- "U.S. ARMS CO." was a trade name used by "H. & D. Folsom Arms Company" and "Supplee-Biddle Hardware Company" on shotguns manufactured by the "Crescent Fire Arms Company", "Henri Pieper", and "Anciens Etablissments Pieper".
- "U.S. ARMS CO." was a trade name used on a variety of firearms by the "Alexander Waller & Company" circa 1877, "Barton & Company" circa 1878, and "H. & D. Folsom Arms Company" circa 1879 and forward.
- "U.S. ARMS CO." was a trade name used by the "United States Arms Company" circa 1874 to 1878, a manufacturer and sales outlet for revolvers manufactured by "Bacon Manufacturing Company", "Hood Firearms Company", "Crescent Fire Arms Company, and "Otis A. Smith (O.A.S.)" of the Norwich Falls Pistol Company.

Model

- the model designation is not marked on the firearm.
- features include: bead front sight, external hammers, double triggers, blued damascus steel and walnut stock.

Manufacturer

- the manufacturer's name is not marked on the firearm.

Action

- side by side pattern.

Other Markings

- the barrel rib is marked "FINE DAMASCUS".

Notes

Make

- "U.S. ARMS DIV.-A.I.G. INC." is marked on right side of barrel.
- "U.S. ARMS DIV.-A.I.G. INC." over "-NO. HAVEN, CT. U.S.A.-" is marked on the left side of the receiver/frame.

Model

- model may be marked on the left side of the barrel.
- features include: blued or matte chrome finish; smooth, unfluted cylinder; anvil-link safety mounted on receiver/frame and hammer; wood grips as standard; removable cylinder mounting/retention pin; right-side gate loading; ejector rod mounted on the bottom right of the barrel; adjustable rear sights and fixed partridge foresight.

Manufacturer

- "U.S. ARMS DIV.-A.I.G. INC." is marked on right side of barrel.
- "U.S. ARMS DIV.-A.I.G. INC." over "-NO. HAVEN, CT. U.S.A.-" is marked on the left side of the receiver/frame.

Serial Number

- marked on right side of receiver/frame below cylinder.
- observed serial numbers have consisted of a letter prefix followed by six digits.

Remarks

- AIG DIV purchased the United States Arms Corporation of Riverhead N.Y. USA in 1979 and produced Abilene revolvers from 1979 until 1983.
- along with their purchase, AIG DIV agreed with Mossberg to allow that company exclusive marketing rights to the Abilene revolver, which they did from 1980-1983.
- Abilene's produced by AIG-DIV differ from their earlier manufacturer in having an "anvil link" safety incorporated into the firing mechanism that prevents discharge unless the trigger has been pulled, and the hammer allowed to fall with full force.

Notes

Make

- make is marked on firearm.

Model

- marked "MILITARY 45 ACP" over "COMBAT MODEL" on the left side of the slide.
- this is a compact, single-action, stainless-steel semi-automatic pistol that was made by the US Arms Division of A.I.G. Corporation for possible distribution by Mossberg.
- very limited quantities of this pistol were made.
- all-stainless construction (matte and polished finishes), wooden grip panels, slide-mounted ambidextrous safety, arched backstrap with no grip safety, adjustable open sights with front ramp insert, hooked trigger-guard.
- just as this project was being finalized (at the time, Mossberg was distributing this same firm's "Abilene" revolvers), Mossberg decided to "streamline" its product line and concentrate on producing shotguns; therefore, the entire project was shelved.

Manufacturer

- manufacturer is marked on firearm.

Action

- recoil operated.

Serial Number

- numbered on frame/receiver.

Shots

- detachable box magazine.

Notes

Make

- "U.S. CARBINE" over "CAL. .30 M1" is marked on the receiver ring.
- "U.S. CARBINE" was adopted into United States Military Service in 1941 and relegated to reserve in 1957.
- "U.S. CARBINE" by Fulton Armory is a commercial versions of this firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- Introduced in 1942 (original version).
- This firearm is a commercial version/reproduction of the original version of the Winchester M1 Carbine.
- "US CARBINE" with "CAL.30 M1" is marked on the top of the breech ring of the receiver/frame.
- the original M1 Carbine was developed by Winchester, for U.S. troops who did not normally carry the full sized battle rifle.
- "M1" by Fulton Armory is a commercial versions of the U.S.A. military "US CARBINE CAL.30 M1".
- features include: fixed, front sight band with protecting ears; knob adjustable rear sights; round, tapered barrel that may be threaded; front barrel band which may include a bayonet lug; safety lever on the right front of the trigger guard; push button magazine release in front of the safety; right side, reciprocating cocking handle; hardwood, fixed or folding metal pistol grip stock and handguard; handguard may also be of sheet metal with ventilated holes or of aluminum alloy with an accessory rail; buttstock with a through the buttstock sling attachment; usually parkerized finish.
- overall length with a 457mm (18") barrel is 903.73mm (35.58") and average weight is 2.49kgs (5.5lbs).

Manufacturer

- "FULTON ARMORY" is marked on the top, rear of the receiver/frame.
- "FULTON ARMORY" is located in Savage, Maryland U.S.A..
- "FULTON ARMORY" is a gunsmithing and parts firm, which specializes in rebuilding and customizing U.S. Service field rifles.

Action

- gas operated.

Serial Number

- serial number is marked on the top rear of the receiver/frame.
- serial number of a referenced example consisted of one letter (C) and five numbers.

Calibre

- calibre designation is marked on the breech ring of the receiver/frame.
- calibre designation is also usually marked on the barrel.
- 30 CARBINE rifling characteristics: 1 turn in 20 inches, right hand twist.

Shots

- detachable box magazine.
- factory magazine are available in 10, 15 and 30 rounds.

Notes

Make

- "U.S. CARBINE" over "CAL. .30 M1" is marked on the receiver ring.
- adopted into United States Military Service as the "US Carbine".
- commercial versions of this firearm are known by the tradename they were marketed under.

Model

- Introduced in 1942.
- "U.S. CARBINE" over "CAL. .30 M1" is stamped on the top of the receiver ring.
- 2,285,000 produced.
- the original M1 Carbine was developed by Winchester, for U.S. troops who did not normally carry the full sized battle rifle.
- early versions were not fitted with a bayonet lug.
- Inland Manufacturing Division of General Morors also produced a folding stocked version known as the M1A1 for use by paratroops.
- this model will be found in many configurations.
- improvements were made during the service life of this model that altered the appearance of this model.
- variations in the stock design and finish will be encountered.
- some of these were later converted to M2 configuration, these will have a change lever on the left side of the receiver that allows full automatic fire. Do not confuse these with the M1 version.

Manufacturer

- "INLAND DIV" may be marked on the top rear of the receiver/frame.
- "INLAND DIV" may be obscured by the rear sight.

Action

- gas operated.

Serial Number

- serial number is marked on the top rear of the receiver/frame.
- serial number may be obscured by the rear sight.
- serial numbers range between: 11 to 999,999
  2,912,520 to 3,212,519
  4,879,526 to 5,549,821
  6,629,884 to 7,234,883
  7,369,661 to 8,069,660

Calibre

- "U.S. CARBINE" and "CAL. 30 M1" are marked on the receiver ring.
- rifling characteristics in calibre 30 CARBINE: 4-grooves, 1 turn in 20 inches, right hand twist.

Shots

- detachable box magazine.

Remarks

- the M1 carbine is a compact firearm which fires a cartridge of intermediate power.
- this firearm was developed as a potential replacement for the pistol and the sub-machine gun.

Notes

Make

- "U.S. CARBINE" over "CAL. .30 M1" is marked on the receiver ring.
- adopted into United States Military Service as the "US Carbine".
- commercial versions of this firearm are known by the tradename they were marketed under.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- Introduced in 1942.
- the original M1 Carbine was developed by Winchester, for U.S. troops who did not normally carry the full sized battle rifle.
- 359,662 produced.
- early versions were not fitted with a bayonet lug.
- this model will be found in many configurations.
- improvements were made during the service life of this model that altered the appearance of this model.
- variations in the stock design and finish will be encountered.
- some of these were later converted to M2 configuration, these will have a change lever on the left side of the receiver/frame that allows full automatic fire. Do not confuse these with the M1 version.

Manufacturer

- "QUALITY H.M.C." is usually marked on the top rear of the receiver/frame.
- "QUALITY H.M.C." markings may be obscured by the rear sight.
- Quality Hardware and Machine Company was one of several manufacturers that produced firearms for U. S. Military service during World War II.

Action

- gas operated.

Serial Number

- serial number is marked on the top rear of the receiver/frame.
- serial number may be obscured by the rear sight.
- serial numbers range between:
- 1,550,000 to 1,662,519;
- 1,875,040 to 1,937,519;
- 4,432,100 to 4,532,099;
- 4,632,100 to 4,879,525.

Calibre

- "U.S. CARBINE" and "CAL. 30 M1" are marked on the receiver ring.
- rifling characteristics in calibre 30 CARBINE: 4-grooves, 1 turn in 20 inches, right hand twist.

Shots

- detachable box magazine.

Remarks

- the M1 carbine is a compact firearm which fires a cartridge of intermediate power.
- this firearm was developed as a potential replacement for the U.S. military issue pistol and sub-machine gun.

15 - 8	7.62MM TOKAREV	5	483	Prohibited PFR, Part 1, para. 236	Non-Commercial Customization	

Notes

Make

- "U.S. CARBINE" over "CAL. .30 M1" is marked on the receiver ring.
- adopted into United States Military Service as the "US Carbine".
- commercial versions of this firearm are known by the tradename they were marketed under.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- Introduced in 1942.
- the original M1 Carbine was developed by Winchester, for U.S. troops who did not normally carry the full sized battle rifle.
- 546,616 units produced.
- early versions were not fitted with a bayonet lug.
- this model will be found in many configurations.
- improvements were made during the service life of this model that altered the appearance of this model.
- variations in the stock design and finish will be encountered.
- some of these were later converted to M2 configuration, these will have a change lever on the left side of the receiver/frame that allows full automatic fire. Do not confuse these with the M1 version.

Manufacturer

- "UNDERWOOD" is usually marked on the top rear of the receiver/frame.
- "UNDERWOOD" may be obscured by the rear sight.
- Underwood-Elliot-Fisher was one of several firms who produced the M1 Carbine for the US Military.

Action

- gas operated.

Serial Number

- numbered on the top rear of the receiver/frame, may be obscured by the rear sight.
- serial numbers range between: 1,350,000 to 1,449,999
  2,352,520 to 2,912,519
  4,010,00 to 4,074,999
  6,099,689 to 6,199,688

Calibre

- "U.S. CARBINE" and "CAL. 30 M1" are marked on the receiver ring.
- rifling characteristics in calibre 30 CARBINE: 4-grooves, 1 turn in 20 inches, right hand twist.

Shots

- detachable box magazine.

Remarks

- the M1 carbine is a compact firearm which fires a cartridge of intermediate power.
- this firearm was developed as a potential replacement for the pistol and the sub-machine gun.

Notes

Make

- "US CARBINE" is usually not marked on the firearm.
- these firearms are of U.S. origin and are usually remarked upon rebuild by the goverment arsenals of Thailand.

Model

- "M1 Thai Carbine Rework" is not marked on the firearm.
- "Thailand's" national crest/cypher consists of a shield over a sword.
- "Thailand's" national crest/cypher is usually marked on top of the receiver ring. The original markings were usually removed when the firearm was reworked.
- M1 Thai Carbine was originally a US Carbine Model M1 reworked in Bangkok.
- M.A.P. provided approximately 64,000 M1's and 9,000 M2's before 1975 for the government of Thailand and the Bangkok police.
- US Carbine model M1 was originally developed by Winchester, with over six million produced by various manufacturers this model will be found in many configurations, improvements were made during the service life of this model that altered the appearance of this model.
- variations in the stock design and finish will be encountered.
- reworked M2 carbines may also be encountered, these will have a change lever on the left side of the receiver/frame that allows full automatic fire. These must not be confused with the M1 version.

Action

- gas operated.

Serial Number

- marked on the top rear of the receiver/frame, may be obscured by the rear sight.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine.
Remarks	- the original US Carbine, model M1 was produced by ten different American companies. As any one of the original contractors firearms may have been used in the rebuild program it is usually not possible to determine who actually manufactured the receiver/frame.

Notes

Make

- "U.S. CARBINE" over "CAL. .30 M1" is marked on the receiver ring.
- adopted into United States Military Service as the "US Carbine".
- commercial versions of this firearm are known by the tradename they were marketed under.

Model

- model designation is not marked on the firearm.
- "U.S. CARBINE" over "CAL. .30 M1" is marked on the receiver ring.
- "A1" in the model designation is for the folding stock.
- this model was developed for use by paratroops.
- this is basically a US Carbine model "M1" that has a folding stock.
- early models had a flip up rear sight, later versions had a larger adjustable rear sight.
- Inland Manufacturing Division of General Motors is reported to have been the sole manufacturer of this model.

Manufacturer

- "INLAND DIV" may be marked on the top rear of the receiver/frame.
- "INLAND DIV" may be obscured by the rear sight.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- gas operated.
Serial Number	- numbered on top rear of receiver, may be obscured by rear sight.
Calibre	- "U.S. CARBINE" and "CAL. 30 M1" are marked on the receiver ring. - rifling characteristics in calibre 30 CARBINE: 4-grooves, 1 turn in 20 inches, right hand twist.
Shots	- detachable box magazine.

Notes

Make	- adopted into United States Military Service as the "US Carbine".
Model	- the M2 configuration of the US Carbine, as originally manufactured, will have a change lever on the left side of the receiver/frame and components that support full automatic fire. - several variations of the model designation markings exist, very few were simply marked "M2". As individual examples of this model were either purpose built as M2 carbines or M1 carbines that were assembled into M2 configuration model markings include "M2", "M1" and "M1" with the "1" being over stamped with a "2".
Manufacturer	- "INLAND DIV" may be marked on the top rear of the receiver/frame. - "INLAND DIV" may be obscured by the rear sight.
Action	- gas operated.
Serial Number	- numbered on top rear of receiver/frame, may be obscured by rear sight.
Shots	- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments - regardless of configuration, all "M2" marked US Carbine receiver/frames are considered to have a legal classification of Prohibited.

Remarks

- the M2 was developed for troops who would not normally carry a standard service rifle.
- this is a compact firearm, select fire, magazine charged and fires an intermediate power cartridge.
- this firearm was also developed as a potential replacement for the pistol and the sub-machine gun.
- it is possible to find U.S. Carbines manufactured from spare parts or surplus parts with M2 Carbine receivers.
- many of the M2 Carbines were converted to fire semi-automatic by the removal or replacement of the component parts required to support full automatic fire. Some of these conversions were done by U.S. Government controlled entities and some by private individuals.

26658 - 4	30 CARBINE	30	457	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- "U.S. Carbine" is marked on the top of the receiver/ring.
- adopted into United States Military Service as the "US Carbine".

Model

- "M2" may be marked on the top of the receiver ring or the rear of the receiver/frame.
- several variations of the model designation markings exist, very few were simply marked "M2". As individual examples of this model were either purpose built as M2 carbines or M1 carbines that were assembled into M2 configuration model markings include "M2", "M1" and "M1" with the "1" being overstamped with a "2".
- the M2 configuration of the US Carbine, as originally manufactured, will have a change lever on the left side of the receiver/frame and components that support full automatic fire.

Manufacturer

- "INLAND DIV" may be marked on the top rear of the receiver/frame.
- "INLAND DIV" may be obscured by the rear sight.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- no longer capable of full automatic fire.
Serial Number	- numbered on top rear of receiver, may be obscured by rear sight.
Shots	- detachable box magazine.
Canadian Law Comments	- regardless of configuration, all "M2" marked US Carbine receiver/frames are considered to have a legal classification of Prohibited.
Remarks	- the M2 was developed for troops who would not normally carry a standard service rifle. - this is a compact firearm, select fire, magazine charged and fires an intermediate power cartridge. - this firearm was also developed as a potential replacement for the pistol and the sub-machine gun. - it is possible to find U.S. Carbines manufactured from spare parts or surplus parts with M2 Carbine receivers. - many of the M2 Carbines were converted to fire semi-automatic by the removal or replacement of the component parts required to support full automatic fire. Some of these conversions were done by U.S. Government controlled entities and some by private individuals.

Notes

Make

- the make is usually not marked on the firearm.
- these firearms are of U.S. origin and are usually remarked by Thai goverment arsenals.

Model

- "M2 Thai Carbine Rework" is not marked on the firearm.
- "Thailand's" national crest/cypher consists of a shield over a sword.
- "Thailand's" national crest/cypher is usually marked on top of the receiver ring. The original markings were usually removed when the firearm was reworked.
- M2 Thai Carbine was originally a US Carbine Model M2 reworked in Bangkok.
- M.A.P. provided approximately 64,000 M1's and 9,000 M2's before 1975 for the government of Thailand and the Bangkok police.
- US Carbine model M1 was originally developed by Winchester, with over six million produced.
- US Carbine model M2 was a full automatic variant of the M1, improvements were made during the service life of this model that altered the appearance of this model.
- variations in the stock design and finish will be encountered.
- rebuilt M1 carbines may also be encountered, these will not have a change lever on the left side of the receiver/frame that allows full automatic fire. These must not be confused with the M2 version.

Action

- gas operated.

Serial Number

- marked on the top rear of the receiver/frame, may be obscured by the rear sight.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine.
Remarks	- the original US Carbine, model M2 was produced by two of the ten different American companies who produced the original model "M1". As any one of the original contractors firearms may have been used in the rebuild program it is usually not possible to determine who actually manufactured the receiver/frame.

Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
128615 - 1	30 CARBINE	5	457	Prohibited PFR, Part 1, para. 236(z.71)	Manufacturer Specifications and Commercial Customization	
128615 - 2	30 CARBINE	15	457	Prohibited PFR, Part 1, para. 236(z.71)	Manufacturer Specifications and Commercial Customization	
128615 - 3	30 CARBINE	30	457	Prohibited PFR, Part 1, para. 236(z.71)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "U.S. CARBINE" over "CAL. 30 T3" is usually marked on the right side of the receiver/frame.

Model

- "U.S. CARBINE" over "CAL. 30 T3" is usually marked on the right side of the receiver/frame.
- "T3" is a variant of the M1 Carbine.
- "T3" is often incorrectly referenced as the "M3"Carbine.
- manufactured circa 1944.
- approximately 811 units were produced by Inland Manufacturing Division of General Motors.
- standard features usually include: parkerized finish on the receiver/frame and round barrel; fixed front sight; integral scope mount in place of standard rear sight; push button or swivel lever safety on the right front of the trigger guard; push button magazine release in front of the safety; fixed wooden pistol grip or metal and wood folding stock with separate upper handguard; left side mounted front sling swivel; inletted oiler holder/sling attachment at the buttstock; front barrel band which may include a bayonet lug; may feature a cone shaped flash hider attached to the barrel.
- overall length with a 457mm (18") barrel is 903.73mm (35.58"), average weight is 2.49kgs (5.5lbs).

Manufacturer

- "INLAND DIV" may be marked on the top rear of the receiver/frame.
- "INLAND DIV" may be obscured by the rear sight.

Action

- gas operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is usually found on the top rear of the receiver/frame or on the side of the receiver/frame at the chamber area. - the serial number may be obscured by the rear sight or the stock. - serial numbers can sometimes be used to indicate a manufacturer or distinct model.
Calibre	- "CAL.30 " may be marked on the receiver/frame.
Shots	- detachable box magazine.
Remarks	- manufacturer names, codes or serial numbers are the surest method of identifying these firearms. Identifying marks are to be taken from the receiver/frame only. Wartime production facilities used many parts manufactured by other carbine producers as well as numerous sub-contractors. Carbines were also often "arsenal refurbished", again making use of components for any number of different sources. Post war manufacturers also used many surplus military parts particularly in the early productions. As these parts ran out they began to use their own modern manufactured components. It is therefore possible to encounter a commercial carbine that will have military markings on some components as well as military manufactured firearms repaired or refurbished with modern commercial parts. Further commercial identification can be done with features such as finish or stock style and material. Specific forms of markings can be used to help identify rough dates of manufacture as well. The proliferation of modern accessory stocks, fittings, sights, etc. may also confuse the issue of specific model identification.

- this is a modern reproduction of a Colt model 1873 Single Action Army revolver manufactured by Uberti to commemorate Richard Petty, the famed NASCAR racer.
- "Richard Petty 43" is marked on the left side of the barrel.
- "King Richard" is marked on the right side of the barrel.
- "Richard Petty" over "43" are marked on the grip plates.
- this revolver is engraved with silver-filled engraving showing a portrait of Richard Petty on the left side of the receiver/frame, and listing his victories around the cylinder between the flutes.
- features include: blade front sight and a groove and notch in the top strap of the receiver/frame for a rear sight; round barrel with a right side mounted ejector rod assembly; solid top receiver/frame with a removable fluted cylinder and right side swing-down loading gate; exposed spur hammer; single action trigger mechanism; faux ivory grip plates; blued finish.

Manufacturer

- United States Historical Society (U.S. Historical Society) was located in Richmond, Virginia, U.S.A.
- Unoted States Historical Society firearms manufactured in the U.S.A. were by Williamsburg Firearms Manufactury and Virginia Firearms Manufactory.
- United States Historical Society/Antique Arms Division was acquired by America Remembers in 1994.

Firearm Reference Number (FRN): 131587
Make: US Historical Society
Model: Wogdon Flintlock Pistol Reproduction

Summary

Make:	US Historical Society
Model:	Wogdon Flintlock Pistol Reproduction
Manufacturer:	US Historical Society/Uberti
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	ITALY
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
131587 - 1	54 FLINTLOCK	1	244	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "U.S. HISTORICAL SOCIETY" is not usually marked on the firearm.
- "Wogdon" and "London" are marked on the barrel.
- "Wogdon" is scripted on the side plates.
- United States Historical Society (U.S. Historical Society) was an umbrella group that produced collector-grade reproductions of famous artifacts related to historic persons and places in US history.
- United States Historical Society/Antique Arms Division of this group specialized in the production of commemorative firearms.

Model

- "Wogdon" and "London" in script are marked on the sideplates.
- based on the original pistols of the Chase Manhattan Bank Collection, New York City, this is a reproduction of the original .54 calibre Wogdon flintlock duelling pistol used by Hamilton and Burr on July 11, 1804 in Weehawken, NJ, USA.
- issued by the US Historical Society, this matched pair of flintlock dueling pistols were sold in a case which is inscribed "The Alexander Hamilton-Aaron Burr Flintlock Dueling Pistols".
- 1200 matched sets were produced 1981.
- features include: coin finished lock plate, action and engraved upper tang; brass forearm; steel ramrod, blued finger rest trigger guard; browned barrels, and hidden set trigger; checkered, varnished wooden stock.

Manufacturer

- United States Historical Society (U.S. Historical Society) was located in Richmond, Virginia, U.S.A.
- Unoted States Historical Society firearms manufactured in the U.S.A. were by Williamsburg Firearms Manufactury and Virginia Firearms Manufactory.
- United States Historical Society/Antique Arms Division was acquired by America Remembers in 1994.

Action

- muzzle loader.

Serial Number

- serial numbers consist of up to three numbers followed by either an "A" or a "B".
- example 9-999A or 9-999B.

Firearm Reference Number (FRN): 28117
Make: US Machine Gun
Model: M60

Summary

Make:	US Machine Gun
Model:	M60
Manufacturer:	New England Group Maremont Corporation
Level:	Converted Automatics
Type:	Machine Gun
Action:	Converted Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
28117 - 1	7.62MM NATO	N/A	650	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- adopted as a general purpose machine gun by the United Staes armed forces as a replacement for the .30 calibre light and heavy Browning machine guns. Equipped with a bi-pod for use in the light machine gun role, and a tri-pod for use as a heavy machine gun.

Model

- "Gun, Machine", over "7.62MM:M60" is marked on the receiver/frame.
- designed in the late 1950's, in service since the early 1960's.
- features include: a quick change barrel that incorporates its own gas cylinder and bi-pod but no handle (a later version, the M60E1, featured a simpler barrel with the bi-pod and gas cylinder fixed to the gun), and a synthetic pistol grip and stock.

Manufacturer

- the manufacturers name is marked on the top of the receiver/frame as: "NEW ENGLAND GROUP", over "MAREMONT CORP.", over "U.S.".
- this manufacturer has operated under different names over the past 30 years, which has included SACO LOWELL SHOPS and SACO DEFENCE SYSTEMS DIVISION MAREMONT CORPORATION.

Action

- no longer capable of full automatic fire.

Shots

- is a belt-fed firearm.

