Firearm Reference Number (FRN): 124061
Make: Tesro
Model: TS22

Summary

Make:	Tesro
Model:	TS22
Manufacturer:	Tesro
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	GERMANY
Serial Numbering:	
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
124061 - 1	22 LR	5	113	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
124061 - 2	32 S&W LONG	5	113	Prohibited CC 84(1) "prohibited firearm" para. (a)(ii)	Manufacturer Specifications and Commercial Customization	Conversion Unit

Notes

Make

- "TESRO" is marked on the side of the firearm.

Model

- "TS22" is a competition/sporting pistol.
- features include: modular construction; aluminum components; magazine mounted in front of the trigger; adjustable match trigger, sights, and walnut/laminated wood grips.
- overall length is 298 mm.
- also available with a conversion/exchange kit which consists of a complete breech, barrel, barrel support, closing springs and appropriate magazine.

Manufacturer

- "TESRO Sportswaffen GmbH & Co. KG" was located in Bachingen, Germany in circa 2008.
- "TESRO Sportswaffen GmbH & Co. KG" was located in Niederstotzingen, Germany prior to 2008.

Action

- blowback operated.

Shots

- detachable box magazine located in front of the trigger guard.

FRT Report

Firearm Reference Number (FRN): 118145
Make: Tetra Industries
Model: Line Thrower MARK 3

Summary

Make:	Tetra Industries
Model:	Line Thrower MARK 3
Manufacturer:	Tetra Industries
Level:	Manufacturer Specifications and Commercial Customization
Type:	Other
Action:	Single-Shot
Country of Manufacturer:	AUSTRALIA
Serial Numbering:	See Note
Legal Classification:	CC 2 "firearm"/CC 84(3) Exempted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
118145 - 1	308 WIN	1	0	CC 2 "firearm"/CC 84(3) Exempted CC 84(3) (c)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- on the specimen examined the MAKE was found only as a component of the serial number on the bottom of the manifold.

Model

- the entire device is designed to be as weather-proof as possible, the metal portion being fabricated from stainless steel and having a synthetic butt-stock.
- this is a single-shot device having no internal or external magazine.
- the baseline for this design and the engineering start-point is a Savage model 110C centre-fire rifle receiver/frame which is permanently modified by the addition of a manifold and firing spigot which reduces the inside diameter of the former barrel attachment point. The firing spigot and manifold are permanently attached to the receiver/frame. The firing gasses are directed through a manifold which has two 90 degree turns to put the centre of the chamber in the firing spigot approximately 30mm higher than the axis of the chamber. The chamber is not long enough to permit a normal 308 WIN calibre ball cartridge to be chambered.
- this firearm has no barrel, it has a hollow spigot approximately 30 mm off the centre-line of the chamber and the spigot is closed at the muzzle end.
- firing cycle: upon firing a blank propelling cartridge, the gas produced is directed 90 degrees upward and then 90 degrees forward through the manifold, then the gasses travel through the hollow spigot and are bled to the exterior to propell a cylindrical carrier to which a line may be attached.

Manufacturer

- manufacturer's name may not be found marked on the device except as noted in the serial number notes.

Type

- line throwing device - "DEEMED NON-FIREARM".

Action

- manually manipulated, bolt operated, single-shot device.

Serial Number

- serial number rationalization unknown.
- specimen observed had a serial number located on the under-side of the manifold.
- specimen serial number observed consisted of the five letter prefix "TETRA" followed by 4 digits.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - this device uses a 308 WIN calibre blank cartridge, the chamber is not long enough to permit a normal 308 WIN calibre ball cartridge to be chambered.

Notes

Make - "Theoben" is usually marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "Rapid MK I" is marked on the receiver/frame. - this is a modern high-power gas-ram air rifle; using a cylinder of compressed gas for power instead of a spring, built for target shooters and small-game/varmint hunters. - features include: bolt action pre-charged pneumatic; two-stage match trigger; manual safety; walnut checkered pistol grip stock with high comb and ventilated recoil pad; receiver/frame grooved for scope mounting. - this model is available with a sound suppressor/silencer or with a barrel weight. - overall length with 406 mm barrel is 1000 mm (39.4"), average weight is 3.2 kg (6.9 lbs).
Manufacturer	- the manufacturer's name is usually marked on the receiver/frame and/or barrel. - Theoben Engineering is a manufacturer based in England that specializes in manufacturing pre-charged pneumatic and gas/spring power air rifles for field and competition use.
Action	- bolt operated, pre-charged pneumatic. - in calibre 177 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. - in calibre 20 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. - in calibre 22 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. - in calibre 25 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
Calibre	- the calibre designation is usually marked on the barrel.
Shots	- this model uses a rotary magazine, capacity is dependant on calibre.
Canadian Law Comments	- this model is available with a sound suppressor/silencer or with a barrel weight. - in Canada, the sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada. - when the sound suppressor/silencer (prohibited device) is removed from the barrel the firearm may correctly be identified as a "Non Restricted Firearm".

Notes

Make

- the make designation "THEOBEN" is marked on the firearm.

Model

- "Rapid MK II" is marked on the receiver/frame.
- this is a modern high-power gas-ram air rifle; using a cylinder of compressed gas for power, instead of a metallic spring, built for target shooters and small-game/varmint hunters.
- features include: two-stage match trigger; manual safety; walnut checkered pistol grip stock with high comb and ventilated recoil pad; receiver/frame grooved for scope mounting.
- this model is available with a factory installed sound suppressor/silencer or a barrel weight.

Manufacturer

- the manufacturer's name is usually marked on the receiver/frame and/or barrel.
- Theoben Engineering is a manufacturer based in England that specializes in manufacturing pre-charged pneumatic and gas/spring power air rifles for field and competition use.

Action

- bolt operated
- in calibre 177 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
- in calibre 20 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
- in calibre 22 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
- in calibre 25 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Serial Number

- located on the receiver/frame.

Calibre

- marked on the barrel.

Canadian Law Comments

- this model is available with a sound suppressor/silencer or with a barrel weight.
- in Canada, the sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada.
- when the sound suppressor/silencer (prohibited device) is removed from the barrel the firearm may correctly be identified as a "Non Restricted Firearm".

Notes

Make

- "Theoben" is usually marked on the firearm.

Model

- "MFR" is usually marked on the left side of the firearm.
- this is a modern air rifle based on the Theoben, Rapid 7 action, using a cylinder of compressed gas for power instead of a metallic spring. Built for target shooters and small-game/varmint hunters.
- features include: barrel is fitted with a full-length integral silencer/sound suppressor; two-stage match trigger; walnut, checkered pistol grip stock with high comb and ventilated recoil pad; receiver/frame grooved for scope mounting.
- three methods of loading, direct into the breech, a single shot holder or a multi-shot magazine.
- although the barrel has an integral, full-length silencer/sound suppressor it is also threaded at the muzzle for use with an additional, removable "MFR" silencer/sound suppressor to further reduce the noise level.
- overall length with 533 mm barrel is 1110 mm (43.5"), average weight is 3.4 kg (7.6 lbs).

Manufacturer

- the manufacturer's name is usually marked on the receiver/frame and/or barrel.
- Theoben Engineering is a manufacturer based in England that specializes in manufacturing pre-charged pneumatic and gas/spring power air rifles for field and competition use.

Action

- bolt operated, pre-charged pneumatic.
- in calibre 177 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
- in calibre 20 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
- in calibre 22 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
- in calibre 25 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Calibre

- the calibre designation is usually marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- this firearm left the factory with an integral sound suppressor/silencer. The sound suppressor/silencer is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada.
- if the prohibited device (sound suppressor/silencer) were to be removed from the firearm, the firearm may correctly be identified as a "Non Restricted Firearm".

- no longer manufactured.
- model designation may be marked on the firearm.
- this is a modern, break barrel air rifle, built for target shooters and hunters.
- features include: walnut pistol grip stock with high comb and rubber buttpad; receiver/frame grooved for scope mounts; adjustable trigger; automatic safety catch.
- the 190 mm barrel is fitted with a "Trans-Port Diffuser" silencer/sound suppressor.
- overall length is 1003 mm (39 1/2"), average weight is 3.1 kg (6.9 lbs).

Manufacturer

- the manufacturer's name is usually marked on the receiver/frame and/or barrel.
- Theoben Engineering is a manufacturer based in England that specializes in manufacturing pre-charged pneumatic and gas/spring power air rifles for field and competition use.

Action

- in calibre 177 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
- in calibre 20 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
- in calibre 22 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - the calibre designation is usually marked on the barrel and/or receiver/frame.

Canadian Law Comments - this firearm left the factory fitted with a sound suppressor/silencer. The sound suppressor/silencer is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada.
- if the prohibited device (sound suppressor/silencer) were to be removed from the firearm, the firearm may correctly be identified as a "Non-Restricted Firearm".

Notes

Make - "Theoben" is usually marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- discontinued in 2001. This model was available in two versions that discharged a projectile at different power levels. Units were available that developed 12ft/lbs of energy as well as units that developed between 15ft/lbs - 22ft/lbs (depending on calibre).
- model designation may be marked on the firearm.
- this is a modern, break barrel air rifle, built for target shooters and hunters.
- features include: checkered Hyedua (an African hardwood, pronounced "shed-u-a") pistol grip stock with high comb and rubber buttpad; receiver/frame grooved for scope mounts; adjustable trigger; automatic safety catch.
- available with a standard or TransPort silencer/sound suppressor, or a barrel weight.
- overall length is 950 mm (37") with the standard silencer/sound suppressor, and 1090 mm (43") with the TransPort silencer/sound suppressor, average weight is 3.6 kg (8 lbs).

Manufacturer

- the manufacturer's name is usually marked on the receiver/frame and/or barrel.
- Theoben Engineering is a manufacturer based in England that specializes in manufacturing pre-charged pneumatic and gas/spring power air rifles for field and competition use.

Action

- in calibre 177 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
- in calibre 20 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
- in calibre 22 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.

Calibre

- the calibre designation is usually marked on the barrel.

Canadian Law Comments

- this model is available with a permanently installed sound suppressor/silencer or with a permanently installed barrel weight.
- in Canada, the sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada.
- when the sound suppressor/silencer (prohibited device) is removed from the barrel the firearm may correctly be identified as a "Non-Restricted Firearm".

124312 - 4	22 PELLET	7	235	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Theoben" is usually marked on the firearm.

Model

- introduced in 1998.
- "SLR 98" may be marked on the firearm.
- "SLR 98" is a variant of the model SLR88, which was a more complicated design requiring more extensive manufacturing and fitting.
- "SLR 98" is a standard pattern under lever gas-piston air rifle.
- features include: round barrel with an integral silencer or an external muzzle weight; receiver/frame has an integral scope mount; two stage trigger; automatic safety; stained walnut pistol grip stock with high Monte Carlo cheek piece and rubber butt pad; blued finish.
- overall length is 990 mm (39"), average weight is 3.5 kg (7.7 lbs).

Manufacturer

- manufacturer's name may be marked on the receiver/frame of the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- spring-piston powered. - in calibre 22 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules. - in calibre 177 PELLET: discharges a projectile at a muzzle velocity exceeding 152.4mps and a muzzle energy exceeding 5.7 Joules.
Serial Number	- serial number is marked on the receiver/frame of the firearm. - serial number rationalization is unknown.
Calibre	- calibre designation is marked on the barrel assembly.
Shots	- removable seven shot rotary magazine, that is advanced automatically upon cocking.
Canadian Law Comments	- this firearm may have left the factory equipped with an integral sound suppressor/silencer. The sound suppressor is subject to the definition of "Prohibited Device" in "Part III/Firearms and Other Weapons" of Section 84 of the Criminal Code of Canada. - if the prohibited device (sound suppressor/silencer) were to be removed from the air gun, the firearm is correctly identified as a "Non Restricted Firearm".

Notes

Make

- the make designation is marked on the top of the left barrel as "THIEME & SCHLEGELMILCH SUHL".

Model

- the model designation is not marked on the firearm.
- features include: two side by side shotgun barrels with a rifle barrel centred below; double triggers; fold down rifle sights and blade foresight; top lever rifle barrel selector and pop-up aperture sight activator; bottom lever opening; exposed double hammers on side lock cocking mechanisms for the shotgun barrels; highly engraved side plates and receiver/frame; sliding top tang safety; checkered semi-pistol grip buttstock with trapdoor cartridge magazine forward of the toe of the stock; checkered forend; ejectors; wide, matted sighting rib; coin finished receiver/frame and blued barrels.

Manufacturer

- the make designation is marked on the top of the left barrel as "THIEME & SCHLEGELMILCH SUHL".
- "NIMROD-GEWEHR-FABRIK" is marked on the barrel
- Nimrod Gewehr Fabrik is a trade name used by Thieme & Schlegelmilch prior to 1939.

Action

- hinged barrel design.
- barrel assembly consists of three barrels: one rifled barrel and two smoothbore barrels or two rifled barrels and one smoothbore barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number is marked on the watertable of the receiver/frame and on the barrel assembly.
Calibre	- the calibre designations are marked as part of the proof marks on the barrel assembly.

Notes

Make

- "Thompson" is a trade name/mark owned by the Auto-Ordnance Corporation.
- "Thompson Semi-Automatic Carbine" is marked on the left side of the receiver/frame.

Model

- "MODEL OF 1927 A3" and "THOMPSON SEMI-AUTOMATIC CARBINE" are marked on the left side of the receiver/frame.
- this is a reproduction of the original Thompson model of 1927 except the 1927A3 is produced in 22 LR only as opposed to 45 ACP for the 1927 model.
- Auto Ordance Corporation has copyright privileges on the Thompson arrowhead trademark as illustrated on image 6.
- This firearm also illustrates a 30 round box magazine and a 22 LR adaptor fitted to the magazine well of the frame. This adaptor is required for this type of 22 LR magazine to function properly. This model was discontinued in 1994.
- Picture 9, illustrates the 1927A3 without the magazine well adaptor. The original 45 ACP box magazine was converted to take 10 rounds of 22 LR. It also illustrates a reproduction 50 round drum magazine with 10 round insert for 22 LR.

Manufacturer

- "Auto-Ordnance Corporation" is marked on the right side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Type	- capable of semi-automatic fire only.
Action	- blow-back operated.
Serial Number	- serial number rationalization unknown, sample observed had a serial number that consisted of a prefix letter "T" followed by four digits.
Calibre	- made in 22LR only.
Shots	- full sized magazines, both the box magazine and the drum magazine, have 22 LR calibre magazine inserts of lessor capacity than the "host" magazine.

Notes

Make

- "Thompson" is a trade name/mark owned by the "Auto-Ordnance Corporation".
- "THOMPSON SUBMACHINE GUN" over "CALIBRE .45 AUTOMATIC COLT CARTRIDGE" are marked on the left side of the receiver/frame.
- "AUTO-ORDNANCE CORPORATION" is marked on the right side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "U.S. MODEL 1928 A1" and "THOMPSON SUBMACHINE GUN" are marked on the left side of the receiver/frame. - it would appear that very few Model 1928 or Model 1928A1 Thompson Submachine Guns were manufactured by Auto-Ordnance Corporation before the production of the "new" Thompson M1 Model commenced in June of 1942. - it appears that Savage and Remington manufactured the bulk of the components for Auto-Ordnance and shipped the parts to Bridgeport where they were assembled into Auto-Ordnance receivers. - it would appear that the receiver and trigger frame were the only components manufactured by Auto-Ordnance at Bridgeport. - parts manufactured by Savage are marked with the letter "S" while parts manufactured by Remington are marked with the letter "R".
Manufacturer	- Auto-Ordnance established its own production facility in Bridgeport, Connecticut, U.S.A in August of 1941. - Auto-Ordnance contracted the Thompson Submachine Gun to be made for them by Colt and Savage Arms prior to August of 1941.
Action	- no longer capable of full automatic fire.
Serial Number	- "AO" prefix to serial No. denotes Auto-Ordnance production.
Calibre	- the Thompson Guns in 7.62MM TOKAREV were converted to that calibre in Viet-Nam during the 1961-1975 Viet-Nam War by what passed for workers in a government factory wokshop. - these conversions are deemed to be Manufacturer's Specifications.
Shots	- detachable box magazine in 5, 20 & 30 shots. - 50 shot drum magazines are available - known as the "L" drum magazine. - 100 shot drum magazines are available - known as the "C" drum magazine.
Remarks	- the Thompson Guns in 7.62MM TOKAREV were converted to that calibre in Viet-Nam during the 1961-1975 Viet-Nam War by what passed for workers in a government factory wokshop. - these conversions are deemed to be Manufacturer's Specifications.

Notes

Make

- "Thompson" is a trade name/mark owned by the "Auto-Ordnance Corporation".
- "THOMPSON SUBMACHINE GUN" over "CALIBRE .45 AUTOMATIC COLT CARTRIDGE" are marked on the left side of the receiver/frame.
- "AUTO-ORDNANCE CORPORATION" is marked on the right side of the receiver/frame.

Model

- this firearm is new production using old receivers that had been stockpiled at the "manufacturer's". These receivers have been assembled with the correct parts for an M1928A1 and the model designation altered at the "factory" to read M1928A1.
- Auto Odnance Corp. contracted Colt to produce the original receiver.
- the serial number is located on the left side and has no prefix or suffix, it consists of numbers only.
- the Model 1928 differs from the Model 1921 by reduction in the cyclic rate of fire from 800 shots per minute for the Model 1921 to 600 shots per minute for the Model 1928.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- Colt production may be identified by the Colts Patent Firearms Manufacturing Company identifier and the Hartford Connecticut, USA address on the left side of the receiver.
Action	- no longer capable of full automatic fire.
Serial Number	- the serial number is located on the left side and has no prefix or suffix, it consists of numbers only.
Shots	- detachable box magazine in 5, 20 & 30 shots. - 50 shot drum magazines are available - known as the "L" drum magazine. -100 shot drum magazines are available - known as the "C" drum magazine.
Other Markings	- may be marked U.S. NAVY, MODEL OF 1928A1, above the serial number.

Notes

Make

- "Thompson" is a trade name/mark owned by the "Auto-Ordnance Corporation".
- "THOMPSON SUBMACHINE GUN" over "CALIBRE .45 AUTOMATIC COLT CARTRIDGE" are marked on the left side of the receiver/frame.
- "AUTO-ORDNANCE CORPORATION" is marked on the right side of the receiver/frame.

Model

- "U.S. MODEL 1928 A1" and "THOMPSON SUBMACHINE GUN" are marked on the left side of the receiver/frame.
- it would appear that very few Model 1928 or Model 1928A1 Thompson Submachine Guns were manufactured by Auto-Ordnance Corporation before the production of the "new" Thompson M1 Model commenced in June of 1942.
- it appears that Savage and Remington manufactured the bulk of the components for Auto-Ordnance and shipped the parts to Bridgeport where they were assembled into Auto-Ordnance receivers.
- it would appear that the receiver and trigger frame were the only components manufactured by Auto-Ordnance at Bridgeport.
- parts manufactured by Savage are marked with the letter "S" while parts manufactured by Remington are marked with the letter "R".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- Savage Arms Corporation production may be identified by the letter S which will be found on most of the component parts of this firearm and the prefix "S" in the serial number. - Savage Arms is/was a firearms manufacturer located in Utica, New York. - Savage manufactured Thompson Submachine Guns for the "Thompson Automatic Arms Company" starting in November 1939 with the first firearms being delivered in "Spring" 1940. - 800,000 M1928 and M1928-A1 guns manufactured by Savage between 1940 and 1942.
Action	- no longer capable of full automatic fire.
Serial Number	- serial number is located on the left side and is prefixed by a "S". - "S" prefix denotes Savage production.
Shots	- detachable box magazine in 5, 20 & 30 shots. - 50 shot drum magazines are available - known as the "L" drum magazine. - 100 shot drum magazines are available - known as the "C" drum magazine.

Notes

Make	- "Thompson" was a trade mark/trade name owned by the Auto Ordnance Corporation; as the owner of the "Thompson" trademark, Auto Ordnance Corp[oration licenced a number of other manufacturers to produce "Thompsons" for the United States military. - the Thompson trade mark/trade name is still in use on a variety of semi-automatic only, commercial versions of the famous "Tommy Gun" as well as a line of "1911" type pistols. The Auto Ordnance Corporation has been a division of Kahr Arms since 1999.
Model	- "THOMPSON SEMI-AUTOMATIC CARBINE" over "CALIBER .45M1" was observed marked on the left isde of the receiver/frame. - this particular firearm is a commercial version of the World War Two, Thompson Submachine Gun Model M1. - this firearm is built at the factory to be capable of semi-automatic fire only. - features include: blade front sight with a protected rear battle sight; pinned, smooth round barrel (no fins); alloy or steel receiver/frame with right side ejection and cocking handle; walnut forearm, pistol grip, and buttstock; blued finish. - overall length for a 419 mm (16 1/2") barrel is 965 mm (38"), and the average weight is 5.2 kgs (11 1/2 lbs) or 4.09 kgs (9 lbs) when featuring an alloy receiver/frame.
Manufacturer	- the manufacturer's name is marked on the firearm.
Type	- although this firearm strongly resembles a full-automatic firearm, it left the factory capable of semi-automatic fire only.
Action	- blowback operated.
Serial Number	- serial number is marked on the left side of the receiver/frame. - serial number rationalization is unknown. - observed serial number consisted of a two letter prefix and four numbers.
Calibre	- samples have been noted with the calibre marked on the left side as "CALIBER 45M1".
Shots	- detachable box magazine in 5, 10, 20 & 30 shot capacities, the 50 shot magazine is a drum magazine.

