Notes

Make

- "VERNEY-CARRON" followed by "SAINT-ETIENNE" over "FRANCE" is marked on the right side of the receiver/frame.

Model

- introduced in 2005.
- "IMPACT" or "IMPACT NT" or "IMPACT NT 185th Anniversary" may be marked on the firearm.
- this model is to commemorate Verney-Carron's 185th anniversary (1820 to 2005).
- 185 units in each calibre has been manufactured and numbered 1 of 185.
- the "Impact NT" model series replaces the "Impact Auto" model series by adding the S.T.A.R. (Systeme Technique Anti-Rebond) which is design to lock the recoil system in the forward position once the action has cycled.
- features include: blued round tapered barrel with a fibre optic front post sight and an adjustable battue style ramp rear sight with a fluorescent guide line; drilled and tapped blued receiver/frame with engraving; gold plated cross bolt safety which is located at the back of the trigger guard; gold plated single adjustable trigger mechanism; hinged box magazine with a gold plated magazine release located on the right side of the firearm above the magazine; gold plated breech block cover and trigger mechanism pins; checkered walnut schnabel forearm and a bavarian style semi-pistol grip buttstock with a rubber recoil pad and sling attachments.
- optional wide screen red dot front sight which attaches to the front sight base once the fiber optic sight is removed.
- overall length with a 520mm (20 1/2") barrel is 1070mm (42 1/8"), average weight is 3.15kg (6.93lbs).

Manufacturer

- "VERNEY-CARRON" followed by "SAINT-ETIENNE" over "FRANCE" is marked on the right side of the receiver/frame.

Action

- gas operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number is marked on the firearm. - do not confuse the production numbering (1 of 185) with the serial number.
Calibre	- calibre designation is marked on the barrel.
Shots	- detachable or hinged box magazine.

Model

- "IMPACT NT TRAQUEUR ONE" may be marked on the receiver/frame.
- the "Impact NT" model series replaces the "Impact Auto" model series by adding the S.T.A.R. (Systeme Technique Anti-Rebound) system designed to lock the recoil system in the forward position once the action has cycled.
- features include: blued round tapered barrel with a fibre optic front post sight and an adjustable battue style ramp rear sight with a "V" grooved guide line; drilled and tapped, old silver finish, receiver/frame with line engraving; a cross bolt safety is located at the back of the trigger guard; single adjustable trigger mechanism; hinged or detachable box magazine with the magazine release located on the right side of the firearm above the magazine; checkered walnut schnabel forearm and a Bavarian style semi-pistol grip buttstock with a rubber recoil pad and sling attachments.
- overall length with a 470mm (18.5") barrel is 1020mm (40 1/4").

Manufacturer

- "VERNEY-CARRON" followed by "SAINT-ETIENNE" over "FRANCE" is marked on the right side of the receiver/frame.

Action

- gas operated.

Serial Number

- the serial number is marked on the receiver/frame.

Shots

- detachable box or hinged floor plate magazine.

Notes

Make

- marked "VERNEY-CARRON" on the right side of the receiver/frame, below the ejection port.

Model

- this is a generic model. Other "Impact Plus" model entries exist which may better describe the firearm.
- "IMPACT PLUS" is marked in gold on the left side of the receiver/frame.
- features include: blued round tapered barrel with a fibre optic front post sight with or without sight hood and an adjustable rear sight or an adjustable battue style ramp rear sight with a fluorescent guide line; drilled and tapped receiver/frame for optic mounting; a thumb safety lever is located behind the bolt on the upper rear tang; gold coloured bolt body and trigger; cocking and loading indicator; single adjustable trigger mechanism; detachable box magazine with the magazine release located on the right side of the firearm above the magazine; checkered walnut Bavarian style one piece pistol grip stock with a schnabel forearm, a plastic butt plate or a rubber recoil pad and sling attachments.
- average weight is 3kg (6.6lbs).
- in 2004, a wide screen red dot front sight was introduced which attaches to the front sight base once the fibre optic sight is removed.
- this is an improved version of the "Impact" bolt action series which featured two locking lugs on the front of the bolt, right side mounted thumb safety and a fixed box magazine with a hinged floorplate.
- overall length with a 600mm barrel is 1140mm (44 7/8").

Manufacturer

- "VERNEY-CARRON" is marked on the right side of the receiver/frame, below the ejection port.

Action

- manual turn bolt mechanism.

Serial Number

- serial numbered may be marked on the barrel and on the receiver/frame.
- observed serial number sequences have consisted of a single number followed by two letters followed by five numbers.

Calibre

- the calibre designation is marked on the barrel.

Shots

- detachable box magazine.

Notes

Make

- known example marked "Verney-Carron" on the left side of the receiver/frame with "Saint-Etienne" marked on the right side.

Model

- no model designation is marked on this firearm.
- this is a generic entry for all over & under pattern shotguns produced by Verney-Carron that have no model name marked on them.
- features may vary widely and may include:
- box lock action, top lever opening,
- single selective trigger or double triggers,
- steel or alloy receiver/frame,
- plain round or ventilated rib on the top barrel,
- extractors or auto ejectors,
- top tang safety,
- French walnut stock and forend,
- varying degrees of hand checkering and engraving.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "Verney-Carron" may be marked on the left side of the receiver/frame. - "Saint-Etienne" may be marked on the right side of the receiver/frame.
Action	- over & under barrel configuration.
Serial Number	- known examples have a five or six digit number without prefix or suffix marked on the inside wall of the receiver/frame.
Other Markings	- known example marked: - "Acier Diamant Extra Fin" on the rear of the top barrel, - "Made in France" on the underside of the receiver/frame.

Notes

Make

- "VERNEY-CARRON" is marked on the right side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- introduced in 1989.
- this is a generic entry for the "Sagittaire" combination guns covering the 1967-1994 and the 2006 generations. The "Sagittaire NT" lineup (1994- 2005) can be found under their own models.
- in 1967 Verney-Carron introduced a full line of shotguns, rifles and combination guns named "Sagittaire".
- Around 1994-95 the Sagittaire line was redesigned with a newer slimmer profiled receiver/frame of either multi-alloy (Ergal) or steel composition, a slimmer buttstock at the wrist area and a different style of engraving. This new generation was then renamed the "Sagittaire NT" (NT means Nouvelle Technologie or New Technology). The "NT" marking remained on all the Sagittaire line up until 2005-06.
- in 2006-07 the Sagittaire line was reviewed again and the "NT" marking was dropped from all the models and sub-models. Despite the fact that the same technology was carried from the previous generation, minor modifications were adopted which can be differentiated from the original 1967 and 1994-95 variations. The 2006-07 Sagittaire line has no "NT" letters following the model name; the hinged box lock receiver/frame has shouldered axis pins with the heads visible from the outside of the receiver/frame (the axis pin heads were not visible on previous variations) and a laser engraving method is used to engrave the receiver/frame.
- features include: blued tapered round over and under barrels with or without side ribs; fixed fibre optic front sight and a two leaf rear sight mounted on a partial rib; smoothed bore upper barrel (fixed or interchangeable choke) and rifled bore lower barrel; extractor; engraved old silver finish front hinged box lock receiver/frame; the break opening lever is located on the rear upper tang; double trigger mechanism; the safety is located in the trigger guard in front of the trigger(s); checkered walnut forearm and straight English style or semi-pistol grip buttstock; black hard plastic buttplate and sling attachments.
- overall length with 600mm (23 5/8") barrels is 1040mm, average weight with a multi alloy Ergal receiver/frame is 3.2kg (7.05lbs), average weight with a steel receiver/frame is 3.4kg (7.5lbs).

Manufacturer

- "VERNEY-CARRON" is marked on the right side of the receiver/frame.

Action

- over & under barrel configuration.

Serial Number

- the serial number is marked on the firearm.

Calibre

- calibre designation is marked on the barrel assembly.

Notes

Make

- "VERNEY-CARRON" is marked on the firearm.

Model

- this entry is for the "Sagittaire Gros Gibier" Shotguns covering the 1967-1994 and the 2006 generations. The "Sagittaire NT Gros Gibier" (1994- 2005) can be found under his own model.
- in 1967 Verney-Carron introduced a full lines of shotguns, rifles and combination guns named "Sagittaire".
- Around 1994-95 the Sagittaire line was redesigned with a newer slimmer profiled receiver/frame of either multi-alloy (Ergal) or steel composition, a slimmer buttstock at the wrist area and a different style of engraving. This new generation was then renamed the "Sagittaire NT" (NT means Nouvelle Technologie or New Technology). The "NT" marking remained on all the Sagittaire lineup until 2005-06.
- in 2006-07 the Sagittaire line was reviewed again and the "NT" marking was dropped from all the models and sub-models. Despite the fact that the same technology was carried from the previous generation, minor modifications were adopted which can be differentiated from the original 1967 and 1994-95 variations. The 2006-07 Sagittaire line has no "NT" letters following the model name; the hinged box lock receiver/frame has shouldered axis pins with the heads visible from the outside of the receiver/frame (the axis pin heads were not visible on previous variations) and a laser engraving method is used to engrave the receiver/frame.
- "SAGITTAIRE" or "SAGITTAIRE GROS GIBIER" may be marked on the firearm.
- features include: blued round tapered over and under barrels without a top rib and with solid side ribs; rifled bores; base mounted fluorescent front sight and a two leaf rear sight mounted on a partial rib; extractor or automatic ejectors; old silver finish engraved front hinged box lock receiver/frame; the break opening lever is located on the rear upper tang; double trigger mechanism; the safety is located in the trigger guard in front of the triggers; checkered walnut forearm and semi-pistol grip buttstock; rubber recoil pad and sling attachments.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "VERNEY-CARRON" is marked on the firearm.
Action	- over & under barrel configuration.
Serial Number	- the serial number is marked on the firearm.
Calibre	- made for firing rifled slugs. - is marked on the barrel assembly.

Notes

Make

- "VERNEY-CARRON" is marked on the underside of the receiver/frame.

Model

- the model designation is marked on both sides of the boxlock receiver/frame as, "SAGITTAIRE NT"; "NT" means "Nouvelle Technologie" or "New Technology".
- features include: walnut butt stock and forend with checkered grip panels available cast for either left or right handed shooters; double triggers; top mounted opening lever; the safety switch is mounted within the trigger guard forward of the front trigger; coin finished receiver/frame with wildlife and scroll scenes engraved on both sides and the underside of the receiver/frame; blued barrels fitted with a battue ramp sight and a post foresight with fibre optic insert; may be fitted with either extractors or ejectors; fitted butt plate or ventilated recoil pad; sling swivel fitted to the barrel assembly and butt stock and the barrel assembly has the provision for fitting optical sight mounts.
- all barrel assemblies are interchangeable between the shotgun, combination gun and rifle versions of this model, though some fitting may be required.
- shotgun barrel assemblies are fitted with a ventilated top barrel rib while combination and double rifle barrel assemblies are fitted with a battue ramp rear sight and a front post sight with fibre optic insert.

Manufacturer

- "VERNEY-CARRON" is marked on the underside of the receiver/frame.

Action

- over and under barrel configuration.

Serial Number

- the serial number is marked on the receiver/frame.
- serial number rationalization is unknown.

Calibre

- the calibre designation is marked on the barrel assembly.

Notes

Make

- the make designation is marked on the underside of the receiver/frame as "VERNEY-CARRON."

Model

- the model designation is marked on both sides of the boxlock receiver/frame as, "SAGITTAIRE NT"; "NT" means "Nouvelle Technologie" or "New Technology".
- features include: walnut butt stock and forend with checkered grip panels available cast for either left or right handed shooters; double triggers; top mounted opening lever; the safety switch is mounted within the trigger guard forward of the front trigger; coin finished receiver/frame with wildlife and scroll scenes engraved on both sides and the underside of the receiver/frame; the receiver frame may be fitted with false sideplates when an "extra luxe" finish is requested; blued barrels fitted with a battue ramp sight and a post foresight with fibre optic insert; may be fitted with either extractors or ejectors; fitted butt plate or ventilated recoil pad; sling swivel fitted to the barrel assembly and butt stock and the barrel assembly has the provision for fitting optical sight mounts.
- all barrel assemblies are interchangeable between the shotgun, combination gun and rifle versions of this model, though some fitting may be required.
- shotgun barrel assemblies are fitted with a ventilated top barrel rib while combination and double rifle barrel assemblies are fitted with a battue ramp rear sight and a front post sight with fibre optic insert.

Manufacturer

- the manufacturer's designation is marked on the underside of the receiver/frame as "VERNEY-CARRON."
- Verney-Carron located in St-Etienne, France; French manufacturer of hunting and target-shooting rifles, shotguns, and handguns that was founded in 1820.

Action

- over and under barrel configuration.

Serial Number

- the serial number is marked on the receiver/frame.
- serial number rationalization is unknown.

Calibre

- the calibre designation is marked on the barrel assembly.

Notes

Make

- "VERNEY-CARRON" is marked on the underside of the receiver/frame and on the barrel assembly.

Model

- "SAGITTAIRE NT" is marked on both sides of the receiver/frame and "BATTUE" may be marked on the barrel assembly.
- "NT" stands for "Nouvelle Technologie" (New Technology).
- features include: blued round tapered over and under rifled barrels with solid side ribs; a fiber optic ramped front sight and an adjustable "Battue" style ramped rear sight; engraved old silver finish front hinged steel or alloy box lock receiver/frame (the upper rear tang is machined separatly); hammerless; single or double trigger mechanism; extractor or automatic ejectors; the break opening lever is located on the upper rear tang; the safety is located in the trigger guard in front of the trigger(s); checkered schnabel style forearm and semi-pistol grip buttstock with a cheekpiece; a black plastic butt plate and sling attachments.
- false side plates are available in the Extra Luxe and Extra Luxe Doree (gold) grade.
- additional shotgun or combination barrels are available.
- in 2004 a wide screen red dot front sight was introduced which attaches to the front sight base once the fiber optic sight is removed.
- average weight is 3.3kg (7.26lbs).
- similar to the model "Sagittaire NT Traqueur" which is available with a 500mm (19 5/8") barrel.

Manufacturer

- "VERNEY-CARRON" is marked on the underside of the receiver/frame and on the barrel assembly.

Action

- over and under configuration.

Serial Number

- the serial number is marked on the firearm.

Calibre

- calibre designation is marked on the barrel assembly.

Notes

Make

- "VERNEY-CARRON" is marked on the receiver/frame.

Model

- introduced in 2007, this model replaced the "Sagittaire NT Traqueur".
- this is the third generation of the Sagittaire line of firearms manufactured by Verney-Carron. In 2007 the marking "NT" was dropped from all the Sagittaire models.
- "Traqueur" may be marked on the upper barrel.
- "Express One" is marked on the right side of the receiver/frame preceded by a Sagittarius logo.
- this is a shorter version of the Express One rifle that is made especially for a heavy brush where a short and light weapon is desirable.
- features include: blued tapered round over and under barrels; fixed fibre optic front sight and an adjustable battue style rear sight; extractor; plain grey finished forged Ergal alloy front hinged box lock receiver/frame with shouldered head axis pins visible from each side of the receiver/frame; the break opening lever is located on the rear upper tang; double trigger mechanism; the safety is located in the trigger guard in front of the trigger(s); checkered walnut forearm and semi-pistol grip buttstock; rubber recoil pad and sling attachments (the front sling swivel is mounted on the right side of the barrel assembly to accommodate a special sling attachment).
- overall length with a 500mm barrel is 940mm (37"), average weight is 3kg (6.6lbs).

Manufacturer

- "VERNEY-CARRON" is marked on the receiver/frame.

Action

- over/under pattern.

Serial Number

- the serial number is marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - caliber is marked on the barrel assembly.

Other Markings - the Verney-Carron logo (a Sagittarius sign) is stamped on the right side of the receiver/frame.

Notes

Make

- "VERNEY-CARRON" or "VERNEY-CARRON USA, INC." may be marked on the firearm.

Model

- "SNAKE CHARMER II" is usually marked on the firearm.
- features include: stainless steel top break front hinged receiver/frame and plain round tapered barrel; exposed hammer; the turn bolt safety is located on the right side of the receiver/frame below the hammer; single trigger mechanism; the break opening catch is located at the front of the trigger guard; synthetic forearm and thumbhole buttstock with a four round storage compartment or plain wooden forearm and semi pistol grip buttstock.
- quick takedown for compact storage.
- overall length with a 464mm (18 1/4") barrel is 737mm (29"), average weight is 1.36kg (3lbs).

Manufacturer

- "VERNEY-CARRON" or "VERNEY-CARRON USA, INC." may be marked on the firearm.
- Verney-Carron SA and Y.B.E. Inc. established a venture in 2000 and formed Verney-Carron USA which acquired Sporting Arms Manufacturing who manufactured the "Snake Charmer II" up until 2001. Verney-Carron USA presently manufacturers the Snake Charmer II out of their facilities in Clay Center, Kansas, USA.

Action

- front hinged top break.

Serial Number

- the serial number is marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - may be marked on the barrel.

185462 - 1	410 GA X 3"	1	711	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
185462 - 2	410 GA X 3"	1	800	Prohibited CC 84(1) "prohibited device" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "Verney-Carron" is marked on the receiver/frame and/or on the barrel.
Model	"SOLO" may be marked on the receiver/frame. - features include: bead front sight; round smooth bore barrel; hinged steel receiver/frame; spur hammer; manual safety located on the upper rear tang; ejector; synthetic textured pistol grip stock and forend; synthetic recoil pad; matte black finish. - overall length with a 711mm (28") barrel is 1100mm (43.3"), average weight is 2.5kg (5.5lbs). - available with a sound suppressor/silencer.
Action	- hinged barrel design.
Serial Number	- serial number is marked on the left side of the receiver/frame.
Calibre	- calibre designation is marked on the barrel.
Canadian Law Comments	- this firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. - if the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

Notes

Make

- "VERNEY-CARRON" over "SAINT-ETIENNE" over "MADE IN FRANCE" is marked on the underside of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- introduced in 2007, this model supersedes the Super 9 MARK III.
- this is the third generation of the Super 9 line of shotguns. In 2007 the "MARK III" marking was dropped from all the Super 9 models and except for few esthetical (engraving styles) changes the model line remained unchanged.
- "SUPER 9" is marked on the underside of the receiver/frame.
- features include: blued round tapered over and under barrels with a ventilated 7mm wide (12mm on Sport models) top rib; smooth or rifled molybdenum chromed bore; bead sight(s) or fibre optic sight; fixed or interchangeable chokes; engraved old silver finish steel or alloy (Ergal) box lock receiver/frame, may have gold inlays and side plates; the safety and the break opening lever are located on the upper rear tang; automatic ejectors or manual extractors option; single five positions adjustable trigger or single selective trigger or double trigger mechanism; checkered walnut schnabel or fluted forearm and straight English style or semi-pistol grip buttstock fitted with a recoil pad or butt plate and may have sling swivel attachments.
- this model is available with a luxe and extra luxe grade of finish or from the custom shop with a prestige or prestige gold grade of finish. The extra luxe, prestige and prestige gold grades also include additional side plates.
- optional barrels sets and factory hard gun case.
- this is a generic model. Other "Super 9" model entries exist which may better describe the firearm.
- overall length with 711mm (28") barrels is 1155mm (45 1/2") average weight from 2.5kg (5.5lbs) to 3.5kg (7.8lbs).

Manufacturer

- "VERNEY-CARRON" is marked on the sides and on the underside of the receiver/frame.

Action

- over and under barrel configuration.

Serial Number

- the serial number is marked under the break opening lever.

Calibre

- caliber is marked on the barrel assembly.

Notes

Make

- "VERNEY-CARRON" is marked on the sideplates, bottom of receiver/frame, and/or barrel rib, depending on amount and quality of engraving.

Model

- manufactured in 2000 to commemorate the new millenium.
- manufactured in each model configuration such as Fulgur, Sporting, Grand Becassier, Super Leger and Plume.
- "SUPER 9 II" is marked on the underside of the receiver/frame.
- the receiver/frame also has a golden banner with the markings "MILLENIUM" followed by "AN 2000".
- features include: blued over and under round barrels with a bead or fiber optic front sight, fixed or interchangeable chokes, ventilated top rib and solid side ribs; old silver finish engraved side plates and box lock receiver/frame with a gold banner inlay; hammerless; selective or adjustable single trigger or double triggers; automatic ejectors or extractors; the safety and the break opening lever are located on the upper rear tang; checkered French walnut fluted or schnabel forearm and straight or pistol grip stock with a plastic butt plate or a rubber recoil pad and sling attachments.

Manufacturer

- "VERNEY-CARRON" is marked on the sides and on the underside of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- over and under configuration.
Serial Number	- the serial number is located under the barrels break opening lever.
Calibre	- is marked on the barrel assembly.
Other Markings	- golden banner on the sideplates with: "AN 2000", "MILLENIUM".

Notes

Make

- "VERNEY-CARRON" is marked on the left side of the receiver/frame.

Model

- introduced in 2007.
- "V12" is marked on the right side of the receiver/frame.
- this is a gas operated semi-automatic shotgun primarily designed for waterfowl hunting using steel shot ammunition.
- features include: blued round tapered chromed barrel with a ventilated (7mm wide) top rib and a bead front sight; interchangeable "Chokinox" chokes; cross bolt safety located behind the trigger; checkered oil finished pistol grip walnut stock; Ergal multi-alloy black finished receiver/frame.
- this model is available in 12 GA X 3" only.
- available with extra chokes which may lengthen the barrel by 30mm or 50mm.
- a 820mm plain smooth bore barrel extension is also available. This barrel extension (referred to as the ABR: Anti-Bruit-Recul) screws in at the end of the original barrel and is also threaded for interchangeable chokes. When added to a 762mm barrel the new overall length is 2.10 meters.
- overall length with a 711mm barrel is 1230mm (48.5"), average weight is 3.150kg (7lbs).

Manufacturer

- manufacturer name is marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- gas operated.
Barrel	- available with screw in choke system that extend out of the barrel by 30mm to 50mm (1 1/4" to 2"). These choke extensions should not be included in any barrel length measurement. - a 820mm smooth bore ported barrel extension is also available. This extension should not be included in any barrel measurement.
Calibre	- caliber is marked on the barrel.
Shots	- tubular magazine located in forearm. - available with a purpose built three shots magazine.
Canadian Law Comments	- this firearm is available with a 820mm, ported, smooth bore, barrel extension. This barrel extension referred to as the ABR (Anti-Bruit-Recul) screws in at the end of the original barrel and is itself threaded to accept interchangeable chokes. When used on this firearm this device is capable of reducing the sound of discharge of the firearm and is consistent with the Criminal Code of Canada, "Part III/Firearms and Other Weapons", Section 84 definition of "Prohibited Device", sub paragraph (c) "a device or contrivance designed and intended to muffle or stop the sound or report of a firearm." - when the sound suppressor/silencer (prohibited device) is removed the firearm is correctly identified as a "Non Restricted Firearm".
Other Markings	- may be marked "SAINT-ETIENNE" on the barrel.

