FRT Report

Firearm Reference Number (FRN): 193962
Make: Unknown Belgian
Model: Gasser Type

Summary

Make:	Unknown Belgian
Model:	Gasser Type
Manufacturer:	Unknown Belgian
Level:	Non-Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	BELGIUM
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
193962 - 1	32 SHORT RF	6	85	Antique AFR, Section 1, para. 6	Non-Commercial Customization	
193962 - 2	380 REV SHORT CF	6	114	Antique AFR, Section 1, para. 7	Non-Commercial Customization	

Notes

Make

- make or manufacturer's markings were not observed on the firearm.
- Belgian proof mark was observed marked on the right side of the receiver/frame.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is a generic record encompassing "Gasser" type revolvers that are unidentifiable as to make, model or manufacturer.
- the distinguishing feature of "Gasser" revolvers is a large, external, tear drop shaped action return spring on the side of the receiver/frame that serves to reset the trigger mechanism once the trigger has been squeezed.
- this action feature may be seen on open topped, closed frame, or top break revolvers.
- features may include: post front sight; round or octagonal barrel; plunger style or swinging ejector rod; fixed or folding trigger; round or fluted cylinder; spur hammer; receiver/frame with or without engraving; double action mechanism; wood grips on a square butt, bird's head or bag grip frame; blued or in the white finish.

Manufacturer

- make or manufacturer's markings were not observed on the firearm.
- Belgian proof mark was observed marked on the right side of the receiver/frame.

FRT Report

Firearm Reference Number (FRN): 119176
Make: Unknown Belgian
Model: Harpers Ferry 1805 US Flintlock Pistol Reproduction

Summary

Make:	Unknown Belgian
Model:	Harpers Ferry 1805 US Flintlock Pistol Reproduction
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	BELGIUM
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
119176 - 2	54 FLINTLOCK	1	254	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	
119176 - 1	58 FLINTLOCK	1	255	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- no maker's name appears on this firearm.
- known example had the word "BELGIUM" marked on the left side plate and Belgian proofmarks on the barrel.

Model

- "Harpers Ferry" followed by a date of 1805, 1806, 1807 or 1808 is usually marked on the rear of the lockplate behind the hammer.
- lockplate is also usually marked with the US "spread eagle" ordnance symbol over the letters "US" or a variation thereof.
- this is a modern reproduction of the "US Pistol Model 1805" which was the first martial pistol contracted by the U.S. government; it was manufactured at the national armory in Harpers Ferry, Virginia.
- it was known as the Model 1805 after the date of the initial order by the US Government; the bulk of the pistols were in fact produced in the years 1806, 1807 and 1808. In many instances the date of manufacture is mistaken as being part of the model designation.
- features include: muzzle loading, flintlock ignition; brass noseband, trigger guard, thimbles, buttcap and side plate; case hardened lockplate and hammer; hardwood stock; round barrel which is usually held to the barrel by a single wedge.
- may have an under barrel rib that extends from the forend of the stock to within 1/8" of the muzzle with a ramrod suspended from the underside of the rib.

Action

- muzzle loading, flint-lock ignition.

Serial Number

- known example had a three digit number with a letter prefix marked on the rear of the barrel.
- letter prefix "B" has been observed.

Other Markings

- known example was marked; "CENTENNIAL Trade Mark" on the top rear of the barrel and "BELGIUM" on the left side plate.

Notes

Make

- "Unknown Belgium" is not marked on the firearm.
- samples have been noted with "BELGIUM" marked on the top of the barrel just over the chamber, or void of any markings other than model designation and Belgian proof marks on receiver/frame and barrel.

Model

- "LITTLE GEM" was observed marked on the top of the barrel just above the forward end of the forearm.
- this is a single shot, under folding shotgun.
- features include: bead front sight and rear sight is machined into the top of the standing breech of the receiver/frame; round smoothbore barrel; front hinged flat sided receiver/frame with the trigger guard acting as the break open lever; external centrally mounted hammer with offset hammer spur (spur offset to the right); trigger guard is round at the back and squared off at the front; checkered wood short forearm and semi-pistol grip buttstock..
- Note: action is unlocked by pulling back on the trigger guard.

Action

- break open action, opened by pulling the trigger guard to the rear.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number was observed marked on right side of receiver/frame and repeated on the right side of the barrel. - serial number was observed marked on the left side of the barrel. - observed serial numbers consisted of three or four numbers without a letter prefix or suffix.
Calibre	- gauge and chamber length denoted by numbers in an oval stamped at the breech end of the barrel; ie. "410-50" (410x 2 1/2"), "410-70" (410x 2 3/4"), or "410-76" (410x3").

Notes

Make

- carries Belgian proof, inspection, and acceptance marks on the cylinder; and "Raye" (rifled) inspection and acceptance marks on the barrel, to Belgian conventions of the late 1800's and early 1900's.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- not marked as to model (or manufacturer). - features simulate the popular "Royal Irish Constabulary" revolvers by Webley; produced during the late 1800s to the early 1900s. - commonly referred to as "R.I.C Type" or "R.I.C. Pattern", sometimes as "British Constabulary", "Metropolitan Police", or "RIC No. 1/2/3". - the features of this firearm are usually characterized as a compact, solid-framed, short-barreled revolver (often with an integral barrel and frame), with fluted or un-fluted five or six chambered cylinder, usually with a right side loading-gate, usually with a swing-out case ejector rod stored within the cylinder axis rod, usually with squared handgrip and steel grip-cap, often with a lanyard ring (instead of the birdshead style handgrip of the Bulldog Type), usually of a large cartridge (rim-fire or centerfire) caliber (such as 32, 38, 41, 44, 450 or larger), with no sights or rudimentary sights.
Serial Number	- usually numbered, visible on the receiver/frame.
Canadian Law Comments	- some examples of this firearm, when manufactured before 1898 may be antique.

Notes

Make

- The make is not marked on the firearm.
- The firearm will show Belgian proof marks.

Model

- The model designation is not marked on the firearm.
- The main feature is the ring trigger, instead of the normal guarded trigger, spur trigger, or folding trigger, found on other revolvers with otherwise similar features.
- Features include: compact pocket size revolver; rudimentary sights; bird's head or rounded grip; exposed spurred hammer; usually has a yoke mounted ejector; right side loading gate.

Serial Number

- The serial number is usually not marked on the firearm.
- A serial number may be found on the receiver/frame, under the grip plates.

Calibre

- The calibre designation is not marked on the firearm.

Shots

- Removeable cylinder.

Notes

Make - will usually bear Belgian proof marks on barrel and action.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "Rook Rifle" is not marked on the firearm.
- "Rook Rifle" model designation was used in the United Kingdom in refers to the intended purpose of a small, single shot, lightweight sporting rifle normally used for rabbit, crow, or vermin control.
- "Rook Rifle" was also known as a 'Garden Rifle', 'Rabbit Rifle', or 'Pest/Vermin Rifle'.
- "Rook Rifle" may be found with a number of different types of actions including but not limited to break open (hinged barrel design), falling block or Martini-type.
- this is a generic file encompassing all Rook Rifles of Belgian manufacture which bear no maker's name or logo.

Action

- 'Rook Rifle" was available in various action types:
- break open action (hinged barrel design).
- falling block/vertical sliding wedge action.
- tilting block action (Martini type).

Notes

Make

- "Belgium", "Made in Belgium" or Belgian proof marks marked on the firearm.

Model

- The model designation is not marked on the firearm.
- Model designation is derived from the method by which this pistol is loaded; loading was accomplished by unscrewing the barrel.

- Screw Barrel Pistols were popular in the period prior to 1880 and were commonly manufactured in England and Belgium.

- This is a single shot pistol with a removable barrel and an exposed hammer centrally located on the receiver/frame behind the chamber.

- This handgun is intended to be loaded from the breech end of the barrel and as such was originally supplied with a wrench to unscrew the barrel from the receiver/frame in order that a lead ball and loose powder could be inserted into the chamber end of the barrel and then the barrel screwed back onto the receiver/frame.

- Features include: octagonal screw on barrel or a round screw on barrel with an underlug; hammer is located in the centre of the receiver/frame; conventional trigger with trigger guard or forward folding trigger; one piece wooden grips.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- The barrel unscrews in front of the chamber, so it can be loaded with a ball that fits the barrel more tightly than is possible with a muzzle loader.
- The turnoff barrel may be rifled.

Notes

Make

- Belgian proof marks may be marked on the barrel or receiver/frame of the firearm.

Model

- there is no model designation marked on the firearm.
- this is a generic record for side by side pistols of Belgian manufacture that cannot otherwise be identified.
- features observed included: chrome plated side by side barrels and receiver/frame; bead front sight; double exposed hammers placed directly behind the standing breech on top of the receiver; double triggers; break-open type of action with a barrel release button positioned in front of trigger guard.
- features observed included: side by side barrels with bead front sight; Remington rolling block type action; double exposed hammers placed directly behind the breech on top of the receiver; single trigger.
- features observed included: side by side barrels with bead front sight; front hinged receiver/frame with top tang mounted break open lever; side hammers; two triggers.

Action

- side by side barrel configuration.

Serial Number

- samples may be seen with or without serial numbers.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- may only be marked "Made in Belgium" on the barrels.
- may only show Belgian Proofs.

Model

- model is not marked on firearm.
- this is a generic entry for those Unknown Belgian side by side shotguns that are not identifiable as to model.
- Side by Side is not a model name but rather a description of the action in order to facilitate identification of the firearm.
- features may include: boxlock; sidelock; hammerless; exposed hammers; extractor or ejector; double triggers and top/side/under lever opening.
- may have several Belgian proof marks.

Action

- side by side barrel configuration.

Serial Number

- when numbered, the serial number may appear on the receiver/frame flats (viewed with the barrels removed or in the open position).

Other Markings

- note that some examples have been marked "Made in Belgium for Eatons of Canada" with no other mention of make or manufacturer.

68944 - 15	44-40 SHOT	1	762	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make - firearm bears no markings to denote make, manufacturer or country of origin.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- model is not marked on the firearm.
- this is a generic entry for Unknown Belgian single barrel shotguns that are not identifiable as to model.
- may be operated by bolt, lever or a hinged break-open mechanism.
- features may vary greatly.
- many single shot bolt action shot guns were made from surplus bolt action military rifles which were re-chambered, re-bored and/or re-barreled to produce a low-cost utilitarian-type single barrel shotgun for the civilian market.
- stock is usually modified from its original military configuration.
- many different calibre/barrel length combinations can be expected for this type of firearm.

Other Markings

- Belgian proofmarks of "ELG*" within an oval indicates that a firearm was made prior to July, 1893. In July of 1893 a crown was added to the top of the oval which encircles "ELG*". These proofmarks are frequently stamped on the bottom or side of the barrel.

FRT Report

Firearm Reference Number (FRN): 130279
Make: Unknown Belgian
Model: Single Barrel Folding Shotgun

Summary

Make:	Unknown Belgian
Model:	Single Barrel Folding Shotgun
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Shotgun
Action:	Single-Shot
Country of Manufacturer:	BELGIUM
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
130279 - 3	16 GA X 2 3/4"	1	750	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	
130279 - 1	28 GA X 2 9/16"	1	760	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "MADE IN BELGIUM" was observed marked on the left side of the barrel or receiver/frame.

Model

- model designation is not marked on the firearm.
- this is a single barrel shotgun which can be folded in half for storage or transporting.
- features observed: round, octagonal or round to octagonal smooth bore barrel with a bead front sight; front hinged receiver/frame with the break open action release lever mounted on the right side; exposed spur hammer; single action trigger mechanism; checkered wood forearm and straight or pistol grip buttstock with a metal butt plate.
- under folding release button is mounted on the left side of the receiver/frame.
- this style of folding shotguns were marketed by the following Belgium companies: Pire in 1899, Crahay in 1912, Galand in 1914, Lovin-Hardy in 1914, Fabrique d'Armes Unies in 1925, Vendrix in 1928, Dumoulin in 1931, Laloux in 1935, Janssen Freres in 1937 and others.

Action

- hinged barrel design.

Serial Number

- serial number was observed marked on the barrel.
- observed serial number consisted of five numbers and a two letter "JS" suffix.

Calibre

- "28-65" inside a letter "C" was observed marked on the barrel.

Other Markings

- "TESTES" was marked on the barrel of an observed example.

Make: Unknown Belgian
Model: Smith & Wesson Hand Ejector 32 No 1 1/2 Safety Hammerless Copy

Summary

Make:	Unknown Belgian
Model:	Smith & Wesson Hand Ejector 32 No 1 1/2 Safety Hammerless Copy
Manufacturer:	Unknown Belgian
Level:	Non-Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	BELGIUM
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
194850 - 2	32 S&W	6	89	Prohibited CC 84(1) "prohibited firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- Belgium proofmarks and/or inspector marks may be found on the right side receiver/frame and cylinder.
- Beligium country proofmark/logo of an oval with "E" over "LG" over a star inside and an attached crown above is marked on the cylinder face.

Model

- model is not marked on the firearm.
- this model loosely resembles a generic made copy of the "Smith & Wesson Hand Ejector 32 No 1 1/2 Safety Hammerless" model that was produced circa 1888 to 1937; distinguishable by the rear grip, squeeze safety.
- features include: round barrel with raised top rib containing side flutes/grooves with fixed half-coin front sight and fixed "V" grooved rear sight; T shaped barrel release; hammerless receiver/frame with front hinge; fluted cylinder; double action trigger and trigger guard with a square/recurve rear; rear grip, squeeze safety; checkered grip plates; blued or nickel plated finish.
- observed feature includes: grip plate with a six pointed star within a circle.

Manufacturer

- manufacturer is not marked on the firearm.
- Belgium proofmarks and/or inspector marks may be found on the right side receiver/frame and cylinder.
- Beligium country proofmark/logo of an oval with "E" over "LG" over a star inside and an attached crown above is marked on the cylinder face.

Serial Number

- serial number is usually marked on the receiver/frame.

Calibre

- calibre is usually marked on the firearm.
- observed marking "FOR 32 SMITH & WESSON CARTRIDGE" found on the top barrel rib.

Model: Tap Action Flintlock Pistol

Summary

Make:	Unknown Belgian
Model:	Tap Action Flintlock Pistol
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Handgun
Action:	Multi-Barrel
Country of Manufacturer:	
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
198126 - 1	40 FLINTLOCK	4	70	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- The make is not marked on the firearm.

Model

- The model designation is not marked on the firearm.
- This is an unusual form of repeating flintlock pistol, using a "tap" (a rotating cross-bolt with holes bored through it) to allow the sparks from the flint going into the pan to fire either one barrel or another, or both barrels at once depending on the position of the "tap".
- Features include: four barrels stacked over top of each other in a two by two configuration; cock, frizzen, and pan in a box-lock action; engraved receiver/frame; sliding safety to block the motion of the cock over the top of the receiver/frame; barrel selector tap on left side; bag-handle wooden grip with imbedded decorative steel pins.

Action

- Muzzle loading, flintlock ignition.

Canadian Law Comments

- Some examples of this model, when manufactured prior to 1898 may be considered Antique in Canada.

Other Markings

- Belgian proof marks are marked on the firearm.

Make	- "BELGIUM", "Made in Belgium" and Belgian proofmarks appear on the firearm.
Model	- model designation is not marked on the firearm, it is a descriptor of the design. - features include: fixed or adjustable sights; internal or external hammer; single or double action trigger mechanism; may have safety lever; fluted or plain cylinder; round or octagonal barrel; square or round butt; blued or nickel finish; wood or plastic grips.
Calibre	- calibre designation may appear on the firearm.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.
Other Markings	- Belgian proofmarks of "ELG*" within an oval indicates that a firearm was made prior to July, 1893. In July of 1893 a crown was added to the top of the oval which encircles "ELG*". These proofmarks are frequently stamped on the back of the cylinder.

Notes

Make

- "Belgium" or "Made in Belgium" is usually marked on the firearm.

Model

- model designation is not marked on the firearm.
- features include: fixed sights; round or octagonal barrel; folding trigger; external hammer or hammerless; square, round or birds head grip; various finishes.
- the model designation is not marked on the firearm; this is a generic "type" designation applied to a small class of pocket revolver popular around the turn of the century in 1800s Europe, sold to allow bicyclists to repel aggressive dogs.
- these revolvers may be seen with a wide variety of features, including fixed or folding trigger; hammerless or spurred hammer; five- or six-shot cylinder, and so on.
- a specific sub-class of "Velo Dog" revolvers was made to resemble the then-new Browning 1906 pistol, and may include features to make them resemble a semi-automatic pistol, such as a flat-sided profile with a manual safety, and even what appears to be a dummy magazine cast into the grip-frame.
- features may include: fixed open or groove sights; round, ovate, flat-sided or octagonal barrel; fixed or folding trigger; external hammer or hammerless; square, round or birds head grip; blued, colour-case-hardened, or nickel finishes.

Serial Number

- may or may not be numbered. One observed example consisted of five numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments - some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

77133 - 2	455 REV	5	64	Antique CC 84(1) "antique firearm" para. (b)	Non-Commercial Customization	

Notes

Make

- no manufacturer's name or trademark symbol is marked on this firearm; it does however have Belgian proofmarks or may say, "Belgium" or "Made in Belgium"; the Make is derived from the fact that this handgun is made in Belgium.

Model

- "Waterloo Bulldog" was observed marked on the top strap.
- features include: fixed sights; octagonal barrel; solid top receiver/frame with a removable fluted cylinder; exposed spur rebound hammer; single/double action trigger mechanism; rounded trigger guard; checkered wood grips; blued finish.
- pivot-type ejector rod is fixed to the front of the receiver/frame, is housed within the cylinder axis pin and swings to the right of the barrel to eject spent casings after it has been partially withdrawn form the axis pin housing.
- Belgian proofmarks are apparent on this firearm.
- this firearm would have been made circa 1870's to the early 1900's.

Serial Number

- known example did not have a serial number.

Notes

Make

- Belgian proofmarks will appear on the firearm, usually on the receiver/frame and/or rear of cylinder.
- no markings that indicate the actual manufacturer appear on the firearm. This type of firearm was built by several firms that remain unidentified.

Model

- "WESTERN" over "BULLDOG" is marked on the top strap.
- "WESTERN BULLDOG" is a Belgian handgun was a copy of the Webley No.2 "British Bulldog". It is typified as a short barreled, solid receiver/frame handgun with a loading gate, usually with an empty case ejecting rod and a bird's head grip.
- features include: half-moon, blade front and grooved top strap rear sight; round or multi-sided barrel; solid top receiver/frame; right side loading gate; smooth-sided cylinder ; double action trigger; exposed spur hammer; checkered wood grip panels.

Serial Number

- serial number of a referenced example was marked under the left grip panel on the receiver/frame.

Notes

Make

- no maker's name is apparent on this firearm, however, British proofmarks will be apparent on the barrel, cylinder and/or receiver/frame.

Model

- no model name is marked on this firearm; model designation is derived from the physical characteristics of the firearm.
- this type of firearm would have been produced circa mid-1850's to mid-late 1860's.
- features may include: percussion ignition, solid receiver/frame; single or double action trigger mechanism; bobbed-type rebound hammer or spurred rebound hammer; Kerr-type loading lever mounted on the left side of the barrel; usually plain round cylinder without fluting; noticeable hump or prawl at the top of the grip frame behind the hammer; octagonal barrel; steel butt cap; blued finish; hardwood checkered grips.
- British proofmarks are apparent on the barrel, cylinder and/or the receiver/frame of this firearm.

Action

- muzzle loading, percussion ignition.

Serial Number

- observed example had a five digit number without prefix or suffix marked on the right side of the receiver/frame.

Other Markings

- observed example had the word, "PATENT" marked on the right side of the receiver/frame followed by the letters, "No" and the serial number.

Notes

Make

- make is not marked on this firearm, however, it will be marked with UK proof marks (London or Birmingham).

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type, which is characterized by a double-action trigger mechanism and a hinged loading lever mounted on the left side of the barrel.
- these revolvers may be seen in split or solid frame styles.
- features may include: blued finish; varying degrees of engraving; (usually) octagonal barrel; fixed open sights; a hinged loading-lever on the side of the barrel that cams a loading plunger rearwards into the chamber mouths as it is pulled upwards; exposed nipples at the rear of the cylinder; a single action/double action trigger mechanism; (usually) a square-butt grip-frame; and wooden, synthetic, bone, or ivory grips.

Serial Number

- may or may not bear a serial number.

147482 - 1	55 FLINTLOCK	1	164	Antique CC 84(1) "antique firearm"	Non-Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- many of the early gunsmiths from this time period did not mark their products and must therefore remain nameless.
- at the time of King Charles the 1st, in 1631, a Commission was establised to create a committee with no fewer than seven gunsmiths, their names being given as Henry Rowland, Richard Burrowe, Thomis Addis, John Norcott, William Dawstin, John Watson, and William Graves. It would be probable, that this type of firearm was made by one or more of these individuals.

Model

- introduced circa 1630 to 1635.
- model designation is not marked on this firearm.
- this is the earliest muzzle loading flintlock pistol, made after the snaphaunce lock design (or converted from one) and before the introduction of the dog-lock design circa 1640.
- features include: octagonal, brass smooth bore barrel is cross pinned to the stock; under barrel mounted ram rod; brass forend tip; lobe trigger with no trigger guard; three side nails; ringed cock top piece; external, transverse sear that engages a partial ring at the rear of the cock base.

Action

- muzzle loader.

Serial Number

- such arms are often marked on the right side of the buttstock or the upper tang of the butt plate with a number that usually represents the rack position, or Company, Unit, or Regiment number and is not the serial number.

FRT Report

Firearm Reference Number (FRN): 122303
Make: Unknown British
Model: Farquharson Sporting Rifle

Summary

Make:	Unknown British
Model:	Farquharson Sporting Rifle
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
122303 - 2	303 BRITISH	1	699	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	
122303 - 1	450/400 X 3"	1	660	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Model

- the Farquharson rifle was manufactured circa 1870.
- this is a generic entry for those unmarked Farquharson rifles that are not identifiable as to a manufacturer.
- the model designation is not marked on the firearm.
- features include: steel receiver/frame and round or octagonal barrel; lever under the trigger guard to drop the falling block; a safety may be located on the right side of the receiver/frame; a wooden stock and forend.
- the receiver/frame and barrel may be engraved.

Action

- lever operated, falling/dropping block design.
- solid metal breechblock slides vertically in grooves cut into the receiver/frame.
- operating lever is located under the trigger guard

Serial Number

- a serial number may be marked on the receiver/frame or barrel.

Remarks

- possible that the unmarked Farquharson Rifles appears to be finished by Webley or Turner from the engraving and stocking style.
- the rifles was also used as a test gun by Eley or Kynoch factory for testing ammunition.

Notes

Make - firearm bears no markings to identify Make or Manufacturer, other than British proofmarks.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- this is a generic record for those percussion pistols that can not be identified as to make, model or manufacturer, but where the country of origin is the United Kingdom. - features may include: a wooden stock with bird's head, bag or saw handle grip; brass fittings (eg. nose cap, grip cap, trigger guard, filigree, bolsters and ram-rod ferrules); fold down or spur trigger; round or octagonal barrel and fixed, adjustable, or no sights. - this type of handgun would have been made circa mid-1850's to early circa 1870's.
Action	- muzzle loader.
Serial Number	- the firearm may be serialized.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

188242 - 1	44 PERCUSSION	6	159	Antique CC 84(1) "antique firearm"	Non-Commercial Customization	

Notes

Make

- British proof marks obvserved on the cylinder of the firearm.
- "crossed spears/sceptres" in X configuration with a "crown above and V below" is marked on the firearm in various places; cylinder and barrel.
- "crossed spears/sceptres" in X configuration with a "crown above and B C P" in each of the blank areas of the X configuration is marked on the firearm; cylinder and barrel.

Model

- "Transitional Pepperbox Revolver" was normally manufactured circa 1840 to the 1860's.
- "Transitional Pepperbox Revolver" is also known as a proto revolver or transitional revolver.
- "Transitional Pepperbox Revolver" resembles a pepperbox revolver with a long barrel wedged on to an extension of the barrel cluster axis pin.
- "Pepperbox" revolver has multiple barrels, which revolve on one axis. The receiver/frame is directly behind the barrels with the grip curving in a downward direction directly behind the receiver/frame.
- "Transitional Pepperbox Revolver" retained the appearance of the pepperbox revolver with the receiver/frame being directly behind a cylinder and a barrel wedged on to an extension of the barrel cluster axis pin and with the grip curving in a downward direction directly behind the receiver/frame.
- "Transitional Pepperbox Revolver" may have a single or double action trigger mechanism. The pepperbox revolver's barrel assembly was shortened and became a cylinder and a single barrel was then fitted.
- "Transitional Pepperbox Revolver" was eventually replaced with the more modern revolver style receiver/frame, grip and hammer.

Serial Number

- may or may not be marked on firearm.
- observed sample did not contain a serial number.

Calibre

- not marked on the firearm.

112655 - 3	32 RF	1	584	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	
112655 - 1	360 NO 5	1	640	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- the firearm is entirely devoid of markings related to Make or Manufacturer.
- often marked with British provisional and definitive proof marks, usually by London or Birmingham Proof Houses.

Model

- "Rook Rifle" is not marked on the firearm.
- "Rook Rifle" model designation was used in the United Kingdom in refers to the intended purpose of a small, single shot, lightweight sporting rifle normally used for rabbit, crow, or vermin control.
- "Rook Rifle" was also known as a 'Garden Rifle', 'Rabbit Rifle', or 'Pest/Vermin Rifle'.
- "Rook Rifle" may be found with a number of different types of actions including but not limited to break open (hinged barrel design), falling block or Martini-type.
- side lock external hammer or hammerless box lock rifle (often engraved), top, under, or side levered, usually single barreled (sometimes double barreled); usually with multiple folding leaf rear sights; usually with checkered walnut pistol grip stock and a small forearm, and often with an octagonal barrel.
- "Rook Rifle" is not to be confuse with the 'Collector Gun' or 'Garden Gun', which is almost identical in appearance, but is a smooth-bore, designed for shot, often in .410 bore. ('Gun' in British parlance usually refers to a smooth-bore shotgun.)

Action

- 'Rook Rifle" was available in various action types:
- break open action (hinged barrel design) manufactured by Holland & Holland, Jeffery, Webley & Scott, etc.
- falling block/vertical sliding wedge action manufactured by Gibbs, Henry, Jeffery-Farquharson, Rigby-Farquharson, etc.
- tilting block action (Martini type) manufactured by Greener, Martini, etc.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- often not marked with caliber designation.
- NOTE: sometimes certain low powered cartridges of the era were specifically referred to as 'Rook Rifle Cartridges'.

Remarks

- this rifle was used to dispatch small nuisance animals; principally 'Rooks' (the term loosely includes crows, ravens, grackles, starlings, magpies and jays), and small animals such as rabbits and squirrels and vermin such as rats, weasels and badgers.
- a rook is a white faced European black bird, a member of the crow family, often considered a mischievous nuisance.

FRT Report

Firearm Reference Number (FRN): 172944
Make: Unknown British
Model: Scottish Highlander Regimental Flintlock Pistol

Summary

Make:	Unknown British
Model:	Scottish Highlander Regimental Flintlock Pistol
Manufacturer:	Unknown British
Level:	Non-Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
172944 - 1	52 FLINTLOCK	1	190	Antique CC 84(1) "antique firearm"	Non-Commercial Customization	

Notes

Make

- make/manufacturer is not marked on the firearm.
- British proof marks are visible on the barrel.

Model

- model designation is derived from the characteristics of the firearm.
- this is an all steel construction, including the stock, flintlock pistol.
- features include: round, stepped barrel slightly flared at the muzzle that may also be octagon; flat sided metal stock with curved grip; under the barrel ram rod; button shaped trigger without trigger guard; ram's horn butt with a threaded, centre knob for the touch hole pick; belt hook attachment on the left side; unfinished steel surface with the stock been steel or brass.
- a very similar pistol, the "Black Watch Pistol" is known under several similar names, and must not be confused with the "Murdoch" pistol; where the "Murdoch" pistol has a "ram's-head" butt, with curlicue extensions that help to protect a ball-headed vent-pick threaded into the butt, the "Black Watch Pistol" is made with an all-brass butt and stock, with a double-lobed "kidney-shaped" butt that allows the pistol to be used as a club after the shot is fired.

Manufacturer

- make/manufacturer is not marked on the firearm.
- British proof marks are visible on the barrel.

Action

- muzzle loader.

197128 - 1	40 PERCUSSION	1	80	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Non-Commercial Customization	

Notes

Make

- British address or British proof marks marked on the firearm.

Model

- The model designation is not marked on the firearm.
- Model designation is derived from the method by which this pistol is loaded; loading was accomplished by unscrewing the barrel.
- Screw Barrel Pistols were popular in the period prior to 1880 and were commonly manufactured in England and Belgium.
- This is a single shot pistol with a removable barrel and an exposed hammer centrally located on the receiver/frame behind the chamber.
- This handgun is intended to be loaded from the breech end of the barrel and as such was originally supplied with a wrench to unscrew the barrel from the receiver/frame in order that a lead ball and loose powder could be inserted into the chamber end of the barrel and then the barrel screwed back onto the receiver/frame.
- Features include: octagonal or round screw on barrel with an underlug; hammer is located in the centre of the receiver/frame; conventional trigger with trigger guard or forward folding trigger; one piece wooden grips.

Action

- The barrel unscrews in front of the chamber, so it can be loaded with a ball that fits the barrel more tightly than is possible with a muzzle loader.
- The turnoff barrel may be rifled.

Calibre

- Calibre designation may not be marked on the firearm.

Notes

Make

- firearm bears no markings to identify Make or Manufacturer.
- may have British proof marks or "England" or variation thereof marked on the firearm.

Model

- "SEA CAPTAIN PISTOL" or variation thereof is marked on the barrel.
- muzzle loading, percussion ignition.
- made during the 1830-1850 era.
- features include: flattened barrel top fitted with a front sight; lower barrel is fitted with bottom ribs that house a swivelling rammer; belt hook on the left side; two hammers and triggers; steel butt cap.

Action

- over & under barrel configuration.

Calibre

- 60 PERCUSSION in this instance refer to the original calibre of "24 bore", bore size that is measuring 15mm (.590").

