Level:	Manufacturer Specifications and Commercial Customization
Type:	Commercial Version
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
196468 - 1	30-06 SPRG	N/A	610	Prohibited PFR, Part 1, para. 105(o)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "WELLS CUSTOM GUNMAKERS" is marked on the right side of the receiver/frame.
- The right side of the receiver/frame for this firearm is also engraved with "BROWNING MACHINE GUN"; these are reproduction markings of the make with which the original full automatic firearms are marked.

Model

- "BROWNING" is marked on the right side of the receiver/frame.
- "M1919A4" is marked on the right side of the receiver/frame.
- This firearm is manufactured as a semi-automatic only version of the "Browning Machine Gun" model "M1919A4", that fires from the closed bolt.

Manufacturer

- "WELLS CUSTOM GUNMAKERS LLC NICHOLSON PA" is marked on the right side of the receiver/frame.
- The right side of the receiver/frame for this firearm may also be engraved with reproduction manufacturer markings with which the original full automatic firearms are marked. On one example, "MAN'FD BY SAGINAW STEERING DIV." over "GENERAL MOTORS CORPORATION" was also marked on the right side of the receiver/frame. Similar reproduction markings of a different company name may instead be marked in this location.

Action

- Recoil operated.
- Gas assisted by means of a muzzle booster / barrel bearing.

Calibre

- The calibre designation is marked on the right side of the receiver/frame.

Shots

- Belt fed firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- Browning Machine Gun receivers (and other similar guns with a box type receiver construction)
- The five sided box consisting of top and bottom plates, left and right side plates and the front trunnion block is the receiver/frame for all purposes of the Criminal Code, Section 2 definition of "firearm".
- For the administrative purposes of The Firearms Act, when the five sided box receiver/frame is further disassembled, the receiver/frame component plate where the manufacturer information and serial number are found, is used to establish the description for the purpose of firearms registration.

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
95356 - 1	9MM LUGER	6	138	Prohibited CC 84(1) "prohibited device" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- make is not marked on firearm.
Model	- model is not marked on firearm. - the MARK I in 9MM LUGER made a perceptible hiss after it has been fired. - due to the clandestine nature of this model no markings will be found on the firearm.
Manufacturer	- manufacturer is not marked on firearm. - firearm was developed by Welwyn Experimental Laboratories in 1942.
Action	- each round has to be chambered and cocked by turning a large round knob at the rear of the action.
Canadian Law Comments	- as it left the factory, this firearm is equipped with an integral sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada. - when the sound suppressor/silencer (prohibited device) is removed from the firearm it would be correctly identified as a "Restricted Firearm".

28601 - 1	11.2X36R WERNDL M1867/70	1	566	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make does not appear on the firearm.

Model

- the model designation does not appear on the firearm.
- the Austro-Hungarian Empire began looking at adopting a factory-made breech-loading single-shot rifle as its standard service arm, and trials were held in 1866 to determine the best rifle for the purpose. Josef Werndl and one of his partners, Karl Holub, entered a side-swinging, drum-breech rifle in these trials to compete against rifles like the Remington Rolling Block. Presumably because the Werndl was a "home-grown" design, the Werndl rifle was officially adopted as the M1867 on July 28th.
- this firearm is a single shot, side hammer, military rifle. It utilises a revolving drum breech block which pivots on its own axis to expose the chamber of the barrel.

Manufacturer

- the manufacturer's name appears on the receiver/frame as "OEWG".

Action

- rotating drum breech.

Other Markings

- the date of manufacture appears on the lockplate as the last three digits of the year (869 to 1869).

Remarks

- this is the carbine version of the Austrian Model 1867 Werndl military rifle. It differs by being considerably shorter, having no barrel bands and in being chambered for a shorter and less powerful cartridge.

Notes

Make

- the make does not appear on the rifle.

Model

- the model designation does not appear on the firearm.
- the Austro-Hungarian Empire began looking at adopting a factory-made breech-loading single-shot rifle as its standard service arm, and trials were held in 1866 to determine the best rifle for the purpose. Josef Werndl and one of his partners, Karl Holub, entered a side-swinging, drum-breech rifle in these trials to compete against rifles like the Remington Rolling Block. Presumably because the Werndl was a "home-grown" design, the Werndl rifle was officially adopted as the M1867 on July 28th.
- this firearm is a single shot, side hammer, military rifle. It utilises a revolving drum breech block which pivots on its own axis to expose the chamber of the barrel.
- in 1878 most of these rifles were altered to fire the 11X58R cartridge.

Manufacturer

- the manufacturer's name appears on the receiver as "OEWG Steyr".

Action

- rotating drum breech.

Other Markings

- the date of manufacture appears on the lockplate as the last three digits of the year (869 for 1869).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- this firearm is a single shot, side hammer, military rifle. It utilises a revolving drum breech block which pivots on its own axis to expose the chamber of the barrel.
- in 1878 most of these rifles were altered to fire the 11X58R cartridge.

Notes

Make

- the make does not appear on the firearm.

Model

- the model designation does not appear on the firearm.
- the Austro-Hungarian Empire began looking at adopting a factory-made breech-loading single-shot rifle as its standard service arm, and trials were held in 1866 to determine the best rifle for the purpose. Josef Werndl and one of his partners, Karl Holub, entered a side-swinging, drum-breech rifle in these trials to compete against rifles like the Remington Rolling Block. Presumably because the Werndl was a "home-grown" design, the Werndl rifle was officially adopted as the M1867 on July 28th.
- this firearm is a single shot, side hammer, military rifle. It utilises a revolving drum breech block which pivots on its own axis to expose the chamber of the barrel.
- the 1877 improvements consisted of: low profile hammer, addition of a nose cap, elimination of barrel bands and a new calibre cartridge was adopted.

Manufacturer

- the manufacturer's name appears on the receiver as "OEWG".

Serial Number

- marked on the left side of receiver/frame.

Other Markings

- last three numerals of year of manufacture appear on the lockplate (875 for 1875).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks - This carbine is an improved version of the Austrian Model 1867 Carbine. It differs from the original carbine by having a hammer of considerably lower profile.

Notes

Make

- the make does not appear on the firearm.

Model

- the model designation does not appear on the firearm.
- the Austro-Hungarian Empire began looking at adopting a factory-made breech-loading single-shot rifle as its standard service arm, and trials were held in 1866 to determine the best rifle for the purpose. Josef Werndl and one of his partners, Karl Holub, entered a side-swinging, drum-breech rifle in these trials to compete against rifles like the Remington Rolling Block. Presumably because the Werndl was a "home-grown" design, the Werndl rifle was officially adopted as the M1867 on July 28th.
- this firearm is a single shot, side hammer, military rifle. It utilises a revolving drum breech block which pivots on its own axis to expose the chamber of the barrel.
- the M1873 Werndl Rifle was an improved M1867 Rifle.
- the improvements consisted of: the rear sight base and leaf were strengthened, the receiver/frame sides were flattened, the lock plate was redesigned with a central hammer, the bayonet catch was redesigned and a new calibre cartridge was adopted.

Manufacturer

- the manufacturer's name appears on the receiver as "OEWG".

Action

- rotating breech single-shot.

Other Markings

- last three numerals of year of manufacture appear on the lockplate (874 for 1874).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- This is an improved version of the Austrian Model 1867 military rifle. It differs from the original Model 1867 primarily in having a central hammer (positioned on the inside of the lockplate as opposed to the outside of the lockplate as on the Model 1867). In 1878 most of these rifles were altered to fire the 11X58R cartridge.

Notes

Make

- "WESSON & HARRINGTON" is marked on the barrel.

Model

- the model designation is not marked on the firearm.
- "PAT. FEB. 7. JUNE 13, '71" is marked on the barrel.
- manufactured from 1871 to 1873.
- total production is approximately 2,500.
- features include: octagonal barrel; solid top brass receiver/frame with fixed fluted cylinder with contoured ejector rod; small circular inspection plate on the left side of the receiver/frame; single action trigger mechanism; sheathed trigger; exposed spurred hammer; brass blade type front sight and notch in top strap for rear sight; bird's head butt; silver plated frame; barrel and cylinder may be have a nickel or blue finish; rosewood grips.

Manufacturer

- "WESSON & HARRINGTON, WORCESTER, MASS." is marked on the barrel.
- Wesson & Harrington was a manufacturing partnership between Frank Wesson and Gilbert Harrington, that lasted from 1871 until 1874 or 1875; they were based in Worcester, Massachusetts, and specialized in manufacturing small single-action revolvers. After the partnership dissolved, Wesson returned to manufacturing rifles and pistols under his own name, while Harrington continued to manufacture handguns under the "Wesson & Harrington" name; in 1888, he formed another partnership with an employee, William Richardson, to become "Harrington & Richardson".

Serial Number

- the serial number is marked on the left front side of the grip strap and may be repeated on the bottom front of the barrel, and on the cylinder, and on the inside of the grips.
- serial number range from 1 to approximately 2,500.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make

- "Wesson & Harrington" is a trade name used by "H&R 1871".
- in 1871 a partnership was formed between Gilbert Harrington and his uncle, Frank Wesson. The resulting company was known as Wesson & Harrington.
- Harrington & Richardson (also known as H&R) was founded in 1875 in Worcester, Massachusetts as the successor to Wesson & Harrington when Wesson sold his share of the company to William A. Richardson.
- Harrington & Richardson Arms Company Inc. continued until early in 1986 when mounting economic pressures forced the closure of the company.
- in 1987, a new firm, known as New England Firearms (NEF), occupied the old Harrington & Richardson facility in Gardner, Massachusetts. New England Firearms marketed a similar line of products with limited success.
- in 1991, a new company known as H&R 1871, Inc. was formed Although this company trades on the Harrington & Richardson name it has no ties with the original company.
- H&R 1871, Inc produces firearms under the Harrington & Richardson, New England Firearms and Wesson & Harrington brand names.
- on November 10, 2000, Marlin Firearms purchased H&R 1871, Inc including the brand names Harrington & Richardson, New England Firearms, and Wesson & Harrington. Under Marlin's ownership the company has become H&R 1871 LLC.

Model

- "1871" and "BUFFALO CLASSIC" are marked on the barrel.
- manufactured in 1995 and 1996.
- this is a single-shot target rifle made in the style of a "buffalo hunter's" rifle.
- features include: aperature front sight with adjustable rear peep sight; blued round heavy barrel; colour case hardened front hinged receiver/frame with top tang mounted break open lever; exposed spurred hammer; transfer-bar firing-pin safety; checkered walnut schnabel forearm and straight grip buttstock with crescent steel buttplate.
- overall length is 1168 mm (46.0") and average weight is 3.6 kgs (8.0 lbs).

Action

- hinged barrel design.

Serial Number

- serial number stamped on side of frame.

Notes

Make - "F.WESSON" or "FRANK WESSON" is marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- model designation is not marked on the firearm. - two versions of this medium frame single shot pistol were made with a front hinged receiver/frame and an under-frame opening lever by Frank Wesson from 1859 through the early 1870s. - both types have a brass or iron frame with square butt, rosewood grips, spur trigger, manually-cocked hammer, action release lever under frame in front of trigger (must be pulled back to release the barrel latch), and a half-round/half-octagon barrel. - the first type ("Model 1859") has a rounded frame and irregularly-shaped side plate, while the second ("Model 1862") has a flat-sided, wider receiver/frame, circular side plate and a longer trigger. - DO NOT CONFUSE these pistols with Frank Wesson's "Medium Frame Single Shot" pistols, which are slightly larger versions of these same handguns, or with any of Frank Wesson's "Pocket Rifles"; the "Small Frame Single Shot" was offered as a 22 Short Gallery Pistol with a short barrel (2 7/8"/73mm to 6"/152mm), while "Medium Frame Single Shots" were in 30 and 32 RF ONLY. All Frank Wesson "Pocket Rifles" will generally have longer barrels (10"/254mm or longer, except for the Small Frame Pocket Rifle), and will have an attachment for a detachable shoulder stock on the grip (normally a slot on the bottom of the butt).
Manufacturer	- Frank Wesson (1828-1899) was an American gunsmith and designer who manufactured a wide range of rifles (including smooth-bored types for use with shot cartridges) and handguns. In 1871, he formed a partnership with Gilbert Harrington, to manufacture small "pocket" revolvers, but returned to making firearms of his own design in 1875.
Action	- tipping barrel.
Serial Number	- the serial numbered is marked on the receiver/frame or the barrel. - serial number range from 1 to approximately 1,000.
Barrel	- barrels are between 3"/76mm and 6"/152mm.
Other Markings	- barrel marked on the first type "F.WESSON/PATENTED OCT. 25, 1859" and on the second type "FRANK WESSON WORCESTED MASS/PAT'D OCT.25,1859 & NOV.11 1862".

Notes

Make

- "F.Wesson" is marked on the barrel.

Model

- "F.Wesson/ Patented Oct. 25, 1859" is marked on the barrel.
- two types of small frame single shot pistols were made with a front hinged receiver/frame and an under-frame opening lever by Frank Wesson from 1859 through the early 1880s.
- both types have a brass frame with square butt, rosewood grips, spur trigger, manually-cocked hammer, action release lever under frame in front of trigger (must be pulled back to release the barrel latch), and a half-round/half-octagon barrel.
- there are two specific sub-types distinguishable within this model; the first type ("Model 1859") has a rounded frame and irregularly-shaped sideplate (marked "F.Wesson/ Patented Oct. 25, 1859" on barrel), while the second ("Model 1862") has a flat-sided frame and circular sideplate (marked "Frank Wesson Worcester, Mass./ Pat'd Oct. 25, 1859 & Nov.11, 1862" on barrel).
- DO NOT CONFUSE these pistols with Frank Wesson's "Medium Frame Single Shot" pistols, which are slightly larger versions of these same handguns, or with any of Frank Wesson's "Pocket Rifles"; the "Small Frame Single Shot" was offered as a 22 Short Gallery Pistol with a short barrel (2 7/8"/73mm to 6"/152mm), while "Medium Frame Single Shots" were in 30 and 32 RF ONLY. All Frank Wesson "Pocket Rifles" will generally have substantially longer barrels (10"/254mm or longer, except for the Small Frame Pocket Rifle), and will have an attachment for a detachable shoulder stock on the grip (normally a slot on the bottom of the butt).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make

- "FRANK WESSON" is marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "Frank Wesson Worcester, Mass." and "Pat'd Oct. 25th, 1859 & Nov.11th, 1862" is marked on the barrel. - manufactured from 1862 to 1870. - this is a medium frame single shot pistol with a front hinged receiver/frame and an under-frame opening lever and a detachable shoulder stock. - features include: brass frame with square butt, rosewood grips, spur trigger, manually-cocked hammer, action release lever under frame in front of trigger (must be pulled back to release the barrel latch), integral extractor, adjustable peep sights with "globe"-style front, and a part-round/part-octagon barrel. - DO NOT CONFUSE these firearms with Frank Wesson's "Medium Frame Single Shot" pistols; the "Medium Frame Single Shot" was offered in 30 or 32 RF ONLY, with substantially shorter barrels, and no adjustable rear sight, while all Frank Wesson "Pocket Rifles" will have substantially longer barrels (10"/254mm or longer), an adjustable peep sight, and will have an attachment for a detachable skeleton-frame shoulder stock on the grip (normally a slot on the bottom of the butt). Also, DO NOT CONFUSE these "Pocket Rifles" with Frank Wesson's "1862 Small Frame Pocket Rifle"; the Medium Frame model has an integral extractor, in all calibres, while the "1862 Small Frame Pocket Rifle" had no extractor.
Manufacturer	- "FRANK WESSON" is marked on the barrel. - Frank Wesson (1828-1899) was an American gunsmith and designer who manufactured a wide range of rifles (including smooth-bored types for use with shot cartridges) and handguns. In 1871, he formed a partnership with Gilbert Harrington, to manufacture small "pocket" revolvers, but returned to making firearms of his own design in 1875.
Action	- "tip-down"-type single-shot pistol.
Serial Number	- the serial number is marked on the receiver/frame.
Barrel	- barrels on these pistols are normally between 10"/254mm and 12"/304MM, but have been known to vary slightly.

Firearm Reference Number (FRN): 63347
Make: Wesson, Frank
Model: No 1 Long Range Rifle Creedmoor

Summary

Make:	Wesson, Frank
Model:	No 1 Long Range Rifle Creedmoor
Manufacturer:	Wesson, Frank
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
63347 - 4	44-100 WESSON	1	863	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	
63347 - 5	45-100 BALLARD	1	863	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Model

- this is a single-shot rifle made specifically for long-range target shooting, especially from the "Creedmoor" position (where the shooter lays on his/her back and steadies the rifle against the leg or thigh).
- believed to have been produced in very limited quantities between the early to mid 1870's through the 1880's.
- these rifles had a back-action sidelock with external hammer, a breech-block that is raised and lowered by means of an underlever that curves around the front of the trigger-guard, adjustable vernier peep sights that can be mounted on the tang or comb, wind-gauge front sight with spirit level, half-octagon or full-octagon barrel, and a deluxe pistol-grip walnut stock with shotgun style buttplate.
- these rifles were available with many options and accessories, and were usually marked "F. Wesson Mfr. Worcester, Mass" over "Long Range Rifle Creedmoor" (sometimes appended with "No 1").

Manufacturer

- Frank Wesson (1828-1899) was an American gunsmith and designer who manufactured a wide range of rifles (including smooth-bored types for use with shot cartridges) and handguns. In 1871, he formed a partnership with Gilbert Harrington, to manufacture small "pocket" revolvers, but returned to making firearms of his own design in 1875.

Action

- falling-block single-shot, opened with an underlever that wraps around the front of the trigger-guard.

FRT Report

Firearm Reference Number (FRN): 72989
Make: Wesson, Frank
Model: Superposed Large Frame

Summary

Make:	Wesson, Frank
Model:	Superposed Large Frame
Manufacturer:	Wesson, Frank
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Multi-Barrel
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
72989 - 1	41 SHORT RF	2	76	Antique CC 84(1) "antique firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "FRANK WESSON WORCESTER MASS Pt. DEC 15/68" or "FRANK WESSON WORCESTER, MASS. PAT. DEC. 15, 1868, JULY 20, 1869" may be marked on the side of the barrels.

Model

- model designation is not marked on the firearm.
- this is a small derringer of the "over/under" type, with two barrels in a monobloc, that are turned by hand for each shot.
- manufactured between 1868 and 1880.
- features include: over and under barrels; brass receiver/frame; exposed spurred hammer; single action trigger mechanism; sheathed trigger; bird's-head grip with rosewood grip panels.
- almost all specimens of this pistol have a sliding "dirk"/knife-blade protruding from the center of the barrel monobloc
- these pistols have only two barrels, but may appear to have three because of the fluting on the monobloc (the center "barrel" is actually the pivot for the barrel assembly).
- found with two types of markings; either "Frank Wesson / Worcester, Mass. / Pat Dec 15, 1868" vertically on the monobloc, or "Frank Wesson Worcester Mass Pat Dec 15, 1868, July 20,1869" horizontally along the monobloc.
- Frank Wesson also made over/under derringers of this type in two smaller frame sizes; these can be distinguished by their calibres.

Manufacturer

- Frank Wesson (1828-1899) was an American gunsmith and designer who manufactured a wide range of rifles (including smooth-bored types for use with shot cartridges) and handguns. In 1871, he formed a partnership with Gilbert Harrington, to manufacture small "pocket" revolvers, but returned to making firearms of his own design in 1875.

Action

- over/under derringer, with rotating barrels.

Notes

Make

- "FRANK WESSON/WORCESTER.MASS./ PT. APPLIED FOR:" or "FRANK WESSON/WORCESTER MASS/ PAT DEC 15, 1868" or "FRANK WESSON WORCESTER MASS PT. DEC 15/38" may be marked on the side of the barrels.

Model

- this is a small derringer of the "over/under" type, with two barrels in a monobloc, that are turned by hand for each shot.
- manufactured from 1868 to 1880.
- features include: brass receiver/frame; spur trigger; half or full fluted barrels; blade front sight; bird's-head grip with rosewood grip panels; and a spur hammer.
- some variants of this pistol have a sliding "dirk"/knife-blade protruding from the center of the barrel mono-bloc
- these pistols have only two barrels, but may appear to have three because of the fluting on the mono-bloc (the center "barrel" is actually the pivot for the barrel assembly).
- Frank Wesson also made over/under derringers of this type in two other frame sizes; these can be distinguished by their calibres.

Notes

Make

- make is usually marked on the barrel monobloc.

Model

- no model designation is marked on this firearm.
- produced circa 1868 to circa 1880.
- single action, over/under barrel configuration in which the barrels rotate/swivel around a central axis pin located between the barrels; the barrels must be rotated by hand.
- brass receiver/frame; spur or sheathed-type trigger; bird's-head grip with rosewood grip panels; ring-type or solid spur hammer centrally located behind the standing breech.
- some variants of this pistol have a sliding "dirk"/knife-blade located on the right side center of the barrel monobloc.
- these pistols have only two barrels, but may appear to have three because of the fluting on the monobloc (the center "barrel" is actually the axis pin or pivot for the barrel assembly).
- usually found with the following two types of markings:
- 1) "Frank Wesson / Worcester, Mass. / Pat Dec 15, 1868" vertically on the monobloc,
- 2) "Frank Wesson Worcester Mass Pt Dec 15/68" horizontally along the monobloc.
- this model line was also produced in two larger receiver/frame sizes with the Medium Frame size available in calibre 32 RF and the Large Frame size available in calibre 41 RF.

Manufacturer

- Frank Wesson (1828-1899) was an American gunsmith and designer who manufactured a wide range of rifles (including smooth-bored types for use with shot cartridges) and handguns.
- In 1871, he formed a partnership with Gilbert Harrington, to manufacture small "pocket" revolvers, but returned to making firearms of his own design in 1875.
- the firm ceased operations circa 1888.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action - over/under barrel configuration in which the barrels rotate/swivel around a central axis pin located between the barrels.

Serial Number - numbered on receiver/frame, from "1" up, without prefix or suffix.

Notes

Model

- this is the first of a series of single-shot, tipping barrel rifles with a "trigger"-type unlocking mechanism that Frank Wesson manufactured between 1859 and 1888.
- these rifles had a bladed hammer (for rimfire cartridges), a brass or steel receiver/frame, crescent buttplate, fixed open sights, a slotted link on the right side of the receiver/frame to limit the upwards travel of the barrel, no extractor or ejector (extraction was by use of the fingers, with reliefs cut at each side of the chamber), and a straight grip walnut stock.
- later variants (Second, Third, Fourth, and Fifth Types) added manual extractors, refined target sights, a larger, heavier receiver/frame, and a hammer-nose that could be selected to use either center-fire or rim-fire cartridges.

Manufacturer

- Frank Wesson (1828-1899) was an American gunsmith and designer who manufactured a wide range of rifles (including smooth-bored types for use with shot cartridges) and handguns. In 1871, he formed a partnership with Gilbert Harrington, to manufacture small "pocket" revolvers, but returned to making firearms of his own design in 1875.

Action

- tipping barrel single-shot, with manually cocked hammer; opened with front "trigger".

Serial Number

- serial number is located on the receiver/frame.

Notes

Model

- this is the fourth of a series of single-shot, tipping barrel rifles with a "trigger"-type unlocking mechanism that Frank Wesson manufactured between 1859 and 1888.
- these rifles have a hammer with an adjustable striker that could be set to hit one of two receiver/frame mounted firing pins (for use with either rimfire or centre-fire cartridges), a heavier iron receiver/frame, crescent butt plate, tang mounted peep sights, a slotted link on the left side of the receiver/frame to limit the upwards travel of the barrel, a manually operated extractor on the right side of the chamber, and a checkered pistol-grip walnut stock.
- later variants (Fifth Type Sporters) added refined target sights, and an even larger, heavier receiver/frame.

