Model

- model designation may not be marked on the firearm, features determine the model.
- manufactured between 1935 and 1948.
- advertised as "Buckhorn", along with a number of other Stevens 22 caliber bolt action single-shot and repeating rifles.
- features include: short stroke bolt, the rear face of the bolt handle root locks with the rear face of the ejection port cut of the tubular receiver, turned down bolt handle, thumb operated safety on the left near the rear of the bolt, fixed tubular under barrel magazine, round tapered barrel with open rear sight and bead front sight, plain one piece walnut stained hardwood stock with semi-pistol grip, plain steel butt plate and take down screw on the underside of the mid-forend.
- do not confuse with the virtually identical Stevens Model 66 rifle manufactured by Stevens, or the similar Model 066 Stevens rifle, all of which were advertised as "Buckhorn", along with a number of other 22 caliber rifles.
- NOTE: The Stevens Model 66 bolt locks against the rear face of the ejection port opening of the receiver; whereas the Stevens Model 066 locks up in a separate bolt-slot behind the ejection port. The Stevens Model 066 was an improved and upgraded redesign of the Stevens Model 66.

Manufacturer

- marked on the top of the barrel ahead of the rear sight, in two lines:
SAVAGE ARMS CORPORATION / CHICOPEE FALLS, MASS. U.S.A.
- in April 1920, the Savage Arms Corporation purchased the J. Stevens Arms Company which retained the Stevens name, and continued manufacture under that name. In 1936, the separate entity of J. Stevens Arms Co. was re-organized as a division of the Savage Arms Corporation.

Action

- turn bolt operated.

- early versions of this firearm featured finger grooves in the forend and a 559mm barrel.
- do not confuse with the virtually identical Stevens Model 66 rifle manufactured by Savage, or the similar Model 066 Stevens rifle, all of which were advertised as "Buckhorn", along with a number of other 22 caliber rifles.
- NOTE: The Stevens Model 66 bolt locks against the rear face of the ejection port opening of the receiver; whereas the Stevens Model 066 locks up in a separate bolt-slot behind the ejection port. The Stevens Model 066 was an improved and upgraded redesign of the Stevens Model 66.

Manufacturer

- marked on top of the barrel, in two lines ahead of the rear-sight:
J. STEVENS ARMS COMPANY / CHICOPEE FALLS, MASS. U.S.A.

Action

- turn bolt operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- firearms manufactured prior to 1968 may not have a serial number.
Calibre	- chambered for the 22 LONG RIFLE cartridge. - marked on the left side of the barrel beside the rear sight in two lines: 22 SHORT - LONG / OR LONG RIFLE
Shots	- this model feeds from a tubular magazine located under the barrel.

Notes

Make

- "STEVENS" is marked on the firearm.
- "STEVENS" trade name/trademark has been used by "J. Stevens & Company", "J. Stevens Arms & Tool Company", "J. Stevens Arms Company" and "Savage".

Model

- originally produced as a Stevens model from 1935 to 1939, introduced as a Springfield model in 1939, as with most commercial firearms produced by Savage during World War II production ceased circa 1942 so that production capability could be focused on military weapons.
- features include: turn-bolt operated action; take-down design (one large screw on the underside of the stock); chromium plated bolt and trigger; one-piece walnut finished, full pistol grip stock with a hard rubber butt plate; gold bead front sight and a barrel mounted sporting rear sight with elevation and windage adjustments; tapered round barrel.
- available with a hooded ramp front sight with interchangeable inserts and an aperture rear sight mounted on the receiver/frame as the Stevens model 083.

Manufacturer

- the Savage name is not marked on the firearm. Sample markings read "J. Stevens Arms Company" over "Chicopee Falls, Mass. U.S.A.". Although marked with the Stevens name this model was produced when Stevens was owned and operated by Savage.

Serial Number

- samples seen have not been serialized.

Calibre

- calibre designation is marked on the barrel.

- manufactured from 1929 to 1934: in 1929 the the 410 Gauge No. 35 OFFHAND PISTOL was re-named the No. 35 AUTOSHOT and the name was reserved exclusively for the 410 gauge smoothbore.

Action

- break open operation; standing breech, barrel muzzle hinges down to expose chamber.

Serial Number

- serial number is marked on the left side of the barrel, beneath the left grip panel and in the dovetail cut into the butt.
- a letter T is found preceding the serial number.