Notes

Make

- maker's name does not appear on this type of firearm.

Model

- model designation is not marked on the firearm.
- this is a generic entry for those Unknown British side by side shotguns that are not identifiable as to model.
- features may include:
- external or internal hammers.
- double or single trigger, with or without barrel selector.
- sidelock or boxlock.
- ejectors or extractors.
- top, side or push button opening lever.
- finishes and engraving may vary widely.

Action

- side by side pattern.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Other Markings

- will normally have English proof marks.

Notes

Make

- The make is not marked on the firearm.
- A banner logo may be found on the grip panels with a five point star followed by 356 within the banner.
- A "five point star with a circle divot in the centre" may be marked on the left side of the receiver/frame or slide.
- A five point star observed to be a "Chinese" marking, but manufacture origins is not known.

Model

- The model designation is usually marked on the right side of the firearm.
- "356" was observed marked on the right side of the slide.
- A banner type logo observed on both the pistol grip panels with a five point star followed by "356" within the banner.
- This firearm closely resembles a Walther PPK/PPKS model.
- Features include: blued or stainless steel barrel; blued receiver/frame with rear exposed hammer with small ring; double-action trigger mechanism; left side magazine release button; left side safety catch on the rear of the slide; hinged trigger guard and is used to lock slide to the receiver/frame.

Action

- Blowback operated.

Serial Number

- The serial number is not marked on the receiver/frame.
- Six numbers was observed marked on the left side of the slide followed by a five pointed star followed by a potential year date; this number nor the year date are not to be mistaken as the serial number in accordance to the serial number marking regulations for Canada.

Other Markings

- A year date "1956" was observed marked on the left side of the slide.

FRT Report

Firearm Reference Number (FRN): 149367
Make: Unknown Chinese
Model: Semi-Automatic

Summary

Make:	Unknown Chinese
Model:	Semi-Automatic
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	CHINA
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
149367 - 1	7.63MM MAUSER	10	197	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- the make is not marked on the firearm; this is one of a large number of Chinese pistols built for the domestic Chinese market between the 1920s and 1950s, based largely on copies of existing Western designs that had been purchased abroad (notably, the Mauser C96 and copies, and the Browning 1900/1910 and copies). Because many of these pistols were made under the control and direction of local warlords, they bear few identifying markings, and are often stamped with non-western and non-Chinese gibberish characters that were never meant to be read or understood by the end users.

Model

- the model is not marked on the firearm; this is a description of the firearm type.
- this is a domestic Chinese pistol that combines features of several foreign-designed pistols that were imported into China during the pre-World War Two period, and which were widely copied in order to arm various armed factions fighting for control of China up until 1953. Many of these pistols will exhibit features of either the Browning 1900 or 1910 pistols, or the Mauser C96 pistol, as these were both among the highly-desired pistols in use during this period.
- features generally include: blued finish; open adjustable C96 Mauser-style sights; an external single-action ring hammer with side cocking "ears" on a square bolt; and a "broomhandle"-style frame, with the magazine contained either in the pistol-grip or in a magazine well forward of the trigger guard.

Action

- recoil-operated.

Serial Number

- numbered on the receiver/frame.

Shots

- detachable box magazine.

Notes

Make

- The make is not marked on the firearm.

Model

- The model designation is not marked on the firearm.
- This is a generic entry. Other "Taser" model entries exist which might better describe the firearm.
- This firearm has a detachable cartridge containing probes and wires, which is installed/loaded from the front. This firearm can also be used without the cartridge installed, as a stun gun, creating an arc between the electrodes.
- Features include: charging port on the underside of the grip; selector mode switch (modes: off, light, siren and electricity discharge); flashlight located on the underside of the firearm.

Action

- Unit contains an internal rechargeable battery which is used to launch and ignite the probes or electrodes.

Serial Number

- The serial number is not marked on the firearm.

Barrel

- The barrel length is determined by measuring the overall length of the cartridge.

Calibre

- The calibre designation is not marked on the firearm.

Shots

- Detachable cartridge containing probes and wires, which is installed/loaded from the front.

- "Mod. 83" is marked on the left side of the receiver/frame in front of the cylinder.
- this is a commercial copy of the Reichsrevolver Model 1883 with no manufacturer marking.
- features include: fixed sights; octagonal barrel; solid top receiver/frame with a removable fluted cylinder and right side swing-down loading gate; exposed spur hammer; double/single action trigger mechanism; radial safety lever is mounted on the left side of the receiver/frame below the hammer; square bottom grip strap with a lanyard ring; checkered wood grip plates.

Serial Number

- serial number is marked on the left side of the grip strap under the grip plate.
- serial number may be repeated on the barrel and cylinder.
- observed serial number consisted of two numbers.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- make is not marked on the firearm.
- firearm will have German proof marks or the name of a city or region in Germany.

Model

- "Drilling" is not marked on the firearm.
- "Drilling" is a three barrel combination gun.
- "Drilling" uses shotgun cartridges and rim or center fire rifle cartridges.
- features include: three barrels; front hinged receiver/frame with a break open device; hammer or hammerless; two or three triggers; may have a barrel selector lever; wood forearm and a straight or pistol grip buttstock.
- Barrel configurations may be as follows:
- side by side shotgun barrels of the same calibre over a rifle barrel;
- side by side rifle barrels of the same calibre over a shotgun barrel;
- one shotgun barrel over a rifle barrel with a smaller calibre rifle barrel offset to one side between the two over and under barrels;
- side by side barrel configuration, one being a shotgun barrel and the other a rifle barrel over a rifle barrel of the same calibre as the side by side, also known as a "Bock Drilling";
- side by side shotgun barrels under a small calibre rifle barrel, also known as "Schienendrilling";
- side by side shotgun barrels over a shotgun barrel;
- over and under shotgun barrels with a rifle barrel offset to the side between the over and under barrels, also known as a "Bock-Doppelflinte mit seitlichem Kleinkaliberlauf"; and
- over and under barrel configuration, shotgun barrel over a small calibre rifle barrel over a larger calibre rifle barrel.

Action

- hinged barrel design.
- barrel assembly consists of three barrels: one rifled barrel and two smoothbore barrels or two rifled barrels and one smoothbore barrel.

Other Markings

- the drilling may have the following markings. This mark may appear in a circular fashion with "PRIMA" over "BOHLER" at the top of the circle and "GEWEHR LAUF" over "STAHL" at the bottom of the circle.

16289 - 2	7MM PIN-FIRE	6	59	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Non-Commercial Customization	

Notes

Make

- no maker's name or mark appears on this firearm.
- German proof marks are apparent on the firearm; "Germany" or "Made in Germany" may also be marked on the barrel and/or receiver/frame.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this handgun resembles the original pin-fire design of Casimir & Eugene Lefaucheux circa 1854-55.
- production of this type of handgun utilizing the pin-fire cartridge system ran from circa 1855 to the mid-late 1880's.
- features include: engraved solid or open-top receiver/frame; fixed sight; octagonal or round barrel; loading gate on right side of standing breech; ejector rod located on the right side of the receiver/frame ("pocket" models may have a removable ejector rod screwed into the butt); spur hammer; trigger guard with or without finger rest; single or double action trigger mechanism; may have a folding-type trigger without trigger guard; may have a lanyard ring located at the bottom of the grip frame; wooden, bone, ivory, or synthetic grips.
- long barrel revolvers were also known to feature a folding leaf style rear sight and a detachable skeletonized buttstock.
- German proof marks are apparent on this firearm.

Action

- double-action revolver.

Serial Number

- may be numbered on the frame and/or cylinder.

Canadian Law Comments

- examples of these revolvers made prior to 1898 are considered "antique" under Canadian law.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make	- bears German proof marks on the receiver/frame, consisting of a "U" below two crowns (the first "U" is a provisional proof, while the second is a definitive proof, applied after the firearm is ready for sale). - may also be marked "Germany" or "Made in Germany".
Model	- no model name is marked on this firearm; model designation is derived from the characteristics of the firearm. - this type of handgun would have been made circa early 1880's to the early 1900's. - this is a small solid receiver/frame double-action revolver that shares the characteristics of the larger "Bulldog Type" revolvers, but is chambered for a smaller cartridge than is customarily seen in the full-size "Bulldog" handgun (i.e. less than .44 cal); it has a shorter barrel and smaller receiver/frame size. - features include: may be seen with folding or full trigger guard; bird's-head or square butt grip frame; swing-out ejector rod that is usually stored in the centre of the cylinder axis pin; plain round or fluted cylinder; exposed hammer or hammerless; swing-out or swing-back type loading gate; fixed sights; usually a blued finish.
Action	- single-action or double-action operation.
Serial Number	- normally numbered on major component parts.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Firearm Reference Number (FRN): 125030
Make: Unknown German
Model: Wheel-Lock Reproduction

Summary

Make:	Unknown German
Model:	Wheel-Lock Reproduction
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
125030 - 1	45 WHEEL-LOCK	1	390	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "Made in Germany" is marked on the receiver/frame/barrel.

Model

- model designation is not marked on the firearm.
- this is a modern reproduction of a German Wheel-Lock pistol.
- Wheel-Lock firearms were originally manufactured in Europe during the 16th and 17th century.
- the system uses a iron pyrites pressed against a revolving toothed wheel to provide the sparks for igniting the powder in the priming pan, which in turn ignites the main powder charge in the barrel. The toothed wheel is made to rotate, when the trigger was pulled, by a spring that was wound by a key in a similar fashion to a mechanical clock.
- features include: steel barrel and side plate; no sight; single trigger; walnut semi-pistol grip stock.

Action

- spring driven rotating gear action.

Serial Number

- located on the receiver/frame/barrel asembly.
- observed specimen had two letter prefix and five numbers.

74250 - 4	177 PELLET	4	397	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- make is not marked on the firearm.

Model

- model is not marked on firearm; as so many of the Hungarian made air rifles do not have a model stamped on them, this record is a generic for those rifles not identifiable as a specific model;
- features may include: solid beechwood stock with sculpted cheekpiece, stamped trigger-guard with access hole to allow the trigger mechanism to be adjusted, and open adjustable sights (with or without a hood for the front sight).
- markings include: a serial number, a "Made in Hungary" stamping and an acceptance/proofing/final inspection mark consisting of a triangle inside a 3mm circle.

Action

- break barrel spring piston air rifle.

Serial Number

- serial number is marked on firearm; rationalization unknown.

132779 - 2	44 PERCUSSION	6	457	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "Made in Italy" is marked on this firearm.

Model

- this is a modern reproduction of a Colt 1848 Dragoon Model 3 black powder, percussion, single action revolver, which was originally manufactured from 1851 to 1861.
- Colt 1848 Dragoon Model 3 was also known as the "Colt Third Model Dragoon".
- "3rd Model Dragoon" may be marked on the left side of the barrel lug.
- features include: muzzle loading, percussion ignition revolving cylinder; single action trigger; loading lever mounted on the underside of the barrel; colour case-hardened steel receiver/frame; brass backstrap and trigger guard; roll engraved cylinder with Ranger and Indian scene; hardwood grips.
- Italian proofmarks are apparent on the barrel and receiver/frame of this firearm.
- Colt 1848 Dragoon distinguishing features between the Model 1, 2, and 3 are:
- Model 1: oval cylinder stop notches, and a square back trigger guard.
- Model 2: rectangular cylinder stop notches, and a square back trigger guard.
- Model 3: rectangular cylinder stop notches, and a rounded trigger guard.
- Model 3: may have a groove in the bottom of the grip strap for a shoulder stock.

Serial Number

- known example had a serial number marked on the front of the trigger guard, the underside of the receiver/frame in front of the trigger guard, the underside of the barrel and on the bottom buttstrap of the grip frame.
- known example had a three or four digit number without prefix or suffix.

Calibre

- known example had the calibre designation marked on the left side of the barrel as, "Cal 44".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - known example was marked "Made in Italy" on the rear left side of the barrel.

Notes

Make

- barrel usually marked "Italy", "Made in Italy" or variation thereof.
- Italian proofmarks are apparent.
- barrel usually marked "Blackpowder Only", "Use Blackpowder Only" or a variation thereof.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- model name not marked on firearm.
- may also be known as the "Kentuckian" pistol which is identical in appearance to the "Kentucky".
- features include: octagonal barrel; one piece wooden stock extending almost to the end of the barrel; may have brass trigger guard, brass nose cap on front of forestock and two exposed brass thimbles under the barrel to retain the ramrod; side hammer; muzzle loader.
- available in both flintlock and caplock.

Barrel

- barrel length measurement for this type of handgun is an external measurement from muzzle end to the rear of barrel where the breech plug meets the barrel -- normally a 'joint-line' is visible where the breech plug butts against the barrel.

Calibre

- may be marked on the barrel.

161367 - 2	72 MATCHLOCK	1	705	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- the make may not be marked, or may only be marked in Japanese kana or ideographs.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is a specific version of the native Japanese-made "tanegashima" or matchlock musket; "Tanegashima" is a southern Japanese island where Portuguese traders with firearms are commonly believed to have first made contact with the Japanese in the mid-1500s, and domestic copies of those firearms spread rapidly through Japan thereafter.
- the classic "tanegashima" musket resembles a long-barreled matchlock pistol with a long pistol-grip, and without a shoulder-stock of any kind; these firearms could be seen used with a pair of cross-sticks or pole-arm with a rest to allow aiming.
- features may include: blued or browned finish; often with intricate engravings of fish, floral scenes, geometric patterns, etc.; fixed open sights; round or octagonal barrels (often with cannon-shaped muzzles); full-length wooden stock with a pistol-grip only; brass or copper fittings; a serpentine on a lockplate to hold a length of slow-match; and a rotating pan-cover to keep priming powder in place until firing.

Manufacturer

- the manufacturer may not be marked, or may only be marked in Japanese kana or ideographs.

Action

- muzzle-loaded matchlock single-shot.

Notes

Model

- model name does not appear on the firearm.
- "Japan" will be marked on the barrel.
- a facsimile of the British Crown as originally used by the British to denote military contract firearms is marked on the lock plate.
- characterized by a one-piece wooden stock extending almost to the end of the barrel, rammer, engraved lock, brass furniture including butt cap.

Action

- side hammer flint or percussion.

195359 - 1	65 PERCUSSION	1	191	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- side plate is marked with the Islamic year 1293 (1876 C.E.) underneath the tughra (seal) of the Turkish sultan; the tughra is likely that of Naser al-Din Shah Qajar who was the king of Persia from July 1831 until May 1896.
- side plate is marked with the face of a smiling lion; lion imagery is common on currency, banknotes and the flag of Persia during the Qajar dynasty and is one of the current emblems of Iran.

Model

- model designation is not marked on the firearm.
- this is a single barrel, muzzle loaded percussion pistol.
- features include: round barrel with half-moon sight; side-mounted percussion hammer; under-barrel hinged ramrod; brass trigger guard; one piece walnut stock; brass capped forend; flat butt with brass cap; lanyard ring.

Manufacturer

- side plate is marked with the Islamic year 1293 (1876 A.D) underneath the tughra (seal) of the Turkish sultan; the tughra is likely that of Naser-al-Din Shah who was the king of Persia from July 1831 until May 1896.
- side plate is marked with the face of a smiling lion; lion imagery is common on currency, banknotes and the flag of Persia during the Qajar dynasty and is one of the current emblems of Iran.
- examples of this percussion pistol have been observed with the Victorian crown with "E.I.G." as well as "Birmingham" marked on the side plate; this is the mark of the East Indian Government.

Action

- muzzle loaded.

Other Markings

- more common examples of this percussion pistol have been observed with the Victorian crown and "E.I.G." as well as "Birmingham" marked on the side plate over the year of manufacture; this is the mark of the East Indian Government.

FRT Report

Firearm Reference Number (FRN): 33960
Make: Unknown Scottish
Model: Howdah Pistol

Summary

Make:	Unknown Scottish
Model:	Howdah Pistol
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Handgun
Action:	Multi-Barrel
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
33960 - 1	577 SNIDER	2	0	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	
33960 - 2	58 PIN-FIRE	2	152	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Model

- manufactured from 1875 to 1880.
- the model is not marked on the firearm; this is a descriptor of the firearm type, applied to large-bore pistols (usually in side by side configuration) that were customarily carried in "howdahs" on the backs of elephants during tiger hunts in India, as a last-ditch measure in case a tiger got too close to an elephant or its riders. These pistols resemble sawed-off rifles or shotguns, but were manufactured as pistols.
- features may include: blued or browned finish; open bead sights; fluid or Damascus barrels; checkered walnut forearm and pistol-grip; Collath underlever or top-lever opening; exposed, manually-cocked hammers; "dog-catch"-style sliding safeties on the lockplates; double triggers; and back-action locks.

Action

- usually side-by-side configuration.

Notes

Make

- make is not marked on the firearm.
- "MADE IN SPAIN" is marked on the receiver/frame/barrel.
- "T.A." over "12m/m" observed marked on barrel, no indication of maker or manufacturer.
- markings may include a logo of a diamond with "ROSCO" or "RUSCO" or "RUBCO" or "ROBCO".

Model

- "MODEL 3" is marked on the receiver/frame/barrel.
- features include: smooth-bore octagonal barrel with fixed bead front sight, no rear sight; right side mule-ear percussion hammer; side-lock action; one-piece checked pistol grip stock with ram-rod under barrel; trigger and trigger-guard.

Action

- black powder muzzle-loading.

Serial Number

- serial number is marked on the receiver/frame.
- observed serial number consisted of five number without letter prefix or suffix.
- serial number rationalization is not known.

Calibre

- calibre is marked on the receiver/frame/barrel.

Other Markings

- markings may include a logo of a diamond with "ROSCO" or "RUSCO" or "RUBCO" or "ROBCO".
- "T.A." over "12m/m" observed marked on barrel, no indication of make or manufacturer.
- barrel markings include standard Spanish country proofmarks for smooth-bore black powder firearms, including: "Crown" over "Shield" with "X" in the centre of shield; three circles in triangle formations; and possible "EIBAR" marking of left side with a "Knight's Helm" over "Shield" with "X" in the centre of shield.

112855 - 1	40 FLINTLOCK	1	96	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Non-Commercial Customization	

Notes

Make

- marked on top of the barrel (post World War Two convention): MADE IN SPAIN
- the firearm is entirely devoid of other markings related to make or manufacture.

Model

- this is a generic entry for Unknown Spanish Flintlock Pocket Pistol Reproductions.
- not marked 'Flintlock Pocket Pistol Reproduction', features determine the model: lock type (flint), featuring black powder muzzle-loading, modest overall size to fit a coat pocket, approximately 102mm to 241mm in length, modest bore diameter, approximately 35 to 50 caliber and of recent manufacture (usually post World War Two).
- the barrel and the breech plug may be formed integrally on many of these small pistols, or the barrel may be a separate piece from the breech plug.
- these pistols were referred to at different times as "Coat Pistol", "Overcoat Pistol", or "Traveler's Pistol".

Action

- muzzle loading, black powder, flint ignition.

Serial Number

- usually marked on the barrel or tang.

Calibre

- may not be marked with caliber designation.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
200744 - 1	45 PERCUSSION	1	57	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- The make is not marked on the firearm.

Model

- The model designation is not marked on the firearm.
- "Philadelphia Derringer" is a reproduction based on the Henry Deringer percussion pistol originally produced in the early 1800's. The use of a "Deringer" pistol to assassinate the American President Abraham Lincoln led to small pocket type percussion pistols becoming known collectively as a "Deringer" or "Philadelphia Deringer" in reference to the city where Henry Deringer produced his firearms. Over the years the spelling was sometimes changed to "Derringer".
- Sold as a finished firearm or as a kit.
- Features include: may come equipped with a round or octagonal barrel.

Action

- Muzzle loading, percussion ignition.

Serial Number

- The serial number is usually marked on the right side of the firearm.

Notes

Make

- "Unwin & Rodgers", "Unwin & Rodgers" over "Patentees, Sheffield" or "Unwin" over "Rodgers" over "Sheffield" may be marked on the side of the barrel or on the side of the knife blade.

Model

- model designation is not marked on the firearm.
- P. Unwin, J. Unwin and J. U. Askham were granted patent number 2801 on November 15, 1860 for a pistol with a pocket knife, dagger or bayonet.
- this is a generic entry for those "Unwin & Rodgers" Knife Pistols that are not identifiable as to a model.
- features may include: a folding single action trigger mechanism; a steel or nickel finished receiver/frame with a round or octagonal barrel along the top and a folding knife or knives below; spurred hammer; and may have horn slab or wooden grip panels.
- some Unwin & Rodgers Knife Pistols are known to have removable bullet molds and rammer inserted into the butt of the receiver/frame.

Manufacturer

- Philip Unwin and James Rodgers manufactured firearms in Sheffield, Yorkshire, England from 1827 to 1868.
- Unwin & Rodgers was known for manufacturing knife pistols.
- Unwin & Rodgers manufactured firearms from the following address: 9 Charles Street in 1827, 23 Burgess Street in 1840, and 124 Rockingham from 1862 to 1868.
- Unwin & Rodgers was succeeded by James Rodgers, circa 1868.

Action

- muzzle loading.

Serial Number

- the firearm may not have a serial number.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - the calibre may not be marked on the firearm.

Notes

Make

- "US" and "MADE IN U.S.A." may be marked on the left side of the receiver/frame.
- "US" was observed marked inside a horizontal figure eight "8". The front loop contained the letter "U" and the rear loop contained the letter "S".

Model

- model name does not appear on this firearm.
- this is a generic entry for US single barrel shotguns that are not identifiable as to model.
- features may include: single round barrel; front hinged receiver/frame; top/side/under mounted break open lever; exposed spur hammer centrally located behind the standing breech; extractor or auto-ejecting; blued or case-hardened receiver/frame; blued barrel; hardwood buttstock and forearm.

Action

- front hinged receiver/frame, top-break design.

Serial Number

- serial number was observed marked on the lower tang of the receiver/frame, behind the trigger guard and repeated on the side of the barrel lug.
- observed serial number consisted of five numbers without a letter prefix or suffix.
- observed serial number consisted of a letter "B" and five numbers.

Other Markings

- "Made in U.S.A." is marked on the left side of the receiver/frame as part of the make markings.

Notes

Make

- "US Armament Corp" or a variation thereof is marked on this reproduction firearm.

Model

- this firearm is a modern reproduction of the Gatling Gun model 1877 Bulldog as manugactured by Colt.
- this firearm is generally known as the "Gatling" or "Gatling Gun" after the name of its inventor, Dr. Richard J. Gatling.
- "Gatling's Battery Gun" is marked on a cast oval bronze plate that is attached to the top rear of the breech housing of the receiver/frame.
- additional markings on this plate are; "Pat. NOV 4.1862" over "MAY 9.1865" over "FEB 28.1871" over "APR 9.1872" over "MADE BY COLTS'S PT. FIRE ARMS MFG CO HARTFORD, CONN U.S.A."
- this is a hand cranked, rotating five-barrel cluster firearm utilizing a top mounted Bruce-type Gravity Feed detachable magazine.
- features include: right side mounted sights; brass encased barrel assembly; brass receiver/frame/casing; hand crank is located at the rear of the gun instead of the side as in all other preceeding models; hand crank operated directly on the main shaft which resulted in a cylic rate of approximately 1000 rpm; headspace adjustment is a nut on the mainshaft at the rear of the action which also held the hand crank in position; black finished iron yoke; brass turntable with elevation assembly; iron tripod bass; wood tripod legs with iron feet.
- overall length of gun is 864 mm (34").
- average weight of gun is 61.23 kgs (135 lbs), and average weight of tripod is 61.23 kgs (135 lbs)

Manufacturer

- U.S. Armament Corporation is located in Ephrata, Pennsylvania, U.S.A.
- U.S. Armament Corporation was incorporated in 1988.

Action

- hand crank operated, repeating action.

Serial Number

- serial number is marked on the receiver/frame/casing.

Firearm Reference Number (FRN): 63362
Make: US Arms Company
Model: Single Barrel

Summary

Make:	US Arms Company
Model:	Single Barrel
Manufacturer:	Crescent Firearms Company
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
63362 - 1	12 GA X 2 3/4"	1	762	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "U.S. ARMS CO." or "U.S. ARMS CO., N.Y." is marked on both sides of the receiver/frame.
- "U.S. ARMS CO." was a trade name used by "H. & D. Folsom Arms Company" and "Supplee-Biddle Hardware Company" on shotguns manufactured by the "Crescent Fire Arms Company", "Henri Pieper", and "Anciens Etablissments Pieper".
- "U.S. ARMS CO." was a trade name used on a variety of firearms by the "Alexander Waller & Company" circa 1877, "Barton & Company" circa 1878, and "H. & D. Folsom Arms Company" circa 1879 and forward.
- "U.S. ARMS CO." was a trade name used by the "United States Arms Company" circa 1874 to 1878, a manufacturer and sales outlet for revolvers manufactured by "Bacon Manufacturing Company", "Hood Firearms Company", "Crescent Fire Arms Company, and "Otis A. Smith (O.A.S.)" of the Norwich Falls Pistol Company.

Serial Number

- reported example has 5 digits.

Notes

Make

- "U.S. ARMS DIV.-A.I.G. INC." is marked on right side of barrel.
- "U.S. ARMS DIV.-A.I.G. INC." over "-NO. HAVEN, CT. U.S.A.-" is marked on the left side of the receiver/frame.

Model

- model may be marked on the left side of the barrel.
- features include: blued or matte chrome finish; smooth, unfluted cylinder; anvil-link safety mounted on receiver/frame and hammer; wood grips as standard; removable cylinder mounting/retention pin; right-side gate loading; ejector rod mounted on the bottom right of the barrel; adjustable rear sights and fixed partridge foresight.

Manufacturer

- "U.S. ARMS DIV.-A.I.G. INC." is marked on right side of barrel.
- "U.S. ARMS DIV.-A.I.G. INC." over "-NO. HAVEN, CT. U.S.A.-" is marked on the left side of the receiver/frame.

Serial Number

- marked on right side of receiver/frame below cylinder.
- observed serial numbers have consisted of a letter prefix followed by six digits.

Remarks

- AIG DIV purchased the United States Arms Corporation of Riverhead N.Y. USA in 1979 and produced Abilene revolvers from 1979 until 1983.
- along with their purchase, AIG DIV agreed with Mossberg to allow that company exclusive marketing rights to the Abilene revolver, which they did from 1980-1983.
- Abilene's produced by AIG-DIV differ from their earlier manufacturer in having an "anvil link" safety incorporated into the firing mechanism that prevents discharge unless the trigger has been pulled, and the hammer allowed to fall with full force.

119383 - 1	45 AUTO	6	102	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is marked on firearm.

Model

- marked "MILITARY 45 ACP" over "COMBAT MODEL" on the left side of the slide.
- this is a compact, single-action, stainless-steel semi-automatic pistol that was made by the US Arms Division of A.I.G. Corporation for possible distribution by Mossberg.
- very limited quantities of this pistol were made.
- all-stainless construction (matte and polished finishes), wooden grip panels, slide-mounted ambidextrous safety, arched backstrap with no grip safety, adjustable open sights with front ramp insert, hooked trigger-guard.
- just as this project was being finalized (at the time, Mossberg was distributing this same firm's "Abilene" revolvers), Mossberg decided to "streamline" its product line and concentrate on producing shotguns; therefore, the entire project was shelved.

Manufacturer

- manufacturer is marked on firearm.

Action

- recoil operated.

Serial Number

- numbered on frame/receiver.

Shots

- detachable box magazine.

- "U.S. CARBINE" over "CAL. .30 M1" is marked on the receiver ring.
- adopted into United States Military Service as the "US Carbine".
- commercial versions of this firearm are known by the tradename they were marketed under.

Model

- Introduced in 1942.
- "U.S. CARBINE" over "CAL. .30 M1" is stamped on the top of the receiver ring.
- 2,285,000 produced.
- the original M1 Carbine was developed by Winchester, for U.S. troops who did not normally carry the full sized battle rifle.
- early versions were not fitted with a bayonet lug.
- Inland Manufacturing Division of General Morors also produced a folding stocked version known as the M1A1 for use by paratroops.
- this model will be found in many configurations.
- improvements were made during the service life of this model that altered the appearance of this model.
- variations in the stock design and finish will be encountered.
- some of these were later converted to M2 configuration, these will have a change lever on the left side of the receiver that allows full automatic fire. Do not confuse these with the M1 version.

Manufacturer

- "INLAND DIV" may be marked on the top rear of the receiver/frame.
- "INLAND DIV" may be obscured by the rear sight.

Action

- gas operated.

Serial Number

- serial number is marked on the top rear of the receiver/frame.
- serial number may be obscured by the rear sight.
- serial numbers range between: 11 to 999,999
  2,912,520 to 3,212,519
  4,879,526 to 5,549,821
  6,629,884 to 7,234,883
  7,369,661 to 8,069,660

Calibre

- "U.S. CARBINE" and "CAL. 30 M1" are marked on the receiver ring.
- rifling characteristics in calibre 30 CARBINE: 4-grooves, 1 turn in 20 inches, right hand twist.

Shots

- detachable box magazine.

Remarks

- the M1 carbine is a compact firearm which fires a cartridge of intermediate power.
- this firearm was developed as a potential replacement for the pistol and the sub-machine gun.

Notes

Make

- "U.S. CARBINE" over "CAL. .30 M1" is marked on the receiver ring.
- adopted into United States Military Service as the "US Carbine".
- commercial versions of this firearm are known by the tradename they were marketed under.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- Introduced in 1942.
- the original M1 Carbine was developed by Winchester, for U.S. troops who did not normally carry the full sized battle rifle.
- 346,500 produced.
- early versions were not fitted with a bayonet lug.
- this model will be found in many configurations.
- improvements were made during the service life of this model that altered the appearance of this model.
- variations in the stock design and finish will be encountered.
- some of these were later converted to M2 configuration, these will have a change lever on the left side of the receiver/frame that allows full automatic fire. Do not confuse these with the M1 version.

Manufacturer

- "I.B.M. CORP." and/or "I.B.M. CORP.", over the serial number, over "AO" is usually marked on the top rear of the receiver/frame.
- "I.B.M. CORP." may be obscured by the rear sight.
- International Business Machine (IBM) Corporation was one of several firms who produced the M1 Carbine for the US Military.

