Note that it is the serial number and barrel length that determines this model.
Manufacturer	- arsenal name appears on the lockplate.
Serial Number	- the serial number appears on the receiver/frame.
Remarks	- this rifle incorporates virtually all the improvements and modifications found on the Model 1879 and the most outstanding difference between this model and the Model 1879 is the presence of a combination ramrod/bayonet. This model was made in limited numbers for feasibility trials by the U.S. Army.

Notes

Make

- "SPRINGFIELD" is marked on the top of the barrel.
- "Springfield" was a trade name used on firearms manufactured by the Savage Arms Company and the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on rifles and shotguns manufactured by the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on revolvers and shotguns manufactured by the Crescent Firearms Company.
- "Springfield Arms Co." was a manufacturer of percussion revolvers located in Springfield, Massachusetts, U.S.A. between 1851 and 1869.

Model

- features include: one piece semi-pistol grip walnut stock; top tang safety; blued barrel; leaf-type adjustable rear sights; grooved receiver/frame.

Manufacturer

- "Savage Arms Corporation" or a variation thereof is marked on the firearm.

Action

- blow-back operated.
- operates as a semi-automatic with 22 LR or high speed cartridges only.
- moving the cross bolt to the left locks the action and adapts the rifle for use as a bolt action or single shot.

Shots

- fixed underbarrel tube magazine.

Remarks

- operates as a semi-automatic with 22 LR only. Pressing the cross bolt to the left locks the action, adapts the rifle for use as a bolt action or single shot. Has a tube type magazine mounted under the barrel and a thumb safety at the rear of the receiver/frame. Walnut finished one piece pistol grip stock with rubber butt plate (early models may have black tip forend). Sporting front sight (early models may have gold bead front sight) and an open rear sight with step elevator. Receiver/frame grooved for scope mounting. Has a round tapered barrel. Similar to the Springfield model 187 with minor internal and/or external modifications.

Notes

Make

- the make appears on the lockplate.

Model

- "1881" appears on the breechblock.
- "U.S.", "SPRINGFIELD" and "1873" are be marked on the lock plate.
- approximately 1,376 Springfield Model 1881 Shotguns were manufactured between 1880 and 1883.
- the Springfield Model 1881 Shotgun is a slightly modified version of the Springfield Trapdoor Rifle or Carbine, chambered for the 20 GA shotgun cartridge.
- this firearm is a side hammer, breech loading shotgun using the Allin, hinged, forward pivoting breechblock system.
- this firearm is manufactured utilizing parts from condemned Rifles and Carbines or earlier manufactured muzzle loading firearms.
- there is a considerable variation between individual firarms.

Manufacturer

- arsenal name appears on the lockplate.

Action

- side hammer, hinged, forward pivoting breechblock system, single shot firearm.

Serial Number

- the serial number appears on the receiver/frame.
- serial number rationalization as follows: consecutively numbered from 1 to 1,376.

Remarks

- this firearm is an arsenal produced shotgun based on the Springfirld Model 1879 Rifle. It incorporates virtually all of the improvements and modifications found on the Springfield Model 1879 except that it is a half stocked shotgun with bead front sight and no provision for sling swivels.

Notes

Make

- "US - SPRINGFIELD - 1884" is marked on the top of the left side of the receiver/frame.
- these rifles were manufactured at the Springfield Armory in 1884 for testing against Hotchkiss and Lee rifles, as possible replacements for the Springfield 1873 "Trap-Door".

Model

- "US - SPRINGFIELD - 1884" is marked on the top of the left side of the receiver/frame; "Chaffee-Reese Magazine Rifle" is not marked on the firearm.
- this is a rifle adopted for limited testing by the US Army in 1882, but which were not manufactured until 1884 by Springfield Armory, because a private contractor could not be found to manufacture them (unliike the Hotchkiss and Lee rifles which it was intended to be tested against).
- this rifle was designed by Reuben Chaffee in 1879 and advanced largely by General James Reese, leading to the design being known as the "Chafee-Reese".
- this rifle was offered as a replacement for the then-issue 1873 "Trap-Door" rifle, with 753 being made by Springfield Armory. Testing was unsuccessful, and these rifles were sold as surplus.
- features include: blued finish; adjustable open sights; long straight-grip walnut stock with two barrel bands; a magazine cut-off on the right side of the receiver/frame; a Gras-style bolt handle; sling swivels; a cocking-piece at the rear of the bolt; and a 5-round magazine tube in the butt, loaded through a trap-door.

Manufacturer

- "US - SPRINGFIELD - 1884" is marked on the top of the left side of the receiver/frame.
- these rifles were manufactured at the Springfield Armory in 1884 for testing against Hotchkiss and Lee rifles, as possible replacements for the Springfield 1873 "Trap-Door".

Action

- turn bolt design.

Shots

- tubular magazine in butt.

Firearm Reference Number (FRN): 2456
Make: Springfield
Model: 30 Calibre Experimental Rifle

Summary

Make:	Springfield
Model:	30 Calibre Experimental Rifle
Manufacturer:	Springfield Armory
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
2456 - 1	30-40 KRAG	1	829	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make	- the make appears on the lockplate.
Model	- the model designation does not appear on the firearm, breechblock may be marked "Model 1888".
Manufacturer	- arsenal name appears on the lockplate.
Calibre	- possibly some of these rifles are chambered for variations of the 30-40 KRAG cartridge
Remarks	- This rifle was manufactured to test .30 calibre smokeless powder ammunition. It utilises the "positive cam" hinged, forward pivoting breechblock action of the Springfield Experimental Rifle Model 1888. Very small quantity of these rifles manufactured (15).