Manufacturer

- Frank Wesson (1828-1899) was an American gunsmith and designer who manufactured a wide range of rifles (including smooth-bored types for use with shot cartridges) and handguns. In 1871, he formed a partnership with Gilbert Harrington, to manufacture small "pocket" revolvers, but returned to making firearms of his own design in 1875.

Action

- tipping-barrel single-shot, with manually-cocked hammer; opened with front "trigger".

Serial Number

- serial number is located on the receiver/frame.

Barrel

- 28"/711mm and 30"/762mm barrels were standard on these firearms, but may have been available in special-order lengths.

Notes

Model

- this is the fifth and last of a series of single-shot, tipping barrel rifles with a "trigger"-type unlocking mechanism that Frank Wesson manufactured between 1859 and 1888.
- these rifles had a hammer with an adjustable striker that could be set to hit one of two receiver/frame mounted firing pins (for use with either rimfire or centerfire cartridges), a heavy, flat sided iron receiver/frame, crescent buttplate, tang mounted peep sights, a slotted link on the left side of the receiver/frame to limit the upwards travel of the barrel, a manually operated extractor on the right side of the chamber, and a straight or pistol-grip walnut stock.

Manufacturer

- Frank Wesson (1828-1899) was an American gunsmith and designer who manufactured a wide range of rifles (including smooth-bored types for use with shot cartridges) and handguns. In 1871, he formed a partnership with Gilbert Harrington, to manufacture small "pocket" revolvers, but returned to making firearms of his own design in 1875.

Action

Make: Western Airguns
Model: Rattler

Summary

Make:	Western Airguns
Model:	Rattler
Manufacturer:	Western Airguns
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Air,Spring or Gas
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
199449 - 1	357 PELLET	15	711	Prohibited CC 84(1) "prohibited device" para. (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- The make is marked on the right side of the receiver/frame.
- The company logo is marked on the firearm.

Model

- "Rattler" is marked on the left side of the receiver/frame.
- "Rattler" is a pre-charged pneumatic (PCP), semi-automatic, bullpup design rifle with a sound suppressor.
- "Rattler" has a primary safety on left side of the rear receiver/frame. A secondary safety lever is located on the right side of the firearm above the trigger. A third one is the magazine locking lever not been in the upper lock position, the rifle will not discharge its pellet.
- Features include: shrouded barrel; under the barrel propellant tubular tank with side pressure gauge and filling connector; regulated air pressure gauge on the left side of the receiver/frame with under power adjuster knob; right side magazine loading gate; top side plates with elongated ventilation holes.
- Overall length with a 711 mm (28 inches) barrel is 1016 mm (40 inches), average weight is 4.22 kg (9.3 lbs).

Manufacturer

- The company logo is marked on the firearm.
- The manufacturer is marked on the right side of the receiver/frame.
- "Western Airguns" is located in Sheridan, Wyoming U.S.A..

Action

- Pre charged pneumatic.
- Velocities have been reported as 244 mps/800 fps and 274 mps/900 fps.

Serial Number

- The serial number is marked on the right side of the receiver/frame.
- Serial number of referenced examples consisted of a two letter prefix (WR) and seven numbers.

Shots

- Detachable rotary disc magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- Discharges a projectile at a muzzle velocity exceeding 152.4 mps and a muzzle energy exceeding 5.7 Joules.
- This firearm may have left the factory equipped with a sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in Section 84, Part III (Firearms and Other Weapons) of the Criminal Code of Canada.

If the complete sound suppressor/silencer (prohibited device) is removed, the firearm is correctly identified as a "Restricted Firearm". NOTE: removal of the internal components of the sound suppressor/silencer (prohibited device) is not sufficient to mitigate a prohibited classification. All components of the sound suppressor/silencer, including the device body, end caps, mounting hardware, all internal parts (baffles, screens, spacers, wipes, etc.), must be removed.

- "Western Arms Co." trade name was used on percussion revolvers manufactured by Bacon Manufacturing Company, and W. W. Marston in the 1850s and 1860s.
- "Western Arms Company" was a distributor/importer of firearms located in Chicago, Illinois and New York City, New York, U.S.A. in the late 1800s and early 1900s.
- "Western Arms Co." trade name was used by John Spencer of Chicago, Illinois circa 1864.
- "Western Arms Co." trade name was observed marked on a .22 calibre single shot rifle, manufacturer unknown.
- "Western Arms Co." trade name was used on Baby Hammerless revolvers manufactured by Henry Kolb in the late 1800s and by R. F. Sedgely in the early 1900s.

Model

- "Navy" revolver series was manufactured from late 1850s to the early 1860s.
- "Navy" revolvers was sold under the tradenames of "Western Arms Company" and "Union Arms Company".
- this is a single action percussion revolver with a solid top receiver/frame.
- features include: bead front sight and groove in the top strap for a rear sight; octagonal or round barrel with rammer/loading lever; solid top receiver/frame with round unfluted cylinder; exposed spur hammer; single action trigger mechanism; brass trigger guard; flat bottom grip strap; walnut grip plates; blued finish.
- cylinder may be plain or have a roll engraved scene.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- William Walker Marston was a gun manufacturer and retailer based in New York City, New York, U.S.A. from 1844 to 1872.
- Marston produced both percussion and metallic cartridge firearms under a variety of names and with various partners: "W.W. Marston", "W.W. Marston, New York City", "W. W. Marston Armory, New York", "William Marston, New York City", "Marston & Knox, New York", "Sprague & Knox, New York", "The Washington Arms Company", "The Union Arms Company" and "Phenix/Phoenix Armory".
- Marston was in partnership with Knox, circa 1847.
- Marston was in partnership with Sprague from 1848 to 1853.

Serial Number

- serial number is located on the underside of the receiver/frame.
- serial number range was from 201 to 1000.

Barrel

- available in the following barrel lengths: 191 mm (7.5"), 203 mm (8"), and 216 mm (8.5").

Notes

Make

- "Ward's Western Field", "Wards Western Field", "WesternField", "Western Field", "M" over "W", "Montgomery Ward", "Montgomery Ward & Co." or a combination of these may be marked on the firearm.
- "M" over "W" is the trademark of "Montgomery Ward & Company".
- "Western Field" is a trademark/trade name used by Montgomery Ward & Company.

Model

- this is one variation of the Mossberg model 800A sold under the Montgomery Ward's house brand name "Western Field".
- the model 800 series was introduced in 1966, it remained in production until 1979. The model 800 was the result of Montgomery Ward's interest in offering a moderately priced bolt action, centre-fire rifle to complete their line of Mossberg made sporting arms. The model 800 was designed for traditional "short" action length cartridges (308 WIN and shorter). Mossberg offered the model 800 in several different calibre, barrel profile, and stock choices, with or without a factory mounted 4X (four power) scope. Each variation was given its own model designation.
- in 1970/71 Mossberg introduced the model 810 series which was designed to handle longer, 30-06 SPRG size cartridges.
- features will usually include: right hand action; blued finish on metalwork; Monte Carlo style, one-piece American walnut stock; barrel mounted folding rear sight and ramp front sight; safety is mounted on the top of the bolt; the bolt has six locking lugs (the model 810 series bolt had four).
- certain versions of the model 800 series were also sold by Montgomery Ward's under the Western Field brand name, by Western Auto under the Revelation name and by Mossberg under the New Haven brand name.

Action

- turn-bolt operated.

Serial Number

- usually numbered on the left side of the receiver/frame.

Calibre

- the calibre designation is marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - internal magazine with a hinged floorplate.

Remarks - Walnut Monte Carlo stock with checkered forearm and pistol grip. Cocks on opening. Thumb operated safety. Six locking lugs on bolt. Box type internal magazine with hinged floor plate. Adjustable folding leaf rear sight and ramped gold bead front sight. Barrel has a slight taper. Made for Wards. Same as Mossberg 810A

Firearm Reference Number (FRN): 2592
Make: Western Field
Model: 777

Summary

Make:	Western Field
Model:	777
Manufacturer:	Mossberg
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Lever Action
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
2592 - 1	30-30 WIN	5	457	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Ward's Western Field", "Wards Western Field", "WesternField", "Western Field", "M" over "W", "Montgomery Ward", "Montgomery Ward & Co." or a combination of these may be marked on the firearm.
- "M" over "W" is the trademark of "Montgomery Ward & Company".
- "Western Field" is a trademark/trade name used by Montgomery Ward & Company.

Model

- manufactured from 1972 to 1978.

Remarks

- American walnut straight stock with brass curved butt plate. Gold plated trigger barrel bands and saddle rings. The trigger is pinned to the lever and disconnects completely when lever is operated. Has a hammer block safety on the side of the receiver. The receiver is drilled and tapped for top-mounting and is serrated to prevent glare. Side ejection and offset hammer spur. Front and rear sling swivels. Adjustable Buckhorn rear sight and ramp gold bead front sight. Made for Wards. Same as the Mossberg 472PCA

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
2597 - 5	308 WIN	4	559	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Ward's Western Field", "Wards Western Field", "WesternField", "Western Field", "M" over "W", "Montgomery Ward", "Montgomery Ward & Co." or a combination of these may be marked on the firearm.
- "M" over "W" is the trademark of "Montgomery Ward & Company".
- "Western Field" is a trademark/trade name used by Montgomery Ward & Company.

Model

- this is one variation of the Mossberg model 800A sold under the Montgomery Ward's house brand name "Western Field".
- the model 800 series was introduced in 1966, it remained in production until 1979. The model 800 was the result of Montgomery Ward's interest in offering a moderately priced bolt action, centre-fire rifle to complete their line of Mossberg made sporting arms. The model 800 was designed for traditional "short" action length cartridges (308 WIN and shorter). Mossberg offered the model 800 in several different calibre, barrel profile, and stock choices, with or without a factory mounted 4X (four power) scope. Each variation was given its own model designation.
- in 1970/71 Mossberg introduced the model 810 series which was designed to handle longer, 30-06 SPRG size cartridges.
- features will usually include: right hand action; blued finish on metalwork; Monte Carlo style, one-piece American walnut stock; barrel mounted folding rear sight and ramp front sight; safety is mounted on the top of the bolt; the bolt has six locking lugs (the model 810 series bolt had four).
- certain versions of the model 800 series were also sold by Montgomery Ward's under the Western Field brand name, by Western Auto under the Revelation name and by Mossberg under the New Haven brand name.

Manufacturer

- manufacturer's name is not marked on the firearm.

Action

- turn-bolt operated.

Serial Number

- usually numbered on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- the calibre designation is marked on the barrel.
Shots	- internal magazine with a hinged floorplate.

4788 - 3	22 SHORT	22	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Model

- 1938-1965 approx.

Remarks

- Operates as a semi-automatic with 22 LR or high speed cartridges only. Pressing the cross bolt to the left locks the action, adapts the rifle for use as a bolt action or single shot. Has a tube type magazine mounted under the barrel and a thumb safety at the rear of the receiver. Has a tapered round barrel. Walnut finished one piece pistol grip stock with rubber butt plate (early model had a black tip forend). Sporting front sight (early models had a gold bead front sight) and an open rear sight with step elevator. Receiver grooved for scope mounting. Same as Stevens 87 with possible internal and/or external modifications. Made for Montgomery Ward under the house brand Western Field.

Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
2586 - 1	22 MAG	5	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Western Field" is marked on top of the barrel.
- Trade name used by Montgomery Ward & Company.
- Alternate Make markings include "Ward's Western Field", "Wards Western Field", "WesternField", "Montgomery Ward", "Montgomery Ward & Co.", and the "M" over "W" logo for Montgomery Ward.

Model

- 1959-1968
- "MODEL M822" is marked on top of the barrel.
- Based on the "Mossberg 640K Chuckster" design.
- Features include: Barrel mounted front blade and rear notch sight; turned down bolt handle; sliding dust cover; bottom metal with magazine release latch; polymer trigger guard; polymer pistol grip end cap; accessory rail above receiver/frame; left rear of the receiver/frame drilled and tapped for accessory peep sight; sliding safety located on the right rear of the receiver/frame.

Manufacturer

- "M" in the model designation stands for O.F. Mossberg & Sons Inc.

Action

- Turn bolt operated.

Serial Number

- The serial number may or may not be marked on the firearm.

Calibre

- "22 MAGNUM - W.M.R." is marked on top of the barrel.

Shots

- Detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- Plain stock, molded trigger guard, butt plate and pistol grip cap. Standard U-notch open sights and swivels. Drilled and tapped for Mossberg S330 peep receiver sight. Safety at right rear side of the receiver. Same as Mossberg 640K
- Montgomery Ward's "Western Field" branded firearms normally have a manufacturer's code in the model designation. The following letters were used to identify the company: "ECH" = Colt Industries; "EFW" = Firearms International Corp.; "EGP" = Golden State Arms; "EHM" = Fr. Heym Waffenfabrik; "EJN" = Jefferson Corp.; "EKN" = Kessler Arms Co.; "EMN" = Marlin Firearms Co.; "EMJ" = Miroku; "ERI" = Remington Arms Co.; "EY" = Iver Johnson Arms Co.; "M" = O.F. Mossberg & Sons; "SB" = Stevens/Savage; and "XNH" = Noble Mfg. Co.

Notes

Make

- "Ward's Western Field", "Wards Western Field", "WesternField", "Western Field", "M" over "W", "Montgomery Ward", "Montgomery Ward & Co." or a combination of these may be marked on the firearm.
- "M" over "W" is the trademark of "Montgomery Ward & Company".
- "Western Field" is a trademark/trade name used by Montgomery Ward & Company.

Model

- "WARD'S WESTERN FIELD" over "MODEL 87-SB87-TA" are marked on the top of the barrel.
- this is a Stevens Model 87 manufactured by Savage and sold by Montgomery Ward as the Western Field 87.
- operates as a blowback semi-automatic, however, pressing in the bolt handle will lock the action for use as single shot only.
- features include: walnut finish, one piece pistol grip stock with rubber butt plate;
tubular magazine mounted under the barrel; thumb safety located at the rear of the receiver/frame; open rear sight with step elevator, receiver/frame grooved for scope mounting; left side of receiver/frame has eight slots cut vertically just rear of the chamber; tapered round barrel; blued finish.

Manufacturer

- the manufacturer's name is not marked on the firearm.
- "SB" in the model designation is Montgomery Ward's manufacturer code for "Stevens/Savage".

Action

- blowback operated.

Serial Number

- observed sample was not marked with a serial number.
- "2094577 PATENTS 2224758" over "2223093 RE22585 2271576" is usually marked on the right side of the barrel, these numbers are patent numbers only and are not serial numbers.

Calibre

- ".22 SHORT, LONG OR LONG RIFLE" over "LONG RIFLE ONLY AS AUTOMATIC" may be marked on the left side of the barrel below the rear sight.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - tubular magazine mounted under the barrel.

Other Markings - known example had the following information marked on the right side of the barrel: "2094577 PATENTS 2224758" over "2223093 RE22585 2271576".

Notes

Make

- "Ward's Western Field", "Wards Western Field", "WesternField", "Western Field", "M" over "W", "Montgomery Ward", "Montgomery Ward & Co." or a combination of these may be marked on the firearm.
- "M" over "W" is the trademark of "Montgomery Ward & Company".
- "Western Field" is a trademark/trade name used by Montgomery Ward & Company.

Model

- "M550AD" is marked on the underside of the receiver/frame in front of the loading port.
- this is a standard pattern pump-action shotgun made for Western Field/Montgomery Ward by Mossberg; this model line is patterned after the Mossberg Model 500 series.
- features include: round tapered barrel with bead front sight; solid top anodized aluminum receiver/frame with right side ejection and bottom loading port; fixed underbarrel tube magazine; may have pressed checkering on walnut forearm and pistol grip buttstock with rubber butt pad; blued finish.
- the bolt locks to the barrel and any Mossberg Model 500 shotgun series 12 GA. barrel may be readily exchanged without the use of any hand tools.

Manufacturer

- "MADE IN U.S.A." is usually marked on the front underside of the receiver/frame and on the barrel.
- manufacturer's name is not usually marked on the firearm.
- Montgomery Ward's Western Field manufacturer's code in the model designation is the letter "M" for O.F. Mossberg & Sons.

Serial Number

- serial number is usually marked on the left side of the reciever/frame, however, observed examples have been noted without a serial number.

Calibre

- calibre is marked on the barrel, eg. "2 3/4" CHAMBER 28 INCH MODIFIED CHOKE" over "12 GA. MADE IN U.S.A.".
- calibre is marked on the underside of the receiver/frame, eg. "12 GA.".

Shots

- tubular magazine mounted under the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- Model note re marking: Montgomery Ward's Western Field normally have a manufacturer's code in the model designation. The following letters were used to identify the company: "ECH" = Colt Industries; "EFW" = Firearms International Corp.; "EGP" = Golden State Arms; "EHM" = Fr. Heym Waffenfabrik; "EJN" = Jefferson Corp.; "EKN" = Kessler Arms Co.; "EMN" = Marlin Firearms Co.; "EMJ" = Miroku; "ERI" = Remington Arms Co.; "EY" = Iver Johnson Arms Co.; "M" = O.F. Mossberg & Sons; "SB" = Stevens/Savage; and "XNH" = Noble Mfg. Co.

- known example was marked on left side of barrel, "2 3/4 CHAMBER 28 INCH MODIFIED CHOKE" over, "12 GA. MADE IN U.S.A.".

- "Ward's Western Field", "Wards Western Field", "WesternField", "Western Field", "M" over "W", "Montgomery Ward", "Montgomery Ward & Co." or a combination of these may be marked on the firearm.
- "M" over "W" is the trademark of "Montgomery Ward & Company".
- "Western Field" is a trademark/trade name used by Montgomery Ward & Company.

Model

- model designation roll stamped on top of the barrel.
- this is a Stevens Model 87 manufactured by Savage and sold by Montgomery Ward as the Western Field Model SB85TA.
- features include:
- operates as a semi-automatic, but pressing the cross bolt to the left locks the action, and adapts the rifle for use as a single shot.
- tube type magazine mounted under the barrel.
- thumb safety located at the rear of the receiver/frame.
- walnut finished, one piece pistol grip stock with rubber butt plate (early model had a black tip forend).
- sporting front sight and open rear sight with step elevator.
- receiver/frame grooved for scope mounting.
- tapered round barrel.
- left side of receiver/frame has eight slots cut vertically just rear of the chamber.

Manufacturer

- the manufacturer's name is not marked on the firearm.
- "SB" in the model designation is Montgomery Ward's manufacturer code for "Stevens/Savage".

Action

- blow back operated.

Serial Number

- may not be marked with a serial numbered.
- do not confuse serial number with patent numbers stamped on the barrel.

Notes

Make

- "Western Field" and "MODEL SD59A" was observed marked on the rear of the receiver/frame.
- "Western Field" is a trademark/trade name used by Montgomery Ward & Company.

Model

- "Western Field" over "MODEL SD59A" was observed marked on the rear of the receiver/frame.
- manufactured circa 1938 to 1965.
- features include: round tapered rifled barrel with fixed front sight and an adjustable open rear sight; tubular receiver/frame with right side ejection port and cocking knob; thumb safety is mounted on the right rear side of the receiver/frame; one piece wood semi-pistol grip stock with rubber butt plate.
- "SD59A" is a Savage model 6A or Stevens model 87 with a different stock and possible internal modifications.
- pressing the cross bolt knob to the left locks the action, and adapts the rifle for use as a manually operated firearm.

Action

- blowback operated.

Serial Number

- serial number was not observed marked on the firearm.
- rim-fire rifles manufactured prior to 1968 may not have a serial number.
- "PATENT 2094577" over "PATENT 2223093" was observed marked on the right side of the barrel on an example.
- "2094577" and "2223093" are not serial numbers, they are United States of America Patent Numbers.

Calibre

- "CAL. 22 LONG RIFLE SMOKELESS GREASED ONLY" was observed marked on the left side of the barrel on an example.
- ".22 SHORT, LONG OR LONG RIFLE" over "LONG RIFLE ONLY AS AUTOMATIC" was observed marked on the left side of the barrel on an example.

Shots

- tuber magazine is mounted under the barrel.

- the observed cylinder was engraved with a naval battle scene of the Texas Navy's victory over Mexico's Navy. The cylinder was marked in small print, "ENGAGED 16 MAY 1843", and "PATENT N.".

Manufacturer

- the "Uberti" name and/or logo (a "U" in an octagonal rifle bore) will be marked on the receiver/frame or barrel.

Action

- muzzle loading.

Serial Number

- the serial number will usually be marked on the underside of the receiver/frame ahead of the trigger guard.
- observed serial number consisted of a letter prefix followed by four numbers.

Notes

Make

- "WESTERNER'S ARMS" or "WESTERNER'S - ARMS" is marked on the barrel.

Model

- model designation is not marked on the firearm.
- this is a modern reproduction of a Griswold & Gunnison 1851 Navy revolver also known as a Griswold & Grier, Griswold, or Griswoldville percussion revolver.
- the C.S.A. "Griswold & Gunnison" revolvers were manufactured between 1862 and 1864 and was a copy of the "Colt 1851 Navy" revolver.
- the main difference in these percussion revolvers is the Colt has an octagonal barrel; steel receiver/frame with engraved cylinder and the Griswold & Gunnison has a round barrel and a brass receiver/frame with a plain cylinder.
- features include: blued round barrel with brass bead front sight; open top brass receiver/frame; brass backstrap and trigger guard; colour case hardened loading lever and hammer; wooden grip.

Manufacturer

- the manufacturer's name or logo may be marked on the firearm.

Serial Number

- the serial number is located on the underside of the receiver/frame.

76375 - 2	45 PERCUSSION	1	901	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Westley Richards" and/or "Westley Richards & Co." is marked on the lockplate and on top of the hinged breech block.

Model

- side hammer, "capping" breech loading service firearm patented in 1858 and adopted by the British Army in 1861 as a limited standard.
- utilises a breech mechanism which features a forward hinging breech block which when in the open position allows the insertion of a combustible paper cartridge into the chamber of the firearm. A percussion cap placed on the external nipple when struck by the hammer detonates the powder charge in the paper cartridge.
- manufactured in at least two carbine and in military rifle configuration.
- commonly referred to as a Westley Richards Monkey Tail because of the shape of the lifting "tail" on the rear of the breech block.
- produced on British military and commercial contract to other countries, most notable being Portugal.
- rifling is of the Whitworth Patent type being hexagonal in section.

Manufacturer

- "Westley Richards" and/or "Westley Richards & Co." is marked on the lockplate and on top of the hinged breech block.
- "Westley Richards" was located in Birmingham, England and had sales offices in London, England.

Other Markings

- lockplates of British military Westley Richards rifles bear a crown, the cypher of Queen Victoria (VR), the manufacturer's name (Westley Richards) and the year of manufacture.
- lockplates of Westley Richards rifles manufactured for commercial sale have the date of manufacture in a triangle and the manufacturer's name (Westley Richards).

126125 - 2	450 REV CF	6	104	Antique AFR, Section 1, para. 7	Manufacturer Specifications and Commercial Customization	

Notes

Make

- known example was marked, "Westley Richards & Co." over "London" on the top strap.

Model

- no model name is marked on this firearm.
- model designation is derived from the characteristics of this firearm that are similar to the typical British handgun called the "R.I.C.".
- features; solid receiver/frame construction; double action trigger; rebounding hammer; ejector rod is housed within the cylinder axis pin and rotates to the right for the ejecting of spent casings; loading gate on the right side of the standing breech; may have a lanyard ring; fluted cylinder; blued finish.
- British proof marks are apparent on the barrel, cylinder and receiver/frame.