Action

- gas operated.

Serial Number

- numbered on the top rear of the receiver/frame, may be obscured by the rear sight.
- serial numbers range between: 3,651,520 to 4,009,999.

Calibre

- "U.S. CARBINE" and "CAL. 30 M1" are marked on the receiver ring.
- rifling characteristics in calibre 30 CARBINE: 4-grooves, 1 turn in 20 inches, right hand twist.

Shots

- detachable box magazine.

Remarks

- the M1 carbine is a compact firearm which fires a cartridge of intermediate power.
- this firearm was developed as a potential replacement for the pistol and the sub-machine gun.

- "U.S. CARBINE" over "CAL. .30 M1" is marked on the receiver ring.
- adopted into United States Military Service as the "US Carbine".
- commercial versions of this firearm are known by the tradename they were marketed under.

Model

- "U.S. CARBINE" and "CAL. 30 M1" are marked on the receiver ring.
- "INLAND MFG DIV GENERAL MOTORS 1-44" was observed marked on the barrel.
- this was originally a semi-automatic M1 Carbine which was developed by Winchester, for U.S. troops who did not normally carry the full sized battle rifle.
- this firearm has been converted from semi-automatic to pump action.

Manufacturer

- "Quality H.M.C." is usually marked on the top rear of the receiver/frame.
- "Quality H.M.C." markings may be obscured by the rear sight.
- the Quality Hardware and Machine Company was one of several manufacturers that produced firearms for U. S. Military service during World War II.

Action

- US Carbine M1 semi-automatic was converted to a manually operated pump action.

Serial Number

- serial number is marked on the top rear of the receiver/frame.
- serial number may be obscured by the rear sight.
- serial numbers range for US Carbine M1 manufactured by Quality Hardware & Machine was from "1,550,000 to 1,662,519", "1,875,040 to 1,937,519", "4,432,100 to 4,532,099", and "4,632,100 to 4,879,525".

Calibre

- "U.S. CARBINE" and "CAL. 30 M1" are marked on the receiver ring.
- rifling characteristics in calibre 30 CARBINE: 4-grooves, 1 turn in 20 inches, right hand twist.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

- "UNDERWOOD" is usually marked on the top rear of the receiver/frame.
- "UNDERWOOD" may be obscured by the rear sight.
- Underwood-Elliot-Fisher was one of several firms who produced the M1 Carbine for the US Military.

Action

- gas operated.

Serial Number

- numbered on the top rear of the receiver/frame, may be obscured by the rear sight.
- serial numbers range between: 1,350,000 to 1,449,999
  2,352,520 to 2,912,519
  4,010,00 to 4,074,999
  6,099,689 to 6,199,688

Calibre

- "U.S. CARBINE" and "CAL. 30 M1" are marked on the receiver ring.
- rifling characteristics in calibre 30 CARBINE: 4-grooves, 1 turn in 20 inches, right hand twist.

Shots

- detachable box magazine.

Remarks

- the M1 carbine is a compact firearm which fires a cartridge of intermediate power.
- this firearm was developed as a potential replacement for the pistol and the sub-machine gun.

Notes

Make

- "U.S. CARBINE" over "CAL. .30 M1" is marked on the receiver ring.
- adopted into United States Military Service as the "US Carbine".
- commercial versions of this firearm are known by the trade name they were marketed under.

Model

- Introduced in 1942.
- "U.S. CARBINE" over "CAL. .30 M1" is marked on the receiver ring.
- "U.S. Carbine model M1" was originally developed by Winchester.
- "U.S. Carbine model M1" was for troops who did not normally carry the full sized battle rifle.
- "U.S. Carbine models M1, M1A1, M2, and T3" were manufactured between June 1942 and August 1945.
- "U.S. Carbine models M1, M1A1, M2, and T3" total production was over 6 million units.
- "U.S. Carbine model M1" early versions were not fitted with a bayonet lug.
- "U.S. Carbine model M1" is found in many configurations.
- improvements were made during the service life of this model that altered the appearance of this model.
- variations in the stock design and finish will be encountered.
- some of these "U.S. Carbine model M1" were later converted to M2 configuration, these will have a change lever on the left side of the receiver/frame that allows full automatic fire. Do not confuse these with the M1 semi-automatic version.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "UN-QUALITY" is usually marked on the top rear of the receiver/frame. - "UN-QUALITY" may be obscured by the rear sight. - Union Swith & Signal supplied receiver/frames to Quality Hardware & Machine for the Carbine Expansion Program. - Union Switch & Signal/Quality Hardware & Machine was one of several firms who produced the M1 Carbine for the US Military.
Action	- gas operated.
Serial Number	- serial number is marked on the top rear of the receiver/frame. - serial number may be obscured by the rear sight.
Calibre	- "U.S. CARBINE" and "CAL. 30 M1" are marked on the receiver ring. - rifling characteristics in calibre 30 CARBINE: 4-grooves, 1 turn in 20 inches, right hand twist.
Shots	- detachable box magazine.
Remarks	- the M1 carbine is a compact firearm which fires a cartridge of intermediate power. - this firearm was developed as a potential replacement for the pistol and the sub-machine gun.

Notes

Make

- "US CARBINE" is usually not marked on the firearm.
- these firearms are of U.S. origin and are usually remarked upon rebuild by the goverment arsenals of Thailand.

Model

- "M1 Thai Carbine Rework" is not marked on the firearm.
- "Thailand's" national crest/cypher consists of a shield over a sword.
- "Thailand's" national crest/cypher is usually marked on top of the receiver ring. The original markings were usually removed when the firearm was reworked.
- M1 Thai Carbine was originally a US Carbine Model M1 reworked in Bangkok.
- M.A.P. provided approximately 64,000 M1's and 9,000 M2's before 1975 for the government of Thailand and the Bangkok police.
- US Carbine model M1 was originally developed by Winchester, with over six million produced by various manufacturers this model will be found in many configurations, improvements were made during the service life of this model that altered the appearance of this model.
- variations in the stock design and finish will be encountered.
- reworked M2 carbines may also be encountered, these will have a change lever on the left side of the receiver/frame that allows full automatic fire. These must not be confused with the M1 version.

Action

- gas operated.

Serial Number

- marked on the top rear of the receiver/frame, may be obscured by the rear sight.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Remarks - the original US Carbine, model M1 was produced by ten different American companies. As any one of the original contractors firearms may have been used in the rebuild program it is usually not possible to determine who actually manufactured the receiver/frame.

Notes

Make

- "U.S. CARBINE" over "CAL. .30 M1" is marked on the receiver ring.
- adopted into United States Military Service as the "US Carbine".
- commercial versions of this firearm are known by the tradename they were marketed under.

Model

- model designation is not marked on the firearm.
- "U.S. CARBINE" over "CAL. .30 M1" is marked on the receiver ring.
- "A1" in the model designation is for the folding stock.
- this model was developed for use by paratroops.
- this is basically a US Carbine model "M1" that has a folding stock.
- early models had a flip up rear sight, later versions had a larger adjustable rear sight.
- Inland Manufacturing Division of General Motors is reported to have been the sole manufacturer of this model.

Manufacturer

- "INLAND DIV" may be marked on the top rear of the receiver/frame.
- "INLAND DIV" may be obscured by the rear sight.

Notes

Make

- "U.S. Carbine" is marked on the top of the receiver/ring.
- adopted into United States Military Service as the "US Carbine".

Model

- "M2" may be marked on the top of the receiver ring or the rear of the receiver/frame.
- several variations of the model designation markings exist, very few were simply marked "M2". As individual examples of this model were either purpose built as M2 carbines or M1 carbines that were assembled into M2 configuration model markings include "M2", "M1" and "M1" with the "1" being overstamped with a "2".
- the M2 configuration of the US Carbine, as originally manufactured, will have a change lever on the left side of the receiver/frame and components that support full automatic fire.

Manufacturer

- "INLAND DIV" may be marked on the top rear of the receiver/frame.
- "INLAND DIV" may be obscured by the rear sight.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- no longer capable of full automatic fire.
Serial Number	- numbered on top rear of receiver, may be obscured by rear sight.
Shots	- detachable box magazine.
Canadian Law Comments	- regardless of configuration, all "M2" marked US Carbine receiver/frames are considered to have a legal classification of Prohibited.
Remarks	- the M2 was developed for troops who would not normally carry a standard service rifle. - this is a compact firearm, select fire, magazine charged and fires an intermediate power cartridge. - this firearm was also developed as a potential replacement for the pistol and the sub-machine gun. - it is possible to find U.S. Carbines manufactured from spare parts or surplus parts with M2 Carbine receivers. - many of the M2 Carbines were converted to fire semi-automatic by the removal or replacement of the component parts required to support full automatic fire. Some of these conversions were done by U.S. Government controlled entities and some by private individuals.

Serial Number	- numbered on top rear of receiver/frame, may be obscured by rear sight.
Shots	- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments - regardless of configuration, all "M2" marked US Carbine receiver/frames are considered to have a legal classification of Prohibited.

Remarks

- the M2 was developed for troops who would not normally carry a standard service rifle.
- this is a compact firearm, select fire, magazine charged and fires an intermediate power cartridge.
- this firearm was also developed as a potential replacement for the pistol and the sub-machine gun.
- it is possible to find U.S. Carbines manufactured from spare parts or surplus parts with M2 Carbine receivers.
- many of the M2 Carbines were converted to fire semi-automatic by the removal or replacement of the component parts required to support full automatic fire. Some of these conversions were done by U.S. Government controlled entities and some by private individuals.

Notes

Make

- the make is usually not marked on the firearm.
- these firearms are of U.S. origin and are usually remarked by the Thai Government.

Model

- "M2 Thai Carbine Rework" is not marked on the firearm.
- "Thailand's" national crest/cypher consists of a shield over a sword.
- "Thailand's" national crest/cypher is usually marked on top of the receiver ring. The original markings were usually removed when the firearm was reworked.
- M2 Thai Carbine was originally a US Carbine Model M2 reworked in Bangkok.
- M.A.P. provided approximately 64,000 M1's and 9,000 M2's before 1975 for the government of Thailand and the Bangkok police.
- US Carbine model M1 was originally developed by Winchester, with over six million produced.
- US Carbine model M2 was a full automatic variant of the M1, improvements were made during the service life of this model that altered the appearance of this model.
- variations in the stock design and finish will be encountered.
- rebuilt M1 carbines may also be encountered, these will not have a change lever on the left side of the receiver/frame that allows full automatic fire. These must not be confused with the M2 version.

Action

- no longer capable of full automatic fire.

Serial Number

- marked on the top rear of the receiver/frame, may be obscured by the rear sight.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Remarks - the original US Carbine, model M2 was produced by two of the ten different American companies who produced the original model "M1". As any one of the original contractors firearms may have been used in the rebuild program it is usually not possible to determine who actually manufactured the receiver/frame.

Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
128615 - 1	30 CARBINE	5	457	Prohibited PFR, Part 1, para. 236(z.71)	Manufacturer Specifications and Commercial Customization	
128615 - 2	30 CARBINE	15	457	Prohibited PFR, Part 1, para. 236(z.71)	Manufacturer Specifications and Commercial Customization	
128615 - 3	30 CARBINE	30	457	Prohibited PFR, Part 1, para. 236(z.71)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "U.S. CARBINE" over "CAL. 30 T3" is usually marked on the right side of the receiver/frame.

Model

- "U.S. CARBINE" over "CAL. 30 T3" is usually marked on the right side of the receiver/frame.
- "T3" is a variant of the M1 Carbine.
- "T3" is often incorrectly referenced as the "M3"Carbine.
- manufactured circa 1944.
- approximately 811 units were produced by Inland Manufacturing Division of General Motors.
- standard features usually include: parkerized finish on the receiver/frame and round barrel; fixed front sight; integral scope mount in place of standard rear sight; push button or swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; fixed wooden pistol grip or metal and wood folding stock with separate upper handguard; left side mounted front sling swivel; inletted oiler holder/sling attachment at the buttstock; front barrel band which may include a bayonet lug; may feature a cone shaped flash hider attached to the barrel.
- overall length with a 457mm (18") barrel is 903.73mm (35.58"), average weight is 2.49kgs (5.5lbs).

Manufacturer

- "INLAND DIV" may be marked on the top rear of the receiver/frame.
- "INLAND DIV" may be obscured by the rear sight.

Action

- gas operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is usually found on the top rear of the receiver/frame or on the side of the receiver/frame at the chamber area. - the serial number may be obscured by the rear sight or the stock. - serial numbers can sometimes be used to indicate a manufacturer or distinct model.
Calibre	- "CAL.30 " may be marked on the receiver/frame.
Shots	- detachable box magazine.
Remarks	- manufacturer names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fittings, sights, etc. may also confuse the issue of specific model identification.

Notes

Make

- "U.S. FIREARMS ACADEMY" is marked on the left side of the receiver/frame.
- "U.S. FIREARMS ACADEMY" is using the words "Battle Born" as a product line name.
- "U.S. FIREARMS ACADEMY" is a firearms dealer/gunsmith enterprise including a firing range/gun club and firearms training.
- "U.S. FIREARMS ACADEMY" is located in Reno, Nevada U.S.A..

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "BB-16" is marked on the left side of the receiver/frame. - "BATTLE BORN" is also marked on the left side of the receiver/frame and represents the product line name of U.S. Firearms Academy. - "BB-16" stands for "Battle Born" and "16" refers to the M16 rifle. - "BB-16" variants are based on the Colt AR-15/M16 design. - "BB-16" is also sold as a receiver/frame. - "BB-16" is available in 9MM Luger and 45 Auto with the use of a magazine well conversion block with an integrally suppressed upper assembly. - features include: threaded muzzle for flash hider/muzzle brake; standard or grooved, M4 carbine contoured barrel; AR15/M16 standard, low profile, accessory rail or folding front sight bracket/gas block; operating gas system may be gas piston operated; accessory rail, free floating or synthetic handguard; A3 accessory rail flat top upper assembly; may have a detachable carrying handle with adjustable rear sight, folding sights or optical sight; collapsible, standard or custom rifle buttstock; synthetic pistol grip; matte black finish.
Action	- gas operated.
Serial Number	- serial number is marked on the left side of the receiver/frame. - serial number of a referenced example consisted of five numbers.
Calibre	- "CAL.: MULTI" is marked on the left side of the receiver/frame. - calibre identification is usually marked on the barrel.
Shots	- detachable box magazine. - uses all magazines available for AR15/M16 type rifles.

Make:	US Historical Society
Model:	Andrew Jackson Commemorative Flintlock Pistol
Manufacturer:	US Historical Society
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
148639 - 1	45 FLINTLOCK	1	216	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "U.S. HISTORICAL SOCIETY" is not usually marked on the firearm.
- United States Historical Society (U.S. Historical Society) was an umbrella group that produced collector-grade reproductions of famous artifacts related to historic persons and places in US history.
- United States Historical Society/Antique Arms Division of this group specialized in the production of commemorative firearms.

Model

- "Andrew Jackson" is engraved on top of the barrel.
- this is a modern reproduction of a flintlock pistol made for the US Historical Society in several variations as a commemorative tribute to Andrew Jackson, the seventh President of the United States; these pistols were made in "gold" (with primarily gold mountings) and "silver" (with primarily silver mountings) versions.
- features include: blued/browned octagonal barrel; fixed open sights; under-barrel ramrod with silver or gold mounting thimbles and cap; tiger-stripe maple bag-grip stock; two oval barrel-mounting escutcheons in the forearm; a bright-polished lock with cock, pan and frizzen on the right side; a gold- or silver-plated trigger-guard; and an oval plaque in the butt with a portrait of Andrew Jackson.

Manufacturer

- United States Historical Society (U.S. Historical Society) was located in Richmond, Virginia, U.S.A.
- United States Historical Society firearms manufactured in the U.S.A. were by Williamsburg Firearms Manufactory and Virginia Firearms Manufactory.
- United States Historical Society/Antique Arms Division was acquired by America Remembers in 1994.

Action

- muzzle-loader.

Serial Number

- numbered on the barrel.

- "Wogdon" is scripted on the side plates.
- United States Historical Society (U.S. Historical Society) was an umbrella group that produced collector-grade reproductions of famous artifacts related to historic persons and places in US history.
- United States Historical Society/Antique Arms Division of this group specialized in the production of commemorative firearms.

Model

- "Wogdon" and "London" in script are marked on the sideplates.
- based on the original pistols of the Chase Manhattan Bank Collection, New York City, this is a reproduction of the original .54 calibre Wogdon flintlock duelling pistol used by Hamilton and Burr on July 11, 1804 in Weehawken, NJ, USA.
- issued by the US Historical Society, this matched pair of flintlock dueling pistols were sold in a case which is inscribed "The Alexander Hamilton-Aaron Burr Flintlock Dueling Pistols".
- 1200 matched sets were produced 1981.
- features include: coin finished lock plate, action and engraved upper tang; brass forearm; steel ramrod, blued finger rest trigger guard; browned barrels, and hidden set trigger; checkered, varnished wooden stock.

Manufacturer

- United States Historical Society (U.S. Historical Society) was located in Richmond, Virginia, U.S.A.
- Unoted States Historical Society firearms manufactured in the U.S.A. were by Williamsburg Firearms Manufactury and Virginia Firearms Manufactory.
- United States Historical Society/Antique Arms Division was acquired by America Remembers in 1994.

Action

- muzzle loader.

Serial Number

- serial numbers consist of up to three numbers followed by either an "A" or a "B".
- example 9-999A or 9-999B.

FRT Report

Firearm Reference Number (FRN): 28117
Make: US Machine Gun
Model: M60

Summary

Make:	US Machine Gun
Model:	M60
Manufacturer:	New England Group Maremont Corporation
Level:	Converted Automatics
Type:	Machine Gun
Action:	Converted Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
28117 - 1	7.62MM NATO	N/A	650	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- adopted as a general purpose machine gun by the United Staes armed forces as a replacement for the .30 calibre light and heavy Browning machine guns. Equipped with a bi-pod for use in the light machine gun role, and a tri-pod for use as a heavy machine gun.

Model

- "Gun, Machine", over "7.62MM:M60" is marked on the receiver/frame.
- designed in the late 1950's, in service since the early 1960's.
- features include: a quick change barrel that incorporates its own gas cylinder and bi-pod but no handle (a later version, the M60E1, featured a simpler barrel with the bi-pod and gas cylinder fixed to the gun), and a synthetic pistol grip and stock.

Manufacturer

- the manufacturers name is marked on the top of the receiver/frame as: "NEW ENGLAND GROUP", over "MAREMONT CORP.", over "U.S.".
- this manufacturer has operated under different names over the past 30 years, which has included SACO LOWELL SHOPS and SACO DEFENCE SYSTEMS DIVISION MAREMONT CORPORATION.

Action

- no longer capable of full automatic fire.

Shots

- is a belt-fed firearm.

Notes

Make

- "US Machine Gun" is not marked on the firearm and incorporates the following variants:
- T161: the M60's developmental designation before it was type-classified in the 1950's.
- M60: the basic model, type-classified in 1957.
- M60E1: an improved version that did not enter production. The primary difference was the handle fixed to the barrel and the removal of the gas cylinder and bipod from the barrel assembly.
- M60E2: used in vehicles as a coaxial machine gun; electrically fired.
- M60B: used in helicopters in the 1960's and 1970's; unmounted.
- M60C: used in fixed mounts in aircraft in the 1960's and 1970's; electrically fired and hydraulically charged.
- M60D: replaced the M60B; a pintle-mount version used especially in armament subsystem for helicopters, but also some other roles.
- M60E3: an updated, lightweight version adopted in the 1980s.
- M60E4 (Mk43 Mod 0/1): an improved model of the 1990s that looks similar to the E3, but has many improvements. It has sub-variants of its own, and is also used by the U.S. Navy (as the Mk 43 Mod 0/1). The Mk 43 Mod 1 is a specialized version with additional accessory rails.
- M60E6: a lightened and improved version of the M60E4.
- M60E6: in the Danish military has the designation "LMG M/60".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "M60E6" may not be marked on the receiver/frame. - "M60E6" is available as a conversion kit or as a complete firearm from US Ordnance, Nevada U.S.A., for any "M60" receiver/frame. - "M60E6" is defined by its features. - "M60E6" is a lightened and improved version of the M60 machine gun. - "M60E6" as of 2015, is not in the United States military service. - "M60E6" is a gas-operated, disintegrating-link, belt-fed, air-cooled machine gun that fires from an open bolt. - features include: threaded muzzle for flash hider/muzzle brake; windage adjustable, high front sight bracket or accessory rail block for removable front sight and fully adjustable aperture rear sight; quick-change barrel in short, long and heavy fluted configurations; gas block and piston operated gas system under the barrel; integrated bipod mounted on the receiver/frame; handguard with accessory rails; handguard mounted, removable, forward pistol grip; top mounted carrying handle; stamped sheet metal construction; receiver/frame is an assembly of several component parts, permanently or semi-permanently joined; non-reciprocating, non-folding, charging handle on the right side of the receiver/frame; receiver/frame mounted ammunition hanger on the left side; aluminum top cover with accessory rail for mounting of optics; ambidextrous safety lever on rear, top of the trigger group housing; synthetic buttstock; matte black or other coloured furniture.
Manufacturer	- "R.I.A." is marked on the left side of the receiver/frame. - "R.I.A." stands for "Rock Island Arsenal".
Action	- gas-operated.
Serial Number	- serial number is marked on the left side of the receiver/frame. - serial number of referenced examples consisted of six numbers.
Calibre	- calibre identification is usually marked on the barrel.
Shots	- belt-fed using disintegrating links.

Notes

Make

- "GUN, MACHINE" is marked on the top of the receiver/frame.

Model

- "M60E6" may or may not be marked on the receiver/frame.
- "M60E6" is available as a conversion kit or as a complete firearm from US Ordnance, Nevada U.S.A., for any "M60" receiver/frame.
- "M60E6" is defined by its features.
- "M60E6" is a lightened and improved version of the M60 machine gun.
- "M60E6" as of 2015, is not in the United States military service.
- "M60E6" is a gas-operated, disintegrating-link, belt-fed, air-cooled machine gun that fires from an open bolt.
- features include: threaded muzzle for flash hider/muzzle brake; windage adjustable, high front sight bracket or accessory rail block for removable front sight and fully adjustable aperture rear sight; quick-change barrel in short, long and heavy fluted configurations; gas block and piston operated gas system under the barrel; integrated bipod mounted on the receiver/frame; handguard with accessory rails; handguard mounted, removable, forward pistol grip; top mounted carrying handle; stamped sheet metal construction; receiver/frame is an assembly of several component parts, permanently or semi-permanently joined; non-reciprocating, non-folding, charging handle on the right side of the receiver/frame; receiver/frame mounted ammunition hanger on the left side; aluminum top cover with accessory rail for mounting of optics; ambidextrous safety lever on rear, top of the trigger group housing; synthetic buttstock; matte black and/or color finish furniture.

Manufacturer

"US ORDNANCE" is marked on the firearm.
- US Ordnance Incorporated is a manufacturer based in McCarran, Nevada (a suburb of Reno/Sparks) that produces semi-automatic recreations of medium machine-guns, as well as machineguns for military and domestic purchasers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- gas-operated.
Serial Number	- serial-numbered on the receiver/frame.
Calibre	- calibre identification is usually marked on the barrel.
Shots	- belt-fed. - use disintegrating links.

Firearm Reference Number (FRN): 121690
Make: US Machine Gun
Model: M73

Summary

Make:	US Machine Gun
Model:	M73
Manufacturer:	General Electric
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
121690 - 1	7.62MM NATO	N/A	558	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is marked on the firearm.

Model

- the model designation is marked on the firearm.
- this is a short lived medium machine gun designed specifically for use in armored vehicles after the withdrawal from service of the US M37/M1919 series of medium machine guns; this machine gun saw use between 1959 and 1977, after which it was itself replaced by the M240/FN MAG58.
- features include: a top-cover that hinges to the side for loading and clearing; ventilated barrel shroud; "U" shaped cocking handle on a cable; solenoid or manual firing; adjustable for left/right hand feed and a barrel shroud that swings to the side to allow barrel changes.
- an infantry tripod mounted version of the M73 was also produced as the "M73C", with open adjustable sights and a pistol grip assembly.
- after various problems with the M73 made themselves known, a "product improved" version of the M73 was adopted for a short while as the "M219"; this machine gun differs from the M73 in a number of internal features, but the main external difference is that the M73 has a number of welded studs on the side plates to aid in mounting the machine gun, while the M219 has slots for adjustable studs.

Manufacturer

- the manufacturer is marked on the firearm.

Action

- recoil operated.

Serial Number

- number on the receiver/frame.

Shots

- belt fed firearm.

Model: XM224E3

Summary

Make:	US Mortar
Model:	XM224E3
Manufacturer:	Watervliet Arsenal
Level:	Manufacturer Specifications and Commercial Customization
Type:	Mortar
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
136656 - 1	60MM MORTAR	1	685	Prohibited PFR, Part 1, para. 95(z.251)	Non-Commercial Customization	

Notes

Make

- make is derived from the characteristics/use of this device as employed by the US Military.
- the mortar is a short barreled, smooth bore or rifled, muzzle or breech loading, low velocity, short range, high-angle-of-fire weapon.
- mortars are classified as artillery although usually employed by infantry troops.

Model

- "MORTAR, 60MM: XM224E3" was observed marked on the mid-tube bracket surrounding the barrel.
- "XM224E3" was manufactured circa 1974.
- "XM224" mortar was approved for development by the US Military in December of 1970.
- "XM224" was an experimental/developmental model which eventually became the 60 MM M224 Lightweight Company Mortar as adopted by the US Military in July of 1977.
- M224 model series was designed as a light weight, smooth bore, muzzle loading, high-angle-of-fire weapon.
- 60MM MORTAR barrel assembly is composed of the barrel, combination base cap, and firing mechanism.
- 60MM MORTAR mount consists of a bipod and a base plate which is provided with screw type elevating and traversing mechanisms to elevate/traverse the mortar.
- 60MM MORTAR is equipped with an M4 optical sight.
- M224 Mortar as adopted by the US Military in 1977 had many design improvements incorporated that were significantly different from the XM224E3 version.
- average weight was 21.11 kgs (46.5 lbs).
- maximum range was 3490 meters (2.17 miles).
- muzzle velocity was from 64 mps to 247 mps.

Manufacturer

- "MFR. WATERVLIET ARS. US" was observed marked on the mid-tube bracket surrounding the barrel.
- Watervliet Arsenal is a United States Army facility founded in 1813.
- Watervliet Arsenal manufacturer mortar tubes, tank cannons, and artillery barrels.
- Watervliet Arsenal is located in Watervliet, New York, U.S.A., just outside of Albany.

Action

- designed to be gravity-fired or fired by using a manual spring-loaded firing pin controlled by a firing lever which cocks and fires the pin in one movement.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- known example had a two digit serial number without prefix or suffix marked on the mid-barrel bracket.
Calibre	- "MORTAR, 60MM" was observed marked on the mid-tube bracket surrounding the barrel.

Firearm Reference Number (FRN): 130849
Make: US Ordnance
Model: M6 37MM Gun

Summary

Make:	US Ordnance
Model:	M6 37MM Gun
Manufacturer:	US Ordnance Department
Level:	Manufacturer Specifications and Commercial Customization
Type:	Cannon
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
130849 - 1	37X223R	1	1981	Prohibited PFR, Part 1, para. 95(z.252)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "ORD. DEPT. U.S.A." was observed marked on the left side of the breech ring.

Model

- "GUN 37MM M6" was observed marked on the left side of the breech ring.
- manufactured in the 1940s.
- "M6 37MM Gun" was used in the following armoured fighting vehicles: M3 Lee Medium Tank, and M22 Locust Light Tank and the M8 Greyhound, Staghound and Humber Armoured Cars.
- this gun was also used in the anti-tank role on a towed field carriage.

Manufacturer

- US Ordnance Department was established by the act of 14 May 1812. During the Revolutionary War, ordnance material was under supervision of the Board of War and Ordnance. Numerous shifts in duties and responsibilities have occurred in the Ordnance Corps since colonial times. It acquired its present designation in 1950.
- US Ordnance Corps, purpose is to support the development, production, acquisition and sustainment of weapons systems and munitions, and to provide Explosive Ordnance Disposal, during peace and war, to provide superior combat power to current and future forces of the United States Army.

Action

- recoil operated, vertically sliding breech block.

Serial Number

- serial number was observed marked on the left side of the breech ring.
- observed serial number consisted of five numbers without a letter prefix or suffix.

Notes

Make

- "U.S. ORDNANCE" is marked on the firearm.
- U.S. Ordnance Incorporated is a manufacturer based in Reno, Nevada, that produces semi-automatic recreations of medium machine-guns.

Model

- "BROWNING M1919A4" is not marked on the receiver/frame.
- "BROWNING M1919A4" is a re-creation of the United States Service, .30 calibre, Browning Machine Gun, M1919A4.
- the Browning Machine Gun was named after the inventor, John M. Browning.
- "BROWNING M1919A4" is capable of semi-automatic fire only.
- the Browning Machine Gun M1919 could be configured into sub-models for different roles. A partial list of the possible configurations follows:

a) Browning Machine Gun M1919A4:
- M1919A4 is an air-cooled firearm which may be found in flexible configuration for infantry use and is normally fired from a tripod, or mounted on an armoured fighting vehicle.
- M1919A4 version feeds belts of ammunition from the left side.

b) Browning Machine Gun M1919A5:
- M1919A5 is an air-cooled firearm designed for fixed configuration and use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- M1919A5 version feeds belts of ammunition from the left side.

c) Browning Machine Gun M1919A6:
- M1919A6 is an air-cooled firearm which may be configured for infantry use with a carrying handle, bipod and shoulder stock.
- M1919A6 version feeds belts of ammunition from the left side.