Notes

Make

- "US Machine Gun" is not marked on the firearm and incorporates the following variants:
- T161: the M60's developmental designation before it was type-classified in the 1950's.
- M60: the basic model, type-classified in 1957.
- M60E1: an improved version that did not enter production. The primary difference was the handle fixed to the barrel and the removal of the gas cylinder and bipod from the barrel assembly.
- M60E2: used in vehicles as a coaxial machine gun; electrically fired.
- M60B: used in helicopters in the 1960's and 1970's; unmounted.
- M60C: used in fixed mounts in aircraft in the 1960's and 1970's; electrically fired and hydraulically charged.
- M60D: replaced the M60B; a pintle-mount version used especially in armament subsystem for helicopters, but also some other roles.
- M60E3: an updated, lightweight version adopted in the 1980s.
- M60E4 (Mk43 Mod 0/1): an improved model of the 1990s that looks similar to the E3, but has many improvements. It has sub-variants of its own, and is also used by the U.S. Navy (as the Mk 43 Mod 0/1). The Mk 43 Mod 1 is a specialized version with additional accessory rails.
- M60E6: a lightened and improved version of the M60E4.
- M60E6: in the Danish military has the designation "LMG M/60".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "M60E6" may not be marked on the receiver/frame. - "M60E6" is available as a conversion kit or as a complete firearm from US Ordnance, Nevada U.S.A., for any "M60" receiver/frame. - "M60E6" is defined by its features. - "M60E6" is a lightened and improved version of the M60 machine gun. - "M60E6" as of 2015, is not in the United States military service. - "M60E6" is a gas-operated, disintegrating-link, belt-fed, air-cooled machine gun that fires from an open bolt. - features include: threaded muzzle for flash hider/muzzle brake; windage adjustable, high front sight bracket or accessory rail block for removable front sight and fully adjustable aperture rear sight; quick-change barrel in short, long and heavy fluted configurations; gas block and piston operated gas system under the barrel; integrated bipod mounted on the receiver/frame; handguard with accessory rails; handguard mounted, removable, forward pistol grip; top mounted carrying handle; stamped sheet metal construction; receiver/frame is an assembly of several component parts, permanently or semi-permanently joined; non-reciprocating, non-folding, charging handle on the right side of the receiver/frame; receiver/frame mounted ammunition hanger on the left side; aluminum top cover with accessory rail for mounting of optics; ambidextrous safety lever on rear, top of the trigger group housing; synthetic buttstock; matte black or other coloured furniture.
Manufacturer	- "R.I.A." is marked on the left side of the receiver/frame. - "R.I.A." stands for "Rock Island Arsenal".
Action	- gas-operated.
Serial Number	- serial number is marked on the left side of the receiver/frame. - serial number of referenced examples consisted of six numbers.
Calibre	- calibre identification is usually marked on the barrel.
Shots	- belt-fed using disintegrating links.

Notes

Make

- "GUN, MACHINE" is marked on the top of the receiver/frame.

Model

- "M60E6" may or may not be marked on the receiver/frame.
- "M60E6" is available as a conversion kit or as a complete firearm from US Ordnance, Nevada U.S.A., for any "M60" receiver/frame.
- "M60E6" is defined by its features.
- "M60E6" is a lightened and improved version of the M60 machine gun.
- "M60E6" as of 2015, is not in the United States military service.
- "M60E6" is a gas-operated, disintegrating-link, belt-fed, air-cooled machine gun that fires from an open bolt.
- features include: threaded muzzle for flash hider/muzzle brake; windage adjustable, high front sight bracket or accessory rail block for removable front sight and fully adjustable aperture rear sight; quick-change barrel in short, long and heavy fluted configurations; gas block and piston operated gas system under the barrel; integrated bipod mounted on the receiver/frame; handguard with accessory rails; handguard mounted, removable, forward pistol grip; top mounted carrying handle; stamped sheet metal construction; receiver/frame is an assembly of several component parts, permanently or semi-permanently joined; non-reciprocating, non-folding, charging handle on the right side of the receiver/frame; receiver/frame mounted ammunition hanger on the left side; aluminum top cover with accessory rail for mounting of optics; ambidextrous safety lever on rear, top of the trigger group housing; synthetic buttstock; matte black and/or color finish furniture.

Manufacturer

"US ORDNANCE" is marked on the firearm.
- US Ordnance Incorporated is a manufacturer based in McCarran, Nevada (a suburb of Reno/Sparks) that produces semi-automatic recreations of medium machine-guns, as well as machineguns for military and domestic purchasers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- gas-operated.
Serial Number	- serial-numbered on the receiver/frame.
Calibre	- calibre identification is usually marked on the barrel.
Shots	- belt-fed. - use disintegrating links.

Notes

Make

- the make is marked on the firearm.

Model

- the model designation is marked on the firearm.
- this is a short lived medium machine gun designed specifically for use in armored vehicles after the withdrawal from service of the US M37/M1919 series of medium machine guns; this machine gun saw use between 1959 and 1977, after which it was itself replaced by the M240/FN MAG58.
- features include: a top-cover that hinges to the side for loading and clearing; ventilated barrel shroud; "U" shaped cocking handle on a cable; solenoid or manual firing; adjustable for left/right hand feed and a barrel shroud that swings to the side to allow barrel changes.
- an infantry tripod mounted version of the M73 was also produced as the "M73C", with open adjustable sights and a pistol grip assembly.
- after various problems with the M73 made themselves known, a "product improved" version of the M73 was adopted for a short while as the "M219"; this machine gun differs from the M73 in a number of internal features, but the main external difference is that the M73 has a number of welded studs on the side plates to aid in mounting the machine gun, while the M219 has slots for adjustable studs.

Manufacturer

- the manufacturer is marked on the firearm.

Action

- recoil operated.

Serial Number

- number on the receiver/frame.

Shots

- belt fed firearm.

Notes

Make	- the make is marked on the right side plate.
Model	- the model designation is marked on the firearm. - this is an in service replacement for the Browning M2 heavy machine gun in the tank co-ax or cupola-mount role; this firearm differs from the M2 in that it is a shorter, lighter machine gun with a faster rate of fire (has an internal rate of fire regulator to slow the action and reduce ammunition consumption). - features include: rectangular receiver/frame with stamped top cover; short ventilated barrel shroud; "prong" style flash hider and rubber or plastic-coated firing/cocking handles (this firearm does not have the M2 Browning "spade" style grips and is cocked by pulling a chain with a handle). - an infantry ground-mount version was also produced for a short while as the "M85C".
Manufacturer	- the manufacturer is marked on the right side plate.
Action	- recoil operated.
Serial Number	- numbered on the right side plate.
Shots	- belt fed firearm.

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
127312 - 1	60MM MORTAR	1	726	Prohibited PFR, Part 1, para. 95(z.249)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- Mortar is a short barreled, smooth bore or rifled, muzzle or breech loading, low velocity, short range, high angle of fire weapon.
- Mortars are classified as artillery although usually employed by infantry troops.

Model

- manufactured between 1938 and 1945.
- this is a light weight, drop fire, infantry mortar.
- features included: round smooth bore barrel; M5 bipod; M5 base plate; M4 sight.

Canadian Law Comments

- This model meets the definition of firearm in the Criminal Code of Canada S.2. This model may be regulated by other Federal Acts such as the Export and Import Permits Act (EIPA) and the Defence Production Act.

Firearm Reference Number (FRN): 136656
Make: US Mortar
Model: XM224E3

Summary

Make:	US Mortar
Model:	XM224E3
Manufacturer:	Watervliet Arsenal
Level:	Manufacturer Specifications and Commercial Customization
Type:	Mortar
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
136656 - 1	60MM MORTAR	1	685	Prohibited PFR, Part 1, para. 95(z.251)	Non-Commercial Customization	

Notes

Make

- make is derived from the characteristics/use of this device as employed by the US Military.
- the mortar is a short barreled, smooth bore or rifled, muzzle or breech loading, low velocity, short range, high-angle-of-fire weapon.
- mortars are classified as artillery although usually employed by infantry troops.

Model

- "MORTAR, 60MM: XM224E3" was observed marked on the mid-tube bracket surrounding the barrel.
- "XM224E3" was manufactured circa 1974.
- "XM224" mortar was approved for development by the US Military in December of 1970.
- "XM224" was an experimental/developmental model which eventually became the 60 MM M224 Lightweight Company Mortar as adopted by the US Military in July of 1977.
- M224 model series was designed as a light weight, smooth bore, muzzle loading, high-angle-of-fire weapon.
- 60MM MORTAR barrel assembly is composed of the barrel, combination base cap, and firing mechanism.
- 60MM MORTAR mount consists of a bipod and a base plate which is provided with screw type elevating and traversing mechanisms to elevate/traverse the mortar.
- 60MM MORTAR is equipped with an M4 optical sight.
- M224 Mortar as adopted by the US Military in 1977 had many design improvements incorporated that were significantly different from the XM224E3 version.
- average weight was 21.11 kgs (46.5 lbs).
- maximum range was 3490 meters (2.17 miles).
- muzzle velocity was from 64 mps to 247 mps.

Manufacturer

- "MFR. WATERVLIET ARS. US" was observed marked on the mid-tube bracket surrounding the barrel.
- Watervliet Arsenal is a United States Army facility founded in 1813.
- Watervliet Arsenal manufacturer mortar tubes, tank cannons, and artillery barrels.
- Watervliet Arsenal is located in Watervliet, New York, U.S.A., just outside of Albany.

Action

- designed to be gravity-fired or fired by using a manual spring-loaded firing pin controlled by a firing lever which cocks and fires the pin in one movement.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- known example had a two digit serial number without prefix or suffix marked on the mid-barrel bracket.
Calibre	- "MORTAR, 60MM" was observed marked on the mid-tube bracket surrounding the barrel.

Notes

Make

- "ORD. DEPT. U.S.A." was observed marked on the left side of the breech ring.

Model

- "GUN 37MM M6" was observed marked on the left side of the breech ring.
- manufactured in the 1940s.
- "M6 37MM Gun" was used in the following armoured fighting vehicles: M3 Lee Medium Tank, and M22 Locust Light Tank and the M8 Greyhound, Staghound and Humber Armoured Cars.
- this gun was also used in the anti-tank role on a towed field carriage.

Manufacturer

- US Ordnance Department was established by the act of 14 May 1812. During the Revolutionary War, ordnance material was under supervision of the Board of War and Ordnance. Numerous shifts in duties and responsibilities have occurred in the Ordnance Corps since colonial times. It acquired its present designation in 1950.
- US Ordnance Corps, purpose is to support the development, production, acquisition and sustainment of weapons systems and munitions, and to provide Explosive Ordnance Disposal, during peace and war, to provide superior combat power to current and future forces of the United States Army.

Action

- recoil operated, vertically sliding breech block.

Serial Number

- serial number was observed marked on the left side of the breech ring.
- observed serial number consisted of five numbers without a letter prefix or suffix.

Notes

Make

- "U.S. ORDNANCE" is marked on the firearm.
- U.S. Ordnance Incorporated is a manufacturer based in Reno, Nevada, that produces semi-automatic recreations of medium machine-guns.

Model

- "BROWNING M1919A4" is not marked on the receiver/frame.
- "BROWNING M1919A4" is a re-creation of the United States Service, .30 calibre, Browning Machine Gun, M1919A4.
- the Browning Machine Gun was named after the inventor, John M. Browning.
- "BROWNING M1919A4" is capable of semi-automatic fire only.
- the Browning Machine Gun M1919 could be configured into sub-models for different roles. A partial list of the possible configurations follows:

a) Browning Machine Gun M1919A4:
- M1919A4 is an air-cooled firearm which may be found in flexible configuration for infantry use and is normally fired from a tripod, or mounted on an armoured fighting vehicle.
- M1919A4 version feeds belts of ammunition from the left side.

b) Browning Machine Gun M1919A5:
- M1919A5 is an air-cooled firearm designed for fixed configuration and use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- M1919A5 version feeds belts of ammunition from the left side.

c) Browning Machine Gun M1919A6:
- M1919A6 is an air-cooled firearm which may be configured for infantry use with a carrying handle, bipod and shoulder stock.
- M1919A6 version feeds belts of ammunition from the left side.

Manufacturer

- US Ordnance Incorporated is a manufacturer based in Reno, Nevada that produces semi-automatic recreations of medium machine-guns.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Type	- designed and manufactured to be capable of semi-automatic fire only.
Action	- "short" recoil operated. - manufactured to fire semi-automatic only.
Serial Number	- serial number is marked the right sideplate. - serial number rationalization unknown.
Shots	- belt-fed firearm.
Canadian Law Comments	- Browning Machine Gun receivers: - The five sided box consisting of top and bottom plates, left and right side plates and the front trunnion block is the receiver/frame for all purposes of the Criminal Code, Section 2 definition of "firearm". - For regulatory purposes, when the five sided box receiver/frame is further disassembled, the receiver/frame component plate where the manufacturer information and serial number are found, is used to establish the description for the purpose of firearms registration. - The classification of this firearm as a semi-automatic firearm is based on the presumption that none of the original five (5) receiver components were reused. This is what was understood to be the meaning of the claim by the manufacturer that the firearm is a "newly manufactured semi-automatic firearm".
Remarks	- this firearm is a re-creation of the United States Service, 30 calibre, Browning Machine Gun, M1919A4, in semi-automatic fire configuration. - the receiver has been designed and manufactured to prevent the use of full-auto parts. - the manufacturer uses surplus US parts to build the receivers / frames into complete firearms. - these US Ordnance, Browning firearms may be reconfigured into sub-models for different roles. Some of these models and sub-models may not be marked on the firearm. A partial list of the possible configurations follows: a) Browning M1919-A4: - the Browning M1919-A4 is an air-cooled firearm which may be found in flexible configuration for infantry use normally fired from a tripod, and a fixed configuration for mounting in an armoured fighting vehicle. - the M1919-A4 version feeds belts of ammunition from the left side. b) Browning M1919-A6: - this Browning M1919A6 firearm is an air-cooled firearm which may be configured with a carrying handle, bi-pod and shoulder stock. - the Browning M1919-A6 version feeds belts of ammunition from the left side.

Notes

Make

- "US ORDNANCE" is usually marked on the firearm.

Model

- the model is marked on the firearm.
- this is a grenade-launching "machine gun", designed for area suppression and anti-vehicle/anti-armour use at ranges up to 2000 metres.
- the barrel is available with a variety of muzzle attachments and can be removed and replaced without any requirements for head space or timing adjustments.
- equipped with machine gun type flip up iron sights and is available with a variety of other optic sights.
- the Mk 19 is fitted with dual spade grips and cocking handle on the left and right side much like the 50 M2 Browning machine gun and is available with a variety of other fire-control systems such as an electric trigger pack for remote controlled firing,
- the standard mount is the M3 tripod (using the Mark 64 cradle/adapter for infantry use and is available with a variety of other mounts.
- fitted with a left side mounted ammunition box.

Manufacturer

"US ORDNANCE" is marked on the firearm.
- US Ordnance Incorporated is a manufacturer based in McCarran, Nevada (a suburb of Reno/Sparks) that produces semi-automatic recreations of medium machine-guns, as well as machineguns for military and domestic purchasers.

Action

- recoil operated.

Serial Number

- serial numbered on the receiver/frame.

Shots

- belt fed firearm.

127322 - 1	57MM RECOILLESS	1	1219	Prohibited PFR, Part 1, para. 95(z.253)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- Recoilless Weapon is designed to eliminate or balance the equal but opposite reaction to the force required to accelerate the projectile out of the tube; known as recoil.
- recoil is eliminated/reduced by controlling the escape of propellent gases to the rear of the weapon through an opening in the breech/venturi.
- Recoilless Rifle was a name originally applied to the US 57mm calibre recoilless rifle as it could be fired from the top of the shoulder.
- Recoilless Gun or Heavy Recoilless Gun/Rifle is usually applied to larger calibre that are fired from lightweight portable tripod mounts or from light vehicles such as a Jeep or Land Rover.

Model

- "M18" is lightweight anti-armour weapon, normally served by a two man crew and could be fired from the shoulder, or on a monopod/bipod or a tripod.
- "T15E3" was the first production version of the 57MM RECOILLESS.
- "T15E3" was introduced in November of 1943.
- "T15E3" had the trigger and sear connected by rods enclosed in a metal housing.
- "T15E3" was improved on and redesignated the "M18".
- "M18" had the trigger and sear connected by a wire cable in a conduit that was located on the right side of the barrel.
- "M18" was introduced in 1944.
- features include: round rifled barrel with manual operated rotating breech venturi; trigger mechanism located on the right side; optica sight.
- overall length of approximately 1564 mm and weight of approximately 25 kg.

Serial Number

- the serial number appears on the front of the breech ring.
- an observed sample serial number consisted of four digits without prefix or suffix.

Canadian Law Comments

- This model meets the definition of firearm in the Criminal Code of Canada S.2. This model may be regulated by other Federal Acts such as the Export and Import Permits Act (EIPA) and the Defence Production Act.

FRT Report

Firearm Reference Number (FRN): 129202
Make: US Recoilless
Model: M20

Summary

Make:	US Recoilless
Model:	M20
Manufacturer:	Firestone Tire & Rubber
Level:	Manufacturer Specifications and Commercial Customization
Type:	Other
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
129202 - 1	75MM RECOILLESS	1	1660	Prohibited PFR, Part 1, para. 95(z.254)	Non-Commercial Customization	

Notes

Make

- Recoilless Weapon is designed to eliminate or balance the equal but opposite reaction to the force required to accelerate the projectile out of the tube; known as recoil.
- recoil is eliminated/reduced by controlling the escape of propellent gases to the rear of the weapon through an opening in the breech/venturi.
- Recoilless Rifle was a name originally applied to the US 57mm calibre recoilless rifle as it could be fired from the top of the shoulder.
- Recoilless Gun or Heavy Recoilless Gun/Rifle is usually applied to larger calibre that are fired from lightweight portable tripod mounts or from light vehicles such as a Jeep or Land Rover.

Model

- "RIFLE 75MM..M20" was observed marked on the rear of the breech.
- "M20" is lightweight anti-armour weapon, normally served by a two man crew and could be fired from a M1917A1 machine gun tripod or a vehicle.
- "T21" was the first version of the 75MM RECOILLESS.
- "T21" was improved on and redesignated the "M20".
- "M20" was introduced in March of 1945.
- features include: round rifled barrel with manual operated rotating breech venturi; trigger mechanism located on the right side; optical sight.
- overall length of approximately 2080 mm and weight of approximately 52 kg.
- rifling; uniform right hand twist, 1 turn in 25".

Manufacturer

- manufacturer's name is marked on the rear of the breech.

Serial Number

- serial number is marked on the rear face of the breech and may be repeated on the venturi and breech block.
- observed serial number consisted of four numbers without a letter prefix or suffix.

Calibre

- ammunition for this firearm consists of High Explosive (HE), High Explosive Anti-tank (HEAT) & Smoke (T40, WP).

Notes

Make

- "U.S. REVOLVER CO" or "U.S. REVOLVER CO." over "MADE IN U.S.A." may be marked on the top strap of the receiver/frame or the barrel.
- "U.S." inside a circle may be marked on the grip plates.
- "U.S. REVOLVER COMPANY" was a trade name used on revolvers manufactured by "Iver Johnson".

Model

- introduced in 1911 and discontinued in 1933.
- model designation is not marked on this firearm.
- available in three receiver/frame sizes; 22LR was built on the small frame, 32 S&W Short was built on the medium frame and 32 S&W Long and 38 S&W were built on the large frame.
- features include: double action, blued or chrome receiver/frame and barrel, spurred hammer, unfluted cylinder, exposed cylinder pin under the barrel, a cylinder loading groove on the right side of the receiver/frame, round barrel, fixed blade front sight with a groove along the top strap or a notch at the rear of the top strap for a rear sight, and the grips may be black hard rubber.
- this model may also have a nickel or chrome finish and pearl or target grips.

Manufacturer

- manufacturer's name is not marked on this firearm.
- "MADE IN THE U.S.A." may be marked on the top strap of the receiver/frame or the barrel.

Serial Number

- the serial number is marked on the left side of the grip receiver/frame under the grip panel. The serial number may have five sequential numbers or one alpha character followed by three to five sequential numbers.
- the serial numbers were allotted to calibres as follows;
- 22LR - 0001 to 100,000 then D0001 to D55850.
- 32 Short - 0001 to 100,000 then E001 to E52100.
- 32 S&W Long and 38 S&W - 0001 to 100,000 then F0011 to F41600.

Notes

Make

- "US Rifle" is not marked on the firearm.
- "U.S." is marked on the receiver ring.
- adopted into the United States of America military service as the US Rifle model of 1903.

Model

- introduced in 1907.
- should be marked on top of the receiver/frame on the breech ring.
- the 1903 Gallery Practice Rifle is built on a standard 1903 receiver/frame and looks almost identical to the 1903 with the modifications of the 1905. With the exception of the barrel bore, in 22 calibre and the chamber is cut to accommodate the Hoffer-Thompson Cartridge Holder.

Manufacturer

- should be marked on top of the receiver on the breech ring.

Action

- manually operated, bolt-action, repeating rifle that requires special cartridge holders.

Serial Number

- should be marked on top of the receiver on the breech ring.

Notes

Make

- "US Rifle" is not marked on the firearm.
- "U.S." is usually marked on the receiver ring.
- adopted into the United States of America military service as the US Rifle model of 1903.

Model

- this is a generic entry for those "Springfield 1903" Models that have been modified/customized/sporterized to such a degree that the original model designation is no longer identifiable.
- this was originally a military rifle (US Rifle, 1903 or 1903/A3), reconfigured to a "sporter" configuration. Original military markings in the form of the make, manufacturer and/or serial number range may not be present.
- features may include:1903 action; internal box magazine; turned down bolt handle; medium-heavy barrel; original or aftermarket iron sights, may be drilled and tapped for various scope mounts, synthetic or wooden pistol grip stock with sling swivel studs; blued finish.

Manufacturer

- if present, the manufacturer is usually marked on the receiver ring.

Action

- turn-bolt design.

Serial Number

- serial number is usually marked on the receiver ring. It may or may not be visible or present depending on the individual firearm.

Calibre

- calibre, if present, may be marked on the barrel or the receiver/frame.

Shots

- internal box magazine.

Notes

Make

- "US Rifle" is not marked on the firearm.
- "U.S." is marked on the receiver ring.
- adopted into the United States of America military service as the US Rifle model of 1903/A4.

Model

- "03/A3" marked on the receiver/frame ring.
- none were marked "03/A4" but are distinct by the position of the designation on the receiver/frame. The marking "Model of 03/A3" appears at the nine o'clock position on the receiver/frame ring, as opposed to a regular Model 1903/A3 where the marking appears at the 12 o'clock position.
- intended for use with a telescopic sight.

Serial Number

- government assigned serial numbers were as follows: 3,407,088 - 3,427,087, Z4,000,001 to Z4,002,920, and 4,992,001 to 4,999,045.

Barrel

- no front sight or rear sight. Early examples had four groove rifling - most of production had two groove rifling.

Remarks

- this model has a telescopic sight base and was originally equipped with a telescopic sight.
- An 8 x 40 hole is drilled and tapped on the receiver ring and on the rear sight base to anchor the scope mount.
- May be found with a WEAVER 330 C telescope (marked M73B1).

Notes

Make

- "US Rifle" is not marked on the firearm.
- "U.S." and "MODEL OF 1917" are marked on the top of the receiver ring.

Model

- produced from 1917 to November 1918.
- total production of 1,181,908 rifles.
- "U.S." and "MODEL OF 1917" are marked on the top of the receiver ring.
- this model is a 30-06 SPRG version of the Enfield Pattern 1914.
- this model was also known as the "American Enfield" or "Rifle, Caliber 30, Model of 1917".
- this model was also produced by Winchester and Remington.
- features include: Mauser-type mechanism; one piece full length military style walnut stock, having a full top-wood hand guard; protected blade front sight and protected elevation adjustable rear peep sight; bayonet lug; sling swivels; integral stripper clip charger bridge.
- the rifle has a notable swept-back dog-legged bolt handle, a pronounced angular step on the front portion of the trigger guard, and a pair of substantial "wings" protecting the rear sights.

Manufacturer

- "EDDYSTONE" is marked on the top of the receiver ring.
- the actual corporate name of the temporary wartime company created to make this rifle at Eddystone was "Remington Arms of Delaware".

Action

- turn-bolt design.

Serial Number

- serial number is marked on the receiver ring, under "U.S.", "MODEL OF 1917" and "EDDYSTONE".
- serial number does not have a letter prefix or suffix.
- total production of 1,181,908 rifles.

Calibre

- calibre designation is not marked on the firearm.

Shots

- integral, fixed box magazine.
- magazine capacity of this firearm as manufactured is six (6) cartridges.
- Note: a common misconception is that the magazine capacity of this rifle as issued is five (5) cartridges. This misconception arose from the official doctrine of loading this rifle using five (5) shot stripper clips originally designed for use in the 1903 Springfield series of US Rifle models.

Other Markings

- U.S. ordnance markings in the form of a small "streamered bomb" or "flaming grenade" on the receiver, bolt, barrel, and other parts.
- may be other markings such as date numerals on the barrel.

Remarks

- When the United States of America entered the First World War in 1917 it was short of rifles.
- The firms (Winchester, Remington) that were producing the British Rifle, Pattern 1914 between 1914 and 1916 had just had their British contracts cancelled in late 1916.
- The British (service) Rifle, Pattern 1914 was quickly redesigned by the Americans and put back into production in calibre 30-06 SPRG, produced as the U.S. Rifle, Cal. 30, model of 1917.