Manufacturer

- known example was marked, "Westley Richards & Co." over "London" on the top strap.

Calibre

- known example had the calibre marked on the front left side of the receiver/frame as ".450".

Canadian Law Comments

- Some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

FRT Report

Firearm Reference Number (FRN): 140382
Make: Westley Richards
Model: Scottish Highlander Regimental Flintlock Pistol

Summary

Make:	Westley Richards
Model:	Scottish Highlander Regimental Flintlock Pistol
Manufacturer:	Westley Richards & Company
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
140382 - 1	56 FLINTLOCK	1	178	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "WESTLEY RICHARDS" is engraved in intertwined banners on the lock plate.

Model

- model designation is not marked on the firearm.
- manufactured circa 1835.
- traditional Scottish military flintlock pistol.
- features include: all metal construction; round, stepped barrel slightly flared at the muzzle; ram's horn butt with a threaded, centre knob for the touch hole pick; button head, turned ram rod; goose neck cock; belt hook attachment on the left side; lobed trigger tip; no trigger guard; external sear mechanism; extensive floral and scroll engraving pattern.
- overall length is 279mm/11".
- a very similar pistol, the "Black Watch Pistol" is known under several similar names, and must not be confused with the "Murdoch" pistol; where the "Murdoch" pistol has a "ram's-head" butt, with curlicue extensions that help to protect a ball-headed vent-pick threaded into the butt, the "Black Watch Pistol" is made with an all-brass butt and stock, with a double-lobed "kidney-shaped" butt that allows the pistol to be used as a club after the shot is fired.

Manufacturer

- "WESTLEY RICHARDS" is engraved in intertwined banners on the lock plate.

Action

- muzzle loading.

Other Markings

- the rank, initials and regimental number may be engraved on the grip.

Notes

Make

- "WESTLEY RICHARDS & CO" over "LONDON" was observed marked on the top strap of the receiver/frame.
- Westley Richards & Company was founded in 1812 by William Westley Richards (1788-1865) in Birmingham, England at 82 High Street.
- William Westley Richards established a retail outlet at 170 New Bond Street (later renamed 178 New Bond Street) under the management of William Bishop in 1815.
- Westley Richards took over the family business from his father, William Westley Richards, in 1840 and continued to manufacturer firearms and introduce further developments in the firearms industry.
- business was known as "Westley Richards" from 1840 to 1859.
- Westley Richards was renamed "Westley Richards & Company" in 1859.
- Westley Richards & Company" was renamed "Westley Richards Arms & Ammunition Company" in 1870.
- Westley Richards Arms & Ammunition Company became "Westley Richards & Company Limited" in 1873.
- Westley Richards retired in 1872, John Deeley took charge of the company and ran it until 1899. John Deeley had joined the company in 1860.
- Westley Richards & Company Limited moved out of the High Street premises to a factory at 40 Grange Road, Bournebrook in 1896. During the era of John Deeley management, he and a foreman, William Anson, developed the Anson and Deeley Boxlock action.
- Leslie Taylor succeeded John Deeley as the managing director of the company. By this time Westley Richards & Company was the only firearms company in Birmingham to operate shooting grounds around London and a shooting school at Henden.
- Westley Richards & Company Limited was liquidated in 1946. A Birmingham businessman purchased the company and in 1948, Malcolm Lyell took charge of the shop, which was then located at 23 Conduit Street.
- by 1955 the owners decided to close down the London business. Malcolm Lyell then purchased Westley Richards & Company and operated as the Westley Richard Agency. Lyell amalgamated with Holland & Holland in 1955.
- Westley Richards still offers fine firearms built to customer specifications.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "WEBLEY'S" over "No 2" over "calibre" was observed marked on the left side of the receiver/frame. - features include: half moon blade front sight and a groove in the top strap for a rear sight; ovate barrel; solid top receiver/frame with a fluted cylinder, and right side swing down loading gate; swing-out case ejector rod stored within the cylinder axis rod; exposed spur hammer; double/single action trigger mechanism; birds-head style grip strap; checkered wood grip plates; blued finish. - NOTE: barrel is ovate and may have an unusual taper with the diameter at the muzzle end being greater in diameter than where the barrel meets the receiver/frame.
Manufacturer	- "WEBLEY'S" or "WEBLEY" over "PATENTS" is usually marked on the side of the receiver/frame. - "P. Webley & Son / Webley & Scott" trademark logo of a "Winged Bullet" over "W&S" is usually marked on the side of the receiver/frame.
Serial Number	- serial number was observed marked on the left side of the receiver/frame. - observed serial numbers consisted of five numbers without a letter prefix or suffix.
Calibre	- "calibre" was observed marked on the left side of the receiver/frame.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "1867" inside a triangle and "WESTLEY RICHARDS & Co" was observed marked on the lockplate of an example.

Model

- manufactured circa 1860 to 1880.
- full model name is not marked on this firearm.
- "WESTLEY RICHARDS" over "PATENT" was observed marked on the breech.
- Westley Richard's breech loading percussion firearm was patented in 1858, this curious design incorporated a hinged breech lever (resembling a monkey's tail) that actuated a piston that pushed a paper wrapped bullet and powder charge with a greased wad into the rear of the barrel. A percussion cap was then applied.
- "WHITWORTH . PATENT" was observed marked on the barrel of an example.
- Joseph Whitworth's polygonal rifled barrel was patented in 1854.
- this is a breech loading, percussion firearm with the option of muzzle loading.
- features include: blade front sight and no rear sight; browned round barrel; steel ram rod is mounted under the barrel; right side lock with exposed percussion hammer; brass furniture; full length hardwood stock; lanyard loop.

Manufacturer

- "1867" inside a triangle and "WESTLEY RICHARDS & Co" was observed marked on the lockplate of an example.

Action

- muzzle or breech loading, percussion ignition.

Serial Number

- serial number is marked left side of the barrel.
- observed serial number consisted of three numbers without a letter prefix or suffix.
- numbered from 1 to 1000.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - the date "1867" within a triangle was marked on the rear of the lockplate of an observed example.

- TruServ Corporation dropped the ServiStar and Coast to Coast trade names and renamed itself True Value Company in 2006.

Model

- 1938-1965 approx

Remarks

- Operates as a semi-automatic with 22 LR or high speed cartridges only. Pressing the cross bolt to the left locks the action, adapts the rifle for use as a bolt action or single shot. Has a tube type magazine mounted under the barrel and a thumb safety at the rear of the receiver. Walnut finished one piece pistol grip stock with rubber butt plate (early model had a black tip forend). Sporting front sight (early model had a gold bead front sight) and an open rear sight with step elevator. Receiver grooved for scope mounting. Has a tapered round barrel. Same as 87 Springfield with possible internal and/or external modifications, made for Cotter & Co. May be under the house brand West Point or Trutest.

Notes

Make

- "Westpoint" is a trade name used by Cotter & Company.
- Cotter & Company of Chicago, Illinois, U.S.A. was founded by John Cotter in 1948.
- Cotter & Company purchased Hibbard Spencer Bartlett & Company in 1962.
- Cotter & Company and ServiStar (ServiStar Hardware was formerly American Hardware Supply and Coast to Coast Hardware) merged to form TrueServ Corporation in 1997.
- TruServ Corporation dropped the ServiStar and Coast to Coast trade names and renamed itself True Value Company in 2006.

Model

- "West Point Model 33" is marked on the barrel.
- manufactured from 1966 to 1970.
- total production of approximately 7,289 units.
- this is a "Marlin model 336 C" sold by "Cotter & Company" under their trade name and model designation.
- features may include: octagonal or round tapered barrel; flat top receiver/frame with round bolt; right side ejection port and loading gate; single trigger; offset hammer spur; tubular magazine; top of receiver/frame sandblasted to reduce glare and drilled and tapped for scope mounts; ramp front sight with hood and semi buckhorn adjustable folding rear sight.

Manufacturer

- manufacturer's name is marked on the barrel.
- contract firearm built by Marlin for Cotter & Company for retail sale under Cotter's trade/brand name "West Point".
- manufacturer's name may be marked on the barrel.
- contract firearm built by Marlin for Cotter & Company for retail sale under Cotter's trade/brand name "West Point".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- solid frame, visible hammer, centre fire, round bolt, side ejection, flat top.
Serial Number	- the serial number is located on the lower tang with a letter prefix. - the serial number may be marked under the operating lever on the trigger plate and repeated on the side of the upper tang, behind the hammer. - the serial number may have a single or two letter prefix, eg. "E000001" or as a two number prefix, eg. "27009190".
Barrel	- round, blued.
Shots	- tubular magazine located under the barrel.
Remarks	- Case hardened, carbine, single trigger, shotgun butt plate, full length tubular magazine, pistol grip stock. May have a gold plated trigger. This is a contract gun manufactured for Cotter & Co by Marlin and is similar to the Marlin Model 336 C with birch woodwork. The word Carbine may, or may not, appear after the model number on the barrel.

- Cotter & Company purchased Hibbard Spencer Bartlett & Company in 1962.
- Cotter & Company and ServiStar (ServiStar Hardware was formerly American Hardware Supply and Coast to Coast Hardware) merged to form TrueServ Corporation in 1997.
- TruServ Corporation dropped the ServiStar and Coast to Coast trade names and renamed itself True Value Company in 2006.

Model

- manufactured from 1989 to present.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- Black Rynite composition stock with removeable butt cap for storage and accessories. Removable grip cap with intergral screwdriver and compass. Folding leaf sight with a cast metal trigger guard. Single trigger and barrel selector spur on hammer. Over and under, separated barrels with the 12 Ga. and 20 Ga. have modified choke. Two way opening lever for either right or left handed shooters. Same as the Savage 24F with some possible internal and/or external modifications, made for Coast To Coast.

Notes

Make

- "WESTPOINT" and "COTTER & COMPANY, CHICAGO, ILLINOIS, U.S.A." are marked on the barrel.
- "Westpoint" is a trade name used by Cotter & Company.
- Cotter & Company of Chicago, Illinois, U.S.A. was founded by John Cotter in 1948.
- Cotter & Company purchased Hibbard Spencer Bartlett & Company in 1962.
- Cotter & Company and ServiStar (ServiStar Hardware was formerly American Hardware Supply and Coast to Coast Hardware) merged to form TrueServ Corporation in 1997.
- TruServ Corporation dropped the ServiStar and Coast to Coast trade names and renamed itself True Value Company in 2006.

Model

- "MODEL 45" is marked on the barrel.
- this is a standard pattern 22 LR semi-automatic rifle built by the Marlin Firearms Company for sale through Cotter & Company of Chicago, Illinois; this rifle is simply a re-named Glenfield Model 75.
- one piece wooden pistol grip stock with impressed "checkering" and animal motifs, barrel band at the forearm, open adjustable sights, sling swivels, cross bolt safety at the rear of the trigger guard and a short tubular magazine in the forearm that feeds from the front.

Manufacturer

- though these firearms were manufactured by Marlin for Cotter & Company, Marlin is not marked on the firearm.

Action

- blowback operated.

Calibre

- "CAL. 22 LR ONLY" is marked on the left side of the barrel.

Shots

- tubular magazine in forearm below barrel.

- TruServ Corporation dropped the ServiStar and Coast to Coast trade names and renamed itself True Value Company in 2006.

Model

- manufactured from 1970 to 1981.

Serial Number

- 6 digits, found on upper left side of frame.

Calibre

- PROOF TESTED CAL XXXXX (marked on the left rear side of the barrel.)

Remarks

- Selected walnut Monte Carlo stock and a corrugated butt plate. Pistol grip and slide are checkered. Slide thumb safety located on the tang and tube type magazine. Folding leaf rear and gold bead front sight on a ramp. Receiver drilled and tapped for top mounted scope. Same as the Savage 170 with some possible internal and/or external modifications, made for Cotter & Co. May be under the house name Trutest or West Point.

- TruServ Corporation dropped the ServiStar and Coast to Coast trade names and renamed itself True Value Company in 2006.

Model

- manufactured from 1938 to 1965 approx.

Remarks

- Operates as a semi-automatic with 22 LR or high speed cartridges only. Pressing the cross bolt to the left locks the action, adapts the rifle for use as a bolt action or single shot. Has a tube type magazine mounted under the barrel and a thumb safety at the rear of the receiver. Walnut finish, one piece pistol grip stock with rubber butt plate (early model had a black tip forend). Sporting front sight (early model had a gold bead front sight) and an open rear sight with step elevator. Receiver grooved for scope mounting. Has a tapered round barrel. Same as Springfield 187 with possible internal and/or external modifications, made for Cotter & Co. May be under the house name Trutest or West Point.

- TruServ Corporation dropped the ServiStar and Coast to Coast trade names and renamed itself True Value Company in 2006.

Model

- manufactured circa 1976.

Remarks

- Martini-type tilting breech block. Western style single-shot rifle has a finger lever, straight stock with separate forearm and a dummy magazine tube which give the appearance of a traditional tubular-magazine lever action carbine. The receiver, lever frame and front barrel band are die-cast zinc alloy with a black epoxy finish. The remaining external metal parts are blued. The stock is a light walnut finish with a matching forearm. Has a tapered round barrel. Same as the Stevens 89 with possible internal and/or external modifications, made for Cotter & Co. May be under the house name Trutest or West Point.

Notes

Make

- "Westpoint" is a trade name used by Cotter & Company.
- Cotter & Company of Chicago, Illinois, U.S.A. was founded by John Cotter in 1948.
- Cotter & Company purchased Hibbard Spencer Bartlett & Company in 1962.
- Cotter & Company and ServiStar (ServiStar Hardware was formerly American Hardware Supply and Coast to Coast Hardware) merged to form TrueServ Corporation in 1997.
- TruServ Corporation dropped the ServiStar and Coast to Coast trade names and renamed itself True Value Company in 2006.

Model

- "West Point Model 75-46" is marked on the barrel.
- manufactured between 1968 and 1970.
- this is a "Marlin model 75" sold by "Cotter & Company" under their trade name and model designation.

Manufacturer

- on barrel.
- contract built by Marlin for Cotter & Company for retail sale under Cotter's trade/brand name "West Point".

Remarks

- Semi automatic, carbine, birch stock, adjustable rear removeable sight, gold plated trigger. In 1970, an anniversary medalion on right side of Monte Carlo stock. This is a contract gun with the name Cotter & Co. manufactured by Marlin and is similar to the Marlin Model 99 M 1.

Notes

Make

- "Westpoint" is a trade name used by Cotter & Company.
- Cotter & Company of Chicago, Illinois, U.S.A. was founded by John Cotter in 1948.
- Cotter & Company purchased Hibbard Spencer Bartlett & Company in 1962.
- Cotter & Company and ServiStar (ServiStar Hardware was formerly American Hardware Supply and Coast to Coast Hardware) merged to form TrueServ Corporation in 1997.
- TruServ Corporation dropped the ServiStar and Coast to Coast trade names and renamed itself True Value Company in 2006.

Manufacturer

- manufactured from 1952 to 1960.

Serial Number

- 6 digits early models may have no serial #.
- found on front right side of frame

Calibre

- PROOF TESTED CAL XXXXX (marked left rear side of barrel).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- Streamlined walnut stock, fluted comb, full pistol grip (white line pistol grip cap in later models) and a corrugated butt plate. Pistol grip and forend are checkered. Action cocks on opening and locking lug with gas vent holes that match twin gas port in receiver. Slide thumb safety located at the right rear of the receiver and has a detachable box magazine. Has a gold bead front sight on a ramp (hooded removable front sight in latter models) and a folding rear sight with screw or sliding elevator. Receiver drilled and tapped for a scope. Same as the Springfield 840 with possible internal and/or external modifications, made for Cotter & Co. May be under the house brand name West Point and Trutest.

FRT Report

Firearm Reference Number (FRN): 139992
Make: WG
Model: 703B Smith & Wesson 627 Airsoft

Summary

Make:	WG
Model:	703B Smith & Wesson 627 Airsoft
Manufacturer:	WinGun (WG)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Airsoft
Action:	Air,Spring or Gas
Country of Manufacturer:	TAIWAN
Serial Numbering:	
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
139992 - 1	6MM AIRSOFT BB	6	203	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (d)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "WG" logo of WinGun is marked on the firearm.

Model

- "703B AIRSOFT" is not marked on the firearm.
- this airsoft firearm resembles a Smith & Wesson model 627 revolver.
- features include: metal construction; adjustable sights; outer barrel/sleeve with under lug and a smoothbore inner barrel; solid top receiver/frame with left side swing-out fluted cylinder; cylinder release is located on the left side of the receiver/frame; exposed hammer; single/double action trigger mechanism; CO2 power cylinder is housed on the grip frame under the left grip plate; black finish.
- overall length is 345 mm, and average weight is 970 grams.

Manufacturer

- "WinGun" is a manufacturer located in Taishan Shiang Taipei, Taiwan.

Type

- this is an airsoft handgun.

Action

- CO2 gas powered.
- at least two variants of this particular model exist:
Variant #1) does not discharge a 0.20 gram 6MM AIRSOFT BB projectile at a muzzle velocity exceeding 238.7 mps (783 fps) and/or a muzzle energy exceeding 5.7 Joules, and
Variant #2) does not discharge a 0.20 gram 6MM AIRSOFT BB projectile at a muzzle velocity exceeding 111.6 mps (366 fps) and/or a muzzle energy exceeding 1.2 Joules.

Shots

- swing-out cylinder.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- this airsoft is available in two variants:
Variant #1) CC 2 "firearm" / CC 84 (3) Exempted: muzzle velocity exceeds 111.6 mps (366 fps) and/or muzzle energy exceeds 1.2 Joules, when discharging a 0.2 gram 6MM AIRSOFT BB, and
Variant #2) CC 84 (1) "replica firearm": muzzle velocity is less than 111.6 mps (366 fps) and/or muzzle energy is less than 1.2 Joules, when discharging a 0.2 gram 6MM AIRSOFT BB.

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
129047 - 1	65 PERCUSSION	1	218	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Whately" or "Whateley" is marked on the sideplate and/or barrel.

Model

- model is not marked on the firearm.
- manufactured prior to 1853.
- one observed example was a conversion from flintlock ignition to percussion ignition by replacing the cock and frizzen with a nipple and hammer.
- features include: round barrel; brass tipped under barrel mounted ramrod; brass trigger guard and grip cap; left side mounted hammer; single piece wood stock.

Manufacturer

- "Whateley" or "Whatley" is marked on the sideplate and/or barrel.
- Henry Piddock Whateley was located in Birmingham, England from 1767 to 1852.
- Henry & John Whateley were located on Whittal Street, Birmingham, England from 1799 to 1817.
- John Whateley was located at 33 Smallbrook Street, Birmingham from 1746 to 1775.
- John Whateley and Mathew Barker formed a partnership known as Barker & Whateley.
- Barker & Whateley was located at 16 Catherine Street, Birmingham from 1766 to 1774.
- Thomas Whateley was located at 46 and later 51 Smallbrook St. Birmingham, England from 1766 to 1777.

Action

- muzzle loader.

Serial Number

- serial number of an observed example was two digits.

FRT Report

Firearm Reference Number (FRN): 147283
Make: Wheeler & Linwood
Model: Screw Barrel Pistol

Summary

Make:	Wheeler & Linwood
Model:	Screw Barrel Pistol
Manufacturer:	
Level:	Non-Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	
Serial Numbering:	
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
147283 - 1	12MM PERCUSSION	1	55	Antique CC 84(1) "antique firearm"	Non-Commercial Customization	
147283 - 2	12MM PERCUSSION	1	55	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Non-Commercial Customization	

Notes

Make

- "WHEELER" over "& LINWOOD" was observed marked on the left side of the receiver/frame.

Model

- Screw Barrel Pistols were popular in the period prior to 1880 and were commonly manufactured in England and Belgium.
- model designation is not marked on the firearm.
- model designation is derived from the method by which this pistol is loaded; loading was accomplished by unscrewing the barrel.
- this is a single shot pistol with a removable barrel and an exposed hammer centrally located on the receiver/frame behind the chamber.
- this handgun is intended to be loaded from the breech end of the barrel and as such was originally suppied with a wrench to unscrew the barrel from the receiver/frame in order that a lead ball and loose powder could be inserted into the chamber end of the barrel and then the barrel screwed back onto the receiver/frame.
- features observed: no front sight; removable, tapered round barrel with an under lug; central hammer; folding trigger; wood grips; nickel finish with light engraving.

Action

- the barrel unscrews in front of the chamber, so it can be loaded with a ball that fits the barrel more tightly than is possible with a muzzle loader.
- the turnoff barrel may be rifled.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Other Markings

- example observed with British proof marks.

Notes

Make

- "Wheeler & Son" was observed marked on the right side lockplate behind the hammer.

Model

- model designation is not marked on the firearm.
- features include: damascus barrel; under-barrel ramrod; side lock action; exposed single hammer on right side of action; English style stock.

Manufacturer

- "Wheeler & Son" was observed marked on the right side lockplate behind the hammer.
- there were at least two "Wheeler &Sons".
- the first was located in Birmingham, England (Robert Wheeler & Son) circa 1799 to 1843 who manufactured trade guns for the Hudson's Bay Company of North America.
- the second "Wheeler & Son" was located in the United States of America as the A.G. Wheeler & Son manufacturer located in Farmington, Maine, U.S.A. fron 1872 to 1873.
- A.G. Wheeler & Son was established by Albert Gallitin Wheeler.
- Albert Gallitin Wheeler & William Lawrence were in a partnership known as "Wheeler & Lawrence" from circa 1858 to 1860.
- Albert Gallitin Wheeler was in business from circa 1860 to 1872.
- Albert Gallitin Wheeler & George A. Stevens were in a partnership known as "Wheeler & Stevens" in 1872.
- Albert Gallitin Wheeler & Chareles E. Wheeler were in a partnership known as A.G. Wheeler & Son from 1872 to 1873.
- Albert Gallitin Wheeler's business was known as A.G. Wheeler & Co. in 1883.
- S. A. Wheeler & Son was a firearms manufacturer located in Waterville, Maine, U.S.A. circa 1877 to 1883.
- S. A. Wheeler & Son was know as S. A. Wheeler from 1874 to 1877.

Action

- muzzle loading, percussion ignition.

Serial Number

- known example did not have a serial number.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
122714 - 1	177 PELLET	1	406	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "J. WHISCOMBE" or "WHISCOMBE" may be marked on the firearm.

Model

- "JW60 MK II" is marked on the firearm.
- "JW" in the model designation denotes John Whiscombe.
- "60" in the model denotes the separation distance of the pistons in millimeters when cocked.
- "MK II" (MARK 2) denotes a product improvement.
- features include: round, polygonal rifled barrel with integral harmonic optimization tuning system (H.O.T.S); muzzle weight; adjustable two stage trigger; automatic safety; aircraft aluminum alloy receiver/frame; recessed under lever cocking arm with positive anti-bear trap safety; scope rail droop compensated; walnut standard or thumbhole stock with multi-adjustable cheekpiece and butt plate.
- available in a right or left hand version and with a match trigger.

Manufacturer

- " J. WHISCOMBE" or "WHISCOMBE" and "Made in England" are marked on the right side of the reciever/frame.
- John Whiscombe business was established in 1987.
- John Whiscombe is the manufacturer the of Whiscombe Opposed Piston Air Rifle.
- John Whiscombe's designed an airgun with dual opposed pistons that increase power and eliminate recoil in a spring-piston air rifle. The pistons are opposed, which means they're facing each other. When the gun is cocked, each piston is pulled back against its own separate mainspring. When the gun is fired, the pistons come together...like the clapping of hands. Instead of a closed compression chamber, each piston acts as the compression chamber for the other piston. They come together at the air transfer port, so all the compressed air is squeezed out the port and behind the pellet.
- John Whiscombe models include the: JW-50, JW-50 MARK 2, JW-55, JW-60, JW-60 FB, JW-60 MARK 2, JW-65, JW-65 MARK 2, JW-75, JW-80, and JW-80 MARK 2.