Manufacturer

- US Ordnance Incorporated is a manufacturer based in Reno, Nevada that produces semi-automatic recreations of medium machine-guns.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Type	- designed and manufactured to be capable of semi-automatic fire only.
Action	- "short" recoil operated. - manufactured to fire semi-automatic only.
Serial Number	- serial number is marked the right sideplate. - serial number rationalization unknown.
Shots	- belt-fed firearm.
Canadian Law Comments	- Browning Machine Gun receivers: - The five sided box consisting of top and bottom plates, left and right side plates and the front trunnion block is the receiver/frame for all purposes of the Criminal Code, Section 2 definition of "firearm". - For regulatory purposes, when the five sided box receiver/frame is further disassembled, the receiver/frame component plate where the manufacturer information and serial number are found, is used to establish the description for the purpose of firearms registration. - The classification of this firearm as a semi-automatic firearm is based on the presumption that none of the original five (5) receiver components were reused. This is what was understood to be the meaning of the claim by the manufacturer that the firearm is a "newly manufactured semi-automatic firearm".
Remarks	- this firearm is a re-creation of the United States Service, 30 calibre, Browning Machine Gun, M1919A4, in semi-automatic fire configuration. - the receiver has been designed and manufactured to prevent the use of full-auto parts. - the manufacturer uses surplus US parts to build the receivers / frames into complete firearms. - these US Ordnance, Browning firearms may be reconfigured into sub-models for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows: a) Browning M1919-A4: - the Browning M1919-A4 is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. - the M1919-A4 version feeds belts of ammunition from the left side. b) Browning M1919-A6: - this Browning M1919A6 firearm is an air-cooled firearm which may be configured with a carrying handle, bi-pod and shoulder stock. - the Browning M1919-A6 version feeds belts of ammunition from the left side.

Notes

Make

- "US ORDNANCE" is usually marked on the firearm.

Model

- the model is marked on the firearm.
- this is a grenade-launching "machine gun", designed for area suppression and anti-vehicle/anti-armour use at ranges up to 2000 metres.
- the barrel is available with a variety of muzzle attachments and can be removed and replaced without any requirements for head space or timing adjustments.
- equipped with machine gun type flip up iron sights and is available with a variety of other optic sights.
- the Mk 19 is fitted with dual spade grips and cocking handle on the left and right side much like the 50 M2 Browning machine gun and is available with a variety of other fire-control systems such as an electric trigger pack for remote controlled firing,
- the standard mount is the M3 tripod (using the Mark 64 cradle/adapter for infantry use and is available with a variety of other mounts.
- fitted with a left side mounted ammunition box.

Manufacturer

"US ORDNANCE" is marked on the firearm.
- US Ordnance Incorporated is a manufacturer based in McCarran, Nevada (a suburb of Reno/Sparks) that produces semi-automatic recreations of medium machine-guns, as well as machineguns for military and domestic purchasers.

Action

- recoil operated.

Serial Number

- serial numbered on the receiver/frame.

Shots

- belt fed firearm.

Make: US Recoilless
Model: M18

Summary

Make:	US Recoilless
Model:	M18
Manufacturer:	
Level:	Manufacturer Specifications and Commercial Customization
Type:	Other
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
127322 - 1	57MM RECOILLESS	1	1219	Prohibited PFR, Part 1, para. 95(z.253)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- Recoilless Weapon is designed to eliminate or balance the equal but opposite reaction to the force required to accelerate the projectile out of the tube; known as recoil.
- recoil is eliminated/reduced by controlling the escape of propellent gases to the rear of the weapon through an opening in the breech/venturi.
- Recoilless Rifle was a name originally applied to the US 57mm calibre recoilless rifle as it could be fired from the top of the shoulder.
- Recoilless Gun or Heavy Recoilless Gun/Rifle is usually applied to larger calibre that are fired from lightweight portable tripod mounts or from light vehicles such as a Jeep or Land Rover.

Model

- "M18" is lightweight anti-armour weapon, normally served by a two man crew and could be fired from the shoulder, or on a monopod/bipod or a tripod.
- "T15E3" was the first production version of the 57MM RECOILLESS.
- "T15E3" was introduced in November of 1943.
- "T15E3" had the trigger and sear connected by rods enclosed in a metal housing.
- "T15E3" was improved on and redesignated the "M18".
- "M18" had the trigger and sear connected by a wire cable in a conduit that was located on the right side of the barrel.
- "M18" was introduced in 1944.
- features include: round rifled barrel with manual operated rotating breech venturi; trigger mechanism located on the right side; optica sight.
- overall length of approximately 1564 mm and weight of approximately 25 kg.

Serial Number

- the serial number appears on the front of the breech ring.
- an observed sample serial number consisted of four digits without prefix or suffix.

Canadian Law Comments

- This model meets the definition of firearm in the Criminal Code of Canada S.2. This model may be regulated by other Federal Acts such as the Export and Import Permits Act (EIPA) and the Defence Production Act.

Firearm Reference Number (FRN): 129057
Make: US Recoilless
Model: M20

Summary

Make:	US Recoilless
Model:	M20
Manufacturer:	Miller Printing Machinery
Level:	Manufacturer Specifications and Commercial Customization
Type:	Other
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
129057 - 1	75MM RECOILLESS	1	2000	Prohibited PFR, Part 1, para. 95(z.254)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- Recoilless Weapon is designed to eliminate or balance the equal but opposite reaction to the force required to accelerate the projectile out of the tube; known as recoil.
- recoil is eliminated/reduced by controlling the escape of propellent gases to the rear of the weapon through an opening in the breech/venturi.
- Recoilless Rifle was a name originally applied to the US 57mm calibre recoilless rifle as it could be fired from the top of the shoulder.
- Recoilless Gun or Heavy Recoilless Gun/Rifle is usually applied to larger calibre that are fired from lightweight portable tripod mounts or from light vehicles such as a Jeep or Land Rover.

Model

- "M20" is lightweight anti-armour weapon, normally served by a two man crew and could be fired from a M1917A1 machine gun tripod or a vehicle.
- "T21" was the first version of the 75MM RECOILLESS.
- "T21" was improved on and redesignated the "M20".
- "M20" was introduced in March of 1945.
- features include: round rifled barrel with manual operated rotating breech venturi; trigger mechanism located on the right side; optica sight.
- overall length of approximately 2080 mm and weight of approximately 52 kg.
- total production - 1238 examples from all manufacturers.

Manufacturer

- Miller Printing Machinery Company was located in Pittsburgh, Pennsylvania, U.S.A.

Canadian Law Comments

- This model meets the definition of firearm in the Criminal Code of Canada S.2. This model may be regulated by other Federal Acts such as the Export and Import Permits Act (EIPA) and the Defence Production Act.

Notes

Make

- "U.S. REVOLVER CO" or "U.S. REVOLVER CO." over "MADE IN U.S.A." may be marked on the top strap of the receiver/frame or the barrel.
- "U.S." inside a circle may be marked on the grip plates.
- "U.S. REVOLVER COMPANY" was a trade name used on revolvers manufactured by "Iver Johnson".

Model

- introduced in 1911 and discontinued in 1933.
- model designation is not marked on this firearm.
- available in three receiver/frame sizes; 22LR was built on the small frame, 32 S&W Short was built on the medium frame and 32 S&W Long and 38 S&W were built on the large frame.
- features include: double action, blued or chrome receiver/frame and barrel, spurred hammer, unfluted cylinder, exposed cylinder pin under the barrel, a cylinder loading groove on the right side of the receiver/frame, round barrel, fixed blade front sight with a groove along the top strap or a notch at the rear of the top strap for a rear sight, and the grips may be black hard rubber.
- this model may also have a nickel or chrome finish and pearl or target grips.

Manufacturer

- manufacturer's name is not marked on this firearm.
- "MADE IN THE U.S.A." may be marked on the top strap of the receiver/frame or the barrel.

Serial Number

- the serial number is marked on the left side of the grip receiver/frame under the grip panel. The serial number may have five sequential numbers or one alpha character followed by three to five sequential numbers.
- the serial numbers were allotted to calibres as follows;
- 22LR - 0001 to 100,000 then D0001 to D55850.
- 32 Short - 0001 to 100,000 then E001 to E52100.
- 32 S&W Long and 38 S&W - 0001 to 100,000 then F0011 to F41600.

Notes

Make

- "U.S." over "SPRINGFIELD" over "ARMORY" was observed marked on the receiver ring.
- adopted into the United States of America military service as the US Rifle model of 1903.

Model

- "MODEL 1903" is marked on the receiver ring.
- manufactured from 1903 to 1939.
- features observed: tapered round barrel with bayonet lug; fixed front and rear sight; wing safety at rear of the bolt; pistol grip stock; sling swivels.

Manufacturer

- the manufacturers name appears on the receiver/frame.
- "U.S." over "SPRINGFIELD" over "ARMORY" was observed marked on the receiver ring.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the receiver/frame.
- serial number range is from 30,503 to 1,548,621.

Shots

- internal box magazine with floor plate.

Notes

Make

- "US Rifle" is not marked on the firearm.
- "U.S." is marked on the receiver ring.
- adopted into the United States of America military service as the US Rifle model of 1903.

Model

- introduced in 1907.
- should be marked on top of the receiver/frame on the breech ring.
- the 1903 Gallery Practice Rifle is built on a standard 1903 receiver/frame and looks almost identical to the 1903 with the modifications of the 1905. With the exception of the barrel bore, in 22 calibre and the chamber is cut to accommodate the Hoffer-Thompson Cartridge Holder.

Manufacturer

- should be marked on top of the receiver on the breech ring.

Action

- manually operated, bolt-action, repeating rifle that requires special cartridge holders.

Serial Number

- should be marked on top of the receiver on the breech ring.

Notes

Make

- "US Rifle" is not marked on the firearm.
- "U.S." is marked on the receiver ring.
- adopted into the United States of America military service as the US Rifle model of 1903 MARK 1.

Model

- the model name is marked on top of action at front.
- this firearm's receiver/frame was modified to accept the "Pederson Device" with a prominent ejection port on the left-hand side of the receiver/frame.
- the official name of the "Pederson Device" was: Automatic Pistol, Calibre 30, Model of 1918.

Manufacturer

- marked on barrel.
- SPRINGFIELD ARMORY located at Springfield Massachusetts, was the first U.S. Government Arsenal; it started in 1790, opened in 1795, officially made a federal arsenal in 1872 by an Act of Congress, terminated production in 1968, and officially closed in 1975.

Serial Number

- marked on top of action at front.
- 145,000 Mark I rifles were manufactured between 1918 and the 30th of June 1921.
- lowest recorded serial number was 1,034,503.
- highest recorded serial number was 1,197,834.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- non detachable magazine.

Notes

Make

- "US Rifle" is not marked on the firearm.
- "U.S." is usually marked on the receiver ring.
- adopted into the United States of America military service as the US Rifle model of 1903.

Model

- this is a generic entry for those "Springfield 1903" Models that have been modified/customized/sporterized to such a degree that the original model designation is no longer identifiable.
- this was originally a military rifle (US Rifle, 1903 or 1903/A3), reconfigured to a "sporter" configuration. Original military markings in the form of the make, manufacturer and/or serial number range may not be present.
- features may include:1903 action; internal box magazine; turned down bolt handle; medium-heavy barrel; original or aftermarket iron sights, may be drilled and tapped for various scope mounts, synthetic or wooden pistol grip stock with sling swivel studs; blued finish.

Manufacturer

- if present, the manufacturer is usually marked on the receiver ring.

Action

- turn-bolt design.

Serial Number

- serial number is usually marked on the receiver ring. It may or may not be visible or present depending on the individual firearm.

Calibre

- calibre, if present, may be marked on the barrel or the receiver/frame.

Shots

- internal box magazine.

2464 - 1	30-06 SPRG	5	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "US Rifle" is not marked on the firearm.
- "U.S." is marked on the receiver ring.
- adopted into the United States of America military service as the US Rifle model of 1903/A4.

Model

- "03/A3" marked on the receiver/frame ring.
- none were marked "03/A4" but are distinct by the position of the designation on the receiver/frame. The marking "Model of 03/A3" appears at the nine o'clock position on the receiver/frame ring, as opposed to a regular Model 1903/A3 where the marking appears at the 12 o'clock position.
- intended for use with a telescopic sight.

Serial Number

- government assigned serial numbers were as follows: 3,407,088 - 3,427,087, Z4,000,001 to Z4,002,920, and 4,992,001 to 4,999,045.

Barrel

- no front sight or rear sight. Early examples had four groove rifling - most of production had two groove rifling.

Remarks

- this model has a telescopic sight base and was originally equipped with a telescopic sight.
- An 8 x 40 hole is drilled and tapped on the receiver ring and on the rear sight base to anchor the scope mount.
- May be found with a WEAVER 330 C telescope (marked M73B1).

Firearm Reference Number (FRN): 200804
Make: US Rifle
Model: 1903/A4

Summary

Make:	US Rifle
Model:	1903/A4
Manufacturer:	US Armament MFG/Remington
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
200804 - 1	30-06 SPRG	5	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "US Rifle" is not marked on the firearm.
- "U.S." is marked on the top of the receiver/frame breech ring.

Model

- "MODEL 03-A3" is marked on the top of the receiver/frame breech ring.
- "1903-A4" is marked on the bottom of the barrel.
- "1903-A4" is a fully refinished, as a standard military rifle scoped version of the "1903-A3" with a new stock and barrel on original "U.S. REMNGTON MODEL 03-A3" receiver/frame.
- Features include: original Remington 1903A3 receiver/frame with original bolt assembly; bolt mounted wing safety; three position left side bolt release lever which also functions as a magazine cut-off; reproduction Redfield Jr. one-piece optic mount; reproduction "C" type walnut with a linseed oil finish stock and wooden upper barrel handguard.

Manufacturer

- "US Armament MFG" is marked on the bottom of the barrel.
- "REMNGTON" is marked on the top of the receiver/frame breech ring.

Action

- Turn bolt operated.

Serial Number

- The serial number is marked on the right side of the receiver/frame.
- The serial number of referenced example consists of seven digits.

Calibre

- The calibre designation is marked on the barrel.

Shots

- Internal box magazine.

Notes

Make

- "US Rifle" is not marked on the firearm.
- "U.S." and "MODEL OF 1917" are marked on the top of the receiver ring.

Model

- produced from 1917 to November 1918.
- total production of 1,181,908 rifles.
- "U.S." and "MODEL OF 1917" are marked on the top of the receiver ring.
- this model is a 30-06 SPRG version of the Enfield Pattern 1914.
- this model was also known as the "American Enfield" or "Rifle, Caliber 30, Model of 1917".
- this model was also produced by Winchester and Remington.
- features include: Mauser-type mechanism; one piece full length military style walnut stock, having a full top-wood hand guard; protected blade front sight and protected elevation adjustable rear peep sight; bayonet lug; sling swivels; integral stripper clip charger bridge.
- the rifle has a notable swept-back dog-legged bolt handle, a pronounced angular step on the front portion of the trigger guard, and a pair of substantial "wings" protecting the rear sights.

Manufacturer

- "EDDYSTONE" is marked on the top of the receiver ring.
- the actual corporate name of the temporary wartime company created to make this rifle at Eddystone was "Remington Arms of Delaware".

Action

- turn-bolt design.

Serial Number

- serial number is marked on the receiver ring, under "U.S.", "MODEL OF 1917" and "EDDYSTONE".
- serial number does not have a letter prefix or suffix.
- total production of 1,181,908 rifles.

Calibre

- calibre designation is not marked on the firearm.

Shots

- integral, fixed box magazine.
- magazine capacity of this firearm as manufactured is six (6) cartridges.
- Note: a common misconception is that the magazine capacity of this rifle as issued is five (5) cartridges. This misconception arose from the official doctrine of loading this rifle using five (5) shot stripper clips originally designed for use in the 1903 Springfield series of US Rifle models.

Other Markings

- U.S. ordnance markings in the form of a small "streamered bomb" or "flaming grenade" on the receiver, bolt, barrel, and other parts.
- may be other markings such as date numerals on the barrel.

Remarks

- When the United States of America entered the First World War in 1917 it was short of rifles.
- The firms (Winchester, Remington) that were producing the British Rifle, Pattern 1914 between 1914 and 1916 had just had their British contracts cancelled in late 1916.
- The British (service) Rifle, Pattern 1914 was quickly redesigned by the Americans and put back into production in calibre 30-06 SPRG, produced as the U.S. Rifle, Cal. 30, model of 1917.

Notes

Make

- "US Rifle" is not marked on the firearm.
- "U.S." and "MODEL OF 1917" are marked on the top of the receiver ring.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- produced from 1917 to November 1918.
- total production: 545,541 rifles
- "U.S." and "MODEL OF 1917" are marked on the top of the receiver ring.
- this model is a 30-06 SPRG version of the Enfield Pattern 1914.
- this model was also known as the "American Enfield" or "Rifle, Caliber 30, Model of 1917".
- this model was also produced by Eddyston Remington Arms (ERA) and Remington.
- features include: Mauser-type mechanism; one piece full length military style walnut stock, having a full top-wood hand guard; protected blade front sight and protected elevation adjustable rear peep sight; bayonet lug; sling swivels; integral stripper clip charger bridge.
- the rifle has a notable swept-back dog-legged bolt handle, a pronounced angular step on the front portion of the trigger guard, and a pair of substantial "wings" protecting the rear sights.

Manufacturer

- "U.S. and "W" or "U.S." over "MODEL OF 1917" over "WINCHESTER" are marked on the top of the receiver ring.
- "W" after "U.S." indicated the manufacturer "Winchester".

Action

- turn-bolt design.

Serial Number

- "U.S." over "W" over the serial number or "U.S." over "MODEL OF 1917" over "WINCHESTER" over the serial number are marked on the top of the receiver ring.
- serial number does not have a letter prefix or suffix.
- total production of 545,541 rifles.

Calibre

- calibre designation is not marked on the firearm.

Shots

- integral, fixed box magazine.
- magazine capacity of this firearm as manufactured is six (6) cartridges.
- Note: a common misconception is that the magazine capacity of this rifle as issued is five (5) cartridges. This misconception arose from the official doctrine of loading this rifle using five (5) shot stripper clips originally designed for use in the 1903 Springfield series of US Rifle models.

Other Markings

- U.S. ordnance markings in the form of a small "streamered bomb" or "flaming grenade" on the receiver, bolt, barrel and other parts.
- may be other markings such as date numerals on the barrel.

Remarks

- when the United States of America entered the First World War in 1917 it was short of rifles.
- the firms (Winchester, Remington) that were producing the British Rifle, Pattern 1914 between 1914 and 1916 had just had their British contracts cancelled in late 1916.
- the British Service Rifle, Pattern 1914 was quickly redesigned by the Americans and put back into production in calibre 30-06 SPRG, produced as the U.S. Rifle, Cal. 30, Model of 1917.

Notes

Make

- "U.S. RIFLE" is marked on the rear tang of the receiver/frame.
- frequently called the "Garand" rifle.
- this semi-automatic service rifle was designed by John Garand, adopted by the U.S. in 1936, and saw service through World War II and Korea.

Model

- Based on the "M1 Garand" design.
- Introduced in 1940.
- "U.S. RIFLE" over "CAL. .30 M1" over "H.& R. ARMS CO." over the serial number are stamped on top rear of receiver/frame.
- manufactured between 1951 and 1954.
- this is a gas operated semi-automatic service rifle designed by John Garand, adopted by the U.S. in 1936, and saw service through World War II and Korea.
- features include: parkerized metal surfaces; walnut stock; post foresight with protective side wings and rear aperture sight adjustable for both windage and elevation; detachable trigger group; bayonet lug forged as part of the gas assembly.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "H.& R. ARMS CO." is marked on rear tang of receiver/frame.
Action	- gas operated.
Serial Number	- the serial number is stamped on top rear of receiver/frame. - government assigned serial numbers range was from 4,660,001 to 4,800,000 and 5,488,247 to 5,793,847. - Harrington & Richardson produced approximately 445,600 M1 rifles.
Shots	- Introduced in 1940 with an 8 shot enbloc clip. - 8 shot enbloc clip. - The "M1 Garand" was introduced in 1936 with an 8 shot enbloc clip. - This firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, eight cartridge, enbloc clip; once inserted into the firearm, this clip cannot be recharged.
Canadian Law Comments	- the "magazine" feed device used in this firearm is exempt from the "REGULATIONS PRESCRIBING CERTAIN FIREARMS AND OTHER WEAPONS, COMPONENTS AND PARTS OF WEAPONS, ACCESSORIES, CARTRIDGE MAGAZINES, AMMUNITION AND PROJECTILES AS PROHIBITED OR RESTRICTED". For further information or clarification see "Part 4, Prohibited Devices", "Former Cartridge Magazine Control Regulations".
Other Markings	- several parts will be marked with part numbers and/or manufacturers markings.

Notes

Make

- "U.S. RIFLE" is marked on the rear tang of the receiver/frame.
- frequently called the "Garand" rifle.
- this semi-automatic service rifle was designed by John Garand, adopted by the U.S. in 1936, and saw service through World War II and Korea.

Model

- Introduced in 1940.
- Based on the "M1 Garand" design.
- "U.S. RIFLE" over "CAL. .30 M1" over "WINCHESTER" over the serial number are stamped on top rear of receiver/frame.
- manufactured between 1940 and 1945.
- this is a gas operated semi-automatic service rifle designed by John Garand, adopted by the U.S. in 1936, and saw service through World War II and Korea.
- features include: parkerized metal surfaces; walnut stock; post foresight with protective side wings and rear aperture sight adjustable for both windage and elevation; detachable trigger group; bayonet lug forged as part of the gas assembly.
- a shortened "Tanker" version was produced for use in the Pacific theatre during World War Two.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "Winchester " is usually marked on the top rear of the receiver/frame.
Action	- gas operated.
Serial Number	- Government assigned serial numbers were 100,001 to 165,000; 1,200,001 to 1,357,473; 2,305,850 to 2,655,982. - Winchester assigned range of 2,305,850 to 2,665,892 was grossly duplicated by Springfield so serial number and manfacturer are needed to ensure correct identification.
Shots	- Introduced in 1940 with an 8 shot enbloc clip. - 8 shot enbloc clip. - This firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, eight cartridge, enbloc clip; once inserted into the firearm, this clip cannot be recharged.
Canadian Law Comments	- the "magazine" feed device used in this firearm is exempt from the "REGULATIONS PRESCRIBING CERTAIN FIREARMS AND OTHER WEAPONS, COMPONENTS AND PARTS OF WEAPONS, ACCESSORIES, CARTRIDGE MAGAZINES, AMMUNITION AND PROJECTILES AS PROHIBITED OR RESTRICTED". Notes

Make

- "U.S. RIFLE" is marked on the rear tang of the receiver/frame.
- frequently called the "Garand" rifle.
- this semi-automatic service rifle was designed by John Garand, adopted by the U.S. in 1936, and saw service through World War II and Korea.

Model

- "U.S. RIFLE" over "CAL. .30 M1" over "SPRINGFIELD" over "ARMORY" or the original manufacturer's name over the serial number are stamped on top rear of receiver/frame.
- the letters "NM" for National Match are marked on the barrel and may be repeated on other parts.
- the M1 National Match rifles were manufactured between 1953 and 1959.
- existing M1 rifles were converted to National Match configuration between 1954 and 1963.
- total production of 44,850 units. This number consisted of 21,390 new rifles and 23,460 rebuilt rifles.
- the M1 National Match "Type 1" configuration started as a tuned up service rifle with the letters "NM" with a star stamped on the barrel and a newly produced receiver/frame.
- the M1 National Match "Type 2" configuration featured a hooded rear sight, glass bedded stock and the letters "NM" marked on many of the parts.

Manufacturer

- "SPRINGFIELD" over "ARMORY" is marked on the tang of the receiver/frame (of those units produced as new at Springfield Armory).
- "SA", the abbreviation for "Springfield Armory" is marked on the barrel.
- converted rifles may retain the original manufacturer's markings.

Action

- gas operated.

Serial Number

- the serial number is marked on the top tang of the receiver/frame.

Calibre

- "CAL. .30 M1" is marked on the top tang.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- this firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, eight cartridge, enbloc clip.
- once inserted into the firearm, this clip cannot be recharged.

Canadian Law Comments

- the "magazine" feed device used in this firearm is exempt from the "REGULATIONS PRESCRIBING CERTAIN FIREARMS AND OTHER WEAPONS, COMPONENTS AND PARTS OF WEAPONS, ACCESSORIES, CARTRIDGE MAGAZINES, AMMUNITION AND PROJECTILES AS PROHIBITED OR RESTRICTED". Notes

Make

- "U.S. RIFLE" is marked on the rear tang of the receiver/frame.
- frequently called the "Garand" rifle.
- this semi-automatic service rifle was designed by John Garand, adopted by the U.S. in 1936, and saw service through World War II and Korea.

Model

- Introduced in 1965.
- Based on the "M1 Garand" design.
- this is a US Navy conversion of a standard US Rifle, M1 (Garand) from .30-06 SPRG to 7.62 MM NATO by the use of a chamber insert to reduce the length of the chamber.

Manufacturer

- American Machine and Foundry Company (AMF) was contracted to convert approximately 17,000 M1 rifles to Mark 2 Model 0 specifications.
- this conversion was done to M1 rifles manufactured by Harrington & Richardson, International Harvester Corporation, Springfield Armory, and Winchester.

Action

- gas operated.

Barrel

- Original .30-06 SPRG chambered barrel modified by the insertion of a chamber insert so the 7.62 MM NATO cartridge could be used.

Calibre

- left side of receiver marked "7.62 MM NATO"

Shots

- Introduced in 1965 with an 8 shot enbloc clip.
- 8 shot enbloc clip.
- This firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, eight cartridge, enbloc clip; once inserted into the firearm, this clip cannot be recharged.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments - the "magazine" feed device used in this firearm is exempt from the "REGULATIONS PRESCRIBING CERTAIN FIREARMS AND OTHER WEAPONS, COMPONENTS AND PARTS OF WEAPONS, ACCESSORIES, CARTRIDGE MAGAZINES, AMMUNITION AND PROJECTILES AS PROHIBITED OR RESTRICTED". For further information or clarification see "Part 4, Prohibited Devices", "Former Cartridge Magazine Control Regulations".

Remarks - This converted model was generally unsatisfactory in US Navy service and most examples of this model were converted (again) to the US Rifle, Navy MK2, Model 1 by rebarrelling with a barrel chambered for the 7.62 MM NATO cartridge.

Firearm Reference Number (FRN): 34160
Make: US Rifle
Model: M1 Navy MARK 2 Model 1

Summary

Make:	US Rifle
Model:	M1 Navy MARK 2 Model 1
Manufacturer:	Harrington & Richardson
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
34160 - 1	7.62MM NATO	8	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make
- "U.S. RIFLE" is marked on the rear tang of the receiver/frame.
- frequently called the "Garand" rifle.
- this semi-automatic service rifle was designed by John Garand, adopted by the U.S. in 1936, and saw service through World War II and Korea.

Model
- Introduced in 1965.
- Based on the "M1 Garand" design.
- this is a US Navy conversion of a standard US Rifle, M1 (Garand) from .30-06 SPRG to 7.62 MM NATO by the use of a new barrel from Springfield Armory.

Manufacturer
- "H. & R. ARMS CO." is marked on the receiver/frame.
- this conversion using new Springfield Armory barrels was carried out by American Machine and Foundry Company (AMF), Harrington & Richardson, and the Naval Weapons Command at Crane, Indianna.

Action
- gas-operated.

Serial Number
- throughout the spectrum, no specific block of numbers.

Barrel
- original 30-06 SPRG barrel, replaced with a barrel chambered for 7.62MM NATO.

Calibre
- left side of receiver marked "7.62MM NATO"

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- Introduced in 1965 with an 8 shot enbloc clip. - This firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, eight cartridge, enbloc clip; once inserted into the firearm, this clip cannot be recharged.
Other Markings	- U.S.Rifle, Cal. 30 M1, (Armoury or manufacturer), serial number.
Remarks	- "7.62 NATO" appears on left side of receiver.

Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
350 - 1	7.62MM NATO	8	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "U.S. RIFLE" is marked on the rear tang of the receiver/frame.
- frequently called the "Garand" rifle.
- this semi-automatic service rifle was designed by John Garand, adopted by the U.S. in 1936, and saw service through World War II and Korea.

Model

- Introduced in 1957.
- Based on the "M1 Garand" design.
- "Navy Match" is engraved on the receiver/frame.
- an enhanced M1 Garand converted for more accurate shooting during training and service competitions.

Manufacturer

- marked H & R ARMS CO. Other manufacturers are probable as this rifle was a conversion of any M1 Garand held by the US Navy.

Action

- gas operated.

Calibre

- left side of receiver/frame is marked "7.62MM NATO"

Shots

- Introduced in 1957 with an 8 shot enbloc clip.
- 8 shot enbloc clip.
- The "M1 Garand" was introduced in 1940 with an 8 shot enbloc clip.
- This firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, eight cartridge, enbloc clip; once inserted into the firearm, this clip cannot be recharged.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- the "magazine" feed device used in this firearm is exempt from the "REGULATIONS PRESCRIBING CERTAIN FIREARMS AND OTHER WEAPONS, COMPONENTS AND PARTS OF WEAPONS, ACCESSORIES, CARTRIDGE MAGAZINES, AMMUNITION AND PROJECTILES AS PROHIBITED OR RESTRICTED". For further information or clarification see "Part 4, Prohibited Devices", "Former Cartridge Magazine Control Regulations".

Remarks

- 'Navy Match' appears on action, "7.62 NATO" on left side of receiver/frame. The M1 Navy Match rifle is a modification of the US Rifle M1 wherein a barrel chamber insert converts the calibre from 30-06 SPRG to 7.62MM NATO. This economy driven conversion was generally unsatisfactory. The US Navy then rebarrelled many of this M1 Navy Match model, rebarrelled rifle officially known as the US Rifle, Navy MK 2 Model 1, Cal 7.62MM

20068 - 2	7.62MM NATO	20	559	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make	- "U.S. RIFLE" is marked on the rear tang of the receiver/frame.
Model	- marked on the top rear receiver/frame.
Manufacturer	- the manufacturer's name is marked on the top rear receiver/frame.
Action	- no longer capable of full automatic fire.
Serial Number	- marked on the top rear receiver below name of the manufacturer.
Barrel	- length does not include the attached flash hider/muzzle brake.
Calibre	- marked on the rear top of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots
- detachable box magazine.