Firearm Reference Number (FRN): 119854
Make: Verona
Model: SX401

Summary

Make:	Verona
Model:	SX401
Manufacturer:	Fabbrica Armi Isidoro Rizzini (FAIR)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Semi-Automatic
Country of Manufacturer:	ITALY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
119854 - 2	12 GA X 3"	4	660	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
119854 - 1	12 GA X 3"	4	711	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "VERONA" is marked on the firearm.
- "VERONA" is a trade name/trademark used on shotguns manufactured in Italy by Vincenzo Bernardelli, Fabbrica Armi Isidoro Rizzini (FAIR), Fausti, Pietta, and Antonio Zoli.
- "VERONA" shotguns were imported by B.C. Outdoors of Boulder City, Nevada, U.S.A. until 2005.
- "VERONA" shotguns have been imported by Legacy Sports International of Reno, Nevada, U.S.A. since 2009.

Model

- model marked on side of receiver as "SX 401", sometimes with additional numerals, letters, or dashes.
- this is a standard-pattern gas-operated semi-automatic shotgun, somewhat resembling the Franchi 48 series of shotguns.
- features include: checkered walnut pistol-grip stock and forearm; matte blued finish; ventilated-rib barrel; magazine cut-off button on right side of receiver/frame; cross-bolt safety at rear of trigger-guard; sling swivels at butt and magazine cap; and gold-plated trigger.
- also available with black synthetic stock and forearm as the "SX405".

Manufacturer

- manufacturer may or may not be marked on firearm.

Action

- gas-operated.

Serial Number

- numbered on right side of receiver/frame, above trigger-guard.

Shots

- tubular magazine.

FRT Report

Firearm Reference Number (FRN): 120459
Make: Vesely
Model: V42

Summary

Make:	Vesely
Model:	V42
Manufacturer:	Birmingham Small Arms (BSA)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Submachine Gun
Action:	Full Automatic
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
120459 - 1	9MM LUGER	60	254	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make may not be marked on the firearm.
- this submachine gun was designed by a Mr. Josef Vesely, a Czech small-arms designer who had originally come to England in 1938 to help in the production of the Besa machine gun; after Czechoslovakia was occupied by Nazi Germany, Mr. Vesely stayed in England and continued working in his chosen field.

Model

- this is an example of a typical first-generation submachine gun, constructed of milled and machined metal, and having a rifle-type wooden buttstock.
- features include: wooden pistol-grip stock with steel buttplate; milled and machined metal surfaces; ventilated barrel shroud; open sights; safety/selector lever on the left side of the trigger housing; and a highly unusual bottom mounted magazine that angles forward to compensate for the slight taper of the 9MM LUGER cartridge.
- this firearm uses a unique "two in one" magazine arrangement, whereby the magazine is divided into two (fore and aft) compartments; an internal follower similar to the slide lock on most semi-automatic pistols keeps the cartridges in the rear half of the magazine depressed until the forward half of the magazine is emptied, and then the magazine will begin to automatically feed from the rearward compartment.
- although this submachine gun showed a number of interesting and useful design features, at the time it was offered by Mr. Vesely, the STEN series was going into production at a much lower cost; therefore, the design was never adopted.

Manufacturer

- it is believed that Birmingham Small Arms (BSA) produced this model in small quantities in experimental or proto-type form only.

Action

- blowback operated.

Serial Number

- numbered on the receiver/frame.

Shots

- detachable box magazine.

Notes

Make

- left side of the slide is usually marked, "VESTA", "VESTA" PATENT", "MANUFACTURE OF FIRE ARMS "VESTA" PATENT", or a variation thereof.
- the name "Vesta" may also be molded into the grip plates.
- "Vesta" was a tradename used by the Spanish firm of Hijos de A. Echeverria formerly located in Eibar, Spain.

Model

- model designation is usually marked on the left side of the slide as, "VESTA " and may also be molded into the grip plates.
- the Vesta model series of handgun consisted of the following two basic design types; the "Ruby Type" pistol as was typically supplied to the French Army during the First World War (this is the larger version) and a copy of the FN-Browning model 1906 Vest Pocket-type of pistol (a smaller version with the same basic lines).
- features may include; safety lever usually located on the left side of the receiver/frame above and to the rear of the trigger although some models did have the safety lever mounted at the left rear of the receiver/frame; magazine release located on the bottom rear of the grip frame; lanyard ring usually located on the lower left side of the grip frame; grip plates may be black plastic which may have the name "VESTA" molded into them or checkered hardwood, and a blued finish.

Manufacturer

- "HIJOS DE A. ECHEVERRIA EIBAR", or the company logo consisting of the letters "HE" usually within a circle may be marked on the slide and/or receiver/frame.
- in many instances, the Vesta series of handguns were not marked with the manufacturers name.
- Hijos de Angel Echeverria was a Spanish firearms manufacturer located in Eibar, Spain; it was established in the early 1900's; how long the business existed is undetermined, however, the firm did not survive past the Spanish Civil War circa 1939.

Action

- blowback operated.

Serial Number

- serial number is usually marked on left or right side of the receiver/frame above the trigger.
- five and six digit numbers without prefix or suffix have been observed.
- the serial number may also be marked on other components.

Calibre

- calibre is normally marked on the slide.

Shots

- detachable box magazine.

Notes

Make

- known example did not have the Vetterli name marked on the firearm; the "Make" is derived from the specific characteristics of the Vetterli design.
- the "VETTERLI" rifle was designed by Friedrich Vetterli.
- Fredrich Vetterli joined the Schweizerische Industrie Gesellschaft Waffen Department in Neuhausen, Switzerland in 1864.
- Fredrich Vetterli developed a metallic cartridge rifle that combined a Dryse-type bolt action with a Henry-type tubular magazine.
- the Vetterli rifle was adopted for military service by Switzerland in 1869 and by Italy in 1870.
- the Vetterli rifle is historically significant in that it is the first repeating cartridge firearm to be adopted as general issue by any nation in the world.

Model

- model designation is not marked on the firearm.
- manufactured from 1869 to 1875.
- Montier Werkstatte / Eidgenossische Montier Werkstatte of Bern manufactured 8,900 rifles.
- 1869 Swiss Rifle is a turn bolt operated repeating firearm utilizing a tubular magazine mounted under the barrel, inside the forearm.
- 1869 Swiss Rifle was approved on the 8th of January 1869 by Switzerland.
- 1869 Swiss Rifle was accepted by the Swiss Parliament in August of 1869.
- 1869 Swiss Rifle is historically significant as it is the first repeating cartridge firearm to be adopted as general issue by any nation in the world.
- features include: round rifled barrel with a fixed blade front sight and an adjustable leaf rear sight; three barrel bands; flat sided receiver/frame with top ejection and loading port on the right side; hooked finger extension on the trigger guard; checkered wood forearm and straight grip buttstock with steel buttplate; sling swivels.

Manufacturer

- "MW" under a white Swiss Cross was observed marked on the left side of the receiver/frame of a known example.
- "MW" was the trademark initials of Montier Werkstatte.
- Montier Werkstatte / Eidgenossische Montier Werkstatte was a state owned firearms manufacturer located in Bern, Switzerland prior to 1876.
- Montier Werkstatte / Eidgenossische Montier Werkstatte was renamed Waffenfabrik Bern / Eidgenossische Waffenfabrik Bern in 1875.
- Waffenfabrik Bern / Eidgenossische Waffenfabrik Bern firearms are marked "Waffenfabrik Bern" or "W+F Bern".
- "Eidgenossische" literally means, "Fellowship of Oathsworn Men" and it refers to a meeting held in 1291 A.D. when a group of men banded together swearing allegiance for mutual protection.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- turn-bolt design.
Serial Number	- serial number was observed marked on the left side of the receiver/frame. - observed serial number consisted of six numbers without a letter prefix or suffix.
Shots	- tubular magazine is mounted under the barrel, inside the forearm.

Notes

Make

- "VETTERLI" was designed by Friedrich Vetterli.
- Friedrich Vetterli joined the Schweizerische Industrie Gesellschaft Waffen Department in Neuhausen, Switzerland in 1864.
- Friedrich Vetterli developed a metallic cartridge rifle that combined a Dreyse type bolt action with a Henry type tube magazine.
- the Vetterli military rifle was adopted by Switzerland in 1869 and Italy in 1870.
- the Vetterli rifle is historically significant as it is the first repeating cartridge firearm to be adopted as general issue by any nation in the world.

Model

- model designation is not marked on the firearm.
- manufactured from 1869 to 1874.
- manufactured approximately 8,700 rifles.
- 1869 Swiss Rifle is a turn bolt operated repeating firearm utilizing a tubular magazine mounted under the barrel, inside the forearm.
- 1869 Swiss Rifle was approved on the 8th of January 1869 by Switzerland.
- 1869 Swiss Rifle was accepted by the Swiss Parliament in August of 1869.
- 1869 Swiss Rifle is historically significant as it is the first repeating cartridge firearm to be adopted as general issue by any nation in the world.
- features include: round rifled barrel with a fixed blade front sight and an adjustable leaf rear sight; three barrel bands; flat sided receiver/frame with top ejection and loading port on the right side; hooked finger extension on the trigger guard; checkered wood forearm and straight grip buttstock with steel buttplate; sling swivels.

Manufacturer

- manufacturer's name is marked on the left side of the receiver/frame.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - tubular magazine is mounted under the barrel, inside the forearm.

- the Vetterli rifle is historically significant as it is the first repeating cartridge firearm to be adopted as general issue by any nation in the world.

Model

- model designation does not appear on the firearm.
- this is a modification to the model 1869 Swiss rifle carried out in 1871; additional rifles were also modified circa 1878 to offset shortages of the 1871-type carbines.
- the 1869/71 rifle was shortened for use by the Special Corps of the Swiss Army.
- features include: turn bolt operated; round barrel with blade front sight and folding leaf rear sight; cleaning rod mounted under the barrel; open top receiver/frame with right side loading port; right side of the receiver/frame does not have a loading gate; under-barrel tubular magazine; trigger guard with finger extension; two piece stock with coarse square checkering on the forearm and a straight grip butt stock.
- this rifle has no bayonet lug on the nose cap and it will not therefore accommodate the attachment of a bayonet.

Manufacturer

- manufacturer is marked on the firearm.

Action

- turn-bolt design.

Serial Number

- serial number is usually located on the left side of the receiver/frame.
- known example had a six digit number without prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre designation is not marked on the firearm.
Shots	- tubular magazine is mounted under the barrel, inside the forearm.

Notes

Make

- "VETTERLI" was designed by Friedrich Vetterli.
- Fredrich Vetterli joined the Schweizerische Industrie Gesellschaft Waffen Department in Neuhausen, Switzerland in 1864.
- Fredrich Vetterli developed a metallic cartridge rifle that combined a Dryse type bolt action with a Henry type tube magazine.
- the Vetterli military rifle was adopted by Switzerland in 1869 and Italy in 1870.
- the Vetterli rifle is historically significant as it is the first repeating cartridge firearm to be adopted as general issue by any nation in the world.

Model

- model designation is not marked on the firearm.
- manufactured from 1869 to 1874.
- manufactured approximately 8,700 rifles.
- 1869 Swiss Rifle is a turn bolt operated repeating firearm utilizing a tubular magazine mounted under the barrel, inside the forearm.
- 1869 Swiss Rifle was approved on the 8th of January 1869 by Switzerland.
- 1869 Swiss Rifle was accepted by the Swiss Parliament in August of 1869.
- 1869 Swiss Rifle is historically significant as it is the first repeating cartridge firearm to be adopted as general issue by any nation in the world.
- features include: round rifled barrel with a fixed blade front sight and an adjustable leaf rear sight; three barrel bands; flat sided receiver/frame with top ejection and loading port on the right side; double firing pin strike; hooked finger extension on the trigger guard; checkered wood forearm and straight grip buttstock with steel buttplate; sling swivels.

Manufacturer

- manufacturer's name is marked on the left side of the receiver/frame.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- serial numbers of observed examples have consisted of five or six numbers without a letter prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - tubular magazine is mounted under the barrel, inside the forearm.

Notes

Make

- "VETTERLI" was designed by Friedrich Vetterli.
- Fredrich Vetterli joined the Schweizerische Industrie Gesellschaft Waffen Department in Neuhausen, Switzerland in 1864.
- Fredrich Vetterli developed a metallic cartridge rifle that combined a Dryse type bolt action with a Henry type tube magazine.
- the Vetterli military rifle was adopted by Switzerland in 1869 and Italy in 1870.
- the Vetterli rifle is historically significant as it is the first repeating cartridge firearm to be adopted as general issue by any nation in the world.

Model

- model designation does not appear on the firearm.
- manufactured until 1891.

Manufacturer

- the manufacturer's name appears on the chamber of the barrel.

Serial Number

- appears on the chamber of the barrel.

Other Markings

- the year of manufacture appears on the chamber of the barrel.

Remarks

- This is a carbine version of the Model 1870 Italian Vetterli bolt action, single shot bolt action military rifle designed specifically for use by the Italian State Police. It differs from the full length rifle by having a considerably shorter barrel and a half length forearm with a contoured metal end cap. When encountered may have a socket bayonet which when not mounted for use is stored in a reversed position under the barrel with the tip in a slot in the forearm. With modifications and alterations it remained in Italian service as late as World War I. It features a turn bolt action which closely resembles the Swiss Model 1869 Vetterli repeating service rifle. Do not confuse this firearm with the Model 1870 Italian Cavalry Carbine.

- This is a carbine version of the Model 1870 Italian Vetterli bolt action, single shot bolt action military rifle designed specifically for use by the Italian State Police. It differs from the full length rifle by having a considerably shorter barrel and a half length forearm with a contoured metal end cap. When encountered may have a socket bayonet which when not mounted for use is stored in a reversed position under the barrel with the tip in a slot in the forearm. With modifications and alterations it remained in Italian service as late as World War I. It features a turn bolt action which closely resembles the Swiss Model 1869 Vetterli repeating service rifle. Do not confuse this firearm with the Model 1870 Italian Cavalry Carbine.

Notes

Make

- "VETTERLI" was designed by Friedrich Vetterli.
- Fredrich Vetterli joined the Schweizerische Industrie Gesellschaft Waffen Department in Neuhausen, Switzerland in 1864.
- Fredrich Vetterli developed a metallic cartridge rifle that combined a Dryse type bolt action with a Henry type tube magazine.
- the Vetterli military rifle was adopted by Switzerland in 1869 and Italy in 1870.
- the Vetterli rifle is historically significant as it is the first repeating cartridge firearm to be adopted as general issue by any nation in the world.

Model

- model designation does not appear on the firearm.
- manufactured until 1891.

Manufacturer

- the manufacturer's name appears on the chamber of the barrel.

Serial Number

- appears on the chamber of the barrel.

Other Markings

- the year of manufacture appears on the chamber of the barrel.

Remarks

- This is a carbine version of the Model 1870 Italian Vetterli bolt action, single shot bolt action military rifle designed specifically for use by the Italian State Police. It differs from the full length rifle by having a considerably shorter barrel and a half length forearm with a contoured metal end cap. FRT Report

Firearm Reference Number (FRN): 33545
Make: Vetterli
Model: 1870 Italian Rifle

Summary

Make:	Vetterli
Model:	1870 Italian Rifle
Manufacturer:	Beretta
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	ITALY
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
33545 - 1	10.4MM ITALIAN VETTERLI	1	860	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "VETTERLI" was designed by Friedrich Vetterli.
- Fredrich Vetterli joined the Schweizerische Industrie Gesellschaft Waffen Department in Neuhausen, Switzerland in 1864.
- Fredrich Vetterli developed a metallic cartridge rifle that combined a Dryse type bolt action with a Henry type tube magazine.
- the Vetterli military rifle was adopted by Switzerland in 1869 and Italy in 1870.
- the Vetterli rifle is historically significant as it is the first repeating cartridge firearm to be adopted as general issue by any nation in the world.

Model

- the model designation does not appear on the firearm.
- manufactured from 1870 to 1887.

Manufacturer

- the manufacturer's name appears on the chamber of the barrel.

Serial Number

- appears on the chamber of the barrel.

Other Markings

- the year of manufacture appears on the chamber of the barrel.

Remarks

- This is a bolt action, single shot bolt action military rifle adopted by Italy in 1870. With modifications and alterations, it remained in Italian service as late as World War I. It features an action which closely resembles the Swiss Model 1869 Vetterli repeating service rifle.

- "SOC. IND. SUISSE", "+", and "SYST. VETTERLIN" or "SYSTEM VETTERLI" may be marked on the receiver/frame.
- "VETTERLI" was designed by Friedrich Vetterli.
- Fredrich Vetterli joined the Schweizerische Industrie Gesellschaft Waffen Department in Neuhausen, Switzerland in 1864.
- Fredrich Vetterli developed a metallic cartridge rifle that combined a Dryse type bolt action with a Henry type tube magazine.
- the Vetterli military rifle was adopted by Switzerland in 1869 and Italy in 1870.
- the Vetterli rifle is historically significant as it is the first repeating cartridge firearm to be adopted as general issue by any nation in the world.

Model

- manufactured from 1870 to 1873.
- model designation is not marked on the firearm.
- features include: fixed front sight and adjustable rear sight; cocking indicator; single trigger mechanism; one piece straight stock with two barrel bands.
- this Vetterli rifle variation does not feature a bayonet lug.
- cartridges with reduce loads (3 grams instead of 3.65 grams of blackpowder) were specially manufactured to accommodate the cadet's smaller dimensions.
- overall length for a 680mm (26.75") barrel is 1149mm (45.25"), average weight is 3.25kg (7.16lbs).

Manufacturer

- "S.J.G. NEUHAUSEN", "SOCIETE INDUSTRIELLE SUISSE NEUHAUSEN" or "SOC. IND. SUISSE", "+", and "SYST. VETTERLIN" may be marked on the left side of the receiver/frame.

Action

- turn-bolt design.

33515 - 1	41 SWISS RF	12	841	Antique AFR, Section 1, para. 2	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "VETTERLI" was designed by Friedrich Vetterli.
- Fredrich Vetterli joined the Schweizerische Industrie Gesellschaft Waffen Department in Neuhausen, Switzerland in 1864.
- Fredrich Vetterli developed a metallic cartridge rifle that combined a Dryse type bolt action with a Henry type tube magazine.
- the Vetterli military rifle was adopted by Switzerland in 1869 and Italy in 1870.
- the Vetterli rifle is historically significant as it is the first repeating cartridge firearm to be adopted as general issue by any nation in the world.

Model

- "M78" is marked on the left side of the receiver/frame.
- manufactured between 1878 and 1881.

Manufacturer

- manufacturer's name is marked on the left side of the receiver/frame.
- Waffenfabrik Bern / Eidgenossische Waffenfabrik of Bern, Switzerland was a state owned ordnance factory from 1875 to 1995.
- Waffenfabrik Bern / Eidgenossische Waffenfabrik of Bern was originally known as Montier Werkstatte / Eidgenossische Montier Werkstatte of Bern prior to 1876.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the left side of the receiver/frame

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- tubular magazine is mounted under the barrel.
Remarks	- this rifle is an improved version of the original Model 1869 Rifle differing primarily in cosmetic details such as lack of checkering on the forearm, one barrel band in lieu of two as on the Model 1869 and a bayonet lug on the right side of the nose cap.

33517 - 1	41 SWISS RF	12	841	Antique AFR, Section 1, para. 2	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "VETTERLI" is not marked on the firearm.
- "VETTERLI" rifle was designed by Friedrich Vetterli.
- Friedrich Vetterli joined the Schweizerische Industrie Gesellschaft Waffen Department in Neuhausen, Switzerland in 1864.
- Friedrich Vetterli developed a metallic cartridge rifle that combined a Dreyse type bolt action with a Henry type tube magazine.
- the Vetterli military rifle was adopted by Switzerland in 1869 and Italy in 1870.
- the Vetterli rifle is historically significant as it is the first repeating cartridge firearm to be adopted as general issue by any nation in the world.

Model

- "M.81" is marked on the left side of the receiver/frame.
- produced between 1881 and 1887.

Manufacturer

- WAFFENFABRIK BERN" is marked on the left side of the receiver/frame.
- Waffenfabrik Bern / Eidgenossische Waffenfabrik of Bern, Switzerland was a state owned ordnance factory from 1875 to 1995.
- Waffenfabrik Bern / Eidgenossische Waffenfabrik of Bern was originally know as Montier Werkstatte / Eidgenossische Montier Werkstatte of Bern prior to 1876.

Action

- turn-bolt design.

Serial Number

- serial number is marked on the left side of the receiver/frame.

Shots

- tubular magazine is mounted under the barrel, inside the forearm, with the loading port/gate located on the right side of the receiver/frame

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- This rifle is an improved version of the Model 1878 Rifle differing primarily in minor details such as an improved rear sight. Like the Model 1878 Rifle there is no checkering on the forearm, one barrel band and a bayonet lug on the right side of the nose cap. Many of these rifles were imported to Canada early in the 20th Century and are commonly encountered.

Firearm Reference Number (FRN): 67088
Make: Vetterli-Vitali
Model: 1870/87 Carabiniere Carbine

Summary

Make:	Vetterli-Vitali
Model:	1870/87 Carabiniere Carbine
Manufacturer:	Beretta
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	ITALY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
67088 - 1	10.4MM ITALIAN VETTERLI	4	606	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "VETTERLI-VITALI" is not marked on the firearm.
- "Vetterli-Vitali" is derived from a combination of the last names of the designers of the basic firearm (Vetterli) and of the magazine (Vitali). Friedrich Vetterli designed the basic rifle, fitted with a tubular magazine. It was adopted into Swiss service and was considered as a significant improvement over previous designs, as it was the first magazine fed repeating rifle design accepted into service in Europe. In 1868-9 the Italian military conducted trials and decided that the breech design of the Vetterli was desirable but the cost of re-equipping with repeating firearms was prohibitive. As a result the first Vetterli's adopted for Italian service were in single-shot configuration
- In 1887, a magazine conversion system developed by Giuseppe Vitali was approved. Most existing rifles were converted between 1888 and 1895.

Model

- the model designation is not marked on the firearm.
- this is a conversion to repeater of the single shot Vetterli Model 1870 Carabiniere Carbine by using a box magazine designed by Vitali. It features a half length fore-stock and a turning bolt system which closely resembles the Swiss Model 1869 Vetterli repeating service rifle.

Manufacturer

- the manufacturer's name is marked on the chamber end of the barrel.

Serial Number

- marked on the chamber end of the barrel.

Other Markings

- the original year of manufacture is marked on the chamber end of the barrel.

Manufacturer

- the manufacturer's name appears on the chamber of the barrel.

Serial Number

- appears on the chamber of the barrel.

Other Markings

- the original year of manufacture and date of conversion appears on the chamber of the barrel.