Action

- discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- located on the receiver/frame.
- observed specimen had three digits.

Model

- "WLA10" is marked on the left side of the receiver/frame on the magazine well.
- "WLA10" is sold as a receiver/frame only.
- Features include: free floating handguard; flat top upper assembly; rear mounted cocking handle; ambidextrous safety selector; magazine release locate on the right side of the receiver/frame.

Manufacturer

- The manufacturer is not marked on the firearm.
- DRG Manufacturing is located in Lake Zurich, Illinois, United States of America.
- In 2023 DRG Manufacturing was rebranded to "Outerwild Manufacturing".

Action

- Gas operated.

Serial Number

- The serial number is marked on the left side of the receiver/frame.
- Serial number of a referenced example consisted of the three letter prefix "WLT" followed by five digits.

Calibre

- "CAL MULTI" is marked on the left side of the receiver/frame on the magazine well.

Shots

- Detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments - This firearm design incorporates a split receiver/frame: the lower receiver is the master component for the receiver/frame for all purposes of the Criminal Code and the Firearms Act.

68704 - 1	22 SHORT	7	79	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Made for Smith & Wesson by Rollin White Arms Co., Lowell, Mass." or "Rollin White Arms Co. Lowell, Mass." is marked on the top of the barrel.

Model

- no model name appears on this firearm.
- produced circa 1860's to approximately 1866-7.
- total production estimated at approximately ten thousand.
- single action, solid frame, spur trigger, octagonal barrel, non-fluted cylinder with locking notches located at front of cylinder.
- fixed blade front sight either half-moon or triangular in shape; a noticeable swell at rear of cylinder top strap is grooved for a rear sight.
- brass frame usually silver plated, blued barrel and cylinder.
- elliptical contour removeable side plate located on left rear of receiver fastened by a single slot-head screw.
- square butt configuration with walnut grips.
- cylindrical axis pin has acorn-shaped head; the axis pin is held in place by a slot-head screw located on right front of receiver, this screw must be loosened in order to release the axis pin for removeal of the cylinder; the axis pin can then be used for the ejection of spent casings.
- cylinder usually roll-engraved, "Patented April 3 1855 & Dec 18 1860".

Manufacturer

- "Rollin White Arms Co. Lowell, Mass." is marked on the top of the barrel.

Serial Number

- serial number usually marked on botton grip strap.
- numbering was sequential starting at 1 without prefix or suffix; known example had a four digit number.

Calibre

- research literature indicates that this handgun was made in 22 Short only.

Firearm Reference Number (FRN): 74910
Make: Whitney Arms Company
Model: Navy 2nd Model

Summary

Make:	Whitney Arms Company
Model:	Navy 2nd Model
Manufacturer:	Whitney Arms Company
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Revolver
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
74910 - 3	22 RF	6	190	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	
74910 - 4	36 PERCUSSION	6	152	Antique CC 84(1) "antique firearm"	Manufacturer Specifications and Commercial Customization	
74910 - 2	36 PERCUSSION	6	178	Antique CC 84(1) "antique firearm"	Manufacturer Specifications and Commercial Customization	
74910 - 1	36 PERCUSSION	6	191	Antique CC 84(1) "antique firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Model

- this is the second Model of a "Navy type" single action percussion revolver made by Whitney between 1858 and 1865; these revolvers were made to compete with similar revolvers produced by Colt, after Colt's patents had expired.
- unlike Navy First Models, all of these revolvers were actually marked "E. WHITNEY" over "N. HAVEN"; by the time that these revolvers were being produced, Whitney's quality control had improved to the point where Whitney did not need to use a pseudonym to protect sales of his other products.
- overall, these revolvers resemble a Remington 1875 without the under barrel web, a brass triggerguard, and with a very thin topstrap on the frame; two piece walnut grips, color case hardened finish, and octagonal barrel.
- collectors have identified six general "types" of the Navy Second Model, and these types can be differentiated by things such as cylinder roll-markings, loading lever type, safety notches on the cylinder, and the number of rifling grooves in the barrel.

Action

- single action percussion revolver.

Serial Number

- numbered on the receiver/frame, from "1" up.

Notes

Make

- not to be confused with the Whitney Firearms Company of Hartford, Connecticut, which produced firearms from 1955 through 1962.

Model

- the Whitney Phoenix was made between 1867 and 1881, for sale to military and civilian customers in America and elsewhere.
- this is an unusual single-shot action with a breechblock that pivots up and to the right to allow access to the chamber; these rifles have been seen with three different types of integral extractors.
- straight-grip walnut stock and forearm, with open adjustable sights.
- some variations of this rifle were made as "Military" rifles, with full-length wood stocks and bayonet mountings; these rifles were intended for sale to state militias and various South and Central American governments, so may be seen with either state property markings, or governmental crests.
- other variations of this rifle were made as, or converted to, "schuetzen" rifles for Swiss-style target competition; these rifles may have sculpted cheekpieces, deluxe-grade wood, hooked buttplates, and other types of ornamentation.
- generally marked only "PHOENIX, Patent May 24, 74", with no indication as to the actual manufacturer.
- variations of this firearm were also made as (or converted to) shotguns.

Manufacturer

- Also sometimes known as "Whitneyville Armory"; this is marked on some of their handguns, and possibly some of their rifles and shotguns.
- Eli Whitney (Sr) was the founder of WHITNEY ARMS COMPANY. Over the years this company has also been known as WHITNEY ARMORY and WHITNEYVILLE ARMORY. The company continued to operate under his son, Eli Whitney (Jr), until it ceased operation in 1888 (having been bought out by Winchester).
- This company is not connected to WHITNEY FIREARMS INCORPORATED, which began operation in 1955.

Action

- single-shot breechloading rifle with a hinged breech-block.

Serial Number

- example described has a four-digit serial number, stamped on the upper and lower tangs of the rifle.

Remarks

- the "Phoenix" was a single-shot design in which the breech-block was a separate piece hinged on the right side of the action; to fire a shot, the user would cock the hammer, rotate the breech-block up to the right, insert a cartridge, then close the breech-block again to fire. This design also had an integral extractor to push fired cases out of the chamber far enough to be grasped by the fingers. Some examples are known to have been produced with nickel-plating, or with tang and globe sights. Those with tang sights were produced with unique "split-trigger" set triggers, where the right half would need to be pushed forward to line up with the left half to set it. None of the examples described have the make or manufacturer anywhere on them, but will have a patent date (May 26, 1874) on them.

Notes

Make

- not to be confused with the Whitney Firearms Company of Hartford, Connecticut, which produced firearms from 1955 through 1962.
- not marked on the firearm.

Model

- less than 5000 Phoenix shotguns were made between 1867 and 1881, often from surplus rifles that had been re-bored after the Civil War.
- uses an unusual single-shot action with a breechblock that pivots up and to the right to allow access to the chamber; these shotguns have been seen with three different types of integral extractors.
- equipped with a straight-grip walnut stock and forearm.
- generally marked only "PHOENIX, Patent May 26, 74" (references sometimes indicate a patent date of "May 24, 74"), with no indication as to the actual manufacturer.

Manufacturer

- not marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- sample examined was numbered on the lower tang.
Calibre	- calibre designation is marked on top of the barrel.
Canadian Law Comments	- examples in some calibres may be considered "Antique" and as such are exempt from firearms registration in Canada. For clarification consult the "Antique Firearms Regulations".

Notes

Make

- "E. WHITNEY" and "N. HAVEN" or "WHITNEYVILLE, CT.", WHITNEYVILLE ARMORY" or "WHITNEYVILLE" is marked on the firearm.
- this company is not connected to WHITNEY FIREARMS INCORPORATED, which began operation in 1955.

Model

- model designation is not marked on the firearm.
- manufactured circa 1856 to 1864.
- features include: blued finish; engraved cylinder; octagonal barrel with hinged, colour case-hardened, loading lever mounted underneath; solid top receiver/frame with fixed round cylinder; exposed spur hammer; conventional trigger guard; two piece walnut grips; fixed sights.

Manufacturer

- "ADDRESS E. WHITNEY" and "WHITNEYVILLE, CT." may be marked on the top strap, or "E. WHITNEY/N. HAVEN" may be marked on the barrel.

Barrel

- barrel lengths will range from 76MM to 152MM.

Notes

Make

- the make designation is marked on the barrels as:
"Whitney Arms Co., Whitneyville, Conn. Homogenous Wrought Steel"

Model

- model is not marked on firearm.
- this model is a side by side exposed hammer percussion shotgun built by the Whitney Arms Company from 1866 to 1869, using surplus war parts originally meant for Civil War contracts.
- these shotguns are known for their rather crude manufacture, with 25mm circular sideplates allowing access to the inner lockwork.
- features include: straight grip walnut stocks and forearm and double triggers.
- also built in a single barrel version.

Manufacturer

- manufacturer's designation is marked on the barrels as:
"Whitney Arms Co., Whitneyville, Conn. Homogenous Wrought Steel"
- also sometimes known as "Whitneyville Armory", which is marked on some of their handguns and possibly some of their rifles and shotguns.
- this company is not connected to WHITNEY FIREARMS INCORPORATED, which began operation in 1955.

Action

- muzzle loading percussion side by side.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the receiver/frame from "1" up.
Calibre	- these shotguns were advertised in gauges from 10 through 20, using Civil War surplus barrels and parts.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
27628 - 1	46 RF	1	558	Antique AFR, Section 1, para. 2	Manufacturer Specifications and Commercial Customization	

Notes

Make

- not to be confused with the Whitney Firearms Company of Hartford, Connecticut, which produced firearms from 1955 through 1962.

Model

- the Swing-Breech Carbine was a limited production firearm that is reminiscent of a Colt SAA revolving carbine, only in a single-shot action, and with double triggers. A receiver-mounted button is used to lock/unlock the action, allowing the breech-block (including the hammer) to swing out horizontally to the left, pivoting on a pin at the comb of the stock. The chamber can then be loaded or unloaded. This firearm also has a forearm-mounted manual extractor. This firearm is exceedingly rare, as less than 50 were manufactured.

Manufacturer

- also sometimes known as "Whitneyville Armory"; this is marked on some of their handguns, and possibly some of their rifles and shotguns.
- Eli Whitney (Sr) was the founder of WHITNEY ARMS COMPANY. Over the years this company has also been known as WHITNEY ARMORY and WHITNEYVILLE ARMORY. The company continued to operate under his son, Eli Whitney (Jr), until it ceased operation in 1888 (having been bought out by Winchester).
- this company is not connected to WHITNEY FIREARMS INCORPORATED, which began operation in 1955.

27574 - 3	45-70 GOVT	11	838	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is not marked on the firearm.
- not to be confused with the Whitney Firearms Company of Hartford, Connecticut, which produced firearms from 1955 through 1962.

Model

- this is a lever-action rifle with a tubular under-barrel magazine, manufactured by Whitney under license with Andrew Burgess (G.Morse, another inventor, was also paid royalties for one of his patents used in this rifle)
- these rifles were produced in both sporting and military versions, and in full-length and carbine variations
- straight-grip walnut stock and forearm, open adjustable sights, closed or "S"-style open serpentine lever, octagon or round barrel, and bayonet mount on military versions.
- these rifles never gained widespread acceptance due to feeding problems; most were made in 45-70 Gov't, but some were chambered in 43 Remington/11.15x58R Spanish Remington and 42 Russian/10.75x58R Russian in hopes of obtaining foreign military contracts.

Manufacturer

- manufacturer's designation is not marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- lever-action rifle with underbarrel tubular magazine.
Serial Number	- numbered on lower tang or floor-plate.
Other Markings	- barrel marked: G.W. MORSE PATENTED OCT. 28th 1856. - upper tang marked: A. BURGESS PATENTED JAN 7th 1873, PATENTED OCT 19th 1873
Remarks	- This was a lever-action repeating rifle, designed for a U.S. Army trial to find a new rifle. Although the design was not accepted by the military, Whitney did put it into production in three versions; a sporting version, a military version and a military carbine. This rifle was very similar to the Winchester lever-action, except it did not have a closed-loop lever to work the action. Some very rare variants of this rifle were made without a loading gate on the right side of the receiver. The military versions of this rifle have a full-length wooden fore-end. Whitney also made two other lever-action designs, the Whitney-Kennedy and the Whitney-Tiesing, which can be distinguished by the fact that the Whitney-Kennedy has a closed-loop lever, and the Whitney-Tiesing is loaded through a slot in the bottom of the receiver.

Notes

Make

- not to be confused with the Whitney Firearms Company of Hartford, Connecticut, which produced firearms from 1955 through 1962.

Model

- this is an exceedingly rare single-shot carbine made by Whitney in 1866-7, using J. W. Cochrane's April 4th, 1865 patent; this carbine was made in hopes of attaining a lucrative contract from the federal government for a new cavalry carbine.
- the firearm has a combination trigger-guard/action lever, that, when operated, raises the front of the breech-block up and out of line with the chamber. When the action is opened, a manual extractor on the left tang is used to eject the fired case, and then the carbine can be reloaded.
- straight-grip walnut stock and forearm, with saddle ring on left side of receiver.
- marked "Whitney Arms Co.-Whitneyville, Conn." on the barrel, and "J.W. Cochrane N.Y. Pat'd" over "Apr.4,1865 & Feb'y 20, 1866" on the breechblock.

Manufacturer

- Also sometimes known as "Whitneyville Armory"; this is marked on some of their handguns, and possibly some of their rifles and shotguns.
- Eli Whitney (Sr) was the founder of WHITNEY ARMS COMPANY. Over the years this company has also been known as WHITNEY ARMORY and WHITNEYVILLE ARMORY. The company continued to operate under his son, Eli Whitney (Jr), until it ceased operation in 1888 (having been bought out by Winchester).
- This company is not connected to WHITNEY FIREARMS INCORPORATED, which began operation in 1955.

Action

- lever-operated tilting-block.

Notes

Make

- the following markings, or a variation thereof will usually be located on the barrel;
- "Whitney Arms Co., New Haven, Conn. U.S.A.",
- "Whitneyville Armory, CT. USA",
- "Whitney Kennedy Mf'd by Whitney Arms Co New Haven, Conn, U.S.A.",
- "Kennedy".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- no model designation appears on this firearm. - produced circa 1879 to 1886. - manufactured by Whitney under licence agreement with Andrew Burgess; this rifle is an improvement on the former Whitney-Burgess/Whitney-Burgess-Morse action with internal design changes incorporated to ensure "jam-free" operation. - the Whitney-Kennedy action differs from the Whitney-Burgess in that the side-mounted loading gate was omitted thus necessitating that the action be fully open in order to load the magazine from the top of the action. - features may include; exposed hammer, under-barrel tubular magazine, built in both small and large receiver/frame sizes depending on calibre, round barrel, hardwood forend with one barrel band, single leaf rear sight, serpentine or "S" shaped lever as was used on the earlier Whitney-Burgess rifles or the full-loop type as introduced later in the production cycle, trap door in buttplate with cleaning rod, blued finish, blued or casehardened receiver/frame.
Manufacturer	- the following markings or a variation thereof will usually be located on the barrel; - "Whitney Arms Co., New Haven, Conn. U.S.A.", - "Whitneyville Armory, CT. USA", - "Whitney Kennedy Mf'd by Whitney Arms Co New Haven, Conn, U.S.A.", - "Kennedy".
Action	- under-lever operated.
Serial Number	- serial numbering from 1 to 5000 after which a letter prefix was used with each letter having a number series from 1 through 1000; letter prefixes from "A" to "T" have been referenced.
Calibre	- calibre designation is usually marked at the breech end of the barrel.
Other Markings	- the following patent markings or a variation thereof is usually marked on the top tang of these firearms, "Patented Jan'y. 7-73, Ap'l, May 13 and Aug.12-79"; these dates apply to the Burgess patents of Jan 7, 1873 and April 1, 1879, the Kennedy patent of May 13, 1879, and the Kennedy-Tiesing patent of Aug 12, 1879.

Notes

Make

- make is marked on the firearm.

Model

- model is not marked on the firearm.
- generally marked in one of three ways; "Whitney Arms Co., New Haven, Conn. U.S.A.", "Whitneyville Armory, CT. USA", or "Whitney Kennedy Mf'd by Whitney Arms Co. New Haven, Conn., U.S.A.". Some specimens have been seen marked simply "Kennedy".
- this is a lever action rifle with a tubular under barrel magazine, manufactured by Whitney under licence with Andrew Burgess; this rifle was a later variation of the Whitney-Burgess, with internal changes to facilitate jam-free feeding.
- these rifles were produced in both sporting and military versions, and in full-length and carbine variations; the majority of the military versions were sold in Central and South America, and may bear national crests.
- features include: straight-grip walnut stock and forearm; open adjustable sights; closed or "S"-style open serpentine lever; octagonal or round barrel; and bayonet mount on military versions.
- these rifles were built in small and large frame sizes, as well as military rifles, with full-length wood and a bayonet lug.
- half-length magazines were an option on some of the commercial rifles.

Manufacturer

- manufacturer's designation is marked on the firearm.

Serial Number

- numbered on receiver/frame; later-production firearms used a letter prefix.

Calibre

- marked on the firearm.

Other Markings

- the following patent markings or a variation thereof is usually marked on the top tang of these firearms, "Patented Jan'y. 7-73, Ap'l, May 13 and Aug.12-79"; these dates apply to the Burgess patents of Jan 7, 1873 and April 1, 1879, the Kennedy patent of May 13, 1879, and the Kennedy-Tiesing patent of Aug 12, 1879.

Notes

Make

- "WHITNEYVILLE ARMORY CO. PATENTED", "OCT.17.'65. RE-IS'D. JUNE 25.'72. DEC.26 '65." and "RE-IS'D. OCT.1.'67. MAY 15.'66. JULY 16.'72." may be marked on the upper tang.
- Whitney Arms Company is not to be confused with the Whitney Firearms Company of Hartford, Connecticut, which produced firearms from 1955 through 1962.

Model

- model designation is not marked on the firearm.
- "WHITNEYVILLE ARMORY CO. PATENTED", "OCT.17.'65. RE-IS'D. JUNE 25.'72. DEC.26 '65." and "RE-IS'D. OCT.1.'67. MAY 15.'66. JULY 16.'72." may be marked on the upper tang.
- Whitney Arms Company manufactured two distinct types of "rolling block" single-shot rifles between 1871 and 1888.
- these rifles operate on the same general principles, but differ in that the Laidley type (the "split-breech" version) used more parts and was more complex to manufacture.
- the "Whitney-Laidley Rolling Block" used four components in the rolling block action (hammer, locking cam, thumb piece plate and breechblock) and the breechblock and hammer retaining plate is mounted on the right side of the receiver/frame.
- the "Whitney-Remington Rolling Block" used two major parts in the rolling block action (hammer and breechblock) and the breechblock and hammer retaining plate is mounted on the left side of the receiver/frame.
- these rifles were made in both military and sporting versions, with some of the rifles being converted to shotguns.
- features include: blued octagonal, half octagonal/half round or round barrel; color-case-hardened or nickel plated flat sided receiver/frame; rolling block action; walnut forearm and straight or semi-pistol grip stock; open adjustable sights (some with tang peep sights).

Action

- rolling-block single-shot.

Serial Number

- serial number is usuallty marked on the lower tang.

Barrel

- these rifles were made with barrels between 18.5"/470mm and 35"/889mm long.

Remarks

- The hammer rides in a thin slot in the middle of the locking cam; in later Whitney "rolling blocks", the hammer and the locking cam were the same piece, and the action was not fully locked until the hammer had already started to fall. These rifles were marked "Whitneyville Armory", with a series of patent dates, the last being July 16, 1872. These may also be called "Whitney-Laidley" rolling block rifles, as Laidley actually designed the firearm, while Whitney manufactured it.

- these rifles were made in both military and sporting versions, with some of the rifles being converted to shotguns.
- features include: blued octagonal, half octagonal/half round or round barrel; color-case-hardened or nickel plated flat sided receiver/frame; rolling block action; walnut forearm and straight or semi-pistol grip stock; open adjustable sights (some with tang peep sights).

Action

- rolling block action.

Serial Number

- serial number is usually marked on the lower tang.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- The rifle appears to have two separate hammer spurs, but the front "hammer" is actually the means by which the breech is opened and closed, while the actual hammer both fires a chambered cartridge and prevents the breech-block from blowing back under the pressure of firing, by use of a hemispherical cam that rotates under the breech-block base before the chambered cartridge is fired. These rifles were produced with both round and octagonal barrels, and most examples won't be marked with make or manufacturer; many will be marked with the patent date of the rifle, though. (May 15, 1866)

- rolling block action.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is usually marked on the lower tang.
Calibre	- the .50-70 version of this rifle could accomodate both centre-fire and rim-fire cartridges, with an inset in the breech-face.
Other Markings	- many of these firearms will have Mexican government acceptance marks on them (a sunburst-shaped cartouche above "R M").

FRT Report

Firearm Reference Number (FRN): 125404
Make: Whitney Arms Company
Model: Whitney-Laidley Montreal Police Carbine

Summary

Make:	Whitney Arms Company
Model:	Whitney-Laidley Montreal Police Carbine
Manufacturer:	Whitney Arms Company
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
125404 - 1	43 SPANISH	1	521	Antique CC 84(1) "antique firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "WHITNEYVILLE ARMORY CO. PATENTED", "OCT.17.'65. RE-IS'D. JUNE 25.'72. DEC.26 '65." and "RE-IS'D. OCT.1.'67. MAY 15.'66. JULY 16.'72." may be marked on the upper tang.

Model

- model designation is not marked on the firearm.
- "WHITNEYVILLE ARMORY CO. PATENTED", "OCT.17.'65. RE-IS'D. JUNE 25.'72. DEC.26 '65." and "RE-IS'D. OCT.1.'67. MAY 15.'66. JULY 16.'72." may be marked on the upper tang.
- "MONTREAL POLICE" was observed stamped on the barrel in front of the rear sight.
- 60 rifles were ordered in 1875 by Montreal Police to escort prisoner.
- features include: blued round barrel; color case hardened receiver/frame with saddle ring and bar on the left side; rolling block action; wooden forearm and straight grip stock; open sights; supplied with angular bayonet;.
- Whitney Arms Company manufactured two distinct types of "rolling block" single-shot rifles between 1871 and 1888.
- these rifles operate on the same general principles, but differ in that the Laidley type (the "split-breech" version) used more parts and was more complex to manufacture.
- the "Whitney-Laidley Rolling Block" used four components in the rolling block action (hammer, locking cam, thumb piece plate and breechblock) and the breechblock and hammer retaining plate is mounted on the right side of the receiver/frame.
- the "Whitney-Remington Rolling Block" used two major parts in the rolling block action (hammer and breechblock) and the breechblock and hammer retaining plate is mounted on the left side of the receiver/frame.

Action

- rolling block action.

Serial Number

- serial number is marked on the lower tang.
- serial number range falls between 6,700 and 7,500.

Other Markings

- number on the buttplate referred to a rack number, from 1 to 60.

Notes

Make

- "WHITNEYVILLE ARMORY CO. PATENTED", "OCT.17.'65. RE-IS'D. JUNE 25.'72. DEC.26 '65." and "RE-IS'D. OCT.1.'67. MAY 15.'66. JULY 16.'72." may be marked on the upper tang.
- Whitney Arms Company is not to be confused with the Whitney Firearms Company of Hartford, Connecticut, which produced firearms from 1955 through 1962.