Notes

Make

- "Thompson" is a trade name/mark owned by the "Auto-Ordnance Corporation".
- "THOMPSON SUBMACHINE GUN" is marked on the left side of the receiver/frame.
- "AUTO-ORDNANCE CORPORATION" is marked on the right side of the receiver/frame.

Model

- "THOMPSON SUBMACHINE GUN" over "CALIBER .45 M1" is marked on the left side of the receiver/frame.
- there were 285,480 Thompson M1 Submachine Guns produced by Savage and Auto Ordnance in total during the years 1942 and 1943.
- production ceased in 1943.

Manufacturer

- Auto Ordnance Corporation production may be identified by the letters A.O.C. which will be found on the bottom of the receiver/frame just forward of the magazine opening.

Action

- blowback operated.

Serial Number

- these military contract firearms do not have the customary "A.O." prefix incorporated in the serial number.
- marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.

Remarks

- this firearm is a redesigned model 1928-A1 Thompson Submachine Gun for the purpose of simplifying production for war-time use.
- the Blish Principle locking system was discarded for a blow-back operating system.
- the Bolt operating handle was moved from the top of the receiver/frame to the right side of the receiver/frame.
- the barrel fins, and muzzle compensator were discontinued to reduce costs of production.
- this model was not capable of accepting the drum magazines.
- the butt was permanently attached and the vertical pistol grip was omitted.

Notes

Make

- "Thompson" is a trade name/mark owned by the Auto-Ordnance Corporation.
- "THOMPSON SUBMACHINE GUN" is marked on the left side of the receiver/frame.

Model

- "THOMPSON SUBMACHINE GUN" over "CALIBER .45 M1" is marked on the left side of the receiver/frame.
- there were 285,480 Thompson M1 Submachine Guns produced by Savage and Auto Ordnance in total during the years 1942 and 1943.
- production ceased in 1943.

Manufacturer

- Savage Arms Corporation production may be identified by the letter "S" which will be found on the bottom of the receiver just forward of the magazine opening.

Action

- no longer capable of full automatic fire.

Serial Number

- the serial number is marked on the left side of the receiver/frame, eg. "No. 147475".
- these military contract firearms do not have the customary "S" prefix incorporated in the serial number.

Calibre

- "Caliber .45" is marked on the left side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- detachable box magazine.

Remarks

- this firearm is a redesigned model 1928-A1 Thompson Submachine Gun for the purpose of simplifying production for war-time use.
- the Blish Principle locking system was discarded for a blow-back operating system.
- the Bolt operating handle was moved from the top of the receiver to the right side of the receiver.
- the barrel fins, and muzzle compensator were discontinued to reduce costs of production.
- this model was not capable of accepting the drum magazines.
- the butt was permanently attached and the vertical pistol grip was omitted.

Notes

Make

- "Thompson" is a trade name/mark owned by the Auto-Ordnance Corporation.
- "THOMPSON SUBMACHINE GUN" may not be marked on the receiver/frame.

Model

- this is a generic record used to identify those Thompson Model M1 copies that have been produced without licence in various parts of the world.
- features include: a hammer activated firing pin, blowback operating system; bolt handle on the right side of the receiver; smooth or finned steel barrel; muzzle compensator; permanently attached butt stock and plain forend without pistol grip; this model may not be capable of accepting drum magazines; bronze and/or steel construction receiver/frames and upper body assemblies have been observed.
- NOTE: Thompson submachine gun models M1 and M1A1 are identical externally. The main difference in the models is in the bolt assembly. The M1's firing pin slides in a cylindrical hole in the bolt and is fired by a hammer. The M1A1's firing pin is integral to the bolt (no firing pin spring, hammer or hammer pin).

Action

- no longer capable of full automatic fire.

Serial Number

- the serial number may be marked on the receiver/frame.

Shots

- detachable box magazine.

Model

- this firearm model is a 1928-A1 Thompson Submachine Gun redesigned for the purpose of simplifying production for war-time use.
- this is a generic record used to identify those Thompson Model M1A1 copies that have been produced without licence in various parts of the world.
- features include: a fixed firing pin, advanced primer ignition, blow-back operating system; bolt handle on the right side of the receiver; smooth or finned steel barrel; muzzle compensator; permanently attached butt stock and plain forend without pistol grip; this model was not capable of accepting the drum magazines; bronze and/or steel construction receiver/frames and upper body assemblies have been observed.
- NOTE: Thompson submachine gun models M1 and M1A1 are identical externally. The main difference in the models is in the bolt assembly. The M1's firing pin slides in a cylindrical hole in the bolt and is fired by a hammer. The M1A1's firing pin is integral to the bolt (no firing pin spring, hammer or hammer pin).

Action

- blowback operation.
- capable of full-automatic fire.

Serial Number

- the serial number may be marked on the receiver/frame.

Shots

- detachable box magazine.

Notes

Make

- "THOMPSON : CENTER ARMS" and "ROCHESTER, N.H." may be marked on the barrel.
- "TCA-C" and "ROCH-NH" may be marked on the front of the receiver/frame, under the forearm.

Model

- "Contender" is usually not marked on the firearm.
- manufactured from 1967 to 2000.
- Contender model was reintroduced as the G2 Contender in 2002.
- comes in blued steel or stainless steel finish.
- this model has been available in a large number of variations; different grip profiles, sighting equipment, barrel profiles and lengths will be encountered.
- all barrels, grips and forestocks interchange, so the external appearance may be altered easily.

Manufacturer

- "THOMPSON : CENTER ARMS" and "ROCHESTER, N.H." may be marked on the barrel.
- "TCA-C" and "ROCH-NH" may be marked on the front of the receiver/frame, under the forearm.

Action

- hinged barrel design.

Serial Number

- serial number is marked on the receiver/frame, behind the hammer.
- serial number rationalization is unknown.
- observed serial numbers consisted of five numbers without a letter prefix or suffix.
- observed serial numbers consisted of six numbers without a letter prefix or suffix.

Barrel

- all barrels will interchange with the "Contender Hunter", "Contender Hunter Carbine" or "Contender Carbine.
- from the Custom Shop, the 22 CCM, 25-20 WIN and 38-55 WIN are offered in any length between 229MM and 381MM.
- some of the barrels accept removable chokes, these chokes are not included in barrel measurements.

Calibre

- calibre designation is marked on barrel.

Notes

Make

- "THOMPSON : CENTER ARMS" and "ROCHESTER, N.H." may be marked on the barrel.
- "TCA-C" and "ROCH-NH" may be marked on the front of the receiver/frame, under the forearm.

Model

- manufactured from 1986 to 2000.
- the Contender Carbine was replaced by the G2 Contender.
- features include: a two-piece walnut or synthetic stock and forearm; blued steel or stainless-steel finishes; open adjustable sights or drilled and tapped for scope mounts; sling swivel studs.
- overall length: 889mm with a 533mm barrel.
- overall length: 737mm with a 413mm barrel.

Manufacturer

- manufacturer is marked on the firearm.

Action

- hinged barrel design.

Serial Number

- serial number is marked on the receiver/frame, behind the hammer.
- serial number rationalization is unknown.
- observed serial numbers consisted of a letter "S" prefix followed by five numbers.

Notes

Make	- "THOMPSON / CENTER" was observed marked on the left side of the barrel and the company logo "T/C" was observed marked on top of the barrel.
Model	- introduced in 2012. - "DIMENSION" was observed marked on the top of the barrel. - the Thompson/Center model Dimension consists of a bolt operated receiver/frame and a one piece stock which is fitted with a removable barrel system for calibre interchangeability. - the bolt operated platform is available in four calibre groups: "A" - short bolt throw, "B" - medium bolt throw, "C" - non magnum long bolt throw and "D" - magnum long bolt throw. Each calibre group has its own bolt, barrel, magazine and magazine housing (except for the 22-250 REM which uses its own exclusive magazine). All interchangeable components are marked/identified with their group letter "A", "B", "C" or "D". A lock nut tightens the barrel to the receiver/frame. The use of a proprietary torque wrench is required to respect headspace and to maintain a consistent zero on target. - features include: blued tapered interchangeable rifled barrel without sights; drilled and tapped receiver/frame with bolt release mounted on the left side of the receiver/frame; single trigger mechanism; thumb safety located on the right side of the receiver/frame; one piece black synthetic stock with removable length of pull adjustment spacers. - an optional bridge style scope mount is available which is attached to the barrel chamber area and to the top rear of the receiver/frame. - available for a right or left handed shooter. - overall length with a 559mm (22") barrel is 1061mm (41.75"), average weight is 3.18kg (7lbs). - overall length with a 610mm (24") barrel is 1111mm (43.75"), average weight is 3.18kg (7lbs).
Manufacturer	- "THOMPSON / CENTER" was observed marked on the left side of the barrel.
Action	- turn-bolt deisgn.
Serial Number	- serial number was observed marked on the left side of the receiver/frame. - example observed with a three letter "JAA" prefix followed by four numbers.
Calibre	- calibre designation was observed marked on the left side of the barrel.
Shots	- detachable box magazine.

Notes

Make

- may be found marked on the barrel.

Model

- model designation may be marked on the barrel.
- this model is designed to use a number 209 shotshell primer instead of the traditional percussion cap.
- features include: blued receiver/frame and barrel, walnut grip and forend, click adjustable rear sight, ramp front sight, and a ramrod located under the barrel.
- also available in rifle configuration.

Manufacturer

- manufacturers markings may be found on the barrel.

Action

- hinged barrel design.

Serial Number

- serial number will be marked on the receiver/frame.

Calibre

- available with accessory barrels that convert the firearm from a muzzle loader to centre fire.

Notes

Make - "Thompson / Center Arms", or "T/C Custom Shop" and "TC" logo is usually marked on the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model

- introduced in 1996.
- "ENCORE" is marked on the firearm.
- "Pistol" has been incorporated into the model designation to differentiate it from the "Encore Rifle" which is also available on the market by Thompson/Center Arms.
- "Encore Pistol" is a break-open single-shot pistol designed for hunting and metallic silhouette competition.
- "Encore Pistol" is based in large part on Thompson/Center's earlier "Contender" design.
- features include: carbon steel or stainless steel construction; open adjustable sights (some versions come with ventilated ribs and shotgun-style bead sights); interchangeable round barrel; front hinged receiver/frame with opening mechanism built into the hinged trigger-guard; walnut or synthetic forearm and anatomical pistol grip; blued or stainless finish.
- this pistol differs mainly from the "Contender" in that the Encore is a strengthened design with built-in ledges on the sides of the receiver/frame; a newer "Contender" pistol, the "G2 Contender" will also have receiver/frame ledges, but smaller than those seen on the Encore.
- available in a "Hunters Package" that includes a factory mounted scope and a carrying case.
- also available with an accessory, muzzle-loading barrel in calibre 50 PERCUSSION or as a complete muzzle-loading pistol as the Encore 209 x 50 Magnum.
- overall length with a 305 mm (12") barrel is 419 mm (16.5"), average weight is 1.93 kgs (4 1/4 lbs).

Action

- hinged barrel design.

Serial Number

- serial number is usually marked on the receiver/frame, behind the hammer.
- serial number rationalization is unknown.
- observed serial number consisted of five numbers without a letter prefix or suffix.
- observed serial number consisted of six numbers without a letter prefix or suffix.

Barrel

- barrels for the "Encore" are not interchangeable with the Thompson/Center Arms "Contender".
- barrels for the "Encore Pistol" and "Encore Rifle" do interchange with one another.

Notes

Make

- the Thompson/Center name is marked on the receiver/frame and/or barrel.

Model

- "G2 Contender" or "Contender G2" is the second generation of the Contender design.
- "G2 Contender" line was introduced in 2002.
- "G2 Contender" will accept barrels from the earlier Contender model but not grips as the angle of the grip-frame has been changed.
- this is the handgun version of the "G2 Contender".
- features include: interchangeable round barrel with ramp front sight and adjustable rear sight or solid rib, bead front sight and internal choke; barrel may be drilled and tapped for scope mounts; front hinged receiver/frame with the trigger guard acts as the break open lever; exposed spur hammer with external manual centre-fire or rimfire selector; single action trigger mechanism; synthetic or walnut forearm and pistol grip with butt cap; blued or stainless steel finish.
- the G2 Contender uses a automatic hammer block safety with bolt interlock covered by Patent Number 5,680,722.
- overall length with a 305 mm (12") barrel is 394 mm (15 1/2") and average weight is 1.6 kg (3.5 lbs).
- overall length with a 356 mm (14") barrel is 445 mm (17 1/2") and average weight is 1.7 kg (3.75 lbs).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the Thompson/Center name is marked on the receiver/frame and/or barrel.
Action	- front hinged/break open action.
Serial Number	- serial number is marked on the receiver/frame, behind the hammer. - serial number rationalization is unknown. - serial number may have a prefix of "G" or "SG" followed by five numbers. - "G" prefix refer to a blued finish. - "SG" prefix refer to a stainless steel finish.
Barrel	- this model will also accept all of the barrel/calibre offerings of the original Contender pistol.
Calibre	- calibre is marked on the barrel.

Firearm Reference Number (FRN): 121282
Make: Thompson/Center
Model: G2 Contender 209

Summary

Make:	Thompson/Center
Model:	G2 Contender 209
Manufacturer:	Thompson/Center Arms
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
121282 - 1	45 PERCUSSION	1	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
121282 - 2	50 PERCUSSION	1	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the Thompson/Center name is marked on the receiver/frame and/or barrel.

Model

- "G2 Contender" is the second generation of the Contender design.
- "G2 Contender" will accept barrels from the earlier Contender model but not grips as the angle of the grip-frame has been changed.
- this version of the "G2 Contender" is a muzzleloading rifle that uses #209 shotgun primers to ignite the powder charge.
- "G2 Contender 209 x 45" was manufactured from 2003 to 2005.
- "G2 Contender 209 x 50" was introduced in 2006.
- also available for use with centre-fire or rim-fire metallic cartridges as the "G2 Contender Rifle".
- features include: walnut, pistol grip buttstock with a matching forend; adjustable rear sight and scope rail; ramped front sight with Tru-Glo fiber optic inserts; blued finish on metal; ramrod mounted on the underside of the barrel; trigger guard acts as the opening lever; barrel is drilled and tapped for scope mounts.

Serial Number

- serial number is marked on the receiver/frame.
- serial number rationalization is unknown.

Calibre

- this model will also accept all of the centerfire or rim-fire barrels offered for the G2 Contender Rifle or the original Contender Carbine.

Notes

Make

- make or logo marked on barrel.

Model

- model is marked on the firearm.
- this is a new-manufacture (2002) muzzle-loading firearm that uses #209 shotgun primers for ignition.
- features include: a synthetic or laminated pistol-grip stock (available in matte black or camouflage finishes), blued steel or stainless-steel construction, open adjustable sights with fluorescent rod front, drilled and tapped for scope mounts, exposed manually-cocked hammer, and a unique "falling-block"-type system for priming the firearm once it's loaded; pulling down on the trigger-guard drops a cover at the rear of the receiver/frame that conceals a recess for a #209 shotshell primer. This cover protects the primer from rain and damp.
- in 2005 a high comb synthetic thumbhole stock has been introduced in three configuration, laminated, black or camouflage.
- overall length with a 660mm (26") barrel is 1016mm (40"), and average weight 3.19kgs (7lbs).
- overall length with a 711mm (28") barrel is 1067mm (42"), and average weight 3.19kgs (7lbs).

Manufacturer

- manufacturer or logo marked on the barrel.

Action

- muzzle-loading single-shot.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- serial number is marked on the firearm.
- serial number rationalization is unknown.
- observed serial number consisted of a letter "S" prefix and six numbers.

Calibre

- rifling characteristic: 1 turn in 28 inches.

Notes

Make

- maker's name is marked on the barrel/receiver/frame.

Model

- model designation is marked on the top of the barrel as "Omega X7".
- this is a muzzle loading, single shot, in-line type percussion ignition rifle utilizing the Thompson/Center patented "sealed pivoting breech" design.
- model series introduced in 2006.
- features; in-line percussion ignition utilizing a sealed pivoting breech design where the breech swings downward by using the spur on the trigger guard, a 209 primer is then placed on the end of the breech plug; lightweight tapered stainless steel barrel; solid aluminum ramrod; rear peep sight, fibre optic front sight; laminated stock with recoil pad.

Manufacturer

- maker's name is marked on the barrel/receiver/frame.

Action

- muzzle loading, single shot, in-line type percussion ignition.

Serial Number

- serial number is marked on the barrel/receiver/frame.

Calibre

- rifling characteristics: 1 turn in 28 inches.

Make: Thompson/Center
Model: Pennsylvania Hunter Carbine

Summary

Make:	Thompson/Center
Model:	Pennsylvania Hunter Carbine
Manufacturer:	Thompson/Center Arms
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
44232 - 1	50 PERCUSSION	1	533	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Model

- discontinued in 2002.
- carbine version of the Pennsylvania Hunter rifle by Thompson/Center.
- hardwood stock, adjustable rear sight
- octogonal barrel stepped to round immediately in front of forestock.

Action

- side hammer cap lock, single trigger.

Barrel

- this firearm utilizes a hooked-breech system; barrel measurement for this type of muzzle loader is an exterior measurement taken from the muzzle end of the barrel to the rear of the barrel where the breech plug joins the barrel normally there is a visible joint-line where the breech plug meets the rear of the barrel.
- barrel measurements taken internally by the rod method will result in readings 15-30mm shorter than factory specification.

Notes

Make

- "THOMPSON/CENTER" and the Thompson/Center logo of an overlaid "TC" in a circle is marked on the firearm.

Model

- "T/CR22" is marked on the left side of the receiver/frame.
- this a Ruger 10/22-based semi-automatic rifle manufactured with a bolt hold-open system that locks the bolt to the rear automatically when the magazine is empty; this mechanism depends on a lifter tab built into the proprietary Thompson/Center magazine, but the rifle will still function with Ruger or aftermarket 10/22 magazines.
- these rifles are built in a "standard" version (FRT #195728) with a non-fluted threaded barrel and a Magpul synthetic stock, and in a "Performance Center" version (FRT #195729) with a fluted threaded barrel and either a laminated or synthetic thumbhole stock.
- features include: blued/anodized finish; threaded muzzle with thread protector; open adjustable peep sights with fluorescent front; integral scope mounting rail on top of the receiver/frame; synthetic Magpul pistol-grip stock in olive drab or camouflage; right-side bolt handle and ejection port, with last shot bolt hold-open; extended magazine release; and cross-bolt safety.

Manufacturer

- "SMITH & WESSON" is marked on the left side of the receiver/frame.

Action

- blowback operated.

Serial Number

- serial-numbered on the left side of the receiver/frame.

Shots

- detachable rotary magazine with a bolt hold-open tab.

Model

- the model is not marked on the firearm; this is a descriptor of the firearm.
- this is a muzzle-loading flintlock military-pattern single-shot pistol manufactured by Thone & Son ("Thone & Zoon") between 1710 and 1810.
- features include: full round iron barrel; full stock with gripcap; underbarrel ramrod; barrel band; cock, frizzen, and flash-pan mounted on right side; brass fittings.
- examples of this firearm may also be seen converted to percussion ignition.

Manufacturer

- "Thone & Zoon" ("Thone & Son") is usually marked on the lockplate.
- Lambertus Michaalis Thone was an Amsterdam, Netherlands-based gunmaker between 1781 and 1810, working towards the end with his son, A. Thone.

Action

- muzzle-loaded flintlock single-shot.

Notes

Make

- "A. THRESHER" over "STAFFORD, CON." is marked on the firearm.

Model

- manufactured prior to 1838.
- model designation is not marked on the firearm.
- this is a standard-pattern underhammer percussion "saw-handle"-style pistol, made using Ruggles' 1826/28 patent for an underhammer lock.
- features include: blued/browned finish; part-round/part-octagon barrel; fixed open sights; underhammer percussion lock; varying styles of triggers; and a "saw-handle"-profile of the grip, generally coming down to a rounded point at the butt. These pistols almost universally have a brass or German silver strap running around the grip of the pistol, may have brass or German silver inlays, and are stamped or engraved with a variety of leaves, vines, stars, and so on.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- "A. THRESHER" over "STAFFORD, CON." is marked on the firearm.
- Alfred Thresher was located in Stafford, Connecticut, U.S.A. between 1833 and 1838.
- Alfred Thresher was the brother-in-law of Adin Ruggles).
- Alfred Thresher produced guns under his own name at the Ruggles' factory.

Action

- muzzle-loading.

30121 - 2	22 LR	1	610	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Thunderbolt" is marked on the barrel.
- "Thunderbolt" was a trade name used by Marky Bros. of Detroit, Michigan.
- "Thunderbolt" was manufactured by "Marlin Firearms".

Model

- "Thunderbolt Model JL" is marked on the barrel.
- manufactured from 1941 to 1977.
- this is a Marlin model "101" sold by Marky Bros. under their trade name of "Thunderbolt" and as the model "JL".

Manufacturer

- "Made in U.S.A." is marked on the barrel.
- the manufacturer's name is not marked on the firearm.

Action

- turn bolt operated.
- may or may not have a cocking ring on rear of bolt, used to cock bolt.

Serial Number

- unknown.
- approximately 1000 supplied to this company.

Barrel

- blued, round, tapered, Ballard or Micro groove.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- "22 Cal. S. L. & L.R." is marked on the barrel.