Calibre

- the shotshell cartridge was originally 410 GA X 2".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- A simple sturdy hinged-frame single-shot shotgun-pistol in .410 gauge, having an iron frame, half round-half octagon barrel, shotgun bead front sight and shotgun style rear sight cast into the top of the frame, full walnut pistol grips, in-frame firing pin, mushroom shaped release stud; finished all blue, or nickelled, or case hardened frame and blued barrel. The cast-in frame shotgun style rear sight distinguishes this firearm from the earlier No. 35 Offhand pistol in .410 gauge. As a handy-gun it was very popular with trappers and farmers.

Notes

Make

- "J. Stevens Arms & Tool Co." is marked on the barrel.

Model

- "CRACK-SHOT" or variation thereof is marked on the top of the barrel.
- manufactured from 1900 to 1912.
- this model differed from the earlier "Tip-Up No 16 Crack Shot" by using a rolling block action.
- this model was replaced by the "Crack Shot 26" falling block action in 1912.
- this variant was produced in two distinct versions that used a rolling block action as opposed to the earlier "tip up" design. The first, known as the " 16 Crack Shot Thumb Safety" was manufactured from 1900 to 1907and is identifiable by the sliding thumb safety on the upper tang. The second, known as the "16 Crack Shot Side-lever" was produced between 1907 and 1912 with a stepped barrel, schnabel forend and deleted the thumb safety feature, the removable right side plate and used a reversible receiver/frame mounted side lever.

Manufacturer

- "J. Stevens Arms & Tool Co." is marked on the top of the barrel.

Action

- rolling block design.

Serial Number

- located on lower tang.
- with or without prefix letter.

Notes

Make

- the make is marked on the breech end of the barrel; these pistols are seen with one of two types of markings. Either "J. STEVENS A. & T. CO.", over "CHICOPEE FALLS, MASS. USA PAT. SEPT. 6, 1864", or "J. STEVENS ARMS CO", over "CHICOPEE FALLS, MASS. USA".

Model

- the model designation is not marked on the firearm.
- this is a single-shot target pistol based on Joshua Stevens' basic "tip-up" single-shot design, with an automatic extractor; this pistol was a "revival" of the earlier Gould No. 37 Target pistol. In 1923, a simpler-to-manufacture version of this pistol was re-introduced as the "No. 35 Offhand", with the primary difference between these two pistols being a bent strap metal trigger-guard on the No. 35 Offhand, rather than the ornate curved cast trigger-guard of the No. 35 Offhand Target.
- features include: blued or nickeled cast iron receiver/frame; blued half-round/half-octagonal barrel (breech portion octagonal); elevation-adjustable rear sight with fixed blade front; bushingless firing-pin held in frame by a screw from the right side of the receiver/frame; walnut grip panels; and a manually-cocked external hammer.

Manufacturer

- the manufacturer is marked on the firearm.

Action

- break open operation; standing breech, barrel muzzle hinges down to expose chamber.

Serial Number

- the serial number is marked on the bottom of the breech end of the barrel (action must be opened to view); all No. 35 Offhand Targets are serial numbered above 25000.

Calibre

- the Stevens Offhand Target No 35 was not made for the .410 gauge smoothbore shotshell cartridge.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- a simple sturdy hinged-frame single-shot pistol, having an iron frame, half round-half octagon barrel, bead front sight and open elevation adjustable rear sight, full walnut pistol grips, in-frame firing pin, mushroom shaped release stud; finished all blue, or nickelled frame and blued barrel.

Notes

Make

- "J. Stevens & Co.", "J. Stevens Arms & Tool Co.", "J. Stevens Arms Co", "Stevens", "Stevens Arms Co." or a variation thereof is usually marked on the firearm.
- "Stevens" is a tradename/brandname used by Stevens and Savage.

Model

- model designation is not marked on the firearm.
- this is a generic model for "Stevens" shotguns that were manufactured by Stevens/Savage and do not display a model designation.
- "Stevens" used the following patent numbers: "December 11, 1900", "April 12, 1910", "April 12, 1912", "February 10, 1914", "April 20, 1915".
- features include: side by side barrel configuration; hinged frame/receiver with top or under lever opener; boxlocks or sidelocks; exposed hammers or hammerless; single or double triggers; straight or pistol grip stock.