Model

- model designation is not marked on the firearm.
- "WHITNEYVILLE ARMORY CO. PATENTED", "OCT.17.'65. RE-IS'D. JUNE 25.'72. DEC.26 '65." and "RE-IS'D. OCT.1.'67. MAY 15.'66. JULY 16.'72." may be marked on the upper tang.
- Whitney Arms Company manufactured two distinct types of "rolling block" single-shot rifles between 1871 and 1888.
- these rifles operate on the same general principles, but differ in that the Laidley type (the "split-breech" version) used more parts and was more complex to manufacture.
- the "Whitney-Laidley Rolling Block" used four components in the rolling block action (hammer, locking cam, thumb piece plate and breechblock) and the breechblock and hammer retaining plate is mounted on the right side of the receiver/frame.
- the "Whitney-Remington Rolling Block" used two major parts in the rolling block action (hammer and breechblock) and the breechblock and hammer retaining plate is mounted on the left side of the receiver/frame.
- these rifles were made in both military and sporting versions, with some of the rifles being converted to shotguns.
- features include: blued octagonal, half octagonal/half round or round barrel; color-case-hardened or nickel plated flat sided receiver/frame; rolling block action; walnut forearm and straight or semi-pistol grip stock; open adjustable sights (some with tang peep sights).

Action

- rolling block action.

Serial Number

- serial number is usuallty marked on the lower tang.

Barrel

- these rifles were made in barrel lengths up to 813mm.

Remarks

- the rifle appears to have two separate hammer spurs, but the front "hammer" is actually the means by which the breech is opened and closed, while the actual hammer both fires a chambered cartridge and prevents the breech-block from blowing back under the pressure of firing, by use of a hemispherical cam that rotates under the breech-block base before the chambered cartridge is fired. These rifles were produced with both round and octagonal barrels, and most examples won't be marked with make or manufacturer; many will be marked with the patent date of the rifle, though. (May 15, 1866)

Notes

Make	- "WHITNEY ARMS CO." over "NEW HAVEN CT. USA." was observed marked on the upper tang of the firearm.
Model	- this is an exact copy of the Remington Rolling Block No. 2 rifle built by Whitney Arms Co. after the patent expired on the Remington rifle. - the No 2 rifle is a lighter weight version of the No 1 size with a rounded, smaller and lighter receiver/frame. - features include: octagonal tapered barrel with blade front sight and upper tang mounted vernier sight; pistol grip, checkered buttstock with steel crescent shaped butt plate; slim tapered forend with ebony tip-cap. - manufactured between 1881 and 1888.
Action	- rolling block design.
Serial Number	- a three digit serial number was observed marked on the bottom tang of the firearm, the same serial was observed marked on the bottom of the barrel, under the forearm.
Calibre	- "22 CAL" was observed marked on the bottom of the barrel, just ahead of the forearm.

74713 - 11	44-40 WIN	15	660	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- not to be confused with the Whitney Firearms Company of Hartford, Connecticut, which produced firearms from 1955 through 1962.

Model

- the model designation is not marked on the firearm.
- manufactured from 1886 to 1888.
- approximate production of less than 2000 units.
- this is a lever-action rifle with a tubular under-barrel magazine, manufactured by Whitney using a patent issued to William Scharf; this was an attempt to produce a better rifle than the Whitney-Kennedy and Whitney-Burgess, to compete with the growing popularity of Winchester's lever-action rifles
- these rifles were produced in both sporting and military versions, and in full-length and carbine variations; this was the last rifle produced by Whitney, as the company was bought out by Winchester in 1888.
- features include: straight-grip walnut stock and forearm; open adjustable sights or leaf folding rear sight; closed-loop lever with loop latch; octagon, round or half octagon and round barrel; and sabre-type bayonet mount on military versions.

Manufacturer

- also sometimes known as "Whitneyville Armory"; this is marked on some of their handguns, and possibly some of their rifles and shotguns.
- Eli Whitney (Sr) was the founder of WHITNEY ARMS COMPANY. Over the years this company has also been known as WHITNEY ARMORY and WHITNEYVILLE ARMORY. The company continued to operate under his son, Eli Whitney (Jr), until it ceased operation in 1888 (having been bought out by Winchester).
- This company is not connected to WHITNEY FIREARMS INCORPORATED, which began operation in 1955.

Action

- lever-action rifle.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number is marked on the receiver/frame.
Calibre	- the calibre designation may be marked on the barrel.
Shots	- tubular magazine mounted below the barrel.
Other Markings	- generally marked "Whitney Arms Company, Whitneyville, Conn" on the barrel, with the tang marked "Whitney Arms Company, Pat'd Dec 21, 1886", and the calibre marked at the breech.

Notes

Make	- not to be confused with the Whitney Firearms Company of Hartford, Connecticut, which produced firearms from 1955 through 1962.
Model	- this is Whitney lever-action design, which can be recognized by the fact that the Whitney-Tiesing has both a closed-loop lever to work the action and has a loading gate on the bottom of the receiver, instead of on the side as with the Winchester lever-action designs.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- Also sometimes known as "Whitneyville Armory"; this is marked on some of their handguns, and possibly some of their rifles and shotguns. - Eli Whitney (Sr) was the founder of WHITNEY ARMS COMPANY. Over the years this company has also been known as WHITNEY ARMORY and WHITNEYVILLE ARMORY. The company continued to operate under his son, Eli Whitney (Jr), until it ceased operation in 1888 (having been bought out by Winchester). - This company is not connected to WHITNEY FIREARMS INCORPORATED, which began operation in 1955.
Barrel	- barrel length of this model isn't specified, but Whitney's other rifles ran between 20"/508mm and 33"/838mm.
Shots	- shots not specified in the reference, but can be as high as 12 in a full-length tube magazine.

Notes

Make

- "E. WHITNEY" and "N. HAVEN" is marked on the lock plate.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".

Model

- this was the first general issue rifled long arm used by the U.S. armed forces
- Eli Whitney Jr. built approximately 26,500 of these rifles under four separate federal contracts, from 1843 to 1855.
- straight grip walnut stock with brass mountings and patchbox, "U.S." marked on buttplate, sling swivels at front trigger guard bow and front band, color-case-hardened lock, brass front sight, and seven-groove rifling.
- these rifles were intended for use with conical Minie ball bullets that expanded in the bore upon firing; therefore, they have ram-rods with sunken tips to push a bullet down onto the powder charge without damaging the bullet point.
- these rifles are marked "E.WHITNEY" over "U.S." in front of the hammer, and "N.HAVEN" with the date of manufacture at the rear of the side plate; with "V/P/U.S." and inspector's marks at the breech. Rifles built after 1848 will also have "STEEL" at the breech. These rifles were also stamped with inspector's marks on the left side of the stock opposite the lock.

Manufacturer

- "E. WHITNEY" and "N. HAVEN" is marked on the lock plate.

Type

- muzzle loading, single shot, side hammer firearm with a percussion ignition system.

Action

- percussion ignition system.

Model: 1861 Connecticut Contract

Summary

Make:	Whitneyville Armory
Model:	1861 Connecticut Contract
Manufacturer:	Whitneyville Armory
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
74070 - 1	58 PERCUSSION	1	1016	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is usually marked on the lockplate as: "E. Whitney" over "N.Haven", or just "Whitneyville".

Model

- this is a copy of the 1861 Rifle-Musket manufactured by Whitney for two Connecticut state militia contracts in 1861 and 1862
- the 1861 has a straight grip walnut stock with curved buttplate, three barrel bands, sling swivels at the front of the trigger guard and the second band, with either seven groove (early) or three groove (late) rifling.
- these rifles were also manufactured for federal contracts; those rifles made for the federal/Union government were marked with "U.S." on the buttplate and had a martial eagle over "U.S." on the lockplate. Rifles made for the State of Connecticut all had a pewter forearm cap on the stock, and no "U.S." marking on the buttplate. The lockplates on these rifles were marked in two styles; an undated lock with "E.Whitney" over "N.Haven", or an undated lock with an eagle in a panoply of flags over "Whitneyville".

Manufacturer

- manufacturer's designation is marked on the lockplate as: "E. Whitney" over "N.Haven", or just "Whitneyville".

Action

- muzzle loading percussion single shot.

74074 - 1	58 PERCUSSION	1	1016	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- may be marked on the lockplate as: "Whitneyville Armory", "Whitneyville" or a variation there of.

Model

- this is a specific sub-type of the 1861 percussion rifle manufactured by Whitney in 1863; this rifle differs from standard 1861's in that the lock is inset flush into the wood, and is not bevelled.
- this rifle (like other 1861s) has a straight grip walnut stock with curved buttplate, three barrel bands, sling swivels at the front of the trigger guard and the second band, three groove rifling, and a tulip shaped ram rod end.
- these rifles were not considered acceptable for federal/Union use, and were sold to commercial dealers and various state militias (markings will differ on state purchased rifles).
- some variations of these rifles are called "Artillery Models", as they have shorter barrels and would presumably have seen use with artillery regiments during the Civil War; these rifles differ from the standard Flush-Lock 1861s in that they have 762mm barrels, and only two barrel bands.

Manufacturer

- may be marked on the lockplate as: "Whitneyville Armory", "Whitneyville" or a variation there of.

Action

- muzzle loading percussion single shot.

Notes

Make

- "E. Whitney" over "N. Haven" may be marked in the middle of the lockplate.

Model

- model is not marked on the firearm.
- this is a percussion rifle manufactured by Whitney using surplus 1855 Maynard Tape Primer lockplates, only without the container or hinged cover for the tape priming. These rifles were built at a time when both the North and South were trying to buy every arm imaginable, and Whitney decided to use these parts rather than scrap them. These rifles can be distinguished from other 1861's by the fact that these rifles have shorter barrels (991mm, versus 1016mm), and have a lockplate with a high "hump" between the hammer and nipple.

Manufacturer

- manufacturer's designation is marked on the rifle as: "E. Whitney" over "N. Haven" in the middle of the lockplate.

Action

- muzzle loading percussion single shot.

Summary

Make:	Whitneyville Armory
Model:	1861 US Navy Percussion Rifle
Manufacturer:	Whitneyville Armory
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
73773 - 1	69 PERCUSSION	1	864	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "U.S." and "WHITNEY-VILLE" or "WHITNEYVILLE" is marked on the lock plate.
- "US" or "U.S." or "U. STATES" or "UNITED STATES" with or without an eagle crest is marked on the lock plate.
- in 1777, the Continental Congress passed a resolution requiring all arms and accoutrements owned by the United States to be marked "U.S." or "United States".

Model

- this is a new pattern rifled musket built for the U.S. Navy by Eli Whitney Jr. between 1861 and 1864
- these rifles are similar in general appearance to the 1861 Artillery Percussion Rifle built by Whitney, except that they have slightly different lock markings (two styles), a nosecap instead of a forward barrel band, and a spur extending from the bottom tang at the rear of the trigger-guard.
- one piece straight grip walnut stock with curved buttplate, peep sight, sling swivels at toe of stock and second band, cylindrical ram rod head, and lock-plate with one of two types of markings. The first type has a spread winged eagle atop a panoply of flags in the middle, "U.S." over "Whitney-ville" at the front, and the date of manufacture ("1863") at the rear of the plate. The second type is identical except that it replaces the "panoply of flags eagle" with the more modern "martial eagle" (spread wings, holding a sheaf of arrows in one talon, and an olive branch in the other), and is seen with dates of "1863" and "1864". Inspector's marks of "FW" (Frank Warner) may also be stamped into the stock on the opposite side of the lock.

Manufacturer

- "WHITNEY-VILLE" or "WHITNEYVILLE" is marked on the lock plate.

Action

- muzzle loading percussion single shot.

Serial Number

- these rifles were numbered to their bayonets, on the tang; these are NOT serial numbers.

Notes

Model

- this is a contemporary copy of the Colt 1851 Navy, produced by Whitney in 1857 and 1858.
- identical to Colt-produced 1851 Navy, except that Whitney-produced guns have two-piece walnut grips and a roll-engraved cylinder scene consisting of an eagle, a shield, and a lion.
- it is believed that these guns were sold to Mexico, and may bear Mexican property marks.

Manufacturer

- normally marked on the firearm.

Action

- single-action percussion revolver.

Notes

Make

- "E.Whitney N. Haven CT" is marked on the barrel.
- "Patent" and "Applied For" are marked on the cylinder hood.

Model

- this is a small revolver with a manually rotated cylinder.
- produced by Whitney between 1850 and 1853.
- features include: octagonal barrel, bag shaped grip with walnut grip panels, cylinder release button high on the backstrap and an etched brass cylinder cover that comes down to the midpoint of the cylinder.
- most of these revolvers were made with blued barrels and silver plated receiver/frame and cylinder cover.

Manufacturer

- "E.Whitney N. Haven CT" is marked on the barrel.
- "Patent" and "Applied For" are marked on the cylinder hood.

Action

- manually revolved cylinder.

Serial Number

- serial number is marked on the receiver/frame, starting at "1".

74894 - 3	36 PERCUSSION	6	203	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Model

- model is not marked on the firearm.
- this is the first Model of a "Navy-type" single action percussion revolver made by Whitney between 1858 and 1865; these revolvers were made to compete with similar revolvers produced by Colt, after Colt's patents had expired.
- many of these revolvers were actually marked "EAGLE CO.", because these revolvers were not up to the quality standards that Whitney had for his other firearms, and he was afraid of gaining a bad reputation for those guns. (guns marked ONLY "EAGLE CO." will be found in their own record.)
- overall, these revolvers resemble a Remington 1875 without the under barrel web, and with a very thin topstrap on the receiver/frame; solid receiver/frame; two piece walnut grips, colour case hardened finish, and octagonal barrel. Early guns were made without a loading lever, having only a cylinder pin through the frame.
- collectors have identified four general "types" of the Navy First Model, and these types can be differentiated by things such as cylinder roll markings, loading lever type, safety notches on the cylinder, and the shape of the junction between the grip frame and receiver/frame proper.
- when these revolvers are marked with Whitney's name, it appears as "E. Whitney" over "N. Haven".

Manufacturer

- manufacturer's designation is marked on the barrel as:
E. Whitney
N.Haven

Action

- single action percussion revolver.

Serial Number

- numbered on the receiver/frame, starting at "1".

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make

- the make is marked on the barrel.
- Eli Whitney (Sr) was the founder of Whitneyville Armory. Over the years this company has also been known as WHITNEY ARMS CO. and WHITNEYVILLE ARMS CO.. The company continued to operate under his son, Eli Whitney (Jr), until it ceased operation in 1888.
- This company is not connected to WHITNEY FIREARMS INCORPORATED, which began operation in 1955.

Model

- manufactured from 1871 to 1879.
- the model designation is not marked on the firearm.
- approximately 3,500 manufactured.
- features include: fixed blade front sight; spur trigger; iron or brass receiver/frame; birds head grip; octagonal or round barrel; available with an unfluted cylinder, a short fluted cylinder, or a long fluted cylinder; may be engraved; all nickel finish or nickeled receiver/frame with blued barrel and cylinder; pearl, rosewood, ivory or hard rubber grips.

Manufacturer

- the manufacturer is marked on the barrel.

Action

- single action.

Serial Number

- sample examined was marked on the bottom of the grip.

Shots

- those models with a 16 mm long cylinder are chambered for the 22 Short cartridge; those models with a 21 mm long cylinder are chambered for the 22 Long cartridge.

Other Markings

- the barrel will be marked:
"WHITNEYVILLE"
or
"WHITNEYVILLE CONN"
or
"WHITNEYVILLE CONN PAT MAY 23, 1871"
or
"WHITNEYVILLE ARMORY CT. USA"
or
"WHITNEYVILLE ARMORY USA"

Remarks

- available in four different receiver/frame sizes:
  - No 1 in calibre 22 SHORT, 7 shots.
  - No 1-1/2 in calibre 32 RF, 5 shots.
  - No 2 in calibre 32 RF, 6 shots.
  - No 2-1/2 in calibre 38 RF, 5 shots.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
27559 - 1	50 RF	1	711	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "Whitneyville Arms Company" marked on the barrel.
Model	- A single-shot rifle that uses a pivoting block inside the receiver/frame as the breech-block. This block is pulled down at the front with a ring to expose the chamber so a cartridge can be loaded, then a lever on the right side of the receiver/frame (behind the trigger guard) is pressed to pivot the breech-block back up behind the chamber again.
Manufacturer	- "Whitneyville Arms Company, Whitneyville, Conn." marked on the barrel.
Serial Number	- the example described has a two-digit serial number on the breech-block, lower tang, butt plate, and other parts.
Other Markings	- "Whitneyville Arms Company" marked on the barrel.

74740 - 2	32 PERCUSSION	6	76	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Model

- this is a small revolver with a manually rotated cylinder, produced by Whitney between 1852 and 1854.
- features include: octagonal barrel, Single Action Army style solid receiver/frame, square backed trigger guard, roll engraved cylinder, and what appears to be a second trigger in front of the proper trigger guard; this is actually the release and lock for the manually revolved cylinder
- most of these revolvers were made with brass receiver/frames and iron trigger guards; some were manufactured with iron receiver/frames and brass trigger guards.

Manufacturer

- marked "E.Whitney N. Haven CT" on the barrel, with "Patent Applied For" on the cylinder hood.

Action

- single action revolver with manually revolved cylinder.

Serial Number

- serial number is marked on the receiver/frame starting at "1".

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- this is a ring-trigger revolver made by Whitney between 1854 and the late 1860s, based on patents issued to Fordyce Beals, an inventor who would later work for Remington. - features include: octagonal barrel, solid frame, no trigger-guard and fluted cylinder. - these revolvers were made in a number of variations, with differences in frame shape and material, cylinder latch, and ring size. - these revolvers are sometimes called "walking beam" revolvers, because of the resemblance of their mechanism to a style of steam engine, which moved up and down and back and forth. - normally marked in one of three fashions; "F.Beals / New Haven, CT" or "Beal's Patent", or "Address E. Whitney / Whitneyville, Ct." with "Beals Patent / Sept. 1854" or "F.Beals / Patent / Sept. 1854" (sometimes seen with a patent date of "June 24, 1856"), or "Address E. Whitney / Whitneyville, Ct." with "F.Beals / Patent / Sept. 1854"
Manufacturer	- this is marked on some of their handguns, and possibly some of their rifles and shotguns.
Serial Number	- numbered on reeiver/frame in more than one series.
Shots	- these revolvers were manufactured in both six- and seven-shot versions.

Notes

Make

- "WHITON BRO. & CO." was marked on the barrel of an observed example.
- Whiton Brothers & Company was located in Boston, Massachusetts, U.S.A. in the 1870's and 1880s.
- Whiton Brothers were David Whiton, Thos. F. Whiton and Lewis C. Whiton.

Model

- model designation is not marked on the firearm.
- this is a spur trigger, single action revolver manufactured between 1873 and 1888.
- features include: round barrel with fixed blade front sight; solid top receiver/frame with removable non-fluted cylinder and loading channel on the right side; cylinder has locking notches at the rear; exposed knurled cylinder access pin with release located on the front of the receiver/frame, under the barrel; exposed spur hammer; sheathed spur trigger; single action trigger mechanism; bird's head grip with wood grip plates; blued or nickel finish.

Manufacturer

- manufacturer's designation is not marked on the firearm.

Serial Number

- serial number of an observed example was stamped on the left side of the grip frame, under the grip plate.
- observed serial number consisted of three numbers without a letter prefix or suffix.

Notes

Make

- "Whitworth Rifle Company Manchester England" or a variation thereof is usually marked on the top of the barrel.
- "Whitworth" within an elongated horizontal oval may be marked on the top of the receiver ring.

Model

- no model designation is marked on this firearm.
- this is a generic entry designed to encompass all bolt action sporter rifles made by or for the Whitworth Rifle Company of Manchester, England that have no model name marked on them.
- turn bolt operated, integral internal box magazine or detachable box magazine depending on the type of action used.
- Whitworth bolt action sporting rifles are built utilizing any of the following actions: US Rifle Model 1917, Enfield Pattern 1914, Lee-Enfield No. 4, original Mauser 98, new Zastava Mark X.
- features may include but are not limited to:
- hinged floor plate with release button located on the front inside of the trigger guard,
- adjustable trigger,
- sliding type safety located on the rear right side of the receiver/frame,
- hooded ramp front sight,
- three leaf express rear sight or adjustable rear sight, receiver/frame may be drilled/tapped for scope mounts,
- Mauser style bolt stop located at the rear left side of the receiver/frame,
- European walnut stock, checkered pistol grip and forearm with cheekpiece and Monte Carlo comb, sling swivels, ventilated rubber recoil pad,
- blued finish.
- British proof marks are usually apparent on the barrel and/or receiver/frame.

Manufacturer

- "Whitworth Rifle Company Manchester England" or a variation thereof is usually marked on the top of the barrel.
- "Whitworth" within an elongated horizontal oval may be marked on the top of the receiver ring.
- Whitworth Rifle Company of Manchester, England, is referred to as a firearms producer, however, the company name also appears to be a brand/trade name used by the international firearms producer/distributor, Interarms of Manchester, England (also referred to as: Interarms House).

Action

- turn bolt operated.

Serial Number

- serial number may be marked on the left side of the barrel or on the left or right side of the receiver/frame.

Calibre

- calibre usually marked on the barrel.

Shots

- integral internal box magazine or detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings - "Interarms" may appear on the rubber recoil pad.

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
189802 - 1	6MM PPC	1	559	Non-Restricted CC 2 "firearm"	Non-Commercial Customization	

Notes

Make

- the make may or may not be marked on the firearm.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm type.
- this is a custom-made single-shot rifle made for "unlimited" division benchrest shooting, where competitors use rifles mounted on heavy (~22 kilogram/50 pounds) aiming platforms, rather than stocks, to try to attain the ultimate in precision at ranges of 100 and 200 yards. Competitors often fire 5-shot groups that result in a single hole using these rifles, as the aiming platform takes the human error component out of firing a group. The term "rail gun" is derived from the fact that the actions and triggers are mounted on a single solid "rail" that is itself bolted to the aiming platform.
- features may include: heavy blued or stainless barrel; square or rectangular receiver bolted to an aiming platform by way of a solid aluminium or steel "rail"; no open sights (drilled and tapped for scope mounts); bolt-operated single-shot with a shell holder bolt, allowing empty cases to be extracted; wheel-adjustable aiming controls; and a machined square trigger-guard.

Manufacturer

- the manufacturer may or may not be marked on the firearm.

Action

- bolt-operated single-shot.

Serial Number

- serial-numbered on the receiver/frame.

Notes

Make

- "WICKLIFFE" is marked on the firearm.
- "Wickliffe" was a trade name used by "Triple S Development Company".

Model

- this is a modern under lever operated dropping block single shot sporting rifle. It features an American walnut buttstock and forearm.
- this firearm is offered in a wide variety of calibres and special order features, such as hand checkered deluxe grade wood, calibre and barrel length to individual customer's tastes.
- actions and barreled actions were offered for sale to gunsmiths and individuals who wanted to build a rifle to their own specifications.
- this model is based on the "Stevens Model 44 1/2".

Manufacturer

- "Triple-S Development Co., Inc." of Wickliffe, Ohio was in business from 1978 to 1981.

Action

- under lever operated dropping block.

Serial Number

- appears on the underside of the front of the receiver/frame.

Barrel

- barrel lengths were available from 559mm to 660mm.

Calibre

- this firearm was chambered for cartridges ranging from 22 HORNET to 45-70 GOVT.

