Notes

Make

- maker's designation usually marked on the top barrel flat as:
"A UBERTI & C. GARDONE VT. ITALY."

Model

- this is a modern reproduction of the Winchester Model 1866 rifle chambered in modern calibres.
- features include: brass receiver/frame; blued or in the white; octagonal or round barrel; European walnut buttstock and separate forearm; loading gate on right side of receiver/frame; saddle ring available as an option; rifle and short rifle versions have a forend cap, carbine version has a barrel band.
- overall length with a 616mm (24 1/4") barrel is 1102mm (43.3"), average weight is 3.75kg (8.2lbs).
- rifling characteristics: 6 grooves right hand twist.

Manufacturer

- the Uberti logo may appear on the firearm as a "U" inside a rifled, octagonal barrel.

Serial Number

- serial number is marked on the bottom of the receiver/frame in front of the trigger guard.

Calibre

- calibre designation may be marked on the left side of the barrel and/or on the upper tang at the wrist.

Shots

- tubular magazine located under the barrel.

Notes

Make	- appears on the barrel.
Model	- reproduction of a lever action Winchester Model 1866 carbine. - brass receiver with etched design. - blued round barrel. - European walnut buttstock and separate forearm (forearm retained by a barrel band) with brass tacks arranged in a pattern. - discontinued in 1989.
Manufacturer	- the Uberti logo may appear on the firearm as a "U" inside a rifled, octagonal barrel.
Serial Number	- appears on the receiver.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- This is a carbine-length modern reproduction of Winchester's 1866 Sporting Rifle, commonly called the "Yellowboy" because of its brass receiver. This rifle has a brass butt-plate in addition to the receiver, and has a round barrel with two barrel bands instead of the octagonal barrel of the rifle version. Uncheckered walnut stock and forend; this rifle differs from the 1866 Yellowboy Carbine in that it is meant to reproduce an "Indian"-style rifle, with brass tacks hammered into the stock in various patterns, and it has a "photo-engraved" pattern on the brass receiver.

Notes

Make

- the "Uberti" name and/or logo is marked on the barrel.

Model

- model designation is not marked on the firearm.
- "Model 1873" or "1873" is marked on the top tang of the receiver/frame.
- this is a modern reproduction of the Winchester Model 1873 lever action rifle.
- available in several configurations and finishes.
- the "Musket" version features a round tapered barrel with a walnut buttstock and forend (the forend runs from the receiver/frame to approximately five inches from the muzzle and is fitted with three barrel bands) and is offered with a reproduction bayonet.
- features include: colour case-hardened, "in the white" or blued receiver/frame; blued tapered round, octagonal or half round & half octagonal barrel; European walnut buttstock with straight or curved pistol grip and separate forearm with barrel band or end cap; blade front and adjustable open rear sight.
- several options include the choice of deluxe grade wood, pistol grip buttstock, checkering, engraving, tang mounted rear sight etc.
- overall length with a 508mm (20") barrel is 991mm (39"), average weight is 3.49kg (7.7lbs).

Manufacturer

- the Uberti logo may appear on the firearm as a "U" inside a rifled, octagonal barrel.

Serial Number

- serial number is marked on the lower tang of the receiver/frame.
- observed serial number consisted of a two letter "ZB" prefix and three numbers.
- "CAT 8474" was observed marked on the front underside of the receiver/frame.
- "CAT 8474" is not a serial number, this is an Italian Proof House catalogue number.

Barrel

- offered with carbine or rifle length barrels.

Calibre

- calibre designation is marked on the barrel.

Shots

- tubular magazine located under the barrel.
- magazine may be half or full length.

Notes

Make

- Uberti and/or the Uberti logo is marked on the barrel.

Model

- this is a reproduction of the original Winchester produced (using Browning patents) model 1885 single-shot target and hunting rifle also known as the "High Wall" or "Low Wall".
- available in several different configurations.
- features include: walnut, straight or pistol-grip buttstock and schnabel tipped forearm with or without checkering; colour case-hardened receiver/frame; single or double set triggers; tapered, round or octagonal barrel; tang mounted Vernier type rear sight or barrel mounted sights; the "Schuetzen" version has a removable hand rest.
- also available with a "carbine" length barrel.
- overall length with a 762mm (30") barrel is 1195mm (47.12"), average weight is 5.54kg (9.8lbs).

Manufacturer

- the Uberti logo may appear on the firearm as a "U" inside a rifled, octagonal barrel.

Action

- lever-operated falling block.

Serial Number

- serial number is marked on the receiver/frame.

Firearm Reference Number (FRN): 99275
Make: Ugarteburu
Model: Side By Side

Summary

Make:	Ugarteburu
Model:	Side By Side
Manufacturer:	Ugarteburu, M
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Multi-Barrel
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
99275 - 1	12 GA X 2 3/4"	2	711	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	
99275 - 2	16 GA X 2 3/4"	2	700	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "M. UGATEBURU" is marked on the barrel assembly and/or on the water table of the receiver/frame.

Model

- model designations are not normally found on shotguns produced by Ugarteburu.
- these shotguns were available built to customer specifications and may therefore be found with a wide variety of features.
- features may include hammerless sidelock or box lock mechanisms, top tang mounted safety and opening lever, double triggers, engraved receiver/frame, blued barrels with solid sighting rib, ejectors, Anson and Deeley locking mechanism, and checkered walnut buttstock and forend.
- may be marked "Made in Spain" on the barrel assembly.

Manufacturer

- the manufacturer's code of "M.U." is marked on the chamber flats and the watertable.
- Martin Ugarteburu was a manufacturer of side by side shotguns located in Eibar, Spain until 1985 when it became part of DIARM. The company did not survive the dissolution of that firm.

Action

- side by side barrel configuration.

Serial Number

- marked on the water table of the receiver/frame.
- observed serial numbers have consisted of five digits.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "UGARTECHEA" or "IGNACIO UGARTECHEA EIBAR" or "UGARTECHEA MADE IN SPAIN" may be marked on the receiver/frame or on the barrel.
Model	- model may be marked on the firearm. - features include: side by side barrels with bead front sight; front hinged receiver/frame with top tang mounted break open lever and safety; side lock action; hammerless; selective automatic ejectors; double triggers; checkered walnut splinter forearm with Anson & Deeley forearm latch and straight grip buttstock; blued barrels; chromed and engraved receiver/frame. - other options available on stocks, ribs, chokes, etc.
Manufacturer	- "UGARTECHEA" or "IGNACIO UGARTECHEA EIBAR" or "UGARTECHEA MADE IN SPAIN" may be marked on the receiver/frame or on the barrel. - one known company logo for "Ignacio Ugartechea" is a knight's helmet above a vertical oval with the letters "IU" inside.
Action	- side by side pattern.
Serial Number	- serial number is usually marked on the watertable of the receiver/frame. - serial number range was from approximately 17,888 to 195,820. - in 1995, the Spanish government instituted a new system for firearm's serial numbering. This system incorporated the code number of the gunmaker/manufactuer, weapon code, serial number sequence, and year of manufacturer. - an example of a serial number is as follows: "35 - 03 - #0# - 95". - serial number break down, the first two numbers (35) are the code numbers for the manufacture, the next two numbers (03) are the code numbers for shotgun, the next Numbers are the serial number sequence and the last two numbers (95) are the year of manufacture.
Remarks	- Polished blue finish, Italian-style engraving, and oil-finished stock and forend; this shotgun is produced in Spain only after receipt of an order, and production takes 4-8 months. The Models 116, 119, and 1042 are similar elaborate versions of this same shotgun.

Notes

Make

- "UGARTECHEA" or ' IGNACIO UGARTECHEA EIBAR" or "UGARTECHEA MADE IN SPAIN" may be marked on the receiver/frame or on the barrel.

Model

- model may be marked on the firearm.
- features include: side by side barrels with bead front sight; front hinged receiver/frame with top tang mounted break open lever and safety; side lock action; hammerless; selective automatic ejectors; double triggers; checkered walnut splinter forearm with Anson & Deeley forearm latch and straight grip buttstock; blued barrels; chromed and engraved receiver/frame.
- other options available on stocks, ribs, chokes, etc.

Manufacturer

- "UGARTECHEA" or ' IGNACIO UGARTECHEA EIBAR" or "UGARTECHEA MADE IN SPAIN" may be marked on the receiver/frame or on the barrel.
- the letters "I" over "U" within a shield is one of the known company logo's for "Ignacio Ugartechea".

Action

- side by side barrel configuration, hinged barrel design.

Serial Number

- serial number is usually marked on the watertable of the receiver/frame.
- serial number range was from approximately 17,888 to 195,820.
- in 1995, the Spanish government instituted a new system for firearm's serial numbering. This system incorporated the code number of the gunmaker/manufactuer, weapon code, serial number sequence, and year of manufacturer.
- an example of a serial number is as follows: "35 - 03 - #0# - 95".
- serial number break down, the first two numbers (35) are the code numbers for the manufacture, the next two numbers (03) are the code numbers for shotgun, the next Numbers are the serial number sequence and the last two numbers (95) are the year of manufacture.

Notes

Make

- "UGARTECHEA" or ' IGNACIO UGARTECHEA EIBAR" or "UGARTECHEA MADE IN SPAIN" may be marked on the receiver/frame or on the barrel.

Model

- manufactured 1922 to present (1999).
- this is a generic entry; other records may exist which may better describe the firearm being identified.
- model designations may not be marked on the firearm, refer to cross referenced records.
- features may include:
- double or single triggers;
- hinged triggers;
- internal or external hammers;
- straight English style stock or pistol grip-style buttstocks with or without cheekpieces;
- fully fitted buttstocks to measure;
- box lock or sidelock mechanisms;
- removeable sideplates;
- narrow or wide barrel ribs;
- blued, case-hardened or plain metal finish;
- Anson and Deeley locking mechansim;
- engraving/inlay on receiver/frame or barrel surfaces;
- checkered or padded buttplate;
- splinter, beavertail, or semi-beavertail forend wood;
- differing grade of wood used for stocking;
- top-tang safety/barrel selector.

Manufacturer

- "UGARTECHEA" or ' IGNACIO UGARTECHEA EIBAR" or "UGARTECHEA MADE IN SPAIN" may be marked on the receiver/frame or on the barrel.
- the letters "I" over "U" within a shield is one of the known company logo's for "Ignacio Ugartechea".

Action

- side by side barrel configuration, hinged barrel design.

Serial Number

- serial number is usually marked on the watertable of the receiver/frame.
- serial number range was from approximately 17,888 to 195,820.
- in 1995, the Spanish government instituted a new system for firearm's serial numbering. This system incorporated the code number of the gunmaker/manufactuer, weapon code, serial number sequence, and year of manufacturer.
- an example of a serial number is as follows: "35 - 03 - #0# - 95".
- serial number break down, the first two numbers (35) are the code numbers for the manufacture, the next two numbers (03) are the code numbers for shotgun, the next Numbers are the serial number sequence and the last two numbers (95) are the year of manufacture.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel - may be encountered in any practicable barrel length direct from the manufacturer.

Calibre
- caliber may be marked on the barrels, and will be marked on the receiver/frame watertable in accordance with Spanish proof standards.
- calibre will be marked for proof in metric terms, EG: 12/70 equals 12 Gauge with a 70mm case length (2 3/4"), therefore, 12 GA X 2 3/4" for calibre.

Notes

Make

- "MFG. FOR ULTRA-HI BY MIROKU JAPAN" is marked on the barrel.
- Ultra-Hi Products Company, Incorporated was an importer/distributor located in Hawthorne, New Jersey, U.S.A. circa 1975 to 1980.
- Ultra-Hi imported reproductions of black-powder flintlock and percussion firearms, both as finished firearms and ready-to-assemble firearm kits.

Model

- model is not marked on the firearm.
- this is a modern reproduction of a typical "Hawken"-type percussion rifle, with stained cherry straight-grip stock, adjustable sights, blued barrel and lock, and brass buttplate, patchbox, trigger-guard/finial grip-strap, nose-cap, and ram-rod thimbles
- manufactured 1976 - 1980
- also available in a flintlock version as the 9050 FA Hawken Flintlock
- all of these firearms were made as both finished, complete firearms, or as "do it yourself" ready-to-assemble kits.

Manufacturer

- "MFG. FOR ULTRA-HI BY MIROKU JAPAN" is marked on the barrel.

Action

- percussion single-shot.

Serial Number

- serial number is located on the left rear side of the barrel.
- observed serial number consisted of four numbers, eg. 0265.

Calibre

- ".50CAL." is marked on the barrel.

Other Markings

- "BLACK POWDER ONLY" and "PROOF TESTED" are marked on the barrel.

Notes

Make

- "ULTRAMATIC" is marked on the left side of the slide.
- these pistols were manufactured in Austria by (first) Ultramatic, then by Wolf, after Wolf bought the rights to the design; Wolf-produced pistols bear a logo resembling a wolf holding a bullseye in its mouth, while the bullseye is simultaneously the "O" in "Wolf".

Model

- "LV" is marked on the left side of the slide.
- this is the longer-barrelled version of the Ultramatic "SV", an unusual recoil-operated semi-automatic pistol produced during the late 1980's and early 1990's. These pistols are made on a modular pattern, with easily-interchangeable parts to allow a given pistol to be modified to a given user's tastes (by adding compensators, longer or shorter slides, optics-mounting rails, calibre-conversion kits, and so on).
- these pistols operate internally somewhat like a VZ-52, with a roller-locked bolt running inside what appears to be a slide that remains stationary on the receiver/frame.
- features include: blued or stainless finish and construction; a barrel bushing that can be swapped out for bushings with integral compensators; open adjustable sights or rail for mounting optical sights; a left-side takedown lever above the trigger guard; single-action trigger mechanism; rectangular gripping bars on the bolt at the rear of the stationary "slide"; finger grooved rubber insert on the front strap; an ambidextrous magazine-release button behind the trigger guard; an ambidextrous manual "flap" thumb safety; loop hammer; extended beavertail tang; rubber or wooden grips; checkered back strap insert.

Manufacturer

- "ULTRAMATIC" is marked on the left side of the slide.
- these pistols were manufactured in Austria by (first) Ultramatic, then by Wolf, after Wolf bought the rights to the design; Wolf-produced pistols bear a logo resembling a wolf holding a bullseye in its mouth, while the bullseye is simultaneously the "O" in "Wolf".

Action

- recoil-operated.

Serial Number

- serial-numbered on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel	- barrel lengths may vary.
Shots	- detachable box magazine.

125721 - 2	22 PELLET	8	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "UMAREX" over the model designation is marked on the left side of the receiver/frame.

Model

- "850 AirMagnum" is marked on the rear left side of the receiver/frame.
- this model is imported from Germany into the United Kingdom by Brocock.
- introduced 2006.
- bolt operated, CO2 powered, repeating air rifle utilizing an 8-shot cylinder-type magazine.
- features; full pistol grip synthetic stock; adjustable fibre optic sights; automatic thumb-type safety; hardened steel barrel; blued finish.
- options include an accessory rail and removable sound suppressor.

Manufacturer

- "UMAREX" over the model designation is marked on the left side of the receiver/frame.

Action

- bolt operated, CO2 powered.
- discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the rear right side of the receiver/frame.
- observed example had an eight digit number with a letter prefix.
- letter prefix "X" has been observed.

Shots

- removable cylinder.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- as it left the factory, this firearm may be equipped with an integral sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada.
- when the sound suppressor/silencer (prohibited device) is removed from the barrel the firearm is correctly identified as a "Non Restricted Firearm".

Notes

Make

- Umarex is marked on the right side of the firearm.

Model

- Overall length with a 1046.5 mm (41.2 inches) barrel is 508 mm (20 inches).
- The model designation is marked on the right side of the firearm.
- The Serial Number is marked on the left side of the receiver/frame.
- The Model features a Thumbhole Stock made of plastic.
- It is a single shot, arrow launcher , with approx. 25 shots of energy in a fully charged air reservoir.
- The Rifle is a PCP (Pre-Charged Pressurized) air system to a manufacture specification of 2625 PSI operating pressure.
- The air tank is filled by a port from a remote tank or air compressor, and features an underside mounted pressure gauge.
- The Rifle has three (3) Picatinny accessory rails attached to the fore stock.
- There is a receiver/frame top mounted Picatinny rail for optics.
- Rifle is packaged with three (3) arrows and removable plastic front and rear sights in box from manufacturer

Manufacturer

- Umarex is marked on the right side of the firearm.

Type

- This is a air powered "spigot" type operating system
- The rifle launches an arrow, which is hollow , and is placed over the spigot barrel from the front.
- The rifle is made ready to fire once an arrow is placed onto the spigot barrel by the operation of the turn bolt located on the right side of the receiver.

Action

- Velocity has been measured as 102.7 mps or 337 fps.
- Pre charged pneumatic.

Serial Number

- The serial number is marked on the left side of the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- Uses an arrow installed over a spigot for launching.

Notes

Make

- "UMAREX" is marked on the left side of the firearm.

Model

- introduced in 2012.
- "E.B.O.S." is marked on the left side of the firearm.
- "E.B.O.S." stands for Electronic Burst Of Steel.
- features include: fixed front sight and an adjustable and removable rear sight; round smoothbore barrel; synthetic receiver/frame with a built in BB reservoir, spring loaded magazine, pistol grip and integral equipment rails; removable vertical front grip; six AA batteries are housed inside the pistol grip; 88 gram CO2 cartridge is housed inside the removable synthetic buttstock; rate of fire selector (300, 400, or 500 shots per minute) lever is mounted on the right side of the receiver/frame; fire selector/burst mode (2, 4, or 8 rounds) lever and manual safety lever are mounted on the left side of the receiver/frame; BB reservoir chamber is mounted on the top front of the receiver/frame; BB magazine and spring loaded BB follower are located on the left side of the receiver/frame.
- overall length is 629 mm (24 3/4"), and average weight is 1.34 kgs (2.95 lbs).

Type

- this firearm resembles a submachine gun.

Action

- CO2 powered.
- selective fire.
- does not discharges a projectile at a muzzle velocity exceeding 152.4 mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the right side of the receiver/frame.
- observed serial number consisted of two number, a letter, and five numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- BBs are stored in a 400 round reservoir on the top of the receiver/frame.
- BBs are loaded into the built-in 24 round BB magazine by pushing the BB follower towards the muzzle and locking it in place. The airgun is shaken until the magazine is loaded. The follower is then released to apply pressure to the 24 BBs.

Notes

Make

- "UMAREX" was observed marked on the air rifle.

Model

- "FORGE" is marked on the right side of the compression chamber.
- this is a standard-pattern break-barrel spring-piston air rifle made for pest control, hunting, or field target competition.
- versions of this air rifle are made both with and without integral suppressors.
- features include: blued metal; adjustable open sights with Picatinny rail for mounting optics; checkered wooden and rubber pistol-grip stock; manual safety at the front of the trigger-guard; cheekpiece; and rubber buttpad.

Manufacturer

- "UMAREX" was observed marked on the right side of the receiver/frame.
- Umarex was established in 1972 as UMA Mayer & Ussfeller GmbH.
- UMA Mayer & Ussfeller GmbH acquired Reck Sportwaffenfabrik Karl Arndt.
- UMA was reorganized as "UMARECK" and finally as "UMAREX".
- Umarex is located in Arnsberg, Germany.
- Umarex purchased Walther in 1996.
- Umarex manufactures firearms, airguns, signal pistols, ammunition, soft air, optics and accessories.
- Umarex manufactures extremely detailed air-pistol versions of genuine handguns and rifles.
- Umarex also contracts other manufactures in China, Mexico, Spain, Taiwan and Turkey to produce firearms under various licensed trade marks.
- Umarex Sportwaffen GmbH & Company KG established a distribution company in North America called "UMAREX USA".
- Umarex USA acquired Ruag Ammotec USA the distributor of the RWS brand of airgun and acquired Crosman Corporation in 1997.
- Umarex distributes produces under the following trade names/trademarks: Ares, Beretta, Browning, Colt, Combat Zone, Elite Force, FN Browning, Hammerli, Heckler & Koch (HK), KWA, Legends, Magnum Research, Mauser, Makarov, Norica, Perfecta, PTS, PTSxKWA, RAM (Real Action Marker), Reck International, Ruger, RWS, Smith & Wesson (S&W), Tactical Force, Tokyo Soldier, Umarex, Walther, and Webley & Scott.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- break-barrel spring-piston air rifle with a velocity/energy above 152.4 mps/5.7 Joules.
Serial Number	- serial-numbered on the compression chamber.
Canadian Law Comments	- At least two variants of this particular model exist: Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport. Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport. - This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. - If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	TAIWAN
Serial Numbering:	See Note
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
198745 - 1	6MM AIRSOFT BB	120	440	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	
198745 - 2	6MM AIRSOFT BB	150	460	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Umarex" is marked on the right side of the receiver/frame.
- "UMAREX" is a manufacturer and importer of air guns.
- "UMAREX" logo use the letter "UX" displayed in logo form.
- "UMAREX" stands for "Umarex Sportwaffen GmbH & Company KG", Germany.
- "UMAREX USA" branch is located in Fort Smith, Arizona U.S.A..

Model

- "G 28" is marked on the left side of the lower receiver/frame.
- "G 28" airsoft is a license copy of the Heckler & Koch "G 28" rifle.
- "G 28" airsoft model is based on the exterior appearance of the AR-15/M16 design.
- "G 28" airsoft is an Automatic Electric Gun (AEG) rifle.
- "G 28" may come with a replica, detachable sound suppressor/silencer that is a prohibited device.
- Features include: free floating handguard with full length top accessory rail and shorter rails on the sides and bottom; upper assembly a integral optic rail, ejection port, cartridge case deflector and forward assist on the right side; lower receiver/frame with left side safety lever and action release, right side magazine release; collapsible buttstock with a adjustable cheek piece.

Manufacturer

- The manufacturer is not marked on the firearm.
- Vega Force Company use the acronym "VFC".

Action

- Air piston is powered by an electric motor, gear box and battery.
- Velocities have been reported as 131 mps/430 fps and 134 mps/440 fps.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- The serial number is marked on the left side of the receiver/frame. - Serial number of a referenced example consisted of two numbers, one letter and five numbers.
Calibre	- Calibre identification is marked on the receiver/frame inside the trigger guard area.
Shots	- Detachable box magazine.
Canadian Law Comments	- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of ""Prohibited Device"" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a ""CC 2 ""firearm""/CC 84(3) Exempted"" firearm. NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed."

Notes

Make

- "UMAREX" may be marked on the airsoft.

Model

- "HECKLER & KOCH G36C AIRSOFT" is not marked on the firearm.
- this airsoft firearm resembles a Heckler & Koch model "G36C" automatic rifle.
- features include: aluminum outer barrel/sleeve and smoothbore inner barrel; black or clear synthetic receiver/frame; synthetic forearm/heat shield assembly, pistol grip and side folding buttstock.
- Heckler & Koch G36C Airsoft with the stock in the folded position has an overall length of 500 mm and with the stock extended has an overall length of 720 mm.
- average weight is 2600 grams.

Manufacturer

- some examples of the Umarex model Heckler & Koch G36C Airsoft have been upgraded to discharge a 0.20 gram 6MM AIRSOFT BB projectile at a muzzle velocity exceeding 111.6 mps (366 fps) and a muzzle energy exceeding 1.2 Joules by Evike.com Incorporated of San Gabriel, California, U.S.A.

Type

- this is an airsoft rifle.