Model:	57
Manufacturer:	Savage
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
31563 - 1	22 LR	5	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
31563 - 2	22 LR	10	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SPRINGFIELD" is marked on the firearm.
- "Springfield" was a trade name used on firearms manufactured by the Savage Arms Corporation and the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on rifles and shotguns manufactured by the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on revolvers and shotguns manufactured by the Crescent Firearms Company.
- "Springfield Arms Co." was a manufacturer of percussion revolvers located in Springfield, Massachusetts, U.S.A. between 1851 and 1869.

Model

- manufactured circa 1940.

Remarks

- Semi automatic, take-down with chrome molydenum allow steel in high shock parts and thumb operated slide safety at the right rear of the receiver. Pressing the bolt to the left locks the action for use as a single shot or repeater. Has a removable box magazine and a vented ejection port on the left side of the receiver. Stock is one piece military style walnut finished with full pistol grip, large take-down screw, cheek piece and rubber butt plate. Gold bead front sight and a sporting rear sight with windage and elevation adjustments. Drilled and tapped for Weaver telescope sights. Has a tapered round barrel. Same as Stevens 85 with some possible internal and/or external modifications.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "SPRINGFIELD MODEL 840" is marked on the left rear side of the receiver/frame or barrel.
- features a streamlined walnut stock, fluted comb, full pistol grip and a corrugated butt plate.
- the bolt features a locking lug with gas vent holes that match twin gas ports in receiver/frame.
- sliding thumb safety located at the right rear of the receiver/frame, which locks the bolt when in the closed position.
- gold bead front sight on a ramp and a rear sight with a sliding elevator.
- receiver/frame drilled and tapped for side mounted scope.
- this model ressembles the model 840, and Savage 340 in all respects, except for minor internal/external changes.
-NOTE: when sold with a telescopic sight, this model is known as the 840T.
- in 222 REM calibre the 840T-1.
- in 30-30 WIN calibre the 840T-2

Manufacturer

- "Savage Arms Corporation" or a variation thereof marked on rear of barrel.

Action

- manually operated, bolt action repeating rifle.

Serial Number

- 6 digits, found on right side of frame.
- early models may have no serial number.

Calibre

- "PROOF TESTED CAL XXXXX" marked on the left rear side of barrel.

Shots

- detachable box magazine.

Remarks

- Streamlined walnut stock, fluted comb, full pistol grip (white line pistol grip cap in later models) and a corrugated butt plate. Pistol grip and forend are checkered. Action cocks on opening and locking lug with gas vent holes that match twin gas ports in receiver. Slide thumb safety located at the right rear of the receiver and has a detachable box magazine. Has a gold bead front sight on a ramp (hooded removable front sight in later models) and a folding rear sight with screw or sliding elevator. Receiver drilled and tapped for a scope. Same as the Stevens 322 with possible internal and/or external modifications.

FRT Report

Firearm Reference Number (FRN): 4428
Make: Springfield
Model: 87

Summary

Make:	Springfield
Model:	87
Manufacturer:	Stevens
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
4428 - 1	22 LR	15	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SPRINGFIELD" is marked on the top of the barrel.
- "Springfield" was a trade name used on firearms manufactured by the Savage Arms Company and the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on rifles and shotguns manufactured by the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on revolvers and shotguns manufactured by the Crescent Firearms Company.
- "Springfield Arms Co." was a manufacturer of percussion revolvers located in Springfield, Massachusetts, U.S.A. between 1851 and 1869.

Model

- "MODEL 87" is usually marked on the barrel.
- manufactured from 1938 to 1948.
- this model became the "Stevens 87" in 1948.
- features include: semi-automatic action; take-down; chrome molydenum alloy steel in high shock parts; thumb operated slide safety at the right rear of the receiver/frame; pressing the bolt to the left locks the action for use as a single shot or repeater; tubular magazine mounted under the barrel; vented ejection port on the left sife of the receiver/frame; stock is one piece military style walnut finished with full pistol grip, large take down screw, fluted comb and rubber butt plate; gold bead front sight and sporting rear sight with windage and elevation adjustments; receiver/frame is drilled and tapped for telescope mount; round tapered barrel.

Manufacturer

- "J. Stevens Arms Company" is marked on the firearm.

Action

- blowback operated.

Serial Number

- observed sample was not marked with a serial number.
- "2094577 PATENTS 2224758" over "2223093 RE22585 2271576" may be marked on the right side of the barrel, these numbers are patent numbers only and are not serial numbers.

Calibre

- the calibre is marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - tubular magazine mounted under the barrel.

Summary

Make:	Springfield
Model:	87A
Manufacturer:	Savage
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
65526 - 2	22 LR	1	150	Prohibited CC 84(1) "prohibited firearm" para. (b)	Non-Commercial Customization	
65526 - 1	22 LR	15	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SPRINGFIELD" is marked on the firearm.
- "Springfield" was a trade name used on firearms manufactured by the Savage Arms Corporation and the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on rifles and shotguns manufactured by the J. Stevens Arms Company.
- "Springfield Arms Co." was a trade name used on revolvers and shotguns manufactured by the Crescent Firearms Company.
- "Springfield Arms Co." was a manufacturer of percussion revolvers located in Springfield, Massachusetts, U.S.A. between 1851 and 1869.