Remarks

- Rim fire, bolt action, take down, manual cocking, single shot with a one piece, pistol grip, birch stock and forearm. Early variety, 1951-55, manufactured with a smooth "knob" cocking piece. Bolt cocked on closing. There were two types of bolt handle location. One had the handle forward on the bolt; second had the handle located almost above the trigger near the rear of the bolt. Intermediate variety, 1960-65 had a vertical ring cocking piece. Late variety, 1967, "t" knob replaced the vertical ring system. Round, blued, tapered, barrel with micro groove rifling in 1953. Ballard rifling prior to 1953. After 1965, barrel lengths went to 22". This is a contract firearm manufactured for the Marky Bros. by Marlin and is similar to the Marlin Model 101.

Notes

Make

- "Thureon Defense", with Thureon's logo of a "T" in a shield is marked on the firearm.

Model

- "Mod. GA" was observed marked on the left side of the magazine housing of the receiver/frame.
- "GA" model is a closed bolt, blowback operated semi-automatic rifle/carbine utilizing a split receiver/frame design and detachable box magazine.
- "GA" model is not of the design commonly known as the AR15/M-16 rifle.
- features include: round free floating rifled barrel with or without a threaded muzzle for attachment of a flash hider; flat sided aluminum upper receiver with round ventilated barrel jacket, left side cocking handle, right side ejection port (left-handed versions with these features reversed are also available), integral Picatinny rail and iron flip up sights, and a fixed or telescoping buttstock; front hinged aluminum lower receiver/frame with left side safety lever, right side magazine release button, AR-15 trigger components, and synthetic pistol grip; matte black finish.
- overall length with a 406 mm (16.0") barrel and the six position buttstock in the closed position is 800 mm (31.5") and in the extended position is 902 mm (35.5"), and average weight is 2.44 kgs (5.375 lb).
- Thureon Defense manufactures several different versions of the same firearm, which are distinguished from one another by the magazine used:
- "GA" model uses magazines designed for Glock pistols;
- "MP" model uses magazines designed for Smith & Wesson M&P pistols;
- "SA" model uses magazines designed for the UZI and Colt submachineguns;
- "SG" model uses magazines designed for Sig-Sauer pistols; and
- "XA" model uses magazines designed for Springfield Armory XDM pistols.
- some versions of the Thureon Defence model GA feature the company logo of a "T" in a shield marked on both sides of the upper receiver in a pattern that features five Thureon Defence logos repeatedly engraved in an overlayed manner with the centre logo appearing on top of the other four logo's.

Manufacturer

- "Thureon Defense", with Thureon's logo of a "T" in a shield is marked on the firearm.
- Thureon Defense is located at: 2118 Wisconsin Ave, New Holstein, WI 53061, United States of America.
- Thureon Defence announced new company ownership and location change on January 31, 2017.
- Thureon Defence is located at W185 N11521 Whitney Drive, Germantown, WI 53022, United States of America.
- "GERMANTOWN, WI" may be marked on the underside of the trigger guard.

Action

- blowback operated.

Serial Number

- numbered on the left side of the receiver/frame immediately above the trigger.
- serial number of two observed examples consisted of a two letter prefix (BA) followed by four numbers.

Calibre

- observed marked on the left side of the magazine housing of the receiver/frame.

Shots

- the Thureon Defense, GA Model is manufactured to use Glock pistol detachable box magazines in all of its calibre chamberings.

Notes

Make

- "TIKKA" is marked on the side of the receiver/frame.
- "TIKKA" is a trade name used by Oy Tikkakoski AB of Tikkakoski, Finland prior to 1989.
- "TIKKA" is a trade name used by Sako Ltd. of Riihimaki, Finland since 1989.

Model

- "TIKKA M55" marked on left side of receiver.
- this is a generic model. Other model "M55" entries exist which might better describe the firearm.
- Tikka Arsenal cartouche, a stylized T within a circle, appears on the right side of the receiver ring.
- introduced in mid-1960's, production ceased circa 1989.
- bolt action rifle is derived from the Mauser M1898 bolt action.
- radial safety catch on the right side of the breech behind the bolt handle, magazine release located in trigger guard ahead of the trigger, bolt release located on left side of receiver.
- model variations result from differing barrel weights and lengths, stock design, quality and finish.

Shots

- detachable box magazine in 3 or 5 shot capacity. Optional 10 shot magazine is available.

Notes

Make

- "TIKKA" is marked on the side of the receiver/frame.
- "TIKKA" is a trade name used by Oy Tikkakoski AB of Tikkakoski, Finland prior to 1989.
- "TIKKA" is a trade name used by Sako Ltd. of Riihimaki, Finland since 1989.

Model

- Tikka M55 stamped into the left side of the receiver. Tikka Arsenal cartouche, stylized T in a circle appears on the right side of the receiver ring. Calibre and Manufacturer's name stamped on left side of barrel.

Manufacturer

- manufacturer's name is usually marked on the left side of the barrel.

Action

- Bolt action derived from Mauser M 1898. Differs in that the safety lug is incorperated into the bolt handle, which in turn mortises into the receiver.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the model number 55 plus a 0 forms 3 digit prefix to serial number further identifying action type - serial number is marked on the left side of the receiver/frame.
Calibre	- calibre designation is usually marked on the left side of the barrel.
Shots	- 3 shot standard detachable box magazine, 5 and 10 shot were also available
Remarks	- Tikka Model M55 has a safety catch located behind the bolt handle on the right rear of the receiver. Bolt release on the opposite side. Magazine release located in the trigger guard ahead of the trigger. Model variations result from changes in barrel weights,lengths,and contour as well as stock design, quality and finish. This model is distinguished by a heavy barrel. The stock is furnished with a roll over style Monte Carlo cheek piece.

Type:	Rifle
Action:	Bolt Action
Country of Manufacturer:	FINLAND
Serial Numbering:	See Note
Legal Classification:	Non-Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
27534 - 1	6.5X55 SWEDISH MAUSER	5	620	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "TIKKA" is marked on the side of the receiver/frame.
- "TIKKA" is a trade name used by Oy Tikkakoski AB of Tikkakoski, Finland prior to 1989.
- "TIKKA" is a trade name used by Sako Ltd. of Riihimaki, Finland since 1989.

Model

- Tikka M65 stamped into the left side of the receiver. Tikka Arsenal cartouche, stylized T in a circle appears on the right side of the receiver ring. Calibre and Manufacturer's name stamped on left side of barrel.

Action

- Bolt action derived from Mauser M 1898. Differs in that the safety lug is incorperated into the bolt handle, which in turn mortises into the receiver. The bolt can be distinguished from the Model M55 by the presence of dual opposed rear locking lugs and dual gas vents in the bolt body

Serial Number

- the model number 65 plus a 0 forms 3 digit prefix to serial number further identifying action type.

Remarks

- Tikka Model M65 has a safety catch located behind the bolt handle on the right rear of the receiver. Bolt release on the opposite side. Magazine release located in the trigger guard ahead of the trigger. Model variations result from changes in barrel weights, lengths, and contour as well as stock design, quality and finish. This model is distinguished by a heavy barrel. The stock is furnished with a roll over style Monte Carlo cheek piece.

Notes

Make

- "TIKKA" is marked on the left side of the receiver/frame.
- "TIKKA" is a trade name used by Oy Tikkakoski AB of Tikkakoski, Finland prior to 1989.
- "TIKKA" is a trade name used by Sako Ltd. of Riihimaki, Finland since 1989.

Model

- "M658" marked on the left side of the action.
- new action introduced circa 1988 to replace the M65 series; the M658 represents an enlarged M558 action designed to handle 30-06 SPRG length cartridges.
- distinguished by the presence of a polymer collar in the rear receiver ring.
- safety catch located behind the bolt handle on the right rear of the receiver, bolt release on left rear side of receiver, magazine release located in the stock ahead of the trigger guard.
- safety can lock both trigger and bolt.

Manufacturer

- marked on left side of barrel.
- Sako Ltd is the parent company of three Finnish arms makers since c.1988, i.e., Sako, Tikka, Valmet.

Action

- turn bolt design.

Serial Number

- serial number is marked on the left side of the receiver/frame.

Calibre

- marked on left side of barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- single column, detachable box magazine.
- 3 shot capacity is standard; 5 shot magazine is available as an option.
- 4 shot capacity magazine for magnum calibres available.

Notes

Make

- "TIKKA" is marked on the side of the receiver/frame.
- "TIKKA" is a trade name used by Oy Tikkakoski AB of Tikkakoski, Finland prior to 1989.
- "TIKKA" is a trade name used by Sako Ltd. of Riihimaki, Finland since 1989.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "M695" stamped on side of receiver/frame. - calibre and maker marked on side of barrel. - this is a generic model entry for the Tikka M695 rifle and is designed to encompass any and all of the Whitetail model series of product names that may be used to identify these rifles other than M695, eg., "Whitetail Hunter", "Synthetic Sporter" etc.; refer AKA screen for complete listing. - "product literature-type" model names as already referenced DO NOT appear on the firearm. - characterized by free-floating barrel, bolt release on left rear of receiver, thumb safety on right rear of the receiver/frame, magazine release located in the stock ahead of the trigger. - also available in a left hand version.
Manufacturer	- marked on the receiver/frame and/or the barrel.
Serial Number	- marked on left side of receiver/frame. - model number "M695" and "RH" or "LH" (right or left-handed action) are stamped immediately preceding the serial number. - the model number and designation do not constitute part of the serial number.
Shots	- detachable box magazine.
Remarks	- the Tikka M695 series has a safety catch located behind the bolt handle on the right rear of the receiver with the bolt release located on the opposite side. - safety operates similarly to the M658. - magazine release located in the stock ahead of the trigger guard. - the receiver is semi-hexagonal in shape to save on manufacturing costs. - unlike the M658 the M695 series of receivers does not have a polymer bushing in the rear receiver ring to serve as a bolt guide but rides directly on the surface of the receiver. - the rifle is available with many different sight or sight mounting systems, stocking-material options, and metal finish or type; i.e blued or stainless.

Notes

Make

- "TIKKA" is marked on the side of the receiver/frame.
- "TIKKA" is a trade name used by Oy Tikkakoski AB of Tikkakoski, Finland prior to 1989.
- "TIKKA" is a trade name used by Sako Ltd. of Riihimaki, Finland since 1989.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "TIKKA T3" is marked on left side of receiver/frame. - importation into North America began in 2003. - features include: blued or stainless steel barrel; scope mounts included; free-floating barrel; bolt release on left rear of receiver/frame; thumb safety on right rear of receiver/frame; magazine release located in the stock ahead of the trigger; laminated, high grade walnut or synthetic stock. - the bolt mechanism has an unconventional front locking lug system which locks at the four and ten o'clock position rather than the normal six and twelve o'clock position of most other Mauser-type bolt actions; this results in a short 70 degree bolt lift to manipulate the mechanism; the normal bolt lift of most other types of bolt action rifles is 90 degrees. The bolt locks into the receiver/frame and has locking lugs which are tapered at the front; plunger ejector and hook extractor. - available as the "T3 Hunter" with a walnut stock and a blued finish. - available as the "T3 Lite" with a lightweight synthetic stock and a blued finish. - available as the "T3 Lite Stainless" with a lightweight synthetic stock and a stainless steel receiver/frame and barrel. - available as the "T3 Laminated Stainless" with a laminated wood stock and a stainless steel receiver/frame and barrel. - available as the "T3 Battue" with a walnut stock and a blued finish. This version also features a shorter barrel (490mm) with a quarter rib mounted fibre optic TruGlo rear sight and a hooded front sight. - available as the "T3 Big Boar" (introduced in 2005) with a blued finish and black synthetic stock that features a straight comb. - available as the "T3 Super Varmint" (introduced in 2005) with a stainless steel action/barrel and black synthetic stock that features an adjustable comb. This model also has a picatinney rail attached to the top of the receiver/frame for mounting a variety of accessories.
Manufacturer	- the name of the manufacturer is marked on the receiver/frame and/or the barrel.
Serial Number	- marked on left side of receiver/frame following the model designation. - alpha/numeric have been observed.
Calibre	- calibre is marked on barrel.
Shots	- detachable box magazine. - magazines are available in a standard "flush" length (does not protrude from the stock) or as an extended magazine with increased capacity. - magazine holds 3, 4, 5 or 6 rounds depending on the model and calibre.

Notes

Make

- "TIKKA" is marked on the side of the receiver/frame.
- "TIKKA" is a trade name used by Oy Tikkakoski AB of Tikkakoski, Finland prior to 1989.
- "TIKKA" is a trade name used by Sako Ltd. of Riihimaki, Finland since 1989.

Model

- "TIKKA T3" may be marked on left side of receiver/frame.
-"Forest" may not be marked on the firearm.
- features observed: cold hammer forged free-floating chrome-moly barrel; black matte manganese phosphatized metal surfaces; bolt release on left rear of receiver/frame; thumb safety on right rear of receiver/frame; magazine release located in the stock ahead of the trigger; adjustable cheek-piece with ambidextrous adjusting knob; checkered pistol grip stock and forend; swivels studs.
- overall length is from 1020 (40 1/4") to 1130mm (40 5/8") average weight is from 3kg (6.61lbs) to 3.2kg (7.05lbs).

Manufacturer

- "SAKO" may be marked on the receiver/frame and/or the barrel.

Action

- turn bolt operated.

Serial Number

- serial number may be marked on left side of receiver/frame following the model designation.

Calibre

- calibre is usually marked on the barrel.

Shots

- detachable box magazine.

Notes

Make

- "TIKKA" is marked on the side of the receiver/frame.
- "TIKKA" is a trade name used by Oy Tikkakoski AB of Tikkakoski, Finland prior to 1989.
- "TIKKA" is a trade name used by Sako Ltd. of Riihimaki, Finland since 1989.

Model

- "TIKKA T3" is marked on left side of receiver/frame. "Hunter" may not be marked on the firearm.
- importation into North America began in 2003.
- features include: blued free-floating barrel; bolt release on left rear of receiver/frame; thumb safety on right rear of receiver/frame; magazine release located in the stock ahead of the trigger; high grade checkered walnut stock; black rubber recoil pad and scope mounts included.
- this model is also available in left hand configuration.
- the bolt mechanism has an unconventional front locking lug system which locks at the four and ten o'clock position rather than the normal six and twelve o'clock position of most other Mauser type bolt actions; this results in a short 70 degree bolt lift to manipulate the mechanism. The bolt locks into the receiver/frame and has locking lugs which are tapered at the front; plunger ejector and hook extractor.
- overall length with a 570mm barrel in short action 223 REM caliber is 1080mm (42.52") average weight is 3.08kg (6.8lbs).

Manufacturer

- marked on the receiver/frame and/or the barrel.

Action

- turn bolt action.

Serial Number

- marked on left side of receiver/frame following the model designation.

Calibre

- marked on barrel.
- rifling characteristics in 260 REM caliber: 1 turn in 229mm (9").

Shots

- detachable box magazine.
- magazines are available in a standard "flush" length (does not protrude from the stock) or as an extended magazine with increased capacity.

- "TIKKA" is a trade name used by Oy Tikkakoski AB of Tikkakoski, Finland prior to 1989.
- "TIKKA" is a trade name used by Sako Ltd. of Riihimaki, Finland since 1989.

Model

- "TIKKA T3" is marked on left side of receiver/frame.
- "Lite" may not be marked on the firearm.
- this model is available as the "T3 Lite" (synthetic stock, blued barrel) or the "T3 Lite Stainless" (synthetic stock, stainless steel barrel).
- features include: blued or stainless steel free-floating barrel; bolt release on left rear of receiver/frame; thumb safety on right rear of receiver/frame; magazine release located in the stock ahead of the trigger; lightweight injection molded synthetic stock; black rubber recoil pad and scope mounts included.
- this model is also available in left hand configuration.
- the bolt mechanism has an unconventional front locking lug system which locks at the four and ten o'clock position rather than the normal six and twelve o'clock position of most other Mauser-type bolt actions; this results in a short 70 degree bolt lift to manipulate the mechanism. The bolt locks into the receiver/frame and has locking lugs which are tapered at the front; plunger ejector and hook extractor.
- overall length with a 620mm barrel in magnum action 300 WIN MAG caliber is 1130mm (44.49") average weight is 2.90kg (6.4lbs).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- marked on the receiver/frame and/or the barrel.
Action	- turn-bolt design.
Serial Number	- serial number is marked on left side of receiver/frame following the model designation. - example observed with a letter prefix and five numbers.
Calibre	- marked on barrel. - rifling characteristics in 7MM-08 REM caliber: 1 turn in 240mm (9.5").
Shots	- detachable box magazine. - magazines are available in a standard "flush" length (does not protrude from the stock) or as an extended magazine with increased capacity.

Model	- "TIKKA T3" is marked on left side of receiver/frame. "Tactical" may not be marked on the firearm. - features include: cold hammer forged free-floating chrome-moly barrel; black matte manganese phosphatized metal surfaces; bolt release on left rear of receiver/frame; thumb safety on right rear of receiver/frame; magazine release located in the stock ahead of the trigger; adjustable cheek-piece with ambidextrous adjusting knob; polypropylene polymer stock; single stage adjustable trigger (optional single set trigger available); black rubber recoil pad; picatinny rail compatible with weaver or US standard military specifications; scope mounts, muzzle break, bipod and heavy duty swivels studs are optional accessories. - the bolt mechanism has an unconventional front locking lug system which locks at the four and ten o'clock position rather than the normal six and twelve o'clock position of most other Mauser-type bolt actions; this results in a short 70 degree bolt lift to manipulate the mechanism. The bolt locks into the receiver/frame and has locking lugs which are tapered at the front; plunger ejector and hook extractor. - overall length with a 600mm barrel in magnum action 300 WIN MAG caliber is 1110mm (43.7") average weight is 3.67kg (8.1lbs).
Manufacturer	- marked on the receiver/frame and/or the barrel.
Action	- turn bolt action.
Serial Number	- marked on left side of receiver/frame following the model designation.
Calibre	- marked on barrel. - rifling characteristics in 300 WIN MAG caliber: 1 turn in 279mm (11").
Shots	- detachable box magazine, straight feeding single column. - extra "color coded" magazines for use of different load are available as an option.

Notes

Make

- "TIKKA" is marked on the side of the receiver/frame.
- "TIKKA" is a trade name used by Oy Tikkakoski AB of Tikkakoski, Finland prior to 1989.
- "TIKKA" is a trade name used by Sako Ltd. of Riihimaki, Finland since 1989.

Model

- "TIKKA T3" is marked on left side of receiver/frame. "Varmint" may not be marked on the firearm.
- features include: cold hammer forged blued free-floating "bull" barrel; bolt release on left rear of receiver/frame; thumb safety on right rear of receiver/frame; magazine release located in the stock ahead of the trigger; high comb and wide forearm injection molded synthetic stock; single stage adjustable trigger; black rubber recoil pad and scope mounts included.
- the bolt mechanism has an unconventional front locking lug system which locks at the four and ten o'clock position rather than the normal six and twelve o'clock position of most other Mauser-type bolt actions; this results in a short 70 degree bolt lift to manipulate the mechanism. The bolt locks into the receiver/frame and has locking lugs which are tapered at the front; plunger ejector and hook extractor.
- overall length with a 600mm barrel in medium action 22-250 REM caliber is 1110mm (43.7") average weight is 3.58kg (7.9lbs).

Manufacturer

- marked on the receiver/frame and/or the barrel.

Action

- turn bolt action.

Serial Number

- marked on left side of receiver/frame following the model designation.

Calibre

- marked on barrel.
- rifling characteristics in 223 REM caliber: 1 turn in 203mm (8").

Shots

- detachable box magazine.
- magazines are available in a standard "flush" length (does not protrude from the stock) or as an extended magazine with increased capacity.

Notes

Make

- "TIKKA" is marked on the side of the receiver/frame.
- "TIKKA" is a trade name used by Oy Tikkakoski AB of Tikkakoski, Finland prior to 1989.
- "TIKKA" is a trade name used by Sako Ltd. of Riihimaki, Finland since 1989.

Model

- introduced in 2016
- "TIKKA T3x" is marked on left side of receiver/frame.
- features include: blued or stainless steel barrel; hooded front sight and ramped rear sight or drilled for scope or integral accessory rail; free-floating barrel; bolt release on left rear of receiver/frame; thumb safety on right rear of receiver/frame; magazine release located in the stock ahead of the trigger; laminated, high grade walnut or synthetic stock with recoil pad.
- the bolt mechanism has an unconventional front locking lug system which locks at the four and ten o'clock position rather than the normal six and twelve o'clock position of most other Mauser-type bolt actions; this results in a short 70 degree bolt lift to manipulate the mechanism; the normal bolt lift of most other types of bolt action rifles is 90 degrees. The bolt locks into the receiver/frame and has locking lugs which are tapered at the front; plunger ejector and hook extractor.
- overall length for the 510mm (20") barrel is 1020mm (40.25"), average weight is 3.3kgs (7.3 lbs).

Manufacturer

- "MADE IN FINDLAND" is marked on the receiver/frame and/or the barrel.

Action

- turn bolt operated.

Serial Number

- marked on left side of receiver/frame following the model designation.
- example observed with a letter prefix and five numbers.

Shots

- detachable box magazine.

Notes

Make

- "TIKKA" is marked on the left side of the receiver/frame.
- Trade name used by "Sako Ltd.".

Model

- Introduced in 2025.
- "T3x" is marked on the left side of the receiver/frame.
- The "T3x Ace Game" is a feature driven firearm, it is defined by its medium contour semi-fluted barrel and a single-stack magazine well.
- Features include: adjustable cheek piece; interchangeable pistol grip; magazine release paddle in front of the trigger guard; receiver/frame with integral accessory rail; spirally fluted bolt; round bolt knob; cocking indicator located behind the bolt; slide safety lever located at the rear right of the receiver/frame; may come in a variety of colour finishes.

Manufacturer

- "TIKKA" is marked on the left side of the receiver/frame.
- Trade name used by "Sako Ltd.".