Serial Number

- serial number is usually located on the watertable and repeated on other components of the firearm.
- serial number may have a one or two letter prefix.
- five digit numbers without prefix or suffix have also been observed.
- Note: some Stevens side by side shotguns are marked "5100" usually on the right side of the receiver/frame; this is not a serial number, it does in fact stand for the Model 5100 side by side shotgun as produced by Stevens.

Notes

Make

- The make is not marked on the firearm.
- "Steyr Solothurn" is commonly known as the result of the two firms that developed/produced this line of submachine guns.
- Waffenfabrik Solothurn A.G. of Solothurn, Switzerland was owned by Rheinmetall of Germany who, under the terms of the Treaty of Versailles were not allowed to manufacture military small arms in Germany. Development continued and when this design was finished, it was sent to Waffenfabrik Solothurn who produced the prototypes and tested and modified the design as necessary. Due to a lack of production capability and severe Swiss restrictions on weapons export the finished design and manufacturing specifications were sent to the Waffenfabrik Steyr (who by this time in the evolution of the firm were known as "Stey Daimler Puch") in Austria who actually manufactured the design.

Model

- Manufactured from 1931 to 1935.
- The model designation is not marked on the firearm.
- "MP30" or model 1930, was adopted by the Austrian police.
- "MP30" noticeable feature is the safety lever located directly in front of the trigger guard. It lock the bolt in the close or open position and is only found on this model of "Steyr Solothurn" submachine gun.
- Features include: front sight blade with protecting ears; ventilated barrel shroud with a front sling swivel; horizontal magazine well on the left side of the receiver/frame having a magazine loading arrangement; sliding fire selector switch on the left side of the stock exposing the letter "E" for semi-automatic or the letter "D" for full-automatic fire; tangent open rear sight graduated from 50 to 500 meters.
- Overall length with a 200 mm (7.8 inches) barrel is 850 mm (33.5 inches).

Notes

Make	- make may or may not be marked on firearm. - this firearm is commonly known as the "Steyr Solothurn" as a result of the two firms that developed/produced this line of submachine guns. - Waffenfabrik Solothurn A.G. of Solothurn, Switzerland was owned by Rheinmetall of Germany who, under the terms of the Treaty of Versailles were not allowed to manufacture military small arms in Germany. Development continued and when this design was finished it was given to Waffenfabrik Solothurn who produced the prototypes and tested and modified the design as necessary. Due to a lack of production capability and severe Swiss restrictions on weapons export the finished design and manufacturing specifications were sent to the Waffenfabrik Steyr (who by this time in the evolution of the firm were known as "Stey Daimler Puch") in Austria who actually manufactured the design.
Model	- this is an inter-war submachine gun designed by Solothurn AG of Switzerland, but actually built by Steyr of Austria (due to Swiss laws regarding export of military equipment) from 1930 until 1940. - externally, this submachine gun resembles a MP-28 (with a one piece wooden pistol grip stock and a horizontal magazine well on the left side), but with several differences. Where the MP-28 has a tubular receiver/frame and a cross bolt fire selector above the trigger, the S1-100 has a octagonal topped receiver/frame cover that can be lifted up and over for disassembly and a fire selector switch mounted on the left side of the stock. - depending on when a given S1-100 was manufactured, it may have one of three safety systems; a lever or button located in front of the trigger guard, a locking slot for the bolt handle in the receiver/frame cover, or a lever located on top of the receiver/frame cover to lock the bolt in the open or closed position. - wooden pistol grip stock, horizontal magazine well on the left side of the receiver/frame, ventilated barrel shroud with provision for mounting a bayonet, fire selector switch on the left side of the stock (rear position for semi automatic, forward position for full automatic), sling swivels and open adjustable sights.
Manufacturer	- manufacturer's designation is not marked on all examples; may be seen with a logo consisting of "S" in circles or "SwS" ('Steyr und Solothurn Waffen"). - these submachine guns were designed by Solothurn in Switzerland, but actually produced by Steyr in Austria.
Action	- selective fire.
Serial Number	- numbered on the left side of the receiver/frame, behind the magazine well.
Shots	- detachable box magazine.