Model

- "Mod 87A" marked on barrel or receiver.
- tubular magazine, mounted under the barrel.
- safety located right side of receiver.
- straight bolt handle is located on the right side of the action.
- will function either as a manually operated bolt action repeating firearm or as a blow-back, semi-automatic repeating firearm depending on how the bolt handle is "set"; when the bolt handle is pulled out to the right as far as it will go, the action will perform in a semi-automatic mode - note: bolt handle reciprocates with the bolt; when bolt handle is pressed to the left as far as it will go, the firearm will function as a straight-pull bolt-action repeater.
- one piece hardwood stock.

Calibre

- left side of barrel marked "CAL 22 LONG RIFLE SMOKELESS GREASED ONLY".

Shots

- under-barrel tubular magazine.
- firearm will function with 22 Short, 22 Long and 22 LR cartridges.

Notes

Make

- "Springfield" is marked on the firearm.
- "Springfield" is a tradename used on firearms imported by Traditions from Spain and sold by Bass Pro Shops of Springfield, Missouri, U.S.A.

Model

- "Springfield" and "Hawken" and "Made in Spain" are marked on the barrel/receiver/frame.
- introduced in 1996.
- this is a single shot muzzle loaded black powder percussion rifle.
- features include: octagonal barrel with dovetailed front and rear sight; case hardened side plate with side mounted external hammer; one piece hard wood stock with brass trigger guard with finger grip, butt plate and forend tip; wood ram rod.
- this firearm leaves the factory in the form of a kit and it is possible to find different finishes on the octagonal barrel and on the hardwood stock.

Manufacturer

- "Ardesa Spain" or the "Ardesa" company logo is not marked on the barrel.
- Ardesa was established in the 1980s.
- Ardesa is a manufacturer located in Vizcaya, Spain.
- Ardesa specializes in producing black powder / muzzle-loading firearms.

Serial Number

- serial number is marked on the receiver/frame/barrel.
- Spanish firearms manufactured pre-1995, the serial number consisted of numbers with or without a letter prefix or suffix.
- Spanish firearms manufactured post-1994, the serial number consists of a two number gunmaker's/manufacture's code, a dash (-), a two number weapon's code, a dash (-), six numbers, a dash (-) and a two number year of production code. example: 14-13-087250-02.

Notes

Make

- "SPRINGFIELD ARMORY" is marked on the right side of the slide.

Model

- introduced in 1994.
- model designation is not marked on the firearm.
- this is a competition version of Springfield Inc.'s "1911-A1" produced by their custom shop.
- features include: blued finish; custom fitted match barrel and bushing; match trigger; custom spur hammer; standard grip safety; undercut front and adjustable BO-MAR rear sights; tuned extractor; beveled magazine well; diamond checkered walnut grips.

Manufacturer

- the manufacturer's designation is marked on the right side of the receiver/frame as "SPRINGFIELD ARMORY / GENESEO IL USA" in two lines.
- additionally, the underside of the forward portion of the receiver/frame or the right hand side forward of the trigger may be marked "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL".
- firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).

Action

- recoil operated.

Serial Number

- the serial number (usually one or two letters and six numbers) is located on the right side of the receiver/frame above the trigger.
- serial number rationalization unknown.

Calibre

- other calibres available as per customer request.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine.
Other Markings	- the Springfield Armory crest (crossed cannons within a circle) and "SPRINGFIELD" over "Custom" (in script) is marked on the right side of the slide. - "SPRINGFIELD" over "GENESEO IL. U.S.A." is marked on the right side of the receiver/frame above the trigger.
Remarks	- the manufacturer should not be confused with the original SPRINGFIELD ARMORY (the first U.S. Government Arsenal, started in 1790, officially opened in 1795, terminated production in 1968, and closed in 1975) which was located at Springfield Massachusetts. - these firearms by Springfield Inc. are usually marked 1911-A1 (with a hyphen), whereas the model produced for the U.S. Government by various manufacturers is usually marked 1911A1 (no hyphen).

Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	BRAZIL
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
125859 - 1	45 AUTO	7	102	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- marked on the right side of the slide: SPRINGFIELD ARMORY

Model

- usually marked "Champion" on the slide, sample noted did not have "1911-A1" markings.
- this is a shortened version of Springfield's "1911-A1"; it has a full-size grip and foreshortened receiver/frame, coupled with a shortened slide and barrel; three dot high-visibility fixed sights, skeletonized or round hammer, bevelled magazine well, lowered and flared ejection port, checkered walnut or black plastic grip panels.
- it is available in Parkerized, blued or stainless finish.
- available in 2005 with an "OD Green/Black Armory Kote" finish and a titanium firing pin.
- the basic "1911-A1 Champion" is available in several variants that include a compensated barrel, a "Mil Spec" finish or are "Super Tuned" by the factory.
- this firearm is of current manufacture by Springfield Inc. based on the U.S. Government model 1911A1 pistol, as initially produced by COLT.

Manufacturer

- the manufacturer's designation is marked on the right side of the receiver/frame as "SPRINGFIELD ARMORY / GENESEO IL USA" in two lines.
- additionally, the underside of the forward portion of the receiver/frame or the right hand side forward of the trigger may be marked "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL".
- firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).

Action

- recoil operated.

Serial Number

- the serial number, usually one or two letters and six numerals, is located on the right side of the receiver/frame above the trigger, immediately below the marking: SPRINGFIELD ARMORY GENESEO IL USA.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - marked with the Springfield Armory crest (crossed cannons within a circle) on the right side of the slide.