Remarks

- This is a conversion to repeater of the bolt action, single shot bolt action Vetterli Model 1870 Italian military rifle using a box magazine designed by Vitali. With modifications and alterations, it remained in Italian service as late as World War I. It features an action which closely resembles the Swiss Model 1869 Vetterli repeating service rifle.

Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	ITALY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
33568 - 1	10.4MM ITALIAN VETTERLI	4	860	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "VETTERLI-VITALI" is not marked on the firearm.
- "Vetterli-Vitali" is derived from a combination of the last names of the designers of the basic firearm (Vetterli) and of the magazine (Vitali). Friedrich Vetterli designed the basic rifle, fitted with a tubular magazine. It was adopted into Swiss service and was considered as a significant improvement over previous designs, as it was the first magazine fed repeating rifle design accepted into service in Europe. In 1868-9 the Italian military conducted trials and decided that the breech design of the Vetterli was desirable but the cost of re-equipping with repeating firearms was prohibitive. As a result the first Vetterli's adopted for Italian service were in single-shot configuration
- In 1887, a magazine conversion system developed by Giuseppe Vitali was approved. Most existing rifles were converted between 1888 and 1895.

Model

- the model designation is not marked on the firearm.

Manufacturer

- the manufacturer's name is marked on the barrel.

Serial Number

- marked on the barrel over the chamber.

Other Markings

- the original year of manufacture and date of conversion is marked on the barrel.

Remarks

- This is a conversion to repeater of the single shot bolt action Vetterli Model 1870 Italian military rifle using a box magazine designed by Vitali. With modifications and alterations, it remained in Italian service to World War One. It features an action which closely resembles the Swiss Model 1869 Vetterli repeating service rifle.

- this is a modification of the Vetterli-Vitali Model 1870/87 turn bolt military rifle.
- modifications were carried out between 1916 and 1918.
- this work included modifying the receiver/frame to accept a 6 shot Mannlicher Carcano clip loaded fixed box magazine, sleeving the existing barrel to 6.5MM calibre and chambering it for the 6.5MM Carcano cartridge and re-graduating the rear sight to accommodate the new cartridge.

Manufacturer

- "Fabbrica Reale d'Armi di Terni" commenced modifications in 1916.
- the original manufacturer's name and year of manufacture are marked on the chamber of the barrel.

Action

- turn bolt operated.

Serial Number

- the serial number is marked on the right side of the barrel at the breech.

Shots

- clip loaded, fixed box magazine.

FRT Report

Firearm Reference Number (FRN): 127307
Make: Vetterli-Vitali
Model: 1870/87/16 Trainer

Summary

Make:	Vetterli-Vitali
Model:	1870/87/16 Trainer
Manufacturer:	Beretta
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	ITALY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
127307 - 1	22 LR	1	430	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	
127307 - 2	22 LR	1	451	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "VETTERLI-VITALI" is not marked on the firearm.
- "Vetterli-Vitali" is derived from a combination of the last names of the designers of the basic firearm (Vetterli) and of the magazine (Vitali). Friedrich Vetterli designed the basic rifle, fitted with a tubular magazine. It was adopted into Swiss service and was considered as a significant improvement over previous designs, as it was the first magazine fed repeating rifle design accepted into service in Europe. In 1868-9 the Italian military conducted trials and decided that the breech design of the Vetterli was desirable but the cost of re-equipping with repeating firearms was prohibitive. As a result the first Vetterli's adopted for Italian service were in single-shot configuration
- In 1887, a magazine conversion system developed by Giuseppe Vitali was approved. Most existing rifles were converted between 1888 and 1895.

Model

- model designation is not marked on the firearm.
- conversion was done between 1934 and 1945.
- year of conversion is marked on the chamber of the barrel.
- Beretta converted Vetterli-Vitali Model 1870/87/16 to calibre 22 LR trainers. This conversion used a new 22 calibre barrel, new extractor system and the magazine housing in the stock was covered by a metal plate.
- features include: round barrel with octagon knox form; graduated quadrant rear sight; blade front sight; round receiver/frame; turn down bolt handle; safety lever located on the right side of the receiver/frame behind the bolt handle; non functional non detachable box magazine with reinforcing plate on stock;one barrel band; spurred trigger guard; and one piece wooden stock with metal nose cap; sling swivels.

Manufacturer

- "1935 - XIII", "BERETTA GARDONE", "serial number" and "BREVETTO 1934" were observed marked on the chamber of the barrel.
- "P. BERETTA" and "GARDONE VT" were observed marked on the side of the butt.

Action

- turn bolt operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number was observed marked on the barrel.
- serial number may consist of a letter "C" prefix followed by four or five numbers.

Firearm Reference Number (FRN): 122400
Make: Vickers
Model: Imperial

Summary

Make:	Vickers
Model:	Imperial
Manufacturer:	Vickers Armstrongs
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Multi-Barrel
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
122400 - 1	12 GA X 2 1/2"	2	762	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "Vickers Armstrongs" is marked on receiver/frame.

Model

- the model designation is usually marked on the rib of the barrel assembly.
- features include: side by side barrels; front hinged receiver/frame with top tang mounted break open lever; top tang push safety; double triggers; sidelock action; fancy engraved; checkered wood with splinter forearm and straight buttstock.
- Vickers lock system was unusual for the time by employing coil springs for both the main spring and the sear spring.

Manufacturer

- "Vickers Armstrongs" is marked on receiver/frame.
- the Vickers' name was first associated with the steel making business of Naylor, Hutchinson, Vickers & Company in Sheffield, England, circa 1923.
- John Hutchinson left the business circa 1841 and the company name was changed to Naylor, Vickers & Company.
- George Portus Naylor died in 1861.
- "Vickers, Sons & Company Limited" was incorporated in 1867 and ceased operations in 1897.
- Vickers, Sons & Company Limited produced naval guns and armor plate and by the 1890s were capable of building and arming an entire battleship.
- Vickers, Sons & Company Limited helped in the formation of the Maxim Gun Company Limited in 1884.
- Vickers, Sons & Company Limited and Maxim Gun Company Limited formed a partnership in 1897 known as Vickers, Sons & Maxim Limited.
- "Vickers, Sons & Maxim Limited" was in operation from 1897 to 1911.
- Vickers Limited was formed to succeed Vickers, Sons & Maxim Limited in 1911 and ceased operations in 1927.
- Vickers Limited and Sir W.G. Armstrong, Whitworth & Company Limited merged in 1927 to form "Vickers-Armstrongs Limited".

Action

- side by side configuration.

Serial Number

- the serial number is usually stamped on the action flats or underneath the barrels just over the chamber area.

Firearm Reference Number (FRN): 17621
Make: Vickers
Model: QF 2 Pounder Naval

Summary

Make:	Vickers
Model:	QF 2 Pounder Naval
Manufacturer:	Vickers
Level:	Manufacturer Specifications and Commercial Customization
Type:	Cannon
Action:	Full Automatic
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
17621 - 1	40X158R	N/A	1570	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is marked on the firearm.

Model

- the model is usually marked on an identification plate attached to the cannon.
- this is a greatly-enlarged Vickers machine gun, chambered for the 40x158R cartridge, adopted as ship-board anti-aircraft armament on Commonwealth ships during the late 1930s, and used in that role until their later-war large-scale replacement by 20mm Oerlikon cannon and the higher-velocity 40mm Bofors guns.
- these cannon inherited the name "Pom Pom" from the earlier 37mm Maxim guns of the First World War, as they shared the same characteristic low rate of fire, enabling each discharge to be heard in a separate "pom-pom-pom" cadence.
- these cannon were primarily manufactured in Mark 7 and Mark 8 variations, and were customarily placed in single (rare), dual, quadruple, and octuplet mounts.
- features include: generalized enlarged Vickers layout and appearance, usually with large cone-shaped flash hiders; large-diameter water jackets; rectangular receiver; commonly painted as a weatherproofing aid; disintegrating-link feed from either the left or right side; and normally aimed via ring sights from a powered mount.

Manufacturer

- the manufacturer is marked on the firearm.

Action

- recoil operated.

Serial Number

- serial numbered on the receiver/frame or identification plate.

Shots

- belt-fed.

- total production of 12,125 units.
- produced from 1917 to 1918.
- water cooled, medium machine gun.

Manufacturer

- "COLT'S PT. F.A. MFG. CO. HARTFORD. CT. U.S.A." is marked on the front of the water jacket.

Action

- recoil and gas assist.

Serial Number

- the serial number will be found marked on the top front of the water jacket immediately behind the front sight.
- the serial number may be repeated on components in various locations on the firearm.
- serial number rationalization unknown.
- observed specimen serial numbers consisted of four digits without prefix or suffix.

Shots

- belt fed.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- markings observed on top front end of water jacket:
VICKERS MACHINE GUN
MODEL OF 1915
COLT'S PT F.A. MFG. CO. HARTFORD, CT. U.S.A.
NO (serial number)
1917 INSPR. (inspector's initials)

Notes

Make
- the make designation is marked on the top of the collar at the front the barrel jacket as "VICKERS AIRCRAFT MACHINE GUN".

Model
- in production from 1917 to 1918.
- the model designation is marked on the collar of the barrel jacket just forward of the rceiver/frame as "VICKERS AIRCRAFT MACHINEGUN MODEL OF 1918".
- features include:a full length vented barrel jacket that looks much like a typical Vickers water reservoir on ground mounted models, there is a cylindrical buffer that protrudes from the back of the receiver/frame not found on any other Vicker's machine guns.

Manufacturer
- the manufacturer's designation is marked on the top of the collar at the front of the barrel jacket as "COLT'S PT. F.A. MFG.CO.HARTFORD, CT.USA"

Action
- no longer capable of full automatic fire.

Serial Number
- model 1918 machine guns in calibre 11X56R FRENCH will have an "A" prefix in the serial number.

Calibre
- samples in calibre 11X59R FRENCH are marked "11M/M CALIBRE".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - uses a desintegrating metal link belt.

Notes

Make

- The make is not marked on the firearm; may be marked "V.M.G.", standing for "Vickers Machine Gun".

Model

- MK I is usually marked on the rear of the water-jacket.
- This is a Vickers heavy machine gun, adopted by the United Kingdom in the early 1930s primarily for use as a tank or armoured fighting vehicle heavy machine gun; by the end of World War Two, these machine guns were considered obsolete, having been replaced by the more-powerful and more-available Browning M2 series in 50 Browning.
- These machine guns were essentially the 303 Vickers machine gun enlarged to accept the 50 Vickers/12.7x81mm cartridge.
- Features include: standard Vickers layout and appearance; no flash-hider; no muzzle booster; corrugated water jacket; bottom case ejection; brass feed-block and water-jacket caps; right-hand feed; mounting lugs on the bottom of a square receiver to allow the machine gun to be installed in a tank, armoured car, or half-track; open adjustable sights; and dual spade grips with thumb trigger.

Manufacturer

- V.A. (Vickers-Armstrong) is usually marked on the rear of the water jacket.

Action

- Recoil operated.

Serial Number

- Serial-numbered on the rear of the water-jacket; known examples serial-numbered with a letter followed by one or more digits.

Shots

- Belt fed firearm.

FRT Report

Firearm Reference Number (FRN): 101635
Make: Vickers Machine Gun
Model: MARK 1 Gas Operated

Summary

Make:	Vickers Machine Gun
Model:	MARK 1 Gas Operated
Manufacturer:	Vickers
Level:	Converted Automatics
Type:	Machine Gun
Action:	Converted Automatic
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
101635 - 1	303 BRITISH	60	737	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
101635 - 2	303 BRITISH	97	737	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
101635 - 3	303 BRITISH	300	737	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
101635 - 4	303 BRITISH	600	737	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make	- the maker's designation is marked on the top of the receiver/frame as "VICKERS".
Model	- in production from 1939 to 1943. - the model designation is marked on the top of the receiver/frame as "VICKERS. GO. MARK.1". - features include:piston assembly mounted under the barrel, cocking handle located on the left side of the receiver/frame, sights mounted on the barrel, trigger located above and in front of the single spade grip.
Manufacturer	- arms manufactured by Vickers-Armstrongs are usually marked "Vickers-Armstongs Ltd. Crayford-Works, Crayford. Kent. England".
Action	- no longer capable of full automatic fire.
Serial Number	- the serial number is usually marked on the top of the receiver/frame and may have the prefix "No" this is the abreviation for the word number and is not to be used as part of the serial number.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel	- does not include flash eliminator.
Shots	- equipped with either a 60 or 97 shot, round removable drum magazine mounted on top of the receiver/frame, or, a 300 or 600 shot flat box.
Canadian Law Comments	- a magazine that "is of the "drum" type", is not a reproduction and was originally designed or manufactured for use in a firearm commonly known as the .303 in.Vickers Mark1 machine gun, or any variant or modified version of it, including the Mark1*, Mark2, Mark2*, Mark3, Mark4, Mark4B, Mark5, Mark6, Mark6*, and Mark 7 is exempt from the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".
Remarks	- the Vickers Gas Operated Mark 1 machine gun was mounted on aircraft, and light vehicles used in desert warfare.

Notes

Make

- make is not marked on the firearm.

Model

-"Mk I" may be marked on the firearm.
- also known as the "Vickers Heavy Machine Gun" or "Vickers Heavy Machine Gun, Mark 1".
- manufactured from 1929 to 1945.
- this was the "Vicker, Sons & Maxim Ltd" improvement on the "Maxim" machine gun.
- this is a water-cooled machine gun which was normally mounted on a tripod when used in the infantry role.
- features included: a water jacket fitted around the barrel for cooling; short-recoil operated with gas assist from a muzzle booster which uses a toggle joint for breech locking and fires from a closed breech position; full automatic fire with a rate of 450 to 550 rounds per minute.; right hand belt feed system, which used 250 round fabric/cloth belt or disintegrating steel linked belt.

Manufacturer

- the manufacturer's marks of "MA" or "SAF" may be marked on the firearm.

Action

- recoil operated with muzzle booster, toggle linked lock mechanism.

Serial Number

- the serial number is found on the top rear of the assembly into which the water jacket is soldered.
- serial number range from 1 to 9999 and B1 to B2344.
- total production of Vickers MARK I Machineguns between 1929 and 1945 is placed at 12,344.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - belt feed mechanism.

FRT Report

Firearm Reference Number (FRN): 117774
Make: Vickers Machine Gun
Model: MARK 2* Aircraft Model

Summary

Make:	Vickers Machine Gun
Model:	MARK 2* Aircraft Model
Manufacturer:	Vickers
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
117774 - 1	303 BRITISH	N/A	723	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is not marked on the firearm.

Model

- "Mk II*" may be marked on the firearm.
- this model was also known as the "Mk II*A" for right hand feed or the "Mk II*B" for left hand feed.
- introduced in 1927.
- this firearm is an air-cooled machine gun which was specifically manufactured for use on an aircraft.
- this is a "Mark 2 Aircraft Model" with a cocking lever and left or right belt feed mechanism.
- features include: a small diameter perforated barrel jacket; short-recoil operated with gas assist from a muzzle booster which uses a toggle joint for breech locking and fires from a closed breech position; full automatic fire with a rate of fire of 750 rounds per minute.; right or left hand belt feed system, which used a linked belt.

Action

- recoil operated with muzzle gas booster, toggle linked lock mechanism.

Serial Number

- the serial number is marked on the receiver/frame of the firearm.

Shots

- belt fed firearm.

Notes

Make

- make is not marked on the firearm.

Model

- "Mk IV" may be marked on the firearm.
- manufactured from 1933 to 1934.
- model designation is usually marked on the top rear collar of the water cooling jacket just forward of the top cover.
- the "MARK 4" was an AFV (armored fighting vehicle) mounted gun made by converting "MARK 1"'s.
- this is a water-cooled machine gun.
- features include: the water cooling jacket was connected to water reservoir inside the tank, which allowed for constant water circulation; short-recoil operated with gas assist from a muzzle booster which uses a toggle joint for breech locking and fires from a closed breech position; full automatic fire with a rate of 450 to 550 rounds per minute; belt feed system, which used 250 round fabric/cloth belt or disintegrating steel linked belt.

Action

- recoil operated with muzzle gas booster, toggle linked lock mechanism.

Shots

- belt feed mechanism.

Notes

Make	- make is not marked on the firearm.
Model	- model is marked on the firearm: "Mk. V" - introduced in 1932. - this is an air-cooled variant of the Mark 1.
Type	- air-cooled, medium machine gun.
Action	- no longer capable of full automatic fire.
Shots	- feed system was normally a belt-feed mechanism which used a two-hundred and fifty round fabric belt or disintegrating steel-link belt. - a modified kit was available which allowed the firearm to accept a drum type magazine.
Canadian Law Comments	- original belts and drum magazines for Vicker's machine guns are exempt from the conditions imposed in the "Regulations Prescribing Certain Firearms and other Weapons, Components and Parts of Weapons, Accessories, Cartridge Magazines, Ammunition and Projectiles as Prohibited or Restricted".

Model

- production started in 1934.
- model designation is usually marked on the top rear collar of the water cooling jacket just forward of the top cover as "Mk VI" .
- the MARK 6 was an AFV (armored fighting vehicle) mounted gun made by converting existing model "MARK 4"'s which themselves were made by converting existing model "MARK 1"'s.
- features include: a corrugated self contained water cooling jacket, strengthened mount, improved barrel removal system, and available with right or left feed mechanism.

Action

- no longer capable of full automatic fire.

Serial Number

- usually marked on the top rear collar of the water cooling jacket just forward of the top cover.

Shots

- this is a belt fed firearm, uses a cloth or disintegrating metal link belt.

Remarks

- the MARK 6 was an AFV mounted machine gun that had a self contained water cooling system which meant the water hoses normally mounted near the front or rear of the water jacket would not be present.

Notes

Make

- make is not marked on the firearm.

Model

- "Mk VI*" is usually marked on the top rear collar of the water cooling jacket just forward of the top cover.
- introduced in 1934.
- the MARK 6 was an AFV (armored fighting vehicle) mounted gun made by converting existing model "MARK 4"'s which themselves were made by converting existing model "MARK 1"'s.
- features include: water cooling jacket was connected to a vehicle's water cooling system; strengthened mount; improved barrel removal system; and available with right or left feed mechanism; short-recoil operated with gas assist from a muzzle booster which uses a toggle joint for breech locking and fires from a closed breech position; full automatic fire with a rate of 450 to 550 rounds per minute; belt feed system, which used 250 round fabric/cloth belt or disintegrating steel linked belt.

Action

- recoil operated with muzzle gas booster, toggle linked lock mechanism.

Shots

- belt feed mechanism.

120542 - 2	303 BRITISH	30	607	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is not marked on the firearm.

Model

- the model designation may not be marked on the firearm.
- this is a light machinegun designed by Adolphe Berthier prior to and during World War One; before the machinegun could be placed in production, the war ended, so Mr. Berthier approached Vickers to further develop his design. During the inter-war period, Vickers produced several variants of the Berthier design, and further modified it to produce a drum-fed version known as the Vickers "GO" ("Gas Operated").
- features include: "Bren"-like appearance, with a top-mounted curved magazine; open adjustable sights offset to clear the magazine; ejection through the right side of the receiver; radially-finned barrel (Vickers-Berthiers after the Mark 2 dispensed with the finned barrel); round cocking handle on the right side of the receiver/frame; wooden butt, pistol-grip and square-fronted forearm; bipod; monopod at rear of butt; and an internal mechanism very similar to the Bren, with a bolt that tips up to lock.
- later variants of the Vickers-Berthier included the Mark 2 (a slightly lightened Mark 1, with a rounded forearm), the Mark 2 Lightweight (a version made for Indian Army trials, with a smooth barrel, no monopod, a thinner, longer forearm, and a butt modified for off-hand support), and the Mark 3 (a version adopted by the Indian armed forces with a heavy barrel and no forearm, but with an under-receiver ring for use on a pintle mount).

Manufacturer

- the manufacturer is marked on the firearm.

Action

- gas-operated.

Serial Number

- numbered on the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable top-mounted box magazine.

Notes

Make

- "VICTOR" may be marked on the barrel.
- "Victor" was a brand/trade name used on guns produced for Hibbard, Spencer, Bartlett & Co. of Chicago, Illinois, USA.
- "Victor" was a brand/trade name used on shotguns manufactured by Crescent Firearms Company between 1904 and 1920.
- "Victor" was a brand/trade name used on Zulu type shotguns by an Unkwonn Belgium manufacturer.
- "Victor" was a brand/trade name used on Suicide Special revolvers manufactured by Harrington & Richardson.
- "Victor" was a brand/trade name used on Derringers manufactured by Marlin.
- "Victor" was a brand/trade name used on pistols from Francisco Arizmendi of Eibar, Spain, circa 1916.

Model

- "VICTOR" may be marked on the barrel.
- the "Victor" was a better grade version of the "ZULU" type single barrel shotgun.
- Zulu type shotgun were produced by European arms dealers utilizing Snider-type hinged breech-block, breech-loading rifles of French or British origin. These rifles were subsequently altered to shotgun configuration and then marketed as the "Zulu".
- Belgian proofmarks may appear on the firearm.
- be aware that the original pre-conversion military markings may still be present on the firearm.
- converted in Europe (Belgium mostly) from huge supplies of Snider & Snider-Enfield surplus military rifles for sale in Africa and other countries as inexpensive shotguns.

Action

- Snider-type breech-loading shotgun with the breechblock hinged either on left or right side of action.

Serial Number

- may not be serial numbered.
- if the individual firearms are serial numbered the number may be found at any location on the firearm.

Barrel

- virtually any barrel length may be encountered and may be accepted as factory specifications as these firearms were "Manufactured or Converted" from military surplus rifles as a cottage industry by all gunsmiths and firearms businesses in Europe at one time or another in the period 1885 - 1925.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- virtually any shotgun gauge / calibre may be encountered in these firearms as each one is virtually an individual customized firearm. - the most commonly encountered calibres are 20 GA & 12 GA.
Other Markings	- be aware that the original pre-conversion military markings may still be present on the firearm.
Remarks	- the Zulu shotgun was produced by European arms dealers utilizing Snider-type hinged breech-block, breech-loading rifles of French or British origin. These rifles were subsequently altered to shotgun configuration and then marketed as the "Zulu". - The name Zulu became a "Brand Name" as the target for the sale of these firearms was the native population of Africa that was not permitted by their colonial governments to be armed with modern firearms. - these shotguns were very inexpensive and were marketed extensively through American sporting goods mail order catalogs during the 1880's and early 1890's.

18925 - 2	7.65MM	7	83	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Victoria" or " 'Victoria' Patent" is marked on the left side of the slide and may be repeated on the grips.
- "Victoria" is the first trade-name used on firearms manufactured by "Esperanza y Unceta".
- the "VICTORIA" tradename was used until 1914.

Model

- "1911 MODEL AUTOMATIC PISTOL" is marked on the left side of the slide.
- this model was introduced circa 1911.
- this model resembles a "FN-Browning 1906".
- early versions were reportedly manufactured with an external hammer, the bulk of production were a hammerless design.