Action

- spring piston is powered by an electric motor, gear box and battery.
- selective fire.
- at least two variants of this particular model exist:
Variant #1) does not discharge a 0.20 gram 6MM AIRSOFT BB projectile at a muzzle velocity exceeding 238.7 mps (783 fps) and/or a muzzle energy exceeding 5.7 Joules, and
Variant #2) does not discharge a 0.20 gram 6MM AIRSOFT BB projectile at a muzzle velocity exceeding 111.6 mps (366 fps) and/or a muzzle energy exceeding 1.2 Joules.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- this airsoft is available in two variants:
Variant #1) CC 2 "firearm" / CC 84 (3) Exempted: muzzle velocity exceeds 111.6 mps (366 fps) and/or muzzle energy exceeds 1.2 Joules, when discharging a 0.2 gram 6MM AIRSOFT BB, and
Variant #2) CC 84 (1) "replica firearm": muzzle velocity is less than 111.6 mps (366 fps) and/or muzzle energy is less than 1.2 Joules, when discharging a 0.2 gram 6MM AIRSOFT BB.

Importer

- "Umarex USA, Forth Smith, AR" is marked on the left side of the receiver/frame.

Canadian Law Comments

- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada.

If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.
- Discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
195110 - 1	BB	10	489	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "UMAREX" may be marked on the receiver/frame.

Model

- "LEGENDS COWBOY RIFLE" is marked on the left side of the barrel.
- this CO2 airgun mimics both the appearance and function of the Winchester 1894 lever action rifle; its action loads and ejects reusable BB casings that resemble cartridges.
- features include: round smoothbore barrel with fixed front sight and adjustable rear sight; receiver/frame with side loading and button ejection port; lever action cocking mechanism; removable CO2 cartridges in the butt stock; plain synthetic straight stock with wood grain finish and rubber butt pad; black finish.
- overall length is 965.2mm (38"), weight is 2.68kgs (5.9lbs).

Manufacturer

- "UMAREX" may be marked on the receiver/frame.
- Umarex was established in 1972 as UMA Mayer & Ussfeller GmbH.
- UMA Mayer & Ussfeller GmbH acquired Reck Sportwaffenfabrik Karl Ardnt.
- UMA was reorganized as "UMARECK" and finally as "UMAREX".
- Umarex is located in Arnsberg, Germany.
- Umarex purchased Walther in 1996.
- Umarex manufactures firearms, airguns, signal pistols, ammunition, soft air, optics and accessories.
- Umarex manufactures extremely detailed air-pistol versions of genuine handguns and rifles.
- Umarex also contracts other manufactures in China, Mexico, Spain, Taiwan and Turkey to produce firearms under various licensed trademarks.
- Umarex Sportwaffen GmbH & Company KG established a distribution company in North America called "UMAREX USA".
- Umarex USA acquired Ruag Ammotec USA the distributor of the RWS brand of airgun and acquired Crosman Corporation in 1997.
- Umarex distributes and produces under the following trade names/trademarks: Ares, Beretta, Browning, Colt, Combat Zone, Elite Force, FN Browning, Hammerli, Heckler & Koch (HK), KWA, Legends, Magnum Research, Mauser, Makarov, Norica, Perfecta, PTS, PTSxKWA, RAM (Real Action Marker), Reck International, Ruger, RWS, Smith & Wesson (S&W), Tactical Force, Tokyo Soldier, Umarex, Walther, and Webley & Scott.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- CO2-powered air rifle. - this model discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
Serial Number	- serial number is marked on the right side of the barrel, and may be repeated on other parts. - serial number of a referenced example consisted of two numbers, a letter "H" and five numbers.

Notes

Make

- "UMAREX USA" may be marked on right side of lower receiver near magazine well.
- "ac" marked on left side of magazine well; AC is the WWII German factory code for Walther; Umarex Germany is the parent company of Walther.

Model

- "LEGENDS MP" observed marked on right side of magazine well, above calibre and serial number;
- designed to resemble the WWII German MP40 submachine gun;
- blowback design with CO2 powered reciprocating bolt to mimic the function of the original MP40 during firing;
- the Umarex "Lengends MP " model may be found in full automatic versions, semiautomatic only versions, and in 6 mm BB (airsoft) versions for specific markets;
- features include: removable threaded muzzle cap; metal construction with black or weathered finish; hooded blade front sight; tapered round barrel with integral barrel support/protector under barrel; metal sling attachment between hexagonal barrel nut and magazine housing; tubular metal receiver; right side ejection port; stamped, ribbed metal magazine housing; two position flip rear sight; charging handle through slot on left side of receiver; magazine release located at left rear of magazine well; brown plastic lower receiver; round disassembly knob at front bottom of lower receiver; three position safety selector at bottom of lower receiver between disassembly knob and trigger guard; round metal trigger guard integral with grip frame; brown plastic grip panels; two position under folding stamped steel shoulder stock with pivoting butt; sling attachment point at rear of receiver.

Type

- this air gun resembles a large automatic pistol or submachine gun.

Action

- CO2 powered.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps (500fps) and/or a muzzle energy exceeding 5.7 Joules.
- selective fire.

Serial Number

- serial number marked on right side of magazine well, below model name and calibre.
- two number prefix in front of a single alpha character, followed by four numbers, was observed.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine;
- CO2 valve at top of magazine; CO2 cartridges contained within magazine body.
- various sellers advertise capacity up to 60 shots; capacity of 50 in 4.5 mm (.177) determined from owner's manual.

Notes

Make

- "UMAREX" is marked on the left side of the barrel block and on the right side and the top of the receiver/frame.

Model

- "OCTANE" is marked on the right side of the action tube.
- "OCTANE" is originally equipped from the factory with an integral silencer system.
- features include: fiber optic front sight and an adjustable rear sight; round, rifled steel barrel with an integral SilencAir silencer; front hinged receiver/frame is drilled and tapped for scope mount/rail; safety lever is located inside the trigger guard; two stage adjustable trigger; one piece synthetic, ambidextrous thumbhole stock with ribbed pistol grip area and a rubber recoil pad; black finish.
- overall length with a 495 mm (19.5") barrel is 1232 mm (48.5"), and the average weight is 4.31 kgs (9.5 lbs).

Manufacturer

- "UMAREX" is marked on the left side of the barrel block and on the right side and the top of the receiver/frame.

Action

- gas-piston powered, hinged barrel design.
- Reaxis gas piston.
- discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the left side of the barrel block.
- serial number observed consisted of eight numbers without a letter prefix or suffix.

Calibre

- calibre is marked on the left side of the barrel block.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- as it left the factory, this firearm is equipped with an integral sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada.
- when the sound suppressor/silencer (prohibited device) is removed the firearm is correctly identified as a "Non Restricted Firearm".

Notes

Make

- The company logo is marked on the firearm.

Model

- "ORIGIN" is marked on the right side of the receiver/frame.
- Features include: integral air pressure gauge; side lever cocking action; picatinny/dovetail rail; adjustable trigger; manual safety; may come equipped with a suppressor.
- Overall length is 1095mm (43.1") and average weight is 3.1 kg (6.8 lbs)

Manufacturer

- The company logo is marked on the firearm.

Action

- Pre charged pneumatic.
- Velocity is reported 328 mps or 1075 fps with a .22 pellet
- Velocity is reported 289 mps or 950 fps with a .25 pellet.

Calibre

- The calibre designation is marked on the left side of the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- Detachable rotary disc magazine.
Canadian Law Comments	- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. - If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed. - Discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Notes

Make

- "UMAREX" is marked on the left side.

Model

- introduced in 2013.
- ``STEEL-FORCE`` is marked on the left side above the safety selector.
- ``STEEL-FORCE`` is a CO2 powered barrelled action inside a synthetic housing (clamshell) that is made to resemble a Colt AR15/M16 carbine.
- ``STEEL-FORCE`` has a safety selector that can be set to single shot or a six shot burst.
- features include: folding down sights; front sight is the access port to the 300 BB reservoir; integral 30 BB magazine is loaded thru an access port located on the left side, below the front sight; short round barrel is housed in the forearm of the clamshell; synthetic clamshell imitates the flashhider, barrel, forearm with four rails, upper receiver with an integral rail, lower receiver assembly, and pistol grip; CO2 cartridges are housed inside the removable magazine/storage compartment; collapsible/telescoping carbine type buttstock; black finish.
- overall length for a 191 mm (7.5") barrel is 718 mm (28.2"), and the average weight is 1.53 kgs (3.37 lbs).

Manufacturer

- "UMAREX" and "MADE IN JAPAN" are marked on the side of the clamshell.

Action

- CO2 powered.
- powered by 2 x 12g CO2 cartridges.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the right side, above the trigger.
- serial number observed consisted of two numbers, a letter "D", and five numbers.

Calibre

- calibre identification is marked on the right side, above the trigger.

Notes

Make

- "UMAREX" is marked on the gas pistol.
- Umarex was established in 1972 as UMA Mayer & Ussfeller GmbH.
- UMA Mayer & Ussfeller GmbH acquired Reck Sportwaffenfabrik Karl Ardnt.
- UMA was reorginized as "UMARECK" and finally as "UMAREX".
- Umarex is located in Arnsberg, Germany.
- Umarex purchased Walther in 1996.
- Umarex manufactures firearms, airguns, signal pistols, ammunition, soft air, optics and accessories.
- Umarex manufactures extremely detailed air-pistol versions of genuine handguns and rifles.
- Umarex also contracts other manufactures in China, Mexico, Spain, Taiwan and Turkey to produce firearms under various licensed trade marks.
- Umarex Sportwaffen GmbH & Company KG established a distribution company in North America called "UMAREX USA".
- Umarex USA acquired Ruag Ammotec USA the distributor of the RWS brand of airgun and acquired Crosman Corporation in 1997.
- Umarex distibutes produces under the following trade names/trademarks: Ares, Beretta, Browning, Colt, Combat Zone, Elite Force, FN Browning, Hammerli, Heckler & Koch (HK), KWA, Legends, Magnum Research, Mauser, Makarov, Norica, Perfecta, PTS, PTSxKWA, RAM (Real Action Marker), Reck International, Ruger, RWS, Smith & Wesson (S&W), Tactical Force, Tokyo Soldier, Umarex, Walther, and Webley & Scott.

Model

- "STEEL STORM" is marked on the left side of the receiver/frame.
- introduced in 2010.
- this is a semi and full automatic six shots burst firing CO2 powered air gun.
- this PDW (personal defense weapon) type gas pistol resembles an H&K model MP7.
- features include: short exposed barrel with lug for muzzle accessories attachment; ear protected front and rear sight with a Picatinny rail between them; rectangular shaped receiver/frame with a protruding pistol grip housing the magazine; Picatinny rail in front of the trigger guard; manual safety on the left side behind the pistol grip; black polymer construction.
- overall length with a 191mm (7.5") barrel is 381mm (15").

Action

- CO2 powered.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number of a referenced example consisted of 2 numbers with a letter prefix and five numbers.
Shots	- 30 shots detachable box magazine with a 300 .177 BB's reservoir.

Serial Number	- The serial number is marked on the left side of the firearm.
Calibre	- The calibre designation is marked on the left side of the firearm. - Calibre designation of a referenced example was marked as "22 cal(5.5mm)".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada.

If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

Notes

Make

- UMAREX . SYRIX is marked on the right side of the receiver/frame.
- The make is marked on the left side of the firearm.

Model

- UMAREX . SYRIX is marked on the right side of the receiver/frame.
- This is a standard-pattern break-barrel spring-piston air rifle made for pest control, hunting, or field target competition.
- Features include: grooved receiver/frame for scope mounts; manual safety at the front of the trigger-guard.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- The manufacturer is marked on the left side of the firearm.
- Umarex was established in 1972 as UMA Mayer & Ussfeller GmbH.
- UMA Mayer & Ussfeller GmbH acquired Reck Sportwaffenfabrik Karl Ardnt.
- UMA was reorganized as "UMARECK" and finally as "UMAREX".
- Umarex is located in Arnsberg, Germany.
- Umarex purchased Walther in 1996.
- Umarex manufactures firearms, airguns, signal pistols, ammunition, soft air, optics and accessories.
- Umarex manufactures extremely detailed air-pistol versions of genuine handguns and rifles.
- Umarex also contracts other manufactures in China, Mexico, Spain, Taiwan and Turkey to produce firearms under various licensed trade marks.
- Umarex Sportwaffen GmbH & Company KG established a distribution company in North America called "UMAREX USA".
- Umarex USA acquired Ruag Ammotec USA the distributor of the RWS brand of airgun and acquired Crosman Corporation in 1997.
- Umarex distributes produces under the following trade names/trademarks: Ares, Beretta, Browning, Colt, Combat Zone, Elite Force, FN Browning, Hammerli, Heckler & Koch (HK), KWA, Legends, Magnum Research, Mauser, Makarov, Norica, Perfecta, PTS, PTSxKWA, RAM (Real Action Marker), Reck International, Ruger, RWS, Smith & Wesson (S&W), Tactical Force, Tokyo Soldier, Umarex, Walther, and Webley & Scott.

Action

- Compressed spring air piston.
- Break open action.
- Velocities have been reported as 304.8 mps/1000 fps and 149.4 mps/490 fps.

Serial Number

- The serial number is marked on the left side of the firearm.
- The serial number of a referenced example consisted of sixteen number and a letter suffix "F".

Canadian Law Comments

- At least two variants of this particular model exist:

Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefore exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.

Notes

Make

- Underground Skunkworks' logo and "UNDERGROUND" over "SKUNKWORKS" over "Columbia Falls, MT" or "UNDERGROUND" over "SKUNKWORKS" over "Columbia Falls, MT" may be marked on the left side of the receiver/frame.

Model

- "911" over the serial number was observed marked on the right front side of the receiver/frame.
- "911" is an improved clone of the Remington model 700 action.
- "911" is available as a complete firearm or as an action only.
- "911" action kit includes the receiver/frame, bolt, side bolt release, firing pin kit, extractor, ejector, and recoil lug.
- "911" receiver/frame is used to manufacture semi-custom rifles in numerous configurations.
- features include: round rifled stainless steel Bartlein or Rock Creek barrel with or without flutes; barrel muzzle may be threaded for attachment of a muzzle brake/flash hider or sound suppressor/silencer; 911 stainless steel or chromoly left or right hand cylindrical receiver/frame with Picatinny rail and side bolt release; one piece chromoly steel bolt with oversize bolt knob; manual safety mounted or te rear side of the receiver/frame; Timney trigger; detachable bottom aluminum metal magazine housing with ambidextrous magazine release; stainless steel pillars; synthetic pistol grip stock with sling swivel studs, equipment rails and bipod or an Accuracy International chassis-system stock design; black or camo finish.

Manufacturer

- Underground Skunkworks, LLC is located in Columbia Falls, Montana, U.S.A.

Action

- turn-bolt design.

Serial Number

- serial number was observed marked on the front right side of the receiver/frame.
- observed serial number consisted of a four letter "UGSW" prefix and three numbers.

Shots

- detachable box magazine.

Canadian Law Comments

- certain variations of this firearm left the factory with a sound suppressor/suppressed barrel assembly and is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada.
- when the sound suppressor/silencer (prohibited device) is removed from the barrel, the firearm is correctly identified as a "Non Restricted Firearm".

Notes

Make

- "UNION" is marked on the left side of the slide and on the grip plates.
- "Union" trade name used by M. Seytres of St. Etienne, France.
- "Union" trade name was used by Unceta y Cia of Guernica, Spain circa 1924 to circa 1931.

Model

- "Pistolet Automatique Francais" and "UNION" is usually marked on the slide.
- several variations of this pistol have been noted; the first, in calibre 6.35MM, is a small "vest pocket" type that resembles a Browning Model 1906 and uses a compact receiver/frame. These smaller versions may incorporate a grip safety with the grip plates mounted by two screws, or have a solid backstrap and only one screw to attach the grip plates.
- the second version uses a larger receiver/frame with a longer grip profile. This version will be found in calibre's 6.35MM and 7.65MM. Samples have been noted that incorporate a grip safety and straight backstrap, or a solid backstrap with an arched or straight profile, either variant may be equipped with a lanyard ring. Many of the larger versions were acquired by the Bank of France (Banque de France) to arm personnel that worked in a high-risk environment. These firearms will bear "B.F" markings on the receiver/frame.
- common features include: serration's on the slide, rudimentary sights, blued finish, heel mounted magazine catch, and the "Union" name and/or logo (an Indian head) moulded into the grip panels.
- some versions were offered with barrels that protruded past the front of the slide.

Manufacturer

- manufacturer's name is not marked on the firearm.
- firearms are usually marked "Fabrique a St. Etienne" on the left side of the slide.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- blowback operated.
Serial Number	- serial number usually is marked on the receiver/frame. - a complete or partial serial number may also appear on other components. - Banque de France (Bank of France) markings, "BF", may be found in the same area as the serial number, these should not be construed as forming a part of the serial number.
Shots	- detachable box magazine, a high capacity magazine (25, 35 or 40 shots) was offered for at least one version in calibre 7.65MM that resembled a horse-shoe.
Other Markings	- in addition to the "Pistolet Automatique Francais" and "Union" markings, samples have been noted with "Acier Garanti" and calibre designation markings on the slide.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
136549 - 1	12 GA X 2 3/4"	2	700	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "UNION ARMERA S.L. EIBAR " and "(MADE IN SPAIN)" was observed marked on the barrel assembly.
- "MARCA", the image of a crane, and "GRULLA" was observed marked on the underside of the receiver/frame.
- the image of a crane over "GRULLA" inside a circle was observed marked on the watertable and barrel flats.
- "U.A" was observed marked on the watertable, barrel flats, and barrels.
- "U.A" is the manufacturer's code for "Union Armera".
- "Union Armera" became "Grulla Armas".

Model

- "Mo 205" was observed marked on the rear tang of the trigger guard.
- features include: blued round side by side smoothbore barrels with bead front sight; front hinged receiver/frame with top tang mounted break open lever and safety; box lock; hammerless; double triggers; checkered wood forearm and semi-pistol grip buttstock; sling attachments.

Manufacturer

- "UNION ARMERA S.L. EIBAR " and "(MADE IN SPAIN)" was observed marked on the barrel assembly.
- "MARCA", the image of a crane, and "GRULLA" was observed marked on the underside of the receiver/frame.
- the image of a crane over "GRULLA" inside a circle was observed marked on the watertable and barrel flats.
- "U.A" was observed marked on the watertable, barrel flats, and barrels.
- "U.A" is the manufacturer's code for "Union Armera".
- "Union Armera" became "Grulla Armas".

Action

- side by side barrel configuration, hinged barrel design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is usually marked on the water table of the receiver/frame and repeated on the underside of the barrel assembly.
- serial number may consisted of five numbers without a letter prefix or suffix.
- serial number may consisted of a letter "U", a period (.), and a letter "A" and five numbers, example "U.A13##7".
- "U.A" is also the manufacturer's code for Union Armera.
- serial number range pre-1995 was from approximately 0001 to 32,508.
- Spanish government instituted a new system for firearm's serial numbering in 1995.
- Spanish system incorporated the code number of the gunmaker/manufacturer, weapon code, serial number sequence, and year of manufacturer, example of a serial number is as follows: "31 - 03 - #0# - 95".
- serial number break down, the first two numbers (31) are the code numbers for the manufacture, the next two numbers (03) are the code numbers for shotgun, the next Numbers are the serial number sequence and the last two numbers (95) are the year of manufacture.

Calibre

- gauge and chamber length was observed marked on the watertable and barrel flats.

Notes

Make

- "UNION ARMERA S.L. - EIBAR -" and "Made in Spain" may be marked on the barrel assembly.
- "MARCA", the image of a crane, and "GRULLA" may be marked on the underside of the receiver/frame.
- the image of a crane over "GRULLA" inside a circle may be marked on the watertable and barrel flats.
- "U.A" may be marked on the watertable and barrel flats.
- "U.A" is the manufacturer's code for "Union Armera".
- "Union Armera" became "Grulla Armas".

Model

- model designation is marked on the firearm.
- features include: side by side barrel configuaration; front hinged receiver/frame with tang mounted break open lever; hammerless.

Action

- side by side barrel configuration.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is usually marked on the water table of the receiver/frame and repeated on the underside of the barrel assembly.
- serial number may consisted of five numbers without a letter prefix or suffix.
- serial number may consisted of a letter "U", a period (.), and a letter "A" and five numbers, example "U.A13##7".
- "U.A" is also the manufacturer's code for Union Armera.
- serial number range pre-1995 was from approximately 0001 to 32,508.
- Spanish government instituted a new system for firearm's serial numbering in 1995.
- Spanish system incorporated the code number of the gunmaker/manufactuer, weapon code, serial number sequence, and year of manufacturer, example of a serial number is as follows: "31 - 03 - #0# - 95".
- serial number break down, the first two numbers (31) are the code numbers for the manufacture, the next two numbers (03) are the code numbers for shotgun, the next Numbers are the serial number sequence and the last two numbers (95) are the year of manufacture.

Calibre

- on the sample examined the calibre was marked in traditional European style as "16-70" within an oval (16 denoting the gauge with 70 giving the chamber length in millimetres).

- "Navy" revolver series was manufactured from late 1850s to the early 1860s.
- "Navy" revolvers was sold under the tradenames of "Western Arms Company" and "Union Arms Company".
- this is a single action percussion revolver with a solid top receiver/frame.
- features include: bead front sight and groove in the top strap for a rear sight; octagonal or round barrel with rammer/loading lever; solid top receiver/frame with round unfluted cylinder; exposed spur hammer; single action trigger mechanism; brass trigger guard; flat bottom grip strap; walnut grip plates; blued finish.
- cylinder may be plain or have a roll engraved scene.

Manufacturer

- William Walker Marston was a gun manufacturer and retailer based in New York City, New York, U.S.A. from 1844 to 1872.
- Marston produced both percussion and metallic cartridge firearms under a variety of names and with various partners: "W.W. Marston", "W.W. Marston, New York City", "W. W. Marston Armory, New York", "William Marston, New York City", "Marston & Knox, New York", "Sprague & Knox, New York", "The Washington Arms Company", "The Union Arms Company" and "Phenix/Phoenix Armory".
- Marston was in partnership with Knox, circa 1847.
- Marston was in partnership with Sprague from 1848 to 1853.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number
- serial number is located on the underside of the receiver/frame.
- serial number range was from 201 to 1000.

Barrel
- available in the following barrel lengths: 191 mm (7.5"), 203 mm (8"), and 216 mm (8.5").

Notes

Make

- "UNION FIRE ARMS CO." over "TOLEDO, OHIO." is marked on the receiver/frame.
- "The Union Fire Arms Co." over "Toledo, Ohio" was marked on firearms from 1903 to 1910.
- "The Union Arms Co." over "Toledo, Ohio" was marked on firearms from 1910 to circa 1913.

Model

- manufactured from 1906 to 1913.
- model designation is not marked on the firearm, this is a generic entry for Union single barrel shotguns that are not identifiable as to model.
- features include:
- hammer, or hammerless.
- break open lever located on the top tang.
- uncheckered hardwood stock.
- round tapered blued barrel.
- receiver/frame may be of case hardened or blued finish.

Manufacturer

- Union Firearms Company was established in Toledo, Ohio by George B. Colton circa 1903.
- Union Firearms/Union Arms produced the models 22 and 23 side by side shotguns, the models 24, 25 Peerless, 25A Trap and 50 pump action shotguns, the models 18 and Diamond Grade single barrel shotguns, Reifengraber semi-automatic pistol and the Lefever Automatic Revolver a copy of the Webley Fosber semi-automatic revolver.
- Union Firearms/Union Arms Company was in business from 1903 to 1913.
- Union Firearms/Union Arms used the following tradenames: Union Firearms Company, Union Arms Company, Illinois Arms Company and Bee Be Arms Company.
- Union Firearms Company/Union Arms Company assets were purchased by the Ithaca Gun Company in 1914.

Serial Number

- serialization unknown, but specimen observed with four numerical digits located on the receiver/frame. Other combinations are possible.

Barrel

- available with barrel lengths from 762 mm (30") to 914 mm (36").

Notes

Make

- "UNION FIRE ARMS CO" over "TOLEDO. O. LEFEVER PAT." is marked on the right side of the receiver/frame.
- "The Union Fire Arms Co." over "Toledo, Ohio" was marked on firearms from 1903 to 1910.
- "The Union Arms Co." over "Toledo, Ohio" was marked on firearms from 1910 to circa 1913.