Notes

Make

- this firearm is marked on the right side of the slide: SPRINGFIELD ARMORY

Model

- this model has a foreshortened and reduced height grip-frame, coupled with a short slide and barrel, military style burr hammer or light weight hammer, grip safety, three-dot high-visibility combat sights and diamond-checkered wood grips or Hogue's wrap-around grips.
- this model is supplied with a blued finish.
- this firearm is manufactured by Springfield Inc. and is based on the U.S. Government model 1911A1 pistol, as initially produced by COLT.
- these firearms by Springfield Inc. are usually marked 1911-A1 (with a hyphen); whereas the model produced for the U.S. Government by various manufacturers is usually marked 1911A1 (no hyphen).

Manufacturer

- the manufacturer's designation is marked on the right side of the receiver/frame as "SPRINGFIELD ARMORY / GENESEO IL USA" in two lines.
- additionally, the underside of the forward portion of the receiver/frame or the right hand side forward of the trigger may be marked "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL".
- firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).

Action

- recoil operated.

Serial Number

- the serial number may consist of the letters "NMC" or "LW" followed by 5-6 digits and is located on the right side of receiver/frame above trigger, immediately below the marking: SPRINGFIELD ARMORY GENESEO IL USA.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre is marked on the top of the barrel.
Shots	- detachable box magazine.
Other Markings	- marked with the Springfield Armory crest (crossed cannons within a circle) on the right side of the slide. - marked on the right side of the receiver above the trigger: SPRINGFIELD GENESEO IL. U.S.A. - may have "NIGHT .45" and a crescent moon marked on the left side of the slide.
Remarks	- the manufacturer should not be confused with the original SPRINGFIELD ARMORY (the first U.S. Government Arsenal, started in 1790, officially opened in 1795, terminated production in 1968, and closed in 1975) which was located at Springfield Massachusetts. - these firearms by Springfield Inc. are usually marked 1911-A1 (with a hyphen), whereas the model produced for the U.S. Government by various manufacturers is usually marked 1911A1 (no hyphen).

Country of Manufacturer:	BRAZIL
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
22236 - 1	45 AUTO	7	114	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- this firearm is marked on the right side of the slide: SPRINGFIELD ARMORY
Model	- this is a short light-weight version of Springfield's 1911-A1, with a shortened and reduced grip-height receiver, coupled with a short slide and barrel with an integral coned-barrel and single-port compensator. - it also features an extended recoil spring guide-rod, military-style burr hammer, 3-dot high-visibility fixed sights, grip safety, and diamond checkered walnut grip panels. - this model is supplied with a blued finish. - these firearms by Springfield Inc. are usually marked 1911-A1 (with a hyphen); whereas the model produced for the U.S. Government by various manufacturers is usually marked 1911A1 (no hyphen).
Manufacturer	- the manufacturer's designation is marked on the right side of the receiver/frame as "SPRINGFIELD ARMORY / GENESEO IL USA" in two lines. - additionally, the underside of the forward portion of the receiver/frame or the right hand side forward of the trigger may be marked "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL". - firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).
Action	- recoil operation based on the Browning system.
Serial Number	- the serial number (usually one or two letters and six numerals), is located on the right side of receiver above trigger, immediately below the marking: SPRINGFIELD ARMORY GENESEO IL USA. - serial number rationalization unknown.
Shots	- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- marked with the Springfield Armory crest (crossed cannons within a circle) on the right side of the slide.
- marked on the right side of the receiver above the trigger: SPRINGFIELD GENESEO IL. U.S.A.

Action:	Semi-Automatic
Country of Manufacturer:	BRAZIL
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
43466 - 1	45 AUTO	7	127	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SPRINGFIELD ARMORY" is marked on the right side of the slide.

Model

- model designation is not marked on the firearm.
- this is a single stack version of Springfield's "1911-A1" built for the IPSC Limited competition.
- features include: National Match receiver/frame; slide with forward and rear cocking serrations; custom fitted match-grade barrel; fitted "Speed" trigger; skeletonized match hammer and sear; lowered and flared ejection port; low mount BoMar adjustable rear target sight and a serrated low mounted front sight; beavertail grip safety; extended ambidextrous thumb safety; checkered extended magazine release; flat main-spring housing, checkered front grip-strap and trigger guard; diamond checkered walnut grip panels; chrome finish.

Manufacturer

- the manufacturer's designation is marked on the right side of the receiver/frame as "SPRINGFIELD ARMORY / GENESEO IL USA" in two lines.
- additionally, the underside of the forward portion of the receiver/frame or the right hand side forward of the trigger may be marked "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL".
- firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).

Action

- recoil operated.

Serial Number

- the serial number (usually one or two letters and six numbers) is located on the right side of the receiver/frame above the trigger.
- serial number rationalization unknown.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- the Springfield Armory crest (crossed cannons within a circle) and "SPRINGFIELD" over "Custom" (in script) is marked on the right side of the slide.
- "SPRINGFIELD" over "GENESEO IL. U.S.A." is marked on the right side of the receiver/frame above the trigger.

Remarks

- the manufacturer should not be confused with the original SPRINGFIELD ARMORY (the first U.S. Government Arsenal, started in 1790, officially opened in 1795, terminated production in 1968, and closed in 1975) which was located at Springfield Massachusetts.
- these firearms by Springfield Inc. are usually marked 1911-A1 (with a hyphen), whereas the model produced for the U.S. Government by various manufacturers is usually marked 1911A1 (no hyphen).

Notes

Make

- marked on the right side of the slide "SPRINGFIELD ARMORY".