Other Markings
- many parts marked with military identification number.
- left side of dial elevator on rear sight marked: LEFT (with counter-clockwise arrow) LEFT (and manufacturer's identification)

Remarks
- this was the official service rifle of the United States from 1961 to 1966: it was replaced by the "M16" Model.
- this rifle was issued in the semi-automatic mode (without the full-automatic lever) with a blind button-plug installed. Other components came installed; conversion to FA required dismantling and installation of the rotating FA change lever (which was not supplied).

Notes

Make

- marked on the top rear of the receiver/frame: U.S. RIFLE 7.62 MM M14 .

Model

- the M14A1 should not be confused with the standard M14 and the M15 heavy barrel.
- the M14A1 was built on the standard M14 receiver/frame, model markings may read "M14" or "M14A1".
- the M14A1 was basically a standard M14 capable of full automatic fire with an adjustable bipod, a stabilizer that fits over the flash hider and locks on the bayonet lug, and an E1 or E2 stock. These stocks are made of wood and have a vertical pistol grip fitted behind the trigger guard, and a folding synthetic hand grip mounted in the forward position. Some examples may be fitted with a rubber buttplate.

Manufacturer

- marked on the top rear of the receiver/frame.

Type

- this Rifle was also used as a Light Machine Gun or Squad Automatic Weapon.

Action

- no longer capable of full automatic fire.

Serial Number

- marked on the top rear of the receiver/frame.

Shots

- detachable box magazine.

120849 - 2	7.62MM NATO	20	559	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- the make is marked on the top of the receiver/frame just behind the rear sight as "U.S. RIFLE".

Model

- the "M" in the model designation indicates the rifle has undergone a conversion process and is re-designated as "Modified Service".
- the "M" designation may be found either hand stamped or engraved on the rear of the receiver/frame following the standard production model designation.
- these rifles were produced by Springfield Armory in 1962 and 1963 directly from their production line and from rifles submitted for repair/overhaul in 1965.
- approximately 9,200 total units were converted to "M" status by welding the selector shaft, selector lock retaining pin, sear release, and receiver sear release into a single solid unit.
- this model is the precursor to the M14 NM as produced by Thompson-Ramo-Wooldridge (TRW) beginning in 1964.
- features include: a wooden stock; parkerized metal surfaces; rear peep and front post sights.
- this model differs from standard M14 rifles in having a glass bedded stock, a unitized gas cylinder system and flash suppressor modifications to enhance accuracy.
- this rifle was initially manufactured for shooter orientation and familiarization use by civilians at the 1963 Small Arms Firing School at Camp Perry. It was issued at the 1964 National Matches at Camp Perry and was also issued to state rifle associations for use. Some units were subsequently offered for sale by the Director of Civilian Marksmanship to NRA affiliated rifle clubs and civilians.

Manufacturer

- these rifles were produced by Springfield Armory in 1962 and 1963 directly from their production line and from rifles submitted for repair/overhaul in 1965.
- this model/conversion was converted from standard M14 rifles by Springfield Armory. Examples may be encountered that were originally produced by other manufacturers but converted during the overhaul/repair process of rifles undertaken in 1965.

Action

- no longer capable of full automatic fire.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number is marked on the top of the receiver/frame, just behind the rear sight.
Calibre	- the calibre designation is marked on the rear of the receiver/frame as "7.62MM".
Shots	- detachable box magazine.
Canadian Law Comments	- as this model uses a receiver/frame that was designed to support full automatic fire capability it is considered a "Converted Automatic" firearm. As such, regardless of when or where the modifications were carried out it retains a Prohibited legal classification. For further clarification see Criminal Code definition; CC 84 (1) "prohibited firearm" para. (c).

120848 - 2	7.62MM NATO	20	559	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- the make is marked on the top of the receiver/frame just behind the rear sight as "U.S. RIFLE".
- as the M14 was the service rifle of the United States it was eligible to be used in the National Rifle Matches held at Camp Perry, Ohio. An engineering program was initiated in 1959 at Springfield Armory to develop the M14 National Match rifle for use in competition.

Model

- the model designation is marked on the top of the receiver/frame just behind the rear sight as "M14 NM". The "NM" in the model designation denotes "National Match".
- Thompson-Ramo-Wooldridge (TRW) was contracted to supply 5,515 M14 "match" rifles for the 1964 National Rifle Matches held at Camp Perry, Ohio. They were also contracted for a further 2,094 rifles for the 1965 Matches. Total actual production is unknown but references indicate that approximately 4,874 rifles were manufactured.
- this rifle was manufactured/modified by Thompson-Ramo-Wooldridge (TRW) by mating specially selected and finished parts to an M14 service rifle receiver/frame that had the selector shaft, sear release, selector lock and receiver sear release welded so that the rifle was no longer capable of full automatic fire.
- other features include: select barrel where the bores were held to half the tolerances of a standard service rifle barrel and not chromium plated; receiver/frame is glass bedded to the stock; fitted with a special rear sight that allows 1/2 minute of angle adjustments for windage and elevation.

Manufacturer

- the manufacturers identifier is marked on the top rear of the receiver/frame as "TRW" in small script inside a triangular symbol.
- Thompson-Ramo-Wooldridge (TRW) was the first private company to be awarded a contract to supply "Match" rifles to the government of the United States.

Action

- no longer capable of full automatic fire.

Serial Number

- the serial number is marked on the top of the receiver/frame behind the rear sight.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine.
Canadian Law Comments	- as this model uses a receiver/frame that was designed to support full automatic fire capability it is considered a "Converted Automatic" firearm. As such, regardless of when or where the modifications were carried out it retains a Prohibited legal classification. For further clarification see Criminal Code definition; CC 84 (1) "prohibited firearm" para. (c).

2564 - 3	22 HORNET	5	622	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
2564 - 2	22 LR	5	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
2564 - 4	22 LR	5	622	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- US RIFLE is marked on top of the receiver ring.
- originaly developed to aid in experimental work for .22 HORNET.

Model

- marked on top of receiver ring.
- this is a 22 calibre target version of the US "Model 1903" Springfield military rifle.
- It is readily identified by the:
- single barrel band,
- half length sporting-type pistol grip stock,
- no top hand guard, and
- blade front sight.

Manufacturer

- marked on top of receiver ring.

Action

- manually operated, bolt actuated, magazine fed, repeating rifle.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- numbered in sequence with the US Rifle, Calibre 30, M1903A1 contemporary production.
Calibre	- this cartridge was devised by Springfield Armoury staff , 1930. - the US Rifle M1922 in caliber 22 Hornet was made in experimental, small quantity lots.
Shots	- detachable box magazine.
Remarks	- The US Rifle, Caliber 22, M1922 was initially developed jointly by the US Ordnance Department and the National Rifle Association (NRA) to provide accurate small-bore rifles for civilian rifle clubs for use in rifle competitions in schools and colleges, and for sale purposes to members of the NRA. - Subsequently this firearm was adopted as a military standard firearm by all branches of the US Forces and the Coast Guard. - The rifles assembled for civilian type marksmanship have shotgun style butts while the military models have a military butt and butt-plate. - As initially produced the rifle was designated M1922, sucessive improvements and modifications have been indicated by the designation M1922M1 and the M2. - In general these improvements have been to the bolt assembly and firing mechanism and may be applied to any of the sub-model variants of this rifle. - The predominant identifying feature of the M1922 is the bolt has a large knob similar to the US Rifle M1903A1 (Springfield Rifle in 30-06 SPRG Calibre), there are also a number of non-visible differences in the firing mechanism.

Notes

Make

- "US RIFLE" is marked on top of the receiver ring.

Model

- marked on top of receiver ring.
- this firearm is a 22 calibre target version of the US Rifle "Model 1903A1" Springfield.
- It is readily identified by the:
- single barrel band,
- half length sporting-type pistol grip stock,
- no top hand guard,
- receiver-mounted adjustable Lyman No 48C aperture rear sight, and
- blade front sight.

Manufacturer

- marked on top of receiver ring.

Action

- turn-bolt design.

Serial Number

- numbered in sequence with the US Rifle, Calibre 30, M1903A1 contemporary production.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- The US Rifle, Caliber 22, M1922 was initially developed jointly by the US Ordnance Department and the National Rifle Association (NRA) to provide accurate small-bore rifles for civilian rifle clubs for use in rifle competitions in schools and colleges, and for sale purposes to members of the NRA.
- Subsequently this firearm was adopted as a military standard firearm by all branches of the US Forces and the Coast Guard.
- The rifles assembled for civilian type marksmanship have shotgun style butts while the military models have a military butt and butt-plate.
- As initially produced the rifle was designated M1922, sucessive improvements and modifications have been indicated by the designation M1922M1 and the M2.
- The modifications that make this rifle the US Rifle, Caliber .22, 1922M1 are as follows:
- redesigned bolt assembly (M1922M1 firing mechanism assembly),
- M1921M1 magazine assembly,
- Lyman 48C receiver sight,
- M2 stock assembly,
- redesigned bolt handle to incorporate an adjustable headspace feature, and
- improved firing pin time.
- This rifle may be a modified US Rifle, 22 Calibre, M1922, further modified to bring it up to the US Rifle 22 Caliber, M1922M1 standard or it may be a purpose-built M1922M1 Rifle.
- All of these improvements may and probably have been applied to all former M1922 pattern rifles except those sold to individuals by the Directorate of Civilian Marksmanship.

Notes

Make

- "U.S. RIFLE" is marked on the rear tang of the receiver/frame.
- frequently called the "Garand" rifle.
- this semi-automatic service rifle was designed by John Garand, adopted by the U.S. in 1936, and saw service through World War II and Korea.

Model

- Introduced in 1944.
- Based on the "M1 Garand" design.
- designation "M1C" does not appear on the firearm.
- this model is a standard US Rifle Cal 30 M1 adapted during manufacture to mount a telescopic sight and as such that designation (US Rifle Cal 30 M1) appears on the rear of the receiver.
- the mount is screwed and pinned to the left side of the receiver (not like the telescopic sight mount of the US Rifle M1D which attaches to a sleeve on the chamber of the barrel).
- when mounted, the telescopic sight aligns with left side of barrel, not over the bore.

Manufacturer

- name appears on the rear of the receiver.

Action

- gas operated.

Serial Number

- appears on the rear of the receiver.
- unknown numbers were made but serial numbers fall within the indicated range.
- 1 to 4,330,000

Calibre

- caliber designation appears on the rear of the receiver as "Cal 30".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- The "M1 Garand" was introduced in 1936 with an 8 shot enbloc clip.
- This firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, eight cartridge, enbloc clip; once inserted into the firearm, this clip cannot be recharged.

Notes

Make

- "U.S. RIFLE" is marked on the rear tang of the receiver/frame.
- frequently called the "Garand" rifle.
- this semi-automatic service rifle was designed by John Garand, adopted by the U.S. in 1936, and saw service through World War II and Korea.

Model

- Introduced in 1944.

- Based on the "M1 Garand" design.
- the model designation does not appear as "M1D" on the firearm.
- this model is a conversion of a standard US Rifle, model M1 to mount a telescopic sight; this conversion was adopted in 1944.
- this is a standard US Rifle M1 except that the barrel has a telescopic sight mounting sleeve to which a telescopic sight base is screwed and pinned. When mounted, the telescopic sight aligns with the left side of the barrel, not over the bore.
- barrels for the M1D were produced by Springfield Armory, these barrels have the drawing number D7312575 marked on the right side. Conversions were carried out at almost all levels within the ordnance system.

Manufacturer

- the original manufacturers name (receiver/frame) appears on the rear of the receiver/frame as "H.& R.ARMS CO." .
- the right "leg" of the receiver/frame may be marked with the initials of the converting facility and the date of the conversion.

Action

- gas operated.

Serial Number

- unknown number made (converted) but serial numbers usually fall within the range of the two serial number blocks assigned to Harrington & Richardson; 4,600,001 to 4,800,000 and 5,488,247 to 5,793,847 (H&R produced rifles have been noted with numbers in the 6,000,000 range).
- early production samples may have a World War II era serial number.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- appears on the top rear of the receiver/frame as "Cal 30 M1".
Shots	- Introduced in 1944 with an 8 shot enbloc clip. - 8 shot enbloc clip. - The "M1 Garand" was introduced in 1940 with an 8 shot enbloc clip. - This firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, eight cartridge, enbloc clip; once inserted into the firearm, this clip cannot be recharged.
Canadian Law Comments	- the "magazine" feed device used in this firearm is exempt from the "REGULATIONS PRESCRIBING CERTAIN FIREARMS AND OTHER WEAPONS, COMPONENTS AND PARTS OF WEAPONS, ACCESSORIES, CARTRIDGE MAGAZINES, AMMUNITION AND PROJECTILES AS PROHIBITED OR RESTRICTED". For further information or clarification see "Part 4, Prohibited Devices", "Former Cartridge Magazine Control Regulations".
Remarks	- although officially adopted in September of 1944 as "Substitute Standard" only a few were produced prior to the end of World War II. All early conversions (1951-1953) were done at Springfield Armory, other facilities continued converting rifles into M1D configuration into the 1960's.

Notes

Make	- US RIFLE is marked on top of the receiver ring.
Model	- marked on top of receiver ring. - introduced in 1933. - this is a 22 calibre target version of the US "Model 1903" Springfield military rifle. - it is readily identified by the: single barrel band, half length sporting-type pistol grip stock, no top hand guard, receiver-mounted adjustable Lyman No 48C aperture rear sight, and blade front sight.
Manufacturer	- marked on top of receiver ring.
Action	- manually operated, bolt actuated, magazine fed, repeating rifle.
Serial Number	- numbered in sequence with the US Rifle, Calibre 30, M1903A1 contemporary production.
Shots	- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- the US Rifle, Caliber 22, M1922 was initially developed jointly by the US Ordnance Department and the National Rifle Association (NRA) to provide accurate small-bore rifles for civilian rifle clubs for use in rifle competitions in schools and colleges, and for sale purposes to members of the NRA.
- subsequently this firearm was adopted as a military standard firearm by all branches of the US Forces and the Coast Guard. The rifles assembled for civilian type marksmanship have shotgun style butts while the military models have a military butt and butt-plate.
- as initially produced the rifle was designated M1922, sucessive improvements and modifications have been indicated by the designation M1922M1 and the M2.
- this model of the US Rifle M1922 is known simply as the M2. It incorporates all of the modifications that changed the original model of this rifle from US Rifle M1922 to US Rifle M1922M1.
- the final modifications that make this rifle the US Rifle, Caliber .22, M2 are as follows:
- redesigned bolt assembly M2,
- M2 magazine assembly,
- M2 stock assembly,
- redesigned bolt handle to incorporate an adjustable headspace feature, and
- improved firing pin time.
- this rifle may be a modified US Rifle, 22 Calibre, M1922, or a US Rifle, 22 Calibre, M1922M1 further modified to bring it up to the US Rifle 22 Caliber, M2 standard.
- all of these improvements may and probably have been applied to all former M1922 pattern rifles except those sold to individuals by the Directorate of Civilian Marksmanship.

Notes

Make

- "U.S." is normally marked on the left side of the receiver/frame.
- this model was adopted as the US Rifle M40 and was in service with the United States Marine Corps as their precision/sniper rifle.

Model

- "M40" is not marked on the receiver/frame.
- "Remington" and "MODEL 700" or "MODEL 40-X" is usually marked on the left side of the receiver/frame.
- this is a Remington model 700 rifle in a military configuration adopted by the United States Marine Corps in 1966 as the "Rifle, Sniper 7.62mm, M40".
- features include: heavy profile steel barrel; Remington model 700 receiver/frame; internal box magazine; bolt release lever inside the trigger guard; receiver/frame drilled and tapped for scope mounts; no open sights; walnut stock with rubber recoil pad.
- this model will normally be found equipped with a Redfield 3 to 9X power telescopic sight.
- NOTE: starting in mid-1976 the "Rifle, Sniper 7.62mm, M40" was rebuilt/modified to the M40A1 configuration .This included a stainless steel barrel and fibreglass stock. This configuration was known as the "Rifle, Sniper 7.62mm, M40A1".

Manufacturer

- the original components are/were supplied by Remington, as these rifles may have undergone routine maintenance and/or rebuilding there may be variations in finish and accessories on individual rifles.

Action

- turn-bolt design.

Serial Number

- the serial number is marked on the receiver/frame.

Shots

- the floorplate and spring/follower assembly can be opened to allow access to the internal box magazine.

Notes

Make

- "US" is marked on the receiver/frame.
- "G A Precision" is not marked on the firearm.
- this model was adopted as the US Rifle M40A1 and is in service with the United States Marine Corps as their precision/sniper rifle.

Model

- "Remington Model 700" is marked on the left side of the receiver/frame.
- this is a Remington model 700 reworked to incorporate the features of the USMC M40A1 model.
- features include: heavy profile blued barrel; Remington model 700 receiver/frame; internal box magazine; bolt release lever inside the trigger guard; receiver/frame drilled and tapped for scope mounts; no open sights; camo fiberglass stock with rubber recoil pad.
- this model will normally be found equipped with a fixed 10X power telescopic sight.

Manufacturer

- the original receiver/frame was supplied by Remington.
- G.A. Precision is a manufacturer based in North Kansas City, Missouri, U.S.A.
- G.A. Precision has been in business since 1999.
- G.A. Precision specializes in "re-manufacturing" bolt-action rifles into custom, tactical and hunting rifles.

Action

- turn-bolt design.

Serial Number

- the serial number is marked on the receiver/frame.
- one example consisted of "US" marked over six numbers on the receiver/frame.

Shots

- the floorplate and spring/follower assembly can be opened to allow access to the internal box magazine.

Notes

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840s.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".
- "Musket" is a term that originally applied to a smooth bore long gun, later the term was applied to the infantryman's shoulder controlled long gun. The musket had a long fore-end and may have been equipped with a bayonet and a front and rear sight.
- "Rifle-Musket" is a term applied when musket barrels were manufactured with rifling, they were sometimes referred to as a rifled musket.
- "Musketoon" is a term applied to a musket equipped with a short barrel and bayonet.

Model

- this is a side hammer, flintlock, muzzleloading musket.
- two barrel bands with a nose band (which encircles the barrel and forend of the stock) retained by flat band springs on the right side of the forearm.
- lock and hammer have flat contour, hammer has reinforced cock.
- triggerguard, buttplate and barrel bands are iron.
- rear sling swivel on stud in front of triggerguard, forward sling swivel on underside of mid barrel band.
- Charleville muskets were imported into the United States and Charleville type muskets were manufactured in the United States during the Revolutionary War period (1775-1783) and were standard issue to American forces during that conflict.
- U.S. manufactured Charleville type muskets issued to government forces, as opposed to state forces, are marked "U.S." or "United States" on the lockplate, barrel and or the stock. Charleville type muskets issued to state forces may be marked with the name of the state eg. "MASS", "CT", "NY".

Type

- smooth bore musket.

Action

- muzzleloading, flintlock.

- "Musketoon" is a term applied to a musket equipped with a short barrel and bayonet.

Model

- model designation is not marked on the firearm.
- manufactured between 1800 and 1815.
- total production of approximately 70,000 muskets.
- lockplate marked "US" in script over an eagle, and "HARPERS" over "FERRY" marked on the tail of the lock. The markings changed with later models with the "HARPERS FERRY" changed to a horizontal marking, under an eagle.
- the barrel near the breech is marked "P", eagle head, "V", in that order reading down from the muzzle.
- later models were also marked with the year of manufacture on the tail of the lock.
- this model was closely modeled after the French Model 1763 musket, known as the "Charleville".
- there are three sub-variants of this model and they are known as: "Type I", "Type II", and "Type III". The differences among the sub-variants are in the pan configuration, the trigger guard, and the markings on the lockplate.
- features include: iron furniture; three barrel bands, upper double strapped; one piece black walnut stock; sling swivel.

Manufacturer

- "Harpers" over "Ferry" or "Harpers Ferry" and the year of manufacture are marked on the lockplate.

Action

- muzzle loader.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel - barrel length noted from 1118 mm (44") to 1143 mm (45").

Notes

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840s.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".
- "Musket" is a term that originally applied to a smooth bore long gun, later the term was applied to the infantryman's shoulder controlled long gun. The musket had a long fore-end and may have been equipped with a bayonet and a front and rear sight.
- "Rifle-Musket" is a term applied when musket barrels were manufactured with rifling, they were sometimes referred to as a rifled musket.
- "Musketoon" is a term applied to a musket equipped with a short barrel and bayonet.
- "Musket" is a term that originally applied to a smooth bore long gun, later the term was applied to the infantryman's shoulder controlled long gun. The musket had a long fore-end and may have been equipped with a bayonet and a front and rear sight.
- "Rifle-Musket" is a term applied when musket barrels were manufactured with rifling, they were sometimes referred to as a rifled musket.
- "Musketoon" is a term applied to a muskets which is equipped with short barrels and bayonet.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- U.S. government awarded numerous contract in 1798 to produce a French Service 1763 pattern Charleville musket.
- manufactured between 1801 and 1809.
- approximately 10,000 of these muskets were produced by Whitney (a quarter of all production).
- this was one of the first attempts to make a truly "mass-produced" firearm with interchangeable parts; Eli Whitney's experience with producing other machines (notably the cotton gin), played a large part in attempting to attain uniformity of parts and dimensions.
- these "rifles" were produced in three distinct styles over the production run, but differ primarily in inspector's markings, shape and tilt of the flash-pan, shape of the cock, and shape of the lockplate; the primary markings remained the same throughout the production run.
- these muskets were all marked with a standing US eagle over "NEW HAVEN" on the sideplate between the cock and the frizzen, with "U.STATES" in an arch at the rear of the sideplate.
- walnut straight-grip stock with heel-plate, three barrel bands, sling swivels in front of trigger-guard and at second barrel band, ram-rod, and a lug for a socket bayonet at muzzle.
- after flintlocks were acknowledged to be obsolete, many of these muskets were converted to percussion ignition, by replacing the cock with a hammer, and drilling and tapping the barrel for a nipple.
- similar muskets were contracted for by various state militias; these can be distinguished by the absence of the "U.STATES" marking on the sideplate.

Manufacturer

- the Whitney name does not appear on the firearm.
- "NEW HAVEN" is marked on the lock plate.

Action

- muzzle loader.

Model

- model designation is not marked on the firearm.
- introduced in 1803.
- United States if America eagle motif and "US" are marked forward of the hammer and "HARPER" over "FERRY" over the year of manufacturer are marked behind the hammer.
- approximately 4,000 of the "Model 1803" were manufactured from 1803 to 1807.
- approximately 15,700 of the "Model 1803" were manufactured from 1814 to 1820.
- features include: part octagon/part round browned barrel, flintlock action, wood forearm and buttstock, blade front and open rear sight, rib beneath barrel, and two ramrod ferrules.
- may have brass mountings and a brass patchbox on right side of butt.

Manufacturer

- "HARPER" over "FERRY" and the date of manufacture are marked on the lock plate.

Action

- muzzle loading.

Serial Number

- rifles produced between 1803 and 1807 were serial numbered.
- rifles produced between 1814 and 1820 were not serial numbered.

Other Markings

- lockplate markings: (eagle motif)/"US", forward of hammer
  "HARPERS/FERRY/"(date), behind hammer, marked vertically
- locks are dated with the year of manufacture.
- barrel markings: "US" within oval/(eaglehead)/"P" within oval, proofmarks.

Notes

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840's.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".
- "Musket" is a term that originally applied to a smooth bore long gun, later the term was applied to the infantryman's shoulder controlled long gun. The musket had a long fore-end and may have been equipped with a bayonet and a front and rear sight.
- "Rifle-Musket" is a term applied when musket barrels were manufactured with rifling, they were sometimes referred to as a rifled musket.
- "Musketoon" is a term applied to a musket equipped with a short barrel and bayonet.

Model

- the model is not marked on the firearm
- this is an example of the US 1808 Contract Flintlock Musket (largely a copy of the in-production Springfield Armory and Harper's Ferry 1795 Flintlock Muskets), adopted by the US in 1808 and supplied by Rudolph and Charles S. Leonard, of Canton, Massachusetts, under a contract issued by the US government to meet the rising demand for military small arms during the lead-up to the War of 1812.
- known Leonard 1808 muskets are marked "R. & C. LEONARD" with a martial eagle, "CANTON", and a date of manufacture on the lockplate.
- features include: browned finish; fixed open sights; iron mountings and three barrel bands; an underbarrel ram-rod; flintlock mechanism with cock and frizzen on the right-side lockplate; sling swivels at second barrel band and front of trigger-guard; and maple straight-grip stock with an iron buttplate.
- these firearms may also be seen converted to percussion ignition.
- the Leonards are also believed to have delivered a small number of flintlock muskets of this pattern to the State of Massachusetts in 1814/15; these muskets are identical to the 1808 pattern, except in not having a US martial eagle or date of manufacture on the lockplate.

Manufacturer

- "R. & C. LEONARD" is marked on the lockplate, with a US martial eagle, "CANTON", and the year of manufacture (up to 1814).

Action

- muzzle-loaded flintlock ignition.

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840s.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".
- "Musket" is a term that originally applied to a smooth bore long gun, later the term was applied to the infantryman's shoulder controlled long gun. The musket had a long fore-end and may have been equipped with a bayonet and a front and rear sight.
- "Rifle-Musket" is a term applied when musket barrels were manufactured with rifling, they were sometimes referred to as a rifled musket.
- "Musketoon" is a term applied to a musket equipped with a short barrel and bayonet.

Model

- model designation is not marked on the firearm.
- 1816 Musket were produced by the U.S. arsenals at Harpers Ferry and Springfield and under contract by numerous manufacturers.
- 1816 Musket was manufactured circa 1837 with the Type III features.
- 1816 Musket is based on the design of the 1763 and 1777 French Service Musket.
- features include: round barrel with three barrel bands; polished bright or brown finish; colour case-hardened, flat, bevelled, lock plate; fixed iron or detachable brass flash pan without fence; walnut stock with or without a low comb.
- originally introduced with an integral iron flash pan and later as the "Type I" (1819-1822) that featured a detachable brass flash pan, an integral trigger guard bow and trigger plate; the "Type II" (1822-1831) that featured a trigger guard bow riveted to the trigger plate and an overall "browned" finish; and the "Type III" (1831-1844) that featured a ball shaped bolster attached to the trigger guard bow, smaller lock markings and a bright finish.
- most of these 1816 muskets were converted to a percussion ignition system circa 1845 that involved the removal of the pan and frizzen, the installation of a nipple, and replacement of the cock with a hammer.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "J.BAKER" under "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked in script or block letter format on the lock plate.
- "PHILA" over "1837" is marked vertically behind the cock.
- James Baker was the administrator of the Marine T. Wickham Armory in the early 1830's and assumed control of the company after the death of Mr. Wickham.

Action

- muzzle loader.

Notes

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840s.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".
- "Musket" is a term that originally applied to a smooth bore long gun, later the term was applied to the infantryman's shoulder controlled long gun. The musket had a long fore-end and may have been equipped with a bayonet and a front and rear sight.
- "Rifle-Musket" is a term applied when musket barrels were manufactured with rifling, they were sometimes referred to as a rifled musket.
- "Musketoon" is a term applied to a musket equipped with a short barrel and bayonet.

Model

- model designation is not marked on the firearm.
- 1816 Musket were produced by the U.S. arsenals at Harpers Ferry and Springfield and under contract by numerous manufacturers.
- 15,000 units manufactured from 1826 to 1830 with the Type II features.
- 1816 Musket is based on the design of the 1763 and 1777 French Service Musket.
- features include: round barrel with three barrel bands; polished bright or brown finish; colour case-hardened, flat, bevelled, lock plate; fixed iron or detachable brass flash pan without fence; walnut stock with or without a low comb.
- originally introduced with an integral iron flash pan and later as the "Type I" (1819-1822) that featured a detachable brass flash pan, an integral trigger guard bow and trigger plate; the "Type II" (1822-1831) that featured a trigger guard bow riveted to the trigger plate and an overall "browned" finish; and the "Type III" (1831-1844) that featured a ball shaped bolster attached to the trigger guard bow, smaller lock markings and a bright finish.
- most of these 1816 muskets were converted to a percussion ignition system circa 1845 that involved the removal of the pan and frizzen, the installation of a nipple, and replacement of the cock with a hammer.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "P.& E.W.BLAKE" under a star and "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked in script or block letter format on the lock plate.
- "NEW HAVEN" over "1826" (and dates inclusive to "1830") is marked vertically behind the cock.
- Philos & Eli Whitney Blake were located in New Haven, Connecticut from 1825 to 1842.
- Philos & Eli Whitney Blake were nephews of Eli Whitney and continued the manufacturing of firearms after his death and until Eli Whitney Jr. came of age to continue his father's business.

Action

- muzzle loader.

Notes

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840s.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".
- "Musket" is a term that originally applied to a smooth bore long gun, later the term was applied to the infantryman's shoulder controlled long gun. The musket had a long fore-end and may have been equipped with a bayonet and a front and rear sight.
- "Rifle-Musket" is a term applied when musket barrels were manufactured with rifling, they were sometimes referred to as a rifled musket.
- "Musketoon" is a term applied to a musket equipped with a short barrel and bayonet.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- model designation is not marked on the firearm.
- 1816 Musket were produced by the U.S. arsenals at Harpers Ferry and Springfield and under contract by numerous manufacturers.
- a few hundred were manufactured in "Type1" configuration.
- 1816 Musket is based on the design of the 1763 and 1777 French Service Musket.
- features include: round barrel with three barrel bands; polished bright or brown finish; colour case-hardened, flat, bevelled, lock plate; fixed iron or detachable brass flash pan without fence; walnut stock with or without a low comb.
- originally introduced with an integral iron flash pan and later as the "Type I" (1819-1822) that featured a detachable brass flash pan, an integral trigger guard bow and trigger plate; the "Type II" (1822-1831) that featured a trigger guard bow riveted to the trigger plate and an overall "browned" finish; and the "Type III" (1831-1844) that featured a ball shaped bolster attached to the trigger guard bow, smaller lock markings and a bright finish.
- most of these 1816 muskets were converted to a percussion ignition system circa 1845 that involved the removal of the pan and frizzen, the installation of a nipple, and replacement of the cock with a hammer.