Action

- Turn bolt operated.

Serial Number

- The serial number is marked on the left side of the receiver/frame.
- The observed serials consists of two (2) letters followed by four (4) digits.

Barrel

- The barrel length does not include any attached device such as flash-hider or muzzle brake.

Calibre

- The calibre designation is marked on the barrel.

Shots

- Detachable box magazine.
- The "T3x Ace" series chassis feature an interchangeable magazine well to accommodate both single and double-stack "Tikka" pattern magazines.
- The "T3x Ace Game" features a single-stack "Tikka" pattern magazine as manufactured.

Other Markings

- Proof mark is marked on the left side of the firearm.

Notes

Make

- "TIKKA" and the Tikka logos of an upside-down triangle with hash-marks resembling a scope reticle or face is marked on the firearm.

Model

- "TIKKA T3x" is marked on the left side of the receiver/frame.
- this is a version of the T3x rifle offered in a right-handed configuration, with a sporter-style checkered camouflage synthetic stock, in matte stainless finish, with round barrels, and in right-handed layout.
- other, similar rifles are offered with similar features, and care must be taken to not confuse these models with one another.
- features include: matte stainless finish; round barrel; no open sights (drilled and tapped for scope mounts or accessory rail); sliding manual safety to the rear of the bolt handle; cocking indicator at the rear of the bolt shroud; standard or set trigger; checkered camouflage synthetic sporter pistol-grip stock with Tikka logo grip-cap; sling swivel studs; and a rubber recoil pad.

Manufacturer

- the manufacturer is not marked on the firearm; Tikka is currently part of a conglomerate owned by Beretta through SAKO.

Action

- turn bolt design.

Serial Number

- serial-numbered on the receiver/frame.

Shots

- detachable box magazine.

Notes

Make

- "TIKKA" and the Tikka logos of an upside-down triangle with hash-marks resembling a scope reticle or face is marked on the firearm.

Model

- "TIKKA T3x" is marked on the off-side of the receiver/frame (left side for a right-handed rifle, right side for a left-handed rifle).
- this is a version of the T3x rifle offered with a sporter-style checkered walnut stock, in blued, with fluted barrels, and in left- and right-handed versions.
- other, similar rifles are offered with similar features, and care must be taken to not confuse these models with one another.
- features include: blued finish; fluted barrel; no open sights (drilled and tapped for scope mounts or accessory rail); sliding manual safety to the rear of the bolt handle; cocking indicator at the rear of the bolt shroud; standard or set trigger; checkered walnut sporter pistol-grip stock with Tikka logo grip-cap; sling swivel studs; and a rubber recoil pad.

Manufacturer

- the manufacturer is not marked on the firearm; Tikka is currently part of a conglomerate owned by Beretta through SAKO.

Serial Number

- serial-numbered on the receiver/frame.

Shots

- detachable box magazine.

Notes

Make

- "TIKKA" and the Tikka logos of an upside-down triangle with hash-marks resembling a scope reticle or face is marked on the firearm.

Model

- "TIKKA T3x" is marked on the off-side of the receiver/frame (left side for a right-handed rifle, right side for a left-handed rifle).
- this is a lightweight version of the T3x rifle offered with a sporter-style checkered black synthetic stock, in blued, with round barrels, and in right- and left-handed versions.
- other, similar rifles are offered with similar features, and care must be taken to not confuse these models with one another.
- features include: blued finish; round barrel; no open sights (drilled and tapped for scope mounts or accessory rail); sliding manual safety to the rear of the bolt handle; cocking indicator at the rear of the bolt shroud; standard or set trigger; checkered synthetic sporter pistol-grip stock with Tikka logo grip-cap; sling swivel studs; and a rubber recoil pad.

Manufacturer

- the manufacturer is not marked on the firearm; Tikka is currently part of a conglomerate owned by Beretta through SAKO.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- turn bolt design.
Serial Number	- serial-numbered on the receiver/frame.
Shots	- detachable box magazine.

Notes

Make

- "TIKKA" and the Tikka logos of an upside-down triangle with hash-marks resembling a scope reticle or face is marked on the firearm.

Model

- "TIKKA T3x" is marked on the off-side of the receiver/frame (left side for a right-handed rifle, right side for a left-handed rifle).
- this is a lightweight stainless version of the T3x rifle offered with a sporter-style checkered black synthetic stock, with round barrels, and in right- and left-handed versions.
- other, similar rifles are offered with similar features, and care must be taken to not confuse these models with one another.
- features include: matte stainless finish; round barrel; no open sights (drilled and tapped for scope mounts or accessory rail); sliding manual safety to the rear of the bolt handle; cocking indicator at the rear of the bolt shroud; standard or set trigger; checkered synthetic sporter pistol-grip stock with Tikka logo grip-cap; sling swivel studs; and a rubber recoil pad.

Manufacturer

- the manufacturer is not marked on the firearm; Tikka is currently part of a conglomerate owned by Beretta through SAKO.

Action

- turn bolt design.

Serial Number

- serial-numbered on the receiver/frame.

Shots

- detachable box magazine.

Notes

Make

- "TIKKA" and the Tikka logos of an upside-down triangle with hash-marks resembling a scope reticle or face is marked on the firearm.

Model

- "TIKKA T3x" is marked on the left side of the receiver/frame.
- this is a lightweight version of the T3x rifle offered with a sporter-style checkered black synthetic stock, in blued or stainless, with round fluted barrels.
- other, similar rifles are offered with similar features, and care must be taken to not confuse these models with one another.
- features include: stainless finish; fluted barrel; no open sights (drilled and tapped for scope mounts or accessory rail); sliding manual safety to the rear of the bolt handle; cocking indicator at the rear of the bolt shroud; standard trigger; checkered synthetic sporter pistol-grip stock with Tikka logo grip-cap; sling swivel studs; and a rubber recoil pad.

Manufacturer

- the manufacturer is not marked on the firearm; Tikka is currently part of a conglomerate owned by Beretta through SAKO.

Action

- turn bolt design.

Serial Number

- serial-numbered on the receiver/frame.

Shots

- detachable box magazine.

118407 - 1	222 REM MAG/12 GA X 2 3/4"	2	660	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	
118407 - 2	30-30 WIN/20 GA X 3"	2	660	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "TIKKA" is a trade name used by Oy Tikkakoski AB of Tikkakoski, Finland prior to 1989.
- "TIKKA" is a trade name used by Sako Ltd. of Riihimaki, Finland since 1989.

Model

- this is an early fore-runner of the Tikka M07 combination gun, made in two caliber/gauge combinations.
- the primary external differences between the M07 and the Twin are that the M07 has a rectangular-shaped selector on the left-hand side of the receiver/frame and a ventilated barrel rib, while the Twin has a simple round button selector and no rib.
- features include: walnut Monte Carlo pistol-grip stock and forearm; blued finish; exposed hammer; open adjustable sights; grooved for mounting a telescopic sight; an optional safety offset to the right of the hammer, and an integral compensator built into the barrel hanger at the muzzle.

Action

- over/under pattern; shotgun over rifle.

Serial Number

- numbered on receiver/frame.

Barrel

- the shot barrel on this firearm is 26"/660mm, while the rifle barrel is 24 1/2"/622; the compensator does not count towards the length of the rifle barrel.

119537 - 1	14 GA X 2"	2	746	Antique AFR, Section 1, para. 5	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make may be marked on the lockplate as, "Timings & Sons".
- John Henry Timings manufactured firearms in Biringham, England, from 1845 to 1863. In 1964, his son joined the family business and the name was changed to Timings & Sons from 1864 to 1883.
- the John Timings family manufactured firearms at the following addresses:
- Little Charles Street - 1845.
- 21 Lower Priory - 1846 to 1852.
- 43 Weaman Street - 1853 to 1855.
- 117 Great Charles Street - 1861 to 1883.

Model

- model is not marked on the firearm.
- this is a generic entry for those Timings side by side shotguns that are not identifiable as to model.
- features include: side by side configuration; single or double triggers and a hinged boxlock action.

Serial Number

- the receiver/frame may not have a serial number.

Calibre

- the gauge may not be marked on the firearm.

60637 - 1	450 REV CF	5	139	Antique AFR, Section 1, para. 7	Manufacturer Specifications and Commercial Customization	

Notes

Make

- make is not marked on the firearm.

Model

- "THOMAS'S PATENT NO. 779" may be marked on the left side of the receiver/frame.
- British Patent Number 779 was granted to John Thomas on March 13, 1896.
- John Thomas was a manager for the firm of Tipping & Lawden.
- 1,200 revolvers were manufactured under license from Thomas from 1870 to 1877.
- features include: blued finish; round barrel with octagonal shroud; solid top receiver/frame; right side mounted, hinged loading gate; external spurred hammer; saw handle, checkered, wood grips; lanyard loop.
- NOTE: the lever on the right side of the receiver/frame unlocks the barrel and cylinder. A knob mounted under the barrel rotates to the left and is then pushed forward. As the cylinder moves forward the cartridge cases are pulled from the cylinder by a fixed ejector plate.
- John Thomas was granted British patent No. 779 in 1869 for a self extracting revolver; No. 324 in 1870 and No. 3091 in 1871 fo a Wedge Bolt action; and No. 3548 in 1874 with T.T. Lawdew

Manufacturer

- manufacturer's name may not be marked on the firearm.
- Thomas Tipping-Lawden was located at Legge Street, Birmingham, England in 1821.
- Thomas Tipping-Lawden moved to 40 Constitution Hill, Birmingham in 1828.
- Caleb & Thomas Tipping-Lawden formed a partnership known as "Tipping & Lawden" in 1837.
- Tipping & Lawden traded from 40 and 41 Constitution Hill and 18 Buckingham Street in Birmingham.

- Luke R. Tippins and his son, John Tippins were both members of the Colchester Rifle Club.
- Luke R. Tippins was also the author of several publications: "Minature Rifle Shooting", "Modern Rifle Shooting in Peace and War", and "The Rifleman's Companion".
- "Modern Rifle Shooting in Peace and War" was printed by J.S. Phillips from 1900 to 1910.
- "The Rifleman's Companion" was printed by Mills & Boon circa 1910.

Model

- model designation is not marked on the firearm.
- Lee-Enfield family of firearms were produced in great numbers and were made available at a reasonable cost, many were converted from military configuration to "Sporting" rifles.
- "Sporter" conversions usually consisted of removing the top handguard(s) and re-configuring the forend by reducing its length. Aftermarket sights or telescopic sighting systems were also frequently added. Although still easily recognized as a Lee-Enfield it is sometimes impossible to determine the original manufacturer and/or model.
- many of these conversions were done on a commercial scale while others were done by individuals.

Manufacturer

- "B.S.A.Co." was marked on the right side of the receiver/frame at the wrist.

Action

- turn-bolt design.

Serial Number

- observed firearm did not have a serial number.

Shots

- detachable box magazine.

Notes

Make

- "TISAS TURKIYE" is marked on the firearm.
- The make is marked on the left side of the firearm.

Model

- "Zigana PX-9" is marked on the left side of the slide.
- This is a polymer-framed semi-automatic pistol very reminiscent of the Springfield XD-9 series, but fitted with a manual ambidextrous thumb safety, rather than a grip safety.
- Features include: black synthetic receiver/frame, with black, stainless, olive green, or desert tan slide; open fixed three-dot sights; dust cover accessory rail; left-side takedown lever and slide-stop; ambidextrous manual safety and magazine release; cocked indicator on the backplate; and interchangeable backstraps to fit different sizes of hands.
- Extended ambidextrous thumb safety located on the firearm.
- Magazine release located on the side of the firearm.
- Slide lock lever located on the side of the firearm.
- Takedown catch/lever located on the side of the firearm.
- The model designation is marked on the left side of the firearm.

Manufacturer

- "TISAS TURKIYE" is marked on the firearm.
- The manufacturer is marked on the left side of the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- Recoil operated.
Serial Number	- serial number is marked on a frame insert, the right side of the slide, and the right side of the barrel hood. - The serial number is marked on the underside of the receiver/frame.
Calibre	- The calibre designation is marked on the barrel, visible through the ejection port.
Shots	- Detachable box magazine.

Notes

Make

- "W.H.. TISDALL" may be marked on the barrel rib.

Model

- "Cape Gun" is not marked on the firearm.
- "Cape Gun" is a double barrel, side by side combination gun with a rifled barrel and a smoothbore barrel.
- "Cape Gun" is made to a specific customer's order as per chambering, barrel length, stock dimensions, and engraving/finish.
- features include: round side by side barrels with a fixed front sight and an adjustable rear sight; front hinged receiver/frame with a break open lever mounted on the top tang; exposed side hammers; double trigger; checkered wood forearm and straight grip or semi-pistol grip buttstock.

Manufacturer

- "W.H. TISDALL, BIRMINGHAM" may be marked on the barrel rib.
- William Henry Tisdall was a firearm manufacturer located in Birmingham and London, he produced firearms from 1863 to 1900 at the following address.
- 1863 to 1867, Court, 5 Steelhouse Lane.
- 1868 to 1873, 40 Digby Street.
- 1874 to 1892, 47 Whittall Street.
- 1893 to 1900, 18 Sand Street.

Action

- side by side barrel configuration, hinged barrel design.

Serial Number

- serial number is marked on the receiver/frame.

118512 - 2	577/450 MARTINI-HENRY	1	737	Antique AFR, Section 1, para. 3	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "W.H. TISDALL, BIRMINGHAM" is normally marked on top of the barrel.

Model

- model designation is not marked on the firearm.
- this model is manufactured on a Martini-Henry receiver/frame.
- features include: single action trigger mechanism, blued receiver/frame and barrel, a teardrop safety lever on the right side of the receiver/frame, a graduated rear sight located near the rear of the barrel with a fixed front sight, and wooden stock and a wooden forend with two barrel bands.
- a lever is located behind the trigger. As the lever is moved downward, a falling ramp moves downward, allowing access to the chamber.
- this type of Martini-Henry sporting rifle could have been manufactured circa early 1870's to the late 1890's.

Manufacturer

- "W.H. TISDALL, BIRMINGHAM" is normally marked on top of the barrel.
- William Henry Tisdall was a firearm manufacturer located in Birmingham and London, he produced firearms from 1863 to 1900.
- William Henry Tisdall was located in Birmingham at the following address.
- 1863 to 1867, Court, 5 Steelhouse Lane.
- 1868 to 1873, 40 Digby Street.
- 1874 to 1892, 47 Whittall Street.
- 1893 to 1900, 18 Sand Street.

Action

- lever actuated, manually operated single-shot rifle.

Serial Number

- the serial number is marked on the underside of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- the calibre designation is normally not marked on the firearm.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Notes

Make

- "TITAN" is marked on the firearm.
- "TITAN" was a trade name used by "Retolaza Hermanos" of Eibar, Spain.
- "TITAN" was a trade name used by "Tanfoglio Giuseppi" of Brescia, Italy on firearms imported by "E.I.G." of Miami, Florida, U.S.A..
- "TITAN" was a trade name used by "F.I.E." of Hialeah, Florida, U.S.A.

Model

- "TITAN PATENT" is marked on the left side of the slide, "TITAN" is also marked on both grip plates.
- features include: blow back operated; single action trigger; detachable box magazine; lever type safety located on left side of the receiver/frame; button-type magazine release located at rear of buttstrap; blued finish.

Manufacturer

- Retolaza Hermanos is not marked on the firearm.
- "R.H." in a circle is the manufacturer's initials and may be marked on the receiver/frame and grip plates.
- Retolaza Hermanos of Eibar, Spain was in business from 1895 to 1936.
- Retolaza Hermanos manufactured Velo-Dog pocket revolvers under the names of Brompetier, Puppy, Velo-Brom and Velo-Mith.
- Retolaza Hermanos started manufacturing semi-automatic pistols circa 1906.
- Retolaza Hermanos manufactured semi-automatic pistols under the names of Gallus, Liberty, Military, Paramount, Retolaza, Stosel, Titan, and Titanic.
- an observed example was also marked "MANUFACTURE OF FIRE ARMS" on the left side of the slide; significance of this marking is unknown, it may have been a trade name used by Retolaza Hermanos.

Action

- blow back operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- known example had a five digit number without prefix or suffix marked on the right side of the receiver/frame.
Calibre	- calibre is marked on the left side of the slide as, "6.35 CAL (25)".
Shots	- detachable box magazine.
Other Markings	- observed example was marked, "Made in Spain" on the rear left side of the receiver/frame, and "MANUFACTURE OF FIRE ARMS" on the left side of the slide.

FRT Report

Firearm Reference Number (FRN): 125588
Make: Titusville Armory
Model: TA-15

Summary

Make:	Titusville Armory
Model:	TA-15
Manufacturer:	Titusville Armory
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
125588 - 1	5.56MM NATO	5	508	Prohibited PFR, Part 1, para. 87(z.857)	Manufacturer Specifications and Commercial Customization	
125588 - 2	5.56MM NATO	30	508	Prohibited PFR, Part 1, para. 87(z.857)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "Titusville" over the Titusville Armory's "TA" cross hairs logo over "Armory" is marked on the left side of the magazine housing.
- "TITUSVILLE ARMORY", "TITUSVILLE FL" and "USA" are marked on the left side of the lower receiver/frame.

Model

- "TA-15" is marked on the left side of the magazine housing of the lower receiver/frame.
- this firearm resembles a Colt AR-15.
- features may include: chrome moly or stainless steel round barrel with or without threaded muzzle for flash suppressor/hider; gas block assembly with or without front sight assembly and without bayonet lug; A2 upper (integral carrying handle and rear sight) or A3 upper (Picatinny rail) with or without detachable carrying handle; forged lower receiver/frame with regular trigger guard; two stage trigger; black or green furniture; A2, mid-length, multi rail or free floating tube handguard; rubber pistol grip; A2 fixed synthetic buttstock or multi position CAR stock.

Manufacturer

- "TITUSVILLE ARMORY", "TITUSVILLE FL" and "USA" are marked on the left side of the lower receiver/frame.

Action

- gas operated.

Serial Number

- serial number is marked on the left side of the magazine housing of the lower receiver/frame.
- observed serial number had a "TA" prefix followed by three numbers.

Calibre

- "5.56x45mm" may be marked on the left side of the magazine housing of the lower receiver/frame.

FRT Report

Firearm Reference Number (FRN): 79052
Make: Tiwa
Model: Auto Pistol

Summary

Make:	Tiwa
Model:	Auto Pistol
Manufacturer:	
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	SPAIN
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
79052 - 2	25 AUTO	6	51	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
79052 - 1	6.35MM	6	51	Prohibited CC 84(1) "prohibited firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make	- marked on the left side of the receiver/frame may be "Aut. Pistole TIWA Cal. 6.35." or "Auto. Pistol TIWA Cal. 6.35." (in both cases the 35 is smaller and underlined.)
Model	- this is a small pocket sized automatic pistol that features black hard rubber grip plates, vertical cocking serrations on the rear of the slide, no sights, blued finish and a slide hold open lever on the left side of the receiver/frame.
Serial Number	- sample seen has a five digit serial number marked on the right rear of the receiver/frame.
Calibre	- marked on the left side of the receiver/frame and on the pistol grip is "Cal. 635" (the 35 is smaller and underlined.)
Shots	- detachable box magazine.
Other Markings	- samples have been noted with the following marks; - a standing lion facing left (Spanish definitive proof on handguns, circa 1923-1929) may be marked on the left rear of the receiver/frame and slide. - a crest with a crown over it and a cross in it (Spanish admission mark (Eibar), circa 1929-1931) may be marked on the left rear of the receiver/frame. - "A" with a star over it (Belgian inspectors mark) have also been noted marked on the left rear of the frame. - the grip plates may be plain or have a picture, in an oval, of the God "Thor" swinging a large club at a serpent.
Remarks	- it is believed that the "Tiwa" marked pistols were produced in Spain in the 1920's.

Firearm Reference Number (FRN): 120492
Make: TKO
Model: Single Shot Pistol

Summary

Make:	TKO
Model:	Single Shot Pistol
Manufacturer:	
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	ARGENTINA
Serial Numbering:	
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
120492 - 2	22 LR	1	101	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	
120492 - 1	5MM FLOBERT	1	101	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make is marked on the grip frame of the firearm.

Model

- the model designation is not marked on the firearm.
- this is a very low-cost single-shot cartridge pistol, of little more than a basic "zip-gun" design, made for domestic sale in Argentina.
- features include: moulded synthetic grip-frame; stamped, folded and welded receiver/frame; stamped trigger without any trigger-guard; nickeled barrel threaded into the receiver/frame; manually-cocked striker at rear of pistol; fixed open sights; and a "bolt-action"-style of loading/unloading mechanism

Action

- bolt-operated single-shot.

Notes

Make

- "TNW. VERNONIA. OR." over "ASR. MULTI. SER." (serial number) was observed marked on the left side of the receiver/frame.

Model

- "ASR" over "9/40/357 PAT." is marked on the left side of the magazine housing.
- "TNW. VERNONIA. OR." over "ASR. MULTI. SER." (serial number) was observed marked on the side of the receiver/frame.
- "ASR" denotes "Aero Survival Rifle".
- "ASR" model is of a modular design.
- "ASR" model is not of the design commonly known as the AR15/M-16 rifle.
- features include: round interchangeable barrel; tubular receiver/frame with right side cocking handle, left and right side ejection ports, top mounted Picatinny type rail, underside mounted rail with or without a fold down grip assembly, and a six position collapsible buttstock; one piece removable trigger mechanism and magazine housing group; black or black with green or pink flames finish.
- over all length with a 413 mm barrel (16.25") barrel installed is 749 mm (29.5").
- overall length with the 413 mm (16.25') barrel removed for storage or transportation is 438 mm (17.25").