Model

- "UNION FIRE ARMS CO" over "TOLEDO. O. LEFEVER PAT." is marked on the right side of the receiver/frame.
- patented by Charles A. Lefever in 1909.
- this is a recoil operated "semi-automatic revolver", similar in concept to the British Webley-Fosberry.
- top latched receiver/frame allows the barrel and cylinder to tip down for reloading, exposed hammer allows a shooter to manually cock the pistol for the first shot, and the cylinder has deep "zig-zags" milled into it, that engage a stud and allow it to index to the next chamber during recoil.
- this firearm has a very "ungainly" appearance to it, as it is very blocky and bulky, and the trigger and trigger-guard look like afterthoughts, that are hung off of the frame at an odd angle.

Manufacturer

- Union Fire Arms Company was established in Toledo, Ohio by George B. Colton circa 1903.
- Union Fire Arms/Union Arms produced the models 22 and 23 side by side shotguns, the models 24, 25 Peerless, 25A Trap and 50 pump action shotguns, the models 18 and Diamond Grade single barrel shotguns, Reifengraber semi-automatic pistol and the Lefever Automatic Revolver a copy of the Webley Fosber semi-automatic revolver.
- Union Fire Arms/Union Arms Company was in business from 1903 to 1913.
- Union Fire Arms/Union Arms used the following tradenames: Union Fire Arms Company, Union Arms Company, Illinois Arms Company and Bee Be Arms Company.
- Union Arms Company assets were purchased by the Ithaca Gun Company in 1914.

Action

- this is a recoil operated "automatic revolver", similar in operation to the Webley-Fosberry.

Notes

Make

- "UNIQUE" is marked on the left side of the slide and on the grip panels.

Model

- model designation may not appear on firearm.
- manufactured from 1923 to 1940.
- the slide is marked: Le Veritable Pistolet Francais Unique.
- similar to the model "FN-Browning 1906".
- features include: blow back operated, left side thumb safety in front of grip plate, magazine safety, no sights, hammerless, butt magazine release.
- this firearm is differentiated from the Model 11, in that the Model 10 lacks both the grip safety and the loaded chamber indicator.

Manufacturer

- "MANUFACTURE D'ARMES DES PYRENEES, HENDAYE" is marked on the left side of the slide.

Action

- blowback operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number has been observed marked on the right rear of the receiver/frame on some examples and above the trigger on the right side of the receiver/frame on other examples.
Shots	- detachable box magazine.

Notes

Make

- "7.65 COURT 9 COUPS" and "UNIQUE" are marked on the left side of the slide.
- "MANUFACTURE D'ARMES DES PYRENEES, HENDAYE" is marked on the left side of the slide.
- "WaA251" German Army acceptance stamp may be marked on the right rear side of the receiver/frame on firearms manufactured from 1940 to 1945.

Model

- model designation not marked on firearm.
- manufactured from circa 1923 to 1940.
- there are physical differences between this design and the "Model 17 Kreigsmodell" which was also manufactured by the Germans during World War II.
- main physical factors is this is a hammerless design.
- a round insignia on the grip plates may read "7.65mm, 9 SCHUSS".

Manufacturer

- the manufacturer's name is marked on the left side of the slide.

Action

- blowback operated.

Serial Number

- serial number is marked on the right side of the receiver/frame.
- model "17" serial number range is from about 1 to 400,000.
- model "17 Kreigsmodell" serial number range is from 58,000 to 76,000.

Calibre

- "7.65mm COURT 9 COUPS UNIQUE" is marked on the left side of the slide.
- caliber designiation is marked on both grip plates.

23078 - 3	7.65MM	9	184	Prohibited CC 84(1) "prohibited firearm" para. (a)(ii)	Non-Commercial Customization	

Notes

Make

- "7.65 COURT 9 COUPS" and "UNIQUE" are marked on the left side of the slide.
- "MANUFACTURE D'ARMES DES PYRENEES, HENDAYE" is marked on the left side of the slide.
- "WaA251" or "WaAD20" German Army acceptance stamp is marked on the right rear side of the receiver/frame.

Model

- may also be known as "Kriegsmodell". It was given this German name when the firearm was manufactured by the occupying German forces during World War II.
- is based on the French "Model 17" design.
- "WaA251" or "WaAD20" German Army acceptance stamp is marked on the right rear side of the receiver/frame.
- physical differences between this design and the original "Model 17" design include: external hammer, prominent rounded rib added to lower backstrap to improve handling, slanted serrations on slide, fluted-type grip plates.
- "7.65mm" over "9 SCHUSS" may be marked inside a circle on the grip plates.
- production of this pistol took place during the period of German occupation of France, from 1940 to 1944, over which time the design changed. Initial 17 Kriegsmodell production was identical to the hammerless pre-war Unique 17, but later production changed to an exposed-hammer design that was continued by MAPF after World War Two as the "R17". Both of these versions can be recognized by German waffenampt eagle markings on the right tang.

Manufacturer

- "MANUFACTURE D'ARMES DES PYRENEES, HENDAYE" is marked on the left side of the slide.

Action

- blowback operated.

Notes

Make

- marked on right side of slide.

Model

- the Unique model "Corsair" line of pistols was the marketing name used by MAPF to market their Modele D series of handguns in North America. The Modele D is generally considered to be a European designation.
- model designation is marked on the left side of the slide.
- a deluxe version of this model known as the "Corsair Presentation" embellished with engraving was also available.
- chambered for 22 LR only.
- 217 & 230mm barrelled versions were considered to be target models and the barrels were produced with integral muzzle breaks.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- marked on right side of receiver.
Shots	- detachable box magazine.
Remarks	- the Corsair was the North American designation for the Unique Modele D series of pistols. The Modele D was produced in the following model/barrel combinations: D1 /78mm, D2 /108mm, D3 /210mm, D4 /217mm & 230mm. - North American research literature also refers to the following barrel lengths as available: 6"/152mm and 4-1/2" /114mm.

Notes

Model

- the model designation is located on the slide.
- blued finish, brown plastic grips, left grip comes with a thumb rest.
- was sold during 1955-65 in the USA under the name "Corsair".

Manufacturer

- Manufacture d'Armes de Pyrénées Françaises (MAPF) of Hendaye was established in 1923. Originaly located in Béhobie, five years later the company was relocated in Hendaye. MAPF was known for a number of brandnames, among which "Unique" was found. Prior to 1939 the company marketed firearms for domestic defence, police and military use. However since 1945 the company slowly turned toward the target type pistols.

Notes

Make

- "UNIQUE" was observed on the left side of the slide.

Model

- "DES/96-U" was observed on the right side of the slide.
- "DES/96-U" was manufactured from 1996 to 2002.
- this is a dedicated Olympic-class semi-auto target pistol, based on the earlier DES/69 U, redesigned with a box magazine that is inserted from the top of the pistol.
- in this design, the hammer is moved inside the frame, to the rear of a breechblock that slides on rails.
- features include: micrometer-adjustable open sights; a rocking lever-type safety/side hold-open on the right side of the frame above the trigger-guard; squared-off frame and barrel block; adjustable trigger; anatomical carved wooden grips with an adjustable heel-plate; magazine catch is on the left side of the grip, low in the butt; blued finish.
- available with various optional sleeve-type counter-weights.
- overall length with a 150 mm (5.9") barrel is 285 mm (11.2"), average weight is 1.14 kg (2.5 lbs) without counter-weight.

Manufacturer

- "UNIQUE" was observed on the left side of the slide.
- "UNIQUE" is a brand name of pistols manufactured by Manufacture d'Armes des Pyrenees Francaise.
- "Made in France" was observed marked on the top of the barrel.

Action

- blowback.

Serial Number

- serial number was observed on the right side of the receiver/frame.
- observed serial number consisted of six digits with no letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

- "armes Unique" is marked on the right side of the slide.
- "Unique" is a tradename used by "Manufacture d'Armes des Pyrenees Francaise" of Hendaye, B.P., France.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "Modele L" is marked on the left side of the slide. - introduced in 1955. - may also be known as "LD". - features include: open-topped slide/external hammer, steel or alloy receiver/frame. - this model is available with an accessory barrel/stock that changes the appearance to resemble a carbine. the pistol barrel is removed and the receiver and slide are inserted into the accessory rifle barrel and stock, to produce a ten-shot semi-automatic pistol-carbine with rifled barrel, open partridge sights, American walnut stock, and a receiver grooved for conventional scope mounts.
Manufacturer	- the manufacturer's name is not marked on the firearm. - "Manufacture d'Armes des Pyrenees Francaise" is located in Hendaye, B.P., France.
Action	- blowback operated.
Serial Number	- the serial number is normally marked on the right side of the receiver/frame.
Calibre	- calibre is normally marked on top of slide.
Shots	- detachable box magazine.
Canadian Law Comments	- this model remains a handgun under Canadian law even when in its carbine configuration.

- Turn bolt operated.

Serial Number

- The serial number is marked on the right side of the receiver/frame.
- The serial number of a referenced example consisted of six digits.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel	- The barrel length does not include any attached device such as flash-hider or muzzle brake.
Shots	- Detachable box magazine.
Canadian Law Comments	- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.
Other Markings	- French proof marks marked on the right side of the barrel.

27089 - 2	22 LR	10	601	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Unique" is marked on the right side of the barrel.
- "Unique" is a trademark/name used by "Manufacture d'Armes des Pyrenees Francaise (MAPF)" of Hendaye, B.P., France.
- "MAPF" has produced small-bore rifles and handguns since 1923.

Model

- "Modele X51" is marked on the right side of the barrel.
- "X51" is an interesting semi-auto design that can also function as a single-shot repeater, depending on the location of the selector switch, located forward of the trigger on the magazine housing; the rifle cocks in the same manner as the early Winchester Self-Loading Rifle, with a rod under the barrel that must be pushed back into the receiver/frame.

Manufacturer

- "Manufacture d'armes des pyrenees fses - HENDAYE - B.P - FRANCE" is marked on the left side of the barrel.
- "Manufacture d'Armes des Pyrenees Francaise" is located in Hendaye, B.P., France.

Action

- blowback operated.
- Note: can also be a single-shot repeater, depending on the position of the selector switch.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number is marked on the right side of the barrel.
Calibre	- the calibre designation is marked on the right side of the barrel as: "Automatique 22 Long Rifle".
Shots	- detachable box magazine.

Notes

Make

- the make name is marked as, "Unique Alpine, TPG 1, Made in Bavaria" on the left side of the firearm.

Model

- the model designation "TPG 1" may be marked on the left side of the firearm.
- this is a target rifle of unique appearance made specifically for ISU type target-shooting or tactical applications.
- features include: a bolt-action mechanism with an external hammer that can be cocked and de-cocked manually; a hexagonal receiver/frame drilled and tapped for scope mounts; free-floated and fluted stainless-steel barrel; three-lugged bolt with short bolt-throw; an ergonomic synthetic thumbhole stock with adjustable cheek piece and butt pad.
- the stock is made by CrossTech in Switzerland, and is available in a standard jet-black colour, as well as in yellow, blue, red, green and camouflage.
- this rifle is intended to use rapid interchange barrels in the various calibres except 338 Lapua Mag.
- a sound suppressor is available for this rifle when chambered in 308 WIN with an unfluted 450 mm barrel length, the length of the suppressor is 630 mm.
- the bench rest version is available as a single shot, solid bottom receiver/frame only or as a modular assembly that permits the operator to change the calibre (barrel and bolt) and to use a magazine well and a magazine.
- overall length is approximately 1,230mm (48 3/8"), average weight is 6.2kg (13.64 lbs).

Manufacturer

- the manufacturer's name, "Unique Alpine, Made in Bavaria", is marked on the left side of the firearm.
- Unique Alpine manufactures 300-metre ISU target rifles and stocks; their company logo consists of the words "UNIQUE ALPINE" and a short sword within a triangular lozenge.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- turn-bolt design.
Serial Number	- the serial number may be marked on the receiver/frame and on the right side of the barrel. - the serial number consists of an "AAB" prefix followed by four numbers.
Calibre	- the calibre designation is marked on the barrel. - rifling characteristics in calibre 223 REM: 6 grooves, 1 turn in 9 inches, right-hand twist. - rifling characteristics in calibre 243 WIN: 6 grooves, 1 turn in 10 inches, right-hand twist. - rifling characteristics in calibre 7MM-08 REM: 6 grooves, 1 turn in 9 inches, right-hand twist. - rifling characteristics in calibre 308 WIN: 6 grooves, 1 turn in 12 inches, right-hand twist. - rifling characteristics in calibre 308 WIN: 6 grooves, 1 turn in 10 inches (in 450mm barrel length only), right-hand twist. - rifling characteristics in calibre 6.5X55 SWEDISH MAUSER: 6 grooves, 1 turn in 8 inches, right-hand twist. - rifling characteristics in calibre 300 WIN MAG: 6 grooves, 1 turn in 10 inches, right-hand twist. - rifling characteristics in calibre 300 REM ULTRA MAG: 6 grooves, 1 turn in 10 inches, right-hand twist. - rifling characteristics in calibre 338 LAPUA MAG: 6 grooves, 1 turn in 10 inches, right-hand twist. - rifling characteristics in calibre 22 PPC: 6 grooves, 1 turn in 14 inches, right-hand twist. - rifling characteristics in calibre 6MM NORMA BR: 6 grooves, 1 turn in 8 inches, right-hand twist.
Shots	- detachable box magazine; available in capacities of 3, 5, or 10 shots.
Canadian Law Comments	- a removable sound suppressor/silencer is available for this firearm. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada. - when the sound suppressor/silencer (prohibited device) is removed from the barrel the firearm is correctly identified as a "Non Restricted Firearm".

120412 - 1	22 LR	1	500	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "UNITED ARMS CO. CHICAGO 20." is marked on the left side of the receiver/frame.
- "MADE IN GERMANY " is marked on the right side of the receiver/frame.
- "United Arms Company" was located in Chicago, Illinois, U.S.A. circa the mid 1950s.
- "United Arms Company" was a mail order distributor who sold products under the following names: United Arms Company, United Binocular Company, United Knife Company, United Products Company, Mid-West Crossbow Company, Mid-West Knife Company, Grandpa's Shop, and Grandps's Knife Shop.

Model

- turn bolt operated, single shot rifle with manually cocked striker.
- very similar in appearance to the Hoban Model 45 or a miniature, Italian Carcano rifle with a one piece military style stock, wooden handguard over the top of the barrel which is secured at the front by a metal barrel band, has a sheet metal imitation box magazine located in front of the trigger guard which is welded to the underside of the receiver/frame and a 'dummy' recoil bolt through the stock, under the breech end of the barrel.
- blade front sight, elevation adjustable rear sight.
- blued finish.

Action

- turn bolt operated.

Notes

Make

- "UNITED DEFENSE", "UNITED DEFENSE MANUFACTURING CORP.", "UDMC", or the United Defense logo of crosshairs surrounded by three swirls, all within a shield, is marked on the firearm.
- the United Defense Manufacturing Corporation was founded in 2006, in Paranaque City, the Philippines, to produce military and civilian firearms.

Model

- "S7" is marked on the left side of the magazine well.
- this is an AR-15-pattern rifle, enlarged to accept the 7.62 NATO cartridge, produced in both gas-impingement and piston operated designs, in a range of barrel lengths.
- United Defense also produces semi-automatic-only versions of this rifle for export and commercial sales.
- features include: standard AR-15/AR-10 layout and operation; anodized/phosphated and synthetic furniture in various colours; flat-top upper with Picatinny rail; flash-hider/muzzle brake; ventilated aluminium forearm; and a buttstock with an adjustable cheekpiece and folding monopod.

Manufacturer

- "UNITED DEFENSE", "UNITED DEFENSE MANUFACTURING CORP.", "UDMC", or the United Defense logo of crosshairs surrounded by three swirls, all within a shield, is marked on the firearm.
- the United Defense Manufacturing Corporation was founded in 2006, in Paranaque City, the Philippines, to produce military and civilian firearms.

Action

- gas-operated.

Serial Number

- serial-numbered on the receiver/frame.

Shots

- detachable box magazine.

Notes

Make

- "UNITED SPORTING ARMS" is marked on the left side of the receiver/frame.

Model

- manufactured from 1981 to 1986.
- "SEVILLE" is marked on the left side of the barrel.
- "Seville" resembles a Colt model 1873 Single Action Army revolver.
- features include: carbon steel or stainless steel construction; fixed ramp front sight with red insert and an adjustable rear sight; solid top receiver/frame with removable fluted cylinder and right side loading gate; exposed spur hammer; single action trigger mechanism; brass or steel backstrap; smooth walnut, Pachmayr or thumbrest grip; blued or satin stainless finish.
- "Seville" is available in a "Seville Sheriff" model with a 89 mm (3 1/2") barrel and the "Seville Silhouette" model with a 267 mm (10 1/2") barrel.

Manufacturer

- "UNITED SPORTING ARMS" is marked on the left side of the receiver/frame.

Serial Number

- serial number is marked on the right side of the receiver/frame.
- observed serial number consisted of a two number "44" prefix, a dash (-), four numbers, and a letter "T" suffix.

Barrel

- Seville Single Action Revolver was available in the following barrel lengths: 64 mm (2 1/2"), 89 mm (3 1/2"), 117 mm (4 5/8"), 140 mm (5 1/2"), 165 mm (6 1/2"), 191 mm (7 1/2"), and 267 mm (10 1/2").

Calibre

- calibre is marked on the left side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - removable cylinder.

- "U.S. FIREARMS MFG. Co." or "U.S.F.A. MFG. Co." and "HARTFORD CT. U.S.A." or "HARTFORD CONN. U.S.A." may be marked on the firearm.
- "U.S.F.A. MFG. Co." is the abbreviation for United States Fire Arms Manufacturing Company.

Model

- this is a modern reproduction of Colt's 1873 Single Action Army revolver with a long non-standard barrel, commonly known as the "Buntline Special", after an Old West lawman called Ned Buntline, who first ordered a revolver on this pattern.
- these revolvers can be ordered with a detachable cast-bronze, nickel-plated skeletonized shoulder-stock, which can be taken off and replaced at will.
- can be ordered blued, engraved, in the white for personal engraving, nickeled, or colour-case-hardened, with blued barrel, cylinder, and grip frame.
- these revolvers can be ordered with a wide variety of personalized custom touches, including choice of grip material, custom serial numbers, the amount and style of engraving, precious metal inlays, etc.

Action

- single-action revolver.

Serial Number

- marked on receiver/frame.

Notes

Make

- "U.S. FIREARMS MFG. Co." or "U.S.F.A. MFG. Co." and "HARTFORD CT. U.S.A." or "HARTFORD CONN. U.S.A." may be marked on the firearm.
- "U.S.F.A. MFG. Co." is the abbreviation for United States Fire Arms Manufacturing Company.

Model

- introduced in 2000.
- partial model designation may be marked on the firearm.
- features include: brushed polished steel receiver/frame, ejector, solid walnut grips and a front blade sight.
- this model is extensively cutaway to reveal the internal mechanism and its function.
- this firearm's receiver/frame has not been sufficiently deactivated as to prevent its further use as the master component of a firearm; for this reason this firearm has been assigned to the legal classification of "Restricted".

Serial Number

- serial number is located on the underside of the receiver/frame.

Other Markings

- patent dates are marked on the left side of the receiver/frame.

Remarks

- factory literature warns that this model is not to be fired.

Notes

Make

- "U.S. FIREARMS MFG. Co." or "U.S.F.A. MFG. Co." and "HARTFORD CT. U.S.A." or "HARTFORD CONN. U.S.A." is usually marked on the firearm.
- "U.S.F.A. MFG. Co." is the abbreviation for United States Fire Arms Manufacturing Company.

Model

- the model designation may not be marked on the firearm.
- this firearm is a close copy of the Colt 1873 Single Action Army, and replicates nearly all original Colt features.
- features include: blade front sight; square notch rear sight formed as part of the top strap of the receiver/frame; fluted cylinder; antique patina finish on all metal surfaces; rubber grip panels; right side, receiver/frame mounted swing-out loading gate; under-barrel mounted, spring loaded ejection rod; spur hammer.

Manufacturer

- the manufacturer's logo of "US" in an oval is marked on the grip panels.
- the manufacturer's name may also be marked on the firearm as "U.S. FIREARMS MFG. Co." or "U.S.F.A. MFG. Co." and "HARTFORD CT. U.S.A." or "HARTFORD CONN. U.S.A."
- "U.S.F.A. MFG. Co." is the abbreviation for United States Fire Arms Manufacturing Company.

Action

- single action.

Serial Number

- the serial number is marked on the receiver/frame.
- USFA used the serial number range from the first generation Colt 1873 Single Action Army beginning around 55,XXX, or a customized serial number as requested by the customer.

Calibre

- the calibre designation is marked on the left side of the barrel.

Other Markings

- "PAT. SEPT,19,1871, JULY,2-72, JAN,19-75" is usually marked on the left side of the receiver/frame below the cylinder.

Notes

Make

- "U.S. FIREARMS MFG. Co." or "U.S.F.A. MFG. Co." and "HARTFORD CT. U.S.A." or "HARTFORD CONN. U.S.A." may be marked on the firearm.
- "U.S.F.A. MFG. Co." is the abbreviation for United States Fire Arms Manufacturing Company.

Model

- this is a modern reproduction of the military issue 1873 Colt Single Action Army revolver issued under the authority of Henry Nettleton, the original US Army Ordnance Inspector for Springfield Armory; original revolvers are highly prized collector's items.
- features include: colour-case-hardened receiver/frame; deeply blued barrel, cylinder, and grip frame.
- these revolvers are marked with the cartouche of Henry Nettleton, and are serial numbered within the specific range of revolvers that Mr. Nettleton would have originally inspected.

Serial Number

- marked on the receiver/frame; serial numbers run from 47056 through 51083.

Notes

Make

- "U.S. FIREARMS MFG. Co." or "U.S.F.A. MFG. Co." and "HARTFORD CT. U.S.A." or "HARTFORD CONN. U.S.A." may be marked on the firearm.
- "U.S.F.A. MFG. Co." is the abbreviation for United States Fire Arms Manufacturing Company.

Model

- this is a modern reproduction of the Colt 1873 Single Action Army, built in a "deluxe" version for shooters and collectors.
- features include: full blued or nickeled finish, or colour-case-hardened receiver/frame with blued barrel and cylinder; fixed sights; screw in or spring loaded cross-pin retained cylinder axis pin and the customer's choice of grip materials (standard is a hard rubber grip with "US" and a martial eagle on them, but also available in walnut, pearl, stag, or ivory).

Serial Number

- numbered on receiver/frame, rationalization unknown.

Barrel

- other barrel lengths available on special order.

Notes

Make

- "U.S. FIREARMS MFG. Co." or "U.S.F.A. MFG. Co." and "HARTFORD CT. U.S.A." or "HARTFORD CONN. U.S.A." may be marked on the firearm.
- "U.S.F.A. MFG. Co." is the abbreviation for United States Fire Arms Manufacturing Company.

Model

- this is a modern reproduction of Colt's 1873 Single Action Army revolver (Pre-War), as produced in Hartford prior to the Second World War.
- features include: colour-case-hardened receiverframe, with deeply blued barrel, cylinder, and grip frame, and the customer's choice of grip materials (standard is hard rubber grips with "US" and a martial eagle on them, but also available in walnut, pearl, stag, or ivory).

Serial Number

- marked on the receiver/frame, rationalization unknown.

Barrel

- other barrel lengths are available on special order.