Notes

Make

- "US Rifle" is not marked on the firearm.
- "U.S." and "MODEL OF 1917" are marked on the top of the receiver ring.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- produced from 1917 to November 1918.
- total production: 545,541 rifles
- "U.S." and "MODEL OF 1917" are marked on the top of the receiver ring.
- this model is a 30-06 SPRG version of the Enfield Pattern 1914.
- this model was also known as the "American Enfield" or "Rifle, Caliber 30, Model of 1917".
- this model was also produced by Eddyston Remington Arms (ERA) and Remington.
- features include: Mauser-type mechanism; one piece full length military style walnut stock, having a full top-wood hand guard; protected blade front sight and protected elevation adjustable rear peep sight; bayonet lug; sling swivels; integral stripper clip charger bridge.
- the rifle has a notable swept-back dog-legged bolt handle, a pronounced angular step on the front portion of the trigger guard, and a pair of substantial "wings" protecting the rear sights.

Manufacturer

- "U.S. and "W" or "U.S." over "MODEL OF 1917" over "WINCHESTER" are marked on the top of the receiver ring.
- "W" after "U.S." indicated the manufacturer "Winchester".

Action

- turn-bolt design.

Serial Number

- "U.S." over "W" over the serial number or "U.S." over "MODEL OF 1917" over "WINCHESTER" over the serial number are marked on the top of the receiver ring.
- serial number does not have a letter prefix or suffix.
- total production of 545,541 rifles.

Calibre

- calibre designation is not marked on the firearm.

Shots

- integral, fixed box magazine.
- magazine capacity of this firearm as manufactured is six (6) cartridges.
- Note: a common misconception is that the magazine capacity of this rifle as issued is five (5) cartridges. This misconception arose from the official doctrine of loading this rifle using five (5) shot stripper clips originally designed for use in the 1903 Springfield series of US Rifle models.

Other Markings

- U.S. ordnance markings in the form of a small "streamered bomb" or "flaming grenade" on the receiver, bolt, barrel and other parts.
- may be other markings such as date numerals on the barrel.

Remarks

- when the United States of America entered the First World War in 1917 it was short of rifles.
- the firms (Winchester, Remington) that were producing the British Rifle, Pattern 1914 between 1914 and 1916 had just had their British contracts cancelled in late 1916.
- the British Service Rifle, Pattern 1914 was quickly redesigned by the Americans and put back into production in calibre 30-06 SPRG, produced as the U.S. Rifle, Cal. 30, Model of 1917.

Notes

Make

- "U.S. RIFLE" is marked on the rear tang of the receiver/frame.
- frequently called the "Garand" rifle.
- this semi-automatic service rifle was designed by John Garand, adopted by the U.S. in 1936, and saw service through World War II and Korea.

Model

- Based on the "M1 Garand" design.
- Introduced in 1940.
- "U.S. RIFLE" over "CAL. .30 M1" over "H.& R. ARMS CO." over the serial number are stamped on top rear of receiver/frame.
- manufactured between 1951 and 1954.
- this is a gas operated semi-automatic service rifle designed by John Garand, adopted by the U.S. in 1936, and saw service through World War II and Korea.
- features include: parkerized metal surfaces; walnut stock; post foresight with protective side wings and rear aperture sight adjustable for both windage and elevation; detachable trigger group; bayonet lug forged as part of the gas assembly.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "H.& R. ARMS CO." is marked on rear tang of receiver/frame.
Action	- gas operated.
Serial Number	- the serial number is stamped on top rear of receiver/frame. - government assigned serial numbers range was from 4,660,001 to 4,800,000 and 5,488,247 to 5,793,847. - Harrington & Richardson produced approximately 445,600 M1 rifles.
Shots	- Introduced in 1940 with an 8 shot enbloc clip. - 8 shot enbloc clip. - The "M1 Garand" was introduced in 1936 with an 8 shot enbloc clip. - This firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, eight cartridge, enbloc clip; once inserted into the firearm, this clip cannot be recharged.
Canadian Law Comments	- the "magazine" feed device used in this firearm is exempt from the "REGULATIONS PRESCRIBING CERTAIN FIREARMS AND OTHER WEAPONS, COMPONENTS AND PARTS OF WEAPONS, ACCESSORIES, CARTRIDGE MAGAZINES, AMMUNITION AND PROJECTILES AS PROHIBITED OR RESTRICTED". For further information or clarification see "Part 4, Prohibited Devices", "Former Cartridge Magazine Control Regulations".
Other Markings	- several parts will be marked with part numbers and/or manufacturers markings.

Notes

Make

- "U.S. RIFLE" is marked on the rear tang of the receiver/frame.
- frequently called the "Garand" rifle.
- this semi-automatic service rifle was designed by John Garand, adopted by the U.S. in 1936, and saw service through World War II and Korea.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- Introduced in 1940.
- Based on the "M1 Garand" design.
- "U.S. RIFLE" over "CAL. .30 M1" over "SPRINGFIELD" over "ARMORY" over the serial number are stamped on top rear of receiver/frame.
- manufactured between 1937 and 1957.
- total production of approximately 4,617,000 rifles.
- this is a gas operated semi-automatic service rifle designed by John Garand, adopted by the U.S. in 1936, and saw service through World War II and Korea.
- features include: parkerized metal surfaces; walnut stock; post foresight with protective side wings and rear aperture sight adjustable for both windage and elevation; detachable trigger group; bayonet lug forged as part of the gas assembly.

Manufacturer

- manufacturer is marked on the top rear of the receiver/frame.

Action

- gas operated.

Serial Number

- the serial number is marked on the top tang of the receiver/frame.
- government assigned serial numbers were: 1 to 100,000; 165,001 to 1,200,000; 1,357,474 to 2,305,849; 2,655,983 to 4,100,000; 4,200,001 to 4,399,999; 5,000,001 to 5,000,500; 5,278,246 to 5,488,246; 5,793,848 to 6,099,905.

Calibre

- marked on the top rear of the receiver: U.S. RIFLE CAL. 30
- a number of the firearms were converted by the government at military installations to use 7.62MM NATO calibre ammunition.

Shots

- this firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, eight cartridge, enbloc clip.
- once inserted into the firearm, this clip cannot be recharged.
- Introduced in 1940 with an 8 shot enbloc clip.
- 8 shot enbloc clip.
- This firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, eight cartridge, enbloc clip; once inserted into the firearm, this clip cannot be recharged.

Canadian Law Comments

- the "magazine" feed device used in this firearm is exempt from the "REGULATIONS PRESCRIBING CERTAIN FIREARMS AND OTHER WEAPONS, COMPONENTS AND PARTS OF WEAPONS, ACCESSORIES, CARTRIDGE MAGAZINES, AMMUNITION AND PROJECTILES AS PROHIBITED OR RESTRICTED". Notes

Make

- "U.S. RIFLE" is marked on the rear tang of the receiver/frame.
- frequently called the "Garand" rifle.
- this semi-automatic service rifle was designed by John Garand, adopted by the U.S. in 1936, and saw service through World War II and Korea.

Model

- Introduced in 1940.
- Based on the "M1 Garand" design.
- "U.S. RIFLE" over "CAL. .30 M1" over "WINCHESTER" over the serial number are stamped on top rear of receiver/frame.
- manufactured between 1940 and 1945.
- this is a gas operated semi-automatic service rifle designed by John Garand, adopted by the U.S. in 1936, and saw service through World War II and Korea.
- features include: parkerized metal surfaces; walnut stock; post foresight with protective side wings and rear aperture sight adjustable for both windage and elevation; detachable trigger group; bayonet lug forged as part of the gas assembly.
- a shortened "Tanker" version was produced for use in the Pacific theatre during World War Two.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "Winchester " is usually marked on the top rear of the receiver/frame.
Action	- gas operated.
Serial Number	- Government assigned serial numbers were 100,001 to 165,000; 1,200,001 to 1,357,473; 2,305,850 to 2,655,982. - Winchester assigned range of 2,305,850 to 2,665,892 was grossly duplicated by Springfield so serial number and manfacturer are needed to ensure correct identification.
Shots	- Introduced in 1940 with an 8 shot enbloc clip. - 8 shot enbloc clip. - This firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, eight cartridge, enbloc clip; once inserted into the firearm, this clip cannot be recharged.
Canadian Law Comments	- the "magazine" feed device used in this firearm is exempt from the "REGULATIONS PRESCRIBING CERTAIN FIREARMS AND OTHER WEAPONS, COMPONENTS AND PARTS OF WEAPONS, ACCESSORIES, CARTRIDGE MAGAZINES, AMMUNITION AND PROJECTILES AS PROHIBITED OR RESTRICTED". For further information or clarification see "Part 4, Prohibited Devices", "Former Cartridge Magazine Control Regulations".

Notes

Make

- "U.S. RIFLE" is marked on the rear tang of the receiver/frame.
- frequently called the "Garand" rifle.
- this semi-automatic service rifle was designed by John Garand, adopted by the U.S. in 1936, and saw service through World War II and Korea.

Model

- "U.S. RIFLE" over "CAL. .30 M1" over "SPRINGFIELD" over "ARMORY" or the original manufacturer's name over the serial number are stamped on top rear of receiver/frame.
- the letters "NM" for National Match are marked on the barrel and may be repeated on other parts.
- the M1 National Match rifles were manufactured between 1953 and 1959.
- existing M1 rifles were converted to National Match configuration between 1954 and 1963.
- total production of 44,850 units. This number consisted of 21,390 new rifles and 23,460 rebuilt rifles.
- the M1 National Match "Type 1" configuration started as a tuned up service rifle with the letters "NM" with a star stamped on the barrel and a newly produced receiver/frame.
- the M1 National Match "Type 2" configuration featured a hooded rear sight, glass bedded stock and the letters "NM" marked on many of the parts.

Manufacturer

- "SPRINGFIELD" over "ARMORY" is marked on the tang of the receiver/frame (of those units produced as new at Springfield Armory).
- "SA", the abbreviation for "Springfield Armory" is marked on the barrel.
- converted rifles may retain the original manufacturer's markings.

Action

- gas operated.

Serial Number

- the serial number is marked on the top tang of the receiver/frame.

Calibre

- "CAL. .30 M1" is marked on the top tang.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- this firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, eight cartridge, enbloc clip.
- once inserted into the firearm, this clip cannot be recharged.

Canadian Law Comments

- the "magazine" feed device used in this firearm is exempt from the "REGULATIONS PRESCRIBING CERTAIN FIREARMS AND OTHER WEAPONS, COMPONENTS AND PARTS OF WEAPONS, ACCESSORIES, CARTRIDGE MAGAZINES, AMMUNITION AND PROJECTILES AS PROHIBITED OR RESTRICTED". Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
36211 - 1	7.62MM NATO	8	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "U.S. RIFLE" is marked on the rear tang of the receiver/frame.
- frequently called the "Garand" rifle.
- this semi-automatic service rifle was designed by John Garand, adopted by the U.S. in 1936, and saw service through World War II and Korea.

Model

- Introduced in 1965.
- Based on the "M1 Garand" design.
- this is a US Navy conversion of a standard US Rifle, M1 (Garand) from .30-06 SPRG to 7.62 MM NATO by the use of a chamber insert to reduce the length of the chamber.

Manufacturer

- American Machine and Foundry Company (AMF) was contracted to convert approximately 17,000 M1 rifles to Mark 2 Model 0 specifications.
- this conversion was done to M1 rifles manufactured by Harrington & Richardson, International Harvester Corporation, Springfield Armory, and Winchester.

Action

- gas operated.

Barrel

- Original .30-06 SPRG chambered barrel modified by the insertion of a chamber insert so the 7.62 MM NATO cartridge could be used.

Calibre

- left side of receiver marked "7.62 MM NATO"

Shots

- Introduced in 1965 with an 8 shot enbloc clip.
- 8 shot enbloc clip.
- This firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, eight cartridge, enbloc clip; once inserted into the firearm, this clip cannot be recharged.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- the "magazine" feed device used in this firearm is exempt from the "REGULATIONS PRESCRIBING CERTAIN FIREARMS AND OTHER WEAPONS, COMPONENTS AND PARTS OF WEAPONS, ACCESSORIES, CARTRIDGE MAGAZINES, AMMUNITION AND PROJECTILES AS PROHIBITED OR RESTRICTED". For further information or clarification see "Part 4, Prohibited Devices", "Former Cartridge Magazine Control Regulations".

Remarks

- This converted model was generally unsatisfactory in US Navy service and most examples of this model were converted (again) to the US Rifle, Navy MK2, Model 1 by rebarrelling with a barrel chambered for the 7.62 MM NATO cartridge.

FRT Report

Firearm Reference Number (FRN): 350
Make: US Rifle
Model: M1 Navy Match

Summary

Make:	US Rifle
Model:	M1 Navy Match
Manufacturer:	Harrington & Richardson
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
350 - 1	7.62MM NATO	8	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "U.S. RIFLE" is marked on the rear tang of the receiver/frame.
- frequently called the "Garand" rifle.
- this semi-automatic service rifle was designed by John Garand, adopted by the U.S. in 1936, and saw service through World War II and Korea.

Model

- Introduced in 1957.
- Based on the "M1 Garand" design.
- "Navy Match" is engraved on the receiver/frame.
- an enhanced M1 Garand converted for more accurate shooting during training and service competitions.

Manufacturer

- marked H & R ARMS CO. Other manufacturers are probable as this rifle was a conversion of any M1 Garand held by the US Navy.

Action

- gas operated.

Calibre

- left side of receiver/frame is marked "7.62MM NATO"

Shots

- Introduced in 1957 with an 8 shot enbloc clip.
- 8 shot enbloc clip.
- The "M1 Garand" was introduced in 1940 with an 8 shot enbloc clip.
- This firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, eight cartridge, enbloc clip; once inserted into the firearm, this clip cannot be recharged.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- the "magazine" feed device used in this firearm is exempt from the "REGULATIONS PRESCRIBING CERTAIN FIREARMS AND OTHER WEAPONS, COMPONENTS AND PARTS OF WEAPONS, ACCESSORIES, CARTRIDGE MAGAZINES, AMMUNITION AND PROJECTILES AS PROHIBITED OR RESTRICTED". For further information or clarification see "Part 4, Prohibited Devices", "Former Cartridge Magazine Control Regulations".

Remarks

- 'Navy Match' appears on action, "7.62 NATO" on left side of receiver/frame. The M1 Navy Match rifle is a modification of the US Rifle M1 wherein a barrel chamber insert converts the calibre from 30-06 SPRG to 7.62MM NATO. This economy driven conversion was generally unsatisfactory. The US Navy then rebarrelled many of this M1 Navy Match model, rebarrelled rifle officially known as the US Rifle, Navy MK 2 Model 1, Cal 7.62MM

FRT Report

Firearm Reference Number (FRN): 20068
Make: US Rifle
Model: M14

Summary

Make:	US Rifle
Model:	M14
Manufacturer:	Harrington & Richardson
Level:	Converted Automatics
Type:	Rifle
Action:	Converted Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
20068 - 3	308 WIN	5	470	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
20068 - 1	7.62MM NATO	5	559	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
20068 - 2	7.62MM NATO	20	559	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make	- "U.S. RIFLE" is marked on the rear tang of the receiver/frame.
Model	- marked on the top rear receiver/frame.
Manufacturer	- the manufacturer's name is marked on the top rear receiver/frame.
Action	- no longer capable of full automatic fire.
Serial Number	- marked on the top rear receiver below name of the manufacturer.
Barrel	- length does not include the attached flash hider/muzzle brake.
Calibre	- marked on the rear top of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots
- detachable box magazine.

Other Markings
- many parts marked with military identification number.
- left side of dial elevator on rear sight marked: LEFT (with counter-clockwise arrow) LEFT (and manufacturer's identification)

Remarks
- this was the official service rifle of the United States from 1961 to 1966: it was replaced by the "M16" Model.
- this rifle was issued in the semi-automatic mode (without the full-automatic lever) with a blind button-plug installed. Other components came installed; conversion to FA required dismantling and installation of the rotating FA change lever (which was not supplied).

64889 - 2	7.62MM NATO	20	559	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- the make is marked on the top rear of the receiver/frame.
Model	- the M14A1 should not be confused with the standard M14 and the M15 heavy barrel. - the M14A1 was built on the standard M14 receiver/frame, model markings may read "M14" or "M14A1". - the M14A1 was basically a standard M14 capable of full automatic fire with an adjustable bipod, a stabilizer that fits over the flash hider and locks on the bayonet lug, and an E1 or E2 stock. These stocks are made of wood and have a vertical pistol grip fitted behind the trigger guard, and a folding synthetic hand grip mounted in the forward position. Some examples may be fitted with a rubber buttplate.
Manufacturer	- marked on the top rear of the receiver/frame just behind the rear sight.
Type	- this Rifle was also used as a Light Machine Gun or Squad Automatic Weapon.
Action	- gas operated.
Serial Number	- marked on the top rear of the receiver/frame.
Shots	- detachable box magazine.

FRT Report

Firearm Reference Number (FRN): 64890
Make: US Rifle
Model: M14A1

Summary

Make:	US Rifle
Model:	M14A1
Manufacturer:	Harrington & Richardson
Level:	Converted Automatics
Type:	Rifle
Action:	Converted Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
64890 - 1	7.62MM NATO	5	559	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
64890 - 2	7.62MM NATO	20	559	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make	- marked on the top rear of the receiver/frame: U.S. RIFLE 7.62 MM M14 .
Model	- the M14A1 should not be confused with the standard M14 and the M15 heavy barrel. - the M14A1 was built on the standard M14 receiver/frame, model markings may read "M14" or "M14A1". - the M14A1 was basically a standard M14 capable of full automatic fire with an adjustable bipod, a stabilizer that fits over the flash hider and locks on the bayonet lug, and an E1 or E2 stock. These stocks are made of wood and have a vertical pistol grip fitted behind the trigger guard, and a folding synthetic hand grip mounted in the forward position. Some examples may be fitted with a rubber buttplate.
Manufacturer	- marked on the top rear of the receiver/frame.
Type	- this Rifle was also used as a Light Machine Gun or Squad Automatic Weapon.
Action	- no longer capable of full automatic fire.
Serial Number	- marked on the top rear of the receiver/frame.
Shots	- detachable box magazine.

Summary

Make:	US Rifle
Model:	M14M
Manufacturer:	Springfield Armory
Level:	Converted Automatics
Type:	Rifle
Action:	Converted Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
120849 - 1	7.62MM NATO	5	559	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
120849 - 2	7.62MM NATO	20	559	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- the make is marked on the top of the receiver/frame just behind the rear sight as "U.S. RIFLE".

Model

- the "M" in the model designation indicates the rifle has undergone a conversion process and is re-designated as "Modified Service".
- the "M" designation may be found either hand stamped or engraved on the rear of the receiver/frame following the standard production model designation.
- these rifles were produced by Springfield Armory in 1962 and 1963 directly from their production line and from rifles submitted for repair/overhaul in 1965.
- approximately 9,200 total units were converted to "M" status by welding the selector shaft, selector lock retaining pin, sear release, and receiver sear release into a single solid unit.
- this model is the precursor to the M14 NM as produced by Thompson-Ramo-Wooldridge (TRW) beginning in 1964.
- features include: a wooden stock; parkerized metal surfaces; rear peep and front post sights.
- this model differs from standard M14 rifles in having a glass bedded stock, a unitized gas cylinder system and flash suppressor modifications to enhance accuracy.
- this rifle was initially manufactured for shooter orientation and familiarization use by civilians at the 1963 Small Arms Firing School at Camp Perry. It was issued at the 1964 National Matches at Camp Perry and was also issued to state rifle associations for use. Some units were subsequently offered for sale by the Director of Civilian Marksmanship to NRA affiliated rifle clubs and civilians.

Manufacturer

- these rifles were produced by Springfield Armory in 1962 and 1963 directly from their production line and from rifles submitted for repair/overhaul in 1965.
- this model/conversion was converted from standard M14 rifles by Springfield Armory. Examples may be encountered that were originally produced by other manufacturers but converted during the overhaul/repair process of rifles undertaken in 1965.

Action

- no longer capable of full automatic fire.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number is marked on the top of the receiver/frame, just behind the rear sight.
Calibre	- the calibre designation is marked on the rear of the receiver/frame as "7.62MM".
Shots	- detachable box magazine.
Canadian Law Comments	- as this model uses a receiver/frame that was designed to support full automatic fire capability it is considered a "Converted Automatic" firearm. As such, regardless of when or where the modifications were carried out it retains a Prohibited legal classification. For further clarification see Criminal Code definition; CC 84 (1) "prohibited firearm" para. (c).

120848 - 2	7.62MM NATO	20	559	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- the make is marked on the top of the receiver/frame just behind the rear sight as "U.S. RIFLE".
- as the M14 was the service rifle of the United States it was eligible to be used in the National Rifle Matches held at Camp Perry, Ohio. An engineering program was initiated in 1959 at Springfield Armory to develop the M14 National Match rifle for use in competition.

Model

- the model designation is marked on the top of the receiver/frame just behind the rear sight as "M14 NM". The "NM" in the model designation denotes "National Match".
- Thompson-Ramo-Wooldridge (TRW) was contracted to supply 5,515 M14 "match" rifles for the 1964 National Rifle Matches held at Camp Perry, Ohio. They were also contracted for a further 2,094 rifles for the 1965 Matches. Total actual production is unknown but references indicate that approximately 4,874 rifles were manufactured.
- this rifle was manufactured/modified by Thompson-Ramo-Wooldridge (TRW) by mating specially selected and finished parts to an M14 service rifle receiver/frame that had the selector shaft, sear release, selector lock and receiver sear release welded so that the rifle was no longer capable of full automatic fire.
- other features include: select barrel where the bores were held to half the tolerances of a standard service rifle barrel and not chromium plated; receiver/frame is glass bedded to the stock; fitted with a special rear sight that allows 1/2 minute of angle adjustments for windage and elevation.

Manufacturer

- the manufacturers identifier is marked on the top rear of the receiver/frame as "TRW" in small script inside a triangular symbol.
- Thompson-Ramo-Wooldridge (TRW) was the first private company to be awarded a contract to supply "Match" rifles to the government of the United States.

Action

- no longer capable of full automatic fire.

Serial Number

- the serial number is marked on the top of the receiver/frame behind the rear sight.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- detachable box magazine.
Canadian Law Comments	- as this model uses a receiver/frame that was designed to support full automatic fire capability it is considered a "Converted Automatic" firearm. Notes

Make

- US RIFLE is marked on top of the receiver ring.
- originaly developed to aid in experimental work for .22 HORNET.

Model

- marked on top of receiver ring.
- this is a 22 calibre target version of the US "Model 1903" Springfield military rifle.
- It is readily identified by the:
- single barrel band,
- half length sporting-type pistol grip stock,
- no top hand guard, and
- blade front sight.

Manufacturer

- marked on top of receiver ring.

Action

- manually operated, bolt actuated, magazine fed, repeating rifle.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- numbered in sequence with the US Rifle, Calibre 30, M1903A1 contemporary production.

Calibre

- this cartridge was devised by Springfield Armoury staff , 1930.
- the US Rifle M1922 in caliber 22 Hornet was made in experimental, small quantity lots.

Shots

- detachable box magazine.

Remarks

- The US Rifle, Caliber 22, M1922 was initially developed jointly by the US Ordnance Department and the National Rifle Association (NRA) to provide accurate small-bore rifles for civilian rifle clubs for use in rifle competitions in schools and colleges, and for sale purposes to members of the NRA.
- Subsequently this firearm was adopted as a military standard firearm by all branches of the US Forces and the Coast Guard.
- The rifles assembled for civilian type marksmanship have shotgun style butts while the military models have a military butt and butt-plate.
- As initially produced the rifle was designated M1922, sucessive improvements and modifications have been indicated by the designation M1922M1 and the M2.
- In general these improvements have been to the bolt assembly and firing mechanism and may be applied to any of the sub-model variants of this rifle.
- The predominant identifying feature of the M1922 is the bolt has a large knob similar to the US Rifle M1903A1 (Springfield Rifle in 30-06 SPRG Calibre), there are also a number of non-visible differences in the firing mechanism.

Firearm Reference Number (FRN): 2565
Make: US Rifle
Model: M1922M1

Summary

Make:	US Rifle
Model:	M1922M1
Manufacturer:	Springfield Armory
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
2565 - 1	22 LR	5	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
2565 - 2	22 LR	5	622	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "US RIFLE" is marked on top of the receiver ring.

Model

- marked on top of receiver ring.
- this firearm is a 22 calibre target version of the US Rifle "Model 1903A1" Springfield.
- It is readily identified by the:
- single barrel band,
- half length sporting-type pistol grip stock,
- no top hand guard,
- receiver-mounted adjustable Lyman No 48C aperture rear sight, and
- blade front sight.

Manufacturer

- marked on top of receiver ring.

Action

- turn-bolt design.