Model

- marked on the left side of the slide "GULF VICTORY SERIES".
- this is a Commercial Commemorative version of Springfield Inc.'s "1911-A1", manufactured during 1991 and 1992 .
- the "Gulf Victory Series" firearm has a military-style spur hammer, fixed sights, checkered walnut grips, and gold-plated trigger, hammer, and magazine release.
- it featured "Presentation Grade" bluing, and gold etched sample representations of an outline map of Iraq, military fighting vehicles and vessels on the left side of the slide; aircraft on the top; and on the right side of the slide, a representation of an installation under air attack with the words DESERT STORM.
- this firearm was manufactured during 1991 and 1992 by Springfield Inc., and is based on the U.S. Government model 1911A1 pistol, as initially produced by COLT.
- these firearms by Springfield Inc. are usually marked 1911-A1 (with a hyphen), whereas the model produced for the U.S. Government by various manufacturers is usually marked 1911A1 (no hyphen).

Manufacturer

- the manufacturer's designation is marked on the right side of the receiver/frame as "SPRINGFIELD ARMORY / GENESEO IL USA" in two lines.
- additionally, the underside of the forward portion of the receiver/frame or the right hand side forward of the trigger may be marked "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL".
- firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).

Action

- recoil operation based on the Browning system.

Serial Number

- the serial number (usually one or two letters and six numerals), is located on the right side of frame above trigger, immediately below the marking: SPRINGFIELD ARMORY GENESEO IL USA.
- serial number rationalization unknown.
- observed serial number with " DS " prefix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine.
Other Markings	- marked with the Springfield Armory crest (crossed cannons within a circle) on the right side of the slide. - marked on the right side of the frame above the trigger: SPRINGFIELD GENESEO IL. U.S.A.

Notes

Make

- the "SPRINGFIELD ARMORY" logo and trade name are usually marked on the right side of the slide.
- "SPRINGFIELD ARMORY" over "GENESEO IL USA" is marked on the right side of the receiver/frame.

Model

- "1911-A1 Leatham Legend TGO1" is not marked on the firearm.
- "Rob Leatham" name may be laser engraved into the grip plates, "RL" for Rob Leatham is marked on the right rear side of the slide and is the prefix in the serial number, "LEGEND SERIES" and "TGO" are marked on the left side of the slide.
- this model is the highest quality pistol that Springfield Armory offers in the Leatham Legend series. This series was designed by four time world champion (as of 2003) shooter Rob Leatham. The features of each pistol determine the actual model within the 1911-A1 Leatham Legend series.
- TGO1: features include a forged steel receiver/frame with a Robar Industries NP-3 nickel/teflon finish; forged slide with a Robar Industries Roguard black finish and rear cocking serrations; low mount BoMar adjustable rear sight with a Dawson fibre optic front sight; national match lightweight adjustable trigger; Smith & Alexander hand checkered flat mainspring housing with magazine well; hand checkered, 20lpi frontstrap; Nowlin match grade bushing and throated barrel; titanium firing pin; ambidextrous safety lever; High-Hand beavertail grip safety; Carry-Bevel treatment (all sharp edges removed); two-piece stainless steel, full length guide rod; lowered and flared ejection port; extended ejector; extended magazine release; unique "Legend" markings and serial number; two sets of grips, one of black Macarta double diamond grips and a Leatham Legend signature laser engraved thin Cocobola smooth wood set.
- TGO2: is a standard production model that shares the same basic features but uses a Springfield Armory wide mouth magazine well, a flat ILS (Integral Locking System) mainspring housing, a standard match grade barrel, a loaded chamber indicator and front and rear cocking serrations on the slide.
- TGO3: uses a lightweight, forged aluminum receiver/frame, stainless steel slide with front and rear cocking serrations and a Springfield Armory rear sight.

Manufacturer

- the manufacturer's designation is marked on the right side of the receiver/frame as "SPRINGFIELD ARMORY / GENESEO IL USA" in two lines.
- additionally, the underside of the forward portion of the receiver/frame or the right hand side forward of the trigger may be marked "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL".
- firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number is marked on the right side of the receiver/frame. - observed serial number had a letter prefix of "RL" followed by five sequential numbers.
Calibre	- marked on the left side of the slide.
Shots	- detachable box magazine. - aftermarket magazines are available with increased shot capacity.

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
194142 - 1	45 AUTO	7	140	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- marked on the right side of the slide.

Model

- "SILENT OPERATOR" over "MASTER CLASS" is marked on the left side of the slide.
- a logo consisting of a "diamond" over a stylized "M", above the word "MASTER", is marked both sides of the slide.
- "1911-A1" is not marked on the firearm.
- this is a variant of the "Government 1911-A1" model" design originally manufactured by Colt, that has been adapted for use with a sound suppressor;
- features include: dovetailed front and rear night sights; round rifled barrel with threaded muzzle and thread protector; steel slide with front and rear serrations; lowered and flared ejection port; steel receiver/frame with round trigger guard and accessory rail; skeletonized trigger and hammer; slide lock, extended thumb safety and magazine release located on the left side of the receiver/frame; beavertail grip safety; checkered front strap and flat mainspring housing; synthetic grip panels; black or medium brown finish.
- overall length with 134mm (5.28") barrel is 236mm (9.3"); average weight with an empty magazine is 1.08kg (2 lbs. 6 oz).

Manufacturer

- "SPRINGFIELD INC" over "GENESEO IL USA" is marked on the right side of the receiver/frame.
- the underside of the forward portion of the receiver/frame or the right hand side forward of the trigger may be marked "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL".
- firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).