Manufacturer

- manufacturer's name is not marked on the firearm.
- an "EU" marking on the grip panels may be the only identifier used by "Esperanza y Unceta".
- the word "HOPE" on the exposed portion of the barrel hood at the ejection port was a definitive characteristic of ESPARANZA Y UNCETA made pistols. HOPE is the english translation of the Spanish name ESPERANZA.

Action

- blowback operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number is marked on the right side of the receiver/frame. - all completed pistols manufactured by ESPERANZA Y UNCETA irrespective of calibre or model were numbered in a single sequential serial numbering system that started with serial number 1. (There is an exception with the CAMPO-GIRO model 1913 and 1913-16 series of pistols for the Spanish Army which had their own serial number range starting at number 1.) - in 1983 ASTRA started a new sequential numbering system which was prefixed by an alpha character. This new system started with the M4000 FALCON model at serial number A0001.
Calibre	- the calibre designation is marked on the left side of the slide.
Shots	- detachable box magazine.
Other Markings	- marked on the left side of the slide: "6.35 1911 MODEL AUTOMATIC PISTOL" and " 'VICTORIA' PATENT" or "7.65 1911 MODEL AUTOMATIC PISTOL" and " 'VICTORIA' PATENT"

Firearm Reference Number (FRN): 108575
Make: Vigneron
Model: M1

Summary

Make:	Vigneron
Model:	M1
Manufacturer:	Societe Anonyme Precision Liegeoise
Level:	Manufacturer Specifications and Commercial Customization
Type:	Submachine Gun
Action:	Full Automatic
Country of Manufacturer:	BELGIUM
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
108575 - 2	9MM LUGER	5	305	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	
108575 - 1	9MM LUGER	32	305	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "VIG" is marked on the left side of the magazine housing.
- "Licence Vigneron" is marked on the left side of the receiver/frame.

Model

- "VIG M1" is marked on the left side of the magazine housing.
- these submachine guns are commonly marked "ABL" ("Armee Belgique Leger"), meaning "Belgian Army", plus the year of manufacture.
- introduced in 1952 to the Belgian Army in the Belgian Congo and produced until 1962.
- features include: ribbed barrel with a fitted compensator; retractable wire stock; three position change lever; pistol grip safety; non reciprocal cocking handle and an ejection port handle.
- firearm will fire single shot when the selector is in full automatic if the trigger is only partly depressed.

Manufacturer

- manufacturer's designation is not marked on firearm.
- examined examples bear an oval logo reading "CMH" molded into the plastic grip.

Action

- blow back, select fire.

Serial Number

- serial number is marked on the left side of the magazine housing.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- these submachine guns are commonly marked "ABL" ("Armee Belgique Leger"), meaning "Belgian Army", plus the year of manufacture. ie. "ABL52" marked on the left side of the magazine housing.

Notes

Make	- marked on the left side of the slide.
Model	- the model designation may be marked on the left side of the slide, some samples have been noted simply marked "Pistola Automatica". - this is a typical "Ruby" or "Eibar" type pistol manufactured circa World War I. The original "Ruby" style of blowback semi-automatic pistol was produced initially by Gabilondo of Spain for the French Army during the First World War; this pistol was subsequently copied/produced by many Spanish manufacturers. - features include: hammerless design; detachable box magazine; manual safety/slide lock lever located on the left side of the receiver/frame above the trigger; no grip safety; fixed front sight, notch rear sight; magazine release located in the heel of the butt; may have a lanyard ring on the bottom left side of the grip frame; curved grasping grooves at the rear of the slide; blued finish.
Manufacturer	- may have been manufactured by Retolaza Hermanos or Gregorio Bolumburu of Eibar. Sample examined was simply marked "MADE IN SPAIN".
Action	- blowback operated.
Serial Number	- sample examined was marked on the left side of the receiver/frame with sequential numbers.
Calibre	- marked on the left side of the slide.
Shots	- detachable box magazine housed in the grip.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- marked on the left side of the slide.
- first line: " - 7.65 1914 Automatic Pistol - " or "Pistola Automatic Cal. 7.65".
- second line: "Vilar".
- marked on the left side of the receiver: "Made in Spain".

FRT Report

Firearm Reference Number (FRN): 120462
Make: Villar Perosa
Model: M1915

Summary

Make:	Villar Perosa
Model:	M1915
Manufacturer:	Canadian General Electric
Level:	Manufacturer Specifications and Commercial Customization
Type:	Submachine Gun
Action:	Full Automatic
Country of Manufacturer:	CANADA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
120462 - 1	9MM GLISENTI	50	319	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make may not be marked on the firearm.

Model

- the model designation may not be marked on the firearm.
- this is a highly unusual firearm, noteworthy for being the first "submachine gun" (defined as a full-automatic firearm which fires pistol-calibre ammunition); the M1915 is actually two separate firearms combined into one mounting, intended to provide a high rate of fire.
- although the M1915 was originally designed and intended by Revelli to fill the role of a general-purpose machinegun for use by Italian "Alpini" (mountain troops), the calibre it was chambered in (9MM GLISENTI) made it entirely unsuitable for use in that role; although the chambering made for a lightweight firearm that could be easily transported, it also made for a firearm that couldn't possibly have the range required by mountain troops. After this realization, most examples of the M1915 were withdrawn from service and the basic design was re-submitted as a single-barrel "true" submachinegun (the OVP). Many M1915s were separated and retro-fitted with wooden stocks to become the model "OVP' or Beretta model 1918.
- the M1915 was offered in several configurations (tripod, bipod, pintle, and shield-mounted fixtures were all available), and each of these were known by a separate model/year designation; however, the basic Villar Perosa design consisted of the side by side dual configuration on a bipod mount.
- features include: dual spade grips; twin thumb triggers; a rotating safety-lever between the grips, above the triggers; blued finish; bottom ejection; and twin detachable top-mounted box magazines (each feeding one half of the assembly).

Manufacturer

- the M1915 was built in Italy by Officine di Villar Perosa and FIAT, and in Canada (small quantities) for Italy by the Canadian General Electric Co. of Toronto.

Action

- retarded blowback operated; the M1915 Villar Perosa is actually two separate firearms combined into one side by side mounting.

Serial Number

- numbered on the receiver(s)/frame(s).

Shots

- detachable box magazines; in standard configuration, the M1915 has two separate 25 shot magazines, each feeding a distinct firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make:	Villar Perosa
Model:	M1915
Manufacturer:	Officine di Villar Perosa
Level:	Manufacturer Specifications and Commercial Customization
Type:	Submachine Gun
Action:	Full Automatic
Country of Manufacturer:	ITALY
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
120461 - 1	9MM GLISENTI	50	319	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make may not be marked on the firearm.

Model

- the model designation may not be marked on the firearm.
- this is a highly unusual firearm, noteworthy for being the first "submachine gun" (defined as a full-automatic firearm which fires pistol-calibre ammunition); the M1915 is actually two separate firearms combined into one mounting, intended to provide a high rate of fire.
- although the M1915 was originally designed and intended by Revelli to fill the role of a general-purpose machinegun for use by Italian "Alpini" (mountain troops), the calibre it was chambered in (9MM GLISENTI) made it entirely unsuitable for use in that role; although the chambering made for a lightweight firearm that could be easily transported, it also made for a firearm that couldn't possibly have the range required by mountain troops. After this realization, most examples of the M1915 were withdrawn from service and the basic design was re-submitted as a single-barrel "true" submachinegun (the OVP). Many M1915s were separated and retro-fitted with wooden stocks to become the model "OVP' or Beretta model 1918.
- the M1915 was offered in several configurations (tripod, bipod, pintle, and shield-mounted fixtures were all available), and each of these were known by a separate model/year designation; however, the basic Villar Perosa design consisted of the side by side dual configuration on a bipod mount.
- features include: dual spade grips; twin thumb triggers; a rotating safety-lever between the grips, above the triggers; blued finish; bottom ejection; and twin detachable top-mounted box magazines (each feeding one half of the assembly).

Manufacturer

- the M1915 was built in Italy by Officine di Villar Perosa and FIAT, and in Canada (small quantities) for Italy by the Canadian General Electric Co. of Toronto.

Action

- retarded blowback operated; the M1915 Villar Perosa is actually two separate firearms combined into one side by side mounting.

Serial Number

- numbered on the receiver(s)/frame(s).

Shots

- detachable box magazines; in standard configuration, the M1915 has two separate 25 shot magazines, each feeding a distinct firearm.

Notes

Model

- this model is a modified version of the original Villar Perosa that was introduced in 1915.
- features include: wood stock, barrel jacket, longer barrel, safety lever on the right side of the trigger housing, double triggers (front trigger is used for semi automatic fire, rear trigger is used for full automatic fire) and a sheet metal bolt retracting mechanism that partially covers the receiver/frame.

Manufacturer

- normally marked on the top of the receiver/frame.
- markings read "OFFICINE DI VILLAR-PEROSA" inside a rectangle.

Action

- no longer capable of full automatic fire.

Serial Number

- marked on the top of the receiver/frame.

Shots

- detachable box magazine.

Notes

Make

- "VIMA" or "VI-MA" is marked on the firearm.

Model

- the model designation is not marked on the firearm.
- the Pegaso and Pegaso L (Lusso or Deluxe) are the same basic firearm but for the level of embellishment.
- the Pegaso is a hinged breach, break open design.
- features include: silver coloured alloy receiver/frame with minimal engraving (the Pegaso L features a larger, more intricate scroll and floral pattern); cold, hammer forged blued barrel; "Greener" type cross-bolt locking mechanism; checkered walnut buttstock and forend; top tang mounted opening lever and safety; blade front sight with a folding rear sight on a quarter rib that is also grooved for a scope mount.

Serial Number

- samples examined were numbered on the receiver/frame and barrel assembly.

Calibre

- Vi-Ma notes that all calibres between 222 REM and 375 H&H MAG can be produced on request.

Notes

Make

- "VIMA" or "VI-MA" is marked on the firearm.

Model

- the model designation is not marked on the firearm.
- the Pegaso and Pegaso L are the same basic firearm but for the level of embellishment.
- the Pegaso is a hinged breach, break open design.
- features include: silver coloured alloy receiver/frame with intricate scroll and floral pattern engraving (the Pegaso features a smaller less intricate pattern); cold, hammer forged blued barrel; "Greener" type cross-bolt locking mechanism; checkered walnut buttstock and forend; top tang mounted opening lever and safety; blade front sight with a folding rear sight on a quarter rib that is also grooved for a scope mount.

Serial Number

- samples examined were numbered on the receiver/frame and barrel assembly.

Calibre

- Vi-Ma notes that all calibres between 222 REM and 375 H&H MAG can be produced on request.

25857 - 2	45 AUTO	1	152	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "VOCO" and "E-TOWN" and "KY" is usually marked on the underside of the barrel, behind the trigger guard.
- "VOCO" is the abbreviation for "Vintage Ordnance Company".

Model

- introduced in 2012.
- "LIBERATOR FP-45 REPRODUCTION" is not marked on the firearm.
- "FP-45" and ".45 ACP" are usually marked on the underside of the barrel, behind the trigger guard.
- this is a modern reproduction of a "Liberator FP-45".
- "Liberator FP-45" was originally produced in 1942 as an economical firearm for air-drop to World War Two partisans in occupied countries. The intention was to use this firearm as a means to acquire other weapons.
- "Liberator FP-45 Reproduction" has a rifled bore and has storage space in the grip for ten (10) loose rounds.
- "Liberator FP-45 Reproduction" is fired by pulling back on a cocking handle with a fixed firing pin, the trigger then releases the firing pin onto the chambered round.
- overall length with a 102 mm (4") barrel is 142 mm (5 9/16"), overall height is 125 mm (4.9"), overall width is approximately 25 mm (1"), and average weight is 0.15 kg (1 lb).

Manufacturer

- "VOCO" and "E-TOWN" and "KY" is usually marked on the underside of the barrel, behind the trigger guard.
- "VOCO" is the abbreviation for "Vintage Ordnance Company".
- "Vintage Ordnance Company, LLC" is located in Elizabethtown, Kentucky, U.S.A.
- "Vintage Ordnance Company, LLC" specializes in manufacturing or distributing Historic Arms Replicas, Accoutrements and Clothing.

Serial Number

- serial number is marked on the front of the grip of the receiver/frame.

Notes

Make

- marked "VIRGINIA" only or "VIRGINIA" over "Manufactory"(in script) on the lockplate in front of the hammer and "RICHMOND" over a date at the rear of the lockplate.

Model

- model designation is not marked on the firearm.
- the first model was manufactured circa 1805 to 1811 in 69 FLINTLOCK calibre and was full stocked and featured iron mountings and ram rod, brass front sight, goose neck style hammer, iron butt cap and an overall length of approximately 18"(457mm).
- the second model was manufactured circa 1812 to 1815 in 54 FLINTLOCK calibre and was half stocked and featured brass mountings, wood or iron swivel ram rod, reinforced hammer, brass butt cap and an overall length of approximately 15"(381mm).
- both models remained in service in Virginia up to the end of the US civil war in flintlock or as percussion conversions.

Manufacturer

- marked "VIRGINIA" only or "VIRGINIA" over "Manufactory" on the lockplate in front of the hammer and "RICHMOND" over a date at the rear of the lockplate.
- in 1798, the Virginia Assembly authorized the establishment of this armory at Richmond.
- originally known as the Virginia Armory and under state control until becoming the Richmond Armory under control of the Confederacy and eventually destroyed by fire in April, 1865.

Action

- muzzle loading.

Barrel

- barrel lengths may vary by 13mm due to manufacturer's nominal specifications.

FRT Report

Firearm Reference Number (FRN): 195080
Make: Vivario-Plomdeur
Model: Side By Side Pin-Fire Pistol

Summary

Make:	Vivario-Plomdeur
Model:	Side By Side Pin-Fire Pistol
Manufacturer:	Vivario-Plomdeur
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Multi-Barrel
Country of Manufacturer:	BELGIUM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
195080 - 1	9MM PIN-FIRE	2	92	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "N. VIVARIO-PLOMDEUR ARQB DU ROI A LIEGE" was observed marked on the barrel rib.

Model

- model is not marked on the firearm
- the model name as designated is derived from the characteristics and ignition system of the handgun.
- features include: side by side round barrels with central rib and bead front sight; concealed drop-down triggers without trigger guard; double exposed hammers; usually side-lever or under-lever opening; checkered hardwood grip; engraved receiver/frame and hammers.

Manufacturer

- "N. VIVARIO-PLOMDEUR ARQB DU ROI A LIEGE" was observed marked on the barrel rib.
- Vivario-Plomdeur was located in Liege, Belgium from 1836-1863, with a branch office in Paris, France from 1850-1863 at 19 Rue D'Enghien.
- Vivario-Plomdeur was a supplier of the Belgian court.
- Vivario-Plomdeur was succeeded by Vivario & Calfice circa 1863-1868 (partnership of Nicolas Vivario and Pascal Calfice) and Vivario-Plomdeur Fils from 1868-1883.
- Vivario & Calfice and Vivario-Plomdeur Fils both operated in Liege and at 19 Rue D'Enghien in Paris.
- Vivario-Plomdeur filed for four patents from 1859-1868, three patents for revolver modifications and one for a pin-fire rifle.
- some references to the Paris location have the company listed as Vivario-Plombeur, Nicolas.

Action

- side by side barrel configuration.

Serial Number

- no serial number was observed.

Other Markings

- the Belgian proof of an oval containing ELG over a star was observed on the underside of the left barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

FRT Report

Firearm Reference Number (FRN): 119290
Make: Vladimirov
Model: KPV

Summary

Make:	Vladimirov
Model:	KPV
Manufacturer:	Russian State Arsenals
Level:	Manufacturer Specifications and Commercial Customization
Type:	Machine Gun
Action:	Full Automatic
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
119290 - 1	14.5X114 RUSSIAN	N/A	1346	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	
119290 - 2	14.5X114 RUSSIAN	N/A	1372	Prohibited CC 84(1) "prohibited firearm" para. (c)	Non-Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- Vladimirov, as a make is derived from the last name of the designer of the KPV machine gun, Semen V. Vladimirov.

Model

- KPV entered service in the 1950s.
- "KPV" or "KPVT" is marked on the receiver/frame.
- Semen Vladimirov designed the KPV immediately after the Second World War, it uses the same high velocity ammunition as the PTRD-41 anti-tank rifle.
- although it was originally designed as an anti-aircraft gun, it is also suitable as an armoured fighting vehicle weapon.
- features include: cylindrical construction; stamped parts; 40 round belt magazine; ambidextrous; fixed firing pin in the bolt body; eight rows of locking lugs which lock in recesses in the barrel; empty cases are extracted by the bolt head and ejected by the subsequent cartridge; engages targets at distances up to 2000 meters; cam-type bolt accelerator operates during the unlocking motion;
- safety features include: breech cannot be locked if barrel is not latched securely; cannot fire if barrel has not been replaced; bolt motion halted if cartridge has not been taken out of the belt link; impossible to close the receiver/frame cover if the bolt-body cam does not locate properly in corresponding groove in slide.

Manufacturer

- manufacturer's factory markings will be on various locations of the firearm.

Type

- air-cooled machine gun.

Action

- short recoil, gas assisted operation.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the receiver/frame.
Shots	- belt fed machine gun.
Other Markings	- cyrillic letters may be marked in various places on the machine gun.

Notes

Make

- make is not marked on the firearm.
- Vladimirov, as a make is derived from the last name of the designer of the KPV machine gun, Semen V. Vladimirov.

Model

- the model designation may not be marked on the firearm; where present, may only be marked in non-Western characters.
- this is a Chinese-made version of the Russian KPV heavy machine gun.
- features include: blued finish; ventilated barrel shroud; cone-shaped flash-hider; adjustable open sights (may also be seen with optical or anti-aircraft sights); and may be seen on vehicle, anti-aircraft, or direct-fire ground mounts; when seen on an anti-aircraft mount, these firearms are commonly seen in quadruple mountings (known in Russian service as the "ZPU").

Manufacturer

- the manufacturer (or factory code thereof) is marked on the firearm.

Action

- recoil-operated.

Serial Number

- numbered on receiver/frame; may contain Oriental ideographs and/or other non-Western characters and/or numerals.

Shots

- belt-fed firearm.

Notes

Make	- "VLTOR WEAPON SYSTEMS" over "TUCSON AZ USA" was observed marked on the right side of the receiver/frame.
Model	- "FORTIS" is marked on the slide. - "Fortis" is a modernized version of the Bren Ten originally produced by Dornaus & Dixon and based on a Jeff Cooper design. - 2500 units scheduled for the first phase of production. Four designs of the Fortis include: Standard and Vice and two short slide versions: Special Forces Dark; and Special Forces Light. - features include: stainless steel, black or two-tone finish; single/double action trigger mechanism; grip safety; black plastic grips.
Manufacturer	- "VLTOR WEAPON SYSTEMS" over "TUCSON AZ USA" was observed marked on the right side of the receiver/frame.
Action	- recoil operated.
Calibre	- rifling characteristics: 5-grooves, radiused right hand twist.
Shots	- detachable box magazine.

FRT Report

Firearm Reference Number (FRN): 129052
Make: Vltor Weapon Systems
Model: PKM

Summary

Make:	Vltor Weapon Systems
Model:	PKM
Manufacturer:	Vltor Weapon Systems
Level:	Manufacturer Specifications and Commercial Customization
Type:	Commercial Version
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
129052 - 1	7.62X54R RUSSIAN	N/A	658	Prohibited PFR, Part 1, para. 64(z.3)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "VLTOR WEAPON SYSTEMS " was observed marked on the right side of the newly manufactured receiver/frame.

Model

- "MOD PKM" was observed marked on the right side of the receiver/frame.
- Vltor Weapon Systems manufactures the receiver/frame and assemble the complete firearm from Hungarian and/or Romanian PKMS parts kits.
- this is a Russian machine gun based on a Kalashnikov style rotating bolt locking mechanism (unlike the earlier Goryunov/SGM/SG-43 series, which used a tilting-bolt locking mechanism).
- these machine guns were built in several variations, and, depending on their primary intended role, could be known as plain "PKM"'s (bipod mount only, intended for infantry fire support), "PKMS"'s (tripod mount, intended for both infantry fire support and anti-aircraft use), "PKMT"'s (internal armored vehicle mount, fired with a solenoid), or as "PKMB"'s (flexible gun mounted on an armoured vehicle, with spade grips).
- a slightly earlier version of the PKM is known as the "PK"; these are the original, harder-to-manufacture versions that have fluted barrels and milled top covers. The PKM series all have non-fluted barrels, and stamped top covers.
- the original PKM machine guns are belt-fed, gas operated firearms that fire in the full automatic mode only; a safety over the right side of the trigger group either blocks the trigger operation, or allows full-automatic fire.
- barrel with quick change mechanism (barrel handle and locating stud are located on top of the barrel), cast and machined components, three-position gas regulator below gas take-off , and solid or skeletonized buttstock with pistol-grip on most versions.

Manufacturer

- "VLTOR WEAPON SYSTEMS TUCSON AZ USA" was observed marked on the right side of the newly manufactured receiver/frame.

Action

- gas operated.

Serial Number

- serial number was observed marked on the rear left side of the receiver/frame.
- observed serial number consisted of an "S" prefix and four numbers.
- other numbers may also be marked on other major component/parts by the original manufacturer's of the parts kits.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - this is a belt-fed firearm, commonly using 100, 200, or 250-round metallic linked belts.

Notes

Make	- "VLTOR" over "WEAPON SYSTEMS" over "TUCSON AZ USA" over "MOD: VR CAL: 5.56" is usually marked on the left side of the magazine housing of the receiver/frame.
Model	- introduced in 2011. - "MOD: VR" is usually marked on the left side of the magazine housing of the receiver/frame. - "VR" is of the design commonly known as the AR family of firearms. - "VR" has a two piece split receiver/frame. - "VR" receiver/frame is manufactured to fit all AR-15 upper assemblies. - features include: aluminum receiver/frame with fixed trigger guard and grip serrations on the front of the magazine well; safety/selector, and bolt release are mounted on the left side of the receiver/frame; magazine release is mounted on the right side of the receiver/frame. - also sold as a lower receiver only.
Manufacturer	- "VLTOR" over "WEAPON SYSTEMS" over "TUCSON AZ USA" is usually marked on the left side of the magazine housing of the receiver/frame.
Action	- gas operated.
Serial Number	- serial number is usually marked on the left side of the magazine housing of the receiver/frame. - observed serial number consisted of eight numbers without a letter prefix or suffix.
Calibre	- calibre is usually marked on the left side of the magazine housing of the receiver/frame.
Shots	- detachable box magazine. - the 50 Beowulf magazine is adapted from the original 5.56x45 NATO version of the magazine but the ability of the magazine to perform as originally designed has not been compromised by the adaptation.

106795 - 3	22 LR	15	508	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "VOERE KUFSTEIN AUSTRIA" may be marked on the barrel.