Serial Number

- numbered in sequence with the US Rifle, Calibre 30, M1903A1 contemporary production.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- The US Rifle, Caliber 22, M1922 was initially developed jointly by the US Ordnance Department and the National Rifle Association (NRA) to provide accurate small-bore rifles for civilian rifle clubs for use in rifle competitions in schools and colleges, and for sale purposes to members of the NRA.
- Subsequently this firearm was adopted as a military standard firearm by all branches of the US Forces and the Coast Guard.
- The rifles assembled for civilian type marksmanship have shotgun style butts while the military models have a military butt and butt-plate.
- As initially produced the rifle was designated M1922, sucessive improvements and modifications have been indicated by the designation M1922M1 and the M2.
- The modifications that make this rifle the US Rifle, Caliber .22, 1922M1 are as follows:
- redesigned bolt assembly (M1922M1 firing mechanism assembly),
- M1921M1 magazine assembly,
- Lyman 48C receiver sight,
- M2 stock assembly,
- redesigned bolt handle to incorporate an adjustable headspace feature, and
- improved firing pin time.
- This rifle may be a modified US Rifle, 22 Calibre, M1922, further modified to bring it up to the US Rifle 22 Caliber, M1922M1 standard or it may be a purpose-built M1922M1 Rifle.
- All of these improvements may and probably have been applied to all former M1922 pattern rifles except those sold to individuals by the Directorate of Civilian Marksmanship.

Notes

Make

- "U.S. RIFLE" is marked on the rear tang of the receiver/frame.
- frequently called the "Garand" rifle.
- this semi-automatic service rifle was designed by John Garand, adopted by the U.S. in 1936, and saw service through World War II and Korea.

Model

- Introduced in 1944.
- Based on the "M1 Garand" design.
- designation "M1C" does not appear on the firearm.
- this model is a standard US Rifle Cal 30 M1 adapted during manufacture to mount a telescopic sight and as such that designation (US Rifle Cal 30 M1) appears on the rear of the receiver.
- the mount is screwed and pinned to the left side of the receiver (not like the telescopic sight mount of the US Rifle M1D which attaches to a sleeve on the chamber of the barrel).
- when mounted, the telescopic sight aligns with left side of barrel, not over the bore.

Manufacturer

- name appears on the rear of the receiver.

Action

- gas operated.

Serial Number

- appears on the rear of the receiver.
- unknown numbers were made but serial numbers fall within the indicated range.
- 1 to 4,330,000

Calibre

- caliber designation appears on the rear of the receiver as "Cal 30".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- The "M1 Garand" was introduced in 1936 with an 8 shot enbloc clip.
- This firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, eight cartridge, enbloc clip; once inserted into the firearm, this clip cannot be recharged.

Notes

Make

- "U.S. RIFLE" is marked on the rear tang of the receiver/frame.
- frequently called the "Garand" rifle.
- this semi-automatic service rifle was designed by John Garand, adopted by the U.S. in 1936, and saw service through World War II and Korea.

Model

- Introduced in 1944.

- Based on the "M1 Garand" design.
- the model designation does not appear as "M1D" on the firearm.
- this model is a conversion of a standard US Rifle, model M1 to mount a telescopic sight; this conversion was adopted in 1944.
- this is a standard US Rifle M1 except that the barrel has a telescopic sight mounting sleeve to which a telescopic sight base is screwed and pinned. When mounted, the telescopic sight aligns with the left side of the barrel, not over the bore.
- barrels for the M1D were produced by Springfield Armory, these barrels have the drawing number D7312575 marked on the right side. Conversions were carried out at almost all levels within the ordnance system.

Manufacturer

- the original manufacturers name (receiver/frame) appears on the rear of the receiver/frame as "H.& R.ARMS CO." .
- the right "leg" of the receiver/frame may be marked with the initials of the converting facility and the date of the conversion.

Action

- gas operated.

Serial Number

- unknown number made (converted) but serial numbers usually fall within the range of the two serial number blocks assigned to Harrington & Richardson; 4,600,001 to 4,800,000 and 5,488,247 to 5,793,847 (H&R produced rifles have been noted with numbers in the 6,000,000 range).
- early production samples may have a World War II era serial number.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- appears on the top rear of the receiver/frame as "Cal 30 M1".
Shots	- Introduced in 1944 with an 8 shot enbloc clip. - 8 shot enbloc clip. - The "M1 Garand" was introduced in 1940 with an 8 shot enbloc clip. - This firearm does not have a conventional magazine, it has a feed mechanism which must be charged with a special, eight cartridge, enbloc clip; once inserted into the firearm, this clip cannot be recharged.
Canadian Law Comments	- the "magazine" feed device used in this firearm is exempt from the "REGULATIONS PRESCRIBING CERTAIN FIREARMS AND OTHER WEAPONS, COMPONENTS AND PARTS OF WEAPONS, ACCESSORIES, CARTRIDGE MAGAZINES, AMMUNITION AND PROJECTILES AS PROHIBITED OR RESTRICTED". For further information or clarification see "Part 4, Prohibited Devices", "Former Cartridge Magazine Control Regulations".
Remarks	- although officially adopted in September of 1944 as "Substitute Standard" only a few were produced prior to the end of World War II. All early conversions (1951-1953) were done at Springfield Armory, other facilities continued converting rifles into M1D configuration into the 1960's.

Notes

Make

- "U.S." is normally marked on the left side of the receiver/frame.
- this model was adopted as the US Rifle M40 and was in service with the United States Marine Corps as their precision/sniper rifle.

Model

- "M40" is not marked on the receiver/frame.
- "Remington" and "MODEL 700" or "MODEL 40-X" is usually marked on the left side of the receiver/frame.
- this is a Remington model 700 rifle in a military configuration adopted by the United States Marine Corps in 1966 as the "Rifle, Sniper 7.62mm, M40".
- features include: heavy profile steel barrel; Remington model 700 receiver/frame; internal box magazine; bolt release lever inside the trigger guard; receiver/frame drilled and tapped for scope mounts; no open sights; walnut stock with rubber recoil pad.
- this model will normally be found equipped with a Redfield 3 to 9X power telescopic sight.
- NOTE: starting in mid-1976 the "Rifle, Sniper 7.62mm, M40" was rebuilt/modified to the M40A1 configuration .This included a stainless steel barrel and fibreglass stock. This configuration was known as the "Rifle, Sniper 7.62mm, M40A1".

Manufacturer

- the original components are/were supplied by Remington, as these rifles may have undergone routine maintenance and/or rebuilding there may be variations in finish and accessories on individual rifles.

Action

- turn-bolt design.

Serial Number

- the serial number is marked on the receiver/frame.

Shots

- the floorplate and spring/follower assembly can be opened to allow access to the internal box magazine.

FRT Report

Firearm Reference Number (FRN): 127213
Make: US Rifle
Model: M40A1

Summary

Make:	US Rifle
Model:	M40A1
Manufacturer:	GA Precision/Remington
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
127213 - 1	308 WIN	5	635	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "US" is marked on the receiver/frame.
- "G A Precision" is not marked on the firearm.
- this model was adopted as the US Rifle M40A1 and is in service with the United States Marine Corps as their precision/sniper rifle.

Model

- "Remington Model 700" is marked on the left side of the receiver/frame.
- this is a Remington model 700 reworked to incorporate the features of the USMC M40A1 model.
- features include: heavy profile blued barrel; Remington model 700 receiver/frame; internal box magazine; bolt release lever inside the trigger guard; receiver/frame drilled and tapped for scope mounts; no open sights; camo fiberglass stock with rubber recoil pad.
- this model will normally be found equipped with a fixed 10X power telescopic sight.

Manufacturer

- the original receiver/frame was supplied by Remington.
- G.A. Precision is a manufacturer based in North Kansas City, Missouri, U.S.A.
- G.A. Precision has been in business since 1999.
- G.A. Precision specializes in "re-manufacturing" bolt-action rifles into custom, tactical and hunting rifles.

Action

- turn-bolt design.

Serial Number

- the serial number is marked on the receiver/frame.
- one example consisted of "US" marked over six numbers on the receiver/frame.

Shots

- the floorplate and spring/follower assembly can be opened to allow access to the internal box magazine.

Notes

Make

- "US RIFLE" is marked on the receiver/frame.
- this model is adopted as the US Rifle M40A1 and is in service with the United States Marine Corps as their precision/sniper rifle.

Model

- "M40A1" is marked on the receiver/frame.
- this is a Remington model 700 in military configuration.
- features include: heavy profile stainless steel barrel; Remington model 700 receiver/frame; internal box magazine; bolt release lever inside the trigger guard; receiver/frame drilled and tapped for scope mounts; no open sights; fiberglass stock with rubber recoil pad.
- this model will normally be found equipped with a fixed 10X power telescopic sight.
- a similar rifle equipped with an adjustable synthetic stock and different sighting system, known as the "M24" is used by the US Army.

Manufacturer

- the original components are/were supplied by Remington, as these rifles may have undergone routine maintenance and/or rebuilding there may be variations in finish and accessories on individual rifles.

Action

- turn bolt operated.

Serial Number

- the serial number is marked on the receiver/frame.

Shots

- the floorplate and spring/follower assembly can be opened to allow access to the internal box magazine.

118077 - 2	7.62MM NATO	5	559	Prohibited CC 84(1) "prohibited firearm" para. (c)	Non-Commercial Customization	
118077 - 1	7.62MM NATO	20	559	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- make is not marked on the firearm.
Model	- this was the prototype immediate predecessor to the M14 rifle, which was tested against the FN-FAL design to determine the US Army's main battle rifle following the M1 Garand. - wooden pistol grip stock and top handguard, fully adjustable sights, fire selector switch on the right side of the receiver/frame, clip guide mounted on top of receiver/frame, flash suppressor, sling swivels and a 20 round detachable box magazine. - depending on the experimental number (T44E1, T44E2, T44E3, or T44E4), these rifles grew closer and closer to the final production version of the M14.
Manufacturer	- manufacturer marked on tang of rifle.
Action	- selective fire gas operated.
Serial Number	- serial number is marked on the receiver/frame tang.
Shots	- detachable box magazine.

Notes

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840s.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".
- "Musket" is a term that originally applied to a smooth bore long gun, later the term was applied to the infantryman's shoulder controlled long gun. The musket had a long fore-end and may have been equipped with a bayonet and a front and rear sight.
- "Rifle-Musket" is a term applied when musket barrels were manufactured with rifling, they were sometimes referred to as a rifled musket.
- "Musketoon" is a term applied to a musket equipped with a short barrel and bayonet.

Model

- this is a side hammer, flintlock, muzzleloading musket.
- two barrel bands with a nose band (which encircles the barrel and forend of the stock) retained by flat band springs on the right side of the forearm.
- lock and hammer have flat contour, hammer has reinforced cock.
- triggerguard, buttplate and barrel bands are iron.
- rear sling swivel on stud in front of triggerguard, forward sling swivel on underside of mid barrel band.
- Charleville muskets were imported into the United States and Charleville type muskets were manufactured in the United States during the Revolutionary War period (1775-1783) and were standard issue to American forces during that conflict.
- U.S. manufactured Charleville type muskets issued to government forces, as opposed to state forces, are marked "U.S." or "United States" on the lockplate, barrel and or the stock. Charleville type muskets issued to state forces may be marked with the name of the state eg. "MASS", "CT", "NY".

Type

- smooth bore musket.

Action

- muzzleloading, flintlock.

- "Musketoon" is a term applied to a musket equipped with a short barrel and bayonet.

Model

- model designation is not marked on the firearm.
- manufactured between 1800 and 1815.
- total production of approximately 70,000 muskets.
- lockplate marked "US" in script over an eagle, and "HARPERS" over "FERRY" marked on the tail of the lock. The markings changed with later models with the "HARPERS FERRY" changed to a horizontal marking, under an eagle.
- the barrel near the breech is marked "P", eagle head, "V", in that order reading down from the muzzle.
- later models were also marked with the year of manufacture on the tail of the lock.
- this model was closely modeled after the French Model 1763 musket, known as the "Charleville".
- there are three sub-variants of this model and they are known as: "Type I", "Type II", and "Type III". The differences among the sub-variants are in the pan configuration, the trigger guard, and the markings on the lockplate.
- features include: iron furniture; three barrel bands, upper double strapped; one piece black walnut stock; sling swivel.

Manufacturer

- "Harpers" over "Ferry" or "Harpers Ferry" and the year of manufacture are marked on the lockplate.

Action

- muzzle loader.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel - barrel length noted from 1118 mm (44") to 1143 mm (45").

- "Musket" is a term that originally applied to a smooth bore long gun, later the term was applied to the infantryman's shoulder controlled long gun. The musket had a long fore-end and may have been equipped with a bayonet and a front and rear sight.
- "Rifle-Musket" is a term applied when musket barrels were manufactured with rifling, they were sometimes referred to as a rifled musket.
- "Musketoon" is a term applied to a muskets which is equipped with short barrels and bayonet.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- U.S. government awarded numerous contract in 1798 to produce a French Service 1763 pattern Charleville musket.
- manufactured between 1801 and 1809.
- approximately 10,000 of these muskets were produced by Whitney (a quarter of all production).
- this was one of the first attempts to make a truly "mass-produced" firearm with interchangeable parts; Eli Whitney's experience with producing other machines (notably the cotton gin), played a large part in attempting to attain uniformity of parts and dimensions.
- these "rifles" were produced in three distinct styles over the production run, but differ primarily in inspector's markings, shape and tilt of the flash-pan, shape of the cock, and shape of the lockplate; the primary markings remained the same throughout the production run.
- these muskets were all marked with a standing US eagle over "NEW HAVEN" on the sideplate between the cock and the frizzen, with "U.STATES" in an arch at the rear of the sideplate.
- walnut straight-grip stock with heel-plate, three barrel bands, sling swivels in front of trigger-guard and at second barrel band, ram-rod, and a lug for a socket bayonet at muzzle.
- after flintlocks were acknowledged to be obsolete, many of these muskets were converted to percussion ignition, by replacing the cock with a hammer, and drilling and tapping the barrel for a nipple.
- similar muskets were contracted for by various state militias; these can be distinguished by the absence of the "U.STATES" marking on the sideplate.

Manufacturer

- the Whitney name does not appear on the firearm.
- "NEW HAVEN" is marked on the lock plate.

Action

- muzzle loader.

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840s.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".

Model

- model designation is not marked on the firearm.
- manufactured between 1799 and 1802.
- this pistol was based on the French pattern of 1777.
- features include: round smooth bore barrel; flintlock mechanism; brass receiver/frame; no forestock; brass trigger guard; one piece walnut grip with brass button cap; ramrod mounted under the barrel, no sights.
- "US" is stamped on the breech.
- 1799 models were converted to percussion ignition.

Manufacturer

- "NORTH & CHENEY BERLIN" or "S. NORTH & E. CHENEY BERLIN" is marked on the firearm.
- "Simeon North & Elisha Cheney" manufactured U.S. contract flintlock pistols from 1799 to 1802 in Berlin, Connecticut, U.S.A.

Action

- muzzle loader.

Serial Number

- the serial number is marked on the underside of the barrel and on the breech plug.

Notes

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840's.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".
- "Musket" is a term that originally applied to a smooth bore long gun, later the term was applied to the infantryman's shoulder controlled long gun. The musket had a long fore-end and may have been equipped with a bayonet and a front and rear sight.
- "Rifle-Musket" is a term applied when musket barrels were manufactured with rifling, they were sometimes referred to as a rifled musket.
- "Musketoon" is a term applied to a musket equipped with a short barrel and bayonet.

Model

- the model is not marked on the firearm
- this is an example of the US 1808 Contract Flintlock Musket (largely a copy of the in-production Springfield Armory and Harper's Ferry 1795 Flintlock Muskets), adopted by the US in 1808 and supplied by Rudolph and Charles S. Leonard, of Canton, Massachusetts, under a contract issued by the US government to meet the rising demand for military small arms during the lead-up to the War of 1812.
- known Leonard 1808 muskets are marked "R. & C. LEONARD" with a martial eagle, "CANTON", and a date of manufacture on the lockplate.
- features include: browned finish; fixed open sights; iron mountings and three barrel bands; an underbarrel ram-rod; flintlock mechanism with cock and frizzen on the right-side lockplate; sling swivels at second barrel band and front of trigger-guard; and maple straight-grip stock with an iron buttplate.
- these firearms may also be seen converted to percussion ignition.
- the Leonards are also believed to have delivered a small number of flintlock muskets of this pattern to the State of Massachusetts in 1814/15; these muskets are identical to the 1808 pattern, except in not having a US martial eagle or date of manufacture on the lockplate.

Manufacturer

- "R. & C. LEONARD" is marked on the lockplate, with a US martial eagle, "CANTON", and the year of manufacture (up to 1814).

Action

- muzzle-loaded flintlock ignition.

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840s.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".
- "Musket" is a term that originally applied to a smooth bore long gun, later the term was applied to the infantryman's shoulder controlled long gun. The musket had a long fore-end and may have been equipped with a bayonet and a front and rear sight.
- "Rifle-Musket" is a term applied when musket barrels were manufactured with rifling, they were sometimes referred to as a rifled musket.
- "Musketoon" is a term applied to a musket equipped with a short barrel and bayonet.

Model

- model designation is not marked on the firearm.
- 1816 Musket were produced by the U.S. arsenals at Harpers Ferry and Springfield and under contract by numerous manufacturers.
- 1816 Musket was manufactured circa 1837 with the Type III features.
- 1816 Musket is based on the design of the 1763 and 1777 French Service Musket.
- features include: round barrel with three barrel bands; polished bright or brown finish; colour case-hardened, flat, bevelled, lock plate; fixed iron or detachable brass flash pan without fence; walnut stock with or without a low comb.
- originally introduced with an integral iron flash pan and later as the "Type I" (1819-1822) that featured a detachable brass flash pan, an integral trigger guard bow and trigger plate; the "Type II" (1822-1831) that featured a trigger guard bow riveted to the trigger plate and an overall "browned" finish; and the "Type III" (1831-1844) that featured a ball shaped bolster attached to the trigger guard bow, smaller lock markings and a bright finish.
- most of these 1816 muskets were converted to a percussion ignition system circa 1845 that involved the removal of the pan and frizzen, the installation of a nipple, and replacement of the cock with a hammer.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "J.BAKER" under "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked in script or block letter format on the lock plate.
- "PHILA" over "1837" is marked vertically behind the cock.
- James Baker was the administrator of the Marine T. Wickham Armory in the early 1830's and assumed control of the company after the death of Mr. Wickham.

Action

- muzzle loader.

- 1816 Musket is based on the design of the 1763 and 1777 French Service Musket.
- features include: round barrel with three barrel bands; polished bright or brown finish; colour case-hardened, flat, bevelled, lock plate; fixed iron or detachable brass flash pan without fence; walnut stock with or without a low comb.
- originally introduced with an integral iron flash pan and later as the "Type I" (1819-1822) that featured a detachable brass flash pan, an integral trigger guard bow and trigger plate; the "Type II" (1822-1831) that featured a trigger guard bow riveted to the trigger plate and an overall "browned" finish; and the "Type III" (1831-1844) that featured a ball shaped bolster attached to the trigger guard bow, smaller lock markings and a bright finish.
- most of these 1816 muskets were converted to a percussion ignition system circa 1845 that involved the removal of the pan and frizzen, the installation of a nipple, and replacement of the cock with a hammer.

Manufacturer

- "E.BUELL" under "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked in script or block letter format on the lock plate.
- "E.BUELL" may be marked vertically behind the cock and "MARLBOROUGH" may be marked below an eagle motif.
- Elisha Buell was located in Hebron, Connecticut from 1776 to 1797 and in Marlborough, Connecticut from 1797 to 1830.

Action

- muzzle loading.

Notes

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840s.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".
- "Musket" is a term that originally applied to a smooth bore long gun, later the term was applied to the infantryman's shoulder controlled long gun. The musket had a long fore-end and may have been equipped with a bayonet and a front and rear sight.
- "Rifle-Musket" is a term applied when musket barrels were manufactured with rifling, they were sometimes referred to as a rifled musket.
- "Musketoon" is a term applied to a musket equipped with a short barrel and bayonet.

Model

- model designation is not marked on the firearm.
- 1816 Musket were produced by the U.S. arsenals at Harpers Ferry and Springfield and under contract by numerous manufacturers.
- 3031 units were manufactured from 1818 to 1819 with the Type I features.
- 1816 Musket is based on the design of the 1763 and 1777 French Service Musket.
- features include: round barrel with three barrel bands; polished bright or brown finish; colour case-hardened, flat, bevelled, lock plate; fixed iron or detachable brass flash pan without fence; walnut stock with or without a low comb.
- originally introduced with an integral iron flash pan and later as the "Type I" (1819-1822) that featured a detachable brass flash pan, an integral trigger guard bow and trigger plate; the "Type II" (1822-1831) that featured a trigger guard bow riveted to the trigger plate and an overall "browned" finish; and the "Type III" (1831-1844) that featured a ball shaped bolster attached to the trigger guard bow, smaller lock markings and a bright finish.
- most of these 1816 muskets were converted to a percussion ignition system circa 1845 that involved the removal of the pan and frizzen, the installation of a nipple, and replacement of the cock with a hammer.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "A.CARRUTH" under "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked in script or block letter format on the lock plate.
- "1818" or "1819" over "US" is marked vertically behind the cock.
- Adam Carruth was located in Greenville, South Carolina from 1809 to 1823..

Action

- muzzle loader.

Notes

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840s.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".
- "Musket" is a term that originally applied to a smooth bore long gun, later the term was applied to the infantryman's shoulder controlled long gun. The musket had a long fore-end and may have been equipped with a bayonet and a front and rear sight.
- "Rifle-Musket" is a term applied when musket barrels were manufactured with rifling, they were sometimes referred to as a rifled musket.
- "Musketoon" is a term applied to a musket equipped with a short barrel and bayonet.

Model

- model designation is not marked on the firearm.
- 1816 Musket were produced by the U.S. arsenals at Harpers Ferry and Springfield and under contract by numerous manufacturer's.
- 600 units were manufactured by Robert & John D. Johnson from circa 1829 to 1835 with the Type III features.
- 1816 Musket is based on the design of the 1763 and 1777 French Service Musket.
- features include: round barrel with three barrel bands; polished bright or brown finish; colour case-hardened, flat, beveled, lock plate; fixed iron or detachable brass flash pan without fence; walnut stock with or without a low comb.
- originally introduced with an integral iron flash pan and later as the "Type I" (1819-1822) that featured a detachable brass flash pan, an integral trigger guard bow and trigger plate; the "Type II" (1822-1831) that featured a trigger guard bow riveted to the trigger plate and an overall "browned" finish; and the "Type III" (1831-1844) that featured a ball shaped bolster attached to the trigger guard bow, smaller lock markings and a bright finish.
- most of these 1816 muskets were converted to a percussion ignition system circa 1845 that involved the removal of the pan and frizzen, the installation of a nipple, and replacement of the cock with a hammer.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "JOHNSON" or "R. & J. D. JOHNSON" under "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked in script or block letter format on the lock plate.
- "MIDDN CONN." under the date is marked vertically behind the cock.
- Robert Johnson was located in Middletown, Connecticut from 1812 to 1855.

Action

- muzzle loader.

Notes

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840s.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".
- "Musket" is a term that originally applied to a smooth bore long gun, later the term was applied to the infantryman's shoulder controlled long gun. The musket had a long fore-end and may have been equipped with a bayonet and a front and rear sight.
- "Rifle-Musket" is a term applied when musket barrels were manufactured with rifling, they were sometimes referred to as a rifled musket.
- "Musketoon" is a term applied to a musket equipped with a short barrel and bayonet.

Model

- model designation is not marked on the firearm.
- 1816 Musket were produced by the U.S. arsenals at Harpers Ferry and Springfield and under contract by numerous manufacturer's.
- 10,350 units were manufactured circa 1831 to 1840 with the Type III features.
- 1816 Musket is based on the design of the 1763 and 1777 French Service Musket.
- features include: round barrel with three barrel bands; polished bright or brown finish; colour case-hardened, flat, bevelled, lock plate; fixed iron or detachable brass flash pan without fence; walnut stock with or without a low comb.
- originally introduced with an integral iron flash pan and later as the "Type I" (1819-1822) that featured a detachable brass flash pan, an integral trigger guard bow and trigger plate; the "Type II" (1822-1831) that featured a trigger guard bow riveted to the trigger plate and an overall "browned" finish; and the "Type III" (1831-1844) that featured a ball shaped bolster attached to the trigger guard bow, smaller lock markings and a bright finish.
- most of these 1816 muskets were converted to a percussion ignition system circa 1845 that involved the removal of the pan and frizzen, the installation of a nipple, and replacement of the cock with a hammer.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "N.STAR" under a sunburst and "US" or "U.S." in script or block letter format is marked on the lock plate.
- "MDDN" over "CONN" over the date is marked vertically behind the cock.
- Nathan Starr (Senior) was located in Middelton, Connecticut from 1798 to 1821.
- Nathan Starr was joined by his son Nathan S. Starr.
- Nathan Starr changed the firms name to "N. Starr & Son" in 1810.
- Nathan Starr died in 1821 and the company was taken over by his son Nathan S. Starr (Junior).
- Nathan S. Starr was in business in Middelton, Connecticut from 1821 to 1852.
- Nathan S. Starr died in 1852.