Notes

Make

- "U.S. FIREARMS MFG. Co." or "U.S.F.A. MFG. Co." and "HARTFORD CT. U.S.A." or "HARTFORD CONN. U.S.A." may be marked on the firearm.
- "U.S.F.A. MFG. Co." is the abbreviation for United States Fire Arms Manufacturing Company.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- this is a modern reproduction of Colt's 1894 Bisley Single Action Army revolver, with a rounded or flat topped receiver/frame, a German silver front sight blade, and drift adjustable rear sight (flat top only). - these revolvers are finished in a complete deep blue, or with a colour-case-hardened receiver/frame and deeply blued barrel, cylinder, and grip frame, or can be ordered with gold, silver, or nickel-plating. - these revolvers are also available with the standard 1873 Single Action Army style grip frames as the "Colt 1873 Single Action Army Flattop Reproduction".
Serial Number	- numbered on the receiver/frame, rationalization unknown.
Barrel	- other barrel lengths available on special order.
Calibre	- calibre designation may be marked on the barrel.

Notes

Make

- "U.S.F.A. MFG. CO." was observed marked on the left side of the slide.
- United States Fire Arms Manufacturing Company's logo of the letters "US" inside a circle may be marked on the side of the slide.

Model

- "MODEL OF 1911. U.S. ARMY" is marked on the right side of the slide.
- "PATENTED" over "APR. 20. 1897. SEPT. 9. 1902. DEC. 19. 1905" is marked on the left side of the slide.
- "UNITED STATES PROPERTY" is marked on the left side of the receiver/frame.
- introduced in 2006.
- this is a reproduction of the Colt model 1911 U.S. Army.
- this firearm incorporates features of both the 1911 and 1911A1 models.
- features include: high polish blued finish; grip safety; flat main-spring housing; manual safety; disconnector safety; fixed sights on the slide; and a slide-hold-open latch that engages after the last shot, or which may be manually engaged; diamond-checkered walnut grips.

Manufacturer

- "U.S.F.A. MFG. CO." over "HARTFORD, CT. U.S.A." is marked on the left side of the slide.

Action

- recoil operated.

Serial Number

- serial number is marked on the left side of the receiver/frame.

Shots

- detachable box magazine housed in the grip.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- "UNITED STATES PROPERTY" was observed marked on the side of the receiver/frame.
- "US" within a circle was observed marked on the side of the slide near the grip serrations.
- "PATENTED" over "APR.20.1897. SEPT.9.1902.DEC.19.1905" was observed marked on the side of the slide.

- "U.S. FIREARMS MFG. Co." or "U.S.F.A. MFG. Co." and "HARTFORD CT. U.S.A." or "HARTFORD CONN. U.S.A." may be marked on the firearm.
- "U.S.F.A. MFG. Co." is the abbreviation for United States Fire Arms Manufacturing Company.

Model

- this is a modern reproduction of one of the earliest successful attempts to produce a reliable handgun that could use self contained metallic cartridges.
- the revolver being reproduced started out as a Colt model 1851 Navy percussion handgun, but was fitted with an adaptor kit invented by Charles Richards, a Colt employee.
- this conversion process replaced the barrel, cylinder, and loading ram with a new barrel, new cylinder, and ejector rod, and made reloading much faster and easier.
- can be ordered blued or colour-case-hardened, with a blued barrel, cylinder, and silver plated grip frame.

Serial Number

- marked on the receiver/frame, rationalization unknown.

Notes

Make

- "U.S. FIREARMS MFG. Co." or "U.S.F.A. MFG. Co." and "HARTFORD CT. U.S.A." or "HARTFORD CONN. U.S.A." may be marked on the firearm.
- "U.S.F.A. MFG. Co." is the abbreviation for United States Fire Arms Manufacturing Company.

Model

- introduced in 2000.
- this is a modern reproduction reminiscent of the Colt produced 1973 Single Action Army revolver with a bird's-head grip frame and a tang at the top rear of the grip.
- this revolver has fixed sights (blade front and slot in the frame), a "Bisley" style curved hammer, and a lanyard ring at the butt.
- can be ordered blued, engraved, in the white for personal engraving, nickeled, or colour-case-hardened, with blued barrel, cylinder, and grip frame.
- depending on the barrel length, these revolvers can be ordered with or without an ejector rod, and with extra cylinders in a calibre compatible with the barrel (ie. 45 AUTO and 45 COLT, 44 SPL and 44 RUSSIAN, etc.)
- these revolvers can be ordered with a wide variety of personalized custom touches, including choice of grip material, custom serial numbers, the amount and style of engraving, precious metal inlays, etc.

Serial Number

- marked on the receiver/frame, rationalization unknown.

Calibre

- 45 COLT is offered as the standard calibre, other calibres are optional.

Notes

Make

- "U.S. FIREARMS MFG. Co." or "U.S.F.A. MFG. Co." and "HARTFORD CT. U.S.A." or "HARTFORD CONN. U.S.A." may be marked on the firearm.
- "U.S.F.A. MFG. Co." is the abbreviation for United States Fire Arms Manufacturing Company.

Model

- introduced in 2000.
- this is a short barreled, modern reproduction reminiscent of the Colt produced 1973 Single Action Army revolver with a bird's-head grip frame and a tang at the top rear of the grip.
- this revolver has fixed sights (blade front and slot in the receiver/frame), a "Bisley" style curved hammer, and a lanyard ring at the butt.
- can be ordered blued, engraved, in the white for personal engraving, nickeled, or colour-case-hardened, with blued barrel, cylinder, and grip frame.
- these revolvers can be ordered with a wide variety of personalized custom touches, including choice of grip material, custom serial numbers, the amount and style of engraving, precious metal inlays, etc.

Serial Number

- marked on the receiver/frame, rationalization unknown.

- "ZIP TM" is marked on both sides of the firearm.
- "ZIP" is a registered trademark used by United States Fire Arms (USFA).
- "ZIP" model is a striker fired, semi-automatic pistol with a modular design; through the use of a "crossover module", the single-shot "Zip SSE" may be converted to a semi-automatic "Zip", and vice-versa.
- features include: steel, rifled, interchangeable barrel with a polymer shroud; clam shell type polymer receiver/frame with an interchangeable top plate assembly, right side ejection port, and an integral equipment rail; interchangeable top plate assembly may have fixed sights, night sights; loading lever is mounted on the left side of the barrel; re-strike cocking lever is mounted on the right side of the barrel; cross bolt safety; magazine release is mounted on the bottom rear of the magazine well.
- "ZIP" model is available in black, blue, grey, and tan.
- "ZIP" model is available with a sound suppressor/silencer barrel kit.
- "ZIP" model is available with a detachable full length stock assembly and when attached to the handgun resembles a short barrel rifle (SBR).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "USFA" over "ZIP TM" and ".22 Long Rifle" are marked on the left side of the receiver/frame. - "ZIP TM .22 L.R. USFA HARTFORD CT USA" and "ZIPFACTORY.COM" are marked on the right side of the receiver/frame. - "USFA" is the abbreviation for United States Fire Arms Manufacturing Company. - "Zip Factory" is a Division of United States Fire Arms Manufacturing Company.
Action	- blowback operated.
Shots	- detachable rotary box magazine. - accepts Ruger model 10/22 style magazines.
Canadian Law Comments	- as it left the factory, this firearm may be equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada. - when the sound suppressor/silencer (prohibited device) is removed from the firearm, the firearm is correctly identified as a "Restricted Firearm".

- "I Won't Be Wronged, I Won't Be Insulted" and "John Wayne/s" signature is marked on the left barrel.
- "John Wayne's" portrait is laser-engraved on the right side of the buttstock.
- "John Wayne's" silhouette is engraved on the butt plate.
- "JW" and a number from "0001" to " 2500" is engraved on the underside of the receiver/frame. "JW-0001" is the John Wayne Coach Gun's Edition Number.
- 2,500 John Wayne Coach Guns were authorized by the John Wayne Family in 2005.
- this is a conventional side by side box lock shotgun with side plates and exposed spur hammers.
- features include: round side by side smoothbore barrels with a bead front sight; front hinged receiver/frame with a top tang mounted break open lever and safety; side plates with exposed hammers; double gold plated triggers; automatic ejectors; checkered walnut forearm and semi-pistol grip buttstock with a steel butt plate; blued and gold metal finish.

Manufacturer

- "Baikal" is marked on the underside of the barrel rib.
- "Baikal" is a trade name that has been used by a consortium of various Soviet Arsenals and is currently utilized by Izhevsky Mekhanichesky Zavod (Izhmech).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- side by side barrel configuration, hinged barrel design.
Serial Number	- serial number is marked on the top tang of the receiver/frame, under the break open/action release lever. - observed serial number consisted of seven numbers and a letter suffix.
Calibre	- gauge and chamber length are marked on the barrel rib.

Notes

Make

- "UNIVERSAL" is a brand name used by "Universal Firearms Corporation" which was in business as a manufacturer and distributor from 1958 to 1987.
- "Universal" did business under the following variations in company identity ("Universal Corporation / Universal Firearms Corporation / Universal Sporting Goods / Universal Enterprising Sales") all of which were located in Hialeah, Florida, USA until the Company was purchased by Iver Johnson Arms of Jacksonville, Arkansas U.S.A. in 1983.
- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Model

- this is a variant of the standard U.S. military M1 Carbine.
- "US CARBINE" with "CAL.30 M1" or variation thereof may be marked on the top of the receiver/frame in front of the ejection opening.
- features include: blued finish on the receiver/frame and round barrel; fixed front sight; knob adjustable rear sights; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; fixed wooden pistol grip stock with wooden upper handguard; left side mounted front sling swivel; inletted oil holder/sling attachment at the buttstock; G.I type front barrel band which may include a bayonet lug; may feature a convertible gas system.
- overall length with a 457mm (18") barrel is 903.73mm (35.58") and average weight is 2.49kgs (5.5lbs).

Manufacturer

- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- gas operated.
- Universal patented a method of easily converting all of its carbines and pistols from semi-automatic repeaters into single shot, bolt action repeaters. This conversion which It is a reversible procedure can be performed by the individual owner simply by removing the gas piston plug and turning it 180 degrees before re-installing it. This effectively cut off the gas system rendering the firearm a single shot. While this feature is interesting it does not change the basic action type which is Semi-Automatic.

Serial Number

- serial number is usually found on the top rear of the receiver/frame or on the side of the receiver/frame at the chamber area.
- the serial number may be obscured by the rear sight.
- serial numbers can sometimes be used to indicate a manufacturer or distinct model.
- "Pat. 3,382.766" may be found marked on several different models of Universal M1 Carbine receiver/frames. It is not a serial number.

Calibre

- "CAL.30 M1" is marked on the receiver/frame.

Shots

- detachable box magazine.

Remarks

-manufacturer's names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fittings, sights, etc. may also confuse the issue of specific model identification.

Notes

Make

- "UNIVERSAL" is a brand name used by "Universal Firearms Corporation" which was in business as a manufacturer and distributor from 1958 to 1987.
- "Universal" did business under the following variations in company identity ("Universal Corporation / Universal Firearms Corporation / Universal Sporting Goods / Universal Enterprising Sales") all of which were located in Hialeah, Florida, USA until the Company was purchased by Iver Johnson Arms of Jacksonville, Arkansas U.S.A. in 1983.
- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Model

- this is a variant of the standard U.S. military M1 Carbine.
- this is a version of the Model 1003 that comes with a factory mounted telescopic sight.
- "US CARBINE" with "CAL.30 M1" or variation thereof may be marked on the top of the receiver/frame in front of the ejection opening.
- features include: satin blued finish on the receiver/frame and round barrel; fixed front sight; knob adjustable rear sights; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; fixed birch hardwood pistol grip stock with perforated metal handguard; left side mounted front sling swivel; inletted oil holder/ sing attachment at the buttstock; G.I type front barrel band which may include a bayonet lug; may feature a convertible gas system.
- overall length with a 457mm (18") barrel is 903.73mm (35.58") and average weight is 2.49kgs (5.5lbs).

Manufacturer

- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- gas operated. - Universal patented a method of easily converting all of its carbines and pistols from semi-automatic repeaters into single shot, bolt action repeaters. This conversion which is a reversible procedure can be performed by the individual owner simply by removing the gas piston plug and turning it 180 degrees before re-installing it. This effectively cut off the gas system rendering the firearm a single shot. While this feature is interesting it does not change the basic action type which is Semi-Automatic.
Serial Number	- serial number is usually found on the top rear of the receiver/frame or on the side of the receiver/frame at the chamber area. - the serial number may be obscured by the rear sight. - serial numbers can sometimes be used to indicate a manufacturer or distinct model. - "Pat. 3,382.766" may be found marked on several different models of Universal M1 Carbine receiver/frames. It is not a serial number.
Barrel	- longer barrels exist.
Calibre	- "CAL.30 M1" is marked on the receiver/frame.
Shots	- detachable box magazine.
Remarks	- manufacturer's names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fittings, sights, etc. may also confuse the issue of specific model identification.

Notes

Make

- "UNIVERSAL" is a brand name used by "Universal Firearms Corporation" which was in business as a manufacturer and distributor from 1958 to 1987.
- "Universal" did business under the following variations in company identity ("Universal Corporation / Universal Firearms Corporation / Universal Sporting Goods / Universal Enterprising Sales") all of which were located in Hialeah, Florida, USA until the Company was purchased by Iver Johnson Arms of Jacksonville, Arkansas U.S.A. in 1983.
- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Model

- this is a variant of the standard U.S. military M1 Carbine.
- this is a deluxe version of the Model 1003.
- "US CARBINE" with "CAL.30 M1" or variation thereof may be marked on the top of the receiver/frame in front of the ejection opening.
- features include: highly-polished bluing on the receiver/frame and round barrel; fixed front sight; knob adjustable rear sights; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; an operating slot cut out of the slide on the right side; glossy Monte-Carlo walnut stock and matching handguard; patented front barrel nut assembly for a free floated barrel; receiver/frame is drilled and tapped and stock is inletted for a side mount ed scope; may be fitted with a plastic spacer in place of a scope; may feature a convertible gas system.
- overall length with a 457mm (18") barrel is 903.73mm (35.58") and average weight is 2.95kgs (6.5lbs).

Manufacturer

- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- gas operated.
- Universal patented a method of easily converting all of its carbines and pistols from semi-automatic repeaters into single shot, bolt action repeaters. This conversion which is a reversible procedure can be performed by the individual owner simply by removing the gas piston plug and turning it 180 degrees before re-installing it. This effectively cut off the gas system rendering the firearm a single shot. While this feature is interesting it does not change the basic action type which is Semi-Automatic.

Serial Number

- serial number is usually found on the top rear of the receiver/frame or on the side of the receiver/frame at the chamber area.
- the serial number may be obscured by the rear sight.
- serial numbers can sometimes be used to indicate a manufacturer or distinct model.
- "Pat. 3,382.766" may be found marked on several different models of Universal M1 Carbine receiver/frames. It is not a serial number.

Barrel

- longer barrels exist.

Calibre

- "CAL.30 M1" is marked on the receiver/frame.

Shots

- detachable box magazine.

Remarks

- manufacturer's names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. 27464 - 3	30 CARBINE	30	457	Prohibited PFR, Part 1, para. 236(z.44)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "UNIVERSAL" is a brand name used by "Universal Firearms Corporation" which was in business as a manufacturer and distributor from 1958 to 1987.
- "Universal" did business under the following variations in company identity ("Universal Corporation / Universal Firearms Corporation / Universal Sporting Goods / Universal Enterprising Sales") all of which were located in Hialeah, Florida, USA until the Company was purchased by Iver Johnson Arms of Jacksonville, Arkansas U.S.A. in 1983.
- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Model

- this is a commercial variant of the standard U.S. military M1 Carbine.
- "US CARBINE" with "CAL.30 M1" or variation thereof may be marked on the top of the receiver/frame in front of the ejection opening.
- features include: nickel plated finish on the receiver/frame and round barrel; fixed front sight; knob adjustable rear sights; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; standard or deluxe Monte Carlo walnut pistol grip stock with matching wood handguard; left side mounted front sling swivel; Universal's patented front barrel band; may feature a convertible gas system.
- overall length with a 457mm (18") barrel is 903.73mm (35.58") and average weight is 2.49kgs (5.5lbs).

Manufacturer

- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- gas operated.
- Universal patented a method of easily converting all of its carbines and pistols from semi-automatic repeaters into single shot, bolt action repeaters. This conversion which is a reversible procedure can be performed by the individual owner simply by removing the gas piston plug and turning it 180 degrees before re-installing it. This effectively cut off the gas system rendering the firearm a single shot. While this feature is interesting it does not change the basic action type which is Semi-Automatic.

Serial Number

- serial number is usually found on the top rear of the receiver/frame or on the side of the receiver/frame at the chamber area.
- the serial number may be obscured by the rear sight.
- serial numbers can sometimes be used to indicate a manufacturer or distinct model.
- "Pat. 3,382.766" may be found marked on several different models of Universal M1 Carbine receiver/frames. It is not a serial number.

Barrel

- longer barrels exist.

Calibre

- "CAL.30 M1" may be marked on the receiver/frame.

Shots

- detachable box magazine.

Remarks

-manufacturer's names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fittings, sights, etc. may also confuse the issue of specific model identification.

Notes

Make

- "UNIVERSAL" is a brand name used by "Universal Firearms Corporation" which was in business as a manufacturer and distributor from 1958 to 1987.
- "Universal" did business under the following variations in company identity ("Universal Corporation / Universal Firearms Corporation / Universal Sporting Goods / Universal Enterprising Sales") all of which were located in Hialeah, Florida, USA until the Company was purchased by Iver Johnson Arms of Jacksonville, Arkansas U.S.A. in 1983.
- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Model

- this is a commercial variant of the standard U.S. military M1 Carbine.
- "US CARBINE" with "CAL.30 M1" or variation thereof may be marked on the top of the receiver/frame in front of the ejection opening.
- features include: gold plated finish on the receiver/frame and round barrel; fixed front sight; knob adjustable rear sights; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; standard or deluxe Monte Carlo walnut pistol grip stock with matching wood handguard; left side mounted front sling swivel; Universal's patented front barrel band; may feature a convertible gas system.
- overall length with a 457mm (18") barrel is 903.73mm (35.58") and average weight is 2.49kgs (5.5lbs).

Manufacturer

- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- gas operated. - Universal patented a method of easily converting all of its carbines and pistols from semi-automatic repeaters into single shot, bolt action repeaters. This conversion which is a reversible procedure can be performed by the individual owner simply by removing the gas piston plug and turning it 180 degrees before re-installing it. This effectively cut off the gas system rendering the firearm a single shot. While this feature is interesting it does not change the basic action type which is Semi-Automatic.
Serial Number	- serial number is usually found on the top rear of the receiver/frame or on the side of the receiver/frame at the chamber area. - the serial number may be obscured by the rear sight. - serial numbers can sometimes be used to indicate a manufacturer or distinct model. - "Pat. 3,382.766" may be found marked on several different models of Universal M1 Carbine receiver/frames. It is not a serial number.
Barrel	- longer barrels do exist, and many re-barreled rifles have been "de-registered".
Calibre	- "CAL.30 M1" may be marked on the receiver/frame.
Shots	- detachable box magazine.
Remarks	-manufacturer's names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fittings, sights, etc. may also confuse the issue of specific model identification.

Make

- "UNIVERSAL" is a brand name used by "Universal Firearms Corporation" which was in business as a manufacturer and distributor from 1958 to 1987.
- "Universal" did business under the following variations in company identity ("Universal Corporation / Universal Firearms Corporation / Universal Sporting Goods / Universal Enterprising Sales") all of which were located in Hialeah, Florida, USA until the Company was purchased by Iver Johnson Arms of Jacksonville, Arkansas U.S.A. in 1983.
- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Model

- this is a commercial variant of the standard U.S. military M1 Carbine.
- "US CARBINE" with "CAL.30 M1" or variation thereof may be marked on the top of the receiver/frame in front of the ejection opening.
- features include: azure blue Teflon finish on the receiver/frame and round barrel; fixed front sight; knob adjustable rear sights; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; standard or deluxe Monte Carlo walnut pistol grip stock with matching wood handguard; left side mounted front sling swivel; Universal's patented front barrel band; may feature a convertible gas system.
- overall length with a 457mm (18") barrel is 903.73mm (35.58") and average weight is 2.49kgs (5.5lbs).

Manufacturer

- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- gas operated.
- Universal patented a method of easily converting all of its carbines and pistols from semi-automatic repeaters into single shot, bolt action repeaters. This conversion which is a reversible procedure can be performed by the individual owner simply by removing the gas piston plug and turning it 180 degrees before re-installing it. This effectively cut off the gas system rendering the firearm a single shot. While this feature is interesting it does not change the basic action type which is Semi-Automatic.

Serial Number

- serial number is usually found on the top rear of the receiver/frame or on the side of the receiver/frame at the chamber area.
- the serial number may be obscured by the rear sight.
- serial numbers can some times be used to indicate a manufacturer or distinct model.
- "Pat. 3,382.766" is marked on several different models of Universal M1 Carbine receiver/frames and is not a serial number.

Calibre

- "CAL.30 M1" be marked on the receiver/frame.

Shots

- detachable box magazine.

Remarks

- manufacturer names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fittings, sights, etc. may also confuse the issue of specific model identification.

Notes

Make

- "UNIVERSAL" is a brand name used by "Universal Firearms Corporation" which was in business as a manufacturer and distributor from 1958 to 1987.
- "Universal" did business under the following variations in company identity ("Universal Corporation / Universal Firearms Corporation / Universal Sporting Goods / Universal Enterprising Sales") all of which were located in Hialeah, Florida, USA until the Company was purchased by Iver Johnson Arms of Jacksonville, Arkansas U.S.A. in 1983.
- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Model

- this is a commercial variant of the standard U.S. military M1 Carbine.
- "CAL.30 M1" or variation thereof may be marked on the top of the receiver/frame in front of the ejection opening.
- features include: high gloss bright blue finish on the receiver/frame and round barrel; blued adjustable rear sights; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; oil finished Monte Carlo Blonde walnut stock with matching handguard; Universal patented front barrel band with ramped gold bead front sight; may feature a convertible gas system; drilled and tapped for scope mounts.
- overall length with a 457mm (18") barrel is 903.73mm (35.58") and average weight is 2.49kgs (5.5lbs).

Manufacturer

- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- gas operated. - Universal patented a method of easily converting all of its carbines and pistols from semi-automatic repeaters into single shot, bolt action repeaters. This conversion which is a reversible procedure can be performed by the individual owner simply by removing the gas piston plug and turning it 180 degrees before re-installing it. This effectively cut off the gas system rendering the firearm a single shot. While this feature is interesting it does not change the basic action type which is Semi-Automatic.
Serial Number	- serial number is usually found on the top rear of the receiver/frame or on the side of the receiver/frame at the chamber area. - the serial number may be obscured by the rear sight. - serial numbers can sometimes be used to indicate a manufacturer or distinct model. - "Pat. 3,382.766" is marked on several different models of Universal M1 Carbine receiver/frames and is not a serial number.
Barrel	- longer barrels do exist, and many re-barreled rifles have been "de-registered".
Calibre	- "CAL.30 M1" may be marked on the receiver/frame.
Shots	- detachable box magazine.
Remarks	- manufacturer's names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fittings, sights, etc. may also confuse the issue of specific model identification.

Notes

Make

- "UNIVERSAL" is a brand name used by "Universal Firearms Corporation" which was in business as a manufacturer and distributor from 1958 to 1987.
- "Universal" did business under the following variations in company identity ("Universal Corporation / Universal Firearms Corporation / Universal Sporting Goods / Universal Enterprising Sales") all of which were located in Hialeah, Florida, USA until the Company was purchased by Iver Johnson Arms of Jacksonville, Arkansas U.S.A. in 1983.
- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Model

- the model designation appears on the side of the barrel.
- features: over and under barrels with ventilated rib, bead front and intermediate sight and extractors; front hinged receiver/frame with top tang mounted break open lever and automatic safety; box lock; hammerless; single selective trigger; checkered European walnut forearm and pistol grip buttstock with recoil pad.

Action

- over and under.

Serial Number

- serial number is marked on the receiver/frame, under the break open lever.
- observed serial number consisted of five sequential numbers without a letter prefix or suffix.