Manufacturer

- "TNW. VERNONIA. OR." over "ASR. MULTI. SER." (serial number) was observed marked on the left side of the receiver/frame.

Action

- blowback operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- Serial number was marked on the left side of the receiver/frame. Observed serial numbers have consisted of six numbers and a letter followed by four numbers.
Calibre	- "TNW. VERNONA. OR." over "ASR. MULTI. SER." (serial number) was observed marked on the left side of the receiver/frame.
Shots	- detachable Glock type box magazines. - the TNW, Model ASR rifle was designed to utilize the standard full size GLOCK pistol magazines in 9mm LUGER, 40 S&W & 45 AUTO Calibres. - 22 LR conversion utilizes magazines designed for the Remington "597".
Canadian Law Comments	- the ten round limit specified in the Cartridge Magazine Control Regulations applies to magazines for this firearm provided: a) the magazine is originally designed for use in a semi-automatic handgun, and b) the handgun is commonly available in Canada. - In the case of this firearm, it has been determined that the component commonly referred to as the upper receiver assembly, into which the barrel is mounted and which contains the breech mechanism and upon which the manufacturer's identification, model identification, proof information, and the full serial number is marked, is the receiver/frame for the purposes stated within the Firearms Act and the Criminal Code of Canada.

Notes

Make

- "TNW. VERNONIA. OR." over "ASP. MULTI. SER. (serial number)" was observed marked on the left side of the receiver/frame.

Model

- the model is marked on the firearm.
- this is a pistol counterpart to the ASR rifle, designed to use Glock pistol magazines.
- features include: parkerized/phosphated barrel and bolt, with the upper and lower receiver/frames available in a variety of colours and finishes; ventilated barrel shroud; open adjustable sights on a full-length Picatinny rail (may be replaced with optics); forearm rail for mounting accessories; right-side operating handle; AR-15-style pistol-grip; and a neoprene-covered buffer tube at the rear of the pistol.

Manufacturer

- "TNW. VERNONIA. OR." over "ASP. MULTI. SER. (serial number)" was observed marked on the left side of the receiver/frame.

Action

- blowback operated.

Serial Number

- serial-numbered on the receiver/frame.

Shots

- detachable box magazine.
- this firearm uses Glock pistol magazines.

Notes

Make

- "TNW" and "INC" in an oval is marked on the right side plate of the receiver/frame.

Model

- the Browning M1919A4 firearm was discontinued by TNW in 2008.
- "BROWNING M1919A4" is not marked on the receiver/frame.
- "US GOVERNMENT", "MODEL 1919 A4/A6 MACHINE GUN", "CALIBER ## SEMI AUTO", VERONIA OR" and "SER NO 000###" may be marked on the right side of the receiver/frame.
- "BROWNING M1919A4" is a re-creation of the United States Service, .30 calibre, Browning Machine Gun, M1919A4.
- the Browning Machine Gun was named after the inventor, John M. Browning.
- "BROWNING M1919A4" is capable of semi-automatic fire only.
- the Browning Machine Gun M1919 could be configured into sub-models for different roles. A partial list of the possible configurations follows:

a) Browning Machine Gun M1919A4:
- M1919A4 is an air-cooled firearm which may be found in flexible configuration for infantry use and is normally fired from a tripod, or mounted on an armoured fighting vehicle.
- M1919A4 version feeds belts of ammunition from the left side.

b) Browning Machine Gun M1919A5:
- M1919A5 is an air-cooled firearm designed for fixed configuration and use in an armoured fighting vehicle. Rate of fire 550 to 650 shots per minute.
- M1919A5 version feeds belts of ammunition from the left side.

c) Browning Machine Gun M1919A6:
- M1919A6 is an air-cooled firearm which may be configured for infantry use with a carrying handle, bipod and shoulder stock.
- M1919A6 version feeds belts of ammunition from the left side.

Manufacturer

- "TNW" and "INC" in an oval is marked on the right side plate of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Type	- designed and manufactured in semi-automatic fire configuration. - the right-hand, side-plate has a shoulder not found on full automatic versions, (see images). - this side plate was manufactured with the shoulder to prevent full automatic parts from being installed.
Action	- "short" recoil operated. - the right-hand, side-plate has a shoulder not found on full automatic versions, see images. - this side plate was manufactured with the shoulder to prevent full automatic parts from being installed.
Serial Number	- the serial number rationalization is unknown. - serial number observed consisted of six digits without sprefix or suffix - zeros are used as place holders to achieve six digits.
Calibre	- calibre is marked on the right side of the receiver/frame.
Shots	- belt-fed firearm.
Canadian Law Comments	- Browning Machine Gun receivers: - The five sided box consisting of top and bottom plates, left and right side plates and the front trunnion block is the receiver/frame for all purposes of the Criminal Code, Section 2 definition of "firearm". - For regulatory purposes, when the five sided box receiver/frame is further disassembled, the receiver/frame component plate where the manufacturer information and serial number are found, is used to establish the description for the purpose of firearms registration. - The classification of this firearm as a semi-automatic firearm is based on the presumption that none of the original five (5) receiver components were reused. This is what was understood to be the meaning of the claim by the manufacturer that the firearm is a "newly manufactured semi-automatic firearm".
Remarks	- this firearm is a re-creation of the United States Service, 30 calibre, Browning Machine Gun, M1919A4, in semi-automatic fire configuration. - the receiver has been designed and manufactured to prevent the use of full-auto parts. - the manufacturer uses surplus US parts to build receivers/frames into complete firearms.

- manufactured in semi-automatic configuration.
- the right-hand side-plate has a shoulder not found on full automatic versions, see images.
- this side plate was manufactured with the shoulder to prevent full automatic parts from being installed.

Serial Number

- the serial number rationalization is unknown.
- serial number observed consisted of six digits without sprefix or suffix - zeros are used as place holders to achieve six digits.

Calibre

- calibre is marked on the right side plate of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots

- belt fed

Canadian Law Comments

- Browning Machine Gun receivers:

- The five sided box consisting of top and bottom plates, left and right side plates and the front trunnion block is the receiver/frame for all purposes of the Criminal Code, Section 2 definition of "firearm".
- For regulatory purposes, when the five sided box receiver/frame is further disassembled, the receiver/frame component plate where the manufacturer information and serial number are found, is used to establish the description for the purpose of firearms registration.
- The classification of this firearm as a semi-automatic firearm is based on the presumption that none of the original five (5) receiver components were reused. This is what was understood to be the meaning of the claim by the manufacturer that the firearm is a "newly manufactured semi-automatic firearm".

Remarks

- this firearm is a re-creation of the United States Service, Browning Machine Gun, Calibre 50, M2 HB, in semi-automatic fire configuration.
- the receiver has been designed and manufactured to prevent the use of full-auto parts.
- the manufacturer uses surplus military parts to build the receiver/frame into complete firearms.

Firearm Reference Number (FRN): 148947
Make: TNW
Model: Browning M2 Heavy Barrel

Summary

Make:	TNW
Model:	Browning M2 Heavy Barrel
Manufacturer:	Technetwork (TNW)/Canadian Arsenals Limited (CAL)
Level:	Converted Automatics
Type:	Machine Gun
Action:	Converted Automatic
Country of Manufacturer:	
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
148947 - 1	50 BMG	N/A	1143	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make

- "TNW" and "INC" in an oval is marked on the right side plate of the receiver/frame.

Model

- "TNW" and "INC" in an oval, over "U.S. GOVERNMENT MODEL HB M2", over "SEMI AUTO 50 CALIBER", over "VERONIA OR", over "SER NO 000###" are marked on the right side plate of the receiver/frame.
- this firearm is a re-creation of the United States Service, Browning Machine Gun, Calibre 50, M2 HB, in semi-automatic fire configuration.
- "Browning Machine Gun" was named after the inventor, John M. Browning.

Manufacturer

- "TNW" and "INC" in an oval is marked on the right side plate of the receiver/frame.
- TNW converted a Browning Machine Gun originally manufactured by Canadian Arsenal Limited to be capable of semi-automatic fire only.
- TNW's right side plate has a shoulder not found on full automatic versions.
- TNW's right side plate was manufactured with the shoulder to prevent full automatic parts from being installed.

Action

- no longer capable of full automatic fire.

Serial Number

- serial number rationalization is unknown.
- TNW's assigned serial number consists of six digits without a letter prefix or suffix, zeros are used as place holders to achieve six digits.
- Canadian Arsenals Limited (CAL) original firearm serial number can be found marked on the top plate (of the five sided box receiver) and is consistent in location, format, size, style and font with an original Canadian Arsenals Limited (CAL) produced 50 Calibre Browning Machine Gun, Models M2 or M3 machine gun.

Calibre

- calibre is marked on the right side plate of the receiver/frame.

Shots

- belt fed.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- Browning Machine Gun receivers:
(1) - the five sided box consisting of top and bottom plates, left and right side plates and the front trunnion block is the receiver/frame for all purposes of the Criminal Code, Section 2 definition of "firearm".
(2) - for regulatory purposes, when the five sided box receiver/frame is further disassembled, the receiver/frame component plate where the manufacturer information and serial number are found, is used to establish the description for the purpose of firearms registration.
(3) - the classification of a semi-automatic firearm is based on the presumption that none of the original five (5) receiver components were reused. This is what was understood to be the meaning of the claim by the manufacturer that the firearm is a "newly manufactured semi-automatic firearm".
(4) - the Criminal Code PART III, Section 84 para (c) definition - prohibited firearm means, "an automatic firearm, whether or not it has been altered to discharge only one projectile with one pressure of the trigger".

Other Markings

- this firearm was constructed utilizing at least one component of the original receiver/frame of a 50 Calibre Browning Machine Gun, Model M2 or M3 Aircraft Basic. The original firearm serial number can be found marked on the top plate (of the five sided box receiver) and is consistent in location, format, size, style and font with an original Canadian Arsenals Limited (CAL) produced 50 Calibre Browning Machine Gun, Model M2 or M3 Aircraft Basic machine gun.

Remarks

- TNW's firearm is a re-creation of the United States Service, Browning Machine Gun, Calibre 50, M2 HB, (in theory) in semi automatic fire configuration.
- TNW receiver's right side plate has been designed and manufactured to prevent the use of full-automatic breech block.
- TNW has used surplus military machine gun parts to build the receiver/frame into a complete firearms.

Notes

Make

- "TNW" and "INC" in an oval is marked on the right side plate of the receiver/frame.

Model

- "US GOVERNMENT, MODEL M37 SEMI AUTO 30 CALIBRE" is marked on the right side of the receiver/frame.
- the TechNetWork (TNW) "US GOVERNMENT, MODEL M37 SEMI AUTO 30 CALIBRE" firearm is a semi automatic re-creation of the United States Service, Browning Machine Gun, M37, which is itself a variation of the Browning Machine Gun M1919 (A4-A5-A6), series of machine guns.
- "GUN, MACHINE, CAL .30, M37" is configured as a co-axial, turret mounted machine gun and may be reconfigured easily to a flexible helicopter door gun.
- the main difference between the Browning M1919 family of machine guns and the M37 is the ability to feed belts from left or right side, in a manner similar to the 50 Calibre Browning M2 series of machine guns.
- features include: perforated barrel jacket having a muzzle booster cap or cone shaped flash hider; the rectangular receiver/frame is riveted steel plate, with a folding front sight bracket attached to the front of the receiver/frame and a ladder type rear sight mounted inside a protective bracket which is an integral part of the top plate; twin cover latches are located one on each side at the rear of the cover; right side mounted breech bolt retracting bar; back plate mounted pistol grip and buffer group; twin spade triggers protruding from the back plate (similar to the 50 Calibre Browning M2); bottom front and rear mounting points; parkerized finish.

Manufacturer

- "TNW" and "INC" in an oval is marked on the right side plate of the receiver/frame.

Action

- short recoil operated.

Serial Number

- sample serial number observed - 000100.

Shots

- Belt fed firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- Browning Machine Gun receivers (and other similar guns with a box type receiver construction)
- The five sided box consisting of top and bottom plates, left and right side plates and the front trunnion block is the receiver/frame for all purposes of the Criminal Code, Section 2 definition of "firearm".
- For Regulatory purposes, when the five sided box receiver/frame is further disassembled, the receiver/frame component plate where the manufacturer information and serial number are found, is used to establish the description for the purpose of firearms registration.
- The classification of this firearm as a semi automatic firearm is based on the presumption that none of the original five (5) receiver components were reused. This is what was understood to be the meaning of the claim by the manufacturer that the firearm is a "newly manufactured as a semi-automatic firearm".

Remarks

- this firearm is a re-creation of the United States Service, Browning Machine Gun, M37, in semi automatic fire configuration.
- the receiver has been designed and manufactured to prevent the use of full-auto parts.
- the manufacturer uses surplus military parts to build the semi-automatic receiver/frame into complete firearms.

Notes

Make	- "TNW inc." in an oval is marked on the right side of the firearm.
Model	- "SEMI-AUTO MG34" is marked on the right side of the firearm. - this firearm is a semi-automatic recreation of the German Machine Gun, Model MG 34, air cooled, machine-gun capable of semi-automatic fire only. - features include: blued finish, bi-pod mount, adjustable sights, perforated cooling jacket surrounding the barrel.
Manufacturer	- "TNW inc" in an oval and "VERNONIA OR." is marked on the right side of the firearm.
Type	- designed and manufactured to be capable of semi-automatic fire only.
Action	- recoil operated, with gas assist by muzzle booster.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number is marked on the top rear of the receiver/frame.
Calibre	- "8mm" is marked on the right sdie of the firearm.
Shots	- belt fed machine gun. - ammunition is packaged in 50 round non-disintegrating belts. - belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum. - a 75 round saddle drum magazine is available for this firearm (which is a true magazine).
Canadian Law Comments	- MG 34 Machine Gun receivers - The machined metal fabrication, from butt socket to the barrel jacket is the receiver/frame for all purposes of the Criminal Code, Section 2 definition of "firearm". - For regulatory purposes the serial number is found on the top rear of the receiver/frame. - The classification of this firearm as a semi automatic firearm is based on the presumption that the receiver is newly manufactured. This is what was understood to be the meaning of the claim by the manufacturer that the firearm is a "newly manufactured semi-automatic firearm".
Remarks	- this firearm is a semi-automatic recreation of the German Service Machine Gun, Model MG 34, air cooled, machine-gun capable of semi-automatic fire only. - the receiver has been designed and manufactured to prevent the use of full-auto parts. - the manufacturer uses surplus parts to build the receivers / frames into complete firearms.

Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
126442 - 1	8MM MAUSER	N/A	600	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Model

- this firearm is a recreation of the German Service Machine Gun, Model MG 42, air cooled, machine-gun in semi-automatic fire configuration.
- features include: blued finish, bi-pod mount, adjustable sights, perforated cooling jacket surrounding the barrel.

Type

- designed and manufactured in semi-automatic fire configuration.

Action

- recoil operated, with gas assist by muzzle booster.

Shots

- belt fed machine gun.
- ammunition is packaged in 50 round non-disintegrating belts.
- belts may be linked together to form a continuous belt of any reasonable capacity, or the 50 round belt may be inserted into a 50 cartridge container/drum.
- the so-called "drum magazine" used by this firearm is a belt carrier and not a cartridge magazine.

Canadian Law Comments

- the rectangular sheet metal pressing/fabrication, from butt socket to the muzzle booster is the receiver/frame for all purposes of the Criminal Code, Section 2 definition of "firearm".
- when the start point is a full automatic firearm, and the component of the receiver/frame having the manufacturer information (in clear or in code) and serial number stamped or inscribed upon it is a purpose-built "semi-automatic" component; when any of the remaining portion of the original full automatic receiver is incorporated into the firearm, the resulting firearm is a "converted automatic" firearm.
- the Criminal Code PART III, Section 84 para (c) definition - prohibited firearm means, "an automatic firearm, whether or not it has been altered to discharge only one projectile with one pressure of the trigger".
- the so-called "drum magazine" used by this firearm is a belt carrier and not a cartridge magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- this firearm is a recreation of the German Service Machine Gun, Model MG42, air cooled, machine-gun in semi-automatic fire configuration.
- the receiver has been designed and manufactured to prevent the use of full-auto parts.
- the manufacturer used surplus parts to complete the firearms.

Notes

Make	- "TNW" and "INC" is found on the receiver/frame on the right side of the barrel jacket.
Model	- "PPSH41 SA" is marked on the right side of the barrel jacket (receiver/frame). - this firearm is a purpose built, semi-automatic version of the Russian Service submachine gun originally developed by Georgiy S. Shpagin in 1941. - features include: shrouded, blade front sight and an adjustable rear sight; round barrel with a full length ventilated jacket; hammer fired; tubular receiver/frame with a right side cocking handle; safety is mounted within the trigger guard; one piece wooden stock; steel butt plate; black finish. - overall firearm length is 970mm (38.2").
Manufacturer	- "TNW" and "INC" is found on the receiver/frame on the right side of the barrel jacket.
Type	- designed and manufactured to be capable of semi-automatic fire only.
Action	- blowback operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- numbers that have no identification value to the semi-automatic TNW, PPSH41 SA firearm may be found on reused, trigger housings on the "tang" portion. - the serial number will be found on the front right side of the barrel jacket (component of the receiver/frame). - serial number observed consisted of six numbers without a prefix or suffix - zeros are used as place holders to achieve six numbers.
Calibre	- "7.62X25" is marked on the side of the receiver/frame.
Shots	- detachable box magazine in 5 shots capacity. - detachable box magazine in 35 shots capacity. - drum magazine in 71 shots capacity available manufactured for use with the original Russian Service, Shpagin Model PPSH41.
Other Markings	- "MFG for MGS" is marked on the side of the receiver/frame of an observed example.
Remarks	- this firearm is a re-creation of the Russian Submachine Gun, Shpagin, Model PPSH41in semi-automatic fire configuration. - the TNW semi-automatic receiver/frame has been designed and manufactured to prevent the use of the automatic breech block and some trigger mechanism parts. - the operating system has been changed from fixed firing pin "advanced primer ignition-blowback" to "simple blowback-hammer fired" and has a reciprocating firing pin. - the manufacturer produces a purpose built semi-automatic receiver/frame and uses surplus military parts to build complete firearms.

Notes

Make

- "TNW INC" is marked on the side of the receiver/frame.
- "TNW" is an acronym formed from the full name of the business which is TechNetWork Firearms Incorporated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "M31 SA 9x19" is marked on the left side of the receiver/frame. - "SUOMI" may be marked on the left side of the rear sight assembly. - this firearm resembles a Suomi Model 1931 submachine gun with near precision and is capable of accepting magazines from an original full-automatic Suomi Model 1931 submachine gun. - as of 2012, there are two basic variations of this firearm model, both identified with the same model name, the original variation is striker fired and is manufactured in semi automatic configuration, the second variation is hammer fired and incorporates a different breech bolt, both variants utilize spring loaded firing pins, both firearms function in "simple blow back", both Incorporate a newly manufactured steel receiver/frame and both firearm variants are manufactured in semi automatic configuration. - this firearm is also available as a "buid-it-yourself kit" firearm. - features include: muzzle brake; ventilated barrel jacket; blade front sight, tangent adjustable rear sight; round, tubular receiver/frame; right side cocking handle and sliding safety catch mounted in the front of the trigger guard; wood one-piece buttstock; steel butt plate.
Manufacturer	- "TNW" INC" is marked on the right side of the receiver/frame. - "TNW" is an acronym formed from the full name of the business which is TechNetWork Firearms Incorporated.
Type	- also available as a "kit" firearm in which the TYPE and ACTION may not be the same as the firearm described by this FRT Record.
Action	- blowback operated, may be found in striker fired or hammer fired versions, both versions incorporate a retractable, spring loaded, firing pin. - the firing cycle commences with the bolt in the forward position.
Serial Number	- serial number is marked on the left side of the receiver/frame. - serial numbers have been observed both with six arabic numerals without prefix or suffix and with a letter prefix (Y) followed by six arabic numerals. - bear in mind that this firearm is also available as a "kit" in which the receiver tube is unfinished. In this case the serial number may not follow any rationalization; being unique to the manufacturer.
Barrel	- this firearm is available in two barrel lengths, one has a barrel extension approximately 95MM in length. - by actual measurement, the barrel and barrel extension is 414MM in length. - a second barrel length was manufactured specifically for the Canadian marketplace measuring 476MM in length.
Calibre	- "9x19" is marked on the left side of the receiver/frame.
Shots	- detachable box or drum magazine. - the M31 will take a number of various types of Suomi magazines and drum. magazines and cartridge magazines from other firearms such as the Russian or Chinese Model PPSH 41, Yugoslavian M49 and M49/57.
Canadian Law Comments	- Criminal Code of Canada PART III, Section 84. (2) "the length of a barrel of a firearm is b) in any other case, the distance from the muzzle of the barrel to and including the chamber, but does not include the length of any component, part or accessory including any component, part or accessory designed or intended to suppress the muzzle flash or reduce recoil". - when measured by the cleaning rod method, a barrel length of 414MM will be obtained, as this firearm has a barrel extension. This barrel extension is approximately 95MM in length which, by Canadian Law, cannot be included in the length of the barrel. Thusly, the barrel length of this firearm, for all administrative purposes of The Firearms Act and the Criminal Code, is 319MM in length. - for Canadian consumption a special barrel which is 476MM in length has been supplied to the Canadian Importer.
Remarks	- as of 2012, there are two basic variations of this firearm model, both identified with the same model name, the original variation is striker fired and is manufactured in semi automatic configuration, the second variation is hammer fired and incorporates a different breech bolt, both variants utilizing spring loaded, retractable, firing pins, both function in "simple blow back", both ncorporate a newly manufactured steel receiver/frame and both of which are manufactured in semi automatic configuration. - this firearm is also available as a "buid-it-yourself kit" firearm.

