Notes

Make

- "WOLF" is marked on the left side of the slide, with a logo resembling a wolf holding a bullseye in its mouth, and the bullseye forming the "O" in "wolf".
- these pistols were manufactured in Austria by Ultramatic, then by Wolf, after Wolf bought the rights to the design.

Model

- "LV" is marked on the left side of the slide.
- this is the longer-barrelled version of the Ultramatic "SV", an unusual recoil-operated semi-automatic pistol produced during the late 1980's and early 1990's. These pistols are made on a modular pattern, with easily-interchangeable parts to allow a given pistol to be modified to a given user's tastes (by adding compensators, longer or shorter slides, optics-mounting rails, calibre-conversion kits, and so on).
- these pistols operate internally somewhat like a VZ-52, with a roller-locked bolt running inside what appears to be a slide that remains stationary on the receiver/frame.
- features include: blued or stainless finish and construction; a barrel bushing that can be swapped out for bushings with integral compensators; open adjustable sights or rail for mounting optical sights; a left-side takedown lever above the trigger-guard; single-action trigger mechanism; rectangular gripping bars on the bolt at the rear of the stationary "slide"; finger-grooved rubber insert on the frontstrap; an ambidextrous magazine-release button behind the trigger guard; an ambidextrous manual "flap" thumb safety; loop hammer; extended beavertail tang; rubber or wooden grips; and a checkered backstrap insert.

Manufacturer

- "WOLF" is marked on the left side of the slide, with a logo resembling a wolf holding a bullseye in its mouth, and the bullseye forming the "O" in "wolf".
- these pistols were manufactured in Austria by Ultramatic, then by Wolf, after Wolf bought the rights to the design.

Action

- recoil-operated.

Serial Number

Notes

Make	- the "Zastava Arms" name and "ZZ" logo are marked on the firearm.
Model	- "MG-42S" is marked on the firearm. - this model is a copy of the German, World War II era, MG42 light machine gun capable of semi-automatic fire only. Although some surplus parts are used in the construction of this model the receiver/frame is of new manufacture (it is not a recycled, surplus part) - features include: one-piece receiver/frame and barrel jacket; blued finish; folding bipod; muzzle booster; charging handle on the right side of the receiver/frame; quick change barrel with a barrel release mechanism on the right side of the barrel jacket; folding front sight with a tangent rear sight. - Note: the bolt, trigger housing, trigger group and charging handle have all been re-designed so that they are not interchangeable with their full automatic counterparts. The receiver/frame also has a welded block to prevent the insertion of original parts.
Manufacturer	- the Zastava Arms name and "ZZ" logo are marked on the firearm.
Type	- this is a modern copy of a World War II era light machine gun, in semi-automatic fire configuration.
Action	- recoil operated with gas assist (muzzle booster).
Serial Number	- the sample examined was numbered on the left side of the receiver/frame, the serial number was repeated on the top cover. - the serial number on the sample examined incorporated an alpha character prefix followed by a dash (-), followed by sequential numbers (example C-15940).
Calibre	- calibre is marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots	- this is a belt fed firearm.
Importer	- the sample examined had the importer markings on the right side of the receiver/frame.
Canadian Law Comments	- The rectangular sheet metal pressing/fabrication, from butt socket to the muzzle booster is the receiver/frame for all purposes of the Criminal Code, Section 2 definition of "firearm". - The classification of this firearm as a semi-automatic firearm is based on the presumption that no part of the original receiver was reused. This is what was understood to be the meaning of the claim by the manufacturer that the firearm is "newly manufactured as a semi-automatic firearm".
Remarks	- this firearm is a recreation of the German Service Machine Gun, Model MG 42, air cooled, machine-gun in semi-automatic fire configuration. - the receiver has been designed and manufactured to prevent the use of full-auto parts.