Calibre

- gauge and barrel length may be marked on the side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - Italian proof marks on barrels and receiver.

Notes

Make

- "UNIVERSAL" is a brand name used by "Universal Firearms Corporation" which was in business as a manufacturer and distributor from 1958 to 1987.
- "Universal" did business under the following variations in company identity ("Universal Corporation / Universal Firearms Corporation / Universal Sporting Goods / Universal Enterprising Sales") all of which were located in Hialeah, Florida, USA until the Company was purchased by Iver Johnson Arms of Jacksonville, Arkansas U.S.A. in 1983.
- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Model

- this is a commercial variant of the standard U.S. military M1 Carbine.
- "FERRET" or variation thereof may be marked on the top of the receiver/frame in front of the ejection opening.
- features include: high gloss blue finish on the receiver/frame and round barrel; fixed front sight; knob adjustable rear sights; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; deluxe Monte Carlo walnut pistol grip stock with matching wood handguard; left side mounted front sling swivel; Universal's patented front barrel band; may feature a convertible gas system. Originally supplied with scope and mount. May not have sights installed.
- overall length with a 457mm (18") barrel is 903.73mm (35.58") and average weight is 2.49kgs (5.5lbs).

Manufacturer

- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- gas operated. - Universal patented a method of easily converting all of its carbines and pistols from semi-automatic repeaters into single shot, bolt action repeaters. This conversion which is a reversible procedure can be performed by the individual owner simply by removing the gas piston plug and turning it 180 degrees before re-installing it. This effectively cut off the gas system rendering the firearm a single shot. While this feature is interesting it does not change the basic action type which is Semi-Automatic.
Serial Number	- serial number is usually found on the top rear of the receiver/frame or on the side of the receiver/frame at the chamber area. - the serial number may be obscured by the rear sight. - serial numbers can sometimes be used to indicate a manufacturer or distinct model. - "Pat. 3,382.766" may be marked on several different models of Universal M1 Carbine receiver/frames and is not a serial number.
Barrel	- longer barrels do exist, and many re-barreled rifles have been "de-registered".
Calibre	- "256" is marked on the receiver/frame above the chamber.
Shots	- detachable box magazine.
Remarks	- manufacturer's names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fittings, sights, etc. may also confuse the issue of specific model identification.

Notes

Make

- "UNIVERSAL" is a brand name used by "Universal Firearms Corporation" which was in business as a manufacturer and distributor from 1958 to 1987.
- "Universal" did business under the following variations in company identity ("Universal Corporation / Universal Firearms Corporation / Universal Sporting Goods / Universal Enterprising Sales") all of which were located in Hialeah, Florida, USA until the Company was purchased by Iver Johnson Arms of Jacksonville, Arkansas U.S.A. in 1983.
- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Model

- this is a commercial variant of the standard U.S. military M1 Carbine.
- manufactured circa 1962 to 1972
- "CAL.30 M1" or variation thereof may be marked on the top of the receiver/frame in front of the ejection opening.
- features include: bright blue finish on the receiver/frame and round barrel; blued adjustable rear sights; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; oil finished wooden stock with matching handguard; Universal patented front barrel band with blued fixed front sight; may feature a convertible gas system; drilled and tapped for scope mounts.
- overall length with a 457mm (18") barrel is 903.73mm (35.58") and average weight is 2.49kgs (5.5lbs).

Manufacturer

- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- gas operated.
- Universal patented a method of easily converting all of its carbines and pistols from semi-automatic repeaters into single shot, bolt action repeaters. This conversion which is a reversible procedure can be performed by the individual owner simply by removing the gas piston plug and turning it 180 degrees before re-installing it. This effectively cut off the gas system rendering the firearm a single shot. While this feature is interesting it does not change the basic action type which is Semi-Automatic.

Serial Number

- found on rear of receiver/frame; often blocked by the rear sight base.
- serial number is usually found on the top rear of the receiver/frame or on the side of the receiver/frame at the chamber area.
- the serial number may be obscured by the rear sight.
- serial numbers can some times be used to indicate a manufacturer or distinct model.
- "Pat. 3,382.766" is marked on several different models of Universal M1 Carbine receiver/frames and is not a serial number.

Barrel

- longer barrels exist.

Calibre

- "CAL.30 M1" may be marked on the receiver/frame.

Shots

- detachable box magazine.

Remarks

- manufacturer's names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fittings, sights, etc. may also confuse the issue of specific model identification.

Notes

Make

- "UNIVERSAL" is a brand name used by "Universal Firearms Corporation" which was in business as a manufacturer and distributor from 1958 to 1987.
- "Universal" did business under the following variations in company identity ("Universal Corporation / Universal Firearms Corporation / Universal Sporting Goods / Universal Enterprising Sales") all of which were located in Hialeah, Florida, USA until the Company was purchased by Iver Johnson Arms of Jacksonville, Arkansas U.S.A. in 1983.
- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Model

- this is a commercial variant of the standard U.S. military M1 Carbine.
- available circa 1962 to 1972.
- "CAL.30 M1" or variation thereof may be marked on the top of the receiver/frame in front of the ejection opening.
- features include: gold plated finish on the receiver/frame and round barrel; blued adjustable rear sights; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; oil finished black walnut stock with matching handguard; Universal patented front barrel band with blued fixed front sight; gold name plate located on the right side of the stock; may feature a convertible gas system; drilled and tapped for scope mounts.
- overall length with a 457mm (18") barrel is 903.73mm (35.58") and average weight is 2.49kgs (5.5lbs).

Manufacturer

- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- gas operated. - Universal patented a method of easily converting all of its carbines and pistols from semi-automatic repeaters into single shot, bolt action repeaters. This conversion which is a reversible procedure can be performed by the individual owner simply by removing the gas piston plug and turning it 180 degrees before re-installing it. This effectively cut off the gas system rendering the firearm a single shot. While this feature is interesting it does not change the basic action type which is Semi-Automatic.
Serial Number	- serial number is usually found on the top rear of the receiver/frame or on the side of the receiver/frame at the chamber area. - the serial number may be obscured by the rear sight. - serial numbers can sometimes be used to indicate a manufacturer or distinct model. - "Pat. 3,382.766" is marked on several different models of Universal M1 Carbine receiver/frames and is not a serial number.
Barrel	- longer barrels exist.
Calibre	- "CAL.30 M1" may be marked on the receiver/frame.
Shots	- detachable box magazine.
Remarks	- manufacturer's names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fittings, sights, etc. may also confuse the issue of specific model identification.

27206 - 3	30 CARBINE	30	457	Prohibited PFR, Part 1, para. 236(z.58)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "UNIVERSAL" is a brand name used by "Universal Firearms Corporation" which was in business as a manufacturer and distributor from 1958 to 1987.
- "Universal" did business under the following variations in company identity ("Universal Corporation / Universal Firearms Corporation / Universal Sporting Goods / Universal Enterprising Sales") all of which were located in Hialeah, Florida, USA until the Company was purchased by Iver Johnson Arms of Jacksonville, Arkansas U.S.A. in 1983.
- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Model

- this is a commercial variant of the standard U.S. military M1 Carbine.
- available circa 1962 to 1972.
- "CAL.30 M1" or variation thereof may be marked on the top of the receiver/frame in front of the ejection opening.
- features include: nickel plated finish on the receiver/frame and round barrel; blued adjustable rear sights; gold plated trigger; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; oil finished black walnut stock with matching handguard; Universal patented front barrel band with blued fixed front sight; nickel name plate located on the right side of the stock; may feature a convertible gas system; drilled and tapped for scope mounts.
- overall length with a 457mm (18") barrel is 903.73mm (35.58") and average weight is 2.49kgs (5.5lbs).

Manufacturer

- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- gas operated.
- Universal patented a method of easily converting all of its carbines and pistols from semi-automatic repeaters into single shot, bolt action repeaters. This conversion which is a reversible procedure can be performed by the individual owner simply by removing the gas piston plug and turning it 180 degrees before re-installing it. This effectively cut off the gas system rendering the firearm a single shot. While this feature is interesting it does not change the basic action type which is Semi-Automatic.

Serial Number

- serial number is usually found on the top rear of the receiver/frame or on the side of the receiver/frame at the chamber area.
- the serial number may be obscured by the rear sight.
- serial numbers can sometimes be used to indicate a manufacturer or distinct model.
- "Pat. 3,382.766" may be found marked on several different models of Universal M1 Carbine receiver/frames. It is not a serial number.

Barrel

- longer barrels exist.

Calibre

- "CAL.30 M1" may be marked on the receiver/frame.

Shots

- detachable box magazine.

Remarks

- manufacturer's names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fittings, sights, etc. may also confuse the issue of specific model identification.

Notes

Make

- "UNIVERSAL" is a brand name used by "Universal Firearms Corporation" which was in business as a manufacturer and distributor from 1958 to 1987.
- "Universal" did business under the following variations in company identity ("Universal Corporation / Universal Firearms Corporation / Universal Sporting Goods / Universal Enterprising Sales") all of which were located in Hialeah, Florida, USA until the Company was purchased by Iver Johnson Arms of Jacksonville, Arkansas U.S.A. in 1983.
- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Model

- "CAL.30 M1" or variation thereof may be marked on the top of the receiver/frame in front of the ejection opening.
- the correct model designation is determined by the features and markings.
- the 5000PT is distinguished by the style of folding metal stock.
- features include: satin blued finish on the receiver/frame and round barrel; fixed front sight with protective wings; knob adjustable rear sights; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; walnut pistol grip stock with perforated metal handguard and a bottom folding metal "schmeisser" style buttstock; left side mounted front sling swivel; front barrel band with no bayonet lug; receiver/frame is drilled and tapped and the stock inletted for scope mounting.
- overall length with a 457mm (18") barrel and stock extended is 914mm (36"), with the stock folded the length is 686mm (27") and average weight is 2.49kgs (5.5lbs).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the top of the receiver/frame above the chamber.
Action	- gas operated. - Universal patented a method of easily converting all of its carbines and pistols from semi-automatic repeaters into single shot, bolt action repeaters. This conversion which is a reversible procedure can be performed by the individual owner simply by removing the gas piston plug and turning it 180 degrees before re-installing it. This effectively cut off the gas system rendering the firearm a single shot. While this feature is interesting it does not change the basic action type which is Semi-Automatic.
Serial Number	- serial number is usually found on the top rear of the receiver/frame or on the side of the receiver/frame at the chamber area. - the serial number may be obscured by the rear sight or stock. - "Pat. 3,382.766" may be found marked on several different models of Universal M1 Carbine receiver/frames. It is not a serial number.
Barrel	- longer barrels exist.
Calibre	- calibre is marked on the top of the receiver/frame as "CAL.30 M1".
Shots	- detachable box magazine.
Remarks	- manufacturer's names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. The proliferation of modern accessory stocks, fittings, sights, etc. may also confuse the issue of specific model identification.

Notes

Make

- "UNIVERSAL" is a brand name used by "Universal Firearms Corporation" which was in business as a manufacturer and distributor from 1958 to 1987.
- "Universal" did business under the following variations in company identity ("Universal Corporation / Universal Firearms Corporation / Universal Sporting Goods / Universal Enterprising Sales") all of which were located in Hialeah, Florida, USA until the Company was purchased by Iver Johnson Arms of Jacksonville, Arkansas U.S.A. in 1983.
- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Model

- this is a commercial variant of the standard U.S. military M1 Carbine.
- "CAL.30 M1" or variation thereof may be marked on the top of the receiver/frame in front of the ejection opening.
- this is the same as the model 5000PT with a shorter barrel.
- the correct model designation is determined by the features and markings.
- features include: blue finish on the receiver/frame and round barrel; fixed front sight with protective wings; knob adjustable rear sights; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; walnut pistol grip stock with perforated metal handguard and a bottom folding metal "schmeisser" style buttstock; left side mounted front sling swivel; front barrel band with no bayonet lug; receiver/frame is drilled and tapped and the stock inletted for scope mounting.
- overall length with a 406mm (16") barrel and stock extended is 864mm (34"), with the stock folded the length is 635mm (25") and average weight is 2.49kgs (5.5lbs).

Manufacturer

- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- gas operated. - Universal patented a method of easily converting all of its carbines and pistols from semi-automatic repeaters into single shot, bolt action repeaters. This conversion which is a reversible procedure can be performed by the individual owner simply by removing the gas piston plug and turning it 180 degrees before re-installing it. This effectively cut off the gas system rendering the firearm a single shot. While this feature is interesting it does not change the basic action type which is Semi-Automatic.
Serial Number	- serial number is usually found on the top rear of the receiver/frame or on the side of the receiver/frame at the chamber area. - the serial number may be obscured by the rear sight. - serial numbers can some times be used to indicate a manufacturer or distinct model. - "Pat. 3,382.766" is marked on several different models of Universal M1 Carbine receiver/frames and is not a serial number.
Calibre	- "CAL.30 M1" be marked on the receiver/frame.
Shots	- detachable box magazine.
Remarks	- manufacturer names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fittings, sights, etc. may also confuse the issue of specific model identification.

Notes

Make

- "UNIVERSAL" is a brand name used by "Universal Firearms Corporation" which was in business as a manufacturer and distributor from 1958 to 1987.
- "Universal" did business under the following variations in company identity ("Universal Corporation / Universal Firearms Corporation / Universal Sporting Goods / Universal Enterprising Sales") all of which were located in Hialeah, Florida, USA until the Company was purchased by Iver Johnson Arms of Jacksonville, Arkansas U.S.A. in 1983.
- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Model

- "UNIVERSAL "DOUBLE WING" 2016" may be marked on the barrel rib.
- "UNIVERSAL "DOUBLE WING" 2025" has been observed marked on one variant.
- introduced in 1970 and discontinued in 1974.
- features include: front hinged receiver/frame with top tang mounted break open lever and automatic safety; box lock; hammerless; double triggers; checkered beavertail forearm and pistol grip butt stock with recoil pad.

Manufacturer

- "MADE IN SPAIN" may be on the left barrel.
- "BEST" and/or "BEST-JI-ERBI" and/or "ERBI" may be marked on the watertable and/or the barrel flats.

Action

- side by side barrel configuration.

Serial Number

- the serial number is marked on the water table, and may be repeated on the underside of the barrel assembly.
- observed serial number had five numbers without a letter prefix or suffix.

Calibre

- gauge and chamber length may be marked on the barrels and repeated on the water table.

Notes

Make

- "UNIVERSAL" is a brand name used by "Universal Firearms Corporation" which was in business as a manufacturer and distributor from 1958 to 1987.
- "Universal" did business under the following variations in company identity ("Universal Corporation / Universal Firearms Corporation / Universal Sporting Goods / Universal Enterprising Sales") all of which were located in Hialeah, Florida, USA until the Company was purchased by Iver Johnson Arms of Jacksonville, Arkansas U.S.A. in 1983.
- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "UNIVERSAL" over "HIALEAH, FLA." over CAL. 30 M1" over "PAT. 3,382,766" may be marked on the receiver ring.
- "ENFORCER" or variation thereof is marked on the receiver/frame.
- features include: blue, nickel, gold, black Teflon, or olive Teflon plated finish on the receiver/frame and round barrel; fixed rear sights; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; wooden pistol grip stock with matching handguard or ventilated metal handguard; front sight mounted on the Universal patented front barrel band; Universal patented gas system, cut out slide assembly, bolt hold open device on the right side of the receiver/frame; may feature a convertible gas system; drilled and tapped for scope mounts.
- overall length with a 260mm (10.25") barrel is 451mm (17.75") and average weight is 2.04kgs (4.5lbs).

Manufacturer

- "UNIVERSAL" over "HIALEAH, FLA." over CAL. 30 M1" over "PAT. 3,382,766" may be marked on the receiver ring.

Action

- gas operated.
- Universal patented a method of easily converting all of its carbines and pistols from semi-automatic repeaters into single shot, bolt action repeaters. This conversion which is a reversible procedure can be performed by the individual owner simply by removing the gas piston plug and turning it 180 degrees before re-installing it. This effectively cut off the gas system rendering the firearm a single shot. While this feature is interesting it does not change the basic action type which is Semi-Automatic.

Serial Number

- serial number is usually found on the top rear of the receiver/frame or on the side of the receiver/frame at the chamber area.
- observed serial number consisted of six numbers without a letter prefix or suffix.
- serial number may be obscured by the rear sight.
- serial numbers can sometimes be used to indicate a manufacturer or distinct model.
- "PAT. 3,382,766" is marked on several different models of Universal M1 Carbine receiver/frames and "3382766" is not a serial number.

Barrel

- 260mm was manufactured in 1970's
- 286mm was manufactured in 1980's.

Calibre

- "CAL.30 M1" may be marked on the receiver/frame.

Shots

- detachable box magazine.

Remarks

- manufacturer's names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fittings, sights, etc. may also confuse the issue of specific model identification.

Notes

Make

- "UNIVERSAL" is a brand name used by "Universal Firearms Corporation" which was in business as a manufacturer and distributor from 1958 to 1987.
- "Universal" did business under the following variations in company identity ("Universal Corporation / Universal Firearms Corporation / Universal Sporting Goods / Universal Enterprising Sales") all of which were located in Hialeah, Florida, USA until the Company was purchased by Iver Johnson Arms of Jacksonville, Arkansas U.S.A. in 1983.
- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Model

- This is a commercial variant of the standard U.S. military M1 Carbine.
- Manufactured from 1964-1967.
- "ENFORCER" or variation thereof may be marked on the top of the receiver/frame.
- Features include: swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; G.I. type front barrel band; Standard G.I. type gas system; may feature a convertible gas system.
- overall length with a 260mm (10.25") barrel is 495.3mm (19.5") and average weight is 1.70kgs (3.75lbs).

Manufacturer

- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Type

- a rifle fitted with a short barrel and pistol grip stock.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- gas operated. - Universal patented a method of easily converting all of its carbines and pistols from semi-automatic repeaters into single shot, bolt action repeaters. This conversion which is a reversible procedure can be performed by the individual owner simply by removing the gas piston plug and turning it 180 degrees before re-installing it. This effectively cut off the gas system rendering the firearm a single shot. While this feature is interesting it does not change the basic action type which is Semi-Automatic.
Serial Number	- serial number is usually found on the top rear of the receiver/frame or on the side of the receiver/frame at the chamber area. - the serial number may be obscured by the rear sight. - serial numbers can some times be used to indicate a manufacturer or distinct model. - "Pat. 3,382.766" may be found marked on several different models of Universal M1 Carbine receiver/frames. It is not a serial number.
Calibre	- "CAL.30 M1" may be marked on the receiver/frame.
Shots	- detachable box magazine.

Notes

Make

- "UNIVERSAL" is a brand name used by "Universal Firearms Corporation" which was in business as a manufacturer and distributor from 1958 to 1987.
- "Universal" did business under the following variations in company identity ("Universal Corporation / Universal Firearms Corporation / Universal Sporting Goods / Universal Enterprising Sales") all of which were located in Hialeah, Florida, USA until the Company was purchased by Iver Johnson Arms of Jacksonville, Arkansas U.S.A. in 1983.
- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Model

- This is a commercial variant of the standard U.S. military M1 Carbine.
- Manufactured from 1964 - 1967.
- "ENFORCER" or variation thereof may be marked on the top of the receiver/frame.
- Features include: swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; G.I. type front barrel band; Standard G.I. type gas system; may feature a convertible gas system.
- Overall length with a 260mm (10.25") barrel is 495.3mm (19.5") and average weight is 1.70kgs (3.75lbs).

Manufacturer

- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Type

- a rifle fitted with a short barrel and pistol grip stock.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- gas operated. - Universal patented a method of easily converting all of its carbines and pistols from semi-automatic repeaters into single shot, bolt action repeaters. This conversion which is a reversible procedure can be performed by the individual owner simply by removing the gas piston plug and turning it 180 degrees before re-installing it. This effectively cut off the gas system rendering the firearm a single shot. While this feature is interesting it does not change the basic action type which is Semi-Automatic.
Serial Number	- serial number is usually found on the top rear of the receiver/frame or on the side of the receiver/frame at the chamber area. - the serial number may be obscured by the rear sight. - serial numbers can some times be used to indicate a manufacturer or distinct model. - "Pat. 3,382.766" may be found marked on several different models of Universal M1 Carbine receiver/frames. It is not a serial number.
Calibre	- "CAL.30 M1" may be marked on the receiver/frame.
Shots	- detachable box magazine.

Notes

Make

- "UNIVERSAL" is a brand name used by "Universal Firearms Corporation" which was in business as a manufacturer and distributor from 1958 to 1987.
- "Universal" did business under the following variations in company identity ("Universal Corporation / Universal Firearms Corporation / Universal Sporting Goods / Universal Enterprising Sales") all of which were located in Hialeah, Florida, USA until the Company was purchased by Iver Johnson Arms of Jacksonville, Arkansas U.S.A. in 1983.
- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Model

- This is a commercial variant of the standard U.S. military M1 Carbine.
- "256" with "FERRET" or variation thereof may be marked on the top of the receiver/frame in front of the ejection opening.
- Features include: stainless steel or high gloss blue finish on the receiver/frame and round barrel; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; deluxe Monte Carlo walnut pistol grip stock with matching wood handguard; left side mounted front sling swivel; Universal's patented front barrel band; may feature a convertible gas system. Originally supplied with scope and mount. May not have sights installed.
- Overall length with a 457mm (18") barrel is 903.73mm (35.58"), average weight is 2.49kgs (5.5lbs).

Manufacturer

- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- Gas operated.
- Universal patented a method of easily converting all of its carbines and pistols from semi-automatic repeaters into single shot, bolt action repeaters. This conversion which is a reversible procedure can be performed by the individual owner simply by removing the gas piston plug and turning it 180 degrees before re-installing it. This effectively cut off the gas system rendering the firearm a single shot. While this feature is interesting it does not change the basic action type which is Semi-Automatic.

Serial Number

- Serial number is usually found on the top rear of the receiver/frame or on the side of the receiver/frame at the chamber area.
- The serial number may be obscured by the rear sight.
- Serial numbers can some times be used to indicate a manufacturer or distinct model.
- "Pat. 3,382.766" may be found marked on several different models of Universal M1 Carbine receiver/frames. It is not a serial number.

Calibre

- "CAL.30 M1" of "256" may be marked on the receiver/frame.

Shots

- In .256 WIN MAG calibre, this firearm will only work with a five round magazine; the rimmed cases stack up too quickly to work through a higher capacity magazine.
- Detachable box magazine.

Make

- "UNIVERSAL" is a brand name used by "Universal Firearms Corporation" which was in business as a manufacturer and distributor from 1958 to 1987.
- "Universal" did business under the following variations in company identity ("Universal Corporation / Universal Firearms Corporation / Universal Sporting Goods / Universal Enterprising Sales") all of which were located in Hialeah, Florida, USA until the Company was purchased by Iver Johnson Arms of Jacksonville, Arkansas U.S.A. in 1983.
- "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.

Model

- "U.S. CARBINE" over "CAL. .30 M1" is marked on the front of the receiver/frame.
- this is a full automatic/selective fire version of the M1 Carbine that incorporates full automatic parts including the left side selector lever most often encountered on the M2 model.
- features include: high gloss blue finish on the receiver/frame and round barrel; fixed front sight; knob adjustable rear sights; folding, partial leather wrapped, skeleton buttstock; swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; front left side and pistol grip mounted sling swivels; Universal's patented front barrel band; may feature a convertible gas system. Originally supplied with scope and mount. May not have sights installed.

Manufacturer

- "UNIVERSAL" and "HIALEAH, FLA." is marked on the receiver/frame.

Action

- gas operated.