147007 - 1	36 PERCUSSION	6	191	Antique CC 84(1) "antique firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- marked "GEORGE TODD, AUSTIN" on the barrel.

Model

- the model is not marked on the firearm; this is a description of the firearm type.
- this is a copy of the Colt 1851 Navy, manufactured by George Todd, of Austin, Texas, from 1857 to 1861; these revolvers are known to have been used by the Confederate States during the US Civil War, and may bear "CS" markings.
- features include: typical Colt 1851 layout and operation; blued or browned finish; round, part octagonal or octagonal barrel, with under-barrel loading lever; flat-sided barrel block; iron frame; thick recoil shield and cut away on the right side to allow the nipples to be capped; walnut grips on a brass grip frame.

Manufacturer

- marked "GEORGE TODD, AUSTIN" on the barrel.
- George Todd was an Austin, Texas-based gunmaker during the 1850s and 60s (just prior to the US Civil War), whose copies of Colt revolvers are known to have been used by the Confederacy during the war. He later moved to Montgomery, Alabama.

Action

- single-action percussion revolver.

Serial Number

- numbered on the receiver/frame.

26529 - 1	9MM LUGER	8	115	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "TOKAGYPT" is marked on the firearm.
- "Tokagypt" is a modernized Tokarev model TT-33.
- Tokarev design is credited to Fedor V. Tokarev.
- Tokarev pistol was approved for service in Russia in 1930 as the Pistolet Tula-Tokarev or "TT-30".
- Tokarev pistol was originally manufactured at the Russian State Arsenal, Tula.
- Tokarev pistol was improved in 1933 and redesignated the "TT-33".
- Tokarev pistols have been manufactured in many countries including Bulgaria, China, Czechoslovakia, East Germany, Hungary, Poland, Romania, Russia and Yugoslavia.

Model

- this firearm has the Egyptian Crest on the left side of the slide.
- "TOKAGYPT 58" is marked on the left side of the slide.
- features include: generalized Tokarev layout and operation, with a manually-operated thumb safety lever at the left rear tang; blued finish; fixed open sights; left-side slide stop; single-action trigger mechanism with exposed round hammer; black synthetic grips; button magazine release behind the trigger.
- later commercial versions may only be marked "PARABELLUM" over "9mm".

Manufacturer

- "MADE IN HUNGARY" over "FEG" and the year of manufacture, eg. "1958" are marked on the left side of the slide.
- "FEG", "FEGYVER", "FEGYVERGYAR", "FEMARU", "FEMARU ES SZERSZAMGEPGYAR NV", "FEMARU FEGYVER ES GEPGYAR RT", "FFG", "FIREBIRD", "FROMMER", "HUNGARIAN ARMS WORKS", "TOKAGYPT", "WALAM", and "BUDAPEST" are trade names/trademarks used on firearms manufactured by "Femaru Fegyver es Gepygar / Fegyver es Gazkeszuelekgyara".

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial number located on left side of frame, directly behind trigger, repeated on top of slide. - observed serial numbers consisted of 2-letter prefix followed by 4 digits, i.e. AAxxxx, other styles include a single letter prefix followed by 5 digits, i.e. Axxxxx
Shots	- detachable box magazine located in the grip.
Remarks	- this firearm has the Egyptian Crest on the left side of the slide

Barrel	- has a slotted or ported muzzle brake approximately 55mm long.
Shots	- detachable box magazine.
Canadian Law Comments	- A number of AVT 1940 rifles, which have been converted to semi automatic only, have been imported to Canada since 1985.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Remarks

- This is a selective fire version of the SVT 1940. It is visually identical to the SVT 1940 but differing by having a trigger mechanism capable of semi and full automatic fire, the safety catch being the selective fire lever.

FRT Report

Firearm Reference Number (FRN): 49547
Make: Tokarev
Model: AVT 1940

Summary

Make:	Tokarev
Model:	AVT 1940
Manufacturer:	
Level:	Converted Automatics
Type:	Rifle
Action:	Converted Automatic
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
49547 - 2	7.62X54R RUSSIAN	5	632	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	
49547 - 1	7.62X54R RUSSIAN	10	632	Prohibited CC 84(1) "prohibited firearm" para. (c)	Converted Automatics	

Notes

Make	- the make does not appear on the firearm.
Model	- the semi-automatic version of this firearm is known as the SVT 1940. - the model designation for the AVT 1940 appears on the right side of the buttstock as "A". - "AVT" is the abbreviation for the Russian designation "Avtomaticheskaya Vintovka Tokareva" (Tokarev Automatic Rifle).
Action	- no longer capable of full automatic fire.
Serial Number	- appears on the left front end of the receiver and has a one or more Cyrillic letter prefix.
Barrel	- has a slotted or ported muzzle brake approximately 55mm long.
Shots	- utilizes a detachable box magazine.
Canadian Law Comments	- a number of AVT 1940 rifles, which have been converted to semi automatic only, have been imported to Canada since 1985.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- the Sestroretsk Arsenal mark is an arrow and may be found on most parts.
- the designation "A" is stamped on the right side of the buttstock.

Remarks

- this is an selective fire version of the SVT 1940. Visually identical to the SVT 1940 but differing by having a trigger mechanism capable of semi and full automatic fire, the safety catch being the selective fire lever.

FRT Report

Firearm Reference Number (FRN): 44440
Make: Tokarev
Model: Firebird

Summary

Make:	Tokarev
Model:	Firebird
Manufacturer:	Femaru Fegyver es Gepgyar RT (FEG)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	HUNGARY
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
44440 - 1	9MM LUGER	8	101	Prohibited CC 84(1) "prohibited firearm" para. (a)(i)	Manufacturer Specifications and Commercial Customization	
44440 - 2	9MM LUGER	8	114	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- Tokarev is not marked on the firearm.
- Tokarev design is credited to Fedor V. Tokarev.
- Tokarev pistol was approved for service in Russia in 1930 as the Pistolet Tula-Tokarev or "TT-30".
- Tokarev pistol was originally manufactured at the Russian State Arsenal, Tula.
- Tokarev pistol was improved in 1933 and redesignated the "TT-33".
- Tokarev pistols have been manufactured in many countries including Bulgaria, China, Czechoslovakia, East Germany, Hungary, Poland, Romania, Russia and Yugoslavia.

Model

- "FIREBIRD" is marked on the left side of the slide; this is a commercially re-manufactured Tokagypt 58, refinished for the German "HEGE" company; noted examples bear both "West Germany" markings and Hungarian proofmarks.
- features include: generalized Tokarev layout and operation, with a manually-operated thumb safety lever at the left rear tang; blued finish; fixed open sights; left-side slide stop; single-action trigger mechanism with exposed round hammer; black synthetic grips; button magazine release behind the trigger.

Manufacturer

- the manufacturer is not marked on the firearm.
- "FEG", "FEGYVER", "FEGYVERGYAR", "FEMARU", "FEMARU ES SZERSZAMGEPGYAR NV", "FEMARU FEGYVER ES GEPGYAR RT", "FFG", "FIREBIRD", "FROMMER", "HUNGARIAN ARMS WORKS", "TOKAGYPT", "WALAM", and "BUDAPEST" are trade names/trademarks used on firearms manufactured by "Femaru Fegyver es Gepygar / Fegyver es Gazkeszuelekgyara".

Action

- recoil-operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- serial-numbered on the left side of the receiver/frame, behind the trigger. - noted examples bear an "E" serial number prefix, followed by five digits.
Calibre	- calibre is marked on the slide.
Shots	- detachable box magazine.

Firearm Reference Number (FRN): 148827
Make: Tokarev
Model: KO-SVT

Summary

Make:	Tokarev
Model:	KO-SVT
Manufacturer:	MOLOT
Level:	Manufacturer Specifications and Commercial Customization
Type:	Rifle
Action:	Semi-Automatic
Country of Manufacturer:	RUSSIA
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
148827 - 1	7.62X54R RUSSIAN	5	628	Prohibited PFR, Part 1, para. 231(e)	Manufacturer Specifications and Commercial Customization	
148827 - 2	7.62X54R RUSSIAN	10	628	Prohibited PFR, Part 1, para. 231(e)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- the make does not appear on the firearm.
- this make is appended to firearms designed by Fedor Vasiliyevich Tokarev, a noted Russian arms designer who did most of his work during the pre-World War Two era, and was primarily responsible for the design of the T-33 pistol and the SVT-38/40 families of rifles.

Model

- "KO-SVT" is marked on the firearm in Cyrillic; the Cyrillic representation of "KO-SVT" resembles "KO-CBT". "KO-SVT" is an acronym for "Karabin Okhotnichy - Samozaryadny Vintovka Tokareva", or "Carbine, Hunting - Self-loading Rifle Tokarev".
- this is a conversion of surplus Tokarev SVT-40 rifles into hunting rifles, performed by Molot, with new manufacturer and model markings.
- features include: standard Tokarev SVT-40 layout and operation; blued finish; multi-slot muzzle brake; hooded open adjustable sights (a rail for mounting optical sights is added to the left side); under-barrel cleaning rod; laminated wooden pistol-grip stock and handguard.

Manufacturer

- "MOLOT" and/or the Vyatsky Polyany logo of a Cyrillic "VP" (resembling "Bn") is marked on the firearm.

Action

- gas-operated.

Serial Number

- numbered on the receiver/frame.

Shots

- detachable box magazine.

Firearm Reference Number (FRN): 22856
Make: Tokarev
Model: M20

Summary

Make:	Tokarev
Model:	M20
Manufacturer:	Chinese State Arsenals
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	CHINA
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
22856 - 2	7.62MM TOKAREV	8	115	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- Tokarev is not marked on the firearm.
- Tokarev design is credited to Fedor V. Tokarev.
- Tokarev pistol was approved for service in Russia in 1930 as the Pistolet Tula-Tokarev or "TT-30".
- Tokarev pistol was originally manufactured at the Russian State Arsenal, Tula.
- Tokarev pistol was improved in 1933 and redesignated the "TT-33".
- Tokarev pistols have been manufactured in many countries including Bulgaria, China, Czechoslovakia, East Germany, Hungary, Poland, Romania, Russia and Yugoslavia.

Model

- model designation normally found on the top of the slide.
- this is a Soviet Military firearm design, essentially similar to a Tokarev Model TT33.
- this firearm is an "export" model, without manufactuerer's identifying markings or any indication of country of origin to be found on the firearm.
- manufactured by the Chinese State Arsenals.

Action

- recoil operated.

Serial Number

- found on both the receiver/frame on the left side above the hand grips and the top of the slide.

Other Markings

- any and all markings which could identify the manufacturer and the country of origin are missing on this model.

Remarks

- this is a Soviet Military firearm design, essentially similar to a Tokarev Model TT33.
- the general design is unusual in that the firing mechanism, comprising the trigger to the hammer, may be removed "en-bloc" for maintenance.
- the finish of the firearm is utilitarian.

Notes

Make

- Tokarev is not marked on the firearm.
- Tokarev design is credited to Fedor V. Tokarev.
- Tokarev pistol was approved for service in Russia in 1930 as the Pistolet Tula-Tokarev or "TT-30".
- Tokarev pistol was originally manufactured at the Russian State Arsenal, Tula.
- Tokarev pistol was improved in 1933 and redesignated the "TT-33".
- Tokarev pistols have been manufactured in many countries including Bulgaria, China, Czechoslovakia, East Germany, Hungary, Poland, Romania, Russia and Yugoslavia.

Model

- model is marked on the left side of the slide.
- differs from Russian TT33 in following ways: it has an elongated pistol grip and magazine, 9 round rather than 8 round magazine.
- later production of this model included a safety, mounted on the left rear of the receiver.
- may be identified by Yugoslavian national crest on top of slide.
- the 9MM LUGER version of this model is known as the M65.

Action

- blowback.
- single action only.

Serial Number

- located on right side of receiver forward of the trigger guard.
- repeated on right side of slide above receiver stamping has a letter prefix, and on barrel within ejection port.
- common part numbers found on this firearm are often confuised with the serial number they are: frame part # 2-00.101, slide part # 1-00.001, trigger part # 2-00.004.

Notes

Make

- Tokarev is not marked on the firearm.
- Tokarev design is credited to Fedor V. Tokarev.
- Tokarev pistol was approved for service in Russia in 1930 as the Pistolet Tula-Tokarev or "TT-30".
- Tokarev pistol was originally manufactured at the Russian State Arsenal, Tula.
- Tokarev pistol was improved in 1933 and redesignated the "TT-33".
- Tokarev pistols have been manufactured in many countries including Bulgaria, China, Czechoslovakia, East Germany, Hungary, Poland, Romania, Russia and Yugoslavia.

Model

- the model designation is marked on the left side of the slide.

Manufacturer

- "11" inside an oval is marked on the top of the slide.

Serial Number

- the master serial number is located on left hand side of receiver/frame above the grip plate (letters and numbers).
- serial number may also be repeated in other locations.

Calibre

- special cartridge adapters must be used in order to fire 22 Long Rifle Rimfire ammunition in this firearm.
- this adapter resembles the 7.62 x 25 mm Russian Tokarev cartridge externally, and has a 22 LR chambre in the bore.

Shots

- detachable box magazine.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Other Markings

- factory designation marked on the top mid-slide 11 (in a circle), with year-date 1955 and serial number (letters and numbers)

Remarks

- This firearm is basicly the standard Soviet TT33 pistol, which has been largely modified to function in blowback operation with the lower recoil energy of the 22 LR ammunition: the barrel locking system has been removed, the slide return spring is lightened, and the firing pin and extractor location has been altered from center-fire to rim-fire. A special cartridge adapter (which resembles the 7.62 x 25 mm Russian Tokarev cartridge) must be used in order to fire 22 Long Rifle Rimfire rounds in this firearm. This model in 22 LR calibre requires the adapter to function, and when the magazine is loaded with adapters installed with 22 LR ammunition, the firearm functions as a semi-automatic, loading, firing and ejecting the adapter and spent cartridge (see calibre notes). The firearm is virtually useless without these adapters, and requires they be retrieved for further use.

FRT Report

Firearm Reference Number (FRN): 25594
Make: Tokarev
Model: Super 12

Summary

Make:	Tokarev
Model:	Super 12
Manufacturer:	Bulgarian State Arsenal, Factory 10
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Semi-Automatic
Country of Manufacturer:	BULGARIA
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
25594 - 2	7.62MM TOKAREV	8	115	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
25594 - 1	9MM LUGER	8	115	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- Tokarev is not marked on the firearm.
- Tokarev design is credited to Fedor V. Tokarev.
- Tokarev pistol was approved for service in Russia in 1930 as the Pistolet Tula-Tokarev or "TT-30".
- Tokarev pistol was originally manufactured at the Russian State Arsenal, Tula.
- Tokarev pistol was improved in 1933 and redesignated the "TT-33".
- Tokarev pistols have been manufactured in many countries including Bulgaria, China, Czechoslovakia, East Germany, Hungary, Poland, Romania, Russia and Yugoslavia.

Model

- usually marked on the right side of the slide: SUPER 12 (12 in circle)
- usually supplied with barrels and magazines in both 9mm PARABELLUM and in 7.62mm TT (7.62mm Tokarev).
- manufactured in Bulgaria, Factory 10.
- the Bulgarian firearm has slightly different features from that of Hungarian manufacture. As a general indication: the Bulgarian pistol, Factory 10, has a two piece pistol grip with a metal backstrap (as on the Walther model PP pistol); and generally has no safety catch. However, these identification features can only be used as in 90% of the time, as this and the Hungarian factory are known to have sub-contracted for each other at different times and even to have manufactured for each other, complete with markings as specified by the customer.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- manufacturer's logo is marked on the receiver/frame. - "Bulgarian State Arsenal, Factory 10" is identified by a "10" in a double circle logo. - "Bulgarian State Arsenal" logo is marked on the left side of the receiver/frame. - "Bulgarian Artillery Arsenal" was originally established in Rousse, Bulgaria circa 1878 for the Bulgarian Army. - "Artillery Arsenal" was transferred to Sofia and became the "Sofia Artillery Arsenal" in 1891. - "Sofia Artillery Arsenal" was moved to Kazanlak in 1924 and became the "State Military Factory". - "State Military Factory" in Kazanlak, Bulgaria was given the code name "Factory 10" in 1948. - "Factory 10" started production of assault rifles circa 1958. - "Factory 10" was renamed the "United Industrial Plant Friedrich Engles" circa 1964. - "United Industrial Plant Friedrich Engles" was known as "F. Engles Machine Building Plant" from 1977 to 1987. - "Arsenal/Arsenal Limited/Arsenal JSCo/Arsenal 2000 JSCo" was established in 1987. - "Arsenal 2000 JSCo "also uses the logo of a "10" in a double circle. - "Arsenal 2000 JSCo "was privatized in 2011.
Action	- recoil operation.
Serial Number	- usually marked on the receiver/frame.
Calibre	- marked on the left side of the slide: PARABELLUM Cal. 9mm + 7.62mm TT
Shots	- detachable box magazine.
Other Markings	- NOTE: Markings found on these pistols may have been applied by the factory, exporter, importer, sales agency or the retail sales agency, and are not of specific identification value. Indeed, most of the markings on model SUPER 12 or T58 pistols are either crudely stamped, or jewellery-store type engravure.
Remarks	- NOTE 1: This firearm has slightly different features depending on where it was manufactured. As a general indication: the Bulgarian pistol, Factory 10, has a two piece pistol grip with a metal backstrap (as on the Walther model PP pistol); and generally has no safety catch. (Pistols manufactured in Hungary, Factory 02, used a one piece grip with a swell or arch on the back; as on the Tokagypt model that does not show a metal backstrap and is usually equipped with a safety catch). However, these can only be used as identification features in 90% of the time. These two factories are known to have sub-contracted for each other at different times and even to have manufactured for each other, complete with markings as specified by the customer. NOTE 2: This is a Soviet Military firearm design, (essentially similar to a Tokarev Model TT33) based on the J. M. Browning short recoil design as may be found on the Colt M1911: its general design is unusual in that the firing lock, comprising the trigger to the hammer, may be removed "en-bloc" for maintenance. The finish of this firearm appears to be for commercial sales, but as with many firearms currently made in the former Soviet Bloc, the finish is not equal to Western Commercial standards.

Notes

Make

- does not appear on the firearm.

Model

- Introduced in 1940.
- does not appear on the firearm.
- a sniper version may also be found with optical sights.
- "SVT" is the abbreviation for the Russian designation "Samozaryadnya Vintovka Tokareva". (Tovarev Self Loading Rifle)
- this is an improved version of the SVT 1938.
- mechanically identical to the SVT 1938 but differing by having a one piece stock, cleaning rod housed under the barrel and longer perforated metal handguard.

Manufacturer

- this is a generic entry. Other "Russian State Arsenal" entries exist which may better describe the firearm.
- the "arrow" arsenal mark may be found on most parts. The various arrow markings were incorporated in Russian arsenals at Izhevsk, Tula, Sestroretsk, Kovrov and possibly others.

Action

- gas operated.

Serial Number

- appears on the left front end of the receiver and may have one or more Cyrillic letter prefix.
- observed Finnish samples have no Cyrillic letters and are sequentially numbered.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Barrel	- barrel has a slotted or ported muzzle brake approximately 55mm in length.
Shots	- detachable box magazine.
Other Markings	- year of manufacture and Soviet star appear on the receiver ring. - Finnish property markings (the letters " S A " inside a rectangle) may also be encountered on the left side of the receiver below the serial number.

Make

- Tokarev is not marked on the firearm.
- Tokarev design is credited to Fedor V. Tokarev.
- the Tokarev pistol was approved for service in Russia in 1930 as the Pistolet Tula-Tokarev or "TT-30".
- originally manufactured at the Russian State Arsenal, Tula.
- Tokarev pistol was improved in 1933 and redesignated the "TT-33".
- Tokarev pistols have been manufactured in many countries including Bulgaria, China, Czechoslovakia, East Germany, Hungary, Poland, Romania, Russia and Yugoslavia.

Model

- may also be known as "Model of 1930".
- forerunner of the TT33
- "TT-30" is not marked on the firearm.
- "TT-30" stands for "Tula-Tokarev Model 1930".
- "TT-30" production was from 1933 to 1935.
- "TT-30" has a total production of 6,785 pistols.
- "TT-30" original design was only produced in 1933.
- "TT-30" produced in 1934 are considered "First Transitional Variation".
- "TT-30" produced in 1935 are considered "Second Transitional Variation" and also the first year of the starting production of its replacement, the "TT-33".
- the year of manufacture is marked on the left side of the receiver/frame and on the top of the slide.
- the main visible feature is a partially removable backstrap.
- features include: fixed blade front sight and dovetailed V-notch rear sight; slide extending to cover the external hammer main body; hammer serrated head exposed over the slide; rear gripping serrations; right side, external extractor and ejection port; right side of receiver frame, sliding locking tab of the slide release lever; no safety; left side slide release lever and magazine release; vertically serrated with a five point star logo at its center, synthetic grip plates; loop lanyard on the bottom left side of the receiver/frame grip; blued finish.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- the Tula logo is a five point star and is stamped on the left side of the receiver/frame and also usually stamped on the top of the slide. - may also be repeated between the serial number and the year of manufacture.
Action	- recoil operated.
Serial Number	- serial number is marked on the left side of the receiver/frame. - serial number is also marked on the top of the slide. - serial number consists of one to four numbers.
Calibre	- calibre designation is not marked on the firearm.
Shots	- detachable box magazine.