Model

- the model designation is not marked on the firearm.
- features include: fixed hooded front sight, adjustable tangent rear sight, grooved receiver/frame for mounting optics, wing safety located at the back of the receiver/frame, extension block that fills the gap between the plastic trigger guard and the detachable box magazine, sling swivels, blued chromed steel barrel, perpendicular cut forearm tip and checkered Monte Carlos cheekpiece stock.
- overall length for a 508mm (20") barrel is 1041mm (41"), average weight is 2.73kg (6lbs).
- similar to the Voere model 2115 which features a hogsback buttstock with cheekpiece.
- similar to the Voere model 2115SE which features a steel trigger guard without an extension block; a Monte Carlos cheekpiece buttstock with an exotic wood forearm tip.
- similar to the Voere model 2114S which features a plain stock.

Manufacturer

- "VOERE KUFSTEIN AUSTRIA" may be marked on the barrel.

Action

- blow back operated.

Serial Number

- serial number is located on the left side of the receive/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- the calibre designation is marked on the left side of the barrel.
Shots	- detachable box magazine.
Other Markings	- "VOERE KUFSTEIN AUSTRIA - CA. 22 LR" is marked on the left side of the barrel. - "LAUFSTAHL 1" is marked on the right side of the barrel.

Notes

Make

- "VOERE Voehrenbach Germany", "VOERE Vöhrenbach Germany", "VOERE Vohrenbach Germany, "VOERE GmbH. Voehrenbach Germany", "VOER GmbH Vöhrenbach Germany" or "VOERE GmbH Vohrenbach Germany" may be marked on the barrel or receiver/frame.

Model

- model designation may be marked on the firearm.
- features include: blued tapered round barrel; adjustable rear sight and fixed front sight; drilled and tapped receiver/frame; safety lever located at the rear of the action; fluted bolt featuring three gas ports and a recessed bolt head; double set trigger; checkered, semi-pistol grip Monte Carlo, one piece stock with exotic wood pistol grip cap and forearm tip.
- overall length with a 600mm (23.6") barrel is 1121mm (44.1"), average weight is 3.2kg (7.05lbs).
- similar to the Voere model 2130E which features a single adjustable or double set trigger.
- similar to the Voere model 2130F which features a direct acting shotgun pattern trigger.

Manufacturer

- "VOERE Voehrenbach Germany", "VOERE Vöhrenbach Germany", "VOERE Vohrenbach Germany, "VOERE GmbH. Voehrenbach Germany", "VOER GmbH Vöhrenbach Germany" or "VOERE GmbH Vohrenbach Germany" may be marked on the barrel or receiver/frame.

Action

- turn-bolt design.

Calibre

- calibre designation may be marked on the firearm.

Shots

- box magazine with front hinged floorplate.

Notes

Make

- "VOERE KUFSTEIN AUSTRIA" may be marked on the barrel or receiver/frame.

Model

- model marked on barrel as "55", usually preceeded by the name of the actual manufacturer; known examples marked, "Rheinmetall 55" and "Benteler 55".
- this is a 22 LR rifle with some unusual features.
- detachable box magazine retained by a catch at the front of the mag well, a one-piece plastic trigger-guard with the front portion recessed and striated to resemble a magazine, a "hog's-back"-style stock without cheekpiece, a rotary safety mounted at the rear of the receiver tube (right for "Safe", left for "Fire"), and an oval hole at the top front of the bolt, through which the firing-pin is visible; when the rifle is cocked and off "Safe" a red-painted portion of the firing-pin is visble through this hole.
- marked "Voere Kufstein/Austria CAL 22 LR" and the serial number on the left side of the barrel, the serial number repeated again on the left side of the receiver, and "55" on the right side of the barrel, preceeded by the factory that actually built the rifle (examples include "RHEINMETALL" and "BENTELER").

Manufacturer

- "VOERE KUFSTEIN AUSTRIA" may be marked on the barrel or receiver/frame.

Action

- blow-back.

Serial Number

- numbered on left side of barrel and receiver.
- known example had six digit number without prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "VOERE KUFSTEIN AUSTRIA" may be marked on the barrel or receiver/frame.
Model	- Introduced in 2014. - Modular rifle based on the Voere LBW action in an adaptable aluminium chassis; interchangeable barrel and bolt head system (except for version in .338 Lapua Magnum). - Features include: round fluted steel or stainless steel or carbon fibre rifled barrel with threaded muzzle; may have ported muzzle brake threaded at the front; version with integral sound suppressor/silencer barrel also available; aluminium forend with accessory rails located over and to the left and right of the barrel; may be equipped with a bipod; may have removable magazine guide or tool compartment on the underside of the forend forward of the magazine well; receiver/frame with integral accessory rail over the right side ejection port; spiral fluted bolt with right side bolt handle; rear mounted three position safety/action lock on the right of the bolt; may have serrated recessed thumb groove on back of bolt to decock the action with forward pressure; cocked indicator on back of bolt; bolt stop button on left rear of receiver/frame; ambidextrous magazine release on left and right side of the magazine well; AR15 type pistol grip with or without adjustable palm rest; telescopic folding stock with adjustable cheekpiece and butt pad. - Overall length with a 685mm (27") barrel and muzzle brake is 1280mm (50 3/8") with stock extended, and 1000mm (39.3") with stock folded, average weight with muzzle brake, bipod, and 5 shot magazine is 6.8kg (14.9lbs).
Manufacturer	- "VOERE KUFSTEIN AUSTRIA" may be marked on the barrel or receiver/frame.
Action	- turn-bolt design.
Serial Number	- serial number is marked on the right side of the receiver/frame, forward of the ejection port. - serial number of a referenced example consisted of a two letter prefix followed by four numbers.
Calibre	- may be marked on the barrel.
Shots	- detachable box magazine
Canadian Law Comments	- one version of this firearm is equipped with an integral sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada. - when the sound suppressor/silencer (prohibited device) of the abovementioned version is removed, the firearm is correctly identified as a "Non-Restricted Firearm".

Notes

Make

- "VOERE KUFSTEIN AUSTRIA" may be marked on the barrel or receiver/frame.

Model

- model designation is not marked on the firearm.
- this is a generic entry for those Voere combination guns that are not identifiable as to model.
- features include: over and under barrel configuration; front hinged receiver/frame with a barrel release located on the upper tang; boxlock; hammerless; single trigger; barrel selector switch located on the left side of the receiver/frame above the trigger guard; blued receiver/frame and barrels; wood stock with a pistol grip.

Manufacturer

- "VOERE KUFSTEIN AUSTRIA" may be marked on the barrel or receiver/frame.

Action

- over and under barrel pattern.

Serial Number

- serial number is marked on the underside of the receiver/frame and may be repeated on the bottom side of the barrels.
- observed specimen had six digits.

Notes

Make

- "VOERE KUFSTEIN AUSTRIA" may be marked on the barrel or receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- introduced in 2018. - model may be marked on the firearm. - rifle uses carbon fibre, polymer, and other lightweight materials to reduce overall weight, and functions with magazines designed for the M-16 and AR-15 rifle. - features include: round carbon fire rifled barrel with integral ported muzzle brake; version with integrated sound suppressor/silencer barrel also available; one piece synthetic pistol grip shoulder stock; inset rail on underside of forend; flat top steel receiver/frame; may have optic/accessory rail over the right side ejection port; right side oversized bolt handle; action cocks when opened; right side two position safety lever and action lock on bolt with corresponding vertical slot in stock above the round trigger guard; adjustable trigger; external lateral magazine well on left side of the receiver/frame forward of the trigger guard; AR-15 style magazine release on rear underside of mag well; bolt retention button on left side of the receiver/frame behind the mag well; shoulder stock with adjustable cheekpiece and multi position telescoping butt pad. - overall length with a 500mm (19.6") barrel is 1000mm (39.37"); weight is 2kg (4.4 lbs).
Manufacturer	- "VOERE KUFSTEIN AUSTRIA" may be marked on the barrel or receiver/frame.
Action	- turn-bolt design.
Serial Number	- serial number is marked on the right side of the receiver/frame. - serial number of a reference example consisted of two letter prefix "PG" and four numbers.
Calibre	- marked on the right side of the receiver/frame, between the ejection port and barrel.
Shots	- detachable box magazine. - use standard factory AR15/M16 magazines.
Canadian Law Comments	- as it left the factory, this firearm is equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada. - when the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". - note that removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer (prohibited device) including all internal parts, baffles, wipes, end caps, mounting hardware and the device body must be removed. - the Voere S16 uses detachable box magazines interchangeable with the AR-15 rifle. Because semi-automatics are limited to a five (5) shot magazine capacity in accordance with the CC PART III, S. 84, Regulations PART 4 Para 3. (1) (a) (ii) "The Former Cartridge Magazine Control Regulations", this limits the magazine capacity to five (5) shots, despite the S16 being designed as a bolt action.

Notes

Make	- "VOERE KUFSTEIN AUSTRIA" may be marked on the barrel or receiver/frame.
Model	- model designation is not marked on the firearm. - this is a generic model for those rifles that have no model markings, other entries exist which may better identify the firearm being examined. - these rifles were built on both commercial Mauser actions and surplus M98 actions. - numerous models and variations exist.
Manufacturer	- "VOERE KUFSTEIN AUSTRIA" may be marked on the barrel or receiver/frame.
Serial Number	- may be marked on the receiver ring and/or on the barrel.
Calibre	- calibre is usually marked on the barrel and can be in English or Metric.
Shots	- may have an integral or a removable box magazine.

Notes

Make - "VOERE" is marked on the left side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- The model designation is not marked on the firearm. - The "Victor 3" is a modular, Remington 700 style bolt-action, designed to accept various proprietary barrels and bolts to form multiple barrel lengths and caliber combinations. It is sold as both a finished firearm and a barreled action with various aftermarket stock and chassis options. - Features include: modular receiver/frame and bolt to allow for different caliber and barrel configurations; magazine release located ahead of the trigger guard; safety lever located on the right side of the receiver/frame tang; may come equipped with a synthetic stock; may feature an adjustable length of pull and adjustable cheek piece.
Manufacturer	- "VOERE" is marked on the left side of the barrel.
Action	- Turn bolt operated.
Serial Number	- The serial number is marked on the right side of the receiver/frame.
Calibre	- The calibre designation is marked on the barrel.
Shots	- Designed to accept AICS/AW type magazines. - Detachable box magazine.
Canadian Law Comments	- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

Notes

Make

- "VOERE KUFSTEIN AUSTRIA" is marked on the left side of the barrel near the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- Introduced in 2014. - "X3" may be marked on the firearm. - Modular rifle based on the Voere LBW action in an adaptable aluminium chassis, with interchangeable barrel and bolt head system. - Features include: round fluted stainless steel or carbon fibre rifled barrel with threaded muzzle; may have ported muzzle brake threaded at the front; version with integral sound suppressor/silencer barrel also available; aluminium forend with accessory rails located over and to the left and right of the barrel; may be equipped with a bipod; may have removable mag guide or tool compartment on the underside of the forend forward of the magazine well; receiver/frame with integral accessory rail over the right side ejection port; spiral fluted bolt with right side bolt handle; rear mounted three position safety/action lock on the right of the bolt; serrated recessed thumb groove on back of bolt to decock the action with forward pressure; cocked indicator on back of bolt; bolt stop button on left rear of receiver/frame; ambidextrous magazine release between the round trigger guard and magazine well; trigger guard pivots to the left or right for use with gloves; AR15 type pistol grip with or without adjustable palm rest; telescopic folding stock with adjustable cheekpiece and butt pad. - Overall length with a 685mm (27") barrel and muzzle brake is 1330mm (52.3") with stock extended, and 930mm (36.6") with stock folded, average weight with muzzle brake, bipod, and 5-shot magazine is 7.5kg (16.5 lbs).
Manufacturer	- "VOERE KUFSTEIN AUSTRIA" is marked on the left side of the barrel near the receiver/frame.
Action	- turn-bolt design.
Serial Number	- serial number is marked on the right side of the receiver/frame, forward of the ejection port. - serial number of a referenced example consisted of a two letter prefix followed by four numbers.
Canadian Law Comments	- one version of this firearm is equipped with an integral sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada. - when the sound suppressor/silencer (prohibited device) of the abovementioned version is removed, the firearm is correctly identified as a "Non-Restricted Firearm".

Notes

Make

- make is marked on the barrel.

Model

- model designation is not marked on the firearm.
- may be marked: "Volcanic New Haven Arms Company Patent Feb. 14, 1854 New Haven Conn.".
- manufactured between 1857 and 1861.
- features: bronze frame; blued barrel and magazine tube; case-hardened operating lever/trigger guard; no forend; straight-wrist buttstock with a concave brass shoulder butt-plate.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- manufacturer is marked on the firearm.
Action	- manually operated, lever actuated, repeating fiream.
Serial Number	- The serial number is marked on the receiver/frame and on major components.
Calibre	- Volcanic ammunition consists of hollow-based bullets similar to the "Minie ball", with loose powder packed into the base cavity and held there by a cork disc with a fulminate of mercury priming charge on the inner side of the cork. During operation, the priming charge would be struck by the firing pin to fire the cartridge, and the entire bullet would be propelled down the bore (a very early progenitor of "caseless ammunition"). - Volcanic ammunition is listed in various references as being 30, 31 or 32 Calibre, 36 or 38 Calibre and 40 or 41 Calibre. The surviving ammunition packages have printed labels designating the contents as Cartridge No. 1 and Cartridge No. 2 which does not assist in determining the calibre.
Shots	- these firearms utilize a tubular under-barrel magazine. - there is some question as to the actual magazine capacity of these firearms, references indicate that the 16 1/2" carbine accepts 20 cartridges in the magazine, the 20" carbine, 25 cartridges and the 25" carbine, 30 cartridges. (All dependent on the barrel length and magazine tube length.)
Remarks	- these rifle & carbine models were built between 1857 and 1861 by the New Haven Arms Company. - the New Haven Arms Company was the successor to both the Volcanic Repeating Arms Company and the early Smith & Wesson Company wich both produced Volacanic firearms. - the Volcanic Repeating Arms Company was re-organized as the New Haven Arms Company in 1857 by Oliver Winchester and eleven other share holders. This group of shareholders emerged as the owners of the plant, machinery and patents of the Volcanic Repeating Arms Co. after the Volcanic Repeating Arms Co became insolvent 18 February, 1857.

Notes

Make

- "THE VOLCANIC" over "REPEATING ARMS CO." over "PATENT NEW HAVEN CONN. FEB. 14. 1854" is marked on the barrel.

Model

- model designation is not marked on the firearm.
- "THE VOLCANIC" over "REPEATING ARMS CO." over "PATENT NEW HAVEN CONN. FEB. 14. 1854" is marked on the barrel.
- Volcanic Carbine are lever-operated rifles built between 1855 and 1857 by the "Volcanic Repeating Arms Company"; this company was the successor to the early version of Smith & Wesson, and produced lever-action handguns and rifles until it was re-organized as the "New Haven Arms Company" in 1857 by Oliver Winchester and seven other share holders of the Volcanic Repeating Arms Co. This group of shareholders emerged as the owners of the plant, machinery and patents of the Volcanic Repeating Arms Co., these patents were used to (first) the "Henry" repeating rifle, and then the "Winchester" line of lever-action repeaters.
- although all new production by the Volcanic Repeating Arms Co. was chambered for 41 Volcanic, several hundred "in progress" 31-calibre Volcanic handguns that had been transferred from the former manufacturer, Smith & Wesson, were also finished under the stewardship of the new company.
- features include: blued barrel and magazine tube on a brass frame; varnished wooden stock with crescent buttplate; operated by a ring lever forming the trigger-guard; octagonal barrel; under-barrel tubular magazine; fixed open sights; and often seen with moderate engraving on the receiver/frame.

Manufacturer

- "THE VOLCANIC" over "REPEATING ARMS CO." over "PATENT NEW HAVEN CONN. FEB. 14. 1854" is marked on the barrel.

Action

- manually operated, lever actuated, repeating firearm.

Serial Number

- The serial number is marked on the receiver/frame and on major components.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- Volcanic ammunition consists of hollow-based bullets similar to the "Minie ball", with loose powder packed into the base cavity and held there by a cork disc with a fulminate of mercury priming charge on the inner side of the cork. During operation, the priming charge would be struck by the firing pin to fire the cartridge, and the entire bullet would be propelled down the bore (a very early progenitor of "caseless ammunition").
- Volcanic ammunition is listed in various references as being 30, 31 or 32 Calibre, 36 or 38 Calibre and 40 or 41 Calibre. The surviving ammunition packages have printed labels designating the contents as Cartridge No. 1 and Cartridge No. 2 which does not assist in determining the calibre.

Shots

- these firearms utilize a tubular under-barrel magazine.
- there is some question as to the actual magazine capacity of these firearms, references indicate that the small-frame 31 calibre Volcanic pistol would accept between 6 and 8 cartridges, and the large-frame 41 calibre Volcanic would accept between 8 and 10 cartridges and the 16 1/2" carbine accepts 20 cartridges in the magazine. (All dependent on the barrel length and magazine tube length.)

Remarks

- these rifle & carbine models were built between 1855 and 1857 by the Volcanic Repeating Arms Company.
- the Volcanic Repeating Arms Company was the successor to the early version of Smith & Wesson, and produced lever-action handguns and rifles until it was re-organized as the New Haven Arms Company in 1857 by Oliver Winchester and seven other share holders of the Volcanic Repeating Arms Co. This group of shareholders emerged as the owners of the plant, machinery and patents of the Volcanic Repeating Arms Co. after the Volcanic Repeating Arms Co became insolvent 18 February, 1857.
- It is reported that all new production by the Volcanic Repeating Arms Co. was chambered for the 41 Volcanic cartridge, several hundred "in progress" 31-calibre Volcanic handguns that had been transferred from the former manufacturer, Smith & Wesson, were also finished under the stewardship of the new company.

FRT Report

Firearm Reference Number (FRN): 145280
Make: Volkov Yartsev
Model: VYa

Summary

Make:	Volkov Yartsev
Model:	VYa
Manufacturer:	Russian State Arsenal, Kovrov
Level:	Manufacturer Specifications and Commercial Customization
Type:	Cannon
Action:	Full Automatic
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
145280 - 1	23X152B	N/A	1650	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- the make is not marked on the firearm; this make is derived from the names of the two lead designers who produced this cannon, Volkov and Yartsev.
Model	- the model is marked on the firearm, in Cyrillic, as "VYa"; the Cyrillic representation of VYa resembles "B (backwards R)". The "ya" sound in Russian is symbolized by a single character that resembles a mirror-image capital R. - this is a gas-operated cannon developed by Volkov and Yartsev at the beginning of World War Two, while working at Tula's TsKB-14 design bureau, and based on the Berezin heavy machine gun; this cannon is essentially a greatly-enlarged Berezin UBK machine gun, developed as a strafing weapon to counter German armoured vehicles. This cannon was commonly mounted on the Illyuishin Il-2 "Sturmovik" ground-attack aircraft. - features include: very thin receiver (in common with the Berezin machine gun); blued finish; above-barrel gas piston (which may or may not also have a pneumatic cocking piston located above it); rectangular-profile receiver with a reciprocating bolt locked by a sideways-moving cross-piece; and solenoid or pneumatic operating controls.
Manufacturer	- the manufacturer or logo thereof is marked on the firearm.
Action	- gas operaterd.
Serial Number	- numbered on the receiver/frame.
Shots	- belt fed.

Firearm Reference Number (FRN): 56737
Make: Volks Gewehr
Model: VG1

Summary

Make:	Volks Gewehr
Model:	VG1
Manufacturer:	Walther (ac)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
56737 - 3	8MM MAUSER	5	533	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "VG 1" may be marked on the left side of the receiver/frame.
- "VG" is the abbreviation for "Volks Gewehr".
- "Volks Gewehr" means people's rifle.
- these rifles were produced by several different contractors in Germany, and may or may not be marked with a manufacturer's code or name.

Model

- "VG 1" may be marked on the left side of the receiver/frame.
- this is a radically simplified bolt-action rifle made at the end of World War II as a "last-ditch" firearm made for issue to German civilians.
- feature include; made to use as many existing parts as possible utilizing existing MG42 barrels and K43/G43 magazines, 98 rifle receiver/frame, etc..., as many stamped parts as possible, and a minimum of machining.

Manufacturer

- "ac" the code for Walther may be marked on the left side of the receiver/frame.

Serial Number

- may or may not be serial numbered.

Shots

- may have an internal magazine or a detachable box magazine.

Notes

Make

- make is not marked on the firearm.
- "Volks Gewehr" means people's rifle.
- these rifles were produced by several different contractors in Germany, and may or may not be marked with a manufacturer's code or name.

Model

- Introduced in 1944.
- model not marked on firearm.
- this model was intended as to be economocally produced to help in the defense of Germany near the end of World War Two when firearms and material were scarce (to facilitate production this rifle mostly comprised of stampings and castings).
- not often found but are highly sought after by collectors of this period (late 1944 and early 1945).

Manufacturer

- "dfb" was the code for "Gustloff-Werke".

Serial Number

- sample imaged has no serial number.

Calibre

- also known as 8MM KURTZ or M43.

Shots

- Introduced in 1944 with 30 shot capacity, magazine.
- detachable box magazine.

Notes

Make

- "Volquartsen" and/or "Volquartsen Custom" logo is usually marked on the receiver/frame.
- "Volquartsen Custom" logo is a stylized letter "C" over a letter "V" or a letter "C" with a letter "V" inside.

Model

- this is the "Lightweight" offering from Volquartsen that incorporates their own receiver/frame design that is also offered as a receiver/frame only. This receiver/frame is designed as a replacement for the Ruger model 10/22 and accepts all aftermarket accessories designed for the 10/22.
- features include: 419mm carbon fiber light-weight tension barrel (available with an optional compensator); choice of a brown laminated wood stock, Hogue Overmolded rubber stock or a McMillan sporter or thumbhole stock; not equipped with iron sights, receiver/frame is fitted with a weaver type scope mount base; cross-bolt safety.
- several other variations of this model are also offered. All use the same basic receiver/frame but feature different stock and/or barrel options.

Manufacturer

- Volquartsen Custom, Limited was established in 1974.
- Volquartsen Custom, Limited is located in Carroll, Iowa, U.S.A.
- Volquartsen Custom, Limited manufacturers its own line of handguns and rifles.
- Volquartsen Custom, Limited also offers a full line of customized Ruger firearms.

Action

- blowback operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- marked on the receiver/frame, rationalization unknown.
Barrel	- barrel length including compensator is 457mm (18").
Shots	- designed to use a Ruger® type detachable box magazine. - aftermarket magazines are available that will increase the shot capacity.

Firearm Reference Number (FRN): 191522
Make: Volquartsen
Model: Summit

Summary

Make:	Volquartsen
Model:	Summit
Manufacturer:	Volquartsen Custom
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
191522 - 1	22 LR	10	432	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Volquartsen" is marked on the left side of the receiver/frame.
- "Volquartsen Custom" is located in Carroll, Iowa, U.S.A.
- "Volquartsen" logo is a stylized letter "C" over a letter "V" or a letter "V" within a "C".