Serial Number

- serial number of an observed example was marked on the top of the receiver/frame.
- serial number of an observed example consisted of five numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- "CAL. .30 M1" is marked on the top rear of the receiver/frame.
Shots	- detachable box magazine.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "UNIVERSAL" is a brand name used by "Universal Firearms Corporation" which was in business as a manufacturer and distributor from 1958 to 1987. - "Universal" did business under the following variations in company identity ("Universal Corporation / Universal Firearms Corporation / Universal Sporting Goods / Universal Enterprising Sales") all of which were located in Hialeah, Florida, USA until the Company was purchased by Iver Johnson Arms of Jacksonville, Arkansas U.S.A. in 1983. - "UNIVERSAL" and "HIALEAH, FLA." is usually marked on the receiver/frame.
Model	- the model designation is not marked on the firearm. - this model is a commercial adaptation of the US Carbine, model M1 and is available in several different variations. - this is a generic entry for the M1 Carbine family of firearms produced by Universal, other entries exist that may better identify the firearm being verified.
Manufacturer	- "UNIVERSAL" and "HIALEAH, FLA." are marked on the top of the receiver ring.
Action	- gas operated.
Serial Number	- serial number is located on the top rear of the receiver/frame. - number may be partially obscured by the rear sight.
Calibre	- calibre is marked on the receiver ring.
Shots	- detachable box magazine. - any of the military or commercial magazines for this type of firearm may be used.
Remarks	- Universal patented a method of easily converting all of its carbines and pistols from semi-automatic repeaters into single shot, bolt action repeaters. This conversion which is a reversible procedure can be performed by the individual owner simply by removing the gas piston plug and turning it 180 degrees before re-installing it. This effectively cuts off the gas system rendering the firearm a single shot. While this feature is interesting it does not change the basic action type which is Semi-Automatic.

196522 - 5	22 LR	20	95	Prohibited CC 84(1) "prohibited firearm" para. (b)	Non-Commercial Customization	

Notes

Make

- The make is not marked on the firearm.

Model

- The model designation is not marked on the firearm.
- This is a generic entry. Other 64 style model entries exist which might better describe the firearm.
- Features may include: Safety lever on the rear right of the receiver/frame; stamped sheet metal metal trigger guard; magazine release in front of the magazine well; right side reciprocating charging handle.

Action

- Blowback operated.

Shots

- Detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- The following features can be used to distinguish certain 64 models when markings are unavailable:
- The "64" can be identified by a thick, synthetic trigger guard and magazine release lever behind the magazine well.
- The "64A" can be identified by a thick, synthetic trigger guard and the magazine release lever was relocated to the front of the magazine well for all subsequent 64 models.
- The "64B" can be identified by a flat, stamped sheet metal metal trigger guard.
- The "64F" can be identified by an injection molded trigger guard integral to the synthetic stock.
- The "64G" can be identified by an injection molded trigger guard with a small triangular gap at the rear.
- The "64 Takedown" can be identified by a knurled takedown nut in front of the receiver/frame.

Firearm Reference Number (FRN): 129134
Make: Unknown
Model: Bang Stick

Summary

Make:	Unknown
Model:	Bang Stick
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
129134 - 9	44 MAG	1	59	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Non-Commercial Customization	
129134 - 8	44 MAG	1	63	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Non-Commercial Customization	

Notes

Make	- this is a generic entry for Bang Sticks that may or may not be marked with a make or manufacturer.
Model	- this is a generic entry for Bang Sticks that may or may not be marked with a model designation. - Bang Sticks generally consist of a unit which may be referred to as the powerhead, a receiver/frame with a barrel that can be interchanged with a barrel in a different calibre, attached to a pole or shaft with or without a ball at its opposite end. The model without the ball may be used with a spear-gun. - features include: a round stainless steel smoothbore barrel with or without a machined knurled grip and without sights that either screws in or is held in the receiver/frame by some sort of retaining device such as two O-rings fitted on the barrel. Round stainless steel receiver/frame which may either be screwed on or tack welded to a steel shaft or fitted onto a metal or wood pole; may have a cotter pin or a knurled ring or both as a safety.
Action	- the firearm is loaded by removing the barrel, placing a cartridge inside the barrel and then screwing the barrel back into the powerhead.
Serial Number	- serial number was not marked on referenced example.
Calibre	- calibre designation may not be marked on the firearm.
Canadian Law Comments	- a firearm that is designed, altered or intended to be aimed and fired by the action of one hand, whether or not it has been redesigned or subsequently altered to be aimed and fired by the action of both hands.

Notes

Make

- The make is not marked on the firearm.

Model

- This is a generic entry for flintlock or percussion blunderbuss firearm with no model, maker, or manufacturer's markings.
- "Blunderbuss" is a smooth-bored firearm with a large, belled muzzle, to allow fast reloading.
- Originally made circa 1780 to 1820. Modern replicas may exist.
- Features include: brass or steel barrel; full length, one piece wood stock with a rounded pistol grip; may have a ram rod; some specimens have been seen with a folding bayonet that may be spring loaded; metal and wood may be carved or engraved.

Action

- muzzle loading.

Serial Number

- known example did not have a serial number.

137720 - 1	60 FLINTLOCK	1	406	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make	- make is not marked on the firearm.
Model	- model designation is not marked on the firearm. - this firearm resembles a flintlock holster pistol with dog catch safety used by the military of Charles the 1st of England circa 1640. - features observed: no sights; round to polygonal to octogonal barrel; ramrod mounted under the barrel; nickel finish side lock with dog catch safety and flintlock hammer; single action trigger mechanism; metal trigger guard; full length stock with fish tail butt and metal butt cap. - dog catch safety (dog safety catch) operated between half and full cock.
Action	- muzzle loading.
Serial Number	- serial number was observed marked on the barrel, under the stock, and partially repeated on the butt cap (four numbers only). - observed serial number consisted of a letter prefix and four numbers.
Other Markings	- example observed with the following marking on the barrel under the stock: "U.H. INDIA"

Notes

Model

- model designation is not marked on the firearm.
- British Royal "Crown" cypher over "GR" and "GRICE" over "1762" is marked on the lockplate.
- this firearm is a modern reproduction of a British Service Pattern 1762 musket originally manufactured by Grice.
- this model is also known as a "Brown Bess".
- features include: round smoothbore barrel with fixed front sight and no rear sight; ram rod mounted under the barrel; right side lock plate with flintlock hammer; brass trigger guard; single action trigger mechanism; one piece walnut straight grip stock with forend cap; polished steel finish.

Action

- muzzle loader, flintlock ignition.

138207 - 1	75 FLINTLOCK	1	991	Antique AFR, Section 1, para. 1	Non-Commercial Customization	

Notes

Make

- make is not marked on the firearm.

Model

- the model designation is not marked on the firearm.
- this is a copy or reproduction of the British Service Pattern 1793 "Brown Bess" musket.
- after 1764, the contractor's name and the date that the lock was made were no longer applied to the lock plate; only the word "TOWER" would appear.
- the original version was produced circa 1793 to circa 1815.
- this is an improved Pattern 1779 Short Land Pattern Musket but with a 991mm / 39" barrel.
- typical features include: sidelock action with exposed hammer, muzzle loading, flintlock ignition; polished "in the white", blackened or browned, smooth bore barrel; full length, one piece walnut stock with nosecap; two screws showing behind the hammer; lobed feather-spring finial; tapered steel ram rod retained by three pipes; brass furniture; sling swivels are attached to the trigger guard bow and screwed through the stock between the first and second pipes; stepped, long tang butt plate.
- the original Pattern of musket encompassed two variations; the Pattern 1793 Musket, India Pattern Type 1 and the Pattern 1809 Musket, India Pattern Type 2.
- average overall length is 1391mm (54 3/4"), average weight is 4.18kg (9.2lbs).

Action

- muzzle loading.

Serial Number

- such arms are often marked on the right side of the buttstock or the upper tang of the butt plate with a number that usually represents the rack position, or Company, Unit, or Regiment number and is not the serial number.

Other Markings

- an observed example featured the East India Company logo, consisting of four letters ("V" over "E", "I" and "C") within an "X" inside a heart marked on the barrel.

Notes

Make

- firearm bears no markings to identify make, manufacture, or country of manufacture.

Model

- "Browning 1935 High Power Copy" is not marked on this firearm.
- this firearm resembles a Browning model 1935 High Power semi-automatic pistol manufactured by FN or Inglis.
- features include: blade front sight and a fixed rear sight; round rifled barrel; flat sided slide with right side ejection and rear grip serrations; exposed hammer; single action trigger mechanism; slide release and manual safety catch are mounted on the left side of the receiver/frame; magazine disconnect; lanyard ring is mounted on the left side of the rear grip strap; checkered black plastic grips; parkerized finish.

Action

- recoil operated.

Serial Number

- serial number of the referenced example was marked on the left side of the grip frame under the grip panel.
- serial number observed consisted of five numbers without a letter prefix or suffix.

Shots

- detachable box magazine.

118540 - 1	450 REV CF	5	57	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Non-Commercial Customization	

Notes

Make

- firearm bears no markings to denote make or manufacturer.

Model

- "THE" over "BULL - DOG" or variation was observed marked on the topstrap.
- in general terms this type of handgun was a copy of the Webley No.2 "British Bulldog". It is typified as a short barreled, solid frame handgun with loading gate, usually has an empty case ejecting rod with the rod sheathed within the cylinder axis pin; this rod is pivot mounted on the right side of the frame and is capable of swinging to the right. A bird's head grip is typical.
- barrel and frame are usually forged integrally as one piece. It may or may not have a noticeable "hump" on the grip backstrap behind the hammer.
- Belgian proofmarks may be apparent.

Calibre

- calibre designation is marked on the left side of the receiver/frame, in front of the cylinder as, "450".

Notes

Make

- will not bear any markings that positively identify the manufacturer or country of manufacture.

Model

- this is a generic record for those "Bulldog" type revolvers that have no make or manufacturer's markings and cannot otherwise be identified.
- other screens exist that might better identify the revolver being examined.
- "Bulldog" may or may not be marked on the firearm (features simulate the popular "British Bulldog" by Webley); produced during the late 1800s to the early 1900s.
- the features of this firearm, which is commonly referred to as "Bulldog", (sometimes as British Bulldog, English Bulldog, Ulster Bulldog, Tower Bulldog, or American Bulldog), are usually characterized as a compact, solid-framed, short-barreled revolver (often with an integral barrel and frame), usually with a right side loading-gate, usually with a swing-out case ejector rod stored within the cylinder axis rod, usually with "Birds-head" style handgrip, fixed or folding trigger, usually of a large cartridge (rim-fire or centerfire) caliber (such as 32, 38, 41, 44, 450 or larger), with no sights or rudimentary sights.
- Some versions may come with a frame mounted safety.

Serial Number

- samples have been noted with the serial number marked on the right side of the receiver/frame, rationalization unknown.

Firearm Reference Number (FRN): 198694
Make: Unknown
Model: C8 Copy

Summary

Make:	Unknown
Model:	C8 Copy
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
198694 - 1	5.56MM NATO	5	460	Prohibited PFR, Part 1, para. 87	Non-Commercial Customization	
198694 - 2	5.56MM NATO	30	460	Prohibited PFR, Part 1, para. 87	Non-Commercial Customization	

Notes

Make	- Markings attempting to replicate the Diemaco logo or Canadian Armed Forces contract markings are marked on the receiver/frame.
Model	- "C8" is marked on the left side of the lower receiver/frame. - Based on the "AR15" design. - This is a generic record for unlicensed copies of the Canadian Military issued "C8" rifle of unknown manufacture. - Features may include: integral accessory rail; forward bolt assist; ambidextrous magazine release; left side bolt catch; left side three(3) position safety selector.
Action	- Gas operated.
Serial Number	- The serial number is usually marked on the left side of the receiver/frame. - Serial number may use series of letters and digits intended to replicate the serial number rationalization used by Diemaco.
Barrel	- The barrel length does not include any attached device such as flash-hider or muzzle brake.
Calibre	- The calibre designation is marked on the left side of the receiver/frame.
Shots	- Detachable box magazine.

Firearm Reference Number (FRN): 127585
Make: Unknown
Model: Cane Gun

Summary

Make:	Unknown
Model:	Cane Gun
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Other
Action:	Air,Spring or Gas
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
127585 - 1	31	1	508	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make	- observed specimen had no markings.
Model	- model designation is not marked on the fiearm. - these air cane guns were manufactured from circa 1840 up to the early 20th century. - this firearm could be found as a muzzle loader or turret breech loading configuration using lead ball ammunition and could be rifled or smooth bore. - typical pattern was two parts, the rear half of the gun was a tubular air reservoir and valve mechanism; the forward half contained the barrel and lock mechanism. - the firearm is cocked by using a clock like key that caused a small button (trigger) to pop out. - features may include: fixed rudimentary sights; black or brown finish metal with billiard ball for its knob.
Action	- discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
Serial Number	- located on receiver/frame barrel assembly between the two parts. - observed specimen had three letters prefix and five numbers. (letter prefix on the observed specimen may be added by a Police detachement)
Calibre	- made in various calibres from .177 to .75.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- firearm bears no markings that denote make or manufacturer.

Model

- this is a generic entry for those Unknown Cane Guns that are not identifiable as to make or manufacturer.
- flintlock and percussion ignition guns may be either muzzle loading or breech loading (screw barrel); this type of firearm in its orginal configuration would have been made circa mid 1700's to mid-early 1870's.
- may be found with smoothbore or rifled barrel.
- may have cane "handle" adapted to fit a detachable butt-stock.
- may be fitted at the tip with a device to stop the muzzle from being damaged.
- may be fitted with, folding trigger, spur trigger, button trigger or ring trigger.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make	- firearm bears no markings that denote make or manufacturer.
Model	- this is a generic entry for those Cane Guns that are not identifiable as to make or manufacturer and are in a revolver configuration. - centrefire or rimfire and may be barreled or simply a revolving cylinder. - made circa 1870 to 1900. - may be found with a smoothbore or rifled barrel. - may have a cane "handle" adapted to fit a detachable butt-stock. - may be fitted with a cylinder axis retaining pin or a spike. - may be fitted with a folding trigger, spur trigger, button trigger or ring trigger.
Type	- this is a walking stick firearm that does not readily fit into the definition of a traditional rifle or handgun.
Action	- a manually indexed, revolving cylinder that also serves as the barrel.
Serial Number	- serial number of an observed example consisted of two numbers and was marked on the side of the receiver/frame.

Model: Colt 1851 Navy Type

Summary

Make:	Unknown
Model:	Colt 1851 Navy Type
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
87315 - 1	36 PERCUSSION	6	189	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- no markings that indicate the make or manufacturer will appear on the firearm.

Model

- this is a generic screen for a firearm having a close resemblance to the Colt 1851 Navy revolver in appearance, size, and features , and for which the "Make" cannot be determined because it is unmarked, or not known.
- this firearm is a six-shot, open-framed, front-loading, percussion revolver, in .36 caliber.
-it consists of three major components: a) the steel front barrel assembly carrying a loading lever; b) the receiver/frame assembly consisting of the receiver/frame, trigger-guard, and back-strap of iron, steel, or brass, and which houses the internal parts consisting of the trigger, hammer, pawl, cylinder stop, and springs; c) the steel cylinder which is comprised of a central axis bored through, the six chambers open to the front, with six nipples for percussion caps at the rear of each chamber.
- the cylinder slips over the barrel axis, which is attached to the frame.
- the barrel assembly is joined to the receiver/frame assembly by a laterally slotted key through the cylinder axis.
- the square-bottomed hand-grips are usually one-pieced of wanut or hardwood.

Serial Number

- may or may not be numbered.

Firearm Reference Number (FRN): 189322
Make: Unknown
Model: Colt 1860 Army Conversion Reproduction

Summary

Make:	Unknown
Model:	Colt 1860 Army Conversion Reproduction
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
189322 - 1	22 LR	6	203	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- no markings that identify the manufacturer or country of manufacture will be evident on the firearm.

Model

- "1860 Army" was observed on the underside, or the model may not be marked on the firearm.
- this is a modern reproduction of a metallic-cartridge conversion of the Colt 1860 Army percussion revolver to use centrefire metallic cartridges, a common post-Civil War practice seen on many original Colt percussion revolvers.
- features include: blued finish; fixed open sights; an original-style "open-top" Colt percussion receiver/frame with a conversion barrel having a manually-operated ejector-rod (rather than a loading rammer of the original percussion system); blued or colour-case-hardened receiver/frame; non-fluted cylinder; and smooth wooden grips.

Serial Number

- serial number is marked on the underside of the receiver/frame.
- serial number is customized.
- serial number of a referenced example consisted of three letter prefix "WGS" over five numbers.

Calibre

- "22 L.R." is marked on the left side of the barrel.

72632 - 3	44 PERCUSSION	6	217	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Model

- this is a reproduction of the Colt 1860 Army cap and ball handgun, available in several styles; with a brass or steel receiver/frame, and with an unfluted cylinder.
- loading lever, hammer, and receiver/frame (in steel-framed versions) are usually color-case-hardened, while the barrel and cylinder are blued. Additionally, the cylinder will usually have a roll-engraved battle scene on it.

Serial Number

- the serial number is marked on the bottom of the grip strap on observed sample.

Notes

Make

- The make is not marked on the receiver/frame.

Model

- The model designation is not marked on the receiver/frame.
- This is a generic entry. Other Colt 1911 type model entries exist which might better describe the firearm.
- Colt 1911 type refer to a receiver/frame of the Colt 1911 and 1911 A1 that are unmarked of a maker or manufacturer.
- Slide lock lever located on the side of the firearm.
- Magazine release located on the side of the firearm.

Action

- Recoil operated.

Serial Number

- The serial number is marked on the left side of the receiver/frame.

Calibre

- The calibre designation is marked on the barrel, visible through the ejection port.

Shots

- Detachable box magazine housed in the grip.

Notes

Model

- this model has the appearance of a Colt/Browning pistol.
- resembles a 1911-A1 Colt pistols.
- parts do not interchange with the Colt 1911-A1 pistols.
- pistol magazines do not interchange with the Colt 1911-A1 pistols.

Manufacturer

- manufacture is probably by "cottage" industry. Very crude workmanship.

Action

- recoil operated.

Shots

- detachable box magazine.

113595 - 3	45 AUTO	8	146	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- there will usually be no markings that would indicate the maker or the country of origin on the firearm.
- samples have been noted with spurious markings that imitate or exactly copy original factory applied marks.

Model

- this model closely resembles the Colt produced "1911A1" style of handgun.
- as there are many variations of the original, the features found on this type of firearm may vary widely.
- features will normally include: a grip safety, single action trigger mechanism, safety lever mounted on the left side of the receiver/frame, magazine release mounted on the left side of the receiver/frame, a straight or arched mainspring housing that may incorporate a lanyard ring, and cocking serrations on the rear of the slide.
- as there exists a large number of aftermarket parts for this type of firearm different sighting arrangements, finishes and grip styles will be encountered.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- recoil operated.
Serial Number	- samples may or may not be numbered. - some samples have been noted with several different numbers applied to the major components.
Shots	- detachable box magazine.
Other Markings	- some samples may be marked with any number of proof marks, these markings are not a guarantee of country of origin.

121344 - 2	22 HORNET/20 GA X 3"	6	592	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make	- the make is not marked on the firearm.
Model	- the model designation is not marked on the firearm. - this is a highly unusual firearm that combines a single shot bolt action shotgun with a pump action rifle (each with its own barrel). This over/under firearm can be used as a rifle or shotgun at the owner's discretion. - features include: round smooth bore and rifled barrel; one piece receiver/frame with a single shot bolt action & a box magazine fed repeater pump action; two triggers; open iron sights; checkered wood forearm and semi-pistol grip buttstock.
Action	- this firearm uses an over/under configuration with a top mounted single shot bolt action shotgun and a box magazine fed pump action rifle.
Barrel	- barrel length of 460mm is for the 20 GA X 3" bolt action and 592mm is for the 22 HORNET pump action.
Calibre	- 22 HORNET magazine fed pump action and 20 GA X 3" single shot bolt action.
Shots	- one shot for the 20 GA X 3" bolt action and five shots for the 22 HORNET pump action.

Notes

Make

- make or manufacturer's name was not observed on the firearm.
- Belgium proof marks were observed on the cylinder.

Model

- "ENGLISH" over "CONSTABULARY" was observed marked on the top strap of the receiver/frame.
- "English Constabulary" resembles a Webley model RIC.
- "Constabulary" refers to a variation of the British Bulldog revolvers which are distinguished from the Bulldogs by a lanyard ring and metal endcap on the bottom of the grip frame.
- features observed: blade front sight and v-noth in the top strap for a rear sight; ovate rifled barrel; solid top receiver/frame with non fluted cylinder and right side swing-down loading gate; pivoting ejector rod mounted on the front of the receiver/frame; exposed spur hammer; single/double action trigger mechanism; grip strap with metal end cap and lanyard ring; checkered wood grip panels.

Serial Number

- serial number was observed marked on the right grip strap of the receiver/frame, underneath the grip panels.
- observed serial number consisted of five numbers without a letter prefix or suffix.

Other Markings

- may have proof marks on the cylindre.

FRT Report

Firearm Reference Number (FRN): 195063
Make: Unknown
Model: English Flintlock Dragoon Pistol Reproduction

Summary

Make:	Unknown
Model:	English Flintlock Dragoon Pistol Reproduction
Manufacturer:	Unknown
Level:	Non-Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
195063 - 1	62 FLINTLOCK	1	288	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Model

- English Flintlock Dragoon Pistol is not marked on the firearm
- features include: round barrel with bare metal finish; under-barrel ramrod on brass thimbles with a brass end-cap, brass pommel, bare metal finish on breech plug and tang; right-side lockplate, cock, pan, and hardened frizzen; brass trigger guard; shield escutcheon shield, and pommel with side straps; full length wooden stock.
- on an observed sample, the barrel featured a simulated crown "GR" broad arrow proofmark and a crown with crossed arrows proofmark. The tang featured a crown with crossed arrows proofmark and a crown with the number 6.
- very close resemblance to the flintlock firearms known as the English Dragoon Pistol Pattern 1738 and Pattern 1730 Land Service Pistol.

Serial Number

- serial number found on the bottom front of the hand grip brass pommel.

Canadian Law Comments

- this reproduction flinlock pistol meets the Criminal Code of Canada definiton of "firearm" in that it can be adapted for use as a firearm by drilling a vent hole in the location that is marked by an indentation or "dimple" on the barrel.
- this flintlock pistol is a firearm that is designed and intended to be discharged by the action of one hand and as such meets the Criminal Code of Canada definition of "handgun".
- this flintlock pistol is a handgun manufactured after 1897 that does not meet the Criminal Code of Canada definition of "antique firearm".

FRT Report

Firearm Reference Number (FRN): 197535
Make: Unknown
Model: Extra American

Summary

Make:	Unknown
Model:	Extra American
Manufacturer:	
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
197535 - 1	35 PERCUSSION	5	95	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- The make is not marked on the firearm.

Model

- "EXTRA AMERICAN" is marked on top of the barrel.
- This is a copy of a Colt "1851 Navy" revolver of unknown manufacture.
- "PATENT SYSTEM" is marked on the left side of the receiver/frame.
- Features may include: loading lever located under the barrel; engraved cylinder and receiver/frame; spurred hammer; round trigger guard; bone grip panels.
- Cylinder was engraved with a naval scene likely intended to imitate the naval battle engraved on the cylinder of the Colt "1851 Navy".

Serial Number

- The serial number is marked on the underside of the receiver/frame.
- The serial number is repeated on the trigger guard.
- Serial number of a referenced example consisted of the letter prefix "S" followed by five digits.

Calibre

- The calibre designation is marked on the left side of the firearm.
- Calibre was marked on the left side of the trigger guard as "CAL 35".

Other Markings

- Post-1893 Belgian proof marks were observed on the cylinder.
- Referenced example had Arabic script marked on the left side of the barrel.
- Cylinder of a referenced example was engraved with a naval scene likely intended to imitate the engravings of a Colt 1851 Navy.

128727 - 1	32-20 WIN	1	660	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- no maker's name is marked on the firearm.