Action

- muzzle loader.

Notes

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840s.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".

Model

- manufactured from 1817 to 1820.
- model designation is not marked on the firearm.
- adopted by the United States in 1816.
- this is a muzzle-loading single-shot pistol.
- 1816 Pistol can be distinguished by a combination of its barrel length (9 1/16"/ 230mm), its stock style (a short stock that extends slightly past a twin barrel band with a front sight), and its overall length (~15 1/4"/387mm).
- features include: browned barrel; bird's-head stock with iron buttcap and tang; under-barrel ramrod; twin barrel band with front sight; hammer, frizzen, and flash-pan mounted on right side of a colour-case-hardened lockplate; iron fittings.
- lockplate is marked "S. NORTH" over "MIDLN CON." (later stamps changed to "MIDLTN CON."), in the middle of "US".
- 1816 Flintlock Pistols were converted to percussion ignition.

Manufacturer

- "S. NORTH" and "MIDLN CON." is marked on the firearm.
- Simeon North was located in Berlin and Middletown, Connecticut, U.S.A. between circa 1790 and circa 1840.
- Simeon North and Elisha Cheney also formed the partnership of "North & Cheney" circa 1797.

Action

- muzzle loader.

Notes

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840s.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".
- "Musket" is a term that originally applied to a smooth bore long gun, later the term was applied to the infantryman's shoulder controlled long gun. The musket had a long fore-end and may have been equipped with a bayonet and a front and rear sight.
- "Rifle-Musket" is a term applied when musket barrels were manufactured with rifling, they were sometimes referred to as a rifled musket.
- "Musketoon" is a term applied to a musket equipped with a short barrel and bayonet.

Model

- model designation does not appear on the firearm.
- this is a conversion of a 1816 flintlock smooth bore musket to percussion cap system as authorized by the U.S. military in 1842.
- full stock, barrel retained by three barrel bands with springs inlet into the right side of the forearm.
- all fittings made of iron and originally finished "in the white".
- sling swivel fitted to the front of the trigger guard and the underside of the middle barrel band.
- some of these firearms subsequently had their barrels rifled and were fitted with elevation adjustable rear sights.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- the US Armory manufacturer's name appears as "SPRINGFIELD" (in two lines) over the date of manufacture.
- other then US Armory SPRINGFIELD and US Armory HARPERS FERRY the following private firms contracted and produced US Muskets 1816:
- J. BAKER; P.&.E. W. BLAKE; E. BUELL; A. CARRUTH; B. EVANS; W.L. EVANS; R. & J.D. JOHNSON; D. NIPPES; H. OSBORNE; L. POMEROY; N. STARR; A. WATERS; E. WHITNEY; M.T. WICKHAM.
- their names may appear on the lockplates of US Muskets model 1816/42.

Notes

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840s.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".

Model

- manufactured prior to 1832.
- model designation is not marked on the firearm.
- this firearm was adopted by the United States in 1826, but most examples will have production dates of 1830 or 1831. These pistols were built to the pattern originally submitted to the Navy by Simeon North, and copy the North-made version.
- this is a muzzle-loading single-shot pistol adopted by the United States in 1826, for Navy use.
- 1826 Pistol can be distinguished by a combination of it's barrel length (8 5/8"/ 219mm), its stock style (a short stock with a mid-forearm single barrel band), fixed front and rear sights; a belt hook, and its overall length (~13 1/4"/336.5mm).
- features include: browned barrel and lockplate; brass front sight; fixed rear sight on tang; swivel ramrod mounted below barrel; bird's-head stock with iron buttcap and tang; single barrel band; cock, frizzen, and flash-pan mounted on right side; iron fittings.
- the lockplate is usually marked "W.L. EVANS" over "V. FORGE", with the date of manufacture, or "US" over "W.L. EVANS" with a date of manufacture.
- examples of this firearm may also be seen converted to percussion ignition

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- William L. Evans was the son of Owen Evans.
- Owen Evans was located in Evansburg, Pennsylvania, U.S.A. from 1790 to 1812.
- Owen Evans and Edward Evans formed a partnership known as "O & E Evans".
- "O & E Evans" was located in Evansburg, Pennsylvania, U.S.A. from 1800 to 1812.
- "O & E Evans" manufactured under military contract the 1798 and 1808 musket.
- William L. Evans was located in Valley Forge, Pennsylvania, U.S.A. from 1797 to 1851.
- William L. Evans manufactured under military contract the 1822 musket and the 1826 flintlock pistol.

Action

- muzzle loader.

Notes

Make

- "US Service" is not marked on the firearm.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- "US Service" as a make is applied to U.S. adopted and issued firearms from the Revolutionary War until the percussion era in the 1840s.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".

Model

- model designation is derived from the date-of-order by the U.S. Government and is not marked on the firearm.
- this firearm represented the last martial flintlock pistol to be ordered by the US Government before the introduction of percussion ignition within the US Ordnance system.
- the firm of Robert Johnson produced approximately 18,000 of these pistols for the US Government from 1836 to 1844.
- muzzle loading, side hammer with flintlock ignition in its original configuration, however, the majority of these pistols where arsenal converted to percussion ignition during the 1850's.
- features;
- round, smoothbore barrel finished in the white, brass blade front sight located one-half inch from the muzzle,
- oval open-type rear sight located on the tang behind the breech,
- case hardened lock with detachable brass pan,
- three quarter hardwood stock that extends to within three inches of the muzzle,
- furniture is iron finished bright,
- single barrel band is characterized by an integral "finger" that extends rearward on the left side of the stock and overlaps the side plate where it is held in place by the front screw of the sideplate,
- the rammer is attached to the underside of the barrel by a swivel lug which is located approximately three-eighths of an inch from the muzzle,
- full round buttcap with an integral tang that extends upward and laps underneath the barrel tang thereby forming the rear grip strap.
- this pistol is usually found with US proofmarks stamped on the breech end of the barrel; these marks usually include the letters "US" over the inspectors initials over the letter "P"; inspectors initials include but are not limited to, "JH", "JCB", "EB".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "R. JOHNSON" over "MIDDn CONN" over the date of manufacture is usually stamped on the lock plate. - the above markings are usually found underneath the letters "U.S." or an eagle's head insignia with the beak of the eagle facing to the right. - Robert Johnson was located in Middletown, Connecticut, U.S.A. from 1812 to 1855.
Action	- muzzle loader.
Serial Number	- it is undetermined if this model series was in fact serial numbered, however, a known example had a two digit number without prefix or suffix marked on the top of the breech end of the barrel.

- this pistol is usually found with US proofmarks stamped on the breech end of the barrel; these marks usually include the letters "US" over the inspectors initials over the letter "P"; inspectors initials include but are not limited to, "JH", "JCB", "EB".

Manufacturer

- "A.H. WATERS & CO." over "MILBURY.M.S." over the date of manufacture is usually stamped on the lock plate.
- the above markings are usually found either underneath the letters "U.S." or an eagle's head insignia with the beak of the eagle facing to the right.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- muzzle loader.
Serial Number	- it is undetermined if this model was in fact serial numbered, however most U.S. military contract firearms were numbered. - serial number on referenced example is marked on the right side plate.
Other Markings	- date of manufacture may be marked on the lockplate as : 1837 ,1838, 1839, 1840, 1841, 1842, 1843, or 1844.

FRT Report

Firearm Reference Number (FRN): 53416
Make: US Service
Model: 1842 US Percussion Pistol

Summary

Make:	US Service
Model:	1842 US Percussion Pistol
Manufacturer:	Aston, Henry & Company
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
53416 - 1	54 PERCUSSION	1	216	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- on lockplate, foward of hammer " US / H. Aston & Co.," and on tail "MIDDTN/CONN/ (date)".

Model

- be careful not to be confused with the model designation, as it was common practice to stamp the date of manufacture on the lock of US martial pistols. Those made by Aston were dated from 1846 until 1850.
- Henry Aston of Middletown, Connecticut received a contract from the U.S War Departement in February 1845 for 30,000 single shot pistols and these were delivered between 1846 and 1852.
- Three thousand of these pistols were delivered to the Navy and many of them may be marked with a small anchor on the barrel near the breech.
- conventional lock, and external hammer.
- barrel band to secure the barrel to the stock.
- brass mounted, linked swivel ramrod under the barrel.

Manufacturer

- US" and "H. ASTON & CO." are marked on the lockplate, forward of hammer.
- Henry Aston arrived in America 1819-1820, and started his own business in 1845 in Middletown Conn. , where he continued to live until is death in 1864.

Action

- muzzle-loading single-shot percussion pistol.

Serial Number

- serialization unknown, but the contract from the US War Department was for 30,000 pistols, and it was common practice that the date of manufacture was marked on lock of US martial pistol. Those made by Aston were dated from 1846 to 1850.

Notes

Make

- "USAS" was observed on the side of the receiver/frame.
- "USAS" was originally designed by John Trevor & James Harless II of "Gilbert Equipment Company". Gilbert Equipment Company was not able to secure an American manufacturer for the "USAS" and approached Daewoo Precision Industries, Ltd. of Korea to evaluate and modify the prototype for CNC production. Daewoo Precision Industries, Ltd. produced approximately 35,000 shotguns under license from Gilbert Equipment Company.
- "Gilbert Equipment Company, Incorporated" was an importer and distributor of the "USAS-12".
- "USAS-12" was manufactured by Daewoo Precision Industries, Ltd. from 1987 to 1989, Ramo Manufacturing, Inc. from 1990 to 1991, and by International Ordnance Corporation from 1992 to 1995.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- "USAS-12" was observed on the right side of the receiver/frame.
- introduced in 1987.
- the "USAS 12" is loosely modeled on the Daewoo assault rifle.
- features include: blue finished cylinder bore barrel; phosphate-finished aluminum-alloy upper receiver/frame with carrying handle and pistol grip housing; ambidextrous charging/cocking handle, ejection ports, and safety/selector lever; folding or fixed charging/cocking handle is located on the upper side of the forearm; detachable box magazine; synthetic forearm, pistol grip and in-line butt stock; hooded post adjustable front sight mounted on the front top of the gas system and semi-fixed rear sight mounted on the carrying handle or adjustable post front sight and aperture rear sight mounted on the carrying handle; sling swivels.
- some USAS-12's have a forward grip assembly which acts as a charging handle for less lethal firing ammunition, this is similar in appearance to a forend grip used on a pump action shotgun.
- overall length 960 mm (37 3/4"), average weight reported from 4.09 kg (9 lbs) to 5.5 kg (12.1 lbs).
- available as a semi-automatic only version or a fully-automatic version for military and law enforcement agencies.

Manufacturer

- "MADE IN KOREA BY" and "DAEWOO PRECISION IND." has been observed on the left side of the receiver/frame.

Action

- gas operated.
- selective fire.

Serial Number

- observed serial number was located on left side of receiver/frame, forward of magazine well.

Calibre

- calibre designation was observed on the right side of the receiver/frame.

Shots

- detachable box or drum magazine.

Other Markings

- "IMPORTED BY", "GILBERT EQUIP. CO." and "CHICKASAH AL" was observed marked on the right side of the receiver/frame of an observed example.
- "GILBERT EQUIPMENT CO", "NASHVILLE TN USA" was observed marked on the right side of the receiver/frame of an observed example.
- "RESTRICTED LAW ENFORCEMENT / USE" was observed marked on the right side of the receiver/frame of an observed example.

Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Semi-Automatic
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
123019 - 1	12 GA X 2 3/4"	10	460	Prohibited PFR, Part 1, para. 5	Manufacturer Specifications and Commercial Customization	
123019 - 2	12 GA X 2 3/4"	20	460	Prohibited PFR, Part 1, para. 5	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "USAS" is marked on the side of the receiver/frame.
- "USAS" was originally designed by John Trevor & James Harless II of "Gilbert Equipment Company". Gilbert Equipment Company was not able to secure an American manufacturer for the "USAS" and approached Daewoo Precision Industries, Ltd. of Korea to evaluate and modify the prototype for CNC production. Daewoo Precision Industries, Ltd. produced approximately 35,000 shotguns under license from Gilbert Equipment Company.
- "Gilbert Equipment Company, Incorporated" was an importer and distributor of the "USAS-12".
- "USAS-12" was manufactured by Daewoo Precision Industries, Ltd. from 1987 to 1989, Ramo Manufacturing, Inc. from 1990 to 1991, and by International Ordnance Corporation from 1992 to 1995.

Model

- "USAS-12" is marked on the right side of the receiver/frame.
- manufactured between 1987 and 1995.
- the "USAS 12" is loosely modeled on the Daewoo assault rifle.
- features include: blue finished cylinder bore barrel; phosphate-finished aluminum-alloy upper receiver/frame with carrying handle and pistol grip housing; ambidextrous charging/cocking handle, ejection ports, and safety lever; folding or fixed charging/cocking handle is located on the upper side of the forearm; detachable box magazine; synthetic forearm, pistol grip and in-line butt stock; hooded post adjustable front sight mounted on the front top of the gas system and semi-fixed rear sight mounted on the carrying handle or adjustable post front sight and aperture rear sight mounted on the carrying handle; sling swivels.
- some USAS-12's have a forward grip assembly which acts as a charging handle for less lethal firing ammunition, this is similar in appearance to a forend grip used on a pump action shotgun.
- overall length 960 mm (37 3/4"), average weight reported from 4.09 kg (9 lbs) to 5.5 kg (12.1 lbs).
- available as a semi-automatic only version or a fully-automatic version for military and law enforcement agencies.

Action

- gas operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the right side of the receiver/frame. - observed specimen consisted of an alpha prefix, seven digits, followed by two alpha characters eg: Axxxxxxx SA
Shots	- detachable box or drum magazine.
Other Markings	- "IMPORTED BY", "GILBERT EQUIP. CO." and "CHICKASAH AL" was observed marked on the right side of the receiver/frame of an observed example. - "GILBERT EQUIPMENT CO", "NASHVILLE TN USA" was observed marked on the right side of the receiver/frame of an observed example. - "RESTRICTED LAW ENFORCEMENT / USE" was observed marked on the right side of the receiver/frame of an observed example.

Firearm Reference Number (FRN): 126011
Make: Uselton
Model: Tactical 1911

Summary

Make:	Uselton
Model:	Tactical 1911
Manufacturer:	Uselton/Caspian Arms
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
126011 - 1	45 AUTO	8	127	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "USELTON ARMS INC" was observed marked on the left side of the slide.

Model

- model designation may be marked on the firearm.
- this pistol is based on the Colt model 1911A1 pistol design.
- features include: solid top slide with ejection port on the right side and finger serrations located at the rear; fixed fibre optic front sight and adjustable rear sight; front of receiver/frame is modified to accept a laser sight or flashlight; skeletonized hammer and trigger; extended spur grip safety; slide release, extended thumb safety and magazine release are located on the left side of the receiver/frame; rounded trigger guard; single adjustable trigger mechanism; checkered front strap; black or black and green molly coated finish with black rubber grip panels.
- features may vary based on customizing specification(s).
- overall length with a 127mm (5") barrel is 216mm (8.5"), average weight is 1.1kg (40oz).
- similar to the Uselton model Classic National Match which does not feature an accessory mounting system at the front of the receiver/frame.

Manufacturer

- "CASPIAN ARMS" was observed marked on the right side of the receiver/frame.
- the receiver/frame is manufactured by Caspian Arms and then customized by Uselton Arms.
- Uselton Arms is located in Madison, Tennessee, USA.
- in 2006 Uselton Arms Incorporated began manufacturing their own receiver/frame.

Action

- recoil operated.

Calibre

- calibre designation may be marked on the firearm.

Shots

- detachable box magazine.

Notes

Make

- "Utica Fire Arms Co." is marked on both left and right lockplates.
- "Simmons" may be marked on the butt plate and "Simmons Hardware Co." may be marked on the grip cap.
- "Utica Fire Arms Co." was a trade name used by the Simmons Hardware Company of St. Louis, MO from 1875 to 1930.
- "Utica Fire Arms Co." were manufactured by the "Crescent Fire Arms Company" in the United States of America.
- "Utica Fire Arms Co." was marked on firearms imported from Europe by the Simmons Hardware Company.

Model

- the model designation is not marked on the firearm.
- "Pat'd App'd For" and/or "Pat. Nov. 25, 90 March 29, 97" may be marked on the watertable.
- features include: side by side barrels; front hinged receiver/frame with top tang mounted break open lever; side locks; side hammers; double triggers; checkered walnut forearm with latch lock and pistol grip butt stock with a hard rubber buttplate.

Manufacturer

- the manufacturer's name may not be marked on the firearm.

Action

- side-by-side configuration, break open operated.

Serial Number

- the serial number is marked on the water table of the receiver/frame, and on the mating undersides of the barrel.
- observed serial number consisted of four sequential numbers.

Other Markings

- the hard rubber buttplate may be marked (in a diagonal banner): SIMMONS
- the grip-cap, if there is one, may be marked: SIMMONS HARDWARE CO. (which was located in St. Louis, Missouri, from 1875 to 1930)
- early models are marked: PAT'D APP'D FOR
- later models are marked: PAT. NOV. 25, 90 MARCH29, 97

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks - this is a generic record created to encompass American manufactured side by side shotguns marked "UTICA" or "Utica Fire Arms Co.". Early American manufactured shotguns by a number of makers display various degrees of fit, finish and quality. Usually these shotguns do not display any marks of proof testing.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make	- "UZI" was introduced in 1951 and is named after its designer, Uziel Gal.
Model	- manufactured from 1980 to 1983. - marked on left rear side of receiver/frame: UZI SEMI-AUTO MODEL A 9MM PARA IMI-ISREAL - marked on right rear side of receiver/frame: ACTION ARMS LTD. PHILA. PA. - post front sight is adjustable for windage and elevation. - rear aperture sight is adjustable for 50 and 100 metres.
Manufacturer	- marked on rear left side of receiver/frame.
Type	- designed in response to American BATF standards to prevent easy conversion to selective fire capability, the commercial version of the UZI Submachine Gun is significantly altered from its full-auto predecessor.
Action	- blowback operation. - floating firing pin, striker fired.
Serial Number	- stamped on right rear side of receiver/frame. - "SA" prefix. - range for model A is SA 01001 to SA 037000. - range for model B is SA037001 to SA073544.
Calibre	- marked on the firearm. - in the case of conversion units, the bolt and barrel are usually marked with their calibre.
Shots	- detachable box magazine.
Remarks	- the Uzi carbine variants, Model A and Model B are semiautomatic Commercial Versions of the selective fire Uzi submachine gun. - the two models have characteristics that distinguish them both from each other and from selective fire variants of the UZI. - the Model A has a sling swivel located on front left of receiver/frame which is not capable of rotating a full 360 degrees while the Model B swivel is capable of 360 degree movement. - model A variants have windage and elevation adjustments incorporated only in the front sight; model B variants have elevation adjustable front sights and windage adjustable rear apertures. - both model A and B bolts have a length-wise groove cut into the right side of the bolt body that tracks along an interior block welded to the interior of the receiver/frame; this modification prevents the installation of the fixed- firing pin, full automatic bolt group. - Models A and B are marked "S' for safe and "F" for fire on their trigger groups. - internal trigger group arrangements are also present. - commercial versions operate from the closed bolt and are striker fired, while selective fire versions of the full-size Uzi Submachinegun are open bolt mechanisms using fixed firing pins and operate by blow-back, advanced primer ignition. - other than on early model A production, both commercial versions have a relieved lower cartridge seating face on the bolt face. - military barrels cannot be mounted in commercial versions: both models A and B have a barrel mounting trunnion and different barrel profiles which prevent interchange between variants.

Notes

Make

- "UZI" was introduced in 1951 and is named after its designer, Uziel Gal.

Model

- manufactured from 1980 to 1983.
- marked on left rear side of receiver/frame:
  UZI SEMI-AUTO
  MODEL B
  9MM PARA (or other calibre)
  IMI-ISREAL
- marked on right rear side of receiver/frame:
  ACTION ARMS LTD.
  PHILA. PA.

Manufacturer

- marked on rear left side of receiver/frame

Type

- designed in response to American BATF standards to prevent easy conversion to selective fire capability, the commercial version of the UZI Submachine Gun is significantly altered from its full-auto predecessor.

Action

- blowback operated.
- floating firing pin, striker fired.

Serial Number

- stamped on right rear side of receiver/frame.
- "SA" prefix.
- range for model A is SA 01001 to SA 037000.
- range for model B is SA037001 to SA073544.
- further, the following prefixes identify the calibre of the firearm;
  SA - 9MM LUGER
  45 SA - 45 AUTO
  41 SA - 41 ACTION EXPRESS

Calibre

- marked on the firearm.
- in the case of conversion units, the bolt and barrel are usually marked with their calibre.

Shots

- detachable box magazine

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- the Uzi carbine variants, Model A and Model B are semiautomatic Commercial Versions of the selective fire Uzi submachine gun.
- the two models have characterisitics that distinguish them both from each other and from selective fire variants of the UZI.
- the Model A has a sling swivel located on front left of receiver/frame which is not not capable of rotating a full 360 degrees while the Model B swivel is capable of 360 degree movement.
- model A variants have windage and elevation adjustments incorporated only in the front sight; model B variants have elevation adjustable front sights and windage adjustable rear apertures.
- both model A and B bolts have a length-wise groove cut into the right side of the bolt body that tracks along an interior block welded to the interior of the receiver/frame; this modification prevents the installation of the fixed- firing pin, full automatic bolt group.
- Models A and B are marked "S' for safe and "F" for fire on their trigger groups.
- internal trigger group arrangements are also present.
- commercial versions operate from the closed bolt and are striker fired, while selective fire versions of the full-size Uzi Submachinegun are open bolt mechanisms using fixed firing pins and operate by blow-back, advanced primer ignition.
- other than on early model A production, both commercial versions have a relieved lower cartridge seating face on the bolt face.
- military barrels cannot be mounted in commercial versions: both models A and B have a barrel mounting trunion and different barrel profiles which prevent interchange between variants.

Notes

Make

- "UZI" was introduced in 1951 and is named after its designer, Uziel Gal.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- This firearm is part of the "Mini UZI" series of firearms. - unknown model markings. - sold as part of the Uzi-America law enforcement line, this firearm was only made with a fixed synthetic butt stock. - can be fitted with any "Mini UZI", commercial version model, short barrel. - fitted with a flash hider. - selector on left side of trigger group is marked "S" for safe, "F" for fire. - front sight adjustable for elevation, rear for windage with supplied tool. - "flip" type rear aperture sight with settings for 100 and 200 metres. - cocking handle system is not ratcheted. - grip safety. - will not accept military barrels. - operates from the closed bolt position. - striker fired. - differs from other UZI models in physical dimensions. - receiver/frame is longer than MICRO or PISTOL models but shorter than A or B models.
Manufacturer	- marked on rear left side of receiver.
Action	- blowback mechanism.
Serial Number	- The serial number is marked on the rear left side of the receiver/frame.
Barrel	- after market barrels are available and commonly found with this firearm although the original configuration was with a 502mm barrel.
Calibre	- The calibre designation is marked on the rear left side of the receiver/frame.
Shots	- detachable box magazine. - accepts all UZI series magazines.
Remarks	- the Mini Uzi series is comprised of both selective fire and semiautomatic only variants. - the semi-automatic variants differ from the selective fire versions in their trigger group, barrel mounting system, and firing/operating method. - selective fire versions were produced in both open and closed bolt operation while the semi-automatic variant is striker fired and operates exclusively from a closed bolt system.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make	- "UZI" was introduced in 1951 and is named after its designer, Uziel Gal.
Model	- "HR 4332" over "9mm/45 ACP/22" over "GROUP IND" over "LOU KY 40214" may be marked on the left side of the receiver/frame. - manufactured from metal stampings with plastic forestock and pistol grip panels. - equipped with either a removable wooden stock or collapsible under-folding metal frame stock. - selector markings on the trigger group are "A" for automatic, "R" for repetition, and "S" for safe. - firearms that were exported for military sales may be marked differently in accordance with national practices. - grip safety. - all windage and elevation adjustments made by moving the front post sight.
Manufacturer	- "GROUP IND" over "LOU KY 40214" may be marked on left side of receiver/frame. - Automatic Weaponry of Brentwood, TN was the sole distributor of full automatic and semi-automatic UZIs manufactured by Group Industries of Louisville, Kentucky, U.S.A. - manufactured under licence. - manufactured on tooling purchased form Fabrique Nationale Herstal (FN).
Action	- no longer capable of full automatic fire.
Serial Number	- serial number is marked on the receiver/frame. - observed serial number consisted of six numbers without a letter prefix or suffix.
Calibre	- "9mm/45 ACP/22" may be marked on the firearm.
Shots	- detachable box magazine.
Remarks	- constructed primarily of heavy sheet metal stampings welded to machined steel blocks for critical areas. - this is a compact firearm, designed with much of the bolt mass forward. - using a fixed firing pin and a bolt face which fully supports the cartridge rim, this firearm uses advanced primer ignition and is not striker fired. - the bolt envelops the chamber end of the barrel presenting a flat surface to view when the bolt is forward. - usually issued with a folding metal buttstock, and sometimes with a detachable wood buttstock. - the magazine fits into the pistol grip. - in addition to a manual safety, a handgrip safety requires full depression before cocking or firing is permitted. - later production models incorporate a ratcheted cocking handle/knob to prevent accidental discharge in the event the cocking handle is released unintentionally before locking to the rear, or in case the firearm is dropped. - although originally designed and produced in Israel this firearm has been built under licence in other countries.