Manufacturer

- "E.BUELL" under "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked in script or block letter format on the lock plate.
- "E.BUELL" may be marked vertically behind the cock and "MARLBOROUGH" may be marked below an eagle motif.
- Elisha Buell was located in Hebron, Connecticut from 1776 to 1797 and in Marlborough, Connecticut from 1797 to 1830.

Action

- muzzle loading.

Notes

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840s.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".
- "Musket" is a term that originally applied to a smooth bore long gun, later the term was applied to the infantryman's shoulder controlled long gun. The musket had a long fore-end and may have been equipped with a bayonet and a front and rear sight.
- "Rifle-Musket" is a term applied when musket barrels were manufactured with rifling, they were sometimes referred to as a rifled musket.
- "Musketoon" is a term applied to a musket equipped with a short barrel and bayonet.

Model

- model designation is not marked on the firearm.
- 1816 Musket were produced by the U.S. arsenals at Harpers Ferry and Springfield and under contract by numerous manufacturer's.
- 600 units were manufactured by Robert & John D. Johnson from circa 1829 to 1835 with the Type III features.
- 1816 Musket is based on the design of the 1763 and 1777 French Service Musket.
- features include: round barrel with three barrel bands; polished bright or brown finish; colour case-hardened, flat, beveled, lock plate; fixed iron or detachable brass flash pan without fence; walnut stock with or without a low comb.
- originally introduced with an integral iron flash pan and later as the "Type I" (1819-1822) that featured a detachable brass flash pan, an integral trigger guard bow and trigger plate; the "Type II" (1822-1831) that featured a trigger guard bow riveted to the trigger plate and an overall "browned" finish; and the "Type III" (1831-1844) that featured a ball shaped bolster attached to the trigger guard bow, smaller lock markings and a bright finish.
- most of these 1816 muskets were converted to a percussion ignition system circa 1845 that involved the removal of the pan and frizzen, the installation of a nipple, and replacement of the cock with a hammer.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "JOHNSON" or "R. & J. D. JOHNSON" under "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked in script or block letter format on the lock plate.
- "MIDDN CONN." under the date is marked vertically behind the cock.
- Robert Johnson was located in Middletown, Connecticut from 1812 to 1855.

Action

- muzzle loader.

Notes

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840s.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".
- "Musket" is a term that originally applied to a smooth bore long gun, later the term was applied to the infantryman's shoulder controlled long gun. The musket had a long fore-end and may have been equipped with a bayonet and a front and rear sight.
- "Rifle-Musket" is a term applied when musket barrels were manufactured with rifling, they were sometimes referred to as a rifled musket.
- "Musketoon" is a term applied to a musket equipped with a short barrel and bayonet.

Model

- model designation is not marked on the firearm.
- any date from 1816 to 1840 may be marked on the lock plate.
- manufactured between 1816 and 1840.
- total production of approximately 325,000 muskets.
- 1816 Musket is based on the design of the 1763 and 1777 French Service Musket.
- features include: round barrel with three barrel bands; polished bright or brown finish; colour case-hardened, flat, bevelled, lock plate; fixed iron or detachable brass flash pan without fence; walnut stock with or without a low comb.
- originally introduced with an integral iron flash pan and later as the "Type I" (1819-1822) that featured a detachable brass flash pan, an integral trigger guard bow and trigger plate; the "Type II" (1822-1831) that featured a trigger guard bow riveted to the trigger plate and an overall "browned" finish; and the "Type III" (1831-1844) that featured a ball shaped bolster attached to the trigger guard bow, smaller lock markings and a bright finish.
- most of these 1816 muskets were converted to a percussion ignition system circa 1845 that involved the removal of the pan and frizzen, the installation of a nipple and replacement of the cock with a hammer.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "SPRINGFIELD" over the date is marked on the tail of the right lock plate. - this model was also made under contract by numerous manufacturer's.
Action	- muzzle loader.
Other Markings	- marked "SPRING" over "FIELD" over the date ie: 1816, 1817 etc. on the tail of the right side lock and "US" or "U.S." under an eagle motif in the middle of right side lock.

Notes

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840s.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".
- "Musket" is a term that originally applied to a smooth bore long gun, later the term was applied to the infantryman's shoulder controlled long gun. The musket had a long fore-end and may have been equipped with a bayonet and a front and rear sight.
- "Rifle-Musket" is a term applied when musket barrels were manufactured with rifling, they were sometimes referred to as a rifled musket.
- "Musketoon" is a term applied to a musket equipped with a short barrel and bayonet.

Model

- model designation is not marked on the firearm.
- 1816 Musket were produced by the U.S. arsenals at Harpers Ferry and Springfield and under contract by numerous manufacturers.
- 16,600 units were manufactured circa 1822 to 1837.
- 1816 Musket is based on the design of the 1763 and 1777 French Service Musket.
- features include: round barrel with three barrel bands; polished bright or brown finish; colour case-hardened, flat, bevelled, lock plate; fixed iron or detachable brass flash pan without fence; walnut stock with or without a low comb.
- originally introduced with an integral iron flash pan and later as the "Type I" (1819-1822) that featured a detachable brass flash pan, an integral trigger guard bow and trigger plate; the "Type II" (1822-1831) that featured a trigger guard bow riveted to the trigger plate and an overall "browned" finish; and the "Type III" (1831-1844) that featured a ball shaped bolster attached to the trigger guard bow, smaller lock markings and a bright finish.
- most of these 1816 muskets were converted to a percussion ignition system circa 1845 that involved the removal of the pan and frizzen, the installation of a nipple, and replacement of the cock with a hammer.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "M.T.WICKHAM" under "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked in script or block letter format on the lock plate.
- "PHILA" over the date may be marked vertically behind the cock.
- Marine T. Wickham was born in 1781 and died in 1833.
- Marine T. Wickham was located Emmitsburg, Maryland from 1802 to 1804 and in Philadelphia, Pennsylvania from 1811 to 1832.

Action

- muzzle loading.

Notes

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840s.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".

Model

- manufactured from 1817 to 1820.
- model designation is not marked on the firearm.
- adopted by the United States in 1816.
- this is a muzzle-loading single-shot pistol.
- 1816 Pistol can be distinguished by a combination of its barrel length (9 1/16"/ 230mm), its stock style (a short stock that extends slightly past a twin barrel band with a front sight), and its overall length (~15 1/4"/387mm).
- features include: browned barrel; bird's-head stock with iron buttcap and tang; under-barrel ramrod; twin barrel band with front sight; hammer, frizzen, and flash-pan mounted on right side of a colour-case-hardened lockplate; iron fittings.
- lockplate is marked "S. NORTH" over "MIDLN CON." (later stamps changed to "MIDLTN CON."), in the middle of "US".
- 1816 Flintlock Pistols were converted to percussion ignition.

Manufacturer

- "S. NORTH" and "MIDLN CON." is marked on the firearm.
- Simeon North was located in Berlin and Middletown, Connecticut, U.S.A. between circa 1790 and circa 1840.
- Simeon North and Elisha Cheney also formed the partnership of "North & Cheney" circa 1797.

Action

- muzzle loader.

Notes

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840s.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".
- "Musket" is a term that originally applied to a smooth bore long gun, later the term was applied to the infantryman's shoulder controlled long gun. The musket had a long fore-end and may have been equipped with a bayonet and a front and rear sight.
- "Rifle-Musket" is a term applied when musket barrels were manufactured with rifling, they were sometimes referred to as a rifled musket.
- "Musketoon" is a term applied to a musket equipped with a short barrel and bayonet.

Model

- model designation does not appear on the firearm.
- this is a conversion of a 1816 flintlock smooth bore musket to percussion cap system as authorized by the U.S. military in 1842.
- full stock, barrel retained by three barrel bands with springs inlet into the right side of the forearm.
- all fittings made of iron and originally finished "in the white".
- sling swivel fitted to the front of the trigger guard and the underside of the middle barrel band.
- some of these firearms subsequently had their barrels rifled and were fitted with elevation adjustable rear sights.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- the US Armory manufacturer's name appears as "SPRINGFIELD" (in two lines) over the date of manufacture.
- other then US Armory SPRINGFIELD and US Armory HARPERS FERRY the following private firms contracted and produced US Muskets 1816:
- J. BAKER; P.&.E. W. BLAKE; E. BUELL; A. CARRUTH; B. EVANS; W.L. EVANS; R. & J.D. JOHNSON; D. NIPPES; H. OSBORNE; L. POMEROY; N. STARR; A. WATERS; E. WHITNEY; M.T. WICKHAM.
- their names may appear on the lockplates of US Muskets model 1816/42.

Notes

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840s.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".

Model

- manufactured prior to 1832.
- model designation is not marked on the firearm.
- this firearm was adopted by the United States in 1826, but most examples will have production dates of 1830 or 1831. These pistols were built to the pattern originally submitted to the Navy by Simeon North, and copy the North-made version.
- this is a muzzle-loading single-shot pistol adopted by the United States in 1826, for Navy use.
- 1826 Pistol can be distinguished by a combination of it's barrel length (8 5/8"/ 219mm), its stock style (a short stock with a mid-forearm single barrel band), fixed front and rear sights; a belt hook, and its overall length (~13 1/4"/336.5mm).
- features include: browned barrel and lockplate; brass front sight; fixed rear sight on tang; swivel ramrod mounted below barrel; bird's-head stock with iron buttcap and tang; single barrel band; cock, frizzen, and flash-pan mounted on right side; iron fittings.
- the lockplate is usually marked "W.L. EVANS" over "V. FORGE", with the date of manufacture, or "US" over "W.L. EVANS" with a date of manufacture.
- examples of this firearm may also be seen converted to percussion ignition

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- William L. Evans was the son of Owen Evans.
- Owen Evans was located in Evansburg, Pennsylvania, U.S.A. from 1790 to 1812.
- Owen Evans and Edward Evans formed a partnership known as "O & E Evans".
- "O & E Evans" was located in Evansburg, Pennsylvania, U.S.A. from 1800 to 1812.
- "O & E Evans" manufactured under military contract the 1798 and 1808 musket.
- William L. Evans was located in Valley Forge, Pennsylvania, U.S.A. from 1797 to 1851.
- William L. Evans manufactured under military contract the 1822 musket and the 1826 flintlock pistol.

Action

- muzzle loader.

Notes

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840s.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".

Model

- model designation is derived from the date-of-order by the U.S. Government and is not marked on the firearm.
- this firearm represented the last martial flintlock pistol to be ordered by the US Government before the introduction of percussion ignition within the US Ordnance system.
- the firm of Robert Johnson produced approximately 18,000 of these pistols for the US Government from 1836 to 1844.
- muzzle loading, side hammer with flintlock ignition in its original configuration, however, the majority of these pistols where arsenal converted to percussion ignition during the 1850's.
- features;
- round, smoothbore barrel finished in the white, brass blade front sight located one-half inch from the muzzle,
- oval open-type rear sight located on the tang behind the breech,
- case hardened lock with detachable brass pan,
- three quarter hardwood stock that extends to within three inches of the muzzle,
- furniture is iron finished bright,
- single barrel band is characterized by an integral "finger" that extends rearward on the left side of the stock and overlaps the side plate where it is held in place by the front screw of the sideplate,
- the rammer is attached to the underside of the barrel by a swivel lug which is located approximately three-eighths of an inch from the muzzle,
- full round buttcap with an integral tang that extends upward and laps underneath the barrel tang thereby forming the rear grip strap.
- this pistol is usually found with US proofmarks stamped on the breech end of the barrel; these marks usually include the letters "US" over the inspectors initials over the letter "P"; inspectors initials include but are not limited to, "JH", "JCB", "EB".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "R. JOHNSON" over "MIDDn CONN" over the date of manufacture is usually stamped on the lock plate. - the above markings are usually found underneath the letters "U.S." or an eagle's head insignia with the beak of the eagle facing to the right. - Robert Johnson was located in Middletown, Connecticut, U.S.A. from 1812 to 1855.
Action	- muzzle loader.
Serial Number	- it is undetermined if this model series was in fact serial numbered, however, a known example had a two digit number without prefix or suffix marked on the top of the breech end of the barrel.

FRT Report

Firearm Reference Number (FRN): 23331
Make: US Service
Model: 1836 Pistol

Summary

Make:	US Service
Model:	1836 Pistol
Manufacturer:	Waters, Asa H
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
23331 - 2	54 FLINTLOCK	1	216	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
23331 - 3	54 PERCUSSION	1	216	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840s.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".

Model

- model designation is derived from the date-of-order by the US Government and is not marked on the firearm.
- this firearm represented the last martial flintlock pistol to be ordered by the US Government before the introduction of percussion ignition within the US Ordnance system.
- the firm of Asa Waters produced approximately 20,000 of these pistols for the US Government from 1836 to 1843.
- the firm of Asa Holman Waters produced approximately 3,000 of these pistols for the US Government in 1844.
- this is a muzzle loading, side hammer with flintlock ignition in its original configuration, however, the majority of these pistols where arsenal converted to percussion ignition during the 1850's.
- features include: round, smoothbore barrel finished in the white; brass blade front sight located one-half inch from the muzzle; oval open-type rear sight located on the tang behind the breech; case hardened lock with detachable brass pan; three quarter hardwood stock that extends to within three inches of the muzzle.
- single barrel band is characterized by an integral "finger" that extends rearward on the left side of the stock and overlaps the side plate where it is held in place by the front screw of the sideplate,
- the rammer is attached to the underside of the barrel by a swivel lug which is located approximately three-eighths of an inch from the muzzle,
- full round buttcap with an integral tang that extends upward and laps underneath the barrel tang thereby forming the rear grip strap.
- this pistol is usually found with US proofmarks stamped on the breech end of the barrel; these marks usually include the letters "US" over the inspectors initials over the letter "P"; inspectors initials include but are not limited to, "JH", "JCB", "EB".

Manufacturer

- "A.H. WATERS & CO." over "MILBURY.M.S." over the date of manufacture is usually stamped on the lock plate.
- the above markings are usually found either underneath the letters "U.S." or an eagle's head insignia with the beak of the eagle facing to the right.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- muzzle loader.
Serial Number	- it is undetermined if this model was in fact serial numbered, however most U.S. military contract firearms were numbered. - serial number on referenced example is marked on the right side plate.
Other Markings	- date of manufacture may be marked on the lockplate as : 1837 ,1838, 1839, 1840, 1841, 1842, 1843, or 1844.

FRT Report

Firearm Reference Number (FRN): 53416
Make: US Service
Model: 1842 US Percussion Pistol

Summary

Make:	US Service
Model:	1842 US Percussion Pistol
Manufacturer:	Aston, Henry & Company
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
53416 - 1	54 PERCUSSION	1	216	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- on lockplate, foward of hammer " US / H. Aston & Co.," and on tail "MIDDTN/CONN/ (date)".

Model

- be careful not to be confused with the model designation, as it was common practice to stamp the date of manufacture on the lock of US martial pistols. Those made by Aston were dated from 1846 until 1850.
- Henry Aston of Middletown, Connecticut received a contract from the U.S War Departement in February 1845 for 30,000 single shot pistols and these were delivered between 1846 and 1852.
- Three thousand of these pistols were delivered to the Navy and many of them may be marked with a small anchor on the barrel near the breech.
- conventional lock, and external hammer.
- barrel band to secure the barrel to the stock.
- brass mounted, linked swivel ramrod under the barrel.

Manufacturer

- US" and "H. ASTON & CO." are marked on the lockplate, forward of hammer.
- Henry Aston arrived in America 1819-1820, and started his own business in 1845 in Middletown Conn. , where he continued to live until is death in 1864.

Action

- muzzle-loading single-shot percussion pistol.

Serial Number

- serialization unknown, but the contract from the US War Department was for 30,000 pistols, and it was common practice that the date of manufacture was marked on lock of US martial pistol. Those made by Aston were dated from 1846 to 1850.

Notes

Make

- "USAS" was observed on the side of the receiver/frame.
- "USAS" was originally designed by John Trevor & James Harless II of "Gilbert Equipment Company". Gilbert Equipment Company was not able to secure an American manufacturer for the "USAS" and approached Daewoo Precision Industries, Ltd. of Korea to evaluate and modify the prototype for CNC production. Daewoo Precision Industries, Ltd. produced approximately 35,000 shotguns under license from Gilbert Equipment Company.
- "Gilbert Equipment Company, Incorporated" was an importer and distributor of the "USAS-12".
- "USAS-12" was manufactured by Daewoo Precision Industries, Ltd. from 1987 to 1989, Ramo Manufacturing, Inc. from 1990 to 1991, and by International Ordnance Corporation from 1992 to 1995.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "USAS-12" was observed on the right side of the receiver/frame.
- introduced in 1987.
- the "USAS 12" is loosely modeled on the Daewoo assault rifle.
- features include: blue finished cylinder bore barrel; phosphate-finished aluminum-alloy upper receiver/frame with carrying handle and pistol grip housing; ambidextrous charging/cocking handle, ejection ports, and safety/selector lever; folding or fixed charging/cocking handle is located on the upper side of the forearm; detachable box magazine; synthetic forearm, pistol grip and in-line butt stock; hooded post adjustable front sight mounted on the front top of the gas system and semi-fixed rear sight mounted on the carrying handle or adjustable post front sight and aperture rear sight mounted on the carrying handle; sling swivels.
- some USAS-12's have a forward grip assembly which acts as a charging handle for less lethal firing ammunition, this is similar in appearance to a forend grip used on a pump action shotgun.
- overall length 960 mm (37 3/4"), average weight reported from 4.09 kg (9 lbs) to 5.5 kg (12.1 lbs).
- available as a semi-automatic only version or a fully-automatic version for military and law enforcement agencies.

Manufacturer

- "MADE IN KOREA BY" and "DAEWOO PRECISION IND." has been observed on the left side of the receiver/frame.

Action

- gas operated.
- selective fire.

Serial Number

- observed serial number was located on left side of receiver/frame, forward of magazine well.

Calibre

- calibre designation was observed on the right side of the receiver/frame.

Shots

- detachable box or drum magazine.

Other Markings

- "IMPORTED BY", "GILBERT EQUIP. CO." and "CHICKASAH AL" was observed marked on the right side of the receiver/frame of an observed example.
- "GILBERT EQUIPMENT CO", "NASHVILLE TN USA" was observed marked on the right side of the receiver/frame of an observed example.
- "RESTRICTED LAW ENFORCEMENT / USE" was observed marked on the right side of the receiver/frame of an observed example.

Notes

Make

- "USAS" was observed on the side of the receiver/frame.
- "USAS" was originally designed by John Trevor & James Harless II of "Gilbert Equipment Company". Gilbert Equipment Company was not able to secure an American manufacturer for the "USAS" and approached Daewoo Precision Industries, Ltd. of Korea to evaluate and modify the prototype for CNC production. Daewoo Precision Industries, Ltd. produced approximately 35,000 shotguns under license from Gilbert Equipment Company.
- "Gilbert Equipment Company, Incorporated" was an importer and distributor of the "USAS-12".
- "USAS-12" was manufactured by Daewoo Precision Industries, Ltd. from 1987 to 1989, Ramo Manufacturing, Inc. from 1990 to 1991, and by International Ordnance Corporation from 1992 to 1995.

Model

- "USAS-12" was observed on the right side of the receiver/frame.
- introduced in 1987.
- the "USAS 12" is loosely modeled on the Daewoo assault rifle.
- features include: blue finished cylinder bore barrel; phosphate-finished aluminum-alloy upper receiver/frame with carrying handle and pistol grip housing; ambidextrous charging/cocking handle, ejection ports, and safety/selector lever; folding or fixed charging/cocking handle is located on the upper side of the forearm; detachable box magazine; synthetic forearm, pistol grip and in-line butt stock; hooded post adjustable front sight mounted on the front top of the gas system and semi-fixed rear sight mounted on the carrying handle or adjustable post front sight and aperture rear sight mounted on the carrying handle; sling swivels.
- some USAS-12's have a forward grip assembly which acts as a charging handle for less lethal firing ammunition, this is similar in appearance to a forend grip used on a pump action shotgun.
- overall length 960 mm (37 3/4"), average weight reported from 4.09 kg (9 lbs) to 5.5 kg (12.1 lbs).
- available as a semi-automatic only version or a fully-automatic version for military and law enforcement agencies.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- manufacturer's name may be marked on the firearm.
- "Ramo, Incorporated" or "Ramo Manufacturing, Incorporated" was located at 412 Space Park South, Nashville, Tennessee in the 1990s.
- "Ramo Manufacturing, Inc.'s" logo consists of a bull elephant with its trunk raised.
- "Ramo Defense Systems" was located at 450 Allied Drive, Nashville, Tennessee from 1999 to 2003.
- Ramo has specialized in producing military and police firearms.

Action

- gas operated.
- selective fire.

Serial Number

- observed serial number was located on left side of receiver/frame, forward of magazine well.

Calibre

- calibre designation was observed on the right side of the receiver/frame.

Shots

- detachable box or drum magazine.

- "USELTON ARMS INC" was observed marked on the left side of the slide.

Model

- model designation may be marked on the firearm.
- this pistol is based on the Colt model 1911A1 pistol design.
- features include: solid top slide with ejection port on the right side and finger serrations located at the rear; fixed sights; skeletonized hammer and trigger; extended spur grip safety; slide release, extended thumb safety and magazine release are located on the left side of the receiver/frame; rounded trigger guard; single adjustable trigger mechanism; checkered front strap; grey finish with black grip panels or stainless steel with ivory coloured grips.
- features may vary based on customizing specification(s).
- overall length with a 89mm (3.5") barrel is 184mm (7.25"), average weight is 909g (32oz).
- similar to the Uselton model Compact Classic which features a black grey finish with rosewood grips and is chambered in 45 AUTO.

Manufacturer

- "CASPIAN ARMS" was observed marked on the right side of the receiver/frame.
- the receiver/frame is manufactured by Caspian Arms and then customized by Uselton Arms.
- Uselton Arms is located in Madison, Tennessee, USA.
- in 2006 Uselton Arms Incorporated began manufacturing their own receiver/frames.

Action

- recoil operated.

Calibre

- calibre designation may be marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Firearm Reference Number (FRN): 117561
Make: Utica
Model: Marksman

Summary

Make:	Utica
Model:	Marksman
Manufacturer:	
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
117561 - 1	22 LR	1	470	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	
117561 - 3	22 LR	1	597	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	
117561 - 2	6MM FLOBERT RF	1	460	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "UTICA MARKSMAN" and "GERMANY" are marked on the barrel.
Model	- "UTICA MARKSMAN" and "GERMANY" are marked on the barrel. - this record reflects a German or Belgian manufactured single shot rifle. - manufactured by a number of different makers, will usually display various degrees of fit, finish and quality. Usually these rifles do not display any marks of proof testing. - this is a manually cocked, bolt operated, single shot rifle with a short stock, open sights, and "safety" notch that the cocking piece can be rotated into.
Action	- turn bolt operated.
Serial Number	- one sample examined was numbered on the underside of the barrel, hidden by the stock.
Calibre	- marked on the left side.

76854 - 2	16 GA X 2 3/4"	2	711	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "Utica Fire Arms Co." is marked on both left and right lockplates.
- "Simmons" may be marked on the butt plate and "Simmons Hardware Co." may be marked on the grip cap.
- "Utica Fire Arms Co." was a trade name used by the Simmons Hardware Company of St. Louis, MO from 1875 to 1930.
- "Utica Fire Arms Co." were manufactured by the "Crescent Fire Arms Company" in the United States of America.
- "Utica Fire Arms Co." was marked on firearms imported from Europe by the Simmons Hardware Company.

Model

- the model designation is not marked on the firearm.
- "Pat'd App'd For" and/or "Pat. Nov. 25, 90 March 29, 97" may be marked on the watertable.
- features include: side by side barrels; front hinged receiver/frame with top tang mounted break open lever; side locks; side hammers; double triggers; checkered walnut forearm with latch lock and pistol grip butt stock with a hard rubber buttplate.

Manufacturer

- the manufacturer's name may not be marked on the firearm.

Action

- side-by-side configuration, break open operated.

Serial Number

- the serial number is marked on the water table of the receiver/frame, and on the mating undersides of the barrel.
- observed serial number consisted of four sequential numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- the hard rubber buttplate may be marked (in a diagonal banner): SIMMONS
- the grip-cap, if there is one, may be marked: SIMMONS HARDWARE CO. (which was located in St. Louis, Missouri, from 1875 to 1930)
- early models are marked: PAT'D APP'D FOR
- later models are marked: PAT. NOV. 25, 90 MARCH29, 97

Remarks

- this is a generic record created to encompass American manufactured side by side shotguns marked "UTICA" or "Utica Fire Arms Co.". Early American manufactured shotguns by a number of makers display various degrees of fit, finish and quality. Usually these shotguns do not display any marks of proof testing.

- "UZI PISTOL" over "MODEL 45" was observed marked on the left side of the receiver/frame.
- "45 Pistol" was a commercial version of the full size submachine gun also known as the model "45".
- manufactured from metal stampings with plastic forestock and pistol grip panels.
- may be equipped with a collapsible under-folding metal frame stock.
- grip safety.
- all windage and elevation adjustments are made by moving the front post sight.

Manufacturer

- "IMI" was observed marked on the left side of the receiver/frame.

Action

- this was originally a semi-automatic only version, that was converted to a "Full Automatic".

Serial Number

- serial number was removed on observed sample.

Calibre

- calibre designation is marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine.
Importer	- the importers name and address is marked on the right side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make	- "UZI" was introduced in 1951 and is named after its designer, Uziel Gal.
Model	- manufactured from 1980 to 1983. - marked on left rear side of receiver/frame: UZI SEMI-AUTO MODEL A 9MM PARA IMI-ISREAL - marked on right rear side of receiver/frame: ACTION ARMS LTD. PHILA. PA. - post front sight is adjustable for windage and elevation. - rear aperture sight is adjustable for 50 and 100 metres.
Manufacturer	- marked on rear left side of receiver/frame.
Type	- designed in response to American BATF standards to prevent easy conversion to selective fire capability, the commercial version of the UZI Submachine Gun is significantly altered from its full-auto predecessor.
Action	- blowback operation. - floating firing pin, striker fired.
Serial Number	- stamped on right rear side of receiver/frame. - "SA" prefix. - range for model A is SA 01001 to SA 037000. - range for model B is SA037001 to SA073544.
Calibre	- marked on the firearm. - in the case of conversion units, the bolt and barrel are usually marked with their calibre.
Shots	- detachable box magazine.
Remarks	- the Uzi carbine variants, Model A and Model B are semiautomatic Commercial Versions of the selective fire Uzi submachine gun. - the two models have characteristics that distinguish them both from each other and from selective fire variants of the UZI. - the Model A has a sling swivel located on front left of receiver/frame which is not capable of rotating a full 360 degrees while the Model B swivel is capable of 360 degree movement. - model A variants have windage and elevation adjustments incorporated only in the front sight; model B variants have elevation adjustable front sights and windage adjustable rear apertures. - both model A and B bolts have a length-wise groove cut into the right side of the bolt body that tracks along an interior block welded to the interior of the receiver/frame; this modification prevents the installation of the fixed- firing pin, full automatic bolt group. - Models A and B are marked "S' for safe and "F" for fire on their trigger groups. - internal trigger group arrangements are also present. - commercial versions operate from the closed bolt and are striker fired, while selective fire versions of the full-size Uzi Submachinegun are open bolt mechanisms using fixed firing pins and operate by blow-back, advanced primer ignition. - other than on early model A production, both commercial versions have a relieved lower cartridge seating face on the bolt face. - military barrels cannot be mounted in commercial versions: both models A and B have a barrel mounting trunnion and different barrel profiles which prevent interchange between variants.

Notes

Make

- "UZI" was introduced in 1951 and is named after its designer, Uziel Gal.

Model

- manufactured from 1980 to 1983.
- marked on left rear side of receiver/frame:
  UZI SEMI-AUTO
  MODEL B
  9MM PARA (or other calibre)
  IMI-ISREAL
- marked on right rear side of receiver/frame:
  ACTION ARMS LTD.
  PHILA. PA.

Manufacturer

- marked on rear left side of receiver/frame

Type

- designed in response to American BATF standards to prevent easy conversion to selective fire capability, the commercial version of the UZI Submachine Gun is significantly altered from its full-auto predecessor.

Action

- blowback operated.
- floating firing pin, striker fired.

Serial Number

- stamped on right rear side of receiver/frame.
- "SA" prefix.
- range for model A is SA 01001 to SA 037000.
- range for model B is SA037001 to SA073544.
- further, the following prefixes identify the calibre of the firearm;
  SA - 9MM LUGER
  45 SA - 45 AUTO
  41 SA - 41 ACTION EXPRESS

Calibre

- marked on the firearm.
- in the case of conversion units, the bolt and barrel are usually marked with their calibre.

Shots

- detachable box magazine

Notes

Make

- "UZI" trade name is marked on the left side of the slide.
- "UZI AMERICA INC" over "NORTH HAVEN CT" may be marked on the left side of the receiver/frame.
- in addition to Israel Military Industries (IMI) the "UZI" trade name was at one time used by UZI America, Inc. of North Haven, Connecticut, a subsidiary of O.F. Mossberg & Sons, Inc..

Model

- the "EAGLE" name and the profile of an eagle's head is usually marked on the left side of the slide.
- manufactured in 1997 and 1998.
- this model was available with a full size receiver/frame with a full-length slide and barrel or with a shortened slide and barrel (referred to as the Eagle "Short Slide"). A similar version was available with a compact size receiver/frame as the model Eagle Compact.
- features include: polygonal rifling; double action (DA) trigger mechanism with a decocker; detachable box magazine; fixed Tritium night sights; matte black finish.
- this firearm was previously marketed as the "Baby Eagle" by Magnum Research and the "Jericho 941" by IMI.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "ISRAEL MIL IND LTD" may be marked on the left side of the receiver/frame. - "MADE IN ISRAEL" may be marked on the right side of the receiver/frame.
Action	- recoil operated.
Serial Number	- the serial number is marked on the right side of the receiver/frame and may be repeated on the slide and barrel.
Shots	- utilizes a detachable box magazine housed in the grip.