Action

- recoil operated.

Serial Number

- marked on the right side of the receiver/frame.
- observed serial number consisted of a two letter prefix (NM) followed by six numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre designation is marked on the barrel visible through the ejection port.
Shots	- detachable box magazine.

Notes

Make

- "SPRINGFIELD ARMORY" is marked on the right side of the slide and/or receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "OMEGA" is marked on the left side of the slide. - manufactured from 1987 to 1990. - replaced by the model "1911-A1 Omega Match" - features include; a 127mm or 152mm ported or unported barrel with polygonal rifling, slide-mounted sights, arched mainspring housing, long trigger, spur hammer, grip safety, bevelled magazine well mouth, and diamond-checkered grip panels. - this firearm is based on the U.S. Government model 1911A1 pistol, as initially produced by COLT. - those firearms by Springfield Inc. are usually marked "1911-A1" (with a hyphen); whereas the model produced for the U.S. Government by various manufacturers is usually marked "1911A1" (no hyphen).
Manufacturer	- the manufacturer's designation is marked on the right side of the receiver/frame as "SPRINGFIELD ARMORY / GENESEO IL USA" in two lines. - additionally, the underside of the forward portion of the receiver/frame or the right hand side forward of the trigger may be marked "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL". - firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).
Action	- recoil operated.
Serial Number	- the serial number (usually one or two letters and six numerals), is located on the right side of receiver above trigger, immediately below the marking: "SPRINGFIELD ARMORY GENESEO IL USA". - serial number rationalization unknown.
Shots	- detachable box magazine.
Other Markings	- marked with the Springfield Armory crest (crossed cannons within a circle) on the right side of the slide.

Notes

Make

- "SPRINGFIELD ARMORY" is marked on the right side of the slide.

Model

- model designation may be marked on the left side of the slide.
- "Springfield" over "Custom" is marked on the right side of the slide.
- this is a target version of Springfield's "1911-A1".
- features include: round rifled barrel; dovetail front sight mounted on the compensator; adjustable rear sight, blued slide with rear serrations; lowered and flared ejection port; magazine release button and slide release located on the left side of the receiver frame; ambidextrous thumb safety; skeletonized hammer; beavertail grip safety; ventilated trigger; checkered rubber mainspring housing; wrap-around rubber grips; two-tone finish.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "SPRINGFIELD ARMORY" over "GENESEO IL USA" or "SPRINGFIELD" over "COLONA IL USA" is marked on the right side of the receiver/frame. - "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL" may be marked on the underside of the forward portion of the receiver/frame, the right side forward of the trigger or under the grip plate. - firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).
Action	- recoil operated.
Serial Number	- the serial number is marked on the receiver/frame. - observed serial number consisted of a two letter prefix (NM) followed by six numbers.
Calibre	- calibre designation is usually marked on the barrel visible through the ejection port and may be marked the left side of the slide.
Shots	- detachable box magazine.
Other Markings	- marked with the Springfield Armory crest (crossed cannons within a circle) on the right side of the slide. - marked on the right side of the frame above the trigger: SPRINGFIELD GENESEO IL. U.S.A.
Remarks	- the manufacturer should not be confused with the original SPRINGFIELD ARMORY (the first U.S. Government Arsenal, started in 1790, officially opened in 1795, terminated production in 1968, and closed in 1975) which was located at Springfield Massachusetts. - these firearms by Springfield Inc. are usually marked 1911-A1 (with a hyphen), whereas the model produced for the U.S. Government by various manufacturers is usually marked 1911A1 (no hyphen).

Notes

Make

- marked on the right side of the slide: SPRINGFIELD ARMORY

Model

- compact version of Springfield's High Capacity Standard.
- features include: receiver/frame with a widened magazine well and a "scallops" behind the trigger guard adjacent to the magazine well to allow improved access the trigger; and a foreshortened and reduced height grip-frame.
- a "loop"-style hammer; three dot high-visibility fixed sights; long trigger; beavertail grip safety; extended thumb safety and slide stop; beveled mouth magazine well; lowered and flared ejection port; and checkered walnut or plastic grip panels.
- available in Parkerized finish only.
- this firearm is of current manufacture by Springfield Inc. based on the U.S. Government model 1911A1 pistol, as initially produced by COLT.
- these firearms by Springfield Inc. are usually marked 1911-A1 (with a hyphen); whereas the model produced for the U.S. Government by various manufacturers is usually marked 1911A1 (no hyphen).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the manufacturer's designation is marked on the right side of the receiver/frame as "SPRINGFIELD ARMORY / GENESEO IL USA" in two lines. - additionally, the underside of the forward portion of the receiver/frame or the right hand side forward of the trigger may be marked "F I Brazil", "F I", "IMBEL BRAZIL" , "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL". - firearms in the 1911A1 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).
Action	- recoil operated.
Serial Number	- the serial number, usually one or two letters and six numerals, is located on the right side of the receiver/frame above the trigger.
Shots	- detachable box magazine.
Other Markings	- marked with the Springfield Armory crest (crossed cannons within a circle) on the right side of the slide.

Notes

Make

- "SPRINGFIELD ARMORY" is marked on the right side of the slide.
- The Springfield Armory logo is marked on the right side of the slide.