Model

- model designation is not marked on the firearm.
- this firearm resembles the Stevens Ideal model.
- features include: part octagonal and round blued barrel; under lever action opening; colour case-hardened receiver/frame; elongated hammer spur; light engraving; sling swivels; straight, walnut, stock with schnabel forend.

Action

- lever operated, falling/dropping block design.
- solid metal breechblock slides vertically in grooves cut into the receiver/frame.

Serial Number

- located on upper rear tang.
- observed specimen had five numbers without a letter prefix or suffix.

Notes

Model

- This is a generic entry for a Browning model 1910 handgun that does not feature any original factory markings.
- The model designation is not marked on the firearm.
- This is a copy of the FN Browning model 1910.
- Observed sample has several markings made to closely resemble those of the FN Browning "1910".
- Slide lock lever located on the side of the firearm.
- Magazine release located at the bottom front of the grip.
- Features include: external extractor; gripping at the rear of the slide; and black plastic grips with logo that resembles the FN-Browning logo.

Action

- Blowback operated.

Serial Number

- The serial number is marked on the right side of the receiver/frame.
- Observed serial number consisted of a letter prefix and five digits.

Calibre

- The calibre designation is marked on the barrel, visible through the ejection port.

Other Markings

- Observed sample has several markings that imitate Belgian proof marks.

Notes

Make

- 3D Printed Glock receiver/frames are mostly printed using privately owned 3D printers and are usually found without any Make or Manufactures markings

Model

- Features include a 3D Printed receiver/frame printed either using thermoplastic feedstock know as a "filament" or a photosensitive liquid "Resin".
- 3D Printed Glock receiver/frames do not have any metal internal support structures, which are typically found internally on all Glock type handguns.
- Various adaptations of the 3D printed Glock can be found online, each with different physical characteristics, which can include such features but are not limited to: integrally 3D Printed front accessories rail, blank non-checkered pistol grip or checkered pistol grips, left side magazine catch, various colours and material can be used.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- no markings that indicate "Make" or "Manufacturer" appear on the firearm. - many of these firearms bear no proof marks to determine manufacturer or country of origin.
Model	- this is a generic screen for muzzle-loading, black powder firearms that bear the appearance, features, and characteristics as follows a) the "cock" of the lock holds a flint which is struck against a iron "frizzen". b) it is a large pistol, bearing a sturdy stock with a bulbous buttend. c) it has a large bore (about 55 to 75 caliber, sometimes larger) of the type commonly used by a horseman of the cavalry, or dragoons. - barrels on early models were long, sometimes 35.5 cm. (14 inches) or more; later models often were built with shorter barrels. - this type of pistol is also referred to as: cavalier's pistol, chevalier pistol, horse pistol, horseman's pistol, dragoon pistol, holster pistol, etc. - flintlock pistols of this type were originally manufactured from the early 1700s and commonly used into the 1840s. With the advent of the percussion lock in the early 1800s, and military use in the late 1830s, many flintlocks were converted to percussion ignition. NOTE: Sea service pistols of various nations were usually of a similar pattern, and usually distinguished by a long belt hook, with brass replacing iron appointments. - no model name appears on this firearm; model designation is derived from the characteristics of the firearm.
Action	- large muzzle-loading, black powder pistol, flint ignition.
Serial Number	- may or may not be numbered.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

120919 - 1	20 GA X 2 1/2"	2	212	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- no maker's name is marked on this firearm.

Model

- no model name is marked on this firearm.
- the model designation is derived from the fact that this type of large bore, side by side pattern pistol was usually used principally by dangerous game hunters for self protection against enraged tigers or other such game and was carried in the "howdah" or saddle on the back of an elephant during the hunt.
- may be muzzle loading percussion or break action breech loading, utilizing box lock or side lock actions.
- features may include; damascus barrels; double triggers; double exposed hammers; underlever, top lever or side lever opening for breech loaders; fixed rear sight; under-barrel ramrod for percussion ignition versions.
- this type of firearm was in use circa 1850 to 1870.

Action

- side by side pattern.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments - some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- there are no markings to denote make, model or manufacturer of this device.

Model

- this is a generic entry to describe all those devices capable of discharging a projectile that have been made or modified from some other device not necessarily resembling a traditional firearm.
- some devices were designed to discharge blanks, distress flares, or tear gas, insecticides or perfume.
- two observed examples resembled modified "Pen Guns" with remanufactured screw-barrels that permit the discharging of rimfire ammunition.
- one observed example had "Alili Depose" marked on the barrel.
- features may include: a removable barrel that permits the insertion of a cartridge; spring loaded striker device with cocking handle or pin; wood, metal, or plastic handle; may or may not have a notch or detent safety.

Action

- spring-loaded, striker fired.

Notes

Model

- "Le Mat" and "Le Mat & Girard" percussion revolvers were manufactured in Belgium, England, and France between 1856 and 1865.
- this is a two-barrel single action revolver.
- this firearm is a single shot with a nine shot cylinder, that revolves on the central single shot barrel
- barrels: both are normally the same internal length.

Action

- over and under barrel configuration.
- upper barrel is normally rifled and bottom barrel is usually a smooth bore.
- this single action handgun combines the features of a multiple shot revolver and a single barrel shotgun.

Shots

- nine (smaller) calibre and one (large) calibre.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make	- no makers name is apparent on this firearm.
Model	- no model name is marked on this firearm; features which describe the basic action-type have been used to determine the model designation. - this is a generic entry for all Martini-action type rifles that have no model name marked on them. - action is of the Martini-style with downward swinging breech block, hinged at the top rear, operated and locked by an under lever. - features may vary widely.
Action	- rear hinged, lever operated tipping block design. - Martini action is locked in the firing position by the tip of the operating lever holding the breech block face up and in line with the chamber.
Serial Number	- known example had a three or four digit number without prefix or suffix marked on the receiver/frame.
Other Markings	- retailer's name may appear on the barrel.

Notes

Model

- a bulky, large caliber "Gasser" style military revolver, popular in the "Montenegro" region of Europe during late 1800s to early 1900s.
- may be open, solid, or hinged frame; with fluted or non-fluted cylinder, often with rod ejector attached to the right side of the frame.
- usually with a long (approx. 150 to 230mm) round barrel, fitted with fixed open sights.
- large, exposed spurr hammer.
- usually fitted with loading gate located on the right side.
- usually with a rounded trigger guard, retained by two screws.
- round "Broom-Handle" style, or squared butt, checkered wood grip-plates (often horn, or bone), retained by one screw.

Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
103396 - 1	12 GA X 3"	4	813	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make	- no markings appear on the firearm that indicate the maker or country of origin.
Model	- this shotgun resembles the "Mossberg 500". - features include: engraved or plain steel or alloy receiver/frame, sliding ambidextrous safety located on the top rear slope of the receiver/frame, checkered wooden buttstock, and a beavertail fore-end.
Serial Number	- serial number may be marked on the left side of the receiver/frame, and may consist of three letters (possibly "BMP"), followed by four digits.
Calibre	- calibre designation may be marked on the underside of the receiver/frame.
Shots	- tubular magazine, located under the barrel.
Other Markings	- these firearms are often encountered with markings intended to imitate original manufacturer markings. These markings may be misspelled or in the same style and same location of the originals.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "Muff Pistol" is not marked on the firearm.
- "Muff Pistol" is a small concealable handgun, usually for women, which can be hidden in a muff (hand-warmer).
- features include: one-piece iron barrel and receiver/frame; no sights; round to octagonal, smooth bore barrel; flat sided receiver/frame; breech plate is hinged on a pivot screw mounted on the left side of the receiver/frame; extractor plate is hinged on a screw mounted on the right side of the receiver/frame; exposed spur hammer; sheathed trigger; single action trigger mechanism; bird's head grip; smooth grip plates.

Action

- Flobert type action.

Serial Number

- some examples of this model had a serial number.

Firearm Reference Number (FRN): 194062
Make: Unknown
Model: Murdoch Pistol Reproduction

Summary

Make:	Unknown
Model:	Murdoch Pistol Reproduction
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
194062 - 1	50 FLINTLOCK	1	188	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- the make is not marked on the firearm.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is a modern reproduction of a "Murdoch" pistol, originally built by John Murdoch, of Doune, Scotland, during the mid-to-late 1700s, for the "Black Watch" of the Royal Highlanders. A very similar pistol, the "Black Watch Pistol" is known under several similar names, and must not be confused with the "Murdoch" pistol; where the "Murdoch" pistol has a "ram's-head" butt, with curlicue extensions that help to protect a ball-headed vent-pick threaded into the butt, the "Black Watch Pistol" is made with an all-brass butt and stock, with a double-lobed "kidney-shaped" butt that allows the pistol to be used as a club after the shot is fired.
- features include: all-metal construction, with polished in-the-white or nickel finish; cannon muzzle; round or faceted barrel; underbarrel ram-rod; left-side belt hook; right-side lockplate, cock, frizzen and pan; a ball-shaped trigger; a vent-pick threaded into the butt and protected with curlicue "ram's horns"; and (usually) monogram plates on the sides of the grips.

Action

- muzzle-loaded flintlock.

Serial Number

- serial-numbered on major internal parts; the pistol must be disassembled to observe the serial number.

Notes

Make

- make does not appear on the firearm.

Model

- "Model No. 1" is marked on the right hand side of the receiver/frame.
- the receiver/frame appears to combine the features of the Savage 1903/1909 pump action 22 rifle and the hump back of the Browning Auto 5.
- this is a take-down pump action rifle.
- features include: round barrel with open sights; solid top, enclosed receiver/frame with an oval ejection port on the right side, top tang mounted sliding safety and single action bar on the right side; large knurled slotted take-down knob on the right side of the receiver/frame, above the trigger; square front edge of the trigger guard forming a magazine guide/housing for the detachable box magazine; walnut straight grip butt stock and smooth slender cylindrical pump forend.

Serial Number

- observed serial number consisted of three digits.
- serial number is located on top of barrel, just aft of the rear sight.

Calibre

- barrel is stamped ".22 CAL. SHORT CTG".

Shots

- detachable box magazine.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
117315 - 1	22 PERCUSSION	4	51	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Non-Commercial Customization	

Notes

Make

- firearm bears no markings that identify make or manufacturer.

Model

- model designation is marked on top of the barrel as "NORMICK".
- features include: single action, square receiver/frame with a centre mounted spurred hammer, four barrels in the pattern of two over two, no trigger guard, and a birds head grip which may have wooden grip panels.
- when the hammer strikes the percussion cap on this model, all four barrels are discharged at once.

Serial Number

- the serial number on an observed sample was marked on the butt of the receiver/frame and under the right grip panel.

FRT Report

Firearm Reference Number (FRN): 199859
Make: Unknown
Model: Not-A-Glock 3D Printed

Summary

Make:	Unknown
Model:	Not-A-Glock 3D Printed
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
199859 - 1	22 LR	10	83	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Non-Commercial Customization	

Notes

Make

- The make is not marked on the firearm.
- The username of the designer may be marked on the firearm.
- This firearm was designed by an individual known as "Ju5t3nc4s3".

Model

- "NOT A GLOCK 22" may be marked in stylized font on the rear slide plate.
- The "NOT-A-GLOCK" is a 3D printed handgun designed to be built with both 3D printed parts and common items that can be found at a hardware store.
- Although this model is referred to as "Not-A-Glock", it resembles a Glock Model 26 in both appearance and size.
- Features include: 3D printed construction; barrel made of improvised material (hydraulic or brake tubing); magazine release button is located on the left side of the receiver/frame, at the intersection of the trigger guard and grip front strap; slide release lever is located on the left side of the receiver/frame; sliding safety selector is located on the left side of the receiver/frame; finish and color may vary depending on printing filament, printer settings, or any alterations made to the openly available design files.

Action

- Blowback operated.

Serial Number

- The serial number is not marked on the firearm.

Calibre

- The calibre designation is usually marked on the barrel, visible through the ejection port.

Shots

- Detachable box magazine.

Notes

Make

- firearm bears no markings related to Make or Manufacturer.

Model

- model designation is not marked on the firearm.
- this is a generic entry for those Pepperbox type handguns that are not identifiable as to Make or Model.
- features may include: open or solid receiver/frame; internal or external spurred hammer; barrels will normally rotate on a center axis; ring trigger, folding trigger or standard trigger within a trigger guard; synthetic or wooden grip panels.
- this type of firearm was made circa early 1830's to mid-late 1850's.

Action

- rotating barrel cluster.

Serial Number

- may have a serial number on the receiver/frame.
- serial number may be located under the grip panels.

Barrel

- this firearm does not have a conventional barrel attached to the receiver/frame and as such the barrel length also includes the length of the cylinder.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments - some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

76855 - 4	32 PERCUSSION	6	100	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Model

- solid top receiver/frame revolver with a round, octagonal or round to octagonal barrel.
- rotating cylinder has percussion nipples mounted at 90 degrees to the side of the cylinders. The hammer, which resembles a rectangular bar, rises and drops striking the percussion cap on the nipple located on the top side of the cylinder when the trigger is pulled. Capable of double action operation only.
- most firearms of this type have no means of loading the cylinder without removing the cylinder from the frame.
- firearms of this type were manufactured in Europe during the 1840's - 1850's and were made obsolete by the advent of the metallic cartridge system.

Serial Number

- may or may not have serial numbers.

FRT Report

Firearm Reference Number (FRN): 71592
Make: Unknown
Model: Percussion Musket

Summary

Make:	Unknown
Model:	Percussion Musket
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Notes

Make - maker's or manufacturer's name is not apparent on this firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- model designation is not marked on the firearm. - production of this type of firearm generally began circa early-to-mid 1800's. - this is a generic entry for those Percussion Muskets that are not identifiable as to Make, Model or Manufacturer and includes unidentified arsenal conversions of muskets from flintlock to percussion. - features include: round or octagonal barrel; side or centre external hammer; full or cut down stock; iron or brass trigger guard and buttplate; may have barrel bands and sling swivels.
Action	- muzzle loader.
Serial Number	- serial number may be present on this type of firearm but should not be confuse with possible inscription of model number or year of manufacture code.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- no markings to indicate make are marked on the firearm.

Model

- this is a generic entry for those percussion rifles that are not identifiable as to make, manufacturer or country of manufacture.
- features may include: round, half round or octagonal barrel.
- percussion ignition system may be in the form of under hammer, side hammer, top hammer or center hammer.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

144111 - 2	44 PERCUSSION	6	140	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- firearm bears no markings to identify Make or Manufacturer.
- "REGISTERED" over "APRIL 24 1852" was observed marked on the receiver/frame.
- "REGISTERED" over "APRIL 24 1852" markings have been associated with Thomas K. Baker of London, England.

Model

- model designation is not marked on the firearm.
- this firearm is also known as a proto revolver or transitional revolver.
- this firearm resembles a pepperbox revolver with a long barrel wedged on to an extension of the barrel cluster axis pin.
- features include: bead front sight with the hammer notched for a rear sight when at full cock; round to octagonal, rifled barrel with a flat sided barrel lug; engraved receiver/frame with top mounted bar hammer, percussion cap shield and a non-fluted percussion cylinder; traditional trigger and trigger guard; double action trigger mechanism; round bottom grip with a metal butt cap and wood grip panels.

Serial Number

- serial number was observed marked on the grip strap.
- serial number observed consisted of four numbers without a letter prefix or suffix.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make - no markings that would indicate the maker or country of manufacture are marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "Transitional Pepperbox Revolver" was normally manufactured circa 1840 to the 1860's. - "Transitional Pepperbox Revolver" is also known as a proto revolver or transitional revolver. - "Transitional Pepperbox Revolver" resembles a pepperbox revolver with a long barrel wedged on to an extension of the barrel cluster axis pin. - "Pepperbox" revolver has multiple barrels, which revolve on one axis. The receiver/frame is directly behind the barrels with the grip curving in a downward direction directly behind the receiver/frame. - "Transitional Pepperbox Revolver" retained the appearance of the pepperbox revolver with the receiver/frame being directly behind a cylinder and a barrel wedged on to an extension of the barrel cluster axis pin and with the grip curving in a downward direction directly behind the receiver/frame. - "Transitional Pepperbox Revolver" may have a single or double action trigger mechanism. The pepperbox revolver's barrel assembly was shortened and became a cylinder and a single barrel was then fitted. - "Transitional Pepperbox Revolver" was eventually replaced with the more modern revolver style receiver/frame, grip and hammer.
Serial Number	- this firearm may not have a serial number marked on the receiver/frame.
Calibre	- the calibre may not be marked on the firearm.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.
Other Markings	- one noted model was marked, "IMPROVED REVOLVER" on top of the barrel.

197746 - 1	22 RF	1	86	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Non-Commercial Customization	

Notes

Make

- The make is not marked on the firearm.

Model

- PG22 is marked on the firearm in various places.
- This is a 3D printed firearm,
- Features include: accessory rail under the barrel, separate grip panels and serrations on the upper assembly.
- Finish and color will vary depending on material, printer and settings.
- Overall length with a 87 mm (3.43 inches) barrel is 217 mm (8.54 inches).
- A later version of this design, incorporating a revolver cylinder has been developed with the same markings. It's full designation is "PG22 Maverick".

Serial Number

- The serial number is not marked on the firearm.

Calibre

- The calibre designation is not marked on the firearm.
- Original design files specify chambering in 22 Short for safety.

Notes

Make

- The make is not marked on the firearm.

Model

- The model designation is not marked on the firearm.
- The "PG22 Maverick" is the successor to the single-shot "PG22 Aurora".
- This is a 3D printed firearm.
- Features include: Synthetic construction; underside accessory rail; serrated striker above the top strap; rifled barrel sleeves fitted into synthetic cylinder; removable grip panels.
- May feature various colors and finishes depending on the material.

Action

- Pepperbox type revolver.
- Fixed rotating cylinder with a manually operated striker.
- Cylinder is rotated manually for loading and unloading.

Serial Number

- The serial number is not marked on the firearm.

Barrel

- This is a "Pepperbox" style firearm, therefore the barrel length is the length of the cylinder.

Calibre

- The calibre designation is not marked on the firearm.

Notes

Make

- no clear indication of make or country of origin on firearm.

Model

- "Pistol Type Pocket Revolver" is not marked on the firearm.
- this is a generic record for those revolvers that can be identified by characteristics only.
- these firearms are small in dimension, typically chambered for low power cartridges.
- the receiver/frame is usually fairly squared over the hammer so that it may or may not have the outward visual appearance of a semi-automatic hammerless pocket pistol in profile.
- features may include: folding, spur type or conventional trigger; with or without trigger guard; exposed or concealed hammer; solid receiver/frame; removable fluted or non-fluted cylinder; round or octagonal barrel; may have an external safety lever; wooden or plastic grip panels; may be fabricated from steel or sheet metal; may or may not have rudimentary post or blade front sight and a notch rear sight.

Calibre

- "Kal 7,65" was observed marked on one example.

Notes

Model

- model designation is not marked on the firearm.
- this is a reproduction of the revolving rifle made by Remington from 1866 to 1879, based on their New Model Army revolver, but with a longer receiver/frame, barrel, loading lever, cylinder and a grip frame modified to accept a straight grip buttstock.
- features include: octagonal or half round/half octagonal barrel; walnut buttstock with crescent butt plate; brass or iron scroll trigger guard with spur for middle finger; blued barrel and cylinder and colour case-hardened receiver/frame.
- known Italian manufacturers of this model are Renato Gamba and Uberti.

Action

- muzzle loading, percussion ignition.

Serial Number

- serial number may consist of five digits.

Calibre

- the calibre designation may not be marked on the firearm.

Other Markings

- Italian proof marks may be stamped on the receiver/frame.

Notes

Make

- no markings that indicate the maker or country of manufacture will be found on the firearm.

Model

- this is a generic entry for those revolvers that are unidentifiable as to Make, Model or Manufacturer.
- other entries exist that may better describe the firearm being examined.
- features may vary greatly.

Serial Number

- these firearms may, or may not be marked with a serial number.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
127375 - 1	44 PERCUSSION	6	190	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- Italian proof marks were observed on the cylinder.

Model

- "ROGERS & SPENCER" and "UTICA, N.Y." was observed marked on the top strap.
- this is a modern reproduction of a "Roger & Spencer Army" percussion revolver.
- features include: octagonal barrel with cone front sight and hinged type loading lever; solid top receiver/frame with round percussion cylinder and "V" groove along the length of the top strap for a rear sight; exposed spurred hammer; single action trigger mechanism; blued finish barrel and receiver/frame; colour casehardened hammer and loading lever; two piece walnut grips.

Serial Number

- serial number was observed marked on the grip strap under the grip plate and repeated on the underside of the barrel.
- observed serial number consisted of three numbers without a letter prefix or suffix.

Remarks

- with the increased interest in the Civil War period, the following is a list of some of the companies that have manufactured or distributed reproductions of the Roger & Spencer revolvers, this is not a comprehensive listing:

Armi Jager
Armi San Marco
Armi San Paolo
Connecticut Valley Arms (CVA)
Dixie Gun Works
Early & Modern Firearms Company (EMF)
Euroarms
Feinwerkbau
Muzzle Loaders Incorporated.
Navy Arms
Pedersoli
Stone Mountain Arms Incorporated

129915 - 1	9MM FLOBERT	2	546	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- make is not marked on the firearm.

Model

- "Rook Rifle" is not marked on the firearm.
- "Rook Rifle" model designation was used in the United Kingdom in refers to the intended purpose of a small, single shot, lightweight sporting rifle normally used for rabbit, crow, or vermin control.
- "Rook Rifle" was also known as a 'Garden Rifle', 'Rabbit Rifle', or 'Pest/Vermin Rifle'.
- "Rook Rifle" may be found with a number of different types of actions including but not limited to break open (hinged barrel design), falling block or Martini-type.
- features may include: engraved receiver/frame; external hammers or hammerless; single or double trigger; top, side or under lever opener; checkered pistol grip or semi pistol grip stock and splinter forearm.

Action

- side by side or over and under pattern.
- 'Rook Rifle" was available in various action types:
- break open action (hinged barrel design).
- falling block/vertical sliding wedge action.
- tilting block action (Martini type).

Serial Number

- may have a serial number under the barrels.

Firearm Reference Number (FRN): 195079
Make: Unknown
Model: Royal Navy Sea Service Musket (1778 Model) Reproduction

Summary

Make:	Unknown
Model:	Royal Navy Sea Service Musket (1778 Model) Reproduction
Manufacturer:	Unknown
Level:	Non-Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
195079 - 1	75 FLINTLOCK	1	935	Antique CC 84(1) "antique firearm" para. (b)	Non-Commercial Customization	

Notes

Model

- the model name is not marked on the firearm.
- "TOWER" is marked on the lockplate behind the hammer.
- this firearm is a smooth-bore musket.
- a crown with the letters "GR" is marked on the lockplate in front of the hammer.
- features include: round barrel with bare metal finish; under-barrel ramrod on brass thimbles, brass buttplate, bare metal finish on breech plug and tang; right-side lockplate, cock, pan, and hardened frizzen; brass trigger guard with steel sling swivel; wooden stock with sling swivel on underside of fore-end.
- on an observed sample, the barrel featured a simulated crown "GR" broad arrow proofmark and a crown with crossed arrows proofmark. The tang featured a crown with crossed arrows proofmark and a crown with the number 6.

Serial Number

- an observed sample has a five digit serial number stamped into the heel of the brass buttplate.

Canadian Law Comments

- this reproduction flinlock musket meets the Criminal Code of Canada definiton of "firearm" in that it can be adapted for use as a firearm by drilling a vent hole in the location that is marked by an indentation or "dimple" on the barrel.
- this flinlock musket is a reproduction of a flintlock firearm that was manufactured after 1897 and as such is prescribed in the Criminal Code of Canada, Regulations Prescribing Antique Firearms to be an "antique firearm".

Notes

Make

- firearm bears no markings that denote make, manufacturer or country of origin.