Model

- introduced in 2018.
- "SUMMIT" is marked on the left side of the receiver/frame.
- "SUMMIT" receiver/frame resembles a Ruger model 10/22 rifle.
- "SUMMIT" uses a toggle style, straight-pull action similar to biathlon style rifles.
- "SUMMIT" is also sold as a barrelled receiver/frame.
- "SUMMIT" has a lightweight carbon fiber barrel, featuring a threaded muzzle.
- "SUMMIT" is based on a concept originally developed and sold by Primary Weapons Systems.
- features include: no sight; carbon fiber barrel with a threaded muzzle; flat sided aluminium alloy receiver/frame with integral optical rail; right side ejection; right side cocking handle having a rectangular shaped bolt knob pointing downward; removable trigger group assembly; cross bolt safety is located on the forward part of the trigger guard; magazine release lever is located on the front of the trigger guard; one piece, synthetic or laminated thumbhole stock; black with colour stock finish.
- overall length for a 432 mm (17") barrel is 883 mm (36"), and the average weight is 2.61kg (5.75 lbs).

Manufacturer

- "Carroll, IA" is marked on the right side of the receiver/frame.
- "Volquartsen Custom, Limited" was established in 1974.
- "Volquartsen Custom, Limited" is located in Carroll, Iowa, U.S.A.
- "Volquartsen Custom, Limited" manufacturers its own line of handguns and rifles.
- "Volquartsen Custom, Limited" also offers a full line of customized Ruger firearms.
- "Volquartsen Custom, Limited" logo is a stylized letter "C" over a letter "V" or a letter "C" with a letter "V" inside.

Action

- toggle style, straight-pull action.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the left side of the receiver/frame. - serial number of referenced examples consisted of a three letter prefix and five numbers.
Calibre	- calibre designation is marked on the barrel.
Shots	- detachable rotary box magazine. - uses all magazines available for the Ruger 10/22 type rifle.

Notes

Make

- "MADE FOR VON LENGERKE AND DETMOLD NEW YORK" or "VL.&D." may be marked on the firearm.
- "Von Lengerke & Detmold" trademark was a triangle containing a soaring duck and the letters "VL. & D.".
- "Von Lengerke & Detmold Incorported" was a dealer and importer located in New York City, New York, U.S.A. from 1884 to 1939.
- "Von Lengerke & Detmold" was purchased by Abercrombie & Fitch.

Model

- "THE KNOCKABOUT GUN" or "THE KNOCK ABOUT GUN" is marked on the side of the receiver/frame.
- features include: side by side barrels with solid rib and bead front sight; front hinged receiver/frame with top tang mounted break open lever and slide type safety; side or box lock; hammerless; double triggers; extractors or ejectors; splinter forearm and straight or semi-pistol grip stock.

Manufacturer

- "AF", "AFC" , "A. Francotte & Cie", "A. Francotte a Liege" or "Francotte" are some of the markings found on Francotte manufactured firearms.

Action

- side by side pattern.

Remarks

- "THE KNOCKABOUT GUN" name was used by Von Lengerke & Detmold Inc. of New York City, New York, U.S.A. on shotguns manufactured by Auguste Francotte & Company.
- "KNOCKABOUT" name was used by Montgomery Ward & Company on shotguns manufactured by Crescent Fire Arms Company from 1904 to 1925 and by J. Stevens Arms Company after 1925.

FRT Report

Firearm Reference Number (FRN): 126753
Make: Vostok
Model: IJ-38

Summary

Make:	Vostok
Model:	IJ-38
Manufacturer:	Russian State Arsenal, Izhevsk
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
126753 - 1	177 PELLET	1	450	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MADE IN USSR" and "VOSTOK" are marked on the right side of the barrel.
- "VOSTOK" and "BAIKAL" were brand or trade names used by RAZNOEXPORT.
- RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export, prior to the privatization of the Russian State Arsenals.
- "VOSTOK" and "BAIKAL" names were used regardless of the origin / manufacturer of the firearms being sold.

Model

- one sample observed featured the model designation, a backwards "N" and two "K's" back-to-back (both cyrilic characters which translates to "IJ") followed by "-38" was marked on top of the receiver/frame.
- features include: round barrel; fixed hooded front sight and adjustable rear sight; grooved tubular receiver/frame; break opening lever located on the left side of the barrel; single trigger mechanism; hammerless; no manual safety; one piece semi-pistol grip stock with pistol grip cap and buttplate.
- overall length with a 450mm (17 3/4") barrel is 1048mm (41 1/4"), average weight is 2.3kg (5.1lbs).

Manufacturer

- one sample observed featured the manufacturer's logo (a vertical arrow in a shield) marked on top of the receiver/frame.

Action

- spring-piston powered.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- one sample observed featured the serial number marked on the left side of the barrel assembly and consisted of one cyrilic caracter followed by five digits.

Calibre

- calibre designation was not marked on the firearm.

Other Markings

- one sample observed featured "MADE IN USSR" marked on the right side of the barrel assembly.

Firearm Reference Number (FRN): 127429
Make: Vostok
Model: IZH-40

Summary

Make:	Vostok
Model:	IZH-40
Manufacturer:	Russian State Arsenal, Izhevsk
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Air,Spring or Gas
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
127429 - 1	177 PELLET	1	222	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Non-Commercial Customization	

Notes

Make	- "VOSTOK" is marked on the right side of the barrel hinge of an observed example. - "VOSTOK" and "BAIKAL" were brand or trade names used by RAZNOEXPORT. - RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export, prior to the privatization of the Russian State Arsenals. - "VOSTOK" and "BAIKAL" names were used regardless of the origin / manufacturer of the firearms being sold.
Model	- a backwards "N" and back to back "K"s (translates from Russian as "IZH") and "-40" is marked on the top rear of the air chamber. - features include: hooded pin front sight and adjustable spring loaded rear sight; plastic stock.
Manufacturer	- manufacturer's designation may not be marked on the firearm.
Action	- spring piston design, hinged barrel. - does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.
Serial Number	- serial number on observed sample was marked on the left side of the barrel hinge.
Other Markings	- "Made in USSR" is marked on the side of barrel block.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold.
- after the demise of the Soviet Union, RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called "Baikal International Trading".
- when the Izhevsk Mechanical Plant launched its own export sales branch it also took the "brand name" Baikal.
- Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.

- "Margolin" target pistol was designed in the early 1950s by Mikhail Margolin.
- "MU2-3" is marked on the top of the receiver/frame.
- the Russian cyrillic character "U" with a tail, has no direct English translation but is pronounced as "tse" and has been translated as "Ts" as in "cats" or "Tz".
- Russian manufactures have substituted this letter with a "C" in their advertisments.
- "MU2-3" has been amended to the model designation of "MC2-3".
- this model is distinguished from other models in this series by the way in which the triger is set .
- the trigger is set in this model by rotating the ring shaped trigger guard.

Manufacturer

- the Tula arsenal markings may be located on the right side of the barrel just forward of the receiver/frame.

Serial Number

- serial number is marked on top of receiver/frame.

Calibre

- calibre is marked on the right side of the barrel just forward of the receiver/frame as ".22".

Remarks

- this is a freepistol used in Olympic target competition.
- the U in the model is a letter from the Cyrlic alphabet and has a comma like tail on the lower right corner, it is pronounced "tse".
- the interpetation of this Cyrlic letter has been done several ways: U,Tz,Ts,and MC.

Notes

Make

- "VOSTOK" and "BAIKAL" were brand or trade names used by RAZNOEXPORT.
- RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export, prior to the privatization of the Russian State Arsenals.
- "VOSTOK" and "BAIKAL" names were used regardless of the origin / manufacturer of the firearms being sold.

Model

- "Margolin" is not marked on the firearm.
- "Margolin" target pistol was designed in the early 1950s by Mikhail Margolin.
- "Margolin MCM" is a blowback operated, self-loading, magazine fed, pistol.
- "MUM" may be marked on the left side of the slide.
- the Russian cyrillic character "U" with a tail, has no direct English translation but is pronounced as "tse" and has been translated as "Ts" as in "cats" or "Tz".
- Russian manufactures have substituted this letter with a "C" in their advertisments.
- "MUM" has been amended to the model designation of "MCM".

Action

- blowback operated.

Serial Number

- serial number rationalization unknown.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- Formerly the firm RAZNOEXPORT handled all production from the Russian Arsenal system destined for foreign sales or export. Baikal and Vostok were brand or trade names within RAZNOEXPORT firm. These brand names were used regardless of the origin / manufacturer of the firearms being sold.
- After the demise of the Soviet Union, RAZNOEXPORT was phased-out. A new export firm was founded to meet the needs of the Department of Defence Industry, this firm was called TEKHMASHEXPORT which had in its structure another firm called Baikal International Trading.
- When the Izhevsk Mechanical Plant launched its own export sales branch it also took the "brand name" Baikal.
- Izhmech was permitted to retain the name Baikal and TECHMASHEXPORT had to dismantle Baikal International Trading.

Remarks

- This firearm has been marketed and manufactured in the past under a variety of names, Baikal, Vostok etc.
- at present (1999) the MCM pistol is a product of the Izhevsky Mekhanichesky Zavod (Izhmech) and is featured in their 1999 catalog as the MCM Small-Bore Pistol.
- Izhmech has its origins in 1942 when the manufacturing at the Russian State arsenal at Izhevsk was split into two entities; Izhmash & Izhmech.
- immediate production in 1942, at Izhmech, consisted of Tokarev TT33 pistols, Model 1895 Nagant revolvers and PTRS Anti-Tank rifles.
- After WWII Izhmech produced the PM Makarov pistol and the APS Stechkin pistol.
- The present Izhevsky Mekhanichesky Zavod (Izhmech) is one of several companies that resulted from the privatisation of the Russian State Arsenal at Izhevsk (circa) 1994.
- the product line of Izhevsky Mekhanichesky Zavod (Izhmech) consists of Baikal "Brand name" sporting firearms, Makarov and other pistols under the IZH model prefixes and parts for Kalashnikov type firearms.
- The other arms factory at Izhevsk (Izhmash - Joint Stock Company) product line consists of Kalashnikov type rifles, carbines and shotguns (Saiga), Dragunov (SVD) type sporting rifles (TIGR).

Notes

Make

- "W.A.C." is marked on the slide and may be repeated on the grips.
- "WAC" or "W.A.C." is an abbreviation that has been used by the following orginizations: "Winfield Arms Corporation", "Western Arms Corporation" in the U.S.A. and "Western Arms (Canada)"

Model

- manufactured from 1921 to 1965.
- imported into North America from the 1950s to 1965.
- model designation is not marked on early versions.
- "Modele A" is usually marked on the left side of the slide of later production versions.
- "A" model was also known as "Le Defendeur".
- "A" model is based on the FN-Browning 1906.
- features include: fixed blade front sights and groove in the top of the slide for a rear sight; flat sided, open top slide with rear grip serrations; striker fired; receiver/frame has a grip safety; single action trigger mechanism; manual safety lever is mounted on the left side of the receiver/frame; detachable box magazine release is mounted on the bottom of the rear grip strap; checkered plastic or hard rubber grip plates; blued finish.

Manufacturer

- "MAB" is marked on the slide.
- "MAB" was an acronym used by "Manufacture d'Armes de Bayonne" of France.
- "Manufacture d'Armes de Bayonne (MAB)" was founded in 1921.
- "Manufacture d'Armes de Bayonne (MAB)" ceased in 1985.

Action

- blowback operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is usually marked on the right side of the receiver/frame, above the trigger or on the slide.
Calibre	- calibre is usually marked on the slide or the chamber of the barrel.
Shots	- detachable box magazine.
Importer	- there is confusion, caused by conflicting references, whether "WAC" is Winfield Arms Corporation (WAC) or Western Arms Canada (WAC). - the worst possible case is both are correct and it is impossible to differentiate between these two importers who market "MAB" firearms under their own "Brand Name".
Other Markings	- markings on the slide may be: "PISTOLET AUTOMATIQUE MAB BREVETE - S.G.D.G." and "MODELE A CAL. 25", or "PISTOLET AUTOMATIQUE MAB BREVETE" and "MODELE A". and "MADE IN FRANCE FOR W.A.C."
Remarks	- there is confusion, caused by conflicting references, whether "WAC" is Winfield Arms Corporation (WAC) or Western Arms Canada (WAC). - the worst possible case is both are correct and it is impossible to differentiate between these two importers who market "MAB" firearms under their own "Brand Name".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- single action, blowback operation.
Serial Number	- serial number is located on the right side of the receiver/frame, above the trigger.
Calibre	- calibre is marked on the slide or the chamber of the barrel.
Shots	- detachable box magazine.
Importer	- there is confusion, caused by conflicting references, whether "WAC" is Winfield Arms Corporation (WAC) or Western Arms Canada (WAC). - the worst possible case is both are correct and it is impossible to differentiate between these two importers who market "MAB" firearms under their own "Brand Name".
Other Markings	- markings on the slide may be: "PISTOLET AUTOMATIQUE MAB BREVETE - S.G.D.G." and "MODELE D", or "PISTOLET AUTOMATIQUE CAL 7.65" and "MAB BREVETE MODELE D". and "MADE IN FRANCE FOR W.A.C."
Remarks	- there is confusion, caused by conflicting references, whether "WAC" is Winfield Arms Corporation (WAC) or Western Arms Canada (WAC). - the worst possible case is both are correct and it is impossible to differentiate between these two importers who market "MAB" firearms under their own "Brand Name".

Notes

Make

- "WALCH" over "FIRE ARMS CO." over "N.Y." is usually marked on the left side of the barrel.
- "PATENTED FEB. 8, 1859" is marked on the right side of the barrel.
- "WALCH FIREARMS COMPANY" was located in New York city, New York, U.S.A. from 1859 to 1862.

Model

- model designation is not marked on the firearm.
- "PATENTED FEB. 8, 1859" is marked on the right side of the barrel.
- manufactured in the early 1860s.
- total production of 200 units.
- features include: fixed sights; octagonal barrel with an under barrel mounted loading lever; open top receiver/frame with a removable cylinder witha rounded raised rib over each chamber; exposed double spurred hammer; double triggers; single action trigger mechanism; checkered or plain walnut grip plates; blued finish.
- the cylinder consists of six chambers, each having two nipples and taking two charges. The front charge is fired by the outer nipple as struck by the right hammer released by the right trigger and the inner charge is fired by the left hammer released by the left trigger.

Manufacturer

- manufacturer's designation is usually not marked on the firearm.
- Union Knife Company was located in Naugatuck, Connecticut, U.S.A. from 1860 to 1865.
- Union Knife Company manufactured Lindsay and Walch revolvers.
- Union Knife Company also sold Bliss & Goodyear revolvers.

Action

- front loading.

Other Markings

- "PATENTED FEB. 8, 1859" is marked on the right side of the barrel.

Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
132335 - 1	58 FLINTLOCK	1	241	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "DUMBAR" over "D. WALKER" was observed marked on the lock.

Model

- model designation is not marked on the firearm.
- manufactured between 1750 and 1810.
- traditional Scottish military flintlock pistol.
- features include: all steel construction; round, stepped barrel slightly flared at the muzzle; ram's horn butt with a threaded, centre knob for the touch hole pick; button head, turned ram rod; goose neck cock; lobed trigger tip; belt hook attachment on the left side.
- a very similar pistol, the "Black Watch Pistol" is known under several similar names, and must not be confused with the "Murdoch" pistol; where the "Murdoch" pistol has a "ram's-head" butt, with curlicue extensions that help to protect a ball-headed vent-pick threaded into the butt, the "Black Watch Pistol" is made with an all-brass butt and stock, with a double-lobed "kidney-shaped" butt that allows the pistol to be used as a club after the shot is fired.

Manufacturer

- Daniel L. Walker was located in Dumbarton, Scotland from 1750 to 1810.
- Daniel L. Walker's business was taken over by his Daniel Walker in 1810.

Action

- muzzle loader.

Other Markings

- the barrel of an example was marked "H.R.H" and with the Roman Numerals "VIII".

119797 - 2	14 GA X 2 1/2"	2	711	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "WALLACE" was observed marked on the receiver/frame.

Model

- model designation is not marked on the firearm.
- this is a generic entry for those Wallace side by side shotguns that are not identifiable as to model.
- features include: side by side barrels; front hinged receiver/frame with top tang mounted break open lever; exposed hammers or hammerless; double triggers; checkered wooden beavertail forearm and pistol grip buttstock.

Manufacturer

- William Wallace was located at 66 King Street, Wigton, Cumberland, England circa 1900.

Action

- side by side barrel configuration.

Serial Number

- may not be serialized on the receiver/frame
- serial number is on the underside of the barrel and may be repeated on the water table.
- observed specimen had four number without a letter prefix or suffix.

Other Markings

- "Wallace England" is marked on both sides of the receiver/frame.
- "England Fine Damascus Steel" may be marked on the barrels.

Make: Wallace, W
Model: Side By Side Percussion

Summary

Make:	Wallace, W
Model:	Side By Side Percussion
Manufacturer:	Wallace, W
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Multi-Barrel
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
103735 - 1	12 GA PERCUSSION	2	793	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
103735 - 2	12 GA PERCUSSION	2	793	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "WALLACE" is marked on the receiver/frame.

Model

- model designation is not marked on the firearm.
- "LONDON FINE TWIST" was observed on the rib between the barrels.
- this is a generic entry for those Wallace side by side muzzle-loading percussion ignition shotguns that are not identifiable as to model.
- features may include; side lock or boxlock action; muzzle loading, percussion ignition; side by side barrel configuration; exposed double hammers; double triggers; ramrod ferrules below the barrels; checkered straight English style hardwood buttstock; checkered forearm; engraved side plates or receiver/frame.

Manufacturer

- William Wallace was located at 66 King Street, Wigton, Cumberland, England circa 1900.
- known example of a percussion shotgun marked "WALLACE" had English definitive Birmingham proof marks which dated c. 1868-1925; this seems to indicate that William Wallace was in business prior to 1900 although research has been unable to confirm exact dates.
- research has revealed that other British firms with the last name of "Wallace" were not in business past circa 1858; this would therefore preclude the use of the above noted Birmingham proof mark by any other known firm with the exception of William Wallace.

Action

- side by side barrel configuration.

Calibre

- calibre designation may be marked on the barrels.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - British proof marks may be stamped on the barrels.

Notes

Make

- "WALTERS & SON" is marked on each side of the receiver/frame.
- Walters' name was associated with a number of gun makers and dealers in Belgium, United Kingdom and United States of America between 1820 and 1900.

Model

- model designation is not marked on the firearm.
- features may include: side by side barrels; front hinged receiver/frame with break open lever located on the top tang or on the underside; exposed hammers or hammerless; double triggers; checkered or plain walnut forearm and semi-pistol grip stock.

Action

- side by side configuration.

Serial Number

- serial number rationalization is unknown.
- observed serial number was located on the watertable and repeated on the underside of the barrel assembly, between the barrels near the muzzle.
- observed serial number consisted of five numbers without a letter prefix or suffix.

Other Markings

- a specimen was observed with Belgian proof mark, ELG in oval, stamped under the barrels near the chamber.

23292 - 3	6.35MM	6	180	Prohibited CC 84(1) "prohibited firearm" para. (a)(ii)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- on some early production models of this firearm the only identifier for make is the slide inscription as follows: - "WALTHER'S SELBSLADE-PISTOLE CALIBRE 6.35."
- this slide marking was later changed to read: - "SELBSLADE-PISTOLE CAL. 6.35. WALTHER'S PATENTE.".
- the "Walther banner" logo is found marked on the slide in later production pistols.

Model

- the model designation is not marked on firearm.
- may also be known as "Model 1908".
- manufacture commenced in 1908.
- the design patent was granted in 1911.
- features include: half moon blade front sight, blued finish, checkered hard rubber grips, vertical gripping striations on both sides of the rear portion of the slide, safety catch located on the left rear of the receiver/frame.
- rifling characteristics: - 4 grooves, right hand twist.

Manufacturer

- "Walther" is marked on the slide.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- blowback operated.
Serial Number	- serial number rationalization unknown. - the serial number will be found marked on the left rear of the receiver/frame. - sample serial numbers observed consisted of up to four sequential numbers without prefix or suffix.
Barrel	- firearms with 180MM length barrels were a special contract delivered to Austria in 1913.
Shots	- detachable box magazine.
Other Markings	- the following markings are usually found on the left side of the slide, but in some variants may be found on the right side of the slide. These markings may include but are not limited to: - "SELBSLADE-PISTOLE CAL. 6.35. WALTHER'S-PATENT" over top of the "WALTHER banner" company logo. - patent markings may be found on firearms and may consist of either: "D.R.P. & AUSLANDEPATENTE" or "E.R.G.M. TN & AUSLANDEPATENTE AFG". - the manufacturer's "CW" (for Carl Walther) logo is found moulded into the hard rubber hand grip plates on the right side and the "Calibre 6.35" will be found moulded into the left hand grip panel. - German proof marks of the production era will be found on the firearm (crown over letter N) located on the barrel, on the slide and on the receiver/frame.
Remarks	- there are contradictions in the references as to the date of commencement of production. The prime reference states "manufacture commenced in 1908", other references state that manufacture commenced "towards the end of 1910". This contention may be true as the patent was issued in 1911.

Notes

Make

- the "WALTHER banner" is marked on the left side of the slide.

Model

- introduced in 1909, sometimes referred to as the model 1909.
- the model designation is not usually marked on the firearm (some samples have been noted with "Mod.2" markings applied to the slide after production).
- this model was offered in two versions, the first used a groove milled into the top of the slide as a sighting channel, the second used "automatic" sights where the rear sight popped up when a cartridge was chambered.
- features include: blued finish; a knurled barrel nut/recoil spring bushing; closed top slide (the Walther model 1 had an open stop slide); safety catch mounted on the left side of the receiver/frame; magazine safety, nine (9) wide cocking serrations at the rear of the slide (this is the most important visual identifier of the model 2, the model 5 is almost identical but has sixteen (16) thin cocking serrations on the slide) and a heel mounted magazine catch.
- rifling characteristics - 6 grooves, right hand twist.

Manufacturer

- slide markings may include any or all of the following:
- on the left side - the "WALTHER banner" company logo.
- "SELBSLADE-PISTOLE CALIBRE 6.35. WALTHER'S-PATENT"
- on the right side - name and address of the factory - "Carl Walther Waffenfabrik Zella St. Bl." or as "Waffenfabrik Walther Zella St. Blasii". These markings may be found in capital letters or lowercase, the address in full or abbreviated format.
- the manufacturer's Walther "CW" monogram may be found moulded into the hard rubber hand grip plates.

Action

- blowback operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- samples examined used sequential numbers without prefix or suffix.
- the serial number is stamped on the receiver/frame on the right side, forward portion of the trigger guard.
- NOTE - the Walther model "5" (an almost identical firearm) the serial number is stamped on the left side of the receiver/frame to the rear of the trigger.