Notes

Make

- "UZI" was introduced in 1951 and is named after its designer, Uziel Gal.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- This firearm is part of the "Mini UZI" series of firearms. - unknown model markings. - sold as part of the Uzi-America law enforcement line, this firearm was only made with a fixed synthetic butt stock. - can be fitted with any "Mini UZI", commercial version model, short barrel. - fitted with a flash hider. - selector on left side of trigger group is marked "S" for safe, "F" for fire. - front sight adjustable for elevation, rear for windage with supplied tool. - "flip" type rear aperture sight with settings for 100 and 200 metres. - cocking handle system is not ratcheted. - grip safety. - will not accept military barrels. - operates from the closed bolt position. - striker fired. - differs from other UZI models in physical dimensions. - receiver/frame is longer than MICRO or PISTOL models but shorter than A or B models.
Manufacturer	- marked on rear left side of receiver.
Action	- blowback mechanism.
Serial Number	- The serial number is marked on the rear left side of the receiver/frame.
Barrel	- after market barrels are available and commonly found with this firearm although the original configuration was with a 502mm barrel.
Calibre	- The calibre designation is marked on the rear left side of the receiver/frame.
Shots	- detachable box magazine. - accepts all UZI series magazines.
Remarks	- the Mini Uzi series is comprised of both selective fire and semiautomatic only variants. - the semi-automatic variants differ from the selective fire versions in their trigger group, barrel mounting system, and firing/operating method. - selective fire versions were produced in both open and closed bolt operation while the semi-automatic variant is striker fired and operates exclusively from a closed bolt system.

Notes

Make	- "UZI" was introduced in 1951 and is named after its designer, Uziel Gal.
Model	- "HR 4332" over "9mm/45 ACP/22" over "GROUP IND" over "LOU KY 40214" may be marked on the left side of the receiver/frame. - manufactured from metal stampings with plastic forestock and pistol grip panels. - equipped with either a removable wooden stock or collapsible under-folding metal frame stock. - selector markings on the trigger group are "A" for automatic, "R" for repetition, and "S" for safe. - firearms that were exported for military sales may be marked differently in accordance with national practices. - grip safety. - all windage and elevation adjustments made by moving the front post sight.
Manufacturer	- "GROUP IND" over "LOU KY 40214" may be marked on left side of receiver/frame. - Automatic Weaponry of Brentwood, TN was the sole distributor of full automatic and semi-automatic UZIs manufactured by Group Industries of Louisville, Kentucky, U.S.A. - manufactured under licence. - manufactured on tooling purchased form Fabrique Nationale Herstal (FN).
Action	- no longer capable of full automatic fire.
Serial Number	- serial number is marked on the receiver/frame. - observed serial number consisted of six numbers without a letter prefix or suffix.
Calibre	- "9mm/45 ACP/22" may be marked on the firearm.
Shots	- detachable box magazine.
Remarks	- constructed primarily of heavy sheet metal stampings welded to machined steel blocks for critical areas. - this is a compact firearm, designed with much of the bolt mass forward. - using a fixed firing pin and a bolt face which fully supports the cartridge rim, this firearm uses advanced primer ignition and is not striker fired. - the bolt envelops the chamber end of the barrel presenting a flat surface to view when the bolt is forward. - usually issued with a folding metal buttstock, and sometimes with a detachable wood buttstock. - the magazine fits into the pistol grip. - in addition to a manual safety, a handgrip safety requires full depression before cocking or firing is permitted. - later production models incorporate a ratcheted cocking handle/knob to prevent accidental discharge in the event the cocking handle is released unintentionally before locking to the rear, or in case the firearm is dropped. - although originally designed and produced in Israel this firearm has been built under licence in other countries.

Notes

Make

- "UZI" is not marked on the firearm.
- "UZI" as a make is in reference to the designer name, Uziel Gal and firearm profile.
- "UZI" was introduced in 1951, designed and produced in Israel.

Model

- "HR 4332" is marked on the left side of the receiver/frame.
- "HR 4332" is a variant of the designed and produced Israeli UZI sub-machine gun.
- features include: straight barrel; knurled barrel retaining nut; front and back sight protecting hears with all sight adjustment made at the front sight; top cover mounted, round cocking handle; receiver/frame made of sheet metal stamping with reinforcement ribs on both side; synthetic handguard and pistol grip panels; folding metal buttstock or detachable wood buttstock; pistol grip has a with safety selector on the left side, a grip safety at its back and the magazine latch at its base; selector markings may be marked "A", "R" and "S" for "safe" or have Hebrew marking of the same meaning; parkerized finish.

Manufacturer

- "GROUP IND" over "LOU KY 40214" may be marked on left side of receiver/frame.
- Automatic Weaponry of Brentwood, TN was the sole distributor of full automatic and semi-automatic UZIs manufactured by Group Industries of Louisville, Kentucky, U.S.A.
- manufactured under licence.
- manufactured on tooling purchased form Fabrique Nationale Herstal (FN).

Action

- blowback operated.

Serial Number

- serial number is marked on the receiver/frame.
- observed serial number consisted of six numbers without a letter prefix or suffix.

Calibre

- "9mm/45 ACP/22" may be marked on firearm.

Shots

- detachable box magazine.

Remarks

- constructed primarily of heavy sheet metal stampings welded to machined steel blocks for critical areas.
- this is a compact firearm, designed with much of the bolt mass forward.
- using a fixed firing pin and a bolt face which fully supports the cartridge rim, this firearm uses advanced primer ignition and is not striker fired.
- the bolt envelops the chamber end of the barrel presenting a flat surface to view when the bolt is forward.
- usually issued with a folding metal buttstock, and sometimes with a detachable wood buttstock.
- the magazine fits into the pistol grip.
- in addition to a manual safety, a handgrip safety requires full depression before cocking or firing is permitted.
- later production models incorporate a ratcheted cocking handle/knob to prevent accidental discharge in the event the cocking handle is released unintentionally before locking to the rear, or in case the firearm is dropped.
- although originally designed and produced in Israel this firearm has been built under licence in other countries.

Notes

Make

- "UZI" was introduced in 1951 and is named after its designer, Uziel Gal.

Model

- model is located on the left side of the receiver/frame as follows:
  MICRO UZI
  9mm PARA
  MP xxx
- operates from the closed bolt position and has a floating firing pin which is striker fired.
- features include folding metal stock, black finish, pistol grip safety, adjustable post front sight and adjustable rear aperture sight.
- fitted with sling swivels on front left protective sight ear and below stock hinge at rear of receiver/frame.
- bolt has a tungsten insert to reduce the cyclic rate of fire.
- this model is longer than the Uzi Pistol and shorter than the Mini series in receiver/frame length.
- overall length with stock folded is 267mm, overall length with stock extended is 470mm.
- trigger group marked "S" for safe, "R" for repetition/semi-automatic and "A" for automatic fire.

Manufacturer

- located on the left side of the receiver/frame.

Type

- originally designed and manufactured as a submachine gun.

Action

- blow back operated.

Serial Number

- sample serial numbers have 5 or 6 digits.
- may be prefixed with "MP"

Shots

- detachable box magazine.

Notes

Make

- "UZI" was introduced in 1951 and is named after its designer, Uziel Gal.

Model

- model is located on the left side of the receiver/frame as: "MICRO UZI".
- operates from the closed bolt position and has a floating firing pin which is striker fired.
- features include folding metal stock, black finish, pistol grip safety, adjustable post front sight and adjustable rear aperture sight.
- fitted with sling swivels on front left protective sight ear and below stock hinge at rear of receiver/frame.
- bolt has a tungsten insert to reduce the cyclic rate of fire.
- this model is longer than the Uzi Pistol and shorter than the Mini series in receiver/frame length.
- overall length with stock folded is 267mm, overall length with stock extended is 470mm.

Manufacturer

- manufacturer's name is marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- blow-back operated. - this firearm operates from the closed bolt position. - manufactured semi-automatic fire only.
Serial Number	- sample serial numbers have 5 or 6 digits. - may be prefixed with "MP"
Calibre	- calibre designation is marked on the left side of the receiver/frame as: "9mm PARA".
Shots	- detachable box magazine.

Notes

Make

- "UZI" was introduced in 1951 and is named after its designer, Uziel Gal.

Model

- marked on rear left side of receiver/frame:
  MINI UZI 9mm
  IMI
- solid wire frame buttstock folds along right side of firearm.
-barrel is ported for muzzle brake purposes.
- selector on left side of trigger group is marked "S" for safe, "R" for repitition fire (semi-automatic) and "A" for full automatic.
- front sight adjustable for elevation, rear for windage with supplied tool.
- "flip" type rear aperture sight with settings for 50 and 150 metres.
- cocking handle system is ratcheted.
- grip safety.
- differs from other UZI models in physical dimensions.
- receiver/frame is longer than MICRO or PISTOL models but shorter than A or B models.
- sling attatchment points found on front left side of receiver below protective front sight ear, and below stock opening/locking assembly at rear of firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- The manufacturer is marked on the rear left side of the receiver/frame.
Action	- no longer capable of full automatic fire.
Serial Number	- marked on rear left side of receiver/frame. - observed samples have had an "MU" prefix followed by numbers.
Calibre	- marked on rear left side of receiver/frame.
Shots	- detachable box magazine. - accepts all UZI series magazines.
Remarks	- the Mini Uzi series is comprised of both selective fire and semi-automatic only variants. - the semi-automatic variants differ from the selective fire versions in their trigger group, barrel mounting system, and firing / operating method. - selective fire versions were produced in both open and closed bolt operation while the semi-automatic variant operates exclusively from a closed bolt system. - when produced in the closed bolt variant, the Mini series does not operate on the advanced primer ignition system; instead it uses a floating firing pin which is striker fired. - when produced in the advanced primer ignition variant, a fixed firing pin is used.

Notes

Make

- "UZI" was introduced in 1951 and is named after its designer, Uziel Gal.
- "UZI MINI CARBINE" is marked on rear left side of receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- marked on rear left side of receiver/frame:
  UZI MINI CARBINE
  9mm PARA
  IMI-ISRAEL
  MCXXXXX
- the receiver/frame is also marked,"ACTION ARMS LTD. PHILA. PA."
- manufactured and imported 1987-1993.
- solid wire frame buttstock folds along right side of firearm.
- optional short barrel is ported for muzzle brake purposes.
- selector on left side of trigger group is marked "S" for safe, "F" for fire.
- front sight adjustable for elevation, rear for windage with supplied tool.
- "flip" type rear aperture sight with settings for 100 and 200 metres.
- cocking handle system is not ratcheted.
- grip safety.
- will not accept military barrels.
- operates from the closed bolt position.
- striker fired.
- differs from other UZI models in physical dimensions.
- receiver/frame is longer than MICRO or PISTOL models but shorter than A or B models.
- sling attatchment points found on fron left side of receiver below protective front sight ear, and below stock opening/locking assembly at rear of firearm.

Manufacturer

- marked on rear of the receiver/frame.

Action

- blowback mechanism.

Serial Number

- marked on rear left side of receiver/frame.
- observed samples have had an "MC" prefic followed by five numbers.

Barrel

- after market barrels are available and commonly found with this firearm although the original configuration was with a 502mm barrel.

Calibre

- marked on rear left side of receiver/frame.

Shots

- detachable box magazine.
- accepts all UZI series magazines.

Remarks

- the Mini Uzi series is comprised of both selective fire and semiautomatic only variants.
- the semi-automatic variants differ from the selective fire versions in their trigger group, barrel mounting system, and firing/operating method.
- selective fire versions were produced in both open and closed bolt operation while the semiautomatic variant is striker fired and operates exclusively from a closed bolt system.

Notes

Make

- "UZI" was introduced in 1951 and is named after its designer, Uziel Gal.
- "UZI PISTOL" is usually marked on the rear left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- marked on the rear left side of the receiver/frame: UZI PISTOL 9MM PARA (or other calibre) - marked on right rear of receiver/frame: ACTION ARMS LTD. PHILA. PA. IMI-ISRAEL - grip safety. -marked "S" for safe and "F" for fire on left side of trigger group. - floating firing pin, striker fired. - adjustable front and rear sights. - overall length of 240mm. - in terms of receiver/frame lengths, this model is shorter than the Micro.
Manufacturer	- "I.M.I.-ISRAEL" marked on rear right side of the receiver/frame.
Type	- this firearm was designed and intended to fire semi-automatic only.
Action	- blow-back operation.
Serial Number	- marked on the rear left or right side of the receiver/frame: usually has a "UP" prefix followed by numbers; eg; UPxxxxxx. Note: UP denotes UZI PISTOL.
Calibre	- marked on the rear left side of the receiver/frame. - kit available for conversion to 41 AE from 9MM PARA.
Shots	- detachable box magazine.
Other Markings	- name of importer marked on the right side of the sample firearm: ACTION ARMS, LTD. Phila. Pa.
Remarks	- this firearm is a miniature UZI submachine gun, capable of semi-automatic fire only. - due to its resemblance of the parent firearm, a submachine gun less the folding stock, it has been assigned to type "Commercial Version".

FRT Report

Firearm Reference Number (FRN): 135471
Make: UZI
Model: Pistol

Summary

Make:	UZI
Model:	Pistol
Manufacturer:	Walther
Level:	Manufacturer Specifications and Commercial Customization
Type:	Commercial Version
Action:	Semi-Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
135471 - 2	22 LR	10	127	Prohibited PFR, Part 1, para. 63	Manufacturer Specifications and Commercial Customization	
135471 - 1	22 LR	20	127	Prohibited PFR, Part 1, para. 63	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "UZI" is marked on the rear, left side of the receiver/frame.
- "UZI" was introduced in 1951 and is named after its designer, Uziel Gal.

Model

- introduced in 2012.
- "UZI PISTOL" is marked on the rear, left side of the receiver/frame.
- "IWI" is marked on both sides of the receiver/frame at the front.
- "IWI - ISRAEL" is marked on the rear, right side of the receiver/frame
- "LICENSED TRADEMARK OF IWI ISRAEL" over "MADE BY CARL WALTHER GERMANY" is marked on the right side of the receiver/frame.
- features include: round barrel that may have two compensator cuts close to the muzzle or fake suppressor; protected, adjustable post front and rear aperture "L" type sight; rectangular shaped, ribbed sheet metal construction receiver/frame; front of the receiver/frame may have some short Picatinny rails; cocking handle on the receiver/frame top cover; centralized, straight pistol grip with grip safety; magazine feed through the pistol grip with the catch on the bottom side; selector on top of the pistol grip marked "F" and "S" with "S" standing for "Safe"; synthetic pistol grip plates; black finish.
- overall length with a 127mm (5") barrel is 240mm (9.5"), and the average weight is 1.75 kgs (3.86 lbs).

Manufacturer

- "MADE BY CARL WALTHER GERMANY" is marked on the right side of the receiver/frame.

Action

- blow back operated.

Serial Number

- serial number is marked on the front right side of the receiver/frame.
- serial numbers observed consisted of a two letter prefix and six numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre identification is marked on the receiver/frame.
Shots	- detachable box magazine.
Other Markings	- "US IMPORTER" over "UMAREX USA" over "FORT SMITH / AR" over "IWI - ISRAEL" may be marked on the right rear of the receiver/frame.

Notes

Make

- "IWI" and "UZI PRO" are marked on the side of the grip.
- "UZI" was introduced in 1951 and is named after its designer, Uziel Gal.

Model

- "UZI PRO PISTOL" is marked on the side of the receiver/frame.
- "UZI PRO" is marked within the IWI logo on both sides of the grip.
- commercial version of the Uzi that fires from a closed bolt, with synthetic furniture, optic/accessory rails, integral polymer grip and mag well.
- features include: adjustable post front and rear aperture "L" type sight; round barrel; rectangular shaped, ribbed sheet metal construction receiver/frame with top mounted optic/accessory rail; left side cocking handle; right side ejection port; polymer pistol grip/trigger housing with integral rectangular trigger guard and front mounted accessory rail; centralized vertical pistol grip with grip safety at top rear of grip; ambidextrous magazine release between trigger guard and grip; two-position sliding safety selector on left side above grip; may have side-folding telescoping synthetic stock or arm brace.
- overall length without folding stock/brace and a 114 mm (4.50") barrel is 240 mm (9.50"), average weight is 1.6 kgs (3 2/3 lbs).

Manufacturer

- "IWI - Made in Israel" and "IWI US - Harrisburg, PA" is marked on the left rear side of the receiver/frame.
- the IWI logo is marked on both sides of the grip.

Action

- blowback operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the receiver/frame with an example consisting of a letter prefix (U) and seven numbers. - marked on the left rear side of the receiver/frame. - referenced examples include a one-letter prefix followed by seven numbers, and eight numbers without prefix.
Calibre	- "9mm" is marked on the receiver/frame. - rifling characteristics: 1 turn in 10 inches, right hand twist.
Shots	- detachable box magazine.

Notes

Make

- "UZI" was introduced in 1951 and is named after its designer, Uziel Gal.

Model

- manufactured from metal stampings with plastic forestock and pistol grip panels.
- equipped with either a removable wooden stock or collapsible under-folding metal frame stock.
- selector markings on the trigger group are "A" for automatic, "R" for repitition, and "S" for safe.
- grip safety.
- all windage and elevation adjustments made by moving the front post sight.

Manufacturer

- The manufacturer may be marked on the left side of the receiver/frame.

Type

- originally designed and manufactured as a submachine gun.

Action

- no longer capable of full automatic fire.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- usually on left side, near the rear. - numbering sequences, the use of prefixes or suffixes, etc, may differ significantly.
Shots	- detachable box magazine.
Other Markings	- observed with different markings: in Hebrew; or with normal Roman alphabet and Arabic numbers; and with several different logos, or no logos at all. Most of the markings are on the left side of the receiver to the rear: the lower receiver may be numbered to match the S/N on the upper receiver, usually on the left side.
Remarks	- constructed primarily of heavy sheet metal stampings welded to machined steel blocks for critical areas. - this is a compact firearm, designed with much of the bolt mass forward. - using a fixed firing pin and a bolt face which fully supports the cartridge rim, the operating principle is advanced primer ignition, blow-back. - the bolt envelops the chamber end of the barrel presenting a flat surface to view when the bolt is forward. - usually issued with a folding metal buttstock, and sometimes with a detachable wood buttstock. - the magazine fits into the pistol grip. - in addition to a manual safety, a handgrip safety requires full depression before cocking or firing is permitted. - although originally designed and produced in Israel this firearm has been built under licence in other countries.

- manufactured from metal stampings with plastic forestock and pistol grip panels.
- equipped with either a removable wooden stock or collapsible under-folding metal frame stock.
- selector markings on the trigger group are "A" for automatic, "R" for repetition, and "S" for safe.
- firearms that were exported for military sales may be marked differently in accordance with national practices.
- grip safety.
- all windage and elevation adjustments made by moving the front post sight.

Manufacturer

- the name of the manufacturer may or may not appear on the firearm: some units have been observed with only a logo, or markings in Hebrew.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Type	- originally designed and manufactured as a submachine gun.
Action	- advanced primer ignition, blow-back.
Serial Number	- serial number is usually marked on left rear side of the receiver/frame. - numbering sequences, the use of prefixes or suffixes, etc, may differ significantly in accordance with national practices on units that have been exported.
Shots	- detachable box magazine.
Other Markings	- Observed with different markings: in Hebrew; or with normal Roman alphabet and Arabic numbers; and with several different logos, or no logos at all. Most of the markings are on the left side of the receiver to the rear: the lower receiver may be numbered to match the S/N on the upper receiver, usually on the left side.
Remarks	- constructed primarily of heavy sheet metal stampings welded to machined steel blocks for critical areas. - this is a compact firearm, designed with much of the bolt mass forward. - using a fixed firing pin and a bolt face which fully supports the cartridge rim, this firearm uses advanced primer ignition and is not striker fired. - the bolt envelops the chamber end of the barrel presenting a flat surface to view when the bolt is forward. - usually issued with a folding metal buttstock, and sometimes with a detachable wood buttstock. - the magazine fits into the pistol grip. - in addition to a manual safety, a handgrip safety requires full depression before cocking or firing is permitted. - later production models incorporate a ratcheted cocking handle/knob to prevent accidental discharge in the event the cocking handle is released unintentionally before locking to the rear, or in case the firearm is dropped. - although originally designed and produced in Israel this firearm has been built under licence in other countries.

FRT Report

Firearm Reference Number (FRN): 147846
Make: UZI
Model: Uzi Mini

Summary

Make:	UZI
Model:	Uzi Mini
Manufacturer:	Umarex
Level:	Manufacturer Specifications and Commercial Customization
Type:	Other
Action:	Air,Spring or Gas
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
147846 - 1	BB	28	127	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MINI UZI" over "IWI" is marked on the left side of the air gun.

Model

- introduced in 2014.
- "MINI UZI" over "IWI" is marked on the left side of the air gun.
- this air gun was made to resemble the UZI model Mini submachine gun, originally manufacture by Israel Weapon Industries (IWI).
- this CO2 powered BB gun functions like a traditional blowback semi-automatic.
- features include: fixed blade front sight and a fixed flip-up rear sight with two apertures; round, smooth bore barrel is threaded for a detachable fake sound suppressor/silencer; synthetic ribbed forearm; cocking handle/lever is mounted on the top of the BB gun; double action only (DAO) trigger mechanism; vertical, ribbed pistol grip with a grip safety; manual safety/selector is mounted on the left side of the grip assembly; magazine/CO2 cylinder release is mounted on the left side at the bottom of the grip assembly; right side folding wire frame buttstock; black finish

Type

- this airgun resembles an Uzi model Mini submachine gun.

Action

- CO2 powered.
- does not discharge a projectile at a muzzle velocity exceeding 152.4 mps or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- serial number observed consisted of two numbers, a letter and four or five numbers.

Calibre

- calibre is marked on the right side of the firearm.

Shots

- removable magazine/CO2 cylinder holder.

Canadian Law Comments

- This firearm is normally Non-Restricted unless affected by the following conditions:

1) by combining a barrel from a licensed firearms manufacture that is less than 406mm (16.0") in length and a receiver/frame fitted with a pistol grip only, this firearm may be deemed a "handgun" and therefore "RESTRICTED" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (a) of the Criminal Code of Canada.
"Handgun" means a firearm that is designed, altered or intended to be aimed and fired by the action of one hand, whether or not it has been redesigned or subsequently altered to be aimed and fired by the action of both hands.

2) "a firearm that is designed or adapted to be fired when reduced to a length of less than 660 mm by folding, telescoping or otherwise" and therefore "Restricted" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (c) of the Criminal Code of Canada.

3) by combining a barrel that has been altered to less than 457mm (18.0") in length by a non-licensed firearms manufacturer (cottage industry, individual or gunsmith) regardless of whether the shotgun has a pistol grip or conventional stock, this firearm is "PROHIBITED" and subject to the definition of a "prohibited firearm" in Part III/Firearms and Other Weapons of Section 84 of the Criminal Code of Canada.
"Prohibited firearm" means a firearm that is adapted from a rifle or shotgun, whether by sawing, cutting or any other alteration, and that, as so adapted,
(i) is less than 660 mm in length, or
(ii) is 660mm or greater in length and has a barrel less than 457 mm in length.

Notes

Make

- "Uzkon" is marked on the firearm.

Model

- This is an AR style shotgun.
- "BR 99" is marked on the firearm.
- "BR 99" for record keeping in the U.S.A. is associated with the upper assembly; in Canada the lower assembly is considered the receiver/frame.
- features include: free floating round barrel having a removable choke tube; synthetic handguard with full length rail; aluminum alloy, accessory rail, flat top upper assembly; may have a detachable carrying handle with adjustable rear sight, folding sights or optical sight; right hand cocking handle and ejector port; gas piston and return spring located/mounted on the support tube located below the barrel; synthetic lower receiver with an integral/fixed or telescoping buttstock and pistol grip; black, camouflage, nickel or red finish on the upper receiver, and black or camouflage finishes on the furniture.

Action

- gas-operated.

Serial Number

- serial-numbered on the lower receiver and the barrel assembly.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.
- 5 and 10 round magazines available.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "Uzkon" is marked on the firearm.
Model	- the model is not marked on the firearm; this is a descriptor of the firearm type. - this is a standard-pattern pump-action shotgun produced in a range of capacities, finishes, barrel lengths and configurations. - features may include: anodized blue/black or matte nickel or camouflaged finishes; bead or rifle sights (may include carry handle or Picatinny rail sight mounts); round or ventilated rib barrels; walnut or synthetic furniture; pistol-grip-only or fixed, telescoping, or semi-pistol-grip or vertical pistol-grip stock; and sling swivels. - overall length with a 330mm (13") barrel with a pistol grip or folding stock is 622mm (24.5").
Serial Number	- serial-numbered on the receiver/frame.
Shots	- underbarrel tubular magazine. - factory +3 extension available.
Canadian Law Comments	- this firearm is normally Non-Restricted unless affected by the following conditions: 1) by combining a barrel from a licensed firearms manufacture that is less than 406mm (16.0") in length and a receiver/frame fitted with a pistol grip only, this firearm may be deemed a "handgun" and therefore "RESTRICTED" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (a) of the Criminal Code of Canada. - "handgun" means a firearm that is designed, altered or intended to be aimed and fired by the action of one hand, whether or not it has been redesigned or subsequently altered to be aimed and fired by the action of both hands. 2) "a firearm that is designed or adapted to be fired when reduced to a length of less than 660 mm by folding, telescoping or otherwise" and therefore "Restricted" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (c) of the Criminal Code of Canada. 3) by combining a barrel that has been altered to less than 457mm (18.0") in length by a non-licensed firearms manufacturer (cottage industry, individual or gunsmith) regardless of whether the shotgun has a pistol grip or conventional stock, this firearm is "PROHIBITED" and subject to the definition of a "prohibited firearm" in Part III/Firearms and Other Weapons of Section 84 of the Criminal Code of Canada. - "prohibited firearm" means a firearm that is adapted from a rifle or shotgun, whether by sawing, cutting or any other alteration, and that, as so adapted, (i) is less than 660 mm in length, or (ii) is 660mm or greater in length and has a barrel less than 457 mm in length.

44723 - 2	7.62MM NATO	N/A	610	Prohibited PFR, Part 1, para. 105(n)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "VALKYRIE ARMS LTD" and "OLYMPIA, WA, USA" are usually marked under the cocking handle slot on the right side of the receiver/frame.

Model

- "BROWNING M1919A4" is not marked on the receiver/frame.
- "BROWNING MOD. 1991", "SEMI - AUTO 7.62 NATO" and "S.N. XXXXX" may be marked on the right side of the receiver/frame.
- "BROWNING M1919A4" is a re-creation of the United States Service, .30 calibre, Browning Machine Gun, M1919A4.
- the Browning Machine Gun was named after the inventor, John M. Browning.
- "BROWNING M1919A4" is capable of semi-automatic fire only.
- the Browning Machine Gun M1919 could be configured into sub-models for different roles. A partial list of the possible configurations follows:

a) Browning Machine Gun M1919A4:
- M1919A4 is an air-cooled firearm which may be found in flexible configuration for infantry use and is normally fired from a tripod, or mounted on an armoured fighting vehicle.
- M1919A4 version feeds belts of ammunition from the left side.

b) Browning Machine Gun M1919A5:
- M1919A5 is an air-cooled firearm designed for fixed configuration and use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- M1919A5 version feeds belts of ammunition from the left side.

c) Browning Machine Gun M1919A6:
- M1919A6 is an air-cooled firearm which may be configured for infantry use with a carrying handle, bipod and shoulder stock.
- M1919A6 version feeds belts of ammunition from the left side.

Manufacturer

- "VALKYRIE ARMS LTD" and "OLYMPIA, WA, USA" is usually marked on the firearm.
- Valkyrie Arms produces semi-automatic versions of "classic" military firearms for the collector/re-enactor market.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Type	- designed and manufactured in semi-automatic fire configuration.
Action	- "short" recoil operated.
Serial Number	- serial number rationalization unknown. - the serial number is located on the right rear of the receiver/frame. - observed specimen serial number consisted of the initials "S. N." which is believed not to be a component of the serial number and five digits without prefix or suffix.
Shots	- belt fed firearm.
Canadian Law Comments	- Browning Machine Gun receivers: - The five sided box consisting of top and bottom plates, left and right side plates and the front trunnion block is the receiver/frame for all purposes of the Criminal Code, Section 2 definition of "firearm". - For regulatory purposes, when the five sided box receiver/frame is further disassembled, the receiver/frame component plate where the manufacturer information and serial number are found, is used to establish the description for the purpose of firearms registration. - The classification of this firearm as a semi-automatic firearm is based on the presumption that none of the original five (5) receiver components were reused. This is what was understood to be the meaning of the claim by the manufacturer that the firearm is a "newly manufactured semi-automatic firearm".
Remarks	- this firearm is a re-creation of the United States Service, 30 calibre, Browning Machine Gun, M1919A4, in semi-automatic fire configuration. - the receiver has been designed and manufactured to prevent the use of full-auto parts. - the manufacturer uses surplus US parts to build the receivers/frames into complete firearms.

122278 - 1	50 BMG	N/A	1143	Prohibited PFR, Part 1, para. 106(g)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "VALKRIE ARMS LTD" and "OLYMPIA, WA, USA" is usually marked on the firearm.
Model	- this firearm is a re-creation of the United States Service, Browning Machine Gun, Calibre 50, M2 HB, capable of semi-automatic fire only. - the model designation, manufacturer's name and the serial number are located on the right-hand receiver/frame side plate, under the feed-way.
Manufacturer	- "VALKRIE ARMS LTD" and "OLYMPIA, WA, USA" is usually marked on the firearm.
Action	- "short" recoil operated. - manufactured to fire semi-automatic only. - the right-hand side-plate has a shoulder not found on full automatic versions, see images. - this side plate was manufactured with the shoulder to prevent full automatic parts from being installed.
Serial Number	- numbered on the right sideplate.
Shots	- belt-fed firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- Browning Machine Gun receivers:

- The five sided box consisting of top and bottom plates, left and right side plates and the front trunnion block is the receiver/frame for all purposes of the Criminal Code, Section 2 definition of "firearm".
- For regulatory purposes, when the five sided box receiver/frame is further disassembled, the receiver/frame component plate where the manufacturer information and serial number are found, is used to establish the description for the purpose of firearms registration.
- The classification of this firearm as a semi-automatic firearm is based on the presumption that none of the original five (5) receiver components were reused. This is what was understood to be the meaning of the claim by the manufacturer that the firearm is a "newly manufactured semi-automatic firearm".