Model

- "Super" over "Tuned "and "V 10 ULTRA COMPACT" is marked on the left side of the slide.
- this is a "factory-customized" firearm with added features such as a ported slide and a (10 vent) ported barrel.
- the Ultra Compact V10 is a shortened, reduced height version of Springfield's "1911-A1".
- features include: fixed front sight with an adjustable rear sight; round rifled barrel; flat sided slide with right side lowered and flared ejection port and rear grasping serrations; skeletonized hammer and trigger; single action trigger mechanism; beavertail grip safety, extended thumb safety, slide and magazine release located on the left side of the receiver/frame; beveled magazine well, checkered front-strap, mainspring housing and wood grip panels; two-tone or stainless steel finish.
- overall length with a 89mm (3 1/2") barrel is 181mm (7 1/8"), average weight is 932.7g (32.9oz).

Manufacturer

- "SPRINGFIELD" over "GENESEO, IL, USA" is marked on the right side of the receiver/frame.
. "F I Brazil", "F I", "IMBEL BRAZIL", "BRAZIL", "ITAJUBA", or "MADE IN BRAZIL" may be marked on the right side of the receiver/frame forward of the trigger.
- firearms in the 1911A1 series of pistols sold under the Springfield Armory name and manufactured using slides and receiver/frames produced by Industria de Material Belico do Brasil (IMBEL).

Action

- recoil operated.

Serial Number

- serial number is marked on the right side of the receiver/frame above the trigger.
- serial number of a referenced example consisted of the letter (N) followed by six numbers.

Calibre

- calibre designation is marked on the left side of the slide.
- rifling characteristics: 1 turn in 16 inches, left hand twist.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.

Other Markings

- marked with the Springfield Armory crest (crossed cannons within a circle) on the right side of the slide.
- marked on the right side of the frame above the trigger: SPRINGFIELD GENESEO IL. U.S.A.

Remarks

- the manufacturer should not be confused with the original SPRINGFIELD ARMORY (the first U.S. Government Arsenal, started in 1790, officially opened in 1795, terminated production in 1968, and closed in 1975) which was located at Springfield Massachusetts.
- these firearms by Springfield Inc. are usually marked 1911-A1 (with a hyphen), whereas the model produced for the U.S. Government by various manufacturers is usually marked 1911A1 (no hyphen).

Notes

Make	- The company logo is marked on the firearm. - "Springfield Armory" is marked on the right side of the firearm.
Model	- "ECHELON" is marked on the left side of the firearm. - The Springfield Armory "Echelon" uses a steel fire control unit/trigger group assembly in its design. This assembly is considered to be the receiver/frame and therefore the serialized component. - Features include: front and rear slide serrations; fully ambidextrous magazine and slide lock releases; accessory rail below muzzle end of firearm; available in a variety of colors.
Manufacturer	- The company logo is marked on the firearm. - "HS PRODUKT" is marked on the left side of the firearm.
Action	- Recoil operated.
Serial Number	- The serial number is marked on the right side of the receiver/frame. - The serial number of referenced examples consisted of a two letter prefix followed by six digits.
Calibre	- The calibre designation is marked on the barrel, visible through the ejection port.
Shots	- Detachable box magazine housed in the grip.
Canadian Law Comments	- The Springfield Armory "Echelon" is a modular firearm. The modular design has a steel receiver/frame housed within a synthetic grip/body module. The receiver/frame is interchangeable with the different grip/body modules.

Notes

Make - this firearm is marked on the right side of the barrel mono-block: M6 Scout SPRINGFIELD ARMORY GENESEO, IL. U.S.A.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- this firearm is marked on the right side of the barrel mono-block: M6 Scout SPRINGFIELD ARMORY GENESEO, IL. U.S.A.
- this is a recently manufactured improved copy of a survival firearm originally built for the U.S. Air Force as the M6 Survival Rifle.
- it is a break-open over/under, with provision for carrying extra shells and cartridges under the flip-up cheek-piece on the butt-stock; other features include an all-weather trigger, and a folding stock that may be readily detached for storage; the firearm is drilled and tapped to permit scope mounting.
- the nose of the hammer must be set to fire the specific barrel (upper-rifle or lower-shotgun) and the hammer needs to be manually cocked to fire.
- the rifle barrel (upper) with flip-down rear-sight (shotgun/rifle) is available in either 22LR, 22 Magnum, or 22 Hornet; the shotgun barrel only comes in 410 gauge, however, flares in this caliber may be launched from this barrel.
- this firearm is available in stainless steel, or parkerized finish.

Manufacturer

- the firearm is manufactured under license by Ceska Zbrojovka; the manufacturer is also known as "CZ".
- the firm Springfield Armory Inc., was formed in 1974 (also refered to as "Springfield Armories") as a purely a commercial operation and manufactures quality firearms and parts, primarily in M1A rifles in semi-automatic only, the 1911A1 style pistols, and other military style firearms.
- since January 1993 this firm has been called Springfield Armory, Springfield Inc., after the rights to the name "Springfield Armory" was purchased from the U.S. Government.
- the manufacturer should not be confused with the original SPRINGFIELD ARMORY (the first U.S. Government Arsenal, started in 1790, officially opened in 1795, terminated production in 1968, and closed in 1975) which was located at Springfield Massachusetts.

Type

- this firearm is a combination gun with a rifle barrel over the shotgun barrel.

Action

- over/under pattern.

Serial Number

- on the receiver/frame.

Calibre

- marked on the respective barrel.

Shots

- rifle over-barrel, shotgun under-barrel.