Calibre

- caliber designation is marked on the left side of the slide.

Shots

- detachable box magazine.

Other Markings

- slide markings may include any or all of the following:
- the "WALTHER banner" company logo.
- name and address of the factory - "Carl Walther Waffenfabrik Zella St. Bl." or as "Waffenfabrik Walther Zella St. Blasii". These markings may be found in capital letters or lower case letters, the address may be found in full or abbreviated format.
- the first Company address was at Zella St. Blasii in the Province of Thuringia and will be marked, as "ZELLA St. Bl.".
- in 1919 the town of Zella St. Blasii and the nearby town of Mehlis merged to become Zella-Mehlis. The second Company address may be found marked on the slide as "Zella-Mehlis (Thur.)" or as "Zella-Mehlis".
- the manufacturer's Walther "CW" (Carl Walther) monogram may be found moulded into the hard rubber hand grip plates.
- German proof marks of the production era will be found on the firearm (crown over letter N) located on the barrel, visible through the ejection port, on the lower middle part of the slide and on the receiver/frame above the trigger.

Remarks

- the key identifiers for the Walther model 2 and 5 are the cocking serrations on the slide and placement of the serial number.
- there are contradictions in the references as to the date of commencement of production. The prime reference states "manufacture commenced in 1909", other references state that manufacture commenced "early in 1913".

Notes

Make

- the "WALTHER banner" trademark will be found marked on the left side of the slide.

Model

- the model designation does not appear on the firearm.
- may also be known as "Second Model 1910".
- manufactured from 1910 to 1928.
- usually found marked on the left side of the slide under the ejection port and above the "WALTHER banner" are the words "SELBSTLADE-PISTOL CAL 7.65. WALTHER'S PATENT"
- the manufacturer's Walther "CW" monogram may be found moulded into the hard rubber hand grip plates.
- features include: fixed blade front sight mounted on the barrel, fixed rear sight mounted on the slide, hammerless, safety catch located on the rear left side of the receiver/frame, a loaded chamber indicator is found on early variations, the front of the barrel is exposed, the rear of the slide is serrated, the ejection port is located on the left side of the slide, blued finish with hard black rubber checkered grips.
- in excess of 300,000 examples of the Model 4 were produced during the production lifetime of this model.
- rifling characteristics - 4 grooves, right hand twist.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the manufacturer is derived from the slide markings which may include any or all of the following: - the "WALTHER banner" company logo. - "SELBSLADE-PISTOLE CALIBRE 7.65. WALTHER'S-PATENT" - the manufacturer's Walther "CW" monogram may be found moulded into the hard rubber hand grip plates.
Action	- blowback operated.
Serial Number	- serial numbered from 29000 to 500000, and between 29000 and 101000 shared the serial numbers with the model 5 and model 7.
Calibre	- the calibre designation appears on slide.
Shots	- detachable box magazine.
Other Markings	- slide markings may include any or all of the following: - the WALTHER banner company logo. - name and address of the factory - "Carl Walther Waffenfabrik Zella St. Bl." or as "Waffenfabrik Walther Zella St. Blasii". These markings may be found in capital letters or lowercase, the address in full or abbreviated. - the first Company address was at Zella St. Blasii in the Province of Thuringia and will be marked, as "ZELLA St. Bl.". - in 1919 the town of Zella St. Blasii and the nearby town of Mehlis merged to become Zella-Mehlis. The second Company address may be found marked on the slide as "Zella-Mehlis (Thur.)" or as "Zella-Mehlis". - usually found marked on the left side of the slide under the ejection port and above the "WALTHER banner" are the words "SELBSTLADE-PISTOL CAL 7.65. Notes

Make

- the "WALTHER banner" trademark will be found marked on the left side of the slide.

Model

- introduced in 1913, discontinued in 1918.
- the model designation is not usually marked on the firearm
- this model was offered in two versions, the first used a groove milled into the top of the slide as a sighting channel, the second used raised, fixed sights.
- features include: blued finish; a knurled barrel nut/recoil spring bushing; closed top slide; safety catch mounted on the left side of the receiver/frame; sixteen (16) narrow cocking serrations at the rear of the slide (this is the most important visual identifier of the model 5, the model 2 is almost identical but has nine (9) cocking serrations on the slide) and a heel mounted magazine catch.
- rifling characteristics - 4 grooves, right hand twist.

Manufacturer

- manufacturer's full name is marked on the slide.

Action

- blowback operated.

Serial Number

- serial number rationalization unknown.
- sample serial numbers observed consisted of five or six digits without prefix or suffix.
- on the Walther model 5 the serial number will be found stamped on the left side of the receiver/frame to the rear of the trigger.
- NOTE that the Walther model 2 has the serial number stamped on the right side, forward portion of the trigger guard.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.

Other Markings

- slide markings may include any or all of the following:
- the WALTHER banner company logo.
- name and address of the factory - "Carl Walther Waffenfabrik Zella St. Bl." or as "Waffenfabrik Walther Zella St. Blasii". These markings may be found in capital letters or lowercase, the address in full or abbreviated format.
- the first Company address was at Zella St. Blasii in the Province of Thuringia and will be so marked, as "ZELLA St. Bl.".
- in 1919 the town of Zella St. Blasii and the nearby town of Mehlis merged to become Zella-Mehlis. The second Company address may be found marked on the slide as "Zella-Mehlis (Thur.)" or as "Zella-Mehlis".
- the manufacturer's Walther banner logo may be found moulded into the hard rubber hand grip plates.
- German proof marks of the production era will be found on the firearm (crown over letter N) located on the barrel, visible through the ejection port, on the lower middle part of the slide and on the receiver/frame above the trigger.

Remarks

- the key identifiers for the Walther model 2 and 5 are the cocking serrations on the slide and placement of the serial number.
- there are contradictions in the references as to the date of commencement of production. The prime reference states "manufacture commenced in 1913", other references state that manufacture commenced "in 1915".

23297 - 1	6.35MM	8	73	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the "Walther Banner trademark" and "Walthers Patent Mod. 8." is marked on the left side of the slide and "Walther" normally will be found moulded into the lower portion of the hand grip plates.

Model

- the model designation appears on the left side of the slide as "Walthers Patent Model 8".
- the firearm was manufactured from 1920 to 1943.
- total production was approximately 200,000.
- minor variations of this model may be found with either internal or external extractor and either with or without a disassembly latch on the top right side of the receiver/frame at the front of the trigger guard.
- the eight shot capacity magazine is peculiar to all variations of the Model 8.
- features include: fixed sights, hard rubber grips, manufactured from steel, finishes available included engraving and gold plating with ivory or mother-of-pearl hand grip panels or engraving with nickel plating and mother-of-pearl hand grip panels, this pistol is normally found in blued steel finish with hard rubber hand grip panels.
- rifling characteristics - six grooves, right hand twist.

Manufacturer

- the manufacturer's name and address is marked on the right side of the slide.
- the manufacturer's logo is found on the hand grip medallions, normally the grip plate medallion on the left side of the firearm will have the stylized CW monogram (for Carl Walther) with the calibre designation "6.35" found on the right side grip plate medallion.

Action

- blowback operated.

Serial Number

- serial number rationalization unknown
- sample serial numbers consisted of up to six sequential numbers without prefix or suffix, marked on the right rear of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel	- custom barrel lengths were available for customers in geographic areas that required long barrels as a condition to ownership.
Shots	- detachable box magazine. - the eight shot magazine is common to all model variations of the Model 8 pistol. - the Walther technical specifications read as if there was a variant capacity firearm magazine; however, this advertising claim states the magazine capacity is eight cartridges and the firearm is a nine shot firearm. The conclusion is: the advertising material adds one cartridge (for a total of nine) to the firearm capacity for a cartridge "in the chamber".
Other Markings	- slide markings may include any or all of the following: - the WALTHER banner company logo. The second Company address - found marked on the slide as "Zella-Mehlis (Thur.)" or as "Zella-Mehlis". - the manufacturer's Walther banner logo may be found moulded into the hard rubber hand grip plates. - German proof marks of the production era will be found on the firearm (crown over letter N or eagle over the letter N) located on the barrel, visible through the ejection port, on the lower middle part of the slide and on the receiver/frame above the trigger. - the manufacturer's logo is found on the hand grip medallions, normally the grip plate medallion on the left side of the firearm will have the stylized CW monogram (for Carl Walther) with the calibre designation "6.35" found on the right side grip plate medallion.

23298 - 1	6.35MM	6	51	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the "Walther Banner Trademark" and "Walthers Patent Mod. 9." is marked on the left side of the slide and "Walther" normally will be found moulded into the lower portion of the hand grip plates.

Model

- this firearm model is a "pocket pistol" designed to compete with the FN-Browning "Baby" pocket pistol.
- manufactured from 1921 to 1945.
- total production - unknown.
- the model designation is marked on the left side of the slide as "Walthers Patent Mod. 9.".
- the Walther Model 9 is further subdivided into two variants in catalogs and advertising material, the Model 9a & the Model 9b.
- the six shot capacity magazine is peculiar to both variations of the Model 9.
- the Model 9b is the Model 9 with light engraving on the slide. The standard Model 9 becomes Model 9a for advertising and marketing purposes.
- NOTE: - no pistols were marked Model 9a or Model 9b, these designations were catalog designations to permit customers to order specific features.
- features include: light engraving (Model 9b only), fixed sights, hard rubber grips, manufactured from steel, finishes available included engraving and gold / or silver wash, normally found in blued steel finish.
- rifling characteristics - six grooves, right hand twist.

Manufacturer

- the manufacturer's name and address is marked on the right side of the slide.
- the manufacturer's logo is found on the hand grip medallions, normally the grip plate medallion on the left side of the firearm will have the stylized CW monogram (for Carl Walther) with the calibre designation "6.35" found on the right side grip plate medallion .

Action

- blowback operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number rationalization unknown
- sample specimen serial numbers consisted of sequential numbers without prefix or suffix, marked on either the left or right side of receiver/frame immediately to the rear of the trigger guard or on the right rear of the receiver/frame.
- the safety catch may partially obscure the serial number.

Shots

- detachable box magazine.
- six shot magazine is common to both model variations, ie. Model 9a & 9b.
- the Walther technical specifications read as if there was a variant capacity firearm magazine; however, this advertising claim states the magazine capacity is six cartridges and the firearm is a seven shot firearm. The conclusion is: the advertising material adds one cartridge (for a total of seven) to the firearm capacity for a cartridge "in the chamber".

Other Markings

- slide markings may include any or all of the following:
- the WALTHER banner company logo.
The second Company address - found marked on the slide as "Zella-Mehlis (Thur.)" or as "Zella-Mehlis"
- the manufacturer's Walther banner logo may be found moulded into the hard rubber hand grip plates.
- German proof marks of the production era will be found on the firearm (crown over letter N or eagle over the letter N) located on the barrel, visible through the ejection port, on the lower middle part of the slide and on the receiver/frame above the trigger.
- the manufacturer's logo is found on the hand grip medallions, normally the grip plate medallion on the left side of the firearm will have the stylized CW monogram (for Carl Walther) with the calibre designation "6.35" found on the right side grip plate medallion.

Notes

Make - marked "Walther" in the Walther banner and "Ulm" on top of the chamber.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- this is a mass production "sporterized" K98 Mauser bolt action rifle, built by Walther during the 1950's; these rifles were built using war surplus K98 actions fitted with new barrels, sights, stocks, triggers, and cross-bolt safeties. - Walther built two general varieties of these rifles, in two stock types. The Model "A" came with double set triggers (in both "Mannlicher" and "Sporter" stock configurations), while the Model "B" came with standard single triggers (also in "Mannlicher" and "Sporter" stock configurations). - these rifles all came with checkered walnut stocks with cheek-rests, and a cross-bolt safety inlet through the tang of the stock above the trigger; this safety takes the place of the standard Mauser "wing" safety when there is a telescopic sight mounted on the rifle (as the "wing" would not clear the scope tube). - features include: double set triggers, sporter length walnut pistol grip stock, quick detachable "claw" type scope mounts, "butter knife" bolt handle, cheek rest and pistol grip cap, internal five shot magazine with floor plate latch, silver bead front sight on a ramp and open folding leaf rear sight.
Manufacturer	- Walther is a German manufacturer that has been making firearms since 1886, first at Zella-Mehlis in East Germany, then at Ulm-Donau in West Germany after the country was partitioned by the Soviets during World War Two. - they are particularly known for their handguns, but also make match-grade air rifles and air pistols, as well as small-bore target rifles and hunting rifles.
Serial Number	- numbered on barrel forward of receiver.
Shots	- integral box magazine.

Model	- this is a mass-production "sporterized" K98 Mauser bolt-action rifle, built by Walther during the 1950's; these rifles were built using war-surplus K98 actions fitted with new barrels, sights, stocks, triggers, and cross-bolt safeties. - full-length walnut pistol-grip stock with metal muzzle cap and ebony forearm spacer, quick-detachable "claw"-type scope mounts, "butter-knife" bolt handle, folding leaf open sights, and a double set trigger. - Walther built two general varieties of these rifles, in two stock types. The Model "A" came with double-set triggers (in both "Mannlicher" and "Sporter" stock configurations), while the Model "B" came with standard single-triggers (also in "Mannlicher" and "Sporter" stock configurations). - these rifles all came with checkered walnut stocks with cheek-rests, and a cross-bolt safety inlet through the tang of the stock above the trigger; this safety takes the place of the standard Mauser "wing" safety when there is a telescopic sight mounted on the rifle (as the "wing" would not clear the scope tube).
Manufacturer	- Walther is a German manufacturer that has been making firearms since 1886, first at Zella-Mehlis in East Germany, then at Ulm-Donau in West Germany after the country was partitioned by the Soviets during World War Two. - they are particularly known for their handguns, but also make match-grade air rifles and air pistols, as well as small-bore target rifles and hunting rifles.
Action	- K98 Mauser bolt action.
Serial Number	- numbered on barrel forward of the receiver/frame.
Shots	- integral box magazine.
Remarks	- Double set triggers. Dark walnut Mannlicher stock with checkered pistol grip, forend. Cheek rest and pistol grip cap. Internal five-shot magazine with floor plate latch. Silver bead front sight on a ramp, open folding leaf rear sight.

Notes

Make

- "Walther Ulm/Do" or a variation thereof is marked on top of the barrel.

Model

- no model name appears on this firearm.
- this is a sporting rifle produced by Walther on refurbished Mauser-type actions utilizing the standard dual-opposed locking lug bolt head system.
- produced mid-1950's to circa mid-1970's.
- internal box magazine with hinged floorplate; button release for magazine floorplate located in front of trigger guard.
- has a unique push-button type safety bolt that runs laterally through the stock above the trigger guard; this safety may also be referred to as the "Walther silent safety".
- single trigger; note: the only difference between this rifle and the model A as produced by Walther is that the model A has a double set trigger.
- one piece walnut stock with checkering on forend and pistol grip; original stocks had schnabel tip forend with small rounded cheek piece; later stocks had Monte Carlo comb and check piece with round-tipped front end.
- long-ramp style front sight, folding leaf rear sight.
- sling swivels located beneath barrel and mid-point of buttstock.
- blued finish.
- also known as the carbine model B with full Mannlicher-style stock and single trigger; the model A carbine has a double set trigger.

Notes

Make

- "WALTHER" in the Walther banner, is marked on the left side of the slide.

Model

- "CCP" is marked on the left side of the slide.
- "CCP" stands for "Concealed Carry Pistol".
- this is a compact 9mm semi-automatic pistol somewhat resembling a compact version of the CP99 pistol.
- features include: polymer frame; matte black or stainless slide on a matte black frame; adjustable open 3-dot sights; slide grasping grooves at front and rear of the slide; accessory rail on the dust cover; a hooked trigger-guard for a finger-forward hold; pre-cocked Glock-like trigger mechanism; a manual thumb safety at the left rear of the frame; a magazine release at the rear of the trigger-guard; and a stippled/checkered grip frame with finger grooves.

Manufacturer

- "WALTHER" in the Walther banner, is marked on the left side of the slide.

Action

- gas-delayed blowback.

Serial Number

- numbered on the receiver/frame.

Shots

- detachable box magazine.

Notes

Make

- make is marked on the firearm.

Model

- "CG 90" stands for " CO 2 Gewehr ("air rifle") 90".
- manufactured between 1987 and 1996.
- this is a highly specialized, target grade air rifle, with a stationary barrel.
- the rifle uses re-chargeable carbon dioxide cylinders to provide a consistent pulse of air to drive the pellet.
- featuresinclude: micrometer sights with globe front, laminated stock with adjustable buttplate and comb.
- overall length is 1120mm.

Action

- the rifle uses pre-charged CO2 tanks that screw into a valve below the barrel.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Other Markings

- may have importers name or mark stamped on the receiver/frame or barrel.

Notes

Model

- this is a highly specialized target grade air pistol, with muzzle brake and horizontal placement of the CO2 tank.
- the pistol uses re-chargeable carbon dioxide cylinders to provide a consistent pulse of air to drive the pellet.
- marked "CP 200" on the side of the breech.
- a similar pistol is available with a power supply that uses compressed air as the model LP 200.
- the same basic design with a vertically mounted power supply is available as the model CP 201 (CO2 powered) or LP 201 (compressed air).

Manufacturer

- Walther is a German manufacturer that has been making firearms since 1886, first at Zella-Mehlis in East Germany, then at Ulm-Donau in West Germany after the country was partitioned by the Soviets during World War Two
- they are particularly known for their handguns, but also make match-grade air rifles and air pistols, as well as small-bore target rifles and hunting rifles.

Action

- manufacturer's nominal specifications: does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.
- independent exemplar testing has been noted to exceed 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Other Markings

- may have importers name or mark stamped on the receiver/frame and/or barrel.

FRT Report

Firearm Reference Number (FRN): 40070
Make: Walther
Model: CP3

Summary

Make:	Walther
Model:	CP3
Manufacturer:	Walther
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Air,Spring or Gas
Country of Manufacturer:	GERMANY
Serial Numbering:	
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
40070 - 1	177 PELLET	1	220	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the Walther "banner" logo is marked on the pistol.

Model

- this is a highly specialized, target grade air pistol with a stationary barrel that is equipped with a bulbous muzzle weight.
- the CP 3 "family" includes the original CP 3 (blued or black anodized finish) and a CP 3 Match MV (matte nickel and blued finish). Both share the same basic features.
- the pistol uses re-chargeable carbon dioxide cylinders to provide a consistent pulse of air to drive the pellet.
- marked "CP 3" on the side of the breech.
- several similar designs have been produced for different uses/preferences, with adjustable grips, different tank sizes, adjustable triggers, etc.
- "CP 3" stands for " CO 2 Pistole ("air pistol") 3".

Action

- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Other Markings

- may also have an importers name or mark stamped on the receiver/frame or barrel.

Notes

Make

- Walther is a German manufacturer that has been making firearms since 1886, first at Zella-Mehlis (in what became East Germany), then at Ulm-Donau (in what became West Germany) after the country was partitioned at the end of World War II.
- they are particularly known for their handguns, but also make match-grade air rifles and air pistols, as well as small-bore target rifles and hunting rifles.

Model

- marked "CP 88" or "Competition CP 88" on left side of slide depending on version.
- "CP 88" stands for " CO 2 Pistole ("air pistol") 88".
- this is an airgun version of Walther's P-88 9MM LUGER handgun, and uses CO2 and eight shot pellet "magazines/discs" to provide the appearance of a semi-automatic air pistol.
- available in blued or nickel plated finishes with wood or black plastic grips and in a competition version.

Action

- CO2 powered
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the right side of the slide.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel	- made in a "Standard", and a "Competition", version with an extended compensator-type barrel.
Shots	- detachable rotary magazine.

Notes

Make

- the name "Walther" inside their banner-type logo or "Carl Walther" over "ULM/DO" is usually marked on the slide and/or receiver/frame.
- "WALTHER" in a banner logo form was observed, on a referenced example, marked on the left side of the slide and on the grip panels.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- introduced in 2000.
- "CP99" was observed on a referenced example marked on both sides of the slide.
- the CP99 is designed to virtually replicate the weight, appearance and function of the Walther model "P99" semi-automatic centre-fire pistol.
- CO2 powered, semi-automatic, blow-back type of action utilizing a detachable 8-shot magazine.
- power source is a 12 gram CO2 cartridge inserted in what would be the magazine.
- features include: fixed front and adjustable rear sight; rifled barrel; integral accessory rail; single/double action trigger mechanism; manual safety switch located on the right side of the receiver/frame; de-cocking system integrated into the upper left side of the slide; ambidextrous magazine release lever integrated into the trigger guard; black finish.
- overall length is 180mm (7.1"), average weight 0.73kg (1.6lbs).
- also available in a smaller version as the "CP99 Compact".

Manufacturer

- "UMAREX" is usually marked on the grips.
- "Trademarks licensed by Carl Walther - Germany" over "UMAREX - Made in Germany" was observed on a referenced example marked on the right side of the slide.

Action

- CO2 powered.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- alpha/numeric serial number was observed, on a referenced example, marked on the right side of the slide.

Calibre

- marked on the right side of the firearm.

"cal. .177 (4.5 mm)" followed by the image of a pellet was observed on a referenced example marked on the right side of the frame.

Shots

- rotary magazine.

Notes

Make	- the Walther "banner" logo is moulded into the stock.
Model	- although this model is advertised in Walther literature as a compact, "Bullpup" design rifle, the receiver/frame (serialized component) is removable from the stock. - the model designation is moulded into the side of the butt. - available in black as the standard model "G22" or in olive green as the "G22 Military". Both are also available in left or right-hand configuration. - both variations features include: ambidextrous sliding safety; integrated lock located next to the safety; cocking indicator (when the action is cocked a red indicator appears in the fire control housing); magazine disconnect (rifle will not fire with the magazine removed); magazine release is integrated into the "thumbhole" portion of the stock, a spare magazine is also housed in the stock; integral carry handle/Weaver-style scope mount rail with a sliding rear sight; Weaver-style rails on the underside of the forend and front sight for use with accessory lights, laser sight or bipod. - available as a factory package with a Walther scope, Walther scope and laser, laser sight only or Walther PS22 red-dot sight.
Manufacturer	- the Walther "banner" logo is moulded into the stock.
Action	- blowback operated.
Serial Number	- the serial number is marked on the receiver/frame, visible through a cut-out in the right side of the stock below the ejection port (This cut-out is not apparent in Walther product literature for 2004 - 2005).
Shots	- detachable box magazine.
Importer	- as a result of a partnership formed in 1999, Smith & Wesson has since become the exclusive distributor of the Walther line of firearms in the United States.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- though advertised in Walther literature as a "bull-pup" design, as it left the factory, this firearm is equipped with a "bull-pup" stock. The stock is subject to the definition of "Prohibited Device" in "Part IIII/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada.
- when the "bull-pup" stock (prohibited device) is removed the firearm is correctly identified as a "Non Restricted Firearm".