Firearm Reference Number (FRN): 176102
Make: Widmer, Casper
Model: Free Pistol

Summary

Make:	Widmer, Casper
Model:	Free Pistol
Manufacturer:	Widmer, Casper
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	SWITZERLAND
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
176102 - 1	22 LR	1	296	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- "C. WIDMER St. GALLEN" and C. Widmer's logo of a "C" surrounding a bullseye, with the centre point of a rounded "W" forming a front sight is marked on the firearm.
Model	- the model is not marked on the firearm; this is a descriptor of the firearm type. - this is a single-shot Free Pistol manufactured by C. Widmer prior to the Second World War; these pistols may vary in characteristics and layout, but usually conform to the single-shot style that was popular at the time. - features usually include: blued finish; open adjustable sights; carved walnut grip and forearm; top-loading; and a rotating "cannon breech" style of bolt at the rear of the pistol.
Manufacturer	- "C. WIDMER St. GALLEN" and C. Widmer's logo of a "C" surrounding a bullseye, with the centre point of a rounded "W" forming a front sight is marked on the firearm. - C. Widmer was a custom match rifle and pistol maker in St. Gallen, north-eastern Switzlerland, prior to the Second World War.
Action	- bolt-operated single-shot, with the bolt being operated through a lever at the bottom of the grip.
Serial Number	- serial-numbered on the barrel.

Notes

Make

- this pistol was designed and apparently also produced by Alois Tomiska of Pilsen, Czechoslovakia. Pistols manufactured here will be marked on the left slide: "Alois Tomiska - Plzen - Patent - Little Tom".
- manufacturing of this model was taken over by "Wiener Waffenfabrik" of Vienna, Austria at an unknown date. This name will be marked on the right side of the slide. These pistols will also have Austrian proofmarks plus the year of proofmarking.

Model

- pistols were assembled until approximately 1929, however, actual production may have ended earlier.
- "LITTLE TOM" is marked on the plastic left grip pannel of the 6.35mm and on the the left side of the slide of the 7.65MM. The 7.65mm has wooden grip pannels.
- Little Tom was manufactured by Wierner Waffenfabrik from 1919 to about 1925.

Manufacturer

- manufacturing of this model was taken over by "Wiener Waffenfabrik" of Vienna, Austria at an unknown date. This name will be marked on the right side of the slide. These pistols will also have Austrian proofmarks plus the year of proofmarking. Wiener Waffenfabrik's Logo of "WWF" run together is marked on the right grip pannel of the 6.35MM and on both grip pannels of the 7.65MM.

Action

- blowback with a double action trigger.

Serial Number

- serial number range is believed to be from 20,00 to 30,000.
- serial number is marked on the right side of the slide.

Shots

- detachable box magazine.

Notes

Make

- Wildey firearms take their name from Wildey J Moore who holds the design patents for the Wildey pistol and developed the cartridge known as the 475 Wildey Magnum.
- firearms sold under the Wildey name were originally produced by Wildey Firearm Company Inc. of Cheshire, Connecticut. Firearms produced by the Wildey Firearm Company were serialized with a "45" prefix followed by four digits (example: 45-0000, (0's were used as placeholders)). Less than one thousand firearms were produced.
- Wildey Inc. bought the company out of bankruptcy. Currently the company is located in Warren, Connecticut. The first 600-650 pistols produced by Wildey Inc. were marked with the Cheshire address markings. To distinguish theses from the pistols produced by Wildey Firearms Company production the serial number prefix was changed to "09" (example: 09-0000). Pistols produced in the New Milford, Connecticut plant are serialized with four digits only with no prefix.

Model

- this is a large, stainless-steel semi-automatic pistol, with a ventilated-rib on the barrel.
- features include: butt magazine-release, wooden grip panels, and a knurled ring for adjusting the gas port at the rear of the barrel.
- the "Hunter" has a matte stainless-steel finish, while the "Survivor" has a brightly-polished stainless-steel finish; each of these is available in a standard rounded trigger-guard variation, and a squared-off trigger-guard variation known as the "Guardsman"
- these pistols will accept interchangeable top ends in different calibres and barrel lengths; the calibre of a given barrel is marked on the bottom of the barrel just ahead of the gas regulating ring.

Manufacturer

- Wildey Inc. is a manufacturer based in New Milford, Connecticut, that specializes in producing a very large gas-operated semi-automatic pistol that pre-dates the Desert Eagle. This company was originally known as the WILDEY FIREARMS COMPANY, but was bought out after suffering financial difficulties, and it became known as WILDEY INCORPORATED.

Action

- gas-operated.

Serial Number

- depending on the date of manufacture, these pistols will have one of three different serial-numbering rationalizations.
- original pistols produced by the Wildey Firearms Co. will have a four digit serial number prefaced by "45". (ie. 45-1234): approximately 800 pistols were produced.
- pistols produced by Wildey, Inc. immediately after the company was bought out of bankruptcy will have a four digit serial number prefaced by "09". (ie. 09-1234): approximately 600 pistols were produced.
- modern-production pistols by Wildey, Inc. will have a four digit serial number without a prefix. (ie. 1234)

Calibre

- The 45 WIN MAG, 41 WILDEY MAG, 44 WILDEY MAG, 45 WILDEY MAG, and 475 WILDEY MAG are all based upon the same case, altered to take different-diameter projectiles.

Shots

- detachable box magazine.

- Wildey firearms take their name from Wildey J Moore who holds the design patents for the Wildey pistol and developed the cartridge known as the 475 Wildey Magnum.
- firearms sold under the Wildey name were originally produced by Wildey Firearm Company Inc. of Cheshire, Connecticut. Firearms produced by the Wildey Firearm Company were serialized with a "45" prefix followed by four digits (example: 45-0000, (0's were used as placeholders)). Less than one thousand firearms were produced.
- Wildey Inc. bought the company out of bankruptcy. Currently the company is located in Warren, Connecticut. The first 600-650 pistols produced by Wildey Inc. were marked with the Cheshire address markings. To distinguish theses from the pistols produced by Wildey Firearms Company production the serial number prefix was changed to "09" (example: 09-0000). Pistols produced in the New Milford, Connecticut plant are serialized with four digits only with no prefix.

Model

- "Wildey Carbine" is marked on the slide.
- features include: skeleton walnut buttstock and walnut forearm, gas operated, scope bases integral to barrel rib.
- this firearm is an adaptation of Wildey's handgun design to a rifle configuration.

Manufacturer

- WILDEY was originally known as WILDEY FIREARMS COMPANY. After the company was bought out, it became known as WILDEY INCORPORATED.

Type

- this model uses a receiver/frame of a handgun with a buttstock "firmly" attached so that it can be marketed in the United states as a "carbine".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- gas operated.
Serial Number	- serial number on the carbine model has an "R" prefix.
Shots	- detachable box magazine.
Canadian Law Comments	- under Canadian law this model remains a handgun.

Notes

Make

- "WILKINSON SWORD Co., PALL MALL. LONDON" was observed marked on the barrel rib.
- "WILKINSON WEBLEY" may be marked on the left side of the top strap.

Model

- "Wilkinson Webley '00" may be marked on the side of the top strap.
- this hinge-frame, top break revolver was manufactured by "Webley" for "Wilkinson".
- introduced in 1900, last unit by Wilkinson on 3 Dec. 1903, numbered W938.
- the cylinder retention cam was improved by increasing the area of engagement into a "stirrup" between it and the cylinder-front retaining groove, attached by screws on both sides of the barrel lug.
- single/double action trigger, bead fore-sight, integral tapered barrel rib, double locked cylinder, checkered squared walnut butt-stock.
- these "Wilkinson" firearms were provided with a superior high-gloss blued finish than similar contemporaries by Webley.

Manufacturer

- "WEBLEY'S" or "WEBLEY" over "PATENTS" may be marked on the side of the receiver/frame.
- "P. Webley & Son / Webley & Scott" trademark logo of a "Winged Bullet" over "W&S" may be marked on the side of the receiver/frame.

Serial Number

- serial number by Webley marked in the right grip-frame notch behind the hammer-strut, on the "barrel lug" under the front barrel hinge, and usually on the rear of the cylinder.
- the firearm may be also augmented with up to a four figure "Wilkinson" serial number that is prefixed with a "W", example: W789.

Calibre

- marked on the left side of the "barrel lug": .455/.476

Other Markings

Notes

Make

- "Wilkinson, Gunmakers, Pall Mall, London S.W." may be marked on the barrel rib.
- "Wilkinson Webley" may be marked on the left side of the top strap.

Model

- model marked on the left side of the barrel strap: "Wilkinson Webley '1910".
- this double action, top break revolver was manufactured by "Webley" for "Wilkinson".
- manufactured circa 1910.
- features include: hinged frame, top break, double action, adjustable rear sight, six groove rifling.

Manufacturer

- "WEBLEY'S" or "WEBLEY" over "PATENTS" may be marked on the side of the receiver/frame.
- "P. Webley & Son / Webley & Scott" trademark logo of a "Winged Bullet" over "W&S" may be marked on the side of the receiver/frame.

Serial Number

- serial number by Webley marked in the right grip-frame notch behind the hammer-strut, on the "barrel lug" under the front barrel hinge and usually on the rear of the cylinder.
- usually marked with a six digit number without suffix or prefix.
- the firearm may also be augmented with up to a four figure "Wilkinson" serial number that is prefixed with a "W", example: W3000.

Calibre

- calibre is marked on the barrel.

195113 - 1	455 REV	6	145	Antique CC 84(1) "antique firearm" para. (b)	Non-Commercial Customization	

Notes

Make

- "WILKINSON, PALL MALL, LONDON" is marked on the barrel rib.
- James Wilkinson was in business from 1804 to 1818.
- James Wilkinson was joined by his son Henry and the company name changed to James Wilkinson & Son in 1819.
- James Wilkinson & Son continued under 1824, when James retired.
- the company name was changed to Wilkinson & Son in 1825 and moved to 27 Pall Mall in 1829.
- Wilkinson & Son was in business from 1825 to 1888.

Model

- model designation is not marked on the firearm.
- model designation is a descriptor of the Webley style of top break revolver with the "Pryse" pattern locking system, characterized by a "tong" style opening system where two levers at the rear of the recoil shield are squeezed in to allow the barrel and cylinder to tip down for loading/unloading.
- features include: octagonal barrel and raised top rib with fixed half-moon front sight and integral V notched rear sight; front hinged receiver/frame with a fluted cylinder; twin break open levers mounted behind the recoil shield; exposed spur hammer; double/single action trigger mechanism; saw handle type grip strap with metal butt cap and lanyard ring; checkered solid walnut grip; nickel plated finish.

Manufacturer

- "AF" under a crown has been observe on one specimen on the grip frame, under the grip.
- "AF", "AFC", "A. Francotte & Cie", "A. Francotte a Liege" or "Francotte" are some of the markings found on Francotte manufactured firearms.
- Francotte was founded by Pierre Joseph Francotte in Liege, Belgium in 1803.
- Pierre Joseph Francotte was the father of Auguste Francotte.
- "AF" was the abbreviation used by "Auguste Francotte", before 1902.
- "AFC" was the abbreviation used by "Auguste Francotte & Cie.", after 1902.

Action

- top break.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is usually marked under the grip panel on the receiver/frame.
- serial number of a referenced example consisted of four numbers.
- there may be a four-digit number marked on the lower left side of the grip. This is not the firearm manufacturer's serial number. It is a separate registry number for Wilkinson, the distributor.

Calibre

- calibre designation was not marked on a referenced example.

96495 - 1	476 REV	6	145	Antique AFR, Section 1, para. 7	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "WILKINSON & SON, PALL MALL, LONDON" was observed marked on the barrel rib.
- Wilkinson's six pointed star trademark with the letters "HW" was observed on the left side of the firearm.
- "HW" are the initials of Henry Wilkinson.

Model

- no model name appears on this firearm.
- manufactured circa 1884 to 1888.
- this is a double action, top break revolver similar to the Webley No. 4, with modifications to Wilkinson specifications.
- this model has the distinctive Pryse-type patented barrel-to-breech locking mechanism with twin tong-like levers extending downwards on either side of the standing breech.
- this model is characterized by a high profile rib running the entire length of the barrel with a very pronounced angle between the rib and the octagonal barrel.
- specific to this model is the "small hinge" pattern of barrel-to-receiver/frame hinge joint whereby the barrel assembly pivots on a single slot head hinge pin located at the very bottom front of the receiver/frame.
- plain or fluted cylinders may be encountered.
- usually has a lanyard ring fixed to the bottom of the butt cap.
- rebounding spurred hammer.
- blued or nickel plated finish with checkered hardwood grip.
- cylinder dismount button is found on the right side of the barrel-lug.

Manufacturer

- "WEBLEY'S" or "WEBLEY" over "PATENTS" may be marked on the side of the receiver/frame.
- "P. Webley & Son / Webley & Scott" trademark logo of a "Winged Bullet" over "W&S" may be marked on the side of the receiver/frame.
- most features and characteristics are similar to the Webley Number 4 design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial numbers for this model series are usually four digits without prefix or suffix. - the "Webley" serial number was initially located on the forward left side of the receiver/frame; at approximately serial number 6461 it was re-located to the rear face of the barrel-lug, below the cylinder axis. - Wilkinson also stamped these firearms with a Wilkinson "registry number" which was usually located on the lower left hand side of the wooden grip, this number should not be mistaken for a serial number.
Calibre	- calibre designation is not marked on the firearm.
Other Markings	- the top of the barrel rib is marked "WILKINSON & SON, PALL MALL, LONDON".
Remarks	- the "Wilkinson" logo represented by an equilateral triangle point-up, super-imposed with another point-down, forming a six-pointed star, with the letters "H.W." in the center appears on the left side of the forward receiver/frame, at the juncture with the barrel.

Notes

Make

- "Williams & Powell, Liverpool" is marked on the left side of the receiver/frame or on the sides of the barrel.
- Williams & Powell was an English firearms manufacturer located in Liverpool, England from 1833 to 1905.
- "Williams & Powell" was a partnership established by Thomas Williams and Samuel Powell.
- Williams & Powell took over the former business of Jeremiah Patrick.
- Jeremiah Patrick established a gun making business in 1784 at 30 Lombard Street, Liverpool, England.
- Jeremiah Patrick died in 1814 and was succeeded by his son Edward Patrick.
- Edward Patrick was located at 44/45 Strand Street, until his death in 1830.
- Ann Patrick took over the business of Edward Patrick in 1830.
- Anne Patrick was located at 10 Pool Lane, Liverpool in 1832.
- Anne Patrick sold the business to Williams & Powell in 1833.
- Williams & Powell's business was located at the following Liverpool addresses; 10 Pool Lane in 1834; 13 South Castle Street in 1837; 25 South Castle Street from 1841 to 1871; 25 South Castle Street & 48 Oldhall Street in 1891; and 27 South Castle Street from 1896 to 1905.
- "William & Powell" was sold to William Richards in 1905; in spite of being sold, the firm's name was still listed as late as 1909.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- manufactured from 1875 to 1910.
- model designation is not marked on the firearm.
- may also be known as "Third Model Derringer" or "Thuer Model".
- total production is approximately 45,000.
- the "Colt Derringer No 3" can be identified from the Colt Derringer No 1 and No 2 by the way the No 3 is loaded. Instead of the oval barrel rotating downward towards the left side, the round barrel pivots horizontally towards the right side.
- features include: single action spur trigger mechanism, the brass receiver/frame with a bird's-head grip was normally nickel plated, or silver plated, the round barrel was blued, nickel plated or silver plated, the front sight is a fixed half moon blade with a notch on the hammer spur for a rear sight, a case hardened spur hammer and trigger, and walnut, ivory, pearl, rosewood, horn, or ebony grip panels.

Manufacturer

- manufacturer is marked on top of the barrel.
- the manufacturer is normally marked on top of the barrel as, "COLT".
- on approximately the first 2,000 deringers the "COLT" will be marked without an angle. The "COLT" marking was then changed to include an angle towards to the right side.
- on some of the deringers sold through Colt's London Agency, the left side of the barrel may be marked:
"COLT'S FIRE ARMS CO."
"14 PALL MALL LONDON".
- the markings will read from the muzzle towards the breech.
- the Colt rampant colt logo with the letter "C" may also be marked on the receiver/frame of some of the deringers sold through Colt's London Agency.

Action

- horizontal pivoting barrel, single shot firearm.
- derringer is loaded by pivoting the barrel horizontally towards the right.

Serial Number

- serialization started at 1 and continued unbroken to approximately 45,000.
- serial numbers are stamped on the left side of the grip strap, under the grip plate and may be repeated on the bottom of the barrel.

Calibre

- "41 Cal." is usually stamped on the left side of the receiver/frame.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- 'WILLIAMS & POWELL 25 SOUTH CASTLE STREET LIVERPOOL" or "WILLIAMS & POWELL" or "WILLIAMS & POWELL, LIVERPOOL" will be marked on the sides of the receiver/frame and/or the top of the rib between the barrels.

Model

- no model name is marked on this firearm; the model designation is derived from the characteristics of the firearm.
- features include: box lock or side lock action; side by side barrels with folding rear express sight and fixed front sight; front hinged receiver/frame; side, under or top lever opening; exposed hammers or hammerless; double triggers; engraved receiver/frame; checkered forearm and pistol grip stock.

Manufacturer

- Williams & Powell was an English firearms manufacturer located in Liverpool, England from 1833 to 1905.
- "Williams & Powell" was a partnership established by Thomas Williams and Samuel Powell.
- Williams & Powell took over the former business of Jeremiah Patrick.
- Jeremiah Patrick established a gun making business in 1784 at 30 Lombard Street, Liverpool, England.
- Jeremiah Patrick died in 1814 and was succeeded by his son Edward Patrick.
- Edward Patrick was located at 44/45 Strand Street, until his death in 1830.
- Anne Patrick took over the business of Edward Patrick in 1830.
- Anne Patrick was located at 10 Pool Lane, Liverpool in 1832.
- Anne Patrick sold the business to Williams & Powell in 1833.
- Williams & Powell's business was located at the following Liverpool addresses; 10 Pool Lane in 1834; 13 South Castle Street in 1837; 25 South Castle Street from 1841 to 1871; 25 South Castle Street & 48 Oldhall Street in 1891; and 27 South Castle Street from 1896 to 1905.
- "William & Powell" was sold to William Richards in 1905; in spite of being sold, the firm's name was still listed as late as 1909.

Action

- side by side barrel configuration.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the receiver/frame. - observed specimen had four numbers without a letter prefix or suffix.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

195952 - 1	45 PERCUSSION	1	44	Antique CC 84(1) "antique firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "WILLIAMS & POWELL" or "WILLIAMS & POWELL" over "LIVERPOOL" is marked on the left side of the receiver/frame.

Model

- model designation is not marked on the firearm.
- model designation is derived from the method by which this pistol is loaded; loading was accomplished by unscrewing the barrel.
- this is a single shot pistol with a removable barrel and an exposed hammer centrally located on the receiver/frame behind the chamber.
- this handgun is intended to be loaded from the breech end of the barrel and as such was originally supplied with a wrench to unscrew the barrel from the receiver/frame in order that a lead ball and loose powder could be inserted into the chamber end of the barrel and then the barrel screwed back onto the receiver/frame.
- features include: round screw on barrel with a small underlug for a wrench; boxlock type action; external, centrally positioned hammer; folding trigger; may have a sliding-type safety device on the top of the rear tang which engages a notch in the rear of the hammer; curved, flat sided, un-checkered with rounded bottom grip; engraved metal parts; steel in the white barrel with brass finish receiver/frame.

Manufacturer

- Williams & Powell was an English firearms manufacturer located in Liverpool, England from 1833 to 1905.
- "Williams & Powell" was a partnership established by Thomas Williams and Samuel Powell.
- Williams & Powell took over the former business of Jeremiah Patrick.
- Jeremiah Patrick established a gun making business in 1784 at 30 Lombard Street, Liverpool, England.
- Jeremiah Patrick died in 1814 and was succeeded by his son Edward Patrick.
- Edward Patrick was located at 44/45 Strand Street, until his death in 1830.
- Ann Patrick took over the business of Edward Patrick in 1830.
- Anne Patrick was located at 10 Pool Lane, Liverpool in 1832.
- Anne Patrick sold the business to Williams & Powell in 1833.
- Williams & Powell's business was located at the following Liverpool addresses; 10 Pool Lane in 1834; 13 South Castle Street in 1837; 25 South Castle Street from 1841 to 1871; 25 South Castle Street & 48 Oldhall Street in 1891; and 27 South Castle Street from 1896 to 1905.
- "William & Powell" was sold to William Richards in 1905; in spite of being sold, the firm's name was still listed as late as 1909.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action - the barrel unscrews in front of the chamber, so it can be loaded with a ball that fits the barrel more tightly than is possible with a muzzle loader.

FRT Report

Firearm Reference Number (FRN): 125584
Make: Wilson Tactical
Model: WT-15

Summary

Make:	Wilson Tactical
Model:	WT-15
Manufacturer:	Wilson Tactical
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
125584 - 1	5.56MM NATO	5	406	Prohibited PFR, Part 1, para. 87(z.902)	Manufacturer Specifications and Commercial Customization	
125584 - 2	5.56MM NATO	20	406	Prohibited PFR, Part 1, para. 87(z.902)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- Wilson Tactical's "WT" logo and "WILSON TACTICAL" are marked on the left side of the magazine housing of the lower receiver/frame.

Model

- "WT-15" is marked on the left side of the receiver/frame.
- this firearm resembles a Colt AR-15.
- features include: black or olive drab anodized finished upper and lower receiver/frame; "A3" style, flattop upper equipped with a detachable carry handle/rear sight assembly; standard front sight mounted on the gas block assembly; chrome lined barrel with a muzzle compensator; two-piece carbine length handguard; rubberized pistol grip and a six position collapsible buttstock.

Manufacturer

- Wilson Tactical's "WT" logo, "WILSON TACTICAL" and "Berryville, AR" are marked on the left side of the magazine housing of the lower receiver/frame.

Action

- gas operated.

Serial Number

- serial number is marked on the left side of the lower receiver/frame on the magazine well.
- observed serial number had a two letter prefix of "WT" followed by five numbers.

Calibre

- "Cal. 5.56mm" is marked on the side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots
- detachable box magazine.
- this model will accept any M16/AR-15 magazine, as such it may be encountered with a higher or lower capacity magazine.

Remarks
- as a large variety of after-market parts are available for this design external appearance may vary greatly from the original configuration.

Notes

Make

- "ALEX WILSON" and "LONDON" was observed marked on the lock plate.

Model

- model designation is not marked on the firearm.
- manufactured prior to 1830.
- features include: octagonal barrel with blade type front sight; ramrod mounted under the barrel; side lock with exposed percussion hammer on right side; single action trigger mechanism; round trigger guard; one piece full length wood stock with checkered bird's head grip.

Manufacturer

- "ALEX WILSON" and "LONDON" was observed marked on the lock plate.
- Alexander Wilson was a gunmaker located in London, England from 1805 to 1829.
- Alexander Wilson was located at 14 Titchborne Street from 1805 to 1811; 3 Sherrard Street, Golden Square from 1811 to 1825; and 1 Vigo Lane, Piccadilly from 1826 to 1829.
- Alexander Wilson's business was taken over by Joseph Lang in 1829.

Action

- muzzle loader, percussion ignition.

Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	UNITED KINGDOM
Serial Numbering:	
Legal Classification:	Antique

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
128176 - 1	41 FLINTLOCK	1	38	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Alex WILSON" was observed marked on the left side of the receiver/frame.