Notes

Make

- "UZI" is not marked on the firearm.
- "UZI" as a make is in reference to the designer name, Uziel Gal and firearm profile.
- "UZI" was introduced in 1951, designed and produced in Israel.

Model

- "HR 4332" is marked on the left side of the receiver/frame.
- "HR 4332" is a variant of the designed and produced Israeli UZI sub-machine gun.
- features include: straight barrel; knurled barrel retaining nut; front and back sight protecting hears with all sight adjustment made at the front sight; top cover mounted, round cocking handle; receiver/frame made of sheet metal stamping with reinforcement ribs on both side; synthetic handguard and pistol grip panels; folding metal buttstock or detachable wood buttstock; pistol grip has a with safety selector on the left side, a grip safety at its back and the magazine latch at its base; selector markings may be marked "A", "R" and "S" for "safe" or have Hebrew marking of the same meaning; parkerized finish.

Manufacturer

- "GROUP IND" over "LOU KY 40214" may be marked on left side of receiver/frame.
- Automatic Weaponry of Brentwood, TN was the sole distributor of full automatic and semi-automatic UZIs manufactured by Group Industries of Louisville, Kentucky, U.S.A.
- manufactured under licence.
- manufactured on tooling purchased form Fabrique Nationale Herstal (FN).

Action

- blowback operated.

Serial Number

- serial number is marked on the receiver/frame.
- observed serial number consisted of six numbers without a letter prefix or suffix.

Calibre

- "9mm/45 ACP/22" may be marked on firearm.

Shots

- detachable box magazine.

Remarks

- constructed primarily of heavy sheet metal stampings welded to machined steel blocks for critical areas.
- this is a compact firearm, designed with much of the bolt mass forward.
- using a fixed firing pin and a bolt face which fully supports the cartridge rim, this firearm uses advanced primer ignition and is not striker fired.
- the bolt envelops the chamber end of the barrel presenting a flat surface to view when the bolt is forward.
- usually issued with a folding metal buttstock, and sometimes with a detachable wood buttstock.
- the magazine fits into the pistol grip.
- in addition to a manual safety, a handgrip safety requires full depression before cocking or firing is permitted.
- later production models incorporate a ratcheted cocking handle/knob to prevent accidental discharge in the event the cocking handle is released unintentionally before locking to the rear, or in case the firearm is dropped.
- although originally designed and produced in Israel this firearm has been built under licence in other countries.

Notes

Make

- "UZI" was introduced in 1951 and is named after its designer, Uziel Gal.

Model

- This firearm is part of the "Mini UZI" series of firearms.
- unknown model markings.
- sold as part of the Uzi-America law enforcement line, this firearm was only made with a fixed synthetic butt stock.
- can be fitted with any "Mini UZI", commercial version model, short barrel.
- selector on left side of trigger group is marked "S" for safe, "F" for fire.
- front sight adjustable for elevation, rear for windage with supplied tool.
- "flip" type rear aperture sight with settings for 100 and 200 metres.
- cocking handle system is not ratcheted.
- grip safety.
- will not accept military barrels.
- operates from the closed bolt position.
- striker fired.
- differs from other UZI models in physical dimensions.
- receiver/frame is longer than MICRO or PISTOL models but shorter than A or B models.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- marked on rear left side of receiver.
Action	- blow-back operated.
Serial Number	- The serial number is marked on the rear left side of the receiver/frame.
Barrel	- after-market barrels are available and commonly found with this firearm although the original configuration was with a 502mm barrel.
Calibre	- marked on rear left side of receiver/frame.
Shots	- detachable box magazine. - accepts all UZI series magazines.
Remarks	- the Mini Uzi series is comprised of both selective fire and semi-automatic only variants. - the semi-automatic variants differ from the selective fire versions in their trigger group, barrel mounting system, and they have been manufactured to fire both by advanced primer ignition (fixed firing pin) and in simple blow-back (bolt forward) with a reciprocating firing pin, striker fired. - selective fire versions were produced in both open and closed bolt operation while the semi-automatic variant is striker fired and operates exclusively in simple blow-back, from a closed bolt.

Notes

Make

- "UZI" was introduced in 1951 and is named after its designer, Uziel Gal.

Model

- model is located on the left side of the receiver/frame as follows:
  MICRO UZI
  9mm PARA
  MP xxx
- operates from the closed bolt position and has a floating firing pin which is striker fired.
- features include folding metal stock, black finish, pistol grip safety, adjustable post front sight and adjustable rear aperture sight.
- fitted with sling swivels on front left protective sight ear and below stock hinge at rear of receiver/frame.
- bolt has a tungsten insert to reduce the cyclic rate of fire.
- this model is longer than the Uzi Pistol and shorter than the Mini series in receiver/frame length.
- overall length with stock folded is 267mm, overall length with stock extended is 470mm.
- trigger group marked "S" for safe, "R" for repetition/semi-automatic and "A" for automatic fire.

Manufacturer

- located on the left side of the receiver/frame.

Type

- originally designed and manufactured as a submachine gun.

Action

- blow back operated.

Serial Number

- sample serial numbers have 5 or 6 digits.
- may be prefixed with "MP"

Shots

- detachable box magazine.

  IMI
- solid wire frame buttstock folds along right side of firearm.
-barrel is ported for muzzle brake purposes.
- selector on left side of trigger group is marked "S" for safe, "R" for repitition fire (semi-automatic) and "A" for full automatic.
- front sight adjustable for elevation, rear for windage with supplied tool.
- "flip" type rear aperture sight with settings for 50 and 150 metres.
- cocking handle system is ratcheted.
- grip safety.
- differs from other UZI models in physical dimensions.
- receiver/frame is longer than MICRO or PISTOL models but shorter than A or B models.
- sling attatchment points found on front left side of receiver below protective front sight ear, and below stock opening / locking assembly at rear of firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- The manufacturer is marked on the rear left side of the receiver/frame.
Action	- blow-back operated.
Serial Number	- marked on rear left side of receiver/frame. - observed samples have had an "MU" prefix followed by numbers.
Calibre	- marked on rear left side of receiver/frame
Shots	- detachable box magazine. - accepts all UZI series magazines.
Remarks	- the Mini Uzi series is comprised of both selective fire and semi-automatic only variants. - the semi-automatic variants differ from the selective fire versions in their trigger group, barrel mounting system, and firing / operating method. - selective fire versions were produced in both open and closed bolt operation while the semi-automatic variant operates exclusively from a closed bolt system. - when produced in the closed bolt variant, the Mini series does not operate on the advanced primer ignition system; instead it uses a floating firing pin which is striker fired. - when produced in the advanced primer ignition variant, a fixed firing pin is used.

Notes

Make

- "UZI" was introduced in 1951 and is named after its designer, Uziel Gal.
- "UZI MINI CARBINE" is marked on rear left side of receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- marked on rear left side of receiver/frame:
  UZI MINI CARBINE
  9mm PARA
  IMI-ISRAEL
  MCXXXXX
- the receiver/frame is also marked,"ACTION ARMS LTD. PHILA. PA."
- manufactured and imported 1987-1993.
- solid wire frame buttstock folds along right side of firearm.
- optional short barrel is ported for muzzle brake purposes.
- selector on left side of trigger group is marked "S" for safe, "F" for fire.
- front sight adjustable for elevation, rear for windage with supplied tool.
- "flip" type rear aperture sight with settings for 100 and 200 metres.
- cocking handle system is not ratcheted.
- grip safety.
- will not accept military barrels.
- operates from the closed bolt position.
- striker fired.
- differs from other UZI models in physical dimensions.
- receiver/frame is longer than MICRO or PISTOL models but shorter than A or B models.
- sling attatchment points found on fron left side of receiver below protective front sight ear, and below stock opening/locking assembly at rear of firearm.

Manufacturer

- marked on rear of the receiver/frame.

Action

- blowback mechanism.

Serial Number

- marked on rear left side of receiver/frame.
- observed samples have had an "MC" prefic followed by five numbers.

Barrel

- after market barrels are available and commonly found with this firearm although the original configuration was with a 502mm barrel.

Calibre

- marked on rear left side of receiver/frame.

Shots

- detachable box magazine.
- accepts all UZI series magazines.

Remarks

- the Mini Uzi series is comprised of both selective fire and semiautomatic only variants.
- the semi-automatic variants differ from the selective fire versions in their trigger group, barrel mounting system, and firing/operating method.
- selective fire versions were produced in both open and closed bolt operation while the semiautomatic variant is striker fired and operates exclusively from a closed bolt system.

Notes

Make	- "UZI" was introduced in 1951 and is named after its designer, Uziel Gal.
Model	- manufactured from metal stampings with plastic forestock and pistol grip panels. - equipped with either a removable wooden stock or collapsible under-folding metal frame stock. - selector markings on the trigger group are "A" for automatic, "R" for repitition, and "S" for safe. - grip safety. - all windage and elevation adjustments made by moving the front post sight.
Manufacturer	- The manufacturer may be marked on the left side of the receiver/frame.
Type	- originally designed and manufactured as a submachine gun.
Action	- advanced primer ignition, blow-back operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- usually on left side, near the rear. - numbering sequences, the use of prefixes or suffixes, etc, may differ significantly.
Shots	- detachable box magazine.
Other Markings	- observed with different markings: in Hebrew; or with normal Roman alphabet and Arabic numbers; and with several different logos, or no logos at all. Most of the markings are on the left side of the receiver to the rear: the lower receiver may be numbered to match the S/N on the upper receiver, usually on the left side.
Remarks	- constructed primarily of heavy sheet metal stampings welded to machined steel blocks for critical areas. - this is a compact firearm, designed with much of the bolt mass forward. - using a fixed firing pin and a bolt face which fully supports the cartridge rim, this firearm uses advanced primer ignition and is not striker fired. - the bolt envelops the chamber end of the barrel presenting a flat surface to view when the bolt is forward. - usually issued with a folding metal buttstock, and sometimes with a detachable wood buttstock. - the magazine fits into the pistol grip. - in addition to a manual safety, a handgrip safety requires full depression before cocking or firing is permitted. - although originally designed and produced in Israel this firearm has been built under licence in other countries.

147846 - 1	BB	28	127	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "MINI UZI" over "IWI" is marked on the left side of the air gun.

Model

- introduced in 2014.
- "MINI UZI" over "IWI" is marked on the left side of the air gun.
- this air gun was made to resemble the UZI model Mini submachine gun, originally manufacture by Israel Weapon Industries (IWI).
- this CO2 powered BB gun functions like a traditional blowback semi-automatic.
- features include: fixed blade front sight and a fixed flip-up rear sight with two apertures; round, smooth bore barrel is threaded for a detachable fake sound suppressor/silencer; synthetic ribbed forearm; cocking handle/lever is mounted on the top of the BB gun; double action only (DAO) trigger mechanism; vertical, ribbed pistol grip with a grip safety; manual safety/selector is mounted on the left side of the grip assembly; magazine/CO2 cylinder release is mounted on the left side at the bottom of the grip assembly; right side folding wire frame buttstock; black finish

Type

- this airgun resembles an Uzi model Mini submachine gun.

Action

- CO2 powered.
- does not discharge a projectile at a muzzle velocity exceeding 152.4 mps or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- serial number observed consisted of two numbers, a letter and four or five numbers.

Calibre

- calibre is marked on the right side of the firearm.

Shots

- removable magazine/CO2 cylinder holder.

197255 - 1	12 GA X 3"	7	500	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "UZKON" is marked on the right side of the receiver/frame.
- "Made In TURKEY" is marked on the barrel.

Model

- "AS-16" is marked on the right side of the receiver/frame.
- "Magnum" is marked on the left side of the receiver/frame.
- Features include: solid top aluminum alloy receiver/frame with right side ejection port and bottom loading port; may have detachable adjustable, fixed rear sight or optical sight; cross bolt safety located on the rear of the trigger guard; action release located on the front, left of the trigger guard; easily removable collapsible stock from the pistol grip.

Serial Number

- The serial number is marked on the right side of the receiver/frame.
- Serial number of a referenced example consisted of two numbers year of manufacture, a dash and four numbers.

Calibre

- The calibre designation is marked on the barrel.

Shots

- Fixed tube magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- This firearm is normally Non-Restricted unless affected by the following conditions:

1) by combining a barrel from a licensed firearms manufacture that is less than 406mm (16.0") in length and a receiver/frame fitted with a pistol grip only, this firearm may be deemed a "handgun" and therefore "RESTRICTED" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (a) of the Criminal Code of Canada.
"Handgun" means a firearm that is designed, altered or intended to be aimed and fired by the action of one hand, whether or not it has been redesigned or subsequently altered to be aimed and fired by the action of both hands.

2) "a firearm that is designed or adapted to be fired when reduced to a length of less than 660 mm by folding, telescoping or otherwise" and therefore "Restricted" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (c) of the Criminal Code of Canada.

3) by combining a barrel that has been altered to less than 457mm (18.0") in length by a non-licensed firearms manufacturer (cottage industry, individual or gunsmith) regardless of whether the shotgun has a pistol grip or conventional stock, this firearm is "PROHIBITED" and subject to the definition of a "prohibited firearm" in Part III/Firearms and Other Weapons of Section 84 of the Criminal Code of Canada.
"Prohibited firearm" means a firearm that is adapted from a rifle or shotgun, whether by sawing, cutting or any other alteration, and that, as so adapted,
(i) is less than 660 mm in length, or
(ii) is 660mm or greater in length and has a barrel less than 457 mm in length.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "Uzkon" is marked on the firearm.
Model	- the model is not marked on the firearm; this is a descriptor of the firearm type. - this is a standard-pattern pump-action shotgun produced in a range of capacities, finishes, barrel lengths and configurations. - features may include: anodized blue/black or matte nickel or camouflaged finishes; bead or rifle sights (may include carry handle or Picatinny rail sight mounts); round or ventilated rib barrels; walnut or synthetic furniture; pistol-grip-only or fixed, telescoping, or semi-pistol-grip or vertical pistol-grip stock; and sling swivels. - overall length with a 330mm (13") barrel with a pistol grip or folding stock is 622mm (24.5").
Serial Number	- serial-numbered on the receiver/frame.
Shots	- underbarrel tubular magazine. - factory +3 extension available.
Canadian Law Comments	- this firearm is normally Non-Restricted unless affected by the following conditions: 1) by combining a barrel from a licensed firearms manufacture that is less than 406mm (16.0") in length and a receiver/frame fitted with a pistol grip only, this firearm may be deemed a "handgun" and therefore "RESTRICTED" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (a) of the Criminal Code of Canada. - "handgun" means a firearm that is designed, altered or intended to be aimed and fired by the action of one hand, whether or not it has been redesigned or subsequently altered to be aimed and fired by the action of both hands. 2) "a firearm that is designed or adapted to be fired when reduced to a length of less than 660 mm by folding, telescoping or otherwise" and therefore "Restricted" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (c) of the Criminal Code of Canada. 3) by combining a barrel that has been altered to less than 457mm (18.0") in length by a non-licensed firearms manufacturer (cottage industry, individual or gunsmith) regardless of whether the shotgun has a pistol grip or conventional stock, this firearm is "PROHIBITED" and subject to the definition of a "prohibited firearm" in Part III/Firearms and Other Weapons of Section 84 of the Criminal Code of Canada. - "prohibited firearm" means a firearm that is adapted from a rifle or shotgun, whether by sawing, cutting or any other alteration, and that, as so adapted, (i) is less than 660 mm in length, or (ii) is 660mm or greater in length and has a barrel less than 457 mm in length.

Notes

Make

- "VALKYRIE ARMS LTD" and "OLYMPIA, WA, USA" are usually marked under the cocking handle slot on the right side of the receiver/frame.

Model

- "BROWNING M1919A4" is not marked on the receiver/frame.
- "BROWNING MOD. 1991", "SEMI - AUTO 7.62 NATO" and "S.N. XXXXX" may be marked on the right side of the receiver/frame.
- "BROWNING M1919A4" is a re-creation of the United States Service, .30 calibre, Browning Machine Gun, M1919A4.
- the Browning Machine Gun was named after the inventor, John M. Browning.
- "BROWNING M1919A4" is capable of semi-automatic fire only.
- the Browning Machine Gun M1919 could be configured into sub-models for different roles. A partial list of the possible configurations follows:

a) Browning Machine Gun M1919A4:
- M1919A4 is an air-cooled firearm which may be found in flexible configuration for infantry use and is normally fired from a tripod, or mounted on an armoured fighting vehicle.
- M1919A4 version feeds belts of ammunition from the left side.

b) Browning Machine Gun M1919A5:
- M1919A5 is an air-cooled firearm designed for fixed configuration and use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- M1919A5 version feeds belts of ammunition from the left side.

c) Browning Machine Gun M1919A6:
- M1919A6 is an air-cooled firearm which may be configured for infantry use with a carrying handle, bipod and shoulder stock.
- M1919A6 version feeds belts of ammunition from the left side.

Manufacturer

- "VALKYRIE ARMS LTD" and "OLYMPIA, WA, USA" is usually marked on the firearm.
- Valkyrie Arms produces semi-automatic versions of "classic" military firearms for the collector/re-enactor market.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Type	- designed and manufactured in semi-automatic fire configuration.
Action	- "short" recoil operated.
Serial Number	- serial number rationalization unknown. - the serial number is located on the right rear of the receiver/frame. - observed specimen serial number consisted of the initials "S. N." which is believed not to be a component of the serial number and five digits without prefix or suffix.
Shots	- belt fed firearm.
Canadian Law Comments	- Browning Machine Gun receivers: - The five sided box consisting of top and bottom plates, left and right side plates and the front trunnion block is the receiver/frame for all purposes of the Criminal Code, Section 2 definition of "firearm". - For regulatory purposes, when the five sided box receiver/frame is further disassembled, the receiver/frame component plate where the manufacturer information and serial number are found, is used to establish the description for the purpose of firearms registration. - The classification of this firearm as a semi-automatic firearm is based on the presumption that none of the original five (5) receiver components were reused. This is what was understood to be the meaning of the claim by the manufacturer that the firearm is a "newly manufactured semi-automatic firearm".
Remarks	- this firearm is a re-creation of the United States Service, 30 calibre, Browning Machine Gun, M1919A4, in semi-automatic fire configuration. - the receiver has been designed and manufactured to prevent the use of full-auto parts. - the manufacturer uses surplus US parts to build the receivers/frames into complete firearms.

FRT Report

Firearm Reference Number (FRN): 122278
Make: Valkyrie Arms
Model: Browning M2 Heavy Barrel

Summary

Make:	Valkyrie Arms
Model:	Browning M2 Heavy Barrel
Manufacturer:	Valkyrie Arms
Level:	Manufacturer Specifications and Commercial Customization
Type:	Commercial Version
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
122278 - 1	50 BMG	N/A	1143	Prohibited PFR, Part 1, para. 106(g)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "VALKRIE ARMS LTD" and "OLYMPIA, WA, USA" is usually marked on the firearm.
Model	- this firearm is a re-creation of the United States Service, Browning Machine Gun, Calibre 50, M2 HB, capable of semi-automatic fire only. - the model designation, manufacturer's name and the serial number are located on the right-hand receiver/frame side plate, under the feed-way.
Manufacturer	- "VALKRIE ARMS LTD" and "OLYMPIA, WA, USA" is usually marked on the firearm.
Action	- "short" recoil operated. - manufactured to fire semi-automatic only. - the right-hand side-plate has a shoulder not found on full automatic versions, see images. - this side plate was manufactured with the shoulder to prevent full automatic parts from being installed.
Serial Number	- numbered on the right sideplate.
Shots	- belt-fed firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- Browning Machine Gun receivers:

- The five sided box consisting of top and bottom plates, left and right side plates and the front trunnion block is the receiver/frame for all purposes of the Criminal Code, Section 2 definition of "firearm".
- For regulatory purposes, when the five sided box receiver/frame is further disassembled, the receiver/frame component plate where the manufacturer information and serial number are found, is used to establish the description for the purpose of firearms registration.
- The classification of this firearm as a semi-automatic firearm is based on the presumption that none of the original five (5) receiver components were reused. This is what was understood to be the meaning of the claim by the manufacturer that the firearm is a "newly manufactured semi-automatic firearm".

Remarks

- this firearm is a re-creation of the United States Service, Browning Machine Gun, Calibre 50, M2 HB, in semi automatic fire configuration.
- the receiver has been designed and manufactured to prevent the use of full-auto parts.
- the manufacturer uses surplus military parts to build the receiver/frame into complete firearms.

Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
121813 - 1	45 AUTO	7	495	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
121813 - 2	45 AUTO	7	495	Prohibited CC 84(1) "prohibited device" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "VALKRIE ARMS LTD" and "OLYMPIA, WA, USA" is usually marked on the firearm.

Model

- The model designation may not be marked on the firearm.
- This is a modern reproduction of the WW2-era "De Lisle Carbine", a specially modified and re-chambered "Lee-Enfield" rifle with an integral silencer, intended for silently removing enemy sentries; these rifles were modified to fire the subsonic .45 Auto cartridge, and fed from standard "1911A1" pistol magazines.
- "Valkyrie Arms" manufactures two versions of the De Lisle; an authentic silenced version for those customers living in jurisdictions that allow silenced firearms, and a "dummy", non-silenced version with a fake suppressor for those customers living in jurisdictions that do not allow silenced/suppressed firearm. Both of these firearms look identical from the outside, and determination of which is which must be made by determining whether or not a given specimen has suppressor "bleed" holes, to vent propellant gasses into the suppressor body.
- Features include: three-piece wooden stock (butt and two-piece forearm); open adjustable sights; large-diameter suppressor body extending from front receiver ring to muzzle; and detachable Colt 1911A1-style magazine.

Manufacturer

- "VALKRIE ARMS LTD" and "OLYMPIA, WA, USA" is usually marked on the firearm.

Action

- Turn bolt operated.

Serial Number

- Those firearms with an integral suppressor/silencer will also be numbered on the tube, as these items are required to be numbered and taxed under US law.

Barrel

- The barrel length does not include any attached device such as flash-hider or muzzle brake.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- Detachable box magazine.
- This firearm uses standard "Colt" 1911A1 Style magazines.

Canadian Law Comments

- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada.

If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

89455 - 2	45 AUTO	30	406	Prohibited PFR, Part 1, para. 189(a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "VALKRIE ARMS LTD" and "OLYMPIA, WA, USA" is usually marked on the firearm.

Model

- this is a semi-automatic only version of the US Submachine Gun M3A1 that was adopted into US military service in December 1944.
- the M3A1 model is a modified version of the "M3".
- the modifications/features include: fixed wire stock, no obvious cocking handle present, cocking of the bolt is accomplished with a finger, using the indentation on the side of the bolt, magazine release catch is protected on the left side of the receiver/frame, larger ejection port, stock plate and magazine filler added to stock, and disassembly grooves added.

Manufacturer

- "VALKRIE ARMS LTD" and "OLYMPIA, WA, USA" is usually marked on the firearm.
- Valkyrie Arms produces semi-automatic versions of "classic" military firearms for the collector/re-enactor market.

Action

- capable of semi-automatic fire only.
- blowback operated, when cocked and ready to fire the bolt remains in the forward position (commonly known as a "closed bolt"), in the original design the bolt remained in the rearward position (commonly known as firing from an "open bolt").

Barrel

- a 203mm "dummy" barrel is offered for display purposes.

Shots

- detachable box magazine.

122265 - 2	9MM LUGER	32	419	Prohibited PFR, Part 1, para. 177(k)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "VALKRIE ARMS LTD" and "OLYMPIA, WA, USA" is usually marked on the firearm.

Model

- The model designation may not be marked on the firearm.
- This is a modern semi-automatic-ONLY reproduction of the WW2 Mk II STEN submachinegun, built by Valkyrie Arms.
- Features include: fixed open sights; "T"-style stock; tubular construction; 16 1/2" / 419mm barrel to comply with US law (also comes with an original-length dummy barrel), and magazine housing that extends to the left of the receiver tube.
- Valkyrie Arms also produces a semi-auto-ONLY version of the STEN Mk III, with a 16 1/2" / 419mm barrel permanently welded to the receiver tube (as with the original STEN Mk III)

Manufacturer

- "VALKRIE ARMS LTD" and "OLYMPIA, WA, USA" is usually marked on the firearm.

Action

- Blowback operated.

Serial Number

- Numbered on the frame/receiver.

Shots

- Detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- The tube in which the breech bolt reciprocates and the magazine housing constitute the receiver/frame for all purposes of the Criminal Code, Section 2 definition of "firearm".
- For regulatory purposes, when the two component receiver/frame is further disassembled, the receiver/frame component known as the magazine housing where the manufacturer information and serial number are found, is used to establish the description for the purpose of firearms registration.
- The classification of this firearm as a semi-automatic firearm is based on the presumption that neither of the original two (2) receiver components were reused. This is what was understood to be the meaning of the claim by the manufacturer that the firearm is a "newly manufactured semi-automatic firearm".