Notes

Make

- Tokarev is not marked on the firearm.
- Tokarev design is credited to Fedor V. Tokarev.
- Tokarev pistol was approved for service in Russia in 1930 as the Pistolet Tula-Tokarev or "TT-30".
- Tokarev pistol was originally manufactured at the Russian State Arsenal, Tula.
- Tokarev pistol was improved in 1933 and redesignated the "TT-33".
- Tokarev pistols have been manufactured in many countries including Bulgaria, China, Czechoslovakia, East Germany, Hungary, Poland, Romania, Russia and Yugoslavia.

Model

- model designation not usually marked on the firearm.
- manufactured from 1933 to the mid-1950's.
- the Model TT33 replaced the Model TT30 and featured slight internal modifications and changes in manufacture.
- similar in appearance to the Colt 1911 design with no safety lever, feed lips of the magazine machined into the receiver/frame and the feature of removing the hammer and lock work assembly as one unit.
- features include: open fixed sights; rear slide grasping serrations; rounded rear of the slide; slide and magazine release on the left side; rear, bottom left side of the grip lanyard ring; single-action trigger mechanism; roundel hammer; synthetic grip panels; utilitarian finish.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer

- manufacturer's logo is marked on the receiver/frame.
- "Bulgarian State Arsenal, Factory 10" is identified by a "10" in a double circle logo.
- "Bulgarian State Arsenal" logo is marked on the left side of the receiver/frame.
- "Bulgarian Artillery Arsenal" was originally established in Rousse, Bulgaria circa 1878 for the Bulgarian Army.
- "Artillery Arsenal" was transferred to Sofia and became the "Sofia Artillery Arsenal" in 1891.
- "Sofia Artillery Arsenal" was moved to Kazanlak in 1924 and became the "State Military Factory".
- "State Military Factory" in Kazanlak, Bulgaria was given the code name "Factory 10" in 1948.
- "Factory 10" started production of assault rifles circa 1958.
- "Factory 10" was renamed the "United Industrial Plant Friedrich Engles" circa 1964.
- "United Industrial Plant Friedrich Engles" was known as "F. Engles Machine Building Plant" from 1977 to 1987.
- "Arsenal/Arsenal Limited/Arsenal JSCo/Arsenal 2000 JSCo" was established in 1987.
- "Arsenal 2000 JSCo "also uses the logo of a "10" in a double circle.
- "Arsenal 2000 JSCo "was privatized in 2011.

Serial Number

- on left side of lower receiver.
- observed samples have had two letters followed by four digits.
- the last four digits on the receiver following the serial number indicate the month and year of manufacture.

Shots

- detachable box magazine.

Notes

Make

- Tokarev is not marked on the firearm.
- Tokarev design is credited to Fedor V. Tokarev.
- Tokarev pistol was approved for service in Russia in 1930 as the Pistolet Tula-Tokarev or "TT-30".
- Tokarev pistol was originally manufactured at the Russian State Arsenal, Tula.
- Tokarev pistol was improved in 1933 and redesignated the "TT-33".
- Tokarev pistols have been manufactured in many countries including Bulgaria, China, Czechoslovakia, East Germany, Hungary, Poland, Romania, Russia and Yugoslavia.

Model

- "TT33" designation is not usually marked on the firearm.
- "TT33" Russian State Arsenal is a generic model. Other "TT33" entries exist which may better describe the firearm manufacturer.
- "TT33" was manufactured from 1933 to the mid-1950's.
- "TT33" replaced the Model TT30 and featured slight internal modifications and changes in manufacture.
- "TT33" has similar in appearance to the Colt 1911 design with no safety lever, feed lips of the magazine machined into the receiver/frame and the feature of removing the hammer and lock work assembly as one unit.
- features include: open fixed sights; rear slide grasping serrations; rounded rear of the slide; slide and magazine release on the left side; rear, bottom left side of the grip lanyard ring; single-action trigger mechanism; roundel hammer; synthetic grip panels; blued finish.

Action

- short recoil, tilting-barrel system.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- serial number consists of two Russian (Cyrillic) characters and numbers.
- an inspection/manufacturer mark and year of manufacture is also usually marked.
- serial number should be reported as numbers.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre - calibre designation is usually marked on the barrel, visible through the ejection port.

Shots - detachable box magazine.

Notes

Make

- Tokarev is not marked on the firearm.
- Tokarev design is credited to Fedor V. Tokarev.
- Tokarev pistol was approved for service in Russia in 1930 as the Pistolet Tula-Tokarev or "TT-30".
- Tokarev pistol was originally manufactured at the Russian State Arsenal, Tula.
- Tokarev pistol was improved in 1933 and redesignated the "TT-33".
- Tokarev pistols have been manufactured in many countries including Bulgaria, China, Czechoslovakia, East Germany, Hungary, Poland, Romania, Russia and Yugoslavia.

Model

- this firearm is the equivalent of the Canadian/British DP Model (DP = Drill Purpose). This denotes a firearm that is unsafe or unsuitable to discharge ammunition, but may be used for training.
- this particular Model has a hole bored in the barrel/chamber.
- this is a Soviet Military firearm design, based on the J. M. Browning short recoil design as may be found on the Colt M1911. Its general design is unusual in that the firing lock, comprising the trigger to the hammer, may be removed "en-bloc" for maintenance.

Manufacturer

- it is believed this Model was manufactured in one of the State Arsenals (probably TULA).

Action

- recoil operated.

Notes

Make

- Tokarev is not marked on the firearm.
- Tokarev design is credited to Fedor V. Tokarev.
- Tokarev pistol was approved for service in Russia in 1930 as the Pistolet Tula-Tokarev or "TT-30".
- Tokarev pistol was originally manufactured at the Russian State Arsenal, Tula.
- Tokarev pistol was improved in 1933 and redesignated the "TT-33".
- Tokarev pistols have been manufactured in many countries including Bulgaria, China, Czechoslovakia, East Germany, Hungary, Poland, Romania, Russia and Yugoslavia.

Model

- model name is not marked on the firearm.
- this firearm is the Hungarian copy of the Russian Tokarev TT33.
- this pistol can be identified by the crest on the grip plate which depicts a star, wheatsheaf and a hammer surrounded by a wreath and the uniform narrow vertical 'grasping' grooves at the rear on both sides of the slide.

Serial Number

- located on rear left side of receiver just above the grip plate.

Shots

- detachable box magazine.

Notes

Make

- Tokarev is not marked on the firearm.
- Tokarev design is credited to Fedor V. Tokarev.
- Tokarev pistol was approved for service in Russia in 1930 as the Pistolet Tula-Tokarev or "TT-30".
- Tokarev pistol was originally manufactured at the Russian State Arsenal, Tula.
- Tokarev pistol was improved in 1933 and redesignated the "TT-33".
- Tokarev pistols have been manufactured in many countries including Bulgaria, China, Czechoslovakia, East Germany, Hungary, Poland, Romania, Russia and Yugoslavia.

Model

- "MDL. TTC" was observed marked on the left side of the slide.
- TT pistols were manufactured from 1933 to the mid-1950's.
- TT-33 model replaced the TT-30 and featured slight internal modifications and changes in manufacture.
- similar in appearance to the TT-33 design.
- features include: flat sided slide with fixed sights and grip serrations at the rear; manual safety lever on the left side of the receiver/frame; plastic grip plates with straight serrations.

Manufacturer

- "MADE IN ROMANIA" was observed marked on the left side of the slide.
- Romanian proof mark was observed marked in front of the serial number.

Action

- recoil operated.

Serial Number

- serial number is marked on the left side of the receiver/frame.
- observed serial number consisted of a two letter prefix, three number, a space and the year of manufacture, eg. "AA275 1958".

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- "CAL. 7.62X25" was observed marked on the left side of the slide.
Shots	- detachable box magazine.
Other Markings	- "C.A.I. GEORGIA V.T." was observed marked on the left side of the slide.

Notes

Make

- The make is not marked on the firearm.
- "Tokarev" stands for the design of the pistol that is credited to Fedor V. Tokarev.

Model

- "TT-C" is marked on the right side of the slide.
- "TT-C" is a commercial Tokarev TT-33 pistol.
- Features include: flat sided slide; external extractor; straight, fine grip serrations at the rear of the slide; rounded rear of the slide that partially covering the hammer and is showing the hammer serrated, rounded top of it; pin retaining clip on the right side of the receiver/frame; plastic grip plates with straight serrations and logo of a star with the letter "CCCP" around it within a circle.

Manufacturer

- The manufacturer logo is marked on the left side of the receiver/frame.
- The manufacturer logo is a arrow pointing up within a triangle, that may be within a circle.

Action

- Recoil operated.

Serial Number

- The serial number is marked on the left side of the receiver/frame.

Calibre

- The calibre designation is marked on the right side of the firearm.

Shots

- Detachable box magazine housed in the grip.

17352 - 2	9MM LUGER	8	115	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- Tokarev is not marked on the firearm.
- Tokarev design is credited to Fedor V. Tokarev.
- Tokarev pistol was approved for service in Russia in 1930 as the Pistolet Tula-Tokarev or "TT-30".
- Tokarev pistol was originally manufactured at the Russian State Arsenal, Tula.
- Tokarev pistol was improved in 1933 and redesignated the "TT-33".
- Tokarev pistols have been manufactured in many countries including Bulgaria, China, Czechoslovakia, East Germany, Hungary, Poland, Romania, Russia and Yugoslavia.

Model

- this is a Chinese copy of the Tokarev model TT33.
- some of these firearms may be identified by the two Chinese ideograms on the right side of the receiver/frame, separated by what appears to be a dash (which in reality is another Chinese ideogram) followed by a factory code or code number.
- this firearm exists in three basic versions: a Russian made, exported to China version, with Russian factory codes and markings; a Chinese made version with Chinese markings and Chinese factory codes, and an interim version which may be a mixture of either or both marking systems and a mix of Chinese and Russian factory codes.

Manufacturer

- Chinese State Arsenals have a factory code system.
- the manufacturer's name or factory code is marked on the left side of the slide.
- NORINCO is a Chinese State marketing agency that sells products of the Chinese State Arsenals.
- "Poly Technologies" is the trade name of "Poly Technologies International Incorporated", a marketing agency which is a subsidiary of the Chinese People's Liberation Army.
- China Jin An is the sales branch of the Ministry of Public Security.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- recoil operation.
Serial Number	- serial numbers have been observed that have a four digit number followed by a space followed by the arsenal marking or code number followed by a space and the full year date.
Shots	- detachable box magazine.
Remarks	- this is a Soviet Military firearm design, essentially similar to a Tokarev Model TT33, except for caliber and width of the receiver/frame. - the general design is unusual in that the firing mechanism, comprising the trigger to the hammer, may be removed "en-bloc" for maintenance. - the finish of the firearm is utilitarian.

Notes

Make

- Tokarev is not marked on the firearm.
- Tokarev design is credited to Fedor V. Tokarev.
- Tokarev pistol was approved for service in Russia in 1930 as the Pistolet Tula-Tokarev or "TT-30".
- Tokarev pistol was originally manufactured at the Russian State Arsenal, Tula.
- Tokarev pistol was improved in 1933 and redesignated the "TT-33".
- Tokarev pistols have been manufactured in many countries including Bulgaria, China, Czechoslovakia, East Germany, Hungary, Poland, Romania, Russia and Yugoslavia.

Model

- "54 Type" in Chinese characters is marked on top of the slide "left to right, first symbol = numeral 5, middle symbol = numeral 4, third symbol = style/type".
- also manufactured as the M 20.
- this is a Soviet Military firearm design, manufactured in China, essentially similar to a Russian Tokarev Model TT33.
- the general design is unusual in that the firing mechanism, comprising the trigger to the hammer, may be removed "en-bloc" for maintenance.
- features include: open fixed sights; rear slide grasping serrations; rounded rear of the slide; slide and magazine release on the left side; rear, bottom left side of the grip lanyard ring; single-action trigger mechanism; roundel hammer; synthetic grip panels; utilitarian finish.

Manufacturer

- Chinese State Arsenal, Factory 66 is not marked on the firearm.
- the manufacturer's identifier may be marked on the left side of the receiver/frame, this is the number "66" enclosed in a triangle.

Action

- recoil operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number

- the serial number is marked on the left side of the receiver/frame.
- the serial number may consist of seven or eight numbers.
- a factory code and year date may follow the serial number.
- yearly blocks of one millon numbers were assigned, i.e.,
1954 - 1,000,000 to 1,999,999
1955 - 2,000,000 to 2,999,999
1956 - 3,000,000 to 3,999,999, etc.

Calibre

- marked on the left side.

Shots

- detachable box magazine.

Remarks

- This firearm is a Russian design, the Tokarev Model TT33. After the Russian firearm had been superseded by the Makarov PM pistol, the Russians sold the machinery to manufacture the Tokarev Model TT33 to the Chinese government.
- Variations of this firearm meant for commercial export sales in U.S.A. may be found with a safety catch mounted on the receiver/frame. For the most part these firearms will not be identified as Tokarev MAKE firearms, they will be Brand named to the importer or the Chinese export agency and are usually renamed for MODEL as well.
- NORINCO is a Chinese State marketing agency that sells products of the Chinese State Arsenals.
- "Poly Technologies" is the trade name of "Poly Technologies International Incorporated", a marketing agency which is a subsidiary of the Chinese People's Liberation Army.
- China Jin An a marketing agency that is the sales branch of the Ministry of Public Security.

Notes

Make

- Tokarev is not marked on the firearm; the make designation is derived from the fact that this pistol is a virtual copy of the original Tokarev semi-automatic pistol as used by the Russian Armed Forces.
- Tokarev design is credited to Fedor V. Tokarev.
- Tokarev pistol was approved for service in Russia in 1930 as the Pistolet Tula-Tokarev or "TT-30".
- Tokarev pistol was originally manufactured at the Russian State Arsenal, Tula.
- Tokarev pistol was improved in 1933 and redesignated the "TT-33".
- Tokarev pistols have been manufactured in many countries including Bulgaria, China, Czechoslovakia, East Germany, Hungary, Poland, Romania, Russia and Yugoslavia.

Model

- "54-1" is marked on the left side of the slide.
- this pistol is a copy of the original Russian designed Tokarev TT-30 semi-automatic pistol.
- features; recoil operated, single action trigger utilizing a single column type detachable box magazine; exposed hammer at rear of receiver/frame; lever type safety located at the left rear of the receiver/frame; magazine release button located on the left side of the receiver/frame behind the trigger; lanyard ring on the rear left side of the grip frame; fixed sights; blued finish.
- known example had black plastic grip plates with a five pointed star within a circle located in the middle of each grip plate.
- known example was marked, "CSI ONT CA" on the left side of the slide; these markings stand for, "China Sports, Inc. Ontario, California".

Manufacturer

- known example was marked "MADE IN CHINA BY NORINCO" on the left side of the slide.
- Norinco (China North Industries) located in the People's Republic of China is a Chinese conglomerate of over one hundred (100) factories that manufacture small arms and military weapons.
- in many instances the name of the manufacturer of a firearm is only represented by a factory number or symbol or a combination thereof as is usually marked on the receiver/frame of the firearm.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Action	- recoil operated.
Serial Number	- serial number is usually marked on the rear left side of the receiver/frame and on the left side of the slide. - known example had an eight digit number without prefix or suffix.
Calibre	- calibre designation is also marked on the barrel, visible through the ejection port.
Shots	- detachable box magazine, single column type.
Importer	- this model was imported into the United States circa 1989 to 1995 only.

Notes

Make

- Tokarev is not marked on the firearm.
- Tokarev design is credited to Fedor V. Tokarev.
- Tokarev pistol was approved for service in Russia in 1930 as the Pistolet Tula-Tokarev or "TT-30".
- Tokarev pistol was originally manufactured at the Russian State Arsenal, Tula.
- Tokarev pistol was improved in 1933 and redesignated the "TT-33".
- Tokarev pistols have been manufactured in many countries including Bulgaria, China, Czechoslovakia, East Germany, Hungary, North Korea, Poland, Romania, Russia and Yugoslavia.

Model

- the model is not marked on the firearm.
- this is a Polish produced copy of the Russian TT33 pistol, manufactured at the Radom factory on Russian machinery between 1947 and 1950; in 1950, the Radom factory was renamed as "Factory 11", and new slide markings with an "11" in an oval were introduced.
- features include: blued finish; fixed open sights; "line and gouge" slide serrations; "FB" in an inverted triangle on top of the slide; a single-action trigger mechanism; synthetic grip panels with "FB" in an inverted triangle on the left side, and "WP" ("Wojskowe Polska", or "Polish Army") on the right side; a lanyard loop on the left side of the butt; and a detachable box magazine.

Manufacturer

- the Radom factory logo of "FB" in an inverted triangle is marked on top of the slide (with the date of production) and on the left grip panel.

Action

- recoil-operated.

Serial Number

- serial number is marked on the left side of the receiver/frame, with two Cyrillic prefix letters.

Shots

- detachable box mahazine.

FRT Report

Firearm Reference Number (FRN): 195651
Make: Tokyo Marui
Model: Sig Sauer P226 Airsoft

Summary

Make:	Tokyo Marui
Model:	Sig Sauer P226 Airsoft
Manufacturer:	Tokyo Marui
Level:	Manufacturer Specifications and Commercial Customization
Type:	Airsoft
Action:	Air,Spring or Gas
Country of Manufacturer:	JAPAN
Serial Numbering:	
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
195651 - 1	6MM AIRSOFT BB	25	196	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	
195651 - 2	9MM LUGER	1	112	Restricted CC 84(1) "restricted firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "TOKYO MARUI CO.LTD" is marked above "MADE IN JAPAN" on the right side of the receiver/frame above the accessory rail.

Model

- "SIG SAUER" is marked on the right grip panel.
- "P226" is marked on the left grip panel.
- "SIG SAUER P226" is marked on the left side scallop near the front of the slide.
- is marked with "ASGK U 658 921" on the right side of the receiver/frame. ASGK stands for Airsoft Gun Kai. ASGK is the industry regulatory body for airsoft and toy guns in Japan.
- resembles with near precision a genuine Sig Sauer P226 handgun.
- despite the extensive use of polymer and low grade metals throughout its construction, and despite any possible intentions of the manufacturer to design an airsoft gun to discharge only 6mm airsoft BB's, this airsoft device so closely replicates a genuine Sig Sauer P226 receiver/frame that it is readily capable of having the major pressure-bearing components (being the slide and barrel assembly) from a genuine Sig Sauer P226 installed upon it and discharging a 9mm Luger caliber cartridge.
- features include: underside accessory rail, double-action trigger; decocking mechanism located on left side of grip; black finish.

Manufacturer

- "TOKYO MARUI CO.LTD" is marked above "MADE IN JAPAN" on the right side of the receiver/frame above the accessory rail.

Canadian Law Comments

- the velocity and energy capabilities of this device in the configuration it is manufactured by Tokyo Marui are below 366 fps with a 0.2 gram 6mm airsoft BB, which is the V50 threshold for casuing serious bodily injury or death to a person. However, because this device is readily capable of accepting the pressure-bearing firearm components from a genuine Sig Sauer P226 handgun and then discharging a cartridge, this device meets the CCC S.2 definition of a "firearm", subsection 84(1) definition of "handgun" and subsection 84(1) definition of "restricted firearm".

130727 - 2	32 RF	5	72	Antique AFR, Section 1, para. 6	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "TOLEDO FIRE ARMS CO. No. 3" is marked on the topstrap of the receiver/frame.
- Toledo Firearms Company was a trade name used by both Dickinson and Hopkins and Allen.
- E.L. & J. Dickinson was located in Springfield, Massachusetts, U.S.A. from 1863 to 1868.
- Edwin L. Dickinson (E.L. Dickinson) was located in Springfield, Massachusetts, U.S.A. from 1863 to 1885.
- Hopkins & Allen was located in Norwich, Massachusetts, U.S.A. from 1868 to 1917.

Model

- "TOLEDO FIRE ARMS CO. No. 3" is marked on the topstrap of the receiver/frame.
- features include: octagonal barrel with half-moon front sight; solid top receiver/frame with removable fluted cylinder and right side cut-out for loading; exposed spurred hammer; sheathed spur trigger; single action trigger mechanism; bird's head grip; checkered grip plates; no rearsight; nickel plated finish.

Serial Number

- serial number is usually located on the left side of the receiver/frame under the grip panel.
- observed serial number consisted of four numbers without a letter prefix or suffix.

Shots

- removable cylinder.

Canadian Law Comments

- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Notes

Make	- "J & W Tolley" is marked on the side plates and the top of the barrel rib.
Model	- model designation not marked on the firearm. - firearms production began with the start of business in 1859; tradename is still in use and is owned by the firm of F.J. Wiseman & Co. - features include: side by side barrels; front hinged receiver/frame; side lock or box lock action; double triggers; extractors or auto ejectors; top or under lever opening; plain or engraved receiver/frame.
Manufacturer	- "J & W TOLLEY BIRMINGHAM ENGLAND" may be marked on the rib barrel. - James & William Tolley started their firearms manufacturing business circa 1859. - research indicates that the firm of Holloway & Naughton appear to have taken over the J.&W. Tolley business circa 1910-11 with trading continuing under the original J.&W. Tolley name. - the J.&W. Tolley name was subsequently purchased from Holloway & Naughton circa 1950's by the firm of F.J. Wiseman & Co. Ltd. located in Cannock, Staffordshire, England; the J.&W. Tolley trademark name is still in use by the Wiseman firm.
Action	- side by side configuration.
Serial Number	- known examples consisted of a four or five numbers located on the lower tang behind the trigger guard.
Canadian Law Comments	- some examples of this model, when manufactured prior to 1898, are considered "Antique" in Canada.