Model

- manufactured prior to 1830.
- model designation is not marked on the firearm.
- model designation is derived from the method by which this pistol is loaded; loading was accomplished by unscrewing the barrel.
- this is a single shot pistol with a removable barrel and an exposed hammer centrally located on the receiver/frame behind the chamber.
- this handgun is intended to be loaded from the breech end of the barrel and as such was originally supplied with a wrench to unscrew the barrel from the receiver/frame in order that a lead ball and loose powder could be inserted into the chamber end of the barrel and then the barrel screwed back onto the receiver/frame.
- features may include: round barrel with underlug for wrench; boxlock action; exposed centrally positioned ringneck cock; folding trigger; sliding-type safety device on the top of the rear tang which engages a notch in the rear of the cock; and wooden grip.

Manufacturer

- "Alex WILSON" and "No 1 VIGO LANE" was observed marked on the left side of the receiver/frame.
- Alexander Wilson was a gunmaker located in London, England from 1805 to 1829.
- Alexander Wilson was located at 14 Titchborne Street from 1805 to 1811; 3 Sherrard Street, Golden Square from 1811 to 1825; and 1 Vigo Lane, Piccadilly from 1826 to 1829.
- Alexander Wilson's business was taken over by Joseph Lang in 1829.

Action

- the barrel unscrews in front of the chamber, so it can be loaded with a ball that fits the barrel more tightly than is possible with a muzzle loader.
- the turnoff barrel may be rifled.

Other Markings

- British proofmarks are usually apparent on the receiver/frame and/or the barrel.
- engravings that may appear on both sides of receiver/frame depicts a "Trophy of Arms".

Make	- "WINCHESTER" and "TRADE MARK REG. IN U.S. PAT. OFF." is marked on the top of the barrel. - WINCHESTER history began on the 15th of March, 1857, when Oliver F. Winchester and John M. Davies obtained title to the entire assets of the Volcanic Repeating Arms Company of Norwich, Connecticut, U.S.A. - Oliver F. Winchester and John F. Davies founded the "New Haven Arms Company" in New Haven, Connecticut, U.S.A. in April of 1857. - New Haven Arms Company was renamed the Winchester Repeating Arms Company in 1866. - Winchester Repeating Arms Company side by side shotguns were manufactured by W.C. Scott & Sons, C.G. Bonehill, W.C. McEntree, Richard Redmond, and H. & E. Hammond Gun Manufacturing between 1879 and 1885. - Winchester Repeating Arms Company was forced into receivership and was purchase by Western Cartridge Company in December of 1931. - Western Cartridge Company was owned by the Olin family. - WINCHESTER REPEATING ARMS COMPANY / WINCHESTER-WESTERN DIVISION produce firearms as a division of Olin (Olin family / Olin Industries, Incorporated / Olin Mathieson Chemical Industries / Olin Corporation) until 1981. - Winchester's corporation and division name changes between 1931 and 1991 are as follows: - "Winchester Repeating Arms Company" from December 22, 1931 to December 31, 1938. - "Winchester Repeating Arms Company A Division of Western Cartridge Company" from December 31, 1938 to December 30, 1944. - "Winchester Repeating Arms Company A Division of Olin Industries, Incorporated" from December 30, 1944 to January, 1952. - "Winchester-Western Division" of Olin Industries, Incorporated from January 1952 to August 31, 1954. - "Winchester-Western Division" of Olin Mathieson Chemical Corporation from August 31, 1954 to September 1, 1969. - "Winchester-Western Division" of Olin Corporation from August 31, 1954 to July 21, 1981. - Winchester-Western Division also had a manufacturing facility in Cobourg, Ontario, Canada at the former Cooey factory, which was known as Winchester (Canada) Limited. - WINCHESTER-WESTERN sold its firearms division to U.S. Repeating Arms Company in 1981. - WINCHESTER trademark has been licensed by Olin to numerous manufacturers and marketing companies. - WINCHESTER firearms were manufactured by U.S. Repeating Arms Company from 1981 to 2006. - WINCHESTER firearms were manufactured at the Olin-Kodensha facility in Tochigi, Japan until 1989. - WINCHESTER firearms have been manufactured by Miroku Firearms Manufacturing of Japan since 1992. - WINCHESTER over & under shotguns have been manufactured by Fabrique Nationale Herstal (FN) of Belgium since 2004. - WINCHESTER model 70 rifles have been manufactured by Fabrique Nationale Manufacturing Incorporated (FNMI) of Columbia, South Carolina, U.S.A. since 2008. - the Winchester tradename is currently controlled by the Olin Corporation and due to its popularity is licenced for use worldwide by Companhia Brasileira de Cartuchos (CBC), Hatsan Arms, Laurona Armas, Marocchi, Mayer & Grammelspacher Dianawerk, Tulski Oruzheiny Zavod (TOZ), Yildiz, and others.
Model	- "MODEL 03" is marked on the barrel. - this was a redesignation of Winchester's first semi-automatic rifle, the model 1903. - the model 1903 and 03 were manufactured between 1903 and 1931/32. - this is a hammerless, direct blow-back take-down rifle that was cocked by pushing in a rod protruding from the forearm under the barrel; this rifle feeds from a side-loading tube magazine located in the butt-stock - this rifle was offered in a "Standard" and a "Deluxe" grade; the "Standard" had an uncheckered straight-grip walnut stock and forearm, while the "Deluxe" had a checkered pistol-grip stock and forearm
Manufacturer	- "MADE IN U.S.A. WINCHESTER REPEATING ARMS CO." and "NEW HAVEN, CONN. U.S.A. PAT. AUG.27.01. FEB.25.02. FEB.3.17. DEC.22.03" may be marked on the top of the barrel in two lines.
Action	- blowback operated.
Serial Number	- the serial number is located on the lower front of the receiver/frame. - the serial number range for the model 1903 was from 3 to approximately 73,000. - the serial number range for the model 03 was from approximately 73,000 to 126,211, some numbers are skipped or omitted.
Calibre	- this firearm was NOT offered chambered for 22 LR. It is a different rimfire cartridge with shorter case of larger diameter (only loaded with the then new "smokeless powder"), with an internally lubricated 45 grain bullet. - this cartridge was specifically designed to prevent use of the standard 22 LR cartridge of that era (which was loaded with black powder); and which, if used, would foul the semi-automatic mechanism, and result in early failure of the firearm. - few early experimental guns in 22 LR were made for the cartridge department for testing.
Shots	- this model feeds from a tubular magazine mounted in the buttstock.

- "WINCHESTER" is marked on the tang.
- WINCHESTER history began on the 15th of March, 1857, when Oliver F. Winchester and John M. Davies obtained title to the entire assets of the Volcanic Repeating Arms Company of Norwich, Connecticut, U.S.A.
- Oliver F. Winchester and John F. Davies founded the "New Haven Arms Company" in New Haven, Connecticut, U.S.A. in April of 1857.
- New Haven Arms Company was renamed the Winchester Repeating Arms Company in 1866.
- Winchester Repeating Arms Company side by side shotguns were manufactured by W.C. Scott & Sons, C.G. Bonehill, W.C. McEntree, Richard Redmond, and H. & E. Hammond Gun Manufacturing between 1879 and 1885.
- Winchester Repeating Arms Company was forced into receivership and was purchase by Western Cartridge Company in December of 1931.
- Western Cartridge Company was owned by the Olin family.
- WINCHESTER REPEATING ARMS COMPANY / WINCHESTER-WESTERN DIVISION produce firearms as a division of Olin (Olin family / Olin Industries, Incorporated / Olin Mathieson Chemical Industries / Olin Corporation) until 1981.
- Winchester's corporation and division name changes between 1931 and 1991 are as follows:
- "Winchester Repeating Arms Company" from December 22, 1931 to December 31, 1938.
- "Winchester Repeating Arms Company A Division of Western Cartridge Company" from December 31, 1938 to December 30, 1944.
- "Winchester Repeating Arms Company A Division of Olin Industries, Incorporated" from December 30, 1944 to January, 1952.
- "Winchester-Western Division" of Olin Industries, Incorporated from January 1952 to August 31, 1954.
- "Winchester-Western Division" of Olin Mathieson Chemical Corporation from August 31, 1954 to September 1, 1969.
- "Winchester-Western Division" of Olin Corporation from August 31, 1954 to July 21, 1981.
- Winchester-Western Division also had a manufacturing facility in Cobourg, Ontario, Canada at the former Cooey factory, which was known as Winchester (Canada) Limited.
- WINCHESTER-WESTERN sold its firearms division to U.S. Repeating Arms Company in 1981.
- WINCHESTER trademark has been licensed by Olin to numerous manufacturers and marketing companies.
- WINCHESTER firearms were manufactured by U.S. Repeating Arms Company from 1981 to 2006.
- WINCHESTER firearms were manufactured at the Olin-Kodensha facility in Tochigi, Japan until 1989.
- WINCHESTER firearms have been manufactured by Miroku Firearms Manufacturing of Japan since 1992.
- WINCHESTER over & under shotguns have been manufactured by Fabrique Nationale Herstal (FN) of Belgium since 2004.
- WINCHESTER model 70 rifles have been manufactured by Fabrique Nationale Manufacturing Incorporated (FNMI) of Columbia, South Carolina, U.S.A. since 2008.
- the Winchester tradename is currently controlled by the Olin Corporation and due to its popularity is licenced for use worldwide by Companhia Brasileira de Cartuchos (CBC), Hatsan Arms, Laurona Armas, Marocchi, Mayer & Grammelspacher Dianawerk, Tulski Oruzheiny Zavod (TOZ), Yildiz, and others.

Model

- manufactured from 1919 to 1923.
- "MOD. 06" and/or "MODEL 06" is marked on the barrel.
- total production of approximately 70,000 units.
- features include: bead front sight and an adjustable open rear sight and/or tang mounted peep sight; round, rifled barrel; tubular magazine is mounted under the barrel; open top receiver/frame; take-down screw is mounted on the left side of the receiver/frame; exposed spur hammer; walnut contoured slide handle forearm and plain buttstock with shotgun butt plate; nickel or blue finish.

Serial Number

- the serial number is marked on the side or bottom of the lower tang and/or the front underside of the receiver/frame.
- the serial number may or may not have a letter suffix.
- serial number range starts at approximately 550,000.

Calibre

- the calibre designation is marked on the side of the barrel.
- initial production was in 22 SHORT only.
- 22 LR chambering introduced in 1908.

Shots

- the tubular magazine is mounted under the barrel.

Other Markings

- manufacturer's name, model number, place of manufacture, patent information and calibre were marked on the barrel.
- 'Trade Mark', manufacturer's name and patent information is also found on the upper tang.

- the Winchester tradename is currently controlled by the Olin Corporation and due to its popularity is licenced for use worldwide by Companhia Brasileira de Cartuchos (CBC), Hatsan Arms, Laurona Armas, Marocchi, Mayer & Grammelspacher Dianawerk, Tulski Oruzheiny Zavod (TOZ), Yildiz, and others.

Model

- Introduced in 1907.
- "MODEL 07 S.L." is marked on the upper tang of the receiver/frame beginning after serial number 15900.
- Discontinued in 1957-1958.
- manufactured from 1907 to 1957.
- "MODEL 07 S.L." is marked on the upper tang of the receiver/frame.
- "MODEL 07 - .351 CAL." is marked on the barrel.
- "MODEL 07" was originally marked the "MODEL 1907".
- "07" model is take-down design.
- features include: bead front sight and an adjustable open rear sight; round, rifled barrel; solid top, flat sided receiver/frame with right side ejection; wood forearm and semi-pistol grip buttstock; blued finish.
- Features include: various variety of blade front sights (choice of silver, ivory, brass or copper); fixed notched rear sight or "V" notch metal plate fixed with locking screw or open "semi-buckhorn" type of rear sight or in some late version models the top tang was drilled and tapped for scope mounting; two part receiver/frame with right side ejection port; plain American walnut wood shoulder stock and similar, unadorned, plain capped forend (capped with a knurled-edge button/disc or with a finger hook and sling swivel attachment) with molded and engraved black "Vulcanite" butt plate.

Manufacturer

- "Winchester" is marked on the firearm in various places.
- "WINCHESTER" is marked on the top tang of the receiver/frame and on the barrel.

Action

- Blowback operated.

Serial Number

- Known serial number locations are: 1) on the left side of the guard above the trigger, and 2) on the receiver/frame immediately above the number on the guard.
- Serial number production was fairly consistent for this model starting with 1 in 1906. However, the total production numbers per year were not published with any form of accuracy after 1945. Last known and referenced serial number produced was 58500 (or 58486 or 58733) in 1957.

Calibre

- ".351 CAL." is marked on the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- Introduced in 1907 with 5 shot magazine capacity.
- 10 round magazine introduced in 1911.
- detachable box magazine.

Other Markings

- Receiver/frame tang markings appear as four lines in either: - 1) (pre-1909) "Winchester" (over) "Trade Mark" (over) "Reg. in U.S. Pat. Off." (over) "Model 07 S.L." OR - 2) (up to 1913) "Winchester" (over) "Trade Mark" (over) "Made in U.S.A." (over) "Model 07 S.L." OR - 3) (up to 1957-58) "Winchester" (over) "Trade Mark" (over) "Made in U.S.A." (over) "Model 07 S.L.".
- Barrel markings appear in variations, in two or three lines, as follows: 1) Manufactured by the Winchester Repeating Arm Co. (over) New Haven, Conn. U.S.A. Self Loading Model 1907, Pat. Aug. 27 (over) Dec. 10, 1901. Feb. 25, 1902. Feb. 17, Dec. 22, 1903. Aug 21, 1906. Oct. 30, 1906. - followed by a centered "-351 Cal"; which also may be followed by two lines of: "-Nickel Steel Barrel-" (over) "Especially for Smokeless Powder". OR
- 2) "Made in New Haven. Conn. U.S. of America - Winchester - Model 07 - .351 Cal." (over) " - Winchester Proof Steel - Trade Mark - "
- Most "1907" models may contain the patented "Winchester Proof Mark", as described: a long/large letter "P" superposed over of a smallish "W" in a small oval cartouche.

Make

- "WINCHESTER TM USED UNDER LICENCE BY DAISY" is marked on the right side of the mechanism housing.
- these air rifles are imported from Brazil by Daisy, who retails them under the "Winchester" name.
- WINCHESTER history began on the 15th of March, 1857, when Oliver F. Winchester and John M. Davies obtained title to the entire assets of the Volcanic Repeating Arms Company of Norwich, Connecticut, U.S.A.
- Oliver F. Winchester and John F. Davies founded the "New Haven Arms Company" in New Haven, Connecticut, U.S.A. in April of 1857.
- New Haven Arms Company was renamed the Winchester Repeating Arms Company in 1866.
- Winchester Repeating Arms Company side by side shotguns were manufactured by W.C. Scott & Sons, C.G. Bonehill, W.C. McEntree, Richard Redmond, and H. & E. Hammond Gun Manufacturing between 1879 and 1885.
- Winchester Repeating Arms Company was forced into receivership and was purchase by Western Cartridge Company in December of 1931.
- Western Cartridge Company was owned by the Olin family.
- WINCHESTER REPEATING ARMS COMPANY / WINCHESTER-WESTERN DIVISION produce firearms as a division of Olin (Olin family / Olin Industries, Incorporated / Olin Mathieson Chemical Industries / Olin Corporation) until 1981.
- Winchester's corporation and division name changes between 1931 and 1991 are as follows:
- "Winchester Repeating Arms Company" from December 22, 1931 to December 31, 1938.
- "Winchester Repeating Arms Company A Division of Western Cartridge Company" from December 31, 1938 to December 30, 1944.
- "Winchester Repeating Arms Company A Division of Olin Industries, Incorporated" from December 30, 1944 to January, 1952.
- "Winchester-Western Division" of Olin Industries, Incorporated from January 1952 to August 31, 1954.
- "Winchester-Western Division" of Olin Mathieson Chemical Corporation from August 31, 1954 to September 1, 1969.
- "Winchester-Western Division" of Olin Corporation from August 31, 1954 to July 21, 1981.
- Winchester-Western Division also had a manufacturing facility in Cobourg, Ontario, Canada at the former Cooey factory, which was known as Winchester (Canada) Limited.
- WINCHESTER-WESTERN sold its firearms division to U.S. Repeating Arms Company in 1981.
- WINCHESTER trademark has been licensed by Olin to numerous manufacturers and marketing companies.
- WINCHESTER firearms were manufactured by U.S. Repeating Arms Company from 1981 to 2006.
- WINCHESTER firearms were manufactured at the Olin-Kodensha facility in Tochigi, Japan until 1989.
- WINCHESTER firearms have been manufactured by Miroku Firearms Manufacturing of Japan since 1992.
- WINCHESTER over & under shotguns have been manufactured by Fabrique Nationale Herstal (FN) of Belgium since 2004.
- WINCHESTER model 70 rifles have been manufactured by Fabrique Nationale Manufacturing Incorporated (FNMI) of Columbia, South Carolina, U.S.A. since 2008.
- the Winchester tradename is currently controlled by the Olin Corporation and due to its popularity is licenced for use worldwide by Companhia Brasileira de Cartuchos (CBC), Hatsan Arms, Laurona Armas, Marocchi, Mayer & Grammelspacher Dianawerk, Tulski Oruzheiny Zavod (TOZ), Yildiz, and others.

Model

- "WINCHESTER (Winchester Logo) MODEL 1000X" is marked on the left side of the barrel block.
- introduced in 2001.
- this is a standard-pattern break-barrel spring-piston air rifle sold under the "Winchester" brand name.
- features include: walnut Monte Carlo pistol-grip stock with horizontal forearm grooves, blued barrel and compression chamber, open adjustable sights and an automatic thumb safety at the rear of the compression chamber.
- also available with a 3-9x32 scope.

Manufacturer

- "CBC", "Made in Brazil", "Made in Brazil by CBC", "Made in Brazil" and "By Companhia Brasileira de Cartuchos" or "Made in Brazil", "By Companhia Brasileira de Cartuchos" and "S.Andre-Est. S.Paulo" may be marked on the receiver/frame or barrel.
- "CBC" is the acronym for Companhia Brasileira de Cartuchos.
- Companhia Brasileira de Cartuchos (CBC) is a Brazilian company that primarily produces ammunition but they also manufacture airguns, revolvers, break open shotguns and double rifles under their own name and contracted "house brand" firearms.

Action

- spring-piston air rifle.
- discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- the serial number consists of nine digits and is marked on the left side of the barrel block.

Calibre

- marked on the left side of the barrel block as ".177 PELLET / 4.5 MM."

Make

- "WINCHESTER" is marked on the barrel assembly.
- WINCHESTER history began on the 15th of March, 1857, when Oliver F. Winchester and John M. Davies obtained title to the entire assets of the Volcanic Repeating Arms Company of Norwich, Connecticut, U.S.A.
- Oliver F. Winchester and John F. Davies founded the "New Haven Arms Company" in New Haven, Connecticut, U.S.A. in April of 1857.
- New Haven Arms Company was renamed the Winchester Repeating Arms Company in 1866.
- Winchester Repeating Arms Company side by side shotguns were manufactured by W.C. Scott & Sons, C.G. Bonehill, W.C. McEntree, Richard Redmond, and H. & E. Hammond Gun Manufacturing between 1879 and 1885.
- Winchester Repeating Arms Company was forced into receivership and was purchase by Western Cartridge Company in December of 1931.
- Western Cartridge Company was owned by the Olin family.
- WINCHESTER REPEATING ARMS COMPANY / WINCHESTER-WESTERN DIVISION produce firearms as a division of Olin (Olin family / Olin Industries, Incorporated / Olin Mathieson Chemical Industries / Olin Corporation) until 1981.
- Winchester's corporation and division name changes between 1931 and 1991 are as follows:
- "Winchester Repeating Arms Company" from December 22, 1931 to December 31, 1938.
- "Winchester Repeating Arms Company A Division of Western Cartridge Company" from December 31, 1938 to December 30, 1944.
- "Winchester Repeating Arms Company A Division of Olin Industries, Incorporated" from December 30, 1944 to January, 1952.
- "Winchester-Western Division" of Olin Industries, Incorporated from January 1952 to August 31, 1954.
- "Winchester-Western Division" of Olin Mathieson Chemical Corporation from August 31, 1954 to September 1, 1969.
- "Winchester-Western Division" of Olin Corporation from August 31, 1954 to July 21, 1981.
- Winchester-Western Division also had a manufacturing facility in Cobourg, Ontario, Canada at the former Cooey factory, which was known as Winchester (Canada) Limited.
- WINCHESTER-WESTERN sold its firearms division to U.S. Repeating Arms Company in 1981.
- WINCHESTER trademark has been licensed by Olin to numerous manufacturers and marketing companies.
- WINCHESTER firearms were manufactured by U.S. Repeating Arms Company from 1981 to 2006.
- WINCHESTER firearms were manufactured at the Olin-Kodensha facility in Tochigi, Japan until 1989.
- WINCHESTER firearms have been manufactured by Miroku Firearms Manufacturing of Japan since 1992.
- WINCHESTER over & under shotguns have been manufactured by Fabrique Nationale Herstal (FN) of Belgium since 2004.
- WINCHESTER model 70 rifles have been manufactured by Fabrique Nationale Manufacturing Incorporated (FNMI) of Columbia, South Carolina, U.S.A. since 2008.
- the Winchester tradename is currently controlled by the Olin Corporation and due to its popularity is licenced for use worldwide by Companhia Brasileira de Cartuchos (CBC), Hatsan Arms, Laurona Armas, Marocchi, Mayer & Grammelspacher Dianawerk, Tulski Oruzheiny Zavod (TOZ), Yildiz, and others.

Model

- "MODEL 101" is marked on the barrel assembly.
- manufactured from 1963 to 1987 and reintroduced in 2008.
- this is a generic model "101". Other model "101" entries exist which might better describe the firearm.
- features include: over and under double barrel shotgun; hammerless, boxlock mechanism with ventilated rib; automatic ejectors and single selective trigger; scroll engraved receiver/frame; checkered walnut stock with a pistol grip; Winchoke system added in 1981.

Manufacturer

- manufacturer's name does not appear on the firearm.
- "Made in Japan" may be marked on the barrel assembly.

Action

- over & under barrel configuration.
- front hinged, tip-down, top-break action with top locking lever.

Serial Number

- alpha/numeric serial number is marked on the upper tang.

Calibre

- calibre designation is marked on the left side of the firearm.

- WINCHESTER trademark has been licensed by Olin to numerous manufacturers and marketing companies.
- WINCHESTER firearms were manufactured by U.S. Repeating Arms Company from 1981 to 2006.
- WINCHESTER firearms were manufactured at the Olin-Kodensha facility in Tochigi, Japan until 1989.
- WINCHESTER firearms have been manufactured by Miroku Firearms Manufacturing of Japan since 1992.
- WINCHESTER over & under shotguns have been manufactured by Fabrique Nationale Herstal (FN) of Belgium since 2004.
- WINCHESTER model 70 rifles have been manufactured by Fabrique Nationale Manufacturing Incorporated (FNMI) of Columbia, South Carolina, U.S.A. since 2008.
- the Winchester tradename is currently controlled by the Olin Corporation and due to its popularity is licenced for use worldwide by Companhia Brasileira de Cartuchos (CBC), Hatsan Arms, Laurona Armas, Marocchi, Mayer & Grammelspacher Dianawerk, Tulski Oruzheiny Zavod (TOZ), Yildiz, and others.

Model

- the model 101 was manufactured from 1963 to 1978.
- the model 101XTR was manufactured from 1978 to 1987.
- "XTR" in Winchester's model designations was first used in 1978 to indicate an upgraded model.
- "XTR" in Winchester's model designations was dropped in 1989.
- this is a generic entry for the Model 101XTR. Other FRT entries exist that may more accurately identify the firearm.