Notes

Make

- "Valmet" maybe marked on the bottom of the receiver/frame.
- "Valmet made in Finland" may be marked on the left side of the upper barrel.

Model

- Model is simply the basic 212 with automatic ejectors.
- features include fixed choke/ventilated rib barrels with 2 bead sights. Single selective trigger system with selector located on the trigger, cocking indicators are also included. The Valmet 312 also comes standard with a ventilated but plate and sling swivels installed on the barrel and butt stock.
- models are available with either 26, 28 or 30 inch 12ga 2-3/4" barrels.
- this basic receiver may also accept double rifle barrels, or a shotgun barrel over a rifle barrel.

Manufacturer

- maybe marked "Valmet" on the lower receiver/frame.
- maybe marked "Valmet made in Finland" on the left side of the upper barrel.
- maybe marked with a stylized "V" on the receiver frame.

Type

- this basic receiver may also accept double rifle barrels, or a shotgun barrel over a rifle barrel.

Action

- over/under pattern.

Notes

Make

- may be marked on the receiver/frame, and is marked on the barrel assembly.

Model

- designed in 1977, produced circa 1980-1989.
- model designation is marked on the sides of receiver/frame.
- this is a generic entry; other entries may exist which will better describe the firearm.
- features may include:
- single selective or double trigger assembly;
- top-lever opening;
- blued or satin nickel finished receiver/frame;
- receiver/frame may be engraved or inlaid;
- matte oil or glossy finish on walnut stock;
- varying buttstock configurations: high, low or medium comb, Monte Carlo cheekpiece, recoil pad;
- cut checkering;
- tang mounted safety and individul barrel cocking indicators;
- blued barrel assembly;
- ventilated rib or plain barrel-top;
- butt and barrel mounted sling swivel attachement points;
- provision for regulation of rifle barrels by the owner through an adjustable mounting system;
- fold-down rifle sights and provision for scope mounting on combination and rifle barrel sets;
- automatic ejectors on shotgun and some rifle or combination barrel sets;
- rifle barrels may be interchanged between combination barrel sets.

Manufacturer

- may be marked on the receiver/frame and/or barrel assembly.

Action

- over and under barrel configuration.
- using the common receiver/frame, all available combination, rifle and shotgun barrel sets are interchangeable.

Serial Number

- serial numbering began in 1978 with number 200021, reaching 256432 by 1984;
- full serial number rationalization is unknown;
- serial number is engraved at left bottom of the locking mechanism of the receiver/frame.

Notes

Make

- "VALMET" over "412" was observed marked on the under side of the receiver/frame.
- "VALMET MADE IN FINDLAND" was observed marked on the left side of the upper barrel on the chamber.

Model

- designed in 1977.
- manufactured from circa 1980 to 1989.
- "412" was observed marked on the right side of the receiver/frame.
- "VALMET" over "412" was observed marked on the under side of the receiver/frame.
- this is a generic entry; other entries may exist which will better describe the firearm.
- features may include: blued round, over and under barrels with or without a ventilated top rib; blued or satin nickel finished front hinged receiver/frame with top tang mounted break open lever, safety, and individual barrel cocking indicators; box lock action may be engraved or inlaid; single selective or double trigger assembly; checkered matte oil or glossy finish walnut forearm and buttstock; sling swivel attachments.
- buttstock configurations: high, low, or medium comb, Monte Carlo cheekpiece, and recoil pad.
- provision for regulation of rifle barrels by the owner through an adjustable mounting system.
- fold-down rifle sights and provision for scope mounting on combination and rifle barrel sets.
- automatic ejectors on shotgun and some rifle or combination barrel sets.
- rifle barrels may be interchanged between combination barrel sets.

Manufacturer

- "VALMET" over "412" was observed marked on the under side of the receiver/frame.
- "VALMET MADE IN FINDLAND" was observed marked on the left side of the upper barrel on the chamber.

Action

- over and under barrel configuration, hinged barrel design.
- "412" model uses a common receiver/frame, all combination, rifle and shotgun barrel sets are interchangeable.

Serial Number

- serial number is marked inside the receiver/frame on the left bottom side, and may be repeated on the barrel assembly.
- serial number rationalization is unknown.
- serial numbering began in 1978 with number 200021, reaching 256432 by 1984.

Notes

Model

- this is a generic model for the 412KE Trap and 412KE Skeet.
- features include: interchangeable coldhammered barrels; high gloss American walnut Monte Carlo stocks and forearms; simple barrel positioning and adjustment; two piece firing pin; monobloc locking shield; may have positive and automatic extraction; top auto safety; trigger-located barrel selector and barrel indicators.
- the same as the 412K, with automatic ejectors instead of extractors.
- may have over & under combination or rifle accessory barrels.

Type

- this model can also accept double rifle or combination barrels.

Action

- over & under pattern.

Serial Number

- serial number on floor of action (beneath chambers), or on tang.

Remarks

- This model was later re-named as the 412S, with less engraving, to appeal to the North American market, though the receiver remained the same.

Notes

Model

- this is a "convertible" firearm, which allows any one of several barrel configurations (over/under shotgun, over/under rifle, over/under combination gun) to be assembled on the same receiver.
- in this configuration, this firearm is a top-latching boxlock over/under combination gun, with single selective trigger, matte nickeled receiver (early guns were available with blued receiver), tang safety, blued barrels, and walnut pistol-grip stock and forearm.

Type

- this combination firearm will also accept double rifle and over/under shotgun barrel sets.

Action

- over/under pattern (shotgun over rifle); additional barrels in rifle only, shotgun only, or combination gun chamberings are available for this receiver.

Serial Number

- on receiver and barrel monobloc.

Notes

Model

- model is marked on the side of the receiver/frame.
- this is a "convertible" firearm, which allows any one of several barrel configurations (over/under shotgun, over/under rifle, over/under combination gun) to be assembled on the same receiver.
- this firearm is a top latching boxlock over/under double rifle, with single selective trigger, matte nickeled receiver, early firearms were available with blued receiver, quarter rib with open sights, scope mounts available, tang safety, blued barrels, and walnut pistol-grip stock and forearm.

Type

- this rifle will also accept over/under shotgun and combination gun barrel sets.

Action

- over/under pattern; additional barrels in rifle only, shotgun only, or combination gun chamberings are available for this receiver.

Serial Number

- on receiver and barrel monobloc.

Notes

Make

- "Valmet" below the Valmet's lion's head trademark/logo is marked on the left side of the receiver/frame.

Model

- manufactured in the 1950s.
- model designation is not marked on the firearm.
- the barrel assembly configuration determines the model.
- the Model 55 has a over and under barrel assembly with the rifle barrel on the top and a shotgun barrel mounted on the bottom.
- features include: over and under barrel configuration; front hinged receiver/frame with top tang mounted break open lever and slide safety; hammerless; single selective trigger; checkered fore end and pistol grip buttstock with cheek piece and rubber recoil pad; sling swivels; fixed front sight and adjustable rear sight.

Manufacturer

- "Valmet" is marked on the left side of the receiver/frame.
- "Made in Finland" is marked on the underside of the receiver/frame.
- "Helsinki, Suomi" is marked on the left side of the receiver/frame.

Action

- over & under barrel configuration with the rifle barrel on the top and the shotgun barrel on the bottom, break open action.

Serial Number

- serial number is marked on the receiver/frame, and repeated on the barrel assembly.
- serial number may consist of four numbers with the last three numbers repeated on various components of the firearm.

Calibre

- "16/70" and "6.5-52R" is marked on the barrel assembly.

Notes

Make

- "VALMET" may be marked on the left side of the receiver/frame and on the butt plate.

Model

- "M76" or "Semi-Automatic Rifle" may be marked on the left side of the receiver/frame.
- manufactured from 1976 to 1990.
- this a variant of the "AK-47".
- features included: round barrel with flash suppressor, semi-automatic only, gas operated, rotating bolt, detachable box magazine, hooded post front sight and tangent aperture rear sight, composite fore-end and pistol grip, folding or fixed butt stock in wood, plastic or metal.
- length with fixed or folding butt stock extended and a 420 mm barrel is 950 mm.
- length overall with butt stock folded and a 420 mm barrel is 690 mm.
- this firearm was available in many sub-variants, such as:
- M76 B or M76 Short = bull-pup stock;
- M76 F or M76 FS = folding butt stock;
- M76 P = fixed plastic butt stock;
- M76 T = fixed tubular butt stock; and
- M76 W = fixed wooden butt stock.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "VALMET" and "Made in Finland" may be marked on the left side of the receiver/frame. - "Valmet Oy" was the manufacturer of the "M76" line from 1976 to 1987, then on the 1st of January 1987, "SAKO" and "VALMET" joined businesses to become the firm of "SAKO-VALMET LTD" or "SAKO-VALMET OY" and produced the "M76" line until 1990.
Action	- this is a gas operated, semi automatic only version of the "M76" Automatic Rifle.
Serial Number	- serial number is marked on the left front side of the receiver/frame. - sample inspected used six digits without a letter prefix or suffix.
Calibre	- calibre designation is marked on the left side of the receiver/frame.
Shots	- detachable box magazine.
Canadian Law Comments	- some versions of the Valmet model M76 , known as the M76 Short, left the factory equipped with a Prohibited Device commonly known as a "bull-pup" stock (PDR, Part 4, para. 2). Even when the "Prohibited Device" is removed this model remains a Prohibited firearm by virtue of PFR, Part 1, para.64 (z.35).

Notes

Make

- "VALMET" and "MADE IN FINLAND" is marked on the left side of the receiver/frame.

Model

- introduced in 1978.
- North American importation ceased in 1989.
- model designation is not usually marked on the firearm.
- M78 LMG was originally available with a stamped metal receiver/frame and later with a milled/machined metal receiver/frame.
- M78 LMG is basically a semi-automatic RPK, directed towards the civilian market.
- features include: hooded front sight and adjustable rear sight; round rifled barrel with a flash hider and an integral bipod; folding carrying handle; AK type receiver/frame; synthetic or wood forearm and pistol grip; synthetic or wood fixed or metal folding buttstock with a rubber recoil pad.
- some versions have a folding integral bipod.

Action

- gas operated.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- observed serial number consisted of six numbers without a letter suffix or prefix.
- serial number rationalization is unknown.

Calibre

- calibre is marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Notes

Make

- "VALMET" and "Made in Finland" are usually marked on the left side of the receiver/frame.

Model

- introduced in 1982, production was limited, discontinued before 1990.
- this firearm is based on the AK-47 design and was created by placing a one-piece composite stock over the Valmet M76 (an earlier version was known as the M76 Short) rifle and a modification to the trigger group.
- this is the semi-automatic version of the selective fire model that is available for law enforcement agencies and is intended for armoured vehicle crews.
- features include: high impact composite bull-pup stock enlarged on the left side for shooter's cheek; adjustable post front sight; peep rear sight; integral open-ended three-pronged flash suppressor/bayonet lug; safety located on the right side of the firearm behind the magazine.
- overall length is 686 mm (27"), average weight is 3.52 kg (7 3/4 lbs).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "VALMET" and "Made in Finland" are usually marked on the left side of the receiver/frame.
Action	- gas operated.
Serial Number	- a serial number is marked on the firearm, rationalization unknown.
Calibre	- the calibre designation is usually marked on the left side of the firearm.
Shots	- detachable box magazine.
Importer	- imported by Odin International Ltd circa 1983, Bumble Bee Wholesale circa 1986 and Stoeger Industries circa 1988.
Canadian Law Comments	- this model left the factory equipped with a Prohibited Device commonly known as a "bull-pup" stock (PDR, Part 4, para. 2). Even when the "Prohibited Device" is removed this model remains a Prohibited firearm by virtue of PFR, Part 1, para.64 (z.39).

137580 - 1	12 GA PERCUSSION	2	813	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- known example was marked "VAN WART" over "SON & Co" on the side of both of the lockplates and "LONDON" on the top of the rib between the barrels.

Model

- no model name is marked on this firearm; the model designation is derived from the characteristics of the firearm.
- this firearm would have been made until circa mid-late 1860's.
- features include: back action sidelocks, double exposed hammers, muzzle loading, percussion ignition shotgun; ramrod mounted underneath the barrels; double triggers.

Manufacturer

- known example was marked "VAN WART" over "SON & Co" on the side of both of the lockplates and "LONDON" on the top of the rib between the barrels.
- Henry Van Wart emigrated from New York U.S.A. to Birmingham, England circa 1809. He operated a firearms manufacturing business under the name of "Van Wart Son & Co" with exports to North America and the West Indies until circa 1882.

Action

- muzzle loading, percussion ignition with side by side barrels.

181462 - 1	16 GA X 2 3/4"	2	739	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "Vapen-Depoten Falun" and the Vapen-Depoten Falun logo of a standing moose in a ring is marked on the firearm.
- Vapen Depoten was an outdoors and fishing/hunting retailer/distributor based in Falun, Sweden, from 1912 until the mid-1980s; they both retailed other brands, and had firearms manufactured for them under their own name.

Model

- the model is not marked on the firearm.
- this is a standard-pattern side by side, side lock, side hammer, shotgun manufactured for Vapen Depoten; an observed example was produced in Belgium, but these shotguns could easily be ordered from any of several manufacturers around the world.
- features include: blued barrels; bead sight; checkered walnut forearm and straight- or pistol-grip stock; blued, colour-case-hardened, or nickeled receiver/frame; double triggers; various levels of engraving; extractors or ejectors; top-lever; tang safety; and buttpad.

Manufacturer

- the manufacturer's name or trademark logo is marked on the firearm.

Action

- side by side configuration.

Serial Number

- serial-numbered on the receiver/frame.

Calibre

- calibre may be amrked on the barrel flats.

Notes

Make	- "VARAN" is marked on the side of the slide.
Model	- "VARAN 9X19" is marked on the slide. - this is a domestically-designed and produced South African pistol manufactured from 1985 until 1994, as a result of the United Nations' arms embargo on South Africa; this pistol combines features of the Browning High Power pistol with an external resemblance to the South African "Mamba" or a Smith & Wesson 59, with a hooked trigger-guard for a finger-forward hold. Internally, the pistol uses the single-action trigger mechanism and barrel lockup cam of the Browning High Power. - for ease of manufacture, this pistol uses a synthetic grip-frame and box magazine, bolted to an upper frame that is machined out of steel. - features include: parkerized/phosphated slide and upper frame; adjustable open sights; single-action trigger mechanism; hooked trigger-guard; loop hammer; synthetic checkered lower grip frame; a "winged V" grip logo"; left side operating controls; and a detachable box magazine.
Action	- recoil-operated.
Serial Number	- serial-numbered on the barrel.
Calibre	- "9X19" is marked on the slide.
Shots	- detachable box magazine.

Firearm Reference Number (FRN): 140997
Make: Veisey & Son
Model: Webley 1853 Longspur

Summary

Make:	Veisey & Son
Model:	Webley 1853 Longspur
Manufacturer:	Webley
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
140997 - 1	34 PERCUSSION	6	102	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "VEISEY & SON" is marked on the barrel.
- James Veisey & Son was located at 105 Moor Street, Birmingham, England in 1868.

Model

- manufactured prior to 1869 if marked "Veisey & Son".
- model name is not marked on the firearm.
- Webley 1853 Longspur is an open top receiver/frame, percussion revolver with a long flat spur hammer.
- Webley 1853 Longspur was manufactured circa 1853 to 1899.
- the 1853 Longspur Model came in three sizes: Holster size, normally five shots and a 178mm (7") barrel, Belt size, normally five shots and a 121 - 127mm (4.75 - 5") barrel, and Pocket size, six shots and a 89 -102mm (3.5 - 4") barrel.
- there may be a safety lever on the left side of the receiver/frame that when pressed foreward the hammer is held safely in either the cocked or uncocked position.
- the First model can be distinguished by the absence of a rammer and a partially enclosed hammer.
- the Second model incorporates an Adams-type rammer secured to the receiver/frame by a spring clip.
- the Third model can be determined by the compound rammer (patented by James Kerr in 1955, No. 1722) that is mounted to the barrel web and lays flat along the left side of the barrel, instead of being hinged is screwed onto the end of the cylinder axis rod and then secured by a horizontal screw entering from the front of the lug into the receiver/frame.

Manufacturer

- "JAMES WEBLEY PATENTEE", or "JAMES WEBLEY ST. MARY'S SQUARE, BIRMINGHAM", or "WEBLEY'S PATENT" may be marked on the firearm.

Action

- percussion ignition.

Serial Number

- serial number is marked on the front right side of the receiver/frame.
- known examples had three numbers without prefix or suffix.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Model

- this is a bolt-action hunting rifle based on the classic Mauser 98 action
- features include: checkered pistol-grip stock with rubber buttpad and contrasting spacer, open adjustable sights on rifles chambered in magnum calibres, sling swivels, and a hammer-forged barrel.
- also available with synthetic stock as the "All Weather" hunting rifle.
- importation began circa 2000.

Manufacturer

- normally marked on the firearm.

Serial Number

- South African law requires the barrel to be serial-numbered, not the receiver/frame.

Shots

- internal box magazine.

Canadian Law Comments

- Canadian law requires the receiver/frame to be serialized.

148850 - 1	20X82	N/A	1102	Prohibited CC 84(1) "prohibited firearm" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make or logo thereof is marked on the firearm.
- VEKTOR is currently (1999) a subsidiary of the DENEL Corporation, an arms manufacturer based in South Africa; VEKTOR itself is based in Lyttelton, South Africa, and manufactures a wide range of small arms, grenade launchers, and light cannon.

Model

- the model is marked on the firearm.
- this is a reworked version of the German MG151/20 aircraft cannon designed by Mauser during the Second World War, produced by Vektor as a multi-purpose cannon for use from helicopter, vehicle, and ground mounts.
- features include: parkerized finish; ambidextrous feed; a thin hinged top-cover; and the sights and firing controls will vary according to the specific mount used (ie. a flexible mount on a helicopter or vehicle will generally have dual "spade"-style pistol grip controls, while remote or vehicle mounts will generally have solenoid controls).
- a conversion kit is also available to convert this cannon to a 50 BMG machine gun for lower-cost training purposes.

Manufacturer

- the manufacturer or logo thereof is marked on the firearm.
- VEKTOR is currently (1999) a subsidiary of the DENEL Corporation, an arms manufacturer based in South Africa; VEKTOR itself is based in Lyttelton, South Africa, and manufactures a wide range of small arms, grenade launchers, and light cannon.

Action

- gas assisted blowback.

Serial Number

- numbered on the receiver/frame.

Shots

- belt fed.

Notes

Make

- may be found marked on the firearm.

Model

- introduced circa 2000.
- "H5" was observed marked on the left side of the receiver/frame.
- based in large part on the Galil rifle.
- features include: blued tapered round barrel without sights; top cover is adapted with an optical mount base; hammerless; rotating breech block; magazine release located in front of the trigger guard; safety lever located in the trigger guard in front of the trigger; single trigger mechanism; action slide located on top of the barrel; wooden forearm and thumbhole buttstock or black synthetic and folding buttstock.
- overall length for a 559mm (22") barrel is 1080mm (42.5") with an extended buttstock and 850mm (33.5") when folded, average weight is 4.5kg (9lbs 15oz).

Notes

Make

- the Republic of South Africa Arsenals group was known as ARMSCOR of South Africa until 1994 when it became DENEL.
- the Lyttleton Ingenieurswerke (LIW) became Vektor in 1994.

Model

- is a modified version of the Israeli "Galil".
- is manufactured without the capability for full-automatic fire.
- has a bipod and tubular, side-folding stock.

Manufacturer

- the MANUFACTURER has been LIW or LIW Division of ARMSCOR of South Africa.
- in 1994 ARMSCOR of South Africa was "dismantled" by the Republic of South Africa Government and reformed as DENEL. In 1994, the LIW factory became known as Vektor.

Serial Number

- serial number is located on the under-side of the barrel.

Remarks

- there is a full-automatic version of this firearm known as the R4.

Notes

Make	- the Republic of South Africa Arsenals group was known as ARMSCOR of South Africa until 1994 when it became DENEL. - the Lyttleton Ingenieurswerke (LIW) which was a division of ARMSCOR became Vektor in 1994.
Model	- this is a bolt-action hunting rifle based on a thick-walled tubular receiver of VEKTOR's own design - single adjustable Timney trigger, drift-adjustable rear sight with hooded front, checkered pistol-grip stock with rubber buttpad, contrasting forearm tip, and through-bolt at the receiver lug, sling swivels, and a hammer-forged barrel. - these rifles have a spring-loaded bolt catch on the left side of the receiver, and VEKTOR's logo stamped into the left side of the receiver; "Lyttelton" is not found anywhere on the firearm. - VEKTOR is also making a single-shot version of this rifle as the "Bisley", which uses a receiver of the same design with a small loading/ejection port on the right side.
Manufacturer	- VEKTOR is currently (1999) a subsidiary of the DENEL Corporation, an arms manufacturer based in South Africa; VEKTOR itself is based in Lyttelton, South Africa, and manufactures a wide range of small arms, grenade launchers, and light cannon.
Action	- manually operated, bolt action repeating rifle.
Serial Number	- may or may not be serial-numbered; South African law requires the barrel to be serial-numbered, not the receiver.
Remarks	- VEKTOR is currently (1999) a subsidiary of the DENEL Corporation, an arms manufacturer based in South Africa; VEKTOR itself is based in Lyttelton, South Africa, and manufactures a wide range of small arms, grenade launchers, and light cannon.

Notes

Make

- the Republic of South Africa Arsenals group was known as ARMSCOR of South Africa until 1994 when it became DENEL.
- the Lyttleton Ingenieurswerke (LIW) which was a division of ARMSCOR became Vektor in 1994.

Model

- is a modified version of the Israeli "Galil".
- is a full-automatic firearm.
- has a bipod and tubular, side-folding stock.

Manufacturer

- the MANUFACTURER has been LIW or LIW Division of ARMSCOR of South Africa.
- in 1994 ARMSCOR of South Africa was "dismantled" by the Republic of South Africa Government and reformed as DENEL. In 1994, the LIW factory became known as Vektor.

Action

- gas operated.

Serial Number

- serial number is located on the under-side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - detachable box magazine.

Remarks
- there is a semi-automatic version of this firearm known as the LM4.
- VEKTOR is currently (1999) a subsidiary of the DENEL Corporation, an arms manufacturer based in South Africa; VEKTOR itself is based in Lyttelton, South Africa, and manufactures a wide range of small arms, grenade launchers, and light cannon.

Notes

Make

- "ESTABLECIMIENTOS VENTURINI SA" is marked on the left side of the barrel.

Model

- "MOD. 72" is marked on the left side of the barrel.
- this firearm bears a strong resemblance to a Colt model 1873 Single Action Army revolver.
- features include: blade front sight and a groove in the top strap for a rear sight; round rifled barrel with an ejector rod assembly mounted on the right side; colour case-hardened solid top receiver/frame with a removeable fluted cylinder and a swing down loading gate on the right side; exposed spur hammer; single action trigger mechanism; brass trigger guard; smooth wood grip plates; blued barrel and cylinder.

Manufacturer

- "ESTABLECIMIENTOS VENTURINI SA" is marked on the left side of the barrel.
- Establecimientos Venturini S.A. was located in Argentina from the 1960s to the early 1980s.

Serial Number

- serial number is marked on the right side of the receiver/frame above the trigger.

Calibre

- usually marked on the left side of the barrel as "CAL .22".
- interchangeable cylinders that are marked with the calibre designation allow calibre changes from 22 LR to 22 MAG.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - the importer's designation may be found on the right side of the receiver/frame as "F.I.E. MIAMI FL"

Notes

Make

- "VERNEY-CARRON" is marked on the right side of the receiver/frame above the trigger.

Model

- This is a generic model. Other "AGO" model entries exist which might better describe the firearm.
- "AGO" may be marked on the firearm.
- features include: removable interchangeable blued round tapered barrel with or without a ventilated rib; bead front sight or adjustable rifle sights; fixed or adjustable or interchangeable choke; smooth or rifled chromed bore; plain or engraved (game scene) bottom fed, side ejection alloy receiver/frame; a magazine cut off is located on the right side of the receiver/frame; the bolt release is located on the left side of the receiver/frame; nickel plated trigger; a cross bolt safety is located at the rear of the trigger guard; checkered walnut forearm and semi-pistol grip buttstock; black plastic buttplate with sling attachments.
- average weight is 3kg (6.6lbs).

Manufacturer

- "VERNEY-CARRON" is marked on the right side of the receiver/frame above the trigger.

Action

- gas operated.

Serial Number

- the serial number is marked on the right side of the receiver/frame above the trigger.

Calibre

- calibre designation may be marked on the barrel.

Shots

- tubular magazine located below the barrel.
- may be factory plugged to 2-round magazine capacity in accordance with hunting regulations.
- a two shot magazine extension is available with the "Ago Stop" model.