Shots

- underbarrel tubular magazine.
- factory extensions available.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Canadian Law Comments

- this firearm is normally Non-Restricted unless affected by the following conditions:

1) by combining a barrel from a licensed firearms manufacture that is less than 406mm (16.0") in length and a receiver/frame fitted with a pistol grip only, this firearm may be deemed a "handgun" and therefore "RESTRICTED" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (a) of the Criminal Code of Canada.
- "handgun" means a firearm that is designed, altered or intended to be aimed and fired by the action of one hand, whether or not it has been redesigned or subsequently altered to be aimed and fired by the action of both hands.

2) "a firearm that is designed or adapted to be fired when reduced to a length of less than 660 mm by folding, telescoping or otherwise" and therefore "Restricted" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (c) of the Criminal Code of Canada.

3) by combining a barrel that has been altered to less than 457mm (18.0") in length by a non-licensed firearms manufacturer (cottage industry, individual or gunsmith) regardless of whether the shotgun has a pistol grip or conventional stock, this firearm is "PROHIBITED" and subject to the definition of a "prohibited firearm" in Part III/Firearms and Other Weapons of Section 84 of the Criminal Code of Canada.
- "prohibited firearm" means a firearm that is adapted from a rifle or shotgun, whether by sawing, cutting or any other alteration, and that, as so adapted,
(i) is less than 660 mm in length, or
(ii) is 660mm or greater in length and has a barrel less than 457 mm in length.

Canadian Law Comments

- this firearm is normally Non-Restricted unless affected by the following conditions:

1) by combining a barrel from a licensed firearms manufacture that is less than 406mm (16.0") in length and a receiver/frame fitted with a pistol grip only, this firearm may be deemed a "handgun" and therefore "RESTRICTED" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (a) of the Criminal Code of Canada.
- "handgun" means a firearm that is designed, altered or intended to be aimed and fired by the action of one hand, whether or not it has been redesigned or subsequently altered to be aimed and fired by the action of both hands.

2) "a firearm that is designed or adapted to be fired when reduced to a length of less than 660 mm by folding, telescoping or otherwise" and therefore "Restricted" under the definition of "restricted firearm" in Part III/Firearms and Other Weapons of Section 84 (1) (c) of the Criminal Code of Canada.

3) by combining a barrel that has been altered to less than 457mm (18.0") in length by a non-licensed firearms manufacturer (cottage industry, individual or gunsmith) regardless of whether the shotgun has a pistol grip or conventional stock, this firearm is "PROHIBITED" and subject to the definition of a "prohibited firearm" in Part III/Firearms and Other Weapons of Section 84 of the Criminal Code of Canada.
- "prohibited firearm" means a firearm that is adapted from a rifle or shotgun, whether by sawing, cutting or any other alteration, and that, as so adapted,
(i) is less than 660 mm in length, or
(ii) is 660mm or greater in length and has a barrel less than 457 mm in length.

Notes

Make

- "TOMES, MELVAIN & CO." is marked on the barrel.
- Francis Tomes was located in New York City, New York, U.S.A. from circa 1840 to 1879, and was involved in the following businesses.
- Francis Tomes & Sons from 1840 to 1858.
- Tomes, Son & Merlvain from 1859 to 1866.
- Tomes, Melvain & Company from 1867 to 1874.
- Francis Tomes & Company from 1875 to 1879.
- Francis Tomes & Sons / Tomes, Son & Merlvain / Tomes, Melvain & Company / Francis Tomes & Company were importers and distributors of American and foreign firearms.

Model

- manufactured in the 1860s.
- approximately 100 examples were manufactured.
- this is a single action percussion revolver with an open top receiver/frame and a traditional trigger guard.
- features include: fixed sights; round barrel with rammer/loading lever; open top receiver/frame with a removable fluted cylinder; exposed spurred hammer; single action trigger mechanism; rounded trigger guard; flat bottom grip strap; wood grips; blued finish; plain or engraved barrel, cylinder and receiver/frame.
- Bacon Manufacturing Company model Pocket Percussion Revolver bears a strong resemblance to a "Manhattan" model Pocket Percussion Revolver.
- Bacon had worked for Manhattan before forming his own company.
- Bacon Manufacturing Company model Pocket Percussion Revolver was also sold under the names of Fitch & Waldo, B. J. Hart & Bro., Tomes Son & Melvain, Union Arms Company, and Western Arms Company.

Notes

Make

- the make is marked on the firearm.

Model

- the model is marked on the firearm.
- this is a small pocket pistol designed and manufactured by the designer, Alois Tomiska, from 1908 until the design was taken over by the Wiener Waffenfabrik (Vienna Weapons Factory) in about 1920; Tomiska-produced pistols bear markings and grip logos (AF) indicating such, as do Wiener Waffenfabrik-produced pistols (WW logo).
- these pistols saw slight changes over their manufacturing period, but all followed the same basic design and operating principles.
- features include: blued finish; square slide with relieved front of slide, exposing the barrel; groove sights; double-action trigger; rotating manual safety behind the trigger-guard; wooden grips; and exposed hammer.

Manufacturer

- the manufacturer is marked on the firearm.

Action

- blowback.

FRT Report

Firearm Reference Number (FRN): 125003
Make: Tomma
Model: Tomma

Summary

Make:	Tomma
Model:	Tomma
Manufacturer:	Henrion, Dassy & Heuschen (HDH)
Level:	Manufacturer Specifications and Commercial Customization
Type:	Handgun
Action:	Multi-Barrel
Country of Manufacturer:	BELGIUM
Serial Numbering:	See Note
Legal Classification:	Prohibited

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
125003 - 1	6.35MM	4	51	Prohibited CC 84(1) "prohibited firearm" para. (a)	Non-Commercial Customization	

Notes

Make

- "TOMMA" inside an oval is marked on the top of the grip plates.

Model

- "TOMMA" inside an oval is marked on the top of the grip plates.
- produced circa 1905 to 1914.
- this is a solid frame, double action, repeating firearm which features four superposed or vertically 'stacked' barrels which are removable for loading and then subsequently manually inserted into the top of the receiver/frame, each pull of the trigger fires one barrel.
- features include: steel receiver/frame and barrels; internal hammer; pivoting safety lever located on left side of receiver/frame; push button barrel release on left side of receiver/frame; and black composite grips with simulated chequering.
- some examples may have nickel plated receiver/frames and barrels.

Manufacturer

- "Henrion, Dassy & Heuschen" may not be marked on firearm.
- "HDH" may be found in some inconspicuous place on the receiver/frame, such as underneath the grip plates.
- "HDH" is used to denote Henrion, Dassy & Heuschen of Liege, Belgium.
- "Henrion, Dassy & Heuschen (HDH)" was in business from 1893 to circa 1934.
- "Henrion, Dassy & Heuschen (HDH)" was originally known as Henrion & Dassy.
- "Henrion & Dassy (H&D) or Fabrique d'Armes Henrion & Dassy of Liege, Belgium was in business prior to 1893.

Action

- vertically stacked barrels.

Serial Number

- serial number located on right side of receiver/frame underneath right grip plate.
- observed examples have had one and two digit numbers without prefix or suffix.

Notes

Make

- The company logo is marked on the receiver/frame.
- Tommy Built Tactical is a firearms manufacturer and retailer located in Lakeland, Florida, United States of America.
- Tommy Built Tactical was located in Gaithersburg, Maryland, Unites States of America.
- Tommy Built Tactical specializes in G36 rifle conversions and newly manufactured G36 design firearms.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Model	- "TG36" is marked on the left side of the receiver/frame. - "TG36" is a semi-automatic rifle based on the civilian version of the H&K G36 rifle. - This rifle uses a rotating bolt-head locking system, which is a departure from H&K's roller-locking design. - Features include: injection moulded, glass filled nylon receiver/frame; ambidextrous charging handle; available with various sight rail options or carry handle; "L" shaped bolt release lever inside the front of the trigger guard; magazine release lever located in front of the trigger guard; ambidextrous safety selector. - "TG36" is sold as a receiver/frame only and as a full firearm. - Overall length with a 419 mm (16.5 inches) barrel is 889 mm (35 inches). - Overall length with a 330 mm (13 inches) barrel is 622 mm (24.5 inches), average weight is 2.95 kg (6 lbs). - Overall length with a 229 mm (9 inches) barrel is 500 mm (19.7 inches).
Manufacturer	- The company logo is marked on the receiver/frame. - "Tommy Built Tactical LLC" over Gaithersburg, MD" is marked on the right side of the receiver/frame.
Action	- Gas operated.
Serial Number	- Serial number is marked on a metal insert on the underside of the firearm in front of the magazine well. - Serial number observed consisted of the model designation followed by four digits.
Barrel	- The barrel length does not include any attached device such as flash-hider or muzzle brake.
Calibre	- "CAL 5.56mm x 45" is marked on the left side of the receiver/frame.
Shots	- Detachable box magazine.

Type:	Handgun
Action:	Single-Shot
Country of Manufacturer:	UNITED STATES OF AMERICA
Serial Numbering:	See Note
Legal Classification:	Restricted

Calibre, Shots and Barrel Length

FRN	Calibre	Shots	Barrel (mm)	Legal Classification Legal Authority	Level	Barrel Type Code
150249 - 1	22 LR	1	203	Restricted CC 84(1) "restricted firearm" para. (a)	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "A. H. TOMPKINS" over "SPRINGFIELD" over "MASS, U.S.A" is marked on top of the receiver/frame.
- "PATENT APPLD. FOR" over "MFG. NO. (serial number)" is usually marked on the left side of the receiver/frame.
- Albert H. Tompkins was a designer located in Springfield, Massachusetts, U.S.A. during the late 1940s and early 1950s.

Model

- manufactured from circa 1947 to circa 1953.
- model designation is not marked on the firearm.
- this is a limited-production trap-door-style single-shot pistol designed by Albert H. Tompkins.
- approximately 224 examples were manufactured by the Varsity Manufacturing Company under the names of A. H. Tompkins and W. E. Woodman.
- features include: blade front sight and an adjustable rear sight; round barrel; flat sided receiver/frame with a "trap-door"-style hinged breech-piece that simultaneously operates an extractor; exposed spur hammer; single action trigger mechanism; metal trigger guard; one piece full-length Mannlicher-style walnut pistol-grip stock; blued finish.
- after 1953, an even smaller number of additional pistols of this design were produced by Varsity under the name of "W.E. Woodman".

Manufacturer

- "MF'D. AT" over "VARSITY MFG. CO." is marked on the right side of the receiver/frame.
- Varsity Manufacturing Company was located in Springfield, Massachusetts, U.S.A. in the late 1940s and the 1950s.

Action

- top hinged breech block design (Springfield Trap Door).

Serial Number

- serial number was observed marked on the left side of the receiver/frame.

Notes

Make

- "TO3" or "TOZ" and/or the "T" logo is marked on the firearm.
- "3" in "TO3" is a Russian Cyrillic character for the English letter "Z".
- "T" logo/symbol consists of the capital letter "T" within a circle, both of which are subsequently enclosed within a triangle.
- "TOZ" or "TO3" or the "T" logo was used on firearms manufactured by the Russian State Arsenal, Tula" or "Tulsky Oruzheiny Zavod (TOZ)".
- "TOZ" firearms were sold in North America under the brand names of "Baikal" and "Vostok".
- "Made in Russia" or "Made in USSR" may be marked on the firearm.

Model

- introduced in 2000.
- the model designation is marked on the left side of the barrel lug or on the ventilated rib as, "MU21-12R". The letter, "U", is a Russian Cyrillic character for the English letter "C". The letter, "P", is a Russian Cyrillic character for the English letter "R".
- features include: blued receiver/frame and ventilated barrel; the safety lever is located on the right side of the receiver/frame above trigger; a fixed bead for a front sight; the loading gate is located on the underside of the receiver/frame; a walnut or beech stock and forearm which may have a ventilated rubber butt plate
- the firearm may also have various levels of engraving, precious metal or pearl inlays, and a stock and forearm with carvings.
- overall length for a 750mm (29 1/2") barrel is 1285mm (50 5/8"), average weight is 3.7kg (8.15lbs).

Manufacturer

- "TOZ" or "TO3" or the "T" logo was used on firearms manufactured by the "Russian State Arsenal, Tula" and "Tulsky Oruzheiny Zavod".
- "T" logo/symbol consists of the capital letter "T" within a circle, both of which are subsequently enclosed within a triangle.

Action

- gas operated.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number	- the serial number is marked on the underside of the receiver/frame.
Calibre	- the gauge designation was observed, marked on the top rib of the barrel as, "12x70".
Shots	- tubular magazine is mounted under the barrel, inside the forearm.

Notes

Make

- "TO3" or "TOZ" and/or the "T" logo is marked on the firearm.
- "3" in "TO3" is a Russian Cyrillic character for the English letter "Z".
- "T" logo/symbol consists of the capital letter "T" within a circle, both of which are subsequently enclosed within a triangle.
- "TOZ" or "TO3" or the "T" logo was used on firearms manufactured by the Russian State Arsenal, Tula" or "Tulsky Oruzheiny Zavod (TOZ)".
- "TOZ" firearms were sold in North America under the brand names of "Baikal" and "Vostok".
- "Made in Russia" or "Made in USSR" may be marked on the firearm.

Model

- the model is marked on the firearm, on the sides of the barrel below the rear sight, in Cyrillic; the Cyrillic representation of "NK" resembles "HK", and is marked on the right side of the barrel, while "8.2" is marked on the left side of the barrel. "NK" stands for "Narezny Kochetova" ("Rifled Kochetov"), after the designer, Dimitry Mikhailovich Kochetov, a designer at the Tula Weapons Factory.
- this rifle was made as a domestic hunting rifle between 1931 and 1941, based on the Mosin-Nagant 1891/30, but chambered for a proprietary 8.2x66R cartridge to prevent the use of military ammunition.
- features include: blued finish; open adjustable sights with hooded front and ramp-adjustable rear; "sporter"-style checkered pistol-grip stock; internal five-round box magazine; turned-down bolt handle with stock recess for the knob; and Mosin-Nagant-style striker on the bolt.
- after World War Two, modified versions of this rifle in the same chambering were put into production at Izhmash as the "KO-8.2" and "KO-8.2M".

Manufacturer

- "TOZ" or "TO3" or the "T" logo was used on firearms manufactured by the "Russian State Arsenal, Tula" and "Tulsky Oruzheiny Zavod".
- "T" logo/symbol consists of the capital letter "T" within a circle, both of which are subsequently enclosed within a triangle.

Serial Number

- numbered on the receiver/frame.

Calibre

- "8.2" is marked on the left side of the barrel.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Shots - fixed box magazine.

Notes

Make

- "TO3" or "TOZ" and/or the "T" logo is marked on the firearm.
- "3" in "TO3" is a Russian Cyrillic character for the English letter "Z".
- "T" logo/symbol consists of the capital letter "T" within a circle, both of which are subsequently enclosed within a triangle.
- "TOZ" or "TO3" or the "T" logo was used on firearms manufactured by the Russian State Arsenal, Tula" or "Tulsky Oruzheiny Zavod (TOZ)".
- "TOZ" firearms were sold in North America under the brand names of "Baikal" and "Vostok".
- "Made in Russia" or "Made in USSR" may be marked on the firearm.

Model

- this is a generic entry designed to encompass those single shot sporting rifles made by TOZ before the use of model numbers was introduced.
- bolt action, usually has military style tangent rear sight, tapered barrel configuration with noticeable 'belled' muzzle.
- may have 'capped' boltway.
- may have safety on right side of receiver behind bolt-handle recess.
- usually has schnabel-type forestock.
- blued finish.
- various barrel lengths and physical variances within this general model description can be expected.
- known example marked on top of receiver with the TOZ trademark (capital letter T within a stylized circle both of which are enclosed within a stylized triangle), the date and "Made in USSR".

Action

- turn bolt design.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Serial Number - known example had a four digit number without prefix or suffix located on left side of receiver ring.

Notes

Make

- "TO3" or "TOZ" and/or the "T" logo is marked on the firearm.
- "3" in "TO3" is a Russian Cyrillic character for the English letter "Z".
- "T" logo/symbol consists of the capital letter "T" within a circle, both of which are subsequently enclosed within a triangle.
- "TOZ" or "TO3" or the "T" logo was used on firearms manufactured by the Russian State Arsenal, Tula" or "Tulsky Oruzheiny Zavod (TOZ)".
- "TOZ" firearms were sold in North America under the brand names of "Baikal" and "Vostok".
- "Made in Russia" or "Made in USSR" may be marked on the firearm.

Model

- introduced in 2000.
- model designation may be marked on the firearm.
- features include: tapered blued barrel; fixed sights; chrome plated smooth bore; fixed choke; single trigger mechanism; blued finish; wood forearm and pistol grip fitted with a under folding metal buttstock with an internal safety that prevents discharge when folded.
- overall length for a 295mm (11 5/8") barrel is 820mm (32 1/4") with the buttstock unfolded and 530mm (20 7/8") with the buttstock folded, average weight is 2.5kg (5.5lbs).
- this shotgun was originally produced as a short-barreled, folding-stock version of the MC-20-01 shotgun (specifically, the MC-20-04), but was renamed as the "TOZ-106" in 1993.

Manufacturer

- "TOZ" or "TO3" or the "T" logo was used on firearms manufactured by the "Russian State Arsenal, Tula" and "Tulsky Oruzheiny Zavod".
- "T" logo/symbol consists of the capital letter "T" within a circle, both of which are subsequently enclosed within a triangle.

Action

- turn-bolt design.

Serial Number

- serial number on one sample was observed marked on the right side of the receiver/frame.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre	- calibre designation may be marked on the firearm.
Shots	- detachable box magazine.
Canadian Law Comments	- this firearm is not "a firearm designed or adapted to be fired when reduced to a length of less than 660MM by folding, telescoping or otherwise". - when fully folded the shotgun will not fire because of the presence a trigger blocking system.

Notes

Make

- "TO3" or "TOZ" and/or the "T" logo is marked on the firearm.
- "3" in "TO3" is a Russian Cyrillic character for the English letter "Z".
- "T" logo/symbol consists of the capital letter "T" within a circle, both of which are subsequently enclosed within a triangle.
- "TOZ" or "TO3" or the "T" logo was used on firearms manufactured by the Russian State Arsenal, Tula" or "Tulsky Oruzheiny Zavod (TOZ)".
- "TOZ" firearms were sold in North America under the brand names of "Baikal" and "Vostok".
- "Made in Russia" or "Made in USSR" may be marked on the firearm.

Model

- the model may or may not be marked on the firearm, depending on the period of manufacture.
- this is a single-shot target rifle made for 50-metre target competition between 1954 and 1972, in various sight and stock configurations; this rifle is based on the TOZ-8M.
- features include: blued finish; hooded front sight with interchangeable inserts; wooden pistol-grip stock with lengthened forearm and sling swivels; micrometer-adjustable peep sights; and turned-down bolt handle.
- overall length and weight depends on the stock, but varies between 1117-1140mm, and 3-4 kgs.

Manufacturer

- "TOZ" or "TO3" or the "T" logo was used on firearms manufactured by the "Russian State Arsenal, Tula" and "Tulsky Oruzheiny Zavod".
- "T" logo/symbol consists of the capital letter "T" within a circle, both of which are subsequently enclosed within a triangle.

Action

- turn bolt design.

Serial Number

- the serial number is marked on the left side of the receiver/frame and is usually repeated on other components.

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Calibre

- the calibre designation is usually marked on the barrel.
- rifling characteristics: 6-grooves, right hand twist.

121777 - 4	308 WIN	6	570	Non-Restricted CC 2 "firearm"	Manufacturer Specifications and Commercial Customization	

Notes

Make

- "TO3" or "TOZ" and/or the "T" logo is marked on the firearm.
- "3" in "TO3" is a Russian Cyrillic character for the English letter "Z".
- "T" logo/symbol consists of the capital letter "T" within a circle, both of which are subsequently enclosed within a triangle.
- "TOZ" or "TO3" or the "T" logo was used on firearms manufactured by the Russian State Arsenal, Tula" or "Tulsky Oruzheiny Zavod (TOZ)".
- "TOZ" firearms were sold in North America under the brand names of "Baikal" and "Vostok".
- "Made in Russia" or "Made in USSR" may be marked on the firearm.

Model

- "TO3-122" is marked on the left side of the receiver/frame.
- the Russian Cyrillic character "3" in the model name translates to the letter "Z" in English giving the model name as "TOZ-122".
- this is a bolt operated repeating rifle utilizing a detachable box magazine.
- features include: round tapered barrel; turn bolt action; one piece hardwood, full pistol grip stock with ebony-type fore-end tip and sling swivel studs; iron sights; blue metal finish.
- overall length for a 570mm (22 1/2") barrel is 1100mm (43 1/4"), average weight is 3.5kg (7.7lbs).

Firearms Reference Table, National Specialized Services, Royal Canadian Mounted Police. All rights reserved, RCMP, 1998-2026.

Manufacturer	- "TOZ" or "TO3" or the "T" logo was used on firearms manufactured by the "Russian State Arsenal, Tula" and "Tulsky Oruzheiny Zavod". - "T" logo/symbol consists of the capital letter "T" within a circle, both of which are subsequently enclosed within a triangle.
Action	- turn bolt operated.
Serial Number	- serial number is marked on the receiver/frame. - known examples have had six digit numbers without prefix or suffix.
Calibre	- known example had the calibre designation marked on the right side of the barrel as, "7.62 x 51(308 Win)".
Shots	- detachable box magazine.