Remarks

- this firearm is a re-creation of the United States Service, Browning Machine Gun, Calibre 50, M2 HB, in semi automatic fire configuration.
- the receiver has been designed and manufactured to prevent the use of full-auto parts.
- the manufacturer uses surplus military parts to build the receiver/frame into complete firearms.

Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
121813 - 1	45 AUTO	7	495	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
121813 - 2	45 AUTO	7	495	Prohibited CC 84(1) "prohibited device" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "VALKRIE ARMS LTD" and "OLYMPIA, WA, USA" is usually marked on the firearm.

Model

- The model designation may not be marked on the firearm.
- This is a modern reproduction of the WW2-era "De Lisle Carbine", a specially modified and re-chambered "Lee-Enfield" rifle with an integral silencer, intended for silently removing enemy sentries; these rifles were modified to fire the subsonic .45 Auto cartridge, and fed from standard "1911A1" pistol magazines.
- "Valkyrie Arms" manufactures two versions of the De Lisle; an authentic silenced version for those customers living in jurisdictions that allow silenced firearms, and a "dummy", non-silenced version with a fake suppressor for those customers living in jurisdictions that do not allow silenced/suppressed firearm. Both of these firearms look identical from the outside, and determination of which is which must be made by determining whether or not a given specimen has suppressor "bleed" holes, to vent propellant gasses into the suppressor body.
- Features include: three-piece wooden stock (butt and two-piece forearm); open adjustable sights; large-diameter suppressor body extending from front receiver ring to muzzle; and detachable Colt 1911A1-style magazine.

Manufacturer

- "VALKRIE ARMS LTD" and "OLYMPIA, WA, USA" is usually marked on the firearm.

Action

- Turn bolt operated.

Serial Number

- Those firearms with an integral suppressor/silencer will also be numbered on the tube, as these items are required to be numbered and taxed under US law.

Barrel

- The barrel length does not include any attached device such as flash-hider or muzzle brake.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- Detachable box magazine.
- This firearm uses standard "Colt" 1911A1 Style magazines.

Canadian Law Comments

- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada.

If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

89455 - 2	45 AUTO	30	406	Prohibited PFR, Part 1, para. 189(a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "VALKRIE ARMS LTD" and "OLYMPIA, WA, USA" is usually marked on the firearm.

Model

- this is a semi-automatic only version of the US Submachine Gun M3A1 that was adopted into US military service in December 1944.
- the M3A1 model is a modified version of the "M3".
- the modifications/features include: fixed wire stock, no obvious cocking handle present, cocking of the bolt is accomplished with a finger, using the indentation on the side of the bolt, magazine release catch is protected on the left side of the receiver/frame, larger ejection port, stock plate and magazine filler added to stock, and disassembly grooves added.

Manufacturer

- "VALKRIE ARMS LTD" and "OLYMPIA, WA, USA" is usually marked on the firearm.
- Valkyrie Arms produces semi-automatic versions of "classic" military firearms for the collector/re-enactor market.

Action

- capable of semi-automatic fire only.
- blowback operated, when cocked and ready to fire the bolt remains in the forward position (commonly known as a "closed bolt"), in the original design the bolt remained in the rearward position (commonly known as firing from an "open bolt").

Barrel

- a 203mm "dummy" barrel is offered for display purposes.

Shots

- detachable box magazine.

Notes

Make

- "VALKRIE ARMS LTD" and "OLYMPIA, WA, USA" is usually marked on the firearm.

Model

- The model is marked on the firearm.
- This is a short-barreled (8"/203mm) "pistol" version of Valkyrie Arms' M3A1 carbine, made without a collapsible shoulder-stock.
- Features include: standard M3A1 submachine gun layout and operation; matte parkerized/phosphated finish; fixed open sights; a folding ejection-port cover; a hole in the bolt that acts as a grip for cocking the pistol; detachable box magazine; a rotating safety on the left side of the lower receiver, and tubular/stamped/welded construction.

Manufacturer

- "VALKRIE ARMS LTD" and "OLYMPIA, WA, USA" is usually marked on the firearm.

Action

- Blowback operated.

Serial Number

- Numbered on the receiver/frame.

Shots

- Detachable box magazine.

122265 - 2	9MM LUGER	32	419	Prohibited PFR, Part 1, para. 177(k)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "VALKRIE ARMS LTD" and "OLYMPIA, WA, USA" is usually marked on the firearm.

Model

- The model designation may not be marked on the firearm.
- This is a modern semi-automatic-ONLY reproduction of the WW2 Mk II STEN submachinegun, built by Valkyrie Arms.
- Features include: fixed open sights; "T"-style stock; tubular construction; 16 1/2" / 419mm barrel to comply with US law (also comes with an original-length dummy barrel), and magazine housing that extends to the left of the receiver tube.
- Valkyrie Arms also produces a semi-auto-ONLY version of the STEN Mk III, with a 16 1/2" / 419mm barrel permanently welded to the receiver tube (as with the original STEN Mk III)

Manufacturer

- "VALKRIE ARMS LTD" and "OLYMPIA, WA, USA" is usually marked on the firearm.

Action

- Blowback operated.

Serial Number

- Numbered on the frame/receiver.

Shots

- Detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- The tube in which the breech bolt reciprocates and the magazine housing constitute the receiver/frame for all purposes of the Criminal Code, Section 2 definition of "firearm".
- For regulatory purposes, when the two component receiver/frame is further disassembled, the receiver/frame component known as the magazine housing where the manufacturer information and serial number are found, is used to establish the description for the purpose of firearms registration.
- The classification of this firearm as a semi-automatic firearm is based on the presumption that neither of the original two (2) receiver components were reused. This is what was understood to be the meaning of the claim by the manufacturer that the firearm is a "newly manufactured semi-automatic firearm".

Notes

Make

- may be marked on the receiver/frame, and is marked on the barrel assembly.

Model

- designed in 1977, produced circa 1980-1989.
- model designation is marked on the sides of receiver/frame.
- this is a generic entry; other entries may exist which will better describe the firearm.
- features may include:
- single selective or double trigger assembly;
- top-lever opening;
- blued or satin nickel finished receiver/frame;
- receiver/frame may be engraved or inlaid;
- matte oil or glossy finish on walnut stock;
- varying buttstock configurations: high, low or medium comb, Monte Carlo cheekpiece, recoil pad;
- cut checkering;
- tang mounted safety and individul barrel cocking indicators;
- blued barrel assembly;
- ventilated rib or plain barrel-top;
- butt and barrel mounted sling swivel attachement points;
- provision for regulation of rifle barrels by the owner through an adjustable mounting system;
- fold-down rifle sights and provision for scope mounting on combination and rifle barrel sets;
- automatic ejectors on shotgun and some rifle or combination barrel sets;
- rifle barrels may be interchanged between combination barrel sets.

Manufacturer

- may be marked on the receiver/frame and/or barrel assembly.

Action

- over and under barrel configuration.
- using the common receiver/frame, all available combination, rifle and shotgun barrel sets are interchangeable.

Serial Number

- serial numbering began in 1978 with number 200021, reaching 256432 by 1984;
- full serial number rationalization is unknown;
- serial number is engraved at left bottom of the locking mechanism of the receiver/frame.

Notes

Make

- "VALMET" over "412" was observed marked on the under side of the receiver/frame.
- "VALMET MADE IN FINDLAND" was observed marked on the left side of the upper barrel on the chamber.

Model

- designed in 1977.
- manufactured from circa 1980 to 1989.
- "412" was observed marked on the right side of the receiver/frame.
- "VALMET" over "412" was observed marked on the under side of the receiver/frame.
- this is a generic entry; other entries may exist which will better describe the firearm.
- features may include: blued round, over and under barrels with or without a ventilated top rib; blued or satin nickel finished front hinged receiver/frame with top tang mounted break open lever, safety, and individual barrel cocking indicators; box lock action may be engraved or inlaid; single selective or double trigger assembly; checkered matte oil or glossy finish walnut forearm and buttstock; sling swivel attachments.
- buttstock configurations: high, low, or medium comb, Monte Carlo cheekpiece, and recoil pad.
- provision for regulation of rifle barrels by the owner through an adjustable mounting system.
- fold-down rifle sights and provision for scope mounting on combination and rifle barrel sets.
- automatic ejectors on shotgun and some rifle or combination barrel sets.
- rifle barrels may be interchanged between combination barrel sets.

Manufacturer

- "VALMET" over "412" was observed marked on the under side of the receiver/frame.
- "VALMET MADE IN FINDLAND" was observed marked on the left side of the upper barrel on the chamber.

Action

- over and under barrel configuration, hinged barrel design.
- "412" model uses a common receiver/frame, all combination, rifle and shotgun barrel sets are interchangeable.

Serial Number

- serial number is marked inside the receiver/frame on the left bottom side, and may be repeated on the barrel assembly.
- serial number rationalization is unknown.
- serial numbering began in 1978 with number 200021, reaching 256432 by 1984.

Notes

Make

- may be marked on the receiver/frame, and is marked on the barrel assembly.

Model

- designed in 1977, produced circa 1980-1989.
- model designation is marked on the side of the receiver/frame.
- this is a generic entry; other entries exist which will better describe the firearm under examination.
- features may include:
- single selective or double trigger assembly;
- top-lever opening;
- blued or satin nickel finished receiver/frame;
- receiver/frame may be engraved or inlaid;
- matte oil or glossy finish on walnut stock;
- varying buttstock configurations: high, low, or medium comb, Monte Carlo cheekpiece, recoil pad;
- cut checkering;
- tang mounted safety and individul barrel cocking indicators;
- blued barrel assembly;
- ventilated rib or plain barrel-top;
- butt and barrel mounted sling swivel attachement points;
- provision for regulation of rifle barrels by the owner through an adjustable mounting system;
- fold-down rifle sights and provision for scope mounting on combination and rifle barrel sets;
- automatic ejectors on shotgun and some rifle or combination barrel sets;
- rifle barrels may be interchanged between combination barrel sets.

Manufacturer

- may be marked on the receiver/frame and/or barrel assembly.

Action

- over and under barrel configuration.
- using a common receiver/frame, all available combination, rifle and shotgun barrel sets are interchangeable.

Serial Number

- serial number rationalization is unknown.
- serial number is engraved at left bottom of the locking mechanism of the receiver/frame.

Notes

Model

- this is a generic model for the 412KE Trap and 412KE Skeet.
- features include: interchangeable coldhammered barrels; high gloss American walnut Monte Carlo stocks and forearms; simple barrel positioning and adjustment; two piece firing pin; monobloc locking shield; may have positive and automatic extraction; top auto safety; trigger-located barrel selector and barrel indicators.
- the same as the 412K, with automatic ejectors instead of extractors.
- may have over & under shotgun or rifle accessory barrels.

Type

- this model can also accept double rifle or double shotgun barrels.

Action

- over & under pattern.

Serial Number

- serial number on floor of action (beneath chambers), or on tang.

Remarks

- This model was later re-named as the 412S, with less engraving, to appeal to the North American market, though the receiver remained the same.

Notes

Model

- this is a "convertible" firearm, which allows any one of several barrel configurations (over/under shotgun, over/under rifle, over/under combination gun) to be assembled on the same receiver
- in this configuration, this firearm is a top-latching boxlock over/under shotgun, with single selective trigger, matte nickeled receiver, early firearms were available with blued receiver, tang safety, blued barrels, option for screw-in choke tubes, and walnut pistol-grip stock and forearm.

Type

- this shotgun will also accept double rifle and combination gun barrel sets.

Action

- over/under pattern; additional barrels in rifle only, shotgun only, or combination gun chamberings are available for this receiver.

Serial Number

- on receiver and barrel monobloc.

Notes

Make

- "Valmet" below the Valmet's lion's head trademark/logo is marked on the left side of the receiver/frame.

Model

- manufactured in the 1950s.
- model designation is not marked on the firearm.
- the barrel assembly configuration determines the model.
- the Model 55 has a over and under barrel assembly with the rifle barrel on the top and a shotgun barrel mounted on the bottom.
- features include: over and under barrel configuration; front hinged receiver/frame with top tang mounted break open lever and slide safety; hammerless; single selective trigger; checkered fore end and pistol grip buttstock with cheek piece and rubber recoil pad; sling swivels; fixed front sight and adjustable rear sight.

Manufacturer

- "Valmet" is marked on the left side of the receiver/frame.
- "Made in Finland" is marked on the underside of the receiver/frame.
- "Helsinki, Suomi" is marked on the left side of the receiver/frame.

Action

- over & under barrel configuration with the rifle barrel on the top and the shotgun barrel on the bottom, break open action.

Serial Number

- serial number is marked on the receiver/frame, and repeated on the barrel assembly.
- serial number may consist of four numbers with the last three numbers repeated on various components of the firearm.

Calibre

- "16/70" and "6.5-52R" is marked on the barrel assembly.

Notes

Make

- "VALMET" may be marked on the left side of the receiver/frame and on the butt plate.

Model

- "M76" or "Semi-Automatic Rifle" may be marked on the left side of the receiver/frame.
- manufactured from 1976 to 1990.
- this a variant of the "AK-47".
- features included: round barrel with flash suppressor, semi-automatic only, gas operated, rotating bolt, detachable box magazine, hooded post front sight and tangent aperture rear sight, composite fore-end and pistol grip, folding or fixed butt stock in wood, plastic or metal.
- length with fixed or folding butt stock extended and a 420 mm barrel is 950 mm.
- length overall with butt stock folded and a 420 mm barrel is 690 mm.
- this firearm was available in many sub-variants, such as:
- M76 B or M76 Short = bull-pup stock;
- M76 F or M76 FS = folding butt stock;
- M76 P = fixed plastic butt stock;
- M76 T = fixed tubular butt stock; and
- M76 W = fixed wooden butt stock.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "VALMET" and "Made in Finland" may be marked on the left side of the receiver/frame. - "Valmet Oy" was the manufacturer of the "M76" line from 1976 to 1987, then on the 1st of January 1987, "SAKO" and "VALMET" joined businesses to become the firm of "SAKO-VALMET LTD" or "SAKO-VALMET OY" and produced the "M76" line until 1990.
Action	- this is a gas operated, semi automatic only version of the "M76" Automatic Rifle.
Serial Number	- serial number is marked on the left front side of the receiver/frame. - sample inspected used six digits without a letter prefix or suffix.
Calibre	- calibre designation is marked on the left side of the receiver/frame.
Shots	- detachable box magazine.
Canadian Law Comments	- some versions of the Valmet model M76 , known as the M76 Short, left the factory equipped with a Prohibited Device commonly known as a "bull-pup" stock (PDR, Part 4, para. 2). Even when the "Prohibited Device" is removed this model remains a Prohibited firearm by virtue of PFR, Part 1, para.64 (z.35).

Notes

Make	- make is marked on the firearm.
Model	- the model designation is marked on the firearm. - this is an updated version of the Valmet M78 (with a milled/machined receiver, rather than the stamped receiver of the original M78), introduced in 1981; this rifle is basically a semi-automatic RPK, directed towards the civilian market. - features include: wood, folding metal, or plastic stock, with pistol grip, and forearm, rubber recoil pad, folding carrying handle, hooded front sight, and adjustable rear sight with night sight blade; some versions may be seen with a folding integral bipod.
Action	- gas operated.
Serial Number	- numbered on receiver/frame.
Shots	- detachable box magazine.

Notes

Make

- "VALMET" and "Made in Finland" are usually marked on the left side of the receiver/frame.

Model

- introduced in 1982, production was limited, discontinued before 1990.
- this firearm is based on the AK-47 design and was created by placing a one-piece composite stock over the Valmet M76 (an earlier version was known as the M76 Short) rifle and a modification to the trigger group.
- this is the semi-automatic version of the selective fire model that is available for law enforcement agencies and is intended for armoured vehicle crews.
- features include: high impact composite bull-pup stock enlarged on the left side for shooter's cheek; adjustable post front sight; peep rear sight; integral open-ended three-pronged flash suppressor/bayonet lug; safety located on the right side of the firearm behind the magazine.
- overall length is 686 mm (27"), average weight is 3.52 kg (7 3/4 lbs).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "VALMET" and "Made in Finland" are usually marked on the left side of the receiver/frame.
Action	- gas operated.
Serial Number	- a serial number is marked on the firearm, rationalization unknown.
Calibre	- the calibre designation is usually marked on the left side of the firearm.
Shots	- detachable box magazine.
Importer	- imported by Odin International Ltd circa 1983, Bumble Bee Wholesale circa 1986 and Stoeger Industries circa 1988.
Canadian Law Comments	- this model left the factory equipped with a Prohibited Device commonly known as a "bull-pup" stock (PDR, Part 4, para. 2). Even when the "Prohibited Device" is removed this model remains a Prohibited firearm by virtue of PFR, Part 1, para.64 (z.39).

Notes

Make

- "VALTRO" and "Made in Italy" are marked on the right side of the receiver/frame.

Model

- model designation may or may not be marked on the firearm.
- this is a pump action shotgun with ghost ring sights; "side-saddle" carrier for extra ammunition; interchangeable chokes; all-synthetic furniture with pistol-grip and ported barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "VALTRO" and "Made in Italy" are marked on the right side of the receiver/frame. - "VALTRO" is derived from the first three letters of "Valle" and "Trompia". - Valle Trompia is a valley in northern Italy. - Valtro was established in 1988. - Valtro has been located in Stocchetta, Villa Carcina, and Collebeato in the Province of Brescia, Italy. - Valtro's trademark has been used on airguns, semi-automatic handguns, pump action and semi-automatic shotguns, and blank/signal pistols. - Valtro's trademark has been distributed in North America by Berkshire Arms Inc. and Valtro U.S.A., Inc.
Serial Number	- marked on receiver/frame.
Shots	- tubular magazine mounted under barrel.

181462 - 1	16 GA X 2 3/4"	2	739	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "Vapen-Depoten Falun" and the Vapen-Depoten Falun logo of a standing moose in a ring is marked on the firearm.
- Vapen Depoten was an outdoors and fishing/hunting retailer/distributor based in Falun, Sweden, from 1912 until the mid-1980s; they both retailed other brands, and had firearms manufactured for them under their own name.

Model

- the model is not marked on the firearm.
- this is a standard-pattern side by side, side lock, side hammer, shotgun manufactured for Vapen Depoten; an observed example was produced in Belgium, but these shotguns could easily be ordered from any of several manufacturers around the world.
- features include: blued barrels; bead sight; checkered walnut forearm and straight- or pistol-grip stock; blued, colour-case-hardened, or nickeled receiver/frame; double triggers; various levels of engraving; extractors or ejectors; top-lever; tang safety; and buttpad.

Manufacturer

- the manufacturer's name or trademark logo is marked on the firearm.

Action

- side by side configuration.

Serial Number

- serial-numbered on the receiver/frame.

Calibre

- calibre may be amrked on the barrel flats.

Notes

Make

- "Vapenringen" inside a border and "Automatic" was observed marked on the right side of the receiver/frame.
- "MADE IN JAPAN" was observed marked on the left side of the barrel.

Model

- "Automatic" was observed marked on the right side of the receiver/frame.
- this is a semi-automatic shotgun manufactured in Japan and sold under the Vapenringen name.
- features include: blued round tapered smoothbore barrel with ventilated rib and bead front sight; solid top receiver/frame with right side ejection and bottom loading port; tubular magazine; breech block release button is located on the right side of the receiver/frame; cross bolt safety located on the rear of the trigger guard; checkered walnut forearm and pistol grip buttstock.

Action

- gas-operated.

Serial Number

- serial number was observed marked on the underside of the receiver/frame in front of the loading port.
- observed serial number consisted of a letter "J" prefix, dash (-) and five numbers.

Calibre

- "12 GAUGE - FOR - 2 3/4" SHELLS" was observed marked on the barrel.

Shots

- tubular magazine mounted under the barrel.

Notes

Make

- "VARAN" is marked on the side of the slide.

Model

- "VARAN 9X19" is marked on the slide.
- this is a domestically-designed and produced South African pistol manufactured from 1985 until 1994, as a result of the United Nations' arms embargo on South Africa; this pistol combines features of the Browning High Power pistol with an external resemblance to the South African "Mamba" or a Smith & Wesson 59, with a hooked trigger-guard for a finger-forward hold. Internally, the pistol uses the single-action trigger mechanism and barrel lockup cam of the Browning High Power.
- for ease of manufacture, this pistol uses a synthetic grip-frame and box magazine, bolted to an upper frame that is machined out of steel.
- features include: parkerized/phosphated slide and upper frame; adjustable open sights; single-action trigger mechanism; hooked trigger-guard; loop hammer; synthetic checkered lower grip frame; a "winged V" grip logo"; left side operating controls; and a detachable box magazine.

Action

- recoil-operated.

Serial Number

- serial-numbered on the barrel.

Calibre

- "9X19" is marked on the slide.

Shots

- detachable box magazine.

FRT Report

Firearm Reference Number (FRN): 140997
Make: Veisey & Son
Model: Webley 1853 Longspur

Summary

Make:	Veisey & Son
Model:	Webley 1853 Longspur
Manufacturer:	Webley
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
140997 - 1	34 PERCUSSION	6	102	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "VEISEY & SON" is marked on the barrel.
- James Veisey & Son was located at 105 Moor Street, Birmingham, England in 1868.

Model

- manufactured prior to 1869 if marked "Veisey & Son".
- model name is not marked on the firearm.
- Webley 1853 Longspur is an open top receiver/frame, percussion revolver with a long flat spur hammer.
- Webley 1853 Longspur was manufactured circa 1853 to 1899.
- the 1853 Longspur Model came in three sizes: Holster size, normally five shots and a 178mm (7") barrel, Belt size, normally five shots and a 121 - 127mm (4.75 - 5") barrel, and Pocket size, six shots and a 89 -102mm (3.5 - 4") barrel.
- there may be a safety lever on the left side of the receiver/frame that when pressed foreward the hammer is held safely in either the cocked or uncocked position.
- the First model can be distinguished by the absence of a rammer and a partially enclosed hammer.
- the Second model incorporates an Adams-type rammer secured to the receiver/frame by a spring clip.
- the Third model can be determined by the compound rammer (patented by James Kerr in 1955, No. 1722) that is mounted to the barrel web and lays flat along the left side of the barrel, instead of being hinged is screwed onto the end of the cylinder axis rod and then secured by a horizontal screw entering from the front of the lug into the receiver/frame.

Manufacturer

- "JAMES WEBLEY PATENTEE", or "JAMES WEBLEY ST. MARY'S SQUARE, BIRMINGHAM", or "WEBLEY'S PATENT" may be marked on the firearm.

Action

- percussion ignition.

Serial Number

- serial number is marked on the front right side of the receiver/frame.
- known examples had three numbers without prefix or suffix.

Notes

Model

- this is a bolt-action hunting rifle based on the classic Mauser 98 action
- features include: checkered pistol-grip stock with rubber buttpad and contrasting spacer, open adjustable sights on rifles chambered in magnum calibres, sling swivels, and a hammer-forged barrel.
- also available with synthetic stock as the "All Weather" hunting rifle.
- importation began circa 2000.

Manufacturer

- normally marked on the firearm.

Serial Number

- South African law requires the barrel to be serial-numbered, not the receiver/frame.

Shots

- internal box magazine.

Canadian Law Comments

- Canadian law requires the receiver/frame to be serialized.

Notes

Make

- the make or logo thereof is marked on the firearm.
- VEKTOR is currently (1999) a subsidiary of the DENEL Corporation, an arms manufacturer based in South Africa; VEKTOR itself is based in Lyttelton, South Africa, and manufactures a wide range of small arms, grenade launchers, and light cannon.

Model

- the model is marked on the firearm.
- this is a reworked version of the German MG151/20 aircraft cannon designed by Mauser during the Second World War, produced by Vektor as a multi-purpose cannon for use from helicopter, vehicle, and ground mounts.
- features include: parkerized finish; ambidextrous feed; a thin hinged top-cover; and the sights and firing controls will vary according to the specific mount used (ie. a flexible mount on a helicopter or vehicle will generally have dual "spade"-style pistol grip controls, while remote or vehicle mounts will generally have solenoid controls).
- a conversion kit is also available to convert this cannon to a 50 BMG machine gun for lower-cost training purposes.

Manufacturer

- the manufacturer or logo thereof is marked on the firearm.
- VEKTOR is currently (1999) a subsidiary of the DENEL Corporation, an arms manufacturer based in South Africa; VEKTOR itself is based in Lyttelton, South Africa, and manufactures a wide range of small arms, grenade launchers, and light cannon.

Action

- gas assisted blowback.

Serial Number

- numbered on the receiver/frame.

Shots

- belt fed.

Notes

Make	- the Republic of South Africa Arsenals group was known as ARMSCOR of South Africa until 1994 when it became DENEL. - the Lyttleton Ingenieurswerke (LIW) which was a division of ARMSCOR became Vektor in 1994.
Model	- this is a bolt-action hunting rifle based on a thick-walled tubular receiver of VEKTOR's own design - single adjustable Timney trigger, drift-adjustable rear sight with hooded front, checkered pistol-grip stock with rubber buttpad, contrasting forearm tip, and through-bolt at the receiver lug, sling swivels, and a hammer-forged barrel. - these rifles have a spring-loaded bolt catch on the left side of the receiver, and VEKTOR's logo stamped into the left side of the receiver; "Lyttelton" is not found anywhere on the firearm. - VEKTOR is also making a single-shot version of this rifle as the "Bisley", which uses a receiver of the same design with a small loading/ejection port on the right side.
Manufacturer	- VEKTOR is currently (1999) a subsidiary of the DENEL Corporation, an arms manufacturer based in South Africa; VEKTOR itself is based in Lyttelton, South Africa, and manufactures a wide range of small arms, grenade launchers, and light cannon.
Action	- manually operated, bolt action repeating rifle.
Serial Number	- may or may not be serial-numbered; South African law requires the barrel to be serial-numbered, not the receiver.
Remarks	- VEKTOR is currently (1999) a subsidiary of the DENEL Corporation, an arms manufacturer based in South Africa; VEKTOR itself is based in Lyttelton, South Africa, and manufactures a wide range of small arms, grenade launchers, and light cannon.

Notes

Make

- "VERCAR" or "VER-CAR" may be marked on the firearm.
- VerCar is a trade name used by Verney-Carron of France.
- "MANUFACTURER D'ARMES VERNEY-CARRON", or "MANUFACTURER D'ARMES VERNEY-CARRON ST.ETIENNE Bte S.G.D.G." may be marked on the left side of the slide.
- "EIBAR" and "VerCar" may be marked on the grips.
- Verney-Carron is a French manufacturer of hunting and target-shooting rifles, shotguns, and handguns that was founded in 1820.
- these pistols were built on contract for Verney-Carron by any one of several small Spanish gunmakers or by Manufacture d'Armes des Pyrenees.

Model

- "Vercar", "VerCar" or "Ver-Car" is marked on the firearm.
- "Vercar", VerCar", or "Ver-Car" are trade marks used by Verney-Carron.
- this model was manufactured circa 1920.
- there were two versions of this "Ruby" type pocket pistol. A smaller version chambered for 25 AUTO (6.35MM) and a larger version chambered for 32 AUTO (7.65MM).
- features include: single action trigger mechanism; blued receiver/frame and slide; concealed hammer; a slot milled along the top of the slide as a sight; the magazine release is located on the butt of the grip; the safety is on the left side of the receiver/frame and may have checkered grip panels.

Action

- blowback operated.

Shots

- detachable box magazine.

Notes

Make

- the make designation, "VERNEY-CARRON" is marked on the receiver/frame and on the barrel assembly.

Model

- introduced in 1998.
- the model designation is marked as "ALTO 6" on the right side of the receiver/frame in gold letters for the classic finish and on the left side of the receiver/frame for the deluxe version.
- this is a standard-pattern gas-operated semi-automatic shotgun, made with interchangeable barrel assemblies for different uses.
- features include: lightweight alloy receiver/frame; french walnut stock with checkered pistol grip and forearm; cross-bolt safety at the rear of the trigger-guard; magazine cut-off at the right front of the receiver; ventilated rib with bead front sight or battue rib and ramp front sights, or adjustable rear sight and ramp front sight or scope mount; sling swivels; fixed or interchangeable chokes; and blued barrel with matte receiver finish.
- the receiver/frame of the Deluxe version consists of engraved nature scene including pheasants on the right side and ducks on the left side.
- a 820mm plain smooth bore barrel extension was introduced in 2004. This barrel extension (referred to as the ABR) screws in at the end of the original barrel and is also threaded for interchangeable chokes. When added to a 762mm barrel the new overall length is 2.10 meters. Primarily designed for waterfowl hunting.
- average weight is 3kg (6.6lbs) without the barrel extention.
- this firearm is also known as the model Auto 6 when imported in North America.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "VERNEY-CARRON" is marked on the receiver/frame and on the barrel assembly.
Action	- gas operated.
Serial Number	- the serial number is marked on the receiver/frame. - the serial number rationalization is unknown.
Barrel	- available with screw in choke system that extend out of the barrel by 30mm to 50mm (1 1/4" to 2"). These choke extensions should not be included in any barrel length measurement. - a 820mm smooth bore ported barrel extension is also available. This extension should not be included in any barrel measurement.
Calibre	- the calibre designation is marked on the barrel assembly.
Shots	- tubular magazine; these magazines can be fitted with a permanent block which reduces the capacity to 2 rounds (for French legal requirements).
Canadian Law Comments	- this firearm is available with a 820mm, ported, smooth bore, barrel extension. This barrel extension (referred to as the ABR: (Anti-Bruit-Recul) screws in at the end of the original barrel and is itself threaded to accept interchangeable chokes. When used on this firearm this device is capable of reducing the sound of discharge of the firearm and is consistent with the Criminal Code of Canada, "Part III/Firearms and Other Weapons", Section 84 definition of "Prohibited Device", sub paragraph (c) "a device or contrivance designed and intended to muffle or stop the sound or report of a firearm." - when the sound suppressor/silencer (prohibited device) is removed the firearm is correctly identified as a "Non Restricted Firearm".
Other Markings	- may be marked on the right hand side of the barrel on two lines as: "VERNEY-CARRON A SAINT-ETIENNE", "MADE IN FRANCE".