Notes

Make

- the make designation, "VERNEY-CARRON" is marked on the receiver/frame and on the barrel assembly.

Model

- introduced in 1998.
- the model designation is marked as "ALTO 6" on the right side of the receiver/frame in gold letters for the classic finish and on the left side of the receiver/frame for the deluxe version.
- this is a standard-pattern gas-operated semi-automatic shotgun, made with interchangeable barrel assemblies for different uses.
- features include: lightweight alloy receiver/frame; french walnut stock with checkered pistol grip and forearm; cross-bolt safety at the rear of the trigger-guard; magazine cut-off at the right front of the receiver; ventilated rib with bead front sight or battue rib and ramp front sights, or adjustable rear sight and ramp front sight or scope mount; sling swivels; fixed or interchangeable chokes; and blued barrel with matte receiver finish.
- the receiver/frame of the Deluxe version consists of engraved nature scene including pheasants on the right side and ducks on the left side.
- a 820mm plain smooth bore barrel extension was introduced in 2004. This barrel extension (referred to as the ABR) screws in at the end of the original barrel and is also threaded for interchangeable chokes. When added to a 762mm barrel the new overall length is 2.10 meters. Primarily designed for waterfowl hunting.
- average weight is 3kg (6.6lbs) without the barrel extention.
- this firearm is also known as the model Auto 6 when imported in North America.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "VERNEY-CARRON" is marked on the receiver/frame and on the barrel assembly.
Action	- gas operated.
Serial Number	- the serial number is marked on the receiver/frame. - the serial number rationalization is unknown.
Barrel	- available with screw in choke system that extend out of the barrel by 30mm to 50mm (1 1/4" to 2"). These choke extensions should not be included in any barrel length measurement. - a 820mm smooth bore ported barrel extension is also available. This extension should not be included in any barrel measurement.
Calibre	- the calibre designation is marked on the barrel assembly.
Shots	- tubular magazine; these magazines can be fitted with a permanent block which reduces the capacity to 2 rounds (for French legal requirements).
Canadian Law Comments	- this firearm is available with a 820mm, ported, smooth bore, barrel extension. This barrel extension (referred to as the ABR: (Anti-Bruit-Recul) screws in at the end of the original barrel and is itself threaded to accept interchangeable chokes. When used on this firearm this device is capable of reducing the sound of discharge of the firearm and is consistent with the Criminal Code of Canada, "Part III/Firearms and Other Weapons", Section 84 definition of "Prohibited Device", sub paragraph (c) "a device or contrivance designed and intended to muffle or stop the sound or report of a firearm." - when the sound suppressor/silencer (prohibited device) is removed the firearm is correctly identified as a "Non Restricted Firearm".
Other Markings	- may be marked on the right hand side of the barrel on two lines as: "VERNEY-CARRON A SAINT-ETIENNE", "MADE IN FRANCE".

Notes

Make

- "Verney-Caron" is marked on the side of the receiver/frame of a referenced example.

Model

- "FLASH-BALL SUPER-PRO" is marked on the side of the receiver/frame of an observed example.
- introduced in 1990.
- designed for security professionals as a less than lethal disabling tool.
- features include: over and under barrel design; all metal construction; double action only; ramp front and adjustable rear sights; hinged, stepped barrel construction with a ringed lower barrel for gripping; checkered grips.
- also available in a single barrel and side by side barrel versions.
- overall weight is 1.55kg (3.41lb).

Manufacturer

- "Verney-Caron" is marked on the side of the receiver/frame of a referenced example.

Action

- over & under configuration with a hinged barrel design.
- does not discharge a projectile at a muzzle velocity exceeding 152.4mps and/or a muzzle energy exceeding 5.7 Joules.

Serial Number

- serial number consists of an alpha/numeric prefix (20FB) and up to five numbers and is marked on the side of the receiver/frame.

Calibre

- projectiles available include: a 28g soft rubber ball; a 23g "tear powder ball"; a 23g ball containing yellow, oil based dye; and a 9 soft rubber ball "buck-shot" load.

Notes

Make

- marked "VERNEY-CARRON" on the right side of the receiver/frame, below the ejection port.

Model

- this is a generic model. Other "Impact Plus" model entries exist which may better describe the firearm.
- "IMPACT PLUS" is marked in gold on the left side of the receiver/frame.
- features include: blued round tapered barrel with a fibre optic front post sight with or without sight hood and an adjustable rear sight or an adjustable battue style ramp rear sight with a fluorescent guide line; drilled and tapped receiver/frame for optic mounting; a thumb safety lever is located behind the bolt on the upper rear tang; gold coloured bolt body and trigger; cocking and loading indicator; single adjustable trigger mechanism; detachable box magazine with the magazine release located on the right side of the firearm above the magazine; checkered walnut Bavarian style one piece pistol grip stock with a schnabel forearm, a plastic butt plate or a rubber recoil pad and sling attachments.
- average weight is 3kg (6.6lbs).
- in 2004, a wide screen red dot front sight was introduced which attaches to the front sight base once the fibre optic sight is removed.
- this is an improved version of the "Impact" bolt action series which featured two locking lugs on the front of the bolt, right side mounted thumb safety and a fixed box magazine with a hinged floorplate.
- overall length with a 600mm barrel is 1140mm (44 7/8").

Manufacturer

- "VERNEY-CARRON" is marked on the right side of the receiver/frame, below the ejection port.

Action

- manual turn bolt mechanism.

Serial Number

- serial numbered may be marked on the barrel and on the receiver/frame.
- observed serial number sequences have consisted of a single number followed by two letters followed by five numbers.

Calibre

- the calibre designation is marked on the barrel.

Shots

- detachable box magazine.

Notes

Make

- "VERNEY-CARRON" is marked in gold color on the right side of the receiver/frame below the ejection port.

Model

- "IMPACT PLUS" is marked in gold on the left side of the receiver/frame or "IMPACT PLUS BATTUE" may be marked on the firearm.
- features include: blued round tapered barrel with a fibre optic front post sight with or without sight hood and an adjustable battue style ramp rear sight with a fluorescent guide line; drilled and tapped receiver/frame for optic mounting; a thumb safety lever is located behind the bolt on the upper rear tang; gold coloured bolt body and trigger; cocking and loading indicator; single adjustable trigger mechanism; detachable box magazine with the magazine release located on the right side of the firearm above the magazine; checkered walnut Bavarian style one piece pistol grip stock with a schnabel forearm, a plastic butt plate or a rubber recoil pad and sling attachments.
- in 2004 a wide screen red dot front sight was introduced which attaches to the front sight base once the fibre optic sight is removed.
- average weight is 3kg (6.6lbs).
- similar to the model "Impact Plus Affut" which is available with an adjustable rear sight and a 600mm (23 5/8") barrel.
- this is an improved version of the "Impact" bolt action series which featured two locking lugs on the front of the bolt, right side mounted thumb safety and a fixed box magazine with a hinged floor plate.

Manufacturer

- "VERNEY-CARRON" is marked in gold color on the right side of the receiver/frame below the ejection port.

Action

- turn-bolt design.

Serial Number

- the serial number is marked on the firearm.

Calibre

- calibre is marked on the firearm.

Shots

- detachable box magazine.

Notes

Make - "Verney-Carron" is usually marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- introduced in 1967 with new variations introduced in 1994 and 2006.
- this is a generic entry for the "Sagittaire" model line covering the 1967-1994 and the 2006 generations. The "Sagittaire NT" lineup (1994- 2005) can be found under their own models.
- in 1967 Verney-Carron introduced a full line of shotguns, rifles and combination guns named "Sagittaire".
- Around 1994-95 the Sagittaire line was redesigned with a newer slimmer profiled receiver/frame of either multi-alloy (Ergal) or steel composition, a slimmer buttstock at the wrist area and a different style of engraving. This new generation was then renamed the "Sagittaire NT" (NT means Nouvelle Technologie or New Technology). The "NT" marking remained on all the Sagittaire line up until 2005-06.
- in 2006-07 the Sagittaire line was reviewed again and the "NT" marking was dropped from all the models and sub-models. Despite the fact that the same technology was carried from the previous generation, minor modifications were adopted which can be differentiated from the original 1967 and 1994-95 variations. The 2006-07 Sagittaire line has no "NT" letters following the model name; the hinged box lock receiver/frame has shouldered axis pins with the heads visible from the outside of the receiver/frame (the axis pin heads were not visible on previous variations) and a laser engraving method is used to engrave the receiver/frame.
- features include: walnut checkered straight or pistol grip stock and forearm; nickel finish engraved boxlock receiver/frame of either multi-alloy (Ergal) or steel construction (newer versions have shouldered head axis pins visible from each side of the receiver/frame); hammerless; fixed or interchangeable screw-in chokes; selective single or double trigger; tang mounted opening lever; sling swivels; ejectors or extractors; bead front sight or ramp with bead front sight and adjustable rear sight; with or without ventilated rib and butt plate or ventilated recoil pad.
- overall length with a 711mm (28") barrel is1150mm (45 1/4") avarage weight is 3.2kg (7 lbs).

Manufacturer

- "VERNEY-CARRON" is marked on the firearm.

Action

- over/under pattern.

Serial Number

- serial number is marked on the firearm.
- observed serial number consisted of six numbers without a letter prefix or suffix.

Calibre

- is marked on the barrel assembly.

28755 - 3	12 GA X 3"	2	560	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- "VERNEY-CARRON" is marked on the firearm.

Model

- this entry is for the "Sagittaire Gros Gibier" Shotguns covering the 1967-1994 and the 2006 generations. The "Sagittaire NT Gros Gibier" (1994- 2005) can be found under his own model.
- in 1967 Verney-Carron introduced a full lines of shotguns, rifles and combination guns named "Sagittaire".
- Around 1994-95 the Sagittaire line was redesigned with a newer slimmer profiled receiver/frame of either multi-alloy (Ergal) or steel composition, a slimmer buttstock at the wrist area and a different style of engraving. This new generation was then renamed the "Sagittaire NT" (NT means Nouvelle Technologie or New Technology). The "NT" marking remained on all the Sagittaire lineup until 2005-06.
- in 2006-07 the Sagittaire line was reviewed again and the "NT" marking was dropped from all the models and sub-models. Despite the fact that the same technology was carried from the previous generation, minor modifications were adopted which can be differentiated from the original 1967 and 1994-95 variations. The 2006-07 Sagittaire line has no "NT" letters following the model name; the hinged box lock receiver/frame has shouldered axis pins with the heads visible from the outside of the receiver/frame (the axis pin heads were not visible on previous variations) and a laser engraving method is used to engrave the receiver/frame.
- "SAGITTAIRE" or "SAGITTAIRE GROS GIBIER" may be marked on the firearm.
- features include: blued round tapered over and under barrels without a top rib and with solid side ribs; rifled bores; base mounted fluorescent front sight and a two leaf rear sight mounted on a partial rib; extractor or automatic ejectors; old silver finish engraved front hinged box lock receiver/frame; the break opening lever is located on the rear upper tang; double trigger mechanism; the safety is located in the trigger guard in front of the triggers; checkered walnut forearm and semi-pistol grip buttstock; rubber recoil pad and sling attachments.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "VERNEY-CARRON" is marked on the firearm.
Action	- over & under barrel configuration.
Serial Number	- the serial number is marked on the firearm.
Calibre	- made for firing rifled slugs. - is marked on the barrel assembly.

Notes

Make

- "VERNEY-CARRON" is marked on the underside of the receiver/frame and on the barrel assembly.

Model

- "SAGITTAIRE NT" is marked on both sides of the receiver/frame and "BATTUE" may be marked on the barrel assembly.
- "NT" stands for "Nouvelle Technologie" (New Technology).
- features include: blued round tapered over and under rifled barrels with solid side ribs; a fiber optic ramped front sight and an adjustable "Battue" style ramped rear sight; engraved old silver finish front hinged steel or alloy box lock receiver/frame (the upper rear tang is machined separatly); hammerless; single or double trigger mechanism; extractor or automatic ejectors; the break opening lever is located on the upper rear tang; the safety is located in the trigger guard in front of the trigger(s); checkered schnabel style forearm and semi-pistol grip buttstock with a cheekpiece; a black plastic butt plate and sling attachments.
- false side plates are available in the Extra Luxe and Extra Luxe Doree (gold) grade.
- additional shotgun or combination barrels are available.
- in 2004 a wide screen red dot front sight was introduced which attaches to the front sight base once the fiber optic sight is removed.
- average weight is 3.3kg (7.26lbs).
- similar to the model "Sagittaire NT Traqueur" which is available with a 500mm (19 5/8") barrel.

Manufacturer

- "VERNEY-CARRON" is marked on the underside of the receiver/frame and on the barrel assembly.

Action

- over and under configuration.

Serial Number

- the serial number is marked on the firearm.

Calibre

- calibre designation is marked on the barrel assembly.

FRT Report

Firearm Reference Number (FRN): 123703
Make: Verney-Carron
Model: Sagittaire NT Polynox

Summary

Make:	Verney-Carron
Model:	Sagittaire NT Polynox
Manufacturer:	Verney-Carron
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Multi-Barrel
Country of Manufacturer:	FRANCE
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
123703 - 1	12 GA X 2 3/4"	2	680	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "VERNEY-CARRON" is marked on the underside of the receiver/frame or on the side plates.

Model

- "SAGITTAIRE NT" is marked on both sides of the receiver/frame and "POLYNOX" may be marked on one of the barrels.
- "NT" stands for "Nouvelle Technologie".
- features include: blued round tapered chromed over and under barrels with a ventilated top rib and solid side ribs; bead front sight; interchangeable chokes; engraved old silver finish front hinged alloy or steel (magnum) box lock receiver/frame (the upper rear tang is machined separatly), engraved side plates are available with the "Extra Luxe" version; hammerless; double trigger mechanism; extractor or automatic ejectors; the break opening lever is located on the upper rear tang; the safety is located in the trigger guard in front of the triggers; checkered fluted forearm and pistol grip buttstock with a black plastic butt plate and sling attachments.
- the "Sagittaire NT Polynox" was designed for the use of steel shot.
- available with extra chokes which may lengthen the barrel by 30mm or 50mm.
- average weight with 680mm (26 3/4") barrels and chambered in 12 GA X 2 3/4" is 2.7kg (5.94lbs).
- average weight with 680mm (26 3/4") barrels and chambered in 12 GA X 3" is 3kg (6.6lbs).

Manufacturer

- "VERNEY-CARRON" is marked on the underside of the receiver/frame or on the side plates.

Action

- over and under barrel configuration.

Serial Number

- the serial number is marked on the receiver/frame.
- serial number rationalization is unknown.

Barrel

- available with extra chokes which may lengthen the barrel by 30mm or 50mm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - calibre designation is marked on the barrel assembly.

Notes

Make

- "VERNEY-CARRON" is marked on the underside of the receiver/frame and on the barrel assembly.

Model

- "SAGITTAIRE NT" is marked on both sides of the receiver/frame and "TRAQUEUR" may be marked on the barrel assembly.
- "NT" stands for "Nouvelle Technologie" (New Technology).
- features include: blued round tapered over and under rifled barrels with solid side ribs; a fiber optic ramped front sight and an adjustable "Battue" style ramped rear sight; engraved old silver finish front hinged steel or alloy box lock receiver/frame (the upper rear tang is machined separatly); hammerless; single or double trigger mechanism; extractor or automatic ejectors; the break opening lever is located on the upper rear tang; the safety is located in the trigger guard in front of the trigger(s); checkered schnabel style forearm and semi-pistol grip buttstock with a cheekpiece; a black plastic butt plate and sling attachments.
- false side plates are available in the Extra Luxe and Extra Luxe Doree (gold) grade.
- additional shotgun or combination barrels are available.
- in 2004 a wide screen red dot front sight was introduced which attaches to the front sight base once the fiber optic sight is removed.
- average weight is 3.2kg (7.02lbs).
- similar to the model "Sagittaire NT Battue" which is available with a 559mm (22") barrel.

Manufacturer

- "VERNEY-CARRON" is marked on the underside of the receiver/frame and on the barrel assembly.

Action

- over and under configuration.

Serial Number

- the serial number is marked on the firearm.

Calibre

- calibre designation is marked on the barrel assembly.

Notes

Make

- "VERNEY-CARRON" is marked on the receiver/frame.

Model

- introduced in 2007, this model replaced the "Sagittaire NT Traqueur".
- this is the third generation of the Sagittaire line of firearms manufactured by Verney-Carron. In 2007 the marking "NT" was dropped from all the Sagittaire models.
- "Traqueur" may be marked on the upper barrel.
- "Express One" is marked on the right side of the receiver/frame preceded by a Sagittarius logo.
- this is a shorter version of the Express One rifle that is made especially for a heavy brush where a short and light weapon is desirable.
- features include: blued tapered round over and under barrels; fixed fibre optic front sight and an adjustable battue style rear sight; extractor; plain grey finished forged Ergal alloy front hinged box lock receiver/frame with shouldered head axis pins visible from each side of the receiver/frame; the break opening lever is located on the rear upper tang; double trigger mechanism; the safety is located in the trigger guard in front of the trigger(s); checkered walnut forearm and semi-pistol grip buttstock; rubber recoil pad and sling attachments (the front sling swivel is mounted on the right side of the barrel assembly to accommodate a special sling attachment).
- overall length with a 500mm barrel is 940mm (37"), average weight is 3kg (6.6lbs).

Manufacturer

- "VERNEY-CARRON" is marked on the receiver/frame.

Action

- over/under pattern.

Serial Number

- the serial number is marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- caliber is marked on the barrel assembly.
Other Markings	- the Verney-Carron logo (a Sagittarius sign) is stamped on the right side of the receiver/frame.

Notes

Make

- "VERNEY-CARRON" or "VERNEY-CARRON USA, INC." may be marked on the firearm.

Model

- "SNAKE CHARMER II" is usually marked on the firearm.
- features include: stainless steel top break front hinged receiver/frame and plain round tapered barrel; exposed hammer; the turn bolt safety is located on the right side of the receiver/frame below the hammer; single trigger mechanism; the break opening catch is located at the front of the trigger guard; synthetic forearm and thumbhole buttstock with a four round storage compartment or plain wooden forearm and semi pistol grip buttstock.
- quick takedown for compact storage.
- overall length with a 464mm (18 1/4") barrel is 737mm (29"), average weight is 1.36kg (3lbs).

Manufacturer

- "VERNEY-CARRON" or "VERNEY-CARRON USA, INC." may be marked on the firearm.
- Verney-Carron SA and Y.B.E. Inc. established a venture in 2000 and formed Verney-Carron USA which acquired Sporting Arms Manufacturing who manufactured the "Snake Charmer II" up until 2001. Verney-Carron USA presently manufacturers the Snake Charmer II out of their facilities in Clay Center, Kansas, USA.

Action

- front hinged top break.

Serial Number

- the serial number is marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - may be marked on the barrel.

FRT Report

Firearm Reference Number (FRN): 185462
Make: Verney-Carron
Model: Solo

Summary

Make:	Verney-Carron
Model:	Solo
Manufacturer:	
Level:	Manufacturer Specifications and Commercial Customization
Type:	Shotgun
Action:	Single-Shot
Country of Manufacturer:	TURKEY
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
185462 - 1	410 GA X 3"	1	711	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
185462 - 2	410 GA X 3"	1	800	Prohibited CC 84(1) "prohibited device" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "Verney-Carron" is marked on the receiver/frame and/or on the barrel.
Model	"SOLO" may be marked on the receiver/frame. - features include: bead front sight; round smooth bore barrel; hinged steel receiver/frame; spur hammer; manual safety located on the upper rear tang; ejector; synthetic textured pistol grip stock and forend; synthetic recoil pad; matte black finish. - overall length with a 711mm (28") barrel is 1100mm (43.3"), average weight is 2.5kg (5.5lbs). - available with a sound suppressor/silencer.
Action	- hinged barrel design.
Serial Number	- serial number is marked on the left side of the receiver/frame.
Calibre	- calibre designation is marked on the barrel.
Canadian Law Comments	- this firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada. - if the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Non-Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

Notes

Make

- "VERNEY-CARRON" may be marked on the firearm.

Model

- "STOPVIS" may be marked on the firearm.
- features include: blued round tapered plain barrel with bead front sight and may have a notched rear sight; smooth bore; plain or engraved breech cover; hammerless; manual extractor; single trigger mechanism; checkered one piece straight English style or semi-pistol grip stock.
- this is a single-shot shotgun of unusual design, similar to the Darne, in which the breech slides back and forth along rails on the receiver/frame.
- unlike the Darne (which uses a T-handle to open and close the breech through a lever arrangement), this shotgun uses a straight-pull breech with a rotating bolt-head.

Manufacturer

- "VERNEY-CARRON" may be marked on the firearm.

Action

- these shotguns use a unique "straight-pull" type of sliding breech, with a rotating bolt-head.

Calibre

- may be marked on the firearm.

Notes

Make

- "VERNEY-CARRON" over "SAINT-ETIENNE" over "MADE IN FRANCE" is marked on the underside of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- introduced in 2007, this model supersedes the Super 9 MARK III.
- this is the third generation of the Super 9 line of shotguns. In 2007 the "MARK III" marking was dropped from all the Super 9 models and except for few esthetical (engraving styles) changes the model line remained unchanged.
- "SUPER 9" is marked on the underside of the receiver/frame.
- features include: blued round tapered over and under barrels with a ventilated 7mm wide (12mm on Sport models) top rib; smooth or rifled molybdenum chromed bore; bead sight(s) or fibre optic sight; fixed or interchangeable chokes; engraved old silver finish steel or alloy (Ergal) box lock receiver/frame, may have gold inlays and side plates; the safety and the break opening lever are located on the upper rear tang; automatic ejectors or manual extractors option; single five positions adjustable trigger or single selective trigger or double trigger mechanism; checkered walnut schnabel or fluted forearm and straight English style or semi-pistol grip buttstock fitted with a recoil pad or butt plate and may have sling swivel attachments.
- this model is available with a luxe and extra luxe grade of finish or from the custom shop with a prestige or prestige gold grade of finish. The extra luxe, prestige and prestige gold grades also include additional side plates.
- optional barrels sets and factory hard gun case.
- this is a generic model. Other "Super 9" model entries exist which may better describe the firearm.
- overall length with 711mm (28") barrels is 1155mm (45 1/2") average weight from 2.5kg (5.5lbs) to 3.5kg (7.8lbs).

Manufacturer

- "VERNEY-CARRON" is marked on the sides and on the underside of the receiver/frame.

Action

- over and under barrel configuration.

Serial Number

- the serial number is marked under the break opening lever.

Calibre

- caliber is marked on the barrel assembly.

Notes

Make

- "VERNEY-CARRON" is marked on the sides and on the underside of the receiver/frame.

Model

- introduced in 1998 and replaced by the model Super 9 MARK III series in 2002.
- "SUPER 9 II" is marked on the underside of the receiver/frame.
- features include: blued round tapered over and under barrels with a ventilated top rib and two solid side ribs; smooth chromed bore barrels with fixed or interchangeable chokes; bead front sight; engraved old silver finish box lock steel receiver/frame with optional gold enlays and side plates; the safety and the break opening lever are located on the upper rear tang; automatic ejectors or optional manual extractors; single selective trigger or double trigger mechanism; checkered walnut schnabel forearm and straight English style or semi-pistol grip buttstock fitted with a butt plate and sling swivel attachments.
- available with a classic, luxe, extra luxe, extra luxe gold grade of finish and from the custom shop a prestige and prestige gold grade of finish. The extra luxe (gold) and prestige (gold) grades also consists of additional side plates.
- optional barrels sets and factory hard gun case.
- average weight is 3kg (6.6lbs).
- similar to the model "Super 9 MARK II Fulgur Magnum" which is chambered in 12 GA X 3" and is available with 762mm (30") barrels.

Manufacturer

- "VERNEY-CARRON" is marked on the sides and on the underside of the receiver/frame.

Action

- over and under barrel configuration.

Serial Number

- the serial number is marked under the break opening lever.

Calibre

- is marked on the barrel assembly.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

- introduced in 2007 this model supersedes the Super 9 MARK III Trap.
- this is the third generation of the Super 9 line of shotguns manufactured by Verney-Carron. In 2007 the "MARK III" marking was dropped from all the Super 9 models and except for few esthetical (engraving styles) changes the model line remained unchanged.
- features include: blued round tapered over and under barrels with a ventilated 12mm wide top rib; smooth chromed bore barrels with fixed (762mm/30" barrel) or interchangeable (711mm/28" barrel) "Chokinox" chokes system; fluorescent front sight; plain grey finished box lock steel receiver/frame; the safety and the break opening lever are located on the upper rear tang; automatic ejectors; single selective or double trigger mechanism; checkered walnut fluted forearm and semi-pistol grip buttstock fitted with a butt plate.
- average weight with a 762mm (30") barrels is 3.5kg (7.8lbs).

Manufacturer

- "VERNEY-CARRON" is marked on the sides and on the underside of the receiver/frame.

Action

- over and under barrel configuration.

Serial Number

- the serial number is marked under the break opening lever.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - calibre is marked on the barrel assembly.