FRT Report

Firearm Reference Number (FRN): 132996
Make: Springfield Armory
Model: M6 Survival

Summary

Make:	Springfield Armory
Model:	M6 Survival
Manufacturer:	Springfield Armory
Level:	Manufacturer Specifications and Commercial Customization
Type:	Combination Gun
Action:	Multi-Barrel
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
132996 - 1	22 LR/410 GA X 3"	2	464	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "SPRINGFIELD ARMORY" is marked on the rear right side of the receiver/frame.
- the Springfield Armory trademark symbol and "GENESEO, IL. U.S.A." are marked on the rear left side of the receiver/frame.
- the trademark symbol consists of a double line circle with two crossed cannons superimposed; "Springfield Armory 1974" is marked within the double line circle.

Model

- model name is marked on the rear right side of the receiver/frame as "M6 SURVIVAL".
- this is a product-improved copy of the original M6 Survival Rifle as originally made for the U.S. Air Force by the US Arsenal Springfield Armory.
- features; break-open over/under design with the rifle barrel over the shotgun barrel; has a provision for carrying extra shells and cartridges under the flip-up cheek-piece on the buttstock; all-weather lever-type trigger with trigger guard, however, earlier versions did not have a trigger guard; folding stock that may be readily detached for storage; no fore stock; firearm is drilled and tapped to permit scope mounting; a push-pull three position selector knob on the hammer sets which barrel will be fired and also incorporates a "safe" position; the hammer needs to be manually cocked to fire; grey/black parkerized finish.
- earlier versions were not equiped with the button, hammer block safety.

Manufacturer

- "SPRINGFIELD ARMORY" is marked on the rear right side of the receiver/frame.
- the Springfield Armory trademark symbol and "GENESEO, IL. U.S.A." are marked on the rear left side of the receiver/frame.
- the trademark symbol consists of a double line circle with two crossed cannons superimposed; "Springfield Armory 1974" is marked within the double line circle.

Action

- over/under barrel configuration.

Serial Number

- known example had the serial number marked on the rear right side of the receiver/frame.
- serial number had a letter prefix followed by five numbers.
- letter prefix "M" has been observed.

Calibre

- calibre designation is marked on the rear right side of the receiver/frame as, ".22 L.R./.410 SHOTGUN".

Notes

Make

- "SPRINGFIELD ARMORY" is marked on the identification plate on the housing assembly.

Model

- "GUN, 20MM, AUTOMATIC: M61A1" is marked on the identification plate on the housing assembly.
- "M61A1" is a Vulcan, Gatling type automatic canon, developed and manufactured by General Electric for the US Military.
- "M61A1" is a six (6), 20-mm barrels mounted on a geared rotor, driven by an electric motor. Firing only once per revolution.
- "M61A1" is primary use on aircraft and has land and sea variants.
- "M61A1" has a lighter version, known as the M61A2 which is mechanically the same as the M61A1, but with thinner barrels and has some metal replacement parts/components having lighter weight materials to reduce overall mass to 91.6 kg (202 lb).
- features include: six barrels in a circular arrangement with a muzzle clamp bracket and a mid-barrel clamp; housing cover covering the firearm rotor assembly; guide bar and indexing pin for the installation on different aircraft cradle; usually has an ammunition pod or drum which feeds linkless ammunition through a flexible feed chute.
- overall length with a 1524mm (60") barrel is 1.86 m (6 ft 1.4"), average weight is 102kg (255lbs).

Manufacturer

- General Electric developed and manufactured Gatlings, Vulcans and Miniguns for the US Military. These models were used in various helicopters, aircraft and naval vessels.
- "G.E. CO." is usually marked on the identification plate on the housing assembly.

Action

- external electric motor or hydraulic unit powered.

Serial Number

- serial number is marked on the identification plate on the housing assembly.
- serial number of a referenced example consisted of five numbers.

Calibre

- "20MM" is marked on the identification plate on the housing assembly.
- 20x102 ammunition are electrically primed.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- link or linkless feeding system.
- "M61A1" rate of fire is 4000 to 6000 rounds.

Notes

Make

- Maker's name will be marked on the rear right side of the receiver/frame as, "SPRINGFIELD" over "ARMORY" over "Geneseo, IL USA".
- this model series was made by Springfield Armory in the USA starting in 1990.

Model

- ""ULTRA" MODEL, I.P.S.C. Approved" is marked on the left side of the slide; the P9 in the model designation is the original factory model name for this model series, it does not however appear on the firearm.
- introduced 1990, discontinued 1993.
- the P9 Ultra IPSC with the "Long Slide Ported" (LSP) was officially endorsed by the IPSC World Body.
- the P9 model series is the basic full-sized single-action / double-action semi-auto pistol by Springfield Armory based on the CZ-75 design.
- features include: recoil operated, semi-automatic pistol utilizing a detachable box magazine; long muzzle-end ported slide and matching ported stainless steel barrel; left side frame-mounted extended sear safety and slide release; serrated front and rear grasping grooves; extended beavertail tang on the grip-frame; skeletonized hammer; slide mounted special target sights; rubberized competition or diamond-checkered walnut grip panels.
- this firearm is available in polished blue, bi-tone, parkerized, or stainless steel finish.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- manufacturer's name is marked on the rear right side of the receiver/frame as, "SPRINGFIELD" over "ARMORY" over "Geneseo, IL USA". - firearms in the P9 series of pistols as sold under the Springfield Armory name are manufactured using slides and receiver/frames produced by Tanfoglio Fratelli (Tanfoglio Brothers), although no markings to this end have been seen marked on production examples.
Action	- recoil operated.