Notes

Make

- "STI" and/or "STI" inside the outline of the state of Texas may be marked on the side of the slide and/or "STI" inside a circle may be marked on the grip plates.
- "STI INTERNATIONAL" may be marked on the right side of the receiver/frame.

Model

- "2011" and the serial number are marked on the receiver/frame.
- the modular design of the 2011 series is comprised of a barrel and slide assembly, a synthetic trigger guard and grip assembly and a steel or alloy receiver/frame. This differs from the traditional 1911A1 design whereby the grip/trigger guard are not integral to the receiver/frame.
- STI also refers to this receiver/frame as the "MODULAR 2011", "MODULAR COMPETITION SYSTEM" or "2011 FRAME KIT".
- the "2011 FRAME KIT" consists of the receiver/frame, grip, magazine release, main spring housing and trigger.
- the "2011 FRAME KIT" are available in a Standard, 5", Tactical and 6" size.
- available with a H.O.S.T. slide, that represents "Holographic Optic Slide Top".

Manufacturer

- "STI International, Inc." is located in Georgetown, Texas, U.S.A.

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the side of the receiver/frame just above the trigger.
- serial number may have two or three letters, a space, and four numerals, but custom serial numbers are available.

Barrel

- there are various calibres and barrel lengths in heavy barrel weights, regular and hybrid, also available with compensator.

Calibre

- calibre is usually marked on the barrel.

Shots

- single or double column, detachable box magazine.
- STI 2011 double column, detachable box magazines are available with a magazine body length of 105 mm, 120 mm, 126 mm, 140 mm, or 170 mm.
- magazine capacity with a 105 mm long magazine body in the following calibres are: 9MM LUGER = 15 rounds, 40 S&W = 10 rounds, and 45 AUTO = 9 rounds.
- magazine capacity with a 120 mm long magazine body in the following calibres are: 9MM LUGER, and 38 SUPER = 15 rounds, 40 S&W = 12 rounds, and 45 AUTO = 10 rounds.
- magazine capacity with a 120 mm long magazine body in the following calibres are: 9MM LUGER, and 38 SUPER = 15 rounds, 40 S&W = 12 rounds, and 45 AUTO = 10 rounds.
- magazine capacity with a 126 mm long magazine body in the following calibres are: 9MM LUGER, and 38 SUPER = 17 rounds, 40 S&W = 14 rounds, and 45 AUTO = 12 rounds.
- magazine capacity with a 140 mm long magazine body in the following calibres are: 9MM LUGER, and 38 SUPER = 20 rounds, 40 S&W = 17 rounds, and 45 AUTO = 14 rounds.
- magazine capacity with a 170 mm long magazine body in the following calibres are: 9MM LUGER, and 38 SUPER = 26 rounds, and 40 S&W = 22.

Canadian Law Comments

- the component that supports the barrel and slide and to which the grip/trigger guard is attached and is typically marked with "2011" and the serial number is deemed the receiver/frame in Canada.

Remarks

- the Model 2011 frame is the standard basic frame used by the company, from which all their models are derived.
- the company also refers to this frame as the "MODULAR 2011" or the "MODULAR COMPETITION SYSTEM".
- the characteristics and operating principles of the COLT 1911/1911A1 is the basis of the design concept of the model 2011 firearm.
- this is a KIT GUN for which frame, slide, pistol grip, barrel and other parts are ordered separately to build a complete firearm.
- the firm manufactures the following frame kits: a STANDARD FRAME KIT (2011 and 2011-A1), a LONG WIDE FRAME KIT, and a 6.0" FRAME KIT, in 4140 Maxwell Alloy Steel or 7075 Aerospace Grade Aluminum.
- the firm manufactures the following slides: a 3.9" CLASSIC, a 4.3" UNIQUE, a 5.1" CLASSIC, a 5.1" HYBRID, a 5.5" COMPENSATED, and a 6.0" UNIQUE in 4140 Grade Steel.
- the following sizes of synthetic handgrips are available: a SHORT CARRY GRIP in black, a LONG GRIP in black, grey or in a choice of three colours, and a SINGLE STACK GRIP in black.
- the firm supplies various fittings and components in varied configurations, of various materials such as: sears, triggers, hammers, firing pins, bushings, scope mounts, compensators, etc. to name a few.
- there are various calibers and barrel lengths in bull barrel weights, regular and hybrid, also available with compensator.