Remarks

- this firearm is an over / under, double barrel, hammerless shotgun.
- this firearm has a ventilated rib, extractors / automatic ejectors, and a single selective trigger.
- there exists a possibility that all 101 XTR shotguns are Pigeon Grade. All Pigeon Grade model 101 shotguns (at the approximate time of the US Repeating Arms take-over) later became 101 XTR Pigeon Grade. However, no reference can be found to substantiate this conjecture. For this reason the 101 XTR and the 101 Pigeon Grade are recognized as two different models.

Model

- model designation found on upper tang: "MOD. 11 S.L."
- the 11 SL (Self Loading) was manufactured from 1914 to 1928.
- model designation was changed in 1914 from the "MOD. 1911 S.L." to "MOD. 11 S.L.", after serial number 52,000.
- total production for the "1911 SL" and "11 SL" from 1911 to 1925 was 83,000.
- barrel, receiver, magazine tube and all working parts are made of nickel steel.
- manufactured in several grades.
- to load the shotgun from the magazine, the barrel is forced to the rear by grasping the knurled area on the barrel. This rearward motion opens the breech bolt, ejects, loads and cocks the gun.

Manufacturer

- "WINCHESTER" is marked on the upper tang and on the barrel.

Action

- recoil operated.

Serial Number

- serial number found on underside of the receiver.
- serial numbers range for the "1911 SL" is from 1 to 52,000.
- serial numbers range for the "11 SL" is from 52,001 to 103,246.
- serial numbers after 4,300 were accompanied by the letter "A", this letter is not to be used in the serial number.
- the letter "A" denote a modification or change to the action.

Calibre

- calibre marked on the barrel: "12 GA."

Shots

- tubular magazine located under the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- Markings may be as follows:
BARREL: two line:
top line: "MANUFACTURED BY WINCHESTER REPEATING ARMS CO. NEW HAVEN. CONNECTICUT. U.S.A. PAT. AUG. 27. 1901. FEB. 25"
bottom line: "NICKEL STEEL" "NOV. 4. 1902. FEB. 17. DEC. 29. 1903. APRIL. 26. AUG. 30. 1904. MARCH 27. NOV. 13. 1906. NOV. 23. 1909. JAN. 4. 11. 1910. JULY 18. 1911. MAY. 7. JUNE 4. 1919." "12 GA".
UPPER TANG:
Two lines:
first line: "WINCHESTER TRADE MARK MOD. 11 S.L."
second line: "REG. U.S.A. & FGN",
or
Three lines:
first line "TRADE MARK",
second line: "WINCHESTER MOD. 11 S.L.",
third line: "REG. U.S.A. & FGN".

Remarks

- Self-loading repeating shotgun, recoil operated, hammerless, five cartridge tubular, take-down. Three piece laminated birch or birch/elm or walnut stock, pistol grip was optional, rubber butt plate (steel butt plates also furnished). A knurled cocking band around the barrel, approximately 97mm wide, is found approximately 480mm from the breech end of the barrel. Matted barrels were available.
The 1911 SL was available in several grades:
Plain/Basic Grade: uncheckered laminated birch stock and forend.
Fancy Finish: checkered walnut stock and forend.
Pigeon Grade: matted barrel, checkered fancy walnut straight grip stock and forend (pistol grip was optional) and elaborate engraving.
Trap Grade: matte barrel, checkered fancy walnut straight grip stock and forend (pistol grip was optional).

Make	- "WINCHESTER" is marked on the barrel. - WINCHESTER history began on the 15th of March, 1857, when Oliver F. Winchester and John M. Davies obtained title to the entire assets of the Volcanic Repeating Arms Company of Norwich, Connecticut, U.S.A. - Oliver F. Winchester and John F. Davies founded the "New Haven Arms Company" in New Haven, Connecticut, U.S.A. in April of 1857. - New Haven Arms Company was renamed the Winchester Repeating Arms Company in 1866. - Winchester Repeating Arms Company side by side shotguns were manufactured by W.C. Scott & Sons, C.G. Bonehill, W.C. McEntree, Richard Redmond, and H. & E. Hammond Gun Manufacturing between 1879 and 1885. - Winchester Repeating Arms Company was forced into receivership and was purchase by Western Cartridge Company in December of 1931. - Western Cartridge Company was owned by the Olin family. - WINCHESTER REPEATING ARMS COMPANY / WINCHESTER-WESTERN DIVISION produce firearms as a division of Olin (Olin family / Olin Industries, Incorporated / Olin Mathieson Chemical Industries / Olin Corporation) until 1981. - Winchester's corporation and division name changes between 1931 and 1991 are as follows: - "Winchester Repeating Arms Company" from December 22, 1931 to December 31, 1938. - "Winchester Repeating Arms Company A Division of Western Cartridge Company" from December 31, 1938 to December 30, 1944. - "Winchester Repeating Arms Company A Division of Olin Industries, Incorporated" from December 30, 1944 to January, 1952. - "Winchester-Western Division" of Olin Industries, Incorporated from January 1952 to August 31, 1954. - "Winchester-Western Division" of Olin Mathieson Chemical Corporation from August 31, 1954 to September 1, 1969. - "Winchester-Western Division" of Olin Corporation from August 31, 1954 to July 21, 1981. - Winchester-Western Division also had a manufacturing facility in Cobourg, Ontario, Canada at the former Cooey factory, which was known as Winchester (Canada) Limited. - WINCHESTER-WESTERN sold its firearms division to U.S. Repeating Arms Company in 1981. - WINCHESTER trademark has been licensed by Olin to numerous manufacturers and marketing companies. - WINCHESTER firearms were manufactured by U.S. Repeating Arms Company from 1981 to 2006. - WINCHESTER firearms were manufactured at the Olin-Kodensha facility in Tochigi, Japan until 1989. - WINCHESTER firearms have been manufactured by Miroku Firearms Manufacturing of Japan since 1992. - WINCHESTER over & under shotguns have been manufactured by Fabrique Nationale Herstal (FN) of Belgium since 2004. - WINCHESTER model 70 rifles have been manufactured by Fabrique Nationale Manufacturing Incorporated (FNMI) of Columbia, South Carolina, U.S.A. since 2008. - the Winchester tradename is currently controlled by the Olin Corporation and due to its popularity is licenced for use worldwide by Companhia Brasileira de Cartuchos (CBC), Hatsan Arms, Laurona Armas, Marocchi, Mayer & Grammelspacher Dianawerk, Tulski Oruzheiny Zavod (TOZ), Yildiz, and others.
Model	- "MODEL 12", "MODEL - 12", "MODEL 12-2 3/4" "MODEL 12-12 GA. 2 3/4 CHAMB.", "MODEL 12 GA. 2 3/4 CHAM." or a variant is marked on the barrel. - introduced in 1912 as the model "1912", became the model "12" circa 1920. - production of the model "12" ceased in 1980. - features include: tapered plain or matted barrel with or without a solid matted raised rib or a ventilated rib and bead front sight; solid top receiver/frame with side ejection and bottom loading port; tubular magazine; hammerless; takedown; cross bolt safety located on the trigger guard; single action bar; action release on the rear of the receiver/frame; wood checkered or grooved forearm and straight or pistol grip stock. NOTE: main difference between the model 12 and the model 12 Featherweight is: - the model 12 when taken down is broken into two almost equal parts, one part consisting of the barrel, magazine and forearm/slide assembly and the other part consisting of the receiver/frame and buttstock. - the model 12 Featherweight when broken down, the barrel is removed and the magazine and forearm/slide assembly remain attached to the receiver/frame.
Manufacturer	- manufacturer's name is marked on the barrel.
Serial Number	- serial number is located on the underside of the receiver/frame. - serial numbers fall between 172000 and 2027250 (circa 1920 to 1980). - from 1959 to 1962 an "F" suffix denoted the model 12 Featherweight. - in 1972 a "Y" prefix was added with number 2000100.
Calibre	- gauge, chamber length and choke may be marked on the barrel. - many of the 20 GA X 2 1/2" and 16 GA X 2 9/16" chambered shotguns were later re-chambered by Winchester and non-factory gunsmiths, for the standard length 20 and 16 gauge cartridges.
Shots	- tubular magazine mounted under the barrel. - may have a factory installed removeable plug which limits the magazine capacity to two (2) cartridges to conform to hunting regulations.

- "Winchester Repeating Arms Company A Division of Western Cartridge Company" from December 31, 1938 to December 30, 1944.
- "Winchester Repeating Arms Company A Division of Olin Industries, Incorporated" from December 30, 1944 to January, 1952.
- "Winchester-Western Division" of Olin Industries, Incorporated from January 1952 to August 31, 1954.
- "Winchester-Western Division" of Olin Mathieson Chemical Corporation from August 31, 1954 to September 1, 1969.
- "Winchester-Western Division" of Olin Corporation from August 31, 1954 to July 21, 1981.
- Winchester-Western Division also had a manufacturing facility in Cobourg, Ontario, Canada at the former Cooey factory, which was known as Winchester (Canada) Limited.
- WINCHESTER-WESTERN sold its firearms division to U.S. Repeating Arms Company in 1981.
- WINCHESTER trademark has been licensed by Olin to numerous manufacturers and marketing companies.
- WINCHESTER firearms were manufactured by U.S. Repeating Arms Company from 1981 to 2006.
- WINCHESTER firearms were manufactured at the Olin-Kodensha facility in Tochigi, Japan until 1989.
- WINCHESTER firearms have been manufactured by Miroku Firearms Manufacturing of Japan since 1992.
- WINCHESTER over & under shotguns have been manufactured by Fabrique Nationale Herstal (FN) of Belgium since 2004.
- WINCHESTER model 70 rifles have been manufactured by Fabrique Nationale Manufacturing Incorporated (FNMI) of Columbia, South Carolina, U.S.A. since 2008.
- the Winchester tradename is currently controlled by the Olin Corporation and due to its popularity is licenced for use worldwide by Companhia Brasileira de Cartuchos (CBC), Hatsan Arms, Laurona Armas, Marocchi, Mayer & Grammelspacher Dianawerk, Tulski Oruzheiny Zavod (TOZ), Yildiz, and others.

Model

- "MODEL 12" is marked on the barrel and the letter "F" is marked after the serial number.
- the model "12 Featherweight" was manufactured from 1959 to 1962.
- features include: interchangeable tapered plain barrel with a bead front sight; solid top receiver/frame with side ejection and bottom loading port; tubular magazine; hammerless; takedown; cross bolt safety located on the trigger guard; single action bar; action release on the rear of the receiver/frame; wood grooved forearm and pistol grip stock.
- main difference between the model 12 and the model 12 Featherweight is:
- the model 12 when taken down is broken into two almost equal parts, one part consisting of the barrel, magazine and forearm/slide assembly and the other part consisting of the receiver/frame and buttstock.
- the model 12 Featherweight when broken down, the barrel is removed and the magazine and forearm/slide assembly remain attached to the receiver/frame.

Manufacturer

- manufacturer's name is marked on the barrel.

Serial Number

- serial number is marked on the bottom front of the receiver/frame and magazine extension.
- serial number range is from 1637000F to 1928018F.

Shots

- tubular magazine mounted under the barrel.
- may have a factory installed removeable plug which limits the magazine capacity to two (2) cartridges to conform to hunting regulations.

Notes

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Make	- "Winchester" trade name is marked on the barrel. - WINCHESTER history began on the 15th of March, 1857, when Oliver F. Winchester and John M. Davies obtained title to the entire assets of the Volcanic Repeating Arms Company of Norwich, Connecticut, U.S.A. - Oliver F. Winchester and John F. Davies founded the "New Haven Arms Company" in New Haven, Connecticut, U.S.A. in April of 1857. - New Haven Arms Company was renamed the Winchester Repeating Arms Company in 1866. - Winchester Repeating Arms Company side by side shotguns were manufactured by W.C. Scott & Sons, C.G. Bonehill, W.C. McEntree, Richard Redmond, and H. & E. Hammond Gun Manufacturing between 1879 and 1885. - Winchester Repeating Arms Company was forced into receivership and was purchase by Western Cartridge Company in December of 1931. - Western Cartridge Company was owned by the Olin family. - WINCHESTER REPEATING ARMS COMPANY / WINCHESTER-WESTERN DIVISION produce firearms as a division of Olin (Olin family / Olin Industries, Incorporated / Olin Mathieson Chemical Industries / Olin Corporation) until 1981. - Winchester's corporation and division name changes between 1931 and 1991 are as follows: - "Winchester Repeating Arms Company" from December 22, 1931 to December 31, 1938. - "Winchester Repeating Arms Company A Division of Western Cartridge Company" from December 31, 1938 to December 30, 1944. - "Winchester Repeating Arms Company A Division of Olin Industries, Incorporated" from December 30, 1944 to January, 1952. - "Winchester-Western Division" of Olin Industries, Incorporated from January 1952 to August 31, 1954. - "Winchester-Western Division" of Olin Mathieson Chemical Corporation from August 31, 1954 to September 1, 1969. - "Winchester-Western Division" of Olin Corporation from August 31, 1954 to July 21, 1981. - Winchester-Western Division also had a manufacturing facility in Cobourg, Ontario, Canada at the former Cooey factory, which was known as Winchester (Canada) Limited. - WINCHESTER-WESTERN sold its firearms division to U.S. Repeating Arms Company in 1981. - WINCHESTER trademark has been licensed by Olin to numerous manufacturers and marketing companies. - WINCHESTER firearms were manufactured by U.S. Repeating Arms Company from 1981 to 2006. - WINCHESTER firearms were manufactured at the Olin-Kodensha facility in Tochigi, Japan until 1989. - WINCHESTER firearms have been manufactured by Miroku Firearms Manufacturing of Japan since 1992. - WINCHESTER over & under shotguns have been manufactured by Fabrique Nationale Herstal (FN) of Belgium since 2004. - WINCHESTER model 70 rifles have been manufactured by Fabrique Nationale Manufacturing Incorporated (FNMI) of Columbia, South Carolina, U.S.A. since 2008. - the Winchester tradename is currently controlled by the Olin Corporation and due to its popularity is licenced for use worldwide by Companhia Brasileira de Cartuchos (CBC), Hatsan Arms, Laurona Armas, Marocchi, Mayer & Grammelspacher Dianawerk, Tulski Oruzheiny Zavod (TOZ), Yildiz, and others.
Model	- the full model designation is not marked on the firearm. - "Model 12" is marked on the barrel, just forward of the receiver/frame. - the U.S.A. military designation for the model "12 Trench Gun" was "Winchester, Shotgun, 12 gauge, Model 12, Riot Type, with Bayonet Attachment and Metal Handguard". - features include: short round barrel; ventilated handguard with an integral bayonet lug and sling swivel; solid top receiver/frame with right side ejection port and bottom loading port; hammerless; tubular magazine; brass bead sight; parkerized or blued metalwork; walnut forend and pistol grip buttstock with sling swivel. - if the ventilated handguard is removed there will be three grooves milled in the barrel crosswise near the muzzle. - Winchester also produced a similar firearm known as the "Model 12 Riot Gun", which has no ventilated hand guard or bayonet lug.
Manufacturer	- "Winchester Repeating Arms Co." is marked on the left side of the barrel.
Action	- manually operated slide action.
Serial Number	- serial number is marked on the underside of the receiver/frame and repeated on the receiver extension. - serial number range is from 10900 to 185000 and 912000 to 1035000.
Calibre	- calibre designation is marked on the barrel.
Shots	- tubular magazine mounted under the barrel.
Other Markings	- as this model was adopted by the U S military, acceptance marks, property markings and proof marks may also appear on the firearm.

Make

- "WINCHESTER" is marked on the barrel.
- WINCHESTER history began on the 15th of March, 1857, when Oliver F. Winchester and John M. Davies obtained title to the entire assets of the Volcanic Repeating Arms Company of Norwich, Connecticut, U.S.A.
- Oliver F. Winchester and John F. Davies founded the "New Haven Arms Company" in New Haven, Connecticut, U.S.A. in April of 1857.
- New Haven Arms Company was renamed the Winchester Repeating Arms Company in 1866.
- Winchester Repeating Arms Company side by side shotguns were manufactured by W.C. Scott & Sons, C.G. Bonehill, W.C. McEntree, Richard Redmond, and H. & E. Hammond Gun Manufacturing between 1879 and 1885.
- Winchester Repeating Arms Company was forced into receivership and was purchase by Western Cartridge Company in December of 1931.
- Western Cartridge Company was owned by the Olin family.
- WINCHESTER REPEATING ARMS COMPANY / WINCHESTER-WESTERN DIVISION produce firearms as a division of Olin (Olin family / Olin Industries, Incorporated / Olin Mathieson Chemical Industries / Olin Corporation) until 1981.
- Winchester's corporation and division name changes between 1931 and 1991 are as follows:
- "Winchester Repeating Arms Company" from December 22, 1931 to December 31, 1938.
- "Winchester Repeating Arms Company A Division of Western Cartridge Company" from December 31, 1938 to December 30, 1944.
- "Winchester Repeating Arms Company A Division of Olin Industries, Incorporated" from December 30, 1944 to January, 1952.
- "Winchester-Western Division" of Olin Industries, Incorporated from January 1952 to August 31, 1954.
- "Winchester-Western Division" of Olin Mathieson Chemical Corporation from August 31, 1954 to September 1, 1969.
- "Winchester-Western Division" of Olin Corporation from August 31, 1954 to July 21, 1981.
- Winchester-Western Division also had a manufacturing facility in Cobourg, Ontario, Canada at the former Cooey factory, which was known as Winchester (Canada) Limited.
- WINCHESTER-WESTERN sold its firearms division to U.S. Repeating Arms Company in 1981.
- WINCHESTER trademark has been licensed by Olin to numerous manufacturers and marketing companies.
- WINCHESTER firearms were manufactured by U.S. Repeating Arms Company from 1981 to 2006.
- WINCHESTER firearms were manufactured at the Olin-Kodensha facility in Tochigi, Japan until 1989.
- WINCHESTER firearms have been manufactured by Miroku Firearms Manufacturing of Japan since 1992.
- WINCHESTER over & under shotguns have been manufactured by Fabrique Nationale Herstal (FN) of Belgium since 2004.
- WINCHESTER model 70 rifles have been manufactured by Fabrique Nationale Manufacturing Incorporated (FNMI) of Columbia, South Carolina, U.S.A. since 2008.
- the Winchester tradename is currently controlled by the Olin Corporation and due to its popularity is licenced for use worldwide by Companhia Brasileira de Cartuchos (CBC), Hatsan Arms, Laurona Armas, Marocchi, Mayer & Grammelspacher Dianawerk, Tulski Oruzheiny Zavod (TOZ), Yildiz, and others.

Model

- introduced in 1982.
- "WINCHESTER MODEL 1200 DEFENDER" is marked on the left side of the barrel.
- "1200 Defender" is a pump shotgun with a plain cylinder bore barrel and a full length tubular magazine, which allows a magazine capacity of six 12 GA X 3" shells or seven 12 GA X 2 3/4" shells.
- features include: round, smoothbore barrel with a bead front sight; solid top steel receiver/frame with right side ejection and bottom loading ports; dual action bars; cross bolt safety is located on the front of the trigger guard; action release is located on the rear left side of the trigger guard; wood ribbed forearm and pistol grip buttstock with a recoil pad.

Serial Number

- serial number is marked on left side of the receiver/frame, above the trigger or under the receiver/frame, ahead of the loading gate.
- observed serial number consisted of a letter "L" prefix and seven numbers.
- serial number will have a letter "L" prefix for Winchester Model 1200's
- serial number will have a two letter "LX" prefix for Winchester Model 1300's.

Calibre

- calibre is marked on the barrel.

Shots

- tubular magazine is mounted under the barrel.

Other Markings

- "WINCHESTER MODEL 1200 DEFENDER 12 GA. 2 3/4" & 3"" over "MADE IN NEW HAVEN, CONN. U.S.A. WINCHESTER PROOF STEEL" is usually marked on the left side of the barrel.

Notes

Make

- "WINCHESTER" is marked on the barrel.
- WINCHESTER history began on the 15th of March, 1857, when Oliver F. Winchester and John M. Davies obtained title to the entire assets of the Volcanic Repeating Arms Company of Norwich, Connecticut, U.S.A.
- Oliver F. Winchester and John F. Davies founded the "New Haven Arms Company" in New Haven, Connecticut, U.S.A. in April of 1857.
- New Haven Arms Company was renamed the Winchester Repeating Arms Company in 1866.
- Winchester Repeating Arms Company side by side shotguns were manufactured by W.C. Scott & Sons, C.G. Bonehill, W.C. McEntree, Richard Redmond, and H. & E. Hammond Gun Manufacturing between 1879 and 1885.
- Winchester Repeating Arms Company was forced into receivership and was purchase by Western Cartridge Company in December of 1931.
- Western Cartridge Company was owned by the Olin family.
- WINCHESTER REPEATING ARMS COMPANY / WINCHESTER-WESTERN DIVISION produce firearms as a division of Olin (Olin family / Olin Industries, Incorporated / Olin Mathieson Chemical Industries / Olin Corporation) until 1981.
- Winchester's corporation and division name changes between 1931 and 1991 are as follows:
- "Winchester Repeating Arms Company" from December 22, 1931 to December 31, 1938.
- "Winchester Repeating Arms Company A Division of Western Cartridge Company" from December 31, 1938 to December 30, 1944.
- "Winchester Repeating Arms Company A Division of Olin Industries, Incorporated" from December 30, 1944 to January, 1952.
- "Winchester-Western Division" of Olin Industries, Incorporated from January 1952 to August 31, 1954.
- "Winchester-Western Division" of Olin Mathieson Chemical Corporation from August 31, 1954 to September 1, 1969.
- "Winchester-Western Division" of Olin Corporation from August 31, 1954 to July 21, 1981.
- Winchester-Western Division also had a manufacturing facility in Cobourg, Ontario, Canada at the former Cooey factory, which was known as Winchester (Canada) Limited.
- WINCHESTER-WESTERN sold its firearms division to U.S. Repeating Arms Company in 1981.
- WINCHESTER trademark has been licensed by Olin to numerous manufacturers and marketing companies.
- WINCHESTER firearms were manufactured by U.S. Repeating Arms Company from 1981 to 2006.
- WINCHESTER firearms were manufactured at the Olin-Kodensha facility in Tochigi, Japan until 1989.
- WINCHESTER firearms have been manufactured by Miroku Firearms Manufacturing of Japan since 1992.
- WINCHESTER over & under shotguns have been manufactured by Fabrique Nationale Herstal (FN) of Belgium since 2004.
- WINCHESTER model 70 rifles have been manufactured by Fabrique Nationale Manufacturing Incorporated (FNMI) of Columbia, South Carolina, U.S.A. since 2008.
- the Winchester tradename is currently controlled by the Olin Corporation and due to its popularity is licenced for use worldwide by Companhia Brasileira de Cartuchos (CBC), Hatsan Arms, Laurona Armas, Marocchi, Mayer & Grammelspacher Dianawerk, Tulski Oruzheiny Zavod (TOZ), Yildiz, and others.

Model

- "WINCHESTER MODEL 1300" is marked on the barrel.
- Winchester model 1300 series was introduced in 1978.
- "SPEED PUMP" was marked on the side of the receiver/frame of the model 1300 beginning in 2003.
- features include: blued, matte or camouflage finish; bead or rifle-type sights; plain or ventilated rib barrel; interchangeable choke tubes; crossbolt safety mounted at front of trigger guard; alloy receiver/frame; wood or synthetic stock.

Manufacturer

- the manufacturer's name may be marked on the butt-plate or recoil pad.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- observed serial number consisted of a letter "L" prefix and seven numbers.

Calibre

- the gauge is marked on the barrel.