Notes

Make

- "Walther" in a banner is marked on the side of the barrel.

Model

- manufactured from 1969 to 2001.
- "GSP" was manufactured in 22 LR as the "GSP Target Standard" and in 32 S&W LONG as the "GSP-C Target".
- "GSP" was available with Conversion Units for calibre 32 S&W LONG, 22 SHORT or 22 LR.
- the calibre of the conversion unit would depend on the original calibre of the firearm.
- commencing in 1975 the GSP receiver/frame was used to build both the OSP & the GSP. This was done to permit a single platform to accept all barrel lengths and all calibres of conversion units interchangeably. Previous to this time it was not possible to install the calibre conversion units of the OSP pistol on the GSP pistol.
- Walther introduced in 1996 a "Carbine Conversion Unit", that allows the owner of a GSP to re-configure the pistol to resemble a 22 LR semi-auto rifle; this conversion comes with a stainless-steel fluted barrel with integral muzzle brake, and a bolt-on laminated stock, with adjustable cheek-piece.
- the "GSP Expert" replaced the "GSP" in 2001. The "GSP Expert" variation had an integral recoil-absorber in a ventilated muzzle shroud.

Manufacturer

- "Carl Walther Waffenfabrik, ULM / Do Made in Germany" is marked on the left side of the barrel mounting frame just forward of the trigger.

Action

- blowback operated.

Serial Number

- serial number rationalization unknown.
- serial numbers will be found on this model on the "upper receiver/frame" of this firearm.
- sample imaged has five digits, without prefix or suffix.
- sample examined was marked with six digits, without prefix or suffix.
- early production of the GSP models had serial numbers on both the grip portion above the trigger and the barrel mounting frame portion of the upper mechanism. At some time in the past, Walther ceased numbering the lower portion of the firearm in what would normally be considered the receiver/frame portion of the pistol.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel

- was manufactured in 22 LR and in 32 S&W LONG calibre.
- it is possible to install any of the calibre conversion units on the Receiver or Frame of this pistol.
- the GSP Junior Conversion Unit in 22 LR Calibre, with a 102MM barrel length;
- the GSP-MV Conversion Unit in 22 LR Calibre with a nickle plated-matte finish, in a 108MM barrel length;
- the GSP-MV Conversion Unit in 32 S&W LONG Calibre with a nickle plated-matte finish, in a 108MM barrel length;
- the OSP Conversion Unit in 22 SHORT Calibre, in an 85MM barrel length;
- the GSP Conversion Unit in 32 S&W LONG Calibre, in a 108MM barrel length; and,
- the GSP Conversion Unit in 22 LR Calibre, in a 108MM barrel length.
- the GSP Carbine conversion unit in 22 LR, with a 426mm barrel length (465mm with GSP compensator).

Shots

- detachable box magazine mounted in front of the trigger guard.
- 5, 8 and 10 shot magazines available in 22 LR only.
- 5 shot magazine available in 32 S&W LONG and 22 SHORT.

Remarks

- This firearms is available in different configurations. Depending on the calibre in which it is purchased, it can be either a GSP in 32 S&W Calibre or a GSP in 22 LR Calibre.
- It is possible to install any of the 3 basic calibre conversion units on the Receiver or Frame of this pistol:
- the GSP Junior Conversion Unit in 22 LR Calibre, with a 102MM barrel length;
- the GSP-MV Conversion Unit in 22 LR Calibre with a nickel plated-matte finish, in a 108MM barrel length;
- the GSP-MV Conversion Unit in 32 S&W LONG Calibre with a nickel plated-matte finish, in a 108MM barrel length;
- the OSP Conversion Unit in 22 SHORT Calibre, in an 85MM & 115MM barrel length;
- the GSP Conversion Unit in 32 S&W LONG Calibre, in a 108MM & 115MM barrel length; and
- the GSP Conversion Unit in 22 LR Calibre, in a 108MM & 115MM barrel length.
- Commencing in 1975-76, the GSP receiver/frame was used to build both the OSP & the GSP.
- This was done to permit a single platform (receiver) to accept all barrel lengths and all calibres of conversion units interchangeably. Previous to this time it was not possible to install the calibre conversion units of the GSP pistol on the OSP pistol.

Firearm Reference Number (FRN): 5336
Make: Walther
Model: GX-1

Summary

Make:	Walther
Model:	GX-1
Manufacturer:	Walther
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
5336 - 1	22 LR	1	648	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Action	- bolt action.
Serial Number	- serial number stamped on the receiver, usually with letter prefix.
Other Markings	- may have importers name or mark stamped on the receiver or barrel.
Remarks	- Walther produced the GX-1 rifle in various models. The difference among these models depended upon minor variations in weight and/or stock and/or barrel and/or trigger type and/or accessories of the same basic rifle. Smallbore target rifle designed for competition. European walnut thumbhole stock has adjustable, (length, vertical and horizontal), steel and aluminum butt plate with removable hook, adjustable, (height), cheek rest and adjustable/removable pistol-grip forend palm rest. Barrel is tapered (thicker toward muzzle). Adjustable/removable counter balance attaches to forend tip. Dovetail mounted front and rear sights, (front sight has interchangeable inserts).

Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
23319 - 3	38 SUPER AUTO	8	127	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
23319 - 2	45 AUTO	7	127	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
23319 - 4	7.65MM LUGER	8	127	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
23319 - 1	9MM LUGER	8	127	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "WALTHER " in a banner and "Waffenfabrik Walther, Zella-Mehlis (Thur)" over "Walther's Patent" is marked on the left side of the slide.

Model

- introduced in 1937, production earmarked for commercial sale continued until 1944.
- "Mod. HP" is marked on the left side of the slide.
- "HP" may also be known as "Heeres Pistole" or "Service Pistol".
- "HP" was identical to the Walther model P38 pistol except for the model designation and a superior commercial finish.

Manufacturer

- "WALTHER " in a banner and "Waffenfabrik Walther, Zella-Mehlis (Thur)" over "Walther's Patent" is marked on the left side of the slide.

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the right side at the front of the receiver/frame.
- serial number rationalization unknown. Does not folllow military serialization practices.
- observed sample serial numbers consisted of four figits without prefix or suffix.
- comercial German proof marks rather than Waa stamps are normally found on these firearms.

Calibre

- calibre designation is marked on the left side of the slide.
- the Model HP in calibres 38 SUPER & 45 AUTO may not have been manufactured in any quantity.

Shots

- detachable box magazine.

Canadian Law Comments

- Handguns chambered for the cartridge 7.65MM LUGER, also known as 30 LUGER and 7.65MM PARABELLUM, are deemed exempt from CC 84(1) "prohibited firearm" para. (a)(ii), which states:
"prohibited firearm" means
(a) a handgun that
(ii) is designed or adapted to discharge a 25 or 32 calibre cartridge,

Other Markings

- comercial German proof marks, rather than Waa stampings, are normally found on these firearms.

Remarks

- this firearm is 1937 - 1944 production of the Walther model P38, destined for commercial sale and named "Heeres Pistole or Service Pistol".
- this firearm is a locked breech, short recoil operated, semi-automatic handgun with a double action trigger mechanism and has a slide-mounted, thumb operated safety catch.
- engaging the safety catch locks the firing pin and decocks the hammer, the sear is also rotated into a raised position that prevents the trigger bar and trigger from returning to the forward position.
- the first shot is usually fired double action by a long trigger pull, subsequent shots are fired single-action unless the safety has been engaged between shots.

FRT Report

Firearm Reference Number (FRN): 40210
Make: Walther
Model: Jaguar

Summary

Make:	Walther
Model:	Jaguar
Manufacturer:	Walther
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	GERMANY
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
40210 - 1	177 PELLET	1	410	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Model

- the Jaguar also come as the Jaguar S. this is the same firearm with a black matte finish and a adgustable bipod.
- this is a fairly recent (production began in 1994) Walther side-cocking air rifle, built primarily for sport or field shooting.
- this firearm has an anatomical stock design with vertical pistol grip, adjustable comb and buttplate.
- these rifles have adjustable open sights and the receiver is are also grooved for scope mounts.

Manufacturer

- "WALTHER" is marked on the right side of the fore end.
- Walther is a German manufacturer that has been making firearms since 1886, first at Zella-Mehlis in eastern Germany, then at Ulm-Donau in West Germany after the country was partitioned by the Soviets during World War Two; they are particularly known for their handguns, but also make match-grade air rifles and air pistols, as well as small-bore target rifles and hunting rifles.

Action

- spring-piston side-cocking design.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Other Markings

- may have importers name or mark stamped on the receiver or barrel.

Remarks

- Walther is a German manufacturer that has been making firearms since 1886.
- the first Company address was at Zella-Mehlis in eastern part of Germany. The Zella-Mehlis production ceased with the end of WW II in May of 1945.
- the factory then moved to Ulm-Donau in West Germany after the original factory location was incorporated into East Germany by the Soviets after World War II.
- Walther is particularly known for their handguns, but they also manufacture match-grade air rifles and air pistols, as well as small-bore target rifles and hunting rifles.
- recently Walther has entered a partnership with Smith & Wesson to market the Walther P99 as the Smith & Wesson Model 99.
- recently Walther has entered a partnership with Russian Air-Gun manufacturers. Walther purchases Russian Air-Guns (mostly pistols at this time [1999]), refinishes the firearm and engraves the Walther Banner trade-mark upon the firearm, selling them as "Walther" firearms.

Notes

Make

- make is marked on the firearm.

Model

- introduced in the early/mid 1950's.
- features include: checkered European walnut stock with high tapered comb, also available in full length "Mannlicher" style or left-hand versions; adjustable cheeckpiece offered as an option; adjustable open rear sight and bead front sight (may have a hood); receiver/frame is grooved for a scope mount; two safeties, one on the rear of the bolt, the other through the stock just above the trigger(s); single or double set triggers.
- this model was available in several variations as a repeating firearm or as a single shot.
- KKJ; five or eight shot magazine, calibre 22 LR.
- KKJ-E; "E" denotes Einzel or single shot, calibre 22 LR.
- KKJ-V; five shot magazine, calibre 5.6X35R VIERLING (in North America this cartridge is known as 22 HORNET (earliest 22 HORNET nomanclature was 22 WCF when loaded as a black powder catridge).
- KKJ-VE; "E" denotes Einzel or single shot, calibre 5.6X35R VIERLING.
- KKJ-M; five shot magazine, calibre 22 MAG.
- KKJ-H; five shot magazine, calibre 22 HORNET (this would seem to duplicate the model offered in calibre 5.6X35R VIERLING, it is believed that this model designation was for the North American market).
- KKJ-HE; "E" denotes Einzel or single shot, calibre 22 HORNET.
- Walther catalogues sometimes incorporated an alpha suffix to the model designation . (example: KKJ-Ma or KKJ-Ho)

Manufacturer

- the "Walther banner" logo will be found marked on the firearm as will the complete company name and address.

Serial Number

- known example had five digit number without prefix or suffix marked on left side of receiver ring.

Calibre

- known example in calibre 22 LR had calibre designation marked on the rear left of the barrel as "Kal.22 l.f.B." which is the German designation for .22 Lan fur Buchsen which in English translates to calibre 22 LR.
- the SAAMI (Sporting Arms & Ammunition Manufacturers Institute) designation of the cartridge 22 HORNET is also used to identify those samples that may be marked with the metric designation 5.6X35R VIERLING (or a variation thereof, these are the same cartridge).

Shots

- removable box magazine.

Other Markings

- may have importers name or mark stamped on the receiver or barrel.

Remarks

- this model was available in several variations as a repeating firearm or as a single shot.
- KKJ; five or eight shot magazine, calibre 22 LR.
- KKJ-E; "E" denotes Einzel or single shot, calibre 22 LR.
- KKJ-V; five shot magazine, calibre 5.6X35R VIERLING (in North America this cartridge is known as 22 HORNET (earliest 22 HORNET nomanclature was 22 WCF when loaded as a black powder catridge).
- KKJ-VE; "E" denotes Einzel or single shot, calibre 5.6X35R VIERLING.
- KKJ-M; five shot magazine, calibre 22 MAG.
- KKJ-H; five shot magazine, calibre 22 HORNET (this would seem to duplicate the model offered in calibre 5.6X35R VIERLING, it is believed that this model designation was for the North American market).
- KKJ-HE; "E" denotes Einzel or single shot, calibre 22 HORNET.

Notes

Make

- the "Walther" banner logo will be found marked on the firearm.

Model

- model introduced circa 1950.
- Walther produced the KKM rifle in various models between the early 1950's and the present (2003). The differences between models are minor variations in weight, stock, barrel, trigger type, sights and accessories.
- KKS-V model variation is a KKM with target sights.
- KKS-D model variation is a KKM with a diopter sight.
- KKM model variation is the standard rifle with simple target sights.
- this firearm variant is the father of the KKM "family" of variant models. The KKM is very similar to the KKM II and the KKM International Match, with the except that the KKM has a conventional stock without a thumbhole and has no front rail palm rest.
- features include: target sights, right and left hand bolt operating system, the butt does not have an adjustable cheekpiece or an adjustable hooked buttplate.

NOTE:- be aware that the accessories for this family of firearms interchange between models and cannot be considered definitive differences that define the models.

Manufacturer

- the "Walther" banner logo will be found marked on the firearm as will the complete company name and address.

Action

- turn-bolt design.

Serial Number

- serial number stamped on the receiver/frame, usually with letter prefix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- the calibre designation is typically marked on the left side of the barrel.
Other Markings	- may have importers name or mark stamped on the receiver or barrel.

Notes

Make

- the "Walther" banner logo will be found marked on the firearm.

Model

- Walther produced the KKM rifle in various models. These differences were minor variations in weight, stock, barrel weight and contour, trigger type or accessories for the same basic rifle design.
- the particular variant model described by this record is essentially an ISU "Free Rifle".
- features include: front rail for accessory mounting; universal diopter sights with filters and polarizing lenses; right and left hand bolt operating systems are available; the butt has an adjustable cheek piece; heavy butt with adjustable hooked butt plate; thumbhole stock, hand rest and bull barrel.
- NOTE:- many of the parts/accessories of this model (sights, counter weights etc.) are removable and do not necessarily have be assembled to a firearm. Be aware that the accessories for this family of firearms interchange between models and cannot be considered definitive differences that define the models.

Manufacturer

- the "Walther" banner logo will be found marked on the firearm as will the complete company name and address.

Action

- turn-bolt design.

Serial Number

- serial number stamped on the receiver/frame, usually with letter prefix.

Calibre

- the calibre designation is typically marked on the left side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - may have importers name or mark stamped on the receiver or barrel.

Remarks - Smallbore target rifle designed for competition. European walnut thumbhole stock has adjustable, (length, vertical and horizontal), steel and aluminum butt plate with removable hook, adjustable, (height), cheek rest and adjustable/removable pistol-grip forend palm rest. Adjustable/ removable counter balance attaches to the forend tip. Dovetail front and rear sights, with interchangeable inserts for the front sight.

Summary

Make:	Walther
Model:	KSP200
Manufacturer:	Izhevsky Mekhanichesky Zavod (Izhmech)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
50889 - 1	22 LR	5	152	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is marked on the right forward portion of the slide.
- the markings, found on the right side of the slide, consist of the name - "Carl Walther Waffenfabrik" and the address "Ulm/Donau Germany". Also found marked on the right side of the slide is (in the German language) "In Cooperation with Baikal".

Model

- this firearm is a target shooting pistol.
- features include: laminated anatomical grips in three different grip sizes, adjustable heel-plate, and adjustable sights. The trigger is adjustable from 28 - 39 ozs.

Manufacturer

- there is a marketing agreement between the Izhevsky Mekhanichesky Zavod (Izhmech) and Umarex, the holding company that owns the Carl Walther firm, whereby Walther markets several IZMECH manufactured Baikal products under the "WALTHER" trade name.
- this firearm is also manufactured in Russia by IZHMECH under both the "Baikal" and "IZMECH" trade names as the IZH-35M.
- this firearm model is marked on the right side of the slide "Cooperation with Baikal".
- the Izhevsky Mekhanichesky Zavod (Izhmech) is the owner of the brand name "Baikal"

Action

- blowback operated.

Serial Number

- the serial number will be found on the left side of the firearm receiver/frame, located just forward of the trigger on the trigger guard.
- the serial number rationalization is not known; a specimen serial number observed consisted of six digits without prefix or suffix. Zeros are used as place holders to produce six digits, ie. the first firearm in this series would be serial number 000001 and so on.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- may have importers name or mark stamped on the receiver or barrel.
- this firearm model is marked on the right side of the slide "Cooperation with Baikal".

Remarks

- there is a marketing agreement between the Izhevsky Mekhanichesky Zavod (Izhmech) who own the brand name "Baikal" and Umarex, the holding company that owns the Carl Walther firm, whereby Walther markets several "IZMECH", Baikal products as Walther products.

Firearm Reference Number (FRN): 120034
Make: Walther
Model: Lever Action

Summary

Make:	Walther
Model:	Lever Action
Manufacturer:	Umarex
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	GERMANY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
120034 - 1	177 PELLET	8	380	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
120034 - 2	177 PELLET	8	480	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is marked on the firearm.
- Walther is a German manufacturer that has been making firearms since 1886, first at Zella-Mehlis in East Germany, then at Ulm-Donau in West Germany after the country was partitioned at the end World War II.
- they are particularly known for their handguns, but also make match-grade air rifles and air pistols, as well as small-bore target rifles and hunting rifles.

Model

- introduced in 2002.
- this is a CO2-powered air rifle that resembles a Winchester model 94 lever-action rifle.
- features include: wooden straight grip stock and forearm; die-cast and black-anodized receiver/frame and lever, with a blued round barrel; barrel is available in carbine and rifle lengths; open adjustable buckhorn sights; false "loading gate" on right side of receiver/frame opens a door for the rotary magazine; saddle ring on left side of the receiver/frame and a unique dual-cylinder CO2 gas system that fits under the buttplate.
- a "Wells Fargo" commemorative version has the added features of a stagecoach and horse engraving on the left side of the receiver/frame; gold coloured receiver/frame.

Manufacturer

- manufacturer's name is marked on the barrel.

Action

- CO2 powered.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- numbered on the receiver/frame.
- observed examples have consisted of a letter prefix (W) and eight numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - eight-shot rotating cylinder.

Notes

Make

- the Walther "Banner" trade mark is usually found on the firearm.

Model

- this is a highly-specialized target-grade air rifle, with a stationary barrel.
- the rifle uses a semi-permanent tank installed below the barrel to provide a consistent pulse of air to drive the pellet.
- this tank can be re-filled from a SCUBA tank or air compressor, and will provide enough power to fire approximately 700 shots.
- muzzle velocity according to Walther is 175 m/p/s and the energy will be less than 7.5 joule.
- micrometer rear sight and globe insert front sight, laminated stock with adjustable buttplate and comb, and heavy muzzle weight.
- "LG 200" stands for "Luft Gewehr ("air rifle") 200".
- also available with a plain beech stock with shorter length of pull, as the LG 200 Junior

Manufacturer

- Walther is a German manufacturer that has been making firearms since 1886, first at Zella-Mehlis in East Germany, then at Ulm-Donau in West Germany after the country was partitioned by the Soviets during World War Two
- they are particularly known for their handguns, but also make match-grade air rifles and air pistols, as well as small-bore target rifles and hunting rifles.

Action

- compressed air design; the rifle uses a semi-permanent tank, installed below the barrel, that is re-charged through fittings from an air compressor or SCUBA tanks.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Other Markings

- may have importers name or mark stamped on the receiver or barrel.

Notes

Make

- the "Walther" banner trade mark is found on the receiver/frame and on the cheekpiece.
- Walther is also marked on the right side of the forearm.

Model

- "LG 300" is marked on the left side of the receiver/frame.
- this firearm is made in two grades, i.e., LG 300 Standard and LG 300 Alutec; the Alutec version may be marked "LG 300 Alutec" on the left side of the forearm.
- this is a highly specialized target grade air rifle, with a stationary barrel.
- the rifle uses a semi-permanent tank installed below the barrel to provide a consistent pulse of air to drive the pellet.
- this tank can be re-filled from a SCUBA tank or air compressor and will provide enough power to fire approximately 450 shots.
- features may include:
- micrometer rear sight and globe insert front sight,
- adjustable trigger,
- blue anodized aluminum stock with adjustable buttplate, laminated wood, pistol grip, forearm and comb,
- tubular type barrel extension,
- optional muzzle weights.
- also available in a field target version as the "LG300 Dominator", with aluminum and laminated stock, or with laminated wood only.

Action

- compressed air design.
- discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- known example had a five digit number without prefix or suffix marked on the left side of the receiver/frame.

Notes

Make

- "WALTHER" trade mark banner was observed marked on the right side of the receiver/frame.
- "Made in Germany" was observed marked on the left side of the receiver/frame.
- "WALTHER" trade mark banner was observed marked on the left side of the stock.
- "WALTHER" trade name was observed marked on the right side of the stock.

Model

- introduced in 2001.
- "LG 300" was observed marked on the left side of the receiver/frame and on the stock.
- "JUNIOR" was observed marked on the right side on the muzzle weight barrel sleeve.
- "LG300 Junior" is a highly specialized target grade air rifle with a stationary barrel.
- "LG300 Junior" uses a semi-permanent pressure cylinder installed below the barrel to provide a consistent pulse of air to drive the pellet.
- "LG300 Junior" is similar to the LG300 and LG300XT models but is a lighter weight version with variable buttstock length.
- features include: carbon fiber barrel jacket and absorber; shortened ultra light aluminum pressure cylinder with gauge; two-stage trigger; laminated beech wood stock with adjustable butt plate, adjustable cheek piece and ambidextrous pistol grip.
- overall length (depending on the butt-stock adjustement) is from 980mm to 1010mm and average weight is 3500 grams.

Manufacturer

- "WALTHER" trade mark banner was observed marked on the right side of the receiver/frame.
- "Made in Germany" was observed marked on the left side of the receiver/frame.
- "WALTHER" trade mark banner was observed marked on the left side of the stock.
- "WALTHER" trade name was observed marked on the right side of the stock.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action

- compressed air design.
- at least two variants of this particular model exist:
Variant #1: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
Variant #2: does not discharge a projectile at a muzzle velocity exceeding 152.4 mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number was observed marked on the left side of the receiver/frame.
- observed serial number consisted of five numbers without a letter prefix or suffix.

Canadian Law Comments

- at least two variants of this particular model exist:
Variant #1: - discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. This variant is subject to the provisions as they apply to firearms under the Criminal Code, Part III and the Firearms Act which include Licensing, Registration, Possession, Export and Import and Authorizations To Transport.
Variant #2: - does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules. This variant is deemed not to be a firearm in accordance with the Criminal Code, Section 84 (3) and the provisions of the Firearms Act and therefor exempt from Licensing, Registration, Possession, Export and Import and Authorizations To Transport.