Model

- Screw Barrel Pistols were popular in the period prior to 1880 and were commonly manufactured in England and Belgium.
- model designation is not marked on the firearm.
- model designation is derived from the method by which this pistol is loaded; loading was accomplished by unscrewing the barrel.
- this is a single shot pistol with a removable barrel and an exposed hammer centrally located on the receiver/frame behind the chamber.
- this handgun is intended to be loaded from the breech end of the barrel and as such was originally suppied with a wrench to unscrew the barrel from the receiver/frame in order that a lead ball and loose powder could be inserted into the chamber end of the barrel and then the barrel screwed back onto the receiver/frame.
- features include: octagonal screw on barrel or a round screw on barrel with an underlug; hammer is located in the centre of the receiver/frame; conventional trigger with trigger guard or forward folding trigger; one piece wooden grips.

Action

- the barrel unscrews in front of the chamber, so it can be loaded with a ball that fits the barrel more tightly than is possible with a muzzle loader.
- the turnoff barrel may be rifled.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- no make is marked on this firearm.

Model

- there is no model name marked on the firearm.
- this is a generic entry for any double barrel percussion shotguns that are unidentifiable as to make, model or manufacturer.
- features include: side lock action; muzzle-loading percussion ignition double barrels, usually side by side configuration; double external hammers; double triggers; under barrel mounted ramrod; may have damascus barrels; may have varying degrees of engraving on the lockplate, trigger guard and/or barrels.

Action

- muzzle-loading, percussion ignition, usually side by side configuration.

Canadian Law Comments

- those shotguns manufactured prior to 1898 in calibres which are not proscribed by the Antique Firearm Regulations are deemed to be antiques.

Other Markings

- one known example was marked "London Twist" in script style writing on the top of the rib between the barrels.

Notes

Make

- research has indicated that in many cases this type of handgun was not marked with a maker's name or proofmarks.

Model

- no model name is marked on this handgun; the model designation is derived from the characteristics of the firearm.
- this type of firearm in its original configuration would have been made circa 1850's to the 1890's.
- features include: side by side barrels; front hinged receiver/frame with boxlock action; may have concealed drop-down triggers without trigger guard, double triggers with conventional trigger guard or in some cases a single trigger; double exposed hammers located on top of the action; usually side-lever or under-lever opening; hardwood grip which may be checkered or fluted; grip may have a grip plate and lanyard ring; may have Damascus barrels; varying degrees of engraving on the barrels and receiver/frame.
- may have a folding dagger-blade attached to the barrels.

Action

- side by side barrel configuration.

Serial Number

- a serial number may be marked on the receiver/frame.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

FRT Report

Firearm Reference Number (FRN): 148227
Make: Unknown
Model: Single Barrel Folding Shotgun

Summary

Make:	Unknown
Model:	Single Barrel Folding Shotgun
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Shotgun
Action:	Single-Shot
Country of Manufacturer:	BELGIUM
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
148227 - 1	410 GA X 2 1/2"	1	742	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Model

- model designation is not marked on the firearm.
- this is a single barrel shotgun which can be folded in half for storage or transporting.
- features observed: round to octagonal smooth bore barrel with a bead front sight; front hinged receiver/frame with the break open action release lever mounted on the right side; exposed offset spur hammer; single action trigger mechanism; checkered wood forearm and straight grip buttstock with a metal buttplate.
- under folding release button is mounted on the left side of the receiver/frame.
- this style of folding shotguns were marketed by the following Belgium companies: Pire in 1899, Crahay in 1912, Galand in 1914, Lovin-Hardy in 1914, Fabrique d'Armes Unies in 1925, Vendrix in 1928, Dumoulin in 1931, Laloux in 1935, and Janssen Freres in 1937.

Action

- hinged barrel design.

Serial Number

- serial number was observed marked on the barrel.

Calibre

- "28-65" inside a letter "C" was observed marked on the barrel.

Other Markings

- "TESTES" was marked on the barrel of an observed example.

Notes

Make

- firearm bears no markings that denote make or manufacturer.
- this type of firearm may have; no markings that denote make or manufacturer; markings that are worn/pitted with age or otherwise illegible; or markings that are unknown as to meaning.

Model

- model is not marked on the firearm.
- this is a generic entry for single barrel percussion shotguns that are unidentifiable as to make, model or manufacturer.
- features include:
- single barrel, external hammer, percussion muzzle-loading shotgun.
- one piece stock, iron mounts, under barrel mounted ramrod.
- may have some degree of engraving on lockplate and trigger guard.

Action

- muzzle loading, percussion ignition.

Canadian Law Comments

- certain examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- there are no markings to denote the maker or country of manufacture found on the firearm.

Model

- this is a generic entry for those single shot pistols that are not identifiable as to make or model.
- these pistols will be found with a wide variety of loading mechanisms where some will use a hinged barrel, a swing out barrel, a sliding barrel, a removable barrel and in some cases will be bolt operated.
- observed specimen was a tilt barrel.

Notes

Make - no maker's name is marked on this firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- model designation is not marked on the firearm. - these are usually unlicenced copies of Smith & Wesson "Hand Ejector" revolvers. - features will usually include: double action trigger mechanism; round or ramp-style blade front sight with a recessed receiver/frame notch service rear sight or a top strap sighting groove; ejector rod; fluted cylinder; under-barrel locking lug; thumb cylinder release on left side of receiver/frame behind the recoil shield; square butt profile; blued or nickel finish.
Action	- double action.
Serial Number	- known example had a serial number marked on the bottom of the grip frame.
Other Markings	- known example was marked "Smith & Wesson" on the left side of the barrel and had a spurious copy of the S&W trademark marked on the left side of the receiver/frame.

Notes

Make

- make is not marked on the firearm.

Model

- model designation is not marked on the firearm.
- this is a copy of a Smith & Wesson Top Break No 3 Double Action New Model revolver.
- Smith & Wesson Top Break No 3 Double Action New Model was originally manufactured from 1881 to 1913.
- features include: round ribbed barrel with blade front sight; front hinged receiver/frame with fluted cylinder with automatic extractor/ejector, and top strap mounted fixed rear sight and break open mechanism; exposed spurred hammer; single/double action trigger mechanism; square back trigger guard; round butt grip frame with wood or hard rubber grips, and with or without a lanyard ring; blued or nickel plated finish.
- Note: may not have a sideplate on the left side of the receiver/frame.

Serial Number

- serial number on observed sample was marked on the left side of the butt, grips must be removed in order to be visible.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- Belgian proof marks such as; an E over an L and G inside an oval, may be marked on various places on the revolver, including the end of the cylinder.
- may have the Smith & Wesson name on the barrel, as well as, patent dates which do not correspond to the official Smith & Wesson patent dates.

Notes

Make

- no make appears on this firearm.

Model

- known example marked, "SCHOFIELD'S PATENT. OCTB. 17. 1876" on the top of the barrel rib.
- this firearm is a copy of the original Smith & Wesson 32 Double Action Revolver.
- the reference to "Schofield's Patent" was sometimes an intentional misrepresentation intended to mislead potential purchasers into thinking they were obtaining an original Smith & Wesson Schofield model handgun as produced by Smith & Wesson and based on Schofield's original patent dated April 22, 1873.
- double action, hinged frame, top break, self-extracting revolver.
- features may include;
- action release lever located at the very rear of the top strap so as to hinge over the standing breech,
- full rib barrel, fluted cylinder, black plastic checkered grip plates,
- blade front sight, notched rear sight,
- nickel plated finish.

Serial Number

- one known sample did not have a serial number.
- two known examples had a four digit number without prefix or suffix marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - Belgian proofmarks may be apparent on the rear of the cylinder, the barrel and/or the receiver/frame.

Firearm Reference Number (FRN): 198288
Make: Unknown
Model: Songbird 3D Printed

Summary

Make:	Unknown
Model:	Songbird 3D Printed
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
198288 - 1	22 LR	1	109	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- The make is not marked on the firearm.

Model

- Introduced in 2015..
- "SONGBIRD" is marked on the top of the firearm in the original 3D printer file.
- "PATRICK" is marked on the left side of the firearm in the original 3D printer file.
- "PATRICK" stands for "James R. Patrick" a mechanical engineering student that is the file developer.
- "SONGBIRD" is made as one-piece firearm, fully made of ABS plastic type operating with rubber bands.
- "SONGBIRD" is available in different variants of 3D printer file.
- Features include: rectangular shaped upper portion; left side barrel port for barrel loading/unloading; rectangular shaped, smooth bore ABS plastic type barrel that may have a metal barrel liner with or without rifling; rear open top for access to the internal hammer.

Action

- Side hinged barrel design.
- Rubber bands operated.

Serial Number

- The serial number is usually not marked on the firearm.

Calibre

- The calibre designation is not marked on the firearm.

Firearm Reference Number (FRN): 125400
Make: Unknown
Model: Springfield 1884 Rifle Reproduction

Summary

Make:	Unknown
Model:	Springfield 1884 Rifle Reproduction
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
125400 - 1	45-70 GOVT	1	808	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- no makers name is marked on this firearm.

Model

- "U.S.", over "MODEL", over 1884" was observed marked on the breechblock.
- this is a reproduction of a Springfield Model 1884 military rifle as made for the US Government.
- this rifle replicates the basic Springfield Model 1879 Rifle with the addition of a tang mounted highly adjustable and complicated Buffington-type rear sight.
- features include: part round/part octagonal barrel with globe front sight and adjustable rear sight; front hinged, top mounted swinging-type breech block which swings vertically over the rear of the barrel to expose the chamber; exposed right side mounted hammer; one piece wooden straight grip stock; brass end cap; trigger guard and butt plate.

Serial Number

- observed serial number was marked on the rear of the receiver/frame.
- observed serial number consisted of five numbers without a letter prefix or suffix.

129926 - 2	32 AUTO	8	114	Prohibited CC 84(1) "prohibited firearm" para. (a)(ii)	Non-Commercial Customization	
129926 - 1	7.65MM	8	114	Prohibited CC 84(1) "prohibited firearm" para. (a)(ii)	Non-Commercial Customization	

Notes

Make

- maker of this firearm is Unknown, however, the left side of the slide has spurious markings that read, "STAR - BECHVERRIA" over EIBAR ESPANA" behind which are the letters "SA"; note that Echeverria is spelled incorrectly.
- The "Star" trademark symbol of Bonifacio Echeverria is also marked on the left side of the slide and is also spurious.

Model

- no model name is marked on this firearm; the model designation is derived from the basic characteristics of the firearm which are similar to that of the Star, Model I semi-automatic pistol.
- features; blow back operated, semi-automatic, single action trigger mechanism utilizing a detachable box magazine; lever-type safety/slide release located on left side of the receiver/frame above the trigger; magazine release button located on the bottom rear left side of the grip frame; exposed spur hammer; blued finish.
- there are no proof marks on this firearm.

Action

- blowback operated.

Serial Number

- observed example did not have a serial number.

Shots

- detachable box magazine.

Firearm Reference Number (FRN): 129976
Make: Unknown
Model: Umbrella Cane Gun

Summary

Make:	Unknown
Model:	Umbrella Cane Gun
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Other
Action:	Single-Shot
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
129976 - 1	410 GA X 3"	1	650	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- firearm bears no markings that denote make or manufacturer.

Model

- this firearm resembles an umbrella.
- this is a generic entry for those Unknown umbrella guns that are not identifiable as to make or manufacturer.
- may be percussion or cartridge firing.
- percussion may be either muzzleloading or breechloading (screw barrel).
- may be found with smoothbore or rifled barrel.
- may be fitted at the tip with a device to stop the muzzle from being damaged.
- may be fitted with, folding trigger, spur trigger, button trigger or ring trigger.
- Note: when the umbrella assembly is removed this firearm looks like a cane gun

Action

- breech-loading

Serial Number

- serial number was observed on the exterior of the breech area.
- observed serial number consisted of three numbers without a letter prefix or suffix.

Calibre

- calibre or gauge was not marked on the firearm, however a chamber length of "76" was noted.

82693 - 3	32 PERCUSSION	1	50	Prohibited CC 84(1) "prohibited firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- no marks that would identify the make or manufacturer appear on the firearm/knife blades.
- this style of Knife Pistol was made by several firms.
- the original makers of this Knife Pistol (Unwin & Rodgers) produced them between approximately 1860 and 1868.

Model

- this Knife Pistol was made to resemble the Unwin & Rodgers models.
- the features will vary widely as will the finish and embellishment found on the barrel and blades.
- typically these Knife Pistols will have two folding blades, hinged or folding trigger and an octagonal barrel mounted along the spine of the knife. Samples have been noted with wood or stag horn handles, and with varying lengths and styles of blades.

Action

- muzzle loading, percussion firearm.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Other Markings

- samples have been noted with British proofs and inspection markings that were in use from 1813 to 1904.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- there are no markings that would indicate the country of origin or name of manufacturer on the firearm.

Model

- this is a generic entry for "Velodog" type revolvers that have no markings and cannot otherwise be accurately identified.
- other screens may exist that may better identify the firearm being examined.
- the name "Velodog" is not marked on the firearm.
- the term initially defined a compact revolver, initially in 5.75mm (also known as 5.5mm) long centre-fire, or the 6mm "Type Francaise" long rimfire cartridge.
- the "Velodog" customarily features a folding trigger, elongated cylinder (fluted or non-fluted), 5 to 7 shots (or more), usually a shrouded or enclosed hammer, often a safety lever on the side or rear of the receiver/frame, most have a yoke mounted ejector that tucks away into the cylinder axis pin, bird's head or square hand grips, round or octagonal barrel (often with rudimentary sights).
- by 1900 the name evolved to define a small calibre, compact self defence revolver with similar features (usually chambered for a 22 rimfire cartridge), which became popular throughout Continental Europe.
- the name was originated by Charles Francois Galand (Paris) in 1894 combining "velocipedist" (bicyclist) and "dog".
- originally intended for use by cyclists to dispatch/repel chasing dogs during the late eighteenth and early nineteenth century, when dog-rabies was a dreaded common disease.
- do not confuse with the "Puppy" revolvers in .25 calibre / 6.35mm, or firearms with similar features of larger calibre's (.320 / 7.65mm calibre or greater).

Calibre

- the calibre may be marked on the firearm.

117959 - 1	32 RF	1	660	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- firearm bears no markings that identify make or manufacturer.

Model

- model designation does not appear on the firearm, but is rather a description of the action.
- this was the last and final improvement of the Flobert rifle, later called "The Warnant Springfield"; the breech block was attached to the breech end of the barrel, so it could be swung up to open the action for loading and unloading the rifle.
- since this system was much stronger than all other Flobert actions previously made, it was available in stronger calibers and heavier barrels.
- features may include: one piece walnut stock with prominent flats on each side of the receiver/frame with a checkered straight or semi pistol grip, octagonal or round barrel, fixed rear and front sights and available in regular or heavy pattern.

Notes

Make

- The make is not marked on the firearm.
- No markings observed on this firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- The model designation is not marked on the receiver/frame. - This is a generic entry for the "Wheel-Lock" action type of firearm. - Wheel-Lock firearms were originally manufactured in Europe during the 16th and 17th century. - The "wheel-lock" system uses iron pyrites pressed against a revolving toothed wheel to provide the sparks for igniting the powder in the priming pan, which in turn ignites the main powder charge in the barrel. The toothed wheel is made to rotate, when the trigger was pulled, by a spring that was wound by a key in a similar fashion to a mechanical clock. - Features include: round to octagonal, polished steel barrel; no sights; ramrod mounted under the barrel; wheel-lock action receiver/frame; walnut pistol grip stock with metal furniture, trigger guard and butt cap.
Action	- Muzzle loading.
Serial Number	- The serial number is not marked on the firearm.
Canadian Law Comments	- Some examples of this model, when manufactured prior to 1898 may be considered Antique in Canada.

FRT Report

Firearm Reference Number (FRN): 130491
Make: Unknown Belgian
Model: 1892 Type

Summary

Make:	Unknown Belgian
Model:	1892 Type
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	BELGIUM
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
130491 - 1	8MM LEBEL REV	6	110	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- make or manufacturer's markings were not observed on the firearm.
- Belgian proof marks were observed marked on the right side of the receiver/frame and on the barrel and cylinder.

Model

- this firearm resembles a French Service Model 1892 revolver of the Nagant design.
- "1892 Type" is not marked on the firearm.
- features include: blade front sight and a notch in the lip of the top strap for a rear sight; round rifled barrel; solid top receiver/frame with right side swing-out fluted cylinder and right side loading gate; exposed spurred hammer with removable firing pin; single/double action trigger mechanism; left side plate is hinged at the front of the receiver/frame to allow access to the interior lock work mechanism; checkered wood grip plates; rounded butt with lanyard ring; blued finish.

Serial Number

- serial number was observed marked on the left side of the receiver/frame and repeated on the cylinder.
- observed serial number consisted of three numbers without a letter prefix or suffix.

Shots

- swing out cylinder. Opens to the right side.

Notes

Make

- make is not marked on this firearm, however, it will be marked with Belgian proof marks and/or "Belgium" or "Made in Belgium".

Model

- "Bulldog Type" is not marked on the firearm.
- model designation is derived from the physical characteristics of the firearm.
- research sources indicate dates of manufacture for this type of handgun as circa 1880's to circa 1914.
- in general terms this type of Belgian handgun was a copy of the Webley No.2 "British Bulldog". It is typified as a short barreled, solid frame handgun with loading gate, usually has an empty case ejecting rod with the rod sheathed within the cylinder axis pin; this rod is pivot mounted on the right side of the frame and is capable of swinging to the right. A bird's head grip is typical.
- barrel and frame are usually forged integrally as one piece. It may or may not have a noticeable "hump" on the grip backstrap behind the hammer. Typically there are no manufacturer's marks of any kind on this genre of handgun, however, Belgian proofmarks and "Made in Belgium" will be apparent.
- may have a folding trigger without trigger guard or solid trigger guard.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

FRT Report

Firearm Reference Number (FRN): 122316
Make: Unknown Belgian
Model: Colt 1851 Navy Copy

Summary

Make:	Unknown Belgian
Model:	Colt 1851 Navy Copy
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	BELGIUM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
122316 - 1	36 PERCUSSION	6	192	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- Belgian proofmarks will usually appear on the firearm, usually on the receiver/frame and/or rear of cylinder.

Model

- the model designation is not marked on the firearm.
- copies of the Colt 1851 Navy pistol were produced by several Belgian manufacturer's who did not mark their names on the firearms.
- generally, the features of this model follow those of the original Colt model, with the significant difference of having alternate cylinder markings which may include scrollwork, floral designs, naval battle scenes or ships, dogs, or mounted horsemen.
- "COLT BREVETTE", "COLT PATENT", or "ADDRESS SAML COLT NEW YORK CITY" may be found marked on the top of the barrel assembly or on the side of the cylinder.
- features may include: blued steel barrel assemblies and case hardened receiver/frames; bronze grip frame; varnished wood grips and an octagonal barrel profile.

Action

- single action percussion revolver.

Serial Number

- the serial number is marked on the underside of the receiver/frame and on the forward portion of the trigger guard assembly.
- observed serial numbers have consisted of four numbers without letter prefix or suffix.
- serial number rationalization is unknown and duplicate serial numbers are known to exist.

Calibre

- the calibre designation is not marked on the firearm.

FRT Report

Firearm Reference Number (FRN): 122699
Make: Unknown Belgian
Model: Drilling

Summary

Make:	Unknown Belgian
Model:	Drilling
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Combination Gun
Action:	Multi-Barrel
Country of Manufacturer:	BELGIUM
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
122699 - 1	7X72R/16 GA X 2 3/4"	3	795	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- firearm will have Belgium proof marks or the name of a city or region in Belgium.

Model

- "Drilling" is not marked on the firearm.
- "Drilling" is a three barrel combination gun.
- "Drilling" uses shotgun cartridges and rimmed or center fire rifle cartridges.
- features include: three barrels; hinged receiver/frame with a break open device; hammer or hammerless; two or three triggers; may have a barrel selector lever; straight or pistol grip stock.
- Barrel configurations may be as follows:
- side by side shotgun barrels of the same calibre over a rifle barrel;
- side by side rifle barrels of the same calibre over a shotgun barrel;
- one shotgun barrel over a rifle barrel with a smaller calibre rifle barrel offset to one side between the two over and under barrels;
- side by side barrel configuration, one being a shotgun barrel and the other a rifle barrel over a rifle barrel of the same calibre as the side by side, also known as a "Bock Drilling";
- side by side shotgun barrels under a small calibre rifle barrel, also known as "Schienendrilling";
- side by side shotgun barrels over a shotgun barrel;
- over and under shotgun barrels with a rifle barrel offset to the side between the over and under barrels, also known as a "Bock-Doppelflinte mit seitlichem Kleinkaliberlauf"; and
- over and under barrel configuration, shotgun barrel over a small calibre rifle barrel over a larger calibre rifle barrel.

Action

- hinged barrel design.
- barrel assembly consists of three barrels: one rifled barrel and two smoothbore barrels or two rifled barrels and one smoothbore barrel.

FRT Report

Firearm Reference Number (FRN): 81533
Make: Unknown Belgian
Model: E

Summary

Make:	Unknown Belgian
Model:	E
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Shotgun
Action:	Multi-Barrel
Country of Manufacturer:	BELGIUM
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
81533 - 2	12 GA X 2 1/2"	2	762	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	
81533 - 3	12 GA X 2 3/4"	2	475	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	
81533 - 4	12 GA X 2 3/4"	2	510	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	
81533 - 1	12 GA X 2 3/4"	2	762	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "MADE IN BELGIUM" was observed on the underside of the solid rib between the barrels.
- "GOVERNMENT TESTED FOR SMOKELESS POWDER" was observed on top side of the solid rib between the barrels.

Model

- "E" inside a diamond was observed marked on the side of the receiver/frame or sidelock plate.
- "Government Tested For Smokeless Powder" was observed marked on the top of the rib between the barrels.
- features include: side by side barrels with bead front sight; front hinged receiver/frame with top tang mounted break open lever and with or without slide type safety; internal or external hammers; double triggers; wood splinter forearm and semi-pistol grip buttstock.

Action

- side by side pattern.

Serial Number

- serial number was observed marked on the watertable and repeated on the underside of the barrel assembly.
- observed serial numbers consisted of four, five and six numbers without a letter prefix or suffix.

Calibre

- sample chambered for 12GAX2 3/4" marked with a 12 over C diamond and 70mm on the underside of barrels.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- the following marks were located on the water table. Belgium nitro proof make "Lion over a line with PV under the line". E over LG over a star in an oval. Five point star over a NP.
- on each of the side plates is an "E" inside a diamond - known example marked, "Government Tested For Smokelss Powder" on the top of the rib between the barrels.

FRT Report

Firearm Reference Number (FRN): 136403
Make: Unknown Belgian
Model: Flobert Type

Summary

Make:	Unknown Belgian
Model:	Flobert Type
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Shotgun
Action:	Single-Shot
Country of Manufacturer:	BELGIUM
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
136403 - 1	44 SHOT	1	409	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- no maker's name appears on this firearm; it will however bear Belgian proof marks and/or be marked, "Belgium", or "Made in Belgium".

Model

- no model name is marked on this firearm, the model name is derived from the action-type characteristics of the firearm.
- manufactured circa 1850 to 1920.
- "Flobert Type" is not marked on firearm.
- this is a generic entry for Unknown Belgian, Flobert Type, smooth bore firearms.
- Flobert Type actions can be classified as one of four variants;
- 1) "Original" Flobert action is where the hammer face forms the lock to close the chamber.
- 2) "Plain" Flobert action is where the hammer face forms the lock to close the chamber except it has the added feature of being fitted with a separate extractor.
- 3) Flobert "Remington System", is where the chamber is closed with a separate breech block resembling the original Remington rolling block design.
- 4) "Warnant System", uses a hinged, forward tipping breech block.

Serial Number

- this type of firearm may or may not have a serial number.
- known example did have a four digit number without prefix or suffix.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.
